IOWA STATE UNIVERSITY

Iowa State University

Courses and Programs Catalog 2009 - 2011

The Iowa State University Catalog

The Iowa State University Catalog is a two-year publication which lists all academic policies, and procedures. In addition, it includes information for fees, curriculum requirements and first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at www.iastate.edu/~catalog/exp/.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Table of Contents

Academic Calendar 2009 - 2011

Fall Semester 2009

Classwork begins
Monday, August 24

University holiday, offices closed
Monday, September 7

Thanksgiving break, classes recessed,
Monday through Friday, November 23-27

University holidays, offices closed
Thursday and Friday, November 26-27

Classes resume
Monday, November 30

Commencement
Friday and Saturday, December 18-19

University holidays, offices closed
Thursday and Friday, December 24-25

Spring Semester 2010

University holiday, offices closed
Friday, January 1

Classwork begins
Monday, January 11

University holiday, offices closed
Monday, January 18

Spring break, classes recessed
Monday through Friday, March 15-19

Classes resume
Monday, March 22

Commencement
Friday and Saturday, May 7-8

Summer Session 2010

Classwork begins Session I
Monday, May 17

University holiday, offices closed
Monday, May 31

Classwork begins Session II
Monday, June 14

University holiday, offices closed
Monday, July 5

Commencement
Saturday, August 7

Fall Semester 2010

Classwork begins
Monday, August 23

University holiday, offices closed
Monday, September 6

Thanksgiving break, classes recessed
Monday through Friday, November 22-26

University holidays, offices closed
Thursday and Friday, November 25-26

Classes resume
Monday,November 29

Commencement
Friday and Saturday, December 17-18

University holidays, offices closed
Thursday and Friday, December 23-24

Spring Semester 2011

University holiday, offices closed
Friday, December 31

Classwork begins
Monday, January 10

University holiday, offices closed
Monday, January 17

Spring break, classes recessed
Monday through Friday, March 14-18

Classes resume
Monday, March 21

Commencement
Friday and Saturday, May 6-7

Summer Session 2011

Classwork begins Session I
Monday, May 16

University holiday, offices closed
Monday, May 30

Classwork begins Session II
Monday, June 13

University holiday, offices closed
Monday, July 4

Commencement
Saturday, August 6

Approved by the Board of Regents,
State of Iowa

The University

Iowa State University is one of the most respected land-grant universities in the nation. Established by the Iowa General Assembly in 1858, the Iowa Agricultural College and Model Farm was designated the first land-grant college when Iowa became the first state to accept the terms of the federal Morrill Act in 1864.

The act allowed Iowa to sell federal land to finance a new college open to all, regardless of wealth, race or gender; offering a practical education in engineering, agriculture and military science as well as classical studies; and sharing research knowledge with all Iowans. Iowa State University officially opened in 1869 and was the first coeducational land-grant school.

In 1903, the nation's first cooperative agricultural extension program was launched when Iowa State professors worked with farmers and county governments to establish demonstration farms and institutes.

It is our institutional commitment to the founding land-grant principles that has produced alumni who are leaders in their professions, research that has forever changed our society and knowledge-based information that has assisted the citizens of our state, nation and world community.

Iowa State's Points of Pride

*The world's first electronic digital computer was developed at Iowa State by math and physics professor John V. Atanasoff and graduate student Clifford Berry, in the late 1930s. Their invention, the ABC computer, has been called the most important technological innovation of the 20th century.

*The university is a leader in virtual reality research and its most advanced virtual reality theater, the C6, is the nation's first six-sided theater that totally immerses the user in images and sound.

*Iowa State's faculty members are recognized for their scholarly efforts. They serve as editors and on editorial and advisory boards of national and international academic professional journals.

*Iowa State is one of the top three U.S. universities in the development of patentable biotechnology.

*Iowa State's faculty includes two professors who have been recognized among the top 100 young technology innovators in the world.

*Iowa State's faculty includes members of the National Academy of Engineering and the National Academy of Sciences.

*Iowa State is a member of the prestigious Association of American Universities that has a membership of only 62 major research universities in the United States and Canada.

*Iowa State's learning communities program for undergraduate students is rated among the nation's best.

*Every state and more than 100 countries are represented in Iowa State's student body.

*Iowa State students have a reputation for winning national and international awards. They win contests for apparel design, NASA food technology, news writing for print and broadcast, computer software, vocal music, and music composition.

*Iowa State is nationally ranked for its beautiful campus and its central campus has been honored by the Association of Landscape Architects as one of only three university Centennial Medallion sites in the nation.

*Iowa State's 600 works of art on campus make its public art collection the largest of any university in the nation.

*Iowa State's Reiman Gardens has been recognized for having the nation's most outstanding public rose garden.

*Iowa State holds two world records certified by the Guinness Book of World Records: one for making the world's largest Rice Krispies Treat to celebrate that Mildred Day, an Iowa State alumnus, helped create the recipe for the popular snack food; and one for growing the tallest amaranth plant in the world.

*Iowa State's wrestling program boasts 5 Olympic gold medalists – the latest being graduate Cael Sanderson at the 2004 Olympic Games in Athens, Greece. Sanderson's perfect collegiate wrestling record of 159 wins has been recognized by *Sports Illustrated* as the second most impressive feat in college sports history.

**Washington Monthly* magazine ranks Iowa State among the top 20 public universities that do the best at serving the United States through educating economically challenged students, undertaking vital research that drives the U.S. economy and promoting the ethic of service to country.

*Iowa State's undergraduate programs for future entrepreneurs are ranked among the top 25 in the country.

*Iowa State's interior design, architecture and landscape architecture programs are ranked among the best in the nation.

*With more than 100 majors, 1700 faculty and 600 clubs and organizations, Iowa State has built a reputation for almost unlimited academic and social opportunities in a personal and welcoming environment.

2005-2010 Strategic Plan

Mission

Create, share, and apply knowledge to make Iowa and the world a better place.

• Create knowledge through world-class scholarship in teaching, research, and creative endeavors.

• Share knowledge through outstanding undergraduate, graduate, professional, and outreach programs.

• Apply knowledge to improve the quality of life for current and future generations.

In carrying out its mission, Iowa State will increase and support diversity in the university community. Diversity enlivens the exchange of ideas, broadens scholarship, and prepares students for lifelong, productive participation in society. See *Nondiscrimination and Affirmative Action Policy* in this section.

Culture

We accomplish our mission:

• through innovation, collaboration, and continuous improvement,
• with honesty, integrity, and professional ethics, and
• with sensitivity and responsiveness to the needs of our state, nation, and the world.

Core Values

We value:

• land-grant ideals,
• a diversity of ideas, peoples, and cultures,
• intellectual freedom,
• leadership, and
• excellence in all we do.

Vision

Iowa State University will be the best at advancing the land-grant ideals and putting science and technology to work.

Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. Faculty and staff will share a passion for creating, sharing, and applying knowledge to improve lives worldwide. Collaborations among partners both inside and outside the university community will flourish. The spirit of Iowa State University will be evident in the integration of the sciences and humanities and in the energy and creativity of its people.

Priorities for 2005-2010

Iowa State is a leading international, comprehensive university with a wide range of dynamic and diverse programs and initiatives. The university commits to continuously evaluating, improving, and evolving these programs as well as exploring and innovating new areas of inquiry and application.

Five priority areas and accompanying goals for 2005-2010 have been identified to reinforce existing strengths and pursue our vision.

Priority: Education

Strengthen undergraduate, graduate, and professional education to enhance student success at Iowa State University and beyond.

Goals

• Improve the rigor, challenge, and international reputation of academic programs.

• Strengthen students' critical thinking, creative abilities, and communication skills.

Enhance students' understanding of global, cultural, ethical, and diversity issues.

• Create an environment that welcomes students to explore a variety of disciplines and career paths.

• Increase interdisciplinary and experiential learning opportunities, such as learning communities, service learning, internships, research experiences, and international exchanges.

• Enhance programs for high-ability students.

• Partner with K-12 schools and community colleges to facilitate transfer to and student success at Iowa State University.

• Enhance services to enable students to find rewarding careers.

• Develop, recognize, and reward excellent teaching.

Priority: Programs

Increase the number of graduate, professional, and research programs that are among the very best -- especially in areas that build on university strengths and address local and global critical needs.

Goals

•Recruit and retain outstanding faculty who are or will be leaders in their fields.

• Increase the number and elevate the overall quality of graduate and professional students.

• Leverage strengths in science and technology to enhance research and scholarly excellence with emphasis on interdisciplinary initiatives involving biological, materials, and information sciences.

• Enhance areas of excellence in the arts, humanities, and social sciences that build on and complement the university's unique strengths.

• Improve facilities and support services for research.

• Enhance the visibility of outstanding faculty members and staff, research accomplishments, and graduate and research programs.

Priority: Economic Impact

Translate discoveries into viable technologies, products, and services to strengthen the economies of Iowa and the world.

Goals

• Expand the use of intellectual property developed at Iowa State University.

• Strengthen educational and outreach programs aimed at Iowa's economic, workforce, and technology development.

Foster an environment that encourages faculty, staff, and students to engage in transfer of technology and entrepreneurial activities.

Priority: Iowa Life

Elevate the state's appeal as a place to live, learn, work, and play.

Goals

• Strengthen our partnerships and communications with Iowans to better identify, address, and solve problems.

• Enhance the vitality of Iowa's communities and well-being of its people.

• Promote the wise use of Iowa's resources and build a sustainable future.

• Expand learning opportunities for Iowans of all ages.

• Partner with Iowans to strengthen their communities' economies and entrepreneurial capacities.

Priority: University Life

Ensure that the university is a great place to learn and work.

Goals

• Recruit and retain faculty, staff, and students who are dedicated to individual and organizational excellence and achievement.

• Expand the diversity of people, ideas, and cultures, and nurture an environment in which diversity can thrive.

• Achieve a sustainable balance between responsibilities and resources that will allow the university to efficiently and effectively realize its vision.

• Foster an environment in which all members of the university community can contribute their fullest while pursuing satisfying personal lives.

• Provide a rich array of extracurricular opportunities to learn, lead, and enjoy life.

• Promote a university that conserves resources and enhances environmental quality.

• Maintain the attractiveness of campus and improve the quality of its facilities.

• Advance the excellence of the university through enhanced connections between ISU and its family of alumni and friends.

• Ensure that intercollegiate athletics programs are models of academic success, integrity, and competitiveness.

Nondiscrimination and Affirmative Action Statement

(July 28, 2008 Reaffirmation)

Iowa State University is committed to developing and implementing a program of nondiscrimination and affirmative action, a responsibility the university accepts willingly because it is the right and just thing to do. Because an educational institution exposes the youth of Iowa and of the nation to a multitude of ideas that strongly influence their future development, it is an area of our society where removing barriers is critical. We insist on promoting the concept of inclusion and participation.

This commitment is part of a larger commitment to developing a safe and supportive climate for all members of the ISU community in classrooms and laboratories, in offices, in the residence hall system, and throughout the campus. Iowa State University recognizes that a non-discriminatory environment complements a commitment to academic inquiry and intellectual and personal growth.

The goal is to provide a non-discriminatory work environment, a non-discriminatory living and learning environment and a non-discriminatory environment for visitors to the campus. Iowa State University herein recommits itself to comply with all federal and state laws, regulations, and orders, including the policies of the Iowa Board of Regents, which pertain to nondiscrimination and affirmative action.

All administrators and personnel providing input into administrative decisions are directed to ensure that all decisions relative to employment, conditions of employment and access to programs and services will be made without regard to race, color, age, religion, national origin, sexual orientation, gender identity, sex, marital status, disability, or status as a U.S. veteran. Exceptions to this directive may be made in matters involving bona fide occupational qualifications, business necessity, actions designed to eliminate workforce underutilization, and/or where this policy conflicts with federal and state laws, rules, regulations, or orders.

Iowa State does not discriminate on the basis of race, color, age, ethnicity, religion, national origin, pregnancy, sexual orientation, gender identity, sex, marital status, disability, or status as a U.S. veteran. Inquiries can be directed to the Director of Equal Opportunity and Diversity, 3210 Beardshear Hall, (515) 294-7612. Iowa State University will base employment decisions so as to further the principle of equal employment opportunity and diversity.

No otherwise qualified person will be denied access to, or participation in, any program, activity, service, or the use of facilities on the basis of factors previously enumerated. Reasonable accommodation will be made to facilitate the participation of persons with disabilities in all such activities consistent with applicable federal and state laws, orders and policies.

Further, all supervisory personnel will be responsible for maintaining an environment that is free of discrimination and harassment. Acts by anyone that adversely affect another person's employment, conditions of employment, academic standing, receipt of services, and/or participation in, or enjoyment of, any other activity, will be regarded as a violation of university policy and thereby subject to appropriate disciplinary action. Retaliation against persons filing complaints, for bringing the violation of this policy forward for review, or for assisting in a review, pursuant to a filed complaint or grievance, is prohibited.

Iowa State University's commitment to nondiscrimination and affirmative action is of the highest priority and is to be adhered to as such. It applies to all university-sponsored programs and activities as well as those that are conducted in cooperation with the university.

Iowa State University has designated Carla R. Espinoza as the affirmative action officer and assigns overall program responsibility to her as the Director of Equal Opportunity and Diversity. Questions regarding complaints and/or compliance with affirmative action or equal opportunity should be directed to her at 3210 Beardshear Hall, Iowa State University, Ames, IA 50011-2024, (515) 294-7612

Iowa State University Accreditation and Administration

Accreditation

Iowa State University is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

Higher Learning Commission of the North Central Association of Colleges and Schools

30 N. LaSalle Street, Suite 2400

Chicago, IL 60602-2504

(800) 621-7440; (312) 263-0456;

Board of Regents, State of Iowa

http://www2.state.ia.us/regents/

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale.

Officers of Administration

Gregory L. Geoffroy, Ph.D.
President of the University

Elizabeth Hoffman, Ph.D.
Executive Vice President and Provost

Warren R. Madden, M.B.A.
Vice President for Business and Finance

Thomas L. Hill, Ph.D.
Vice President for Student Affairs

Wendy K. Wintersteen, Ph.D.
Dean of the College of Agriculture and Life Sciences

Labh Hira, Ph. D.
Dean of the College of Business

Mark C. Engelbrecht, M. Arch.
Dean of the College of Design

James E. Bernard, Ph.D.
Interim Dean of the College of Engineering

Pamela J. White, Ph.D.
Interim Dean of the College of Human Sciences

Michael B. Whiteford, Ph.D.
Dean of the College of Liberal Arts and Sciences

John U. Thomson, DVM
Dean of the College of Veterinary Medicine

Jack M. Payne, Ph.D.
Vice President for Extension and Outreach

Sharon Quisenberry, Ph.D.
Vice President for Research and Economic Development

David K. Holger, Ph.D.
Dean of the Graduate College

Olivia M. Madison, M.A.,
Dean of the Library

Dione D. Somerville, Ed.D.
Dean of Students

Admissions and Registrar

Office of Admissions

Director: Marc Harding, M.Ed.
Senior Associate Directors: Phil Caffrey, M.S.; Stephanie Salasek, M.S.

Office of the Registrar

Assistant Vice President for Enrollment and Registrar: Kathleen M. Jones, M.S.
Senior Associate Registrar and Director for Transfer Relations: Laura Doering, M.S.
Associate Registrar: Larry Dau, B.S.

Admission

When to Apply

Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu.

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See Index, *College of Veterinary Medicine, Application and Admission.*

How to Apply

Applications for admission are available on the Web at www.admissions.iastate.edu.

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Visits to the Campus

Visitors to Iowa State University are always welcome!

The Soults Family Visitor Center, located in the Memorial Union, is open Monday through Friday from 8 a.m. until 5 p.m., and most Saturday mornings from 9 a.m. until 1 p.m. when classes are in session. Counselors are available to speak with prospective students and their families about admission, financial aid, housing, student life, academic programs and other opportunities. Visitors are offered student-guided walking tours of campus and the residence halls along with an enrollment presentation and an academic information session.

Prospective students and parents are encouraged to visit the campus and the Soults Family Visitor Center. Arrangements for a campus visit or registration for "Experience Iowa State" or "Transfer Visit Days" open house programs can be made at www.admissions.iastate.edu or by contacting the Soults Family Visitor Center at 800-262-3810 or locally at 515-294-5836.

Admission requirements are stated in the Iowa Administrative Code. Admission policies are established by the Faculty Senate. Any Admission decisions are made by the admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Undergraduate Admission into Degree Programs Directly from High School

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). In addition applicants must have their secondary school provide an official transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved Iowa high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), the ACT or SAT. Contact the Office of Admissions for minimum score requirements for each examination.

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based on the following equation:

(2 x ACT composite score)

+ (1 x percentile class rank)

+ (20 x high school GPA)

+ (5 x number of years of high school core courses completed)

RAI Score

Note: For purposes of calculating the RAI, SAT scores will be converted to ACT composite equivalents; high school rank is expressed as a percentile with 99% as the top value; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all four of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

Those applicants who are not offered unconditional admission will either be given the opportunity to enroll for a trial period during the preceding summer session or be denied admission.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation Required for Admission

Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts
Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics
Three years, including one year each of algebra, geometry, and advanced algebra

Science
Three years, including one year each of courses from two of the following fields: biology, chemistry, and physics

Social Studies
Two years

Additional Entrance Requirements for the College of Liberal Arts and Sciences and the College of Engineering

In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission into Degree Programs by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved Iowa high school and whose primary language is not English must meet the university's English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), the ACT or SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point average required by Iowa State for specific programs, will be admitted. A 2.00 grade point average (on a 4.00 grading scale) is the minimum transfer grade point average requirement. Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

   Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of *Transfer Credit Practices of Designated Educational Institutions*, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

A. Students from regionally accredited colleges and universities.

   Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

   —credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

   —credit in courses or programs in which the institution granting the credit is not directly involved.

   No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.

   Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor's degree at Iowa State University.

   Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

C. Students from colleges and universities not regionally accredited.

   When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study at Iowa State, or by examination. The amount of transfer credit and the terms of the validation process will be specified at the time of admission.

   In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

   In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of *Transfer Credit Practices of Designated Educational Institutions* will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.

   Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies

A. Students with credit obtained during military service.

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *A Guide to the Evaluation of Educational Experiences in the Armed Services*.

B. Students with credit obtained through non-college sponsored instruction.

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *The National Guide to Educational Credit for Training Programs.*

C. Students with credit obtained through correspondence courses.

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).

Iowa State University will award credit for each of the following 14 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/cbe_clep.php.

E. Students with "test-out" credit.

Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State's requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State's College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/equiv) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

Nondegree Undergraduate

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Credit obtained under the nondegree undergraduate classification may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree students in the College of Liberal Arts and Sciences, and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as degree-seeking students. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, *Academic Renewal Policy*; and *Reentry.*

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to

complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See *Index*, *Reentry* for more information.

Residency

Classification of Residents and Nonresidents for Admission and Tuition Purposes

These criteria are contained in the *Policy Manual, Board of Regents, State of Iowa and or the Iowa Administrative Code: Board of Regents, State of Iowa.*

Graduate Assistants

Students with graduate assistantships of 1/4-time or more are assessed Iowa resident tuition and fees. Nonresident students with graduate assistantships of 1/4-time or more retain their nonresidency classification, but are assessed resident tuition and fees as long as the graduate assistantship is continued.

The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for resident tuition and fees during the period of the assistantship appointment. Iowa residency is not granted, but a waiver of nonresident tuition and fees is in effect. When the graduate assistantship ends, the tuition and fee waiver for the spouse is terminated. (Board of Regents, State of Iowa, Minutes March 15, 1995, p. 801).

The graduate student must request the resident tuition assessment by **midterm** of the term in question. The benefit will not be granted retroactively.

General

A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver's license, and not meet the residency requirements as established by the Board of Regents, State of Iowa, for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:

1. A statement from the student describing employment and expected source of support
2. A statement from the student's employer
3. A statement from the student's parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
4. Supporting statements from persons who might be familiar with the family situation
5. Iowa state income tax return.

D. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

Guidelines

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

A. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

B. In deciding why a person is in the state of Iowa, the person's domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

C. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

1. Has not acquired domicile in another state;
2. Has maintained a continuous voting record in Iowa; and
3. Has filed regular Iowa resident income tax returns during absence from the state.

D. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

E. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

F. A person who is moved into the state as the result of military or civil orders from

the government for other than educational purposes, or the dependent of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the student is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the student is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

G. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

1. Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
2. Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

H. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

I. At the Regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Ho Chunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299)

Facts

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.
4. Former domicile in the state and maintenance of significant connections therein while absent.
5. Acceptance of an offer of permanent employment in Iowa.
6. Other facts indicating the student's domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver's license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.

Registration/Enrollment

In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls. See Index, *Registration*.

Enrollment Status

Enrollment status is defined for certification purposes as either full-time or half-time.

Full-time status, fall or spring semester

Undergraduates: 12 credits
Graduates: 9 credits

Half-time status, fall or spring semester

Undergraduates: 6 credits
Graduates: 5 credits

Summer status
Summer status depends on the number of weeks a student is enrolled. Always contact the Office of the Registrar to verify a student's status for a summer session.

With the exception of enrollment certification for veterans' benefits, credit hours are rounded up to the next whole number. For example, credit load of 11.5 credits is rounded up to 12 credits. Contact the Office of the Registrar for more information.

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of CBE Programs

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State's policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe.

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Correspondence concerning the Advanced Placement Program should be addressed to the College Board Advanced Placement Examinations, P.O. Box 977-IS, Princeton, New Jersey 08541, or visit their web site at www.collegeboard.com/student/testing/ap/about.html.

International Baccalaureate Examinations

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate North America Office. Results listed on high school transcripts are not considered official.

Correspondence concerning the IB Program should be addressed to IB North America, 475 Riverside Drive, Suite 240, New York, NY 10115, ibna@ibo.org, or visit their website at www.ibo.org.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally

administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students' grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements. For a listing of common departmental test-out exams, refer to www.public.iastate.edu/~stdtcouns/TestOuts2.html. Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program

CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section, and does not accept College Mathematics or English Composition. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students' degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acct 284; engineering majors should consult with their academic adviser before registering for this examination); Biology (Biol 101, not for biology or engineering majors); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); Principles of Microeconomics (Econ 101); and Calculus (Math 165).

In addition, Iowa State University will award up to 16 semester credit hours for CLEP French Language and up to 16 semester credit hours for CLEP Spanish Language. Please note that native or near native speakers of French or Spanish may not test out of the beginning or intermediate levels in these languages.

A nonrefundable fee is charged for each CLEP test requested, and all requests should be made one week prior to the test date. CLEP tests are administered by the Student Counseling Service Testing Office Monday through Friday. For information on whether to take any of the CLEP tests, contact your academic adviser. To obtain information on any of the CLEP tests, contact the SCS Testing Office, Rm. 2030 Student Services Building, Iowa State University, Ames, Iowa 50011, or send e-mail to scsclep@iastate.edu. To print a copy of the institutional CLEP registration form, go to www.public.iastate.edu/~stdtcouns/ and select Testing Services.

Policies and Procedures Governing CBE Tests

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).
2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.
3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.
4. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.
5. There is a nonrefundable fee for all departmental and CLEP tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.
6. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.
7. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.
8. Listed below are policies for transferring CBE from another college or university to Iowa State University:
   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State's AP and CLEP policies.
   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State's IB policies.
   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.
9. Credit earned from CBE will be posted to the student's academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.
10. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.
11. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Office of New Student Programs

Orientation

Orientation assists new undergraduates with the transition to Iowa State University. At orientation, students plan their academic programs, register for classes, learn about university policies and procedures, and prepare for personal and social adjustments to the university. The university Orientation Committee, composed of Iowa State University faculty, and staff, is responsible for the orientation programs; the undergraduate colleges of the university, in cooperation with the Office of New Student Programs, have responsibility for the implementation of orientation programs for new students and their families.

The Orientation Committee conducts an extensive orientation program during the summer, with additional programs held prior to each term. Special orientation sessions are conducted for transfer students during the spring. New students receive an invitation to attend an orientation program before their first semester at the university

Summer Orientation

Summer orientation for freshmen is a two-day program scheduled in June. As early as January, new freshman students and their family members are asked to select a convenient time from among a number of orientation sessions that are scheduled during June. In addition to preparing their class schedules for fall semester, new students with their family members participate in informational activities about policies and procedures at the university, and meet formally and informally with

faculty, staff, and other new students and their families. These sessions, held in a comfortable, informative atmosphere, lessen existing anxieties, assist in the development of a clearer understanding of the university environment, and make it possible for new students—with support from their family members—to begin to make the academic and social decisions that are faced by all students at the university.

Housing and meals are available at campus residence halls for a nominal fee during June freshman orientation.

Destination Iowa State

The Destination Iowa State program is held for all new freshman and transfer students on the Thursday, Friday, and Saturday before classes begin fall semester; and on the Saturday before classes begin spring semester. The program helps new students develop academic and social strategies to ensure a successful transition to Iowa State University.

WelcomeFest

WelcomeFest activities are scheduled during the first week of fall semester to welcome students to campus. All students, including transfer students, are invited to participate in WelcomeFest.

Information Disclosure

Iowa State University is required by law to make available to enrolled students, prospective students, and their parents certain information about the university. The information disclosure policy is available at www.iastate.edu/~disclosure. Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

Student Records

Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

Public Information

Certain information concerning students is considered to be open to the public upon inquiry. This public information is of two types: directory information and other information not included in the ISU Directory. ISU directory information includes local address, telephone number, campus e-mail address, home town, college, curriculum, year in school, and enrollment status. Other public information includes mailing address, date and place of birth, dates of attendance at Iowa State, expected date of graduation, names of advisers, awards and academic honors, Iowa State degree(s) and date(s) awarded, previous educational institutions attended, degrees received, dates of attendance, full- or part-time status, participation in officially recognized activities and sports, and weight and height of members of athletic teams.

Public information will be released by the registrar to anyone upon inquiry, unless students have requested that their information not be released. A request to have public information withheld should be made at the Office of the Registrar, 214 Enrollment Services Center. Once the request is processed, the registrar will notify the appropriate university offices.

For the purposes of FERPA, Iowa State University defines directory information to include both ISU directory information and public information as defined above.

It is the policy of the university to respect the privacy of students; therefore, only lists and labels containing names of students with directory information will be made available to members of the public. This directory information will be provided on a time-available basis for the cost of producing the information. Directories are also available in the bookstores for those persons needing directory information. Directory information is available on the World Wide Web using the online phonebook; and from printed directories, which may be purchased at the bookstores.

Confidential Information

With the exception of the information noted above, all student records are considered to be confidential and are open only to school officials .A school official is a person employed by the university in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Iowa State University's notification of rights under FERPA can be found at www. public. iastate. edu/~registrar/info/ferpanotice.html.

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated school official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:
   a. Academic records: registrar
   b. Admissions records: director of admissions
   c. Financial aid records: director of student financial aid
   d. Business records: university controller
   e. Traffic and security records: director, ISU Department of Public Safety
   f. Medical records: director, Thielen Student Health Center
   g. Counseling records and test scores: director, Student Counseling Service
   h. Actions of Academic Standards Committees: college deans
   i. Disciplinary records: dean of students
   j. Residence hall records: director of residence
   k. Placement records: college placement officers.
   l. Evaluations for admission to ISU graduate or professional programs: deans or department chairs
   m. Special academic programs: faculty member in charge of the program and the dean of the college.
2. The designated official may release records to other school officials who have a legitimate need for the information. A list of those persons who normally have access to each type of student record is available in 214 Enrollment Services Center.
3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Enrollment Services Center.
4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived his or her right to review, nor does it apply to medical and counseling records.
5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.
6. A file containing copies of records pertinent to advising is maintained on each student for use by the student's adviser. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the adviser, but for convenience it may be stored elsewhere such as in the dean's office or department office. When the student changes majors, or changes advisers within the same major, the file is transferred to the new adviser. Under the university's student records policy, the student is considered to have the right of access to this file.
7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.
8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.

9. Confidential information may be released by students to their parents or other trusted third parties through the AccessPlus third party system. Confidential information may also be released by obtaining the student's written consent or by having the parent establish the student's dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent's most recent federal income tax return.
10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.

Posting Grades and Test Scores

Instructors who wish to inform students of their performance may post grades and test scores on a secure course web site as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location (World Wide Web or hard copy posting) unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

Release of Grades

Students who choose to release their grades to parents or other trusted third parties may do so using the AccessPlus third party system. Reports of a student's grades are not routinely sent to the student's parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

When Records May Be Withheld

The appropriate university official may request that a student's record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld.

The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

Review and Challenge of Records

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

ISUCard and Identification Number

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a university password, which is required for electronic access to personal student information.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

Social Security Number

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

Policy on Student Names

Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student's complete and legal name. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted.

Tuition, Fees and Expenses

For the most current and complete information see www.iastate.edu/~registrar/fees

All tuition, fees, and expenses, and policies listed in this publication are effective summer session 2009 and are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa. Tuition and fees are based on credit load at 5:00 p.m. on the 10th day of class, which is the last day for adjustments downward in tuition and fee assessment.

Tuition

Enrollment is not complete until fees are paid. Tuition is charged based upon the number of credits in which a student is enrolled. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations are found in this catalog under Admissions and Registrar.

Fees

Following are the descriptions of several commonly assessed fees for Iowa State University students. The list is not inclusive. All fees are subject to change without notice.

Activity, Services, Building and Recreation: The activity, services & building fee is a mandatory fee that supports a variety of activities and services for all students. It is not based on whether or not a student uses an individual activity or service. This fee provides several benefits such as student admission rates to concerts and athletic events and, unlimited use of CyRide, the Ames bus system. In addition, the fee provides support for campus recreation facilities, the Memorial Union, and campus organizations and services as allocated by the Government of the Student Body. All students will be charged a maximum of $226.35 each fall and spring semester, and $113.75 per summer semester. Exemptions are granted for students exclusively registered for the following: distance education courses (sections beginning with X); courses for which no tuition is assessed; continuous registration status courses, and high school students enrolled under the Post-Secondary Enrollment Options Act. Students in exemption categories named above may elect to pay this fee and will be assessed based upon their enrollment status.

For students who withdraw or change to an exempt status as defined above, the tuition adjustment schedule will also be used for the activity fee.

Tuition Schedule Per Semester

In effect for Fall 2009. Subject to change without notice.

Full Time Rates	Resident	Nonresident
Undergraduate (12 or more credits)	$2,878	$8,488
Business Juniors and Seniors (Includes $250 differential tuition)	$3,128	$8,738
Engineering Juniors and Seniors	$3,815	$9,406
Graduate (9 or more credits)	$3,358	$8,908
Engineering Graduate:	$3,869	$9,414
Veterinary Medicine (12+ credits)	$7,841	$18,630

For students enrolled for less than a full course load and for the most current and complete information, see the Fee Schedule Per Credit list at www.iastate.edu/~registrar/fees.

Additional information:

Audits and zero credit courses: assessed according to contact hours; maximum charge for zero credit courses is three credit hours

R credits: assessed for the minimum fee only if no other credits are taken.

Continuous registration fee for graduate students: $70.

Partial credits (.5): assessed on the next larger whole number of credits, e.g., 6.5 credits is assessed as 7 credits.

Saturday MBA/Des Moines MBA classes: MBA students are assessed the graduate rate plus $113 per credit supplemental tuition fee (supplemental tuition fee subject to change without notice).

Summer session: based on per credit as indicated in the fee schedule.

Tuition assessment for study abroad credits: up to a maximum of 12 credits, is above and beyond tuition for other courses taken during the same term.

Application: The application fee for domestic undergraduates and graduate students is $40, the fee for international undergraduate students is $50, while the fee for international graduate students is $90. All applicants for Veterinary Medicine pay an application fee of $60. This is a nonrefundable fee and must accompany the application for admission. This fee does not apply to special students or workshop applicants, and is subject to change without notice.

Applied Music (Private Instruction): The music fee is charged to students receiving private music instruction and is in addition to regular tuition. The fee offsets the costs of one-on-one instruction. One credit of instruction is $150; the fee for two credits is $190.

Camp: A special tuition rate is assessed to students participating in camp programs. The undergraduate assessment is $240 per credit and the graduate rate is $374 per credit. Summer camp programs entitled to the special rate are Anthropology and Geology. Students will be charged other fees in addition to tuition for enrolling in these programs. To obtain total fee information, students should contact the director of the individual program.

Career Services: The career services fees vary among college-based career services offices ranging from $0 - $25 per student.

Catalog: First semester students (transfer or incoming freshmen) receive complimentary copies of the catalog. Catalog information is also available on the Web at http://www.iastate.edu/~catalog/ or provided to high school guidance offices or community college student service areas. Individuals and organizations may purchase a catalog from the University Bookstore for a cost of $5 plus shipping.

Computer: All students will be charged a computer fee each semester.

Full-time graduate and undergraduate students enrolled in the College of Engineering (including Systems Engineering) are charged $223 per semester.

Full-time graduate and undergraduate students majoring in Computer Science are charged $223 per semester.

Full-time undergraduate students enrolled in the College of Business are charged $135 per semester, while full-time graduate students are charged $112 per semester.

All other full-time undergraduate students are charged the standard computer fee of $115 per semester. Full-time graduate students are charged an $92 per semester computer fee.

Students enrolled less than full-time are assessed prorated computer fees according to the number of credits for which they are enrolled.

High school students enrolled under the Postsecondary Enrollment Options Act; or students enrolled exclusively in courses for which no tuition is assessed are not assessed a computer fee.

For students who withdraw, computer fee adjustments will be made according to the tuition adjustment schedule. Adjustments for a reduction in credits below a full time load is 100 percent through the second week, with no refunds after the second week. Students who change their major will be charged the full computer fee for the major into which they transfer if the change occurs before the end of the second week. If the change occurs after the second week, then no change in the computer fee assessment will occur.

Delivery: Some distance education courses charge a delivery fee to offset additional expenses incurred in offering a course at a distance. Applicable delivery fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu. Delivery fees also appear on each student's schedule detail available on AccessPlus.

Developmental: A developmental course fee is charged in addition to the tuition charged for other courses on the student's schedule. For example: A student taking 12 credits plus a developmental course will pay full-time tuition for the 12 credits, *plus* the developmental course fee(s). These fees are intended to cover the direct costs of offering these developmental courses. Developmental course fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu/

Diploma Replacement: Individuals who have lost their diploma may request a replacement for $25.

Graduation: Undergraduate and graduate students are charged a $50 nonrefundable graduation fee the term they receive their degree.

Health Facility: All students are charged an $8 Health Facility Fee each semester except for students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; and high school students enrolled under the Postsecondary Enrollment Options Act. These exceptions do not apply to international students (except where noted) or graduate students on graduate assistantships. For students who withdraw or change to an exempt status as defined above, the refund schedule for tuition will be used for the health facility fee.

Students who carry the ISU sponsored student health insurance must also be assessed the health facility fee.

Health (Student Health): A $98 student health fee, which partially finances the services of the Thielen Student Health Center, is charged to all students each semester. This fee is not assessed to students enrolled for four or fewer credits or students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; weekend MBA courses; Lakeside Laboratory courses; and high school students enrolled under the Postsecondary Enrollment Options Act. (These exemptions do not apply to international students or to graduate students on graduate assistantships.) Students who are exempt from the mandatory health fee may use the services of the Thielen Student Health Center on a fee for service basis, or may elect to pay the $98 Health Fee and $8 Health Facility Fee, which allows participants to receive services at the Thielen Student Health Center for the same rate as students who pay the mandatory health fees. Spouses/domestic partners of students who wish to use the Thielen Student Health Center must pay the $98 Health Fee and $8 Health Facility Fee.

Students who withdraw or change to an exempt status as defined above will receive a credit adjustment of 100 percent during the first two weeks, with no credit adjustment after the second week. Students who add courses at any time during the semester will be assessed the student health fee if applicable according to the guidelines stated above. Students who carry the ISU sponsored insurance must also be assessed the student health fee. If spouse or domestic partner is covered under the insurance plan, the spouse (domestic partner) must also be covered under the Health Fee and Health Facility Fee.

Health Insurance: All international students and their accompanying dependents must enroll in the ISU Student and Scholar Health Insurance Program. ISU requires nonimmigrant international students and their dependents to purchase and maintain coverage through the ISU health insurance plan for the duration of their tenure at the university. Insurance plans purchased outside the university may be used for supplemental coverage, but cannot be substituted for the ISU plan. Students not assessed the mandatory Student Health Fee and spouses of students should contact the Student Health Insurance Office at 515-294-4820 for more information.

Identification Card (ISUCard) Replacement: All students receive their first identification card free of charge. Those cardholders who have lost or misplaced their identification cards are assessed a $25 fee to cover the cost of replacement.

Late Fee Payment: If payment of the minimum due is not made by the deadline printed on the billing statement, all fees become due immediately. A one-percent finance charge will be assessed on the total amount due at that time. These students will also have a hold placed on their registration until payment of the total amount due has been made.

Late Registration: Undergraduate students who do not complete their registration before the first day of classes are charged a $20 late registration fee. Graduate students who do not complete their registration before the first day of classes are charged a late registration fee of $20 during the first week of classes, $50 the second week of classes, and $100 the third week of classes or anytime later.

New Student Programs: A nonrefundable fee of $190 is assessed to all new degree-seeking undergraduates (including new direct from high school and new transfer students). The fee covers full costs associated with orientation and Destination Iowa State programming, including publications, mailings, programming, and student assistants who provide services to students and their families during orientation and Destination Iowa State.

Returned Check/Direct Debit Charge: This $30 fee is a charge against the person who writes a dishonored check or authorizes a direct debit to an account that has been closed or has insufficient funds.

Schedule Change: Starting the sixth day of classes a $10 fee is charged for course drops, additions, and section changes. One fee is assessed for multiple changes processed at the same time for the same term.

Senior: A $2 fee covers the cost of special senior activities. This fee is optional and is assessed spring term only.

Special Course: Some courses have expenses above the cost of tuition that enhance the instruction. These fees may cover the cost of field trips, use of equipment, materials or supplies, or professional support. Applicable special course fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu/. Special course fees also appear on each student's schedule detail available on AccessPlus.

Sponsored International Student: This fee is assessed to the sponsor of international students as a way to compensate for the special record keeping, billing requirements, correspondence, and the deferred payment option extended to sponsoring agencies. The current fee will be 5 percent of the total tuition charge billed the sponsor. In succeeding years, the fee may be raised after 90 days advance notice to the sponsoring agency.

Study Abroad: Tuition assessment for study abroad credits, up to a maximum of 12 credits, is above and beyond tuition for other courses taken during the same term.

Thesis Fee: This $100 nonrefundable fee is charged to any student who submits a master's degree thesis or doctoral dissertation to the Graduate College.

Transcript: Students may obtain an official transcript of their student academic record for $15. An additional $5 service charge for each transcript is assessed for same day service.

Workshops: The fee for one-credit workshops, with no other course enrollments, is $240 for undergraduate students and $374 for graduate students.

Fee Payment

The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of new charges is available on the first of each month on Access Plus and each student will receive an email message at that time at their Iowa State e-mail address telling them that their bill is available. It is the student's responsibility to ensure that the university has a correct e-mail address and to regularly check their Iowa State e-mail account. Students who do not receive a billing statement before the term begins or are unable to use AccessPlus to view their bill, should contact the Accounts Receivable Office to learn the amount of their account balance due. Failure to receive a billing statement or view their account on AccessPlus will not exempt students from late penalties or from having a hold placed on their registration. Payments for fall semester are due August 20. Payments for spring semester are due January 20. Payments for summer semester are due May 20.

Students may pay their university bill by direct debit through AccessPlus. They may also pay by mail by sending a check or money order (along with the bottom portion of the billing statement printed from AccessPlus) to Iowa State University, Treasurer's Office, 1220 Beardshear Hall, Ames, IA 50011-2044. Payments may also be made in person in the Treasurer's Office.

Deferred Payment

Each term, students who do not pay their first installment in full by the due date will automatically select the deferred option, and will be charged a $20 administrative fee.

University fees may be paid in three installments each academic term. Payments for fall semester will be due August 20, September 20, and October 20. Payments for spring semester will be due January 20, February 20, and March 20. Summer fees will be due May 20, June 20 and July 20.

Monthly Payment Plan

Under the Monthly Payment Plan, students pay the academic costs for fall and spring semesters in 12 installments beginning April 20 and ending the following March 20. A $50 enrollment fee is due with the first monthly payment. All payments are deducted from a designated bank account. For more information about the Monthly Payment Plan, contact the Accounts Receivable Office.

Past Due Accounts

If students have past due accounts receivable charges prior to the beginning of classes, they may be dropped from enrollment if these past due charges are not paid by the Friday before the first day of class. Students that are subject to being dropped will be notified via their Iowa State e-mail account.

Refunds

Refunds are available for students who cancel or withdraw their registration within the appropriate time period. To cancel their registration, students must notify the Office of the Registrar before the first day of the semester to avoid tuition assessment. Beginning on the first day of the semester, it will be necessary for students to formally withdraw from the university to terminate their registration. More information about canceling registration and withdrawing from classes can be found at www.iastate.edu/~registrar/registration/

Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

Withdrawal Date	Student Pays
Before first day of classes	0%
During class days 1-5	10%
During class days 6-10	25%
During class days 11-15	50%
During class days 16-20	75%
After the twentieth day of classes	100%

Students who wish to appeal tuition and fee assessment for withdrawals should contact the fees section of the Office of the Registrar. Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student.

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

Fee refund for students with a reduction in credits below full-time:

100 percent if change is made during first two weeks. No adjustment is made after the second week. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

Workshop and Short Courses Refunds

Students who drop workshops or short courses of one or two weeks on or before the first class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.

Student Financial Aid

The Office of Student Financial Aid helps families afford Iowa State University. Grants, scholarships, loans, and part-time employment opportunities are available to assist students and families in meeting their college expenses.

Eligibility for financial aid is determined by the Free Application for Federal Student Aid (FAFSA). Students can apply online at www.fafsa.ed.gov beginning January 1 for the coming academic year. Students should submit the FAFSA before to March 1 to receive consideration for most grants and scholarships. A new application must be completed each academic year.

The priority deadline for financial aid is March 1. Priority financial aid is awarded to eligible students who complete the FAFSA prior to March 1 each year. Students who apply after this date will be considered for the Federal Pell Grant and student loans. New students enrolling spring semester or summer session should complete the current year's aid application to apply for any available financial aid.

To be eligible for most financial aid programs, a student must be a U.S. citizen or permanent resident, enrolled at least half-time, and making satisfactory academic progress toward a degree.

Students may use their financial aid for study in other countries if they have clearance for the transfer of credit to their degree programs and have made financial aid arrangements prior to departure. For further information, contact the Study Abroad Center, 3224 Memorial Union, or the Office of Student Financial Aid, 0210 Beardshear Hall.

There are three general types of financial aid programs: gift aid (scholarships and grants), loans, and part-time employment. Laws, regulations, and policies governing these programs are subject to change.

I. Gift Aid

A. Scholarships

1. ISU Scholarships. Scholarships are awarded on the basis of achievement, although many also require demonstrated financial need. Find out more about scholarships at www.financialaid.iastate.edu.

2. Military Officer Education (ROTC) Scholarships:

   Army. The Military Science Department offers 2-, 3-, and 4-year Army ROTC scholarships to qualified students on a competitive basis in virtually any academic discipline. These scholarships provide monies for tuition, all required fees (except student health), books and supplies allowance, and a monthly cash subsistence allowance. For applications or additional information, contact the Military Science Department at 132 Armory or call 515-294-1852.

   Navy. The Naval Science Department offers several scholarship programs to qualified students. The scholarships cover payment of tuition, fees, books, and a monthly stipend. Information is available from the Naval Science Department, 3 Armory, or by calling 515-294-6050.

   Air Force. The Air Force offers Air Force ROTC scholarships for periods of 2, 3, or 4 years, with up to 1 additional year for qualified applicants in selected majors. The scholarships provide payment of tuition and fees. In addition, scholarship cadets receive between $250-$400 monthly subsistence allowance and $510 per year book allowance. Express scholarships are also available to students qualified in certain technical academic majors. Details on scholarship qualification, application procedures, and eligibility are available from the Department of Air Force Aerospace Studies, 515-294-1716.

3. Other Scholarship Sources: Students are encouraged to pursue scholarship opportunities from outside agencies and private organizations. Check the financial aid Web site for current postings and additional resources.

B. Grants

1. Federal Pell Grant. This federal grant is for undergraduates working toward their first bachelor's degree. The amount of Pell Grant is based on the Estimated Family Contribution (EFC) as calculated using a federal formula.

2. Federal Supplemental Educational Opportunity Grant. This federal grant is awarded to high-need students who also qualify for the Pell Grant. Students who file their FAFSA prior to March 1 are considered for this award.

3. ISU Grant. This university grant is for undergraduate students who show financial need. The FAFSA must be filed prior to March 1 to be considered for this award.

4. Academic Competitiveness Grant. This federal grant will provide up to $750 for the first year and up to $1300 for the second year of undergraduate study to students who are U.S. citizens, eligible for the Pell Grant, and have completed a rigorous high school program as determined by the student's state of residence.

5. SMART Grant: The National SMART Grant will provide up to $4000 for the third and fourth years of undergraduate study to students who are U.S. citizens, eligible for the Pell Grant, have a cumulative GPA of at least 3.00, and are enrolled in an eligible major.

6. Officer Education (ROTC) Financial Assistance Grants. All students enrolled in Advanced ROTC (third and fourth years) in the Army, Navy, and Air Force programs are provided a monthly stipend. For further information, contact the appropriate ROTC department in the Armory.

7. Tuition Assistance Grant for Undergraduate International Students. Undergraduate international students who have been at Iowa State University for at least a year and are faced with financial hardship resulting from unforeseen circumstances may apply for this grant. Apply via the International Students and Scholars Web site (www.iastate.edu/~internat_info).

8. International Student Financial Aid. International students raise money through cross-cultural activities toward a scholarship fund. These monies will be used to assist international students who have unforeseen financial emergencies. For further information, contact the International Student Council at www.stuorg.iastate.edu/isc/.

II. Loans

A. William D. Ford Federal Direct Loan Program. These student loans are obtained through the U.S. Department of Education by filing the FAFSA.

1. Federal Direct Subsidized Loan. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin six months after graduation or less than half-time enrollment. The interest rate will range from 3.4% to 6.8% depending on the year in which the loan was borrowed.
2. Federal Direct Unsubsidized Stafford Loan. The interest on this non-need based loan is charged to the borrower from the time the loan is disbursed until paid in full. Interest may be paid while you are in school or added to the principal balance of the loan. Borrower repayment begins six months after graduation or less than half-time enrollment. The interest rate is fixed at 6.8%.

B. Federal Perkins Loan Program. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin nine months after graduation or less than half-time enrollment. The interest rate is fixed at 5 percent.

C. Federal Health Professions Loans. This student loan is limited to students enrolled in the College of Veterinary Medicine. The FAFSA is required, and parental information must be provided, regardless of age or dependency of the student. The interest rate is fixed at 5 percent, and interest does not accrue while the student is enrolled full-time. Borrower repayment begins twelve months after graduation or less than half-time enrollment.

D. Federal Direct PLUS (Parent Loan for Undergraduate Students). This loan is for parents of a dependent student and the loan is subject to credit analysis. A parent may borrow up to the cost of attendance less any other financial aid. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment begins 60 days after the loan has been disbursed in full unless the parent requests a deferment until after the student graduates. This loan is not need-based, and does not require filing the FAFSA.

E. Federal Direct PLUS Loan for Graduate & Professional Students (Vet Med). This loan is for Graduate and Professional Students (such as Vet Med students) and is subject to credit analysis. Students may borrow up to the cost of attendance less any other financial aid. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment can be deferred as long as the student is enrolled at least half-time.

F. Private Loan Options. Private loans supplement the federal loan programs and are subject to credit analysis. These loan programs do not require filing the FAFSA.

III. Part-time Employment

There are many part-time employment opportunities available for students, both on campus and off campus. Students who secure part-time jobs gain valuable experience to aid in job placement after graduation. Part-time employment can also help reduce loan indebtedness.

A. Federal College Work-Study. Work-study positions provide hourly employment for students with financial need, as determined by filing the FAFSA. Students with work-study eligibility are able to view work-study positions on the Student Job Board on AccessPLUS.

B. Other Part-Time Employment. The Student Job Board on AccessPLUS lists positions which do not require filing the FAFSA. All students can view these listings for current job openings.

IV. Other Financial Aid

Many other forms of financial aid are available to students who qualify, including Vocational Rehabilitation, Veterans Benefits, and Department of Human Services programs. For further information on these programs, contact the appropriate government office.

Student Housing and Dining

Director of Residence: Pete Englin

Director of ISU Dining: Nancy Levandowski

Associate Directors:

Virginia Arthur (Residence Life)

Darryl Knight (Facilities Operations)

Jill Arroyo (Residential Dining)

Assistant Directors:

Karen Larson (Catering)

Kristi Patel (Retail Operations)

Lisa Ludovico (Residence)

Jamie Lenz (Food Stores / Vending)

The university provides housing for more than 8,000 students in on-campus residence halls and apartments. Housing is available for undergraduate and graduate students; single students and families.

Each student who accepts admission to the University is eligible to submit a housing contract. Acceptance of admission to the university is necessary before a housing contract will be accepted. Contracts can be submitted on-line using AccessPlus. Housing priority for new students is based upon the date the completed contract is received in the Department of Residence Administrative Services Office.

Questions and correspondence concerning on-campus housing and dining should be directed to the Department of Residence Administrative Services Office, 2419 Friley Hall, Iowa State University, Ames, Iowa 50012. E-mail: housing@iastate.edu. Phone: (800) 854-9050. Additional information may be obtained at http://housing.iastate.edu/.

Undergraduate Residence Halls

Most residence hall rooms are double occupancy; however, a limited number of triple and single occupancy rooms are also available. All rooms are furnished with extra-long twin beds and mattresses, closet or wardrobe, clothing drawers, desks and chairs, expanded basic cable and high-speed university Ethernet. Students provide their own bedding, towels, study lamps, etc. Students are responsible for cleaning their own rooms.

All students who live in an undergraduate residence hall are required to purchase one of seven convenient, flexible Weekly or Semester meal plans. Weekly plans range from seven to an unlimited number of meals allotted per week, while Semester plans include 175 or 225 meals allotted each semester. Weekly and Semester plans also include Dining Dollar$, a cash equivalent that can be used in all ISU Dining locations. Students can use their meals to eat in one of ISU Dining's "all-you-care-to-eat" dining centers or to purchase a meal bundle in one of ISU Dining's cafés, restaurants or dining centers.

All housing and dining contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. With the exception of Linden Hall, all undergraduate Residence Halls close during Winter Break. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

Housing and dining contracts are "academically friendly." Students who leave the University as the result of graduation, withdraw, dismissal or participation in a University approved study-abroad, internship, co-op, or student teaching program are eligible to cancel their contract without penalty. For reasons other than those listed, students who cancel their housing contract after the cancellation deadline (March 1 for current ISU students, May 1 for newly admitted ISU students) may be responsible for paying for 80 percent of the remaining value of their entire contract, both housing and dining. For additional information concerning the residence hall contract, students should contact the Administrative Services Office

In addition to the basic necessities, several special services are available for use by residents. These include house dens for informal get-togethers and relaxation; lounge areas for meeting and entertaining guests; vending areas for snacks; hall desks with recreation/entertainment items, recreational equipment, and mail delivery; laundry facilities; study areas; meeting rooms and offices for student organizations; computer labs; and parking lots assigned to the residence halls.

The residence halls are organized geographically into two neighborhoods: Richardson Court and Union Drive. The students in each of these neighborhoods elect a group of executive officers to be responsible for coordinating neighborhood events and activities. Each neighborhood funds and maintains a social program, an intramural program, and numerous committees that supplement the total social and educational development of the individual residents. The neighborhoods are joined in an Inter-Residence Hall Association (IRHA), with an all-residence hall parliament, which jointly sponsors Residence Hall Week, Free Friday Flicks, scholarships, leadership conferences, and more.

Each neighborhood is further organized into smaller living groups called houses. These houses of 40 to 60 residents are the foundation of Iowa State University's residence hall program. Members of the houses elect their own officers, and the majority of programs are planned on a house participation basis. Participation in the house program is a great way for students to receive full benefit from the residence hall experience.

Students may choose to live in single-gender or coed houses. Coed houses have male and female students living at opposite ends of the house or on separate levels of the house. They have separate bathroom facilities but share lounge facilities and house activities.

Residential Learning Communities, which bring together students with similar academic focus, are also available in the residence halls. These communities offer a collaborative living and learning environment, increased student/faculty interaction, social and academic networks essential to student success, and a sense of membership in the ISU community.

Currently, the following learning communities are available: ACES (Agriculture Community Encourages Success); ABE (Agricultural and Biosystems Engineering); BEST (Biology Education Success Team); BLT (Business Learning Teams); Chemical Engineering; Common Threads (Textiles and Clothing); CLUE (Community Learning for Undeclared Engineers); Computer Science; Design Exchange; Entrepreneurship and Innovation; FSHN (Food Science and Human Nutrition); Honors; LEAD (Leadership through Engineering Academic Diversity); NREM (Natural Resource Ecology and Management; and WiSE (Women in Science and Engineering). Theme houses are also available, including cross-cultural, Army ROTC, and Air Force ROTC. For the most up-to-date information on learning community opportunities at Iowa State, visit http://www.lc.iastate.edu/.

Upper-Division Residence Hall

Two residence halls, Buchanan Hall and Wallace Hall, offer the convenience of residence hall living with a more mature environment for older students. To be eligible to live in Buchanan or Wallace, students must minimally have sophomore classification or be at least 19 years of age. In Buchanan, two floors are reserved for students who are 21 years of age and older. There is no age requirement for students living on the Entrepreneurship and Innovation Learning Community floor in Buchanan.

Buchanan rooms offer a suite-style set-up with two rooms joined by a private bathroom. Double suites have a sink in each room and share a bathroom with the adjacent room that includes a toilet and shower. Single suites share a bathroom with the adjacent room that includes sink, toilet, and shower. Each room is furnished with a lofted bed, desk with bookcase and file, desk chair, wardrobe/dresser unit, expanded basic cable and high-speed university Ethernet. Student lounges and kitchenettes are available on most floors. Residents living in Buchanan must purchase a meal plan.

All Wallace rooms are super-singles. That is, a double-sized room furnished for and occupied by only one student. Each room is furnished

with a bed, desk, desk chair, futon, dresser, wardrobe, micro-fridge, expanded basic cable, and high-speed university Ethernet. Student lounges are available on each floor. Residents living in Wallace are not required to purchase a meal plan.

Both Buchanan and Wallace halls remain open during Winter Break at no additional charge. All Buchanan and Wallace hall contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. In Buchanan, summer contracts are also available. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

Undergraduate and Graduate Single Student Apartments

Apartments for single students are offered in two on-campus neighborhoods: Frederiksen Court and Schilletter and University Villages (SUV). To be eligible to live in these areas, students must minimally have sophomore classification or be at least 19 years of age. All Frederiksen Court and SUV contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Both Frederiksen Court and SUV remain open during Winter Break at no additional charge. Summer contracts are also available in both locations. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

Frederiksen Court apartments accommodate four persons of the same gender in either two or four bedrooms. Each apartment is furnished with living room and bedroom furniture and the kitchen has a full-size refrigerator, stove, microwave, dishwasher and garbage disposal. A washer and dryer are also included in each apartment.

Rent, which is billed on a semester-basis, includes all utilities: electricity, water, garbage pickup, basic phone service, expanded basic cable, and high-speed university Ethernet.

The Frederiksen Court Community Center features meeting rooms and lounge space, a fitness center, business center and Hawthorn Market and & Café a retail dining facility that offers hot meals, snacks, beverages, and convenience items.

In SUV, single students typically live in University Village. All apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. The majority of University Village apartments are unfurnished, but a limited number of furnished units are available.

Rent, which is billed monthly by the university, includes include expanded basic cable television, high-speed Internet connectivity, water, and garbage removal service. Residents pay for their own gas, electricity, and telephone.

The SUV Community Center features large meeting rooms and lounge space, a community kitchen and a computer lab.

Apartments for Families

Family Housing is available in the SUV area in Schilletter Village. Students must be married/domestic partners and/or have dependent children in order to be eligible for family housing.

All Schilletter Village contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Schilletter Village remains open during Winter Break at no additional charge. Summer contracts are also available in both locations. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

All apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. Students provide their own furniture and window coverings. Hook-ups for personal washer and dryer are available in the basement of each unit as are private, lockable storage closets.

Rent is billed monthly by the university. Rental rates include expanded basic cable television, high-speed Internet connectivity, water, and garbage removal service. Residents pay for their own gas, electricity, and telephone.

The SUV Community Center features large meeting rooms and lounge space, a community kitchen and a computer lab. The community also boasts a bike/walking path and several playgrounds.

Off-campus Housing for Students

Off-campus housing information may be obtained through real estate agents, local newspapers, or by contacting individual owners.

Dining Options for On- and Off-Campus Apartments

ISU Dining offers a variety of convenient, flexible meal plans to students who live in on-campus and off-campus apartments. Plans include traditional Weekly plans, ranging from seven to an unlimited number meals allotted per week, to Semester plans with 175 or 225 meals allotted each semester. Weekly and Semester plans also include Dining Dollar$, a cash equivalent that can be used in all ISU Dining locations. Students in non-meal plan required areas can also choose to purchase Meal Blocks (small allotments of meals without Dining Dollar$) or Dining Dollar$ only.

All dining contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Summer contracts are also available. For a complete listing of meal plans and rates, please visit the ISU Dining http://www.dining.iastate.edu/. Questions and correspondence concerning meal plans should be directed to the Department of Residence Administrative Services Office, 2419 Friley Hall, Iowa State University, Ames, Iowa 50012. E-mail: housing@iastate.edu. Phone: (800) 854-9050. Additional information may be obtained at http://housing.iastate.edu/.

Fraternities and Sororities

Of the 50 fraternity and sorority chapters on the Iowa State University campus, 42 have chapter houses, and provide housing for about 1,800 undergraduate students. Eight multicultural Greek fraternities and sororities do not provide residential facilities for members, but are active in scholastic, service and social projects.

The chapter house facilities are similar to a private residence: living room, den, kitchen, dining room, laundry room, etc. The staff in the Office of Greek Affairs, a department in the Dean of Students Office, provide advising, programs, and services for the Greek chapters and organizations. Local alumni work with each fraternity and sorority to ensure that the chapter structure meets all the state and local building, safety, and fire codes that are required with incorporation under the State Law of Iowa.

The average cost of living in a fraternity or sorority chapter house ranges from $2,800-$3,400 per semester. The cost includes room, board, social expenses and membership dues.

Most men may move directly into a fraternity house at the beginning of an academic year if they pledge a chapter that has a house. Typically, they continue living there throughout their college years. Women pledging a sorority during formal recruitment or informally throughout the year generally live in the residence halls for the academic year. However, as space becomes available in a chapter house, sorority members often move into the house as sophomores or upper-class women.

Student Services

The University Library

Dean of the Library:

Olivia M. A. Madison, M.L.A.

General Information–(515)-294-3642

Library Hours–(515)-294-4849

The University Library provides a wide array of print, non-print, and electronic information resources, which are housed in the main Parks Library, the e-Library, the Veterinary Medical Library, and three subject-oriented reading rooms (design, mathematics, and physical sciences). The library's extensive collections support research and study for all ISU graduate programs, with the strongest support at the Ph.D. level. These collections are nationally recognized for their strengths in basic and applied fields of biological and physical sciences. Library holdings include more than 2,529,920 volumes and approximately 66,195 current serial titles.

The library encourages use of its collections and many services, and assistance is provided at five public service desks. These desks include the Learning Connections Center, Interlibrary Loan/Document Delivery, the Circulation Desk, the Media Center (incl. Maps, Media, Microforms, and Course Reserve collections), and Special Collections. In addition, instruction in the use of library resources is offered to graduate and undergraduate students.

The library's e-Library, accessed through the Internet, provides access to the local online catalog; online indexes; electronic journals and books; and selected Internet sites. Assistance in using this vast body of electronic resources is available at the Learning Connections Center, digital reference services, and through individually arranged appointments with reference librarians.

The Parks Library has a limited number of semiprivate study rooms available for faculty, graduate students, and professional and scientific staff. They are intended for research and other scholarly activities that require extensive use of library material. Normally, assignments are made for a semester at a time.

Student Answer Center

www.public.iastate.edu/~registrar/AnswerCenter/

Students who have questions but are not sure where to find an answer may contact the Student Answer Center located on the ground floor of Beardshear Hall. A staff member will answer campus-related questions on the spot or provide referrals to other university departments as needed. Information may include registration instruction, financial aid status, or classroom directions. Students can pick up forms, information brochures, campus maps, or use one of the computers to log on to AccessPlus or e-mail. Questions can be answered by email at answercenter@iastate.edu or by phone 515-294-4469 or online at: www.public.iastate.edu/~registrar/AnswerCenter/homepage.html

Student Counseling Service

Assistant Vice President and Director of Counseling: Terry W. Mason, Ph.D.

Associate Director: Joyce A. Davidson, Ph.D.

Professional Staff: Cara Armstrong, Ph.D.; Mark R. Becker, Ph.D.; Jonathan H. Brandon, Ph.D.; Janet A. Croyle, M.Ed.; Jeffrey K. Ellens, Ph.D.; Ronald A. Jackson, Ph.D.; Marty I. Martinez, Ph.D.; Martha S. Norton, M.S.; Erin L. Pederson, Ph.D.; Todd Pietruszka, Ph.D.; Michelle M. Roling, M.Ed.

The Student Counseling Service (SCS) assists students in enhancing their academic success and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Services include:

•One-on-one counseling for any issue of personal concern, such as depression, anxiety, stress management, relationship issues, identity issues, and other forms of personal challenge. Students may also receive therapeutic services to deal with more severe mental health issues.

•Couples counseling for ISU students and their partners during times of relationship difficulty.

•Eating disorders assessment and treatment for students concerned with eating or body image issues. Students receiving treatment for eating disorders might also work with physicians, nutritionists, and personal trainers as their needs require.

•Substance abuse assessments to help students determine the nature and extent of their alcohol or other drug use and the impact of this use on their well being. Counselors offer recommendations and referrals for any concerns identified through the assessment.

•Career counseling to assist students having difficulty choosing a major or making decisions about their future after college.

•Group counseling is offered to facilitate personal growth and social skills learning. A list of the current semester's groups is available on the SCS web site.

•A variety of outreach programs are also available.

Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Nominal fees are also charged for uncancelled missed appointments. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the Student Counseling Service without the written permission of the client unless an imminent harm condition exists.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

Thielen Student Health Center

Interim Director: Penni McKinley, R.N., B.A.

Providers: Robin Engstrom, M.D.; Rebecca Fritzsche, M.D.; Malhar Gore, M.D.; Scott Meyer, M.D.; Pauline Miller, M.D.; Robert Nathanson, M.D.; Carver Nebbe, M.D.; Maria Pringle, ARNP; Mary S. Raman, ARNP; Cosette Scallon, M.D.; Marc Shulman, M.D.; Lee Wilkins, M.D.

Thielen Student Health Center is located on the corner of Sheldon Avenue and Union Drive, just west of Beyer Hall. Services include physician, nurse practitioner and nurse consultations, physical exams, laboratory and x-ray services, sports medicine and physical therapy, immunizations, pharmacy, diet and nutrition consultation, fitness consultation, stress management, smoking cessation, workshops, free and confidential HIV testing, and referral services.

The student health fee partially finances the services of the Thielen Student Health Center and is charged to all students taking 5 or more credits each semester. Those taking 4 or fewer credits may access services by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services. Students with less than 5 credits who elect not to pay the health fee may still be seen at the Thielen Student Health Center, but will be charged for the services provided. International students are required to pay the health fee. The health fee is not a substitute for health insurance.

Clinic hours:

Monday, 8 a.m.-6 p.m.
Tuesday, Thursday and Friday, 8 a.m.-5 p.m.
Wednesday, 9 a.m.-5 p.m.
Saturday, 9 a.m.-12 noon.

Hours vary during breaks and summer session. The Thielen Student Health Center is closed during all University Holidays. Patients are seen by appointment. Please call 515-294-5801. Each patient has the option of seeing the provider he/she requests.

Thielen Student Health Center phones are automatically switched to the First Nurse at Mary Greeley Medical Center so urgent health questions can be answered during the hours the Thielen Student Health Center is closed.

Service is available for urgent or emergency problems after regular clinic hours at McFarland Urgent Care Clinic or Mary Greeley Medical Center Emergency Room. The cost is the responsibility of the student and/or the student's insurance plan.

Career Services Offices

Agriculture and Life Sciences:
141 Curtiss Hall
Business: 1320 Gerdin Business Building
Design: 297 College of Design
Engineering: 308 Marston Hall
Graduate Business/MBA:
1360 Gerdin Business Building
Human Sciences: E105 Lagomarcino Hall
Liberal Arts and Sciences: 351 Catt Hall
Veterinary Medicine: 2270A Veterinary Medicine Complex

Career Services is a coordinated network of career services offices offering a broad range of programs and services for undergraduate, professional, and graduate students, faculty, staff, alumni, and employers. These services include career exploration, career development, experiential learning, and professional career search assistance programs. The goal is to provide constituents with life-long skills to assist with career development and exploration.

A broad range of programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsors multiple career fairs, which bring to the ISU campus hundreds of employers. The career services offices also coordinate on-campus interview opportunities. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

In addition to the college-based career services offices, the Career Exploration Service provides a variety of services to students who are unsure about their major or future career path. Students can work one-on-one with a trained career counselor, use the many books and electronic resources in the Career Exploration Center, or enroll in LAS 104, Personal Career Choice. All services are free for students and confidential.

Additional information on career services is available at www.career.iastate.edu.

Child Care

Child Care Administration, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care coordinator is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:

• Center for Child Care Resources: Assistance in locating campus and community child care services, 100 University Village, Suite 1010, 515-294-8833 or 1-800-437-8599

• University Community Childcare, Family Resource Center, 100 University Village, 515-294-9838

• The Comfort Zone: Childcare for kids who don't feel so good, 100 University Village, 515-294-3333.

• Flex-Care: Part time care for children of ISU students, 100 University Village, 515-294-9838.

• University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.

• ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care coordinator at 515-294-8827.

International Students and Scholars

http://www.isso.iastate.edu

Director: James Dorsett

Coordinator of Administration: Deborah Vance

Program Coordinators: Virginia McCallum, Dilok Phanchantraurai, Ali Soltanshahi, Becky Zama

Program Assistant: Arlis Penner

Systems Analyst: David Morgan

Administrative Specialist: Lana Seiler

International Students and Scholars Office (ISSO) is committed to providing courteous, accurate, timely service and informative programs for international students, visiting scholars, faculty, staff, and citizens of Iowa interested in international education and exchange. ISSO staff members orient and advise international students and scholars on university procedures, community resources, U.S. visa issues, and nonacademic personal concerns. ISSO intercultural programs, such as the Culture Corps, Friendships International, Conversational English Program and activities developed with the International Student Council and dozens of international student organizations, bring international students and Americans together for mutual learning. We welcome volunteers to join these and other programs.

www.dso.iastate.edu/
The Dean of Students Office (DSO) provides a wide array of services and programs that enhance each student's education at Iowa State University. DSO departments are located in numerous locations on the ISU campus. The mission of the Dean of Students Office is to enhance the quality of life of ISU students by supporting the university's commitment to the academic success and holistic development of each individual student.

The DSO coordinates a variety of services that are each distinct and different, but nonetheless similar in their orientation toward maximizing students' educational opportunities and challenging students intellectually, physically, and socially.

Academic Success Center

www.dso.iastate.edu/asc
1060 Hixson-Lied Student Success Center
(515) 294-6624; TTY (515) 294-6635

The Academic Success Center (ASC) encompasses several academic assistance programs. The services available at the ASC include the following: resources for students with disabilities (see Disability Resources); course-specific Tutoring Services and Supplemental Instruction; general assistance through the Learning Lab, individual consultation for those with needs related to study skills/time management; and a one-credit study skills class (Psychology 131). All programs are focused on helping students learn how to learn and achieve their academic goals.

Tutoring Services' mission is to enhance academic growth and success. Tutoring is the process by which students can get more individualized instruction for undergraduate courses offered at ISU. Staff members recruit and screen tutors, schedule convenient times to meet, collect fees, and pay tutors.

Supplemental Instruction (SI) is a free academic assistance program for difficult selected 100 and 200 level courses. Peer SI leaders who have demonstrated competence in the course attend classes and conduct biweekly sessions to help students learn and study the course material. A complete schedule can be viewed online.

The Learning Lab is a "learning how to learn" center. A service to students, the Learning Lab helps them with tips on how to succeed in the classroom. The Learning Lab is staffed by academic consultants who work with students to pinpoint areas in their study strategies that might need improvement.

Psychology 131, a one-credit study skills course, addresses academic success strategies as well as a variety of reading and study strategies and tactics from time management to test taking. It is offered each semester. Class size is limited to allow for group interaction as well as individual attention.

Greek Affairs

www.greek.iastate.edu
B0355 Memorial Union
(515) 294-1023

Greek Affairs provides advising, consultation, and educational services to the fraternities and sororities at ISU. Professional staff and graduate assistants work with student leaders, members, and chapter advisers to provide support to the chapters and to advise Collegiate Panhellenic Council, Interfraternity Council, National Pan-Hellenic Council, Multicultural Greek Council, Greek Week, Fall/Spring Blood Drives, Order of Omega, Junior Greek Council, and other student organizations and activities affiliated with the Greek Community.

Fraternities and sororities have been active at ISU since 1875. The over 50 fraternities and sororities at ISU have more than 2,000 student members and represent about 11 percent of the undergraduate student population. The Greek Affairs staff and local alumni work with each fraternity and sorority to ensure that the chapter is meeting the educational objectives of the university, their national affiliations and the developmental needs of the students.

Hixson Opportunity Awards

www.dso.iastate.edu/hixson
1080 Hixson-Lied Student Success Center (515) 294-6479

The activities and programs offered to Hixson Scholars are designed to promote the retention and success of these students. These programs and resources aim to develop a community of students and friends within the larger Iowa State community. Programs include the Hixson Seminar (University Studies 111), Hixson News (a monthly newsletter), monthly activities, community service, Hixson Mentors, and the Hixson Leadership Seminars (University Studies 311 & 312).

Judicial Affairs

www.dso.iastate.edu/ja
1010 Student Services Building
(515) 294-1021

The Office of Judicial Affairs is responsible for the university's Centralized Judicial System. Representatives from the Office of Judicial Affairs interpret university policies and conduct student disciplinary hearings for academic and nonacademic violations of the Iowa State University Student Disciplinary Regulations. As members of the ISU community, all students have certain rights and responsibilities. When an alleged violation of the Student Disciplinary Regulations occurs, a representative from the Office of Judicial Affairs investigates the complaint, interprets general university regulations and guidelines, conducts student discipline hearings which ensure the standards of due process, and consults with faculty, staff, and students regarding student conduct issues.

Student discipline hearings are conducted in accordance with the rules and regulations as set forth in university policies and procedures. Disciplinary hearings are administered by a member of the Judicial Affairs staff, the All Greek Judicial board, or by members of the All-University Judiciary (AUJ) committee. The Office of Judicial Affairs serves as a resource for anyone with questions regarding a student conduct issue.

Lesbian, Gay, Bisexual and Transgender Student Services

www.dso.iastate.edu/lgbtss
1034 Student Services Building
(515) 294-5433
lgbtss@iastate.edu

Lesbian, Gay, Bisexual, & Transgender Student Services (LGBTSS) is a resource center for all members of the university community to learn more about aspects of sexual identity and gender identity/expression. LGBTSS is committed to providing information and education that enhances the educational experience and overall quality of student life on the ISU campus. LGBTSS strives to increase the awareness of Lesbian, Gay, Bisexual, Transgender, Queer, and Ally (LGBTQA) issues on campus by providing a safe space, as well as informational and educational programming, resources, and support services. Our vision is to promote a welcoming and inclusive campus climate for LGBTQA persons and their allies and to eliminate homophobia, heterosexism, and sexism at Iowa State University.

LGBTSS services and programs include:

Speaker's Bureau – Panel discussion presentations where LGBTQA people and allies share their own experiences and present on a vast array of LGBTQA issues.

Safe Zone Program – Initiative to increase the visibility of allies on our campus. Displaying a safe zone symbol sends an important message of a willingness and commitment to provide an atmosphere of acceptance, understanding, and support to the LGBTQA community at ISU.

Library – Information center with over 1,000 resources (non-fiction & fiction books, magazines, videos, and magazines) available for confidential checkout.

Support Groups – Ongoing, confidential, peer-facilitated groups designed to provide a safe, supportive place for talking about important issues.

Referrals – Contact information available for various campus and community resources for personal, legal, health services.

Celebration Events – Programs where we recognize the accomplishments of LGBTQA campus members. The Small Victories Celebration takes place early in the spring semester and Lavender Graduation is in May.

Margaret Sloss Women's Center

www.dso.iastate.edu/mswc
Sloss House
(515) 294-4154

The Margaret Sloss Women's Center promotes the educational, personal, and career development of all women in the ISU/Ames community. Along with other departments, the Women's Center shares the university's responsibility of creating a safe and supportive environment for all individuals. The purpose of the Women's Center is to promote and sustain women through assistance, programs, and information and referral services.

The Women's Center provides:

- Assistance and support for women who work toward making change, on both personal and institutional levels.
- A safe space for women to meet, study, eat, network, discuss, find support, watch a video or just relax.
- A clearinghouse of information including a lending library, resource files, a calendar of events, and a variety of videos and audio tapes.
- Educational programming that focuses on helping students, staff, and faculty thrive in an academic environment by motivating them toward a greater understanding of, and involvement with, gender issues. Educational programs presented in residence halls, departments and organizations include workshops on a variety of topics.
- Coordination and co-sponsorship of special events including Women's Week, National Coming Out Days, Sexual Assault Awareness

Month, and Women's History Month. Throughout the year, the Women's Center also sponsors a number of speakers on current issues, hosts conferences, and coordinates support and discussion groups.

• A place to gain experience and/or credit as a journalism or design intern, practicum student, student programmer, board member, or volunteer.

Other services include an electronic breast pump, lockers to rent, free condoms, meeting space for campus and community organizations, kitchen facilities, a TV and VCR.

Multicultural Student Affairs (MSA)

www.dso.iastate.edu/msa
2080 Student Services Building
(515) 294-6338

Multicultural Student Affairs was established to assist the university in keeping its commitment to equal educational opportunity. The mission of MSA is to provide and share leadership in the holistic development of African American, Latino/a-Hispanic, Asian American/Pacific Islander, and American Indian/Alaskan Native students. In supporting university spirit and commitment to a high quality of life, academic success and graduation of all Iowa State University students, MSA is dedicated to collaboration with all university departments, offices, and related organizations in the delivery of programs and services that respond to the ever changing needs of all students.
MSA staff work closely with all units of the university to achieve the following objectives:
• Increase the number of students of color entering and graduating from ISU.
• Ensure access, choice, and persistence with all departments and organizations interested in the growth and development of students of color.
• Maintain liaison and coordinate programs with all departments and organizations interested in the growth and development of students of color.
• Develop students for a future beyond their undergraduate college experience – professionally, intellectually and culturally.
• Provide leadership for diversity awareness education regarding race and ethnicity.
These objectives assist in the achievement of the Office of Multicultural Student Affairs' mission. This is accomplished through the following services and programs:
• Academic Program for Excellence (APEX)
• Carver Academy Program
• George Washington Carver Scholarship
• Multicultural Vision Program (MVP) Scholarship
• MSA Emergency Loan Program
• MSA Tutoring
• First Year Student of Color Experience programming
• Race Relations programming

National Student Exchange (NSE)

www.dso.iastate.edu/nse
1080 Hixson-Lied Student Success Center (515) 294-6479

Since 1968, National Student Exchange has offered students a domestic alternative to study abroad. What began with three campuses exchanging seven students is now 190 universities placing 4000 students a year. Iowa State University is pleased to offer exchanges in this program.

Since its founding, more than 80,000 students have participated in NSE. The National Student Exchange was founded as a counterpart to study abroad programs, recognizing that not every student is seeking a study opportunity outside the United States. NSE offers low-cost options for ISU students to study out-of-state, at culturally diverse campuses, with program compatibility to our campus.

Features of the National Student Exchange include:

• Access to additional courses and programs

• Exchange among university honors programs

• Multicultural opportunities

• Resident assistant exchange options

• Credits applied toward degree

• Tuition reciprocity across the United States

Exchange features and requirements:

• NSE campuses in 48 states, three U.S. territories, and six Canadian provinces

• Duration of exchange can range from one semester to one calendar year

• Exchanges can occur in different academic and calendar years

• Students must be full-time during application and exchange

• GPA of 2.5 on a 4.00 scale required

Parents Association (ISUPA)

www.dso.iastate.edu/pa
1010 Student Services Building
(515) 294-6054

All parents of Iowa State University undergraduate students are automatically considered members of the ISU Parents' Association. The ISUPA serves as a link between the university and parents and families. Its mission is to serve and inform parents and to enhance the quality of student life at ISU.

There are no membership fees collected by the ISUPA. It is funded exclusively by contributions and fundraisers, such as the annual tuition raffle. The ISUPA Board of Directors, along with members of the Dean of Students Office staff, sponsors programs which include:

• Family Handbook, which is distributed to parents of all new ISU students at June orientation

• Parents' Advisory Line (PAL), 1-800-772-8546, a toll free assistance line for families

• Parent Calling Project, a phone-a-thon to parents of new ISU students each fall

• Cyclone Family Weekend, the university's premiere event for families largely funded by the ISUPA

• Involvement in ISU Admissions events

Parents interested in volunteering on the ISUPA Board of Directors can find the application form at the ISUPA web site.

Recreation Services

www.recservices.iastate.edu
2220 State Gymnasium
(515) 294-4980

Recreation Services is dedicated to the provision of quality recreational opportunities for the campus community. Programs include intramural sports, sport clubs, informal recreation, outdoor recreation, special events, fitness programs, and recreation facility management. Assistance for other recreational services is provided.

The Informal Recreation program includes the opportunity for recreational sports activity in Beyer Hall, State Gymnasium, Forker Building (east campus), Lied Recreation/Athletic Center, outdoor tennis courts near the Forker Building, recreation fields east of the Towers and Maple-Willow-Larch Residence Halls, and the Southeast Field Complex east of the football stadium. Two regulation golf holes north of the Armory are open for ISU recreation golf use at no charge. The Ames/ISU Ice Arena is also available for drop in open skating or organized events.

The Group Fitness program provides nearly 60 classes per week for staying fit. The types of aerobics classes available include: high/low impact, step, toning and aqua. We also offer personal trainers for those that would like to have one-on-one assistance with their workout. The Rec Milers Program is designed to help students stay interested and involved in a regular exercise program. Participants have the flexibility to choose their own activities and can exercise at their own pace and convenience. Participants keep track of their recreational mileage for each month. To get mileage credit, progress slips must be deposited in the Rec Miler's boxes at the Recreation Services Office, 2220 State Gym, or at the Lied Recreation/Athletic Facility. Monthly totals for each participant are posted at State Gym. Participants may earn awards for specific milestones. Aerobic activities for Rec Miler credit include: bike, walk, basketball, handball, cross country skiing, stationary bike, fitness class, jump rope, soccer, jog/run, swim, racquetball and tennis.

The Outdoor Recreation program is composed of four basic elements: the camping-outdoor equipment checkout program; the organized trip program; basic instruction activity workshops; the Resource Center and Library. All of these programs and activities are designed to provide opportunities for natural environment experiences.

The Sports Club program is designed to serve individual interests in different sports club activities and is student-oriented in every aspect. Sports clubs offer team or individual recreational opportunities. Following are the sports clubs: archery, badminton, ballroom dance, baseball, bowling, boxing, canoe and kayak, cycling, equestrian, fencing, flying, hapkido, hockey, judo, karate, kum do, lacrosse, motorcycle, mountaineering/rock climbing, paintball, pool, racquetball, rifle and pistol, rodeo, roller hockey, rugby, running, sailing, scuba, shotokan karate, ski and snowboard, skydivers, soccer, table tennis, tae-kwon-do, tennis, trap and skeet, triathlon, ultimate frisbee, unicycle, volleyball, water polo, water ski and weightlifting.

These clubs offer instruction and competition at the local and intercollegiate levels. The club members set dues, and most clubs receive financial subsidy from the Government of the Student Body to enable students to participate regardless of their financial situation.

The Intramural Sports program involves competition among participants who enter as teams or individuals and play according to specific schedules. There are more than 50 intramural sport activities ranging from football to inner tube water basketball and curling. Activities include men's, women's and co-rec divisions. Numerous special events add spice to the recreation program. These activities are of an endless variety and usually take place in a short time span. In general, they encompass demonstrations, performances, special contests, mass group participation, social occasions, excursions, displays, or special instruction.

Other physical, cultural, and social recreation programs are sponsored in coordination with various departments, organizations, and groups on and off campus. Contact us for more information.

Student Assistance and Outreach Services

www.dso.iastate.edu/sa
1010 Student Services Building
(515) 294-1020

Student Assistance Services (SAS) staff members provide guidance for students who are dealing with issues that affect their personal, academic, and family lives. They help students understand university policies and navigate processes and procedures on campus in order to enhance their academic experience at ISU.

Consultation and assistance is provided with concern for each student's personal well being and educational objectives. SAS staff members coordinate the notification of faculty members for students who miss classes due to emergencies. They also advise students who wish to file formal academic grievances. SAS staff members work closely with ISU faculty and staff to identify the best possible options for ISU students who are seeking to help themselves. Personalized referrals to other University resources and services are used to provide proactive and comprehensive assistance to students.

Student Disability Resources (SDR)

www.dso.iastate.edu/dr
1076 Student Services Building
(515) 294-7220; TTY (515) 294-6635

Staff members in the Student Disability Resources office coordinate support services that students may need in order to reach their fullest academic potential. SDR staff members coordinate accommodations and serve as a resource within the university community concerning students who have qualifying disabilities. SDR provides assistance, information, support, counseling, education, referral, and promotes disability awareness in students, faculty, staff, the Ames community, and the state of Iowa.

Student Legal Services

www.dso.iastate.edu/sls
B0367 Memorial Union
(515) 294-0978

Funded entirely by the Government of the Student Body, Student Legal Services (SLS) is a legal aid office for students currently enrolled at Iowa State University and registered Iowa State University student groups. It is staffed by two attorneys who advise and often represent students in a variety of cases and are available for consultation with respect to most legal concerns.

The types of cases most often handled include:

- Family Law and Divorce
- Criminal Law
- Landlord - Tenant Problems
- Off-campus Employment Problems
- Consumer Issues
- Administrative Issues
- Notary Services

The services of SLS are available to students and registered Iowa State University student groups free of charge. Students must pay their own court costs and any out of pocket expenses.

SLS cannot represent students in fee generating cases, controversies involving student vs. student or student vs. ISU, ISU student judicial matters and generally does not handle felony defense or cases involving excessive time. However, consultation with an attorney regarding these matters is available.

Student Support Services Program

www.dso.iastate.edu/sssp
2010 Student Services Building
(515) 294-0210

Student Support Services Program (SSSP), a federally funded program, provides academic support to eligible students and is designed to increase the retention and graduation rates of low-income individuals who are first-generation college students or individuals with disabilities. The needs of the students who are accepted into SSSP are thoroughly assessed through testing and counseling. SSSP participants receive personal and career counseling, along with academic advice, tutoring, and assistance in receiving financial aid.

Participants in SSSP are encouraged to work with an SSSP student mentor to become acclimated to the ISU environment. These relationships also encourage participants to fully access ISU resources. Study skills improvement sessions and basic skills instruction are provided in the areas of math and writing. In addition, cultural enrichment (i.e. theatre, dance, and musical events) and educational activities (leadership conferences, graduate/professional, etc.) are planned. These services are provided free of charge to eligible students after they are accepted into the program.

Vocational Rehabilitation

www.dso.iastate.edu/vr
1045 Student Services Building
(515) 294-5059

The State of Iowa Division of Vocational Rehabilitation Services Office provides services to students who based on medical documentation, have a disability and it is a substantial impediment to employment. Rehabilitation services may include the following: medical assessment; vocational evaluation; counseling and guidance; special adaptive equipment or devices; financial assistance toward training; and job placement assistance. No direct fees are charged, but there may be some costs through involvement with services.

Student Activities and Honor Societies

Memorial Union Activities and Services

The Memorial Union is an historic building that is regarded as the heart of campus life and the center of informal education at Iowa State University.

515-296-6848; www.mu.iastate.edu

Arts, Entertainment, Recreation:

- Underground (bowling, billiards, video arcade, Nintendo Wii)
- Maintenance Shop: live music
- Student Union Board: weekly films, comedy, hypnotists, special events, much more
- Art exhibits and art-for-rent
- Workspace (art and crafts classes for fun, studios for work in wood, photo, pottery; button maker, screen printing, die cut machine)
- Big screen TVs; pianos to play
- Lectures

Student Organizations

- Student organization offices and meeting space; recognition process.

Dining & Shopping

- Food Court & MU Market & Café
- University Book Store

Study Spots

- Browsing Library & Computer Lab; Chapel; Multicultural Center
- Lounges: Main, West, Pride, Commons & more

Services

- Hotel, meeting rooms, catering
- Parking ramp
- Copy Center
- Soults Family Visitor Center
- ATMs, Ticket Office, Lockers
- U.S. Post Office – full service
- Student Legal Service

Distinctive Feature

- Gold Star Hall, an active memorial to Iowa State service personnel lost in the nation's conflicts

Student Activities Center

Director of Student Activities
George Micalone

Coordinator for Leadership and Service
Jennifer Garrett

Coordinator for Art Programs
Letitia Kenemer

Coordinator for Entertainment Programs
Steven Satterlee

Underground Recreation Center Manager
Doug Swanson

The Student Activities Center (SAC) in the Memorial Union is committed to helping students learn inside and outside the classroom by offering countless ways to get involved at Iowa State through leadership, service, arts, entertainment and recreation activities.

The Student Activities Center includes: the Workspace (arts studio), the Maintenance Shop (entertainment venue), the Underground (recreation center/ bowling alley), leadership and service programs, art galleries in the MU, and management of the recognition of over 700 campus and student organizations. For a complete list of recognized organizations visit www.stuorg.iastate.edu.

The staff provides assistance to student and campus organization leaders, members and advisers on an individual or group basis. This office produces Newsline, an online newsletter distributed twice a month to officers and advisers of recognized student and campus organizations. Available on the SAC website are resources for student and campus organizations including the event authorization process, publicity and promotion ideas, constitution writing guidelines, and officer transition information. The Student Activities Center offers a 1-credit course called Leadership ISU where students learn leadership skills through a series of activities and seminars.

Annual SAC events include: ClubFest I & II (organization involvement fair), WelcomeFest (Ames and ISU opportunity fair), Coach Talks (hear from Men's and Women's head basketball coaches), Iowa State Leadership Experience (one-day leadership conference), Social Justice Summit, and Winterfest (celebration of all things winter). Student Activities Center staff advise key student organizations including: Student Union Board, Dance Marathon, Freshmen Council, Student Volunteer Services, The 10,000 Hours Show, and VEISHEA.

More information is available at the Student Activities Center, located in the East Student Office Space in the Memorial Union (across from the Food Court); online at www.sac.iastate.edu; or by calling (515) 294-8081.

Lectures

http://www.lectures.iastate.edu/

Throughout the academic year, the Committee on Lectures brings to the campus a number of speakers eminent in national and international affairs, the sciences, and the arts. In addition to giving formal lectures, a number of these speakers meet with students informally for discussions. Through these lectures and discussions the students are given a well-rounded presentation on subjects and areas affecting their culture, educational and economic philosophy, and scientific development. Past speakers include scholars E.O. Wilson and Stephen J. Gould; activists Gloria Steinem and Anita Hill; actor and comedian Bill Cosby; poet Maya Angelou; and astronaut Sally Ride.

The Institute on World Affairs is an annual series of speakers and on a topic of international interest held in the fall. Spring semester, the Institute on National Affairs is held with a topic of national concern as its focus. Focus, an annual fine arts festival with emphasis on student creativity in the arts, is held in the spring. The Committee on Lectures also sponsors or co-sponsors dramatic, dance, and musical events.

Students are encouraged to contact the lectures program office and become involved in the planning of these events.

Motor Vehicles and Bicycles

Students are permitted to own and operate motor vehicles - automobiles, motor scooters, and motorcycles. However, motor vehicles are in no way necessary for an Iowa State University student. Iowa State University is primarily a pedestrian campus. Those who operate a motor vehicle or bicycle on campus must abide by the rather extensive traffic and parking regulations. Fines are levied for infractions of these regulations. All motor vehicles and bicycles owned or operated by students on university property must be registered with the Parking Division Office located in the Armory. Copies of the traffic and parking regulations also are available at this office or online at http://www.dps.iastate.edu/parking/.

Honor Societies

Honor societies at Iowa State University provide opportunities for students who excel in the classroom and want to network with others in their major. Below is a list of honor societies followed by a brief description.

Members of these honor societies are eligible for transcript recognition through the Office of the Registrar. More information, including the complete list of honor societies, can be found on the student organization database at www.stuorg.iastate.edu.

Alpha Epsilon—Agricultural Engineering
The purpose is to promote the high ideals of the engineering profession, to give recognition to those agricultural engineers who manifest worthy qualities of character, scholarship, and professional attainment, and to encourage and support such improvements in the agricultural engineering profession that make it an instrument of greater service to humanity. Membership is based on scholarship, leadership, and character.

Alpha Kappa Delta—Sociology
Members share interest in the field of sociology, research of social problems, and such other social and intellectual activities as will lead to improvement in the human condition.

Alpha Lambda Delta/Phi Eta Sigma — Freshmen
First-year students who achieve at least a 3.5 GPA for one or more semesters their first year may be members of these national honor societies. These societies encourage superior scholastic attainment among students in their first year at institutions of higher education.

Alpha Pi Mu—Industrial Engineering
Members are chosen for character, achievement, and scholarship in industrial engineering. The group provides social and educational interaction for industrial engineering.

Alpha Upsilon Alpha—Education
An educational honorary, this group recognizes and encourages scholarship and leadership in the field of reading.

Alpha Zeta—Agriculture
Members must have completed three semesters of study in the College of Agriculture and Life Sciences or Veterinary Medicine and be in the upper two-fifths of their class. Meetings are held to foster high standards of scholarship, character, and leadership. Alpha Zeta sponsors lectures, service projects, and promotes the agricultural programs at ISU.

Beta Alpha Psi – Accounting
A national honorary for students in accounting, Beta Alpha Psi recognizes academic excellence and complements members' formal education by providing interaction between students, faculty, and professionals, and fosters lifelong growth, service and ethical conduct.

Beta Beta Beta Biological Honor Society
A national organization for students in the biological sciences with a purpose to recognize undergraduates with exceptional scholarship, leadership and character.

Beta Gamma Sigma
An honor society for collegiate schools of business, Beta Gamma Sigma recognizes high academic achievement.

Cardinal Key—Senior Leadership
The Senior Honor Society of Cardinal Key recognizes those persons who have been outstanding leaders in college life, who have rendered noteworthy service to Iowa State University, who are of high moral character, and who rank high scholastically. Members are selected by application and interview.

Chi Epsilon—Civil Engineering
The purpose of this honorary is to develop the profession of civil engineering through the interaction of members, fellow civil engineering students, and faculty. Scholarship, character, practicality, and sociability are the fundamental requirements for membership.

Epsilon Pi Tau—Education in Technology
Members are selected from the upper one-fourth of the juniors, seniors, and graduate students in industrial technology. The group strives to promote skill, social and professional efficiency, and research.

Eta Kappa Nu—Electrical and Computer Engineering
An International Honor Society for primarily juniors and seniors, as well as graduate students and professional engineers. The organization recognizes scholarship, personal character, useful voluntary services, and distinguished accomplishments. It assists its members throughout their lives in becoming better professionals and citizens.

Gamma Sigma Delta—Agriculture
The honorary encourages a high degree of excellence in the practice of agricultural pursuits and encourages high standards of scholarship in all branches of agricultural science and education. Membership includes junior and senior students, graduate students, faculty, and alumni.

Golden Key—All University
A national nonprofit academic honors organization, Golden Key is dedicated to recognizing and encouraging scholastic achievement in all undergraduate fields of study and to uniting collegiate faculty and administrators.

Kappa Delta Pi—Education
In an effort to promote excellence in and recognize outstanding contributions to education, Kappa Delta Pi maintains a high degree of professional fellowship among its members, quickens professional growth, and honors achievement in educational work. Membership invitations are extended to second semester sophomores, juniors, and seniors with a GPA of 3.25 or above.

Kappa Omicron Nu, Gamma Chapter
Objectives of the honor society are to promote graduate study and research, and to stimulate scholarship and leadership toward the well-being of individuals and families throughout the world. Top 10 percent of junior and top 20 percent of senior students maintaining at least a B average, and outstanding graduate students in family and consumer sciences, are eligible for selection. Research within the college is shared at monthly meetings.

Kappa Tau Alpha—Journalism
Kappa Tau Alpha is the national society dedicated to the recognition and promotion of scholarship in the field of journalism. Members are selected from the upper 10 percent of the senior class. Graduate students and faculty who qualify are also eligible for membership.

Mortar Board
Members are recognized for superior academic achievement and community service.

National Society of Collegiate Scholars
The purpose is to recognize and celebrate high achievement in all academic disciplines, to provide opportunities for personal growth and leadership development, and to organize and encourage learning opportunities through community service.

Omega Chi Epsilon—Chemical Engineering
Membership is open to chemical engineering juniors in the top 20 percent of their class, or seniors in the top 30 percent. The purpose is recognition and promotion of high scholarship, original investigation, and professional service in chemical engineering.

Order of Omega—Fraternity and Sorority Honorary
A national Greek honorary, the Order of Omega was founded at Iowa State in 1957. Criteria for membership include character; scholarship; leadership; service to the individual chapter, the Greek system, the university, and the Ames community. Membership is limited to junior and senior students who comprise one percent of the Greek population.

Phi Alpha Theta—History
Students who have a B average in at least 15 hours of history are eligible for membership. The local branch sponsors social activities, co-sponsors prizes for undergraduate essays in history, and encourages students' participation in state wide, regional, and national Phi Alpha Theta conferences.

Phi Beta Delta, Alpha Delta Chapter
The honor society recognizes and encourages high professional, intellectual and personal achievements in the field of international education.

Phi Beta Kappa—Liberal Arts and Sciences
Phi Beta Kappa is a national honorary society, founded in 1776 "to recognize and encourage scholarship, friendship, and cultural interests." Membership is by invitation to students enrolled in the LAS curriculum. To be eligible, juniors must have at least a 3.80 cumulative grade point average and seniors, at least a 3.60 average. Other criteria for membership include requirements in the mathematical disciplines and a foreign language.

Phi Kappa Phi—All University
This national honor society recognizes and encourages superior scholarship in all academic disciplines. Membership is open to qualified undergraduates and graduates by invitation and occasionally to faculty and alumni.

Phi Upsilon Omicron—Family and Consumer Sciences
Members are selected from junior and senior family and consumer sciences students who have demonstrated academic excellence and professional leadership qualities. Membership is a means of furthering professional goals. Outstanding graduate students are also eligible for selection.

Pi Mu Epsilon—Mathematics
Pi Mu Epsilon is the national mathematics honorary society whose purpose is the promotion of scholarly activity in mathematics among students and staff. Members are students and faculty who have completed at least two years of college-level mathematics with honor (at least 3.33 GPA) and have maintained an overall GPA of at least 3.0.

Pi Sigma Alpha—Political Science
Pi Sigma Alpha is the national honor political science honor society.

Pi Tau Sigma—Mechanical Engineering
Members are juniors and seniors in the upper ranks of their classes in mechanical engineering. Meetings and social functions are held to recognize and encourage outstanding scholastic achievement.

Psi Chi—Psychology
This national honor society in psychology recognizes and honors individuals maintaining high scholarship and documented interest in psychology.

Sigma Delta Pi—Spanish

Honor society for high-achieving students of the Spanish language at Iowa State University.

Sigma Gamma Tau—Aerospace Engineering
Sigma Gamma Tau is the national honorary for aerospace-aeronautical engineering students who have displayed outstanding scholarship, leadership, and personal characteristics. Members are selected from the upper fourth of the junior class and upper third of the senior class who have maintained a 3.00 or better cumulative grade point average.

Sigma Lambda Chi—Construction Engineering
The purpose is the recognition of outstanding students in construction engineering. Upperclass students in construction engineering may be initiated into the society providing they have an overall scholastic average in the upper 20 percent of their class.

Sigma Phi Omega, chapter Alpha Omega—Gerontology
National academic honor and professional society that recognizes excellence in the study of gerontology/aging, and serves as a link between gerontology educators, alumni, and local professionals. The mission of SPO is to promote scholarship, professionalism, friendship, and services to older persons, and to recognize exemplary attainment in gerontology/aging studies and related fields.

Sigma Tau Delta—English
An international English honor society, the purpose of this honorary is to confer distinction upon outstanding students of the English language and literature in undergraduate, graduate, and professional studies.

Sigma Xi—Research
Sigma Xi, the scientific research society, is a broad-based scientific honor society with over 500 chapters and clubs at universities and nonacademic scientific institutions. Sigma Xi awards associate membership to undergraduates and graduate students who have demonstrated research potential through participation in an original scientific research activity. Full membership in Sigma Xi recognizes a significant scientific research contribution.

Tau Beta Pi—Engineering
Tau Beta Pi honors engineering undergraduates, graduate students, and outstanding alumni who have distinguished themselves in scholarship and by exemplary character. Members are selected from engineering juniors in the upper eighth and seniors and graduate students in the upper fifth of their classes.

Upsilon Pi Epsilon—Computer Science
An honor society for computer science students.

Xi Sigma Pi—Forestry
An honor society that recognizes outstanding juniors, seniors, graduate students and faculty members in forestry. The objective is to encourage high professional standards in the profession of forestry and to promote fraternal relationships among foresters.

Distance Education

Iowa State University remains true to the land-grant tradition of extending knowledge far beyond campus borders. Faculty members provide cutting-edge information that helps people continue to learn and meet the demands of careers and society. Annually thousands of students enroll in Iowa State courses without setting foot in Ames. In addition to the traditional method of instructors traveling to classrooms off campus, Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, CD, and on the Iowa Communications Network (ICN).

Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

College distance education staff provides leadership in helping faculty identify the needs of Iowans and methods to reach adult learners. They also help students access services and information at the university.

For a list of courses and programs, visit www.distance.iastate.edu. Information on registering for distance education courses is available from the web site or from the Office of Registrar at 515-294-1889 (8am-4pm CT).

Certificate and Degree Programs Offered through Distance Education

College of Agriculture and Life Sciences

The College of Agriculture and Life Sciences Distance Education at Iowa State University provides the flexibility to enhance your career through online learning. Online courses and graduate programs allow you to remain at your present job and location while continuing your education and advancing in your field. You learn at a premier university from the most respected professors in their field through web-based interaction, streaming media or CD-ROM.

For more information contact College of Agriculture and Life Sciences distance education staff by email at agdecontact@iastate.edu or call (515)294-7656 or (800) 747-4478.

Master of Agriculture

via Web-based interaction, streaming media or CD-ROM

This program is the oldest on-line degree program in the College of Agriculture and Life Sciences. The goal of this program is to prepare individuals for proactive roles in addressing and responding to personal, professional, and societal issues and challenges in a changing food, agriculture and natural resources system through education and outreach in public and private agencies, and through training and development in business and industry. The intent of the program is to enable individuals to grow and develop as professionals, positioning themselves for emerging opportunities within or outside of their current employment.

This is a broad-based agricultural degree which includes courses in animal sciences, plant sciences, agricultural economics, agricultural education, research design or statistics, and sociology. Up to 10 credits may be transferred into the program. The degree is 32 credits including a creative component project.

Students are accepted from any part of the United States and Canada. Call (800) 747-4478 to learn more.

For more information contact:

Wade Miller, Professor & Coordinator of PROAG Program

Department of Agricultural Education and Studies

217 Curtiss Hall, Iowa State University, Ames, Iowa 50011

(515) 294-0895 or
e-mail: wwmiller@iastate.edu

Master of Science in Agricultural Education

via Web-based interaction, streaming media or CD-ROM

The program can be completed completely at a distance as there are no required on-campus courses or meetings. The program is designed for agriculture teachers in secondary and post-secondary settings, extension professionals, educators in public and private settings, and agricultural communicators. The flexibility of the program makes it possible for working professionals to obtain a master's while continuing to meet personal and professional responsibilities.

The curriculum is 30 semester hours and is flexible allowing you to create a program best suited to your needs, interests, and aspirations. You may choose to earn a specialization in agricultural extension education. Fifteen credits of required courses include: Foundations of Agricultural Education (AgEdS 550), Program Development and Evaluation in Agricultural and Extension Education (AgEdS 524), Introduction to Learning Theory in Agricultural Education (AgEdS 533), Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources (AgEdS 520), and Introduction to Research in Agricultural Education (AgEdS 510). The curriculum also includes 13 credits of electives, 2 credits of creative component, and a final oral examination. Up to 8 credits may be transferred from another university. A thesis option is available if you wish to pursue a Ph.D. or a research-oriented career.

Students are accepted from any part of the United States and Canada. Call (800) 747-4478 to learn more about the program.

For more information contact:

Greg Miller, Professor & Director of Graduate Education

Department of Agricultural Education and Studies

201Curtiss Hall, Iowa State University, Ames, Iowa 50011

(515) 294-2583 or
e-mail: gsmiller@iastate.edu

Master of Science in Agronomy

via Web-based interaction, streaming media or CD-ROM

Designed for professionals who are working in industry and government. The degree ensures you have an advanced knowledge of agronomic systems and superior problem-solving skills. The program emphasizes practical, professional, and technical skills involved in crop management, soil and water management, and integrated pest management.

The curriculum consists of 12 courses plus a one-credit workshop and a three-credit creative component, for a total of 40 credits. The workshop is the only course that requires attendance on campus—three or four days one summer. The course prerequisites for admission to the program are limited to fundamental agriculture courses, recognizing that many potential students will not have majored in agronomy as undergraduates.

Generally, students who have completed a degree from a College of Agriculture and Life Sciences will meet the requirements. Call (866) MSAGRON to learn more about the program.

For more information contact:

Jesse Drew, Department of Agronomy

2206 Agronomy, Iowa State University, Ames, Iowa 50011

(515) 294-2999 or e-mail: jd250@iastate.edu

Graduate Certificate in Food Safety and Defense

via Web-based interaction, streaming media or CD/DVD-ROM

The Food Safety & Defense Graduate Certificate Program is an inter-institutional certificate program offered in cooperation with Kansas State University Food Science Institute, University of Nebraska-Lincoln Food Science, and University of Missouri Food Science programs. These universities have established a multi-state agricultural consortium to develop and deliver high-priority collaborative distance education programs in the food and agricultural sciences. To find out more information about the online community development master's degree program, please visit www.fshn.hs.iastate.edu/grad/foodsafetycert.php.

For more information contact:

Suzanne Hendrich, Professor

220 MacKay, Iowa State University, Ames, Iowa 50011

(515) 294-4272 or
e-mail: shendric@iastate.edu

College of Engineering

Engineering Distance Education (EDE) and the College of Engineering have provided distance education since 1968. In 1969, Iowa State University received the National Extension Program Award for pioneering video based continuing education to working engineers. EDE offers streaming media based educational content accessible to anyone with a computer and connection to the Internet. For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Computer Engineering or Electrical Engineering

via streaming media

Study topics of emerging research and interest. Areas of emphases include communications and signal processing, computing and networking systems, electric power and energy systems, secure and reliable computing, software systems, and advanced materials and electronics. Each master's program totals 30 graduate credits; a thesis or non-thesis option may be selected.

Graduate Certificate in Environmental Engineering

via streaming media

Environmental engineering is a rapidly growing field. Graduate courses in the certificate program help practicing professionals update and acquire new skills. The technology-based studies prepare engineers for the challenges posed by an expanding industrial base and help ensure sustainable agricultural practices and quality municipal services.

The curriculum explores the theory of environmental chemistry and biotechnology, methodologies of environmental engineering, and applies conceptual and technical knowledge to real-world applications. The certificate is 12 credits including four courses and a seminar program. Seminar program can be substituted for an approved program of conference attendance and presenting a paper or seminar. For more information, send an email to leeuwen@iastate.edu or call 515-294-5251.

Master of Engineering in Industrial Engineering

via streaming media

The industrial engineering program combines engineering and business considerations. Engineers learn advanced concepts, theories, and methods for the design and analysis of complex systems. The program focuses on fundamental issues that relate directly to the economic health of industry; namely productivity, cost, quality, and lead time. Areas of specialization available by distance learning are applied operations research, enterprise informatics, advanced manufacturing, and ergonomics. The degree is 30 credits of coursework.

Master of Science in Mechanical Engineering

via streaming media

The mechanical engineering graduate program offers internationally acclaimed research programs in biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization. A student may apply instrumentation design of experiments, and computational methods to any of these areas. The program is 30 credits and has a thesis and non-thesis option

Our research and graduate programs are built upon a strong foundation comprising the core of mechanical engineering– thermal-fluid sciences, design and manufacturing, materials and mechanics, dynamic systems, and control. Our faculty members are experienced researchers and educators who are grounded in these fundamental disciplines and focused on solving timely problems that address important national global societal needs.

Graduate Certificate in Power Systems Engineering

via streaming media

Iowa State University has a long-standing international reputation for education and research in electric power engineering. The electrical and computer engineering department designed the 12-credit graduate certificate for power engineering specialists in government, private sector, and academia.

Upon completion of the program, power engineering specialists will be proficient in theory and modeling plus have the tools to perform engineering tasks related to planning and operating electric power generation, transmission, and distribution systems, plus knowledge of related public policy.

Master of Engineering in Systems Engineering

via streaming media

The systems engineering program develops the management capabilities needed in today's work environment. Engineers, regardless of undergraduate discipline, develop the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. The degree is 30 credits, typically including 24 credits of engineering courses distributed among three broad groups (systems engineering core courses, elective engineering courses, and area of specialization courses), and 6 credits of elective non-engineering courses.

Graduate Certificate in Systems Engineering

via streaming media

Certificate in Systems Engineering: The systems engineering certificate program develops the management capabilities needed in today's work environment. Engineers, regardless of undergraduate discipline, develop the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. The certificate is 13 credits consisting of two basic courses in systems engineering, a course in requirements development, a course in project management and a one-credit capstone project.

Master of Science in Civil Engineering specializing in Construction Engineering and Management

via streaming media

Construction Engineering and Management specialty provides a unique blend of technical and management education that will help you solve problems and compete in the ever-changing construction environment. The program focuses on the three functional areas of construction engineering and management: management techniques, construction operations, and construction methods.

The degree requires thirty credits. Fifteen credits are selected from the construction engineering and management specialty. With the remaining credits, students may explore related engineering, business, architecture and planning topics. Students will execute a two to four credit creative component related to their professional interest. Up to nine credits may be transferred with approval of the students plan of study committee.

College of Human Sciences

Master of Education or Science Principal licensure

Preparation for Leadership (PreLEAD) via a combination of methods at various sites around the state with some work online and via the Iowa Communications Network (ICN)

A master's program of 36 credits leads to licensing as a school administrator. Courses are structured to build leadership skills in organizational processes, scope and framework of schools, and interpersonal dimensions. Students are paired with practicing administrators, experiencing leadership roles firsthand. For more information, send an e-mail to educadmin@iastate.edu or call (515) 294-9734.

Doctor of Philosophy Superintendent licensure (Certificate of Advanced Studies)

via a combination including online, the Iowa Communications Network (ICN) and video conferencing

A post master's curriculum of 30 credits provides training for the school superintendent license. The program emphasizes leadership skills, child and adolescent development, curriculum and instruction, school law and ethics, resource management, community relationships, and data-driven decision making. For more information, send an e-mail to educadmin@iastate.edu or call (515) 294-9734.

Master of Education with specialization in curriculum and instructional technology
via blend of online and on campus

Designed to meet the needs of K-12 teachers and other educational practitioners, the three-year program is 32 credits offered in a learning community environment. The program is designed for those who want to earn a master's and are seeking leadership positions for infusing technology into teaching and learning environments. For more information, send an e-mail to citmed@iastate.edu or call (515) 294-5926.

Master of Family and Consumer Sciences
online

Delivered off-campus since 1994, the non-thesis master's is designed for working professionals to enhance skills in a current position and increase chances for promotion. The comprehensive degree requires a minimum of 18-21 credits from two or more family and consumer sciences departments. With electives, the degree program totals 36 credits. For more information, send an e-mail to mfcsinfo@iastate.edu or call (515) 294-0211 or (877) 891-5349.

Master of Family and Consumer Sciences with specialization in Dietetics
online

Dietetics is the study of nutrition and how food impacts our health and well-being. Dietitians work in a variety of settings including hospitals, businesses, community health and wellness areas.

The program is inter-institutional and is designed for the Registered Dietitian. Topics include nutrition across the lifespan, nutrigenomics, medical nutrition therapy, business and management, and professional leadership. The 36-credit master's program includes 15 elective credits to tailor the program. For more information, send an e-mail to mfcsinfo@iastate.edu or call (515) 294-5186 or (877) 891-5349.

Master of Family and Consumer Sciences with specialization in family financial planning

Graduate Certificate in Family Financial Planning
online

Financial planners are increasingly in demand as Americans seek help managing their income, assets, and debts. Iowa State joined other universities to create an inter-institutional program. After being admitted to one of the participating universities, students take online courses from all the universities.

Courses cover financial counseling, personal taxation, insurance, retirement planning, and employee benefits. The non-thesis program is 42-credits. The graduate certificate is 18 credits. Completing either the master's or the certificate meets the educational requirements for the Certified Financial Planner™ examination. For more information, send an e-mail to mfcsinfo@iastate.edu or call (515) 294-2731 or (877) 891-5349.

Master of Family and Consumer Sciences with specialization in gerontology

Graduate Certificate in Gerontology
online

Gerontology is the multidisciplinary study of the aging processes and individuals as they grow from middle age through later life. People enter gerontology from many areas such as social work, nursing, counseling, recreation, public policy, long-term care administration, medicine, architecture, psychology, adult education, and rehabilitation therapy.

The program is inter-institutional. Topics include adult development, family relations, economics and public policy, environmental considerations, and health and nutrition. The 36-credit master's program includes 12 elective credits to tailor the program. The certificate is 21 credits. For more information, send an e-mail to mfcsinfo@iastate.edu or call (515) 294-5186 or (877) 891-5349.

Leadership Academies
via blend of online and several intensive summer weeks on campus

Master of Science or Master of Education or Doctor of Philosophy in Family and Consumer Sciences Education
The leadership academy for a longstanding, prestigious graduate program was begun in 2002. Visiting professors from across North America teach. Either master's degree is 30 credits. The doctorate is 72 credits. For more information, send an e-mail to haus@iastate.edu or call (515) 294-5307 or (877) 891-5349.

Doctor of Philosophy in Foodservice and Lodging Management
The Child Nutrition Program Leadership Academy is a new delivery format for the longstanding and prestigious graduate program in Foodservice and Lodging Management (formerly Hotel, Restaurant, and Institution Management). The Leadership Academy is designed to meet the needs of professionals employed in the school foodservice industry. The doctorate is 78 credits; up to 30 credits may be accepted from a master's degree.

For more information, send an e-mail to jsneed@iastate.edu or call (515) 294-8474.

College of Business
Master of Business Administration in Des Moines
Students progress through the core curriculum in a cohort, allowing camaraderie with colleagues from a variety of businesses and industries.

The program is 48 credits. The first four semesters help build a strong foundation of core business knowledge; the final four semesters are tailored to academic and career goals.

Students may concentrate on a general management MBA or specialize in finance, information systems, or marketing. A double degree, MBA and Master of Science in Information Systems, is also offered. For more information, send an e-mail to busgrad@iastate.edu or call (515) 294-8118 or (877) 478-4622.

College of Liberal Arts and Sciences
Bachelor of Liberal Studies
via a combination of distance learning options

The Bachelor of Liberal Studies (BLS) is a general studies degree in the liberal arts. It provides the flexibility to choose courses based on interests and goals. Course work is selected from three of the following five distribution areas: humanities, communications and arts, natural sciences and mathematical disciplines, social sciences, and professional fields.

The BLS degree is offered with similar requirements by all three Iowa public universities, and provides a framework to assemble the educational opportunities locally available. Up to three-fourths of the degree requirements may be transferred from accredited institutions. For more information, send an e-mail to las@iastate.edu or call (515) 294-4831.

Master of Public Administration

Graduate Certificate of Public Management
via web conferencing and streaming media

Prepare for public service leadership in public administration, whether with government, nonprofit agencies, or private organizations working with governments. The public administration programs are designed to prepare or improve the performance level of mid-career public managers and administrators.

Iowa State's Master of Public Administration is accredited by the National Association of Schools of Public Affairs and Administration. This degree program requires 37 credits. Select an area of concentration from e-Government and management of information technology, public management, and policy analysis. The certificate requires 15 graduate credits. For more information, send an e-mail to mpa@iastate.edu or call (515) 294-3764.

Master of School Mathematics
via distance learning

This program, administered by the Department of Mathematics, is designed for secondary mathematics teachers. The degree is built on three objectives: enhanced knowledge of algebra, geometry, calculus, statistics, and discrete mathematics; effective strategies for creating a student-centered classroom emphasizing problem solving; and computing technology in learning and teaching mathematics.

The program requires 33 credits and includes a creative component. For more information, send an e-mail to msm@math.iastate.edu or call (515) 294-0393.

Master of Science in Statistics
via distance learning

The Department of Statistics offers courses and the degree to employees of companies who sign a letter of agreement with Iowa State. The degree is the same as on campus; the program requirements are the same including the written master's exam, creative component, and a final oral exam. For more information, send an e-mail to statistics@iastate.edu or call (515) 294-3440.

Interdisciplinary – Multiple Colleges

Graduate Certificate in Biorenewable Resources

via streaming media

Through a series of twelve credit hours of graduate coursework, the Biorenewable Resources and Technology certificate will offer students from a wide variety of science and engineering backgrounds an exposure to advanced study in the use of plant- and crop-based resources for the production of biobased products, including fuels, chemicals, materials, and energy. The program aims to train professionals to serve the emerging bioeconomy, and in so doing to serve state, national, and global needs in moving toward a more sustainable industrial economy.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Biorenewable Resources

via streaming media

Iowa State University recently established the first graduate program in biorenewable resources and technology in the United States; and is happy to announce that the Masters Program is now 100% online! The Biorenewable Resources and Technology program offers students from a wide variety of science and engineering backgrounds advanced study in the use of plant- and crop-based resources for the production of biobased products, including fuels, chemicals, materials, and energy.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Graduate Certificate in Human Computer Interaction

via streaming media

Human computer interaction is the interdisciplinary study of the relationship between humans and increasingly powerful, yet portable computers. The accelerating integration of technology into every aspect of society demands professionals who employ novel solutions needed to integrate usefulness and usability while minimizing intrusiveness.

The curriculum in human computer interaction provides an understanding of emerging interface technologies; explores human cognition, behavioral methods, and usability techniques; and highlights the latest research. The interdisciplinary program draws courses from industrial, computer, and mechanical engineering; psychology; computer science; and management information systems among other disciplines. The certificate program is 12 credits, which includes four graduate courses.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Human Computer Interaction

via streaming media

The accelerating integration of technology into every aspect of society will demand professionals trained with information technology skills that are augmented by an understanding of the human user. This interdisciplinary degree program was created from the growing demand from business and industry for a masters program that provides education in the field of Human Computer Interaction. The curriculum in human computer interaction is very flexible. Students are required to take three core courses and elective courses from disciplines of their interest. The program consists of 27 credits of coursework plus 3 credit Capstone Course. The Capstone Course project will use the knowledge gained from the course work to demonstrate that the student has mastered important HCI related skills.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Information Assurance

Graduate Certificate in Information Assurance

via streaming media

Faculty members from six academic departments contribute to securing information in application areas ranging from software to networks to electronic democracy. Computer engineering is the home department for the distance learning graduate programs which meet the needs of information system security specialists in government, the private sector, and educational institutions. The master's program is 30 credits. The certificate is four computer engineering courses.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Interdisciplinary Studies, Community Development specialization

via Web-based interaction, streaming media or CD/DVD-ROM

Global economic restructuring and the devolution of government services have created significant challenges for communities, particularly those in rural areas. This specialization in community development provides the skills, information, and networks to facilitate sustainable and prosperous community change. The program is designed for those seeking a career in community development and practitioners who wish to augment their training.

In 2005 Iowa State joined five other universities to offer a master's in community development. The 36-credit program has three tracks: natural resource management, working with native communities, and building economic capacity.

Coordinated by the College of Agriculture and Life Sciences.

For more information contact:

Cornelia Flora, Professor
107 Curtiss Hall, Iowa State University
Ames, Iowa 50011

(515) 294-1329 or e-mail: cflora@iastate.edu

Master of Science in Seed Technology and Business

via Web-based interaction, streaming media or CD-ROM

The program is specifically oriented to prepare students for management roles. Designed for professionals working in industry and government, the degree ensures an advanced knowledge of seed science, technology and basic business and problem-solving skills. It emphasizes decision making for application to practical and technical issues in all aspects of the seed business.

The curriculum consists of 15 courses and a three or four-credit creative component. The program is a non-thesis degree. The admission requirements are a four year degree in either agriculture or business; graduation in the top quarter of your class; and GRE (Q) 570 or better, GRE (V) 500 or better or GMAT 570 or better. Appropriate four year degrees in biological sciences or related fields may also be accepted.

Coordinated by the College of Agriculture and Life Sciences.

For more information:

Paul Christensen, Manager Seed Technology and Business Program
102a Seed Science Building
Iowa State University,
Ames, Iowa 50011-3228
(515) 294-8745 or

Continuing Education and Professional Development

The mission of Continuing Education and Professional Development (CEPD) is to provide high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transitions, and academic growth.

CEPD supports Iowa State University's outreach mission and to facilitate access to excellence in education for a diverse community of adult learners within Iowa and beyond by utilizing technologies that expand access.

CEPD offers both Continuing Education Units (CEUs) and non-CEU courses, workshops, conferences and other educational activities sponsored by Iowa State University. While these programs do not carry academic credits, they are designed to ensure that a student's continuing education and professional needs are met.

For a list of courses and programs, or to request specific courses and programs, visit cepd.iastate.edu, or call (515) 294-6222. Information also is available at the Iowa State University Extension offices across the state.

Research and Extension

Research

Research is an important activity at Iowa State University. Faculty members engage in research pursuits as well as teaching. Graduate students, and in some cases undergraduates, play an active part in this search for new knowledge.

Support for research at Iowa State University comes from state and federal appropriations as well as from contracts and grants involving the federal government and nonfederal organizations. As part of its total program, the university also operates extension services, special laboratories, centers, and institutes.

Official Research, Outreach, and/or Instructional Centers and Institutes at ISU as Recognized by the Board of Regents, State of Iowa, are listed at http://www.vpresearch.iastate.edu/docs/centers.pdf. Additional information concerning any of these organizations and student research opportunities they support may be obtained from their administrative offices.

Iowa State University Extension

Iowa State University Extension builds partnerships and provides research-based learning opportunities to improve quality of life in Iowa. ISU Extension continues to lead the university-wide effort to engage Iowans with education and information about their issues and priorities for healthy people, healthy environments, and healthy economies

Iowa State University is the state's land-grant institution with the mission of creating, sharing, and applying knowledge. Historically, ISU Extension has led the university in its formal engagement mission to Iowans. With an active partnership and presence in every county, ISU Extension engages the people of Iowa with education and information in the following areas:

Agriculture and Natural Resources. ISU Extension provides unbiased, research-based information and education to agricultural professionals to grow the economic base of Iowa agriculture.

Business and Industry. Extension's Center for industrial Research and Service (CIRAS) enhances the performance of Iowa business and industry through research, education, and technical assistance.

Community and Economic Development. ISU Extension helps organizations and local governments make Iowa communities better places to live and work, with programs and services in community leadership, management, and policy and design development.

Families. ISU Extension reaches out to families across the lifespan, providing research-based information and education to help families make decisions that improve and transform their lives.

4-H Youth Development. ISU Extension helps kids and teens develop communication skills, give back to their communities, and learn to be leaders for Iowa's future.

Continuing and Distance Education. Through Continuing Education and Professional Development (CEPD), ISU Extension provides high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transitions, and academic growth.

Academic Life

Academic Advising

Academic advising is an intentional, collaborative relationship based on trust and mutual respect that promotes the student's development of competence, autonomy, and sound decision making skills. Adviser-student interactions are grounded in teaching and learning and are vital in promoting student growth and personal development through learning, discovery, and engagement. Academic advising supports the mission of the University.

Academic Advising Process

All undergraduate students are assigned an academic adviser based on their major/ curriculum. A new adviser assignment is made when a student changes majors/curricula. Advisers serve as a primary resource for students, connecting them with the wide variety of services and academic opportunities available to them. The advising experience begins during the prospective student stage and continues through graduation. The goal of academic advising is an individualized academic experience for each student developed through a mentoring relationship.

Academic Advising Responsibilities

A successful academic advising relationship involves fulfillment of responsibilities on the part of both the student and the academic adviser.

Student responsibilities include:

- knowing Iowa State University policies and procedures
- knowing graduation requirements for degree program
- understanding and accepting the consequences of their academic decisions
- seeking, evaluating, and acting upon advising assistance
- taking responsibility for accomplishing his/her degree plan

Academic Adviser responsibilities include:

- assisting students in achieving the learning outcomes of their academic program, their college, and the university
- referring students to appropriate campus resources
- empowering students to develop an academic plan appropriate to the student's abilities, interests, academic and career goals
- communicating university policies and procedures accurately

Learning Communities

www.lc.iastate.edu

Learning communities are a university-wide initiative providing students the opportunity to connect with peers who have similar academic goals. Students in learning communities typically take one to three courses together and may live together (or near each other) in the same residence hall. Although many of the learning communities are focused on first-year students, opportunities are available for sophomores, juniors, and transfer students.

In addition to developing academic and social networks, advantages of joining a learning community include: getting to know people and making friends in your major or area of interest, getting to know faculty and staff members, making a smooth transition from high school to college, making connections between in-class and out-of-class learning, applying classroom learning to real world situations through hands-on experiences, exploring career opportunities, and having fun! Most learning communities employ an upper-division student as a peer mentor who organizes various activities for the students, ranging from study groups to social events. We have found that students in learning communities are more satisfied with their overall experience at Iowa State, earn higher first-term grades, are more likely to remain enrolled at Iowa State after one year, and are more likely to graduate.

First-year students are offered the opportunity to sign up for learning community courses during summer orientation. For learning communities that offer a residential living environment the sign up takes place online with the housing contract.

Any student interested in joining a learning community should contact the learning community coordinator for more information. A list of coordinators, along with current opportunities, can be found at www.lc.iastate.edu.

AccessPlus Information System

accessplus.iastate.edu

AccessPlus is a secure and confidential campus information system that is available via the World Wide Web. Students, employees, and affiliates view personalized menus from campus and home workstations. For public convenience, AccessPlus stations are available in the Memorial Union and at the Visitors Information Center. Students can use AccessPlus to register for classes, view and print current term schedules, view class meeting rooms, class instructors, academic records, final grades, financial aid status, current university bill, academic adviser assignment and projected date of graduation. University employees use the system to view personal information such as pay history and insurance. Some employees also perform business-related functions. Information about and access to AccessPlus may be found at www.iastate.edu/~registrar/info/access.html or accessplus.iastate.edu.

Third Party Access on AccessPlus

Third party access is an option in AccessPlus that allows students to grant access to selected personal information to a trusted third party. For example, Third Party Access allows a student to set up a special account for a parent or family member to view their grades and/or pay their university bill. More information on creating third party accounts is available from Help after signing onto AccessPlus at https://accessplus.iastate.edu/frontdoor/tpa-info.jsp

Policies for Graduate Students

The Graduate College has specific policies approved by the Graduate College body. The *Graduate College Handbook* is the official source for all policies related to graduate students. See http://www.grad-college.iastate.edu/publications/gchandbook/ for the latest updated information.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. Dean's List. Each semester the university issues a dean's list made up of those students who have carried at least 12 hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-hour requirement. No dean's list is issued for summer school. The list can be viewed at http://www.iastate.edu/~registrar/info/deanslist.pdf
2. Annual Scholars and Leaders Ceremony. In the spring the university sponsors a ceremony at which exemplary student leaders and high scholarship students in all classes are recognized.
3. Graduation with Distinction. Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits.

   Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student's official transcript and diploma and in the commencement program.

   Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

4. Honors Program. Students who are full members of the University Honors Program have a cumulative grade point average of 3.35 or higher at the beginning of their final term. In addition, they will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student's permanent record and diploma, and in the commencement program.

Academic Privileges and Opportunities

Credit by Examination

Academic credit may be earned by means of special examinations. The Credit by Examination (CBE) program is available to current Iowa State students as well as prospective and entering students. Students with college-level proficiency in particular areas are encouraged to investigate credit by examination early in their college careers. For more information, see Index, Credit by Examination.

Pass-Not Pass Grading

Students may choose to take a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who have earned at least 40 semester credits and who are not on academic probation (P) at the beginning of the semester are eligible. A special student must obtain approval from their academic adviser and college dean.
2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.
3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.
4. Courses offered on a satisfactory-fail basis may not be taken P-NP.
5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser's signature in the P-NP approval section of the form.
6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.
7. Changes to or from a P-NP basis must be made before the last day to drop (usually the Friday of week 10 of the term). If the change from P-NP to a graded basis is made after the first 10 class days of a semester (first five days of summer session), the course will count toward the total P-NP credits allowed.
8. Registration on a P-NP basis is not indicated on the instructor's class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.
9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student's grade point average (GPA).
10. Students who pass a course taken under the P-NP system may not repeat the course. When students have taken a course and received a grade, they may not repeat it for P-NP credit.
11. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.
12. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student's degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student's degree program.

Auditing

To audit a course means to enroll in the course without receiving credit for the course. The instructor of the course approves the audit request.

Students are assessed fees as though they are taking the course for credit, but the audited course does not count in determining full-time student status. However, an audited course does count towards the maximum allowable credits per semester. Audited courses do not apply toward V.A. benefits.

Graduate students: An audited course counts as one credit in the graduate student's allowable course load; however, fees will be assessed for the full number of credits for the course. See Index, Graduate College.

Changing status to audit: Changing a course from credit to audit requires dropping the course for credit and adding it as an audit on a schedule change request form. After day 5 of the semester, the drop will count toward the total allowable ISU drops. The drop appears on the student's permanent record and a drop fee will be assessed to the student's university bill.

Rights and privileges: Once enrolled in an audited course, auditors have the same rights and privileges as any student taking the course for credit. Their names appear on the class list with a notation that they are auditing the course. Audited courses do not appear on the student's permanent record except by special request from the student. A request form can be downloaded from the Office of the Registrar web site at www.iastate.edu/~registrar/forms.

Undergraduate students need approval from the instructor as well as their adviser, and college; graduate students need approval from the instructor as well as their major professor and the Graduate College.

Audit Deadlines
In addition to the deadlines provided below, note that instructors must approve all audits.

- Full semester courses:
  Adding an audit–day 10 deadline:
  –Through day 5 of classes: instructor approval required.
  –Day 6-10: instructor, adviser approval required; schedule change fee applies.
  –After day 10: only with extenuating circumstances, instructor, adviser, college approval required; schedule change fee applies.

  Changing status, from credit to audit–day 10 deadline:
  –Through day 5 of classes: instructor approval required.
  –Day 6-10: instructor, adviser, college approval required; schedule change fee applies.
  –After day 10: only with extenuating circumstances, instructor, adviser, college approval required; schedule change fee applies.

  Changing status from audit to credit–day 5 deadline:
  –Through day 5 of classes: instructor approval required.
  –After day 5: instructor, adviser, college approval required; schedule change fee applies.

- Partial semester or summer courses: Deadlines are determined based on the length of the course. For deadlines concerning partial term or summer courses, contact the Student Scheduling Office, 515-294-2331.

Independent Study

Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department's prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student's work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work he or she will do for that credit, and the system by which she or he will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor's permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.

Progressing Toward a Degree

Classification

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school.

Classification in all colleges except Veterinary Medicine is as follows:

Sophomore: 30 credit hours earned

Junior: 60 credit hours earned

Senior: 90 credit hours earned

Students who have a bachelor's degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as a special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student's college, based on relevance to the students' program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student's Iowa State cumulative grade point average.

A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student has a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Degree Planning - ISU Degree Audit

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus. The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student's curriculum.

Students should use the degree audit information to help them review progress towards their degrees(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will have completed all degree requirements upon successful completion of the courses on the student's schedule that term.

In addition, through AccessPlus, students may request a "What If" degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress courses apply toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

Two Bachelor's Degrees

Students may receive two bachelor's degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form, Request for Double Major/Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will have access to the student's information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor's Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

Double Major/Curriculum

A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, "Request for a Double Major/Curriculum or Two Degrees." This form, available from advisers and classification offices, should be completed at least one term prior to graduation. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student's rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student's registration adviser, but both advisers will have

access to the student's information. Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

Second Major (Curriculum) Completed after the Bachelor's Degree

After receiving a bachelor's degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean's office.

Changing Curriculum or Major

A student's freedom to change their major, and the procedure that should be followed, depend on the student's academic standing and on policies of individual colleges as approved by the provost.

1. If students are not on academic probation (P) and have never been dismissed and reinstated, they may change their major by consulting first with their adviser. (If, however, they have been on academic probation in the past, they may also be subject to regulation 4, below.) Beyond that, they should follow these procedures:
   a. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
   b. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and their file from their adviser, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.
2. Students on academic probation (P) must first obtain permission to enter the new major. Permission comes from the dean of the college responsible for that major in consultation with the department head. If permission is granted, students should then follow the procedures described above. If they are on academic probation and want to transfer to another college in the university, they must do so before the last day to drop a course in period 2 (see Index, Making Schedule Changes).
3. Students who have been reinstated may not transfer to another college during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.
4. Students who transferred from one college to another while on academic probation, (P) may not transfer back unless they have the permission of the academic standards committee of the college from which they originally transferred.

Declaring a Minor

Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students' transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. For additional information regarding policies which govern minors, see Index, Minor. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student's transcript

Graduation

Seniors must file a graduation application with the Graduation Office, 214 Enrollment Services Center, by the Friday of the first week of classes for students who plan to graduate in fall and spring semesters, and the last day of spring semester for students who plan to graduate in summer. Applications may be obtained from the adviser; college office; www.iastate.edu/~registrar/forms; the Student Answer Center, or the Graduation Office, 214 Enrollment Services Center. Students will be notified of their graduation status by mail approximately four weeks after the semester begins.

Individual college graduation activities take place at the end of fall and spring semesters. The formal commencement ceremonies are held at the end of the semester. For more information see www.iastate.edu/~registrar/graduation

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. Registration for the term has been completed and the date of graduation is correct on the degree audit printout.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State and have also met any special grade point averages required by their college, department, or program in specified groups of courses.
   a. Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.

b. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.

5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.
7. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their diploma or transcript. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.

Evaluation of Academic Progress

Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students' learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   a. The course is multi-sectioned.
   b. A common departmentally developed examination will be administered to all students in all sections at the same time.
   c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.

Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
   a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
   b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
   c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
   d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
   e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
   f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Dead Week

The last week of fall and spring undergraduate classes has been designated Dead Week by the Government of the Student Body and Iowa State University. The intent is to provide students with time for review and preparation for final examinations. Therefore, no student organization registered with the Student Organization Office may hold meetings or sponsor events without the expressed permission of Program Coordinator in the Student Activities Center, Memorial Union. For academic programs, the last week of classes is considered to be a normal week in the semester except that in developing their syllabi faculty shall consider the following guidelines:

1. Mandatory final examinations in any course may not be given during Dead Week except for laboratory courses and for those classes meeting once a week only and for which there is no contact during the normal final exam week. Take-home final exams and small quizzes are generally acceptable. (For example, quizzes worth no more than 10 percent of the final grade and/or that cover no more than one-fourth of assigned reading material in the course could be given.)
2. Major course assignments should be assigned prior to Dead Week (major assignments include major research papers, projects, etc.). Any modifications to assignments should be made in a timely fashion to give students adequate time to complete the assignments.

3. Major course assignments should be due no later than the Friday prior to Dead Week. Exceptions include class presentations by students, semester-long projects such as a design project assignment in lieu of a final, and extensions of the deadline requested by individual students.

   Instructors are reminded that most students are enrolled in several courses each semester, and widespread violation of these guidelines can cause student workloads to be excessive as students begin their preparation for final examinations. Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

Grading System

Grades represent the permanent official record of a student's academic performance. The grading system at Iowa State operates according to the following regulations:

1. Student performance or status is recorded by the grades and marks described below. A student's grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor's degree.

Grades	Quality Points
A	4.00
A–	3.67
B+	3.33
B	3.00
B–	2.67
C+	2.33
C	2.00
C–	1.67
D+	1.33
D	1.00
D–	0.67
F	0.00

P—Passing mark obtained under the Pass-Not Pass system. See Index, Pass-Not Pass.

NP—Non-passing mark obtained under the Pass-Not Pass system. See Index, Pass-Not Pass.

S—Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (required-credit) courses, and in courses numbered 290, 490, 590, and 690.

T—Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.

X—The course was officially dropped by the student after the first week of the term.

N—No report was submitted by the instructor. This is not a recognized grade or mark; it merely indicates the instructor has not submitted a grade and that a grade report has been requested.

I—Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student's control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.

The student and instructor must complete and sign an incomplete contract (Incomplete Mark Report form) that states the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year. The instructor then submits an I for the final grade and sends the form to the Office of the Registrar. If the student is not available at the end of the term to sign the Incomplete Mark Report form because of ill health or other reasons, the instructor may assign an incomplete mark and submit the form without the student's signature. The Office of the Registrar will record the incomplete mark and mail a copy of the form to the student. If the student chooses not to accept the incomplete, the student has until midterm of the following semester to contact his or her instructor and request a grade be submitted to the registrar. If the student has not contacted the instructor by midterm, the student must resolve the incomplete according to the conditions set forth in the Incomplete Mark Report form.

When a student completes the requirements specified on the Incomplete Mark Report form, the instructor submits the appropriate grade, which becomes part of the student's cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, may not be changed to an Incomplete except to correct an error at the request of the instructor and with the approval of the instructor's department head and the dean of the instructor's college. The instructor should send a card (Grade Report to the Registrar) reporting the change, and an Incomplete Mark Report form to the appropriate dean who will forward them to the registrar if the change is approved.

Incompletes in all courses must be resolved by the middle of the student's term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

2. To change a grade or mark already reported to the registrar, the instructor submits a change card (Grade Report to the Registrar). This card is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

3. Midterm Grades. The registrar will collect C-, D, and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisers using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

   The purpose of midterm grades is to provide the student and adviser with a timely warning that the student's academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

4. Grades in all courses attempted remain on each student's record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.5. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average. If a course is repeated, the cumulative grade point average is calculated according to the process described in item 6a below.

6. Repeating Courses.

   a. The most recent grade for a course a student repeats will be used in computing the student's cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student's record.

   b. Students may repeat any course for which an F grade or any passing grade except P or S was received, but they may not elect to repeat the course under the Pass-Not Pass system.

   c. Beyond 15 credits of repeats, both grades will be included in computing the cumulative grade point average.

   d. Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.

   e. Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student's adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.

   f. Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.

g. A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.

7. Students who want to protest a grade submitted by an instructor should follow the procedures described in the section, Appeal of Academic Grievances.

Academic Progress

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate.

Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval.

The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university's academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee's judgment, the student's academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student's ISU cumulative grade point average, are subject to Iowa State University's academic standards.

Academic Probation Policy

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university.

Students who are placed on academic probation should immediately seek assistance in academic improvement from such sources as academic advisers, instructors, the Student Counseling Service, and the Academic Success Center.

Academic Warning, Probation, and Dismissal

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student's semester grade point average (GPA), the student's cumulative ISU GPA, and the student's transfer GPA (if below 2.00.)

Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center.
A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student's permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

• Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or

• They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Academic probation is an indication of very serious academic difficulty which may result in dismissal from the university. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both.

Students who are placed on academic probation are required to develop a plan for academic improvement in consultation with their academic adviser which may include referral to the Academic Success Center. Academic probation status is not a part of the student's permanent academic record.

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.

2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

• Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA. At the end of any spring semester, students in dismissal status may enroll for summer term. (See Summer Option for Students in Dismissal Status in the Summer Academic Standards Regulations section.)

• Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).

• Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal
Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student's academic record as a permanent notation. The official transcript of a student who has been dismissed includes a "not in good standing" notation.

Summer Academic Standards Regulations

Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:
All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student's grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Summer Cumulative GPA:
A student who was on academic probation (P) at the beginning of summer term based only on cumulative GPA, who raises his or her cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA < 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

Summer Option for Students in Dismissal Status:
A student considered for academic dismissal at the end of spring semester will be permitted to enroll for the summer term. The combined spring/summer GPA will be used to determine whether the student should be permitted to continue his/her enrollment after the summer term. If the resulting combined term GPA is not 2.00 or greater, the student will be academically dismissed.

Additional Academic Standards Regulations

Changing colleges: A student on academic probation (P) may transfer to another college within the university only with the permission of the department chair of the new department and the dean of the new college. For students on academic probation (P), transfer during period 3 (i.e., after the last day to drop a course) may be approved by the department chair of the new department and the dean of the new college only under exceptional circumstances.

A student who has transferred from a college while on academic probation (P) cannot transfer back unless permission is granted by the academic standards committee of the original college.

A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.

Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.

Special students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

Reinstatement

The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean's office in the college they wish to enter for instructions specific to that college.

   The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.
2. Students can only be reinstated after at least one academic semester has elapsed since they were academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.
3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academic dismissal.
4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student's academic standing when the transfer is requested.
5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 12 or more months or who are international students must also file a reentry form prior to their return. http://www.public.iastate.edu/~registrar/info/ug-reentry.html (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)
6. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal

Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee's action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee's action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee's action. The dean must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal Policy

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:
   a. Students must not have enrolled at Iowa State University for five or more consecutive years.
   b. Students must not have graduated from Iowa State University.
   c. Students must currently be in good academic standing. (If the student was previously dismissed, he or she must be reinstated.)
2. Conditions. Academic renewal is based on the following conditions:
   a. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.
   b. Renewal may be applied only to academic terms completed prior to the students' extended absence.
   c. All courses and grades for the chosen terms will remain on the students' academic record.
   d. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
   e. Students who have used all of their drop options will be given one extra drop.
   f. Students may be granted only one academic renewal.

   To be eligible for a degree after academic renewal is granted, students must complete a minimum of 24 credit hours at Iowa State University.
3. Procedures.
   a. Students should discuss their desire to pursue academic renewal with an adviser in the college they wish to enter.
   b. The student must complete the Academic Renewal Petition form available from www.iastate.edu/~registrar/forms.
   c. After the form is signed by the student and academic adviser, it is submitted to the Records area in the Office of the Registrar, 214 Enrollment Services Center.

Satisfactory Academic Progress for Financial Aid Recipients

In order to remain eligible to receive financial aid from the student aid programs listed below, a student must meet both quantitative and qualitative academic standards as described within this policy. These standards are minimum expectations; specific aid programs may require a higher level of progress. A student not in compliance will be unable to receive aid from these programs until the deficiency has been corrected. Progress toward a degree will be reviewed each term and enforced at intervals no longer than one year. The programs affected by this policy are:

Federal, state, and institutional grants
Federal student and parent loans
Some private student loans

1. The qualitative academic standard for undergraduate students is to maintain a cumulative grade point average of a 2.0 or higher.
2. The quantitative academic standard for full-time undergraduate students is described below:
   a. Duration of eligibility. Students may receive federal, state, and institutional aid for a maximum of six academic years or twelve semesters. Students who have not accumulated sufficient credit hours at the end of this time period to complete their course of study will not be eligible to continue to receive financial aid.
   b. Annual credit hours to be earned. An undergraduate student who receives financial aid from one or more of the programs cited above must complete credit at a rate at least equal to the scale below, where the numbers in the top row indicate academic years completed, and those in the bottom row indicate credit hours required:

1	2	3	4	5	6
15	30	51	72	96	120

3. The quantitative academic standard for all part-time students is as follows:
   a. The duration of eligibility for part-time students is the same as above, but adjusted by the rate of attendance. For example, a student with a maximum duration of six years who is attending school half-time would have the duration of eligibility adjusted to twelve years.
   b. Part-time students who are otherwise eligible for financial aid must maintain the academic standards or rate of completion as stated above, adjusted by the number of hours attempted at the time the financial aid was disbursed.

      9 to 11 credit hours = 3/4 time

      6 to 8 credit hours = 1/2 time
4. Regaining eligibility. If a student is denied financial aid because of failure to comply with the above standards, the additionally required credit must be earned at the student's own expense at Iowa State University, or the student must transfer sufficient hours taken at another institution to make up the deficiency.
5. Transfer students. A student transferring to Iowa State University for the first time will be treated as a first-term student and will not be held responsible for previous terms or credit hours taken at former institutions. If a student attends Iowa State University, transfers to another institution, and then transfers back to Iowa State, the credits earned at the other institution will be added to the student's total earned credit hours.
6. Noncredit courses. Noncredit courses may be converted to credit hours by translating weekly contact hours as defined by the Office of the Registrar.
7. Appeals. Students ineligible for financial aid as a result of this policy, or ineligible for any other reason, may appeal this decision by submitting in writing extenuating circumstances beyond their control that affected their progress to the Office of Student Financial Aid. Forms for this purpose are available on the Student Financial Aid web site at www.financialaid.iastate.edu/.

   The appeal must be signed by the student's academic adviser. If this appeal is denied, a further appeal may be made to a committee composed of the chair of the University Financial Aid Committee, the chair of the University Academic Advising Committee, and the director of Student Financial Aid. Appeals of other financial aid decisions, including loss of athletic grants-in-aid, shall also follow this procedure.
8. General Information and Definitions
   a. Incompletes, repeated courses, withdrawals. A student who receives an Incomplete, repeats a course, or withdraws may continue to receive financial aid upon reentering the university as long as the student completes the required credit hours for each academic school year and maintains the minimum grade point average standards. However, the duration of eligibility will not be extended for a student who withdraws or repeats a course. (See the section Duration of Eligibility.)
   b. Exceptions to the policy.

      ((1) Veterinary Medicine students. For those students enrolled in the College of Veterinary Medicine, eligibility will be based on the academic criteria of the college.

      (2) All other Graduate students. For academic standing and time-to-degree standards please see the Graduate College Handbook.
   c. Academic school year. This includes the summer session and regular semesters within any 12-month period. Credits earned during the summer session will be included when totaling credit hours earned each academic year.
   d. Changes in program of study. The duration of eligibility will not be extended for a student who changes from one program of study to another. (See Duration of Eligibility, in the section, Satisfactory Academic Progress for Financial Aid Recipients.)

These academic progress criteria are defined in minimal terms. If the student earns only the minimum credit hours for financial aid eligibility, the student's total eligibility for particular programs may be exhausted prior to degree completion. (See the Duration of Eligibility and credit hour earning scale.) In addition, the student's college or department may require more credit hours than required by this policy.

Sources of Help with Academic Problems

If students are having trouble in a course, the following persons and places may be able to provide help:

1. The instructor of the course should be the primary sources of assistance to enhance the student's academic achievement in the course. Students are encouraged to visit the instructor during stated office hours and seek individual assistance from the instructor if that is not possible.
2. Another valuable source of support is the student's academic adviser, who often can help clarify academic issues and can recommend support services or remedial strategies.
3. The Academic Success Center in the Hixson-Lied Student Success Center has a collection of services such as tutoring, supplemental instruction (SI), the academic success course, learning lab, disability resources, and workshops designed to help students reach their academic goals.
4. The office of the department that offers the course may have a list of persons qualified to provide tutoring services for the course. They also may have help rooms or other support programs. The locations of the department offices are listed in the front of the ISU Directory.
5. The Student Counseling Service provides professional counseling services for students with problems which affect academic performance.

Appeal of Academic Grievances

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an appeal more than one year following completion of the course, and may not initiate the appeal of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal appeal, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor's department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal in writing to the dean of the instructor's college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair's decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor's college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within ten class days of receipt of the written notice of the appeal.

Within five class days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost's decision may be made to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Government of the Student Body. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

Academic Regulations

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validation of Enrollment for regulations concerning attendance to validate students' enrollment in a class.

Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course. Generally, students are expected to attend all class meetings as scheduled.

Veteran Attendance

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available on the Web, www.iastate.edu/~registrar/info/vabeneft.shtml

Field Trips

Trips away from campus are sometimes arranged as a means of enriching the students' learning experience in a given course. Such trips may not take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday through Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Faculty should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

In order to go on a field trip required in one of their courses, students must first obtain permission from the instructors whose classes they will miss. If permission to miss class is not granted, students cannot be required to go on the field trip nor can they be penalized for missing the trip.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes.

Ownership of Course-related Presentations

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell the notes or recordings must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Conduct Code as published in the Student Disciplinary Regulations at www.dso.iastate.edu/regulations/homepage.htm.

Recording and Transmission of Classes

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on his or her classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases the recordings may be preserved and used for other classes as well.

Credit Involving a Paid Activity

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department.

The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student's learning will be assessed.

Academic Dishonesty

Academic dishonesty occurs when a student uses or attempts to use unauthorized information in the taking of an exam; or submits as his or her own work themes, reports, drawings, laboratory notes, or other products prepared by another person; or knowingly assists another student in such acts or plagiarism. Such behavior is abhorrent to the university, and students found responsible for academic dishonesty face expulsion, suspension, conduct probation, or reprimand. Instances of academic dishonesty ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.

Examples of specific acts of academic dishonesty include but are not limited to:

1. Obtaining unauthorized information. Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, or by looking at your notes or other written work during an examination when not specifically permitted to do so.
2. Tendering of information. Students may not give or sell their work to another person who plans to submit it as his or her own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, or giving or selling a term paper to another student.
3. Misrepresentation. Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing a paper from a term paper service; reproducing another person's paper (even with modifications) and submitting it as their own; having another student do their computer program or having someone else take their exam.
4. Bribery. Offering money or any item or service to a faculty member or any other person to gain academic advantage for yourself or another is dishonest.
5. Plagiarism. Unacknowledged use of the information, ideas, or phrasing of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws. Literary offenses of this kind are known as plagiarism.

   Plagiarism occurs when they do not credit the sources from which they borrow ideas, whether these ideas are reproduced exactly or summarized. The method of documentation will differ depending on whether the sources are written, oral, or visual. Ethically, communicators are responsible for providing accurate, detailed information about their sources. Practically, audiences need this information to comprehend and evaluate a message's content. The ***Student Guide: English 150 and 250***, available for purchase at the University Book Store, describes the process of documenting source materials as do many other reference guides.

Academic dishonesty is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic dishonesty or academic misconduct is therefore subject to appropriate academic penalty; to be determined by the instructor of the course, as well as sanctions under the university Student Disciplinary Regulations. If an instructor believes that a student has behaved dishonestly in a course, the following steps are to be followed:

1. The instructor should confront the student with the charge of dishonesty and arrange a meeting with the student to discuss the charge and to hear the student's explanation.
2. If the student admits responsibility for academic misconduct, the instructor shall inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade.

   Because academic dishonesty is also a student conduct violation under Section 4.2.1 of the Student Disciplinary Regulations, the instructor must report the incident in writing to the Dean of Students. After investigating the incident and discussing it with the instructor, the Dean of Students, or his/her designee, will meet with the student and depending on the severity of the offense as well as on the student's past conduct record, may handle the matter through an administrative hearing or schedule a hearing before the All University Judiciary (AUJ).

   This hearing, conducted according to the procedures outlined in the Student Disciplinary Regulations, is to determine the disciplinary action to be taken. In any case, the student's academic adviser will be informed of the incident but may not insert any record of it in the student's academic file.
3. If the student claims to be not responsible for the alleged violation of academic misconduct, the instructor may not assign the student a grade for the work in question until the question of responsibility is resolved, unless circumstances require that an interim grade be assigned. The instructor shall consult with his or her department chair and report the incident in writing to the Dean of Students.

   The Dean of Students will refer the case to the Office of Judicial Affairs for investigation. After reviewing the report and completing an investigation, the Office of Judicial Affairs will file a formal complaint against the student if it is determined that there is cause to believe academic misconduct occurred. The case may be adjudicated through an administrative hearing or referred to a hearing before the All University Judiciary (AUJ) depending on the nature and severity of the violation as set forth in the Student Disciplinary Regulations.

   If the case is referred to the AUJ both the student and instructor will be invited to attend an AUJ hearing and present pertinent information. If the Administrative Hearing Officer (in a minor case) or the AUJ (in a major case) finds the student responsible for the charge of academic misconduct, the instructor will inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade. The Administrative Hearing Officer or AUJ will determine the appropriate disciplinary action with respect to the nature of the violation.

   If the Administrative Hearing Officer or AUJ finds the student "not responsible" for academic misconduct, the instructor will grade the student accordingly on the work in question and the student's grade in the course will not be adversely affected. If the student is found responsible the student's adviser will be informed of the decision but shall not insert any record of the action in the student's academic file.
4. If a student either admits dishonest behavior or is found responsible for academic misconduct by the AUJ, the Office of Judicial Affairs (OJA) or AUJ may impose any of the following sanctions:

   a) Disciplinary Reprimand: An official written notice to the student that his/her conduct is in violation of university rules and regulations.

   b) Conduct Probation: A more severe sanction than a disciplinary reprimand, to include a period of review and observation during which the student must demonstrate the ability to comply with university rules, regulations, and other requirements stipulated for the probation period.

c) Suspension/Deferred Suspension: The suspension is deferred subject to a definite or indefinite period of observation and review. If a student is found responsible for a further violation of the university Student Disciplinary Regulations or an order of a judiciary body, suspension will take place immediately.

- Definite - The student is dropped from the university for a specific length of time. This suspension cannot be for less than one semester or more than two years.
- Indefinite: - The Student is dropped from the university indefinitely. Reinstatement may be contingent upon meeting the written requirements of the AUJ specified at the time the sanction was imposed. Normally, a student who is suspended indefinitely may not be reinstated for a minimum of two years.

d) Expulsion: The student is permanently deprived of the opportunity to continue at the university in any status.

5. A student accused of academic misconduct has the option to stay in the class or to drop the class if the drop is made within the approved time periods and according to the regulations established by the university. If the student chooses to drop the class, the student will be required to sign a statement of understanding that if the student is later found responsible for academic misconduct, then the student will receive an "F" for the course.
6. Procedures for appeal of either the All University Judiciary's conduct decision or the instructor's grade are available from the Dean of Students Office.
7. In instances in which the student admits responsibility or is judged to be responsible by OJA or the AUJ, a staff member of the Dean of Students Office will counsel with the student in an effort to deter any further such incidents.

8 Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of seven years, after which the file records are purged. These student records are confidential; nothing from them appears on a student's academic transcript.8. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the Dean of Students is available at any time to provide advice and assistance to the instructor in deciding a proper course of action to be taken.

9. Students enrolled in the College of Veterinary Medicine are bound by an honor code. A charge of academic dishonesty may be made by a student or instructor to the Interclass Honor Board chairperson according to the procedures outlined in the Honor Code, or the instructor may follow procedures outlined above. The Interclass Honor Board functions as the judiciary of the College of Veterinary Medicine for the allegations presented to it.

Response to Classroom Disruption

Should any student officially enrolled for credit or audit in a class disrupt the instructor's ability to ensure a safe environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom disruption, the instructor may, if she or he finds it necessary, explain to the student and the class why the particular action is deemed disruptive. The instructor should also take into consideration complaints of disruptive behavior brought to their attention by students. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention, including suspension from class, use of student disciplinary regulations, or police intervention, as discussed in more detail in the Faculty Handbook. (See www.iastate.edu/, choose Index, Faculty Handbook.)

Although most situations are best resolved without resorting to requests for police intervention, the Department of Public Safety should be called when the disruptive behavior prohibits the continuation of the class. The Department of Public Safety may also be called if any person enters or remains in the classroom after being asked by the instructor to leave.

Other violations related to academic misconduct may include subsection 4.1.11 Misuse of Computers and subsection 4.2.20 Unauthorized Sale of Others' Intellectual Works. These subsections are located in the Iowa State University Student Disciplinary Regulations under section 4 of the Conduct Code.

Registration

Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student's academic adviser. All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. See Index, Academic Advising.

Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls. See Index, Fees and Expenses.

Disabled students who need assistance with any phase of registration should contact Disability Resources. See Index, Disability Resources.)

Dates and Deadlines

Dates for registration are published in the university calendar on the Web at www.iastate.edu/~registrar/forms/, the *ISU Directory*, and departmental bulletin boards.

Students are assigned a registration start date and time, which is the first day and time they can use the registration system. Registration start dates are assigned based on projected year in school classification (computed by combining total credits, current term credits, and current term test out credits). Then specific start dates within projected year in school are established by using the sum of total credits and current term test out credits.

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at www.iastate.edu/~registrar/registration.

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not completed by the end of the fifth day of classes, students must obtain written permission from their advisers, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that time.

Registration Responsibilities

The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involves the student's adviser; the student services staff of the student's college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

The student is responsible for knowing and adhering to university policies and procedures that apply to registration and schedule changes; checking the accuracy of his/her schedule on AccessPlus, including schedule adjustments (i.e., adds, drops, section changes); knowing the degree requirements of his or her major and/or curriculum; planning course schedules to meet those requirements; and monitoring the accuracy of the degree audit.

The adviser is responsible for consulting with advisees during the advising/registration period; providing information about student's major and curriculum requirements; providing guidance in the student's course selection; assisting in monitoring the degree audit for accuracy; and for notifying the college student services office with corrections to the degree audit.

The college student services staff is responsible for assisting new and reentering students with the registration process; resolving unusual scheduling problems; and updating the degree audit or solving problems concerning the degree audit.

The dean is responsible for making decisions with respect to requests for deviations from university policies, deadlines, etc. Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Class Schedule Planner

The Class Schedule Planner is an application that allows students to plan their schedules using courses displayed in the Schedule of Classes. Students can select courses and/or sections they want to take for a particular term, as well as block out unavailable class days and times. Based on those selections, Class Schedule Planner can return all possible schedules to the student in a color coded grid format.

Though it is a Web-based application, the Class Schedule Planner does not require authentication (no user ID, PIN, or password). Therefore, it is essential that students understand this is a planner and as such, it does not register them in courses and cannot be used to complete their registration. The application requires that the user have Java on their computer. The first screen of the Planner provides information about how to use the planner and simple instructions for downloading the Java application. A useful Help link also has been provided. The Class Schedule Planner is available at http://planner.iastate.

Using AccessPlus Registration

Students enter the system via AccessPlus by using university ID and password. If required by their college, they also need to enter a registration access number (RAN).

The registration system provides messages after each entry indicating whether each request has been processed. Students also may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

All students are encouraged to register for courses through the AccessPlus registration system. However, students who are unable to use the system may register in person by processing their signed Registration Worksheet in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Registration System Abuse

Using the AccessPlus registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisers have the right to determine abuse and revoke privileges for any type of registration system abuse.

Course Information

Prerequisite. A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. See Index, Course Prerequisites.

Permission Required courses/sections. To register for these sections, students must obtain authorization on a Schedule Change/Restriction Waiver form and process the approved form in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during summer orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Schedule Change/Restriction Waiver form. The form is processed in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Classrooms are listed for each course in the Online Schedule of Classes at http://classes.iastate.edu/ and on the student's class schedule on AccessPlus.

Cancelled courses/sections. In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their AccessPlus schedule.

Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the Schedule of Classes. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

Registration Process

To register for classes, students need the following materials and information:

• Registration Worksheet, available for download at www.iastate.edu/~registrar/forms/.

• A RAN (registration access number) if required by their college.

• Course information from the Online Schedule of Classes at http://classes.iastate.edu/.

• Other departmental information applicable to their curriculum, available from their adviser.

Students are expected to do the following in the advising and registration process:

1. Meet with their adviser, who will provide the following:
   a. degree audit
   b. guidance in course selection
   c. Registration Authorization form, with RAN, if applicable.
2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases advisers will not be involved in selecting meeting times.
3. Review their registration start date/time information and any registration hold information on AccessPlus, under Current Information. Students in those colleges which require a four-digit registration access number (RAN) should meet with their adviser in advance of their start date, to obtain their Registration Authorization Card on which the RAN is printed.
4. Register for courses using the AccessPlus registration system.

Credit Limits

For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limits are 12 credits for undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their adviser. Advisers should notify the student's college student services office if the credit limit needs to be changed.

Registration Holds

Students with holds on their registration will not have access to registration until the initiating offices have released the holds. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration. Prior to their registration, students may check for holds on AccessPlus.

Drop Limit

Students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.) Students who entered Iowa State University as freshmen are allowed to drop a maximum of five courses during their undergraduate career. If they entered at a level above freshman classification or in the College of Veterinary Medicine, they are allowed to drop a maximum of four courses. Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count as a first term for this purpose. Students who enroll at Iowa State University as undergraduates after receiving a bachelor's degree are permitted two drops.

Exceptions to the drop limit may be made for courses that must be dropped for reasons beyond the student's control. These exceptions are granted only by the dean or other authorized person in the student's college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding their limit. Students who attempt to drop a course beyond the limit without special permission by the dean of the student's college will continue to be enrolled in the course and will receive a grade at the end of the term.

Making Schedule Changes

Schedule Changes. Students may make schedule changes through the first five days of class using the AccessPlus registration system.

Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

Schedule change periods are as follows:
Period 1 ends on the fifth day of classes in the fall and spring semesters. Schedule changes during period 1 are free and do not require adviser signatures. Instructor or departmental approval may be required for adds or section changes for some courses during period 1. Course drops during this period do not count toward a student's ISU course drop limit, and will not appear on a student's permanent record. Schedule changes during period 1 may be processed through the AccessPlus registration system or by presenting a Schedule Change form to the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Period 2 ends the Friday of week 10 in the fall and spring semesters. During this period, schedule changes require signatures of adviser and instructor and are processed on a Schedule Change form. A fee is assessed for adds, drops, and section changes during this period. Course drops after period 1 count toward a student's ISU drop limit and appear as an X on the permanent record. A section change does not require a drop.

Drops and other schedule changes that are judged to be beyond the student's control may be processed as administrative actions if approved by the college dean. There is no fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. The effective date of an administrative action is the date it is approved by the college dean.

Period 3 is anytime after period 2. Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the student, and must be approved by the dean of the student's college.

Half-Semester and Partial Term Courses
Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find out specific deadlines for partial term courses, contact the Registrar's Student Scheduling Office, 10 Enrollment Services Center, 294-2331.

R-Credit Courses (required courses)
Processing a scheduling change for a required course is usually considered administrative. There is no fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. To make a Period 3 R-credit drop administrative requires approval of the college dean.

Validating Enrollment

To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop the course or they will receive an F grade.

Cancellation/Withdrawal

Students who decide not to attend classes before the date class work begins must cancel their registration to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first day of class or later must withdraw from the university.

Registration Cancellation

A cancellation is processed when a student notifies the Office of the Registrar, prior to the day class work begins, of the decision not to attend classes for the current semester. All courses are removed and no tuition and fees are assessed.

Students may cancel their registration by contacting the Office of the Registrar at 0460 Beardshear Hall, 515-294-1889. Students who call should request the name of the person taking the call and record the name as well as the time and date called.

Withdrawal

Students who decide not to attend classes beginning the first day of class or later, must process a withdrawal form. Per the student's request, the "Request for Withdrawal" form is initiated and submitted by the College to the Office of the Registrar. The student is withdrawn from all courses based on the withdrawal date on the form, and tuition and fees are adjusted, if appropriate according to established policies approved by the Board of Regents, State of Iowa. See www.iastate.edu/~registrar/registration/tuition-adj.shtml

Withdrawal procedures must be followed otherwise instructors of the courses involved will assign grades or marks they consider appropriate. Since these grades may be Fs, students are warned that failure to follow the prescribed withdrawal procedures may adversely affect a later application for reentry or transfer to another institution.

Students who are considering withdrawal from the university should immediately consult their academic adviser to discuss reasons for the withdrawal and alternatives.

A request for withdrawal during period 3, (i.e., after the last day to drop a course without extenuating circumstances) will not be approved except for circumstances that are beyond the student's control. The dean of the student's college or his or her designee, must approve such requests. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Students should not expect to withdraw during or after the final examination week. In a situation beyond a student's control, when examinations cannot be completed, arrangements should be made for incompletes rather than withdrawal during final exam week. Students who are on academic probation (P) and withdraw during period 3 will not be permitted to enroll the following term, except under extenuating circumstances.

Withdrawal Procedures

To withdraw from the university, students must do the following:

1. Complete a Request for Withdrawal form, with adviser's signature.
2. Request the approval and obtain the signature of the college in which they are enrolled. (If the request is approved, the withdrawal form will be forwarded to the Office of the Registrar where it will be recorded; the information is then sent to the appropriate offices.)

The effective date of the withdrawal is the date on which it is approved by the college dean, or his or her designee. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

If students complete the withdrawal procedure, the courses they are taking will not be included on the permanent record nor counted as part of their drop allowance. Half semester courses completed prior to withdrawal will be included on their permanent record. Incompletes will not be accepted for any courses taken during the term the student withdraws.

Interim or Medical Withdrawal

The University may order involuntary withdrawal of a student if it is determined that the student is suffering from a mental disorder as defined by the current American Psychiatric Association Diagnostic Manual such that the disorder causes, or threatens to cause, the student to engage in behavior which poses a significant danger of causing imminent harm to the student, to others or to substantial property rights, or renders the student unable to engage in basic required activities necessary to obtain an education.

Status of Conduct Proceedings

If the student has been charged with violation of the Uniform Rules of Conduct, but it appears that medical reasons exist for the objectionable behavior, the withdrawal policy may be activated prior to issuance of a determination in the conduct process. If the student is ordered medically withdrawn from the university, such action terminates the pending disciplinary action. If the student is found not to be subject to medical withdrawal under this section, conduct proceedings may be reinstated.

Interim Action

The OJA (Office of Judicial Affairs) Administrator or the Dean of students may order interim medical suspension of a student where there appears to be an imminent threat of harm to self or others. If the student is suspended, within 48 hours of ordering interim medical suspension, the Dean of Students will schedule an interim hearing before the Medical Withdrawal Committee, consisting of the Director of Student Health (or designee), the Director of the Student Counseling Service (or designee), and the Dean of Students. The student and the OJA Administrator will have an opportunity to present information as to whether interim medical suspension should be continued or modified, and whether medical withdrawal should be considered.

The Medical Withdrawal Committee may order the student to be referred for an evaluation by a licensed mental health professional of the university's choosing if there is adequate reason to believe that a basis for medical withdrawal exists. The order of referral must be sent to the student and notify the student of the scheduled evaluation to occur no later than seven days from the date of the referral letter. The University will cover the cost of the evaluation. If a student fails to complete the evaluation, the university may continue interim medical suspension and may order restrictions on campus access until the evaluation is completed and reviewed by the university. The decision to continue interim medical suspension and for referral may be appealed within 48 hours, in writing, to the Vice President for Student Affairs. The student may be assisted by any two individuals of his or her choice in any hearing or appeal.

Involuntary Medical Withdrawal

If the medical evaluation supports medical withdrawal, a hearing will be scheduled before the Dean of Students, the Director of Student Health and a member of the Student Counseling staff. The student will have at least 48 hours to independently review the psychological or psychiatric evaluation prior to the hearing. The student and the OJA Administrator may present arguments for or against involuntary Medical Withdrawal. A written decision shall be rendered by the Medical Withdrawal Committee stating the reasons for its determination. The decision may be appealed, in writing to the Vice President for Student Affairs. A student who has undergone involuntary medical withdrawal must reapply, and may not reenter the university without providing competent medical evidence that the medical condition no longer exists, or is sufficiently under treatment so as to remove any substantial likelihood of reoccurrence of the condition which caused medical withdrawal. The University may require the student, at the student's cost, to undergo a medical evaluation by a licensed mental health professional of the university's choosing. A medical withdrawal is not considered a disciplinary action, though a prior medical withdrawal may be considered in subsequent conduct hearings involving the student.

Tuition and Fees Adjustments for Withdrawals

Tuition and fees adjustments are made for withdrawals according to the schedule for full term courses (appropriate adjustments will be made when partial term courses are involved).

Students may appeal a tuition and fees assessment for withdrawals. Determinations will be made for instances beyond the control of the student. The results will be sent to the student in writing.

Returning/Reentry to the University

U.S. students who have been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed since last enrolled, a U.S. student must apply for reentry to the university. All international students must apply for reentry regardless of the time away from the university.

Returning Students

U.S. undergraduate and non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form.

Returning U.S. students and graduate students should contact the Office of the Registrar to have their records updated and registration access created. Students should contact their advisers or major professor to select courses and begin the registration process.

Returning students who want to change their curricula should follow the same procedure as in-school students. Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that initiated the drop. (See below for policies that apply to requests for reinstatement.)

Reentry Students

Undergraduate and nondegree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available from www.iastate.edu/~registrar/info/reentry.html.

Students with a bachelor's degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate application.

International students must complete a reentry form. Forms are available from www.iastate.edu/~registrar/info/reentry.html. Financial certification of ability to cover all educational and living expenses will be required.

The reentry form should be completed and returned to the Office of the Registrar, 0460 Beardshear Hall, well in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Reentering students must also contact their departmental office/adviser to prepare a class schedule. Reentry must be approved prior to registration.

Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

Reentry Approval Process

Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average. See Index, Reinstatement.

Academic Renewal Policy

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations. See Index, Academic Renewal Policy.

Colleges and Curricula

Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission of the North Central Association.

The main undergraduate academic programs of each college are listed below, together with the degrees awarded upon completion. In many cases certain majors, minors, options, or electives allow for increased specialization within the programs. Programs which are administered jointly by two colleges are listed within both colleges.

College of Agriculture and Life Sciences

Agricultural Biochemistry, B.S.
Agricultural Business, B.S.
Agricultural and Life Sciences Education, B.S.
Agricultural Studies, B.S.
Agricultural Systems Technology, B.S.
Agronomy, B.S.
Animal Ecology, B.S.

World Languages and Cultures B.A.:
- French
- German
- Russian Studies
- Spanish

College of Veterinary Medicine

Veterinary Medicine, D.V.M.

Bachelor's Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer from another college or university is normally required to have a 2.00 cumulative average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, but will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor's degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student's major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor's degrees if he or she meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Minors

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student's transcript. Lists of undergraduate minors offered by each college appear in the college description. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.

All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. Specific requirements and/or restrictions are available from the department or program offering the minor.

Undergraduate Certificates

All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass-not pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index).

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

•Communication instruction and practice are distributed over the student's entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.

•Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student's major.

•Active learning and higher-order thinking are fostered through communication.

•Faculty across the university share responsibility for the student's progress in communication practices.

•Both faculty and students engage in ongoing assessment for continuous improvement of the student's communication practices.

Iowa State University's communication curriculum, based on these five principles, seeks to enrich the student's understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses: To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (English 150 and 250), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Upper-Level Curricula: Continuing development of communication skills will be directed by the student's major department. Using the university's basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

•designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;

•a sequence of courses within the major that incorporates communication tasks of increasing complexity;

•linked courses—one in communication, one in the major—that integrate readings and assignments;

•advanced composition course(s) appropriate to the student's major and offering instruction in written, oral, and visual communication;

•communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course- specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

Library Study

Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

U.S. Diversity and International Perspective Requirements

One of Iowa State University's goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students' fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student's college or requirements of the student's major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
- analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
- analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
- analyze the perspectives of groups and individuals affected by discrimination
- analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students' understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are "studying abroad" from their home country's perspective, are normally deemed to have met the International Perspectives requirement.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- analyze and evaluate the influence of global issues in their own lives.
- describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events.
- communicate competently in a second language.

Curriculum Requirements

The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and his or her adviser in planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

Catalog in Effect

A student may choose to graduate under the catalog in effect at the time of graduation, or one of the two immediately preceding catalogs, provided it covers a period of his or her enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Special Programs

Honors Program

The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The goal of the program is to enable Honors students to gain maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the Honors designation on their transcripts and on their baccalaureate diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet those objectives. An honors program may include substitutions for required courses, combinations of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about Honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.

Other benefits. Members of the Honors Program have 24-hour access to the Honors building as a quiet place to study, use the computers, and visit with other Honors students. Students also have off-campus opportunities such as attending Honors semesters and Wingspread conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU Students who have a cumulative grade-point average of at least 3.35 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible for admission as long as they have at least 48 semester credits remaining before graduation. Transfer students with a transfer G.P.A of 3.5 or higher and more than 60 credits remaining are eligible to apply.

College of Agriculture and Life Sciences

Wendy Wintersteen, Dean
Joe Colletti, Senior Associate Dean
David Acker, Associate Dean
Gerald Miller, Associate Dean
www.ag.iastate.edu

Departments of the College

Agricultural Education and Studies
Agricultural and Biosystems Engineering
Agronomy
Animal Science
Biochemistry, Biophysics, and Molecular Biology
Ecology, Evolution, and Organismal Biology
Economics
Entomology
Food Science and Human Nutrition
Genetics, Development and Cell Biology
Horticulture
Natural Resource Ecology and Management
Plant Pathology
Sociology

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates include production agriculture, business and industry, public agencies, education, biological and environmental sciences, value-added processing, natural resource management, rural development, animal and human health professions, and graduate studies.

High School Preparation

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of biology and chemistry, or biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

Majors in the College of Agriculture and Life Sciences

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

Primary Majors

Agricultural Biochemistry
Agricultural Business
Agricultural and Life Sciences Education
Agricultural Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biology
Culinary Science
Dairy Science
Dietetics
Diet and Exercise
Environmental Science
Food Science
Forestry
Genetics
Global Resource Systems
Horticulture
Industrial Technology
Insect Science
Microbiology
Nutritional Science
Public Service and Administration in Agriculture

Secondary Majors

Environmental Studies
International Agriculture
Seed Science

A secondary major must be taken in conjunction with a primary major.

Minors

Agricultural Biochemistry
Agricultural Education and Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biology
Emerging Global Diseases*
Entrepreneurial Studies*
Environmental Science
Environmental Studies
Food Safety*
Food Science
Forestry
Genetics
Horticulture
Industrial Technology
Insect Science
International Agriculture
Meat Science
Microbiology
Nutrition

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificate

Occupational Safety

See statement on minors in the *Colleges and Curricula* section of this catalog.

Special Programs

Agriculture Exploration

Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preveterinary Medicine

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preveterinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements).

Students who are undecided about choice of major may enroll in general preveterinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preveterinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program

The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs

Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see *Extended and Continuing Education* for further information.

Study Abroad and International Travel Opportunities

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities in more than 25 countries around the world. For additional information, contact the Office of Global Agriculture Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

College of Agriculture and Life Sciences Core Curriculum and Electives

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

Minimum Credits	Subject Area
9.5	Interpersonal and public communication skills
6	English composition with grades of C or better
3	Speech fundamentals with grades of C or better; 0.5 credit in Lib 160
17	Mathematical, physical, and life sciences 3 credits of mathematics; 3 credits of statistics; 5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics); 6 credits of life sciences including Biology 101 or 211, and 3 credits of life sciences from a college-approved list: (http://www.ag.iastate.edu/student/student_services.php)
12	Humanities, social sciences 3 credits of humanities; 3 credits of social sciences; 3 credits of U.S. diversity from an approved list; 3 credits of international perspectives from an approved list.
3	Ethics Requirement met in one of two ways designated by the student's major program of study: 1) 3 credits from a college-approved list; or 2) a course in foundational elements of ethical/critical thinking offered by the Department of Philosophy specifically to meet this requirement for College of Agriculture and Life Sciences majors, and a course designated by the student's major program designated to coordinate with this foundational course. Refer to the College of Agriculture and Life Sciences web site for details of the ethics requirement.

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

Professional, Interpersonal and Cross-cultural Communications
- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

Problem-Solving/Critical Thinking
- Apply a holistic approach to solving complex issue laden problems.
- Apply a rational and objective process to:

  -Distinguish verifiable facts from value claims,

  -Determine the accuracy of statements,

  -Identify assumptions and detect bias,

  -Distinguish relevant from irrelevant information,

  -Prioritize needs.
- Summarize, analyze, and interpret simple research data and policy issues.

Leadership
- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

Entrepreneurship
- Demonstrate innovativeness and creativity regardless of context.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning
- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics
- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness
- Explain the physical and biological interactions within ecosystems
- Explain how human activities impact the environment and how societies area affected by environmental change.

International/Multi-Cultural Awareness
- U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:

  Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,

  Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,

  Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,

  Analyze the perspectives of groups and individuals affected by discrimination,

  Analyze how cultural diversity and cooperation among social groups affect U.S. society.
- International Perspectives – Students should achieve two of the following outcomes. They should be able to:

  Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,

  Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve,

  Analyze and evaluate the influence of global issues in their own lives,

  Describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events,

  Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

Electives

Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements.

Advising

Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students' interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

Graduate Study

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

Biorenewable Resources and Technology
Ecology and Evolutionary Biology
Environmental Science
Genetics
Immunobiology
Microbiology
Molecular, Cellular, and Developmental Biology
Neuroscience
Nutritional Sciences
Plant Biology
Professional Agriculture (off-campus)
Seed Technology and Business
Sustainable Agriculture
Technology and Social Change (interdepartmental minor)
Toxicology

For details, consult the Graduate College section of this catalog.

Curriculum in Agricultural Biochemistry

Administered by the Department of Biochemistry, Biophysics and Molecular Biology.

Cr.	Degree Requirements
9.5	**Interpersonal and public communication skills** Engl 150, 250; Sp Cm 212; Lib 160
62-63	**Mathematical, physical, and life sciences** Math 165, 166, 265 or 266; Phys 221, 222; Chem 201 (or 177, 178), 177N (or 177L), 210 or 211, 211L, 322L, 324, 325, 331, 331L, 332; Biol 211, 212, 211L or 212L, 313, 314
15	**Humanities, ethics, and social science** 3 cr. in ethics from an approved list; 3 cr. in humanities; 3 cr. in social sciences; 3 cr. in U.S. diversity from an approved list; 3 cr. in international perspectives from an approved list
9	**Agricultural sciences** 9 cr. from an approved list available in the department. Two courses with environmental awareness emphasis will be chosen from an approved list.
11-13	**Agricultural biochemistry** BBMB 101, 102, 201, 404, 405 or 501, 502; 411. Students wishing research experience in agricultural biochemistry are encouraged to enroll in BBMB 499
21.5-22.5	**Electives**
128	**Total credits**

Typical Program for the First Year

Cr.	Fall
5	Advanced General Chemistry—Chem 201
1	Laboratory in General Chemistry— Chem 177N
4	Calculus I—Math 165
0.5	Library Instruction—Lib 160
3	Principles of Biology—Biol 211
1	Principles of Biology Laboratory—Biol 211L
1	Introduction to Biochemical Activities—BBMB 101
Cr.	**Spring**
3	Critical Thinking and Communication—Engl 150
4	Calculus II—Math 166
3	Communications—Sp Cm 212
3	Principles of Biology—Biol 212
1	Principles of Biology Laboratory—Biol 212L
1	Introduction to Biochemistry—BBMB 102

Curriculum in Agricultural Business

Administered by the Department of Economics. Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

Cr.	Degree Requirements
12.5	**Interpersonal and public communication skills** Lib 160 Engl 150, 250 Engl 302 or Engl 309 or Engl 314 Sp Cm 212 or AgEdS 311
13	**Mathematics** Math 160, Econ 207, or Math 165, Econ 207, or Math 165, 166 Stat 226, 326
4-5	**Physical Sciences** Chem 163-163L or Phys 111
6	**Life and Environmental Sciences** Biol 101 or 211 NREM 120 or Biol 173 or other credits that meet the environmental intensive requirement
15	**Social science, humanities, and ethics** Courses in individual areas below may overlap but the total credits taken must equal 12 or more Ethics International Perspectives U.S. diversity Humanities (if the student has taken a humanities course among the ethics, international perspectives, or U.S. diversity requirements, the humanities requirement may be fulfilled by taking a course in a social science other than economics)
12	**Business** Acct 284, 285 Fin 301 One of the following: Mgmt 310, 370, Mkt 340, MIS 330, OSCM 320, or LSCM 360
6	**Electives in agricultural, food, or natural resources sciences**
26.5	**Economics** Econ 101, 101L, 110, 235, 301,302 or 353 Twelve credits in economics courses selected from an approved departmental list.
32-33	**Free electives**
128	**Total credits**

Typical Program for the First Year

Cr.	Fall
4	Microeconomics—Econ 101, 101L
0.5	Orientation in Agricultural Business—Econ 110
4	Mathematics I — Math 160 or 165
3	Elective in agricultural, food, or natural resource science.
3	Critical Thinking and Communication—Engl 150
0.5	Library Instruction — Lib 160
Cr.	**Spring**
3	Intro. to Agricultural Markets—Econ 235
3-4	Mathematics II—Econ 207 or Math 166
3	Macroeconomics—Econ 102
3	Environmental Biology—Biol 173
3	Agricultural, Food, or Natural Resources Science Course

Curriculum in Agricultural Education

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

Teacher Certification Option

Cr.	Degree Requirements
9.5	**Interpersonal and public communication skills** Engl 150, 250, Lib 160, AgEdS 311 (3 cr.)
18-19	**Mathematical, physical, and life sciences** Chem 163, 163L or 177, 177L; Stat 104; Biol 211, 211L; Biol 212, 212L; Math 104 or 150
18	**Humanities, ethics, and social sciences** Psych 230; C I 333 and 406; American history elective (3 cr.); from approved lists: 3 cr. in ethics; 3 cr. in international perspectives
37	**Agricultural sciences and economics** AgEds 488; Agron 114 and 154; An S 101 and 114; Hort 221; Econ 101, 331; NREM 120; 6 credits in agriculture and life sciences; 6 credits in courses 300-level or above to be chosen from technology systems management, animal science, agronomy, agricultural economics, forestry, or horticulture
31.5	**Professional credits** AgEdS 110A, 211A, 310, 401, 402, 416, 417 (14 Cr.); C I 201, 204, Sp Ed 450.
13-14	**Electives**

Communications Option

Cr.	Degree Requirements
9.5	**Interpersonal and public communication skills—** Engl 150, 250, Lib 160, AgEds 311
23-24	**Mathematical, physical, and life sciences—** Chem 163, 163L or 177, 177L; Biol 211, 212; BMBB 221 or Phys 106; life science elective (3 cr.); demonstration of computer proficiency; (3 cr.) Math 104 or 150; Stat 104
18	**Humanities, ethics, and social sciences—** Econ 101 or 102; psychology elective (3 cr.); ethics elective (3 cr.); international perspectives elective (3 cr.); U.S. diversity elective (3 cr.); humanities elective (3 cr.).
32	**Agricultural sciences and economics—** 10 credits in a selected area of agricultural sciences and economics including 6 credits at the 300-400 level; 6 cr. each in two additional areas of agricultural sciences and economics; agricultural sciences and economics electives (10 cr.)
32.5	**Professional communications—** AgEdS 110A, 211, 215, 315, 412 (6 cr.); select 21 cr. from Jl MC 101, 342, 347, Engl 205, 302, 309, 310, 314, 411, 415, 416, Mgmt 310, 370, 371, Sp Cm 110, 212, 312, 323, 327, ComSt 102, 214, 310, 314, 317
12-13	**Electives**
128	**Total credits**

Typical Program for the First Year

Cr.	Fall
0.5	Orientation–AgEdS 110A
3	Critical Thinking and Communication —Engl 150
3	Probability and Matrices—Math 104 or Discrete Mathematics for Business and Social Sciences – Math 150
3	Principles of Micro Economics—Econ 101
3	Principles of Biology I–Biol 211
1	Principles of Biology Laboratory – Biol 211L
2	Survey of the Animal Industry–- An S 114
2	Working with Animals–An S 101L
0.5	Library Instruction—Lib 160
Cr.	**Spring**
3	Statistics—Stat 104
3	Principles of Agronomy—Agron 114
3	Introduction to Instructional Technology—C I 201
3	Introduction to Agricultural Markets–Econ 235
3	Principles of Biology II—Biol 212
1	Principles of Biology Laboratory– Biol 212L

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Cr.	Degree Requirements
12.5	**Interpersonal and public communication skills** Engl 150, 250; written communications elective (3 cr.); speech elective (3 cr.); Lib 160
20	**Mathematical, physical, and life sciences** Chem 163, 163L or 177, 177L; Math 104 or 150; Stat 104; Biol 101 or 211; life science elective (6 cr.)
18	**Humanities, ethics, and social sciences** Econ 101; AgEdS 315; from approved lists: 3 cr. in ethics; 3 cr. in international perspectives; 3 cr. in U.S. diversity; humanities electives (3 cr.)
43.5	**Agricultural sciences and economics** AgEdS 110B, 215, 450; Agron 114, 154, 212; An S 114 and 101, electives (6 cr.); Econ 235, 330; Ent electives (2 cr.); 300-400 level agricultural sciences and economics electives (9 cr.); electives from the College of Agriculture (2cr.).
Other required courses	
3	Acct 284
31	**Electives**
128	**Total credits**

Typical Program for the First Year

Cr.	Fall
0.5	Orientation—AgEdS 110B
2	Survey of the Animal Industry—An S 114
2	Working with Animals—An S 101
3	Introduction to Probability and Matrices—Math 104 or Discrete Mathematics—Math 150

3	Humanities elective
3	Statistics—Stat 104

Preveterinary Studies

Preparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.

Curriculum in Agricultural Systems Technology

Administered by the Department of Agricultural and Biosystems Engineering. A minor in agricultural systems technology is available; the requirements appear under Technology Systems Management, Courses and Programs.

Students majoring in Agricultural Systems Technology choose between two options: Agricultural and Biosystems Management or Machine Systems.

Agricultural and Biosystems Management Option

Cr.	Degree Requirements
12.5	Interpersonal and public communication skills Engl 150, 250; Sp Cm 212 or AgEdS 311; Engl 302 or 309 or 314; Lib 160
29	Mathematical, physical, and life sciences Math 142 and 160; Stat 104; Chem 163, 163L; Phys 111 and 112; and 6 cr. of life science from department-approved list
15	Humanities, ethics, and social sciences Econ 101; 3 cr. in humanities from college-approved list; 3 cr. in ethics from college-approved list, 3 cr. in International Perspectives from University-approved list; and 3 cr. U.S. Diversity from University approved list.
30	Technology core TSM 110, 111, 115, 116, 201, 210, 270, 301, 310, 363, 397, 399, 401, 415, and 416.
6	Business core Acct 284; Econ 330 or 355 or 336, or Mgmt 370 or 414.
33	Option core TSM 322, 324, 327, 330, 325, 333, 424, and 12 cr. in technical electives from department-approved list.
125.5	Total credits

Machine Systems Option

Cr.	Degree Requirements
12.5	Interpersonal and public communications skills Engl 150, 250; Sp Cm 212 or AgEdS 311; Engl 302 or 309 or 314; Lib 160
29	Mathematical, physical, and life sciences Math 142 and 160; Stat 104; Chem 163, 163L; Phys 111 and 112; and 6 cr. of life science from department-approved list.
15	Humanities, ethics, and social sciences Econ 101; 3 cr. in humanities from college-approved lists; 3 cr. in ethics from college-approved list; 3 cr. in international perspectives from university-approved list; and 3 cr. in U.S. diversity from university-approved list.
30	Technology core TSM 110, 111, 115, 116, 201, 210, 270, 301, 310, 363, 397, 399, 401, 415, and 416.
6	Business core Acct 284; Econ 330 or 355 or 336, or Mgmt 370 or 414.
33	Option core TSM 216, 240, 330, 333, 335, 337, 370, 443, 465, and 5 cr. of technical electives from department-approved list.
125.5	Total credits

Typical Program for the First Year

Cr.	Fall
1	Introduction to Technology—TSM 110
3	Trigonometry and Analytic Geometry—Math 142
3	Critical Thinking and Communication—Engl 150
5	General Chemistry—Chem 163, 163L
3	Life science elective
0.5	Library Instruction—Lib 160
Cr.	**Spring**
1	Experiencing Technology—TSM 111
3	Solving Technology Problems—TSM 115
3	Principles of Microeconomics—Econ 101
4	General Physics—Phys 111
4	Survey of Calculus—Math 160

Curriculum in Agronomy

Students majoring in agronomy study crop, soil, and environmental sciences under one of five options: agroecology; agronomy management and business; plant breeding; research and development; or soil and environmental science. A minimum of 15 credits in agronomy courses must be earned at Iowa State.

Core Requirements

Cr.	Degree Requirements
12.5	Interpersonal and public communication skills Engl 150, 250; Lib 160; Sp Cm 212 or AgEdS 311; Engl 302, or 309, or 314
6-14	Mathematical sciences Math 140 or 150 or 165/166 or 181/182, depending on option; and Stat 104
15-25	Physical sciences Chem 163/163L, or 177/177L and 178/178L; and 231/231L or BBMB 221 or Chem 331/331L and 332/332L; and Phys 106 or 111 or 221 depending on option
11-26	Biological sciences Biol 211, 211L, 212, 212L; other courses by option
15	Humanities, ethics, and social science 3 cr. each in ethics, U.S. diversity, international perspectives, humanities, and social sciences from approved lists
21.5-31.5	Agronomic sciences Agron 105, 110, 114, 154, 206, 210, 310 or 311, 316, 354, 354L, 410 and agricultural issues course.

Options

Agroecology

The Agroecology option provides the scientific foundation for understanding and managing agricultural systems with ecological and environmental perspectives. Students may pursue graduate study or careers in sustainable agriculture. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/agro_ecol.aspx.

Agronomy Management and Business

The Agronomy Management and Business option is designed for those individuals who seek employment as agronomists working in agribusinesses such as cooperatives, seed companies, herbicide and fertilizer dealers, or crop consulting firms. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/mgt_bus.aspx.

Plant Breeding and Biotechnology

The Plant Breeding and Biotechnology option is a science-oriented option recommended for those who would like to work in plant breeding or plant biotechnology. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/plantbreeding.aspx.

Research and Development

The Research and Development is recommended for individuals who plan to work toward a graduate degree, or anyone who would like a strong science orientation in their degree program. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/res_dev.aspx.

Soil and Environmental Quality

The Soil and Environmental Quality option is designed for those individuals interested in careers in environmental science, soil science, or natural resource managment. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/soil_env.sci.aspx.

Typical Program for the First Year

Cr.	Fall
0.5	Orientation in Agronomy—Agron 110
3	Principles of Agronomy—Agron 114
3	Introduction to Meteorology—Agron 206
5	General Chemistry—Chem 163 and 163L
3	Critical Thinking and Communication—Engl 150
Cr.	**Spring**
3	Fundamentals of Soil Science—Agron 154
4	Principles of Biology I and Lab—Biol 211/211L
3	Mathematics or Statistics—Stat 104
0.5	Library Instruction—Lib 160
3	Principles of Microeconomics—Econ 101

Curriculum in Animal Ecology

Cr. Degree Requirements
15.5 Interpersonal and public communication skills
Engl 150 and 250; Sp Cm 212; Lib 160; two additional 3-cr. courses in written or oral communication from an approved list; and communications-intensive requirement
9-10 Mathematical sciences
Math 140 and 142; Stat 101 or 104
13 Physical sciences
Chem 163, 163L or 177, 177L; 231, 231L; Phys 106
20 Biological sciences
A Ecl 312, 365; Biol 211, 211L, 212, 212L; NREM 110, 120, 211
15 Humanities, ethics, and social science
From approved lists: 3 cr. in humanities; 3 cr. in social sciences; 3 cr. in ethics, 3 cr. in U.S. diversity, and 3 cr. in international perspectives; and environmental-intensive and problem-solving intensive requirements
R Practical experience requirement (NREM 104)

Students majoring in Animal Ecology are required to choose one of the following options by the end of their sophomore year: Aquatic Sciences, Fisheries, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife.

Options

Cr.
34 Aquatic Sciences
A Ecl 418, 486, 486L; Math 160 or 165, or 181; NREM 407; remaining credits to complete 34 total from approved list
34 Fisheries
A Ecl 321, 440, 441, 486, 486L; Math 160, 165, or 181; remaining credits to complete 34 total from approved list.
33 Interpretation of Natural Resources
A Ecl 366, Biol 366, Ent 370, NREM 303, 330, 430; one course from For 356 or Biol 474; one course from Agron 154, 206, Astro 120, Geol 100, 101, or Geol 108/Env S 108; remaining credits from approved list to equal 33 total.
33 Preveterinary and Wildlife Care
An S 214, NREM 330; one course from An S 336 or Biol 354; one course from Anthr 438, BMS 329, 415 and 416, Biol 155, 335, 351, 352, 434; one course from An S 331, Biol 313, 423, or Gen 320, one course from A Ecl 366, 458, 459 (one of the 400-level courses preferred for pre-vet students); three or more credits from A Ecl 401, 442, 454
An S 319, 493, Micro 201 and 201L, or Biol 353; 3 credits of A Ecl or NREM coursework at 300-level or above; remaining credits to complete 33 total from approved lists.
42 Wildlife
A Ecl 371, 451; Biol 313 or Gen 320, Biol 366; Math 160 or 165, or 181; 6 credits from A Ecl 457, 458, 459; 6 credits from A Ecl 455, NREM 450X, 460, 385/585, 532, FOR 453, Env S 293, 482, C R P 491; 3 credits from A Ecl 454X, 515, 551, Biol 315, 336X, 354, 354L, 471X, Ent 370, EEOB 507, NREM 475X, Anthr 438; 5 credits from Biol 355, 454, 456, 474, For 356, EEOB 564, Agron 317; remaining credits to complete 42 total from approved lists
12.5-22.5 Free electives
128 Total Credits

Typical Program for the First Year

Cr. Fall
4 Principles of Biology—Biol 211, 211L
R Orientation in Natural Resource Ecology and Management—NREM 110
3 Critical Thinking and Communication—Engl 150
3 College Algebra—Math 140
5 General Chemistry—Chem 163, 163L
Cr. Spring
4 Principles of Biology—Biol 212, 212L
3 Introduction to Renewable Resources—NREM 120
3 Statistics—Stat 101 or 104
0.5 Library Instruction—Lib 160
3 Trigonometry and Analytic Geometry—Math 142
3 Elective

Preveterinary Studies

Preparation for admission to veterinary medicine may be accomplished through the animal ecology curriculum. The Preveterinary and Wildlife Care option has been designed for this purpose.

Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science (AnS) from Iowa State University (ISU) a minimum of 15 credits in AnS must be earned from courses taught in the AnS department at ISU. Students desiring to complete a minor in AnS must complete 17 credits in AnS courses from a list maintained in the department, and a minimum of 9 credits in AnS must be earned from courses taught in the AnS department at ISU.

Cr. Degree Requirements
12.5 Interpersonal and public communication skills
Engl 150, 250, 302 or 309 or 314; Sp Cm 212 or AgEdS 311 or ComSt 214; Lib 160; and communications-intensive requirement*
10 Mathematical and computer sciences
Stat 101 or 104 or 226
Com S 103
Math 140 or 150 or 160 or 165 or 181 (some options may restrict choices)
3 Business elective
Econ 101 or 102 or Acct 284 (some options may restrict choices)
8 Physical sciences
Chem 163 & 163L or Chem 177 and 177L (some options may restrict choices); BBMB 221 or Chem 231 & 231L or Chem 331 & 331L (some options may restrict choices)
8 Biological sciences
Biol 211, 211L; 212, 212L; Biol 313 or Gen 320; Micro 201 & 201L or Micro 302 & 302L
18 Personal development, human relations, and global awareness
a minimum of: 3 credits in humanities; 3 cr. in social sciences; from approved lists : 3 cr. in ethics, 3 cr. in international awareness, 3 credits in U.S. multicultural awareness; and problem solving-intensive requirement;
36 Animal science
An S 101, 110, 114, 211, 214, 214L, 311, 319, 331, 352, 411; three courses from: AnS 216, 223, 224, 225, 226, 229, 235, 270 (some options may restrict choices); one course from: AnS 336, 337, 345, 360, Biol 305, 314, 352, 353, Ent 372, 374, Micro 310, VDPAM 487 (some options may restrict choices); one course from: AnS 415, 423, 424, 425, 426, 429, 434 (some options may restrict choices); one course from AnS 415, 419, 423, 424, 425, 426, 429, 434, 460, FS HN 405, 410, 420, Micro 407 (some options may restrict choices)
26.5 Pre-Veterinary Medicine
Chem 177, 177L, 178, 331, 331L, 332; BBMB 301 or Biol 314; Math 141 or 142 (if trigonometry not taken in high school) Phys 111; one course from AnS 415, 423, 424, 425, 426, 429 or 434; one course from AnS 415, 419, 423, 424, 425, 426, 429, 434, 460, FSHN 405, 410, 420, Micro 407; free electives 13.5
26.5 Livestock Management
Acct 284; AgEdS 451; Econ 101, 330, 331; An S 270; two courses from An S 223, 225, 226, 229, 235; two courses from An S 336, 337, 345, 360; one course from AnS 423, 424, 425, 426, 429, 434; one course from AnS 415, 419, 423, 424, 425, 426, 429, 434, 460, FS HN 405, 410, 420, Micro 407; VDPAM 487; free electives 8.5
26.5 Animal Products
Chem 177 & 177L; two courses from An S 223, 225, 226, 229, 235; An S 270, 360, 460; one course from 423, 425, 426, 429, 434, FS HN 405 or 410; one course from FS HN 420 or Micro 407; free electives 23.5

26.5 Pre-Graduate/Pre-Professional Studies
Chem 177, 177L, 178; Chem 231 & 231L or Chem 331 & 331L; 3 courses from departmental list ; Math 160 or 165 or 181; free electives 14.5

26.5 Companion Animal Management
Acct 284; business or economics electives 9; two courses from: AnS 216, 223, 225, 226, 229, 235, 270; AnS 224, 336, 424; one course from AnS 415, 419, 423, 425, 426, 429, 434, 460, FS HN 405, 410, 420, Micro 407; free electives 17.5

26.5 Equine Management
Acct 284; business or economics electives 9; ; two courses from: AnS 223, 224, 225, 226, 229, 235, 270; AnS 216, 415; 6 cr. equine electives from AnS 115, 217, 306, 316, 417, 475E, BMS 421; one course from AnS 419, 423, 424, 425, 426, 429, 434, 460, FS HN 405, 410, 420, Micro 407; free electives 11.5

Typical Program for the First Year

Cr.	Fall
R	Orientation in Animal Science—An S 110
2	Working with Animals—An S 101
3	Principles of Biology—Biol 211
1	Principles of Biology Lab—Biol 211L
3	Critical Thinking and Communication—Engl 150

3	Statistics—Stat 101 or 104 or 226
3	Humanities elective

Preveterinary Studies

Preparation for admission to veterinary medicine may be accomplished through the animal science curriculum.

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Cr. Degree Requirements*

9.5 Interpersonal and public communication skills
Engl 150, 250; oral communication Sp Cm 212; Lib 160

7 Mathematics
7 credits of Math or Statistics, to include one semester each of Calculus and Statistics.

25 Physical sciences
25 credits selected from an approved list of chemistry, biochemistry and physics. List available on Biology Program web site.

24 Biological sciences core
Biol 110, 111, 211, 211L; 212, 212L, 312, 313, 313L, 314, 314L, 315

20 Advanced biology courses
20 credits in approved biology courses numbered 300 and above from department-approved list; 8 credits must be taken from biology designator; minimum of two laboratory or field courses must be included.

15 Humanities and social science
3 cr. in humanities, social sciences, ethics, international perspectives and U.S. diversity chosen from an approved list. The environmental intensive requirement is met by the core requirement of Biol 312.

17-20 Free electives

120 Total credits

Typical Program for the First Year

Cr.	Fall
0.5	Orientation in Biology— Biol 110
3	Critical Thinking and Communication—Engl 150
5	General Chemistry— Chem 163, 163L; or 177, 177L
4	Mathematics or Statistics—Math 160, 165 or 181; or Stat 101 or 104

Preveterinary Studies

Preparation for admission to veterinary medicine may be accomplished through the dairy science curriculum.

Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Health and Kinesiology.

Courses included have been approved as meeting the academic requirements of the American Dietetic Association in preparation for admission to dietetic internship programs. There is a $30 fee for a statement of verification of completion of the approved program. Courses also are included to meet the ACSM requirements for certification at the level of Health Fitness Instructor.

Cr. Degree Requirements*
9.5 Interpersonal and public communication skills
Engl 150, 250; Lib 160; Sp Cm 212
38-41 Mathematical, physical, and life sciences
Math 140, 142, 160, 165, or 181; Stat 101, 104, or 226; Chem 163 and 163L or 177, 177L, and 178; 231; 231L; Phys 106 or 111; BBMB 301; Biol 211, 212, 255, 255L, 256, 256L; Micro 201
15 Humanities and social science
select 3 credits from approved humanities course list; select 3 credits from approved Ethics course list (if ethics course selected is not on the humanities list, 3 additional credits of humanities must be taken.); Psych 101, 230
20-22 Diet and Exercise

6 Business
Select 6 credits from Acct 215, 284, 285; Econ 301, 320; Mgmt 310, 370, 371, 414, 472; MIS 330; Mkt 340, 447, 448
44 Food science and human nutrition
FS HN 101, 110, 167, 203, 311, 351, 403, 405, 406, 410, 411, 412, 420, 421, 471, 472, 480
0-5 Electives
120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists.

Option 3. Consumer Food Science

Cr. Degree Requirements*
21.5 Communications/Library
Engl 150, 250; Jl MC 305 or 220; select 6 cr. from Jl MC 347, Engl 205, 302, 309, 313, or 314; Sp Cm 212 or ComSt 214; Lib 160; TSM 115
6-7 Mathematical sciences
Math 140, 142, 160, 165, or 181; Stat 101 or 104
16 Physical sciences
Chem 163 and 163L or 177, 177L and 178; 231, 231L; Phys 106
12-13 Biological sciences
BBMB 301; Biol 211, 212; Micro 201 or 302; and Micro 201L or 302L
11-12 Humanities/Social sciences
Econ 101; FS HN 342; 3 credits Humanties courses; and Env S 120 or 201
41 Food science and human nutrition
FS HN 101, 110, 167, 203, 214, 265, 311, 403, 405, 406, 411, 412, 420, 471, 480
6 Business
Mkt 340 and 447
0-3 Electives
120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists.

Concurrent B.S. and M.S. Program:

Well qualified students in Food Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Food Science and a master of science degree in Food Science and Technology. For more information, refer to www.fshn.hs.iastate.edu

Curriculum in Forestry

Cr. Degree Requirements
12.5 Interpersonal and public communication skills
Engl 150, 250; 314, or 302 or 309; Lib 160; Sp Cm 212
22 Mathematical, physical, and life sciences
Math 140, 150; Stat 101 or 104; Chem 163, 163L; Biol 211, 211L; Agron 154
15 Humanities, ethics, and social science
3 cr. in humanities; 3 cr. in ethics from approved list; Soc 130 or 134 and 3 cr. in U.S. diversity and 3 cr. in international perspectives
29 Forestry courses
For 201, 202, 203, 204, 205, 206, 302, 451, 454; NREM 110, 120, 211
R Practical experience requirement
NREM 104

Students majoring in forestry are required to choose one of the following options at the end of their sophomore year: forest ecosystem management; sustainable material science and technology; urban and community forestry; natural resource conservation and restoration; or interpretation of natural resources.

Options

Cr.
40 Sustainable Materials Science and Technology
Chem 231, 231L, Econ 101, For 280, 480, 481, 483, 485, 486, 487; Math 151; Mkt 340, Stat 401
35 Forest Ecosystem Management
Biol 212, 212L, For 280, 342, 356, 452; one course from NREM 385, 460; For 453; Math 151 or 181; NREM 301, 345; Pl P 416
37 Urban and Community Forestry
Biol 212, 212L; For 280, 356, 452, 475; Hort 342 or 344; one course from NREM 385,460 or For 453; Math 151 or 181; Pl P 416; Soc 310 or 382; C R P 253 or 270
44 Natural Resource Conservation and Restoration
A Ecl 312; Biol 212, 212L, 204; For 356, 452; one course from NREM 385, 460 or For 453; Math 151 or 181; NREM 301, 330, 390, 407; Pl P 416; 3 credits from approved departmental list
34 Interpretation of Natural Resources
A Ecl 365 and 366; Biol 212, 212L, 366, Ent 370, NREM 303, 330, 430; For 452, one course from (For 453 or NREM 460 or 385); one course from Agron 206, Astro 120, Geol 100, 101, 108; select remaining credits to complete 34 credits from approved departmental list.
5.5-15.5 Free electives
128 Total credits

Typical Program for the First Year

Cr. Fall
3 Critical Thinking and Communication—Engl 150
R Orientation in Natural Resource Ecology and Management—NREM 110
3 College Algebra—Math 140
3 Principles of Biology I—Biol 211
1 Principles of Biology Laboratory I—Biol 211L
3 Introduction to Renewable Resources—NREM 120
3 Social Science—Soc 130 or 134
16

Cr. Spring
3 Foundations of Soil Science—Agron 154
0.5 Library —Lib 160
3 or 4 Statistics—Stat 101 or 104
4 General Chemistry I —Chem 163
1 General Chemistry Lab I—Chem 163L
3 or 4 Wood Properties and Identification—For 280 or U.S. Diversity/International Perspectives
14.5 or 16.5

Curriculum in Genetics

Undergraduate study in genetics is jointly administered by the Department of Biochemistry, Biophysics, and Molecular Biology, the Department of Genetics, Development, and Cell Biology, and the Department of Ecology, Evolution, and Organismal Biology.

Cr. Degree Requirements
12.5 Communications
Engl 150, 250; an advanced English writing course (Engl 302-316); oral communication (AgEdS 311, Sp Cm 212; Lib 160
11 Math
Must include at least one course from both calculus and statistics chosen from Math 160, 165, 166, 181, 182; Stat 101 or 104, 401, 402, 403
3 Computer Studies
Three credits in computer science or computer applications chosen from an approved list. See department for list.
31 Physical sciences
Chem 177, 177L, 178, 178L (or 211), 331, 331L, 332, 332L; BBMB 404 or 420; Chem 211 or 321 or BBMB 405 or 411; Physics 111, 112 or 221, 222
23 Biological sciences
Biol 211, 211L, 212, 212L, 313, 313L, 314, 314L; Micro 302; Biol 315
15 Humanities, ethics, and social sciences
15 credits including at least 3 cr. each in the humanities, social sciences, ethics, international perspectives and U.S. diversity chosen from an approved list.
The environment-intensive and problem solving-intensive college requirements can be satisfied by selection of appropriate courses. See department for lists.

9.5 Genetics
Gen 110, 410, 411, 460 or 462, 491
9 Support electives
Choose 9 credits from approved list. See department for list.
Biol (A Ecl) 312 must be included in the program
Electives
Additional electives sufficient to equal the 128 credits required for graduation.
128 Total credits

Typical Program for the First Year

Cr.	Fall
5	General Chemistry—Chem 177, 177L
3	English—Engl 150
4	Calculus—Math 165 or 181
4	Principles of Biology—Biol 211, 212L
0.5	Orientation and Career Opportunities—Gen 110
0.5	Library Instruction—Lib 160
Cr.	**Spring**
4	General Chemistry—Chem 178, 178L
3	Statistics 101 or 104
4	Calculus—Math 161 or 166 or 182
4	Principles of Biology—Biol 212, 212L

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world, either industrialized or developing, to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing a minor or certificate program in the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Cr.	Degree Requirements
12.5	Interpersonal and Public Communications Skills
3	Critical Thinking and Communication—Engl 150
3	Written, Oral, Visual, and Electronic Composition—Engl 250
0.5	Library Instruction—Lib 160
3	Report and Proposal Writing —Engl 309 or
3	Business Communication —Engl 302 or
3	Technical Communication—Engl 314
3	Fundamentals of Public Speaking—Sp Cm 212 or
3	Presentation and Sales Strategies for Agricultural Audiences—AgEds 311

6-8 credits

Cr.	Mathematical Sciences
3-4	Mathematics (Math 140 or higher course number)
3-4	Statistics—101 or 104

15 credits

Cr.	Humanities, Ethics, and Social Science
3	Humanities (from approved list)*
3	Social Sciences—Econ 101 or 102
3	International Perspectives from approved list*
3	U.S. Diversity from approved list
3	Ethics (from approved list

* Requirement embedded within other curriculum requirements

27-35 credits (depending upon language study)

Cr.	Global Competency
12-20	Students will emphasize a region of the globe. World Language proficiency through intermediate levels. Complete 100 and 200 levels of a single college-level world language.
15	Coursework in culture, history, politics and economics in which students emphasize a global region outside the United States, up to 3 credits may be earned through travel courses. Courses in the WLC Language and Cultures for Professions are also eligible.

15 - 18 credits

Cr.	Physical and Life Sciences
5	General Chemistry—Chem 163, 163L; or 177, 177L
4	Principles of Biology—Biol 211, 211L
3	300-level or higher life sciences course

One of the following is required, two are recommended:

3	Environmental Geology—Geol 101
3	Fundamentals of Soil Science—Agron 154 or
3	Soils for Horticulture Scientists—Agron 155
3	Introduction to Meteorology—Agron 206
3	World Climates—Agron 406

22 credits

Cr.	Global Resource Systems
1	Orientation—Globe 110
3	Global Resource Systems (1Cr.)—Globe 201
3	Issues in Global Resource Systems—Globe 211
3	Resource Systems of Industrialized Nations—Globe 301
3	Resource Systems of Developing Nations—Globe 302
3 - 12	Internship Global or United States
3	Senior Research—Globe 401
3	Responses to Global Resource System Challenges—Globe 402

15 -18 credits

Cr.	Technical Concentration

15 -18 credits: Satisfied by any of the 23 minors or a certificate offered in the College of Agriculture and Life Sciences.

14 - 16 credits: Free Electives

128.5 Total Credits

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Specialization Options.

A horticulture minor is available. The requirements appear under *Horticulture, Courses and Programs*.

Cr.	Degree Requirements
12.5	Interpersonal and Public Communication Skills Engl 150, 250, 302 or 314; Lib 160; Sp Cm 212 or AgEdS 311; and a communications-intensive requirement (see department for procedure)
6-9	Mathematical sciences Math 140 or 150 or 165 or 181; and Stat 101 or 104 or 226 or 401
13	Physical sciences Chem 163, 163L; or 177, 177L; and 231, 231L, or 331, 331L; and one complete course from: Chem 164, 164L; 178, 178L; or Phys 106 or 111. A student must take either (1) Chem 163/163L and 164/164L series and Chem 231/231L series or (2) Chem 177/177L and 178/178L series and Chem 331/331L. A student may take Phys 106 or 111 instead of Chem 164/164L or 178/178L.
18	Biological sciences Biol 211, 211L, 212, 212L select 10 credits from the following group: Agron 260, 316, 317, 354, 354L; Biol 312, 314, 314L, 330, 355, 366, 454, 474; Ent 370, 375, 376; For 416; Pl P 391, 408; Gen 320 or Biol 313, 313L.
15	Humanities, ethics, and social sciences One 3-credit course from an approved list in each of the following areas: humanities,ethics, social science, U. S. diversity, and international perspectives; see department for procedure in meeting problem-solving, environmental-intensive, and communication-intensive requirements.
3	Soil science Agron 154 or 155
30	Horticulture Hort 110, 221, 321, 497; select a minimum of 22 credits from the following group: Hort 233, 240, 280, 282, 283, 322, 330, 332, 338, 341, 342, 351, 351L, 354, 354L, 380, 381, 391, 398, 422, 423, 424, 434, 435, 442, 444, 445, 446, 451, 452, 453, 454, 461, 471, 471L, 475, 480, 481, 484, 490, 491, 493, 495, 496, 497, 511, 551. Transfer students may transfer up to 10 credits of 200- and 300-courses in the horticulture area.
	Specialization Options (A minor in an approved area of study may be substituted for the Specialization Option with permission of student's adviser)
12	Environmental horticulture option: Hort 424 must be among the courses that fulfill the horticulture requirement. Other recommended course is Hort 484. The student must

take Biol 312 and 9 or more credits from the following group: Agron 260, Biol 355, Econ 334, Ent 375, Env S 293, 324, 382, 450, 460, 491; TSM 324, 424.

12 Fruit and vegetable production and management option:
Hort 422, 445, 461, 471 and 471L must be among the courses that fulfill the horticulture requirement. Acct 284; and 9 or more credits from the following group: Acct 215, 285, 316; Com S 103; Econ 230, 334; FS HN 272, 403, 405, 471, 472; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447; TSM 270.

12 Greenhouse production and management option:
Hort 233, 322, 330, 332, 422, 434, 435 and 445 must be among the courses that fulfill the horticulture requirement. Acct 284; and 9 or more credits from the following group: Acct 215, 285, 316; Com S 103; Econ 334; Ent 375; Mgmt 310, 313, 370; Mkt 340, 442, 446, 447.

15 Horticultural communications and public education:
Students in this option must take Engl 314 under Interpersonal and Public Communications Skills and a minimum of 12 credits from the following group: ComSt 102, 214, 317; Engl 220, 303, 305, 313; Jl MC 201, 220, 310, 341, Sp Cm 312, 313.

12 Landscape Design, Installation and Management option:
Hort 240, 280, 330, 341, 342, 351, 380, 381, 444, 446, 480 and 481 must be among the courses that fulfill the horticulture requirement. Up to 3 credits can be used in the biological sciences area. Another recommended course is Hort 445. Acct 284; and 9 or more credits from the following group: Acct 215, 285 316; Mgmt 310, 313, 370, 371; Mkt 340, 343, 442, 447; TSM 324.

12 Nursery crops production and garden center management option:
Hort 240, 322, 330, 341, 342, 351, 442, and 445 must be among the courses that fulfill the horticulture requirement. Acct 284; and 9 or more credits from the following group: Acct 215, 285, 316; Agron 206; Com S 103; Econ 230, 334; EnSci 446 or 461I; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447; TSM 270.

12 Public garden management and administration option:
Hort 233, 240, 282, 322, 330 and 445 must be among the courses that fulfill the horticulture requirement. Other recommended courses are Hort 280, 332, 341, 342, 351, 351L, 380 and 381. The student must select a minimum of 12 credits from the following: Acct 284, 285, 316; Econ 334; Engl 303, 309, 313, 415; EnSci 446 or 461I; Fin 301; JLMC 220; Mgmt 310, 313, 370, 371 471; Sp Cm 312, 313.

12 Science option:
Those who choose the Science Option must take: Biol 330 for part of the biological sciences requirement; Math 165 or 181 for the mathematical sciences requirement; Chem 177, 177L, 178, 178L, 331, 331L, 332, 332L, Phys 111 and 112 for the physical sciences requirement. BBMB 301 or 404, Math 166 or 182; and 5 or more credits from the following group: BBMB 311, 404, 405, 411; Biol 313, 313L, 314, 314L, 315; Chem 211, 211L, 316, 316L, 321L, 322L, 324; Com S 107, 207; Gen 409, 410.

12 Turfgrass management option:
Hort 240, 351, 351L, 445, 451, 452, 453 and 551 must be among the courses that fulfill the horticulture requirement. Other recommended course: Hort 330. Acct 284 and 9 or more credits from the following group: Acct 285, 316; Agron 206, 260, 317, 338, 356, 360, 459; Com S 103; Econ 334; Ent 375; Env S 201, 324; EnSci 446 or 416I; HRI 289; Mgmt 370, 371; Pl P 391; TSM 270, 324, 424; additional business courses may be used with permission of adviser.

14-18 Electives

128.5 Total credits

Typical Program for the First Year

Curriculum in Industrial Technology

Administered by the Department of Agricultural and Biosystems Engineering.

An undergraduate certificate in occupational safety is available; the requirements appear under Technology Systems Management courses and programs. A minor in Industrial Technology is available; the requirements appear under Technology Systems Management courses and programs.

Students majoring in Industrial Technology choose between two options: Manufacturing or Occupational Safety.

Manufacturing Option

Cr. Degree Requirements

12.5 Interpersonal and public communications skills
Engl 150, 250; Sp Cm 212 or AgEds 311; Engl 302 or 309 or 314; Lib 160

29 Mathematical, physical, and life sciences
Math 142 and 160; Stat 104; Chem 163, 163L; Phys 111 and 112; and 6 cr. of life science from department-approved list

15 Humanities, ethics, and social sciences
Econ 101; 3 cr. in humanities from college-approved list; 3 cr. in ethics from college-approved list; 3 cr. in international perspectives from university-approved list; and 3 cr. in U.S. diversity from university-approved list.

30 Technology core
TSM 110, 111, 115, 116, 201, 210, 270, 301, 310, 363, 397, 399, 401, 415, and 416.

6 Business core
Acct 284; Econ 330 or 355 or 336, or Mgmt 370 or 414.

33 Option core
TSM 216, 240, 337, 340, 370, 440, 443, 444, 445, 465, and 3 cr. of technical electives from department-approved list

125.5 Total credits

Occupational Safety Option

Cr. Degree Requirements

12.5 Interpersonal and public communications skills
Engl 150, 250; Sp Cm 212 or AgEds 311; Engl 302 or 309 or 314; Lib 160

29 Mathematical, physical, and life sciences
Math 142 and 160; Stat 104; Chem 163, 163L; Phys 111 and 112; Biol 155 and 3 cr. of life science from department-approved list.

15 Humanities, ethics, and social sciences
Econ 101; 3 cr. in humanities from college-approved list; 3 cr. in ethics from college-approved list; 3 cr. in international perspectives from university-approved list; and 3 cr. in U.S. diversity from university-approved list.

30 Technology core
TSM 110, 111, 115, 116, 201, 210, 270, 301, 310, 363, 397, 399, 401, 415, and 416

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

Cr.	Degree Requirements
	(Additional prerequisites may be required for some courses.)
12.5	**Interpersonal and public communication skills** Engl 150, 250; Sp Cm 212 or AgEdS 311; Lib 160; electives (3 cr.) select from Engl 302 or 314, or JI MC 205
19	**Mathematics, physical, and life sciences** Math 150, Chem 163, 163L, or Chem 177, 177L, math or physical science electives select from BBMB, Chem, Com S, Math, Phys, or Stat (5 cr.); biological sciences electives select from Biol, Gen, Micro, or PI P (6 cr.) and demonstration of computer proficiency (See primary major department.)
15	**Humanities, ethics, and social sciences** Soc 130 or 134, or Econ 101; 3 cr. in ethics; 3 cr. in U.S. diversity; 3 cr. in international perspectives
15	International Agriculture Internship in International Agriculture or Study Abroad Program or Foreign Language (6cr.)
3	Agron 342 Select courses with international agriculture focus in any major in the College of Agriculture and Life Sciences (6 cr.) (See Supervisory Committee list)
66.5	**Primary major requirements and free electives**
128	**Total credits**

Program for the First Year

Because international agriculture is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

Curriculum in Insect Science

Cr.	Degree Requirements
12.5	**Interpersonal and public communication skills** Engl 150, 250, 314; Sp Cm 212; Lib 160
3	**Mathematical and physical sciences** Stat 104
14	**Life sciences** Biol 211, 211L, 212, 212L, 312; Micro 201, 201L
15	**Humanities, ethics, and social science** Econ 101; 3 cr. in humanities; from approved lists: 3 cr. in ethics; 3 cr. in international perspectives; 3 cr. in U.S. diversity requirement
19	**Entomology** Ent 110, 201, 211, 370, 374, 376; 490E; Ent electives; for students entering entomology with one year or more of college-level biological sciences courses, Ent 201 and 211 are waived, and the group requirement reduced to 16 cr.

Students majoring in Entomology are required to choose one of the following options by the end of their sophomore year; Agricultural and Horticultural Insect Management, or Insect Biology.

Agricultural and Horticultural Insect Management Option

Curriculum in Seed Science

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study include: seed production, conditioning, pathology, physiology, quality control, and marketing, as well as seed plant designs.

Cr.	Degree Requirements
12.5	**Interpersonal and public communication skills** Engl 150, 250; Sp Cm 212 or AgEdS 311; Lib 160; Engl 302 or 309 or 314 or Sp Cm 312
38	**Mathematical, physical, and life sciences** Math 140 or 150; Stat 101 or 104; Chem 163, 163L; BBMB 221 or Chem 231, 231L; Phys 106 or 111, or Chem 164, 164L; Biol 211, 211L; Biol 212, 212L; Ent 376; Gen 320 or Biol 313; Agron 317; Pl P 408; and demonstration of computer proficiency (see department of primary major for procedures)
15	**Humanities, ethics, and social science** 3 cr. each of humanities, social sciences, ethics (from an approved list), U.S. diversity (from an approved list), and international perspectives
21	**Agricultural sciences** Agron 114 or Hort 221; Agron 154, 206, 354; Agron or Hort electives (6 cr.); TSM electives (3 cr.)
9	**Economics and business** Econ 101, 235; and one course from the following group: Acct 284; Econ 102, 330, 336; Mgmt 370; Mkt 340
10	**Seed science** Agron 338, 421, 491, and 2 cr. of Agron, Hort, Pl P or TSM electives at the 300-400 level
22.5	**Primary major requirements and free electives**
128	**Total credits**

Typical Program for the First Year

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

College of Business

Finance
Logistics, Operations and Management
Information Systems
Management
Marketing

Objectives of the Curriculum in Business

The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by the International Association for Management Education (AACSB), the national business accrediting agency.

Organization of Curriculum

The undergraduate curriculum in business is divided into two phases: a general education (pre-business) program and a professional program. The pre-business requirements provide a broad foundation in the liberal arts. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The eight majors offered for the degree bachelor of science (B.S.) are accounting; finance; management; management information systems; marketing; logistics and supply chain management; operations and supply chain management; and business economics. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Bachelor of Science

The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting; finance; management; management information systems; marketing; logistics and supply chain management; operations and supply chain management; or business economics.

Required High School Preparation

Students entering the pre-business curriculum must present evidence of the following high school preparation:

a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.

b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.

c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics;

d. Two (2) years of social studies.

Admission Standards to Professional Programs

All new entering students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any Engl 101 courses, Engl 150, and the following foundation courses or their approved substitutions: Math 150, Econ 101, Econ 102, Stat 226, Acct 284, and BusAd 101. See Curriculum in Business.

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.35 in at least 12 credits, or full member of the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of Acct 285 and MIS 330, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at https://apps.bus.iastate.edu/ProfessionalProgram/ or from the Undergraduate Programs Office in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2009-2011 catalog:

(1) A minimum of 122 semester credits are required.

(2) At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.

(3) At least 50% of the 122 credits required for graduation must consist of general education (non-business credits).

(4) A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.

(5) The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.

(6) Students must achieve Communication proficiency by earning a grade of C or better in two of the three required English courses.

(7) A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.

(8) A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.

(9) Business majors may not take business courses Pass-Not Pass (P/NP).

(10) General education courses may not be taken P/NP.

(11) No more than 9 elective credits may be taken P/NP.

Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting; finance; management; management information systems; marketing; logistics and supply chain management; operations and supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

Pre-business Curriculum

Cr.	
18.5	Foundation Courses
R	BusAd 150[3]
3	BusAd 250

6	Select from approved list
3	Natural science
6	Social science
	U.S. diversity course[5]

1 Acct, Fin, and Bus Econ majors will also take State 326 as part of the supporting courses. Bus Econ majors will take Math 160 instead of 150, and Econ 207 instead of Math 151. See the Undergraduate Programs Office in the College of Business.

2 Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curricula.

3 Students without adequate computer background may take Com S 103 to satisfy the computer literacy requirement.

4 Students may satisfy this requirement either by taking six credit hours from the University International Perspectives list, or three credit hours from the International Perspectives list and three credit hours from the College of Business Global Perspectives list. Approved list of courses is available on the web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

5 Courses for this requirement may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.

Advising System

The Undergraduate Programs staff, under the leadership of the Director for Undergraduate Programs, facilitates student progress toward graduation while supporting the academic standards of the College of Business and Iowa State University. To accomplish this, the Undergraduate Programs staff provides services for all College of Business students, including academic advising, learning opportunities, and teaching and developmental activities.

Students in the College of Business have advisers located in the Undergraduate Programs Office. The adviser assists students with developing an academic program; accessing pertinent university resources; and meeting their educational objectives.

The college offers an orientation program for entering students. All entering students and family members are encouraged to attend orientation. During orientation the adviser and the student prepare an appropriate schedule and the student registers for courses. Placement assessments may be required in Mathematics and English to assist in placing students in the appropriate level of courses if this cannot be determined by ACT/SAT scores, high school preparation classes or transfer courses.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.35 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation. Special advisers will assist honors students in developing an appropriate program of study.

Internships

Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Career Services Center will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: the business core courses; the major specialization; computer proficiency; Acct 215; and Math 151.

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each additional major that is not used in the other majors.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Curriculum Changes

Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

International Business Secondary Major

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor

The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are ACCT 284, Acct 285 or ACCT 215 or BUSAD 250 (6 credits), three courses selected from Fin 301, Mgmt 370, MIS 330, Mkt 340, LSCM 360, or OSCM 320 (9 credits). The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A "C" average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade.

Students with a major in the College of Business may qualify for a minor specialization in one of the college's departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business

Entrepreneurial Studies Cross-Disciplinary Minor

The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include Mgmt 310, Mgmt 313 (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at http://www.business.iastate.edu/undergraduate/minors/entrepreneurship.

Non-degree Seeking Students

Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college's admission requirements.

Upper Division Courses for Students Outside the College

Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college's admission requirements, as long as they meet course prerequisites.

Graduate Study

Four programs are offered at the graduate level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), a master of science (M.S.) in business, and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The M.B.A. is the professional management education program for those pursuing careers in business. The purpose of this professional program is to provide professional business education by preparing students to understand the impact of technology on business organizations in a global environment. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, agribusiness, family financial planning, finance, information systems, international business, supply chain management or marketing.

The master of accounting (M.Acc.) is a 32-hour degree. The program requires 15 hours of graduate accounting courses, at least 9 hours of non-accounting graduate electives, a communications course, and an international course from an approved list. The M.Acc. is appropriate for any student wanting to pursue a variety of accounting careers. Additionally, the program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-40 credits depending upon the student's background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The M.S. program, consisting of 30 minimum credits, is oriented toward further business specialization at the master's level for students with undergraduate degrees or academic backgrounds in business. The program is intended to serve those students who desire specialized study of an area within business. Students in the program must complete a thesis. This program is also a suitable vehicle for students planning to pursue a Ph.D. in business.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P), informational systems (M.B.A./M.S.I.S), and statistics (M.B.A./M.S.-Statistics). The Department of Logistics, Operations, and Management Information Systems in the College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Science and Business, and Transportation. The College of Business also offers a business administration minor to students with majors outside the college. A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in civil engineering, computer engineering, electrical engineering, industrial engineering, and mechanical engineering.

Ph.D in Business and Technology

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management information technology (MIT). Many departments in the college (Logistics, Operations, Management Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master's degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.

Landscape Architecture

Objectives of the Curricula in Design

The College of Design is among a small, elite number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific environmental design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, interior designers, studio artists, arts administrators and environmental designers.

Graduate Curricula

The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Majors

Architecture
Architectural Studies
Art and Design
Community and Regional Planning
Graphic Design

Digital Media
Entrepreneurial Studies*
Environmental Studies*
Gerontology*
International Studies*
Technology and Social Change*

*The College of Design participates in these interdepartmental secondary majors and minors.

Organization of Curricula

The undergraduate curricula in design are divided into two phases: a pre-professional Core Design Program and a professional program. The Core Design Program grounds the undergraduate degree programs, provides a rich, rigorous inclusive base for the curricula. It creates shared language, experience, and community for programs, faculty and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple programs, and experiment with interdisciplinary work.

For students entering the Core Design Program, the college highly recommends purchase of a digital camera.

The intense, discipline-specific professional curricula that follow the Core focus on developing students' ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core and the professional programs, is composed to insure that students receive a well-rounded undergraduate education.

High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended through not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements: 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability; 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra; 3 years of science, including at least two of the following: 1 year of biology, 1 year of chemistry, or 1 year of physics; 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Admission Standards to Enrollment Managed Professional Programs

Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, scholarship performance, and a written essay.

Advising

Each student receives personal assistance from an academic advisor within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisers. Once admitted to professional programs, students are assigned to faculty advisers. Advisers help students develop a program of study, access pertinent university resources as well as provide information on career choice.

The college's career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See *Index, Honors Program*.

Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements of the college.

Core Design Program

Cr.	Fall/Spring
4	Dsn S 102
4	Dsn S 131
3	Dsn S 183
6	Social Science/Humanities Electives*
6	Math/Science Electives**
6	English 150/250
0.5	Library 160
29.5	**

* General education credits in the Core Design Program may count toward the minimum credits.

** Students applying to Architecture for admission must take Math 142 and Physics 111 in the first year. These two courses total seven credits for a total of 30.5 core credits.

General Education

Minimum Credits.

- 6 **Biological sciences, physical sciences and mathematics**
  Includes courses in the fields of agronomy, astronomy and astrophysics, biology, botany, chemistry, civil engineering, computer science, geology, mathematics, physics, statistics, and zoology.
- 9.5 **Communications**
  Engl 150*, 250*, Lib 160. Includes courses in the fields of English (composition), and speech communication (interpersonal and rhetorical).
- 6 **Humanities**
  Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.
- 6 **Social sciences**
  Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, political science, psychology, sociology, and women's studies.
- 9 **Additional credit hours selected from any of the above areas.**
  Six credits must be at the 300 level or above.
- 9 **Selected from the above areas.**
  Six credits must be at the 300 level or above.
- 36.5 **Minimum credits**

See departmental curricula for specific course requirements within the general education areas.

*To meet requirements for graduation, a minimum grade of C– must be received.

Minor in Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work: three credits of history selected form College of Design course offerings and twelve additional credits selected from College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses in their major or in the Core Design Program to satisfy this minor.

Minor in Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement; and at least 3 credits from the listed courses numbered 200. Courses taken for this minor may not be taken on a pass-not pass basis.

Students enrolled in the College of Design may not use courses in their major or in the Core Design Program to satisfy this minor.

Curriculum in Architecture

The Department offers undergraduate and graduate degree programs:

A 138-credit undergraduate professional program, preceded by a 28-credit preprofessional program, leading to the bachelor of architecture degree.

A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit post-professional graduate program leading to the Master of Architecture. (M.Arch. II)

A 30-credit interdisciplinary graduate research program leading to the Master of Science in Architectural Studies. (M.S.A.S.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Curriculum in Art and Design—B.A.

Administered by the Department of Art and Design and leading to a 120.5 credit undergraduate Bachelor of Arts degree including a 29.5 credit pre-professional program (college core).

This curriculum offers two concentrations: Art and Culture, and Art and Design History and Theory. Both concentrations are combined with an applied career minor or approved program.

Consideration for admission into the B.A. curriculum is based upon department resources, GPA earned in the college Core Courses and the freshman year.

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

10	Electives
120.5	Total credits

*A second major or minor must be approved by the department offering the program of study. See university guidelines for structuring and declaring a second major and/or minor. Credit hours not applied toward a formal second major or minor must be used in a coherent program approved by the Department of Art and Design. Approval for these 30 credits must be documented in writing following completion of 75 credits and before completion of 100 credits toward the B.A. degree.

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 129 credit undergraduate program leading to the Bachelor of Science. The curriculum is designed to prepare students to enter the profession of planning ready to work in a variety of professional settings. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

Consideration for admission into the Community and Regional Planning professional program takes place either through review of the performance in the College of Design's first year CORE design program, or through transfer from another curricula or accredited institution. If applying through the CORE program, admission is based upon a student's cumulative GPA for all courses earned during the first year, portfolio work submitted upon completion of the CORE courses, and an essay submission. In either case, predictors of success in the program include the quality of prior work and interest in the field. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking. Students entering the CRP professional program from outsidethe College of Design should provide a similar portfolioof their work for evaluation.

Curriculum in Graphic Design

Administered by the Department of Art and Design and leading to a 123.5 credit undergraduate Bachelor of Fine Arts in Graphic Design including a 29.5 credit pre-professional program (the college core).

Consideration for admission into the graphic design is based on department resources; GPA earned in the College Core courses and the freshman year; as well as porfolio, all of which are submitted at the end of the freshman year.

On admission to the program, the faculty strongly recommend the purchase of a laptop computer and software. Specifications for the laptop computer and software are available at www.design.iastate.edu under the "Students" link.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Curriculum in Integrated Studio Arts—B.F.A.

Administered by the Department of Art and Design and leading to a 120.5 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts including a 29.5 credit pre-professional program (the college core).

Consideration for admission into the Integrated Studio Arts program is based upon departmental resources; GPA earned in the College Core courses and in the freshman year; as well as a portfolio, all of which are submitted at the end of the freshman year.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

On admission to the program, if the student wishes to pursue studies in digital media and or photography, the faculty strongly recommend the purchase of a laptop computer and software. Specifications for the laptop computer and software are available at www.design.iastate.edu under the "Students" link

Curriculum in Interior Design

Administered by the Department of Art and Design and leading to a 127.5 credit undergraduate Bachelor of Fine Arts in Interior Design including a 29.5 credit pre-professional program (the college core).

Consideration for admission in the Interior Design program is based upon departmental resources; GPA earned in the College Core and the freshman year; as well as a portfolio, all of which are submitted at the end of the freshman year.

A 34 graduate credit program leading to the master of arts, for students planning to undertake professional or design research-orientated pursuits (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program leading to the degree master of fine arts.

For more complete graduate program descriptions see Graduate Study under Interior Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires completion of 29.5 credit freshman design core program, including the following courses: Dsn S 102, Dsn S 131, Dsn S 183, 6 credits of Social Science/Humanities, 6 credits of Math/Science, English 150 or 250 and Library 160. Admission is based on department resources and will be determined by a formal review at the end of the freshman foundation year.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year pre-professional program of 29.5 credits and a four-year professional program of 120 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the pre-professional program. Applicants are reviewed on the basis of scholastic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor's and Master's levels.

The department also offers a 36 credit graduate program leading to the degree Master of Landscape Architecture. For more complete graduate program descriptions, see Graduate Study under Landscape Architecture in the Courses and Programs section.

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students' critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Each program is guided by the criteria developed by ABET, a non-governmental organization of peer reviewers which assures the quality of post secondary engineering education. The outcomes and objectives of the accredited engineering programs can be found in the Courses and Programs section of the catalog.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/ Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: agricultural engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, and materials engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: civil engineering, computer engineering, electrical engineering, industrial engineering and mechanical engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

Accreditation

Ten curricula in the College of Engineering are accredited by ABET. Two newer curricula will pursue accreditation. Accreditation status is indicated in the Courses and Programs section for each engineering curricula. For more information on accreditation practices contact:

Engineering Accreditation Commission
ABET
111 Market Place, Suite 1050
Baltimore, MD 21202-4012
Phone: 410-347-7700
http://www.abet.org

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include: 2 years of algebra, 1 year of geometry, and 1/2 year of trigonometry and 1/2 year of pre-calculus; 1 year each of chemistry, biology, and physics; 3 years of social science, and 4 years of English. See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Basic Program for Professional Engineering Curricula

The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor's degree in a minimum time.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing either Math 141 or 142 before enrolling in Math 166 or C E 160.

The Department of English may recommend placement in one or more sections of Engl 101 if the placement test administered to students whose first language is not English indicates a deficiency in reading or writing. Satisfactory completion of the recommended course(s) will be required of students in the College of Engineering.

Basic Program

Cr.	
8	Mathematics 165, 166
6	English 150, 250
4	Chemistry 167 or 177*
3	Engineering 160, Aer E 160, CE 160, Cpr E 185, E E 185, S E 185, or I E 148**
5	Physics 221
R	Engineering 101***
0.5	Library 160
26.5	Total credits

Students without a strong high school chemistry background may opt to take a two course sequence of Chem 155 (3 cr.) and Chem 165 (4 cr.) to meet the Chem 167 (4 cr.) requirement.

English 250 is normally taken in the second year. However, students who advance place into this course may be able to enroll during their first year. Credit for English 150 is earned upon successful completion of English 250. In addition to the basic program courses listed above, curriculum designated courses normally taken the first year of each engineering curricula are listed below.

Curriculum Designated Requirements

Aerospace Engineering—Aer E 160**, Aer E 161 (4 cr.), Aer E 192 (R), GenEd Electives (3 cr)

Agricultural Engineering—Chem 167L (1 cr.), A E 110 (1 cr.), Engr 170 (3 cr.), SSH Elective (3 cr.)

Biological Systems Engineering—Chem 167L (1 cr.), BSE 110 (1 cr.), Engr 170 (3 cr.), SSH Elective (3 cr.)

Chemical Engineering—Chem 177*, 177L (1 cr.), 178 (3 cr.), 178L (1 cr.), SSH Elective (3 cr.)

Civil Engineering—Chem 167L (1 cr.) or Chem 177L (1 cr.)*, C E 105 (1 cr.), C E 160**, C E 170 (2 cr.), C E 111 (3 cr.), SSH Elective (3 cr.)

Computer Engineering—Cpr E 185** (3 cr.), Com S 227 (4 cr.), Cpr E 166 (R cr.), Gen Ed Elective (3 cr.)

Construction Engineering—Con E 121 (1 cr.), 122 (1 cr.), Psychology Elective – Psych 101, 230, or 280 (3 cr.), Engr 170 (3 cr.), SSH Elective (3 cr.)

Electrical Engineering—E E 185** (3 cr.), Com S 207 (3 cr.) or 227 (4 cr.), E E 166 (R cr.), Gen Ed Elective (3 cr.)

Industrial Engineering—I E 101 (R cr.), I E 148** (3 cr.), SSH Elective (6 cr.)

Materials Engineering—Chem 177*, 177L (1 cr.), 178 (3 cr.), 178L (1 cr.), Engr 170 (3 cr.), Gen Ed Elective (3 cr.), (Physics 221 scheduled in sophomore year.)

Mechanical Engineering—Chem 167L (1 cr.), Engr 170 (3 cr.), M E 102 (R cr.), Gen Ed Elective (3 cr.)

Software Engineering— S E 185** (3 cr.), 166 (R cr.), Com S 227 (4 cr.), 228 (3 cr.)

The student's adviser may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable.

*Students planning to enroll in C E[1], Ch E, or Mat E will find Chem 177 to be a better preparation for Chem 178. However, Chem 167 is accepted as a substitute for 177 for those students declaring one of these curricula after having completed 167. The Chem 155-165 sequence is an acceptable substitute for Chem 167.

**Recommended choices by program:

Aer E: Aer E 160 (3 cr.)
C E: C E 160 (3 cr.)
Cpr E: Cpr E 185 (3 cr.)
E E: E E 185 (3 cr.)
I E: I E 148 (3 cr.)
S E: S E 185 (3 cr.)

Credit hours for graduation will be given for any one of Aer E 160, C E 160, Engr 160, I E 148, Cpr E 185, E E 185, or S E 185 without increasing a curriculum's minimum number of credits required for graduation.

***Students enrolled in the joint software engineering degree program will take S E 101.

[1]Students in the general emphasis in C E have two chemistry/physics sequence options. The environmental emphasis requires Option 1.

Option 1—Chem 177, 177L, 178, 178L, and Phys 221.

Option 2—Chem 167, 167L; or Chem 177, 177L; and Phys 221 and 222. Students who opt for Phys 222 rather than Chem 178, 178L will increase the total number of credits required by 1.

Requirement for Entry into Professional Program

Students enrolled in the College of Engineering must satisfy both of the following requirements before enrolling in the professional courses (200-level and above) offered by departments in the Engineering College:

1. Completion of the basic program with a grade point average of 2.00 or better in the basic program courses.
2. A cumulative grade point average of 2.00 or better for all courses taken at Iowa State University.

The following are the only exceptions to this rule:

a. Students who have completed all of their coursework while enrolled in the College of Engineering, but have not met the two basic program requirements, may enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering.

b. Students transferring to the College of Engineering from another college or university, or from a program outside this college, who have not met the two basic program requirements may also enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering. However, they may be granted an additional semester upon review by the college.

c. Iowa State students not pursuing an engineering degree may generally take engineering courses without restrictions provided they meet the prerequisites and space is available.

d. Only the first two semesters of 200-level and above engineering courses, taken at ISU while a student is not enrolled in the College of Engineering, can be applied toward an engineering degree.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 nor more than 48 semester credits.

Engineering Minors

The College of Engineering offers three undergraduate minors which are open only to students in the College of Engineering. These are minors in bioengineering, nondestructive evaluation, and nuclear engineering. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The bioengineering minor is a 15 credit interdisciplinary program that complements a student's major discipline by providing additional insight into the interactions between various engineering disciplines and biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Bioengineering in Courses and Programs.

The nondestructive evaluation minor is a 16 credit minor open only to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an interdisciplinary faculty committee. For minor course requirements, refer to Aerospace Engineering in Courses and Programs for minor course requirements.

The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also through an inter-institutional distance education program offered through the Web by four of the Big 12 Engineering Consortium Schools. For minor course requirements, refer to Nuclear Engineering in *Courses and Programs*.

Minor for Non-Engineers

The College of Engineering also offers an undergraduate minor in engineering studies which is open only to students outside of the College of Engineering.

The engineering studies minor is a 21 credit interdepartmental minor. A student's minor program in engineering studies must include at least nine credits which are beyond the total used to meet minimum degree requirements. The minor is supervised by an interdepartmental faculty committee. Refer to Engineering Studies in Courses and Programs for minor course requirements.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to maintain close contact with students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. All entering students are encouraged to attend an orientation session. Placement assessments given during the orientation program help determine the student's level of achievement and enable the adviser to prepare an appropriate program for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering's International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, a cooperative education program. Enrollment in the program allows students to gain practical experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional year to complete curriculum requirements.

   These programs are arranged so that the student alternates academic work with employment periods. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student's potential as a future full-time employee. Both domestic and international co-op programs are available.

   Cooperative education students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (298, 398, or 498) for each work period and are considered full time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. Internships are a mechanism by which a student may work full-time for one semester per academic year while maintaining her/his status as a full-time student.

   Internship students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (397) for a fall or spring semester work period or (396) for the summer term are considered to be full time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Programs. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

   Engineering International Programs (EIP) has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study with leading universities in other countries and multinational corporations, visit the EIP home page at www.eng.iastate.edu/intl-progs/.

e. Engineering Leadership Program. Started in the Fall Semester of 2006, the Engineering Leadership Program (ELP) was developed to address the growing need for leaders trained in technology. Initial funding for the program was provided by 3M Company with additional funding from other corporate and private sources. Students selected into the ELP have opportunities to interface with engineers and company leadership of the donating companies. Mentored by a faculty and a peer mentor, each student receives individual direction and insight on academics, leadership opportunities, career paths and life skills. They are encouraged to develop their individual leadership styles and leadership competencies, while interacting with industry, government, faculty and student leaders. Incoming freshmen may apply the spring prior to their first fall semester at Iowa State University. Current Iowa State students may apply to be upper-level scholars each spring. Visit the ELP website at: http://www.eng.iastate.edu/leadership/ .

Curriculum in Aerospace Engineering

Leading to the degree bachelor of science.

Total credits required: 126.5. See also *Basic Program and Special Programs.*

International Perspectives[1]: 3 cr.
U.S. Diversity[1]: 3 cr.

Communication Proficiency and Library requirements: Engl 150 and Engl 250 with minimum grade of C ; Lib 160. Department approval. (See Basic Program for credit requirements.)

General Education Electives: 15.0 cr[2]
Complete 15 cr. including a series. A series of at least two courses must be taken to fulfill this requirement.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Aer E 160, 3 cr.[3]; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.

Math and Physical Science: 13 cr.
Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.

Aerospace Engineering Core: 48 cr.
Aer E 243, 3 cr. and Aer E 243L 0.5 cr.; Aer E 261, 4 cr.; Aer E 311, 3 cr. and Aer E 311L, 0.5 cr.; Aer E 321, 3 cr.; Aer E 331, 3 cr.; Aer E 343, 3 cr. and Aer E 343L, 1 cr.; Aer E 351, 3 cr.; Aer E 355, 3 cr.; Aer E 411, 3 cr.; Aer E 421, 3 cr.; Aer E 361, 3 cr.; Aer E 461, 3 cr.; Aer E 462, 3 cr.; E M 324, 3 cr.; M E 330, 3 cr.

Other Remaining Courses: 24 cr.
E M 274, 3 cr.; E M 345, 3 cr.; Mat E 272, 2 cr.; Aer E 161, 4 cr. Complete 3 cr., from Aer E 412, 3 cr.; Aer E 422, 3 cr.; Aer E 423, 3 cr.; Aer E 426, 3 cr.; Aer E 432, 3 cr.; Aer E 442, 3 cr.; Aer E 446, 3 cr.; Aer E 451, 3 cr. or Aer E 464. Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding Aer E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships:
Aer E 192, R cr.; Aer E 291, R cr.; Aer E 292, R cr., Aer E 391, R cr., Aer E 392, R cr., Aer E 491, R, cr. and Aer E 492, R cr.

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved list.

[3] See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

[4] 2.00 required including transfer courses.

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 cr. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]
U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with a minimum grade of C; Lib 160. (See *Basic Program* for credits.) Complete one course from AgEds 311, Engl 309, Engl 314 or Sp Cm 212.

Social Sciences and Humanities: 12 cr.[2]
Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity university-approved list. Complete additional 6 cr. Social Sciences and Humanities courses.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.[3]; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See *Basic Program* rule.)

Math and Physical Science: 9 cr.
Chem 167L, 1 cr. or Chem 177L, 1 cr.; Phys 222, 5 cr.; and Stat 305, 3 cr.

Ag Engineering Core: 24 cr.[4]
A E 216, 3 cr.; A E 316, 3 cr.; A E 363, 4 cr.; A E 415, 2 cr.; A E 416, 2 cr.; E M 274, 3 cr.; E M 324, 3 cr.; E M 327, 1 cr.; Math 266, 3 cr.

Other Remaining Courses: 16 cr.
A E 110, 1 cr.; A E 201, 1 cr.; A E 301, 1 cr.; A E 401, 1 cr.; A E 404, 3 cr.; Engr 170, 3 cr.; M E 330, 3 cr. Complete one course (3 cr.) from AgEds 311, Engl 309, Engl 314 or Sp Cm 212.

Select remaining courses from one of the following options:

Agricultural and Environmental Systems Engineering Option: 40 cr.
A E 271, 1 cr. or A E 272, 1 cr.; A E 431, 3 cr.; A E 431, 3 cr.; A E 472, 3 cr.; Biol 211, 3 cr.; C E 332, 3 cr.; C E 372, 4 cr.; E M 378, 3 cr. Complete one course (3 cr.) from A E 340, A E 478, or BSE 480. Complete 3 cr. from Biological and Natural Resource Sciences list.[2]

Power and Machinery Engineering Option: 40 cr.
A E 271, 1 cr. or A E 272, 1 cr.; A E 340, 3 cr.; A E 342, 3 cr.; A E 413, 3 cr.; Agron 154, 3 cr.; Biol 211, 3 cr.; E M 345, 3 cr.; E M 378, 3 cr.; M E 324, 4 cr.; M E 325, 3 cr.; Mat E 272, 2 cr. Complete one course (3 cr.) from A E 431, A E 469, A E 472 or 478, or A E 480. Complete six credits of electives.[2]

Co-op/Internships (Optional)

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved list.

[3] See *Basic Program for Professional Engineering Curricula* for accepted substitutions for curriculum designated courses in the Basic Program.

[4] 2.00 required including transfer courses.

Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 cr. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with a minimum grade of C; Lib 160. (See *Basic Program* for credits.) Complete one course from AgEds 311, C E 203, Engl 309, or Sp Cm 212.

Social Sciences and Humanities: 12 cr. [2]
Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity university-approved list. Complete additional 6 cr. Social Sciences and Humanities courses.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 , 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.c; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See *Basic Program* rule.)

Biological, Math and Physical Science: 20 cr.
Biol 212, 3 cr.; Chem 167L, 1 cr.; Math 267, 4 cr.; Phys 222, 5 cr.; and Micro 302, 3 cr., Micro 302L, 1 cr., Stat 305, 3 cr.

Biological Systems Engineering Core: 26 cr.[4]
A E 316, 3 cr.; A E 363, 4 cr.; A E 404, 3 cr.; BSE 201, 1 cr.; BSE 216, 3 cr.; BSE 301, 1 cr.; BSE 380, 3 cr.; BSE 401, 1 cr.; BSE 415, 2 cr.; BSE 416, 2 cr.; BSE 480, 3 cr.

Other Remaining Courses: 23 cr.
BSE 110, 1 cr.; Ch E 356, 3 cr.; Ch E 357, 3 cr.; Engr 170, 3 cr.; E M 274, 3 cr.; E M 324, 3 cr.; E M 327, 1 cr.; M E 330, 3 cr. Complete one course (3 cr.) from AgEds 311, C E 203, Engl 309, or Sp Cm 212.

Complete remaining courses from one of the following options:

Biorenewable Resources Engineering Option: 20 cr.
A E 388, 3 cr. BSE 403, 3 cr.; Chem 331, 3 cr.; Chem 331L, 2 cr.; Chem 332, 3 cr. Complete 6 credits for option electives.[2]

Bioenvironmental Engineering Option: 20 cr.
A E 431, 3 cr. C E 326, 3 cr.; Chem 211, 2 cr.; Chem 211L, 2 cr.; Chem 231, 3 cr.; Chem 231L, 1 cr. Complete 3 cr. from A E 436, C E 421, C E 428, or EnSci 381. Complete 3 credits for remaining option elective. [2]

Food Engineering Option: 20 cr.
AE 451, 3 cr.; BSE 469, 3 cr.; Chem 231, 3 cr.; FSHN 311, 4 cr.; FSHN 420, 3 cr.; FSHN 471, 3 cr. Select 1 credit to complete option elective.

Pre-Professional and Pre-Graduate Option: 19-20 cr.
Chem 331, 3 cr.; Chem 331L, 1 cr.; Chem 332, 3 cr.; Chem 332L, 1 cr. Complete 3 credits from A E 406 or BSE 403. Complete 8 to 9 credits for remaining option electives. [2]

Co-op/Internships (Optional)

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved list.

[3] See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

[4] 2.00 GPA required including transfer courses.

Curriculum in Chemical Engineering

Administered by the Department of Chemical and Biological Engineering

Leading to the degree bachelor of science.

Total credits required: 125.5 cr. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]
U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement:
Engl 150 and Engl 250; Lib 160. (See Basic Program for credit requirements.) Complete one course from Engl 309, 3 cr.; Engl 314, 3cr.; or JL MC 347, 3 cr.

Social Sciences and Humanities: 15 cr.
Complete a total of 15 cr. with at least 6 cr. but not more than 9 cr. from the same department.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.[3]; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 30 cr.
Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.; Chem 167L, 1 cr. or Chem 177L, 1 cr.; Chem 178, 3 cr.; Chem 178L, 1 cr.; Chem 325, 3 cr.; Chem 331, 3 cr.; Chem 332, 3 cr.; BBMB 301, 3 cr.

Chemical Engineering Core: 33 cr.[4]
Ch E 210, 3 cr.; Ch E 302, 1 cr.; Ch E 310, 3 cr.; Ch E 325, 2 cr.; Ch E 356, 3 cr.; Ch E 357, 3 cr.; Ch E 358, 3 cr.; Ch E 381, 3 cr.; Ch E 382, 3 cr.; Ch E 421, 3 cr.; Ch E 426, 2 cr.; Ch E 430, 4 cr.

Other Remaining Courses: 21 cr.
Complete one course from Engl 309, 3 cr.; Engl 314 3 cr. or JL MC 347, 3 cr.
Complete 3 cr. from Chemistry Electives list.[2]
Complete 3 cr. from Statistical Electives list.[2]
Complete 3 cr. from Chemical Engineering

Electives list.[2] Complete 3 cr. from any 300+ level course in engineering.[2] Complete 6 cr. from Professional Electives list.[2]

Biological Engineering Option
The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering:

Math and Physical Science – BBMB 404 or Biol 313, 3 cr., may be substituted for BBMB 301 from list above.

Chemical Engineering Core – Replace Ch E 426, 2 cr. with Ch E 427, 2 cr. in required Core.

Other Remaining Courses:
Chemistry Electives, 3 cr. - BBMB 405 (prerequisite 404), BBMB 420 (prerequisite 301), or Biol 314.
Chemical Engineering Electives, 3 cr. – Ch E 415, Ch E 440, Ch E 542 or Ch E 562.
Engineering Electives, 3 cr. – A E 373, A E 480, BRT 501, C E 421, or MSE 580.
Professional Electives, 6 cr. – Ch E 415, Ch E 440, Ch E 542, Ch E 562, or Ch E 490; and one course from 300-level, or above, life sciences (not BBMB 301), 300- or above level course in Chem, FS HN or BBMB.

Co-op/Internships: Optional

[1]These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2]Choose from department approved list.

[3]See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

[4]2.00 required including transfer courses.

Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 131.5* See also *Basic Program and Special Programs.*

International Perspectives: 3 cr.[1]
U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C); Lib 160. (See Basic Program for credit requirements.)

Social Sciences and Humanities: 12 cr.[2]
Complete 12 cr. with 6 cr. at 200-level or above.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 160, 3 cr.[3]; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 17 cr. (18 cr.)*
Chem 177L, 1 cr.; Chem 178, 3 cr. and Chem 178L, 1 cr., or Phys 222 5 cr.; Geol 201, 3 cr.; Math 266, 3 cr. Complete 3 cr. Statistics Electives[2]. Complete 3 cr. Numerical Analysis Electives[2].

C E Engineering Core: 30 cr.[4]
E M 274, 3 cr.; E M 324, 3 cr.; E M 345, 3 cr.; E M 378, 3 cr. C E 305, 3 cr.; C E 326, 3 cr.; C E 332, 3 cr.; C E 355, 2 cr.; C E 360, 3 cr.; and C E 372, 4 cr.

Other Remaining Courses: 45 cr.
C E 105, 1 cr.; C E 111, 3 cr.; C E 170, 2 cr.; C E 205, 3 cr.; C E 306, 3 cr.; C E 333, 3 cr.; C E 334, 3 cr.; C E 382, 3 cr.; C E 453, 4 cr.; C E 485, 2 cr.; C E 486, 3 cr.; E M 327, 1 cr.; Sp Cm 212, 3 cr. Complete 11 cr. Engineering Topics Electives.[2]

Seminar/Co-op/Internships: R cr.
C E 403, R. cr.

Co-op/Internship optional.

[1]These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2]Choose from department approved list.

[3]See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

[4]2.00 required including transfer courses.

* Note: Students who opt for Phys 222 rather than Chem 178, 178L will complete 18 cr. here which will increase the total number of credits required by 1.

Curriculum in Civil Engineering with Environmental Option

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 130.5. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement: Engl 150 and Engl 250 with minimum grade of C); Lib 160. (See Basic Program for credit requirements.)

Social Sciences and Humanities: 12 cr.[2]
Complete 12 cr. with 6 cr. at 200-level or above.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 160, 3 cr.[3]; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See *Basic Program* rule.)

Math and Physical Science: 26 cr.
Chem 177L, 1 cr.; Chem 178, 3 cr. and Chem 178L, 1 cr., Biol 173 or 211, 3 cr.; Chem 231, 3 cr., and Chem 231L, 1 cr.; Geol 201, 3 cr.; Math 266, 3 cr.; Micro 201, 2 cr. Complete 3 cr. Statistics Electives[2]. Complete 3 cr. Numerical Analysis Electives[2].

C E/Env Engineering Core: 27 cr.[4]
E M 274, 3 cr.; E M 324, 3 cr.; E M 378, 3 cr.; C E 305, 3 cr.; C E 326, 3 cr.; C E 332, 3 cr.; C E 355, 2 cr.; C E 360, 3 cr.; and C E 372, 4 cr.

Other Remaining Courses: 39 cr.
C E 105, 1 cr.; C E 111, 3 cr.; C E 170, 2 cr.; C E 205, 3 cr.; C E 306, 3 cr.; C E 334, 3 cr.; C E 382, 3 cr.; C E 420, 3 cr.; C E 421, 3 cr.; C E 428, 3 cr.; C E 485, 2 cr.; C E 486, 3 cr.; E M 327, 1 cr.; Sp Cm 212, 3 cr. Complete 3 cr. Engineering Topics Electives.[2]

Seminar/Co-op/Internships: R cr.
C E 403, R. cr.

Co-op/Internship optional.

[1]These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2]Choose from department approved list.

[3]See *Basic Program for Professional Engineering Curricula* for accepted substitutions for curriculum designated courses in the Basic Program.

[4]2.00 required including transfer courses.

Curriculum in Computer Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree bachelor of science.

Total credits required: 126.5 See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement: Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See *Basic Program* for credit requirements.) Engl 314 or Engl 309 with a minimum grade of C.

General Education Electives: 15 cr.[2]
Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Cpr E 185, 3 cr.c; Lib 160, 0.5 cr.; Math 165, 4 cr. (minimum grade of C-) and Math 166, 4 cr. (minimum grade of C-); and Phys 221, 5 cr. (See *Basic Program* rule.)

Math and Physical Science: 20 cr.
Com S 227, 4 cr. (minimum grade of C-) and Com S 228, 3 cr. (minimum grade of C-). Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

Computer Engineering Core: 33 cr.[4]
Cpr E 281, 4 cr.; Cpr E 288, 4 cr.; Cpr E 308, 4 cr.; Cpr E 310, 3 cr.; Cpr E 381, 4 cr.; Com S 309, 3 cr.; Com S 311, 3 cr.; E E 201, 4 cr.; and E E 230, 4 cr.

Other Remaining Courses: 32 cr.
Cpr E 491, 3 cr. and Cpr E 492, 2 cr. Engl 314, 3 cr. or Engl 309, 3 cr. with a minimum grade of C.
Complete 3 cr. of Computer Science courses, 6 cr. of Computer Engineering, 9 cr. of Technical Electives, and 3 cr. of Electrical Engineering courses.b Stat 330, 3 cr.

Seminar/Co-op/Internships:
Cpr E 166, R cr. Cpr E 294, R cr., Cpr E 394, R cr. and Cpr E 494, R cr.

Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include Cpr E 491. Senior Design Project I and Professionalism, Cpr E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

[1]These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.

[2]Choose from department approved lists.

[3]See *Basic Program for Professional Engineering Curricula* for accepted substitutions for curriculum designated courses in the *Basic Program*.

[4]2.00 required including transfer courses.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Curriculum in Construction Engineering

Administered by the Department of Civil, Construction, and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: Building Option –123.5, Heavy Option – 123.5, Electrical – 126.5, Mechanical – 125.5 cr.

See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirements: Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See *Basic Program* for credit requirements.) Business Communication Elective: one course from Engl 302, Engl 309 or Engl 314 with a minimum grade of C.

Social Sciences and Humanities: 12 cr.
Complete one of Psych 101, Psych 230, Psych 250, or Psych 280. Complete either Econ 101 or Econ 102. Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity approved list.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 160, 3 cr.[3]; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See *Basic Program* rule.)

Math and Physical Science: 11 cr. (B, H); 12 cr. (E, M).
Stat 105, 3 cr.; Math 266, 3 cr. (B, H); Math 267, 4 cr. (E, M); Phys 222, 5 cr.

Construction Engineering Core: 24 cr. (B, H, E); 25 cr. (M)[4].
E M 274, 3 cr.; E M 324, 3 cr.; Con E 421, 3 cr.; E M 378, 3 cr.; C E 332, 3 cr.; (See options for remaining option Core courses.)

Additional Required Courses: 35 cr. (B, H), 36 cr. (E, M)
Con E 121, 1 cr.; Con E 122, 1 cr.; C E 170,| 2 cr.; C E 111, 3 cr.; Acct. 284, 3 cr.; Con E 221, 4 cr.; Con E 241, 3 cr.; Con E 251, 1 cr. Complete one 3 cr. Law Elective.[2].; Con E 441, 3 cr.; Con E 487, 2 cr. and Con E 488, 3 cr.; Complete one 3 cr. Business Communication Elective from Engl 302, 309, or 314[2]. Complete one course from Math or Stat Elective, 3 cr. (B, H); 4 cr. (E, M)[2]

Select remaining courses from one of the following options:

Building Option:
Remaining Core courses (9 cr.)
C E 360, 3 cr.; Con E 322, 3 cr.; Con E 340, 3 cr.
Remaining option courses – 15 cr.
C E 333, 3 cr.; C E 334, 3 cr.; C E 383, 1 cr.; Con E 352, 3 cr.; Con E 353, 2 cr.; E M 327, 1 cr.; Complete 2 cr. from Engineering Topics Electives.[2]

Heavy Option:
Remaining Core courses (9 cr.)
C E 360, 3 cr.; Con E 322, 3 cr.; and Con E 340, 3 cr.
Remaining option courses – 15 cr.
C E 333, 3 cr.; C E 334, 3 cr.; C E 382, 3 cr.; E M 327, 1 cr. Complete 5 cr. of Engineering Topics Electives[2].

Electrical Option:
Remaining Core courses (9 cr.)
M E 231, 3 cr.; E E 303, 3 cr. and E E 456, 3 cr.
Remaining option courses – 16 cr.
Con E 352, 3 cr.; Con E 353, 2 cr.; E E 201, 4 cr. E E 230, 4 cr. and E E 457, 3 cr.

Mechanical Option:
Remaining Core courses (10 cr.)
M E 231, 3 cr., M E 436, 4 cr., and M E 441, 3 cr.
Remaining option courses – 14 cr.
Con E 352, 3 cr.; Con E 353, 2 cr; E E 442, 2 cr. and E E 448, 2 cr.; M E 442, 3 cr.
Complete 2 cr. of Engineering Topics Electives.

Co-op/Internships - Optional

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved list.

[3] See *Basic Program for Professional Engineering Curricula* for accepted substitutions for curriculum designated courses in the *Basic Program*.

[4] 2.00 required including transfer courses

Curriculum in Electrical Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree bachelor of science.

Total credits required: 126.5 See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement: Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See *Basic Program* for credit requirements.) Engl 314 or Engl 309 with a minimum grade of C.

General Education Electives: 15 cr.[2]
Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; E E 185, 3 cr.c; Lib 160, 0.5 cr.; Math 165, 4 cr. (minimum grade of C-) and Math 166, 4 cr. (minimum grade of C-); and Phys 221, 5 cr. (See *Basic Program* rule.)

Math and Physical Science: 16 cr.
Com S 207, 3 cr. or Com S 227, 4 cr. (minimum grade of C-), Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

Electrical Engineering Core: 37 cr.[4]
Cpr E 281, 4 cr.; Cpr E 288, 4 cr.; E E 201, 4 cr.; E E 230, 4 cr.;E E 224, 4 cr.; E E 303, 3 cr.; E E 311, 4 cr.; E E 322, 3 cr.; E E 330, 4 cr. or E E 331, 4 cr.; and E E 332, 3 cr.

Other Remaining Courses: 32 cr.
E E 491, 3 cr. and E E 492, 2 cr. Engl 309, 3 cr. or Engl 314, 3 cr. with a minimum grade of C.
I E 305, 3 cr.
Complete one 3 cr. course from Math Electives list.[2]
Complete 12 cr. from EE/Cpr E Technical Elective list including one approved sequence.[2]
Complete 6 additional credits from Math Electives list, EE/Cpr E Technical Elective list and/or non-EE/CprE Electives list.[2]

Seminar/Co-op/Internships:
E E 166, R cr. E E 294, R cr., E E 394, R cr. and E E 494, R cr. Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved lists.

[3] See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

[4] 2.00 required including transfer courses.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree bachelor of science.

Total credits required: 120.5 cr. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirements:
Engl 150 and Engl 250 with minimum grade of C; Lib 160.

Remaining Communication courses: 6 cr.
Engl 314, 3 cr.; Sp Cm 212, 3 cr.

Social Sciences and Humanities: 12 cr.[2]
Six of twelve credits must be from 200-level or above courses. Six credits must be sequential or related courses.

Basic Program: 26.5 cr.[4]
Chem 167, 4 cr.[3]; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements), Engr 101, R cr.; I E 148, 3 cr.[3], Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See *Basic Program* rule.)

Math and Physical Science: 17 cr.
Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.; Stat 231, 4 cr.

Industrial Engineering Core: 31 cr.
I E 248, 3 cr.; I E 271, 3 cr.; I E 305, 3 cr.; I E 312, 3 cr.; I E 413, 4 cr., I E 341, 3 cr.; I E 348, 3 cr.; I E 361, 3 cr.; I E 441, 3 cr.; I E 448, 3 cr.

Other Remaining Courses: 28 cr.
Mat E 272, 2 cr.; E M 274, 3 cr.; E E 442, 2 cr.; M E 330, 3 cr.; Focus Electives , 6 cr.[2]; Management Electives, 6 cr.[2]; and Engineering Topic Electives, 6 cr.[2]

Seminar/Co-op/Internships:

I E 101, R cr. Optional co-op/internship courses.

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved list.

[3] See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

[4] 2.00 required including transfer courses.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 cr. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See *Basic Program* for credit requirements.) Complete one course from Engl 302, 309, 314 or JL MC 347 with a minimum grade of C.

General Education Electives: 15 cr.
Complete 12 cr. from approved list with a minimum of 6 cr. but no more than 9 cr. from one designator, and a maximum of 9 cr. of 100-level courses[2] . Complete one course from Engl 302, 309, 314 or JL MC 347.[4]

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.c; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science 18 cr.
Complete Chem 177L, 1 cr.; Chem 178, 3 cr. and Chem 178L, 1 cr.; Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

Materials Engineering Core: 32 cr.[4]
Mat E 201, R cr.; Mat E 214, 3 cr.; Mat E 215, 3 cr.; Mat E 215L, 1 cr.; Mat E 216, 4 cr.; Mat E 311, 3 cr.; Mat E 314, 3 cr.; Mat E 316, 3 cr.; Mat E 317, 3 cr.; Mat E 413, 3 cr., Mat E 414, 3 cr., Mat E 418, 3 cr.

Other Courses: 12 cr.
Engr 170, 3 cr.; E M 274, 3 cr.; E M 324, 3 cr.; Complete 3 cr. from non-remedial courses.

Seminar/Co-op/Internships
Co-op and internships are optional.

Option Requirements: 18 cr.
Students must choose two from the four areas of specialization: ceramic, electronic, metallic and polymeric materials. In lieu of the second specialty from the four listed, a student may propose an individually designed, materials related technical specialty to meet specific career goals. Students must have a 3.00 gpa and a B+ in Mat E 215. Students may learn other requirements and procedures for applying in the Undergraduate Handbook or by speaking with their adviser. The options below meet that expectation by using the following specialization courses:

Ceramic Materials: 321, 322, 425
Electronic Materials: 334, 332, 433
Metallic Materials: 342, 443, 444
Polymeric Materials: 351, 453, 454

Technical Electives: 6 cr.
Complete 6 cr. technical electives from approved departments.[2]

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved list.

[3] See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the *Basic Program*.

[4] 2.00 required including transfer courses.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

Curriculum in Mechanical Engineering

Leading to the degree bachelor of science.

Total credits required: 128.5 cr. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C); Lib 160. (See Basic Program for credit requirements.)

Remaining Communication Courses: 3 cr.
Engl 314, 3 cr.

General Education Electives: 15 cr.
Econ 101, 3 cr. or Econ 102, 3 cr.
Complete 3 additional credits of Social Science Electives.[2]
Complete 6 cr. of Humanities Electives.[2]
Complete 3 additional General Education credits.[2]

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.c; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See *Basic Program* rule)

Math and Physical Science: 20 cr.
Engr 170, 3 cr.; Chem 167L, 1 cr. or Chem 177L, 1 cr.; Math 265, 4 cr.; Math 267, 4 cr. or Math 266, 3 cr. with Math 268, 1 cr.; Phys 222, 5 cr.; Stat 305, 3 cr.

Mechanical Engineering Core: 46 cr.[4]
E M 274, 3 cr.; E M 324, 3 cr.; E M 345, 3 cr.; E E 442, 2 cr.; E E 448, 2 cr.; M E 270, 3 cr.; M E 231, 3 cr; M E 324, 4 cr.; M E 325, 3 cr.; M E 332, 3 cr.; M E 335, 4 cr.; M E 370, 3 cr.; M E 421, 4 cr.; M E 436, 4 cr.; Mat E 272, 2 cr.

Other Remaining Courses: 18 cr.
Complete one course from M E 415, 3 cr.; M E 442, 3 cr. or M E 486, 3 cr. Complete 15 cr. Technical Electives.[2]

Seminar/Co-op/Internships:
M E 102, R cr.; M E 202, R cr. Co-op/Internship Optional

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved list.

[3] See *Basic Program* for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the *Basic Program*.

[4] 2.00 GPA average required including transfer courses.

Transfer Credit Requirements - The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program. The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, three must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level ME technical electives. No more than 3 credits of ME 490 (independent study) shall be applied to meet the 12 credit requirement.

Curriculum in Software Engineering

Administered by the Department of Electrical and Computer Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

Total credits required: 124.5 cr. See also *Basic Program* and *Special Programs*.

International Perspectives: 3 cr.[1]

U.S. Diversity: 3 cr.[1]

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See *Basic Program* for credit requirements.) Engl 314 with a minimum grade of C.

General Education Electives: 15 cr.[2]
Complete 6 cr. from Arts and Humanities list, 3 cr. of Social Sciences, and an additional 6 cr. from either Arts and Humanities or Social Sciences lists.

Basic Program: 26.5 cr.[4]
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; S E 185, 3 cr.[3]; Lib 160, 0.5 cr.; Math 165, 4 cr. (minimum grade of C-) and Math 166, 4 cr. (minimum grade of C-); and Phys 221, 5 cr. (See *Basic Program* rule.)

Math and Physical Science: 11 cr.
Com S 227, 4 cr. (minimum grade of C-) and Com S 228, 3 cr. (minimum grade of C-). Math 267, 4 cr.

Software Engineering Core: 31 cr.[4]
Cpr E 281, 4 cr.; Cpr E 288, 4 cr. or Com S 229, 3 cr.; Cpr E 308, 4 cr. or Com S 352, 3 cr.; Com S 309, 3 cr.; Com S 311, 3 cr.; Com S 330, 3 cr. or Cpr E 310, 3 cr.; ComS 363, 3 cr. S E 319, 3 cr.; S E 329, 3 cr. and S E 339, 3 cr.

Other Remaining Courses: 41 cr.
S E 491, 3 cr. and S E 492, 2 cr. Engl 314, 3 cr. with a minimum grade of C. Complete either Econ 101, 3 cr., Econ 102, 3 cr. or I E 305, 3 cr. Sp Cm 212, 3 cr. Stat 330, 3 cr.
Complete 3 cr. from Math Electives list.[2]
Complete 6 cr. from Software Engineering course list. [2]
Complete 3 cr. from Technical Electives list.[2]
Complete 12 cr. from list of Supplementary Electives.[2]

Note: Excess credits from CprE 288 and/or Cpr E 308 may be applied to meet Supplementary Elective credit requirement.

Seminar/Co-op/Internships
S E 166 or Com S 203. Co-op or internship is optional.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism, S E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

[1] These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

[2] Choose from department approved lists.

[3] See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

d 2.00 required including transfer courses.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

College of Human Sciences

Pamela White, Interim Dean
Carla Peterson, Associate Dean
www.hs.iastate.edu/

Departments of the College

Apparel, Educational Studies, and Hospitality Management

Curriculum and Instruction

Educational Leadership and Policy Studies

Food Science and Human Nutrition

Kinesiology

Human Development and Family Studies

The College of Human Sciences provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences (CHS) was founded in 2005 and is the newest college on the ISU campus. The college fosters innovative synergies in teaching and research, and in many ways is reinventing how human potential can be enhanced. Members of the College of Human Sciences community strive to improve the quality of people's lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Recommended High School Preparation

Recommended preparation for students entering most departments of the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social science and/or humanities. In addition, students interested in Elementary Education or Early Childhood Education are advised to complete three or more years of high school study in one foreign language.

Information for Prospective Students

Each student in the College of Human Sciences works closely with an academic adviser who is associated with the curriculum in which the student is majoring. In some majors, freshmen are advised by a general college adviser. After the freshmen year, these students are assigned an adviser in the department of the chosen curriculum. Advisers assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisers attempt to adjust each student's schedule of course work in accordance with the student's interests and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Open Option Status

The College of Human Sciences offers an open option for entering students who have not selected a specific area of study. An orientation course helps students explore the opportunities available. Program planning information can be obtained from general college advisers.

Planned Transfer Programs

By careful planning, students may begin their education at another college, then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Student Services.

Families Extension

Students may prepare for a career in the Cooperative Extension Service by enrolling in a curriculum in the College of Human Sciences that provides them with a broad subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the associate dean and director of Iowa State University Extension to Families programs, the director of Iowa State University Extension to Youth and 4-H programs, or the Extension Human Resources office.

Undergraduate Core Curriculum

Graduates of the College of Human Sciences will demonstrate professional and personal competencies in concepts fundamental to the College's mission. These core concepts serve as a unifying focus for students in the College. Competencies will be assessed by designated outcomes in courses within each major in the College. For information on the specific core competencies for particular majors contact the departmental office administering the program.

General Education

Students in the College of Human Sciences are required to complete a program in general education which is integrated with their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

9.5 cr.

I. Communication Skills: English 150, 250; Library 160; and 3 credits in oral communication

9 cr.

II. Biological and physical sciences and mathematical disciplines: at least 3 credits in mathematical disciplines

15 cr.

III. Social sciences and humanities: at least 6 credits in social sciences and at least 6 credits in humanities

Accreditation and Licensure

The following program-specific accreditation/licensure/registrations have been attained by departments within the college:

Department of Apparel, Educational Studies, and Hospitality Management:
Family and Consumer Sciences Education Teacher Licensure Program is licensed by the Iowa Department of Education and the Iowa Board of Educational Examiners.

Hotel, Restaurant, and Institution Management: is accredited by the Accreditation Commission for Programs in Hospitality Administration, the accrediting agency of the International Council on Hotel, Restaurant, and Institutional Education.

Production focus of the Apparel Merchandising, Design, and Production major is endorsed by the American Apparel and Footwear Association.

Department of Food Science and Human Nutrition:
Food Science and Industry and Food Science and Technology curricula are approved by the Institute of Food Technologists. The Dietetics Internship Program and the Didactic Program in Dietetics are accredited by the Commission on Accreditation/Approval for Dietetics Education of The American Dietetic Association, 216 W. Jackson Blvd., Chicago, IL 60606-6995, 312/899-4876.

Department of Kinesiology:
The Athletic Training Option is accredited by the Commission on Accreditation of Athletic Training Education.

Department of Human Development and Family Studies:
The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC) Academy for Early Childhood Programs and licensed by the Iowa Department of Human Services.

Teacher Education and Licensure

All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the University Teacher Education Program and be recommended by the CHS Associate Dean for Teacher Education.

Each student will be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.

For details concerning the professional teacher education requirements and the areas of specialization requirements, see Teacher Education, Courses and Programs.

Majors

For more information about a major, see: 1) the curriculum descriptions in this section of the catalog; 2) the department catalog section under *Courses and Programs;* and 3) department websites.

Apparel Merchandising, Design, and Production—Options: Merchandising; Design; Production—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Child, Adult, and Family Services—Options: Child Programs; Youth Programs; and Adult/Family Programs — Administered by the Department of Human Development and Family Studies

Culinary Science- Administered by the Department of Food Science and Human Nutrition

Dietetics—Administered by the Department of Food Science and Human Nutrition

Early Childhood Education—Administered jointly by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies

Elementary Education—Administered by the Department of Curriculum and Instruction

Family and Consumer Sciences Education and Studies—Options: Communications; Professional Studies; Teacher Licensure—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Family Finance, Housing, and Policy—Administered by the Department of Human Development and Family Studies

Food Science—Options: Consumer Food Science; Food Science and Industry; Food Science and Technology—Administered by the Department of Food Science and Human Nutrition

Kinesiology—Options: Athletic Training; Community and Public Health; Exercise Science; General Studies; Health/Fitness Management; and Physical Education Licensure —Administered by the Department of Kinesiology

Hotel, Restaurant, and Institution Management—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Nutritional Science—Administered by the Department of Food Science and Human Nutrition

Secondary Education—The College of Human Sciences provides secondary education licensure programs in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, foreign languages, general sciences, health, family and consumer sciences education, mathematics, music, physical science, physics, and social studies. See *Index, Teacher Education*.

Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel Merchandising, Design, and Production

Athletic Coaching

Child, Adult, and Family Services

Dance

Educational Services in Family and Consumer Sciences

Family Finance, Housing, and Policy

Food Safety (interdepartmental minor)

Gerontology (interdisciplinary minor)

Hotel, Restaurant, and Institution Management

Nutrition (two minors: one for non FSHN majors and one for department majors)

See *Index* for minor requirements for specific departments and programs.

International Studies (secondary major only)

Sport and Culture

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see *Index, International Studies)*.

Double Majors

Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor's degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, including the CHS core, and prerequisite and supporting courses.

Two Bachelor's Degrees

Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see *Index, Two Bachelor's Degrees*.

International and Cross Cultural Programs

International experience opportunities are available and encouraged through the College of Human Sciences to broaden international and cross-cultural perspectives. Scholarships and other forms of financial assistance are available which provide partial support for students studying abroad. The College has established programs with a variety of colleges and universities around the world including Glasgow Caledonian University, Glasgow, Scotland; University of Otago, Dunedin, New Zealand; the International College of Hospitality Administration, Brig, Switzerland; the London College of Fashion, London, England; and Paris American Academy, Paris, France. Students also have an opportunity to participate in group study abroad programs to Europe, Africa, Central and South America, and Asia.

Other opportunities may be developed through consultation with the college director of international experiences and the student's adviser; for example, students have acquired internships and studied in such countries as Kenya, Rwanda, Spain, Puerto Rico, Ireland, Guatemala, Switzerland, England, Australia, Germany, and France. Faculty members bring diversity and global perspectives to instruction and research through their work in India, South Korea, Central and South America, Pakistan, Africa, and Europe.

Honors Program

High achieving students, with a grade point average of above 3.35, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and complete an honors project. For further information, contact the College Honors Committee or academic adviser. Also see Index, Honors Program.

Dietetics Internship (DI)

This post-baccalaureate program, administered by the Department of Food Science and Human Nutrition, is accredited by the American Dietetic Association (ADA). The purpose of the program is to enable those who meet the academic requirements of the ADA to obtain at least 900 hours of practice supervised by registered dietitians in medical nutrition therapy, community nutrition, and foodservice management to meet ADA performance requirements for entry level dietitians.

Students who satisfactorily complete the DI will be eligible to take the national registration examination administered by the Commission on Dietetic Registration.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in public and private institutions and for teaching, research, and extension positions in colleges and universities.

Graduate Curricula

The College of Human Sciences offers programs leading to the degrees of master of science, master of education, and doctor of philosophy. Graduate study in the College of Human Sciences is conducted through the Graduate College. Details are found in the Graduate College section of this catalog, (www.grad-college.iastate.edu) and on department websites.

Curriculum in Apparel Merchandising, Design, and Production

Administered by the Textiles and Clothing Program. Leading to the degree bachelor of science. **Total credits required: 123** including a minimum of 18 credits in AMDP at Iowa State University for the degree.

The major in apparel merchandising, design, and production provides a broad based program of study with flexibility in creating program options. Courses are required in general education, and textiles and clothing core. To complete the program, a student combines structured clusters of courses to form primary and secondary program options.

A minor in apparel merchandising, design, and production is available; the requirements appear under *Textiles and Clothing, Courses and Programs.*

Cr.	Degree Requirements
9.5	**Communications Skills**
6.5	Engl 150, 250; Lib 160
3	Select from ComSt 214, 218; Sp Cm 212
9-14	**Biological and Physical Sciences and Mathematical Disciplines**
3-4	Mathematics (Math 150 recommended for Merchandising and Production Options)
3-5	Select from natural sciences (including FS HN 167)
4-5	Stat 101 or 104, or 226

Curriculum in Early Childhood Education

The curriculum in early childhood education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms and home based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets the requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is administered jointly by the Departments of Human Development and Family Studies and Curriculum and Instruction.

Students in early childhood education must make application to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education's mandate for a performance based system of teacher training. Following this same type of system, the state of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Teacher Education Standards along with other information about the University Teacher Education Program, can be found at www.teacher.hs.iastate.edu/, the teacher education website.

Foreign Language Requirement
Early childhood education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F.

Degree Requirements

Communication Options
Select 3 credits from: ComSt 102, 218, 317, Sp Cm 212, 312, 313, 322, 327

Physical Sciences Options
Select 3 credits from: Astro 120, 150, Chem 160, 163, 164, Geol 100, 102, LAS 111, Mteor 206, Phys 101, 106

Biological Sciences Options
Select 3 credits from: Biol 101, 173, 155, 211, 211L, 255, 255L, 258, Ent 211

U.S. Diversity and International Perspectives Requirement: Students in Early Childhood Education fulfill the U.S. Diversity and International Perspectives Requirements by choosing three credits of coursework from each of the university-approved lists.

*Refer to departmental curriculum sheet, available from adviser, for specific course requirements.

Curriculum in Elementary Education

The curriculum in elementary education is planned for students preparing to teach in grades kindergarten through six. For additional information, see Index*, Elementary Education*.

Teaching endorsements in areas closely related to elementary education, including a special education endorsement in Instructional Strategist I: Mild/Moderate K-8, are available for elementary education majors. See Teacher Education, Courses and Programs, for information about specific endorsements.

Additional teaching endorsements, available at the graduate level to individuals who hold a valid Iowa teaching license, include the following: K-6 foreign language, reading, special education (Instructional Strategist I: Mild/Moderate K-8; Instructional Strategist I: Mild/Moderate 5-12; and Instructional Strategist II: Behavior Disorders/Learning Disabilities, ages 5-21).

Communication Proficiency
In order to meet graduation requirements, all students must have a C (2.0) or better for each of Engl 150 and Engl 250.

U.S. Diversity and International Perspectives
In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See department for approved lists of courses.

Foreign Language Requirement
Elementary education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F. Certification in American Sign Language is recognized by the University and satisfies the foreign language requirement for the curriculum in Elementary Education.

Total credits required: 128.5.

Curriculum in Family and Consumer Sciences Education and Studies

Administered by Apparel, Educational Studies and Hospitality Management. Leading to the degree bachelor of science. Total credits required: 125.5

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core. Students select one program option.

There are three choices for this curriculum. Option 1, teacher licensure, Option 2, communications, or Option 3, professional studies. In all options, students are prepared with a broad-based understanding of family and consumer sciences.

Option 1, teacher licensure, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior, and senior high schools. With additional credits students may also be approved to teach in specific occupational areas: child care, fashion merchandising, and foodservice. Further information about licensure programs appears under Teacher Education.

Option 2, communications, is designed for students seeking careers emphasizing communication with diverse populations in extension, business, community agencies, community colleges, and youth and adult education programs in a global community.

Option 3, professional studies, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Opportunities to participate in study abroad, internships, and field study build a solid base for work in a global community. Careers include working with diverse population in extension, business, community agencies, community colleges, and youth and adult education programs.

The program offers a minor in family and consumer sciences education; the requirements appear under Family and Consumer Sciences Education and Studies, Courses and Programs.

Cr. Degree Requirements

9.5 Communications and library
6 Engl 150, 250
3 Select from: ComSt 102, 214 218, Sp Cm 212, 312
0.5 Lib 160
9-10 Natural sciences and mathematical disciplines
3 Biol 101 or Biol 155
3-4 Select a course from the mathematical disciplines (Teacher licensure option must select a Math or Stat course and communications option must select Stat 101 or 104)
3 Select additional course in natural science. (Both teacher licensure option and communications option must complete high school chemistry or its equivalent. Teacher licensure must have a physical science course)
9 Social sciences
3 Econ 101
3 Soc 130 or 134
3 HD FS 102
9 Humanities
9 Courses from approved list (Teacher licensure must complete 3 cr. of American history or American government)
14 Family and Consumer Sciences Education and Studies core
AESHM 111, 206, 460
AESHM 311, 379, 421

Option 1: Teacher Licensure
75 Additional Professional Courses
30 FCEdS 214, 280L, 306, 318, 403, 413, 417A, 417B
6 FSHN 111, 167
12 HD FS 239; 276; 283, and 349;
3 Select from HD FS 341, 483, or 488
3 Select from HD FS 220, 221, 226 or FCEdS 223
3 T C Select one course from 121, 131, 165, 204, or 362
15 C I 201, 204, 333, 406, 415, 426
3 Sp Ed 450
125.5 Total Credits

Option 2: Communications
74-75 Additional Professional Courses
14 FCEdS 306, 415, 418A
3 FSHN 167
3 JL MC 305
6 HD FS 239; 283
3 AESHM 287
9 Select from: Engl 302, 309, 313, or 314
3 Sp Cm 312
6 Jl MC Select from 205, 220, 341, 462, 476, or 477
6 Jl MC 342 and 342L
3 Select from Anthr 417, AESHM 342, T C 362, or Phil 340
12 Select from AESHM, FCEdS, FS HN, HD FS, HRI, H S, or T C (At least 6 credits should be 300 level or above)
6-7 Electives
121 Total Credits

Option 3: Professional Studies
74 Additional Professional Courses
6-11 FCEdS 415, 418B
3 HD FS 283
3 HD FS Select from 239, 341, 483, or 488
3 AESHM 474 or Mgmt 310
3 FSHN 167
3 Select from: Anthr 417; AESHM 342, T C 362; Phil 340
6 Select from Engl 302, 309, 313, 314; Jl MC 205; Sp Cm 312
16-21 Select from AESHM, FCEdS, FS HN, HD FS, HRI, H S, or T C (At least 6 credits should be 300 level or above)
14 Select from Natural Sciences, Social Sciences, Humanities, Art and Design
12 Electives
121 Total Credits

Occupational teaching areas available:
Child care: HD FS 220, 221, 340, 343, 445

Fashion merchandising: T C 131, 165, 375, 376, 377, Com S 103

Foodservice: Biol 101, Micro 201 or HRI 233, 333, 380, 380L, 438

Curriculum in Family Finance, Housing, and Policy

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

Total credits required: 121.5

The family finance, housing, and policy curriculum prepares students for professional work related to financial and housing resource management and policy analysis. The program focuses on financial resource management, housing services and administration, and family policy issues pertinent to children, adults, and families. Graduates of the program are prepared for employment within the public and private sector as financial counselors and planners, insurance agents, loan officers, mortgage originators, government housing authority administrators, housing advocates, housing planners, real-estate agents, non-profit agency administrators, policy analysts and lobbyists, property managers, and consumer credit and financial aid counselors. Family finance, housing, and policy majors also are prepared to enter graduate programs in family policy and family financial planning.

Learning outcomes are identified for graduates with a degree in family finance, housing, and policy. Students are able to: demonstrate competency in consumer science and their chosen field of emphasis; demonstrate proficiency in interpersonal communication and in working with diverse groups to solve multidisciplinary problems; effectively prepare and deliver information to family finance, housing, and policy professionals as well as to the general public; critically evaluate information and accurately interpret and use research; understand the complexity of issues facing professionals in the field, including ethical, cultural and environmental elements.

A minor in family finance, housing and policy is available; the requirements appear under Human Development and Family Studies, Courses and Programs.

Degree Requirements
121.5 total semester credits required

12.5	Communications and Library Engl 150, 250, Sp Cm 212, Lib 160 Select from Engl 302, 309, 314

6	Business Mkt 340 or 447
0-3	Electives
120.5	Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.

Concurrent B.S. and M.S. Program:
Well qualified students in Food Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Food Science and a master of science degree in Food Science and Technology. For more information, refer to www.fshn.hs.iastate.edu

Curriculum in Kinesiology and Health

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the health, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of six options: 1) Athletic Training, 2) Community and Public Health. 3) Exercise Science, 4) General Studies, 5) Health/Fitness Management, and 6) Physical Education Licensure.

Minors in dance, athletic coaching, and sport and culture are available; the requirements appear under Kinesiology, Courses and Programs.

A major in Performing Arts with a dance emphasis is available; the requirements appear under *Curriculum in Performing Arts in Theatre.*

Communication Proficiency
In order to meet graduation requirements, all students must earn an average of C (2.0) or better in Engl 150 and 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course (select from Engl 220, 302, 309, or 314).

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See university approved list.

Total credits required: 124 (46 credits in courses numbered 300 or above).

R Review of Athletic Training Competencies—Kin 489
2 Instructor's First Aid and CPR—H S 305
4 General Chemistry—Chem 163
1 Laboratory in General Chemistry—Chem 163L
4 Physics 106 or 111
3 Drug Education—H S 215

Elective to equal 124 total credits

The following courses are required; they can be taken as part of the General Education requirements:

3-5 Statistics—Stat 101, 104, 226
2-3 Mathematics—select from Math 140, 141, 142, 150, 165

The following six courses must also be taken; three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365, 372 and H S 350.

Option 2. Community and Public Health

This option emphasizes health promotion and disease prevention and prepares students for professional involvement in community health agencies which incorporate health services and the educational process. Students will be prepared for employment in state and public health agencies, volunteer health agencies, hospitals (patient education), and industry (health and wellness programs). Graduates are eligible to take the National Certified Health Education Specialist (CHES) exam which recognizes qualified specialists in the diversified field of health education.

2 First Aid and Emergency Care—H S 105
3 Drug Education—H S 215
3 Worksite Health Promotion—H S 380

3 Principles of Marketing—Mkt 340
3 Principles of Public Relations—Jl MC 220 or Publicity Methods—Jl MC 205
3 Principles of Microeconomics—Econ 101
3-4 Select from Engl 309, Engl 313, HD FS 395, HD FS 449 or Jl MC 342/342L
10-16 Directed Field Experience—H S 485

Electives to equal 124 total credits

The following courses must also be taken. They can fulfill either General Education or Core requirements for the Kinesiology & Health major:

3 Statistics—Stat 101, 104, 226
3 Psych 230 or HD FS 102 (under Social Science choice)

The following three courses must also be taken; they will fulfill the Advanced Core requirement; H S 310, 350 and Kin 366.

Option 3. Exercise Science

The Exercise Science option is designed for students interested in an interdisciplinary approach to the science of human movement. By combining exercise science with another area of study to support an individualized program, this option is suitable for students interested in graduate study or who are preparing for advanced study leading to careers in medicine, physical therapy, or other allied health programs.

R Search Strategies for Field Experience and Employment—Ex Sp 385
6 Two 300-400 level Ex Sp courses
26 Meet the requirements of a specialization area in a related field

Electives to equal 124 total credits
A statistics course and one of Math 140, 141, 142, or 165 must be selected in the General Education requirements.

The following six courses must also be taken; three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365 or 366, 372 and H S 350.

Option 4. General Studies

The general studies option is provided for students interested in an interdisciplinary approach to the study of human movement. In this option kinesiology is combined with a concentration in another area of study to support an individualized program, such as community sport and recreation, dance, and other sport, exercise, or health related fields. Programs of study must be approved by the undergraduate program coordinator.

R Kin 385
6 Additional credits in 300-400 Kin courses
26 Credits in related areas of study (must be approved by Curriculum Coordinator)
8-12 Internship in Sport and Exercise Science—Kin 485

Electives to equal 124 credits

The following courses must also be taken. They can fulfill the General Education requirements:

2-3 Mathematics—Select from Math 140, 141, 142, 150, 165
3-5 Statistics—select from Stat 101, 104, 226

4 Physics—Physics 106 or 111

The following five courses must also be taken: three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365, 372.

Option 5. Health/Fitness Management

This option prepares students for careers in the physical fitness/health field. It is designed for those who wish to prepare for professional roles as exercise specialists or program directors in corporate fitness programs, health clubs, cardiac rehabilitation programs, or other public and private agencies providing physical fitness activities.

2 Basic Athletic Training—Kin 220

2 Leadership Techniques for Fitness Programs—Kin 259

0-2 Electives
120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.

Concurrent B.S. and M.S. Program:
Well qualified students in Nuritional Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Nutritional Science and a master of science degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu

The College of Liberal Arts and Sciences is the academic home, the foundation, for many essential learning disciplines. The college provides students with all the components of a modern liberal education. Students may choose to study in various fields of the physical, biological, and social sciences; in mathematical disciplines; in methods and systems of communication; and in the arts and humanities.

Learning and Teaching Mission

The primary mission of the college is to promote learning in all its dimensions by providing the student with ample opportunities to acquire the requisite knowledge, abilities, and skills to succeed in the world beyond the university. Throughout coursework within the major and in general education, students will develop skills in reasoning, analysis, and communication; achieve an understanding of the intellectual, historical, and artistic foundations of culture; and work to strengthen their abilities to interact with people, cultures, and the environment in an ethical and sensitive manner. To achieve these learning goals, the college asks students to acquire depth in learning within disciplines of their own choosing, and to acquire breadth through general education courses and electives.

The Curriculum

A baccalaureate degree in liberal arts and sciences is the end result of a curriculum that connects and integrates study in a major with general education. Requirements for a degree are deliberately flexible. Students select programs of study suited to a variety of interests and goals. Students having academic interests not fully met by a departmental major may also pursue a major offered by one of the college's interdepartmental programs or may apply for an undergraduate major in interdisciplinary studies (See *Index, Cross-Disciplinary Studies, Courses and Programs*). The college participates in the University Honors Program; thus, students with exceptional academic promise can develop unique and challenging programs of study.

The college has three curricula: a curriculum in Liberal Arts and Sciences, leading to the bachelor of arts or the bachelor of science degree; a curriculum in music, leading to the bachelor of music degree; and a curriculum in liberal studies, leading to the bachelor of liberal studies degree.

High School Preparation/ Admission Requirements

Students entering the college are required to present evidence of the following high school preparation:

4 years of English (Typically this preparation includes courses in British, American, and world literature in which critical reading and writing skills are emphasized and courses in speech and composition, including at least one senior-level writing course.)

3 years of social studies (Typically such preparation includes two semesters of world history, two semesters of American history, and a semester of American government. Electives can be chosen from areas such as economics, sociology, or psychology.)

2 years of a single world language (Three years or more of a single world language are strongly recommended for students who wish to continue their work in that language. A minimum of three years of a single world language is required to fulfill the world language graduation requirement in the College of Liberal Arts and Sciences.)

3 years of mathematics (Such preparation shall include two semesters of beginning algebra, two semesters of geometry, and two semesters of intermediate algebra. A fourth year of study involving analytic geometry, trigonometry, linear algebra, and/or calculus is strongly recommended for students who will major in mathematical or scientific disciplines.)

3 years of science (At least two years of such preparation shall be chosen from biology, chemistry, and physics.)

Recommended but not required as a condition of admission to the College of Liberal Arts and Sciences is one semester of computer experience. (Such a course should stress problem-solving with computers and should not substitute for courses in mathematics. In schools where computer use is an integral part of most courses, separate instruction in computers is not necessary.)

Students who transfer from another college or university with at least 24 credits of satisfactory coursework may be exempt from most of these requirements. Students who do not meet the requirements listed here may be admitted with a limited number of deficiencies. Contact the college office for further information about resolving these deficiencies.

Transfer Students

To graduate from the College of Liberal Arts and Sciences, a transfer student must complete the general requirements of the college as well as those of the university. Students planning to transfer to Iowa State University for the purpose of enrolling in the College of Liberal Arts and Sciences are advised to contact the college office for information concerning degree program requirements. Prospective transfer students are urged to learn about the academic programs that are of interest to them well before arriving on campus so that pretransfer courses are appropriate to the planned major and transferable toward graduation from ISU. Additional information concerning transfer credit evaluation may be obtained through the Office of Admissions as well as the department in which a student is interested.

A transfer student in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of his or her graduation or under one of the two immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed. A transfer student is responsible for reviewing his/her transfer credit evaluation with the academic adviser during the first semester of enrollment.

University Requirements

The university requirements for the bachelor's degree, including statements of academic standards, learning goals, the university residence requirement, the Communication proficiency requirement, U.S. diversity and international perspectives requirement, and the library requirement, appear in the Colleges and Curricula portion at the beginning of this catalog.

Curriculum in Liberal Arts and Sciences

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, an undergraduate student must earn a minimum of 120 semester credits including a minimum of 32 semester credits earned in residence at Iowa State University. In addition, the student must meet general education, communication proficiency, library proficiency, world language, and advanced credit requirements, as well as the requirements of a major. Courses taken on a pass/not pass basis may be counted toward the required total of 120 credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

General Education

Requirements and Learning Goals

The central importance of a general education is reflected in the learning goals of each of four disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation for all specializations. Students earn the minimum credits listed in each of the four general education areas in courses not required by the department of the first major listed on the degree program. Interdisciplinary courses may be used to satisfy requirements in any area for which they have been approved, but a student may not apply the same course to more than one area.

Credit by Examination Program

Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education area requirements.

World Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture's language.

As a means of achieving this objective, a student must satisfy a graduation requirement equivalent to the first year of university-level study in one world language (normally, completion of a two-semester sequence in any one world language). Students who have completed three or more years of high-school world language study are deemed to have completed the LAS World Language Requirement. These students may not enroll in or receive credit for 101 or 102 in those languages; test-out credit may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. 101 or 102 may not be taken on a remedial basis.

Students who have completed more than one year but less than three years of high-school world language study may not enroll in 101 in the same language. These students may enroll in either a 102 course in that language, or in the case of Spanish, Span 97. Before enrolling in either Span 97 or a 102 language course, students are advised to take the on-line placement test available at www.language.iastate.edu. Span 97 is designed for students who need additional remedial work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete Span 97 with a passing grade will have fulfilled the LAS World Language Requirement. Students who have completed Span 97 and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students who have completed more than one year but less than three years of high-school world language study may satisfy the World Language Requirement by (a) passing the exam for credit at the 102 level, (b) receiving a passing grade in a 102 world language course, or (c) receiving a passing grade in a world language course at the 200-level or higher. For more information see *Department of World Languages and Cultures*. (Courses taught in English do not satisfy the World Language Requirement). Iowa State University accepts a record of academic performance in American Sign Language or certification of proficiency in American Sign Language as fulfillment of entrance or graduation requirements in world language for a baccalaureate degree.

Questions about the World Language Requirement and how to meet it should be directed to the Department of World Languages and Cultures. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply additional courses in world languages toward the appropriate general education areas. Majors in any world language are deemed to have fulfilled the college World Language Requirement. International students for whom English is a second language may satisfy the World Language Requirement by completion of Engl 150 and 250 at ISU with an average grade of C- or better. See *World Languages and Cultures* for additional information on international students.

Advanced Communication Skills

The continued development of communication skills following the sophomore year is the responsibility of the student's major department. The department promotes this development by adopting measures to certify the writing proficiency of its own majors. Certification occurs upon satisfactory completion of a designated course in which writing is evaluated and is a significant component. This designated course may be be either a course required in the student's program or an advanced writing course offered by the Department of English (e.g., Engl 302, 305, or 314).

General Education Areas

The central importance of a general education is reflected in the learning goals of each of three disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation for all specializations. The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

Arts and Humanities—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.

Natural Sciences and Mathematical Disciplines—(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should experience science as a rational search for understanding the structure and behavior of the natural world, and should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking.

Social Sciences—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutuions.

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas. The list of majors falling within each area is available from the Office of the Dean, College of Liberal Arts and Sciences, and is posted on the web site of the College of Liberal Arts and Sciences.

Courses from the department of the first major may not be applied to general education requirements. Courses cross-listed with a course in the student's first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once. Interdisciplinary courses may be used to satisfy requirements in any area for which they have been approved, but a student may not apply the same course more than once.

Lists of approved courses are available on the web, from academic advisers or from the Office of the Dean, College of Liberal Arts and Sciences.

Advanced Credit Requirements

To obtain a baccalaureate degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. Courses from the department of the first major listed on the degree program may not be counted in the general education areas.

The Major

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major is comprised of 24 to 48 credits in a specific discipline as determined by the faculty. Tracks within a major must have a common 24 credit core. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.)

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. Courses in the first major listed on the degree program may not be counted in the general education groups.

Courses meeting the requirement of additional majors may be counted in the general education groups. When choosing an additional major, students must confirm that the additional major is allowable (see list under "*Double Majors*").

The major is chosen from the following list, which also indicates the degree(s) offered in the respective majors.

Advertising, B.A.
Anthropology, B.A., B.S.
Biochemistry, B.S.
Bioinformatics and Computational Biology, B.S.
Biological/Pre-Medical Illustration, B.A.
Biology, B.S.
Biophysics, B.S.
Chemistry, B.A., B.S.
Communication Studies, B.A.
Computer Science, B.S.
Earth Science, B.A., B.S.
Economics, B.S.
English, B.A., B.S.
Environmental Science, B.S.
    Environmental Studies (may be taken as a second major with the degree to be determined by the first major)
Genetics, B.S.
Geology, B.S.
History, B.A., B.S.
Interdisciplinary Studies, B.A., B.S.
    International Studies (may be taken as a second major with the degree to be determined by the first major)
Journalism and Mass Communication, B.A., B.S.
Linguistics, B.A.
Mathematics, B.S.
Meteorology, B.S.
Music, B.A., B. Mus.
Performing Arts, B.A.
Philosophy, B.A.
Physics, B.S.
Political Science, B.A.
Psychology, B.A., B.S.
Religious Studies, B.A.
Sociology, B.A., B.S.
Software Engineering, B.S.
Speech Communication, B.A.
Statistics, B.S.
Technical Communication, B.S.
Women's Studies, B.A., B.S.
World Languages and Cultures, B.A.

The major in interdisciplinary studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives. (See Index, *Interdisciplinary Studies*.)

A curriculum in liberal studies leading to a bachelor of liberal studies degree (B.L.S.) is also available. (See Index, *Liberal Studies*.)

The LAS College offers certificate programs available for students seeking documentation of additional study in specialized academic topics. At present, certificates are available in Latin American Studies and in Community Leadership and Public Service. Information about the specific course requirements in these certificate programs may be found in their respective entries in the Courses and Programs section of this catalog.

Double Majors

Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor's degree in another college of the university. Double majors between the following are not allowed: Chemistry with Biochemistry and Agricultural Biochemistry; Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Genetics, and Microbiology.

The major departments must then approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major.

If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education and World Language Requirements.

A student may earn two degrees in the Liberal Arts and Sciences curriculum with two appropriate majors and at least 30 additional credits. Either the B.A. or the B.S. in this curriculum may be earned with the Bachelor of Music. A major in Liberal Arts and Sciences may not be added to a Bachelor of Liberal Studies or a Bachelor of Music degree. Any degree offered by this college may be earned together with a degree with a major in any other college of the university. For the requirements for two degrees, see Index, *Bachelor's Degree Requirements.*

Minor

A minor, which is optional, must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. (See Index, *Minors*.)

The following minors are offered by the college of Liberal Arts and Sciences:

Advertising
African American Studies
American Indian Studies
Anthropology
Astronomy
Biochemistry
Biological Illustration
Biology
Chemistry
Chinese Studies
Classical Studies
Communication Studies
Computer Science
Criminal Justice Studies
Economics
Emerging Global Disease
English
Entrepreneurial Studies
Environmental Science
Environmental Studies
French
Genetics
Geology
German
Gerontology
History
International Studies
Journalism and Mass Communication
Latin
Linguistics
Mathematics
Meteorology
Military Studies (Army Reserve Officers' Training Corps)
Music
Music Technology
Performing Arts
Philosophy
Physics
Political Science
Psychology
Religious Studies
Russian Studies
Sociology
Spanish
Speech Communication
Statistics
Technical Communication
Technology and Social Change
Women's Studies

Courses applied toward the general education groups may be used to meet the requirements of a minor. (For restrictions, see *Index, Minors*.)

If a student declares a minor and completes the requirements specified by the offering department/program, the minor will be recorded on the transcript.

Electives

Students will take additional courses, freely elected, sufficient to accumulate a total of 120 credits. These additional courses together with the general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.

Planning the Program of Study

Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student's chosen major is provided to the student and the adviser each semester. The student should review the audit each semester and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean's office. It is essential that the audit be reviewed and updated in a timely fashion in order to avoid delay in the student's graduation.

During the first year, students should meet proficiency requirements in English and in library. They should also make progress toward meeting the general education requirements, a large part of which should be completed by the end of the second year. The third and fourth years should emphasize completion of the major (and minor, if elected) and of general education requirements, and should give the student an opportunity to take electives.

Academic Advising Learning Outcomes

Through their experience with academic advising, students will:

Develop an understanding of the structure, application, and goals of a liberal arts education in relation to their academic development.

Be able to formulate appropriate questions, seek information, and evaluate and apply academic advice.

Know the requirements, policies and protocol of the university, college, and department as they relate to their educational experience.

Understand how degree programs can be enhanced by study and experiences tailored to their intellectual and personal goals.

Be able to identify and utilize university resources effectively to

- Satisfy degree requirements
- Plan programs of study, including selection of appropriate courses and registration
- Discover how interests, skills and goals connect to fields of study and careers
- Link curricular and co-curricular activities
- Research and prepare for advanced study and/or careers

Share responsibility for a mentor-mentee relationship between advisee and adviser.

The Open Option

Many students entering Iowa State University are not ready to declare a major. They want time to become familiar with the academic opportunities that the university offers and to determine the best match between their academic interests and abilities. These students enter Iowa State University as Open Option majors.

The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State. Open Option students are assigned academic advisers in the Liberal Arts and Sciences Student Academic Services Office. These advisers help students with academic and career development.

During the first year, an orientation class introduces them to all of the colleges and majors on campus. A career development class in the second semester guides students in selecting a major and career that match their academic and personal goals. Open Option majors also have the opportunity to be members of a learning community with other Open Option students.

Aided by their adviser, Open Option students select courses that allow them to sample their academic interests before committing to a specific university major. Open Option students are encouraged to declare this major by the end of the first year. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

Honors Program

For information on the Honors Program in the College of Liberal Arts and Sciences, see Index*, Liberal Arts and Sciences, Cross-Disciplinary Programs, Honors Program.*

Reserve Officers' Training Corps Programs (ROTC)

The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in the Military Science (Army), Naval Science, and Air Force Aerospace Studies).

Teacher Licensure

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for licensure. Teaching licenses are issued for a specific teaching level, e.g., K-6 or 7-12. A subject area endorsement is listed on the candidate's license. The licensee may have multiple subject area endorsements listed.

Students in the College of Liberal Arts and Sciences who complete the approved licensure program in music education (BM degree with Vocal K-12 option or Instrumental K-12 option) may apply for a teaching license that allows them to teach music in grades K-12. Students who plan to teach in secondary schools (grades 7-12) may qualify for a license by completing an approved licensure program in one of the following LAS majors:

Biology
Chemistry
Earth Science
English
French
German
History
Spanish (Latin & Russian endorsements)
Mathematics
Physics

Students may also add these additional endorsements to their primary license:

English as a Second Language
General Science
Physical Science
Social Studies
Speech Communication

For further information, see *Index, Teacher Education*.

Preprofessional Programs

Students in the College of Liberal Arts and Sciences may participate in preprofessional programs in human health-related fields, law, and theology by taking the courses required for admission to professional schools. Students may enter the college with the designation Premed, Prelaw, or Preprofessional Health Programs. Most will earn a bachelor's degree by choosing a major and meeting the requirements for the major while taking the preprofessional courses.

Others will spend one to three years as students in the college before transferring to a professional school to which they have applied and been accepted. For further information, see *Index, Preprofessional Study.*

Experiential Learning (Internship/Co-op Program)

The Experiential Learning (Internship/Co-op) Program assists students in gaining career-related experience while going to school. Internships/Co-ops provide students with the opportunity to gain specific skills, apply academic knowledge in practical situations, pretest their career choice, earn a salary, and establish a network of professional contacts.

Most internships are full-time and last for a semester or a summer, but a part-time experience is possible. Students wishing to receive academic credit for their internship must make arrangements with a faculty member in their major department. In contrast, co-op students work full-time on an extended basis (work two semesters) or on an alternating basis (work, school, work, etc.) during any semester (fall, spring, summer).

It may take students participating in the Experiential Learning (Internship/Co-op) Program an additional semester or more to complete their academic curriculum requirements. For additional information, contact Business/Liberal Arts and Sciences Career Services.

Curriculum for Bachelor of Music

The Department of Music offers a Bachelor of Music degree (B.Mus.) as well as a Bachelor of Arts degree in music. For information about both degrees, see Music, Courses and Programs.

In order to receive teacher certification in music, students must earn the bachelor of music degree.

Candidates for the bachelor of music will complete the following requirements.

Cr.	
38.5-46.5	General education
47	Music core
31-52.5	Music option

(Students must select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition.)

Curriculum for Bachelor of Liberal Studies

The LAS College administers a bachelors degree program in Liberal Studies. This degree, the bachelor of liberal studies (B.L.S.), was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

For specific degree requirements, see Liberal Studies, Courses and Programs.

Curriculum for Software Engineering

A bachelor of science degree in software engineering is jointly administered by the Department of Electrical and Computer Engineering (College of Engineering) and the Department of Computer Science (College of Liberal Arts and Sciences). The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This interdepartmental program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering, Courses and Programs.

College of Veterinary Medicine

John U. Thomson, Dean
Donald D. Draper, Associate Dean for Academic and Student Affairs
Donald L. Reynolds, Associate Dean for Research and Graduate Studies
Eldon Uhlenhopp, Interim Associate Dean for Outreach and Operations

vetmed.iastate.edu/

Departments of the College

Biomedical Sciences
Veterinary Clinical Sciences
Veterinary Diagnostic and Production Animal Medicine
Veterinary Microbiology and Preventive Medicine
Veterinary Pathology

Other units of the college include the Veterinary Teaching Hospital, Veterinary Diagnostic Laboratory, Veterinary Medical Research Institute, Veterinary Education and Technology Services and Office of Curricular and Student Assessment. The college participates in interdisciplinary graduate programs in genetics; molecular, cellular and developmental biology; toxicology; immunobiology; and neuroscience.

Objectives of the Curriculum

The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care providers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in small animal medicine and surgery, equine medicine and surgery, food animal medicine and surgery, and production animal medicine. Companion animal medicine and surgery are provided within the regionally recognized referral hospital through the community practice unit and equine field services. The college is located in one of the most intensive livestock producing areas in the United States. Because of this, students engage in extensive food supply veterinary medicine experiences and numerous diagnostic cases.

The professional curriculum is a four-year course of study leading to the doctor of veterinary medicine degree. Each of the first three years of the curriculum consists of two semesters while the fourth year has three semesters. Students are admitted into the professional curriculum after completing a minimum of 60 semester credits of required undergraduate coursework.

A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational program. Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent D.V.M./M.S., DVM/Ph.D., D.V.M./M.P.H. programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor's degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

Pre-veterinary Medicine Preparation

Admission Requirements

The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice.

Undergraduate students are strongly encouraged to complete a bachelor's degree before applying to the College of Veterinary Medicine. Because veterinarians have varied career options, when deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may find benefits in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College web site at www.vetmed.iastate.edu/.

Applicants for admission to the College of Veterinary Medicine must have attended an accredited college or university, have completed 40 semester credits prior to the deadline for filing an application for admission, and have completed 60 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the **end of the fall term in which the applicant applies.** However, if necessary, the applicant may complete up to two required science courses during the spring term prior to matriculation.

Any required science courses taken the spring term prior to matriculation requires a grade of B (3.00) or better to fulfill the requirement. Remaining non-science required courses must be completed by the end of spring term prior to matriculation with a grade of C (2.00) or better. Required courses may not be taken during the summer prior to entering the program.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

English Composition One year of composition or writing emphasis courses. May include business or technical writing.

Engl 150, 250, 302, 309, or 314 6 cr.

Oral Communications May include public speaking, interpersonal communication, group or organizational communication or speaking emphasis courses.

Sp Cm 212, 223, or 312 or ComSt 214 or Ag Ed 311 3 cr.

General Chemistry with Laboratory*
One year series for biological science majors with one semester lab.

Chem 177-177L, 178 7 cr.

Organic Chemistry with Laboratory*
One year series with one semester lab.

Chem 331, 331L, 332 7 cr.

Biochemistry*
One semester (no lab required)
BBMB 301 3 cr.

General Physics with Laboratory*
First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound.
Phys 111 4 cr.

General Biology with Laboratory*
Two semester series with lab each semester. A Bachelor's degree in Biology fulfills this requirement.
Biol 211, 211L, 212, 212L 8 cr.

Genetics *	
Must include Mendelian and molecular genetics.	
Biol 313 or Gen 320	3 cr.
Mammalian Anatomy or Physiology*	
Human anatomy or physiology will also fulfill this requirement (no lab required).	
An S 214, BMS 329, Biol 155, or Biol 255 or Biol 335)	3 cr.
Humanities or Social Sciences	8 cr.
Electives	8 cr.
Total Credits Required	60 cr.

* science requirement

Credits in the previously specified courses will normally be earned on the traditional four-letter grading system with A as the highest grade and D as the lowest passing grade. All required courses must be completed with a grade of C (2.0) or better. It is generally expected that required courses have been completed within the past eight (8) years. AP or CLEP credits must be documented by original scores submitted to the University and MUST meet the University's minimum requirement in the appropriate subject area. CLEP credits may be accepted only for arts, humanities and social sciences. Credits in the preceding specified courses will not be accepted if earned under the pass-not pass grading system or similar options.

Application and Admission

Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the VMCAS website (www.aavmc.org under VMCAS). Those applying through VMCAS also need to complete the ISU Supplementary Application found at the College of Veterinary Medicine website. The deadline for filing the VMCAS application, evaluations and transcripts is October 1. The supplemental application, and processing fee are due to the College of Veterinary Medicine postmarked by October 15.

Any student wishing to use international coursework (including study abroad) to fulfill a preveterinary requirement must provide a transcript from the foreign institution.

A list of courses in progress at the time of submission and/or scheduled for completion by the end of spring term should accompany the supplemental application. Undergraduate college credits must average at least 2.50 on a 4.00 marking system for the application to be accepted. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. Undergraduate GPA, Graduate Record Exam (GRE) general test score (The GRE must be taken prior to October 15 of the year the applicant applies and the scores must be received by October 31.), animal and veterinary experience, essays, recommendations and personal development (leadership, citizenship, etc.) are given consideration in the selection of candidates. An interview will be required for those applying to enter Fall 2008 and later.

Approximately one-half of the positions available are reserved for residents of Iowa. The College of Veterinary Medicine has implemented a Cooperative Program in Veterinary Medicine with the University of Nebraska-Lincoln for Nebraska residents and contracts with the states of North Dakota, South Dakota and New Jersey. A number of positions are also available to residents of other states. A few highly qualified international students may be accepted and are considered in the non-resident/non-contract applicant pool. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at www.vetmed.iastate.edu and click on Admissions.

Curriculum in Veterinary Medicine

Graduation Requirements

To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D while enrolled in the College of Veterinary Medicine, and have at least a 2.0 grade-point average in the veterinary medicine curriculum.

Required Courses in the Professional Program

BBMB 420—Physiological Chemistry
BMS 330—Principles of Morphology I
BMS 331—Principles of Morphology II
BMS 333—Biomedical Sciences I
BMS 334—Biomedical Sciences II
BMS 337—Neurobiology
BMS/VCS 339—Clinical Foundations I
BMS 345—Case Study I
BMS 346—Case Study II
BMS 354—General Pharmacology
BMS 443—Pharmacology and Therapeutics
VCS 311—Veterinarian in Society I
VCS 312—Veterinarian in Society II
VCS 313—Veterinarian in Society III
VCS 314—Veterinarian in Society IV
VCS 315—Veterinarian in Society V
VCS 385—Seminar
VCS 391—Clinical Imaging
VCS 393—Principles of Surgery
VCS 394—Principles of Surgery Lab
VCS 395—Small Animal Surgery
VCS 398—Anesthesiology
VCS 399—Ophthalmology
VCS 436—Small Animal Internal Medicine
VCS/VDPAM 440—Introduction to Clinics
VCS 444—Small Animal Medicine
VCS 445—Equine Medicine
VCS 448—Diagnostic Imaging and Radiobiology
VCS 449—Junior Surgery Laboratory
VCS/VDPAM 450—Disturbances of Reproduction
VDPAM/V PTH 426—Veterinary Toxicology
VDPAM 445—Clinical Medicine
V MPM 378—Case Study IV
V MPM 380—Veterinary Immunology
V MPM 386—Veterinary Microbiology
V MPM 387—Veterinary Virology
V MPM 388—Public Health and the role of the Veterinary Profession
V MPM 437—Infectious Diseases and Preventive Medicine
V PTH 342—Anatomic Pathology I
V PTH 372—Anatomic Pathology II
V PTH 376—Veterinary Parasitology
V PTH 377—Case Study III
V PTH 409—Introduction to Veterinary Cytology and Laboratory Techniques
V PTH 425—Clinical Pathology

Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students can participate in rotations focused on small animals, horses, or food animals. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

Students may choose from the following list of clinical rotations.

Anesthesiology
Beef Production Medicine
Cardiology
CDC Epidemiology
Clinical Microbiology
Clinical Pathology
Community Practice
Dairy Production Medicine
Dermatology
Diagnostic Laboratory
Equine Field Services
Equine Medicine
Equine Surgery
Farrier
Food Animal Medicine and Surgery
Food Supply Field Services
Intensive Care/Emergency Medicine
Necropsy
Neurology
Oncology
Ophthalmology
Orthopedic Surgery
Public Health Laboratory
Radiology
Small Animal Medicine
Small Ruminant Production Medicine
Soft Tissue Surgery
Swine Production Medicine
Theriogenology

Reinstatement

Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dismissed from the College of Veterinary Medicine, after having successfully completed one or more semesters forfeits his/her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.

Graduate College

www.grad-college.iastate.edu/

David K. Holger, Dean
George A. Jackson, Assistant Dean
Carolyn Payne, Assistant Dean

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for administering students' graduate programs, and for promoting research support from various governmental, industrial, and private agencies.

The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master's and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socio-economic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees master of arts, master of science, and doctor of philosophy are research oriented. In many fields master's degrees are also awarded without a thesis, but a written report of independent study, called a creative component, is generally required. For those individuals interested in advanced study directed toward meeting vocational or professional objectives, the following degrees are offered: master of accounting, master of agriculture, master of architecture, master of arts in teaching, master of business administration, master of community and regional planning, master of education, master of engineering, master of family and consumer sciences, master of fine arts, master of landscape architecture, master of public administration, and the master of school mathematics.

The Graduate College Handbook lists policies and procedures of the Graduate College. It is available at the Graduate College's Web site: www.grad-college.iastate.edu/.

Admission

All degree-seeking graduate students must have graduated with a bachelor's or master's degree from a regionally accredited U.S. institution or from a recognized foreign institution where the requirements for the bachelor's degree or its equivalent are similar to those at ISU. Additionally, each applicant must be accepted at ISU by the major program, the Office of Admissions, and the Graduate College. For information concerning graduate study in a particular academic discipline, prospective students should correspond with the chair of the major program in which they wish to study.

Iowa State University has a shared application process, which means certain items are sent (electronically or in print form) to the Office of Admissions and other items are sent to the graduate program to which the prospective student is applying. Detailed instructions are available at https://www.applyweb.com/apply/isu/. Students are also encouraged to check the Program Requirements Web page on the Graduate College Web site at http://www.grad-college.iastate.edu/programs/APprograms.php for mailing instructions and deadlines for each program.

The nonrefundable application fee is $30 ($70 for international applicants). An electronic application is required to apply to ISU's graduate programs; the form and necessary instructions are available at https://www.applyweb.com/apply/isu/. The application fee is required of all applicants except those who have attended Iowa State as undergraduates, or those applying for admission in the nondegree admission status. Iowa State requires official academic records and statements of all degrees earned from all institutions attended since secondary school. Faxed, scanned, and notarized copies are not considered official. that each previous college or university attended provide official transcripts of grades and credits earned, and request that the institution from which the degree was granted provide a statement of the degree received and the applicant's quartile class rank, if available from the institution.

Many programs have very early application deadlines. For more details, check program deadlines at www.grad-college.iastate.edu/programs/APprograms.php.

Categories of Graduate Admission

An applicant pursuing an advanced degree must be recommended by the program in which he/she will be pursuing an advanced degree and must be approved by the Dean of the Graduate College.There are three admission categories for students who wish to pursue an advanced degree:

Full Admission status may be granted to an applicant who either has achieved a grade point average (GPA) of 3.0 or greater (on a 4.0 scale), or ranks in the upper one-half of his or her undergraduate class.

Provisional admission status may be granted to applicants who meet the requirements for full admission (listed above), but have academic or prerequisite deficiencies to remedy. Transfer from provisional admission to full admission status requires the completion of the graduate English requirement, completion of the coursework prescribed to remedy the background deficiencies with a grade average of B or better, and the written recommendation of the major professor and approval by the Dean of the Graduate College.

Restricted admission status may be granted to an applicant who does not satisfy the formal university requirements for full admission status and/or lacks undergraduate preparation in a field related to the graduate field of study. Restricted admission may also be granted to graduates of non-English-speaking foreign institutions, even if the student meets the university requirements for full admission status. Advancement from restricted to full admission status requires completion of 9 semester credits of graduate level course work as a graduate student with a cumulative grade average of B or better and satisfaction of the Graduate College English requirement. A recommendation is submitted in writing to the Graduate College by the major professor and must be approved by the Dean of the Graduate College.

Graduate Admission Without a Declared Major

Admission without a declared major is a category for graduates of regionally accredited institutions in the United States who do not intend to seek an advanced degree from Iowa State University. Such students usually include:

1. Those who intend to transfer graduate credit earned at Iowa State University to other institutions.
2. Those who intend to use graduate credits earned for professional certification.
3. Those who enroll for personal satisfaction.
4. Those who enroll occasionally in off-campus graduate courses.Students who wish to apply to Iowa State University without a declared major need to contact the Office of Admissions, 100 Enrollment Services Center (1-800-262-3810) for the nondegree application form for students in this category. The application form is also available at the web site at www.admissions.iastate.edu/nondegree/

Applications and schedules for students with an undeclared major are processed directly by the Office of Admissions and the Graduate College office; no program approvals are generally required. (Applications and schedules for students declaring a major require program evaluation and approval.)

A student without a declared major who subsequently seeks full, provisional, or restricted admission must apply to and be accepted by a graduate program and by the Graduate College for degree study. A new application, the application fee (unless the student attended Iowa State University as an undergraduate), and transcripts from all colleges attended are required.

For those students originally admitted to the Graduate College on a nondegree basis, no more than 9 semester hours of graduate credit earned under the nondegree option may be applied if the student later chooses to undertake a graduate degree program. The student's program of study committee will recommend to the Graduate College which courses (if any) taken on a nondegree basis may be included in the degree program.

Graduate Admission of International Students

An applicant who is a graduate of a recognized foreign institution is subject to the same criteria for admission as a graduate from an institution in the United States and may be recommended for the same admission categories described above except that of the nondegree option. International applicants for nondegree status may be considered for admission at the discretion of the Graduate College dean. Application and admission deadlines for international students can be obtained from the Admissions web site at www.admissions.iastate.edu/apply/.

International students are required to show evidence of financial support and to carry adequate health and accident insurance while in residence.

Admission Examinations

Graduate Record Examination. The Graduate Record Examination (GRE) is not a university-wide requirement for all applicants. However, many programs require or recommend submission of GRE scores; individual program statements at www.grad-college.iastate.edu/programs/APprograms.php should be consulted for this information.

English Requirements for Non-native Speakers

Applicants whose native language is not English and who have not earned a bachelor's or master's in a country where the only official language is English are required to submit Test of English as a Foreign Language (TOEFL) scores as part of the admission process. A minimum score of at least 79 on the TOEFL internet-based test or 550 on the paper-based test is required by the Graduate College. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. Because many programs require higher TOEFL and/or IELTS scores, applicants should check directly with the program to which they desire admission or browse the Graduate College Web site at www.grad-college.iastate.edu/programs/APprograms.php.

Graduate students whose native language is not English and who did not graduate from a U.S. institution must take an English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English. A student who does not pass this examination is assigned to one or more courses in the English 99 and 101 series. This course work must be completed during the first year of study . (There is a developmental course fee for the English 99 course.). Non-native English speaking ISU graduate students who meet or exceed the TOEFL scores (640 or above on the paper-based test or 105 on the internet-based test) are exempted from taking the Enlish Placement Test. (Self-enrollment in English 099 or 101 courses remains possible.

A graduate student whose native language is not English but did graduate from a U.S. institution, may bring to the Graduate College the "Request for the Graduate College to Approve the Graduate English Requirement for a Student Whose Native Language is NOT English" form, available from the Graduate College or on the Graduate College's Web site at www.grad-college.iastate.edu/forms/forms.html. Two conditions must be met: the student must have received a bachelor's, master's, or Ph.D degree from a U.S. college or university and the language of instruction at that college or university must have been in English.

New teaching assistants whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. Tests of oral proficiency and teaching skills (SPEAK and TEACH) are given before the beginning of each semester. Department offices have a schedule of SPEAK/TEACH testing dates, or browse the SPEAK/TEACH Web site. Registration for the test is held in 1116 Pearson Hall the day before the test is administered. TAs and faculty with questions about SPEAK/TEACH testing should call 515-294-1958 or 515-294-7996. A prospective teaching assistant who does not pass these tests is required to successfully complete course work and be retested. University Studies 180 is a series of communication courses designed to help new teaching assistants. Students focus upon pronunciation, listening, question-handling, teaching and lecturing skills, and analyze the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go to the SPEAK/TEACH Office, 1116 Pearson by the first or second day of classes to obtain permission to enter the course by completing a course add slip.

Graduate Appointments

Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate work and to promote research. Such appointments and research opportunities are available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship (20 hours per week) permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. These students may also be eligible for tuition scholarship awards (50% of in-state tuition for most master's students and 100% of in-state tuition for most Ph.D. students and certain terminal masters students). Students who are graduates of a regionally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor's degree are substantially equivalent to those of Iowa State University, who are admitted in the full or provisional admissions status, and who present the requisite undergraduate or graduate preparation, may apply for these appointments.

Students registered on a restricted basis or those placed on academic probation are eligible for assistantship appointment only on a term by term basis but are not normally eligible for a graduate tuition scholarship. Students admitted without a declared major are not eligible for assistantship appointments. Further information may be obtained by writing to the appropriate graduate program.

The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full time study for the master's degree or five years for the doctorate, the student will not normally be continued on assistantship support (shorter periods may be stipulated by the student's program or department).

Postdoctoral Study

Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the Dean of the Graduate College.

Graduate Study by Staff Members

Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section, and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

Registration

Graduate students are encouraged to register for courses on the ISU web site (www.iastate.edu) via AccessPlus. Students who are unable or who choose not to register through this system may use a walk-through registration procedure. Students who do not register by the published deadline for initiation of a schedule through the AccessPlus systems must use the walk-through procedure. For complete information on registration, see the ISU Schedule of Classes or the Registration Web site at www.iastate.edu/~registrar/registration/.

Credit Limits

Registration is limited to a maximum of 15 credits per semester. Schedules for graduate assistants on one-half time appointments are limited to a maximum of 12 credits. For full-time staff members, the limit is 6 credits. (Different credit limits apply during the summer session; see the Graduate College Handbook at www.grad-college.iastate.edu/publications/homepage.html for more details.)

Interim Registration

Registration for special work between semesters and during certain vacation periods cannot exceed one credit for each week that the student is in residence. For more information, consult the Graduate College Handbook.

Distance Education

Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at http://www.distance.iastate.edu/programs/homepage.php.

Other information about graduate requirements is available in the Graduate College Handbook at http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html.

Doctoral Post Prelim (formerly Continuous Registration)

Even when Ph.D. graduate students have completed course work and residency requirements, they are required to register and pay tuition and fees, whether or not university facilities and equipment are used or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major department or program and pay the appropriate graduate tuition and fees.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are not used, the Ph.D. candidate may register for Gr St 680 (Doctoral Post Prelim Registration) and pay the Doctoral Post Prelim Registration fee.

The Ph.D. candidate must be aware that registration for Gr St 680 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and is not sufficient registration for the term the preliminary or final oral examination is taken; and does not defer student loans.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

Auditing

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve ALL audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audited courses do not appear on the student's permanent record unless the "Request for Audit(s) to Appear on Transcript" form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College's web site at www.grad-college.iastate.edu/forms/forms.html, must be filed with the Graduate College, 1137 Pearson Hall.

After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student's permanent record as a drop. Audits are not acceptable as registration for loan deferments.

Graduate Courses Taken by Undergraduates

Certain graduate level courses listed in the ISU Catalog may be used in the program of study even though they were taken for graduate credit by the student as an undergraduate at Iowa State University.

The following conditions must be met:

1. The POS committee can request approval from the Dean of the Graduate College that up to nine hours of such credit be applied toward meeting advanced degree requirements (these courses must be clearly marked on the POS).
2. Credits earned in these courses must be in addition to those used to meet requirements for the bachelor's degree and must have grades of B or better.
3. The student must be classified as an undergraduate and not a nondegree undergraduate (credits taken as a nondegree undergraduate student are not allowed).
4. The Graduation Office (10A Enrollment Services Center) should be contacted to determine that the courses were not taken as Graduation Office (10A Enrollment Services Center) indicating that the courses were not taken as a nondegree undergraduate student, were not used toward fulfillment of the undergraduate degree program and were graded B or better.

Undergraduate Admission to Concurrent Graduate Degree Programs

Several programs provide opportunities for well qualified ISU juniors and seniors majoring in those curricula to apply for admission to both a bachelor's and master's degree.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For a complete listing of the concurrent degree programs, consult the table, "Concurrent Bachelor and Master Programs" in this section.

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the programs listed below about applying early in their undergraduate careers. Undergraduate students seeking admission to concurrent graduate degree programs in field other than these, plus any student with an interdepartmental major, must submit a written proposal for an individualized program, co-signed by their advisers, to the Graduate College for review and approval. For more information about the application process and transferring credits, consult the *Graduate College Handbook*.

Veterinary Medicine Students in Concurrent Graduate Degree Programs

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must complete a graduate application, complete a "Concurrent Enrollment Request" form available in the Graduate College office or on the web site at www.grad-college.iastate.edu/forms/forms.html, submit both forms with appropriate transcripts and letters of recommendation to the Office of Admissions (100 Enrollment Services Center). (Copies of the application forms may be obtained at www.admissions.iastate.edu/apply/index.php.) State on the application that the application is for a concurrent degree program.

Signed approvals on the Graduate Admissions Evaluation form are required from the graduate program, the Dean of the College of Veterinary Medicine, and the Dean of the Graduate College. On admittance, the student receives an admission notification from the Office of Admissions. For more information see the *Graduate College Handbook*.

Graduate Students in Concurrent Undergraduate Programs

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions (100 Enrollment Services Center) to obtain admission information (even if the student has been previously

admitted as an undergraduate). A "Concurrent Enrollment Request" form should be obtained from the Graduate College Web site at www.grad-college.iastate.edu/forms/forms.html and circulated for the appropriate approvals. The student must be formally admitted both as a graduate student and as an undergraduate student. Official enrollment and fee payment will be as a graduate student. Credits transferred from the graduate permanent record to the undergraduate permanent record are no longer available for use on a graduate program of study.

Courses Taken as a Nondegree Undergraduate Student

A person classified as a "nondegree undergraduate" student may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if he/she is to receive graduate credit for courses.

Grading

Grades are the permanent official record of a student's academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)

All courses (even if they are undergraduate courses) taken as a graduate student will be calculated into the graduate GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester's average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. Creative Component/Research (599 and 699) credits are not used in the calculation of the GPA. In the case of repeated courses, only the grade achieved the last time the course is taken is used in computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student's GPA.

Pass (P)/Not Pass (NP) Course Credit

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS, nor do P/NP marks contribute to the student's GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see *the Graduate College Handbook*.

Satisfactory/Fail (S/F) Grading

S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a D- grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis. S/F grading may be used only for approved courses offered as seminars, symposia, workshops, special topics, and research. Programs must submit requests for S/F grading to the Dean of the Graduate College. The Graduate College Curriculum and Catalog Committee reviews and approves or rejects all S/F courses.

Grievances about Grades

A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in the *Graduate College Handbook.*

Probation

If a graduate student does not maintain a cumulative 3.0 grade point average on all course work taken, exclusive of research credit, he or she may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in course work only. New, first-term graduate students who fall below a 3.0 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.0 GPA. These students will receive a warning letter from the Graduate College.

While on academic probation a student will not be admitted to candidacy for a degree and if appointed to a graduate assistantship, the student will not receive a Graduate tuition scholarship unless approval is given by the student's academic college. If a student is to qualify for a tuition scholarship, he/she must be removed from probation by the tenth class day of the term.

To insure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review his or her record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.0 GPA or greater.

Master's Degrees

General requirements for all master's degrees are as follows:

General Requirements

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master's programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee

New graduate students at ISU may be assigned a temporary academic adviser by the major program in the first semester of the student's residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A master's POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's master's research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. For more information on duties and makeup of the committee as well as changes to the committee makeup, see the *Graduate College Handbook*.

Program of Study.The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee be formed later than the term before the final oral examination.

Residency. There is no on-campus residency requirement for the master's degree.

Credits. Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master's programs. At least 22 graduate credits must be earned from Iowa State University unless noted in the descriptions under "Specific Master's Degrees" in this catalog.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student's responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better. Audits may be listed on the program of study, but do not carry credit.

Major. A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. A student may not minor and major in the same field. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student's POS committee.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation" form (diploma slip). A minor cannot be added to a degree that has already been received.

Department/Program Change.

Transferring from One Major/Program/Department to Another

Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another department or program. Because graduate students are admitted to particular programs, transfers require the approval of both the receiving program and the Graduate College.

Students seeking transfer to another program or department should first discuss their wishes with the new program DOGE (Director of Graduate Education) to determine requirements and interest by the new program. When a student receives a favorable preliminary response from the new program, he or she should fill out the student portion of the form entitled "Request to Transfer from One/Major/Program/Department to Another" and submit this form to his or her current DOGE. The current DOGE will fill out the Current Program Information adding any comments he or she believes the new program should consider and forward the form to the proposed new program. This form is available from the department, the Graduate College, or the Graduate College web page.

The receiving program will generally give the student the same consideration and employ the same admissions standards that are used for original applications for admission and will expect the same application materials (transcripts, letters of recommendation, test scores, etc). During the process, the new and old programs and the Graduate College are authorized and encouraged to seek and disclose information related to the student's overall fitness for studies in the receiving program. Programs are authorized to inquire into the student's prior conduct at the university, both with the prior department and with the Dean of Students.

Upon departmental action (acceptance or denial), the request to transfer form must be sent to the Graduate College for approval. All parties

will receive a copy of the completed form from the Graduate College.

Students desiring to transfer from a degree-seeking status to a nondegree-seeking status need to fill out the "Request to Transfer from One Major/Program/Department to Non-degree" form and bring it to the Graduate College.

Students desiring to transfer from nondegree-seeking status to a degree-seeking status must be admitted by a program through the regular graduate admission process.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact the graduate classification officer (1137 Pearson Hall). The classification officer will consult with the student and determine the proper course of action.

Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year previous and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate, must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed "Undergraduate Reentry" form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student's overall fitness for continued studies including information about the student's conduct, employment and education since the student's last enrollment.

Individuals who do not have active graduate status and who first enrolled less than one year previous should first see the classification officer in the Graduate College.

Time Limits. It is expected that work for the master's degree shall be completed within five years. In special circumstances the student's POS committee may recommend that the Dean of the Graduate College extend these degree time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student's POS committee and the Graduate College. The inclusion in the student's program of study of course work that is beyond the time limits ("over-age" courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Application for Graduation. Students planning to graduate must submit an "Application for Graduation" form (diploma slip) to the Graduate Office by the end of the first week of the semester (fall or spring) in which he/she expects to receive the degree, or by the last day of spring semester when wishing to graduate during summer.

Before submitting this form, a student must have submitted and had approved by the Graduate College a "Recommendation for Committee Appointment" form and a "Program of Study" form. Also the student must have been fully admitted to a program and have met the Graduate English requirement if he/she is a non-native English speaker. Graduation may be delayed if the "Application for Graduation" form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she should call the Graduate College (515-294-4531) and cancel the previously submitted "Application for Graduation" form. The student must then file a new form for the next planned term of graduation.

Thesis. A master's thesis is a scholarly composition that demonstrates the ability of the author to do independent and creative work. A thesis is required in all fields in which a master's degree is awarded, except where specific provision is made for a nonthesis degree program. A minimum of three research credits is required on every program of study for a thesis master's degree.

Responsibility for writing and editing of the thesis rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of theses. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the thesis to assure the highest level of quality when the student presents the thesis to the committee for final approval.

Copies of the thesis must be submitted to the members of the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College's web site (http://www.grad-college.iastate.edu/thesis/homepage.html) for requirements, revised fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation" form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College's cancellation deadline.

Creative Component. Most nonthesis students must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of two credits of such independent work is required on those programs of study for a nonthesis master's degree. Some programs require more credits. (For more information, contact the individual program or consult the Specific Master's Degrees section in this catalog.) The element of creative independent study must be explicitly identified on the program of study. The format of the creative component is determined in cooperation with the POS committee. As with a thesis, a creative component should be submitted to members of the POS committee two weeks before the final oral examination. However, no final submission of a creative component is turned in to the Graduate College for review and approval.

Final Oral Examination. Most master's candidates must pass final oral examinations. The final oral examination must be held by the final examination deadline date for the semester in which the degree is granted. All coursework in the program of study must either be completed or in progress before the final examination can be scheduled. This examination is oral; it may also include a written component if specified by the student's (POS) committee.

Graduate students must register at Iowa State for the equivalent of two credits, or for the R-credit course GR ST 600 (Examination Only) if no course work is needed, during the semester in which the final examination is taken. (Graduate students who are not required to take a final oral examination should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.) Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the final oral examination. If the examination is taken during the interim between terms (including the first day of classes), registration can be for either the term before or the term after the examination is held.

The candidate is responsible for initiating the "Request for Final Oral Examination" form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student's program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see *the Graduate College Handbook*.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a "Graduate Student Approval Slip for Graduation" form. It is sent to the major professor or program to give to the student after the "Request for Final Examination" form is received and approved by the Graduate College. Signatures are required by the major program, the Graduate College Thesis specialist (for those completing a thesis), and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term's graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Specific Master's Degrees

The number of credits in a major for a master's degree will vary according to the degrees listed below. General credit requirements for all master's degrees include: a minimum of 30 graduate credits is required for all master's programs at ISU; at least 22 graduate credits must be earned at ISU unless noted in descriptions; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the POS form.

Master of Arts or Master of Science—Thesis

At least 30 credits of acceptable graduate work must be completed, not less than 22 of which must be earned from ISU. Students are expected to research and write a thesis that demonstrates independent and creative work. A minimum of 3 semester credits is required for thesis research.

Master of Arts or Master of Science—Nonthesis

In certain programs a nonthesis degree program is offered. (For more information on requirements, contact the individual program or department.) This option requires the satisfactory completion of at least 30 graduate credit hours of acceptable work (not including research credit), not less than 22 credits of which must be earned from Iowa State University, and satisfactory completion of a comprehensive final oral examination. In addition, every nonthesis master's program must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, or other creative endeavor). A minimum of two semester hours of such independent work (referred to as the creative component) is required on every program of study for a nonthesis master's degree and is applied toward the credit-hour requirement. This element of creative independent study must be explicitly identified on the program of study. Detailed requirements may vary with fields. Reference should be made to the *Courses and Programs* section in this catalog.

Master of Accounting. The Department of Accounting offers a 30-credit Master of Accounting graduate degree. The program requires 15 credits of graduate accounting courses, at least 9 credits of non-accounting graduate electives, a communications course, an international course from an approved list, and an optional creative component. At least 22 graduate credits must be earned at ISU. The degree is appropriate for any student wanting to pursue a variety of accounting careers. Additionally, the program is designed to help interested candidates meet the 150-hour education requirement for the CPA certification in Iowa. Since no final oral examination is required in the above professional program and its options, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Agriculture. The major in professional agriculture is an off-campus, nonthesis program leading to the master of agriculture degree. It is available to students wishing to pursue graduate study in agriculture without taking formal coursework on campus. The program is considered to be a terminal master's degree. Students are required to take a minimum of two courses in each of three disciplines and complete 28 semester credits of formal coursework and four credits of creative component experience, resulting in a total of 32 graduate credits of coursework. At least 22 graduate credits must be earned at ISU. Courses are delivered via video-tapes, interactive video, world-wide web, on-and off-campus classes and workshops. Specific courses offered in the program and the location of the off-campus classes may be obtained from the departmental course listings, off-campus course catalog, or by contacting the Professional Agriculture Coordinator, 201 Curtiss Hall.

Master of Architecture. The Department of Architecture offers three master programs: M Arch I, M Arch II and M S A S. M Arch I (100 credits) is a non-thesis accredited professional degree in architecture. Students with an undergraduate degree other than architecture enroll in a 100-credit, seven semester program. Students with a B.A. or B.S. in architecture or other affiliated design fields are considered for advanced standing based on a review of their academic record. Students with advanced standing typically enroll for four semesters. Since no final oral examination is required in the M Arch I program, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

The M Arch II (30 credits) is a post-professional degree in architecture with a required graduate thesis. Students with a B Arch, M Arch I or equivalent professional degree in architecture or other affiliated design fields may apply for this degree.

The M S A S (30 credits) is an interdisciplinary research degree in architecture with a required graduate thesis. This degree is for students with bachelor degrees in various fields that are interested in conducting graduate-level research on the built environment. At least 22 graduate credits must be earned at ISU for all the above programs.

Since no final oral examination is required in the above professional program and its options, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

The M.Arch. II (30-credit) option is for students with a B.A. or B.S. in a 4-year degree program in architecture or a M.Arch.I degree. These students must complete a thesis. At least 22 graduate credits must be earned at ISU for all the above options.

Master of Arts in Teaching. This is a degree leading to teacher licensure. A range of graduate credits are required depending on the program offering the degree. The student must also demonstrate an ability to perform independent study through the completion of a creative component or thesis. At least 22 graduate credit hours must be earned at ISU.

Master of Business Administration. The College of Business offers a 48 graduate credit-hour program leading to a nonthesis master of business administration degree.

At least 22 graduate credits must be earned at ISU. Students may select courses in the traditional business disciplines or choose areas of specialization in accounting, agribusiness, family finanical planning, information systems, international business, marketing, and supply chain management.

Since no final oral examination is required, M.B.A. students should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Community and Regional Planning. The master of community and regional planning degree requires a minimum of 48 graduate semester credit hours. At least 22 graduate credits must be earned at ISU. This degree is available as a thesis or nonthesis option.

Master of Education. For the master of education degree, a range of 30 to 40 graduate credits are required. At least 22 graduate credits must be earned at ISU. The student demonstrates an ability to perform independent study through the completion of a creative component or a field-based activity.

Master of Engineering. The academic standards and the general level of attainment are the same for the master of engineering and master of science degrees. Master of engineering programs are offered to meet the needs for professionally oriented programs on campus and for off-campus professionally oriented programs at locations with adequate library and laboratory facilities. An appropriate number of credit hours in design, laboratory work, computation, or independent study is required as evidence of individual accomplishment. Of the minimum 30 graduate credits requirement, 22 graduate credit hours must be earned at ISU. For those Master of Engineering programs that do not require a final oral examination, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Family and Consumer Sciences. The College of Human Sciences offers two nonthesis options leading to the degree master of family and consumer sciences. Both options are designed to enhance the skills of those holding the bachelor's degree so that they may meet the requirements of their present jobs or progress in their careers. The comprehensive option can be followed on- or off-campus and requires 36 graduate credits covering a variety of family and consumer sciences subject matter. The specialization option requires 36 credits and is offered on-campus from the following departments and programs: Dietetics, Family Financial Planning, Foodservice and Lodging Management, Gerontology, Human Development and Family Studies, Nutritional Sciences, and Textiles and Clothing. At least 22 graduate

credits must be earned at ISU. Both options require a written and oral integrative final exam.

Master of Fine Arts. For this degree a minimum of 54-61 graduate credits is required, including the completion of a thesis-exhibition or a thesis. At least 22 graduate credits must be earned at ISU.

Master of Landscape Architecture. The master of landscape architecture degree requires a minimum of 36 graduate credits and the satisfactory completion of a thesis or a creative component. At least 22 graduate credits must be earned at ISU.

Master of Public Administration. This is a professional degree program designed to provide training necessary for an administrator in a public or quasi-public bureaucracy. The MPA degree requires 37 graduate credit hours, which includes (a) 12 credit hours in Core Competency, (b) 12 credit hours in one of the Concentration areas, (c) 4 credit hours in other required courses, (d) up to 7 credit hours of electives, (e) 3 credit hours of Creative Component (a Capstone Project) or a minimum of 3 credit hours of research (thesis). Pre-service students are encouraged to obtain an internship for 3 credit hours. At least 22 graduate credits must be earned at ISU.

Master of School Mathematics. This degree is designed primarily for in-service secondary mathematics teachers. Its prescribed program of study requires 33 graduate credits, two of which come from the writing of an approved creative component, 15 from courses offered for graduate credit, and 13 from courses offered for nonmajor graduate credit. At least 22 credit hours must be earned at ISU.

Master's Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master's degrees and two diplomas are granted at the same time. For double degrees the final project (thesis or creative component) must integrate subject areas from both departments. One final oral examination must be held covering the combined thesis or creative component. Students planning to pursue double degrees must complete a double degree request form and submit it to the Dean of Graduate College for approval. Just one "Recommendation for Committee Appointment" form and one "Program of Study (POS)" form need to be submitted for the two degrees. However, two "Application for Graduation" forms, one for each degree, will need to be submitted. All forms should show clearly that the student is enrolled in a double-degree program.

Like other master's programs, three graduate faculty members can constitute a POS committee; however, POS committees for double degrees must include co-major professors from each of the majors. Although specific degree programs may require more, the program of study must include at least 44 hours of non-overlapping credit (22 for each major) in the two degrees.

Several such combinations are currently available: (1) Master of Architecture/Master of Business Administration; (2) Master of Architecture/Master of Community and Regional Planning; (3) Master of Community and Regional Planning/Master of Business Administration; (4) Master of Landscape Architecture/Master of Community and Regional Planning; (5) Master of Public Administration/Master of Community and Regional Planning; (6) Master of Public Administration/Master of Science in Information Assurance; (7) Master of Science in Statistics/Master of Business Administration; and (8) Master of Science in Information Systems/Master of Business Administration.

If a student outside one of the named areas is interested in an individually-developed double degree program, a written proposal for a double degree to serve those interests and needs must be submitted to the Dean of the Graduate College for review. See t*he Graduate College Handbook* for more information.

Drake University Law School/ Iowa State University Combined Degree

To provide training in the complementary fields of law, political science, and economics with a minimum amount of academic duplication, special arrangements for combined degree programs have been approved with the Drake University Law School. ISU and Drake offer a combined J.D.-M.A. in political science and J.D.-Ph.D. in economics. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for nonmajor graduate credit. Because of the difference in grading systems, the Law School grades are transferred as passes, provided the student has achieved a grade of C or better in those courses at Drake for the political science program or a grade of B or better for the economics program.

Applicants for either of the combined programs must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

Doctor of Philosophy

General Requirements

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are: (1) high attainment and proficiency of the candidate in his or her chosen field, (2) development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work, and (3) successful passing of detailed examinations over the field of the candidate's major work, with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master's or Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals fo the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee. The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student's major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

Changes to POS committee. Recommendations for changes in the POS committee must have the approval of the student, major professor, DOGE, and all committee members involved in the change (committee members who are on Faculty Professional Development Assignments, retired, or resigned do not have to sign) before seeking approval of the Graduate College. A form to seek approval is available in program offices or on the web at www.grad-college.iastate.edu/forms/forms.html. These changes must be approved by the Dean of the Graduate College before the preliminary or final oral examination is held. For more information on changes to the committee and to the Program of Study, see the *Graduate College Handbook*.

Program of Study. The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

Credits. A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. At least 24 of these credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session while in residence at the university. (This requirement does not apply to doctoral students who are employed more than half time at ISU). There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student's responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Residency. At least 24 semester credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session. This requirement does not apply to doctoral students who are employed at least half-time by Iowa State University and government laboratories located in Ames. Of the 72 graduate credits required for a Ph.D. at least 36 credits, including all dissertation research credits, must be earned under the supervision of the student's POS committee.

Major. A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed at the end of this section of the bulletin. Opportunities also exist for majoring in more than one area of study (co-major or joint major programs).

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student's POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation" form (diploma slip). A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.

Time Limits. A student beginning a Ph.D. degree program at Iowa State with a master's degree from another institution is expected to complete the Ph.D. within five years, while a student beginning a Ph.D. degree program without the master's degree is expected to complete the program within seven years. If warranted, the Program of Study (POS) Committee may request by letter that the Dean of the Graduate College extend these time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student's program of study committee and the Graduate College. The inclusion in the program of study of coursework that is beyond the time limits ("over-age" courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Preliminary Examination. The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student's knowledge of major, minor, and supporting subject areas as well as the student's ability to analyze, organize, and present subject matter relevant to the field. A "Request for Preliminary Examination" form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the "Request for Preliminary Examination" form is submitted to the Graduate College: admitted to full admission status in a Ph.D. granting program, approved "Recommendation for Committee Appointment" form, approved POS form, English requirement met, not on probation, time limit not exceeded, qualifying examination (if required by program) passed, and registration for at least the equivalent of 2 credits, or for the R-credit course GR ST 600 (Examination Only) if no course work is needed, during the term in which the preliminary oral examination is taken. (Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the preliminary oral examination.)

A preliminary oral examination will not be scheduled for a student on provisional or restricted admission or on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program's DOGE is approved by the Dean of the Graduate College.

Application for Graduation. Application for graduation should be made by the end of the first week of the semester (fall or spring) in which the student expects to receive the degree, or by the last day of the spring semester if graduation is planned during summer session. To apply for graduation, the student is required to submit to the Graduate College a signed "Application for Graduation" form, available in the program office or on the web at www.grad-college.iastate.edu/forms/ forms.html. Before submitting this form, a student must have submitted and had approved by the Graduate College a "Recommendation for Committee Appointment" form and a "Program of Study" form. Also the student must have been fully admitted to a program and have met the Graduate English requirement. Graduation may be delayed if the "Application for Graduation" form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she should call the Graduate College (515-294-4531) and cancel the previously submitted "Application for Graduation" form. The student must then file a new form for the next planned term of graduation.

Dissertation. A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval. Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College's web site (http://www.grad-college.iastate.edu/thesis/homepage.html) for new requirements, revised fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation" form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College's cancellation deadline.

Final Oral Examination. The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To receive the degree at the end of a given semester, the student must hold the final oral examination before the final oral examination deadline for the semester.

The candidate is responsible for initiating the "Request for Final Oral Examination" form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student's program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see t*he Graduate College Handbook*.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a "Graduate Student Approval Slip for Graduation" form. It is sent to the major professor or program to give to the student after the "Request for Final Examination" form is received and approved by the Graduate College. Signatures are required by the major program, the Graduate College Thesis specialist, and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term's graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Graduate Majors

More information on each major can be found in the Courses and Programs section of this catalog under the department or program listed in parentheses after the degree information.

Accounting: M.Acc. (see *Accounting*)

Aerospace Engineering: M.Engr., M.S., Ph.D. (see *Aerospace Engineering*)

Agricultural Economics: M.S., Ph.D. (see *Economics*)

Agricultural Education: M.S., Ph.D. (see *Agricultural Education and Studies*)

Agricultural Engineering: M. Engr., M.S., Ph.D. (see *Agricultural Engineering*)

Agricultural History and Rural Studies: Ph.D. (see *History*)

Agricultural Meteorology: M.S., Ph.D. (see *Agronomy*)

Agronomy: M.S. (see *Agronomy*)

Analytical Chemistry: M.S., Ph.D. (see *Chemistry*)

Animal Breeding and Genetics: M.S., Ph.D. (see *Animal Science*)

Animal Ecology: M.S., Ph.D. (see *Natural Resource Ecology and Management*)

Animal Physiology: M.S., Ph.D. (see *Animal Science*)

Animal Science: M.S., Ph.D. (see *Animal Science*)

Anthropology: M.A. (see *Anthropology*)

Applied Linguistics and Technology: Ph.D. (see *English*)

Applied Mathematics: M.S., Ph.D. (see *Mathematics*)

Applied Physics: M.S., Ph.D. (see *Physics and Astronomy*)

Architectural Studies: M.S. (see *Architecture*)

Architecture: M. Arch., M. Arch./M.B.A., M. Arch./M.C.R.P. (see *Architecture*)

Art and Design: M.A. (see *Art and Design*)

Astrophysics: M.S., Ph.D. (see *Physics and Astronomy*)

Biochemistry: M.S., Ph.D. (see *Biochemistry, Biophysics and Molecular Biology*)

Bioinformatics and Computational Biology: M.S., Ph.D. (see *Bioinformatics and Computational Biology*)

Biomedical Sciences: M.S., Ph.D. (see *Biomedical Sciences*)

Biophysics: M.S., Ph.D. (see *Biochemistry, Biophysics and Molecular Biology*)

Biorenewable Resources and Technology: M.S., Ph.D. (see *Biorenewable Resources and Technology*)

Botany: M.S., Ph.D. (see *Botany*)

Business: M.S. (see *Business Administration*)

Business Administration: M.B.A., M. Arch./M.B.A., M.B.A./M.C.R.P., M.B.A./M.S. (Statistics), **M.B.A./M.S** (Information Systems) (see *Business Administration*)

Business and Technology: Ph.D. (see Business and Technology)

Chemical Engineering: M. Engr., M.S., Ph.D. (see *Chemical and Biological Engineering*)

Chemistry: M.S., Ph.D. (see *Chemistry*)

Civil Engineering: M.S., Ph.D. (see *Civil Engineering*)

Community and Regional Planning: M.C.R.P., M. Arch./M.C.R.P., M.B.A./M.C.R.P., M.L.A./M.C.R.P, M.P.A./M.C.R.P. (see *Community and Regional Planning*)

Computer Engineering: M.S., Ph.D. (see *Computer Engineering*)

Computer Science: M.S., Ph.D. (see *Computer Science*)

Condensed Matter Physics: M.S., Ph.D. (see *Physics and Astronomy*)

Creative Writing and Environment: M.F.A. (see *English*)

Crop Production and Physiology: M.S., Ph.D (see *Agronomy*)

Diet and Exercise: B.S./M.S. only (see *Food Science and Human Nutrition or Health and Human Performance*)

Earth Science: M.S., Ph. D. (see *Geological and Atmospheric Sciences*)

Ecology and Evolutionary Biology: M.S., Ph.D. (see *Ecology and Evolutionary Biology*)

Economics: M.S., Ph.D. (see *Economics*)

Education: M.Ed., M.Ed. Practitioner, M.S., Ph.D. (see *Curriculum and Instruction, Educational Leadership and Policy Studies*)

Electrical Engineering: M.S., Ph.D. (see *Electrical Engineering*)

Engineering Mechanics: M.Engr., M.S., Ph.D. (see *Engineering Mechanics*)

English: M.A. (see *English*)

Entomology: M.S., Ph.D. (see *Entomology*)

Environmental Science: M.S., Ph.D. (see *Environmental Science*)

Family and Consumer Sciences: M.F.C.S. (see *Family and Consumer Sciences, Master of*)

Family and Consumer Sciences Education: M.Ed., M.S., Ph.D (see *Family and Consumer Sciences Education and Studies*)

Fisheries Biology: M.S., Ph. D. (see *Natural Resource Ecology and Management*)

Food Science and Technology: M.S., Ph.D. (see *Food Science and Human Nutrition*)

Foodservice and Lodging Management: M.S., Ph.D. (see *Hotel, Restaurant, and Institution Management*)

Forestry: M.S., Ph.D. (see *Natural Resource Ecology and Management*)

Genetics: M.S., Ph.D. (see Genetics—Interdisciplinary)

Geology: M.S., Ph.D. (see *Geological and Atmospheric Sciences*)

Graphic Design: M.F.A. (see *Art and Design*)

High Energy Physics: M.S., Ph.D. (see *Physics and Astronomy*)

History: M.A. (see *History*)

History of Technology and Science: M.A., Ph.D. (see *History*)

Horticulture: M.S., Ph.D. (see *Horticulture*)

Human Computer Interaction: M.S., Ph.D. (see *Human Computer Interaction*)

Human Development and Family Studies: M.S., Ph.D. (see *Human Development and Family Studies*)

Immunobiology: M.S., Ph.D. (see *Immunobiology*)

Industrial and Agricultural Technology: M.S., Ph.D. (see *Technology Systems Management*)

Industrial Engineering: M.S., Ph.D. (see *Industrial Engineering*)

Information Assurance: M.S., M.S./M.P.A. (see *Information Assurance*)

Information Systems: M.S., M.S./M.B.A. (see *Management Information Systems*)

Inorganic Chemistry: M.S., Ph.D. (see *Chemistry*)

Integrated Visual Arts: M.F.A. (see *Art and Design*)

Interdisciplinary Graduate Studies: M.A., M.S (see *Interdisciplinary Graduate Studies*)

Interior Design: M.F.A. (see *Art and Design*)

Journalism and Mass Communication: M.S. (see *Journalism and Communication, Greenlee School of*)

Kinesiology: M.S., Ph.D. (see *Kinesiology*)

Landscape Architecture: M.L.A., M.L.A./M.C.R.P. (see *Landscape Architecture*)

Materials Science and Engineering: M.S., Ph.D. (see *Materials Science and Engineering*)

Mathematics: M.S., Ph.D. (see *Mathematics*)

Meat Science: M.S., Ph.D. (see *Animal Science, Food Science and Human Nutrition* (offered as Ph.D. only jointly with Animal Science))

Mechanical Engineering: M.S., Ph.D. (see *Mechanical Engineering*)

Meteorology: M.S., Ph.D. (see *Geological and Atmospheric Sciences*)

Microbiology: M.S., Ph.D. (see *Microbiology*)

Molecular, Cellular, and Developmental Biology: M.S., Ph.D. (see *Molecular, Cellular, and Developmental Biology*)

Neuroscience: M.S., Ph.D. (see *Neuroscience*)

Nuclear Physics: M.S., Ph.D. (see *Physics and Astronomy*)

Nutritional Sciences: M.S., Ph.D. (see *Nutritional Sciences*)

Operations Research (must be a joint major with Statistics): M.S. (see *Industrial Engineering/Statistics*)

Organic Chemistry: M.S., Ph.D. (see *Chemistry*)

Physical Chemistry: M.S., Ph.D. (see *Chemistry*)

Physics: M.S., Ph.D. (see *Physics and Astronomy*)

Plant Breeding: M.S., Ph.D. (see *Agronomy*)

Plant Pathology: M.S., Ph.D. (see *Plant Pathology*)

Plant Biology: M.S., Ph.D. (see *Plant Physiology*)

Political Science: M.A., (see *Political Science*)

Professional Agriculture: M.Ag. (see *Professional Agriculture*)

Psychology: M.S., Ph.D. (see *Psychology*)

Public Administration: M.P.A., M.P.A./M.C.R.P., M.P.A./M.S. (Information Assurance) (see *Political Science*)

Rhetoric and Professional Communication: Ph.D. (see *English*)

Rhetoric, Composition, and Professional Communication: M.A. (see *English*)

Rural Sociology: M.S., Ph.D. (see *Sociology*)

School Mathematics: M.S.M. (see *Mathematics*)

Science Education: M.A.T. (see *Curriculum and Instruction*)

Seed Technology and Business: M.S. (see *Seed Technology and Business*)

Sociology: M.S., Ph.D. (see *Sociology*)

Soil Science: M.S., Ph.D. (see *Agronomy*)

Statistics: M.S., M.B.A./M.S., Ph.D. (see *Statistics*)

Sustainable Agriculture: M.S., Ph.D. (see *Sustainable Agriculture*)

Systems Engineering: M.Engr. (see *Systems Engineering*)

Teaching English as a Second Language/Applied Linguistics: M.A. (see *English*)

Textiles and Clothing: M.S., Ph.D. (see *Textiles and Clothing*)

Toxicology: M.S., Ph.D. (see *Toxicology*)

Transportation: M.S. (see *Transportation*)

Veterinary Clinical Sciences: M.S. (see *Veterinary Clinical Science*)

Veterinary Microbiology: M.S., Ph.D. (see *Veterinary Microbiology and Preventive Medicine*)

Veterinary Pathology: M.S., Ph.D. (see *Veterinary Pathology*)

Veterinary Preventive Medicine: M.S. (see *Veterinary Diagnostic and Animal Production Medicine*)

Wildlife Biology: M.S., Ph.D. (see *Natural Resource Ecology and Management*)

Zoology: M.S., Ph.D (see *Zoology*)

Declared Minors

(in addition to the majors above which can also be minors)

Complex Adaptive Systems (see *Complex Adaptive Systems*)

Gerontology (see *Gerontology*)

Philosophy (see *Philosophy and Religious Studies*)

Graduate Certificate Programs

A graduate certificate provides a mechanism for bestowing formal recognition of focused graduate study in a specialized area that is less comprehensive than required for a master's degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master's or doctoral degree. For more detailed information on certificate programs, browse the Graduate College web site at: www.grad-college.iastate.edu/publications/gchandbook/appendixd.html.

Advanced Medical Nutrition Therapy Certificate (see *http://www.fshn.hs.iastate.edu/grad/certificate.php*)

Biorenewable Resources and Technology Certificate (see *http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/BRT-GradCert.html*)

Community College Leadership Certification (see www.cclp.hs.iastate.edu/)

Community College Teaching (see *http://www.cclp.hs.iastate.edu/teaching_learning.html*)

Dietetics Communication and Counseling Certificate (see *http://www.fshn.hs.iastate.edu/grad/certificate.php*)

Dietetics Management Certificate (see *http://www.fshn.hs.iastate.edu/grad/certificate.php*)

Environmental Engineering Certificate (see *http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/environmental.html)*

Family Financial Planning Certificate (see *http://www.hs.iastate.edu/online/mfcs/ffp/homepage.php*)

Food Safety and Defense Graduate Certificate (see *http://www.fshn.hs.iastate.edu/grad/foodsafetycert.php*)

Forensic Sciences Certificate (see *http://www.chem.iastate.edu/certificate/)*

Gerontology Certificate (see *http://www.hs.iastate.edu/online/mfcs/gerontology/homepage.php*)

Geographic Information Systems Certificate (see *www.design.iastate.edu/GIS/*)

Graduate Student Teaching Certificate (see *http://www.celt.iastate.edu/gstc/homepage.html*)

Human Computer Interaction (see *http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/hci.html*)

Information Assurance Certificate (see *http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/infas.html*)

Power Systems Engineering Certificate (see *http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/powersystems.html*)

Principal Licensure (Pre-LEAD) (see *http://www.elps.hs.iastate.edu/edadm/edadmhmpg3-prelead.php*)

Public Management Certificate (see *www.pols.iastate.edu/mpa.shtml*)

Seed Business Management (see *http://www.seeds.iastate.edu/class/certificates.htm*)

Seed Science and Technology (see *http://www.seeds.iastate.edu/class/certificates.htm)*

Special Education Certificate (see *http://www.teacher.hs.iastate.edu/addtnl_endorsements.php)*

Superintendent Licensure (see *www.elps.hs.iastate.edu/edadm/edadmhmpg3-acad.php)*

Systems Engineering (see *http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/syscert.html*)

TESL (Teaching English as a Second Language) Certificate (see *http://www.public.iastate.edu/~apling/TESL_cert.html*)

First-Year Honors Program. Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which is designed to introduce students to an honors education, consists of special honors sections of English 250 and Library 160, a FHP Seminar, and advising by honors advisers. Students may also choose to participate in the Honors Mentor Program, designed to introduce students to scholarship. Participants select an area of interest and are matched with faculty members conducting research in that area. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information. Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office in Jischke Honors Building or on the Honors webpage, www.honors.iastate.edu.

Dual-degree Programs

Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor's degree from Iowa State. (See Index, *Preprofessional Study.)*

Iowa Lakeside Laboratory

Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, www.lakesidelab.org.

Regent Universities Student Exchange Program

Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)

Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student's academic adviser in advance of application. Detailed information and applications forms are available from:

National Student Exchange

Study Abroad

Our planet is in a constant state of change, and occurrences in remote corners of the globe can profoundly impact our lives. It is clear from the effects of global warming, international trade, terrorism, and pandemics of one nature or the other that we cannot ignore what is happening beyond our shores and borders. Students who graduate without an understanding of other cultures, languages, business practices, and political systems are disadvan00taged both educationally and professionally. Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. Further, study abroad is an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, work, volunteer opportunities, and service-learning, and scholarships. The Center's library has a fine selection of travel books, information on international careers, cross-cultural orientation, social and business customs around the world, and travel bargains. The International Student Identity Card and passport photographs can also be obtained at the Center.

With over 250 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition.

Semester in Australia, Canada, Greece, Ireland, Italy, New Zealand, or UK offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, and in some cases summer.

Intensive Language Programs offer students a total immersion experience in French, German, Russian, or Spanish by studying in Québec, Canada (French), France, Germany, Russia, Mexico, Peru, or Spain. Summer and semester programs are available.

Group Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctic to England and to more than 40 other destinations.

Courses and Programs

Information About Courses

Course Numbers

The courses in each department are numbered from 1 to 699, according to the following groups:

1-99	Courses not carrying credit toward a degree (zero credit).
100-299	Courses primarily for freshman and sophomore students.
300-499	Courses primarily for junior and senior students.
500-599	Courses primarily for graduate students, but open to qualified undergraduates.
600-699	Courses for graduate students.

Credits and Contact Hours

The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, Com S 103 is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term "Cr. arr." means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term "Cr. R." means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student's degree, but it does apply toward the degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student's drop limit and will not appear on the student's transcript. (*See Index, Schedule Changes.*)

Semester of Offering

Within each course description may be found one or more of the following letters: F. S. SS., indicating which term—fall, spring, summer session—of the academic year the course is offered. "Alt." is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite

A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite for a course for which he or she is responsible. Thus, permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

It is university policy that the instructor shall inform- the students at the beginning of each course if students who have not met the prerequisite requirements must drop the course. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses

A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Designators/Course Abbreviations

For abbreviations for designating departments and programs See *Index, Designators.*

Dual-listed Courses

Dual-listed courses permit undergraduate and graduate students to be in the same class but to receive credit under two different course numbers. Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase "Dual-listed with," although the student's official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the *Graduate Faculty Handbook*.)

Off-campus courses-Residential Credit

Iowa State University offers distance education courses over the Iowa Communications Network (ICN), by videotape and on the World Wide Web. These courses are the same as those offered on campus, carry residential credit, and are taught by ISU faculty members. Credit earned in off-campus courses becomes a part of the student's academic record at Iowa State University and may be used to meet degree requirements in the same manner as credit earned on campus.

Priority Enrollment

High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Special Course Fees

Courses for which special course fees are assessed are designated in the *Schedule of Classes*. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental Math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Additional information on camp fees and the developmental Math fee may be found in the fees and expenses section. See *Index, Fees.*

Graduate Programs

Graduate Major

A major in the Graduate College is the area of academic professional concentration, approved by the Board of Regents, in which the student chooses to qualify for the award of a graduate degree.

Graduate Area of Specialization

Areas of specialization are indicated in the graduate statements of some departments. This is a subdivision of a major in which a strong graduate-level program is available. When approved by the Graduate College, such areas of specialization are shown parenthetically after the major on official records, including transcripts and thesis/dissertation title pages.

Interdepartmental Programs

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

Nonmajor Graduate Credit

All courses included on the Program of Study of a graduate student must be approved by the student's program of study committee. Usually courses in the major are selected from 500- and 600- level courses in the major. Courses outside of the major can be selected from other 500- and 600- level courses and from 300- and 400- level courses which have been approved for nonmajor graduate credit. In the catalog, the approved 300- and 400- level courses are indicated by the words "Nonmajor graduate credit" in the course description.

Accounting

Marvin L. Bouillon, Chair of Department

Professors: Hira, Ravenscroft

Professors (Emeritus): Brown, Elvik, Handy

Associate Professors: Bouillon, Dilla, Doran, Jeffrey, Kurtenbach

Associate Professors (Emeritus): Murphy

Assistant Professors: Denison, Gary, Janvrin, No, Terando

Assistant Professors (Adjunct): Curtis

Instructors (Adjunct): Duffy, Mazzitelli

Senior Lecturer: Clem

Lecturer: Christensen, Hashmi, Whittle

Undergraduate Study

For undergraduate curriculum in business, major in accounting, see *College of Business, Curricula*.

The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, and controlling the activities of the firm. Accounting is needed by external users in order to make investment decisions, grant or withhold credit, and, in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with: (1) a mastery of basic accounting concepts; (2) an ability to think critically and creatively about accounting problems; (3) an ability to communicate effectively and work with others as a member of a team; (4) an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession. The requirements for the accounting major are met by successful completion of the following courses: Acct 383, 384, 386, 387, 485, and 497. See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include Business Law II (Acct 316). The Department of Accounting should be consulted for information on specific alternative plans of study.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to be stand alone.

CPA Note: In addition to the 18 credits of accounting required for the accounting major, candidates for the CPA exam must complete two additional accounting courses to sit for the CPA exam, for a total of 24 hours beyond principles. Students may use the electives shown above or petition to take graduate courses to fulfill the additional six hours. Business Law II (Accounting 316) is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. In order to be certified or licensed to practice in Iowa, students must complete 150 credits. Qualified students should consider taking the Master of Accounting to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the MAcc Program so you may complete your graduate degree in an efficient manner. For states outside Iowa, be sure to check local rules, as each state determines its own licensing requirements.

Graduate Study

The department offers work for a graduate degree - the masters of accounting (M.Acc.). This is a 30-hour degree, with an optional creative components. The program requires 15 hours of graduate accounting courses, at least 9 hours of nonaccounting graduate electives, a communications course and an international course from an approved list. Students who choose the creative component option may replace two required hours of accounting with the creative component. Included in the 15 required hours of graduate accounting courses is a 3-credit required course, Acct 598. The M.Acc. is appropriate for any student wanting to pursue a variety of accounting careers. The M.Acc. program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa.

The department participates in the M.B.A. full-time and part-time programs. The M.B.A. program is a 48-credit, nonthesis, noncreative component curriculum. Twenty four of the 48 credits are core courses and the remaining 24 are graduate electives.

Within the M.B.A. program, students may develop an area of specialization in accounting. This specialization requires that 12 of the 24 credits of graduate electives be from accounting.

The specialization in accounting is designed to help meet the 150 hour education requirement for CPA certification in Iowa.

Courses primarily for undergraduate students

Acct 215. Legal Environment of Business. (3-0) Cr. 3. F.S.SS. *Prereq: Sophomore classification.* General history, structure, and principles of law. The legal system, as an agency of social control; good business practices, and tool for change. The court systems, Constitution, torts, contracts, administrative agencies, and agency law.

Acct 284. Financial Accounting. (3-0) Cr. 3. F.S.SS. *Prereq: 15 hours of credit at ISU or sophomore standing.* Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

Acct 285. Managerial Accounting. (3-0) Cr. 3. F.S.SS. *Prereq: 284.* Preparation and use of internal managerial reports for decision-making, planning and performance evaluation.

Acct 316. Business Law. (3-0) Cr. 3. F.S. *Prereq: 215.* Continuation of 215. Sales under the Uniform Commercial Code, negotiable instruments, secured transactions, property transactions, partnerships, and wills and estates.

Acct 383. Intermediate Managerial Accounting. (3-0) Cr. 3. F.S. *Prereq: 285 or 508.* Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes traditional and contemporary models of cost estimation, assignment, and control, responsibility accounting, and nonrecurring decisions. Emphasis on developing written and oral communication skills, as well as spreadsheet capabilities.

Acct 384. Accounting Information Systems. (3-0) Cr. 3. *Prereq: 285.* Analysis of concepts and procedures underlying the automated accumulation and processing of accounting data. EDP internal control and audit techniques. Trends in accounting information systems.

Acct 386. Intermediate Accounting I. (3-0) Cr. 3. F.S. *Prereq: 285 or 508.* The conceptual framework of financial accounting. Communication of financial information on the income and retained earnings statements, statement of cash flows, and the balance sheet. Accounting concepts relating to current and operational assets of the firm.

Acct 387. Intermediate Accounting II. (3-0) Cr. 3. F.S. *Prereq: 386.* Financial accounting and reporting practices for business entities. Generally accepted accounting principles (GAAP) relative to firm liabilities, equity, income, taxes, employee benefits, leases, accounting changes and cash flows. Discussion of current issues in financial accounting.

Acct 483. Advanced Managerial Accounting. (Dual-listed with 583). (3-0) Cr. 3. *Prereq: 383 or 581.* Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

Acct 485. Principles of Federal Income Tax. (3-0) Cr. 3. F.S. *Prereq: 285 or 508.* An introduction to the fundamentals of income tax related to entities and individual taxpayers, and concepts applicable to all tax entities. Depreciation, like-kind exchanges, and capital gain treatment. Transaction planning to maximize participation in preferential tax opportunities. Nonmajor graduate credit.

Acct 486. Volunteer Income Tax Assistance. (0-2) Cr. 1. Repeatable. S. *Prereq: 284.* Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency Status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

Acct 488. Governmental and Non-profit Institution Accounting. (3-0) Cr. 3. *Prereq: 387.* Budgeting, accounting, auditing, and financial reporting principles associated with private and public nonprofit organizations. Includes survey of state, local, municipal, and federal government accounting, as well as accounting for colleges, universities, public schools, health care facilities, voluntary health and welfare organizations and other not for profit entities. Nonmajor graduate credit.

Acct 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: 285, senior classification, permission of instructor.*

Acct 495. Advanced Accounting Problems. (Dual-listed with 595). (3-0) Cr. 3. *Prereq: 387.* Partnerships, branch operations, accounting for business combinations and affiliated companies, consolidated financial statements; reporting for multinational operations. Nonmajor graduate credit.

Acct 497. Introduction to Auditing. (3-0) Cr. 3. F.S. *Prereq: 384, 387 and Stat 326.* The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of Statistical sampling in auditing. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Acct 508. Survey of Financial Accounting. (2-0) Cr. 2. *Prereq: Graduate classification.* A general introduction to financial accounting information. Financial

topics covered include the use and analysis of financial information, the regulatory environment, and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

Acct 533. Data Management for Decision Makers. (Cross-listed with MIS). (3-0) Cr. 3. *Prereq: MIS 503.* Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

Acct 581. Accounting for Decision Making. (3-0) Cr. 3. *Prereq: 508 or equivalent.* Decision analysis applied to managerial accounting issues. Generation of information for management decision making and control. Responsibility accounting and non-recurring decisions.

Acct 582. Corporate Governance and Leadership. (Cross-listed with Mgmt). (3-0) Cr. 3. *Prereq: Mgmt 502 or permission.* Examination of top managers and corporate boards of directors in terms of roles, responsibilities, and tasks. Examination of corporate governance structure and functioning. Topics include CEO tenure and compensation, board monitoring and composition, board responsibility and accountability, board structure and performance, CEO and board roles in strategic management, shareholder and stakeholder representation, corporate social responsibility, ethics and corporate governance, international governance, and executive leadership style.

Acct 583. Advanced Managerial Accounting. (Dual-listed with 483). (3-0) Cr. 3. *Prereq: 383 or 581.* Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

Acct 585. Tax Implications of Business Decisions. (3-0) Cr. 3. *Prereq: 485.* The impact of federal tax legislation on the formation, operation and liquidation or reorganization of entities. Income-tax planning for executives.

Acct 586. Advanced Federal Taxation. (3-0) Cr. 3. F.S. *Prereq: 485.* Advanced topics in Federal Taxation. An in-depth study of partnership, corporation, fiduciary, and estate and give taxation. Tax administration, practice and tax planning are covered. Strongly recommended for those who plan a career in public accounting or taxation.

Acct 588. Governmental and Non-profit Institution Accounting. (3-0) Cr. 3. *Prereq: 387 or 592.* Budgeting, accounting, auditing, and financial reporting principles associated with private and public nonprofit organizations. Includes survey of state, local, municipal and federal government accounting, as well as accounting for colleges, universities, public schools, health care facilities, voluntary health and welfare organizations and other not for profit entities.

Acct 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor. For students* wishing to do individual research in a particular area of accounting.

Acct 591. Fraud Examination and Prevention. (3-0) Cr. 3. *Prereq: 497 or 508.* Principles and methodology of fraud detection and deterrence. Addresses the following: Causes and elements of fraud, costs to society, asset theft, financial statement representation, internal controls for fraud prevention, evidence gathering, and legal aspects of fraud.

Acct 592. Financial statement Analysis. (3-0) Cr. 3. *Prereq: 284 or 508.* The presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics covered will include the financial reporting system, the primary financial statements, and effects of accounting method choice on reported financial data, and firm valuation.

Acct 594. Business Valuation. (3-0) Cr. 3. *Prereq: 387 or 592.* Using financial statement analysis to value the firm. Topics covered include assessing how well a firm's financial statements reflect the economic effects of its resource management strategies and constructing proforma financial information that will serve as inputs to valuation models.

Acct 595. Advanced Accounting Problems. (Dual-listed with 495). (3-0) Cr. 3. *Prereq: 387.* Partnerships, branch operations, accounting for business combinations and affiliated companies, consolidated financial statements; reporting for multinational operations.

Acct 596. International Accounting. (3-0) Cr. 3. *Prereq: 386 or 508.* Accounting and reporting requirements and managerial issues faced by multinational corporations. The international environment of standard setting will be examined. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

Acct 597. Advanced Auditing and Assurance Services. (3-0) Cr. 3. *Prereq: 497.* A study of advanced auditing and assurance issues. Topics include risk analysis, internal control, fraud detection, analytical procedures, evaluating operational and strategic objectives, and reporting and implementing audit findings.

Acct 598. Financial Accounting: Theory and Contemporary Issues. (3-0) Cr. 3. F. *Prereq: 387 or 592.* Theoretical discussion of the financial accounting and reporting environment. The usefulness of financial accounting information for decision making will be examined. A number of current financial accounting issues and the financial accounting standard setting process will be discussed and examined. MAcc students should take this course during their last semester.

Acct 599. Creative Component. Cr. 2. *Prereq: Admission to the Master of Accounting Program*. This course prepares students to complete their creative component project option in the Master of Accounting degree.

Aerospace Engineering

Thomas Shih, Chair of Department

Distinguished Professors: Soukoulis, R. B. Thompson

Distinguished Professors (Emeritus): D. Thompson, Young

Professors: Chandra, Chimenti, Durbin, Holger, Kelkar, Levitas, Lu, Oliver, Rajagopalan, Rothmayer, Rudolphi, Sarkar, Schmerr, Shih, Takle, Wang, Wie, Zachary

Professors (Emeritus): Akers, Greer, Inger, Iversen, Jenison, McConnell, McDaniel, Munson, Pierson, Rizzo, Rogge, Rohach, Tannehill, Tsai, Weiss, Wilson

Professors (Adjunct): Hsu, Nakagawa

Associate Professors: Bastawros, Bryden, Dayal, Hilliard, Hindman, Mitra, Sherman, Sturges

Associate Professors (Emeritus): Hermann, Seversike, Trulin, Vogel

Associate Professors (Adjunct): Biner, Cox, Roberts

Associate Professors (Collaborators): Flatau

Assistant Professors: Chung, Holland, Hong, Hu, Jacobson

Assistant Professors (Adjunct): Byrd, Gray

Assistant Professors (Collaborators): Chavez

Senior Lecturers: Deam, Haugli, Schaefer

Lecturers: Boylan

Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air, water, and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, and transportation problems play major roles.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended over a five-year span to permit alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years. See *College of Engineering, Cooperative Programs.*

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement: The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

Graduates should be actively contributing, valued members in their chosen profession showing continued professional growth.

Graduates should use their strong foundation in science, mathematics, and engineering to create innovative practices and/or technologies.

Graduates should demonstrate teamwork, leadership, planning, and initiative in advancing organizational goals.

Graduates should act with integrity, based on an awareness of the impact of their work –economic, environmental, and Societal impact – and work to maintain high levels of cultural adaptability.

Graduates should demonstrate critical thinking and effective, multi-modal communication skills.

Graduates should strive to learn continuously through professional improvement opportunities and self study.

Graduates should work to ensure superior quality, customer satisfaction, and safety outcomes in their work.

Nondestructive Evaluation (NDE)
The NDE minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor may be earned by completing 16 credits including:
(1) MatE/E M 362 and 362L
(2) Two courses (6-7 credits) from: E M 350, Aer E/E E/E M/Mat E 490 (in the area of NDE), M S E/E M 550.
(3) Two courses (6 credits) from: Aer E 321, 421, 422, 423, 426; E E 424; E M 424, 425; Mat E 418, 443, 444; M E 417, 418; Stat 305.

A combined average grade of C or higher is required in courses applied to the minor and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

The department offers work for the degrees master of engineering, master of science, and doctor of philosophy with major in aerospace engineering, and minor work to students taking major work in other departments. For all graduate degrees it is possible to establish a co-major program with another graduate degree granting department. Within the aerospace program, work is available in the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

The degrees master of science and doctor of philosophy require an acceptable thesis in addition to the coursework. For the degree master of engineering, a creative component or suitable project is required. Appropriate credit is allotted for this requirement.

Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

The normal prerequisite to major graduate work in aerospace engineering is the completion of a curriculum substantially equivalent to that required of aerospace engineering students at this university. However, because of the diversity of interests within the graduate programs in aerospace engineering, a student whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses normally will be offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Courses primarily for undergraduate students

Aer E 101H. Engineering Honors Orientation. Cr. R. F. *Prereq: Membership in the Freshman Honors Program.* Introduction to the College of Engineering and the Aerospace Engineering profession. Information concerning university, college, and department policies, procedures and resources with emphasis on the Freshman Honors Program. Topics include experiential education study abroad opportunities, and department mentorships.

Aer E 112. Orientation to Learning and Productive Team Membership. (Cross-listed with FS HN, Hort, TSM, NREM). (2-0) Cr. 2. F. Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

Aer E 160. Aerospace Engineering Problems With Computer Applications Laboratory. (2-2) Cr. 3. F.S. *Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in Math 142, 165.* Solving aerospace engineering problems and presenting solutions through technical reports. Significant figures. SI units. Graphing and curve fitting. Flowcharting. Introduction to material balances, mechanics, electrical circuits, statistics engineering economics, and design. Spreadsheet programs. Introduction to UNIX/LINUX computing environments, and programming in FORTRAN. Team projects.
H. Honors. F.

Aer E 161. Numerical, Graphical and Laboratory Techniques for Aerospace Engineering. (3-2) Cr. 4. F.S. *Prereq: 160 or equivalent course.* Computer solutions to aerospace engineering problems using the FORTRAN language and Matlab(R), with emphasis on numerical methods. Introduction to computing environments including UNIX/LINUX. Graphical description of geometrical objects with emphasis on aerospace design. Solid modeling using computer graphics software. Develop proficiency with basic instrumentation utilized in subsequent Aerospace Engineering laboratory courses. Computational and Statistical analysis of lab results. Written and oral technical reports, team projects.
H. Honors. S.

Aer E 192. Aerospace Seminar. Cr. R. S. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities, specifically experiential learning and study abroad. Academic program planning, departmental symposium participation.
H. Honors.

Aer E 243. Aerodynamics I. (3-0) Cr. 3. F.S. *Prereq: Grade of C- or better in 261, Math 265, enrollment in 243L.* Introduction to fluid mechanics and aerodynamics. Fluid properties, statics, and kinematics. Conservation equations in differential and integral form. Bernoulli's equation. Dimensional analysis. Basic potential flow concepts and solutions. Examples of numerical methods. Applications of multi-variable calculus to fluid mechanics and aerodynamics.

Aer E 243L. Aerodynamics Laboratory I. (0-3) Cr. 0.5. F.S. *Prereq: Enrollment in 243.* Introduction to fluid dynamic principles and instruments in aerodynamics through laboratory studies and experiments. Report writing.

Aer E 261. Introduction to Performance and Design. (4-0) Cr. 4. F.S. *Prereq: 161, Math 166, Phys 221.* Introduction to aerospace disciplinary topics, including: aerodynamics, structures, propulsion, and flight dynamics with emphasis on performance.

Aer E 265. Scientific Balloon Engineering and Operations. (Cross-listed with Mteor). (0-2) Cr. 1. Repeatable. F. Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.**Aer E 290. Independent Study.** Cr. arr. Repeatable. *Prereq: Sophomore classification, approval of the department.*

A. Flight ground instruction
B. In-flight training (Prereq: 301.)
C. Other

Aer E 291. Aerospace Seminar. Cr. R. F. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, departmental symposium participation.
H. Honors

Aer E 292. Aerospace Seminar. Cr. R. S. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, departmental symposium participation. Satisfactory-fail only.
H. Honors

Aer E 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* First professional work period in the cooperative education program. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 301. Flight Experience. Cr. R. F. *Prereq: Credit or enrollment in 355.* Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Six hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Satisfactory-fail only.

Aer E 311. Gas Dynamics. (3-0) Cr. 3. S. *Prereq: 243, M E 330, enrollment in 311L.* Properties of liquids and gases, review of thermodynamic processes and relations, energy equation, compressible flow, shock and expansion waves, isentropic flow, Fanno and Rayleigh flow. Nonmajor graduate credit.

Aer E 311L. Gas Dynamics Laboratory. (0-3) Cr. 0.5. S. *Prereq: 243, 243L, enrollment in 311.* Introduction to experimental compressible flow and propulsion principles, techniques and instruments through laboratory studies and experiments. Report writing.

Aer E 321. Flight Structures Analysis and Laboratory. (2.5-1) Cr. 3. F. *Prereq: E M 324.* 3 hours of lecture weekly and laboratory alternating weeks. Determination of flight loads. Materials selection for flight applications. Analysis of flight structures including trusses, beams, frames, and shear panels employing classical and finite element methods. Laboratory experiments on flight structures. Nonmajor graduate credit.

Aer E 331. Flight Control Systems I. (3-0) Cr. 3. S. *Prereq: 355.* Linear system analysis. Control system designs using root-locus and frequency response methods. Applications in flight control systems. Nonmajor graduate credit.

Aer E 343. Aerodynamics II. (3-0) Cr. 3. S. *Prereq: Credit or enrollment in 311 and enrollment in 343L.* Incompressible, subsonic, transonic, supersonic, hypersonic flow over airfoils and wings. Viscous flow theory. Laminar boundary layers. Transition and turbulent flow. Nonmajor graduate credit.

Aer E 343L. Aerodynamics Laboratory II. (0-2) Cr. 1. S. *Prereq: Enrollment in 343.* Advanced concepts in aerodynamics and propulsion through laboratory experience. Experiments include model tests. Techniques in subsonic and supersonic measurements. Report writing.

Aer E 351. Astrodynamics I. (3-0) Cr. 3. F. *Prereq: E M 345, Aer E 261, Credit or enrollment in Aer E 243.* Introduction to astrodynamics. Two-body motion. Geocentric, lunar and interplanetary trajectories and applications. Launch and atmospheric re-entry trajectories. Nonmajor graduate credit.

Aer E 355. Aircraft Flight Dynamics and Control. (3-0) Cr. 3. F. *Prereq: 261, Math 267, E M 345.* Aircraft rigid body equations of motion, linearization, and modal analysis. Longitudinal and lateral-directional Static and dynamic stability analysis. Flight handling characteristics analysis. Longitudinal and lateral-directional open loop response to aircraft control inputs. Aircraft flight handling qualities. Nonmajor graduate credit.

Aer E 361. Computational Techniques for Aerospace Design. (2-2) Cr. 3. F.S. *Prereq: 243, Math 267, E M 324, E M 345.* Advanced programming, workstation environment, and development of computational tools for aerospace analysis and design. Nonmajor graduate credit.

Aer E 391. Aerospace Seminar. Cr. R. F. (1-0) Professional skills development activities including: interviewing, program of study specialization considerations, post baccalaureate study options, career planning.

Aer E 392. Aerospace Seminar. Cr. R. S. (1-0) Professional skills development activities including: program of study specialization considerations, post baccalaureate study options, career planning. Preliminary senior design project planning and mentor selection. Satisfactory-fail only.

Aer E 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of department and Engineering Career Services.* Summer professional work period. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 397. Engineering Internship. Cr. R. Repeatable. F.S. *Prereq: Permission of department and Engineering Career Services.* Professional work period, one semester maximum per academic year. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: 298, permission of department and Engineering Career Services.* Second professional work period in the cooperative education program. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 411. Aerospace Vehicle Propulsion I. (3-0) Cr. 3. F. *Prereq: 311.* Atmospheric propulsion system performance and cycle analysis. Momentum theorem, thrust and propulsive efficiency. Thermodynamics of compressible flow with heat and work addition. Components and principles of turbojets and turbofans. Rocket engines and ramjet principles. Nonmajor graduate credit.

Aer E 412. Aerospace Vehicle Propulsion II. (3-0) Cr. 3. *Prereq: 343, 411.* Electricity and magnetism. Plasma physics. Ion engine performance. Introduction to advanced electromagnetic propulsion systems. Energy sources and nuclear propulsion. Low thrust mission analysis. Space mission requirements Nonmajor graduate credit.

Aer E 417. Experimental Mechanics. (Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered 2010. *Prereq: E M 324.* Introduction of different aspects of measuring deformation, strains, and stress for practical engineering problems. Strain gage theory and application. Selected laboratory experiments. Nonmajor graduate credit.

Aer E 421. Advanced Flight Structures. (2.5-1) Cr. 3. S. *Prereq: 321, Math 266 or 267.* Analysis of indeterminate flight structures including finite element laboratory. Static analysis of complex structural components subject to thermal and aerodynamic loads. Analytical and finite element solutions for stresses and displacements of membrane, plane stress, plate structures. Buckling of beams, frames, and plate structures. Introduction to vibration of flight structures. Steady state and transient structural response using normal modal analysis. Nonmajor graduate credit.

Aer E 422. Aeroelasticity. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 421 or E M 450 or M E 450.* Vibration theory. Steady and unsteady flows. Mathematical foundations of aeroelasticity, static and dynamic aeroelasticity. Linear unsteady aerodynamics, nonsteady aerodynamics of lifting surfaces. Stall flutter. Aeroelastic problems in civil engineering structures. Aeroelastic problems of rotorcraft. Experimental aeroelasticity. Selected wind tunnel laboratory experiments. Nonmajor graduate credit.

Aer E 423. Composite Flight Structures. (2-2) Cr. 3. *Prereq: E M 324; Mat E 272.* Fabrication, testing and analysis of composite materials used in flight structures. Basic laminate theory of beams, plates and shells. Manufacturing and machining considerations of various types of composites. Testing of composites for material properties, strength and defects. Student projects required. Nonmajor graduate credit.

Aer E 426. Design of Aerospace Structures. (1-6) Cr. 3. *Prereq: E M 324.* Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability. Nonmajor graduate credit.

Aer E 432. Flight Control Systems II. (3-0) Cr. 3. *Prereq: 331.* Aircraft lateral directional stability augmentation. Launch vehicle pitch control system design. Control of flexible vehicles. Satellite attitude control. Flight control designs based on state-space methods. Introduction to sample-data systems. Nonmajor graduate credit.

Aer E 442. V/STOL Aerodynamics and Performance. (3-0) Cr. 3. *Prereq: 355.* Introduction to the aerodynamics, performance, stability, control and critical maneuvering characteristics of V/STOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vectored engines. Nonmajor graduate credit.

Aer E 446. Computational Fluid Dynamics. (3-0) Cr. 3. *Prereq: 343.* Introduction to modern computational fluid dynamics. Finite difference and finite volume methods. Explicit, implicit, and iterative techniques. Solutions of elliptic, parabolic, and hyperbolic equations. Emphasis on applications. Commercial software. Nonmajor graduate credit.

Aer E 448. Fluid Dynamics of Turbomachinery. (Cross-listed with M E). (3-0) Cr. 3. S. *Prereq: M E 335 or equivalent.* Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines and related fluid system components. Nonmajor graduate credit.

Aer E 451. Astrodynamics II. (3-0) Cr. 3. *Prereq: 351.* Simple orbit determination and prediction. Advanced orbit maneuvers, single-, double-, and triple-impulse; fixed-impulse, finite-duration. 3-D rigid-body dynamics, Euler's equations, satellite stabilization and attitude control. Earth gravity field models and gravity harmonics, orbit perturbations, variational methods, relative orbital mechanics, Clohessy-Wiltshire equations. Nonmajor graduate credit.

Aer E 461. Modern Design Methodology with Aerospace Applications. (2-2) Cr. 3. F.S. *Prereq: 361, 311, 321, 351, 355.* Introduction to modern engineering design methodology. Computational constrained optimal design approach including selection of objective function, characterization of constraint system, materials and strength considerations, and sensitivity analyses. Nonmajor graduate credit.

Aer E 462. Design of Aerospace Systems. (1-4) Cr. 3. F.S. *Prereq: 461.* Fundamental principles used in engineering design of aircraft, missile, and space systems. Preliminary design of aerospace vehicles.

Aer E 464. Spacecraft Systems. (3-0) Cr. 3. *Prereq: 351.* An examination of spacecraft systems including attitude determination and control, power, thermal control, communications, propulsion, guidance, navigation, command and data handling, and mechanisms. Explanation of space and operational environments as they impact spacecraft design. Includes discussion of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues. Nonmajor graduate credit.

Aer E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Cpr E, E E, Engr, I E, Mat E, M E). (1-4) Cr. 3. Repeatable. F.S. *Prereq: Student must be within two semesters of graduation and receive permission of instructor.* Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

Aer E 490. Independent Study. Cr. arr. Repeatable. *Prereq: Junior or senior classification, approval of the department.*
A. Aero and/or Gas Dynamics
B. Propulsion
C. Aerospace Structures
D. Flight Dynamics
E. Spacecraft Systems
F. Flight Control Systems
G. Aeroelasticity
H. Honors
I. Design
J. Non-destructive Evaluation
K. Wind Engineering
L. Multi-functional Ultra-light Structures
O. Other

Aer E 491. Aerospace Seminar. Cr. R. F.S. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Engineering ethics case studies and discussions. Academic program planning, departmental symposium participation.

Aer E 492. Aerospace Seminar. Cr. R. F.S. (1-0) Professional skills development activities. Writing and presentation of a technical paper at the department's Aerospace Symposium or at a recognized student or professional meeting of the American Institute of Aeronautics and Astronautics (AIAA). Satisfactory-fail only.

Aer E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: 398, permission of department and Engineering Career Services.* Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

Aer E 499. Senior Project. Cr. arr. Repeatable. F.S. *Prereq: Senior classification, credit or enrollment in 491.* Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduate students

Aer E 514. Advanced Mechanics of Materials. (Cross-listed with E M). (3-0) Cr. 3. F. *Prereq: E M 324.* Theory of stress and strain, stress-strain relationships. Unsymmetrical bending, curved beams, shear center. Torsion of thin-walled noncircular sections. Equilibrium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders.

Aer E 517. Experimental Mechanics. (Cross-listed with E M). (3-2) Cr. 4. Alt. S., offered 2010. *Prereq: E M 510 or 514 or 516.* Fundamental concepts for Force, displacement, stress, and strain measurements. Strain gages. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro and nano scale regimes.

Aer E 521. Airframe Analysis. (3-0) Cr. 3. F. *Prereq: 421 or E M 424.* Analysis of Static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

Aer E 522. Design and Analysis of Composite Materials. (3-0) Cr. 3. F. *Prereq: E M 324.* Composite constituent materials, micro-mechanics, laminate analysis, hygro-thermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of composites, short fiber composites, and demonstration laboratory.

Aer E 524. Numerical Mesh Generation. (3-0) Cr. 3. *Prereq: Math 385, proficiency in programming.* Introduction to modern mesh generation techniques. Structured and unstructured mesh methods, algebraic and PDE methods, elliptic and hyperbolic methods, variational methods, error analysis, Delaunay triangulation, data structures, geometric modeling with B-spline and NURBS surfaces, surface meshing.

Aer E 525. Finite Element Analysis. (Cross-listed with E M). (3-0) Cr. 3. S. *Prereq: E M 425, Math 385.* Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

Aer E 531. Automatic Control of Flight Vehicles. (3-0) Cr. 3. S. *Prereq: 331.* Applications of classical and modern linear control theory to automatic control of flight vehicles. Spacecraft attitude control. Control of flexible vehicles. Linear-quadratic regulator design applications.

Aer E 532. Compressible Fluid Flow. (Cross-listed with M E). (3-0) Cr. 3. S. *Prereq: M E 335 or Aer E 541.* Thermodynamics of compressible flow. Viscous and inviscid compressible flow equations. One dimensional steady flow; isentropic flow, normal shock waves oblique and curved shocks, constant area flow with friction and heat transfer. Linear theory and Prandtl-Glauert similarity. Method of characteristics. Subsonic, transonic, supersonic and hypersonic flows.

Aer E 541. Incompressible Flow Aerodynamics. (3-0) Cr. 3. F. *Prereq: 343 or M E 335.* Kinematics and dynamics of fluid flow. Derivation of the Navier-Stokes, Euler and potential flow equations. Introduction to generalized curvilinear coordinates. Ideal fluids. Two-dimensional and three-dimensional potential flow. Complex variable methods.

Aer E 543. Viscous Flow Aerodynamics. (3-0) Cr. 3. S. *Prereq: 541.* Navier-Stokes equations. Incompressible and compressible boundary layers. Similarity solutions. Computational and general solution methods. Introduction to stability of laminar flows, transition and turbulent flow.

Aer E 545. Advance Experimental Technique for Thermal-Fluid Studies. (3-0) Cr. 3. S. *Prereq: 343 or M E 335 or E M 378.* Introduction of various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies. Pressure gauge and transducers; Pitot tube; hot wire anemometry; shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Holograph PIV, microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive application and demonstration laboratory experiments will be included.

Aer E 546. Computational Fluid Mechanics and Heat Transfer I. (Cross-listed with M E). (3-0) Cr. 3. F. *Prereq: Credit or enrollment in 541 or ME 538.* Introduction to finite difference and finite volume methods used in modern engineering. Basic concepts of discretization, consistency, and stability. Applications of numerical methods to selected model partial differential equations.

Aer E 547. Computational Fluid Mechanics and Heat Transfer II. (Cross-listed with M E). (3-0) Cr. 3. S. *Prereq: M E 546.* Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

Aer E 551. Orbital Mechanics. (3-0) Cr. 3. F. *Prereq: 351.* Review of 2-body problem. Orbital maneuvers. Relative motion in orbit. Orbit perturbation analysis. Gravity field expansions and effects on orbiters. 3-body problem with applications.

Aer E 556. Guidance and Navigation of Aerospace Vehicles. (3-0) Cr. 3. F. *Prereq: 331.* Principles of guidance systems for spacecraft, launch vehicles, homing and ballistic missiles. Optimal guidance. Interplanetary transfer guidance with low thrust. Principles of inertial navigation. Theory and applications of the Global Positioning System. Celestial navigation procedures. Application of Kalman filtering to recursive navigation theory.

Aer E 565. Systems Engineering and Analysis. (Cross-listed with E E, I E). (3-0) Cr. 3. *Prereq: Coursework in basic Statistics.* Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

Aer E 566. Avionics Systems Engineering. (Cross-listed with E E). (3-0) Cr. 3. S. *Prereq: E E 565.* Avionics functions. Applications of systems engineering principles to avionics. Top-down design of avionics systems. Automated design tools.

Aer E 569. Mechanics of Composite and Combined Materials. (Cross-listed with E M). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: E M 324.* Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites.

Aer E 570. Wind Engineering. (Cross-listed with E M). (3-0) Cr. 3. F. *Prereq: E M 378, 345.* Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

Aer E 572. Turbulence. (Cross-listed with Ch E). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 543 or M E 538.* Qualitative features of turbulence. Statistical and spectral representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds stress, dissipation rate. Isotropic turbulence, homogeneous shear flows, free shear flows, wall bounded flows. Scalar transport, particulate transport.

Aer E 573. Random Signal Analysis and Kalman Filtering. (Cross-listed with E E, Math, M E). (3-0) Cr. 3. F. *Prereq: E E 324 or Aer E 331 or M E 370 or 411 or Math 341 or 395.* Elementary notions of probability. Random processes. Autocorrelation and spectral functions. Estimation of spectrum from finite data. Response of linear systems to random inputs. Discrete and continuous Kalman filter theory and applications. Smoothing and prediction. Linearization of nonlinear dynamics.

Aer E 574. Optimal Control. (Cross-listed with E E, Math, M E). (3-0) Cr. 3. S. *Prereq: E E 577.* The optimal control problem. Variational approach. Pontryagin's principle. Hamilton-Jacobi equation. Dynamic programming. Time-optimal, minimum fuel, minimum energy control systems. The regulator problem. Structures and properties of optimal controls.

Aer E 575. Introduction to Robust Control. (Cross-listed with E E, Math, M E). (3-0) Cr. 3. *Prereq: E E 577.* Introduction to modern robust control. Model and signal uncertainty in control systems. Uncertainty description. Stability and performance robustness to uncertainty. Solutions to the H2, Hoo, and I1 control problems. Tools for robustness analysis and synthesis.

Aer E 576. Digital Feedback Control Systems. (Cross-listed with E E, Math, M E). (3-0) Cr. 3. F. *Prereq: E E 475 or Aer E 432 or M E 411 or 414 or Math 415; and Math 267.* Sampled data, discrete data, and the z-transform. Design of digital control systems using transform methods; root locus, frequency response and direct design methods. Design using state-space methods. Controllability, observability, pole placement, state estimators. Digital filters in control systems. Microcomputer implementation of digital filters. Finite wordlength effects. Linear quadratic optimal control in digital control systems. Simulation of digital control systems.

Aer E 577. Linear Systems. (Cross-listed with E E, Math, M E). (3-0) Cr. 3. F. *Prereq: E E 324 or Aer E 331 or M E 414 or Math 415; and Math 307.* State variable and input-output descriptions of linear continuous-time and discrete time systems. Solution of linear dynamical equations. Controllability and observability of linear dynamical systems. Canonical descriptions of linear equations. Irreducible realizations of rational transfer function matrices. Canonical form dynamical equations. State feedback. State estimators. Decoupling by state feedback. Design of feedback systems. Stability of linear dynamical systems.

Aer E 578. Nonlinear Systems. (Cross-listed with E E, Math, M E). (3-0) Cr. 3. S. *Prereq: E E 577.* Classification of nonlinear control systems. Existence and uniqueness of solutions. Approximate analysis methods. Periodic orbits. Concept of stability and Lyapunov stability theory. Absolute stability of feedback systems. Input-output stability. Passivity.

Aer E 581. Perturbation Methods. (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Math 267.* Mathematical perturbation methods with applications to ordinary differential equations. Perturbation expansions. Order of magnitude and gauge functions. Matched asymptotic expansions. Boundary layer problems. Multiple scales. Resonance and mode coupling. Solvability conditions for differential equations. Physical and engineering applications.

Aer E 590. Special Topics. Cr. arr. Repeatable.
A. Aero and/or Gas Dynamics
B. Propulsion
C. Aerospace Structures
D. Flight Dynamics
E. Spacecraft Systems
F. Flight Control Systems
G. Aeroelasticity
H. Viscous Aerodynamics
I. Design
J. Hypersonics
K. Computational Aerodynamics
L. Optimization
M. Non Destructive Evaluation
N. Wind Engineering

Aer E 591. Graduate Student Seminar Series. Cr. R. Repeatable. Presentation of professional topics by department graduate students. Development of presentation skills used in a professional conference setting involving question and answer format.

Aer E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

Aer E 647. Advanced High Speed Computational Fluid Dynamics. (Cross-listed with M E). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 547.* An examination of current methods in computational fluid dynamics. Differencing strategies. Advanced solution algorithms. Grid generation. Construction of complex CFD algorithms. Current applications. Use of state of the art CFD codes.

Aer E 690. Advanced Topics. Cr. arr. Repeatable.
A. Aero and/or Gas Dynamics
B. Propulsion
C. Aerospace Structures
D. Flight Dynamics
E. Spacecraft Systems
F. Flight Control Systems
G. Aeroelasticity

H. Viscous Aerodynamics
I. Design
J. Hypersonics
K. Computational Aerodynamics
L. Non Destructive Evaluation
M. Wind Engineering

Aer E 697. Engineering Internship. Cr. R. Repeatable. *Prereq: Permission of DOGE (Director of Graduate Education), graduate classification.* One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Aer E 699. Research. Cr. arr. Repeatable.

African and African American Studies

www.las.iastate.edu/AfricanAmericanStudies/

Interdepartmental Undergraduate Program

Undergraduate Study

African and African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans' experience and African American contributions to American culture. Students in the program analyze and learn about African American experiences through the study of history, literature, art, religion, and Society. They gain knowledge and develop skills and sensitivities to help them function effectively in today's diverse Society.

African and African American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university's diversity requirement. Students can minor or even design their own Interdisciplinary Studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

A minor in African and African American Studies requires six courses in the program with a minimum of 18 credits, including Introduction to African American Studies (Af Am 201) and Seminar in African American Culture (Af Am 460). The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Graduate Study

Several courses are open for nonmajor graduate credit. See individual listings for more information.

Courses primarily for undergraduate students

Af Am 201. Introduction to African American Studies. (3-0) Cr. 3. F.S. An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

Af Am 325. Peoples and Cultures of Africa. (Cross-listed with Anthr). (3-0) Cr. 3. S. *Prereq: Anthr 201 or 306 recommended.* Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

Af Am 330. Ethnic and Race Relations. (Cross-listed with Soc). (3-0) Cr. 3. F.S.SS. *Prereq: Soc 130 or 134.* Analysis of ethnic and race relations, particularly in America; emphasis on the Sociology and psychology of race and ethnic relations.

Af Am 334. African American Religious Experience. (Cross-listed with Relig). (3-0) Cr. 3. F. *Prereq: Prior course work in Religious Studies or African American Studies required.* Examination of the African American experience from the perspective of black religion and the black church, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

Af Am 347. African American Literature to 1960. (Cross-listed with Engl). (3-0) Cr. 3. *Prereq: Engl 250.* Intensive study of African American writing, possibly including slave narratives, Harlem Renaissance works, literature of social protest, and Forerunners of contemporary works that reveal key thematic, stylistic, and historical range of the literature. Nonmajor graduate credit.

Af Am 348. Contemporary African American Literature. (Cross-listed with Engl). (3-0) Cr. 3. S. *Prereq: Engl 250.* Intensive reading in literature by African Americans from 1960 to the present. Nonmajor graduate credit.

Af Am 350. African American Women. (Cross-listed with W S). (3-0) Cr. 3. S. *Prereq: 3 credits in Womens' Studies or African American Studies.* Economic, social, political and cultural roles of African American women in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored. Nonmajor graduate credit.

Af Am 353. History of African Americans I. (Cross-listed with Hist). (3-0) Cr. 3. S. *Prereq: Sophomore classification.* Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War.

Af Am 354. History of African Americans II. (Cross-listed with Hist). (3-0) Cr. 3. S. *Prereq: Sophomore classification.* Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism.

Af Am 460. Seminar in African American Culture. (3-0) Cr. 3. S. Intensive study of a selected topic in African-American Studies in one or more disciplines. Selected readings of various authors, movements, eras, or genres. Primary and secondary source materials. Nonmajor graduate credit.

Af Am 490. Independent Study. Cr. arr. Repeatable.

Courses offered by other departments

Engl 349. Topics in Multicultural Literatures of the United States. (3-0) Cr. 3. See English.

Relig 475. Seminar: Issues in the Study of Religion. (3-0) Cr. 3. See Philosophy and Religious Studies

Agricultural Education and Studies

Robert Martin, Chair of Department

University Professors (Emeritus): Williams

Professors: Acker, Honeyman, Martin, G. Miller, W. Miller

Professors (Emeritus):Carter, CrawFord, Gamon, Gauger, Hoerner, Lawrence, Parsons, Trede

Associate Professors: Grudens-Schuck, McEowen

Associate Professors (Emeritus): Bruene, Jones

Assistant Professors: Dollisso, Esters, Morris, Polito, Retallick, Steiner

Lecturers: Brown, Paulsen

Undergraduate Study

For undergraduate curricula in agricultural education and agricultural studies leading to the degree bachelor of science, see College of Agriculture, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agricultural education and agricultural studies. The agricultural education curriculum prepares persons for careers as agricultural education instructors and educational specialists for industry and governmental agencies. The agricultural education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs will meet the university, college, and departmental outcomes in the following nine areas: 1) professional, interpersonal, and cross-cultural communications; 2) Problem-solving/critical thinking; 3) leadership; 4) entrepreneurship; 5) life-long learning; 6) ethics; 7) environmental awareness; 8) U.S. diversity; and 9) international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/assessment/agedsindex.htm.

The department offers a minor in agricultural education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. Courses that can be taken for a minor are 211, 310, 311, 315, 412 or 418, 414, 450, 490, 496, and 499.

Visit the departmental website at www.AgEds.iastate.edu/

Graduate Study

The department offers the degrees master of science and doctor of philosophy with a major in agricultural education, a specialization in agricultural extension education, opportunities for emphasis in international agricultural education, and a minor for students majoring in other curricula. Graduate students who have earned a bachelor's degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis-program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grantsmanship.

The department administers the interdepartmental graduate program in professional agriculture designed for off-campus students pursuing a master of agriculture degree; see *Off-Campus Credit Courses and Programs.*

The department also cooperates in the international development studies option of the General Graduate Studies Program.

Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry personnel.

Courses primarily for undergraduate students

AgEds 110. Orientation. (1-0) Cr. 0.5. F. Orientation to the department. Careers in agriculture.
A. Agricultural Education
B. Agricultural Studies
C. General Agriculture

AgEds 111. Orientation for Agricultural Excellence Scholars. (1-0) Cr. 1. Repeatable. F. *Prereq: Enrollment as an agricultural excellence scholar.* The roles of professionals in agriculture, academic preparation for assuming the role of a professional in agriculture, and meeting the demands of the scholar's curriculum.

AgEds 112. Agriculture Biotechnology Colloquium. (1-0) Cr. 1. S. *Prereq: Enrollment as an agricultural excellence scholar.* The scientific basis of biological and social sciences in agriculture.

AgEds 211. Early Field Based Experience. (1-0) Cr. 1. Repeatable. F.S.SS. *Prereq: 110.* Five days on-site in an agricultural setting observing competencies and issues in problem solving, decision-making, initiative taking, teamwork, leadership, written and oral communications, critical thinking and creativity. When students register it is their responsibility to make an appointment with the departmental coordinator (very early in the semester) to plan their experience.
A. High School Agriculture Program
B. Extension
C. Agricultural Industries and Agencies

AgEds 215. Career Seminar. (1-0) Cr. 1. F.S. *Prereq: Sophomore classification.* Overview of career opportunities. Evaluation of interests and accomplishments and setting career goals. Development of job search and interviewing skills. Establishing networks of job contacts.

AgEds 290. Special Problems in Agricultural Education and Studies. Cr. arr. Repeatable. F.S.SS.

AgEds 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the department cooperative education coordinator; sophomore classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AgEds 310. Foundations of Agricultural Education Programs. (2-0) Cr. 2. S. Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

AgEds 311. Presentation and Sales Strategies for Agricultural Audiences. (3-0) Cr. 3. F.S. Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

AgEds 312. Science With Practice. (1-3) Cr. 2. F.S. *Prereq: College of Agriculture and Life Sciences majors only.* A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include journals, micro-reflections, formal presentations, and a comprehensive portfolio. Students will be able to recognize and articulate what is learned through the experience and transfer what is learned to future experiences.

AgEds 315. Personal and Professional Leadership in Agriculture. (3-0) Cr. 3. F.S. Learn leadership theories and group facilitation skills for personal and professional applications in agricultural education, industry, and communities.

AgEds 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the department cooperative education coordinator; junior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AgEds 401. Planning Agriculture and Life Sciences Education Programs. (Dual-listed with 501). (3-0) Cr. 3. F. *Prereq: 310.* Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AgEds 402. Methods of Teaching in Agriculture and Life Sciences. (Dual-listed with 502). (3-0) Cr. 3. F. *Prereq: Concurrent enrollment in 401.* Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AgEds 412. Internship in Agricultural Education and Studies. Cr. arr. Repeatable. F.S.SS. *Prereq: 211, junior classification in AgEds and permission of instructor.* A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles. Nonmajor graduate credit.

AgEds 414. Developing Agricultural Education Programs in Non-formal Settings. (2-0) Cr. 2. S. *Prereq: 211 and permission of instructor.* Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies. Nonmajor graduate credit.

AgEds 416. Pre-Student Teaching Experience in Agricultural Education. Cr. 1. F.S. *Prereq: 211, 402 and admission to teacher education program.* A one-week field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AgEds 417. Supervised Teaching in Agriculture and Life Sciences. Cr. arr. Repeatable. F.S. *Prereq: 211, 402 and admission to teacher education program.* Supervised teaching in public schools.

AgEds 418. Supervised Extension Experience. Cr. arr. Repeatable. F.S.SS. *Prereq: 211, junior classification, permission of instructor.* Supervised professional experience in an approved county, area or State Cooperative Extension Service office. Nonmajor graduate credit.

AgEds 450. Farm Management and Operation. (1-6) Cr. 3. Repeatable. F.S.SS. *Prereq: Econ 235, Econ 330, junior classification.* Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm's livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor. Nonmajor graduate credit.

AgEds 451. Agricultural Law. (3-2) Cr. 4. S. *Prereq: Senior classification.* The legal framework impinging upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers. Nonmajor graduate credit.

AgEds 488. Methods of Teaching Agricultural Mechanics. (2-3) Cr. 3. F.S. Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials.

AgEds 490. Independent Study in Agricultural Education and Studies. Cr. arr. Repeatable. F.S.SS. *Prereq: Junior or senior classification, permission of instructor.*
A. Philosophy, Curriculum, and Methods
B. Leadership, Evaluation, and Administration
C. Business, Industry, and Production Agriculture
D. Extension and International Agriculture
E. Instructional Technology
F. Environmental Issues
G. Entrepreneurship
H. Honors
I. Communications

AgEds 496. Agricultural Travel Course. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Nonmajor graduate credit.
A. International
B. Domestic

AgEds 498. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the department cooperative education coordinator; senior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AgEds 499. Undergraduate Research. Cr. arr. F.S.SS. *Prereq: Permission of instructor, adviser, and departmental chair.* Research experience in agricultural education and studies with application to selected problems.

Courses primarily for graduate students, open to qualified undergraduate students

AgEds 501. Planning Agriculture and Life Sciences Education Programs. (Dual-listed with 401). (3-0) Cr. 3. F. *Prereq: 310.* Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AgEds 502. Methods of Teaching in Agriculture and Life Sciences. (Dual-listed with 402). (3-0) Cr. 3. F. *Prereq: Concurrent enrollment in 501.* Topics include principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AgEds 510. Introduction to Research in Agricultural Education. (3-0) Cr. 3. S. *Prereq: Graduate classification.* Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AgEds 514. Organizing Agricultural Information for Professional and Scientific Meetings. (1-2) Cr. 2. F. *Prereq: Graduate classification in agriculture.* Concepts and practices in planning, preparing, and presenting materials used in professional meetings and scientific papers by agriculturalists with special emphasis on computerized delivery methods.

AgEds 520. Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources. (3-0) Cr. 3. F. *Prereq: Graduate classification.* Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AgEds 524. Program Development and Evaluation in Agricultural and Extension Education. (3-0) Cr. 3. F. *Prereq: Graduate classification.* Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.

AgEds 533. Introduction to Learning Theory in Agricultural Education. (3-0) Cr. 3. S. *Prereq: Graduate classification.* Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

AgEds 550. Foundations of Agricultural Education. (3-0) Cr. 3. F. *Prereq: Graduate classification.* Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.

AgEds 552. Data Analysis and Interpretation. (2-0) Cr. 2. F. *Prereq: 510.* Strategies for analyzing, interpreting, and reporting quantitative research data in the social and behavioral sciences.

AgEds 561. Technology Transfer and the Role of Agricultural and Extension Education. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification.* The impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs.

AgEds 590. Special Topics in Agricultural Education. Cr. arr. Repeatable. F.S.SS. *Prereq: 12 credits in agricultural education.*
A. Curriculum
B. Methods
C. Philosophy
D. Evaluation
E. Administration
F. Leadership
G. Guidance
I. Instructional Technology
J. Extension
K. International Agriculture
L. Program Planning

AgEds 593. Workshop in Agricultural Education. Cr. arr. Repeatable. F.S.SS. *Prereq: 12 credits in agricultural education.*
A. Curriculum
B. Methods
C. Evaluation
D. Administration
E. Leadership
F. Extension
G. Program Planning
H. Instructional Technology
M. Biotechnology Workshop

AgEds 599. Creative Component. Cr. arr. Repeatable. F.S.SS. For nonthesis M.S. degree programs.

Courses for graduate students

AgEds 604. Evaluation in Agricultural and Extension Education. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 401 or 524.* Criteria and procedures for designing and facilitating evaluations of programs in agricultural and extension education. Critique of evaluation theories. Match quantitative and qualitative methods and instruments to evaluation contexts. Evaluation reporting and utilization.

AgEds 615. Seminar in Agricultural Education. (1-0) Cr. 1. Repeatable. F.S.SS. Satisfactory-fail only.
A. Writing for publication
B. Ethics
C. Grant writing
D. Career planning
E. Contemporary issues

AgEds 617. Professional Internship for Agricultural Educators. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Satisfactory-fail only.

AgEds 625. Leadership, Administration, Supervision and Management of Agricultural Education Programs. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Graduate classification.* Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.

AgEds 699. Research. Cr. arr. Repeatable.

Agricultural Engineering

(Administered by the Department of Agricultural and Biosystems Engineering)

Rameshwar Kanwar, Chair of Department

Distinguished Professor: Brown

Distinguished Professors (Emeritus): H. Johnson

University Professors: Bern

University Professors (Emeritus): Baker

Professors: Chen, Downing, Glanville, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Emeritus): Beer, Bekkum, Buchele, Bundy, Hazen, Hoerner, Keeney, Lovely, Maney, Mangold, Marley, Melvin, Miller, Pedersen, Riley, R. Smith

Professors (Collaborators): Laflen

Associate Professors: Anex, Bhandari, Birrell, Brumm, Burns, Freeman, Koziel, Mickelson, Raman, Steward, Tim

Associate Professors (Emeritus): Anderson, Greiner, Lorimor

Associate Professors (Collaborators): Han

Assistant Professors: Darr, Grewell, Helmers, Kaleita-Forbes, Keren, Kim, Soupir, Tang, Yu

Assistant Professors (Emeritus): Boyd, Bradshaw

Assistant Professors (Adjunct): Inyang, Shahan, Tong

Assistant Professors (Collaborators): Dunn, Malone

Lecturer: Snell

Undergraduate Study

For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science, see *College of Engineering, Curricula.* This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Agricultural Engineering Curriculum Educational Goal, Objectives, and Learning Outcomes: The goal of the curriculum in agricultural engineering is to train students to integrate basic physical and biological sciences with engineering design principles to solve problems related to production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources worldwide.

The agricultural engineering bachelor of science degree program has the following educational objectives for its graduates. Two to five years after graduation, through the professional practice of engineering, graduates should:

1. Have demonstrated competence in methods of analysis involving use of Mathematics, fundamental physical and biological sciences, engineering sciences, and computation needed for the practice of biological systems engineering in food, fiber, energy and environmental companies and agencies.

2. Have developed skills necessary to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.

3. Be capable of addressing issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in engineering practice.

4. Have demonstrated continuous professional and technical growth, with practical experience, so as to be licensed as a professional engineer or achieve that level of expertise

5. Demonstrated the ability to:

a. be a successful leader of multi-disciplinary teams,
b. efficiently manage multiple simultaneous projects,
c. work collaboratively,
d. implement multi-disciplinary systems-based solutions,
e. apply innovative solutions to problems through the use of new methods or technologies,
f. contribute to the business success of their employer, and
g. build community

The agricultural engineering degree program outcomes are statements that describe what our students are expected to know and be able to do by the time of graduation. To meet the established agricultural engineering program educational objectives, the expected outcomes for agricultural engineering bachelor of science graduates are:

a) an ability to apply knowledge of mathematics, science, and engineering
b) an ability to design and conduct experiments, as well as to analyze and interpret data
c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
d) an ability to function on multi-disciplinary teams
e) an ability to identify, formulate, and solve engineering problems
f) an understanding of professional and ethical responsibility
g) an ability to communicate effectively
h) achievement of the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and Societal context
i) a recognition of the need for, and an ability to engage in life-long learning
j) a knowledge of contemporary issues
k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
l) proficiency in mathematics through differential equations
m) proficiency in biological and engineering sciences
n) competence in the application of engineering to agriculture, aquaculture, food, Forestry, human, natural resource, or other biological systems.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. The department has cooperative programs established for interested and qualified students. The four-year curriculum is extended over a five-year period and interspersed with work periods at cooperating organizations. This plan offers valuable practical experience and financial assistance during the years in college

The department also offers a bachelor of science curriculum in biological systems engineering. See College of Engineering, Curricula. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences, Curricula.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. Refer to Graduate Study for more information.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with a major in agricultural engineering, and offers minor work for students in other majors. Within the agricultural engineering major the student may specialize in:

- advanced machinery engineering (agricultural safety and health, sensors and artificial intelligence, controls and automation, precision agriculture, and biorenewables)
- animal and plant production engineering (air emissions measurement and abatement, animal welfare, environmental control in animal housing, manure treatment, crop modeling, plant stress physiology, precision agriculture, and decision support systems)
- environmental stewardship engineering (erosion control, drainage/water management, pollutant fate and transport, nutrients management, wetlands, vegetated filter/buffer strips, hydrological/water quality/crop modeling, geographic information science (GIS)

- remote sensing, water quality, and watershed management, or
- process engineering for food safety and value addition (processing technologies and systems for adding value, quality management systems, agricultural product, marketing practices and standards, instrumentation for grain, seed, and food quality enhancement).

A prerequisite to graduate work is the completion of an undergraduate curriculum substantially equivalent to that required of agricultural engineering undergraduate students at this institution. However, because of the diversity of interests within the graduate programs in agricultural engineering, a student may qualify for graduate study even though the undergraduate training has been in a discipline other than agricultural engineering. Supporting work will be required depending on the student's background and area of interest with requirements defined by departmental graduate student guidelines: www.iastate.edu/grad_students.asp

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology (see Graduate Majors).

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human and computer interaction, and toxicology (see Index).

Courses primarily for undergraduate students

A E 110. Experiencing Agricultural and Biosystems Engineering. (0-2) Cr. 1. S. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

A E 201. Entrepreneurship and Internship Seminar. (Cross-listed with BSE, TSM). (1-0) Cr. 1. F.S. *Prereq: Sophomore classification in A E, AST, BSE or ITec.* 8 week course. Overview of the entrepreneurial process and its importance in the economy and the engineering/technical workplace. Preparation for internship experiences. Relationship of workplace competencies to entrepreneurship, intrapreneurship, and internships; portfolios.

A E 216. Fundamentals of Agricultural and Biosystems Engineering. (Cross-listed with BSE). (2-2) Cr. 3. S. *Prereq: 110, Engr 160, credit or enrollment in Math 166.* Application of Mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.

A E 271. Engineering Applications of Parametric Solid Modeling. (1-2) Cr. 1. F.S. *Prereq: Engr 170 or TSM 116 or equivalent.* 8 week-course. Creating, editing, and documenting part and assembly models using Solidworks.

A E 272. Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER. (1-2) Cr. 1. F.S. *Prereq: Engr 170 or TSM 116 or equivalent.* 8 week-course. Applications of Pro/ENGINEER software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation: standard drawing views, dimensions, and notes.

A E 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* First professional work period in the cooperative education program. Students must register for this course before commencing work.

A E 301. Leadership and Ethics Seminar. (Cross-listed with BSE, TSM). (1-0) Cr. 1. F.S. *Prereq: 201.* 8 week course. Leadership and ethics experiences through case studies and seminar presentations by practitioners. Relationship of workplace competencies to leadership and ethics; portfolios.

A E 316. Applied Numerical Methods for Agricultural and Biosystems Engineering. (Cross-listed with BSE). (2-2) Cr. 3. F. *Prereq: Engr 160, Math 266.* Computer aided solution of agricultural engineering problems by use of numerical techniques and Mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

A E 325. Biorenewable Systems. (Cross-listed with Agron, An S, BusAd, Econ, TSM). (3-0) Cr. 3. F. *Prereq: Econ 101, Chem 155 or higher, Math 140 or higher.* Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

A E 340. Functional Analysis and Design of Agricultural Field Machinery. (2-2) Cr. 3. F. *Prereq: 110, 203, 216.* Principles of operation, design, selection, testing and evaluation of agricultural field machinery and systems. Functional and mechanical performances. Crop and soil interaction with machines. Machine systems, including land preparation, crop establishment, crop protection, harvesting and post-harvest, materials handling systems.

A E 342. Agricultural Tractor Power. (2-3) Cr. 3. S. *Prereq: M E 330 or Ch E 381 or M E 231.* Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms. Nonmajor graduate credit.

A E 363. Agri-Industrial Applications of Electric Power and Electronics. (3-2) Cr. 4. F. *Prereq: Phys 222.* Single phase and three phase circuit design. Electrical safety. Electric motors and controls. Programmable logic controllers. Digital logic, instrumentation and sensors. Nonmajor graduate credit.

A E 388. Sustainable Engineering and International Development. (Cross-listed with C E, E E, M E, Mat E). (2-2) Cr. 3. F. *Prereq: Junior classification in engineering.* Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as non-government organizations (NGOs). Course readings, final project/design report.

A E 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of department and Engineering Career Services.* Summer professional work period.

A E 397. Engineering Internship. Cr. R. Repeatable. F.S. *Prereq: Permission of department and Engineering Career Services.* One semester maximum per academic year professional work period.

A E 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: 298, permission of department and Engineering Career Services.* Second professional work period in the cooperative education program. Students must register for this course before commencing work.

A E 401. Professionalism Seminar. (Cross-listed with BSE, TSM). (1-0) Cr. 1. F.S. *Prereq: 301.* 8 week course. Examination of professionalism in the context of engineering and technology. Time, project and personnel management. Communications and professional portfolios. Professional licensure. Transition to professional careers.

A E 403. Modeling and Controls for Agricultural Systems. (Dual-listed with 503). (2-2) Cr. 3. Alt. S., offered 2011. *Prereq: 363, Math 267.* Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling.

A E 404. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with 504). (2-2) Cr. 3. F. *Prereq: 363 or Cpr E 281.* Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems.

A E 406. Applied Computational Intelligence for Agricultural and Biological Systems. (Dual-listed with 506). (2-2) Cr. 3. Alt. F., offered 2010. *Prereq: 216 or equivalent, Math 166, Stat 305.* Applications of biologically inspired computational intelligence tools to solve problems in agricultural and biological systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree Learning. Fundamental machine vision techniques will be introduced in the first part of course and integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A E 408. GIS and Natural Resources Management. (Dual-listed with 508). (Cross-listed with EnSci). (2-2) Cr. 3. F. *Prereq: Working knowledge of computers and Windows environment.* Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

A E 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with BioE, BSE, C E). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

A E 413. Fluid Power Engineering. (Cross-listed with M E). (2-2) Cr. 3. F. *Prereq: Credit or enrollment in E M 378 or M E 335, A E 216 or M E 270.* Properties of hydraulic fluids. Performance parameters of fixed and variable displacement pumps and motors. Hydraulic circuits and systems. HydroStatic transmissions. Characteristics of control valves. Analysis and design of hydraulic systems for power and control functions. Nonmajor graduate credit.

A E 415. Agricultural Engineering Design I. (Cross-listed with BSE). (1-2) Cr. 2. F.S. *Prereq: 271 or 272, E M 324.* Identification of current design problems in agricultural engineering. Development of alternate solutions using creativity and engineering analysis and synthesis techniques. Nonmajor graduate credit.

A E 416. Agricultural Engineering Design II. (Cross-listed with BSE). (1-2) Cr. 2. F.S. *Prereq: 415.* Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

A E 424. Air Pollution. (Dual-listed with 524). (Cross-listed with C E, EnSci). (1-0) Cr. 1. *Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above.* 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology.
E. Agricultural sources of pollution

A E 431. Design and Evaluation of Soil and Water Conservation Systems. (Dual-listed with 531). (2-3) Cr. 3. F. *Prereq: E M 378 or Ch E 356.* Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality.

A E 436. Design and Evaluation of Soil and Water Monitoring Systems. (Dual-listed with 536). (2-3) Cr. 3. Alt. S., offered 2011. *Prereq: A E 431 or permission of the instructor.* Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures.

A E 451. Food and Bioprocess Engineering. (Dual-listed with 551). (3-0) Cr. 3. F. *Prereq: 216 and M E 436 or Ch E 357, or FS HN 351 and Math 266 or 267.* Application of engineering principles and Mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes.

A E 466. Multidisciplinary Engineering Design. (Cross-listed with Aer E, Cpr E, E E, Engr, I E, Mat E, M E.) (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of the instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

A E 469. Grain Processing and Handling. (Dual-listed with 569). (2-3) Cr. 3. S. *Prereq: 216.* Cereal grain and oilseed properties, quality measurement, processing, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems.

A E 472. Design of Environmental Modification Systems for Animal Housing. (Dual-listed with 572). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 216, M E 330.* Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, energy use, duct design, control strategies.

A E 478. Wood Frame Structural Design. (Dual-listed with 578). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 216, E M 324.* Design of light-framed wood structures using LRFD and ASD design procedures. Includes analysis of wind, snow, dead, and live loads. Applications include animal housing and machine storage. Fasteners, laminated posts, truss design and use of National Design Specifications.

A E 490. Independent Study. Cr. arr. Repeatable.
B. Biosystems Engineering
C. Computer-aided Design
E. Environmental Systems
F. Food Engineering
H. Honors
O. Occupational Safety
P. Power and Machinery Engineering
Q. Structures
R. Process Engineering
S. Environmental and Natural Resources Systems
U. Waste Management

A E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: 398, permission of department and Engineering Career Services.* Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

A E 503. Modeling and Controls for Agricultural Systems. (Dual-listed with 403). (2-2) Cr. 3. Alt. S., offered 2011. *Prereq: 363, Math 267.* Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A E 504. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with 404). (2-2) Cr. 3. F. *Prereq: 363 or Cpr E 281.* Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A E 506. Applied Computational Intelligence for Agricultural and Biological Systems. (Dual-listed with 406). (2-2) Cr. 3. Alt. F., offered 2010. *Prereq: 216 or equivalent, Math 166, Stat 305.* Applications of biologically inspired computational intelligence tools to solve problems in agricultural and biological systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree Learning. Fundamental machine vision techniques will be introduced in the first part of course and integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation. Individual and/or group projects required for graduate credit.

A E 508. GIS and Natural Resources Management. (Dual-listed with 408). (Cross-listed with EnSci). (2-2) Cr. 3. F. *Prereq: Working knowledge of computers and Windows environment.* Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.

A E 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with BSE, BRT, C E). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

A E 515. Integrated Crop and Livestock Production Systems. (Cross-listed with Agron, An S, SusAg). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: SusAg 509.* Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A E 524. Air Pollution. (Dual-listed with 424). (Cross-listed with C E, EnSci). (1-0) Cr. 1. *Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above or permission of instructor.* 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology.
E. Agricultural sources of pollution

A E 531. Design and Evaluation of Soil and Water Conservation Systems. (Dual-listed with 431). (Cross-listed with EnSci). (2-3) Cr. 3. F. *Prereq: E M 378 or Ch E 356.* Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design;

relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A E 533. Erosion and Sediment Transport. (Cross-listed with EnSci). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: 422 or C E 372, Math 266.* Soil erosion processes, modified universal soil loss equation and its application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reserves sedimentation, wind erosion, BMPs for controlling erosion.

A E 536. Design and Evaluation of Soil and Water Monitoring Systems. (Dual-listed with 436). (2-3) Cr. 3. Alt. S., offered 2011. *Prereq: 431/531.* Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A E 551. Food and Bioprocess Engineering. (Dual-listed with 451). (3-0) Cr. 3. F. *Prereq: 216 and M E 436 or Ch E 357, or FS HN 351 and Math 266 or 267.* Application of engineering principles and Mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A E 569. Grain Processing and Handling. (Dual-listed with 469). (2-3) Cr. 3. S. *Prereq: 216.* Cereal grain and oilseed preservation, quality measurement, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems. Individual and group projects required for graduate credit.

A E 572. Design of Environmental Modification Systems for Animal Housing. (Dual-listed with 472). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 216, M E 330.* Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, duct design, and controls. Individual and group projects required for graduate credit.

A E 578. Wood Frame Structural Design. (Dual-listed with 478). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 216, E M 324.* Design of light-framed wood structures. Includes analysis of wind, snow, dead, and live loads. Applications include animal housing and machine storage. Fasteners, laminated posts, truss design and use of National Design Specifications. Individual project required for graduate credit.

A E 590. Special Topics. Cr. arr. Repeatable.
B. Biosystems Engineering
F. Food Engineering
O. Occupational Safety
P. Power and Machinery Engineering
Q. Structures and Environment
R. Process Engineering
S. Water and Environment
U. Waste Management

A E 598. Technical Communications for a Master's Degree. (Cross-listed with TSM). Cr. 1. F.S.SS. A technical paper draft based on the M.S. thesis or creative component is required of all master's students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on M.S. thesis or creative component is required of all master's students. This presentation must be in a form that satisfies the normal presentation requirements of a professional Society. The presentation itself (oral or poster) may be made at a professional Society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Satisfactory-fail only.

A E 599. Creative Component. Cr. arr. Repeatable.

Courses primarily for graduate students

A E 601. Graduate Seminar. (Cross-listed with TSM). (1-0) Cr. 1. F. Keys to writing a good MS thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems, review of literature, research hypothesis, objectives, methods, procedures, and reports. Research grant proposals, patents and intellectual property rights, and international research centers of excellence will be discussed.

A E 610. Foundations of Sustainable Agriculture. (Cross-listed with Anthr, Soc, SusAg, Agron). (3-0) Cr. 3. F. *Prereq: Graduate classification, permission of instructor.* Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging systems of agriculture in terms of core concepts of sustainability and their theoretical contexts.

A E 690. Advanced Topics. Cr. arr. Repeatable.

A E 694. Teaching Practicum. (Cross-listed with TSM). Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification and permission of instructor.* Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

A E 697. Engineering Internship. Cr. R. Repeatable. *Prereq: Permission of department chair, graduate classification.* One semester and one summer maximum per academic year professional work period.

A E 698. Technical Communications for a Doctoral Degree. (Cross-listed with TSM). Cr. 1. F.S.SS. A technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional Society. The presentation itself (oral or poster) may be made at a professional Society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Satisfactory-fail only.

A E 699. Research. Cr. arr. Repeatable.
B. Biosystems Engineering
C. Computer-aided Design
E. Environmental Systems
F. Food Engineering
O. Occupational Safety
P. Power and Machinery Engineering
Q. Structures
R. Process Engineering
S. Environment and Natural Resources
U. Waste Management

Agronomy

Kendall Lamkey, Chair of Department

Distinguished Professors: Fehr, Horton

Distinguished Professors (Emeritus): Frey, Hallauer, Pesek, Russell, Shaw

Professors: P. Anderson, Arritt, Barnhart, Beavis, Burras, Chen, Cianzio, Cruse, Elmore, Fales, Gallus, Gutowski, Hartzler, Killorn, Lamkey, Lee, Liebman, Loynachan, Mallarino, Miller, Moore, Mullen, Owen, P. Peterson, T. Peterson, Sandor, Sawyer, Schnable, Tabatabai, Takle, Taylor, Thompson, Wang, Westgate, Wolt

Professors (Emeritus): M. Anderson, Atkins, Benson, Burris, Campbell, I. Carlson, R. Carlson, Fenton, Green, Hodges, Imsande, Keeney, Larson, Pearce, Schafer, Schaller, A. Scott, Shibles, Shrader, Skrdla, Stritzel, H. Thompson, L. Thompson, Troeh, Voss, Wedin, Whigham, Woolley, Yarger

Professors (Collaborators): Hatfield, Jaynes, Karlen, Kaspar, Laird, Logsdon, Masters, Palmer, Shoemaker

Associate Professors: Al-Kaisi, Becraft, Bhattacharyya, Dekker, Delate, Knapp, Lubberstedt, Manu, Wiedenhoeft

Associate Professors (Collaborators): Cambardella, Grant, Kovar, Moorman, Pollak, Sauer, M. Scott

Assistant Professors: Goggi, Heaton, Henning, Hornbuckle, Pedersen, Polito, Salas-Fernandez

Assistant Professor (Adjunct): Fu

Assistant Professors (Collaborators): Blanco, Cannon, Edwards, Gardner, Graham, Guan, Singer, Widrlechner

Lecturers: Christensen, Ciha, Dobill, McAndrews, Sleugh, Zdorkowski

Undergraduate Study

For undergraduate curriculum in Agronomy, see *College of Agriculture, Curricula.*

The Department of Agronomy has a curriculum noted for its scientific rigor and breadth in crop science, soil science, agricultural meteorology, and plant breeding. It prepares students for science-based professional positions, graduate study, or research careers across the spectrum of Agronomy.

The curriculum provides both flexibility and direction for students by offering four in-depth options: crop management and business, agroecology, soil and environmental science, quality and plant breeding and biotechnology. A minimum of 15 credits of Agronomy courses must be earned at Iowa State for students transferring from other institutions. The program also has many opportunities for undergraduate students to be involved in cutting edge research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in communications, critical thinking, problem solving, and working effectively with others.

They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An Agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field Agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ Agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, and in regulatory agencies as plant, food, and grain inspectors. Additional areas of work open to Agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a credentialed title of "Agronomy International Scholar" for agronomy majors who have distinguished themselves in global understanding and international experience. Contact the department for requirements.

The department offers work for a minor in Agronomy. Students are required to complete an approved minor program that includes Agron 114, 154, 212, 354, and 6 additional credits, of which a minimum of 3 credits must be at the 300+ level. Nine credits for the Agronomy minor must be earned at Iowa State.

Graduate Study

The department offers programs that lead to the degrees master of science and doctor of philosophy, with majors in agricultural meteorology; crop production and physiology with optional specializations in seed science and weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil Microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. A M.S. nonthesis option is available for students desiring a general degree program with additional coursework and a written creative component substituting for thesis research.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

The department offers a Master of Science degree in Agronomy designed for the continuing education of professional Agronomists. The Program is taught at a distance using computer-based instructional media. It is a nonthesis degree requiring completion of a written creative component.

The department cooperates in the interdepartmental program in professional agriculture; interdepartmental majors in ecology and evolutionary biology; genetics; MCDB (molecular, cellular, and developmental biology); plant physiology; sustainable agriculture; and environmental science.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on Agronomic, biological, and physical sciences.

Courses primarily for undergraduate students

Agron 105. Leadership Experience. Cr. R. F.S.SS. A participatory experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

Agron 110. Professional Development in Agronomy: Orientation. (0.5-0) Cr. 0.5. F. Orientation to college life, the profession of Agronomy, and the Agronomy curriculum.

Agron 114. Principles of Agronomy. (2-3) Cr. 3. F.S. Mullen. A foundation course in Agronomy applying crop, soil, and environmental sciences in understanding agricultural systems in the world. Includes introductory concepts of plant, soil, tillage, pest, environmental, and sustainable aspects of crop production. Off-campus version offered through internet by interactive computer courseware.

Agron 120. Introduction to Renewable Resources. (Cross-listed with Env S, NREM). (3-0) Cr. 3. F.S. Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

Agron 154. Fundamentals of Soil Science. (2-2) Cr. 3. F.S. *Prereq: Chem 163.* Manu. Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer databank information in balancing Agronomic, economic, and environmental concerns in soil management. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

Agron 155. Soils for Horticultural Scientists. (2-2) Cr. 3. F.S. *Prereq: Chem 163.* Restricted to students in Horticulture. Manu. Physical, chemical and biological properties of natural and manufactured soils. Use of soil information when producing plants on natural and manufactured soils. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

Agron 156. Soils for Urban Use. (2-2) Cr. 3. F.S. Restricted to students outside the College of Agriculture. Manu. Fundamental properties of soils and their application to urban Settings. Development of a site plan for area of land using data from soil survey and computerized data bank information. Field trip. Credit for only one of Agron 154, 155 or 156 may be applied toward graduation.

Agron 160. Water Resources of the World. (Cross-listed with Geol, Mteor, Env S). (3-0) Cr. 3. S. Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in Society and the environment.

Agron 206. Introduction to Meteorology. (Cross-listed with Mteor). (3-0) Cr. 3. F.S. Basic concepts in meteorology, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. Self-study laboratory assignments utilize interactive computerized exercises, worksheets and computerized real-time forecasting. Self-study section may be available to distant education students.

Agron 210. Professional Development in Agronomy: Career Planning. (1-0) Cr. 1. F. *Prereq: Sophomore classification.* Career planning, résumé and cover letter preparation, and interviewing techniques. Career orientation through invited speakers.

Agron 212. Crop Growth, Productivity and Management. (3-2) Cr. 4. F.S. *Prereq: 114.* Production and management practices for corn, soybean, small grain, and forage crops common to Midwestern U.S. agriculture. Emphasis on growth and development, plant characteristics, management practices, crop use, quality, and problem-solving.

Agron 260. Soils and Environmental Quality. (Cross-listed with Env S). (3-0) Cr. 3. F.S. Burras. Role of soils in environmental quality and natural resources management. Emphasis on soil erosion and conservation, water quality, and environmental planning. Saturday field trip.

Agron 283. Pesticide Application Certification. (Cross-listed with Ent, For, Hort). (2-0) Cr. 2. S. Holscher. Core background and specialty topics in agricultural, and Horticultural pesticide applicator certification. Students can Select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

Agron 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department cooperative education coordinator, sophomore classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Agron 310. Professional Development in Agronomy: Work Experience. Cr. R. F.S.SS. Professional work experience in Agronomy. See adviser for departmental requirements. Satisfactory-fail only.

Agron 311. Professional Internship in Agronomy. (1-0) Cr. 1. Repeatable. F.S. *Prereq: Agron 110, Agronomy majors only, permission of instructor before internship begins.* Wiedenhoeft. A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science.

Agron 316. Crop Structure-Function Relationships. (3-0) Cr. 3. F.S. *Prereq: Biol 211.* Knapp. Basic principles concerning the growth, development, and production of crop communities in relation to their environment. Nonmajor graduate credit.

Agron 317. Principles of Weed Science. (2-2) Cr. 3. F. *Prereq: Biol 211.* Hartzler. Biology and ecology of weeds. Interactions between weeds and crops. Principles and practices of integrated weed management systems. Herbicide mechanisms, classification, and fate in plants and soils.

Agron 317L. Principles of Weed Science Laboratory. (0-3) Cr. 1. F. *Prereq: Enrollment in Agron 317.* Optional lab to accompany Agron 317. Identification, biology and management of important weeds of Agronomic and Horticultural habitats. Field trips.

Agron 320. Genetics, Agriculture and Biotechnology. (Cross-listed with Gen). (3-0) Cr. 3. F.S. *Prereq: Biol 212.* Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

Agron 325. Biorenewable Systems. (Cross-listed with A E, An S, BusAd, Econ, TSM). (3-0) Cr. 3. F. *Prereq: Econ 101, Chem 155 or higher, Math 140 or higher.* Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

Agron 330. Crop and Seed Identification Laboratory. (0-4) Cr. 2. S. *Prereq: 114.* Identification, Agronomic and binomial classification of crops, weeds, and diseases. Analysis of crop seed samples for contaminants of weed and other crop seeds.

Agron 331. Intercollegiate Crops Team. (0-6) Cr. 2. F.S. *Prereq: Permission of instructor.* Intensive training in preparation for intercollegiate competition in national crops contests.

Agron 334. Forage Crop Management. (3-0) Cr. 3. F.S. *Prereq: 114.* Barnhart. Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. Students enrolling for graduate credit will be expected to complete an additional class project. Nonmajor graduate credit.

Agron 338. Seed Science and Technology. (Cross-listed with Hort). (2-3) Cr. 3. F. *Prereq: 114 or Hort 221, Biol 211.* Goggi. Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

Agron 342. World Food Issues: Past and Present. (Cross-listed with Env S, FS HN, T SC). (3-0) Cr. 3. F.S. *Prereq: Junior classification.* Zdorkowski, Ford. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit.
H. Honors Section. (Honors Program students only.)

Agron 351. Turfgrass Establishment and Management. (Cross-listed with Hort). (3-0) Cr. 3. F. *Prereq: Hort 221 or Agron 114 or Biol 211.* Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

Agron 351L. Turfgrass Establishment and Management Laboratory. (Cross-listed with Hort). (0-3) Cr. 1. F. *Prereq: Credit or enrollment in 351.* Those enrolled in the Horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.

Agron 354. Soils and Plant Growth. (Cross-listed with Hort). (3-0) Cr. 3. F.S. *Prereq: Agron 154 and Biol 101 or 211.* Killorn or Loynachan. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

Agron 354L. Soils and Plant Growth Laboratory. (Cross-listed with Hort). (0-3) Cr. 1. F.S. *Prereq: Credit or enrollment in 354.* Henning. Laboratory exercises in soil testing that assess a soil's ability to support nutritive requirements for plant growth.

Agron 356. Site-Specific Crop and Soil Management. (3-3) Cr. 4. F. *Prereq: 114 and 354.* Polito. Development of solutions to crop and soil management problems in consultation with a producer-client. Identification of client needs, gathering technical information, and use of geographic information systems as a tool for making crop and soil management decisions. Development and presentation of solutions for crop and soil management issues confronting the client. Emphasis will be placed on identifying and solving complex problems that require integration of biological, physical, chemical, and economic components within a crop and soil management system. Nonmajor graduate credit.

Agron 360. Environmental Soil Science. (Cross-listed with EnSci). (2-3) Cr. 3. S. *Prereq: Agron 260 or Geol 100 or 201.* Burras and Killorn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

Agron 370. Field Experience in Soil Description and Interpretation. (0-3) Cr. 1. Repeatable. F.S. *Prereq: 154 and permission of instructor.* Sandor. Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.

Agron 392. Systems Analysis in Crop and Soil Management. (2-3) Cr. 3. F.S. *Prereq: 316, 354.* Wiedenhoeft. Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

Agron 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department cooperative education coordinator; junior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Agron 402. Watershed Hydrology. (Cross-listed with EnSci, Geol, Mteor, NREM). (3-3) Cr. 4. F. *Prereq: Four courses in physical or biological sciences or engineering; junior standing.* Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

Agron 402I. Watershed Hydrology and Surficial Processes. (Cross-listed with Ia LL, EnSci). Cr. 4. SS. *Prereq: Four courses in physical or biological sciences or engineering.* Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminates) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

Agron 404. Global Change. (Dual-listed with 504). (Cross-listed with EnSci, Env S, Mteor). (3-0) Cr. 3. S. *Prereq: Four courses in physical or biological sciences or engineering; junior standing.* Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

Agron 405. Environmental Biophysics. (Dual-listed with 505). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Math 166 or equivalent.* Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Nonmajor graduate credit.

Agron 406. World Climates. (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. F. *Prereq: Agron/Mteor 206.* Arritt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including Society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit.

Agron 407. Mesoscale Meteorology. (Dual-listed with 507). (Cross-listed with Mteor). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Math 166 and Mteor 454.* Arritt, Gallus. Physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure.

Agron 410. Professional Development in Agronomy: Senior Forum. (1-0) Cr. 1. F.S. *Prereq: Senior classification.* Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.

Agron 417. Evolutionary Ecology of Weeds. (Dual-listed with 517). (3-0) Cr. 3. *Prereq: 317* Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

Agron 421. Introduction to Plant Breeding. (Cross-listed with Hort). (3-0) Cr. 3. F. *Prereq: Gen 320 or Biol 313.* Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing Agronomic and Horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.

Agron 446. International Issues and Challenges in Sustainable Development. (Cross-listed with Globe, IntSt). Cr. 4. S. *Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor.* Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad.

Agron 450. Issues in Sustainable Agriculture. (Cross-listed with Env S). (3-0) Cr. 3. F. Zdorkowski. Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices.

Agron 452. GIS for Geoscientists. (Dual-listed with 552). (Cross-listed with Geol, EnSci). (2-2) Cr. 3. F. *Prereq: Geol 100, Geol 201 or equivalent.* Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

Agron 459. Environmental Soil and Water Chemistry. (Dual-listed with 559). (Cross-listed with EnSci). (3-3) Cr. 4. F. *Prereq: Agron 354 or EnSci 360; Chem 164, 165, or 178; Math 140. Chem 211 or 231 recommended.* Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.

Agron 463. Soil formation and Landscape Relationships. (Dual-listed with 563). (Cross-listed with EnSci). (2-4) Cr. 4. S. *Prereq: Agron 154 or 260.* Sandor. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of Agron 463 or 463I may be applied for graduation. Nonmajor graduate credit.

Agron 463I. Soil formation and Landscape Relationships. (Dual-listed with 563I).(Cross-listed with EnSci, Ia LL). Cr. 4. Alt. SS., offered 2010. *Prereq: 154 or 260.* Burras. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for one of Agron 463 or 463I may be applied for graduation. Nonmajor graduate credit.

Agron 477. Soil Physics. (Dual-listed with 577). (Cross-listed with EnSci). (3-0) Cr. 3. S. *Prereq: 354. Recommended: Math 166.* Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

Agron 484. Organic Agricultural Theory and Practice. (Dual-listed with 584). (Cross-listed with Hort). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 9 cr. in biological or physical sciences.* Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and Socio-economic processes and policies in organic agriculture from researcher and producer perspectives. Nonmajor graduate credit.

Agron 485. Soil and Environmental Microbiology. (Dual-listed with 585). (Cross-listed with EnSci, Micro). (2-3) Cr. 3. F. *Prereq: 154 or 402, Micro 201 (Micro 203 recommended).* Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

Agron 490. Independent Study. Cr. 1-3. Repeatable maximum of 4 credits. F.S.SS. *Prereq: Junior or senior classification with at least 8 credits in Agronomy; permission of instructor in specialty area after consultation.* Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.
E. Entrepreneurship
G. General
H. Honors
Z. Service Learning

Agron 491. Seed Science Internship Experience. (Cross-listed with TSM, Hort). Cr. arr. Repeatable. F.S.SS. *Prereq: Agron 338, advanced approval and participation of employer and instructor.* A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

Agron 493. Workshop in Agronomy. Cr. arr. Repeatable. *Prereq: Permission of instructor.* Staff. Workshop experience in crops, soils, or agricultural meteorology. Nonmajor graduate credit.

Agron 495. Agricultural Travel Course Preparation. Cr. R. Repeatable. F.S. *Prereq: Permission of instructor.* Limited enrollment. Students enrolled in this course intend to register for Agron 496 the following term. Topics will include the agricultural industries, climate, crops, culture, economics, geography, history, livestock, marketing, soils, and preparation for travel to locations to be visited.

Agron 496. Agricultural Travel Course. Cr. arr. Repeatable. *Prereq: Permission of instructor.* Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.
A. International Tour
B. Domestic Tour

Agron 497. Agroecology Field Course. (3-0) Cr. 3. F. *Prereq: Jr. or Sr. classification with at least 8 credits in Agronomy.* A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

Agron 498. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department cooperative education coordinator; senior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Agron 500. Orientation Seminar. (2-0) Cr. 1. F. *Prereq: International Agronomy graduate students only.* Loynachan. An introduction to Iowa and U.S. agriculture for international scholars in Agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.

Agron 501. Crop Growth and Development. (3-0) Cr. 3. F. *Prereq: 114, Math 140, Chem 163, Biol 101.* Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield. Required course for the Master of Science in Agronomy degree program.

Agron 502. Chemistry, Physics, and Biology of Soils. (3-0) Cr. 3. F. *Prereq: 114, 154, Biol 101, Chem 163, and Math 140.* Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program.

Agron 503. Climate and Crop Growth. (3-0) Cr. 3. F. *Prereq: 114 and Math 140.* Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the micro-climate-agriculture interaction. Basic meteorological principles are also presented to support these applied concepts. Required course for the Master of Science in Agronomy degree program.

Agron 504. Global Change. (Dual-listed with 404). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. S. *Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing.* Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

Agron 505. Environmental Biophysics. (Dual-listed with 405). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Math 166 or equivalent.* Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Semester project required.

Agron 507. Mesoscale Meteorology. (Dual-listed with 407). (Cross-listed with Mteor). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Math 166 and Mteor 454.* Arritt, Gallus. The physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Semester project and in-class presentation required.

Agron 508. Biophysical Crop Ecology. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 505.* Taylor. Principles of resource capture (light and water) applied to growth and development. Ecological implications of radiation, temperature, moisture, and the biological properties of size, shape, resistance to water vapor loss, and absorptivity to solar and thermal radiation. Physiological stress in the soil, plant, atmosphere continuum.

Agron 509. Agroecosystem Analysis. (Cross-listed with Anthr, Soc, SusAg). (3-4) Cr. 3. F. *Prereq: Senior or above classification.* Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc), and scales of operation.

Agron 510. Crop Improvement. (Cross-listed with STB). (3-0) Cr. 3. F. *Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor.* A study of the basic principles and methods in the genetic improvement of crop plants. Methods used in manipulating genomes through the use of biotechnology. Methods of cultivar development. Quantitative procedures for describing response to selection. Analysis of the relationship of reproductive characters and growth characteristics to response to selection.

Agron 511. Crop Improvement. (3-0) Cr. 3. S. *Prereq: 114, Math 140, Chem 163, Biol 101.* Basic principles in the genetic improvement of crop plants. Methods of cultivar development in self-pollinated and cross-pollinated crop species. Required course for the Master of Science in Agronomy degree program.

Agron 512. Soil-Plant Environment. (3-0) Cr. 3. S. *Prereq: 502. Recommended 501.* Loynachan. Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management. Required course for the Master of Science in Agronomy degree program.

Agron 513. Quantitative Methods for Agronomy. (3-0) Cr. 3. S. *Prereq: 114, Math 140, Stat 104.* Quantitative methods for analyzing and interpreting Agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of JMP for organization, analyzing, and presenting data. Required course for the Master of Science in Agronomy degree program.

Agron 514. Integrated Pest Management. (3-0) Cr. 3. SS. *Prereq: 114, 501, Math 140, Chem 163, Biol 101. Recommended: 502, 503.* Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management. Required course for the Master of Science in Agronomy degree program.

Agron 515. Integrated Crop and Livestock Production Systems. (Cross-listed with A E, SusAg, An S). (3-0) Cr. 3. F. *Prereq: 509.* Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

Agron 516. Crop Physiology. (3-0) Cr. 3. S. Westgate. Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.

Agron 517. Evolutionary Ecology of Weeds. (Dual-listed with 417). (3-0) Cr. 3. S. *Prereq: 317.* Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

Agron 518. Microwave Remote Sensing. (Cross-listed with E E, Mteor). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Math 265 or equivalent or permission of instructor.* Hornbuckle. Microwave remote sensing of Earth's surface and atmosphere. Overview of relevant electromagnetic theory and antenna theory. Planck emission and the radiative transfer equation. The electrical properties of natural materials at microwave frequencies. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, and soil and vegetation water content.

Agron 519. Herbicide Physiology and Biochemistry. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 317; Biol 330.* Owen. Herbicide mechanisms of action, selectivity, uptake, and translocation. Specific sites of herbicide action as they affect plant physiology. Herbicide resistance in weeds and crops. Implications of herbicides on weed management.

Agron 521. Principles of Cultivar Development. (3-0) Cr. 3. F. *Prereq: 421; Stat 401.* Theoretical and practical analysis of alternative breeding methods to improve crop plants. Strategies to incorporate germplasm resources, develop populations, maximize genetic gain, and use marker-assisted selection. Relationship of breeding methods to commercial seed production.

Agron 522. Field Methods in Plant Breeding. (0-6) Cr. 2. SS. *Prereq: 521.* Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Satisfactory-fail only.

Agron 526. Field Plot Technique. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Stat 401.* Moore. Planning experiments for agricultural research, analysis of data, and concepts in data interpretation.

Agron 527. Plant Genetics. (3-0) Cr. 3. S. *Prereq: Gen 410.* Bhattacharyya. Fundamental genetic and cytogenetic concepts from plant perspective including recombination, linkage analysis, genetic and molecular mapping, male sterility, self incompatibility, apomixis, and polyploid evolution.

Agron 529. Publishing in Plant Science Journals. (Cross-listed with Hort, NREM). (2-0) Cr. 2. S. *Prereq: Permission of instructor; evidence of a publishable unit of the student's research data.* Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

Agron 530. Ecologically Based Pest Management Strategies. (Cross-listed with SusAg, Ent, Pl P). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: SusAg 509.* Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

Agron 531. Crop Ecology and Management. (3-0) Cr. 3. F. *Prereq: 501, 502, 503. Recommended: 512, 514.* Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints,

and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.

Agron 532. Soil Management. (3-0) Cr. 3. F. *Prereq: 501, 503, 512. Recommended 513.* Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the Agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

Agron 533. Crop Protection. (3-0) Cr. 3. F. *Prereq: 514.* Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

Agron 534. Seed and Variety, Testing and Technology. (Cross-listed with STB). (2-0) Cr. 2. *Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor.* The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

Agron 535. Introduction to the Seed Industry. (Cross-listed with STB). Cr. 1. *Prereq: Curriculum requires undergraduate specialization in a business or biological science.* An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in related to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

Agron 536. Quantitative Methods for Seed. (Cross-listed with STB). (1-0) Cr. 1. F. *Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor.* Quantitative Methods for analyzing and interpreting Agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

Agron 537. Plant Stress Biology. (Cross-listed with Hort, EEOB). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Biol 330A or equivalent and BBMB 404-405.* Physiology and molecular biology of plant responses to environmental stress. Emphasis on the role of hormones and hormone interactions in governing stress responses. Lectures are prepared from journal papers that elucidate key mechanisms controlling responses to drought, flooding, salt, nutrient deficiencies, freezing, pathogens and herbivores. Plants studied include genetic model systems and crops of Horticultural and Agronomic value.

Agron 538. Seed Physiology. (2-0) Cr. 2. Alt. F., offered 2010. *Prereq: 338; Chem 231 or Chem 331.* Goggi. Physiological aspects of seed development, maturation, longevity, dormancy, and germination. Emphasis on current literature and advanced methodology.

Agron 539. Seed Conditioning and Storage. (Cross-listed with STB). (2-0) Cr. 2. F. *Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor.* The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as focal points within the overall operations of a seed company.

Agron 541. Applied Agricultural Meteorology. Cr. 2-3. F.S.SS. *Prereq: 206 or upper division Biological Science.* Taylor. Applied concepts in agricultural meteorology. Basic concepts of weather and of crop/climate relationships influencing production, protection, yield and associated production risk factors. Self study sections are available to resident and to distant education students all semesters. Credit for only one of Agron 503 or 541 may be applied toward graduation.

Agron 546. Organizational Strategies for Diversified Farming Systems. (Cross-listed with Soc, Hort, SusAg). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: SusAg 509.* Examination of the organization and operation of complex, diversified farming systems using tools and perspectives drawn from ecology, Agronomy, and Sociology. The course includes a significant field component focused on an Iowa farm.

Agron 547. Seed Production. (Cross-listed with STB). (2-0) Cr. 2. Alt. F., offered 2010. *Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of instructor.* Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Resources and capabilities required. Survey of differences in seed production strategies between crops and impact of differences on management of seed production.

Agron 551. Growth and Development of Perennial Grasses. (Cross-listed with Hort). (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: Junior or senior or graduate classification or permission of instructor.* The grass plant. Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

Agron 552. GIS for Geoscientists. (Dual-listed with 452). (Cross-listed with Geol, EnSci). (2-2) Cr. 3. F. *Prereq: Geol 100, Geol 201 or equivalent.* Introduction to geographic information systems (GIS) with particular emphasis on geoscience data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

Agron 553. Soil-Plant Relationships. (Cross-listed with EnSci). (3-0) Cr. 3. F. *Prereq: Agron 354.* Killorn. Composition and properties of soils in relation to the nutrition and growth of plants.

Agron 554. Advanced Soil Management. (2-0) Cr. 2. Alt. F., offered 2009. *Prereq: 354; Math 165.* Cruse. Implications of soil management on the soil environment and root activity. Effect of soil physical properties on soil erosion.

Agron 555. Soil Clay Mineralogy. (Cross-listed with Geol). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Agron 473, Chem 178. Recommend: Geol 311.* Structure and behavior of clay minerals in soil environments, with emphasis on layer silicates and on Fe, Mn, and Al oxides.

Agron 555L. Soil Clay Mineralogy Laboratory. (Cross-listed with Geol). (0-3) Cr. 1. Alt. S., offered 2010. *Prereq: Credit or enrollment in 555.* Thompson. Application of X-ray diffraction, thermal analysis, infrared spectroscopy, and chemical analyses to identification and behavior of clay minerals in soils.

Agron 558. Laboratory Methods in Soil Chemistry. (Cross-listed with EnSci). (2-3) Cr. 3. F. *Prereq: Agron 354 and Chem 178 or 211.* Tabatabai. Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

Agron 559. Environmental Soil and Water Chemistry. (Dual-listed with 459). (Cross-listed with EnSci). (3-3) Cr. 4. F. *Prereq: Agron 354 or EnSci 360; Chem 164, 165, or 178; Math 140. Chem 211 or 231 recommended.* Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, chemical-equilibrium speciation programs, and applications to contemporary environmental issues.

Agron 561. Population and Quantitative Genetics for Breeding. (Cross-listed with An S). (4-0) Cr. 4. F. *Prereq: Stat 401.* Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.

Agron 563. Soil formation and Landscape Relationships. (Dual-listed with 463). (Cross-listed with EnSci). (2-4) Cr. 4. S. *Prereq: 154 or 260.* Sandor. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of Agron 563 or 563I may be applied for graduation.

Agron 563I. Soil formation and Landscape Relationships. (Dual-listed with 463I).(Cross-listed with EnSci, Ia LL). Cr. 4. Alt. SS., offered 2010. *Prereq: 154 or 260.* Burras. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

Agron 565. Professional Practice in the Life Sciences. (Cross-listed with PI P, An S, BCB, Hort, Micro, V MPM). Cr. arr. S. *Prereq: Graduate classification.* Professional discourse on the ethical and legal issues facing life science researchers. Offered in modular format; each module is four weeks.
A. Professional Practices in Research. (Cr. 1.0) Good scientific practices and professional ethics in the life sciences.
B. Intellectual Property and Industry Interactions. (Cr. 0.5) Ethical and legal issues facing life scientists involved in research interactions with industry.

Agron 570. Risk Assessment for Food, Agriculture and Veterinary Medicine. (Cross-listed with VDPAM, Tox). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Stat 104 or consent of instructor: Wolt, Hurd.* Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analyses. Uncertainty analysis.

Agron 575. Soil Formation and Transformation. (Cross-listed with EnSci). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 463 or equivalent.* Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

Agron 577. Soil Physics. (Dual-listed with 477). (Cross-listed with EnSci). (3-0) Cr. 3. S. *Prereq: 354. Recommended: Math 166.* Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

Agron 578. Laboratory Methods in Soil Physics. (Cross-listed with EnSci). (0-3) Cr. 1. S. *Prereq: 577 concurrent.* Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

Agron 584. Organic Agricultural Theory and Practice. (Dual-listed with 484). (Cross-listed with Hort, SusAg). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 9 cr. in biological or physical sciences.* Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and Socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

Agron 585. Soil and Environmental Microbiology. (Dual-listed with 485). (Cross-listed with EnSci, Micro). (2-3) Cr. 3. F. *Prereq: 154 or 402, Micro 201 (Micro 203 recommended).* Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

Agron 590. Special Topics. Cr. arr. Repeatable. *Prereq: 15 credits in Agronomy.* Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

Agron 591. Agronomic Systems Analysis. (3-0) Cr. 3. S. *Prereq: 511, 513, 531, 532, 533.* Analysis of cropping systems from a problem-solving perspective. Case studies will be used to develop the students' ability to solve Agronomic problems. Required course for the Master of Science in Agronomy degree program.

Agron 592. Current Issues in Agronomy. (3-0) Cr. 3. S. *Prereq: 501, 503, 511, 512, 513, 514.* Study and discussion of topics of current interest to the field of Agronomy. While Agron 591 deals with Agronomics at the farm and landscape level, Agron 592 seeks to address issues on a broader scale including off-farm agricultural impacts. Required course for the Master of Science in Agronomy degree program.

Agron 593. Workshop in Agronomy. (1-0) Cr. 1. SS. *Prereq: 501, 502, 503, 514 (or current enrollment). Recommended: 511, 512, 513.* Practical field and laboratory experience integrating coursework in climatology, crops, and soils. Workshop includes lectures, labs and local agri-business tours. Required course for the Master of Science in Agronomy degree program.

Agron 595. Seed Quality, Production, and Research Management. (Cross-listed with STB). (3-0) Cr. 3. *Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor.* Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager's tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

Agron 599. Creative Component. Cr. arr. *Prereq: Nonthesis M.S. option only.* A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.
A. Agricultural Meteorology
B. Crop Production and Physiology
C. Plant Breeding
D. Soil Chemistry
E. Soil Fertility
F. Soil Management
G. Soil Microbiology and Biochemistry
H. Soil Morphology and Genesis
I. Soil Physics
K. Seed Science
L. Weed Science
M. Agronomy

Courses for graduate students

Agron 600. Seminar. (1-0) Cr. 1. Repeatable. F.S. Reports and discussion of recent literature and research.
A. Plant Breeding.
B. Soils. F.S.
C. Crop Production and Physiology. F.S.

Agron 609. Agricultural Meteorology Conference. (1-0) Cr. 1. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Literature reviews and conferences with instructor on special problems relating to agricultural meteorology, beyond the scope of current courses offered.

Agron 610. Foundations of Sustainable Agriculture. (Cross-listed with SusAg, A E, Anthr, Soc). (3-0) Cr. 3. F. *Prereq: Graduate classification, permission of instructor.* Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

Agron 616. Advanced Topics in Plant Physiology and Biochemistry. (4-0) Cr. 4. Alt. S., offered 2010. *Prereq: Graduate classification; permission of instructor.* Westgate. An in-depth treatment of physiological, biochemical and molecular processes regulating plant growth and development. Emphasis on individual study followed by in-class presentations and discussion.

Agron 621. Advanced Plant Breeding. (3-0) Cr. 3. S. *Prereq: 521, 526, 561; Gen 410.* Lamkey. Estimation and interpretation of genetic effects and variances of plant populations, analysis of mating designs, heritability estimation, intra- and interpopulation selection methods, prediction of genetic gain, inbreeding and heterosis, classification and development of parental materials, selection indices, and combining ability analysis.

Agron 625. Genetic Strategies in Plant Breeding. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 521, Gen 410.* Lee. Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

Agron 655. Advanced Soil Fertility. (2-0) Cr. 2. Alt. S., offered 2011. *Prereq: 553.* Evaluation of soil fertility and fertilizers; theory and applications.

Agron 677. Advanced Soil Physics. (2-0) Cr. 2. Alt. F., offered 2010. *Prereq: 577; Math 266, 267. Recommended: Com S 207.* Horton. The flow and distribution of water, chemicals, and heat in soils. Physical principles and applications.

Agron 685. Advanced Soil Biochemistry. (Cross-listed with Micro, EnSci). (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: Agron 585.* Tabatabai. Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

Agron 696. Research Seminar. (Cross-listed with BBMB, GDCB, PlBio, Hort, For). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Satisfactory-fail only.

Agron 698. Agronomy Teaching Practicum. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification in Agronomy and permission of instructor.* Graduate student experience in the Agronomy teaching program. Satisfactory-fail only.

Agron 699. Research. Cr. arr. Repeatable.
A. Agricultural Meteorology
B. Crop Production and Physiology
C. Plant Breeding
D. Soil Chemistry
E. Soil Fertility
F. Soil Management
G. Soil Microbiology and Biochemistry
H. Soil Morphology and Genesis
I. Soil Physics
J. Plant Physiology
K. Seed Science
L. Weed Science

Air Force Aerospace Studies

www.iastate.edu/~airforce/

Col. James Cramp, Chair of Department

Professors: Cramp

Assistant Professors (Adjunct): Menschner, Morgan, Wendelin

Undergraduate Study

The objectives of the Department of Air Force Aerospace Studies are to provide qualified students the opportunity to earn a commission as an officer in the active duty Air Force, and to build better citizens for those not interested in joining the Air Force.

The curriculum is divided into two basic phases, the general military course (GMC) and the professional officer course (POC). The GMC is introductory and consists of four consecutive 1-hour courses normally taken during the freshman and sophomore years. GMC completion is not a prerequisite for entry into the POC, although it is recommended by the department.

Prior to entry into the POC, most students complete field training at an Air Force base. Students who have completed the GMC participate in a 4-week program, which provides a concentrated experience in the Air Force environment. The training program includes junior officer training, aircraft and aircrew orientation, career orientation, survival training, an introduction to typical base functions, and physical training. A 6-week training program is provided for those students entering the POC who did not complete the GMC. This program includes all that is offered in the 4-week program, plus academic and leadership laboratory experiences included in the on-campus GMC courses.

Selection for the professional officer course is on a competitive basis, and cadets enrolling in this course must meet certain academic, mental, physical, and moral standards. Qualified cadets may be selected as flight candidates and receive flight instruction prior to attending Undergraduate Pilot Training (UPT) or Undergraduate Navigator Training (UNT). Upon enrollment in the POC, all cadets are required to complete a contractual agreement with the Air Force, which obligates them to 4 years of active duty as an officer in the United States Air Force. Air Force active duty commitment is 10 years for pilots and 6 years for navigators. Uniforms and AFROTC texts are supplied to the cadets, and those in the POC receive a subsistence allowance between $450-500 per month.

Students who fail to observe the contract terms may be called to active duty in an enlisted grade or be required to repay monies received from the Air Force.

Air Force ROTC scholarships are available and provide payment of full tuition and fees. In addition, Scholarship cadets receive between $$300-500 monthly subsistence allowance and $900 per year book allowance. Upon acceptance of a scholarship, the student executes a contract with the Air Force. Scholarships can be awarded for periods of 2, 3, or 4 years, with up to 1 additional year for qualified applicants in selected majors. To determine eligibility and initiate application procedures for the scholarship program, interested students should contact the department.

Entry into the program is not dependent on departmental major or year in the university. The AFROTC program is open to both male and female students.

The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above.

Courses primarily for undergraduate students

AFAS 101. Leadership Laboratory I. (0-2) Cr. 1. F. Instructions on Air Force customs and courtesies; drill and ceremonies, issuing military commands, physical training, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 102. Leadership Laboratory II. (0-2) Cr. 1. S. Continuation of AFAS 101. Air Force customs and courtesies; drill and ceremonies, issuing military commands, instructing team members, physical training, directing and evaluating the preceding skills, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 141. Foundations of the United States Air Force. (1-0) Cr. 1. F. Basic introduction to the United States Air Force and Air Force Reserve Officer Training Corps. Mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, and communication skills. Leadership Laboratory is mandatory for AFROTC cadets complements this course by providing cadets with followership experiences.

AFAS 142. Foundations of the United States Air Force. (1-0) Cr. 1. S. A continuation of 141. Topics include Air Force installations, Air Force core values, leadership and team building, further study of interpersonal communication, the Oath of Office and Commissioning. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 151. Air Force Physical Training. (0-2) Cr. 1. Repeatable. S. F. *Prereq: Enrollment as a cadet in an Air Force Aerospace Studies Class.* Use of basic military training skills and instruction to develop confidence, leadership, communication skills and physical fitness. The team approach is utilized in the instruction and application of Air Force physical fitness requirements. Students will learn various Air Force physical fitness techniques as well as how to conduct physical fitness sessions. Full participation in all events will be determined based on student's physical and medical eligibility. Satisfactory-fail only.

AFAS 201. Leadership Laboratory I. (0-2) Cr. 1. F. Instruction for junior cadets on Air Force customs and courtesies, drill and ceremonies, issuing military commands, instructing, physical training, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued military training related to wearing the uniform, engaging in military customs and courtesies, and participating in military ceremonies. This laboratory is required if applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 202. Leadership Laboratory II. (0-2) Cr. 1. S. A continuation of AFAS 201, instructing junior cadets on Air Force customs and courtesies, drill and ceremonies, issuing military commands, instructing, physical training, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued military training related to wearing the uniform, engaging in military customs and courtesies, and participating in military ceremonies. This laboratory is required if applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 241. The Evolution of USAF Air & Space Power I. (1-0) Cr. 1. F. Examines the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the Korean War. Historical examples are provided to illustrate the development of Air Force capabilities (competencies), and missions (functions) to demonstrate the evolution of what has become today's USAF air and space power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 242. The Evolution of USAF Air & Space Power II. (1-0) Cr. 1. S. Examines the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the Korean War to the space-age global positioning systems of the Persian Gulf War. Historical examples are provided to illustrate the development of Air Force capabilities (competencies), and missions (functions) to demonstrate the evolution of what has become today's USAF air and space power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 301. Leadership Laboratory I. (0-3) Cr. 1. F. Mid-level management of leadership experiences involving the planning and controlling of the military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if taking AFAS 341 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 302. Leadership Laboratory II. (0-3) Cr. 1. S. Continuation of AFAS 301, mid-level management of leadership experiences involving the planning and controlling of the military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 341. Air Force Leadership Studies I. (3-0) Cr. 3. F. *Prereq: 141, 142, 241, and 242.* Continuation of the study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 342. Air Force Leadership Studies II. (3-0) Cr. 3. S. *Prereq: 341.* A continuation of the study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 401. Leadership Laboratory I. (0-3) Cr. 1. F. Advanced leadership experiences involving the planning and controlling of the upper level management of military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if taking AFAS 441 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 402. Leadership Laboratory II. (0-3) Cr. 1. S. Advanced leadership experiences involving the planning and controlling of the military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if taking AFAS 442 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 441. National Security Affairs & Preparation for Active Duty I. (3-0) Cr. 3. F. *Prereq: 342.* Examines the national security process to include the development of U.S. Policy and strategy; structure of the Department of Defense: advanced study of Joint and Air Force Doctrine; and, advanced study of joint operations. Examines administrative actions and military law as they pertain to force management. Includes a regional studies component with focus on Africa, Latin America, South Asia and East Asia. Begins preparation for active duty through emphasis on current issues affecting professional military officers. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 442. National Security Affairs & Preparation for Active Duty II. (3-0) Cr. 3. S. *Prereq: 342.* Continuation of AFAS 441. Extends examination of the national security process to a full spectrum of officer, enlisted, and civilian force management issues. Extends the regional studies component through focus on Europe, Russia and the Middle East. Continues preparation for active duty through emphasis on current issues affecting professional military officers. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

American Indian Studies

(Interdepartmental Undergraduate Minor)

Program Director: Sidner Larson

The American Indian Studies Program is a cross-disciplinary program in the College of Liberal Arts and Sciences that emphasizes perspectives from American Indian Studies, Anthropology, art, history, literature, political science and Sociology. The primary goal of the American Indian Studies program is to conduct interdisciplinary investigations of the intellectual practices, lived history, values, political Status, rights, and responsibilities of tribal nations. Students have the opportunity to learn about the cultural heritage of American Indians, their historical relationship with non-Indians, and their participation in contemporary American

Society. They analyze the tropes and techniques common to American Indian oral and written literatures; comparison/contrast of American Indian cultures to mainstream and other world cultures; and, articulation of the role American Indians are playing in approaches to modern social and environmental issues.

The courses in the American Indian Studies Program provide added background for students whose career interests may include multicultural education, human Services, legal services, or public administration.

Within the College of Liberal Arts and Sciences, courses in American Indian Studies can be used as electives, in a minor, or in an interdisciplinary studies major (for details, see *Index, Interdisciplinary Studies*). Students majoring in another college who wish to use these courses should consult with their advisers.

A minor in the College of Liberal Arts and Sciences must include at least 15 credits of courses in the field. A minor in American Indian Studies must include 210, two courses chosen from among the following: 310, 322, 332 and 346, and two additional courses chosen from the program courses listed below. The American Indian Studies Program Committee will, upon application by the student and review of the program, certify that the student has completed a minor in American Indian Studies.

Because course offerings vary from year to year, any student interested in a minor in American Indian Studies should contact the American Indian Studies office for advising. (See *Index, LAS Cross-Disciplinary Programs*.)

Courses primarily for undergraduate students

Am In 210. Introduction to American Indian Studies. (3-0) Cr. 3. F.S.SS. Introduction to the multidisciplinary aspects of American Indian Studies. Topics include literature, the arts, history, anthropology, sociology, education, and contemporary Indian politics. Guest lectures, media presentations, and discussion of assigned readings.

Am In 240. Introduction to American Indian Literature. (Cross-listed with Engl). (3-0) Cr. 3. F. *Prereq: Credit in or exemption from Engl 150.* Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.

Am In 310. Topics in American Indian Studies. (3-0) Cr. 3. Repeatable. F.S. Issues within specific topical areas of American Indian Society and culture, such as social work with Indian families, tribal government, and environmental policy.

Am In 315. Archaeology of North America. (Cross-listed with Anthr). (3-0) Cr. 3. S. *Prereq: Anthr 202 or 308.* Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Am In 322. Peoples and Cultures of Native North America. (Cross-listed with Anthr). (3-0) Cr. 3. F.SS. *Prereq: Anthr 201 or Am In 210.* Origin, distribution, and traditional life of native peoples of North America. Survey of culture areas; ecology and subsistence, language, kinship, life cycle, political, economic, and religious systems; impact of European contact.

Am In 323. Topics in Latin American Anthropology. (Cross-listed with Anthr). (3-0) Cr. 3. Repeatable. *Prereq: Anthr 201 or 306 recommended.* Exploration of contemporary Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key Sociocultural issues in Latin America. Topics vary each time offered.
A. Violence and Memory
B. Social movements and Democracy
C. Race, Class and Gender
D. Regional Focus

Am In 328. American Indian Religions. (Cross-listed with Relig). (3-0) Cr. 3. An introduction to the beliefs and rituals of Native American religious traditions, with attention to cultural and historical contexts and implications. Nonmajor graduate credit.

Am In 342. American Indian Women Writers. (Cross-listed with W S). (3-0) Cr. 3. *Prereq: Engl 250.* Literature of American Indian women writers which examines their social, political, and cultural roles in the United States. Exploration of American Indian women's literary, philosophical, and artistic works aimed at recovering elements of identity, redescribing stereotypes, resisting colonization, and constructing femininity. Nonmajor graduate credit.

Am In 346. American Indian Literature. (Cross-listed with Engl). (3-0) Cr. 3. S. *Prereq: Engl 250.* Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Nonmajor graduate credit.

Am In 420. Cultural Continuity and Change on the Prairie-Plains. (Cross-listed with Anthr). (3-0) Cr. 3. F. *Prereq: Anthr 315 or 322.* Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indian groups through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Am In 426. Topics in Native American Architecture. (Cross-listed with Dsn S, Arch). (3-0) Cr. 3. Repeatable. F.S. *Prereq: Junior classification.* History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Am In 432. Current Issues in Native North America. (Cross-listed with Anthr). (3-0) Cr. 3. S. *Prereq: Anthr 201 or 306; 322 or Am In 210 recommended.* Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal Status, the reservation system, treaty violations, Indian militancy, education and urbanization, self-determination, social impact of resource development, and other current concerns.

Am In 490. Independent Study. Cr. arr. Repeatable. *Prereq: 6 credits in American Indian Studies; permission of instructor.* Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits in Am In 490 may be counted toward graduation.

Courses offered by other departments

Anthr 428. Topics in Archaeological Laboratory Methods and Techniques. See *Anthropology*.

Anthr 429. Archaeological Field School. See *Anthropology*.

C I 280C. Pre-Student Teaching Experience: Native American Tutoring. See *Curriculum Instruction.*

Hist 370. History of Iowa. See *History*.

Hist 465. The American West. See *History*.

Pol S 312. Minicourse in American Government and Politics. See *Political Science.* Acceptable only when offered as a course in American Indian tribal government and political theory.

Soc 330. Ethnic and Race Relations. See *Sociology*.

Animal Science

www.ans.iastate.edu/

Maynard Hogberg, Chair of Department

Distinguished Professors: Anderson, Beitz, Lamont, Rothschild, Sebranek

Distinguished Professors (Emeritus): Freeman, Jacobson, Sell, Trenkle, Willham

University Professors: Kenealy

University Professors (Emeritus): Parrish

Professors: Ahn, Baas, Berger, Brant, Cordray, Dekkers, Dickson, Fernando, Garrick, Harris, Hoffman, Hogberg, Honeyman, Kilmer, E. Lonergan, S. Lonergan, Loy, Mabry, Morrical, Nissen, Olson, Prusa, Robson, Russell, Spike, M. Spurlock, Strohbehn, Tuggle, Xin

Professors (Emeritus): Brackelsberg, Ewan, Foreman, Haynes, Holden, Jurgens, Kiser, Marple, Owings, Rouse, Rust, Speer, Stevermer, Stromer, Topel, Voelker, Wickersham, Wilson, Wunder, Young, Zimmerman, Zmolek

Professors (Collaborators): Clutter, Horst, Kehrli, Nonnecke, Quigley, Reinhardt, Scanes

Associate Professors: Auwerda, Cunnick, Huiatt, Jeftinija, Patience, Reecy, Skaar, Spurlock, Stalder, Timms, Tyler, Youngs

Associate Professors (Collaborators): Frye, Gunsett, Kerr, Mahanna, Sosnicki

Assistant Professors: Butters-Johnson, Ellinwood, Gabler, Ross, Selsby

Assistant Professors (Collaborators): Bonner, Campbell, Lippolis, McVicker, Pita, Rathmacher

Senior Lecturer: Boury

Lecturers: Ferwerda, Olsen, Thayne

Clinician: Leuschen

Undergraduate Study

The Department of Animal Science Undergraduate Program intends for its graduates to be able to detail the symbiotic relationship of animals and humans, to solve the complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding global community. To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The department's undergraduate degree program has 10 major program goals. They are to provide a comprehensive animal science education in (1) science, (2) animal management, and (3) agri-business. In addition, our program strives to create an environment developing: (4) effective communication skills, (5) skills enabling students to gather and integrate information to solve problems, (6) self learners, (7) leaders and team builders, and (8) awareness of domestic and global issues driving changes in the animal industries. Our program also works to (9) provide career skills appropriate to job market needs, and (10) provide superior counseling for fulfilling individual student objectives.

Learner outcomes for each of these goals, for each of our courses, and other information defining the program can be found at our web site: www.ans.iastate.edu/.

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science, as well as complementary work toward admission to schools of law, medicine, and veterinary medicine which may be done while satisfying requirements for the degree bachelor of science degree (see Index). A minimum of 15 credits of animal science coursework must be

earned at Iowa State University. A combined bachelor of science and master of science in animal science is also offered.

The department offers a minor in Animal Science. The minor requires: 101, 114, 214, 214L, one course from: 216, 223, 224, 225, 226, 229, 235, 270, two courses from: 319, 331, 352, 360. A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science advisor.

The department offers a minor in Meat Science. The minor requires: 270, 360, 460; one course from: 489, 490C, six credits from: FS HN 311, 403, 405, 406, 410, 412, 419, 420, 471, Micro 407. Students majoring in Animal Science will NOT be allowed to count the 9 required credits (270, 360, 460) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science advisor.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; animal nutrition; meat science; animal physiology; and animal science. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agronomy; anatomy; microbiology; biochemistry; chemistry; economics; food science and human nutrition; genetics; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), nutritional sciences, and toxicology (see *Index*).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Courses primarily for undergraduate students

An S 101. Working with Animals. (1-3) Cr. 2. F.S. A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

An S 110. Orientation in Animal Science and ISU. Cr. R. F.S. Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

An S 114. Survey of the Animal Industry. (2-0) Cr. 2. F.S.SS. Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

An S 115. Horsemanship and Equitation. (0-4) Cr. 1. Repeatable. F.S. An S 115 can be taken for a maximum of three times for credit. Satisfactory-fail only.
A. Beginner Hunt Seat Equitation.
B. Beginner Jumping. Prereq: 115C, or able to walk, trot, and canter.
C. Intermediate Hunt Seat Equitation. Prereq: 115A or be able to walk, trot, and canter.
D. Intermediate Jumping. Prereq: 115C or jumped a course up to 18".
E. Beginner Western Horsemanship.
F. Intermediate Western Horsemanship. Prereq: 115 E or able to walk, jog and lope.

An S 211. Issues Facing Animal Science. (0-2) Cr. 1. F.S. *Prereq: 114, sophomore classification.* Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Satisfactory-fail only.

An S 214. Domestic Animal Physiology. (3-0) Cr. 3. F.S. *Prereq: Biol 212, Chem 163 or 177.* Introduction to anatomy and physiology of the neural, circulatory, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

An S 214L. Domestic Animal Anatomy and Physiology Lab. (0-2) Cr. 1. F.S. *Prereq: Concurrent enrollment in An S 214.* Basic anatomy of domestic animals.

An S 216. Equine Science. (2-2) Cr. 3. F. *Prereq: 101 or 114; one course in biology.* Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

An S 217. Equine Farm Practicum. (2-2) Cr. 2. F. *Prereq: Student majoring in Animal Science, An S 115 or riding experience, An S 216 or concurrent.* Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, preparing horses for sale, marketing techniques and web design.

An S 223. Poultry Science. (2-2) Cr. 3. F.S. *Prereq: 101, 114.* Introduction to principles, practices and decisions necessary when raising poultry through their production cycle.

An S 224. Companion Animal Science. (2-2) Cr. 3. S. *Prereq: Course in biology.* Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

An S 225. Swine Science. (2-2) Cr. 3. F.S. *Prereq: 101, 114.* Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle.

An S 226. Beef Cattle Science. (2-2) Cr. 3. F.S. *Prereq: 101, 114.* Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

An S 229. Sheep Science. (2-2) Cr. 3. F.S. *Prereq: 101, 114.* Introduction to principles, practices and decisions necessary when raising sheep through the vertically integrated production cycle.

An S 235. Dairy Cattle Science. (2-2) Cr. 3. F. *Prereq: 101, 114.* Introduction to principles, practices and decisions necessary when raising dairy cattle through the vertically integrated production cycle.

An S 270. Foods of Animal Origin. (2-2) Cr. 3. F. *Prereq: Biol 212, Chem 163 or 177.* Principles, practices and issues impacting the production, processing and preservation of safe, wholesome, nutritious, and palatable meat, dairy, and egg products. Product evaluation, classification, value, and utilization.

An S 305. Livestock Evaluation. (0-6) Cr. 3. F. *Prereq: Junior classification; An S 270 recommended.* Fall semester leads to 475A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions.

An S 306. Equine Evaluation. (0-6) Cr. 3. S. *Prereq: sophomore classification or permission of instructor.* Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills are practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed.

An S 311. Career Preparation in Animal Science. (0-2) Cr. 1. F.S. *Prereq: Junior classification in An S.* Life skill development emphasized in the context of career preparation. Assist students with career goal clarification, interview skills, resume preparation. Internship development, job shadowing, and exploration of career option. Satisfactory-fail only.

An S 316. Training the Horse. (0-6) Cr. 3. F. *Prereq: 115, or ability to walk, trot and canter.* Modifying the behavior of the horse for performance objectives through bitting, longeing, saddling, and riding.

An S 319. Animal Nutrition. (2-2) Cr. 3. F.S.SS. *Prereq: 214, course in organic chemistry or biochemistry.* Fundamentals of nutrition. Essential nutritive requirements of domestic animals, sources of nutrients, composition and identification of feeds, diet formulation and feeding recommendations. Nonmajor graduate credit.

An S 320. Livestock Feeding Program Design. (0-4) Cr. 2. F.S. *Prereq: 319.* Advanced diet formulation and feeding recommendations. Evaluation of alternate feeding programs and diets in the context of case studies.

An S 325. Biorenewable Systems. (Cross-listed with A E, Agron, BusAd, Econ, TSM). (3-0) Cr. 3. F. *Prereq: Econ 101, Chem 155 or higher, Math 140 or higher.* Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

An S 331. Domestic Animal Reproduction. (3-0) Cr. 3. F.S. *Prereq: Course in physiology.* Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes. Nonmajor graduate credit.

An S 332. Laboratory Methods in Animal Reproduction. (0-4) Cr. 2. F.S. *Prereq: Credit or enrollment in 331.* Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of artificial insemination in farm animals; and selected laboratory exercises with written report.

An S 333. Embryo Transfer and Related Technologies. (2-0) Cr. 2. F.S. *Prereq: 331 or 332.* Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer. Nonmajor graduate credit.

An S 334. Embryo Transfer Laboratory. (0-3) Cr. 1. F. *Prereq: Credit or concurrent enrollment in An S 333; An S 332 or VDPAM 416; permission of instructor.* Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, and embryo sexing will be demonstrated and/or performed. Nonmajor graduate credit.

An S 335. Dairy Cattle Evaluation. (0-6) Cr. 3. S. *Prereq: Sophomore classification.* Evaluation of breeding animals for dairy herds. Comparative terminology, decision making, and presentation of oral reasons. Trips to dairy cattle farms. Livestock handling.

An S 336. Domestic Animal Behavior and Well-Being. (2-2) Cr. 3. F. *Prereq: One course in physiology.* Principles of behavior relative to animal care, management and environmental design to ensure animal well-being. Examination of basic neural-endocrine mechanisms involved in the animal's response to its environment. Awareness of animal protection, law and legislation. Methods to objectively assess animal well-being.

An S 337. Lactation. (2-0) Cr. 2. S. *Prereq: 214.* The structure, development and evolution of the mammary gland. Mammary metabolism, milk synthesis; neural and endocrine regulation of mammary function. Immune function and health of the mammary gland.

An S 345. Growth and Development of Domestic Animals. (3-0) Cr. 3. S. *Prereq: An S 214; Biol 313 or Gen 320.* Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

An S 352. Genetic Improvement of Domestic Animals. (2-2) Cr. 3. F.S. *Prereq: One course in statistics, Biol 211, course in genetics.* Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation. Nonmajor graduate credit.

An S 353. Animal Breeding Programs Design. (0-4) Cr. 2. S. *Prereq: 352.* Evaluation of alternate breeding programs and genetic improvement techniques in the context of case study. Experiential and cooperative learning techniques employed. Nonmajor graduate credit.

An S 360. Fresh Meats. (2-2) Cr. 3. F. *Prereq: 270; a course in organic or biochemistry.* Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat. Nonmajor graduate credit.

An S 399. Animal Science Internship. Cr. arr. Repeatable. F.S.SS.

A. Graded Internship Experience. Cr. 2 to 6. Prereq: Permission of the instructor. Learning experience focused on professional development for a career related to animal science. Journal, presentation, and creative component.
B. Supervised Internship Experience. Cr.
R. Prereq: Permission of internship coordinator. Supervised learning activity consisting of work period in production agriculture or the agriculture-related industry.

An S 411. Addressing Issues in Animal Science. (0-2) Cr. 1. F.S. *Prereq: Senior classification in An S.* Life skill development emphasized in the context of exploring one's perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected.

An S 415. Equine Systems Management. (2-2) Cr. 3. S. *Prereq: 216, 319, 331.* Application of advanced horse management - nutrition, reproduction, exercise physiology and business. Computer-aided management. Explore topics of current concern in the horse industry. Computer aided study. Nonmajor graduate credit.

An S 417. Equine Reproductive Management. (2-2) Cr. 3. S. *Prereq: 216, 331, 415 or concurrent and permission of instructor.* Practical application of managing a breeding farm including servicing the mare, handling stallions, breeding problems, foaling mares, and marketing techniques.

An S 419. Advanced Animal Nutrition. (2-0) Cr. 2. F. *Prereq: 214, 319.* Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition. Nonmajor graduate credit.

An S 423. Poultry Systems Management. (2-2) Cr. 3. F. *Prereq: 223, 319, 331, 352.* Decisions facing the administrator of a poultry enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the poultry enterprise. Computer aided study. Nonmajor graduate credit.

An S 424. Companion Animal Systems Management. (2-2) Cr. 3. S. *Prereq: 224, 319, 331, 352.* Decisions facing the administrator of a companion animal enterprise. Financial and business goal identification, problem clarification, and resource allocation to manage the companion animal system. Nonmajor graduate credit.

An S 425. Swine Systems Management. (2-2) Cr. 3. F.S. *Prereq: 225, 270, 319, 331, 352; Econ 330 or equivalent recommended.* Decisions facing the administrator of a swine enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the swine enterprise. Computer aided study. Nonmajor graduate credit.

An S 426. Beef Cattle Systems Management. (2-2) Cr. 3. F.S. *Prereq: 226, 270, 319, 331, 352; Econ 330 or equivalent recommended.* Decisions facing the administrator of a beef cow-calf or feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise. Computer aided study. Nonmajor graduate credit.

An S 429. Sheep Systems Management. (2-2) Cr. 3. S. *Prereq: 229, 319, 331, 352; Agron 334 recommended; Econ 330 or equivalent recommended.* Decisions facing the administrator of a sheep enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the sheep enterprise. Computer aided study. Nonmajor graduate credit.

An S 434. Dairy Systems Management. (2-2) Cr. 3. F.S. *Prereq: 235, 319, 331, 337, 352; Econ 330 or equivalent recommended.* Decisions facing the administrator of a dairy enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the dairy enterprise. Computer aided study. Nonmajor graduate credit.

An S 435. Applied Dairy Farm Evaluation. (2-2) Cr. 3. S. *Prereq: An S 434; Econ 330.* Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications. Nonmajor graduate credit.

An S 460. Processed Meats. (Dual-listed with 560). (2-2) Cr. 3. S. *Prereq: 270.* Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausages products. Nonmajor graduate credit.

An S 475. Intercollegiate Judging Training and Competition. (0-4) Cr. arr. Repeatable. F.S. *Prereq: permission of instructor.* Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.
A. Meat Animals
B. Dairy Cattle
C. Meats
D. Meat Animal Evaluation.
E. Horses
F. Management Systems

An S 480. Animal Industry Leadership Fellows. Cr. 1. Repeatable. F.S. *Prereq: A. An S 226; permission of instructor C. An S 225; permission of instructor.* Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Satisfactory-fail only.
A. Beef
C. Pork

An S 489. Issues in Food Safety. (Cross-listed with FS HN, HRI, VDPAM). (1-0) Cr. 1. Alt. S., offered 2010. *Prereq: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 or 420; FS HN 403.* Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

An S 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of the instructor.* Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.
A. Animal Science
B. Dairy Science
C. Meat Science
D. Companion Animal Science
E. Equine Science
G. Poultry Science
H. Honors
I. Entrepreneurship

An S 493. Workshop in Animal Science. Cr. arr. Repeatable. *Prereq: Permission of instructor.* Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry. Nonmajor graduate credit.

An S 495. Agricultural Travel Course Preparation. Cr. R. Repeatable. F.S. *Prereq: Permission of instructor.* Limited enrollment. Students enrolled in this course will also register for Agron 495 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

An S 496. Agricultural Travel Course. Cr. arr. Repeatable. *Prereq: Permission of instructor, 30 college credits.* Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.
A. International tour
B. Domestic tour

An S 497. Undergraduate Teaching Experiences in Animal Science. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

An S 500. Computer Techniques for Biological Research. (2-0) Cr. 1. F. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.
A. (1st half of semester) UNIX and SAS
B. (2nd half of semester) Problem solving using matrix algebra

An S 501. Survey of Animal Disciplines. (1-0) Cr. 1. F. Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Satisfactory-fail only.

An S 503. Seminar in Animal Production. (1-0) Cr. 1. Repeatable. F. *Prereq: Permission of instructor.* Discussion and evaluation of current topics in animal production and management.

An S 511. Applied Ruminant Nutrition. (2-0) Cr. 2. *Prereq: 319.* Procedures and theories in beef, dairy, and sheep nutrition. Feeding programs and requirements for lactation, growth, and reproduction. Designed for master of agriculture program.

An S 515. Integrated Crop and Livestock Production Systems. (Cross-listed with A E, Agron, SusAg). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: SusAg 509.* Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

An S 518. Digestive Physiology and Metabolism of Non Ruminants. (Cross-listed with NutrS). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: An S 419 or NutrS 501.* Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

An S 520. Digestive Physiology and Metabolism of Ruminants. (Cross-listed with NutrS). (2-2) Cr. 3. Alt. S., offered 2010. *Prereq: An S 419 or NutrS 501.* Digestive physiology and nutrient metabolism in ruminant and preruminant animals.

An S 533. Physiology and Endocrinology of Animal Reproduction. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: General physiology course.* Development of structure and function of the reproductive system. Physiologic and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, parturition, interaction of environment, thyroid and adrenal function, and nutrition with these processes.

An S 536. Perinatology. (2-0) Cr. 2. S. *Prereq: One course in physiology; one course in biochemistry.* Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.

An S 537. Topics in Farm Animal Environmental Physiology, Behavior, Stress, and Welfare. (3-0) Cr. 3. Repeatable. F.S. *Prereq: permission of instructor; M.S. or Ph.D. student.* Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

A. Animal rights and Philosophies
B. Brain mechanisms of stress
C. Measuring behavior and welfare
D. Environmental stressors
E. Stress and the immune system
F. Other related topics

An S 540. Livestock Immunogenetics. (Cross-listed with Micro, V MPM). (2-0) Cr. 2. Alt. S., offered 2011. *Prereq: An S 561 or Micro 575 or V MPM 520.* Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

An S 549. Advanced Vertebrate Physiology I. (Cross-listed with B M S, Kin). (3-0) Cr. 3. F. *Prereq: Biol 335; credit or enrollment in BBMB 404 or 420.* Neurophysiology, sensory systems, muscle, neuroendocrinology, endocrinology.

An S 552. Advanced Vertebrate Physiology II. (Cross-listed with B M S, Kin, NutrS). (3-0) Cr. 3. S. *Prereq: Biol 335; credit or enrollment in BBMB 404 or 420.* Cardiovascular, renal, respiratory, and digestive physiology.

An S 552L. Advanced Vertebrate Physiology Laboratory. (Cross-listed with BMS). (0-3) Cr. 1. *Prereq: Credit or enrollment in B M S 552.* Laboratory for cardiovascular, renal, respiratory, and digestive physiology.

An S 556. Current Topics in Genome Analysis. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: BBMB 405 or GDCB 510.* Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes. Survey of Statistical methods and computer programs for bioinformatics, linkage mapping, radiation hybrid mapping, and mapping quantitative trait loci.

An S 560. Processed Meats. (Dual-listed with 460). (2-2) Cr. 3. S. *Prereq: 270.* Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

An S 561. Population and Quantitative Genetics for Breeding. (Cross-listed with Agron). (4-0) Cr. 4. F. *Prereq: Stat 401.* Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.

An S 562. Methodologies for Population/Quantitative Genetics. (2-0) Cr. 2. S. *Prereq: 561, Stat 402.* Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.
A. Linear Models and Genetic Prediction.
B. Advanced Genetic Prediction and Paramater Estimation.

An S 565. Professional Practice in the Life Sciences. (Cross-listed with PI P, Agron, BCB, Hort, Micro, V MPM). Cr. arr. S. *Prereq: Graduate classification.* Professional discourse on the ethical and legal issues facing life science researchers. Offered in modular format; each module is four weeks.

A. Professional Practices in Research. (Cr. 1.0) Good scientific practices and professional ethics in the life sciences.
B. Intellectual Property and Industry Interactions. (Cr. 0.5) Ethical and legal issues facing life scientists involved in research interactions with industry.

An S 570. Advanced Meat Science and Applied Muscle Biology. (2-2) Cr. 3. S. *Prereq: 470.* Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. Oral research reports and a research proposal.

An S 571. Advanced Meat Processing Principles and Technology. (2-2) Cr. 3. Alt. F., offered 2010. *Prereq: An S 470 or 570.* Physical/chemical relationships during processing. Effects of modern technology, nonmeat additives and preservation techniques on quality and safety of processed meat. Laboratory demonstration of principles and technology.

An S 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

A. Animal Breeding
B. Animal Nutrition
C. Meat Animal Production
D. Dairy Production
E. Meat Science
F. Physiology of Reproduction
G. Muscle Biology
H. Poultry Nutrition
I. Poultry Products
J. Experimental Surgery
K. Professional Topics
L. Teaching
M. Molecular Biology
N. Ethology

An S 599. Creative Component. Cr. arr. F.S.SS. *Prereq: Nonthesis M.S.* A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.
A. Animal Breeding and Genetics
B. Animal Nutrition
C. Animal Physiology
D. Animal Science
E. Meat Science

Courses for graduate students

An S 603. Seminar in Animal Nutrition. (1-0) Cr. 1. Repeatable. F.S. *Prereq: Permission of instructor.* Discussion of current literature; preparation and submission of abstracts.

An S 619. Advanced Nutrition and Metabolism - Protein. (Cross-listed with NutrS). (2-0) Cr. 2. F. *Prereq: BBMB 405.* Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.

An S 620. Advanced Nutrition and Metabolism - Energy. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: BBMB 405.* Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research.

An S 633. Seminar in Animal Reproduction. (1-0) Cr. 1. Repeatable. F. *Prereq: Permission of instructor.* Discussion of current literature and preparation of reports on selected topics concerning physiology of reproduction.

An S 652. Animal Breeding Strategies. (2-0) Cr. 2. *Prereq: An S 561.* Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, cross-breeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.
A. Breeding Goals and Response to Selection (S.)
B. Design and Evaluation of Animal Breeding Programs (Alt. S., offered 2011)

An S 653. Applied Animal Breeding Strategies. (2-0) Cr. 2. F. *Prereq: 561 recommended.* Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company to define a class project.
A. Swine and Poultry (Alt. F., offered 2010)
B. Beef and Dairy (Alt. F., offered 2009)

An S 655. Advanced Computational Methods in Animal Breeding and Genetics. (3-1) Cr. 2. Alt. F., offered 2009. *Prereq: 500, 562, Com S 207.* Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd

half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.
A. Computational Strategies for Predicting Breeding Values
B. Computational Strategies for Genetic Parameter Estimation

An S 656. Statistical Methods for Mapping Quantitative Trait Loci. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 562, Stat 447.* Statistical methods for mapping quantitative trait loci in out-bred populations. Methods based on modeling covariances between relatives. Likelihood based methods using half-sib and full-sib families and extended pedigrees. Bayesian methods applied.

An S 658. Seminar in Animal Breeding and Genetics. (1-0) Cr. 1. Repeatable. F.S. Presentation of current research related to animal breeding and genetics.

An S 670. Molecular Biology of Muscle. (Cross-listed with BBMB). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: BBMB 405, 420, or 502.* Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

An S 684. Seminar in Meat Science. (1-0) Cr. 1. Repeatable. S. *Prereq: Permission of instructor.* Discussion and evaluation of current topics in research publications in meat science.

An S 685. Seminar in Muscle Biology. (1-0) Cr. 1. Repeatable. S. *Prereq: Permission of instructor.* Reports and discussion of recent literature and current investigations.

An S 695. Seminar in Animal Science. (1-0) Cr. 1. Repeatable. S. Reports and discussion of current issues and research in animal science. One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Satisfactory-fail only.

An S 699. Research. Cr. arr. Repeatable.
A. Animal Breeding
B. Animal Nutrition
C. Meat Animal Production
D. Dairy Production
E. Meat Science F. Physiology of Reproduction
G. Muscle Biology
H. Poultry Nutrition
I. Poultry Products
J. Animal Ethology

Anthropology

http://www.Anthr.iastate.edu/

R. Paul Lasley, Chair of Department

Professors: Lasley, Whiteford

Professors (Emeritus): Bower, Butler, Gradwohl, Huang

Associate Professors: Coinman, Ilahiane, Pruetz

Associate Professors (Emeritus): Wolff

Assistant Professors: Arndt, Dusselier, Hill, Moutsatsos, Viatori

Lecturers: Folinsbee, Johnsen

Undergraduate Study

An undergraduate major in Anthropology can Serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology graduates develop a well-rounded professional education in four fields of anthropology: cultural anthropology, linguistic anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and social relations, human biology and evolution, languages, music, art, architecture, and through the study of past human communities. Graduates learn the important historical and contemporary issues of our subdisciplines, and they learn what it means to be a "modern" Anthropologist and a citizen in an international and global community. Graduates develop an appreciation of the value of cultural diversity at the local, national and international level. They acquire a particular holistic vision that requires using a repertoire of methods in order to forge a deeper understanding of cultural contexts, both past and present. Undergraduate students may obtain experience in archaeological, ethnological and biological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Groups I, II, and/or IV. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Group III.

Undergraduate students with majors in anthropology are required to take the following anthropology core courses: 306, 307, 308, 309 and 450. One course in statistics is required.

Undergraduates majoring in anthropology are required to have a minor or a second major. A minor usually consists of 15 credits minimum. A minor in anthropology consists of at least 15 credits and must include 306 or 309 and 307 or 308, and at least 3 other credits in courses numbered 300 or above.

Communication Proficiency requirement: The department requires that a student earn a grade of C or better in Engl 250 and either English 302 or 309 or 314.

The principal subdisciplines of anthropology are represented by the following:

1. General cultural anthropology and ethnology: 201, 230, 250, 257, 306, 313, 322, 323, 325, 326, 327, 335, 340, 411, 412, 418, 431, 432, 434B, 436, 439, 444, 450, 451B, 490B, 491.

2. Archaeology: 202, 308, 315, 321, 337, 414, 416, 420, 428, 429, 434A, 450, 451A, 427I, 490A.

3. Linguistic Anthropology: 309, 451D, 490D.

4. Biological Anthropology: 202, 307, 319, 424, 434C, 438, 445, 451C, 490C.

Graduate Study

The department offers work for the degree master of arts with a major in anthropology. Graduate courses are offered in the areas of biological anthropology, archaeology, cultural anthropology, linguistic anthropology, history and theory, and methodology. Competence in one foreign language and in statistics must be demonstrated. A thesis, generally based on original fieldwork, is required.

Courses primarily for undergraduate students

Anthr 201. Introduction to Cultural Anthropology. (3-0) Cr. 3. F.S.SS. Comparative study of culture as key to understanding human behaviors in different Societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.

Anthr 202. Introduction to Biological Anthropology and Archaeology. (3-0) Cr. 3. F.S. Human biological and cultural evolution; survey of the evidence from fossil forms and archaeology, as well as living primates and traditional cultures; introduction to methods of study in archaeology and biological anthropology.

Anthr 230. Globalization and the Human Condition. (3-0) Cr. 3. F.S. An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific.

Anthr 250. Contemporary Muslim Societies. (3-0) Cr. 3. S. An introduction to understanding key local and global issues facing Muslim Society. Focus on cultural, social, political, religious, and ecological forces shaping contemporary Muslim Societies and linkages with the non-Muslim world.

Anthr 306. Cultural Anthropology. (2-2) Cr. 3. S. *Prereq: 201.* Survey of the major theoretical, methodological and empirical foundations of cultural anthropology. Participatory lab: focus on ethnographic methods through individual research projects.

Anthr 307. Biological Anthropology. (2-2) Cr. 3. S. *Prereq: 202.* Human evolution as known from fossil evidence, comparative primate studies, and genetic variations in living populations. Laboratory-tutorial sessions include study and discussion of human osteology, fossil hominids, simple Mendelian traits, and bio-ethics in applied biological anthropology.

Anthr 308. Archaeology. (2-2) Cr. 3. F. *Prereq: 202.* Methods and techniques for the recovery and interpretation of archaeological evidence, its role in reconstructing human behavior and past environments. Laboratory sessions include experience in the interpretation of archaeological evidence, the use of classification systems, and prehistoric technologies such as ceramics and stone tools. Field trips.

Anthr 309. Linguistic Anthropology. (Cross-listed with Ling). (2-2) Cr. 3. F. *Prereq: 201.* Language as a human attribute; language versus animal communication; human communication in cultural context; paralanguage, kinesics, proxemics, artifacts as communication; language and culture; cross-cultural Sociolinguistics; ethnoscience; and language policies. Participatory lab: focus on analysis of a non-Western language and communication system.

Anthr 313. The Family and Kinship in Cross-Cultural Perspective. (Dual-listed with 513). (3-0) Cr. 3. S. *Prereq: 201 recommended.* Comparative and historical overview of family, marriage and kinship crossculturally; discussion of differences in the structure, cycle, and functioning of family and kin relations through ethnographic readings, including Euro-American examples; current critical and theoretical issues in kinship studies, especially integrating work on gender, sexuality and representation.

Anthr 315. Archaeology of North America. (Dual-listed with 515). (Cross-listed with Am In). (3-0) Cr. 3. S. *Prereq: 202 or 308.* Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Anthr 319. Skeletal Biology. (Dual-listed with 519). (2-2) Cr. 3. F. *Prereq: 307 or college level biology.* Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.

Anthr 321. World Prehistory. (Dual-listed with 521). (3-0) Cr. 3. S. *Prereq: 202 recommended.* An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past Societies.

Anthr 322. Peoples and Cultures of Native North America. (Dual-listed with 522). (Cross-listed with Am In). (3-0) Cr. 3. F.SS. *Prereq: 201 or Am In 210.* Origin, distribution, and traditional life of native peoples of North America. Survey of culture areas; ecology and subsistence, language, kinship, life cycle, political, economic, and religious systems; impact of European contact.

Anthr 323. Topics in Latin American Anthropology. (Dual-listed with 523). (Cross-listed with Am In). (3-0) Cr. 3. Repeatable. S. *Prereq: Anthr 201 or 306 recommended.* Exploration of contemporary Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key Sociocultural issues in Latin America. Topics vary each time offered.
A. Violence and Memory
B. Social movements and Democracy
C. Race, Class and Gender
D. Regional Focus

Anthr 325. Peoples and Cultures of Africa. (Dual-listed with 525). (Cross-listed with Af Am). (3-0) Cr. 3. S. *Prereq: 201 or 306 recommended.* Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

Anthr 335. Peoples and Cultures of the Middle East. (Dual-listed with 535). (3-0) Cr. 3. F. *Prereq: 201 or 306 recommended.* Anthropological approaches to the study of Middle East cultures. Survey of major culture areas, discussion of economic, political, and social and religious issues and systems. Examination of contemporary social movements.

Anthr 337. Andean Archaeology. (Dual-listed with 537). (3-0) Cr. 3. F. *Prereq: 202 or 321 recommended.* Survey of prehistoric Andean cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economic, religious, and political organization, the rich material culture recovered through archaeological records; and the use of ethnohistoric texts and modern ethnographies to reconstruct the prehistory of Andean Societies.

Anthr 340. Magic, Witchcraft, and Religion. (Dual-listed with 540). (Cross-listed with Relig). (3-0) Cr. 3. S. *Prereq: 201 or 306.* Origin and development of indigenous magico-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and Sociocultural change, including acculturation, nativistic, and revitalization movements.

Anthr 350. Primate Behavior. (Dual-listed with 550). (2-2) Cr. 3. F.S.SS. *Prereq: Anthr 202 and/or basic biology course recommended.*. An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and prosimians; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

Anthr 411. Culture Change and Applied Anthropology. (Dual-listed with 511). (3-0) Cr. 3. F. *Prereq: 201 or 306.* Theoretical and practical considerations of human cultural development. Examination of theories of cultural change, culture contact and acculturation. Dynamics of directed change in contemporary world cultures. Principles, theories, and ethics of international development projects from a sociocultural perspective.

Anthr 412. Psychological Anthropology. (Dual-listed with 512). (3-0) Cr. 3. F. *Prereq: 201 or 306.* Relationship of cultural, social and personality factors in human behavior. Cross-cultural comparisons of child rearing practices, cognitive development, mental health, deviancy, ethno-psychiatry, altered states of consciousness, and psychological dimensions of culture change.

Anthr 414. Southwestern Archaeology. (Dual-listed with 514). (3-0) Cr. 3. F. *Prereq: 308 or 315 or 321.* Prehistoric archaeology of the American Southwest, including the Paleo-indian and Archaic periods; the adoption of agriculture; the emergence of pueblo Societies; relationships with contemporary Southwest cultures.

Anthr 418. Global Culture, Consumption and Modernity. (Dual-listed with 518). (3-0) Cr. 3. F. *Prereq: Anthr 201 or 306 recommended.* Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.

Anthr 420. Cultural Continuity and Change in the Prairie-Plains. (Dual-listed with 520). (Cross-listed with Am In). (3-0) Cr. 3. F. *Prereq: 315 or 322.* Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indian groups through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Anthr 424. Forensic Anthropology. (Dual-listed with 524). (2-2) Cr. 3. S. *Prereq: 319.* Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

Anthr 427I. Archaeology. (Cross-listed with Ia LL). Cr. 4. SS. Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and excavation techniques. Nonmajor graduate credit.

Anthr 428. Topics in Archaeological Laboratory Methods and Techniques. (Dual-listed with 528). (2-2) Cr. 3. Repeatable. S. *Prereq: 308.* Laboratory processing, analysis, and interpretation of archaeological materials such as lithics, ceramics, and faunal remains. Laboratory sessions emphasize analytical techniques including classification, data acquisition and organization, and computer applications
A. Lithics
B. Ceramics
C. Faunal remains
D. General.

Anthr 429. Archaeological Field School. (Dual-listed with 529). Cr. arr. SS. *Prereq: 202 or 308.* Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

Anthr 431. Ethnographic Field School. (Dual-listed with 531). Cr. arr. SS. 4 or 6 weeks. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology, learning a variety of investigative research techniques commonly used in social sciences.

Anthr 432. Current Issues in Native North America. (Dual-listed with 532). (Cross-listed with Am In). (3-0) Cr. 3. S. *Prereq: 201 or 306; 322 or Am In 210 recommended.* Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal Status, the reservation system, treaty violations, Indian militancy, education and urbanization, self-determination, social impact of resource development, and other current concerns.

Anthr 434. Internship. Cr. arr. Repeatable. F.S.SS. *Prereq: Junior or senior standing.* Supervised practice in government agencies, museums, and business organizations. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy anthropology core courses for majors or for the anthropology minor. Satisfactory-fail only.
A. Archaeology
B. Cultural Anthropology
C. Biological Anthropology
D. Linguistic Anthropology

Anthr 436. Development Anthropology. (Dual-listed with 536). (3-0) Cr. 3. S. *Prereq: Anthr 201 or 306.* Historical and theoretical basis of the practices of development, applied and economic anthropology. Covers a wide range of topics such as the role of aid, institutions of development, indigenous knowledge, rural development projects, organization of production, migration, health and environment.

Anthr 438. Primate Evolutionary Ecology and Behavior. (Dual-listed with 538). Cr. 3. S. *Prereq: 202 or 307.* Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

Anthr 439. Medical Anthropology. (Dual-listed with 539). (3-0) Cr. 3. S. *Prereq: 201 or 202 or 306.* Study of human health in cultural and environmental context; comparison of health and disease patterns of western and non-western populations; healing systems; use of epidemiological models in understanding illness and disease etiologies cross-culturally; interrelationship between diet and culture.

Anthr 444. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 544). (Cross-listed with W S). (3-0) Cr. 3. S. *Prereq: Anthr 201; Anthr 306 recommended.* Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western Societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anthr 445. Biological Field School. (Dual-listed with 545). Cr. arr. SS. *Prereq: 202 or Biol 101.* Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

Anthr 450. Historical and Theoretical Approaches in Anthropology. (3-0) Cr. 3. F. *Prereq: 306.* Survey of the historical foundations of anthropology and its interrelated four sub-fields; key figures in 19th and 20th century anthropology with a focus on major theoretical contributions.

Anthr 451. Practicum in Anthropology. Cr. arr. Repeatable. F.S.SS. *Prereq: 201 or 202 or 308.* Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.
A. Archaeology
B. Cultural Anthropology
C. Biological Anthropology
D. Linguistic Anthropology

Anthr 482. Topics in Biological Anthropology. (Dual-listed with 582). (3-0) Cr. 3. Repeatable. F. *Prereq: Anthr 307.* In-depth study of current topics in biological Anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.
A. Paleoanthropology
B. Primate Cognition
C. Population Conservation
D. Population Genetics and Human Evolution

Anthr 490. Independent Study. Cr. arr. Repeatable. *Prereq: 9 credits in anthropology.* No more than 9 credits of Anthr 490 may be counted toward graduation.
A. Archaeology
B. Cultural Anthropology
C. Biological Anthropology
D. Linguistic Anthropology (Same as Ling 490D)

H. Honors
I. Undergraduate Independent Study (Same as Ia LL 490I)

Courses primarily for graduate students, open to qualified undergraduate students

Anthr 500. Language and Culture. (Cross-listed with Ling). (3-0) Cr. 3. S. *Prereq: Anthr 309 or 510.* Approaches to the study of the relationship between language structure, world view, and cognition; social and structural linguistic variation; cross-cultural aspects of verbal and non-verbal communication; linguistic change; contemporary applications of linguistic anthropology.

Anthr 503. Biological Anthropology. (3-0) Cr. 3. F. *Prereq: 307.* Survey of the history of biological anthropology, current developments and theoretical issues in evolution, human variation and adaptation, population studies, primates and primate behavior, and Paleoanthropology.

Anthr 509. Agroecosystems Analysis. (Cross-listed with Agron, Soc, SusAg). (3-4) Cr. 3. F. *Prereq: Senior or above classification.* Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (Agronomic, economic, ecologic, social, etc.) and scales of operation.

Anthr 510. Theoretical Dimensions of Cultural Anthropology. (3-0) Cr. 3. F. *Prereq: 6 credits in anthropology.* Survey of historical and current developments in topical and theoretical approaches to sociocultural anthropology. Examination and assessment of controversies; new research directions and theoretical approaches.

Anthr 511. Culture Change and Applied Anthropology. (Dual-listed with 411). (3-0) Cr. 3. F. *Prereq: 6 credits in anthropology, 201 or 306.* Theoretical and practical considerations of cultural development. Examination of theories, cultural change, culture contact and acculturation. Dynamics of directed change in contemporary world cultures. Principles, theories, and ethics of international development projects from a sociocultural perspective.

Anthr 512. Psychological Anthropology. (Dual-listed with 412). (3-0) Cr. 3. F. *Prereq: 201 or 306.* Relationship of cultural, social and personality factors in human behavior. Cross-cultural comparisons of child rearing practices, cognitive development, mental health, deviancy, ethno-psychiatry, altered states of consciousness, and psychological dimensions of culture change.

Anthr 513. The Family and Kinship in Cross-Cultural Perspective. (Dual-listed with 313). (3-0) Cr. 3. S. *Prereq: 6 credits in anthropology, 201 recommended.* Comparative and historical overview of family, marriage and kinship crossculturally; discussion of differences in the structure, cycle, and functioning of family and kin relations through ethnographic readings, including Euro-American examples; current critical and theoretical issues in kinship studies, especially integrating work on gender, sexuality and representation.

Anthr 514. Southwestern Archaeology. (Dual-listed with 414). (3-0) Cr. 3. F. *Prereq: 308 or 315 or 321.* Prehistoric archaeology of the American Southwest, including the Paleo-indian and Archaic periods; the adoption of agriculture; the emergence of pueblo Societies; relationships with contemporary Southwest cultures.

Anthr 515. Archaeology of North America. (Dual-listed with 315). (3-0) Cr. 3. S. *Prereq: 202 or 308.* Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Anthr 518. Global Culture, Consumption and Modernity. (Dual-listed with 418). (3-0) Cr. 3. F. *Prereq: Anthr 201 or 306 recommended.* Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.

Anthr 519. Skeletal Biology. (Dual-listed with 319). (2-2) Cr. 3. F. *Prereq: 307 or college level biology recommended.* Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human Skeleton. Applications to forensic anthropology, paeopathology, and bioarchaeology are introduced.

Anthr 520. Cultural Continuity and Change in the Prairie-Plains. (Dual-listed with 420). (3-0) Cr. 3. F. *Prereq: 315 or 322.* Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indian groups through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Anthr 521. World Prehistory. (Dual-listed with 321). (3-0) Cr. 3. S. *Prereq: 202 recommended.* An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past Societies.

Anthr 522. Peoples and Cultures of Native North America. (Dual-listed with 322). (3-0) Cr. 3. F. *Prereq: 201 or Am In 210.* Origin, distribution, and traditional life of native peoples of North America. Survey of culture areas; ecology and subsistence, language, kinship, life cycle; political, economic and religious systems; impact of European contact.

Anthr 523. Topics in Latin American Anthropology. (Dual-listed with 323). (3-0) Cr. 3. Repeatable. S. *Prereq: 6 credits in anthropology, 201 or 306 recommended.* Exploration of contemporary Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key Sociocultural issues in Latin America. Topics vary each time offered.
A. Violence and Memory
B. Social Movements and Democracy
C. Race, Class and Gender
D. Regional Focus

Anthr 524. Forensic Anthropology. (Dual-listed with 424). (3-0) Cr. 3. S. *Prereq: 319.* Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

Anthr 525. Peoples and Cultures of Africa. (Dual-listed with 325). (3-0) Cr. 3. S. *Prereq: 201 or 306 recommended.* Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

Anthr 528. Topics in Archaeological Laboratory Methods and Techniques. (Dual-listed with 428). (2-2) Cr. 3. Repeatable. S. *Prereq: 308.* Laboratory processing, analysis, and interpretation of archaeological materials such as lithics, ceramics, and faunal remains. Laboratory sessions emphasize analytical techniques including classification, data acquisition organization, and computer applications
A. Lithics
B. Ceramics
C. Faunal remains
D. General.

Anthr 529. Archaeological Field School. (Dual-listed with 429). Cr. arr. SS. *Prereq: 202 or 308.* Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

Anthr 530. Ethnographic Field Methods. Cr. 3. F. *Prereq: 6 credits in anthropology, permission of instructor.* Field training experience in ethnography. Problems emphasizing field studies in the contemporary Societies of the world. Focus on techniques of data gathering and analysis.

Anthr 531. Ethnographic Field School. (Dual-listed with 431). Cr. arr. SS. 4 or 6 weeks. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology, learning a variety of investigative research techniques commonly used in social sciences.

Anthr 532. Current Issues in Native North America. (Dual-listed with 432). (3-0) Cr. 3. S. *Prereq: 6 credits in anthropology, 201 or 306; 322 or Am In 210 recommended.* Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal Status, the reservation system, treaty violations, Indian militancy, education and urbanization, self-determination, social impact of resource development, and other current concerns.

Anthr 535. Peoples and Cultures of the Middle East. (Dual-listed with 335). (3-0) Cr. 3. F. *Prereq: 201 or 306 recommended.* Anthropological approaches to the study of Middle East cultures. Survey of major culture areas. Discussion of economic, political, and social and religious issues and systems. Examination of contemporary social movements.

Anthr 536. Development Anthropology. (Dual-listed with 436). (3-0) Cr. 3. S. *Prereq: Anthr 201 or 306.* Historical and theoretical basis of the practices of development, applied and economic anthropology. Covers a wide range of topics such as the role of aid, institutions of development, indigenous knowledge, rural development projects, organization of production, migration, health and environment.

Anthr 537. Andean Archaeology. (Dual-listed with 337). (3-0) Cr. 3. F. *Prereq: 202 or 321 recommended.* Survey of prehistoric Andean cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economics, religious, and political organization, the rich material culture recovered through archaeological records; and the use of ethnohistoric texts and modern ethnographies to reconstruct the prehistory of Andean societies.

Anthr 538. Primate Evolutionary Ecology and Behavior. (Dual-listed with 438). (3-0) Cr. 3. S. *Prereq: 202 or 307.* Primate behavior and ecology in evolutionary perspective; biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

Anthr 539. Medical Anthropology. (Dual-listed with 439). (3-0) Cr. 3. S. *Prereq: 6 credits in anthropology, 201 or 202 or 306 recommended.* Study of human health in cultural and environmental context; comparison of health and disease patterns of western and non-western populations; healing systems; use of epidemiological models in understanding illness and disease etiologies cross-culturally; interrelationship between diet and culture.

Anthr 540. Magic, Witchcraft, and Religion. (Dual-listed with 340). (3-0) Cr. 3. S. *Prereq: 6 credits in anthropology, 201 or 306 recommended.* Origin and development of indigenous magico-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and Socio-cultural change, including acculturation, nativistic, and revitalization movements.

Anthr 544. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 444). (Cross-listed with W S). (3-0) Cr. 3. S. *Prereq: 201; 306 recommended.* Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western Societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anthr 545. Biological Field School. (Dual-listed with 445). Cr. arr. SS. *Prereq: Anthr 202 or Biol 101 and permission of instructor.* Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

Anthr 550. Primate Behavior. (Dual-listed with 350). (2-2) Cr. 3. F.S.SS. *Prereq: Anthr 202 and/or basic biology course recommended.*. An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and prosimians; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

Anthr 555. Seminar in Archaeology. (3-0) Cr. 3. S. *Prereq: 308 or 429.* Examination of the history of Anthropological archaeology and current issues and debates concerning methods, theories and the ethics of modern archaeology.

Anthr 582. Topics in Biological Anthropology. (Dual-listed with 482). (3-0) Cr. 3. Repeatable. F. *Prereq: Anthr 307.* In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.
A. Paleoanthropology
B. Primate Cognition
C. Population Conservation
D. Population Genetics and Human Evolution

Anthr 590. Graduate Independent Study. (Cross-listed with Ia LL, A Ecl, EEOB). Cr. arr. Repeatable. SS. *Prereq: Graduate classification and permission of instructor.*
I. Iowa Lakeside Laboratory (Same as Ia LL 590I)

Anthr 591. Orientation to Anthropology. (1-0) Cr. 1. F. *Prereq: Admission to the Anthropology Graduate Program.* Introduction to the Anthropology program, including the requirements for successful degree completion, department administrative procedures, ethics in anthropology and current trends in the four subfields of anthropology. Required of graduate students. Satisfactory-fail only.

Courses for graduate students

Anthr 610. Foundations of Sustainable Agriculture. (Cross-listed with Agron, SusAg, Soc, A E). (3-0) Cr. 3. F. *Prereq: Graduate classification, permission of instructor.* Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging systems of agriculture in terms of core concepts of sustainability and their theoretical contexts.

Anthr 699. Research. Cr. arr. Repeatable.
I. Iowa Lakeside Laboratory (Same as Ia LL 699I.)

Apparel, Educational Studies, and Hospitality Management

Robert Bosselman, Chair of Department

Distinguished Professors (Emeritus): Fanslow, Moyer, Winakor

University Professors (Emeritus): Farrell-Beck

Professors: Bosselman, Damhorst, Fiore, Kadolph

Professors (Emeritus): Anderson, Beavers, Brun, Burnet, Cowan, Crabtree, Gilmore, Smith, Stone, Williams

Associate Professors: Baltzer, Hausafus, Niehm, Parsons

Associate Professors (Emeritus): Amos, Brackelsberg, Brown, Ebert, Huss, Kundel, Kunz, Walsh

Associate Professors (Adjunct): Strohbehn

Assistant Professors: Barker, Hurst, Karpova, Keino, Y. Lee, Marcketti, Rajagopal, Wohlsdorf-Arendt, Zheng

Assistant Professors (Adjunct): Glock

Instructors (Adjunct): Fratzke

Lecturers: Ackerman, Burger, Christensen, Fiihr, Fitzpatrick, Kramer, M. Lee, Sanger, Trost, Wirth, Wise

The department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, event planning, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student's major area of study whether it be Apparel Merchandising, Design, and Production; Family and Consumer Sciences Education; Hotel and Institutional Management; agriculture, business, design education, engineering, liberal arts and sciences or minor areas of study including entrepreneurial studies, design studies, or international studies.

Students majoring in Apparel Merchandising, Design, and Production are required to earn a C- or better in all AESHM courses applied to the degree, including transfer courses.

For additional courses of interest, see the listings for Family and Consumer Sciences Education and Studies; Hotel, Restaurant, and Institution Management; and Textiles and Clothing.

Courses primarily for undergraduate students

AESHM 111. Professional Development for AESHM. (2-2) Cr. 3. F.S. Career exploration, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components. Some WWW lectures.

AESHM 271. Public Relations and Event Management I. (2-2) Cr. arr. Repeatable. S. *Prereq: Permission of instructor.* Overview of public relations and event management in the apparel and hospitality industries. Production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Course must be taken for 3 credits first time, can be repeated for 1 credit.

AESHM 275. Merchandising. (3-0) Cr. 3. F.S. *Prereq: 3 credits in Math*. Principles of merchandising as applied to human science-related businesses, such as retailing, service, hospitality, and manufacturing. Study of planning, development, and presentation of apparel- and hospitality-related product lines.

AESHM 287. Principles of Management in Human Sciences. (3-0) Cr. 3. F.S. Introduction to management concepts and principles with application to the human Sciences organizations. Includes service quality management, professionalism, and social responsibility.

AESHM 311. Seminar on Careers and Internships. (1-0) Cr. 1. F.S. *Prereq: Sophomore classification. Good academic standing.* Internship and career planning, professional expectations and responsibilities. Resume development, cover letters, portfolio planning, interviewing techniques, and business etiquette.

AESHM 340. Hospitality and Apparel Marketing Strategies. (3-0) Cr. 3. F. *Prereq: Econ 101.* Application of marketing principles to the hospitality, apparel and retail industries. Emphasis on development of organizational strategies, marketing plans, service and social marketing principles within human sciences-related businesses.

AESHM 342. Aesthetics of Everyday Experience. (3-0) Cr. 3. F.S. Design principles, aesthetic concepts, and Philosophies applied to multi-sensory consumer environments. Influence of individual differences and cultural patterns on aesthetic preferences.

AESHM 379. Community Leadership: Examination of social Issues. (3-0) Cr. 3. F. Study of family and community social issues from diverse perspectives. Application of critical thinking and reflection to issues with a focus on leadership within the community.

AESHM 421. Developing Global Leadership: Maximizing Human Potential. (3-0) Cr. 3. S. Development of leadership in a global environment. Focus on the contributions of women in enhancing the well-being of others. Strategies for working with individuals, families and communities in other countries and cultures. Taking local action on global issues. Student participation in cultural activities.

AESHM 424. International Study Abroad Seminar. Cr. arr. Repeatable. F.S.SS. Orientation to study abroad program considering topics related to country and location; travel arrangements and preparation for study abroad; on-site fieldwork and academic experiences in an international setting.

AESHM 438. Human Resource Management. (3-0) Cr. 3. S. *Prereq: HRI 193, AESHM 275 or 287; junior classification.* Principles and practices of human resource management relevant to human Science-related organizations. Emphasis on the entry-level manager's role.

AESHM 471. Public Relations and Event Management II. (2-2) Cr. arr. Repeatable. S. *Prereq: Permission of instructor.* Advanced application of public relations and event management in the apparel and hospitality industries. Provide leadership and communicate direction for production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Course must be taken for 3 credits first time, can be repeated for 1 credit.

AESHM 474. Entrepreneurship in Human Sciences. (Dual-listed with 574). (3-0) Cr. 3. S. *Prereq: junior or senior Status.* Entrepreneurship concepts of innovation, creativity, opportunity assessment, business planning. Focus on human Sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Project applications include market research, feasibility analysis, and new business proposals.

AESHM 477. Multi-channel Retailing. (3-0) Cr. 3. F. *Prereq: 3 credits in marketing or AESHM 275 or 287.* Strategies used by retailers to market products through store formats, e-commerce, catalog, TV, mobile, direct sales. Emphasis on integration of e-commerce with other channels.

Courses primarily for graduate students, open to qualified undergraduate students

AESHM 545. Consumer Aesthetics and Retail Branding. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: One course in design elements and principles, psychology, consumer behavior, or marketing.* Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, design, environmental psychology, and marketing literature.

AESHM 574. Entrepreneurship in Human Sciences. (Dual-listed with 474). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: One course in marketing or permission of instructor.* Entrepreneurship concepts of innovation, creativity, opportunity assessment, business planning. Focus on human Sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Project applications include market research, feasibility analysis, and business proposals.

AESHM 577. E-Commerce for Apparel and Hospitality Companies. (3-0) Cr. 3. Alt. SS., offered 2011. *Prereq: Course in marketing or permission of instructor.* Technology and consumer trends, industry practices, and marketing strategies for e-commerce. Evaluation and development of apparel or hospitality

company websites. Theory application to development of multi-channel business strategies.

Architecture

www.arch.iastate.edu

Calvin Lewis, Chair of Department

Professors: Block, Chan, Engelbrecht, Lewis, Osterberg, Palermo, Schwennsen, Shao

Professors (Emeritus): Findlay, Heemstra, Kitzman, Mckeown, Mukerjea, Shank, Stone

Associate Professors: Alread, Bassler, Bermann, Cardinal-Pett, Ghandour, Horwitz, Leslie, Muecke, Naegele, Paxson, Squire

Associate Professor (Adjunct): Masterson

Assistant Professors: Call, Campbell, Maves, Passe, Sobiech-Munson, Zarecor

Assistant Professor (Collaborator): Schneider

Lecturers: Anderson, Fisher, Goche, Jackson, Julien, Kalaher, Lueth, Whitehead, Zhao

Undergraduate Study

The undergraduate program in architecture is a five-year curriculum leading to the bachelor of architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth year students.

The undergraduate curriculum includes one year of preprofessional coursework and four years of professional coursework. Admission to the professional degree program is based on the applicant's performance in the completed preprofessional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources.

Objectives of the Bachelor of Architecture program:
The Department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tempered; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in Society.

For students entering the professional program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software. See the *Undergraduate Academic Advising Handbook* in the departmental office or the departmental web pages for hardware and software specifications.

For a more complete undergraduate program description, see *College of Design, Curricula*.

Graduate Study

The Department of Architecture offers professional, post-professional and research-oriented degrees for graduate students. The M.Arch. I and M. Arch. II emphasize the relationship between professional education and research. The M.S.A.S. is for students with non-professional degrees who want to pursue graduate-level research on the built environment. All the programs encourage interdisciplinary work within the College of Design and across related fields within the university.

Objectives:
The graduate program assumes the following: the built environment is an active agent in a global ecosystem and the setting for most forms of cultural exchange; the built environment can make positive and negative contributions to the vitality of local and global communities; understanding the dynamics of social production, material consumption and cultural exchange is a prerequisite to meaningful architectural design. For the most part, the built environment is designed by people who do not consider the consequences of their actions broadly. Therefore, our program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts with a particular emphasis on the dynamics of the contemporary American Midwest. The domain of the architect's action is limited, but the range of information needed to make intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary collaboration and teamwork.

The M.Arch. I is an accredited first professional degree in architecture. Students with an undergraduate degree other than architecture enroll in a 100-credit, seven semester program. The curriculum starts with an intensive three-semester course sequence that places equal emphasis on architectural design, science and technology, and social and historical seminars on the built environment. The remaining four semesters have an open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a series of thematic and option studios, as well as various elective offerings. Students with a B.A. or B.S. in architecture or other affiliated design fields are considered for advanced standing based on a review of their academic record.

The M.Arch. II is a 30-credit post-professional degree in architecture for students with a B.Arch. or equivalent professional degree in architecture. The program is not subject to NAAB accreditation. The M.Arch. II program offers designers with a professional degree an opportunity to pursue advanced research in design. The program of study is expected to explore architectural design within interdisciplinary fields and requires completion of a creative component. As a precondition for acceptance, applicants are required to submit a statement of purpose that defines the research they want to pursue in architectural design. Upon admission, students partner with a faculty member to select courses from across the university to determine their program of study. A minimum of two semesters should be devoted to the program; due to teaching assistantship and research needs, students often take longer to finish.

The M.S.A.S. is a 30-credit interdisciplinary research degree in architectural studies. This degree is for students with bachelor degrees in various fields and interests in graduate-level research on the built environment. The M.S.A.S program is not subject to NAAB accreditation and is not intended, on its own, to lead to a career as a licensed architect. The program of study is expected to explore architecture within interdisciplinary fields and requires completion of a thesis project. As a precondition for acceptance, applicants are required to submit a thesis proposal. Upon admission, students partner with a faculty member to serve as a thesis adviser and to determine their program of study. A minimum of two semesters should be devoted to the program; due to teaching assistantship and research needs, students often take longer to finish. Areas of specialization include, but are not limited to: accessibility, architectural education, architectural history, building technology, energy and sustainability, environmental and social change, globalization and the built environment, historic preservation, housing, light and sound, politics and architecture and professional ethics.

Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch./M.C.R.P.) and the College of Business (M.Arch./M.B.A.).

Financial support in the form of teaching and research assistantships is available.

Contact the department office for specific curricula.

Courses primarily for undergraduate students

Arch 102. Pre-Architecture Design. (1-6) Cr. 4. F.S. Three-dimensional design and drawing, with emphasis on creative conceptualization, exploration of materials, and analytical thinking. Includes study of architectural precedents and exercises to develop ability to communicate about form and space.

Arch 132. Two-Dimensional Studio. (0-6) Cr. 2. F.S. *Prereq: Enrollment in the preprofessional program.* Introduction to free-hand drawing concepts and practices. Exploration of the sketch as a means of inquiry, conceptualization and representation of form and space. Exercises focus on acquiring proficiency in the perceptual and experiential aspects of drawing. Various media, subjects and environmental contexts.

Arch 182. An Introduction to Architecture. (3-0) Cr. 3. S. *Prereq: Open to non-majors.* Through the study of architects, buildings, and theories, an introduction to the discipline of architecture, presenting architectural process and architectural works as culturally grounded events and artifacts.

Arch 201. Architectural Design I. (1-15) Cr. 6. F. *Prereq: Completion of the preprofessional program and admission into the professional program.* Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

Arch 202. Architectural Design II. (1-15) Cr. 6. S. *Prereq: 201; Math 142; Phys 111.* Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban Spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in

groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.

Arch 221. History of Western Architecture I. (Cross-listed with Dsn S). (3-0) Cr. 3. F. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Ancient through Renaissance.

Arch 222. History of Western Architecture II. (Cross-listed with Dsn S). (3-0) Cr. 3. S. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.

Arch 230. Design Communications I. (2-2) Cr. 3. F. *Prereq: Admission to the professional program.* Investigations of various design media–including computer graphics and freehand drawing–and their applications to design, specifically to the course work in 201. Exercises to develop manual skill and perceptual sensitivity.

Arch 240. Materials and Assemblies I. (3-0) Cr. 3. F. *Prereq: Completion of the preprofessional program and admission into the professional program.* Introduction to common architectural materials, their physical properties, and integration into light construction subsystems. Model building codes, gravitational and climactic forces, and simplified methods of analysis for the preliminary design of building systems.

Arch 242. Architectural Structures I. (3-1) Cr. 3. S. *Prereq: 240; Math 142; Phys 111.* Structural performance and preliminary design of residential scale wood frame members and systems; principles of equilibrium and material behavior.

Arch 271. Human Behavior and Environmental Theory. (3-0) Cr. 3. F. *Prereq: Completion of the preprofessional program and admission into the professional program.* Exploration of theories that describe social structure and order and the manner in which individuals and Societies organize themselves and structure their environment.

Arch 301. Architectural Design III. (1-15) Cr. 6. F. *Prereq: 202.* Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

Arch 302. Architectural Design IV. (1-15) Cr. 6. S. *Prereq: 301 and minimum 2.0 GPA in previous studio courses.* Continuation of 301, examining housing in the urban Situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

Arch 310. Practical Experience. Cr. R. *Prereq: Permission of department chair.* Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

Arch 334. Computer Applications in Architecture. (2-2) Cr. 3. F.S.SS. *Prereq: 201; 230.* Current and potential applications of digital computers in architecture. Projects employing computer graphics and modeling methods. Awareness of programming languages related to applications.

Arch 335. Three-Dimensional Studio. (Cross-listed with ArtIS). (0-5) Cr. 2. Repeatable. F.S. This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

Arch 344. Architectural Structures II. (3-0) Cr. 3. F. *Prereq: 242.* Structural performance and preliminary design of low to medium rise steel frame members and systems, long span steel systems, and masonry walls and systems. Principles of equilibrium and material behavior.

Arch 346. Architectural Structures III. (3-0) Cr. 3. S. *Prereq: 344.* Structural performance and preliminary design of low- to medium- rise reinforced concrete and prestressed concrete members and systems. Wind and seismic lateral forces and the principles of equilibrium and material behavior.

Arch 351. Solar Home Design. (Cross-listed with Dsn S). (3-0) Cr. 3. S. *Prereq: 202.* Architectural design and technical analysis of residential structures with emphasis on energy construction and solar energy utilization.

Arch 357. Environmental Forces in Architecture. (3-0) Cr. 3. S. *Prereq: Completion of the preprofessional program and admission into the professional program; Math 142; Phys 111.* Introduction to environmental forces that describe the function of buildings in terms of human comfort and patterns of occupancy. Emphasis on analytical rules of thumb and calculation methods that contribute to design synthesis. A design process is developed utilizing building climatology, control of thermal, luminous, and acoustic environments.

Arch 401. Architectural Design V. (1-15) Cr. 6. F. *Prereq: 302.* A rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation and integration of contextual and historical considerations, as well as structural, environmental, and communication systems, in a comprehensive design proposal.

Arch 402. Architectural Design VI. (1-15) Cr. 6. S. *Prereq: 401 and minimum 2.0 GPA in previous studio courses.* An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option.

Arch 403. Architectural Design VII. (1-15) Cr. 6. F. *Prereq: 402.* Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. Dsn S 446/546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 404. Architectural Design VIII. (1-15) Cr. 6. S. *Prereq: 403.* Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. Dsn S 446/546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 420. Topics in American Architecture. (3-0) Cr. 3. Repeatable. F.S. *Prereq: Junior classification.* History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 420 may be applied to degree program. Nonmajor graduate credit.

Arch 422. Topics in Medieval Architecture. (3-0) Cr. 3. Repeatable. S. *Prereq: Junior classification.* History, theory, and principles of medieval architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 422 may be applied to degree program. Nonmajor graduate credit.

Arch 423. Topics in Renaissance to Mid-Eighteenth Century Architecture. (3-0) Cr. 3. Repeatable. S. *Prereq: Junior classification.* History, theory, and principles of renaissance to mid-eighteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 423 may be applied to degree program. Nonmajor graduate credit.

Arch 424. Topics in Nineteenth Century Architecture. (3-0) Cr. 3. Repeatable. F. *Prereq: Junior classification.* History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 424 may be applied to degree program. Nonmajor graduate credit.

Arch 425. Topics in Twentieth Century Architecture. (3-0) Cr. 3. Repeatable. F.S. *Prereq: Junior classification.* History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 425 may be applied to degree program. Nonmajor graduate credit.

Arch 426. Topics in Native American Architecture. (Cross-listed with Am In, Dsn S). (3-0) Cr. 3. Repeatable. F.S. *Prereq: Junior classification.* History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Arch 427. History, Theory, and Criticism of Chinese Architecture. (Dual-listed with 527). (3-0) Cr. 3. F. *Prereq: Junior classification.* Survey of the history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relation to art, landscape design, and urban Structure. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit.

Arch 431. Analytical Drawing. (1-6) Cr. 3. Repeatable. F.S. *Prereq: 232, 302.* Exploration of 2- and 3-dimensional representations. Emphasis on on-site freehand sketching, perspective and orthographic drawing, rendering of shadows and textures, and use of diverse media.

Arch 432. Advanced Computer Lighting and Rendering. (3-0) Cr. 3. Repeatable. F.S. *Prereq: 230, 301.* Exploration of the computer as a design and communication tool. Emphasis on lighting and rendering techniques.

Arch 433. File to Fabrication. (3-0) Cr. 3. Repeatable. F.S. *Prereq: 230, 301.* Exploration of the computer as a design and manufacturing tool. Emphasis on fabrication techniques and rapid prototyping including laser-cutting, 3-D printing and CNC routing.

Arch 434. Computer-aided Architectural and Environmental Design. (1-4) Cr. 3. S. *Prereq: 334.* Emphasis on application of the computer as a design tool, topical applications and computer graphic methods, development of computer software for architectural and environmental problem solving. Nonmajor graduate credit.

Arch 436. Advanced Design Media. (2-2) Cr. 3. Repeatable. F.SS. *Prereq: 230.* Special topics in design media applications.

Arch 437. Architectural Photography. (3-0) Cr. 3. F. *Prereq: 202.* Emphasis on use of the camera and lighting in photographing drawings and interior and exterior building environments. Nonmajor graduate credit.

Arch 448. Materials and Assemblies II. (3-0) Cr. 3. S. *Prereq: 346.* Investigation of the materials and integrated systems found in complex construction assemblies. Emphasis on determination and utilization of appropriate forms of material assemblies and structural systems for large scale construction.

Arch 458. Environmental Control Systems. (3-0) Cr. 3. F. *Prereq: 357.* Overview of architectural environmental control systems in response to occupant comfort, patterns of use, health, and safety regulations. Emphasis on the analytical rules of thumb and calculation methods necessary to provide integrated

design synthesis of technical systems within architecture. Understanding the use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems.

Arch 482. Professional Practice. (Dual-listed with 582). (3-0) Cr. 3. F. *Prereq: 202.* Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

Arch 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: Written approval of instructor and department chair on required form.* Independent investigation.
A. Design Communications.
B. Design
C. Technical Systems.
D. Architectural History
E. Behavioral Studies
F. Practice
H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

Arch 505. Architectural Design I. (0-10) Cr. 5. F. *Prereq: Admission to the M Arch program. Concurrent enrollment in 595; 541.* An introduction to comprehensive architectural design projects (individual and collaborative) with coordinated studies in design media, history, theory, culture, science, and technology. Projects establish a framework for designing buildings as aspects of dynamic circumstances such as environmental forces, construction methods, economic and political regulations, social relationships, and cultural values. Course content and assignments coordinated with 506 and 596.

Arch 506. Architectural Design II. (0-10) Cr. 5. S. *Prereq: 505; 583; 541. Coreq: 596; 542.* Continuation of 505. More challenging comprehensive architectural design projects (individual and collaborative) with coordinated studies in design media, history, theory, culture, science and technology. Projects establish a framework for designing buildings as aspects of dynamic circumstances such as environmental forces, construction methods, economic and political regulations, social relationships and cultural values.

Arch 507. Architectural Design and Media III. (0-10) Cr. 5. SS. *Prereq: 506, 596, 542. Coreq: Arch 543.* Design projects that examine the relationship between architectural concepts and the reality of built form. Emphasis is placed on the multi-faceted role of the architectural detail in the design process. Assignments involve the study of contemporary and historic construction documentation, research into architectural materials and the use of representational media appropriate to the scale of the detail. Projects also demand engagement with the cultural and technological issues explored in previous and concurrent courses.

Arch 510. Practical Experience. Cr. R. Repeatable. F.S.SS. *Prereq: Graduate standing and permission of department DOGE.* Students must register for this course prior to commencing each period. Available only to students taking course loads of 8 credits or less.

Arch 519. Middle Eastern Cities. (3-0) Cr. 3. F. *Prereq: Graduate or senior standing.* Middle Eastern cities introduce a particular continuity between history and contemporary life where in some cases the latter is about re-defining the former. Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces.

Arch 527. History, Theory, and Criticism of Chinese Architecture. (Dual-listed with 427). (3-0) Cr. 3. F. *Prereq: Senior classification or graduate standing.* The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 528. Topical Studies in Architecture. (Cross-listed with Dsn S). (3-0) Cr. arr. Repeatable. F.S.SS. *Prereq: Arch 221, 222 or senior classification or graduate standing.*
A. Studies in Architecture and Culture
B. Technology
C. Communications
D. Design
E. Practice

Arch 529. Spatial Dialectics in the American Midwest. (3-0) Cr. 3. S. *Prereq: Graduate or senior standing.* The American Midwest has witnessed dramatic transformation during the last two centuries which impacted its physical, environmental, economic and social characteristics. This course is an interdisciplinary study of the evolution and sustainability of Midwestern space in relationship to forces of flow shaped by the mobility of bodies, products, meanings, and symbols that are enforced, incorporated, reproduced or destroyed.

Arch 534. Advanced Computer-aided Architectural Design. (1-4) Cr. 3. Repeatable. F. *Prereq: 434, permission of instructor.* Emphasis on concepts, algorithms, data structures, advanced modeling, rendering, animation, and virtual reality applications in architectural design.

Arch 535. Advanced Three-Dimensional Studio. (0-5) Cr. 2. Repeatable. F.S. *Prereq: 335 or graduate standing.* Advanced investigation of sculptural expression with emphasis on individual projects.

Arch 541. Science and Technology for Architects I. (4-2) Cr. 5. F. *Prereq: Admission to the M.Arch I program. Coreq: 505; 595.* First of a four-course series in building science and technologies. Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelopes. Theory and case studies, stressing the connectivity of technical issues to broader formal, social, and cultural spheres. Course content and assignments coordinated with 505 and 595.

Arch 542. Science and Technology for Architects II. (4-2) Cr. 5. S. *Prereq: 505; 541; 595. Coreq: 506; 596.* Second of a four-course series in building science and technologies. Elementary Statics and Beam Theory, Basic Construction Materials, and Site and Building Circulation. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres. Course content and assignments coordinated with 506 and 596.

Arch 558. Sustainability and Green Architecture. (Cross-listed with Dsn S). (3-0) Cr. 3. F. *Prereq: Graduate standing.* Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, architects and examples of buildings with green or sustainable designations.

Arch 567. Preservation, Restoration, and Rehabilitation. (Cross-listed with Dsn S). (3-0) Cr. 3. S. *Prereq: Senior classification.* Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 571. Design for All People. (Cross-listed with Dsn S, Geron). (3-0) Cr. 3. S. *Prereq: Senior classification or graduate standing.* Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 575. Contemporary Urban Design Theory. (Cross-listed with Dsn S). (3-0) Cr. 3. S. *Prereq: Senior classification or graduate standing.* Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 576. Study Abroad Options. (3-0) Cr. 3. Repeatable. SS. Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus.

Arch 581. Service Learning. (1-12) Cr. 5. SS. *Prereq: 506, 596, 542.* Planning and construction of a full-scale project serving a community need. Learning occurs through both theory and active involvement in constructed work. Projects connect previous coursework to practical applications and community involvement.

Arch 582. Professional Practice. (Dual-listed with 482). (3-0) Cr. 3. F. *Prereq: Graduate standing.* Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

Arch 583. Research in Practice. (3-0) Cr. 3. S. *Prereq: Senior or graduate standing.* Foundational course in the methods and conceptual tools of design research in the context of practice. Through team and individual guided projects, students generate, analyze and represent knowledge in design-related communications and contexts. Alternative models of practice, client groups and communities are addressed within projects that precede, feed, follow, or overlap with architectural contracts.

Arch 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Written approval of instructor and department chair on approved form.* Investigation of architectural issues having a specialized nature.

Arch 595. Seminar on the Built Environment I: History. (5-0) Cr. 5. F. *Prereq: Admission to the MArch I program. Coreq: 505; 541.* Introduction to architectural history and its role in shaping the contemporary practice of architecture. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects. Course content and assignments coordinated with 505 and 541.

Arch 596. Seminar on the Built Environment II: Landscape and Society. (5-0) Cr. 5. S. *Prereq: 505; 541; 595. Coreq: 506; 542.* Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment. Course content and assignments coordinated with 506 and 542.

Arch 597. Seminar on the Built Environment III: Theory. (3-0) Cr. 3. F. *Prereq: Senior classification or graduate standing.* Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space. Coursework includes readings, seminar discussion and a research paper.

Arch 598. Seminar in the Built Environment IV: Topical Study. (3-0) Cr. 3. S. *Prereq: senior or graduate standing.* A research seminar that takes an in-depth look at a topic within contemporary discourses on architecture and urbanism. The topic will be considered from multiple points of view including its historical, theoretical, behavioral and cultural aspects.

Courses for graduate students

Arch 601. Architecture and Landscape Design. (0-12) Cr. 6. F. *Prereq: 507; 542; 596. Coreq: 643.* Design projects that explore the relationships among architecture, cultural landscapes, and biological issues. Emphasis on regional sites and Socio-economic conditions. Projects stress engagement with local circumstances and stakeholders, and the application of interdisciplinary research, new materials and systems. Course content and assignments coordinated with 643.

Arch 602. Design Studio Options. (0-12) Cr. 6. Repeatable. S. *Prereq: 601.* Design studio electives include, but are not limited to: independent and interdisciplinary projects, study abroad, and design-build. Dsn S 446/546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 603. Comprehensive Design. (0-12) Cr. 6. F. *Prereq: 601.* Rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations, as well as structural, environmental, mechanical, electrical and plumbing systems, in a comprehensive design proposal. This course fulfills the Graduate College Creative Component Requirement.

Arch 643. Science and Technology for Architects III. (2-2) Cr. 3. F. *Prereq: 507, 542, 596, 581 or graduate standing. Coreq: 601.* Third in a four-course series in building science and technologies. Structural Elements and Systems, and Building Services. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres. Course content and assignments coordinated with 601.

Arch 644. Science and Technology for Architects IV. (2-2) Cr. 3. S. *Prereq: 643 or graduate standing.* Fourth of a four-course series in building science and technologies. Building Enclosures, Interior Construction and Sensory Qualities, Fabrication and Construction. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres. Summative Student Project.

Arch 690. Independent Design Study. (1-15) Cr. 6. Repeatable. F.S.SS. *Prereq: Admission to MSAS or M Arch 30 credit program.* Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Advisory Committee.

Arch 698. Graduate Seminar. Cr. R. Repeatable. F.S. *Prereq: Graduate standing.* Special topics and guest speakers.

Arch 699. Research. (1-18) Cr. arr. Repeatable. F.S.SS.

Art and Design

Roger Baer, Chair of Department

Distinguished Professors (Emeritus): Heggen, Miller

Professors: Baer, Herrnstadt, Lilligren

Professors (Emeritus): Allen, Bro, Dake, Evans, Fowles, Held, Pickett, Singer, Smith, Sontag, Stieglitz, Tartakov

Associate Professors: Akkurt, Caldwell, Chidister, Croyle, Cunnally, Curran, Fontaine, Gibbs, Gould, Jones, Kang, Katz, Malven, Martin, Mickelson, Muench, Paschke, Richards, Satterfield, Stout, Walton, Warme

Associate Professors (Emeritus): Bruene, Lehner, Mcilrath, Polster, Sage, Sreenivasam

Associate Professors (Adjunct): Demartino, Pohlman

Associate Professor (Collaborator): Sandor

Assistant Professors: Brunner, Bruski, Call, Campbell, Eisman, Faber, Godbey, Golec, Holland, Iasevoli, Sobiech-Munson, Song

Assistant Professor (Collaborator): Schneider

Senior Lecturers: Boehmer, Harris, Mikovec, Pappenheimer, Ure

Lecturers: Biechler, Morgan

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in three curricular areas: Graphic Design, Integrated Studio Arts, and Interior Design. The department also offers the degree Bachelor of Arts (B.A.) in Art and Design. Each of these curricula affords excellent preparation for a variety of career opportunities or as a foundation for graduate study.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, and the visual organization of communication media. Graphic design graduates effectively integrate abstract thinking skills; communication design theory, history, and methodology; and technology. Components of visual communication including typography, symbology, and image creation are integrated with an understanding of professional practice.

B.F.A. Integrated Studio Arts. Students select from a variety of studio options in order to build a portfolio and prepare for a professional practice in the visual arts. This concentration emphasizes aesthetics, visual problem solving, critical thinking, and skill development in a variety of media employing contemporary, historical, and cultural theory and practices.

B.F.A. Interior Design. Emphasis is on the student's application of design processes to creatively solve problems of the interior environment based on knowledge of human Safety, functional utility, physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction and application of human factors. The curriculum is accredited by the Foundation for Interior Design Education Research (FIDER) as providing professional level education.

Students entering the Graphic Design, Interior Design, or Integrated Studio Arts programs involving computeraided design or animation are strongly encouraged to purchase or lease of a laptop/notebook computer and appropriate software. Contact the department or see the College of Design web site for hardware and software specification.

B.A. Art and Design. This curriculum offers two concentrations: Art and Culture, and Visual Cultural

Culture Studies. Art and Culture has a greater emphasis on studio components, and Visual Culture Studies on humanities and liberal arts components.

Both concentrations are combined with an applied career minor or approved program.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minor in design studies.

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design, Integrated Visual Arts, and Interior Design, and Master of Arts (M.A.) in Art and Design, with degree specialization in interior design, graphic design, and environmental graphic design. Graduates have a broad understanding of visual communication, problem solving, and interdisciplinary studies.

The M.F.A. curricula in Graphic Design and Interior Design require a minimum of 60 credits. The M.F.A curriculum in Integrated Visual Arts requires a minimum of 61. These programs include an art and design seminar, a studio concentration, history and criticism courses, a teaching seminar, elective courses outside the department or area of study, and the completion of a thesis-exhibition or thesis.

M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language and symbology. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. The M.F.A. is recognized as the terminal degree in the graphic design field. The degree requires completion of a written thesis integrating theory, research, and design problem solving.

M.F.A graduates in Interior Design are proficient in visual communication skills, design theory, human factors, and space planning. The M.F.A. degree is considered a terminal degree in the interior design field. The degree requires completion of a written thesis comprised of original research.

M.F.A. graduates in Integrated Visual Arts have skills that link traditional studio disciplines with emerging technologies. Graduates are prepared as visual artists to enter studio research, business, higher education or new interdisciplinary fields. The MFA is recognized as the terminal degree. A required thesis-exhibition is composed of two parts, a substantial exhibition and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

The M.A. in Art and Design with specialization in interior design requires a minimum of 34 credits including a studio concentration and work in research methods and human factors. Candidates focus on research in an area of specialization culminating in a written thesis comprised of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the PhD. Applicants without a degree in interior design may be required to complete up to 40 additional credits of course work.

The M.A. in Art and Design with a specialization in graphic design requires a minimum of 30 credits including seminar courses in art and design, a studio concentration, a history course, a business practice course, courses outside of graphic design, and the completion of a capstone course in graphic design. Graduate students selecting the M.A. in graphic design will focus on a first professional degree. Applicants without a degree in graphic design may be required to complete up to 17 additional credits of coursework.

The M.A. in Art and Design with a specialization in environmental graphic design requires a minimum of 34 credits including a seminar course in art and

design, a studio concentration, a history courses, courses in design methods, and the completion of a capstone course in environmental graphic design.

Graduate students selecting the M.A. in environmental graphic design will focus on a first professional degree. Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the master of fine arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student's undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students' progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Art and Design, College of Design, Iowa State University, Ames, Iowa 50011-3092.

Art (Art)

Courses primarily for undergraduate students

Art 108. Visual Foundations I. (0-6) Cr. 3. F.S.SS. Exploring visual order, creative process, and interaction of two- and three-dimensional design. Introduction to color.

Art 109. Visual Foundations II. (0-6) Cr. 3. F.S.SS. *Prereq: 108.* Continued exploration of visual order, creative process, and interaction of two- and three-dimensional design and color.

Art 110. Orientation to Artand Design. Cr. R. F.S. Overview of the department and university with special emphasis on curricula, program planning, and study skills. Advising, policy and procedures, student services.

Art 130. Drawing I. (1-6) Cr. 3. F.S.SS. The introductory course in drawing, focusing on the fundamentals of drawing from observation. Subject matter may include working from the still life, architectural settings, landscape and the human figure. Line, shape, perspective and value studies are explored through a variety of drawing media.

Art 230. Drawing II. (0-6) Cr. 3. F.S. *Prereq: Art 108 or Dsn S 102, 183, and 131.* A continuation of Dsn S 131 (Design Representation). Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.

Art 292. Introduction to Visual Culture Studies. (Cross-listed with Dsn S). (3-0) Cr. 3. F.S. *Prereq: Open to all majors.* An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.

Art 494. Art and Design in Europe Seminar. (1-0) Cr. 1. *Prereq: Permission of instructor and planned enrollment in 495.* Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Satisfactory-fail only.
A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 495. Art and Design in Europe. (Dual-listed with 595). Cr. 3. F.S.SS. *Prereq: 494, permission of instructor.* International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Travel and tour expenses to be paid by the student.
A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 496. Art and Design Field Study. Cr. R. Repeatable. *Prereq: Enrollment in an art and design studio or art history course, permission of instructor.* Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Satisfactory-fail only.

Art 497. Studio Internship. Cr. arr. Repeatable. F.S.SS. *Prereq: Advanced classification in a department curriculum.* Written approval of supervising instructor and department chair on required form in advance of semester of enrollment. Supervised experience with a cooperating artist or studio. Satisfactory-fail only.

Art 498. Museum/Gallery Internship. Cr. arr. Repeatable. F.S.SS. *Prereq: Advanced classification in a department curriculum.* Written approval of supervising instructor on required form in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Satisfactory-fail only.

Art 501. Issues in Visual and Material Culture Seminar. (3-0) Cr. 3. *Prereq: Permission of instructor.* Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both relate to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies.

Art 511. Seminar in Teaching. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification.* Readings and discussion of university level design education issues, studio/classroom observation, development of a teaching Philosophy, lesson planning and presentation.

Art 595. Art and Design in Europe. (Dual-listed with 495). Cr. 3. *Prereq: Graduate classification, 494 or equivalent, permission of instructor.* International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Tour and travel expenses to be paid by the student.
A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 598. Museum/Gallery Internship. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification and permission of instructor.* Written approval in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Satisfactory-fail only.

Courses for graduate students

Art 605. Research Methods. (3-0) Cr. 3. *Prereq: Permission of instructor.* Research strategies related to fine art and technology. Application of selected methods to specific issues.

Art 697. Studio Internship. Cr. arr. F.S.SS. *Prereq: Graduate classification and approval of POS committee.* Supervised off-campus learning experience with a prominent artist, designer, or firm.

Art 699. Research. Cr. arr. Repeatable.
A. Thesis
B. Thesis-exhibition museum or gallery or art center.
Satisfactory-fail only.

Art Education (ArtEd)

Courses primarily for undergraduate students

ArtEd 211. Introduction to Art Education. (0-6) Cr. 3. F.S. Design experiences for the K-12 classroom. Hands-on discipline-specific and integrated art activities; emphasis on creativity and thinking skills.

Graphic Design (ArtGr)

Courses primarily for undergraduate students

ArtGr 270. Graphic Design Studio I. (0-6) Cr. 3. F. *Prereq: Dsn S 102 and Dsn S 131, enrollment in 275; admission to the graphic design program through department review.* Basic design concepts and color principles used for visual communication.

ArtGr 271. Graphic Design Studio II. (0-6) Cr. 3. S. *Prereq: Art 230, ArtGr 270, 275, enrollment in 276.* Principles of typographic composition, structure and hierarchy. Formal and conceptual principles of symbology.

ArtGr 275. GraphicTechnology I. (0-4) Cr. 2. F. *Prereq: enrollment in 270.* Basic computer skills for graphic design.

ArtGr 276. GraphicTechnology II. (1-2) Cr. 2. S. *Prereq: 275, enrollment in 271.* Color management, color theory and applications skills for graphic design.

ArtGr 291. Theories and Principles of Graphic Design. (1-0) Cr. 1. F. *Prereq: Enrollment in 270.* Historical, cultural, and social issues related to the practice of visual communication.

ArtGr 370. Graphic Design Studio III. (0-6) Cr. 3. F. *Prereq: 271, 276, enrollment in a 2-credit option; credit or enrollment in 387.* Creation and design of images and symbols for communication. Application and integration of typography with images and symbols.

ArtGr 371. Graphic Design Studio IV. (0-6) Cr. 3. S. *Prereq: 370, 387, enrollment in a 2-credit option.* Development and preparation of design concepts for application to the printing and electronic publishing process. Creative problem-solving skills, introduction to systems design.

ArtGr 372. Graphic Design Materials and Processes. (2-0) Cr. 2. S. *Prereq: Credit or enrollment in 371.* Lecture about the processes and materials involved in graphic design arts reproduction. Course covers prepress, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

ArtGr 377. Graphic Design Internship Seminar. (1-0) Cr. 1. F. *Prereq: Credit or enrollment in 370 or 371.* Procedural and ethical concerns related to the graphic design internship. Personal goals, preparation of resume and plans for internship. Study and tours of areas of interest within the graphic design profession.

ArtGr 378. Critical Issues in Graphic Design. (2-0) Cr. 2. *Prereq: Credit or enrollment in 370.* Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ArtGr 387. Graphic Design History/Theory/ Criticism I. (Dual-listed with 587). (3-0) Cr. 3. F. *Prereq: Art H 280, 281, Dsn S 183.* Late nineteenth century to the 1990s. This course will explore the cultural, social,

political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics. Nonmajor graduate credit.

ArtGr 388. Graphic Design History/Theory/ Criticism II. (Dual-listed with 588). (3-0) Cr. 3. S. *Prereq: Art H 281, Dsn S 183, or ArtGr 387.* Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice. Nonmajor graduate credit.

ArtGr 391. Graphic Design Field Study. (0-1) Cr. 1. Repeatable. *Prereq: Enrollment in 300 or 400 level graphic design studio course.* Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Satisfactory-fail only.

ArtGr 470. Graphic Design Studio V. (0-6) Cr. 3. F. *Prereq: 371, enrollment in a 2-credit option.* Advanced design systems as applied to corporate identity and environmental graphic design. Symbology as an integrated component of communication systems.

ArtGr 472. Photographic Art Direction. (Dual-listed with 572). (0-6) Cr. 3. *Prereq: 471, 482, enrollment in 370 or 371, or 470 or 471.* Photography as a graphic design component. Compositional and conceptual elements in photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 473. Time Based Multi-Media. (Dual-listed with 573). (0-6) Cr. 3. *Prereq: Enrollment in 370 or 371, or 470 or 482.* The design of visual, aural and written communication for electronic media.

ArtGr 474. Exhibition Design. (Dual-listed with 574). (0-6) Cr. 3. F.S. *Prereq: Enrollment in 370 or 371 or 470 or 482.* Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 475. Advanced Typography. (Dual-listed with 575). (0-6) Cr. 3. F.S. *Prereq: Enrollment in 370 or 371 or 470 or 482.* Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ArtGr 476. Graphic Design Methodology. (Dual-listed with 576). (0-6) Cr. 3. F.S. *Prereq: Enrollment in 370 or 371 or 470 or 482.* Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ArtGr 477. Graphic Design Practicum. (0-6) Cr. 3. F.S. *Prereq: Enrollment in 370 or 371 or 470 or 482, portfolio review and permission of instructor.* Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ArtGr 478. Web Design for E-Commerce/Graphic Applications. (Dual-listed with 578). (0-6) Cr. 3. S. *Prereq: Enrollment in 370 or 371 or 470 or 482.* The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 479. Wayfinding Design. (Dual-listed with 579). (0-6) Cr. 3. *Prereq: Enrollment in 370 or 371 or 470 or 482.* Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ArtGr 480. Graphic Design Internship. (3-0) Cr. 3. SS. *Prereq: 377, 12 credits in graphic design; permission of instructor, registration in advance of enrollment.* Graphic design experience in an off-campus professional environment.

ArtGr 481. Graphic Design Professional Practices. (3-0) Cr. 3. S. *Prereq: Credit or enrollment in 470.* Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.

ArtGr 482. Professional Presentation. (0-6) Cr. 3. S. *Prereq: 470, enrollment in a 2-credit option.* Exploration and development of the graphic design portfolio and resume in electronic, print, and photographic form.

ArtGr 484. Selected Studies in Graphic Design. (Dual-listed with 584). Cr. arr. Repeatable. *Prereq: Permission of instructor.* Special issues related to graphic design. Topics vary each time offered.

ArtGr 490. Independent Study. Cr. arr. Repeatable. *Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment.* Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
A. Theory, Criticism, and Methodology
B. Two-Dimensional Design
C. Three-Dimensional Design
H. Honors
I. Internship/Cooperative (in-depth experience other than ArtGr 480)

ArtGr 491. Publication Design: Magazines. (Dual-listed with 591). (0-6) Cr. 3. F. *Prereq: Credit or enrollment in 370.* The Philosophy, concepts and structures of magazine design.

ArtGr 492. Publication Design: Books. (Dual-listed with 592). (0-6) Cr. 3. S. *Prereq: Credit or enrollment in 370 or 371.* The Philosophy, concepts and structures of book design.

ArtGr 493. Workshop. Cr. arr. Repeatable. *Prereq: Evidence of satisfactory experience in area of specialization.* Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduate students

ArtGr 570. Advanced Studies in Visual Communication. (0-6) Cr. 3. F. *Prereq: Graduate classification in College of Design.* Theory and investigation of systems, structures, principles of visual organization, and typography for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ArtGr 571. Signs, Symbols, Images. (0-6) Cr. 3. S. *Prereq: Graduate Classification in College of Design.* Investigation and application of signs, symbols and semiotic theory for communication. Studio problems influenced by social, cultural, environmental, or technological factors.

ArtGr 572. Photographic Art Direction. (Dual-listed with 472). (0-6) Cr. 3. *Prereq: Graduate enrollment in College of Design.* Photography as a graphic design component. Compositional and conceptual elements in photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 573. Time Based Multi-Media. (Dual-listed with 473). (0-6) Cr. 3. *Prereq: Graduate enrollment in College of Design.* The design of visual, aural and written communication for electronic media.

ArtGr 574. Exhibition Design. (Dual-listed with 474). (0-6) Cr. 3. *Prereq: Graduate enrollment in College of Design.* Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 575. Advanced Typography. (Dual-listed with 475). (0-6) Cr. 3. *Prereq: Graduate classification in College of Design.* Typographic theory exploring traditional and non-traditional forms.

ArtGr 576. Graphic Design Methodology. (Dual-listed with 476). (0-6) Cr. 3. *Prereq: Graduate enrollment in College of Design.* Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ArtGr 578. Design for E-Commerce/Graphic Applications. (Dual-listed with 478). (0-6) Cr. 3. *Prereq: Graduate enrollment in College of Design.* The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 579. Wayfinding Design. (Dual-listed with 479). (0-6) Cr. 3. *Prereq: Graduate enrollment in College of Design.* Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ArtGr 584. Selected Studies in Graphic Design. (Dual-listed with 484). Cr. arr. Repeatable. *Prereq: Graduate classification in the College of Design.* Special issues related to graphic design. Topics vary each time offered.

ArtGr 587. Graphic Design History/Theory/ Criticism I. (Dual-listed with 387). (3-0) Cr. 3. F. *Prereq: Graduate classification.* Late nineteenth century to the 1990's, this course will explore the cultural social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics.

ArtGr 588. Graphic Design History/Theory/ Criticism II. (Dual-listed with 388). (3-0) Cr. 3. S. *Prereq: Graduate classification.* Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice.

ArtGr 590. Special Topics. Cr. arr. *Prereq: Bachelor's degree in graphic design, or evidence of satisfactory equivalency in specialized area.* Written approval of instructor and department chair on required form in advance of semester of enrollment.
A. Theory, Criticism, and Methodology
B. Two-Dimensional Design
C. Three-Dimensional Design

ArtGr 591. Publication Design: Magazines. (Dual-listed with 491). (0-6) Cr. 3. F. *Prereq: Graduate enrollment in College of Design.* The Philosophy, concepts and structures of magazine design.

ArtGr 592. Publication Design: Books. (Dual-listed with 492). (0-6) Cr. 3. S. *Prereq: Graduate enrollment in College of Design.* The Philosophy, concepts and structures of book design.

ArtGr 593. Workshop. Cr. arr. Repeatable. *Prereq: Graduate classification; evidence of satisfactory experience in area of specialization.* Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ArtGr 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

ArtGr 672. Graphic Design and Human Interaction. (0-6) Cr. 3. F.S. *Prereq: 570, 571, and graduate enrollment in College of Design or permission of instructor.* The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.
A) Usability. The exploration and design of interface/interaction with products, systems, and technologies
B) Design for Behavioral Change. The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.
C) Consumer Experience Design and Branding. The exploration and design of identity systems and consumer brand experiences..

ArtGr 690. Advanced Topics. Cr. arr. Repeatable.

ArtGr 698. Current Issues in Graphic Design. Cr. arr. Repeatable. *Prereq: Graduate enrollment in College of Design or permission of instructor.* Selected issues in contemporary graphic design. Topics and readings vary each time offered.

ArtGr 699. Research-Thesis. Cr. arr. Repeatable.

Art History (Art H)

Courses primarily for undergraduate students

Art H 181. Origins and Evolution of Modern Design. (Cross-listed with Dsn S). (3-0) Cr. 3. F.S. History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

Art H 280. History of Art I. (Cross-listed with Dsn S). (3-0) Cr. 3. F. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. H. Honors. Cr. 4.

Art H 281. History of Art II. (Cross-listed with Dsn S). (3-0) Cr. 3. S. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.
H. Honors. Cr. 4

Art H 378. Popes and Caesars: 2000 Years of Art History in Rome. (3-0) Cr. 3. SS. *Prereq: Permission of instructor.* Survey of Italian art and architecture from the Etruscans to Bernini, including lectures and tours of museums and historical sites. Study abroad course taught in Rome, with travel to other Italian cities. Tour and travel expenses to be paid by student.

Art H 382. Art and Architecture of Asia. (Dual-listed with 582). (Cross-listed with Dsn S). (3-0) Cr. 3. Introduction to the history of art and architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Museum field trip expenses to be paid by students. Nonmajor graduate credit.

Art H 383. Greek and Roman Art. (Dual-listed with 583). (Cross-listed with Dsn S, Cl St). (3-0) Cr. 3. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

Art H 384. Art of Islam. (3-0) Cr. 3. Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.

Art H 385. Renaissance Art. (Dual-listed with 585). (Cross-listed with Dsn S). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries. Nonmajor graduate credit.

Art H 394. Women/Gender in Art. (Dual-listed with 594). (Cross-listed with Dsn S). (3-0) Cr. 3. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture. Nonmajor graduate credit.

Art H 481. Art and Architecture of India. (Dual-listed with 581). (Cross-listed with Dsn S). (3-0) Cr. 3. Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically. Nonmajor graduate credit.

Art H 487. Nineteenth Century Art. (Dual-listed with 587). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Nonmajor graduate credit.

Art H 488. Modern and Contemporary Art and Theory I. (Dual-listed with 588). (Cross-listed with Dsn S). (3-0) Cr. 3. F. Visual arts and critical theory from Impressionism to Abstract Expressionism Nonmajor graduate credit.

Art H 489. Sequential Art. (Dual-listed with 589). (Cross-listed with Dsn S). Cr. 3. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present. Nonmajor graduate credit.

Art H 490. Independent Study. Cr. arr. Repeatable. *Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment.* Student must have completed Art History coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
H. Honors

Art H 495. Modern and Contemporary Art and Theory II. (Dual-listed with 595). (Cross-listed with Dsn S). (3-0) Cr. 3. Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.

Art H 496. History of Photography. (Dual-listed with 596). (Cross-listed with Dsn S). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

Art H 498. Selected Topics in Art History. (Dual-listed with 598). (Cross-listed with Dsn S). (3-0) Cr. 3. Repeatable. Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

Art H 581. Art and Architecture of India. (Dual-listed with 481). (Cross-listed with Dsn S). (3-0) Cr. 3. F. *Prereq: Graduate classification, permission of instructor.* Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically.

Art H 582. Art and Architecture of Asia. (Dual-listed with 382). (Cross-listed with Dsn S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Introduction to the history of art and architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Museum field trip expenses to be paid by students.

Art H 583. Greek and Roman Art. (Dual-listed with 383). (Cross-listed with Dsn S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

Art H 585. Renaissance Art. (Dual-listed with 385). (Cross-listed with Dsn S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

Art H 587. Nineteenth Century Art. (Dual-listed with 487). (Cross-listed with Dsn S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* European and American art and architecture from 1780 to 1900, focusing on the major movements of western Europe: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

Art H 588. Modern and Contemporary Art and Theory I. (Dual-listed with 488). (Cross-listed with Dsn S). (3-0) Cr. 3. F. *Prereq: Graduate classification, permission of instructor.* Visual arts and critical theory from Impressionism to Abstract Expressionism.

Art H 589. Sequential Art. (Dual-listed with 489). (Cross-listed with Dsn S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* An Art History survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Art H 590. Special Topics. Cr. arr. *Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area.* Written approval of instructor and department chair on required form in advance of semester of enrollment.

Art H 594. Women/Gender in Art. (Dual-listed with 394). (Cross-listed with Dsn S, W S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Art H 595. Modern and Contemporary Art and Theory II. (Dual-listed with 495). (Cross-listed with Dsn S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Visual arts and critical theory from Abstract Expressionism to the present.

Art H 596. History of Photography. (Dual-listed with 496). (Cross-listed with Dsn S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

Art H 598. Selected Topics in Art History. (Dual-listed with 498). (Cross-listed with Dsn S). (3-0) Cr. 3. Repeatable. *Prereq: Graduate classification, permission of instructor.* Specialized study in the history or criticism of art and/or design.

Interior Design (ArtID)

Courses primarily for undergraduate students

ArtID 250. Fundamentals of Interior Design. (2-0) Cr. 2. F. The profession, issues, and the role of interior design.

ArtID 251. Human Factors in Interior Design. (2-0) Cr. 2. S. Overview of issues related to health and safety, ergonomics, Anthropometrics, perception, psycho-behavioral response, physiology, physical ability and universal design. Emphasis on application of human factors to analysis and solution of interior design problems.

ArtID 255. Forces That Shape Interior Space. (3-0) Cr. 3. F. *Prereq: Open to non-majors.* A survey of variables influencing the form and function of interior environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form.

ArtID 259. Sophomore Field Study. Cr. R. *Prereq: Enrollment in interior design studio course.* Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Satisfactory-fail only.

ArtID 261. Graphic Communication for Interior Design I. (0-4) Cr. 2. F. *Prereq: Admission to the interior design program through program review and enrollment in 265.* Proficiency in the development of technical conventions, and design drawing with drafting instruments. Emphasis on drawing layout, line quality, and lettering. Site and structure measurements, dimensioning, single and multi-view drawings, sections and axonometrics.

ArtID 262. Graphic Communication for Interior Design II. (0-4) Cr. 2. F. *Prereq: Admission to the interior design program through program review and enrollment in 265.* Perspective drawing, design sketching, presentation drawings, shades, shadows, and reflections. Use of various rendering media and techniques.

ArtID 263. Graphic Communication for Interior Design III. (0-4) Cr. 2. S. *Prereq: 261, enrollment in 267.* Computer visualization techniques and applications; projects employing computer graphic methods.

ArtID 265. Interior Design Studio I. (1-6) Cr. 4. F. *Prereq: Credit or enrollment in 250, 261, 262, and 350; admission to the interior design program through program review.* Enhanced creative interior design problem solving. Emphasis on research, spatial composition theories and graphic ideation and communication as applied to the interior design of small scale environments. Modeling and manual visualization techniques.

ArtID 267. Interior Design Studio II. (1-6) Cr. 4. S. *Prereq: 250, 261, 262, 265, 350, enrollment in 251, 259, and 351.* Human factors issues including ergonomics, human behavior and the requirements of special groups. Color theories related to interior spaces. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques.

ArtID 350. Interior Materials Systems and Details I. (2-2) Cr. 3. F. *Prereq: Admission to the interior design program through program review.* Exploration of concepts, materials, and assemblies associated with development of planar interior elements including floors, walls, ceiling, windows, and finishes. Fiber, plastic, sheet metal, and other materials. Emphasis on human factors, testing, codes, detailing, specifications, and other issues related to design and end use.

ArtID 351. Interior Materials Systems and Details II. (2-2) Cr. 3. S. *Prereq: 265, 350 and enrollment in 267.* Exploration of concepts, materials, and assemblies associated with development of furnishings, furniture-scale interior elements. Discussion of materials and fabrication, focusing on wood and metal. Emphasis on human factors, testing, codes, detailing, specifications and other issues related to design and end use.

ArtID 352. Interior Materials Systems and Details III. (2-2) Cr. 3. S. *Prereq: 267, 351 and enrollment in 367.* Exploration of concepts, materials, and components associated with the use of light as an element in interior spaces. Lighting principles, and techniques. Emphasis on human factors, testing, codes, detailing, specifications, and other issues related to design and end use. Teamwork.

ArtID 353. Interior Materials Systems and Details IV. (2-2) Cr. 3. F. *Prereq: 351 and enrollment in 365.* Exploration of concepts, materials, and assemblies associated with development of building construction. Discussion of common building materials and methods. Overview of electrical, mechanical, acoustical, and other building systems. Emphasis on human factors, codes, detailing, and other interior design issues related to buildings.

ArtID 355. Interior Design History/Theory/Criticism I. (3-0) Cr. 3. F. Theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture, from a critical, historical and multicultural perspective. Focus on pre-1850. Nonmajor graduate credit.

ArtID 356. Interior Design History/Theory/Criticism II. (3-0) Cr. 3. S. *Prereq: Credit or enrollment in 355 or permission of instructor.* Advanced theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture from a critical, historical, and multicultural perspective. Focus on mid-nineteenth and twentieth century. Nonmajor graduate credit.

ArtID 357. Made in Italy. (2-0) Cr. 2. F. *Prereq: Participation in Study Abroad Rome program.* An investigation of the 20th century roots of modern Italian design and its contemporary form. Lectures and seminar presentations highlight major Italian designers and internationally significant design in the 20th century. Focus is on innovative design that exhibits a synthesis of formal and social functions.

ArtID 359. Junior Field Study. Cr. R. F. *Prereq: Enrollment in third year interior design studio course.* Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms, and museums. Satisfactory-fail only.

ArtID 360. Interior Design Internship Seminar. (0-1) Cr. 0.5. Repeatable. F.S. *Prereq: Enrollment in third year studio course.* Procedural and ethical concerns relating to interior design internship. Preparation of placement credentials and formulation of personal goals. Internship plans and agreements. Satisfactory-fail only.

ArtID 365. Interior Design Studio III. (1-6) Cr. 4. F. *Prereq: 263, 267, 351 credit or enrollment in 353.* Refined methods of problem identification design programming and problem solving, including theoretically-based concept development and refinement. Emphasis on optimized design work environments and compliance with codes and standards. Produce small and large scale projects. Alternative manual and computer-based visualization methods. Teamwork.

ArtID 367. Interior Design Studio IV. (1-6) Cr. 4. S. *Prereq: 365, credit or enrollment in 352 and 369.* Emphasis on three-dimensional spatial development in large scale, multiple scale unit institutional projects. Inclusion of extensive design documentation. Expansion of alternative manual and computer-based visualization methods. Teamwork.

ArtID 368. International Study Orientation Seminar. (1-0) Cr. 1. *Prereq: 365, permission of instructor and planned enrollment in Rome study option.* Historic and contemporary architecture and interior design, customs and traditions of Rome and related travel itinerary locations. Required of students participating in the interior design international study option.

ArtID 459. Senior Field Study. Cr. R. *Prereq: Enrollment in fourth year interior design studio course.* Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Satisfactory-fail only.

ArtID 460. Interior Design Internship. Cr. 3. SS. *Prereq: Completion of 350, 365.* Professional interior design off-campus experience.

ArtID 461. Interior Design Professional Practices. (3-0) Cr. 3. S. *Prereq: 460.* Organization and general management of the interior design office: agreements, business procedures, and professional ethics. Professional interior design issues and concerns.

ArtID 463. Environments for the Aging. (Cross-listed with HD FS, Geron). (3-0) Cr. 3. S. *Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies.* Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

ArtID 465. Interior Design Studio V. (Dual-listed with 565). (1-6) Cr. 4. F. *Prereq: 460.* Design research and refined problem solving methods including functional analysis, programming and detailing. Multi-cultural, study abroad option. Nonmajor graduate credit.

ArtID 467. Interior Design Studio VI. (Dual-listed with 567). (1-6) Cr. 4. S. *Prereq: 465, credit in 469 and all required interior systems and history/theory/criticism courses or permission of instructor.* Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Nonmajor graduate credit.

ArtID 468. Interior Design in an Urban Setting. (1-4) Cr. 3. S. *Prereq: Enrollment or credit in third year studio courses.* Study of selected interior design projects and designers practicing in an urban Setting. Studio project examining issues related to interior design in an urban context.

ArtID 469. Advanced Studies in Interior Design. (Dual-listed with 569). Cr. 3. Repeatable. *Prereq: 12 credits in interior design related courses or permission of instructor.* Examination of special issues with emphasis on their translation into design application. Topics vary each time offered. Nonmajor graduate credit.

ArtID 490. Independent Study. Cr. arr. Repeatable. *Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment.* Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
H. Honors

ArtID 493. Workshop. Cr. arr. Repeatable. F.S.SS. *Prereq: Evidence of satisfactory experience in area of specialization.* Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduate students

ArtID 550. Creative Integration. (1-2) Cr. 2. Repeatable. F.S. *Prereq: Permission of instructor.* Analysis and expansion of technical, theoretical and procedural sources of design insight and their application to design problem-solving. Emphasis on the refinement and communication of clear, logical bases for design decisions.

ArtID 551. Design Humanics. (3-0) Cr. 3. Repeatable. F.S. *Prereq: Instructor permission.* An exploration of human nature as broadly defined and as applied to design of the built environment. Consideration of human characteristics, responses and performance, at varying scales, as sources of design insight. Topics vary each time offered.
A: Micro-Scale Humanics- Issues related to the nature, performance and accommodation of the individual organism, including sensation and perception, physical requirement, individual Anthropometrics, personal safety and other issues connecting human needs and built environmental responses.
B: Meso-Scale Humanics- Issues related to human performance in small to moderate scale settings, including psychological and behavioral dimensions, social factors, interpersonal safety, etc. C: Macro-Scale Humanics- Cultural and Societal influences on human performance and well being in the moderate to large scale built environment, including the impact of political, economic, cultural, geographic, design cultural and other Societal factors.

ArtID 552. Design Methods. (2-0) Cr. 2. Repeatable. F.S. *Prereq: Permission of instructor.* Survey of methodologies and methodological tools for varied end uses and drawn from wide ranging sources. Emphasis on their organization and application to design of the human environment. Topics vary each time offered.
A. Investigation & Analysis - Methods of design research, analysis, programming and theory formulation.
B. Synthesis - Methods of synthesizing design concepts and solutions
C. Communication - Methods of managing, translating, communicating and otherwise utilizing text, image, abstract and other forms of information.
D. Procedural Alternatives - New and specialized methodological trends, including subject or setting-specific methods.

ArtID 554. Interior Design Teaching Practicum. Cr. arr. Repeatable. F.S.SS. *Prereq: Completion of ArtId 667 or permission of instructor.* Supervised practical application of interior design theory, materials, and practice to the educational process.

ArtID 559. Graduate Interior Design Field Study. Cr. R. Repeatable. *Prereq: Graduate enrollment or permission of instructor.* Study and tours of places of interior design-related interest such as manufacturers, design studios, related professional offices, showrooms, museums, and historical sites.

ArtID 560. Interior Design Internship. (3-0) Cr. 3. *Prereq: Completion of a graduate interior design studio or permission of instructor.* Applied, off campus, professional interior design-related experience

ArtID 565. Interior Design Studio V. (Dual-listed with 465). (1-6) Cr. 4. F. *Prereq: Graduate classification and concurrent enrollment in 598.* Design research and refined problem-solving methods including functional analysis, programming and detailing. Multi-cultural, hospitality and retail. Study abroad option.

ArtID 567. Interior Design Studio VI. (Dual-listed with 467). (1-6) Cr. 4. S. *Prereq: Graduate classification and concurrent enrollment in 598 or permission of instructor.* Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Nonmajor graduate credit.

ArtID 569. Advanced Studies in Interior Design. (Dual-listed with 469). Cr. 3. Repeatable. *Prereq: Graduate classification, permission of instructor.* Examination of special issues with emphasis on their translation into design application. Topics vary each time offered.

ArtID 590. Special Topics. Cr. arr. *Prereq: Bachelor's degree in interior design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.*

ArtID 593. Workshop. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification; evidence of satisfactory experience in area of specialization.* Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ArtID 598. Research Forum. (1-0) Cr. 1. Repeatable. F.S. *Prereq: Concurrent enrollment in 565, 567, 665, or 667, or permission of instructor.* Presentation and discussion of cross-disciplinary design research theory, methods, and application. Focus on the investigation, application, and communication of types of design research.

Courses for graduate students

ArtID 660. Research Methods. (3-0) Cr. 3. S. *Prereq: Permission of instructor.* Research strategies related to design. Application of selected methods to specific issues.

ArtID 665. Advanced Interior Design Studio. (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification, concurrent enrollment in 598.* Interior design problem-solving with emphasis on special issues. Project types will include but not be restricted to hospitality, health care, institutional, industrial, residential, historic preservation and commercial environments.

ArtID 667. Experimental Interior Design. (0-6) Cr. 3. Repeatable. F.S. *Prereq: Concurrent enrollment in 598, permission of instructor.* Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

ArtID 690. Advanced Topics. Cr. arr. Repeatable. *Prereq: M.F.A classification, permission of instructor.*

ArtID 697. Design Practicum. Cr. arr. Repeatable. F.S.SS. *Prereq: Approval of POS committee.* Supervised off-campus learning experience with a prominent designer or firm. (Credit not to be applied to MA degree program of study).

ArtID 698. Current Issues in Interior Design. Cr. 3. Repeatable. *Prereq: Graduate classification.* Selected issues in contemporary design. Topics and readings vary each time offered.

ArtID 699. Research. Cr. arr. Repeatable.
A. Thesis
B. Thesis-Exhibition

Integrated Studio Arts (ArtIS)

Courses primarily for undergraduate students

ArtIS 201. Foundations of Visual Literacy. (0-6) Cr. 3. F.S. *Prereq: Dsn S 102 and 131.* Exploration through the World Wide Web of the nature of visual perception in relation to issues of visual communication and problem solving, envisioning information, scientific visualization and visual thinking. Studio assignments to be digitized and sent to instructor electronically for evaluation and critique.

ArtIS 205. Studio Fundamentals I. (0-6) Cr. 3. F.S. *Prereq: Acceptance into the BFA ISA program..* Introduction to studio fundamentals and crossover between media. Emphasis on ceramics and fibers as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 207. Studio Fundamentals II. (0-6) Cr. 3. F.S. *Prereq: Acceptance into the BFA ISA program.* Introduction to studio fundamentals and crossover between media. Emphasis on metals and wet darkroom photography as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 208. Color. (0-6) Cr. 3. F.S. *Prereq: Dsn S 102, 131, and 183.* Required of all ISA BFA students. The impact of changing visual relationships emphasizing physical and psychological color concepts. Additive and subtractive mixing and color interaction exercises using various color media.

ArtIS 209. Studio Fundamentals III. (0-6) Cr. 3. F.S. *Prereq: Acceptance into the ISA BFA program.* Introduction to studio fundamentals and crossover between media. Emphasis on printmaking and wood as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 211. Studio Fundamentals IV. (0-6) Cr. 3. F.S. *Prereq: Acceptance into the ISA BFA program..* Introduction to studio fundamentals and crossover between media. Emphasis on computers and painting as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 227. Introduction to Creative Digital Photography. (0-6) Cr. 3. F.S. *Prereq: Dsn S 102, 131, and 183.* The course will include camera operation, scanning, image manipulation, color management and printing. Must have access to 35 mm camera or 4 megapixel (minimum resolution) digital camera. Cameras must have manual override. Digital photography as a medium of design, expression and communication.

ArtIS 229. Introduction to Darkroom Photography. (0-6) Cr. 3. F.S. *Prereq: Dsn S 102, 131 and 183.* Photography as a creative medium of design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

ArtIS 233. Watercolor Painting. (0-6) Cr. 3. F.S. *Prereq: Art 230.* Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ArtIS 238. Painting I. (0-6) Cr. 3. F.S. *Prereq: Art 230.* Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ArtIS 305. Integrative Media. (Dual-listed with 505). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Dsn S 102, 131 and 183 and 6 credits of additional ISA studio at 200+ level.* Exploration and application of materials and methods that combine and integrate traditional approaches, alternative/new materials and alternative approaches, and new media.

ArtIS 308. Computer Modeling, Rendering and Virtual Photography. (0-6) Cr. 3. F.S. *Prereq: Art 230 or permission of instructor.* Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ArtIS 310. Sources of Visual Design. (0-6) Cr. 3. F.S. *Prereq: Art 230.* Required of all ISA BFA students. Studio exercises to develop awareness of external and internal sources for design.

ArtIS 311. Contemporary Issues in Studio Art. (0-6) Cr. 3. F.S. *Prereq: 310.* Studio based exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an experimental and applied knowledge base for understanding each student's place in the contemporary art world.

ArtIS 320. Introduction to Furniture Design. (0-6) Cr. 3. F.S. *Prereq: ArtIS 209 or permission of instructor.* Design and creation of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ArtIS 322. Ceramics II. (0-6) Cr. 3. F.S. *Prereq: 222 or 205.* Further investigation of concepts and techniques in ceramics; introduction to glaze research and kiln firing.

ArtIS 323. Scientific Illustration Principles and Techniques. (Cross-listed with BPM I). (0-6) Cr. 3. Repeatable. F. *Prereq: 6 credits in art and design and 3 credits in biological sciences.* Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

ArtIS 324. Jewelry/Metalsmithing II. (0-6) Cr. 3. F.S. *Prereq: 207 or permission of instructor.* Continued study of traditional and contemporary metal fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ArtIS 325. Integrated Studio Arts Seminar. (2-0) Cr. 2. Repeatable. *Prereq: Any 3-D studio.* Contemporary issues in studio arts explored through lectures and presentations.

ArtIS 326. Illustration and Illustration Software. (Cross-listed with BPM I). (0-6) Cr. 3. Repeatable. S. *Prereq: 323.* Application of painting, drawing, and image making techniques to communication. Development of technical abilities using illustration software. Digital and print production techniques.

ArtIS 327. Illustration as Communication. (Cross-listed with BPM I). (0-6) Cr. 3. F. *Prereq: 326.* Studio problems in illustration emphasizing composition and communication. Problem solving methodologies.

ArtIS 329. Creative Photography. (0-6) Cr. 3. Repeatable. F.S. *Prereq: 207 or 229.* Continuation and expansion of concepts and processes covered in ArtIS 207 and ArtIS 229. Individual thematic expression further enhanced through photographic history and criticism.

ArtIS 330. Drawing III: Life Drawing. (0-6) Cr. 3. Repeatable. F.S. *Prereq: Art 230.* Drawing from the human figure.

ArtIS 335. Three-Dimensional Studio. (Cross-listed with Arch). (0-5) Cr. 2. Repeatable. F.S. This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

ArtIS 337. Application of Scientific Illustration Techniques. (Cross-listed with BPM I). (0-6) Cr. 3. S. *Prereq: 323.* Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

ArtIS 338. Painting II. (0-6) Cr. 3. Repeatable. F.S. *Prereq: 238.* Painting using acrylic and oil media; composition and expression.

ArtIS 345. Woven Structures. (0-6) Cr. 3. Repeatable. *Prereq: DsnS 102, 131, 183, and ArtIS 205 or equivalent.* Introduction to a variety of textile techniques including on-loom and off-loom woven construction using both traditional and non-traditional materials and approaches. Techniques may include basketry, tapestry weaving, papermaking, and 4-harness

weaving. Emphasis placed on technical development, exploration and experimentation with a variety of fiber media, development of problem solving and critical thinking skills.

ArtIS 346. Textile Surface Design. (0-6) Cr. 3. Repeatable. *Prereq: Dsn S 102, 131, 183 and ArtIS 205, or equivalent.* Introduction to surface design using dyes and discharging agents, as well as mechanical and liquid resists to create complex surfaces. Other surface embellishment techniques, such as direct application of pigments and stitching, will be explored. Emphasis on technical skill development and research, as well as conceptual exploration and visual problem solving.

ArtIS 347. Printed Textile Design. (0-6) Cr. 3. Repeatable. *Prereq: Dsn S 102,131, 183, and ArtIS 205 or equivalent, or permission of instructor.* Textile printing methods; block, stencil, screen-printing using dyes, discharging agents, and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Research and development of surface design techniques as a means for personal expression.

ArtIS 356. Relief Printmaking. (Dual-listed with 556). (0-6) Cr. 3. Repeatable. F. *Prereq: Art 230.* Examine the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 357. Intaglio and Monotype Printmaking. (Dual-listed with 557). (0-6) Cr. 3. Repeatable. F. *Prereq: Art 230.* Examine the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 358. Lithography. (Dual-listed with 558). (0-6) Cr. 3. Repeatable. S. *Prereq: Credit or enrollment in Art 230.* Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ArtIS 399. BFA Professional Practice. (2-0) Cr. 2. S. *Prereq: Junior classification in Art and Design BFA curriculum. Required of all ISA BFA students.* Introduction to professional practices including development of portfolio (visual and written components). Lecture and presentation topics include applying to graduate school, grants/funding opportunities, professional networking, exhibition opportunities, and best practices for studio artists. Half semester course.

ArtIS 407. Principles of 3D Character Animation. (Dual-listed with 507). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable. F.S. *Prereq: 308.* Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed. Nonmajor graduate credit.

ArtIS 408. Principles of 3D Animation. (0-6) Cr. 3. Repeatable. F.S. *Prereq: 308.* Animation techniques using the computer and available software. Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed. Nonmajor graduate credit.

ArtIS 409. Computer/Video Game Design and Development. (Dual-listed with 509). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Permission of instructor. Programming emphasis: Com S 227, 228, 229 or equivalent in Engineering; art or graphics emphasis: Art 230 and ArtIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: junior classification.* Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed. Nonmajor graduate credit.

ArtIS 420. Advanced Furniture Design. (Dual-listed with 520). (0-6) Cr. 3. Repeatable. F.S. *Prereq: 320.* Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production. Nonmajor graduate credit.

ArtIS 422. Ceramics Studio. (Dual-listed with 522). (0-6) Cr. 3. Repeatable. F.S. *Prereq: 322.* In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression in the medium of ceramics. Kiln firings, research into contemporary artists and development of a body of work are emphasized. Nonmajor graduate credit.

ArtIS 424. Jewelry/Metalsmithing III. (Dual-listed with 524). (0-6) Cr. 3. Repeatable. F.S. *Prereq: 324 or permission of instructor.* Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculpural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

ArtIS 429. Advanced Photography. (Dual-listed with 529). (0-6) Cr. 3. Repeatable. F.S. *Prereq: 329.* Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concerns. Nonmajor graduate credit.

ArtIS 430. Drawing IV. (Dual-listed with 530). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Art 330.* Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 438. Painting III. (Dual-listed with 538). (0-6) Cr. 3. Repeatable. F.S. *Prereq: 338.* Figurative and non-figurative painting with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 447. Advanced Printed Textile Design. (Dual-listed with 547). (0-6) Cr. 3. Repeatable. *Prereq: 346 or 347.* Advanced textile printing techniques that include screen-printing with dyes, discharging agents, and pigments, and digital printing on fabric. Experimental printing methods will also be explored. Emphasis is on research and development of surface design techniques as a means for personal expression. Nonmajor graduate credit.

ArtIS 458. Advanced Printmaking. (0-6) Cr. 3. Repeatable. F.S. *Prereq: 356, 357, or 358, and permission of instructor.* Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

ArtIS 482. Selected Topics in Studio Art. (Dual-listed with 582). Cr. arr. Repeatable. F.S. *Prereq: Permission of instructor.* Special issues related to studio art. Topics vary each time offered.

ArtIS 490. Independent Study. Cr. arr. Repeatable. *Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment.* Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
B. Ceramics
C. Computer Art and Design

ArtIS 499. BFA Exhibition. (1-0) Cr. 1. S. *Prereq: 399 and senior classification in the Art and Design BFA Curriculum.* Capstone experience for the BFA degree; includes the creation and refinement of a final portfolio both visual and written components. Students give a portfolio presentation to the ISA faculty. Course culminates in the planning and installation of the BFA group exhibition in a formal gallery setting. Required of all ISA BFA students. Half semester course.

Courses primarily for graduate students, open to qualified undergraduate students

ArtIS 505. Integrative Media. (Dual-listed with 305). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification and permission of instructor.* Exploration and application of materials and methods that combine and integrate traditional approaches, alternative/new materials, alternative approaches and new media.

ArtIS 507. Principles of 3D Character Animation. (Dual-listed with 407). (Cross-listed with HCI). (0-6) Cr. 3. F.S. *Prereq: 308.* Advanced, 3D computer-generated animation concepts and techniques.

ArtIS 508. Computer Aided Animation and Visualization. (0-6) Cr. 3. Repeatable. S. *Prereq: 408 or graduate Status and permission of instructor.* Further investigations begun in ArtIS 408. Attention given to the workflow and management of creating animation and visualizations.

ArtIS 509. Computer/Video Game Design and Development. (Dual-listed with 409). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Permission of instructor..* Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed.

ArtIS 520. Advanced Furniture Design. (Dual-listed with 420). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification and permission of instructor..* Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ArtIS 522. Ceramics Studio. (Dual-listed with 422). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification and permission of instructor.* In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression in the medium of ceramics, kiln firings, research into contemporary artists and development of a body of work are emphasized.

ArtIS 524. Jewelry and Decorative Metalsmithing III. (Dual-listed with 424). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification and permission of instructor.* Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including

raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.

ArtIS 529. Advanced Photography. (Dual-listed with 429). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification and permission of instructor.* Independent, advanced work in traditional, alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concerns.

ArtIS 530. Drawing. (Dual-listed with 430). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification and permission of instructor.* Figurative and non-figurative drawing with advanced work in media, composition, and theory.

ArtIS 538. Advanced Painting. (Dual-listed with 438). (0-6) Cr. 3. Repeatable. F.S. *Prereq: Graduate classification and permission of instructor.*. Figurative and non-figurative painting with advanced work in media, composition, and theory.

ArtIS 547. Advanced Printed Textile Design. (Dual-listed with 447). (0-6) Cr. 3. Repeatable. *Prereq: Graduate classification.* Advanced textile printing techniques that include screen-printing with dyes, discharging agents, and pigments, and digital printing on fabric. Experimental printing methods will also be explored. Emphasis is on research and development of surface design techniques as a means for personal expression.

ArtIS 556. Relief Printmaking. (Dual-listed with 356). (0-6) Cr. 3. Repeatable. F. *Prereq: Graduate classification and permission of instructor.* Examine the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 557. Intaglio and Monotype Printmaking. (Dual-listed with 357). (0-6) Cr. 3. Repeatable. F. *Prereq: Graduate classification and permission of instructor.* Examine the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 558. Lithography. (Dual-listed with 358). (0-6) Cr. 3. Repeatable. F. *Prereq: Graduate classification and permission of instructor.* Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Emphasis is on experimental and creative use of printmaking for artistic expression. Experienced lithography students may focus on stone lithography and increased work with color.

ArtIS 582. Selected Topics in Studio Art. (Dual-listed with 482). Cr. arr. Repeatable. F.S. *Prereq: Permission of Instructor.* Special issues related to studio art. Topics vary each time offered.

ArtIS 590. Special Topics. Cr. arr. *Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area.* Written approval of instructor and department chair on required form in advance of semester of enrollment.

Aragula Gururaj Rao, Chair of Department

Distinguished Professors: Beitz, Fromm

Distinguished Professors (Emeritus): Graves, Metzler

University Professor: Girton

University Professors (Emeritus): Hammond, Horowitz, White

Professors: Andreotti, Honzatko, Jernigan, R. Johansen, K. Johansen, Miller, Myers, Nikolau, Nilsen-Hamilton, Rao, Robson, Robyt, Shin, Thornburg

Professors (Emeritus): Applequist, Atherly, Buss, Stromer, Thomas, Tipton

Professor (Collaborator): Meyer, Tabatabai

Associate Professors: Ambrosio, Bobik, Dispirito, Hargrove, Huiatt, Peters

Associate Professors (Adjunct): James

Assistant Professors: Amarasinghe, Macintosh, Shogren-Knaak, Yu, Zabotina

Lecturer: Fulton, Girton

Undergraduate Study

The department offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary medical, and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their studies in graduate school, medical school, or veterinary medical school.

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in mathematics and physics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

Agricultural Biochemistry Major in the College of Agriculture

For the undergraduate curriculum leading to the degree bachelor of science, see *College of Agriculture, Curricula*. Agricultural biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in biochemistry, chemistry, physics, and mathematics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and animal and plant biotechnology.

Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences

For the undergraduate curriculum leading to the degree of bachelor of science, see Liberal Arts and Sciences, Curriculum. Biochemistry and biophysics are recommended to students whose career interests involve advanced study or employment in biochemistry or biophysics, or in related areas of the biological or medical sciences.

Undergraduate majors in the College of Liberal Arts and Sciences in biochemistry usually have the following basic courses or their equivalents in their programs: BBMB 101, 102, 201, 404 (or 501), 405 (or 502), 411, 461 (or 551); Chem 201 (or 177, 178), 201L (or 177N or 177L), 211, 211L, 322L, 324, 325, 331, 332, 333L (or 331L), 334L (or 332L); Math 165, 166, 265 (or 266 or 267); Phys 221, 222; Biol 211, 211L (or 212L or 313L or 314), 212, 313, 314, and a minimum of 4 additional credits of biological science courses from biology, genetics, and microbiology. Undergraduate research, BBMB 499, is strongly recommended.

Undergraduate majors in biophysics usually include the following basic courses in their programs: BBMB 101, 102, 404, 411, 461 (or 551); Chem 201 (or 177, 178), 177N (or 177L), 322L, 324, 325, 331, 332; Math 165, 166, 265, 266, 307 (or 317), 471; Phys 221, 222; Com S 207; Stat 305 or 231; Biol 211, 211L (or 212L), 212; Chem 211 and 211L; and 9 additional credits in 300 or higher level courses in biochemistry, biophysics, biological sciences, chemistry, or physics.

These lists of courses should not be regarded as statements of fixed requirements or as complete outlines of the work necessary for the major. They are given solely for the convenience of students or advisers who wish to estimate the amount of basic study that may be needed.

Biochemistry and biophysics majors are advised to meet the College of Liberal Arts and Sciences foreign language requirement with courses in French, German, or Russian.

See also the B.S./M.S. program under Graduate Study.

The department offers minors in biochemistry in both the College of Agriculture and the College of Liberal Arts and Sciences, which may be earned by credit in BBMB 404, 405, 311 (or 411), and 451 (or Chem 325), plus additional supporting 300 level courses in chemistry or biochemistry for a total of 15 credits.

Communication Proficiency requirement: Majors in agricultural biochemistry must complete Engl 150 and 250 and one course in speech fundamentals with a grade of C or better in each of these courses. Majors in the College of Liberal Arts and Sciences must complete Engl 150 and 250 and one of the following with a grade of C- or better: (a) Engl 305, 309, or 314; (b) a written report in BBMB 411, or 499.

Interdepartmental Majors

The department participates along with other biological science departments including GDCB and EEOB in offering interdepartmental majors in Biology and Genetics. Biology courses that are staffed in part by department faculty members include Biol 101, 313, 314, and 313L (See Biology).

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), plant physiology, and toxicology. Minor work is offered to students taking major work in other departments.

Prerequisite to graduate work is a sound undergraduate background in biology, chemistry, mathematics, and physics.

All graduate students are required by the department to teach as part of their training for an advanced degree.

The department offers a B.S./M.S. program in biochemistry that allows students to obtain both the B.S. and M.S. degrees in five years. The program is open to students in the College of Liberal Arts and Sciences and in the College of Agriculture. Students interested in this program should contact the department office for details. Application for admission to the Graduate College should be made near the end of the junior undergraduate (third) year. Students would begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships.

Courses primarily for undergraduate students

BBMB 101. Introduction to Biochemistry. (1-0) Cr. 1. F. Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 102. Introduction to Biochemistry Laboratory. (0-2) Cr. 1. S. *Prereq: Credit or enrollment in Chem 177 and 177L*. Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. May include laboratory experiments as well as literature readings and discussion. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 201. Chemical Principles in Biological Systems. (2-0) Cr. 2. S. *Prereq: Credit or enrollment in Chem 331.* Survey of chemical principles as they apply in biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics, or agricultural biochemistry.

BBMB 221. Structure and Reactions in Biochemical Processes. (3-0) Cr. 3. F. *Prereq: Chem 163, 167, or 177.* Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry or biophysics. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301. Survey of Biochemistry. (3-0) Cr. 3. F.S.SS. *Prereq: Chem 231 or 331.* A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 311. Biochemistry Laboratory. (1-3) Cr. 2. S. *Prereq: Credit or enrollment in 301 or Biol 314.* Emphasis on isolation, characterization, and quantification of biological substances. Only one of BBMB 311 or Biol 314L can be counted toward graduation. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 403. Microbial Biochemistry and Biotechnology. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Chem 332, BBMB 301.* Fundamental principles of microbial biochemistry, physiology, and genetics, and their application to microbial biotechnology. Topics will include biorenewable resources, metabolic pathway engineering, enzyme engineering, bioremediation, microbial diversity genomics, metagenomics. Nonmajor graduate credit.

BBMB 404. Biochemistry I. (3-0) Cr. 3. F. *Prereq: Chem 332*. A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure; enzymology; carbohydrate metabolism. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 405. Biochemistry II. (3-0) Cr. 3. S. *Prereq: 404.* A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 411. Techniques in Biochemical Research. (1-8) Cr. 3. F. *Prereq: Credit or enrollment in 404 or 501, Chem 210 or 211.* Introduction to laboratory techniques for studying biochemistry, including: chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids. Nonmajor graduate credit.

BBMB 420. Physiological Chemistry. (3-0) Cr. 3. F. *Prereq: Chem 332, BBMB 301 or Biol 314.* Structure and function of proteins; enzymology; biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry, biochemistry or biophysics. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 430. Procaryotic Diversity and Ecology. (Dual-listed with 530). (Cross-listed with Micro). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Micro 302, Micro 302L*. Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 440. Laboratory in Microbial Physiology, Diversity, and Genetics. (Cross-listed with Micro). (1-7) Cr. 3. F. *Prereq: Micro 302, 302L, Chem 332, Biol 313L*. Study of the fundamental techniques and theory of studying the diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for the phylogenetic characterization, and genetic manipulation of diverse species of bacteria.

BBMB 451. Physical Biochemistry. (2-0) Cr. 2. F. *Prereq: Chem 331, Phys 112 or 222; a previous course in calculus is helpful but not required.* Selected topics in physical chemistry in the context of applications to problems in biology, biochemistry and food sciences. Not acceptable for credit toward a major in biochemistry or biophysics. Nonmajor graduate credit.

BBMB 461. Topics in Biophysics. (2-0) Cr. 2. S. *Prereq: 451 or Chem 321 or Phys 304.* Biological phenomena viewed as problems in physics, with a focus on structure determinations and macromolecular characterization. Nonmajor graduate credit.

BBMB 490. Independent Study. Cr. arr. F.S.SS. *Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor.* College of Agriculture: a maximum of 9 credits of 490 may be applied toward graduation.
H. Honors

BBMB 499. Undergraduate Research. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of staff member with whom student proposes to work.* Research under senior staff guidance.

Courses primarily for graduate students, open to qualified undergraduate students

BBMB 501. Comprehensive Biochemistry I. (4-0) Cr. 4. F. *Prereq: Chem 210 or 211, 322, and 332; a previous course in biochemistry is strongly recommended.* Chemical composition of living matter and the chemistry of life processes. Chemical characterization of amino acids, proteins, carbohydrates and lipids; enzymology and co-enzymes; metabolism of carbohydrates; biological oxidations.

BBMB 502. Comprehensive Biochemistry II. (4-0) Cr. 4. S. *Prereq: 501.* Chemical composition of living matter and the chemistry of life processes. Metabolism of lipids, amino acids, and nucleotides; membrane biochemistry; biosynthesis of DNA, RNA, and proteins; gene regulation; selected topics.

BBMB 503. Bioinorganic Chemistry. (Cross-listed with Chem). (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: Chem 402 or BBMB 405.* Essential elements: transport and storage of ions and of oxygen; metalloenzymes and metallocoenzymes; electron-transfer processes in respiration and photosynthesis; metabolism of nonmetals and redox processes involved in it; medicinal aspects of inorganic chemistry.

BBMB 520. Genetic Engineering. (Cross-listed with GDCB, MCDB). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Gen 411 or BBMB 405.* Strategies and methods of gene cloning, restriction endonuclease mapping, southern hybridization, isolation and manipulation of plasmid DNA, and detection of specific genes in bacteria.

BBMB 530. Procaryotic Diversity and Ecology. (Dual-listed with 430). (Cross-listed with Micro). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Micro 302, Micro 302L*. Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 531. Structure and Reactivity of Biomolecules. (3-0) Cr. 1. F. *Prereq: Chem 332.* Five weeks. Special properties of reactive groups prevalent in biomolecules and reactions commonly encountered in biochemical studies. A study of reaction types and mechanisms in biochemistry.

BBMB 541. Computational Biochemistry. (1-0) Cr. 1. F. *Prereq: A previous course in biochemistry is recommended.* Computer applications in biochemical research.

BBMB 542. Introduction to Molecular Biology Techniques. (Cross-listed with GDCB, BCB, B M S, FS HN, Hort, NutrS, VDPAM, EEOB, NREM, V MPM). Cr. 1. Repeatable. F.S.SS. *Prereq: Graduate classification.* Workshops in basic molecular biology techniques and related procedures. Satisfactory-fail only.
A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.SS.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonol antibody production. (S.SS.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

BBMB 551. Molecular Biophysics. (3-0) Cr. 3. F. *Prereq: Chem 322.* An examination of physical methods for the study of molecular structure and organization of biological materials, with emphasis on applications. Spectroscopy, hydrodynamic methods, nuclear magnetic resonance, and X-ray diffraction.

BBMB 552. Biomolecular NMR Spectroscopy. (2-0) Cr. 2. Alt. S., offered 2011. *Prereq: Chem 325 or permission of instructor.* Advanced solution state Nuclear Magnetic Resonance spectroscopy as applied to biological systems. Topics include theoretical principles of NMR, practical aspects of experimental NMR, methodologies for protein structure determination, NMR relaxation, recent advances in NMR spectroscopy.

BBMB 569. Bioinformatics III (Structural Genome Informatics). (Cross-listed with BCB, Com S, Cpr E, Math). (3-0) Cr. 3. F. *Prereq: BCB 567, Gen 411, Stat 430.* Algorithmic and Statistical approaches in structural genomics including protein, DNA and RNA structure. Structure determination, refinement, representation, comparison, visualization, and modeling. Analysis and prediction of protein secondary and tertiary structure, disorder, protein cores and surfaces, protein-protein and protein-nucleic acid interactions, protein localization and function.

BBMB 581. Seminar. (1-0) Cr. 1. F. *Prereq: Permission of instructor.* Short presentations by students and discussion on assigned topics. For entering graduate students.

BBMB 590. Special Topics. Cr. arr.

BBMB 593. Workshop in Biochemistry and Biophysics. Cr. 1. Repeatable. *Prereq: Permission of instructor.* Graduate workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry.

Courses for graduate students

BBMB 607. Plant Biochemistry. (2-0) Cr. 2. Alt. F., offered 2010. *Prereq: 405 or 502.* Description of unique aspects of plant biochemistry including lipid metabolism, cell wall structure, secondary metabolism, phytoalexin biosynthesis, and plant defenses.

BBMB 615. Molecular Immunology. (Cross-listed with Micro, V MPM). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: BBMB 405 or 502.* Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signalling pathways leading to expression of genes that control and activate immune function.

BBMB 622. Carbohydrate Chemistry. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 404 or 501.* Structure, occurrence, properties, function, and chemical and enzymatic modifications of monosaccharides, oligosaccharides, polysaccharides, and glycoproteins.

BBMB 632. Kinetics of Enzyme Action. (2-0) Cr. 2. Alt. S., offered 2011. *Prereq: 501.* Fundamental and advanced enzyme kinetics. Topics include integrated rate equations, methods for deriving initial-rate equations, inhibition, product effects, methods for verifying kinetic mechanisms, allostery, hysteresis, isotope effects, and complex kinetic mechanisms.

BBMB 640. Signal Transduction. (Cross-listed with GDCB, MCDB). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: GDCB 528, BBMB 404.* Mechanisms and components of cellular signal transduction including receptors, G-proteins, second messengers, protein phosphorylation, other post-translational protein modications, and transcriptional regulation.

BBMB 642. Mechanisms of Enzymatic Catalysis. (2-0) Cr. 1. Alt. F., offered 2010. *Prereq: 404, 420, or 501.* First 8 weeks. The chemical basis of enzymatic catalysis with emphasis on mechanisms of substrate recognition, general acid-base catalysis and stereoelectronic factors.

BBMB 645. Molecular Signaling. (2-0) Cr. 2. Alt. S., offered 2011. *Prereq: 405, 420, or 502.* Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone; growth factor and extracellular matrix activators; protein kinases; caspase and transcription factor downstream signals; lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

BBMB 652. Protein Chemistry - Chemical Methods. (2-0) Cr. 1. Alt. S., offered 2010. *Prereq: 404 or 501.* First 8 weeks. Chemical reactions as a means of determining protein structure and biological function.

BBMB 653. Protein Chemistry - Physical Methods. (2-0) Cr. 1. Alt. S., offered 2010. *Prereq: 404 or 501.* Second 8 weeks. Protein structure determination as a means of understanding biological function.

BBMB 660. Membrane Biochemistry. (2-0) Cr. 2. Alt. F., offered 2010. *Prereq: 405 or 502.* Protein and lipid constituents of biological membranes. Structure and topography of membrane proteins. Selected topics concerning the membrane proteins involved in diverse biochemical processes, such as energy transduction transport across membranes, neurotransmission and signal transduction.

BBMB 661. Current Topics in Neurobiology. (Cross-listed with Neuro, GDCB). Cr. arr. Repeatable. *Prereq: Permission of instructor.* Topics may include communication, hormones and behavior, neural integration, membrane biophysics, molecular and cellular neuroscience, developmental neurobiology, neuroanatomy and ultrastructure, sensory biology, social behavior, techniques in neurobiology and behavior.

BBMB 670. Molecular Biology of Muscle. (Cross-listed with An S). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: BBMB 405, 420, or 502.* Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development, and turnover. Cytoskeletal proteins and dynamics.

BBMB 675. Nucleic Acid Structure and Function. (2-0) Cr. 2. F. *Prereq: 405 or 502.* In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 676. Biochemistry of Gene Expression in Eucaryotes. (Cross-listed with MCDB). (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 404 or 501, 405 or 502 or GDCB 511.* Analysis of the biochemical processes involved in expression of eucaryotic genes and the regulation thereof, including RNA polymerase, transcriptional regulatory proteins, enhancers and silencers, chromosome structure, termination, RNA processing, RNA transport, RNA turnover, small RNAs translational regulation, protein turnover.

BBMB 681. Advanced Seminar. Cr. 1. Repeatable. F.S. *Prereq: Permission of instructor.* Student presentations.

BBMB 682. Departmental Seminar. Cr. R. F.S. *Prereq: Permission of instructor.* Staff and visitor research.

BBMB 696. Research Seminar. (Cross-listed with Agron, GDCB, PlBio, Hort, For). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Satisfactory-fail only.

BBMB 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with MCDB, GDCB, Micro, V MPM). (2-0) Cr. arr. Repeatable. F.S. Student and faculty presentations.

BBMB 699. Research. Cr. arr. *Prereq: Permission of instructor.*

Bioengineering

http://www.eng.iastate.edu/bioengineering/

Minor administered by the College of Engineering

Supervisory Committee: P. Reilly (Chair), A. Bastawros, T. Kim, H. van Leeuwen, S. Pandey, G. Mirka, L. Genalo, P. Shrotriya

The bioengineering minor at Iowa State University is an interdisciplinary program that complements a student's major discipline by providing additional insight into the interactions between various engineering disciplines and biological systems, emphasizing new ways of solving biological problems. The program provides students with unique educational experiences to apply engineering skills and create new biobased products and devices.

Undergraduate Study

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core Bioengineering knowledge, on which tracks will be superimposed to provide in-depth exposure to targeted areas of specialization. In addition to the core courses—BioE 201 and 202—students will complete coursework identified in the following tracks:

Bioinformatics and Systems Biology: BioE 325, BCB 211, 401, 402, and 442.

Biomaterials and Biomechanics: BioE 352, Ch E 440, Ex Sp 355, and Mat E 456.

Biomicrosystems: BioE 341, 341L, 450, 450L, and 428.

Biosystems and Environmental Engineering: A E 216 and 480, BioE 411/511, Ch E 415 and 427, and C E 421/521.

Courses primarily for undergraduate students

Undergraduate engineering students can satisfy the minor in bioengineering by completing a total of 15 credits: 6 from the core curriculum and 9 from the specialized tracks. Students can either choose to specialize in a particular track shown above or use courses from all tracks from which to draw their set of courses. The minor must include at least nine credits which are beyond the total used to meet curriculum requirements for the bachelors of science degree in engineering.

Students are strongly encouraged to consult either their undergraduate academic advisor or a member of the supervisory committee for assistance during the application process.

BioE 201. Introduction to Bioengineering I. (3-0) Cr. 3. *Prereq: Chem 167.* An exploration of cell structure and function, cellular metabolism, types of life forms, energy transport and use, biomolecule structure and function, and enzyme structure, function, and kinetics, with strong Mathematical emphasis.

BioE 202. Introduction to Bioengineering II. (3-0) Cr. 3. *Prereq: BioE 201.* Feedback loops in biological systems, cell and microbial growth patterns, fermentation kinetics. Biotechnology in diseases, wastewater treatment, genetic engineering of bacteria, fungi, plants, and animals, and biosensor operation. Strong Mathematical emphasis.

BioE 325. Systems Biology for Engineering. (3-0) Cr. 3. *Prereq: 202, Math 267.* Review of systems approaches for modeling. Introduction or review of methods for gene regulation in cells and how to model them. Auto regulation of gene networks. Feedforward modeling, timing considerations. Feedback mechanisms. Kinetic and rate-limiting steps.

BioE 341. BioMEMs and Nanotechnology. (3-0) Cr. 3. *Prereq: 202.* Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nanowires, and stimuli-responsive biomaterials.

BioE 341L. BioMEMS and Nanotechnology Laboratory. (0-3) Cr. 1. *Prereq: 202, concurrent enrollment in 341.* Introductory laboratory course accompanying BioE 341. Design, fabrication, and characterization of BioMEMS lab-on-a-chip devices and nanoscale techniques for bioengineering. Student group projects. BioE341L not a necessary corequisite with BioE341.

BioE 352. Molecular, Cellular and Tissue Biomechanics. (3-0) Cr. 3. *Prereq: 201, E M 324, Mat E 272.* Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and nonliving systems. Laws of motion, free-body diagrams and simple force analysis of musculoskeletal system. biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

BioE 411. Bioprocessing and Bioproducts. (Cross-listed with A E, BSE, C E). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, Bionergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, Bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BioE 428. Image Processing with Biomedical Applications. (3-0) Cr. 3. *Prereq: E E 324.* Review of signal processing, linear algebra, probability. Image sampling and quantization. Image transforms, image enhancement, image denoising/restoration. Tomographic reconstruction, segmentation and registration, recognition and shape analysis and applications in Computer Aided disease Detection (CAD).

BioE 450. Biosensing. (3-0) Cr. 3. *Prereq: 202.* Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

BioE 450L. Biosensing Laboratory. (0-3) Cr. 1. *Prereq: 202, concurrent enrollment in BioE 450.* Laboratory course accompanying BioE 450. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors. Lab is not a necessary corequisite with BioE 450..

Bioinformatics and Computational Biology – Undergraduate

www.las.iastate.edu/bcb/

Chair: S. Willson

Supervisory Committee: V. Brendel, K. Dorman, D. Fernandez-Baca, F. Honavar, M. Smiley

Undergraduate study

Undergraduate study in BCBio is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell Biology, and the Department of Mathematics. The undergraduate B.S. degree is offered through the College of Liberal Arts and Sciences.

Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad range of possibilities to get involved in research.

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBio graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology that now exist.

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

In addition to basic degree requirements listed in the Curriculum in Liberal Arts and Sciences (www.las.iastate.edu/academics/generaleducation/), BCBio majors must satisfy the following requirements:

A. Complementary Courses for the BCBio Major (37 cr)
   1. Chem (177, 177L, 178) or (201, 201L); 331.
   2. Phys 221.
   3. Stat 330, 341 and 430.
   4. Biol 211, 211L, 212, 212L and 314.

B. Core Courses Within the BCBio Major (48 cr)
   1. Gen 313, 313L and 411.
   2. Com S 227, 228, 363, and 330 (or Cpr E 310).
   3. Math 165, 166, 265 and (307 or 317).
   4. BCBio 110, 211, 401, 402.
   5. BCBio 490 or 491 (3 cr)

C. Support Electives
3-9 credits to be chosen from the following list:

BCB 495, 539, 542, 548, 549, 550, 551, 593, 594, 596, 597; Phys 222; BBMB 404, 405; Biol 315, 423, 462, 465, 472; Gen 340, 410; Stat 342, 402, 416, 432; Com S and Cpr E courses at the 300 level and above; Math (266 or 267), 304, 314, 385, 471, 481.

D. The communications and English proficiency requirements of the LAS college are met by Engl 150, 250 or 250H, and an additional English writing course chosen from Engl 309 or Engl 314. The lowest grade acceptable in Engl 150, 250 or 250H is C-.

Courses primarily for undergraduate students

BCBio 110. BCBio Orientation. (1-0) Cr. 0.5. F. First 8 weeks. Orientation to the area of bioinformatics and computational biology. For students considering a major in BCBio. Specializations and career opportunities. Satisfactory-fail only.

BCBio 211. Introduction to Bioinformatics and Computational Biology. (3-0) Cr. 3. S. Overview of bioinformatics and computational biology. Database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

BCBio 401. Fundamentals of Bioinformatics and Computational Biology I. (3-0) Cr. 3. F. *Prereq: BCBio 211, Com S 228.* Biology as an information science. Generative models for sequences. String algorithms. Sequence alignment. Algorithmic and Statistical aspects of database search. Basic methods in molecular phylogeny/phylogenomics. Genome sequence assembly.

BCBio 402. Fundamentals of Bioinformatics and Computational Biology II. (3-0) Cr. 3. S. *Prereq: BCBio 401.* Genome annotation. DNA and protein motifs. DNA microarrays. Introduction to gene expression studies. Protein, DNA and RNA structure. Structure representation, comparison and visualization. Biological networks and systems.

BCBio 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: BCBio 211, junior or senior classification, permission of instructor.* Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBio 490 and 491 toward graduation.

BCBio 491. Team Research Projects.. Cr. arr. Repeatable. *Prereq: BCBio 211, junior or senior classification, permission of instructor.* Research projects in bioinformatics and computational biology done by teams of students. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBio 490 and 491 toward graduation.

Interdepartmental Graduate Major

Chair: C. Tuggle

Associate Chair: V. Brendel

Supervisory Committee: C. Tuggle, V. Brendel, J. Dickerson, D. Dobbs, X. Huang, Z. Wu, R. Jernigan (ex-officio), S. Aluru (former chair)

Participating Faculty: D. Adams, S. Aluru, A. Andreotti, L. Bartholomay, W. Beavis, M. Bhattacharyya, A. Bogdanove, V. Brendel, A. Bronikowski, S. Cannon, H. Chou, D. Cook, J. Dekkers, J. Dickerson, P. Dixon, D. Dobbs, K. Dorman, O. Eulenstein, R. Fernando, H. Greenlee, X. Gu, K. Ho, V. Honavar, R. Honzatko, X. Huang, F. Janzen, R. Jernigan, D. Jones, S. Lamont, D. Lavrov, C. Lawrence, H. Levine, P. Liu, G. Macintosh, A. Miller, L. Miller, C. Minion, K. Moloney, D. Nettleton, B. Nikolau, M. Nilsen-Hamilton,

T. Peterson, G. Phillips, K. Rajan, J. Reecy, P. Reilly, S. Rodermel, M. Rothschild, D. Sakaguchi , P. Schnable, T. Sen, J. Shanks , M. Smiley, J. Smith, G. Song, X. Song, A. Travesset, C. Tuggle, N. Valenzuela, J. Wendel, S. Whitham, S. Willson, R. Wise, Z. Wu, E. Wurtele, E. Yu

Undergraduate Study

Undergraduates seeking a B.S. in Bioinformatics and Computational Biology should enroll in the undergraduate major BCBio, which is described in a separate section of this catalog. *See Index, BCBio.*

Undergraduates wishing to prepare for graduate study in Bioinformatics and Computational Biology should consider the undergraduate major in BCBio. Alternatively, they should obtain solid undergraduate training in at least one of the foundation disciplines: molecular biology, computer science, mathematics, statistics, and physics. They should also elect courses in basic biology, basic transmission and molecular genetics, chemistry, physics, mathematics at least through calculus, statistics, and computer programming.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Genetics, Development and Cell Biology; Industrial Manufacturing and Systems Engineering; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu.

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 (Graduate Research Rotation), working with three or more different research groups to gain experience in both "wet" (biological) and "dry" (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A well-prepared student will have taken calculus (through multivariable calculus, such as Math 265), a calculus-based introduction to probability and Statistics (like Stat 341), two semesters of computer programming (like Com S 207 and 208), one semester of discrete structures (like Com S 330 or Cpr E 310), some physical and organic chemistry (like Chem 163 and 231), biochemistry (like BBMB 301), genetics (like Biol 313), and evolution (like Biol 315).

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics (BCB 567, 568, 569, and 570), one core course in Molecular Genetics (GDCB 511), and background courses in statistics and computer science. Students make research presentations (BCB 690), attend faculty research seminars (BCB 691), and participate in workshops/symposia (BCB 593). M.S. students take the above background and core courses, take at least 12 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu.)

Courses primarily for undergraduate students

BCB 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with Com S, Cpr E, Gen, Biol). (4-0) Cr. 4. F. *Prereq: Math 165 or Stat 401 or equivalent.* Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

BCB 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.*

BCB 495. Molecular Biology for Computational Scientists. (Cross-listed with Gen). (3-0) Cr. 3. F. Survey of molecular cell biology and molecular genetics for nonbiologists, especially those interested in bioinformatics/computational biology. Basic cell structure and function; principles of molecular genetics; biosynthesis, structure, and function of DNA, RNA, and proteins; regulation of gene expression; selected topics. Provides biological background for BCB 594. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students.

BCB 538. Computational Genomics and Evolution. (Cross-listed with GDCB). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Biol 313.* Introduction to evolutionary sequence analysis at the genome level. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

BCB 539. Statistical Methods for Computational Biology. (Cross-listed with GDCB). (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: BCB 568.* Gu. Advanced discussion about Statistical modeling of DNA and amino acid sequences, microarray expression profiles and other genome-wide data interpretation.

BCB 542. Introduction to Molecular Biology Techniques. (Cross-listed with GDCB, BBMB, B M S, FS HN, Hort, NutrS, VDPAM, EEOB, NREM, V MPM). Cr. 1. Repeatable. F.S.SS. *Prereq: Graduate classification.* Workshops in basic molecular biology techniques and related procedures. Satisfactory-fail only.
A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.SS.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonol antibody production. (S.SS.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

BCB 544. Introduction to Bioinformatics. (Dual-listed with 444). (Cross-listed with Com S, Cpr E, GDCB). (4-0) Cr. 4. F. *Prereq: Math 165 or Stat 401 or equivalent.* Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

BCB 549. Advanced Algorithms in Computational Biology. (Cross-listed with Cpr E, Com S). (3-0) Cr. 3. S. *Prereq: Com S 311 and either 208 or 228.* Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, seminumerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

BCB 550. Evolutionary Problems for Computational Biologists. (Cross-listed with Com S). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Com S 311 and some knowledge of programming.* Discussion and analysis of basic evolutionary principles and the necessary knowledge in computational biology to solve real world problems. Topics include character and distance based methods, phylogenetic tree distances, and consensus methods, and approaches to extract the necessary information from sequence-databases to build phylogenetic trees.

BCB 551. Computational Techniques for Genome Assembly and Analysis. (Cross-listed with Com S). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Com S 311 and some knowledge of programming.* Huang. Introduction to practical sequence assembly and comparison techniques. Topics include global alignment, local alignment, overlapping alignment, banded alignment, linear-space alignment, word hashing, DNA-protein alignment, DNA-cDNA alignment, comparison of two sets of sequences, construction of contigs, and generation of consensus sequences. Focus on development of sequence assembly and comparison programs.

BCB 565. Professional Practice in the Life Sciences. (Cross-listed with Pl P, Agron, An S, Hort, Micro, V MPM). Cr. arr. S. *Prereq: Graduate classification.* Professional discourse on the ethical and legal issues facing life science researchers. Offered in modular format; each module is four weeks.
A. Professional Practices in Research. (Cr. 1.0) Good scientific practices and professional ethics in the life sciences.
B. Intellectual Property and Industry Interactions. (Cr. 0.5) Ethical and legal issues facing life scientists involved in research interactions with industry.

BCB 567. Bioinformatics I (Fundamentals of Genome Informatics). (Cross-listed with Com S, Cpr E). (3-0) Cr. 3. F. *Prereq: Com S 208; Com S 330; Stat 341; credit or enrollment in Biol 315, Stat 430.* Biology as an information science. Review of algorithms and information processing. Generative models for sequences. String algorithms. Pairwise sequence alignment. Multiple sequence alignment. Searching sequence databases. Genome sequence assembly.

BCB 568. Bioinformatics II (Advanced Genome Informatics). (Cross-listed with GDCB, Stat, Com S). (3-0) Cr. 3. S. *Prereq: BCB 567, BBMB 301, Biol 315, Stat 430, credit or enrollment in Gen 411.* Advanced sequence models. Basic methods in molecular phylogeny. Hidden Markov models. Genome annotation. DNA and protein motifs. Introduction to gene expression analysis.

BCB 569. Bioinformatics III (Structural Genome Informatics). (Cross-listed with BBMB, Com S, Math, Cpr E). (3-0) Cr. 3. F. *Prereq: BCB 567, Gen 411, Stat 430.* Algorithmic and Statistical approaches in structural genomics including protein, DNA and RNA structure. Structure determination, refinement, representation, comparison, visualization, and modeling. Analysis and prediction of protein secondary and tertiary structure, disorder, protein cores and surfaces, protein-protein and protein-nucleic acid interactions, protein localization and function.

BCB 570. Bioinformatics IV (Computational Functional Genomics and Systems Biology). (Cross-listed with Com S, GDCB, Stat, Cpr E). (3-0) Cr. 3. S. *Prereq: BCB 567, Biol 315, Com S 311 and either 208 or 228, Gen 411, Stat 430.* Algorithmic and Statistical approaches in computational functional genomics and systems biology. Analysis of high throughput gene expression, proteomics, and other datasets obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, simulation and inference of transcriptional regulatory modules and networks, protein-protein interaction networks, metabolic networks, cells and systems: Dynamic systems, Boolean, and probabilistic models. Ontology-driven, network based, and probabilistic approaches to information integration.

BCB 590. Special Topics. Cr. arr. Repeatable. *Prereq: Permission of instructor.*

BCB 593. Workshop in Bioinformatics and Computational Biology. (1-0) Cr. 1. Repeatable. F.S. Current topics in bioinformatics and computational biology research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

BCB 596. Genomic Data Processing. (Cross-listed with Com S, GDCB). (3-0) Cr. 3. F. *Prereq: Some knowledge of programming.* Study the practical aspects of genomic data processing with an emphasis on hand-on projects. Students will carry out major data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contaminant removal; shotgun assembly procedures and EST clustering methods; genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank reports; and data collection and dissemination through the Internet. Useful post-genomic topics like microarray design and data analysis will also be covered.

BCB 597. Introductory Computational Structural Biology. (Cross-listed with Math). (3-0) Cr. 3. S. *Prereq: Math 561 and 562.* Mathematical and computational approaches to protein structure prediction and determination. Topics include molecular distance geometry, potential energy minimization, and molecular dynamics simulation.

BCB 599. Creative Component. Cr. arr.

Courses for graduate students

BCB 690. Student Seminar in Bioinformatics and Computational Biology. Cr. 1. Repeatable. S. Student research presentations.

BCB 691H. Faculty Seminar in Bioinformatics and Computational Biology. (Cross-listed with GDCB). (1-0) Cr. 1. Repeatable. Faculty research series.

H. Bioinformatics and Computational Biology. (Same as GDCB 691H).

BCB 697. Graduate Research Rotation. Cr. arr. F.S.SS. Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major.

BCB 699. Research. Cr. arr. Repeatable.

Biological/ Premedical Illustration

www.bpmi.iastate.edu

(Interdepartmental Undergraduate Program)

Program Committee: Lynn G. Clark, Chair; Dean Biechler, John Dorn, Stanley W. Harpole, Steven M. Herrnstadt, Harry Horner, Don Sakaguchi.

Undergraduate Study

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "communicating science through art," the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, free-lance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences. Design courses include: Dsn S 131 and Art 230, ArtIS 233, 308, and 330, BPM I 323, 326, 327, 337, and 497 plus 12 credits chosen from a list of approved upper level courses in art and design. Biological science courses include: LAS 101, Biol 211, 211L, 212, 212L, 255, 256, 351: Biol 356 or 366 or 454, and at least 9 credits chosen from a list of approved biological science courses. Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

Communication Proficiency Requirement. Students must earn a minimum of C in both English 150 and 250 or equivalent composition courses and in one advanced writing course numbered Engl 302 through 316.

Students in BPM I must complete a senior project or an internship experience (BPM I 497) in which they design and produce artwork that is suitable for publication or public display.

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses. The biological sciences must include Biol 211, 211L, 212, and 212L. The art and design courses must include BPM I 323 and 337, and an advanced drawing, illustration, electronic media, or painting course. For more information, contact the BPM I adviser in 102 Catt Hall or view the website listed above.

Courses primarily for undergraduate students

BPM I 323. Scientific Illustration Principles and Techniques. (Cross-listed with ArtIS). (0-6) Cr. 3. Repeatable. F. *Prereq: 6 credits in art and design and 3 credits in biological sciences.* Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

BPM I 326. Illustration and Illustration Software. (Cross-listed with ArtIS). (0-6) Cr. 3. S. *Prereq: 323.* Application of painting, drawing, and image making techniques to communication. Development of technical abilities using illustration software. Digital and print production techniques.

BPM I 327. Illustration as Communication. (Cross-listed with ArtIS). (0-6) Cr. 3. F. *Prereq: 326.* Studio problems in illustration emphasizing composition and communication. Problem solving methodologies.

BPM I 337. Application of Scientific Illustration Techniques. (Cross-listed with ArtIS). (0-6) Cr. 3. Repeatable. S. *Prereq: 327.* Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

BPM I 395. Field Illustration. Cr. arr. Repeatable. S.SS. *Prereq: Permission of instructor.* A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BPM I 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the program cooperative education coordinator, junior classification.* Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BPM I 435l. Illustrating Nature I Sketching. (Cross-listed with Ia LL). Cr. 2. SS. Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

BPM I 436l. Illustrating Nature II Photography. (Cross-listed with Ia LL). Cr. 2. SS. Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

BPM I 490. Independent Study. Cr. arr. Repeatable. *Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment.*

BPM I 494. Special Topics in Illustration. Cr. arr. Repeatable. Intensive exploration of illustration techniques in a studio or field setting.

BPM I 497. Illustration Internship. Cr. arr. Repeatable. *Prereq: Junior or senior classification in BPM I, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment.* Satisfactory-fail only.

Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering

Rameshwar Kanwar, Chair of Department

Distinguished Professor: Brown

Distinguished Professor (Emeritus): H. Johnson

University Professor: Bern

University Professor (Emeritus): Baker

Professors: Chen, Downing, Glanville, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Emeritus): Beer, Bekkum, Buchele, Bundy, Hazen, Hoerner, Keeney, Lovely, Maney, Mangold, Marley, Melvin, Miller, Pedersen, Riley, R. Smith

Professor (Collaborator): Laflen

Associate Professors: Anex, Bhandari, Birrell, Brumm, Burns, Freeman, Koziel, Mickelson, Raman, Steward, Tim

Associate Professor (Emeritus): Anderson, Greiner, Lorimor

Associate Professor (Collaborators): Han

Assistant Professors: Darr, Grewell, Helmers, Kaleita-Forbes, Keren, Kim, Soupir, Tang, Yu

Assistant Professor (Emeritus): Boyd, Bradshaw

Assistant Professors (Adjunct): Inyang, Shahan, Tong

Assistant Professors (Collaborators): Dunn, Malone

Lecturer: Snell

Courses primarily for undergraduate students

BSE 110. Experiencing Biological Systems Engineering. (0-2) Cr. 1. S. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of biological systems engineering. Report writing, co-ops, internships, careers, registration planning.

BSE 201. Entrepreneurship and Internship Seminar. (Cross-listed with A E, TSM). (1-0) Cr. 1. F.S. *Prereq: Sophomore classification in AE, AST, BSE, or I Tec.* 8 week course. Overview of the entrepreneurial process and its importance in the economy and the engineering/ technical workplace. Preparation for internship experiences. Relationship of workplace competencies to entrepreneurship, intrapreneurship, and internships; portfolios.

BSE 216. Fundamentals of Agricultural and Biosystems Engineering. (Cross-listed with A E). (2-2) Cr. 3. S. *Prereq: A E 110, Engr 160, credit or enrollment in Math 166.* Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.

BSE 301. Leadership and Ethics Seminar. (Cross-listed with A E, TSM). (1-0) Cr. 1. F.S. *Prereq: 201.* 8 week course. Leadership and ethics experiences through case studies and seminar presentations by practitioners. Relationship of workplace competencies to leadership and ethics; portfolios.

BSE 316. Applied Numerical Methods for Agricultural and Biosystems Engineering. (Cross-listed with A E). (2-2) Cr. 3. F. *Prereq: Engr 160, Math 266.* Computer aided solution of agricultural engineering problems by use of numerical techniques and Mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

BSE 380. Principles of Biological Systems Engineering. (3-0) Cr. 3. S. *Prereq: 216, Ch E 357 or M E 436.* Unit-operation analysis of biological systems, through the study of mass, energy, and information transport in bioresource production and conversion systems. Quantification and modeling of biomass production, ecological interactions, and bioreactor operations.

BSE 401. Professionalism Seminar. (Cross-listed with A E, TSM). (1-0) Cr. 1. F.S. *Prereq: 301.* 8 week course. Examination of professionalism in the context of engineering and technology. Time, project and personnel management. Communications and professional portfolios. Professional licensure. Transition to professional careers.

BSE 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with A E, BioE, C E). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BSE 415. Agricultural Engineering Design I. (Cross-listed with A E). (1-2) Cr. 2. F.S. *Prereq: A E 271 or 272, E M 324.* Identification of current design problems in agricultural engineering. Development of alternate solutions using creativity and engineering analysis and synthesis techniques. Nonmajor graduate credit.

BSE 416. Agricultural Engineering Design II. (Cross-listed with A E). (1-2) Cr. 2. F.S. *Prereq: 415.* Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

BSE 480. Engineering Analysis of Biological Systems. (Dual-listed with 580). (Cross-listed with EnSci). (2-2) Cr. 3. F. *Prereq: 216; Math 266; Biol 211 or 212; M E 330.* Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues.

BSE 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with A E, BRT, C E). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BSE 580. Engineering Analysis of Biological Systems. (Dual-listed with 480). (Cross-listed with EnSci). (2-2) Cr. 3. F. *Prereq: 216; Math 266; Biol 211 or 212; M E 330.* Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues. Students enrolled in A E 580 will be required to answer additional exam questions and report on two journal articles.

Biology

www.biology.iastate.edu

(Interdepartmental Undergraduate Program)

James T. Colbert, Program Coordinator

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution and Organismal Biology and the Department of Genetics, Development and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Undergraduate Study

Biology majors, start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, five with labs. The first year (Biol 211, 211L, 212, 212L) provides a broad introduction to the nature of life. During the first year, students also take Biol 110 and 111, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. The second year explores concepts in ecology in Biol 312 and the principles of genetics in Biol 313 and 313L. The third year includes courses in cell and molecular biology (Biol 314, 314L) and evolutionary biology (Biol 315). Biology majors must take an additional 20 credits of biological science at the 300 level or above from an approved list of courses. Of these, at least 8 credits must be taken as biology courses, and a minimum of two laboratory or field courses must also be included. Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Contact the Biology Program Office for details regarding differences in general education and course requirements which are specific to these colleges.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one or more of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. The Biology Program has identified areas of special interest for many disciplines within Biology, with supporting 300-, 400-, and 500-level courses, enabling majors to gain substantial experience in these areas prior to graduation. Faculty advisers with experience in these subject areas work with students to provide advice about preparing for future training in a range of Biology-related professions. Consult the Biology Program advising staff for more information.

Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major; advanced students should consider including 500 level courses in their programs. Check the Biology Program's World Wide Web site for a complete listing of acceptable upper-level life science courses

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in

the biology major. Courses in field and aquatic biology are offered at the Iowa Lakeside Laboratory. Courses in marine biology can be taken at the Gulf Coast Research Laboratory in Mississippi. Iowa State University is a member of the Organization for Tropical Studies, and students may take courses at the organization's field Station in Costa Rica. Courses taught at field Stations associated with other universities throughout the country may also be applied to the degree. Attending a summer field Station adds an important component to an undergraduate program of study.

Courses Offered at Iowa Lakeside Laboratory at Milford, Iowa

Iowa Lakeside Lab is an Iowa Regents facility located at Lake Okoboji in northwest Iowa where various summer courses in field and aquatic biology are offered. Any of the following courses taken at the lab are directly applicable to the degree program in Biology. See the *Iowa Lakeside Laboratory* entry elsewhere in the catalog for a full description of the courses.

Courses offered at Gulf Coast Research Laboratory

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number Biol 480. Written permission of the Biology Program Director is required for this arrangement. Courses that are available each summer may be viewed at www.coms.usm.edu.

Courses offered at Summer Biological Field Stations

Courses taken at summer field Stations may be transferred to Iowa State University as credit in Biol 481. Such Stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to field Stations in different biomes, e.g. marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts.

Courses offered by the Organization for Tropical Studies

Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as Biology 482. For further information check www.ots.duke.edu or inquire in the Biology Program Office.

Undergraduate research. Students who have interest in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in Biol 490. Internship experiences are often available at other universities and at industrial or government laboratories. Students participating in such projects may receive internship credit in Biol 494. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education.

International experience. Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in Biol 394 or similar courses in other departments. Many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in Emerging Global Disease, International Studies, or a foreign language can add an international emphasis to a degree in biology. Biology advisers are eager to help plan and arrange such experiences with interested students.

Supporting course requirements. Understanding the modern biological sciences requires an understanding of the physical and Mathematical sciences. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics are required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take: two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Students in the College of Liberal Arts and Sciences, must fulfill the foreign language and general education requirements listed elsewhere in this catalog for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college as listed elsewhere in the catalog.

Given the important role of writing in the modern sciences, biology majors must demonstrate English competency by earning a minimum of C in both English 150 and 250 or equivalent composition courses and in one advanced writing course numbered English 302 through 316, or JI MC 347.

Customizing a degree

The advantage of choosing a biology major is the flexibility it allows in customizing a program of study to individual goals. That said, the faculty recognizes that many students studying biology have common goals. Consequently, the faculty has developed specific recommendations for students interested in pursuing the following areas of study:

Teacher Licensure. Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Premedical and Prehealth Professions Studies. Biology majors who will go on to medical or health professional schools are urged to determine the entrance requirements for the institutions where they might study. A list of courses recommended for those who wish to pursue a pre-med curriculum is available in the Biology Program office.

Preveterinary Studies. Many students whose goal is to attend veterinary school choose Biology as their major. The requirements for entrance to the Iowa State Veterinary College are listed elsewhere in this bulletin and should be consulted as programs of study are planned.

Preparation for Graduate Studies. Students who are considering graduate school to further their education in a biological sciences should identify a faculty member who has similar interests. Faculty can mentor students as undergraduates providing a smooth transition to graduate school.

Minor

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology, and includes the completion of the specific courses listed below: Biol 211 and 211L, 212 and 212L, and 7 credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must only apply to the minor. For more information, see the Biology Program Web Site, or contact the Biology, Environmental Science, and Genetics Student Services Office in 103 Bessey Hall.

Graduate Study

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Physiology; Toxicology; Immunobiology; and Environmental Science are also available. (See *Index*.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Courses primarily for undergraduate students

Biol 101. Introductory Biology. (3-0) Cr. 3. F.S.SS. Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Non-majors only. Only one of Biol 101 or 211 may count toward graduation.

Biol 110. Introduction to Biology. Cr. 0.5. F. Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Satisfactory-fail only.

Biol 111. Opportunities in Biology. (1-0) Cr. 0.5. S. Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Satisfactory-fail only.

Biol 155. Human Biology. (3-0) Cr. 3. F.S. A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science.

Biol 165. Field Botany. (2-4) Cr. 2. F.SS. 8 weeks. Field and laboratory studies of plants in various local habitats. Includes trees, shrubs, flowering plants and other green plants, lichens and fungi. Not recommended for students with professional interest in plant science.

Biol 173. Environmental Biology. (Cross-listed with Env S). (3-0) Cr. 3. F.S. An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Non-majors only.

Biol 204. Biodiversity. (Cross-listed with Env S). (4-0) Cr. 2. S. *Prereq: One course in life sciences*. Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Not intended for major credit in the biological sciences. Half semester course.

Biol 211. Principles of Biology I. (3-0) Cr. 3. F.S. *Prereq: High school biology and chemistry or credit or enrollment in Chem 163 or 177.* Introduction to the nature of life, including the cellular basis of life; the nature of heredity; evolution; diversity of microbial, plant, and animal life; and principles of ecology. Intended for life science majors. Only one of Biol 101 or 211 may count toward graduation.

Biol 211L. Principles of Biology Laboratory I. (0-3) Cr. 1. F.S. *Prereq: Credit or enrollment in 211.* Laboratory to accompany 211.

Biol 212. Principles of Biology II. (3-0) Cr. 3. F.S. *Prereq: 211.* Introduction to the nature of life, including the cellular basis of life; energy relationships; the nature of heredity; evolution; form and function of microbial, plant, and animal life.

Biol 212L. Principles of Biology Laboratory II. (0-3) Cr. 1. F.S. *Prereq: credit or enrollment in 212.* Laboratory to accompany 212.

Biol 255. Fundamentals of Human Anatomy. (3-0) Cr. 3. F. *Prereq: high school biology and chemistry, or Biol 101.* An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Not intended for major credit in biology.

Biol 255L. Fundamentals of Human Anatomy Laboratory. (0-3) Cr. 1. F. *Prereq: Credit or enrollment in 255.* Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Not intended for major credit in biology.

Biol 256. Fundamentals of Human Physiology. (3-0) Cr. 3. S. *Prereq: high school biology and chemistry, or Biol 101, or 255 (recommended).* An introduction to human physiology, studying the function of all body systems. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider 335 for their physiology background. Not intended for major credit in biology.

Biol 256L. Fundamentals of Human Physiology Laboratory. (0-3) Cr. 1. S. *Prereq: Credit or enrollment in 256.* Student-conducted experiments investigating concepts of human physiology with computer data acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical students should consider 335 for their anatomy and physiology background. Not intended for major credit in biology.

Biol 258. Human Reproduction. (Cross-listed with W S). (3-0) Cr. 3. F. *Prereq: Biol 101, or 155, or 211.* Anatomy and physiology of human reproductive systems, including fertility, pregnancy, and delivery.

Biol 305. Embryology. (2-0) Cr. 2. S. *Prereq: 212.* Basic principles and processes of development. Course will cover classical as well as current aspects of developmental biology. Emphasis will be on vertebrate model systems. Not acceptable for credit in the major for Biology or Genetics major.

Biol 305L. Embryology Laboratory. (0-3) Cr. 1. S. *Prereq: Credit or enrollment in 305.* Selected experiments demonstrating basic concepts in development. Mixture of live embryo experiments and vertebrate developmental anatomy.

Biol 306. Metabolic Physiology of Mammals. Cr. 3. Prereq: 211, 212. Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached form an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of organismal physiology; energy and water balances, physiology of rest exercise, and environmental stress. Students cannot receive credit for both Biol 306 and Biol 335

Biol 307. Women in Science and Engineering. (Cross-listed with W S). (3-0) Cr. 3. F. *Prereq: a 200 level course in science, engineering or women's studies; Engl 250.* The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives. Factors contributing to underrepresentation; feminist critiques of science; examination of successful strategies.

Biol 312. Ecology. (Cross-listed with A Ecl, EnSci). (3-3) Cr. 4. F.SS. *Prereq: 211L and 212L.* Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

Biol 313. Principles of Genetics. (Cross-listed with Gen). (3-0) Cr. 3. F.S. *Prereq: 211, 211L, 212, and 212L.* Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

Biol 313L. Genetics Laboratory. (Cross-listed with Gen). (0-3) Cr. 1. F.S. *Prereq: Credit or enrollment in 313.* Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

Biol 314. Principles of Molecular Cell Biology. (3-0) Cr. 3. F.S. *Prereq: Biol 313.* Integration of elementary principles of metabolism, bioenergetics, cell structure and function to develop a molecular view of how the cell works.

Biol 314L. Molecular Cell Biology Laboratory. (0-3) Cr. 1. F.S. *Prereq: Credit or enrollment in 314.* Laboratory to accompany Biology 314.

Biol 315. Biological Evolution. (3-0) Cr. 3. F.S. *Prereq: 313.* The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation. Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns.

Biology 328. Cell Physiology of Human Diseases. (3-0) Cr. 3. Prereq: 212. Survey of macromolecular and ultrastructural organization of animal cell and membrane structures, including recent molecular discoveries in areas of genomics and proteomics involved with cell growth and cell interactions. Emphasis on selected topics of cellular functions with known human disease states.

Biol 330. Principles of Plant Physiology. (3-0) Cr. 3. *Prereq: Biol 313 or Gen 320; Biol 314 or BBMB 301; Chem 231 or 332; Phys 106 or 111.* An overview of classical and current concepts, principles and approaches regarding the basic mechanisms of plant function underlying growth, development and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism and photosynthesis..

Biol 330L. Principles of Plant Physiology Laboratory. (0-3) Cr. 1. *Prereq: Credit or enrollment in 330.* Laboratory to accompany Biol 330. Experiments and explorations illustrating fundamental principles of plant physiology. Nonmajor graduate credit.

Biol 335. Principles of Animal Physiology. (3-3) Cr. 4. F.S. *Prereq: Biol 314.* Introduction to systemic functions with emphasis on mammals. Nonmajor graduate credit.

Biology 336. Ecological and Evolutionary Animal Physiology. (3-0) Cr. 3. *Prereq: 211, 212.* Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.

Biol 351. Comparative Chordate Anatomy. (3-4) Cr. 5. S. *Prereq: 212, junior classification.* The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates; comparisons of anatomic structures among major groups, the adaptive significance of anatomic structures. Laboratory involves dissection of representative species.

Biol 352. Vertebrate Histology. (3-3) Cr. 4. S. *Prereq: 212.* Microscopic structure of vertebrate tissues and organs, with an introduction to histological techniques.

Biol 353. Introductory Parasitology. (Cross-listed with Micro). (3-3) Cr. 4. F. *Prereq: Biol 212.* Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

Biol 354. Animal Behavior. (3-0) Cr. 3. F. *Prereq: 212.* Ethological and Sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care).

Biol 354L. Laboratory in Animal Behavior. (0-3) Cr. 1. F. *Prereq: Credit or enrollment in Biol 354.* Laboratory techniques for observation, description and analysis of animal activities; independent projects.

Biol 355. Plants and People. (3-0) Cr. 3. S. *Prereq: Credit in 211 and 211L.* Uses of plants and fungi by humans and the importance of plants in the past, present and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern Societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

Biol 356. Dendrology. (Cross-listed with For). (2-4) Cr. 4. F. *Prereq: Biol 211.* Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Natural disturbances, human impacts, management and restoration concerns for major North American forest regions will be addressed. Nonmajor graduate credit.

Biol 364. Invertebrate Biology. Cr. arr. F. *Prereq: Biol 212.* Emphasis on diversity, development, physiology and behavior of invertebrate organisms-the "spineless wonders" of the world. Laboratory involves hands-on study and investigation of living invertebrates.

Biol 365. Vertebrate Biology. (Cross-listed with A Ecl). (3-2) Cr. 4. F. *Prereq: 212, 212L.* Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ Systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

Biol 366. Plant Systematics. (2-4) Cr. 4. S. *Prereq: 211.* Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, identification and field study of local plants.

Biol 371. Ecological Methods. (Cross-listed with A Ecl). (2-2) Cr. 3. F. *Prereq: 312; Stat 101 or 104.* Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor graduate credit.

Biol 381. Environmental Systems I: Introduction to Environmental Systems. (Cross-listed with EnSci, Env S, Micro). (2-4) Cr. 4. F. *Prereq: 12 credits of natural science including Biology and chemistry.* Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

Biol 382. Environmental Systems II: Analysis of Environmental Systems. (Cross-listed with EnSci). (2-4) Cr. 4. S. *Prereq: EnSci 381.* Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

Biol 393. North American Field Trips in Biology. Cr. arr. Repeatable. *Prereq: Two courses in the biological sciences and by approval of application.* Extended field trips, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip.
B. Field trip. Cr. 1 to 3. Trip to North American location under supervision of faculty member. Report required.

Biol 394. International Field Trips in Biology. Cr. arr. Repeatable. *Prereq: Two courses in the biological sciences and by approval of application.* Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip.
B. Field trip. Cr. 1 to 3. Trip to international location under supervision of faculty member. Report required. Offered on a satisfactory-fail grading basis only.

Biol 423. Developmental Biology. (3-0) Cr. 3. S. *Prereq: Biol 313.* Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

Biol 423L. Developmental Biology Laboratory. (0-3) Cr. 1. S. *Prereq: Credit or enrollment in 423.* Experiments and explorations illustrating fundamental principles of multicellular development.

Biol 428. Topics in Cell Biology. (3-0) Cr. 3. S. *Prereq: 314.* Selected topics on biological organization and function at the cellular level. Emphasis on biomembranes. Nonmajor graduate credit.

Biol 434. General Comparative Endocrinology. Cr. arr. S. *Prereq: 314.* Dual-listed with EEOB 534. Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones. Laboratory techniques for studying hormonal phenomena. Nonmajor graduate credit.

Biol 436. Neurobiology. (3-0) Cr. arr. F. *Prereq: Biol 335 or Psych 310; physics recommended; permission of instructor to enroll in lab.* (3-3) for 4 cr. Integration, coding, plasticity, and development in nervous systems. Nonmajor graduate credit.

Biol 436L. Neurobiology Laboratory. (0-3) Cr. 1. F. Prereq: Credit or enrollment in 436; permission of instructor to enroll in lab. Laboratory experimentation and demonstrations on integration, coding plasticity, and development in nervous systems. Nonmajor graduate credit.

Biol 439. Environmental Physiology. Cr. arr. Alt. S., offered 2010. *Prereq: 355 or A Ecl 311; physics recommended.* Dual-listed with EEOB 539. Physiological adaptations to the environment with an emphasis on vertebrates. Nonmajor graduate credit.

Biol 444. Introduction to Bioinformatics. (Cross-listed with BCB, Com S, Cpr E, Gen). (4-0) Cr. 4. F. *Prereq: Math 165 or Stat 401 or equivalent.* Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

Biol 454. Plant Anatomy. (3-3) Cr. 4. F. *Prereq: Biol 212L; 366 recommended.* Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds. Nonmajor graduate credit.

Biol 455. Bryophyte and Lichen Biodiversity. (Dual-listed with EEOB.) Cr. 3. *Prereq: Biol 212, Biol 212L.* Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning. Nonmajor graduate credit.

Biol 456. Principles of Mycology. (Cross-listed with Micro). (2-3) Cr. 3. F. *Prereq: 10 credits in biological sciences.* Morphology, diversity and ecology of fungi; their relation to agriculture and industry and human health. Nonmajor graduate credit.

Biol 457. Herpetology. (Cross-listed with A Ecl). (2-3) Cr. 3. F. *Prereq: A Ecl 365 or Biol 351.* Dual-listed with EEOB 557. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

Biol 458. Ornithology. (Cross-listed with A Ecl). (2-3) Cr. 3. S. *Prereq: A Ecl 365 or Biol 351.* Dual-listed with EEOB 558. Biology, ecology, evolution, and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

Biol 459. Mammalogy. (Cross-listed with A Ecl). (2-3) Cr. 3. S. *Prereq: 351 or A Ecl 365.* Dual-listed with EEOB 559. Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

Biol 462. Evolutionary Genetics. (Cross-listed with Gen). (3-0) Cr. 3. S. *Prereq: Biol 315.* The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

Biol 465. Morphometric Analysis. (3-2) Cr. 4. Alt. S., offered 2010. *Prereq: Stat 401.* Dual-listed with EEOB 565. A comprehensive overview of the theory and methods for the analysis of biological shape with emphasis on data acquisition, standardization, statistical analysis, and visualization of results. Methods for both landmark and outline data will be discussed. Nonmajor graduate credit.

Biol 471. Introductory Conservation Biology. (3-0) Cr. 3. Prereq: Biol 312. Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

Biol 472. Community Ecology. (2-2) Cr. 3. S. *Prereq: Biol 312.* The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecifc interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates. Nonmajor graduate credit.

Biol 474. Plant Ecology. (3-0) Cr. 3. S. *Prereq: Biol 312.* Principles of plant population and community ecology. Nonmajor graduate credit.

Biol 476. Functional Ecology. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Biol 312.* Dual-listed with EEOB 576. The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

Biol 480. Studies in Marine Biology. Cr. arr. Repeatable. Courses taken at Gulf Coast Research Laboratory and other marine biological Stations are transferred to Iowa State University under this number.

Biol 481. Summer Field Studies. Cr. arr. Repeatable. Courses taken at summer biological field Stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field Stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

Biol 482. Tropical Biology. Cr. arr. Repeatable. *Prereq: One year of college biology; knowledge of Spanish desirable but not required.* Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

Biol 484. Ecosystem Ecology. (Cross-listed with EnSci). (3-0) Cr. 3. S. *Prereq: Combined 12 credits in biology and chemistry.* Introduction of the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

Biol 486. Aquatic Ecology. (Cross-listed with EnSci, A Ecl). (3-0) Cr. 3. F. *Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301.* Dual-listed with EEOB 586. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. Nonmajor graduate credit.

Biol 486L. Aquatic Ecology Laboratory. (Cross-listed with A Ecl, EnSci). (0-3) Cr. 1. F. *Prereq: Concurrent enrollment in 486.* Dual-listed with EEOB 586L. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

Biol 487. Microbial Ecology. (Cross-listed with EnSci, Micro). (3-0) Cr. 3. F. *Prereq: Six credits in biology and 6 credits in chemistry.* Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

Biol 488. Identification of Aquatic Organisms. (0-3) Cr. 1. F.S. On line taxonomic and identification exercises to accompany 486. Instruction and practice in the identification of algae, aquatic macrophytes, zooplankton, and benthos. Nonmajor graduate credit.

Biol 489. Population Ecology. (2-2) Cr. 3. F. *Prereq: Biol 312, Stat 101 or 104, a course in calculus, or graduate standing.* Dual-listed with EEOB 589. Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

Biol 490. Independent Study. Cr. arr. Repeatable. *Prereq: 8 credits in biology and permission of instructor.* Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.
I. Iowa Lakeside Laboratory. (Same as Ia LL 490I) Cr. 1 to 4 each time taken. See Iowa Lakeside Laboratory.
R. Biological research. Cr. 1 to 6 each time taken. For students registering to work on an independent research project under the direction of a faculty member.

Biol 491. Laboratory Teaching Experience. Cr. arr. Repeatable. *Prereq: Permission of supervising staff. For students* registering to be undergraduate laboratory assistants. Satisfactory-fail only.

Biol 494. Biology Internship. Cr. arr. Repeatable. *Prereq: 8 credits in biology and permission of instructor.* Intended to provide credit for significant professional experiences in biological sciences. A written proposal is required prior to registration. Intended for Biology majors.

Biol 495. Undergraduate Seminar. Cr. arr. Repeatable. F.S. *Prereq: 15 credits in biological science; permission of instructor.* Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

Biol 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: Junior classification and permission of the department cooperative education coordinator.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Biomedical Sciences

James Bloedel, Chair of Department

Distinguished Professors: Anderson, Kanthasamy

Distinguished Professors (Emeritus): Christensen, Dellmann

University Professor: Draper

University Professors (Emeritus): Adams, Reece

Professors: Bloedel, Evans, Franke, Goff, Hsu, King, Lin, Martin, Nara, Riedesel, Sharp, Uemura, Ware

Professors (Emeritus): Ahrens, Bal, Carithers, Dyer, Engen, Ghoshal, Randic

Associate Professors: Bracha, Carlson, Day, Jeftinija, Millman, Sakaguchi, Singh

Associate Professors (Emeritus): Crump, Martin

Associate Professors (Collaborators): Hamouche, Kangas, Richt

Assistant Professors: M. Greenlee, Kanthasamy, Kimber, Palic, Rowe

Assistant Professor (Adjunct): Singh

Assistant Professors (Collaborators): Barton, J. Greenlee, Kesl, Kwon

Senior Lecturer: Bolser

Lecturer: Kibbel

Professional Program of Study

For professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

A good foundation in anatomy, physiology, and pharmacology of animals is necessary to understand the mechanisms of animal disease processes and their treatment. Study of mammalian anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems relevant to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacology to include pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

Graduate Programs

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit. Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer's disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nematode ion-channels, Parkinson's disease, pharmacology of schistosomiasis, pharmacology of salmonellosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells. The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

Courses primarily for undergraduate students

B M S 329. Anatomy and Physiology of Domestic Animals. (3-0) Cr. 3. S. *Prereq: Biol 212, 212L.* Survey of body systems of domestic animals. Provides a medical science orientation particularly useful to students in a preveterinary medicine curriculum.

Courses primarily for professional curriculum students

B M S 330. Principles of Morphology I. (Dual-listed with 530). (3-6) Cr. 5. F. *Prereq: First-year classification in veterinary medicine.* Anatomy of the dog.

B M S 331. Principles of Morphology II. (Dual-listed with 531). (2-6) Cr. 4. S. *Prereq: First-year classification in veterinary medicine.* Comparative and topographic anatomy of horse, ruminants, pig, and chicken.

B M S 333. Biomedical Sciences I. (5-3) Cr. 6. F. *Prereq: First-year classification in veterinary medicine.* Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system.

B M S 334. Biomedical Sciences II. (5-3) Cr. 6. S. *Prereq: First-year classification in veterinary medicine.* Microscopic anatomy of the immune system and integument. Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system.

B M S 337. Neuroanatomy. (Dual-listed with 537). (2-2) Cr. 3. S. *Prereq: First-year classification in veterinary medicine.* Neuroanatomy of domestic animals.

B M S 339. Clinical Foundations I. (Cross-listed with V C S). (0-2) Cr. 1. F. *Prereq: First-year classification in veterinary medicine.* Canine physical examination; basic behavior, animal handling and restraint; medical record keeping.

B M S 345. Case Study I. (0-2) Cr. 1. F. *Prereq: First-year classification in veterinary medicine.* Clinical applications of basic sciences taught concurrently in the fall semester of the first year curriculum in veterinary medicine.

B M S 346. Case Study II. (0-1) Cr. 1. S. *Prereq: First-year classification in veterinary medicine.* Clinical applications of basic sciences taught concurrently in the spring semester of the first year curriculum in veterinary medicine.

B M S 354. General Pharmacology. (Dual-listed with 554). (3-0) Cr. 3. S. *Prereq: 333, 334.* General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems. Nonmajor graduate credit.

B M S 355. Topics in Molecular Veterinary Medicine. (Dual-listed with 555). (1-0) Cr. 1. S. *Prereq: Enrollment in or completion of 354..* Receptor and signal transduction anomalies and their diagnosis in veterinary medicine.

B M S 401. Intro to Aquatic Animal Medicine. (Cross-listed with A Ecl). (1-2) Cr. 1. S. 8 week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

B M S 403. Behavior of Domestic Animals. (1-0) Cr. 1. Alt. S., offered 2010. *Prereq: Classification in veterinary medicine.* Normal and abnormal behavior of domestic animals.

B M S 415. Anatomy of Laboratory Animals. (Dual-listed with 515). (1-2) Cr. 2. Alt. S., offered 2010. *Prereq: One year of college biology.* Gross and microscopic anatomy of laboratory animals.

B M S 416. Avian Anatomy. (Dual-listed with 516). (1-2) Cr. 2. Alt. S., offered 2011. *Prereq: One year college biology.* Gross and microscopic anatomy of domestic, exotic, and pet birds.

B M S 421. Special and Applied Anatomy of the Horse. (1-3) Cr. 2. F. *Prereq: 330 or 331 or An S 316 or 415, classification in veterinary medicine.* Special and applied anatomy of the horse. Nonmajor graduate credit.

B M S 443. Pharmacology and Therapeutics. (Dual-listed with 543). (3-0) Cr. 3. F. *Prereq: 354.* Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.*
H. Honors

B M S 496. International Preceptorship. (0-40) Cr. arr. Repeatable. S. *Prereq: Second-year classification in veterinary medicine.* International Preceptorships and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

B M S 501. Selected Research Methods in Biomedical Sciences. (0-8) Cr. 3. F.S.SS. *Prereq: Graduate classification, permission of a BMS faculty member.* Experience in biomedical techniques in selected BMS laboratories that include but is not limited to cytochemical methods, molecular biological techniques, extracellular and intracellular unit recording, microiontophoresis, microinjection, spectrophoto-fluorometric analysis of chemicals, use of radioisotopes, radioimmunoassay, Ca2+ imaging, confocal microscopy, fluorescence microscopy, and immunocytochemistry.

B M S 515. Anatomy of Laboratory Animals. (Dual-listed with 415). (1-2) Cr. 2. Alt. S., offered 2010. *Prereq: One year of college biology and graduate classification..* Gross and microscopic anatomy of laboratory animals.

B M S 516. Avian Anatomy. (Dual-listed with 416). (1-2) Cr. 2. Alt. S., offered 2011. *Prereq: One year college biology.* Gross and microscopic anatomy of domestic, exotic, and pet birds.

B M S 530. Principles of Morphology I. (Dual-listed with 330). (3-6) Cr. 5. F. *Prereq: 10 credits in biological science and permission of the instructor.* Anatomy of the dog.

B M S 531. Principles of Morphology II. (Dual-listed with 331). (2-6) Cr. 4. S. *Prereq: B M S 530.* Comparative and topographic anatomy of horse, ruminants, pig, and chicken.

B M S 537. Neuroanatomy. (Dual-listed with 337). (2-2) Cr. 3. S. *Prereq: 10 credits in biological science and permission of the instructor.* Neuroanatomy of domestic animals.

B M S 542. Introduction to Molecular Biology Techniques. (Cross-listed with GDCB, BBMB, BCB, FS HN, Hort, NutrS, VDPAM, EEOB, NREM, V MPM). Cr. 1. Repeatable. F.S.SS. *Prereq: Graduate classification.* Workshops in basic molecular biology techniques and related procedures. Satisfactory-fail only.
A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.SS.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonol antibody production. (S.SS.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

B M S 543. Pharmacology and Therapeutics. (Dual-listed with 443). (3-0) Cr. 3. F. *Prereq: 554.* Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 549. Advanced Vertebrate Physiology I. (Cross-listed with An S, Kin). (3-0) Cr. 3. F. *Prereq: Biol 335, credit or enrollment in BBMB 404 or 420.* Neurophysiology, sensory systems, muscle, neuroendocrinology, and endocrinology.

B M S 552. Advanced Vertebrate Physiology II. (Cross-listed with An S, Kin, NutrS). (3-0) Cr. 3. S. *Prereq: Biol 335, credit or enrollment in BBMB 404 or 420.* Cardiovascular, renal, respiratory, and digestive physiology.

B M S 554. General Pharmacology. (Dual-listed with 354). (Cross-listed with Tox). (3-0) Cr. 3. S. *Prereq: 549 and 552; BBMB 404, 405.* General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

B M S 555. Topics in Molecular Veterinary Medicine. (Dual-listed with 355). (1-0) Cr. 1. S. *Prereq: Enrollment in or completion of 554 and graduate classification.* Receptor and signal transduction anomalies and their diagnosis in veterinary medicine.

B M S 556. Cellular, Molecular and Developmental Neuroscience. (Cross-listed with GDCB, Neuro). Cr. arr. F. *Prereq: Biol 335 or Biol 436; physics recommended.* Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

B M S 575. Cell Biology. (Cross-listed with Tox). (3-0) Cr. 3. F. *Prereq: 10 credits in biological science and permission of instructor.* A multi-instructor course covering major topics in cell structure and function, including: universal features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper.

B M S 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.*
A. Anatomy
B. Physiology
C. Pharmacology
D. Cell biology

B M S 599. Creative Component. Cr. arr. F.S.SS. *Prereq: Enrollment in BMS graduate program, and permission of instructor..* Creative component for non-thesis Master of Science degree.

Courses for graduate students

B M S 688. Research Review. Cr. 1. Repeatable. F.S. *Prereq: Enrollment in BMS graduate program.* A forum for B M S students to gain experience in the critical exchange of ideas through oral presentation and discussion of scientific information.

B M S 690. Advanced Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.*
A. Anatomy
B. Physiology
C. Pharmacology
D. Cell biology

B M S 698. Seminar. Cr. arr. Repeatable. F.S.SS. *Prereq: Enrollment in BMS graduate program..*
A. Cr. R each time taken. F.
S. Attendance required. B. Cr. 1 each time taken. F.S.S
S. Attendance and presentation required. Offered on a satisfactory-fail grading basis only.

B M S 699. Research. Cr. arr. Repeatable. F.S.SS. *Prereq: Enrollment in BMS graduate program..*
A. Anatomy
B. Physiology
C. Pharmacology
D. Cell biology

Biorenewable Resources and Technology

www.biorenew.iastate.edu

(Interdepartmental Graduate Program)

D. R. Raman, Chair

Program Coordinating Committee: R. Anex, R.C. Brown, L. Johnson, G. Kraus, M. Liebman, B. Nikolau, B. Shanks

Over 60 Iowa State University faculty members from 16 academic departments and five colleges are affiliated with the Biorenewable Resources and Technology (BRT) graduate program; a complete and up-to-date listing is maintained at: www.biorenew.iastate.edu.

Graduate Study

The graduate program in Biorenewable Resources and Technology (BRT) offers students advanced study in the use of plant and crop-based resources in the production of biobased products (fuels, chemicals, materials, and energy). The BRT program was the first graduate program in biorenewable resources established in the United States. This multi-disciplinary program offers the degrees of master of science and doctor of philosophy in Biorenewable Resources and Technology, and a minor to students taking major work in other departments. The curriculum is designed to encourage students to obtain co-major degrees in Biorenewable Resources and Technology and a more traditional science or engineering discipline. A thesis is required for the master of science degree.

Prerequisite to major graduate work is a bachelor's degree or prior graduate training in engineering or a physical or biological discipline, including agricultural sciences.

The core required courses in the Biorenewable Resources and Technology graduate program include: a foundation course entitled BRT 501 "Fundamentals of Biorenewable Resources", BRT 506 "Biobased Products Seminar", BRT 590 "Special Topics", and BRT 591L "Biorenewable Resources Laboratory". The elective core courses must come from an approved list of courses from a variety of traditional disciplines encompassing one or more of four areas crucial to the development of biobased products: plant science, production, processing, and utilization. Students must complete elective core courses from at least three of the four topical areas, selected in consultation with the student's Program of Study (POS) committee

Graduates of the program will be equipped with skills to develop and manage cost effective and environmentally attractive technologies for producing fuels, chemicals, materials, foods and energy from renewable plant biomass.

Information on application procedures and specific requirements of the major can be obtained from the following Internet address: www.biorenew.iastate.edu

Courses primarily for graduate students, open to qualified undergraduate students

BRT 501. Fundamentals of Biorenewable Resources. (3-0) Cr. 3. S. *Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics.* Introduction to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Survey of biorenewable resource base and properties; description of biobased products; methods of biorenewable resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

BRT 506. Biobased Products Seminar. Cr. arr. F.S. *Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics.* Taken one semester for 1 credit and remaining semesters as R credit. Seminars and discussion on current topics in biorenewable resources and technology. Satisfactory-fail only.
A. Cr. 1. Paper required.
B. Cr.
R. Attendance only.

BRT 511. Bioprocessing and Bioproducts. (Cross-listed with A E, BSE, C E). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 101 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofules, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis. Term paper for graduate level only.

BRT 535. Thermochemical Processing of Biomass. (Cross-listed with M E). (3-0) Cr. 3. S. *Prereq: Undergraduate course work in thermodynamics and transport phenomena.* Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels.

BRT 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Investigation of an approved topic on an individual basis. Course content and requirements to be designed and developed in consultation with the student's major professor or instructor, but in all cases a formal report should be written.

BRT 591L. Biorenewable Resources Laboratory. (0-3) Cr. 1. Repeatable. F.S.SS. *Prereq: Permission of student's major professor and instructor.* Special topics laboratory and research experience in biorenewable resources and technology that affords an experience beyond thesis-focused research. To be designed in consultation with the student's major professor and instructor. A laboratory report is required. For student in the BRT program, BRT 591L may be taken twice. For student in the BRT program, BRT 591L may be taken twice.

Courses for graduate students

BRT 699. Research. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of student's major professor.*

Botany

www.eeob.iastate.edu

Interdepartmental Graduate Major

Robert S. Wallace, Director of Graduate Education

Participating Faculty: D. Bassham, L. Clark, J. Colbert, W. Crumpton, D. Farrar (Emeritus), H. Horner, T. Jurik, K. Moloney, J. Nason, D. Oliver, J. Pritchard (Adjunct), J. Raich, S. Rodermel, L. Tiffany (Emeritus), M. Spalding, A. van der Valk, R. Wallace, J. Wendel, B. Wilsey, E. Wurtele

Undergraduate Study

Students wishing to pursue an undergraduate degree in the basic plant sciences are encouraged to investigate the numerous possibilities available to them at Iowa State University. The undergraduate Biology Program, jointly administered by faculties of the departments of Ecology, Evolution, and Organismal Biology (EEOB) and Genetics, Cell and Developmental Biology (GDCB), includes a wide spectrum of opportunities for students to develop their academic interests through the study of plant biology. Students can major in Biology in the College of Liberal Arts and Sciences or in the College of Agriculture. Contact the Biology Student Services office in 103 Bessey Hall for general information about the Biology Program. For those students interested in applied plant sciences, undergraduate majors in Agronomy, Horticulture, and Forestry are also available through the College of Agriculture.

Graduate Study

The Botany Graduate Program offers work for the degrees Master of Science and Doctor of Philosophy with a graduate major in Botany, and minor work for students majoring in other departments or graduate programs. Within the Botany Graduate Major, one of the following areas of specialization may be designated: aquatic and wetland ecology, cytology, ecology, morphology, mycology, physiology and molecular biology, or systematics and evolution. Relevant graduate courses that may be counted toward completion of these degrees are offered by the Departments of EEOB and GDCB, and by other departments and programs. The specific requirements for each student's course distribution and research activities are set by the Program of Study Committee established for each student individually, and must satisfy all requirements of the Graduate College (See *Index*). GRE (and if necessary, TOEFL) scores are required of all applicants; students are encouraged to contact faculty prior to application.

Related interdepartmental graduate majors in Ecology and Evolutionary Biology (EEOB); Environmental Science (EnSci); Genetics (IG); Molecular, Cellular and Developmental Biology (MCDB); Plant Physiology (IPPM); and Toxicology should also be investigated as possible graduate programs with specific disciplinary focus.

At present, the Botany Graduate Program is under review and may change Status in the near future. Before applying for admission to the Botany Graduate Major, prospective students should contact the Botany Graduate Program Director of Graduate Education Dr. Robert Wallace (rwallace@iastate.edu) for specific details about the program's Status and application procedures.

Business Administration

Labh S. Hira, Dean

Undergraduate Study

Kay M. Palan, Professor in charge, Undergraduate Programs in Business.

For undergraduate curriculum leading to the degree bachelor of science, majors in accounting, business economics, finance, management, management information systems, marketing, operations and supply chain management, logistics and supply chain management and a secondary major in international business, see College of Business, Curricula.

The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Logistics, Operations, and Management Information Systems, Management, and Marketing by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study

Michael Crum, Professor in Charge, Graduate Programs in Business

The College of Business offers work towards two graduate programs in business administration: the master of business administration (MBA) and the master of science in business (M.S.), which are described below. The college also has two specialized master degree programs: the master of accounting (M.Acc.), which is described under the Department of Accounting and the master of science in information systems (M.S.I.S.) which is described under Management Information Systems. The college also offers a Ph.D. in business and technology, with specialization in customer management, supply chain management, and management of information technology. Finally, the College of Business is a participating member of the following interdepartmental programs: master of science in transportation, master of science in seed technology and business, master of science and Ph.D. in human computer interaction, and master of science in information assurance.

Master of Business Administration (M.B.A.)

The College of Business offers a 48 credit program leading to a nonthesis master of business administration degree with a specialization in accounting, agribusiness, family financial planning, finance, information systems, international business, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business.

Students working toward the M.B.A. are required to complete a series of core courses in the basic functional areas of business (accounting, economics, statistics, finance, supply chain management, organizational behavior, management information systems, marketing, international business, ethics and social responsibility, strategic management), and advanced elective coursework.

Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Logistics, Operations and Management Information Systems, Management, Marketing, and Statistics. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in civil, computer, electrical, industrial, or mechanical engineering. The College of Business and the College of Veterinary Medicine offer a concurrent M.B.A./D.V.M. degree.

Double master's degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./ M.C.R.P.), information systems (M.B.A./M.S.I.S.) and Statistics (M.B.A./ M.S.-Statistics).

Students may enroll in the M.B.A. on either a full-time or part-time basis. The part-time M.B.A. is designed for employed professionals. Part-time MBA classes are held in the evenings in Ames and Des Moines.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from liberal arts, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit Graduate Management Admission Test (GMAT) scores, official transcripts of previous academic work, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time M.B.A. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 1 (March 1 for international students). Part-time M.B.A. applications are considered for fall, spring, or summer entry.

Master of Science (M.S.) in Business

The College of Business offers graduate work leading to the master of science degree with a major in business. All the departments in the college, (Accounting, Finance, Logistics, Operations and Management Information Systems, Management, and Marketing), and the departments of Economics and Statistics cooperate in providing coursework toward this degree. The program is designed to serve those students who desire specialized study of an area within business at the master's level. It also serves to develop their research capabilities.

The M.S. degree is best suited for students with degrees or academic backgrounds in business as they may complete the program within the 30 credit minimum. Students without business backgrounds are required to fulfill pre-requisites and common body of knowledge coursework in accounting, finance, management information systems, marketing, organizational behavior, supply chain management, global business, business ethics, and strategy. The program is composed of 7 credits of required courses in economics and Statistics plus 3 to 6 credits of thesis and 17 to 20 credits of coursework in an area of emphasis. The student, with the help of a program of study committee, designs an educational program in specialized functional or industry areas within business.

Application deadline for the M.S. program is May 1 for fall admission and November 1 for spring admission. Applicants must submit official transcripts of previous educational coursework and degrees, the Graduate Management Admission Test (GMAT) scores, personal essays, resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) scores.

Ph.D. in Business and Technology

The College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management of information technology (MIT). Many departments in the college (Logistics, Operations, Management Information Systems, marketing and Management), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master's degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These include:

- Financial and managerial accounting (min. 2 Cr)
- Corporate finance (min. 2 Cr)
- Strategic management (min. 2 Cr)
- Management information systems (min. 2 Cr)
- Marketing (min. 2 Cr)
- Supply chain management (min. 2 Cr)
- Economics – micro and macro (min. 6 Cr)

Students can choose one of three areas of specialization—CM, SCM or MIT. The customer management (CM) area will focus on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses' customer base.

The supply chain management (SCM) specialization will focus on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today's world, where competition is across supply chain networks, SCM, just like CM, will involve integrating business processes across firms.

The management of information technology (MIT) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIT specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student's PhD committee. Each student must complete advanced courses in their area of specialization, a minor area that supports the major area, and research methods. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, the Graduate Management Admission Test (GMAT) scores, personal essays, resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Courses primarily for undergraduate students

BusAd 101. Orientation. (1-0) Cr. 0.5. F.S. First 8 weeks. A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 101H. Orientation. (1-0) Cr. 0.5. F. *Prereq: Membership in the Freshman Honors Program.* Designed to supplement the Freshman Honors orientation (Hon 121) with college specific information, to facilitate the development of Honors programs of study in business, and to acquaint students with university policies and procedures. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 102. Expanded Orientation. (1-0) Cr. 1. F.S. A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 150. Computer Competencies for Business. Cr. R. Students will demonstrate proficiency in MS Word, Excel, and PowerPoint, as well as the ability to conduct research using the Internet, use WebCT, and communicate via e-mail. Self-paced instruction available for students who are unable to demonstrate appropriate proficiency. Satisfactory-fail only.

BusAd 201. Career Issues in Business. (1-0) Cr. 0.5. F.S. *Prereq: 101.* Eight-week course designed to provide students with knowledge of careers in business and issues relevant to any workplace. Presentations by business professionals, current students who have previously interned, and faculty and staff with knowledge of careers in the various majors. Includes coverage of diversity and ethics issues in the workplace. Satisfactory-fail only.

BusAd 250. Introduction to Business. (3-0) Cr. 3. *Prereq: 101, 150 or Com S 103.* Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

BusAd 291. Experiential Learning. Cr. arr. Repeatable. *Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience.* Supervised travel and/or work experience in a business related discipline. Satisfactory-fail only.
A. Domestic Internship.
B. International Internship.
C. Domestic Travel and Study.
D. International Travel and Study.

BusAd 292. Entrepreneurship & Innovation Learning Community (EILC) Seminar. (1-0) Cr. 1. *Prereq: Current member of or have applied to be a member of Entrepreneurship and Innovation Learning Community (see www.isupjcenter.org/ELC for more information).* Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

BusAd 301. Professional Employment Preparation. (1-0) Cr. 0.5. *Prereq: 201.* Eight-week course designed to provide students with the skills to develop and implement a professional job search and to function professionally in a workplace setting. Topics include resume and professional correspondence, interviewing, working a career fair, the comprehensive job search, evaluating offers, business etiquette, networking, and transitioning to employee. Satisfactory-fail only.

BusAd 325. Biorenewable Systems. (Cross-listed with A E, Agron, An S, Econ, TSM). (3-0) Cr. 3. F. *Prereq: Econ 101, Chem 155 or higher, Math 140 or higher.* Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

BusAd 398. Cooperative Education. Cr. R. Repeatable. *Prereq: Permission of department.* Required of all cooperative students. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Satisfactory-fail only.

BusAd 490. Independent Study. Cr. arr. Repeatable. *Prereq: 490A: Mgmt 414, Mkt 448, LSCM 466 or Fin 380; senior classification, permission of instructor; for 490H: Admission to the Business Honors Program.*
A. International Business
E. Entrepreneurship
H. Honors

BusAd 491. Professional Experiential Learning. Cr. arr. Repeatable. *Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience.* Supervised travel and/or work experiences in a business related discipline. Satisfactory-fail only.
A. Domestic Internship.
B. International Internship.
C. Domestic Travel and Study.
D. International Travel and Study.
E. Other Experiential Learning Experience.

BusAd 492. The Washington Center Experience. Cr. arr. *Prereq: Professional program, written approval of supervising instructor and department chair on required form prior to the learning experience.* Participation in The Washington Center seminar/internship program. Includes seminars/forums, work experience, and a portfolio of experiences.

Courses primarily for graduate students, open to qualified undergraduate students

BusAd 501. Strategy and Planning. (2-0) Cr. 2. *Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor.* Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

BusAd 503. information Systems. (2-0) Cr. 2. *Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor.* Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases and discussions highlight the techniques and tactics used by managers to cope with strategic

issues within an increasingly technical competitive environment.

BusAd 504. Marketing and Logistics. (3-0) Cr. 3. *Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor.* Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BusAd 507. Organizational Behavior. (2-0) Cr. 2. *Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor.* Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BusAd 508. Accounting and Finance. (3-0) Cr. 3. *Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor.* Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BusAd 509. Seed Trade, Policy and Regulation. (3-0) Cr. 3. *Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor.* Cultural, financial, economic, political, legal/regulatory environments shaping an organization's international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BusAd 533. Economic and Business Decision Tools. (Cross-listed with Econ). (3-0) Cr. 3. *Prereq: Econ 501 or Econ 532.* Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools for decision making. The topics covered include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decisions, discrete choice modeling and Statistical bootstrapping, and financial performance evaluation using commercially available software.

BusAd 591. Professional Experiential Learning. Cr. arr. Repeatable. *Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience.* Academically supervised travel and/or work experiences in a business related discipline.

BusAd 592. MBA Professional Skills Development. Cr. R. *Prereq: Admission to Full-time MBA Program.* Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical for success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Satisfactory-fail only.

BusAd 598. Cooperative Education. Cr. R. *Prereq: Permission of instructor.* Professional work experience. Students must register for this course prior to commencing work. Satisfactory-fail only.

BusAd 599. Creative Component. Cr. 3. *Prereq: Graduate classification, permission of supervisory committee chair.* Preparation and writing of creative component.
A. Accounting
C. Finance
E. Management
F. Marketing
H. Logistics and Supply Chain Management
I. Agribusiness
J. General Business
K. Management Information Systems
L. Operations and Supply Chain Management

Courses primarily for graduate students

BusAd 699. Research. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification, permission of major professor.* Research.

Chemical Engineering

(Administered by the Department of Chemical and Biological Engineering)

www.cbe.iastate.edu

James Hill, Chair of Department

Distinguished Professors: Brown, Reilly

Distinguished Professors (Emeritus): Burnet, Doraiswamy, Seagrave

University Professor: Hill

University Professor (Emeritus): Wheelock

Professors: Fox, Glatz, Hebert, Jolls, Kushner, Mallapragada, Narasimhan, Rollins, B. Shanks, J. Shanks

Professors (Emeritus): Abraham, Boylan, Schrader, Ulrichson, Youngquist

Professor (Collaborator): Porter

Associate Professors: Hillier, Olsen, Vigil

Associate Professor (Emeritus): Collins

Associate Professors (Adjunct): Hanneman

Assistant Professors: Clapp, Cochran, Dong, Jarboe, Lamm, O'Donnell, Schneider

Senior Lecturer: Loveland

Lecturer: Stiehl

Undergraduate Study

For undergraduate curriculum in chemical engineering leading to the degree bachelor of science, see *College of Engineering, Curricula*. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Chemical engineering is a profession which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by Society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products, chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer's influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates that have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments, and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and Societal context, and recognition of the need for, and an ability to engage in life-long learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

A significant number of chemical engineering graduates should have an ability to function as engineers in an international setting, and an ability to pursue research and advanced studies in chemical engineering, or in related fields such as medicine, law, and business.

A cooperative education program is available to students in chemical engineering. See *Cooperative Programs, College of Engineering.*

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor's degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the master of science degree. The master of science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework,

13 within Ch E and 2 outside). The master of engineering requirements are the same for credits and include a special project rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework, 19 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree can refer to the department's home page and/or the department's Graduate Student Handbook for degree options and credit requirements.

Courses primarily for undergraduate students

Ch E 104. Chemical Engineering Learning Community. Cr. R. F.S. *Prereq: Enrollment in Chemical Engineering Learning Team.* (1-0) Curriculum in career planning and academic course support for Freshmen learning team.

Ch E 204. Chemical Engineering Continuing Learning Community. Cr. R. F.S. *Prereq: Corequisite-enrollment in Chemical Engineering Learning Team.* (1-0) Curriculum and career planning, academic course support for learning community.

Ch E 210. Material and Energy Balances. (3-0) Cr. 3. F.S. *Prereq: Chem 178, Math 166.* Introduction to chemical processes. Physical behavior of gases, liquids, and solids. Application of material and energy balances to chemical engineering equipment and processes.

Ch E 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* First professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 302. Seminar. (1-0) Cr. 1. F. *Prereq: Junior classification in chemical engineering.*

Ch E 310. Computational Methods in Chemical Engineering. (3-0) Cr. 3. F.S. *Prereq: 210 and Engr 160.* Numerical methods for solving systems of linear and nonlinear equations, ordinary differential equations, numerical differentiation and integration, and nonlinear regression using chemical engineering examples. Nonmajor graduate credit.

Ch E 325. Chemical Engineering Laboratory I. (0-4) Cr. 2. F.S. *Prereq: 357, credit or enrollment in 381.* Experiments covering fundamental material and energy balances, momentum and energy transport operations, and thermodynamics. Computer applications. Nonmajor graduate credit.

Ch E 356. Transport Phenomena I. (3-0) Cr. 3. F.S. *Prereq: 210, Phys 221, credit or enrollment in Math 267.* Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling. Nonmajor graduate credit.

Ch E 357. Transport Phenomena II. (3-0) Cr. 3. F.S. *Prereq: Credit or enrollment in 310; 356.* Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion. Nonmajor graduate credit.

Ch E 358. Separations. (3-0) Cr. 3. F.S. *Prereq: 310, 357.* Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer. Nonmajor graduate credit.

Ch E 381. Chemical Engineering Thermodynamics. (3-0) Cr. 3. F.S. *Prereq: Credit or enrollment in 310; Math 267, Phys 222, Chem 325.* Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria. Nonmajor graduate credit.

Ch E 382. Chemical Reaction Engineering. (3-0) Cr. 3. F.S. *Prereq: Credit in 310; 381, credit or enrollment in 357.* Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors. Nonmajor graduate credit.

Ch E 391. Foreign Study Orientation. Cr. arr. *Prereq: Credit or enrollment in 357 and 381 or permission of instructor.* Credit for graduation allowable only upon completion of Ch E 392. Satisfactory-fail only.
A. Foreign Study Orientation ISU (1-0) Cr. 1.
S. B. Foreign Study Orientation Europe Cr. 2. SS.

Ch E 392. Foreign Study Program. Cr. 4. SS. *Prereq: 391A, enrollment in 391B.* Study of chemical engineering including laboratories and lectures at University College London or other collaborating international universities. Comparative study of U.S. and international manufacturing facilities. Expenses required.

Ch E 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of department and Engineering Career Services.* Summer professional work period. Students must register for this course prior to commencing work.

Ch E 397. Engineering Internship. Cr. R. Repeatable. F.S. *Prereq: Permission of department and Engineering Career Services.* One semester maximum per academic year professional work period. Students must register for this course prior to commencing work.

Ch E 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: 298, permission of department and Engineering Career Services.* Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 406. Environmental Chemodynamics. (3-0) Cr. 3. F. *Prereq: 381, credit or enrollment in 358.* Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment. Nonmajor graduate credit.

Ch E 408. Surface and Colloid Chemistry. (Dual-listed with 508). (3-0) Cr. 3. F. *Prereq: 381 or equivalent.* Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentaton, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis. Nonmajor graduate credit.

Ch E 415. Biochemical Engineering. (Dual-listed with 515). (3-0) Cr. 3. S. *Prereq: 357, 382 recommended, Chem 331.* Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation. Nonmajor graduate credit.

Ch E 421. Process Control. (3-0) Cr. 3. F.S. *Prereq: Credit or enrollment in 358, 382, Math 267.* Control of industrial chemical processes. Device applications and limitations. Dynamics of chemical process components and process control systems. Nonmajor graduate credit.

Ch E 426. Chemical Engineering Laboratory II. (0-4) Cr. 2. F.S. *Prereq: 325, 358, 382.* Experiments in heat and mass transfer, staged operations, chemical reactor performance, unit processes. Computer applications. Only one of Ch E 426 or 427 may count toward graduation. Nonmajor graduate credit.

Ch E 427. Biological Engineering Laboratory. (0-4) Cr. 2. S. *Prereq: Credit in 325, 358, 382 and BBMB 301.* Experiments on biological applications in chemical engineering. Only one of Ch E 426 or 427 may count toward graduation. Nonmajor graduate credit.

Ch E 430. Process and Plant Design. (2-6) Cr. 4. F.S. *Prereq: 358, 382.* Synthesis of chemical engineering processes, equipment and plants. Cost estimation and feasibility analysis. Nonmajor graduate credit.

Ch E 440. Biomedical Applications of Chemical Engineering. (Dual-listed with 540). (3-0) Cr. 3. *Prereq: 210, Math 266, Phys 222.* Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging. Nonmajor graduate credit.

Ch E 442. Polymers and Polymer Engineering. (Cross-listed with Mat E). (3-0) Cr. 3. S. *Prereq: 382 and Chem 331 or Mat E 351.* Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry. Nonmajor graduate credit.

Ch E 490. Independent Study. (0-18) Cr. arr. Repeatable. Introduction to research methods; investigation of an approved topic.
H. Honors

Ch E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: 398, permission of department and Engineering Career Services.* Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Ch E 499. Undergraduate Research. (0-9) Cr. 3. Repeatable. *Prereq: Permission of department.* Research in chosen area of chemical engineering, with final written report. Students are encouraged to elect this course for two consecutive semesters. For students majoring in chemical engineering. No more than 6 credits of Ch E 499 may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

Ch E 508. Surface and Colloid Chemistry. (Dual-listed with 408). (3-0) Cr. 3. F. Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis. Term project required for graduate credit.

Ch E 515. Biochemical Engineering. (Dual-listed with 415). (3-0) Cr. 3. S. *Prereq: 357, 382, Chem 331.* Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation. Term project required for graduate credit.

Ch E 540. Biomedical Applications of Chemical Engineering. (Dual-listed with 440). (3-0) Cr. 3. *Prereq: 210, Math 266, Phys 222.* Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging. Term project required for graduate credit.

Ch E 542. Polymeric Biomaterials. (3-0) Cr. 3. *Prereq: Chem 331 or a polymers class.* Polymeric biomaterials, overview of biomaterial requirements, different classes of polymers used as biomaterials, specific bioapplications of polymers.

Ch E 545. Analytical and Numerical Methods. (3-0) Cr. 3. F. *Prereq: 358, Math 267.* Analysis of equipment and processes by analytic and/or numerical solution of descriptive differential equations. Operational and series techniques, boundary value problems, numerical interpolation and approximation, integration techniques.

Ch E 554. Integrated Transport Phenomena. (4-0) Cr. 4. F. *Prereq: 357, 381, Math 267, credit or enrollment in 545.* Conservation equations governing diffusive and convective transport of momentum, thermal energy and chemical species. Transport during laminar flow in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled with chemical reactions and phase change. Scaling and approximation methods for Mathematical solution of transport models. Diffusive fluxes; conservation equations

for heat and mass transfer; scaling and approximation techniques; fundamentals of fluid mechanics; unidirectional flow; creeping flow; laminar flow at high Reynolds number; forced-convection heat and mass transfer in confined and unconfined laminar flows.

Ch E 562. Bioseparations. (3-0) Cr. 3. *Prereq: 357 or advanced standing in a science major.* Principles and techniques for separation and recovery of biologically-produced molecules, especially proteins. Relationship between the chemistry of biological molecules and efficient separation and preservation of biological activity. Includes centrifugation and filtration, membrane processing, extraction, precipitation and crystallization, chromatography, and electrophoresis.

Ch E 572. Turbulence. (Cross-listed with Aer E). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Aer E 543 or M E 538.* Qualitative features of turbulence. Statistical and spectral representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds stress, dissipation rate. Isotropic turbulence, homogeneous shear flows, free shear flows, wall bounded flows. Scalar transport, particulate transport.

Ch E 583. Advanced Thermodynamics. (3-0) Cr. 3. F. *Prereq: 381.* Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-reaction equilibria/stability.

Ch E 587. Advanced Chemical Reactor Design. (3-0) Cr. 3. S. *Prereq: 382.* Analysis of complex reactions and kinetics. Fixed bed, fluidized bed, and other industrial reactors. Analysis and design of non-ideal flow mixing, and residence times. Heterogeneous reactors.

Ch E 590. Special Topics. Cr. arr. Repeatable. Investigation of an approved topic on an individual basis.

Ch E 595. Special Topics. Cr. arr. Repeatable.
A. Separations
B. Advanced Control Theory
C. Crystallization
D. Thermodynamics
G. Biological Engineering
I. Materials & Biomaterials
J. Protein Engineering/Bioseparations
K. Surfaces
L. Combinatorial Design

Ch E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

Ch E 601. Seminar. Cr. R. Repeatable. F.S. Satisfactory-fail only.

Ch E 625. Metabolic Engineering. (3-0) Cr. 3. *Prereq: 382, Chem 331.* Principles of metabolic engineering. Emphasis on emerging examples in biorenewables and plant metabolic engineering. Overview of biochemical pathways, determination of flux distributions by stoichiometric and labeling techniques; kinetics and thermodynamics of metabolic networks; metabolic control analysis; genetic engineering for overexpression, deregulation, or inhibition of enzymes; directed evolution; application of bioinformatics, genomics, and proteomics.

Ch E 632. Multiphase Flow. (Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: M E 538.* Single particle, mutliparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions.

Ch E 642. Principles and Applications of Molecular Simulation. (3-0) Cr. 3. *Prereq: 545.* Principles of Statistical physics. General features of molecular simulations including Monte Carlo (MC) methods, molecular mechanics (MM), and molecular dynamics (MD). Overview of intermolecular and interatomic potentials. Evaluation of phase equilibria, free energies, and surface/interfacial properties. Coarse-grained methods.

Ch E 652. Advanced Transport. (3-0) Cr. 3. *Prereq: 552 and 553.* Advanced topics in momentum transport, fluid mechanics, and mass transport including study of recent literature.

Ch E 688. Catalysis and Catalytic Processes. (3-0) Cr. 3. *Prereq: 382.* Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

Ch E 690. Advanced Topics. Cr. arr. Repeatable.
A. Separations
B. Advanced Statistical Modeling and Control
C. Crystallization
D. Thermodynamics
E. Protein Engineering/Bioseparations
F. Biological Engineering
G. Materials & Biomaterials
H. Surfaces
I. Combinatorial Design

Ch E 697. Engineering Internship. Cr. R. Repeatable. F.S.SS. *Prereq: Permission of major professor, graduate classification.* One semester and one summer maximum per academic year professional work period.

Ch E 699. Research. Cr. arr. Repeatable.

Chemistry

www.chem.iastate.edu

Jacob Petrich, Chair of Department

Distinguished Professors: Barton, Corbett, Gordon, Larock, Thiel

Distinguished Professors (Emeritus): Angelici, Espenson, Fritz, Johnson, Ruedenberg, Yeung

University Professors: Hoffman, Kraus, Verkade

Professors: Geoffroy, Greenbowe, Holme, Hong, Houk, Jenks, Lin, Miller, Petrich, Schmidt-Rohr, Shin, Trahanovsky, Windus, Woo

Professors (Emeritus): Franzen, Gerstein, Hutton, Jacobson, McCarley, Powell, Russell, Struve

Professor (Adjunct): Bakac, Pruski

Professor (Adjunct Emeritus): Trahanovsky

Professor (Collaborator): Porter

Associate Professors: Hillier, Pohl, Song, Zhao

Assistant Professors: Fang, Jeffries-El, Lee, Sadow, Smith, Stauffer

Senior Lecturers: Burnett

Lecturers: Bonaccorsi, Kingston

Undergraduate Study

For undergraduate curricula in liberal arts and sciences leading to the degrees bachelor of science and bachelor of arts, see *Liberal Arts and Sciences, Curriculum*.

Graduates holding the B.S. degree in chemistry qualify in many fields: as teachers of chemistry, as supervisors in industry, as technical sales personnel, and as research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they can explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, or to obtain joint majors or strong minors. The B.A. degree does not prepare students as well for graduate study or professional employment in chemistry.

Graduates have firm foundations in the fundamentals and application of current chemical theories. They are able to design, carry-out, record, and analyze the results of chemical experiments. They are able to use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research. Graduates are able to communicate the results of their work to chemists, as well as non-chemists. They understand the ethical and environmental dimensions of problems and issues facing chemists. They follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals. Graduates are skilled in problem solving, critical thinking, and analytical reasoning. These skills can be applied to careers in education and industry and professions such as law, medicine, environmental sciences, and forensic sciences. The curricula in chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree provided they also take one Biochemistry course, typically BBMB 301 or 404.

Liberal arts majors who wish to transfer into chemistry at the end of their second year may still complete all degree requirements and graduate within five years.

Undergraduate students seeking the B.S. degree in chemistry usually take courses essential to the degree program according to the following schedule:

First year: Chem 177 and 178, or 201, 177L or 201L; 211, 211L; Math 165, 166; Engl 150; Lib 160.

Second year: Chem 331, 332, 333L, 334L; Math 265; Phys 221, 222.

Third year: Chem 324, 325, 322L, 316, 316L, 301; Engl 250 or 250H; Foreign language requirement.

Fourth year: Chem 402, 401L, 2 advanced chemistry courses (minimum 4 credits). Chem 399 or 499 is strongly recommended. Credits earned in 399/499 can only be used to meet one of the advanced course requirements.

Chemistry majors seeking certification to teach chemistry in secondary schools must meet the requirements of the College of Human Sciences as well as those of the chemistry program. In addition, they must apply formally for admission to the teacher education program.

Undergraduate students seeking the B.A. degree in chemistry have the following courses in their degree programs as minimum requirements: 177, 178, and 177L, or 201 and 177L or 201L; 211, 211L, 301, 316, 316L, 324, 321L or 322L, 325, 331, 331L, 332, 332L. Math 165, 166 and Phys 221, 222 are required as supporting work.

The Department offers a minor in chemistry which may be earned by credit in Chem 177, 177L (or 167 and 167L), 178, 211, 211L, 324, 331, 331L and one of the following: Chem 301; 316 and 316L or 325 and 321L, or 332 and 332L. The total minimum credits in chemistry thus will be 20 to 23 depending on which advanced courses are selected.

Communication Proficiency requirement: The Department requires a grade of C– or better in each of English 150 and 250 or 250H.

Graduate Study

The Department offers work for the degrees master of science and doctor of philosophy with majors in chemistry analytical, inorganic, organic, and physical chemistry. Co-majors may be taken between areas within chemistry or between one of the areas in chemistry and another department. Courses in other areas of chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in chemistry may choose an additional specialty in one of the six areas: Materials Chemistry, Industrial Chemistry,

Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside course requirement. A minor in chemistry is available to students in other departments. The Department participates in the interdepartmental major in toxicology.

The Department of Chemistry requires all graduate students majoring in chemistry to teach as part of their training for an advanced degree. Prerequisite to major graduate work is the completion of undergraduate work in chemistry, mathematics, and physics substantially equivalent to that required of undergraduate chemistry majors at this institution.

The course numbers for general chemistry courses include 155-178, and 201.

Index to field of work for 200 level courses and above is given by the second and third digits of course numbers:

(a) Inorganic Chemistry 00-09
(b) Analytical Chemistry 10-19
(c) Physical Chemistry 20-29 and 60-69
(d) Organic Chemistry 30-39
(e) Chemical Education 50-59
(f) Interdisciplinary Chemistry 70-89
(g) Research 99

Courses primarily for undergraduate students

Chem 050. Preparation for College Chemistry. (3-0) F. *Prereq: 1 year high school algebra.* An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on Mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course. Credit for Chem 50 does not count toward graduation.

Chem 155. Foundations of Chemistry for Engineers. (3-0) Cr. 3. F. *Prereq: Math 140 or the high school equivalent.* The first semester of a two semester sequence covering principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Chem 155 may not be counted for credit toward graduation in any engineering curriculum.

Chem 160. Chemistry in Modern Society. (3-0) Cr. 3. Alt. S., offered 2010. Aspects of chemistry visible to a nonscientist in our Society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

Chem 163. College Chemistry. (4-0) Cr. 4. F.S. *Prereq: 1 year of high school algebra and geometry and either Chem 50 or 155 or 1 year of high school chemistry; and credit or enrollment in 163L.* The first semester of a two semester sequence. A general survey of chemistry and properties with an emphasis on conceptual problems. Stoichiometry, atomic structure, chemical bonding, states of matter, energy relations, acid-base theory and oxidation-reduction reactions. The 163, 164 sequence does not meet the prerequisite for 331. Credit for examination (test-out exams) for 163 is available only to students who are not currently enrolled in the course. Only one of Chem 163, 165, 167, 177, or 201 may count toward graduation.

Chem 163L. Laboratory in College Chemistry. (0-3) Cr. 1. F.S.SS. *Prereq: Credit or enrollment for credit in 163.* Laboratory to accompany 163. Must be taken with 163. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 165. Foundations of Chemistry for Engineers. (4-0) Cr. 4. S. *Prereq: 155.* Continuation of 155. Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Chem 165 or 167 satisfies the chemistry requirement in engineering curricula. Only one of Chem 163, 165, 167, 177, or 201 may count toward graduation.

Chem 167. General Chemistry for Engineering Students. (4-0) Cr. 4. F.S. *Prereq: Math 140 or the high school equivalent and one year of traditional college prep chemistry or Chem 50.* Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. This is an accelerated course designed for students with an excellent preparation in Math and science and is a terminal course intended for engineering students who do not plan to take additional courses in chemistry. Credit by examination (test-out exams) for 167 is available only to students who are not currently enrolled in the course. Only one of Chem 163, 165, 167, 177, or 201 may count toward graduation.

Chem 167L. Laboratory in General Chemistry for Engineering. (0-3) Cr. 1. F.S. *Prereq: Credit or enrollment for credit in 167 or 165.* Laboratory to accompany 167. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 177. General Chemistry I. (4-0) Cr. 4. F.S.SS. *Prereq: Math 140 or high school equivalent and 50, 155 or 1 year high school chemistry and credit or enrollment in 177L. Chemistry and biochemistry majors may consider taking 201.* The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163-164. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Credit by examination (test-out exams) for 177 is available only to students who are not currently enrolled in the course. Only one of Chem 163, 165, 167, 177, or 201 may count toward graduation.

Chem 177L. Laboratory in General Chemistry I. (0-3) Cr. 1. F.S.SS. *Prereq: Credit or enrollment for credit in 177.* Laboratory to accompany 177. 177L must be taken with 177. 177N: for chemistry and biochemistry majors. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 177N. Laboratory in General Chemistry I. (0-3) Cr. 1. F.S.SS. *Prereq: Credit or enrollment for credit in 177. For chemistry and biochemistry majors.* Laboratory to accompany 177. 177N must be taken with 177. Graduation Messages: Only one of Chem 163L, 167L, and 177N may count toward graduation.

Chem 178. General Chemistry II. (3-0) Cr. 3. F.S. *Prereq: 177, 177L.* Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Credit by examination (test-out exams) for 178 is available only to students who are not currently enrolled in the course. Only one of Chem 164 and 178 may count toward graduation.

Chem 178L. Laboratory in College Chemistry II. (0-3) Cr. 1. F.S. *Prereq: 177L and credit or enrollment for credit in 178.* Laboratory to accompany 178. 178L is not a necessary corequisite with 178. Only one of Chem 164L and 178L may count toward graduation.

Chem 201. Advanced General Chemistry. (5-0) Cr. 5. F. *Prereq: Math 140 or high school equivalent and one year of high school chemistry. Co-enrollment in 201L.* A one semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 165, 167, 177, or 201 may count toward graduation.

Chem 201L. Laboratory in Advanced General Chemistry. (0-3) Cr. 1. *Prereq: Credit or enrollment for credit in 201.* Laboratory to accompany 201. Introductory lab experience in synthesis and analysis to prepare student for research activities 201L must be taken with 201. Only one of 163L, 167L, 177L, 177N or 201L may count toward graduation.

Chem 211. Quantitative and Environmental Analysis. (2-0) Cr. 2. F.S. *Prereq: 164 and 164L, credit or enrollment in 178, or 201 and 201L; and concurrent enrollment in 211L.* Theory and practice of elementary volumetric, chromatographic, electrochemical and spectrometric methods of analysis. Chemical equilibrium, sampling, and data evaluation. Emphasis on environmental analytical chemistry; the same methods are widely used in biological and materials sciences as well.

Chem 211L. Quantitative and Environmental Analysis Laboratory. (0-6) Cr. 2. F.S. *Prereq: Credit or enrollment in 164 and 164L, or 178; and concurrent enrollment in Chem 211.* Introductory laboratory experience in volumetric, spectrometric, electrochemical and chromatographic methods of chemical analysis.

Chem 231. Elementary Organic Chemistry. (3-0) Cr. 3. F.S.SS. *Prereq: 163, 163L, or 177, 177L; credit or enrollment in 231L.* A survey of modern organic chemistry including nomenclature, structure and bonding, and reactions of hydrocarbons and important classes of natural and synthetic organic compounds. For students desiring only an elementary course in organic chemistry. Students in physical or biological sciences and premedical or preveterinary curricula should take the full year sequence 331 and 332 (with the accompanying laboratories 331L and 332L). Only one of Chem 231 and 331 or BBMB 221 may count toward graduation.

Chem 231L. Laboratory in Elementary Organic Chemistry. (0-3) Cr. 1. F.S.SS. *Prereq: Credit or enrollment for credit in 231; 163L or 177L.* Laboratory to accompany 231. 231L must be taken with 231. Only one of Chem 231L and 331L may count toward graduation.

Chem 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the Department cooperative education coordinator; sophomore classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Chem 299. Undergraduate Research (for Freshmen and Sophomores). Cr. arr. Repeatable. *Prereq: Permission of staff member with whom student proposes to work.*

Chem 301. Inorganic Chemistry. (2-0) Cr. 2. S. *Prereq: 324.* Atomic and molecular structure and bonding principles; molecular shapes and symmetry; acids and bases; solid-state structures and properties; inorganic chemistry of H, B, C. Nonmajor graduate credit.

Chem 316. Instrumental Methods of Chemical Analysis. (2-0) Cr. 2. F. *Prereq: 211, 211L, Math 166, and concurrent enrollment in 316L; Phys 222 recommended.* Quantitative and qualitative instrumental analysis. Operational theory of instruments, atomic and molecular absorption and emission spectroscopy, electroanalysis, mass spectrometry, liquid and gas chromatography, electrophoresis, literature of chemical analysis. Nonmajor graduate credit.

Chem 316L. Instrumental Analysis Laboratory. (0-6) Cr. 2. F. *Prereq: Credit or enrollment in Chem 316.* Advanced laboratory experience in UV-visible spectrophotometry, atomic absorption and emission spectrometry, electrochemistry, gas and liquid chromatography, electrophoresis, mass spectrometry, and other instrumental methods. Nonmajor graduate credit.

Chem 321L. Laboratory in Physical Chemistry. (1-3) Cr. 2. S. *Prereq: Credit or enrollment for credit in 324 or 325.* Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, infrared and optical spectroscopy, lasers. Not applicable towards the B.S. degree in Chemistry. Only one of Chem 321L and 322L may count toward graduation. Nonmajor graduate credit.

Chem 322L. Laboratory in Physical Chemistry. (1-6) Cr. 3. S. *Prereq: Chem 324.* Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, surface science, infrared and optical spectroscopy, lasers. Only one of Chem 321L and 322L may count toward graduation. Nonmajor graduate credit.

Chem 324. Introductory Quantum Mechanics. (3-0) Cr. 3. F. *Prereq: 178, Math 166, Phys 222 recommended.* Quantum mechanics, atomic and molecular structure, spectroscopy, kinetic theory of gases, chemical kinetics. Nonmajor graduate credit.

Chem 325. Chemical Thermodynamics. (3-0) Cr. 3. F.S. *Prereq: 178, Math 166, Phys 222 recommended.* Classical thermodynamics 1st, 2nd, and 3rd laws with applications to gases and interfacial systems, multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Students taking a two-semester physical chemistry sequence are advised to take 324 first; in the spring semester, a molecular-based section of this course, stressing Statistical thermodynamics, is offered for which knowledge of 324 is useful. Nonmajor graduate credit.

Chem 331. Organic Chemistry I. (3-0) Cr. 3. F.S. *Prereq: 178 or 201, enrollment in 331L highly recommended.* The first half of a two semester sequence. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms. For students majoring in physical and biological sciences, premedical and preveterinary curricula, chemistry and biochemistry. Students desiring only one semester of organic chemistry should take 231 and 231L, not 331. Only one of Chem 231 and 331 may count toward graduation. Nonmajor graduate credit.

Chem 331L. Laboratory in Organic Chemistry I. (0-3) Cr. 1. F.S. *Prereq: Credit or enrollment for credit in 331, 177L.* Laboratory to accompany 331. Chemistry and biochemistry majors are encouraged to take 333L. Only one of Chem 231L and 331L may count toward graduation.

Chem 332. Organic Chemistry II. (3-0) Cr. 3. F.S. *Prereq: 331, enrollment in 332L highly recommended.* Continuation of 331. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms, natural products, carbohydrates and proteins. For students majoring in physical and biological sciences, premedical and preveterinary curricula, chemistry and biochemistry. Nonmajor graduate credit.

Chem 332L. Laboratory in Organic Chemistry II. (0-3) Cr. 1. F.S. *Prereq: 331L, credit or enrollment for credit in 332.* Laboratory to accompany 332. Chemistry and biochemistry majors are encouraged to take 334L.

Chem 333L. Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors). (0-6) Cr. 2. F. *Prereq: Credit or enrollment for credit in 331.* Laboratory to accompany 331 for chemistry and biochemistry majors.

Chem 334L. Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors). (0-6) Cr. 2. S. *Prereq: 333L, credit or enrollment for credit in 332.* Laboratory to accompany 332 for chemistry and biochemistry majors.

Chem 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the Department cooperative education coordinator; junior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Chem 399. Undergraduate Research. Cr. arr. *Prereq: Permission of instructor with whom student proposes to work and junior or senior classification.* No more than Six total credits of Chem 399 and Chem 499 may count toward graduation.

Chem 401L. Inorganic Chemistry Laboratory. (0-3) Cr. 1. F. *Prereq: 301.* Preparation and characterization of inorganic and organometallic compounds by modern techniques. For students majoring in chemistry or biochemistry. Nonmajor graduate credit.

Chem 402. Advanced Inorganic Chemistry. (Dual-listed with 502). (3-0) Cr. 3. F. *Prereq: 301; 331 recommended.* Chemistry of the d and f metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic solid state and bioinorganic chemistry. Nonmajor graduate credit.

Chem 490. Independent Study. Cr. arr. *Prereq: Completion of 6 credits in chemistry at the 300 level or higher and permission of instructor.* No more than 9 credits of Chem 490 may count toward graduation.

Chem 498. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the Department cooperative education coordinator; senior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Chem 499. Senior Research. Cr. arr. Repeatable. *Prereq: Permission of instructor with whom student proposes to work; B average in all chemistry, physics, and mathematics courses.* Research in chosen area of chemistry, with final written report as senior thesis. This course should be elected for two consecutive semesters. For students majoring in chemistry. No more than Six total credits for Chem 399 and 499 may count toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

Chem 501L. Inorganic Preparations. (0-3) Cr. 1. F. *Prereq: 402.* Preparation and characterization of inorganic and organometallic compounds by modern research techniques.

Chem 502. Advanced Inorganic Chemistry. (Dual-listed with 402). (3-0) Cr. 3. F. *Prereq: 301; 331 recommended.* Chemistry of the d and f metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic, solid state, and bioinorganic chemistry.

Chem 503. Bioinorganic Chemistry. (Cross-listed with BBMB). (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 402 or BBMB 405.* Essential elements: transport and storage of ions and of oxygen; metalloenzymes and metallocoenzymes; electron-transfer processes in respiration and photosynthesis; metabolism of nonmetals and redox processes involved in it; medicinal aspects of inorganic chemistry.

Chem 505. Physical Inorganic Chemistry. (3-0) Cr. 3. S. *Prereq: 402 or 502 and 324.* Elementary group theory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds.

Chem 511. Advanced Quantitative Analysis. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 316 and 316L.* General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular microscopy; bioanalytical methods; data evaluation; chemometrics; and analytical literature.

Chem 512. Electrochemical Methods of Analysis. (3-0) Cr. 3. F. *Prereq: 316 and 316L, 324, and 322L.* Principles of convective-diffusional mass transport in electroanalysis. Applications of potentiometry, voltammetry, and coulometry. Introduction to heterogeneous and homogeneous kinetics in electroanalysis. Analog and digital circuitry. Interfacing.

Chem 513. Analytical Molecular and Atomic Spectroscopy. (3-0) Cr. 3. S. *Prereq: 316 and 316L, 324, 322L.* Introduction to physical optics and design of photometric instruments. Principles of absorption, emission, fluorescence, and Raman Spectroscopy. Error and precision of optical methods. Ultraviolet, visible, and infrared methods of qualitative and quantitative organic and inorganic analysis.

Chem 516. Analytical Separations. (3-0) Cr. 3. F. *Prereq: 316 and 316L, 324, 322L.* Principles and examples of inorganic and organic separation methods applied to analytical chemistry. Solvent extraction, volatilization, ion exchange, liquid and gas chromatography, and electrophoresis.

Chem 531. Organic Synthesis I. (2-0) Cr. 2. S. *Prereq: 332.* Survey of organic functional group transformations.

Chem 532. Organic Synthesis II. (2-0) Cr. 2. F. *Prereq: 531.* Synthesis of complex organic compounds including natural products.

Chem 537. Physical Organic Chemistry I. (3-0) Cr. 3. F. *Prereq: 332.* Molecular structure, stereochemistry, introduction to reaction mechanisms, thermodynamic and kinetic data, linear free energy relationships, isotope effects, orbital symmetry.

Chem 538. Physical Organic Chemistry II. (3-0) Cr. 3. S. *Prereq: 537.* Survey of reactive intermediates including cations, anions, carbenes, and radicals.

Chem 540. Seminar in forensic Sciences. (1-0) Cr. 1. Repeatable. S. *Prereq: Chem 231 or graduate enrollment.* Seminars by professional criminalists, research scientists, Certificate students, and educators. Emphasis on opportunities for research and development, citizen involvement, and educational outreach related to forensic science. Weekly report required.

Chem 542. Independent Research and Presentation in Forensic Science. (1-0) Cr. 1. S. *Prereq: Enrollment in the Graduate Certificate in Forensic Sciences.* Research topic approved by course instructor. Written and oral reports required. Oral report given in forensics seminar, Chem 540.

Chem 550. Safety in the Chemical Laboratory. (1-0) Cr. 1. S. *Prereq: 332L.* Introduction to laboratory safety and chemical hygiene. Use of engineering controls and personal protective equipment. Chemical storage and waste disposal practices. Handling hazardous chemicals. Radiation safety and laser safety. Satisfactory-fail only.

Chem 555. Teaching College Chemistry. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: Graduate or senior classification..* Methods of instruction, strategies and techniques for effective teaching and learning along with practice teaching in undergraduate chemistry recitation and laboratory courses. Cooperative learning, guided-inquiry, learning cycles, conceptual change, models and modeling, concept maps, visualization, computer simulations, web-based delivery systems, and learning theories.

Chem 561. Fundamentals of Quantum Mechanics. (4-0) Cr. 4. F. *Prereq: 324.* Schroedinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; operators including angular momenta; time-independent and time-dependent perturbation theory; Schroedinger and Heisenberg representations; unitary operators; interaction picture, density matrix.

Chem 562. Fundamentals of Atomic and Molecular Quantum Mechanics. (3-0) Cr. 3. S. *Prereq: 561, credit or enrollment in 583.* Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods.

Chem 563. Statistical Mechanics. (3-0) Cr. 3. S. *Prereq: 325.* Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium.

Chem 564. Molecular Spectroscopy and Structure. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 505 or 562.* Maxwell's field equations, interaction of light with matter including time-dependent perturbation theory, microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection rules, special lineshapes and introduction to nonlinear and coherent laser spectroscopies.

Chem 571. Solid-State Chemistry. (2-0) Cr. 2. Alt. S., offered 2011. *Prereq: 301, 324.* A study of solid state materials including structures, bonding, defects, disorder, phase transitions, ionic mobility, metal-insulator transitions, band theory, synthesis and intercalation.

Chem 572. Spectrometric Identification of Organic Compounds. (2-3) Cr. 3. F. *Prereq: 332.* Principles of infrared, ultraviolet, nuclear magnetic resonance, and mass spectroscopy as applied to organic chemistry.

Chem 574. Organometallic Chemistry of the Transition Metals. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 301, 332.* Transition metal complexes of ligands such as cyclopentadienyl, olefins, acetylenes, benzenes, and carbon monoxide. Homogeneous catalysis.

Chem 576. Surface Chemistry. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 324.* Gas-surface interactions and techniques of characterization. Idealized surface lattices, surface tension, Wulff plots, work function, adsorbate-adsorbate interactions, 2D phase diagrams, diffusion, thin film growth, adsorption and desorption mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based spectroscopies for surface analysis (including AES, FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM).

Chem 577. Mass Spectrometry. (3-0) Cr. 3. S. *Prereq: Permission of instructor.* Basic physics, instrumentation, chemical and biological applications of mass spectrometry.

Chem 578. Chemical Kinetics and Mechanisms. (2-0) Cr. 2. Alt. F., offered 2010. *Prereq: 324.* Rates and mechanisms; reversible, consecutive, and competing reactions; chain mechanisms; kinetic isotope effects; very rapid reactions; acid-base catalysis, theories of unimolecular reactions; transition State and Marcus theories.

Chem 579. Introduction to Research in Chemistry. (1-0) Cr. R. F.S. Introduction to the various areas of research in chemistry at Iowa State University.

Chem 580. Introduction to Computational Quantum Chemistry. (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: 324.* Basic principles of quantum mechanics, schrodinger equation. Hartree-Fock/molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry.

Chem 581. Principles of Lasers and Optics. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 324, Phys 222.* Students with weak background should take Chem 580. For students working with lasers and optics; stimulated adsorption and emission based on the classical electron oscillator model; population inversion, laser amplification; laser pumping; oscillation and cavity modes; laser beam characterization; linear propagation; design of laser resonators, ray and wave optics; nonlinear optics.

Chem 583. Chemical Group Theory. (1-0) Cr. 1. F. *Prereq: 324.* Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momenta; space groups and crystals; permutation group, antisymmetry, and spin states.

Chem 589. Current Topics in Chemistry. (1-0) Cr. R. F.S. Presentation of recent literature and chemical problems under current investigation.

Chem 599. Nonthesis Research. Cr. arr. *Prereq: Permission of instructor concerned.*

Courses for graduate students

Chem 501L. Inorganic Preparations. (0-3) Cr. 1. F. *Prereq: 402.* Preparation and characterization of inorganic and organometallic compounds by modern research techniques.

Chem 502. Advanced Inorganic Chemistry. (Dual-listed with 402). (3-0) Cr. 3. F. *Prereq: 301; 331 recommended.* Chemistry of the d and f metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic, solid state, and bioinorganic chemistry.

Chem 503. Bioinorganic Chemistry. (Cross-listed with BBMB). (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 402 or BBMB 405.* Essential elements: transport and storage of ions and of oxygen; metalloenzymes and metallocoenzymes; electron-transfer processes in respiration and photosynthesis; metabolism of nonmetals and redox processes involved in it; medicinal aspects of inorganic chemistry.

Chem 505. Physical Inorganic Chemistry. (3-0) Cr. 3. S. *Prereq: 402 or 502 and 324.* Elementary group theory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds.

Chem 511. Advanced Quantitative Analysis. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 316 and 316L.* General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular microscopy; bioanalytical methods; data evaluation; chemometrics; and analytical literature.

Chem 512. Electrochemical Methods of Analysis. (3-0) Cr. 3. F. *Prereq: 316 and 316L, 324, and 322L.* Principles of convective-diffusional mass transport in electroanalysis. Applications of potentiometry, voltammetry, and coulometry. Introduction to heterogeneous and homogeneous kinetics in electroanalysis. Analog and digital circuitry. Interfacing.

Chem 513. Analytical Molecular and Atomic Spectroscopy. (3-0) Cr. 3. S. *Prereq: 316 and 316L, 324, 322L.* Introduction to physical optics and design of photometric instruments. Principles of absorption, emission, fluorescence, and Raman Spectroscopy. Error and precision of optical methods. Ultraviolet, visible, and infrared methods of qualitative and quantitative organic and inorganic analysis.

Chem 516. Analytical Separations. (3-0) Cr. 3. F. *Prereq: 316 and 316L, 324, 322L.* Principles and examples of inorganic and organic separation methods applied to analytical chemistry. Solvent extraction, volatilization, ion exchange, liquid and gas chromatography, and electrophoresis.

Chem 531. Organic Synthesis I. (2-0) Cr. 2. S. *Prereq: 332.* Survey of organic functional group transformations.

Chem 532. Organic Synthesis II. (2-0) Cr. 2. F. *Prereq: 531.* Synthesis of complex organic compounds including natural products.

Chem 537. Physical Organic Chemistry I. (3-0) Cr. 3. F. *Prereq: 332.* Molecular structure, stereochemistry, introduction to reaction mechanisms, thermodynamic and kinetic data, linear free energy relationships, isotope effects, orbital symmetry.

Chem 538. Physical Organic Chemistry II. (3-0) Cr. 3. S. *Prereq: 537* Survey of reactive intermediates including cations, anions, carbenes, and radicals.

Chem 540. Seminar in Forensic Sciences. (1-0) Cr. 1. Repeatable. S. *Prereq: Chem 231 or graduate enrollment.* Seminars by professional criminalists, research scientists, Certificate students, and educators. Emphasis on opportunities for research and development, citizen involvement, and educational outreach related to forensic science. Weekly report required.

Chem 542. Independent Research and Presentation in Forensic Science. (1-0) Cr. 1. S. *Prereq: Enrollment in the Graduate Certificate in Forensic Sciences.* Research topic approved by course instructor. Written and oral reports required. Oral report given in forensics seminar, Chem 540.

Chem 550. Safety in the Chemical Laboratory. (1-0) Cr. 1. S. *Prereq: 332L.* Introduction to laboratory safety and chemical hygiene. Use of engineering controls and personal protective equipment. Chemical storage and waste disposal practices. Handling hazardous chemicals. Radiation safety and laser safety. Satisfactory-fail only.

Chem 555. Teaching College Chemistry. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: Graduate or senior classification..* Methods of instruction, strategies and techniques for effective teaching and learning along with practice teaching in undergraduate chemistry recitation and laboratory courses. Cooperative learning, guided-inquiry, learning cycles, conceptual change, models and modeling, concept maps, visualization, computer simulations, web-based delivery systems, and learning theories.

Chem 561. Fundamentals of Quantum Mechanics. (4-0) Cr. 4. F. *Prereq: 324.* Schroedinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; operators including angular momenta; time-independent and time-dependent perturbation theory; Schroedinger and Heisenberg representations; unitary operators; interaction picture, density matrix.

Chem 562. Fundamentals of Atomic and Molecular Quantum Mechanics. (3-0) Cr. 3. S. *Prereq: 561, credit or enrollment in 583.* Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods.

Chem 563. Statistical Mechanics. (3-0) Cr. 3. S. *Prereq: 325.* Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium.

Chem 564. Molecular Spectroscopy and Structure. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 505 or 562.* Maxwell's field equations, interaction of light with matter including time-dependent perturbation theory, microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection rules, special lineshapes and introduction to nonlinear and coherent laser spectroscopies.

Chem 571. Solid-State Chemistry. (2-0) Cr. 2. Alt. S., offered 2011. *Prereq: 301, 324.* A study of solid state materials including structures, bonding, defects, disorder, phase transitions, ionic mobility, metal-insulator transitions, band theory, synthesis and intercalation.

Chem 572. Spectrometric Identification of Organic Compounds. (2-3) Cr. 3. F. *Prereq: 332.* Principles of infrared, ultraviolet, nuclear magnetic resonance, and mass spectroscopy as applied to organic chemistry.

Chem 574. Organometallic Chemistry of the Transition Metals. (2-0) Cr. 2. Alt. S., offered 2010. *Prereq: 301, 332.* Transition metal complexes of ligands such as cyclopentadienyl, olefins, acetylenes, benzenes, and carbon monoxide. Homogeneous catalysis.

Chem 576. Surface Chemistry. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 324.* Gas-surface interactions and techniques of characterization. Idealized surface lattices, surface tension, Wulff plots, work function, adsorbate-adsorbate interactions, 2D phase diagrams, diffusion, thin film growth, adsorption and desorption mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based spectroscopies for surface analysis (including AES, FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM).

Chem 577. Mass Spectrometry. (3-0) Cr. 3. S. *Prereq: Permission of instructor.* Basic physics, instrumentation, chemical and biological applications of mass spectrometry.

Chem 578. Chemical Kinetics and Mechanisms. (2-0) Cr. 2. Alt. F., offered 2010. *Prereq: 324.* Rates and mechanisms; reversible, consecutive, and competing reactions; chain mechanisms; kinetic isotope effects; very rapid reactions; acid-base catalysis, theories of unimolecular reactions; transition State and Marcus theories.

Chem 579. Introduction to Research in Chemistry. (1-0) Cr. R. F.S. Introduction to the various areas of research in chemistry at Iowa State University.

Chem 580. Introduction to Computational Quantum Chemistry. (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: 324.* Basic principles of quantum mechanics, schrodinger equation. Hartree-Fock/molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry.

Chem 581. Principles of Lasers and Optics. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 324, Phys 222.* Students with weak background should take Chem 580. For students working with lasers and optics; stimulated adsorption and emission based on the classical electron oscillator model; population inversion, laser amplification; laser pumping; oscillation and cavity modes; laser beam characterization; linear propagation; design of laser resonators, ray and wave optics; nonlinear optics.

Chem 583. Chemical Group Theory. (1-0) Cr. 1. F. *Prereq: 324.* Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momenta; space groups and crystals; permutation group, antisymmetry, and spin states.

Chem 589. Current Topics in Chemistry. (1-0) Cr. R. F.S. Presentation of recent literature and chemical problems under current investigation.

Chem 599. Nonthesis Research. Cr. arr. *Prereq: Permission of instructor concerned.*

Chem 600. Seminar in Inorganic Chemistry. (1-0) Cr. 1. Repeatable. F.S. *Prereq: Permission of instructor.*

Chem 601. Selected Topics in Inorganic Chemistry. (2-0) Cr. arr. F.S. *Prereq: Permission of instructor.* Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; nonaqueous solutions; Zintl phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and bioinorganic chemistry of nucleic acids.

Chem 611. Seminar in Analytical Chemistry. (1-0) Cr. 1. Repeatable. F.S. *Prereq: Permission of instructor.*

Chem 619. Special Topics in Analytical Chemistry. (2-0) Cr. arr. Repeatable. F.S. *Prereq: Permission of instructor.* Raman Spectroscopy, sensors, spectroelectrochemistry, capillary electrophoresis, analytical plasmas, chemometrics and bioanalytical chemistry.

Chem 631. Seminar in Organic Chemistry. (1-0) Cr. 1. Repeatable. F.S. *Prereq: Permission of instructor.*

Chem 632. Selected Topics in Organic Chemistry. (2-0) Cr. arr. Repeatable. F.S. *Prereq: 537.* Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidations and reductions, modern organic synthesis, reactive intermediates, bioorganic chemistry, and polymers.

Chem 660. Seminar in Physical Chemistry. (1-0) Cr. 1. Repeatable. S. *Prereq: Permission of instructor.*

Chem 667. Special Topics in Physical Chemistry. (2-0) Cr. arr. F.S. *Prereq: Permission of instructor.* Advanced and recent developments in physical chemistry are selected for each offering.

Chem 699. Research. Cr. arr. Repeatable. *Prereq: Permission of instructor.*

Civil Engineering

(Administered by the Department of Civil, Construction and Environmental Engineering)

James Alleman, Chair of Department

Distinguished Professors: Klaiber

Distinguished Professors (Emeritus): Baumann, Cleasby, Handy

University Professors (Emeritus): Lohnes

Professors: Alleman, Fanous, Jaselskis, Kannel, Maze, Nambisan, Ong, Pometto, Porter, Sarkar, Schaefer, Souleyrette, Van Leeuwen, Wipf

Professors (Emeritus): Bergeson, Brewer, Carstens, Greimann, Hardy, Jellinger, Kao, Lee, Mashaw, Mickle, Morgan, Northup, Oulman, Sanders

Professors (Collaborators): Surampalli

Associate Professors: Abendroth, Baenziger, Bhandari, Ellis, Gu, Hallmark, Jahren, Koziel, Rehmann, Sritharan, Strong, Sung, Wang, White, Williams

Associate Professors (Emeritus): Chase, Mercier, Sheeler, Ward

Assistant Professors: Aslock, Bolluyt, Ceylan, Gkritza, Grewell, Kandil, Rouse, Shane

Assistant Professors (Adjunct): Phares, Plazak, Schlorholtz, Smadi, Taylor

Instructors (Adjunct): Amenson, Gaunt

Senior Lecturers: Cormicle, Jones, Sirotiak, Walton

Lecturers: Baker, Cackler, Hawkins, Hunacek, Mescher, Perkins, Smith, Stout

Clinician: Gopalakrishnan

Undergraduate Study

For undergraduate curriculum in civil engineering leading to the degree bachelor of science, see *College of Engineering, Curricula.* This curriculum is accredited by the Engineering Accreditation Commission of the ABET.

Civil engineering consists of the application of the laws, forces, and materials of nature to the planning, design, construction, maintenance, and operation of public and private facilities, subject to economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes the planning, design, and responsible execution of surveying operations, and the location, delimitation, and delineation of physical and cultural features on the surface of the earth. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on the campus is supplemented by inspection trips which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health; providing safe, palatable and ample water supply; management of solid and hazardous waste; proper treatment and disposal of domestic and industrial wastewaters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and the control of water quality, soil contamination, and air pollution. At the undergraduate level, the study of various environmental and water resource engineering topics is part of the course of study leading to the Bachelor's degree in civil engineering.

Program Goal

Consultation with an industrial advisory board of employers of civil engineers, with a broad base of civil engineering educators, and with students and alumni has yielded a continuous process of program planning, program assessment, curriculum development, and instructional development to produce an integrated, learning-based curriculum. The curriculum listed in this catalog has the academic program goal of developing an effective program that fulfills student educational needs and that equips and empowers qualified students for a successful career in civil or environmental engineering.

Program Objectives

To achieve the program goal, the Department has developed objectives intended to result in the following outcomes such that graduates:

1. have a comprehensive education in the fundamentals of civil engineering,

2. are prepared to undertake civil engineering design tasks,

3. demonstrate effective communication skills and teamwork in multidisciplinary projects,

4. play a constructive role to address the needs of Society and the environment, and

5. are motivated to continue their professional development.

The faculty encourages the development of the student's professional skills through participation in cooperative education, internships, or progressive summer engineering employment. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and a master of science in Civil Engineering or a master of business administration in the College of Business Administration.

Graduate Study

The Department of Civil, Construction and Environmental Engineering offers work for the master of science and doctor of philosophy degrees with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, and transportation engineering. The department also offers minor work to students from other engineering departments.

Candidates for the degree master of science are required to satisfactorily complete 30 credits of acceptable graduate work, including preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree refer to the department's home page and/or the department's Graduate Student Handbook for degree options and credit requirements. The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of engineering students at this university. However, because of the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student's background and area of interest. A prospective graduate student is urged to specify the degree program and area of specialization in which he or she is interested on the application for admission. The department participates in the interdepartmental majors in transportation (master of science only), environmental science, and biorenewable resources and technology (see Index).

The Department of Civil, Construction and Environmental Engineering offers a graduate certificate in environmental engineering. Completion of the certificate requires at least twelve credits including 520, 521, 591 (R) seminar, and any two courses related to environmental engineering from those available from the departments of Civil, Construction and Environmental Engineering, Agricultural and Biosystems Engineering, and Chemical and Biological Engineering.

Courses primarily for undergraduate students

C E 101. Technical Lecture. Cr. R. F.S. (1-0) Discussion of various phases of civil engineering. For transfer students only. Evaluation of transfer credits and discussion of graduation requirements. Satisfactory-fail only.

C E 105. Introduction to the Civil Engineering Profession. (1-0) Cr. 1. F.S. Overview of the nature and scope of the civil engineering profession. Exploration of the various specialty areas within civil engineering. Bloom's Taxonomy and creativity. Departmental rules, student services operations, degree requirements, educational objectives, program of study planning, career options, and student organizations.

C E 111. Fundamentals of Surveying I. (2-3) Cr. 3. F.S. *Prereq: 160, credit or enrollment in Engr 170 or C E 170, Math 165, credit or enrollment in C E 105 for C E majors.* Introduction to error theory. Fundamentals of observing distances, elevations, and angles. Traversing. Irregular areas. Circular and parabolic curves. Earthwork including mass diagrams. Construction staking. Computer applications and introduction to photogrammetry, geographic information systems and global positioning systems technology.

C E 120. Civil Engineering Learning Community. Cr. R. Repeatable. Integration of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. Satisfactory-fail only.

C E 160. Engineering Problems with Computational Laboratory. (2-2) Cr. 3. F.S. *Prereq: Math 141, 142 or satisfactory scores on mathematics placement assessments; credit or enrollment in Math 165. Form*ulation of engineering problems using spreadsheets and Visual Basic for Application for solution. Presenting results using word processing, tables, and graphs. Introduction to engineering economics and statics. Civil engineering examples.

C E 170. Graphics for Civil Engineering. (0-4) Cr. 2. F.S. *Prereq: Math 165, credit or enrollment in C E 105.* Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

C E 205. Economic Analysis and Technical Communication in Civil Engineering. (3-0) Cr. 3. F.S. *Prereq: Math 166, Engl 250.* Concepts and applications of civil engineering economics. Engineering economics basics including analysis of interest, present worth, annual worth, future worth, and rate of return. Comparison of project alternatives with incremental rate of return, benefit/cost ratio, taxation, depreciation, and inflation. Principles and processes of effective written and oral communication of civil engineering technical information.

C E 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* First professional work period in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

C E 305. Professional Issues in Civil Engineering. (3-0) Cr. 3. F.S. *Prereq: 205.* Civil engineering history and heritage. Professionalism, licensure, liability, ethics, leadership, teamwork, critical thinking, and social responsibility in the practice of civil engineering. Engineering business management principles, including organizational structures and business economics. Applications and impacts of regulations in civil engineering. Written and oral technical presentations.

C E 306. Project Management for Civil Engineers. (2-3) Cr. 3. F.S. *Prereq: 305.* Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents and in estimating quantities.

C E 326. Principles of Environmental Engineering. (2-2) Cr. 3. F.S. *Prereq: Chem 167 or 178, Math 166, credit or enrollment in E M 378.* Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control. Nonmajor graduate credit.

C E 332. Structural Analysis I. (2-2) Cr. 3. F.S. *Prereq: E M 324.* Loads, shear, moment, and deflected shape diagrams for beams and framed structures. Approximate methods. Deformation calculations. Application of flexibility methods to frames and continuous beams. Application of moment distribution and stiffness methods to continuous beams and braced frames. Influence lines for determinate and indeterminate beams using Muller-Breslau principle. Computer applications to analyze beams and frames. Nonmajor graduate credit.

C E 333. Structural Steel Design I. (2-2) Cr. 3. F.S. *Prereq: 332, E M 327.* Design and behavior of the elements of steel structures, proportioning members and connections. Load and Resistance Factor Design. Preliminary design of a building structure. Nonmajor graduate credit.

C E 334. Reinforced Concrete Design I. (2-2) Cr. 3. F.S. *Prereq: 332, E M 327.* Analysis and design of beams, one-way slabs, and columns. Preliminary design of building frames using pattern loading and moment coefficients. Nonmajor graduate credit.

C E 350. Introduction to Transportation Planning. (3-0) Cr. 3. S. *Prereq: 3 credits in statistics, junior classification.* An introductory course for planning urban and regional transportation systems within government. Applications and impacts of legislation, financing, four-step planning process, population trends, land use, societal impacts, public transportation, master plans and traffic impact studies. Organization and coordination of the transportation planning function. Term paper and class participation required. Not available for graduation credit for students in civil engineering.

C E 355. Principles of Transportation Engineering. (2-0) Cr. 2. F.S. *Prereq: 111, 205, Phys 221, a course in statistics from the approved departmental list.* Introduction to planning and operations of transportation facilities. Vehicle/operation/infrastructure characteristics. Technological, economic and environmental factors. Travel demand modeling and capacity analysis.

C E 360. Geotechnical Engineering. (2-3) Cr. 3. F.S. *Prereq: E M 324, credit or enrollment in Geol 201.* Introduction to soil engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity. Nonmajor graduate credit.

C E 372. Engineering Hydrology and Hydraulics. (3-2) Cr. 4. F.S. *Prereq: E M 378, a course in statistics from the approved department list.* The hydrologic cycle: precipitation, infiltration, runoff, evapotranspiration, groundwater, and streamflow. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required. Nonmajor graduate credit.

C E 382. Design of Concretes. (2-3) Cr. 3. F.S. *Prereq: Credit or enrollment in 360.* Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing; principles of pavement thickness design. Nonmajor graduate credit.

C E 383. Design of Portland Cement Concrete. (0-2) Cr. 1. F.S. *Prereq: Credit or enrollment in 360.* For Con E students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete.

C E 388. Sustainable Engineering and International Development. (Cross-listed with A E, E E, M E, Mat E). (2-2) Cr. 3. F. *Prereq: Junior classification in engineering.* Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as non-government organizations (NGOs). Course readings, final project/design report.

C E 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of department and Engineering Career Services, completion of two terms in residence in civil engineering, employment in civil engineering or related field.* Summer professional work period. Students must register for this course prior to commencing work. Satisfactory-fail only.

C E 397. Engineering Internship. Cr. R. Repeatable. F.S. *Prereq: Permission of department and Engineering Career Services.* One semester maximum per academic year professional work period. Students must register for this course prior to commencing work. Satisfactory-fail only.

C E 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: 298, permission of department and Engineering Career Services.* Second professional work period in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

C E 403. Program and Outcome Assessment. Cr. R. F.S. *Prereq: Verification of undergraduate application for graduation by the end of the first week of class. Permission of instructor for students who are scheduled for summer graduation.* Assessment of C E Curriculum and educational objectives. Satisfactory-fail only.

C E 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with A E, BioE, BSE). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

C E 417. Land Surveying. (2-3) Cr. 3. S. *Prereq: 111.* Legal principles affecting the determination of land boundaries, public domain survey systems. Locating sequential and simultaneous conveyances. Record research, plat preparation, and land description. Study of selected court cases. Nonmajor graduate credit.

C E 420. Environmental Engineering Chemistry. (Dual-listed with 520). (2-3) Cr. 3. F. *Prereq: 326, Chem 177 and 178, Math 166.* Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilbria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 421. Environmental Biotechnology. (Dual-listed with 521). (2-2) Cr. 3. F. *Prereq: 326.* Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens, parasites, and disinfection.

C E 424. Air Pollution. (Dual-listed with 524). (Cross-listed with EnSci, A E). (1-0) Cr. 1. *Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above.* 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

C E 428. Water and Wastewater Treatment Plant Design. (2-2) Cr. 3. S. *Prereq: 326.* Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management.

C E 446. Bridge Design. (2-2) Cr. 3. Alt. S., offered 2011. *Prereq: 333, 334.* Bridge design in structural steel and reinforced concrete. Application of AASHTO Bridge Design Specifications. Analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches. Nonmajor graduate credit.

C E 447. Building Design. (2-2) Cr. 3. Alt. S., offered 2010. *Prereq: 333, 334.* Building design in structural steel and reinforced concrete. Investigation of structural behavior of frameworks. Lateral load resisting systems. Application of current building codes and design specifications. Review of building designs. Preliminary designs include investigating alternative structural systems. Final designs include preparation of design calculations and sketches. Nonmajor graduate credit.

C E 451. Urban Transportation Planning Models. (Dual-listed with 551). (2-2) Cr. 3. F. *Prereq: 350 or 355.* Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems. Nonmajor graduate credit.

C E 453. Highway Design. (3-3) Cr. 4. F.S. *Prereq: 306, 355, 372, 382.* Introduction to traffic engineering and highway planning. Design, construction, and maintenance of highway facilities; earthwork, drainage structures; pavements. Preparation of environmental impact statement. A complete design project is required. Oral and written reports. Computer applications. Nonmajor graduate credit.

C E 460. Foundation Engineering. (3-0) Cr. 3. F.S. *Prereq: 360.* Fundamentals of foundation engineering. Exploration, sampling, and in-situ tests. Shallow and deep foundations. Settlement and bearing capacity analyses. Stability of excavations and earth retaining structures. Nonmajor graduate credit.

C E 473. Groundwater Hydrology. (Dual-listed with 573). (3-0) Cr. 3. F. *Prereq: 372.* Principles of groundwater flow, hydraulics of wells, super-position, slug and pumping tests, streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Nonmajor graduate credit.

C E 483. Pavement Analysis and Design. (Dual-listed with 583). (3-0) Cr. 3. *Prereq: 360 and 382.* Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems. Nonmajor graduate credit.

C E 485. Civil Engineering Design I. (1-2) Cr. 2. F.S. *Prereq: 306, 326, 333 or 334, 355, Sp Cm 212.* The civil engineering design process, interacting with the client, identification of the engineering problems, development of a technical proposal, identification of design criteria, cost estimating, planning and scheduling, codes and standards, development of feasible alternatives, selection of best alternative, oral presentation and poster.

C E 486. Civil Engineering Design II. (1-4) Cr. 3. F.S. *Prereq: 326, 333 or 334, 382; credit or enrollment in 428 or 453, and 485.* The engineering design computations, case histories of design inadequacies, environmental impact, safety and health in the work place, ethics, contract documents, design plans and specifications, teamwork, synthesis of previous coursework in a group project, oral presentations.

C E 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Independent study in any phase of civil engineering. Pre-enrollment contract required.
H. Honors

C E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: 398, permission of department and Engineering Career Services.* Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

C E 501. Preconstruction Project Engineering and Management. (3-0) Cr. 3. *Prereq: Con E 221 and 421.* Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Determinants of construction project success, conceptual estimating, design and engineering planning for automated construction techniques, constructability review procedures, planning for safety, value engineering.

C E 502. Construction Project Engineering and Management. (3-0) Cr. 3. *Prereq: Con E 221 and 421.* Application of engineering and management control techniques to construction projects. Construction project control techniques, equipment selection and utilization, project administration, construction process simulation, Quality Management, and productivity improvement programs.

C E 503. Construction Management Functions and Processes. (3-0) Cr. 3. *Prereq: Con E 421.* Analysis of critical construction management skills. Analysis of organizational systems related to construction management. Case studies. Analysis of theories of motivation, planning, leadership, organizational change, etc., as they relate to field construction operations.

C E 505. Design of Construction Systems. (3-0) Cr. 3. *Prereq: 334, 360, Con E 322 and 340.* Advanced design of concrete formwork and falsework systems. Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

C E 506. Case Histories in Construction Documents. (3-0) Cr. 3. *Prereq: Con E 221, credit or enrollment in Con E 421.* Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510. Information Technologies for Construction. (3-0) Cr. 3. *Prereq: Con E 421, Engr 160 or C E 160 or equivalent.*Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with A E, BRT, BSE). (3-0) Cr. 3. F. *Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification.* Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis. Term paper for graduate level only.

C E 513. Geodetic and Satellite Surveying. (2-3) Cr. 3. *Prereq: 111.* Triangulation and trilateration observation and computation. Precise leveling. Electronic distance measuring instrument calibration. Geodetic astronomy for latitude and longitude determination. Global positioning systems of satellite observation and computation.

C E 520. Environmental Engineering Chemistry. (Dual-listed with 420). (Cross-listed with EnSci). (2-3) Cr. 3. *Prereq: Chem 177 and 178, Math 166.* Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Individual laboratory practicals and group projects required. Term paper and oral presentation for graduate level only.

C E 521. Environmental Biotechnology. (Dual-listed with 421). (Cross-listed with EnSci). (2-2) Cr. 3. *Prereq: 326.* Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

C E 522. Water Pollution Control Processes. (Cross-listed with EnSci). (2-2) Cr. 3. *Prereq: 521.* Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

C E 523. Physical-Chemical Treatment Process. (Cross-listed with EnSci). (2-2) Cr. 3. *Prereq: 520.* Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

C E 524. Air Pollution. (Dual-listed with 424). (Cross-listed with A E, EnSci). (1-0) Cr. 1. *Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above.* 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

C E 527. Solid Waste Management. (Cross-listed with EnSci). (3-0) Cr. 3. *Prereq: 326.* Planning and design of solid waste management systems; includes characterization and collection of domestic, commercial, and industrial solid wastes, waste minimization and recycling, energy and materials recovery, composting, incineration, and landfill design.

C E 529. Hazardous Waste Management. (Cross-listed with EnSci). (3-0) Cr. 3. *Prereq: 326.* Regulatory requirements for the classification, transport, storage and treatment of hazardous wastes. Analysis and design of alternatives for treatment and disposal technologies, including physical, chemical, and biological treatment, solidification, incineration, and secure landfill design. Regulatory requirements and procedures for hazardous waste contaminated site investigations and risk analysis. Analysis and design of remedial action alternatives for site restoration.

C E 532. Structural Analysis II. (3-0) Cr. 3. F. *Prereq: 332.* Analysis of indeterminate structural problems by the force and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Additional topics for the stiffness method.

C E 533. Structural Steel Design II. (3-0) Cr. 3. *Prereq: 333.* Every third semester, offered F 2009. Development of the AISC design equations for and the design of tension members, columns, beams, beam-columns, and plate girders for Load and Resistance Factor Design. Elastic and inelastic buckling of members and member elements. Torsion of W-shapes.

C E 534. Reinforced Concrete Design II. (2-2) Cr. 3. *Prereq: 334.* Every third semester, offered F 2010. Design of reinforced concrete long columns, floor slabs, building frames, isolated footings and combined footings. Design and behavior considerations for torsion, biaxial bending, structural joints and shear friction. Introduction to cold-formed composite steel and composite floor slab design.

C E 535. Prestressed Concrete Structures. (3-0) Cr. 3. *Prereq: 334.* Every third semester, offered F 2009. Design of prestressed concrete structures, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, statically indeterminate structures.

C E 536. Masonry and Timber Design. (2-2) Cr. 3. *Prereq: 334.* Every third semester, offered S 2010. Behavior and design of clay and concrete masonry beams, columns, walls, and structural systems. Behavior and design of timber and laminated timber beams, columns, connections, and structural systems.

C E 541. Dynamic Analysis of Structures. (3-0) Cr. 3. *Prereq: E M 345 and credit or enrollment in 532.* Every third semester, offered S 2010. Single and multi-degree-of-freedom systems. Free and forced vibrations. Linear and nonlinear response. Modal analysis. Response spectra. Seismic analysis.

C E 542. Structural Analysis by Finite Elements. (3-0) Cr. 3. S. *Prereq: 532.* Use of the finite element method for the analysis of complex structural configurations. Plane stress, plate and shell finite elements. General purpose finite element programs.

C E 545. Seismic Design. (3-0) Cr. 3. *Prereq: 333, 334.* Every third semester, offered F 2010. Seismic hazard in the United States. Engineering characteristics of ground motions. Structural damage in past earthquakes. Capacity design Philosophy for seismic resistant design. Conceptual design of structures. Capacity design process including design of structural members.

C E 547. Analysis and Design of Plate and Slab Structures. (3-0) Cr. 3. *Prereq: 334, E M 514, Math 266.* Bending and buckling of thin plate components in structures utilizing classical and energy methods. Analysis of shell roofs by membrane and bending theories.

C E 550. Advanced Highway Design. (3-0) Cr. 3. *Prereq: 453.* Evaluation of rural and urban street and highway design theory. Establishment of design criteria, application to street and highway systems, and to intersections and interchanges; drainage design, and urban freeway design aspects. Computer applications.

C E 551. Urban Transportation Planning Models. (Dual-listed with 451). (2-2) Cr. 3. F. *Prereq: 350 or 355.* Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems. Term project required for graduate credit.

C E 552. Traffic Safety, Operations, and Maintenance. (2-2) Cr. 3. *Prereq: 355.* Engineering aspects of highway traffic safety. Reduction of accident incidence and severity through highway design and traffic control. Accident analysis. Legal implications. Safety in highway design, maintenance, and operation.

C E 553. Traffic Engineering. (2-2) Cr. 3. *Prereq: 355.* Driver, pedestrian, and vehicular characteristics. Traffic characteristics; highway capacity; traffic studies and analyses. Principles of traffic control for improved highway traffic service. Application of intersection, corridor or network analysis computer evaluation and optimization tools.

C E 554. Advanced Technology in Transportation. (3-0) Cr. 3. *Prereq: 350, 355, graduate standing in transportation or civil engineering.* Advanced traffic control systems including signal systems technology and field assets. Regional traffic management and communications centers. Traffic surveillance, monitoring and incident management. Advanced traveler information systems. The automated highway.

C E 555. Advanced Traffic Operations. (3-0) Cr. 3. *Prereq: 553.* Solve real-world traffic engineering problems; explore interactions between traffic systems components; advanced skills related to signal timing, coordination, and optimization; practical applications of common traffic engineering tools.

C E 556. Transportation Data Analysis. (3-0) Cr. 3. *Prereq: 355, Stat 101 or 105.* Analysis of transportation data, identification of data sources and limitations. Static and dynamic data elements such as infrastructure characteristics, flow and operations-related data elements. Spatial and temporal extents data for planning, design, operations, and management of transportation systems. Summarizing, analyzing, modeling, and interpreting data. Use of information technologies for highways, transit, and aviation systems.

C E 557. Transportation Systems Analysis. (3-0) Cr. 3. *Prereq: 355, 3 credits in statistics or probability.* Travel studies and analysis of data. Travel projections. Public transportation forecasts and analyses. Statewide, regional, and local transportation system planning. Corridor travel planning. Optimization of systems.

C E 558. Transportation Systems Development and Management Laboratory. (2-2) Cr. 3. *Prereq: 350 or 355.* Study of designated problems in traffic engineering, urban transportation planning, and urban development. Forecasting and evaluation of social, economic, and environmental impact of proposed solutions; considerations of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

C E 559. Transportation Infrastructure/Asset Management. (3-0) Cr. 3. *Prereq: 355 or 453, 382.* Engineering management techniques for maintaining and managing infrastructure assets. Systematic approach to management through value engineering, engineering economics, and life cycle cost analysis. Selection and scheduling of maintenance activities. Analysis of network-wide resource needs. Project level analysis.

C E 560. Fundamentals of Soil Mechanics. (3-0) Cr. 3. *Prereq: 360.* Limiting stress analysis, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, seepage, pore pressure parameters, consolidation, slope stability and retaining wall applications.

C E 561. Applied Foundation Engineering. (2-3) Cr. 3. *Prereq: 460.* Lateral earth pressure theories and retaining structures. Field investigations, in-situ testing, foundations on expansive soils, and analysis and design of shallow and deep foundations. Foundation engineering reports.

C E 562. Site Evaluations for Civil Engineering Projects. (2-2) Cr. 3. *Prereq: 360.* Identification and mapping of engineering soils from airphotos. Use of remote sensing and GIS, planning subsurface investigations, geomaterials prospecting, water resource applications.

C E 563. Experimental Methods in Geo-Engineering. (1-4) Cr. 3. *Prereq: 360.* Principles of geo-engineering laboratory testing including the conduct, analysis, and interpretation of soil classification tests, compaction tests, permeability tests, consolidation, triaxial, direct and ring shear tests. Issues regarding laboratory testing versus field testing and acquisition, transport, storage, and preparation of samples for geotechnical testing. Field and laboratory geotechnical monitoring techniques, including the measurements of deformation, strain, total stress and pore water pressure.

C E 564. Application of Numerical Methods to Geotechnical Design. (3-0) Cr. 3. *Prereq: 560.* Application of numerical methods to analysis and design of foundations, underground structures, and soil-structure interaction. Application of slope stability software. Layered soils, bearing capacity and settlement for complex geometries, wave equation for piles, and foundation vibrations.

C E 565. Fundamentals of Geomaterials Behavior. (2-3) Cr. 3. *Prereq: 382.* Atoms and molecules, crystal chemistry, clay minerals, structure of solids, phase transformations and phase equilibria. Surfaces and interfacial phenomena, colloid chemistry, mechanical properties. Applications to soils and civil engineering materials. Overview of state-of-the-art instrumental techniques for analysis of the physicochemical properties of soils and civil engineering materials.

C E 567. Geomaterials Stabilization. (2-2) Cr. 3. *Prereq: 565.* Soil and aggregate physical and chemical stabilization procedures. Soil stabilization analysis and design. Ground modification methods. Geosynthetics application and design.

C E 570. Applied Hydraulic Design. (2-2) Cr. 3. *Prereq: 372.* Flow characteristics in natural and constructed channels; principles of hydraulic design of culverts, bridge waterway openings, spillways, hydraulic gates and gated structures, pumping Stations, and miscellaneous water control structures; pipe networks, mathematical modeling. Design project.

C E 571. Surface Water Hydrology. (Cross-listed with EnSci). (3-0) Cr. 3. *Prereq: 372.* Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and Statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. Design project.

C E 572. Analysis and Modeling Aquatic Environments. (Cross-listed with EnSci). (3-0) Cr. 3. *Prereq: 372.* Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

C E 573. Groundwater Hydrology. (Dual-listed with 473). (Cross-listed with EnSci). (3-0) Cr. 3. *Prereq: 372.* Principles of groundwater flow, hydraulics of wells, super-position, slug and pumping tests,

streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Individual and group projects.

C E 574. Environmental Impact Assessment. (Cross-listed with EnSci). (3-0) Cr. 3. *Prereq: 4 courses in natural, biological or engineering sciences and senior or above classification.* Review of federal and state requirements for environmental impact assessment, requirements of the National Environmental Policy Act and Council on Environmental Quality, methods of evaluating the environmental impacts on the physical, biological, socioeconomic, cultural/historical, human health and psychological environments, public participation in EIS, review and evaluate project environmental impact statements. An environmental impact assessment of a proposed project will be completed in small teams.

C E 576. Environmental Flows. (3-0) Cr. 3. *Prereq: EM 378 or equivalent.* Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

C E 581. Geotechnical and Materials Engineering Seminar. Cr. R. Repeatable. *Prereq: Graduate classification.* (1-0) Students and outside/invited speakers give weekly presentations about the ongoing research work and Geotechnical and Materials Engineering issues. Satisfactory-fail only.

C E 583. Pavement Analysis and Design. (Dual-listed with 483). (3-0) Cr. 3. *Prereq: 360 and 382.* Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 586. Advanced Asphalt Materials. (2-3) Cr. 3. *Prereq: 382.* Advanced asphalt concrete (SUPERPAVE) mix designs. Aggregates. Admixtures. Production and construction, quality control and inspection. Nondestructive testing. Pavement thickness design. Materials engineering reports.

C E 587. Advanced Portland Cement Concretes. (2-3) Cr. 3. *Prereq: 382 or 383.* Hydraulic cements, aggregates, admixtures, and mix design; concrete production, quality control, early-age properties and durability. Concrete distress examination, identification, prevention, and nondestructive testing; advanced concrete technology, high-strength and high performance concrete.

C E 590. Special Topics. Cr. arr. Repeatable. F.S.SS. Pre-enrollment contract required.

C E 591. Seminar in Environmental Engineering. Cr. R. Repeatable. F.S. *Prereq: Graduate classification.* (1-0) Contemporary environmental engineering issues. Outside speakers. Review of ongoing research in environmental engineering. Satisfactory-fail only.

C E 594. Special Topics in Construction Engineering and Management. Cr. arr. Repeatable. *Prereq: Con E 322, Con E 340 or C E 306, and permission of instructor.* Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics:
A. Planning and Scheduling
B. Computer Applications for Planning and Scheduling
C. Cost Estimating
D. Computer Applications for Cost Estimating
E. Project Controls
F. Computer Applications for Project Controls
G. Integration of Planning, Scheduling and Project Controls
J. Trenchless Technologies
K. Electrical and Mechanical Construction
L. Advanced Building Construction Topics
M. Design Build Construction
N. Industrial Construction
O. Highway and Heavy Construction
P. Advanced Technologies
Q. Construction Quality Control
R. Risk Management
S. Building Information Modeling

C E 595. Research Methods in Construction Engineering and Management. (0-1) Cr. 1. *Prereq: Credit or enrollment in 501, 502, 503, or 505.* Assigned readings and reports on research methods to solve construction engineering and management problems such as robotics, project controls, automation, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

C E 599. Creative Component. Cr. arr. Repeatable. Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis.

Courses for graduate students

C E 622. Advanced Topics in Environmental Engineering. (2-0) Cr. 2. Repeatable. *Prereq: Permission of environmental engineering graduate faculty.* Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:
A. Water Pollution Control
B. Water Treatment
C. Solid and Hazardous Waste
D. Water Resources

C E 649. Advanced Topics in Structural Engineering. (3-0) Cr. 3. Repeatable. *Prereq: Permission of structural engineering graduate faculty.* Advanced concepts in structural engineering topics. Emphasis for a particular offering will be selected from the following topics:
A. Behavior of Metal Structures
B. Design of Concrete Shells
D. Advanced Matrix Analysis of Structures
E. Dynamic Design of Structures
F. Reliability Assessment of Structures.

C E 690. Advanced Topics. Cr. arr. Repeatable. F.S.SS. Pre-enrollment contract required.

C E 697. Engineering Internship. Cr. R. Repeatable. *Prereq: Permission of coop advisor, graduate classification.* One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

C E 699. Research. Cr. arr. Repeatable. *Prereq: Pre-enrollment contract required.* Advanced topic for thesis/dissertation.

Classical Studies

www.iastate.edu/~classics

(Interdepartmental Undergraduate Program)

Program Committee: M. Henry, Chair; G. Betcher, T. Butler, J. Cunnally, J. Goodwin, M. Graham, J. Hagge, D. Hollander, R. Meyer, M. Mook

The Classical Studies program is a cross-disciplinary program in the College of Liberal Arts and Sciences which offers an integrated curriculum of courses in the languages, literatures, history, and thought of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Complete and current information about the Program may be found on-line at: www.iastate.edu/ ~classics/

Courses in Classical Studies provide background for students whose major fields of study or career interests include Anthropology, English, World Languages and Cultures, History, Music, Philosophy, Women's Studies, law, medicine, material culture, political science, the life sciences and related fields. Students who wish to pursue an interdisciplinary major in Classical Studies should consult the Program Chair.

A student who wishes to declare a minor must successfully complete the following requirements: (a) Greek 102 or Latin 102; (b) Cl St 273 or 275; (c) Three additional courses (nine credits) from the courses listed below (primary or departmental), or as approved by the program committee

Courses primarily for undergraduate students

Cl St 273. Greek and Roman Mythology. (3-0) Cr. 3. F.SS. Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories.
H. Honors (4-0) Cr. 4.

Cl St 275. The Ancient City. (3-0) Cr. 3. S. Examination of ancient urban life, including historical context, physical space, material culture, religion, literature, and art; examination of civic identity (the "polis"). Contrast between the concepts of urban and rural. Examples drawn from specific ancient cities; some attention to modern methods of recovering the conditions of ancient urban life and the fundamental concept of the city in European history.
H. Honors. (4-0) Cr. 4.

Cl St 304. Cultural Heritage of the Ancient World. (Cross-listed with Hist). (3-0) Cr. 3. *Prereq: Sophomore classification.* Historical examination of art, literature, thought, and religious beliefs of major civilizations of the ancient Mediterranean countries until the end of the 8th century.

Cl St 310. Ancient Philosophy. (Cross-listed with Phil). (3-0) Cr. 3. F. *Prereq: Phil 201.* Survey of ancient Greek Philosophy, focusing on the pre-Socratics, Plato, and Aristotle. Questions concerning being, knowledge, language, and the good life are treated in depth. Nonmajor graduate credit.

Cl St 350. Rhetorical Theories and Issues in Context. (Cross-listed with Engl, Sp Cm). (3-0) Cr. 3. S. *Prereq: Engl 250.* Ideas about the relationship between rhetoric and Society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

Cl St 353. World Literature: Western Foundations through Renaissance. (Cross-listed with Engl). (3-0) Cr. 3. F.S. *Prereq: Engl 250.* Representative works from the drama, epics, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Cl St 367. Christianity in the Roman Empire. (Cross-listed with Relig). (3-0) Cr. 3. An historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman culture on the thought and practice of Christians and the interaction of early Christians with their contemporaries. Nonmajor graduate credit.

Cl St 372. Greek and Roman Tragedy and Comedy. (3-0) Cr. 3. S. *Prereq: 273 or 275 or one course in Latin or Greek or English 250.* Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media.
H. Honors (4-0) Cr. 4.

Cl St 373. Heroes of Greece, Rome, and Today. (3-0) Cr. 3. F. *Prereq: 273 or 275 or one course in Latin or Greek or English 250.* Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil.
H. Honors (4-0) Cr. 4.

Cl St 374. Women in the Ancient Mediterranean World. (Cross-listed with Hist, W S). (3-0) Cr. 3. Repeatable. S. *Prereq: Any one course in Cl St, W S, Latin, or Greek.* Chronological and topical survey of the Status of women in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on either the Greek world and Hellenistic Egypt, or Hellenistic Egypt and Rome.
A. Hellenic World and Hellenistic Egypt
B. Roman World including Roman Egypt

Cl St 376. Classical Archaeology. (Cross-listed with Hist, Relig). (3-0) Cr. 3. Repeatable. S. Chronological survey of the material culture of the ancient Greece-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
A. Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece. (ca 3000-700 BCE).
B. Archaic through Hellenistic Greece (ca 700-30 BCE).

Cl St 383. Greek and Roman Art. (Cross-listed with Art H, Dsn S). (3-0) Cr. 3. Greek art from Neolithic through Hellenistic periods. Roman art from the traditional founding to t he end of the empire in the West. Nonmajor graduate credit.

Cl St 394. The Archaeology of Greece: An Introduction. (2-0) Cr. 2. S. Introduction to the topography, history, archaeology, monuments and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece, preparatory to study abroad in Greece (Cl St 395).

Cl St 395. Study Abroad: The Archaeology of Greece. Cr. arr. SS. *Prereq: 394.* Supervised on-site instruction in the archaeology, monuments, and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece.

Cl St 402. Greek Civilization. (Cross-listed with Hist). (3-0) Cr. 3. *Prereq: Sophomore classification.* Ancient Greece from the Bronze Age to the Hellenistic period; evolution of the Greek polis and its cultural contributions with a particular emphasis on the writings of Herodotus and Thucydides.

Cl St 403. Roman Civilization. (Cross-listed with Hist). (3-0) Cr. 3. *Prereq: Sophomore classification.* Ancient Rome from the Regal Period to the Fall of the Western Empire; evolution of Roman institutions and Rome's cultural contributions studied through original sources. Nonmajor graduate credit.

Cl St 404. Roman Social History. (Cross-listed with Hist). (3-0) Cr. 3. *Prereq: Sophomore classification.* Examines major topics in Roman social history during the late Republic and early Empire such as class, family, slavery, religion and the economy. Nonmajor graduate credit.

Cl St 430. Western Political Thought: Plato to Machiavelli. (Cross-listed with Pol S). (3-0) Cr. 3. *Prereq: 6 credits in political science, philosophy, or European History.* Major concepts in original texts of classical, medieval, and renaissance authors: justice, community, man's basic nature; natural law; force; Society outside the political order. Nonmajor graduate credit.

Cl St 480. Seminar in Classical Studies. (3-0) Cr. 3. *Prereq: 30 credits in Classical Studies or related courses, permission of Program Chair.* Advanced study of a selected topic in Classical Studies. Research paper or project selected by the student.

Cl St 490. Independent Study. Cr. arr. Repeatable. *Prereq: 7 credits in classical studies at the 200 level or higher; permission of the Program Chair.* Designed to meet the needs of students who wish to study specific topics in classical civilization in areas where courses are not offered, or to pursue such study beyond the limits of existing courses.

Courses for graduate students, major or minor, open to qualified undergraduates

Cl St 512. Proseminar in Ancient European History. (Cross-listed with Hist). (3-0) Cr. 3. Repeatable. *Prereq: Permission of instructor.* Readings in European History.
A. Ancient (Same as Hist 512A)

Cl St 594. Seminar in Ancient European History. (Cross-listed with Hist). (3-0) Cr. 3. Repeatable. *Prereq: Permission of instructor.* Topics vary each time offered.
A. Ancient (Same as Hist 594A)

Primary Courses (Offered by Other Departments)

Art H 383. Greek and Roman Art. See *Art and Design.*

Greek 101. Elementary Ancient Greek I. See *World Languages and Cultures.*

Greek 102. Elementary Ancient Greek II. See *World Languages and Cultures.*

Greek 201. Intermediate Classical Greek. See *World Languages and Cultures.*

Greek 332. Introduction to Classical Greek Literature. See *World Languages and Cultures.*

Greek 441. Advanced Readings in Greek Literature. See *World Languages and Cultures.*

Greek 442. Advanced Topics in Greek Literature. See *World Languages and Cultures.*

Greek 490. Independent Study. See *Foreign Language and Literature* website. (www.language.iastate.edu)

Hist 280. Introduction to History of Science I. See *History.*

Latin 101. Elementary Latin I. See *World Languages and Cultures.*

Latin 102. Elementary Latin II. See *World Languages and Cultures.*

Latin 201. Intermediate Latin. See *World Languages and Cultures.*

Latin 332. Introduction to Latin Literature. See *World Languages and Cultures.*

Latin 441. Advanced Readings in Latin Literature. See *World Languages and Cultures.*

Latin 442. Advanced Topics in Latin Literature. See *World Languages and Cultures.*

Latin 490. Independent Study. See *World Languages and Cultures* website. (www.language.iastate.edu)

Communication Studies

(Administered by the College of Liberal Arts and Sciences)

The Communication Studies Major

The communication studies major prepares students for careers in business and industry and graduate education. Students majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, personnel, public relations, training and development, sales, management, organizational development, business communication, law, and international and intercultural relations.

ComSt majors master a focused course of inquiry into the contemporary study of human communication. The ComSt major provides this focus through emphasis in applied communication theory and research in interpersonal, small group, organizational, and intercultural communication.

ComSt majors must earn at least 120.5 credits, with 45 credits at the 300-400 levels, and a minimum of 33 credits in ComSt.

Communication Proficiency Requirement:

To meet the University's Communication Proficiency requirement students are required to take Engl 302, 309, 314, or 415. An average of C- is required in English 150, 250 (or 250H), and this additional writing course.

The Communication Studies Major

Core Requirements (15 credits)
- 3 Introduction to Communication Studies, ComSt 101
- 3 Introduction to Interpersonal Communication, ComSt 102
- 3 Introduction to Communication Research Methods, ComSt 203
- 3 Human Communication Theory, ComSt 301

Select one of these courses:
- 3 Professional Communication, ComSt 214
- 3 Conflict Management, ComSt 218
- 3 Fundamentals of Public Speaking, SpCm 212

Upper Division Requirements (Select five course/15 credits)
- 3 Language, Thought and Action, ComSt 305
- 3 Intercultural Communication, ComSt 310
- 3 Relational Communication, ComSt 311
- 3 Organizational Communication, ComSt 314
- 3 Small Group Communication, ComSt 317
- 3 Nonverbal Communication, ComSt 325
- 3 Computer Mediated Communication, ComSt 330
- 3 Semantics, SpCm 305
- 3 Gender and Communication, ComSt 323

Select one of these seminars:
- 3 Communication Theory or Research, ComSt 404A
- 3 Interpersonal Communication, ComSt 404B
- 3 Small Group Communication, ComSt 404C
- 3 Organizational Communication, ComSt 404D
- 3 Intercultural Communication, ComSt 404E
- 3 Nonverbal Communication, ComSt 404F
- 3 Training and Development, ComSt 404G
- 3 Computer Mediated Communication, ComSt 404H

33 Total

Enhancement Requirement (4 credits)
- 4 Computer Applications, Com S 103
  Recommended: Stat 101 or equivalent

Communication Studies. The requirements for a minor in ComSt may be fulfilled by credit in ComSt 101, ComSt 203, ComSt 301 plus at least 9 additional hours of communication studies, of which 6 credits are in courses numbered 300 or above. Students must earn a grade of C or better in all courses taken for the minor. No credits in 490, 499, or 590 may apply toward the minor.

Communication Studies (ComSt)

Courses primarily for undergraduate students

ComSt 101. Introduction to Communication Studies. (3-0) Cr. 3. An introduction to communication theory, the development and functions of communication, and a survey of interpersonal, small group, organizational, and intercultural communication.

ComSt 102. Introduction to Interpersonal Communication. (3-0) Cr. 3. Application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

ComSt 203. Introduction to Communication Research Methods. (3-0) Cr. 3. An introduction to analyzing and conducting communication research. Includes theory development, statistics, and methodologies.

ComSt 214. Professional Communication. (3-0) Cr. 3. Communication theory and skill development in organizational settings. Emphasis on: interpersonal skill development, team and meeting facilitation, informational interviewing, and team presentations and self-assessment.

ComSt 218. Conflict Management. (3-0) Cr. 3. Exploration of communication theories, principles and methods associated with effective conflict management.

ComSt 301. Human Communication Theory. (3-0) Cr. 3. *Prereq: 101.* Examination of the major theories related to human communication; with particular emphasis on theories underlying interpersonal, small group, organizational, and intercultural communication.

ComSt 305. Language, Thought and Action. (Cross-listed with Sp Cm, Ling). (3-0) Cr. 3. F.S.SS. *Prereq: Engl 250.* The study of symbolic processes and how meaning is conveyed in words, sentences, and utterances; discussion of modern theories of meaning; and an exploration of relationships among language, thought and action. Nonmajor graduate credit.

ComSt 310. Intercultural Communication. (3-0) Cr. 3. *Prereq: 101 or 102, 203, 301.* Examines the theories, principles and research on intercultural communication to enhance cultural sensitivity and to recognize, accept, and adapt to cultural diversity. Interactive assignments.

ComSt 311. Relational Communication. (3-0) Cr. 3. *Prereq: 102, 203, 301.* A study of contemporary interpersonal communication theories and research. Emphasis on relational development research including initiation, maintenance, conflict management, and dissolution.

ComSt 314. Organizational Communication. (3-0) Cr. 3. *Prereq: 101 or 102, 203, 301.* Theory and research in organizational communication; strategies for assessing and improving individual and organizational communication effectiveness; an understanding of how organizational meaning is created and sustained through human communication.

ComSt 317. Small Group Communication. (3-0) Cr. 3. *Prereq: 101 or 102, 203, 301.* Theory and research in small group communication; application to group decision-making and leadership. Includes communication analyses of groups and teams.

ComSt 323. Gender and Communication. (Cross-listed with Sp Cm, W S). (3-0) Cr. 3. F. *Prereq: Sp Cm 212.* The rhetorical strategies women and men use to succeed in oral communication; the theory, principles, and practice of effective gender communication in a variety of settings. Nonmajor graduate credit.

ComSt 325. Nonverbal Communication. (Cross-listed with Sp Cm). (3-0) Cr. 3. *Prereq: ComSt 101 or 102, 203, 301.* Theory and research in nonverbal communication; exploration of nonverbal subcodes; function of nonverbal communication in various contexts; student-designed investigations.

ComSt 330. Computer Mediated Communication. (3-0) Cr. 3. *Prereq: 101 or 102, 203, 301.* Theories and perspectives related to mediated communication in interpersonal and organizational settings. Focus on how new technology will impact human interaction with computers as well as between and among humans.

ComSt 404. Seminar in Communication Studies. (Dual-listed with 504). (3-0) Cr. 3. Repeatable. *Prereq: ComSt 301 plus 9 additional hours of 300 level ComSt courses.*
A. Communication Theory or Research
B. Interpersonal Communication
C. Small Group Communication
D. Organizational Communication
E. Intercultural Communication
F. Nonverbal Communication
G. Training and Development
I. Computer Mediated Communication

ComSt 490. Independent Study. Cr. arr. Repeatable. *Prereq: 9 credits in communication studies and junior classification.* Application must be submitted for approval the semester prior to the independent study.

ComSt 499. Professional Internship. Cr. arr. Repeatable. Four hundred hours of on-site work is required for 3 hours credit. Registration by application only. Application must be submitted to Communication Studies faculty adviser for approval the semester prior to the internship.

Courses primarily for graduate students, open to qualified undergraduate students

ComSt 504. Seminar in Communication Studies. (Dual-listed with 404). (3-0) Cr. 3. Repeatable. F.S. *Prereq: Graduate standing and permission of instructor.*
A. Communication Theory and Research
B. Interpersonal Communication
C. Small Group Communication
D. Organizational Communication
E. Intercultural Communication
F. Nonverbal Communication
G. Training and Development
I. Computer Mediated Communication

ComSt 590. Special Topics. Cr. arr. Repeatable. Application must be submitted for approval the semester prior to the independent study.

Community Development

www.gpidea.org

(Interinstitutional Graduate Program)

Participating Institutions:

Iowa State University
Kansas State University
University of Nebraska
North Dakota State University
South Dakota State University

Community Development is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the six institutions: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an optional area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, and an email address are required for completing the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

C Dev 502. Community and Natural Resource Management. (3-0) Cr. 3. Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices. Enhancement of ability of community development professionals to work with communities to plan, develop and monitor conversation and development of natural resources with multiple functions.

C Dev 503. Community Development I: Principles and Strategies of Community Change. (3-0) Cr. 3. Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to conceptual models from diverse disciplines. Exploration of professional practice principles, and student construction of their personal framework for practicing community development.

C Dev 504. Community Analysis: Introduction to Methods. (3-0) Cr. 3. Introduction to research methods relevant to community development. Formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

C Dev 505. Community Development II: Organizing for Community Change. (3-0) Cr. 3. Examines role of civil Society in community planning efforts. Comparative approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

C Dev 506. Community and Regional Economic Analysis. (3-0) Cr. 3. Introduction to concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, and analytical tools. Strategies for local economic Development will also be explored.

C Dev 507. Introduction to Native Communities. (3-0) Cr. 3. A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities. Basic understanding within the context of community development of the diversity of the tribal structures and cultures and the unique history and jurisdictional considerations of these nations. Working with tribes, Federal and Indian relations, and governance and cultural issues.

C Dev 508. Ecological Economics. (3-0) Cr. 3. Approaches economy and community by looking at the inherent interdependence, jointness, and potential complimentarity between ecology and economy (utility) of a place.

C Dev 509. Building Native Community and Economic Capacity. (3-0) Cr. 3. Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

C Dev 510. Indian Country Agriculture and Natural Resources. (3-0) Cr. 3. Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

C Dev 512. Sustainable Communities. (3-0) Cr. 3. Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.

C Dev 513. Economic Development Strategies and Programs. (3-0) Cr. 3. Course explores theories of local economic Development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic Development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.

C Dev 520. Orientation in Community Development. (1-0) Cr. 1. Introduction to the Community Development program. Focus on on-line delivery methods, graduate level research and writing, technology skills.

C Dev 522. Community Leadership and Capacity Building. (3-0) Cr. 3. Defining leadership and applying it to the workplace. Understanding of potential link between leadership and community capacity. Identifying strategies for leadership development in communities.

C Dev 523. Grantwriting for Community Development Professionals. (3-0) Cr. 3. Basic Grant Development and Management will introduce students to the grant-getting process and provide an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results.

C Dev 524. Non-Profit Management in Community Development. (3-0) Cr. 3. Understanding of how non-profit organizations are run in order that they may participate more fully in community development efforts. Learning skills necessary to assist organizations to manage community development projects and programs, such as, budgeting, planning, personnel, facilities, volunteer management, and fundraising.

C Dev 542. The Policy and Politics of Coastal Areas. (Cross-listed with Pol S). (3-0) Cr. 3. Exploration of political implications of coastal policy. Issues include: "Carrying capacity," zoning, regulation of human development activities, tradeoffs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

C Dev 599. Creative Component. Cr. arr.

Community and Regional Planning

Douglas Johnston, Chair of Department

Professors: Johnston, Mahayni

Professors (Emeritus): Shinn

Associate Professors: Borich, Bradbury, Coates, Owusu

Associate Professors (Emeritus): Huntington, Knox, Malone

Assistant Professors: Basmajian, Clapp, Haddad, Sandoval, Taylor, Trabalzi

Assistant Professors (Adjunct): Swenson

Lecturers: Jensen, Mehrotra

Undergraduate Study

For undergraduate curriculum in community and regional planning leading to the degree bachelor of science, see College of Design, Curricula.

Community and regional planning is a professional field of study aimed at assessing the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to understand and solve problems. Most planners work at the local level, but they are concerned with issues that affect the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Planning has its roots in landscape architecture, architecture, engineering, law, economics, and public administration. Most contemporary planners are trained in the physical and social sciences so they can understand the society and economy in which plans must be implemented. Planning demands technical competence as well as creativity, plus pragmatism and an ability to envision alternatives to the physical and social environments in which we live.

Graduates of the Community and Regional Planning department will be capable of performing in entry level positions in public planning agencies or with planning consulting firms. Graduates are able to integrate planning knowledge and skills in practical applications to current planning issues, and to communicate in written and oral form.

Graduates of the Community and Regional Planning Department are expected to have knowledge of the structure and functions of urban settlements, the history of planning, and aspects of plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, collaborative approaches to these, and in synthesizing and applying knowledge to practice. Graduates are expected to assess the impact of values in terms of equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning, thus providing the student with an education which, when combined with experience, supports the individual's eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in design studies and environmental studies.

Graduate Study

The Department offers work for the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. In addition, students can design their own area of concentration if it does not fit in any of the three areas, with the assistance of their major professor. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a thesis of 6 credits or a professional planning report of 4 credits. The planning core consists of C R P 501, 502, 511, 521, 523, 532, 561, and 592. Satisfactory completion of the core requirements and the acceptance of a thesis (6 credits) or a professional planning report (4 credits) are required for the M.C.R.P. degree. Students with a bachelors' degree in community and regional planning from an accredited planning school can waive up to 9 credits. The ability to waive credits is determined by a review of the coursework completed during undergraduate study, the grades received (only a grade of "B" or higher is acceptable) and the student's planning experience. The decision to waive up to 9 credits of the masters program should be made before first time registration for classes through a petition to the DOGE. In addition, the student is encouraged to complete three months of acceptable work experience in a planning office between the first and second year of study. No foreign language is required for the degree master of community and regional planning.

Double degree programs are offered with architecture (M.C.R.P/M.Arch.), business (M.C.R.P/M.B.A.), public administration (M.C.R.P/M.P.A.), and landscape architecture (M.C.R.P/M.L.A.). The department also participates in the interdepartmental major in transportation.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to graduate students in all disciplines of the University. Information guides for the graduate degree and certificate may be obtained from the department office at the department's web page at: http://www.design.iastate.edu/CRP/

CRP currently offers several courses via distance learning to graduates and planning professionals interested in expanding their knowledge of planning. Further details of current distance course offerings may be found on the CRP website and on the ISU Continuing Education website. For more information, send an e-mail to crp@iastate.edu

Courses primarily for undergraduate students

C R P 253. Survey of Community and Regional Planning. (3-0) Cr. 3. F. A historical survey of planning, the nature and problems of urban areas, and the goals, procedures, and results of urban planning.

C R P 270. Forces Shaping Our Metropolitan Environment. (Cross-listed with Dsn S). (3-0) Cr. 3. S. Must be taken prior to completing 9 credits in C R P. Introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

C R P 272. Planning Analysis and Techniques I. (2-2) Cr. 3. F. Existing and emerging techniques for preparation of community planning studies. Sources of planning information and data. Survey techniques including survey instruments, sampling methods, sample size for demographic studies. Land use surveys for comprehensive and transportation planning. Student's oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 274. Planning Analysis and Techniques II. (2-2) Cr. 3. S. *Prereq: 272.* Use of quantitative methods for analysis of population, land use, economic and transportation make-up of a community; activities and location, intensity, and timing of land uses and public services. Student's oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 291. World Cities and Globalization. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Sophomore classification.* World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.

C R P 293. Environmental Planning. (Cross-listed with Dsn S, Env S). (3-0) Cr. 3. F. *Prereq: Sophomore classification.* Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

C R P 320. Urban form. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 253 or 270, or permission of instructor.* Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

C R P 330. Practicum. Cr. arr. Repeatable. F.S.SS. *Prereq: Major in community and regional planning.* Structured work experience under close supervision of a professional planner. Practical planning experience; relationships between theory and practice, professional responsibilities, and the scope of various planning roles.

C R P 331. Professional Practice Seminar. (Dual-listed with 531). (1-0) Cr. 1. S. *Prereq: Major in community and regional planning.* Preparation for working in a planning office; discussion of expectation of employer; presentations from planning professionals, and discussion of differences/similarities between public and private planning offices. Satisfactory-fail only.

C R P 332. Community Planning Studio I. (2-4) Cr. 4. F. *Prereq: 253, 274.* Application of planning methods and skills to issue identification and investigation. Introduction to problem formulation, study, and analysis in a community setting.

C R P 376. Rural, Urban and Regional Economics. (Cross-listed with Econ). (3-0) Cr. 3. F.S. *Prereq: Econ 101.* Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime. Nonmajor graduate credit.

C R P 383. Theory of the Planning Process. (3-0) Cr. 3. S. *Prereq: 253, junior Status.* The nature of planning and its relation to social and economic planning; levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.

C R P 391. Field Travel. Cr. arr. Repeatable. F.S.SS. *Prereq: CRP major and permission of instructor.* Observation of professional practice and community or regional problems and issues. Satisfactory-fail only.

C R P 410. Professional Work Experience. Cr. R. F.S.SS. *Prereq: Permission of department chair.* Approved professional work experience.

C R P 416. Urban Design and Practice. (Dual-listed with 516). (3-6) Cr. 6. S. *Prereq: 253 or 270.* Principles of urban design and their application to residential and commercial development in studio projects.

C R P 417. Urban Revitalization. (Dual-listed with 517). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 253 or 270.* Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 425. Growth Management. (Dual-listed with 525). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Junior classification.* Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

C R P 429. International Planning. (Dual-listed with 529). (Cross-listed with Dsn S). (3-0) Cr. 3. S. *Prereq: Junior classification.* Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 432. Community Planning Studio II. (1-6) Cr. 4. F.S.SS. *Prereq: 332, 383.* Integration of planning methods and theory in dealing with a community planning problem. Analysis of problem and formulation of strategies for implementation. Preparation of a community planning report.

C R P 435. Planning in Small Towns. (Dual-listed with 535). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 253, 270, or junior classification.* Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society.

C R P 442. Site Development. (Dual-listed with 542). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 253, 272.* Introduction to site analysis using landscape architecture and environmental principles, drawing also on basic engineering concepts. Work will evolve from analysis to land development design.

C R P 445. Transportation Policy Planning. (Dual-listed with 545). (3-0) Cr. 3. F. *Prereq: C E 350 or equivalent.* Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 451. Introduction to Geographic Information Systems. (Dual-listed with 551). (2-2) Cr. 3. F.S.SS. Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 452. Geographic Data Management and Planning Analysis. (Dual-listed with 552). (2-2) Cr. 3. F.S. *Prereq: C R P 451 or equivalent.* Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 455. Community Economic Development. (Dual-listed with 555). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Sophomore classification.* The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 475. Grant Writing. (Dual-listed with 575). (1-0) Cr. 1. F. *Prereq: 253 or 270 and junior classification.* A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 481. Regional and State Planning. (Dual-listed with 581). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 253 or 270.* Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 484. Sustainable Communities. (Dual-listed with 584). (Cross-listed with Dsn S, Env S). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Senior classification.* The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

C R P 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: Written approval of instructor and department chair on required form.* Investigation of an approved topic commensurate with student's interest and ability. Satisfactory-fail only.
H. Honors

C R P 491. Environmental Law and Planning. (Dual-listed with 591). (Cross-listed with Dsn S, Env S). (3-0) Cr. 3. S. *Prereq: 6 credits in natural sciences.* Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 492. Planning Law, Administration and Implementation. (3-0) Cr. 3. F. *Prereq: 383.* The basis in constitutional, common, and Statutory law for the powers of plan effectuation. Problems of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

C R P 494. Senior Seminar in Planning. Cr. arr. Repeatable. F.S.SS. *Prereq: Senior classification, 332 should be taken prior to or concurrently.* An advanced forum for seniors that focuses upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding current issues and their affects upon planning applications is expected.

C R P 498. Portfolio Development and Review. (1-0) Cr. 1. F.S. Should be taken in the final semester of the planning program. Preparation of a portfolio of student work that represents student learning throughout the entire planning program.

Courses primarily for graduate students, open to qualified undergraduate students

C R P 501. Methods I. (3-0) Cr. 3. F. *Prereq: Graduate classification and Stat 401.* Applications of quantitative methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Primary data collection using survey techniques. Secondary data types and sources of planning information for population projection and demographic analysis.

C R P 502. Methods II. (3-0) Cr. 3. S. *Prereq: Graduate classification and 501.* Investigative and participatory methods for citizen involvement and planning research including public meetings and processes, consultation, case studies, and focus groups. Research design for planning practice, and thesis and professional report proposal development.

C R P 504. Why Change Anything?. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification.* Introduction to a range of approaches to justifying innovations, changes, and interventions proposed by designers, planners, and artists. Reasons for change and their bases in social, philosophical, and design reasoning; and their usefulness in justifying change to different audiences. Investigation of fallacies, ideologies, and contemporary problems in justifications.

C R P 510. Professional Work Experience. Cr. R. F.S.SS. *Prereq: Permission of department chair.* Approved professional work experience.

C R P 511. Introduction to Community and Regional Planning. (3-0) Cr. 3. F. *Prereq: Graduate classification.* Development of planning in the United States; history and evolution of the planning profession and constructs of current practice. Theoretical basis of planning.

C R P 516. Urban Design Practice. (Dual-listed with 416). (3-6) Cr. 6. S. *Prereq: Graduate classification.* Principles of urban design and their application to residential and commercial development in studio project.

C R P 517. Urban Revitalization. (Dual-listed with 417). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification.* Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 519. Middle Eastern Cities. (3-0) Cr. 3. F. *Prereq: Graduate or senior standing.* Middle Eastern cities introduce a particular continuity between history and contemporary life where in some cases the latter is about re-defining the former. Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces.

C R P 521. Land Use Planning. (3-0) Cr. 3. F. *Prereq: Graduate classification.* Theories of the origin and growth of urban places and the dynamics of urban structure and land use. Methods and techniques for making land use plans dealing with orderly, efficient, and equitable development and arrangement of land uses within the planning process. Examination of the interrelationships among land use, transportation, environment, and infrastructure and public facilities.

C R P 523. Economic Analysis and the Financing of Public Planning Projects. (3-0) Cr. 3. S. *Prereq: Graduate classification.* Analytical approaches to local and regional economic change and performance in the context of the changing economic geography of the U.S. Traditional and contemporary approaches to industrial location theory and analysis. Recent developments in public sector finance, capital budgeting, project evaluation and the financing of planning projects and economic development activity.

C R P 525. Growth Management. (Dual-listed with 425). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Graduate classification.* Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

C R P 529. International Planning. (Dual-listed with 429). (Cross-listed with Dsn S). (3-0) Cr. 3. S. *Prereq: Graduate classification.* Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 530. Practicum. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification in community and regional planning.* Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in functioning specialties. Satisfactory-fail only.

C R P 531. Professional Practice Seminar. (Dual-listed with 331). (1-0) Cr. 1. S. *Prereq: Graduate classification.* Preparation for working in a planning office; discussion of expectations of employer; presentations from planning professionals, and discussion of differences and similarities between public and private planning offices. Satisfactory-fail only.

C R P 532. Community Planning Studio. (1-6) Cr. 4. F.SS. *Prereq: 521, 523.* Integration of planning methods and theory in dealing with a community planning problem. Analysis of problem and formulation of strategies for implementation. Preparation of a community planning report.

C R P 535. Planning in Small Towns. (Dual-listed with 435). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Graduate classification.* Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's Society.

C R P 542. Site Development. (Dual-listed with 442). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification.* Introduction to site analysis using landscape architecture and environmental principles, but drawing also on basic engineering concepts. Work will evolve from analysis to land development design based on that analysis.

C R P 545. Transportation Policy Planning. (Dual-listed with 445). (3-0) Cr. 3. F. *Prereq: Graduate classification.* Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Tools like policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to State, metropolitan, and local governments.

C R P 551. Introduction to Geographic Information Systems. (Dual-listed with 451). (2-2) Cr. 3. F.S.SS. Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 552. Geographic Data Management and Planning Analysis. (Dual-listed with 452). (2-2) Cr. 3. F.S. *Prereq: 551.* Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 553. Analytical Planning/GIS. (2-2) Cr. 3. S. *Prereq: 451/551.* Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques.

C R P 555. Community Economic Development. (Dual-listed with 455). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Graduate classification.* The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 561. Seminar in Planning Theory. (3-0) Cr. 3. S. *Prereq: graduate classification.* Current planning theories: comprehensive land use, advocacy, participatory, radical, and transactive planning models. Decision making and organization models as they affect planning practice. Value conflicts and conflict resolution.

C R P 575. Grant Writing. (Dual-listed with 475). (1-0) Cr. 1. F. *Prereq: Graduate classification.* A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 581. Regional and State Planning. (Dual-listed with 481). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification.* Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 584. Sustainable Communities. (Dual-listed with 484). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Graduate classification.* The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

C R P 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification and written approval of instructor and department chair on required form.*
A. Planning Law, Administration and Implementation
B. Economic Development
C. Urban Design
D. Housing and Urban Revitalization
H. Environmental Planning
I. Land Use and Transportation Planning
N. International Planning
O. Spatial Analytical Methods
P. Planning in Small Towns
Q. Diversity and Equity in Planning
R. Geographic Information Systems

C R P 591. Environmental Law and Planning. (Dual-listed with 491). (Cross-listed with Dsn S, L A). (3-0) Cr. 3. S. *Prereq: Graduate classification.* Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 592. Land Use and Development Regulation Law. (3-0) Cr. 3. F. *Prereq: Graduate classification.* An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed.

C R P 595. Seminar in GIS Applications/Research. (1-0) Cr. 1. F.S. *Prereq: 9 credits in GIS Certificate program.* Discussion and demonstration of current GIS applications and research in multiple disciplines. Satisfactory-fail only.

C R P 599. Professional Planning Report. Cr. arr. Repeatable. F.S.SS. Independent student research on planning topic. The course will serve as a capstone experience for the student, demonstrating ability to integrate planning knowledge and skills in the practical application of the student's abilities on a current planning issue. The completed report must be submitted to and approved by the POS committee as evidence of the mastery of the principles of community and regional planning.

Courses for graduate students

C R P 699. Research. Cr. arr. Repeatable. F.S.SS.

Complex Adaptive Systems

(Interdepartmental Graduate Minor)

Program Co-chairs: K.M. Bryden and J. E. Mayfield

The Complex Adaptive Systems (CAS) minor provides graduate students with an understanding of the interrelationships among the various methodologies often collectively referred to as Artificial Life. Of special importance in the program is the interplay of biological principles and computer simulations in various fields including Economics, Engineering, Mathematics, and Biology.

Graduates understand the ways in which artificial life techniques may be applied to their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application.

Work in the CAS minor is offered for students pursuing any graduate degree. The primary cooperating departments are Economics; Computer Science; Electrical and Computer Engineering; Mechanical Engineering; Mathematics; Psychology; Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Each student's Masters Program of Study (POS) must include at least 9 CAS relevant course credits chosen in consultation with the student's POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 (see below). Each student's Ph.D. POS must include at least 12 CAS relevant courses credits chosen in consultation with the student's POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503. Ph.D. students who also minored in CAS at the master's level must take one additional CAS relevant course (3 cr.) and two additional credits of CAS seminar. Courses that satisfy CAS requirements may also be used to satisfy major requirements if such "double counting" is acceptable to the major program.

Interested students may contact the chairperson of the advisory committee for complete lists of courses and of CAS faculty members.

Courses primarily for graduate students, open to qualified undergraduate students

CAS 502. Complex Adaptive Systems Seminar. (Cross-listed with Com S). (1-0) Cr. 1. F.S. *Prereq: Admission to CAS minor.* Understanding core techniques in artificial life is based on basic readings in

complex adaptive systems. Techniques of complex system analysis methods including: evolutionary computation, neural nets, agent based simulations (agent based computational economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

CAS 503. Complex Adaptive Systems Concepts and Techniques. (Cross-listed with Com S). (3-0) Cr. 3. S. *Prereq: Admission to CAS minor or related field.* Survey of complex systems and their analysis. Examples are drawn from engineering, computer science, biology, economics and physics.

Computer Engineering

www.ece.iastate.edu

(Administered by the Department of Electrical and Computer Engineering)

Arun Somani, Chair of Department

Distinguished Professors: Somani, Soukoulis

Distinguished Professors (Emeritus): Brown, Fouad, Lord, Nilsson, Pohm

University Professor: Jacobson

University Professor (Emeritus): Jones

Professors: Ajjarapu, Aluru, J. Bowler, Dalal, Geiger, Kamal, Kothari, Kumar, Kushner, Liu, Luecke, Mccalley, Oliver, Rover, Shinar, Weber

Professors (Emeritus): Anderson, Basart, Brearley, Brockman, Comstock, Fanslow, Hale, Horton, Hsieh, Kopplin, Melsa, Potter, Read, Sheble, Smay, Stewart, Swift, Townsend, Venkata

Professor (Adjunct): Shinar

Professor (Emeritus Adjunct): Hillesland

Professors (Collaborators): Jiles, Lee

Associate Professors: N. Bowler, Chang, Chen, Chu, Davidson, Davis, Dickerson, Dogandzic, Elia, Govindarasu, Guan, S. Kim, Song, Tirthapura, Tuttle, Tyagi, Z. Wang

Associate Professors (Emeritus): Bond, Carlson, Coady, Mericle, Pavlat, Scott, Stephenson

Associate Professors (Adjunct): Biswas, Sosonkina

Associate Professors (Collaborators): Ashlock, Salapaka

Assistant Professors: Aliprantis, Bigelow, Chaudhary, Chung, Daniels, Dong, Fayed, Hornbuckle, Jones, J. Kim, Ma, Neihart, Nguyen, Pandey, Qiao, Ramamoorthy, Stoytchev, Vaidya, Vaswani, L. Wang, Ying, Zambreno, Zhang

Assistant Professor (Adjunct): Amin, Bode

Assistant Professor (Collaborators): Balasubramaniam

Senior Lecturer: Mina, Wiersema

Undergraduate Study

For the undergraduate curriculum in computer engineering leading to the degree bachelor of science, see *College of Engineering, Curricula.* This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The Electrical and Computer Engineering (ECPE) Department at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software, software systems, embedded systems, networking, information security, computer architecture, and VLSI.

Students may also take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

The objective of the computer engineering program at ISU is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

Expertise: Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in the analysis, design, and evaluation of computer and software systems, including system integration and implementation, using contemporary practices.

Engagement: Graduates should be engaged in the engineering profession, locally and globally, contributing through the ethical, competent, and creative practice of computer engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

Learning: Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self study, and they should demonstrate the ability to adapt in a constantly changing field.

Leadership: Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

Teamwork: Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdisciplinary backgrounds by applying engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs. Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world. Well qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the bachelor of science and master of science or the bachelor of science and master of business administration degrees. See *Graduate Study* for more information.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The degree master of science with thesis is recommended for students who intend to continue toward the doctor of philosophy degree or to undertake a career in research and development. The nonthesis master of science degree requires a creative component.

The normal prerequisite to major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student's undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the doctor of philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental master of science and doctor of philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering is also a participating department in the interdepartmental master of science in information assurance program. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

Well qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both bachelor of science and master of science or bachelor of science and master of business administration degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

Courses primarily for undergraduate students

Cpr E 166. Professional Programs Orientation. (Cross-listed with E E). Cr. R. F.S. (1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.

Cpr E 185. Introduction to Computer Engineering and Problem Solving I. (2-2) Cr. 3. *Prereq: Credit or enrollment in Math 141.* Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using the C language.

Cpr E 186. Introduction to Computer Engineering and Problem Solving II. (0-2) Cr. 1. S. *Prereq: 185.* Project based examples from computer engineering. Group skills needed to work effectively in teams.

Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers.

Cpr E 281. Digital Logic. (3-2) Cr. 4. F.S. *Prereq: sophomore classification.* Number systems and representation. Boolean algebra and logic minimization. Combinational and sequential logic design. Arithmetic circuits and finite state machines. Use of programmable logic devices. Introduction to computer-aided schematic capture systems, simulation tools, and hardware description languages. Design of a simple digital systems.

Cpr E 288. Embedded Systems I: Introduction. (3-2) Cr. 4. F.S. *Prereq: 281, Com S 207 or Com S 227.* Embedded C programming. Interrupt handling. Memory mapped I/O in the context of an application. Elementary embedded design flow/methodology. Timers, scheduling, resource allocation, optimization, state machine based controllers, real time constraints within the context of an application. Applications laboratory exercises with embedded devices.

Cpr E 294. Program Discovery. (Cross-listed with E E). Cr. R. *Prereq: 166 or E E 166.* The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today's world. Satisfactory-fail only.

Cpr E 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* First professional work period in the cooperative education program. Students must register for this course before commencing work.

Cpr E 308. Operating Systems: Principles and Practice. (3-3) Cr. 4. F.S. *Prereq: 381, 310.* Operating system concepts, processes, threads, synchronization between threads, process and thread scheduling, deadlocks, memory management, file systems, I/O systems, security, Linux-based lab experiments. Nonmajor graduate credit.

Cpr E 310. Theoretical Foundations of Computer Engineering. (3-0) Cr. 3. F.S. *Prereq: Credit or enrollment in Cpr E 288, Com S 228.* Propositional logic and methods of proof; set theory and its applications; Mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering.

Cpr E 329. Software Project Management. (Cross-listed with S E). (3-0) Cr. 3. *Prereq: Com S 309.* Process-based software development. Capability Maturity Model (CMM), Project planning, cost estimation, and scheduling. Project management tools. Factors influencing productivity and success. Productivity metrics. Analysis of options and risks. Version control and configuration management. Inspections and reviews. Managing the testing process. Software quality metrics. Modern software engineering techniques and practices. Nonmajor graduate credit.

Cpr E 330. Integrated Electronics. (Cross-listed with E E). (3-3) Cr. 4. *Prereq: E E 201, credit or enrollment in E E 230, Cpr E 281.* Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells. Nonmajor graduate credit.

Cpr E 339. Software Architecture and Design. (Cross-listed with S E). (3-0) Cr. 3. *Prereq: S E 319.* Modeling and design of software at the architectural level. Architectural styles. Basics of model-driven architecture. Object-oriented design and analysis. Iterative development and unified process. Design patterns. Design by contract. Component based design. Product families. Measurement theory and appropriate use of metrics in design. Designing for qualities such as performance, safety, security, reliability, reusability, etc. Analysis and evaluation of software architectures. Introduction to architecture definition languages. Basics of software evolution, reengineering, and reverse engineering. Case studies. Introduction to distributed system software. Nonmajor graduate credit.

Cpr E 370. Toying with Technology. (Cross-listed with Mat E). (2-2) Cr. 3. F.S. *Prereq: C I 201, junior standing in non-engineering major.* A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEGOs and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

Cpr E 381. Computer Organization and Assembly Level Programming. (3-2) Cr. 4. F.S. *Prereq: 281.* Introduction to computer organization, evaluating performance of computer systems, instruction set design. Assembly level programming: arithmetic operations, control flow instructions, procedure calls, stack management. Processor design. Datapath and control, scalar pipelines, introduction to memory and I/O systems.

Cpr E 394. Program Exploration. (Cross-listed with E E). Cr. R. *Prereq: 294 or E E 294.* Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Satisfactory-fail only.

Cpr E 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of department and Engineering Career Services.* Summer professional work period.

Cpr E 397. Engineering Internship. Cr. R. Repeatable. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* One semester maximum per academic year professional work period.

Cpr E 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: 298, permission of department and Engineering Career Services.* Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Cpr E 412. Formal Aspects of Specification and Verification. (Cross-listed with Com S, S E). (3-0) Cr. 3. *Prereq: Com S 309, S E 319.* Introduction to prepositional/predicate/temporal logic, program verification using theorem proving, model-based verification using model checking, and tools for verification. Nonmajor graduate credit.

Cpr E 416. Software Evolution and Maintenance. (Cross-listed with S E). (3-0) Cr. 3. *Prereq: Com S 309, S E 319.* Fundamental concepts in software evolution and maintenance; practical software evolution processes; legacy systems, program comprehension, impact analysis, program migration and transformation, refactoring. Tools for software evolution and maintenance. Case studies, experimental software projects. Written reports and oral presentation. Nonmajor graduate credit.

Cpr E 418. High Speed System Engineering Measurement and Testing. (Cross-listed with E E). (3-2) Cr. 4. F. *Prereq: E E 230 and 311.* Measurement of high speed systems and mixed signal systems. Measurement accuracy and error. Network analysis and spectrum analysis used in high speed measurement and testing. Test specification process and parametric measurement. Sampling and digital signal processing concepts. Design for testability. Testing equipment. Applications. Nonmajor graduate credit.

Cpr E 425. High Performance Computing for Scientific and Engineering Applications. (Cross-listed with Com S). (3-1) Cr. 3. S. *Prereq: Com S 311, Com S 330, Engl 250, Sp Cm 212.* Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports. Nonmajor graduate credit.

Cpr E 426. Introduction to Parallel Algorithms and Programming. (Dual-listed with 526). (Cross-listed with Com S). (3-2) Cr. 4. F. *Prereq: Cpr E 308 or Com S 321, Com S 311.* Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. Nonmajor graduate credit.

Cpr E 431. Basics of Information System Security. (3-0) Cr. 3. S. *Prereq: credit or enrollment in Cpr E 489 or Com S 454.* Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Newtork security mechanisms such as intrusion detection, firewalls, IPSEC, and related protocols. Ethics and legal issues in information security. Other selected topics. Programming and system configuration assignments. Nonmajor graduate credit.

Cpr E 435. Analog VLSI Circuit Design. (Cross-listed with E E). (3-3) Cr. 4. S. *Prereq: 330, E E 332, 324, and either E E 322 or Stat 330.* Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters. Nonmajor graduate credit.

Cpr E 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with BCB, Com S, Biol, Gen). (4-0) Cr. 4. F. *Prereq: Math 165 or Stat 401 or equivalent.* Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic tree, comparative and functional genomics. Nonmajor graduate credit.

Cpr E 450. Distributed Systems and Middleware. (Dual-listed with 550). (3-0) Cr. 3. *Prereq: 308 or Com S 352.* Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications. Nonmajor graduate credit.

Cpr E 454. Distributed and Network Operating Systems. (Dual-listed with 554). (Cross-listed with Com S). (3-1) Cr. 3. Alt. S., offered 2011. *Prereq: Com S 311, Com S 352, Engl 250, Sp Cm 212.* Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, interprocess communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports. Nonmajor graduate credit.

Cpr E 458. Real Time Systems. (Dual-listed with 558). (3-0) Cr. 3. *Prereq: 308 or Com S 352.* Fundamental concepts in real-time systems. Real time task scheduling paradigms. Resource management in uniprocessor, multiprocessor, and distributed real-time systems. Fault-tolerance, resource reclaiming, and overload handling. Real-time channel, packet scheduling, and real-time LAN protocols. Case study of real-time operating systems. Laboratory experiments. Nonmajor graduate credit.

Cpr E 465. Digital VLSI Design. (Cross-listed with E E). (3-3) Cr. 4. S. *Prereq: E E 330.* Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design

space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (Soc) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

Cpr E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, E E, Engr, I E, Mat E, M E). (1-4) Cr. 3. Repeatable. F.S. *Prereq: Student must be within two semesters of graduation and receive permission of instructor.* Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

Cpr E 488. Embedded Systems Design. (3-3) Cr. 4. *Prereq: 381 or Com S 321.* Embedded microprocessors, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform-based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations. Nonmajor graduate credit.

Cpr E 489. Computer Networking and Data Communications. (3-2) Cr. 4. F.S. *Prereq: 381 or E E 324.* Modern computer networking and data communications concepts. TCP/IP, OSI protocols, client server programming, data link protocols, local area networks, and routing protocols. Nonmajor graduate credit.

Cpr E 490. Independent Study. Cr. arr. Repeatable. *Prereq: Senior classification in computer engineering.* Investigation of an approved topic.
H. Honors

Cpr E 491. Senior Design Project I and Professionalism. (Cross-listed with E E). (2-3) Cr. 3. F.S. *Prereq: 308 or E E 322, completion of 24 credits in the E E core professional program or 29 credits in the Cpr E core professional program, Engl 314.* Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

Cpr E 492. Senior Design Project II. (Cross-listed with E E). (1-3) Cr. 2. F.S. *Prereq: 491 or E E 491.* Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

Cpr E 494. Portfolio Assessment. (Cross-listed with E E). Cr. R. *Prereq: Credit or enrollment in 491.* Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

Cpr E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: 398, permission of department and Engineering Career Services.* Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

Cpr E 501. Analog and Mixed-Signal VLSI Circuit Design Techniques. (Cross-listed with E E). (3-3) Cr. 4. F. *Prereq: 435.* Design techniques for analog and mixed-signal VLSI circuits. Amplifiers; operational amplifiers, transconductance amplifiers, finite gain amplifiers and current amplifiers. Linear building blocks; differential amplifiers, current mirrors, references, cascading and buffering. Performance characterization of linear integrated circuits; offset, noise, sensitivity and stability. Layout considerations, simulation, yield and modeling for high-performance linear integrated circuits.

Cpr E 505. CMOS and BiCMOS Data Conversion Circuits. (Cross-listed with E E). (3-3) Cr. 4. Alt. S., offered 2010. *Prereq: 501.* Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

Cpr E 507. VLSI Communication Circuits. (Cross-listed with E E). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 330 or 501.* Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

Cpr E 511. Design and Analysis of Algorithms. (Cross-listed with Com S). (3-0) Cr. 3. F. *Prereq: Com S 311.* A study of basic algorithm design and analysis techniques. Advanced data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometry. NP- completeness and approximation algorithms.

Cpr E 525. Numerical Analysis of High-Performance Computing. (Cross-listed with Com S, Math). (3-0) Cr. 3. S. *Prereq: 308, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C.* Development, analysis, and testing of efficient numerical methods for use on state-of-the-Art High performance computers. Applications of the methods to the student's area of research.

Cpr E 526. Introduction to Parallel Algorithms and Programming. (Dual-listed with 426). (Cross-listed with Com S). (3-2) Cr. 4. F. *Prereq: 308 or Com S 321, Com S 311.* Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

Cpr E 528. Probabilistic Methods in Computer Engineering. (3-0) Cr. 3. *Prereq: Com S 311.* The application of randomization and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data set algorithmics.

Cpr E 530. Advanced Protocols and Network Security. (Cross-listed with InfAs). (3-0) Cr. 3. *Prereq: 381.* Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols, IP routing, network security issues. Emphasis on laboratory experiments.

Cpr E 531. Information System Security. (Cross-listed with InfAs). (3-0) Cr. 3. *Prereq: 489 or 530 or Com S 586 or MIS 535.* Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

Cpr E 532. Information Warfare. (Cross-listed with InfAs). (3-0) Cr. 3. S. *Prereq: 531.* Computer system and network security: implementation, configuration, testing of security software and hardware, network monitoring. Authentication, firewalls, vulnerabilities, exploits, countermeasures. Ethics in information assurance. Emphasis on laboratory experiments.

Cpr E 533. Cryptography. (Cross-listed with Math, InfAs). (3-0) Cr. 3. S. *Prereq: Math 301 or Cpr E 310 or Com S 330.* Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

Cpr E 534. Legal and Ethical Issues in Information Assurance. (Cross-listed with InfAs, Pol S). (3-0) Cr. 3. S. *Prereq: Graduate classification, Cpr E or InfAs 531.* Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.

Cpr E 535. Steganography and Watermarking. (Cross-listed with Math, InfAs). (3-0) Cr. 3. S. *Prereq: Cpr E 531 or E E 524 or Math 533/Cpr E 533/InfAs 533.* Basic principles of steganography and watermarking. Algorithms based on spatial domain approaches, transformations of data, statistical approaches. Techniques for images, video, and audio data. Communications models for data hiding. Analysis, detection and recovery of hidden data. Military, commercial and e-commerce applications. Known theoretical results. Software packages for data hiding. Social and legal issues, case studies, and digital rights management issues that affect technological development of steganography and watermarking. Current developments in the area.

Cpr E 536. Computer and Network Forensics. (Cross-listed with InfAs). (3-0) Cr. 3. *Prereq: 381 and 489 or 530.* Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

Cpr E 537. Wireless Network Security. (3-0) Cr. 3. S. *Prereq: Credit or enrollment in 489 or 530.* Introduction to the physical layer and special issues associated with security of the airlink interface. Communication system modeling, wireless networking, base Stations, mobile Stations, airlink multiple access, jamming, spoofing, signal intercept, wireless LANS and modems, cellular, position location, spread spectrum, signal modeling, propagation modeling, wireless security terminology.

Cpr E 541. High-Performance Communication Networks. (3-0) Cr. 3. *Prereq: 489 or 530.* Selected topics from recent advances in high performance networks; next generation internet; asynchronous transfer made; traffic management, quality of service; high speed switching.

Cpr E 542. Optical Communication Networks. (3-0) Cr. 3. S. *Prereq: 489.* Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing; network architectures and protocol for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control; access networks; metro networks.

Cpr E 543. Wireless Network Architecture. (3-0) Cr. 3. *Prereq: Credit or enrollment in 489 or 530.* Introduction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking. Operation and management of Medium Access Control in wireless local area networks; recent developments in 802.11 and Bluetooth; wireless ATM; Mobile Internet Protocol; Mobile Transmission Control Protocol; wireless application protocol; ad-hoc wireless networks.

Cpr E 544. Introduction to Bioinformatics. (Dual-listed with 444). (Cross-listed with BCB, Com S, GDCB). (4-0) Cr. 4. F. *Prereq: Math 165 or Stat 401 or equivalent.* Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

Cpr E 545. Fault-Tolerant Systems. (3-0) Cr. 3. *Prereq: 381.* Faults and their manifestations, errors, and failures; fault detection, location and reconfiguration techniques; time, space, and information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; fault-tolerant networks; fault tolerance in real-time systems; reliable software design; checkpointing and rollback recovery; and reliability evaluation techniques and tools.

Cpr E 546. Wireless Sensor Networks. (3-0) Cr. 3. *Prereq: Cpr E 489 or 530.* Selected topics from recent advances in wireless sensor networks, including data-centric routing, query, and storage; data fusion and aggregation; coverage, connectivity, and lifetime of wireless sensor networks; wireless sensor networks deployment and management; security issues; energy-efficiency issues; radio and link characteristics in wireless sensor networks; medium access control protocols and link layer techniques; tracking and localization; geographical routing; robust routing; time synchronization; wireless sensor networks applications. Introduction to TinyOS and the nesC language. Hands-on experiments with Crossbow Motes.

Cpr E 549. Advanced Algorithms in Computational Biology. (Cross-listed with Com S, BCB). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Com S 311 and either Com S 228 or Com S 208.* Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

Cpr E 550. Distributed Systems and Middleware. (Dual-listed with 450). (3-0) Cr. 3. *Prereq: 308 or Com S 352.* Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications.

Cpr E 554. Distributed and Network Operating Systems. (Dual-listed with 454). (Cross-listed with Com S). (3-1) Cr. 3. Alt. S., offered 2011. *Prereq: Com S 311, Com S 352.* Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

Cpr E 556. Scalable Software Engineering. (3-0) Cr. 3. *Prereq: Com S 309.* Study of methods, techniques and tools for design, development and evolution of complex software; aspect–oriented programming, domain-specific software technologies, automation for reliable and scalable software engineering, program analysis, comprehension, and program transformations.

Cpr E 557. Computer Graphics and Geometric Modeling. (Cross-listed with Com S, M E). (3-0) Cr. 3. F.S. *Prereq: M E 421, programming experience in C.* Fundamentals of computer graphics technology. Data structures. Parametric curve and surface modeling. Solid model representations. Applications in engineering design, analysis, and manufacturing.

Cpr E 558. Real-Time Systems. (Dual-listed with 458). (3-0) Cr. 3. *Prereq: 308 or Com S 352.* Fundamental concepts in real-time systems. Real-time task scheduling paradigms. Resource management in uniprocessor, multiprocessor, and distributed real-time systems. Fault-tolerance, resource reclaiming, and overload handling. Real-time channel, packet scheduling, and real-time LAN protocols. Case study of real-time operating systems. Laboratory experiments.

Cpr E 563. Modeling and Optimization of Interconnect in Deep Submicron Design. (3-0) Cr. 3. *Prereq: 465.* Modeling and optimization techniques for high-performance digital and analog interconnect designs. RLC extraction. Interconnect modeling: Elmore delay model, moment computation, asymptotic waveform evaluation, Pade Via Lanczos, pole analysis, transmission lines. Driver modeling. Interconnect optimization: topology optimization, device sizing, wire sizing, buffer insertion, high-performance clock sizing.

Cpr E 564. Synthesis and Optimization of Digital Circuits. (3-0) Cr. 3. S. *Prereq: 381.* Algorithms and techniques to generate application-specific VLSI circuits from high-level behavioral modeling in hardware description languages. Boolean logic representation, two-level and multi-level logic synthesis, sequential logic optimization, hardware models, architectural-level synthesis and optimization, scheduling algorithms, resource sharing and binding.

Cpr E 566. Physical Design of VLSI Systems. (3-0) Cr. 3. *Prereq: 465.* Physical design of VLSI systems. Partitioning algorithms. Placement and floorplanning algorithms. Routing-global and detailed. Layout compaction. Physical design of FPGA's and MCM's. Performance-driven layout synthesis.

Cpr E 567. Bioinformatics I (Fundamentals of Genome informatics). (Cross-listed with Com S, BCB). (3-0) Cr. 3. F. *Prereq: Com S 208; Com S 330; Stat 341; credit or enrollment in Biol 315, Stat 430.* Biology as an information science. Review of algorithms and information processing. Generative models for sequences. String algorithms. Pairwise sequence alignment. Multiple sequence alignment. Searching sequence databases. Genome sequence assembly.

Cpr E 569. Bioinformatics III (Structural Genome Informatics). (Cross-listed with BBMB, Com S, Math, BCB). (3-0) Cr. 3. F. *Prereq: BCB 567, Gen 411, Stat 430.* Algorithmic and Statistical approaches in structural genomics including protein, DNA and RNA structure. Structure determination, refinement, representation, comparison, visualization, and modeling. Analysis and prediction of protein secondary and tertiary structure, disorder, protein cores and surfaces, protein-protein and protein-nucleic acid interactions, protein localization and function.

Cpr E 570. Bioinformatics IV (Computational Functional Genomics and Systems Biology). (Cross-listed with BCB, Com S, GDCB,Stat). (3-0) Cr. 3. S. *Prereq: BCB 567, Biol 315, Com S 311 and either 208 or 228, Gen 411, Stat 430.* Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput gene expression, proteomics, and other datasets obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, simulation and inference of transcriptional regulatory modules and networks, protein-protein interaction networks, metabolic networks, cells and systems: Dynamic systems, Boolean, and probabilistic models. Ontology-driven, network based, and probabilistic approaches to nformation integration.

Cpr E 575. Computational Perception. (Cross-listed with Com S, HCI). (3-0) Cr. 3. S. *Prereq: Graduate standing or permission of instructor.* This class covers Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on both theoretical and practical levels. You will work in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

Cpr E 581. Computer Systems Architecture. (Cross-listed with Com S). (3-0) Cr. 3. F. *Prereq: 381.* Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

Cpr E 582. Computer Systems Performance. (3-0) Cr. 3. *Prereq: 381, 310 and Stat 330.* Review of probability and stochastic processes concepts; Markovian processes; Markovian queues; renewal theory; semi-Markovian queues; queueing networks, multiprocessor architectures; computer networks; switching systems; case studies.

Cpr E 583. Reconfigurable Computing Systems. (Cross-listed with Com S). (3-0) Cr. 3. *Prereq: Background in computer architecture, design, and organization.* Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurabiltiy.

Cpr E 587. Text Mining, Text Processing, and the Internet. (3-0) Cr. 3. *Prereq: Com S 309 or Com S 311.* Mining, retrieval, and other processing of text, including text and hypermedia on the world wide web. Human computer interaction in the context of text and hyper media. Topics of particular interest to enrolled students.

Cpr E 588. Embedded Computer Systems. (3-0) Cr. 3. *Prereq: 308.* Hardware/software systems and codesign. Models of computation for embedded systems. System-level design. Modeling, specification, synthesis, and verification. Hardware/software implementation. Design space exploration. Performance analysis and optimization. Multiprocessor system on chip. Platform-based design. Design methodologies and tools. Case studies and design projects.

Cpr E 589. Multimedia Systems. (3-0) Cr. 3. S. *Prereq: 308 or Com S 352.* Fundamentals concepts in multimedia systems. Resource management issues in distributed/networked multimedia systems, QoS routing and multicasting. Traffic shaping, Task and message scheduling, Internet QoS. Adaptive multimedia applications over the Internet. Operating system support for multimedia. Storage architecture and scalable media servers. Compression techniques, synchronization techniques, processor architectures for multimedia.

Cpr E 590. Special Topics. Cr. arr. Repeatable. Formulation and solution of theoretical or practical problems in computer engineering.

Cpr E 592. Seminar in Computer Engineering. Cr. arr. Repeatable. *Prereq: Permission of instructor.* Projects or seminar in Computer Engineering.

Cpr E 594. Selected Topics in Computer Engineering. (3-0) Cr. 3. Repeatable.

Cpr E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

Cpr E 626. Parallel Algorithms for Scientific Applications. (Cross-listed with Com S). (3-0) Cr. 3. *Prereq: 526.* Algorithm design for high-performance computing. Applications to numerical simulations, sparse matrix computation, multidimensional tree data structure, and particle-based methods, random numbers and Monte Carlo applications, algorithms, and computational biology.

Cpr E 632. Information Assurance Capstone Design. (Cross-listed with InfAs). (3-0) Cr. 3. *Prereq: 531, 532, 534.* Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attach each other's secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report, and an oral report.

Cpr E 681. Advanced Topics in Computer Architecture. (Cross-listed with Com S). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 581.* Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

Cpr E 697. Engineering Internship. (Cross-listed with E E). Cr. R. Repeatable. *Prereq: Permission of department chair and Engineering Career Services, graduate classification.* One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Cpr E 699. Research. Cr. arr. Repeatable.

Computer Science

www.cs.iastate.edu

Undergraduate Study

Carl Chang, Chair of Department

Professors: Aluru, Bergman, C. Chang, Fernandez-Baca, Honavar, Huang, Kothari, J. Lutz, R. Lutz, Maddux, Miller, Slutzki, Wong

Professors (Emeritus): Brearley, Oldehoeft, Stewart, Thomas

Associate Professors: Aduri, J. Chang , Chaudhuri, Chou, Eulenstein, Gadia, Jia, Miner, Prabhu, Tavanapong, Tyagi, Zhu

Associate Professor (Collaborators): Mayordome

Assistant Professors: Basu, Cai, Harding, Margaritis, Rajan, Ruan, Song, Stoytchev, Tian, T. Zhang, W. Zhang

Senior Lecturers: Lathroup, Mitra

Lecturers: S. Chang, Johnson, Kautz

Undergraduate Study

The curriculum leading to the baccalaureate degree in computer science is designed to prepare students for positions as computer scientists with business, industry, or government, or for graduate study in computer science. The main objectives are to impart to students an understanding of the basics of computer science, to develop proficiency in the practice of computing, and to prepare them for continued professional development.

The following are intended learning outcomes for computer science majors. Seniors will assess these outcomes in a survey conducted before they graduate and feedback thus obtained will be used to improve the curriculum.

A. Impart an understanding of the basics of the discipline. Each graduate will know

A.1 Fundamental principles of computing,
A.2 Basic foundations of Mathematics, Statistics, and physical sciences
A.3 Design and implementation of programs

B. Develop proficiency in the practice of computing. The graduated student will be able to

B.1 formulate and solve problems in computing,
B.2 Understand design and performance requirements of software systems,
B.3 Apply sound principles to the synthesis and analysis of computer systems

C. Prepare for continued professional development. Our students will

C1 Engage in lifelong learning and expect to embrace change,
C.2 Communicate effectively and think critically and creatively, both independently and with others,
C.3 Be aware of social and ethical issues of computers in Society

Students must earn at least a C- in each course taken to fulfill the Degree Program.

Students must take at least 45 credits at the 300 level or higher at Iowa State University.

To complete an undergraduate degree in Computer Science, a student must satisfy the requirements of the College of Liberal Arts and Sciences (see *Liberal Arts and Sciences, Curriculum*) and include the following courses within the group requirements: Phil 343; Sp Cm 212; 14 credits of Math and Statistics including Math 165, Math 166, one Statistics course from Stat 105, 231, 305, 330, 333, or 341, and at least one Math course from Math 265, 266, 304, 307, 314, or 317; a minimum of 13 credits of natural science including Phys 221, 222, and at least one additional natural science course from the following list: A Ecl 312, Anthr 202, 307, BBMB 221, Biol 312, Biol 355, Chem 163-231, Ent 370, Env S 324, Env S 330, FS HN 167, Gen 260, Geol 100-108, 201, 311, 451, 475, Mat E 207, 211, Mteor 206, 301, Psych 310. Communication Proficiency requirement: Engl 150, 250 and one of Engl 302, 305, 309 or 314. The minimum grade accepted in each of the three required English courses is a C-.

Students wishing to pursue the B.S. degree in computer science must first successfully complete the premajor program consisting of the following courses and minimum grade requirements:

Course	Minimum Grade
227	C-
228	C-
Math 165	C-

Students majoring in computer science must successfully complete this premajor program prior to taking any other courses in the Department. Thus, for computer science majors, this premajor serves as a necessary prerequisite to all the other courses offered by the Department.

Computer science majors transferring from other institutions must take at least 15 of their credits at the 300-level or above in our department while in residence at Iowa State.

To graduate with a major in the Computer Science Department, a student must earn at least a C- in each of the courses taken to fulfill the program of study.

A minimum of 44 credits is required for the B.S. degree in computer science. The required courses are: Com S 101, 203, Cpr E 281, Com S 227, 228, 229, 309, 311, 321, 330, 331, 342, 352, 362 or 363. In addition, two advanced-level courses must be selected from the following groups:

Group W: 426, 440, 454, 477, 486

Group B: 401, 409, 416, 417, 425, 430, 455, 461, 472, 474

Group N: 412, 418, Math 421, 471, 481, 426; Cpr E 485, Cpr E 489, M E 557

Courses in Group W require written reports and those in Group B require both oral and written reports. Students must take one course from Group B and one course from any group.

Students must earn a C- or better in each course in the department which is a prerequisite to a course listed in the student's degree program.

Undergraduate Minor. The Computer Science Department offers an undergraduate minor in Computer Science. The minor requires at least 19 credits in computer science courses. Com S 227, 228, and 229, adding up to 10 credits are required. In addition, at least 9 credits should be taken in courses at the 300 level or above.

Undergraduate Curriculum in Software Engineering. The Department of Computer Science together with the Department of Electrical and Computer Engineering also offer a curriculum leading to an undergraduate degree in software engineering. The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice. Students may also take elective courses in computer engineering and computer science.

See Index, Software Engineering. For curriculum information, see also College of Engineering and College of Liberal Arts and Sciences.

Graduate Study

The department offers work for the degrees Master of Science and Doctor of Philosophy with a major in Computer Science. The Doctor of Philosophy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor to students majoring in other departments.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor's degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, a minimum of 30 semester credits is required. A thesis demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The Ph.D. requirements are governed by the student's program of study committee within established guidelines of the department and the graduate college. They include coursework, demonstrated proficiency in four areas of Computer Science, a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Courses primarily for undergraduate students

Com S 101. Orientation. Cr. R. F.S. Introduction to the procedures and policies of Iowa State University and the Department of Computer Science, test-outs, honorary Societies, etc. Issues relevant to student adjustment to college life will also be discussed. Satisfactory-fail only.

Com S 103. Computer Applications. Cr. 4. F.S.SS. Introduction to computer literacy and applications. Applications: Windows, Internet browser/HTML, word processing, spreadsheets, database management and presentation software. Literacy: history of computing, structure of computers, telecommunications, computer ethics, computer crime, and history of programming languages. No prior computer experience necessary. Course is offered online only. Students must attend an orientation session the first week of class.

Com S 104. Introduction to Computers. (1.5-1) Cr. 2. F.S. Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.

Com S 107. Applied Computer Programming. (3-0) Cr. 3. F.S. Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

Com S 201. Computer Programming in COBOL. (3-0) Cr. 3. SS. *Prereq: 107 or 207 or 227.* Computer programming in COBOL. Emphasis on the design, writing, debugging, and testing of business applications programs in a transaction-oriented environment.

Com S 203. Careers in Computer Science. Cr. R. F.S. Computer science as a profession. Introduction to career fields open to computer science majors. Relationship of coursework to careers. Presentations by computer science professionals. Satisfactory-fail only.

Com S 207. Programming I. (3-1) Cr. 3. F.S. *Prereq: Math 150 or placement into Math 140/141/142 or higher.* An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/error-handling. This course is designed for nonmajors. Credit may not be applied toward graduation for both Com S 207 and 227.

Com S 208. Programming II. (3-1) Cr. 3. S. *Prereq: 207, credit or enrollment in Math 151, 160, or 165.* Intermediate-level programming techniques. Emphasis on designing, writing, testing, debugging, and documenting medium-sized programs. Data structures and their uses. Dynamic memory usage. Inheritance and polymorphism. Algorithm design and efficiency: recursion, searching, and sorting. Event-driven and GUI programming. The software development process. This course is designed for nonmajors. Credit may not be applied toward the major.

Com S 227. Introduction to Object-oriented Programming. (3-2) Cr. 4. F.S. An introduction to object-oriented design and programming techniques. Symbolic and numerical computation. Recursion and iteration. Modularity procedural and data abstraction, specifications and subtyping. Object-oriented techniques. Imperative programming. Emphasis on principles of programming and object-oriented design through extensive practice in design, writing, running, debugging, and reasoning about programs. This course is designed for majors. Credit may not be applied toward graduation for both Com S 207 and 227.

Com S 228. Introduction to Data Structures. (3-1) Cr. 3. F.S. *Prereq: C- or better in 227, credit or enrollment in Math 165.* An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism. Abstract data type specification and correctness. Collections and associated algorithms, such as stacks, queues, lists, trees. Searching and sorting algorithms. Graphs. Data on secondary storage. Analysis of algoritms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

Com S 229. Advanced Programming Techniques. (3-0) Cr. 3. F.S. *Prereq: 228, credit or enrollment in Math 166.* Object-oriented programming experience using a language suitable for exploring advanced topics in programming. Topics include memory management, parameter passing, inheritance, compiling, debugging, and maintaining programs. Significant programming projects.

Com S 252. Linux Operating System Essentials. (2-2) Cr. 3. F. *Prereq: 103 or 207 or 227.* Selected topics include: Linux Distributions, installation, configuration, and management of a Linux based computer system, shell programming, network accessing technologies, package management systems, system security, user, file sharing techniques, interoperation with other computers on the network, and open-source software. This is a hands-on course designed to demonstrate the installation and utilization of the Linux operating system for a personal computer.

Com S 290. Independent Study. Cr. arr. F.S. *Prereq: Permission of instructor.* Satisfactory-fail only.
H. Honors

Com S 309. Software Development Practices. (3-1) Cr. 3. F.S. *Prereq: Com S 228 with C- or better, Com S 229 or Cpr E 211, Engl 250.* A practical introduction to methods for managing software development. Process models, requirements analysis, structured and object-oriented design, coding, testing, maintenance, cost and schedule estimation, metrics. Programming projects. Nonmajor graduate credit.

Com S 311. Design and Analysis of Algorithms. (3-1) Cr. 3. F.S. *Prereq: 228 with C- or better, Math 166, Engl 250, and Com S 330 or Cpr E 310.* Basic techniques for design and analysis of efficient algorithms. Sorting, searching, graph algorithms, computational geometry, string processing and NP-completeness. Design techniques such as dynamic programming and the greedy method. Asymptotic, worst-case, average-case and amortized analyses. Data structures including heaps, hash tables, binary search trees and red-black trees. Programming projects. Credit may not be applied toward graduation for both Com S 311 and 381. Nonmajor graduate credit.

Com S 319. Software Construction and User Interfaces. (Cross-listed with S E). (3-0) Cr. 3. F. Basic theory of grammars, parsing. Language paradigms. State transition and table-based software design. Rapid system prototyping. Review of principles of object orientation, object oriented analysis using UML. Event-driven and clock-driven simulation. Software construction methods. Frameworks and APIs. User interface architecture, evaluation of user interface. Design of windows, menus, and commands. Introduction to format specification and model-based software design. Introduction to domain-specific software engineering. Nonmajor graduate credit.

Com S 321. Introduction to Computer Architecture and Machine-Level Programming. (3-1) Cr. 3. F.S. *Prereq: C- or higher in 228, Cpr E 281 and Engl 250.* Introduction to computer architecture and organization. Emphasis on evaluation of performance, instruction set architecture, datapath and control, memory-hierarchy design, and pipelining. Assembly language on a simulator. Nonmajor graduate credit.

Com S 330. Discrete Computational Structures. (3-1) Cr. 3. F.S. *Prereq: C- or higher in 228, C- or higher in Math 166 and Engl 250.* Concepts in discrete Mathematics as applied to computer science. Logic, proof techniques, set theory, relations, graphs, combinatorics, discrete probability and number theory. Nonmajor graduate credit.

Com S 331. Theory of Computing. (Cross-listed with Ling). (3-1) Cr. 3. F.S. *Prereq: C- or higher in 228, C- or higher in Com S 330 or Cpr E 310, C- or higher in Math 166, and Engl 250.* Models of computation: finite state automata, pushdown automata and Turing machines. Study of grammars and their relation to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Chomsky hierarchy and relations between classes of languages. Nonmajor graduate credit.

Com S 342. Principles of Programming Languages. (3-1) Cr. 3. F.S. *Prereq: 321; 330 or Cpr E 310; either 309, 362 or 363; Engl 250.* Organization of programming languages emphasizing language design concepts and semantics. Study of language features and major programming paradigms, especially functional programming. Programming projects. Nonmajor graduate credit.

Com S 350. Number Theory. (Cross-listed with Math). (3-0) Cr. 3. S. *Prereq: Math 166.* Divisibility, integer representations, primes and divisors, linear diophantine equations, congruences, and multiplicative functions. Applications to cryptography. Nonmajor graduate credit.

Com S 352. Introduction to Operating Systems. (3-1) Cr. 3. F.S. *Prereq: 229, and 321; Engl 250.* Survey of operating system issues. Introduction to hardware and software components including: processors, peripherals, interrupts, management of processes, threads and memory, deadlocks, file systems, protection, virtual machines and system organization, and introduction to distributed operating systems. Programming projects. Nonmajor graduate credit.

Com S 362. Object-Oriented Analysis and Design. (3-0) Cr. 3. F.S. *Prereq: 228 with C- or better, Engl 250.* Object-oriented requirements analysis and systems design. Design notations such as the Unifed Modeling Language. Design Patterns. Group design and programming with large programming projects. Nonmajor graduate credit.

Com S 363. Introduction to Database Management Systems. (3-0) Cr. 3. F.S. *Prereq: 228 with C- or better, Engl 250.* Relational, object-oriented, and semistructured data models and query languages. SQL, ODMG, and XML standards. Database design using entity-relationship model, data dependencies and object definition language. Application development in SQL-like languages and general purpose host languages with application program interfaces. Information integration using data warehouses, mediators and wrappers. Programming Projects. Nonmajor graduate credit.

Com S 398. Cooperative Education. Cr. R. *Prereq: Permission of department chair.* Required of all cooperative students. Students must register for this course prior to commencing each work period.

Com S 401. Projects in Computing and Business Applications. (2-2) Cr. 3. F. *Prereq: Engl 250, Sp Cm 212, Com S 309, and either 362 or 363.* Applications of software development methods (requirements collection and analysis, software design, project management, documentation and testing), programming techniques, database designs and administration, network application programming to solve computing needs in business settings. A study of practical applications of emerging technologies in computing. Emphasis on semester-long team programming projects. Lab assignments. Oral and written reports. Nonmajor graduate credit.

Com S 409. Software Requirements Engineering. (Dual-listed with 509). (Cross-listed with S E). (3-0) Cr. 3. F. *Prereq: Com S 309, Engl 250, Sp Cm 212.* The requirements engineering process, including identification of stakeholders, requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and validation. Use of Models: State-oriented, Function-oriented, and Object-oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements. Non-functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required. Nonmajor graduate credit.

Com S 412. Formal Aspects of Specification and Verification. (Cross-listed with Cpr E, S E). (3-0) Cr. 3. *Prereq: Com S 309, 319.* Introduction to prepositional/predicate/temporal logic, program verification using theorem proving, model-based verification using model checking, and tools for verification. Nonmajor graduate credit.

Com S 417. Software Testing. (Cross-listed with S E). (3-0) Cr. 3. S. *Prereq: Com S 309, 319, Engl 250, Sp Cm 212.* Comprehensive study of software testing, principles, methodologies, management strategies and techniques. Test models, test design techniques (black box and white-box testing techniques), integration, regression, system testing methods, and software testing tools. Nonmajor graduate credit.

Com S 418. Introduction to Computational Geometry. (Dual-listed with 518). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 311 or permission of instructor.* Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams and Delaunay triangulation, convex hulls, robot motion

planning, visibility graphs. Other selected topics. Programming assignments. Nonmajor graduate credit.

Com S 421. Logic for Mathematics and Computer Science. (Cross-listed with Math). (3-0) Cr. 3. S. *Prereq: Math 301 or 307 or 317 or Com S 330.* Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, program specification and verification, model checking and binary decision diagrams. Nonmajor graduate credit.

Com S 425. High Performance Computing for Scientific and Engineering Applications. (Cross-listed with Cpr E). (3-1) Cr. 3. S. *Prereq: 311, 330, Engl 250, Sp Cm 212.* Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports. Nonmajor graduate credit.

Com S 426. Introduction to Parallel Algorithms and Programming. (Dual-listed with 526). (Cross-listed with Cpr E). (3-2) Cr. 4. F. *Prereq: Cpr E 308 or Com S 321, Com S 311.* Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. Nonmajor graduate credit.

Com S 430. Advanced Programming Tools. (3-1) Cr. 3. F. *Prereq: 311, 362 or 363, Engl 250, Sp Cm 212.* Topics in advanced programming techniques and tools widely used by industry (e.g., event-driven programming and graphical user interfaces, standard libraries, client/server architectures and techniques for distributed applications). Emphasis on programming projects in a modern integrated development environment. Oral and written reports. Nonmajor graduate credit.

Com S 433. Computational Models of Nanoscale Self-Assembly. (Dual-listed with 533). (3-0) Cr. 3. S. *Prereq: C- or higher in 331 or consent of the instructor.* Modeling and analysis of natural and engineered systems that spontaneously assemble themselves from small components. Topics include biomolecular self-assembly, tile assembly models, computation via self-assembly, distributed folding, origami models, and self-repair. Emphasis on Mathematical methods of describing, simulating, programming, and verifying the behaviors of self-assembling systems. Graduate credit requires a written or oral report on current research. Nonmajor graduate credit.

Com S 440. Principles and Practice of Compiling. (Dual-listed with 540). (3-1) Cr. 3. Alt. S., offered 2011. *Prereq: 331, 342, Engl 250, Sp Cm 212.* Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 440 and 540. Topics: lexical, syntax and semantic analyses, syntax-directed translation, runtime environment and library support. Written reports. Nonmajor graduate credit.

Com S 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with BCB, Biol, Cpr E, Gen). (4-0) Cr. 4. F. *Prereq: Math 165 or Stat 401 or equivalent.* Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

Com S 454. Distributed and Network Operating Systems. (Dual-listed with 554). (Cross-listed with Cpr E). (3-1) Cr. 3. Alt. S., offered 2011. *Prereq: 311, 352, Engl 250, Sp Cm 212.* Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports. Nonmajor graduate credit.

Com S 455. Simulation: Algorithms and Implementation. (Dual-listed with 555). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 311 and 330, Stat 330, Engl 150, Sp Cm 212.* Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary Statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts. Oral and written reports. Nonmajor graduate credit.

Com S 461. Principles and Internals of Database Systems. (Dual-listed with 561). (3-1) Cr. 3. F. *Prereq: 311, Engl 250, Sp Cm 212 and Com S 363.* Models for structured and semistructured data. Algebraic, first order, and user-oriented query languages. Database schema design. Physical storage, access methods, and query processing. Transaction management, concurrency control, and crash recovery. Database security. Information integration using data warehouses, mediators, wrappers, and data mining. Parallel and distributed databases, and special purpose databases. Oral and written reports. Nonmajor graduate credit.

Com S 471. Computational Linear Algebra and Fixed Point Iteration. (Cross-listed with Math). (3-0) Cr. 3. Alt. F., offered 2009. S. *Prereq: Math 265 and either Math 266, or 267; knowledge of a programming language.* Computational error, solutions of linear systems, least squares, similarity methods for eigenvalues, solution of nonlinear equations in one and several variables. Nonmajor graduate credit.

Com S 472. Principles of Artificial Intelligence. (Dual-listed with 572). (3-1) Cr. 3. F. *Prereq: 311, 330 or Cpr E 310, Stat 330, Engl 250, Sp Cm 212, Com S 342 or comparable programming experience.* Specification, design, implementation, and selected applications of intelligent software agents and multi-agent systems. Computational models of intelligent behavior, including problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction. Reactive, deliberative, rational, adaptive, learning and communicative agents and multiagent systems. Artificial intelligence programming. Graduate credit requires a research project and a written report. Oral and written reports. Nonmajor graduate credit.

Com S 474. Elements of Neural Computation. (3-1) Cr. 3. Alt. F., offered 2010. *Prereq: 311, 330 or Cpr E 310, Stat 330, Math 165, Engl 250, Sp Cm 212, Com S 342 or comparable programming experience.* Introduction to theory and applications of neural computation and computational neuroscience. Computational models of neurons and networks of neurons. Neural architectures for associative memory, knowledge representation, inference, pattern classification, function approximation, stochastic search, decision making, and behavior. Neural architectures and algorithms for learning including perceptions, support vector machines, kernel methods, bayesian learning, instance based learning, reinforcement learning, unsupervised learning, and related techniques. Applications in Artificial Intelligence and cognitive and neural modeling. Hands-on experience is emphasized through the use of simulation tools and laboratory projects. Oral and written reports. Nonmajor graduate credit.

Com S 477. Problem Solving Techniques for Applied Computer Science. (Dual-listed with 577). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 228; 330 or Cpr E 310, Math 166, Math 307 or Math 317, or consent of the instructor.* Selected topics in applied Mathematics and modern heuristics that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Polynomial interpolation, roots of polynomials, resultants, solution of linear and nonlinear equations, approximation, data fitting, fast Fourier transform, linear programming, nonlinear optimization, Lagrange multipliers, genetic algorithms, integration of ODEs, curves, curvature, Frenet formulas, cubic splines, and Bezier curves. Programming components. Written report for graduate credit. Nonmajor graduate credit.

Com S 481. Numerical Solution of Differential Equations and Interpolation. (Cross-listed with Math). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Math 265 and either Math 266 or 267; knowledge of a programming language.* Polynomial and spline interpolation, orthogonal polynomials, least squares, numerical differentiation and integration, numerical solution of ordinary differential equations. Nonmajor graduate credit.

Com S 486. Fundamental Concepts in Computer Networking. (3-0) Cr. 3. S. *Prereq: 352.* An introduction to fundamental concepts in the design and implementation of computer communication in both the wired and wireless networks, their protocols, and applications. Layered network architecture in the Internet, applications, transport, Socket APIs, network, and data link layers and their protocols, multimedia networking, and network security. Nonmajor graduate credit.

Com S 490. Independent Study. Cr. arr. Repeatable. F.S. *Prereq: 6 credits in computer science, permission of instructor.* No more than 9 credits of Com S 490 may be counted toward graduation. Satisfactory-fail only. H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

Com S 502. Complex Adaptive Systems Seminar. (Cross-listed with CAS). (1-0) Cr. 1. F.S. *Prereq: Admissions to CAS minor.* Understanding core techniques in artificial life are based on basic readings in complex adaptive systems. Understand techniques of complex system analysis methods including: Evolutionary computation, Neural nets, Agent based simulations (Agent based Computational Economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

Com S 503. Complex Adaptive Systems Concepts and Techniques. (Cross-listed with CAS). (3-0) Cr. 3. S. *Prereq: Admission to CAS minor or related field.* Survey of complex systems and their analysis. Examples are drawn from engineering, computer science, biology, economics and physics.

Com S 509. Software Requirements Engineering. (Dual-listed with 409). (3-0) Cr. 3. F. *Prereq: 309.* The requirements engineering process including identification of stakeholders requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and validation. Use of Models: State-oriented, Function-oriented, and Object-oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements. Non-functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required.

Com S 511. Design and Analysis of Algorithms. (Cross-listed with Cpr E). (3-0) Cr. 3. F. *Prereq: Com S 311.* A study of basic algorithm design and analysis techniques. Advanced data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometry. NP-completeness and approximation algorithms.

Com S 512. Formal Methods in Software Engineering. (3-0) Cr. 3. S. *Prereq: 311, 330.* A study of formal techniques for specification and verification of software systems. Topics include temporal logic, propositional and predicate logic, model checking, process algebra, theorem proving. Tools providing automated support for these techniques will also be discussed.

Com S 515. Software System Safety. (3-0) Cr. 3. F. *Prereq: 309 or 311, 342.* An introduction to the analysis, design, and testing of software for safety-critical and high-integrity systems. Analysis techniques, formal verification, fault identification and recovery, model checking, and certification issues. Emphasizes a case-based and systematic approach to software's role in safe systems.

Com S 518. Introduction to Computational Geometry. (Dual-listed with 418). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 311 or permission of instructor.* Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams and Delaunay triangulation, convex hulls, robot motion planning, visibility graphs. Other selected topics. Programming assignments. A scholarly report must be submitted for graduate credit.

Com S 525. Numerical Analysis of High Performance Computing. (Cross-listed with Cpr E, Math). (3-0) Cr. 3. S. *Prereq: Cpr E 308, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C.* Development, analysis, and testing of efficient numerical methods for use on current state-of-the-Art High performance computers. Applications of the methods to the students' areas of research.

Com S 526. Introduction to Parallel Algorithms and Programming. (Dual-listed with 426). (Cross-listed with Cpr E). (3-2) Cr. 4. F. *Prereq: Cpr E 308 or Com S 321, Com S 311.* Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

Com S 531. Theory of Computation. (3-0) Cr. 3. S. *Prereq: 331.* A systematic study of the fundamental models and analytical methods of theoretical computer science. Computability, the Church-Turing thesis, decidable and undecidable problems, and the elements of recursive function theory. Time complexity, logic, Boolean circuits, and NP-completeness. Role of randomness in computation.

Com S 533. Computational Models of Nanoscale Self-Assembly. (Dual-listed with 433). (3-0) Cr. 3. S. *Prereq: C- or higher in 331 or consent of the instructor.* Modeling and analysis of natural and engineered systems that spontaneously assemble themselves from small components. Topics include biomolecular self-assembly, tile assembly models, computation via self-assembly, distributed folding, origami models, and self-repair. Emphasis on Mathematical methods of describing, simulating, programming, and verifying the behaviors of self-assembling systems. Graduate credit requires a written or oral report on current research.

Com S 540. Principles and Practice of Compiling. (Dual-listed with 440). (3-1) Cr. 3. Alt. S., offered 2011. *Prereq: 331, 342, Engl 250, Sp Cm 212.* Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 440 and 540. Topics: lexical, syntax and semantic analyses, syntax-directed translation, runtime environment and library support. Written reports.

Com S 541. Programming Languages. (3-1) Cr. 3. F. *Prereq: 342 or 440.* Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

Com S 544. Introduction to Bioinformatics. (Dual-listed with 444). (Cross-listed with BCB, Cpr E, GDCB). (4-0) Cr. 4. F. *Prereq: Math 165 or Stat 401 or equivalent.* Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

Com S 549. Advanced Algorithms in Computational Biology. (Cross-listed with BCB, Cpr E). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 311 and either 228 or 208.* Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

Com S 550. Evolutionary Problems for Computational Biologists. (Cross-listed with BCB). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Com S 311 and some knowledge of programming.* Discussion and analysis of basic evolutionary principles and the necessary knowledge in computational biology to solve real world problems. Topics include character and distance based methods, phylogenetic tree distances, and consensus methods, and approaches to extract the necessary information from sequence-databases to build phylogenetic trees.

Com S 551. Computational Techniques for Genome Assembly and Analysis. (Cross-listed with BCB). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: 311 and some knowledge of programming.* Huang. Introduction to practical sequence assembly and comparison techniques. Topics include global alignment, local alignment, overlapping alignment, banded alignment, linear-space alignment, word hashing, DNA-protein alignment, DNA-cDNA alignment, comparison of two sets of sequences, construction of contigs, and generation of consensus sequences. Focus on development of sequence assembly and comparison programs.

Com S 552. Principles of Operating Systems. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 352.* A comparative study of high-level language facilities for process synchronization and communication. Formal analysis of deadlock, concurrency control and recovery. Protection issues including capability-based systems, access and flow control, encryption, and authentication. Additional topics chosen from distributed operating systems, soft real-time operating systems, and advanced security issues.

Com S 554. Distributed and Network Operating Systems. (Dual-listed with 454). (Cross-listed with Cpr E). (3-1) Cr. 3. Alt. S., offered 2011. *Prereq: 311, 352.* Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

Com S 555. Simulation: Algorithms and Implementation. (Dual-listed with 455). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Com S 311 and 330, Stat 330.* Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary Statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts. Oral and written reports.

Com S 556. Analysis Algorithms for Stochastic Models. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Com S 331, Math 307, and Stat 330.* Introduction to the use of stochastic models to study complex systems, including network communication and distributed systems. Data structures and algorithms for analyzing discrete-State models expressed in high-level formalisms. State space and reachability graph construction, model checking, Markov chain construction and numerical solution, computation of performance measures, product-form models, approximations, and advanced techniques.

Com S 557. Computer Graphics and Geometric Modeling. (Cross-listed with M E, Cpr E). (3-0) Cr. 3. F.S. *Prereq: 421, programming experience in C.* Fundamentals of computer graphics technology. Data structures. Parametric curve and surface modeling. Solid model representations. Applications in engineering design, analysis, and manufacturing

Com S 558. Introduction to the 3D Visualization of Scientific Data. (Cross-listed with Geol, HCI). (2-2) Cr. 3. Alt. S., offered 2011. *Prereq: Graduate-student standing in the Mathematical or natural sciences.* Introduction to visualizing scientific information with 3D computer graphics and their foundation in human perception. Overview of different visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, engineering). Class project in interactive 3D visualization using the OpenDX, VTK or a similar system.

Com S 561. Principles and Internals of Database Systems. (Dual-listed with 461). (3-1) Cr. 3. F. *Prereq: Graduate classification.* Models for structured and semistructured data. Algebraic, first order, and user-oriented query languages. Database schema design. Physical storage, access methods, and query processing. Transaction management, concurrency control, and crash recovery. Database security. Information integration using data warehouses, mediators, wrappers, and data mining. Parallel and distributed databases, and special purpose databases. Oral and written reports. Satisfactory-fail only.

Com S 562. Implementation of Database Systems. (3-0) Cr. 3. F. *Prereq: 461 or 561.* Implementation topics and projects are chosen from the following: Storage architecture, buffer management and caching, access methods, design, parsing and compilation of query languages and update operations, application programming interfaces (APIs), user interfaces, query optimization and processing, and transaction management for relational, object-oriented, semistructured (XML), and special purpose database models; client-server architectures, metadata and middleware for database integration, web databases.

Com S 567. Bioinformatics I (Fundamentals of Genome Informatics). (Cross-listed with BCB, Cpr E). (3-0) Cr. 3. F. *Prereq: Com S 208; Com S 330; Stat 341; credit or enrollment in Biol 315, Stat 430.* Biology as an information science. Review of algorithms and information processing. Generative models for sequences. String algorithms. Pairwise sequence alignment. Multiple sequence alignment. Searching sequence databases. Genome sequence assembly.

Com S 568. Bioinformatics II (Advanced Genome Informatics). (Cross-listed with BCB, GDCB, Stat). (3-0) Cr. 3. S. *Prereq: BCB 567, BBMB 301, Biol 315, Stat 430, credit or enrollment in Gen 411.* Advanced sequence models. Basic methods in molecular phylogeny. Hidden Markov models. Genome annotation. DNA and protein motifs. Introduction to gene expression analysis.

Com S 569. Bioinformatics III (Structural Genome Informatics). (Cross-listed with BBMB, BCB, Math, Cpr E). (3-0) Cr. 3. F. *Prereq: BCB 567, Gen 411, Stat 430.* Algorithmic and Statistical approaches in structural genomics including protein, DNA and RNA structure. Structure determination, refinement, representation, comparison, visualization, and modeling. Analysis and prediction of protein secondary and tertiary structure, disorder, protein cores and surfaces, protein-protein and protein-nucleic acid interactions, protein localization and function.

Com S 570. Bioinformatics IV (Computational Functional Genomics and Systems Biology). (Cross-listed with BCB, GDCB, Stat, Cpr E). (3-0) Cr. 3. S. *Prereq: BCB 567, Biol 315, Com S 311 and either 208 or 228, Gen 411, Stat 430.* Algorithmic and

Statistical approaches in computational functional genomics and systems biology. Analysis of high throughput gene expression, proteomics, and other datasets obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, simulation and inference of transcriptional regulatory modules and networks, protein-protein interaction networks, metabolic networks, cells and systems: Dynamic systems, Boolean, and probabilistic models. Ontology-driven, network based, and probabilistic approaches to information integration.

Com S 572. Principles of Artificial Intelligence. (Dual-listed with 472). (3-1) Cr. 3. F. *Prereq: 311, 331, Stat 330, Com S 342 or comparable programming experience.* Specification, design, implementation, and selected applications of intelligent software agents and multi-agent systems. Computational models of intelligent behavior, including problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction. Reactive, deliverative, rational, adaptive, learning and communicative agents. Artificial intelligence programming. Graduate credit requires a research project and a written report. Oral and written reports.

Com S 573. Machine Learning. (3-1) Cr. 3. S. *Prereq: 311, 362, Stat 330.* Algorithmic models of learning. Design, analysis, implementation and applications of learning algorithms. Learning of concepts, classification rules, functions, relations, grammars, probability distributions, value functions, models, skills, behaviors and programs. Agents that learn from observation, examples, instruction, induction, deduction, reinforcement and interaction. Computational learning theory. Data mining and knowledge discovery using artificial neural networks, support vector machines, decision trees, Bayesian networks, association rules, dimensionality reduction, feature selection and visualization. Learning from heterogeneous, distributed, dynamic data and knowledge sources. Learning in multi-agent systems. Selected applications in automated knowledge acquisition, pattern recognition, program synthesis, bioinformatics and Internet-based information systems. Oral and written reports.

Com S 574. Intelligent Multiagent Systems. (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Stat 330; Com S 331; 572, 573, 472, or 474.* Specification, design, implementation, and applications of multi-agent systems. Intelligent agent architectures; infrastructures, languages and tools for design and implementation of distributed multi-agent systems; Multi-agent organizations, communication, interaction, cooperation, team formation, negotiation, competition, and learning. Selected topics in decision theory, game theory, contract theory, bargaining theory, auction theory, and organizational theory. Selected topics in knowledge representation and ontologies. Agent-based systems and the Semantic Web. Applications in distributed intelligent information networks for information retrieval, information integration, inference, and discovery from heterogeneous, autonomous, distributed, dynamic information sources.

Com S 575. Computational Perception. (Cross-listed with Cpr E, HCI). (3-0) Cr. 3. S. *Prereq: Graduate standing or permission of instructor.* Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. You will work in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

Com S 577. Problem Solving Techniques for Applied Computer Science. (Dual-listed with 477). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 228; 330 or Cpr E 310, Math 166, Math 307 or Math 317, or consent of the instructor.* Selected topics in applied Mathematics and modern heuristics that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Homogeneous coordinates and transformations, perspective projection, quaternions and rotations, polynomial interpolation, roots of polynomials, resultants, solution of linear and nonlinear equations, approximation, data fitting, Fourier series and fast Fourier transform, linear programming, nonlinear optimization, Lagrange multipliers, parametric and algebraic curves, curvature, Frenet formulas, Bezier curves. Programming components. A scholarly report is required for graduate credit.

Com S 581. Computer Systems Architecture. (Cross-listed with Cpr E). (3-0) Cr. 3. F. *Prereq: Cpr E 381.* Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

Com S 583. Reconfigurable Computing Systems. (Cross-listed with Cpr E). (3-0) Cr. 3. *Prereq: Background in computer architecture, design, and organization.* Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurabiltiy.

Com S 586. Computer Network Architectures. (3-0) Cr. 3. F. *Prereq: 511, 552 or Cpr E 489.* Design and implementation of computer communication networks: layered network architectures, local area networks, data link protocols, distributed routing, transport services, network programming interfaces, network applications, error control, flow/congestion control, interconnection of heterogeneous networks, TCP/IP, ATM networks, multimedia communications, IP and application multicast, overlay networks, network security and web computing.

Com S 587. Principles of Distributed and Network Programming. (3-0) Cr. 3. F. *Prereq: 352 or Cpr E 489 or equivalent.* Programming paradigms for building modern distributed applications, including multithreaded client-server programming, distributed object frameworks and programming languages. Directory services. Web-based computing. Mobile computing. Peer-to-Peer computing. Network multimedia applications. Reliability and manageability of networked systems, including aspects of distributed system security, verification of concurrent systems, and network management.

Com S 590. Special Topics. Cr. arr. Repeatable. *Prereq: Permission of instructor.* Satisfactory-fail only.

Com S 592. Research Colloquia. Cr. 1. F.S. *Prereq: Graduation classification.* Attend Computer Science Research Colloquia. Written summary is required. Satisfactory-fail only.

Com S 596. Genomic Data Processing. (Cross-listed with BCB, GDCB). (3-0) Cr. 3. F. *Prereq: Some knowledge of programming.* Study the practical aspects of genomic data processing with an emphasis on hand-on projects. Students will carry out major data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contaminant removal; shotgun assembly procedures and EST clustering methods; genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank reports; and data collection and dissemination through the Internet. Useful post-genomic topics like microarray design and data analysis will also be covered.

Com S 598. Graduate Internship. Cr. R. Repeatable. F.S.SS. *Prereq: Graduate Classification.* Supervised internship working in professional settings appropriate to the student's degree program. Academic work under faculty supervision.

Com S 599. Creative Component. Cr. arr. Creative component for nonthesis option of Master of Science degree. Satisfactory-fail only.

Courses for graduate students

Com S 610. Seminar. Cr. arr. Satisfactory-fail only.

Com S 611. Advanced Topics in Analysis of Algorithms. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. *Prereq: 511, 531.* Advanced algorithm analysis and design techniques. Topics include graph algorithms, algebraic algorithms, number-theoretic algorithms, randomized and parallel algorithms. Intractable problems and NP-completeness. Advanced data structures.

Com S 612. Distributed Algorithms. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 511 or 531.* The theory of distributed computation. Algorithms, lower bounds and impossibility results. Leader Elections, mutual exlusion, consensus and clock synchronization algorithms. Synchronous, asynchronous and partially synchronous distributed systems models. Shared memory and message passing systems. Fault-tolerance and randomization. Broadcast and multicast. Wait-free object simulations. Distributed shared memory.

Com S 625. Issues in Parallel Programming and Performance. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 511.* Parallel solutions of numerical and non-numerical problems, implementation of parallel programs on parallel machines, performance and other computational issues in parallel programming.

Com S 626. Parallel Algorithms for Scientific Applications. (Cross-listed with Cpr E). (3-0) Cr. 3. *Prereq: 526.* Algorithm design for high-performance computing. Applications to numerical simulations, sparse matrix computation, multidimensional tree data structure, and particle-based methods, random numbers and Monte Carlo applications, algorithms, and computational biology.

Com S 631. Advanced Topics in Computational Complexity. (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. *Prereq: 531.* Advanced study in the quantitative theory of computation. Time and space complexity of algorithmic problems. The structure of P, NP, PH, PSPACE, and other complexity classes, especially with respect to resource-bounded reducibilities and complete problems. Complexity relative to auxiliary information, including oracle computation and relativized classes, randomized algorithms, advice machines, Boolean circuits. Kolmogorov complexity and randomness.

Com S 633. Advanced Topics in Computational Randomness. (3-0) Cr. 3. Repeatable. Alt. F., offered 2009. *Prereq: 531.* Advanced study of the role of randomness in computation. Randomized algorithms, derandomization, and probabilistic complexity classes. Kolmogorov complexity, algorithmic information theory, and algorithmic randomness. Applications chosen from cryptography, interactive proof systems, computational learning, lower bound arguments, mathematical logic, and the organization of complex systems.

Com S 634. Theory of Games, Knowledge and Uncertainty. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 330.* Fundamentals of Game Theory: individual decision making, strategic and extensive games, mixed strategies, backward induction, Nash and other equilibrium concepts. Discussion of Auctions and Bargaining. Repeated, Bayesian and evolutionary games. Interactive Epistemology: reasoning about knowledge in multiagent environment, properties of knowledge, agreements, and common knowledge. Reasoning about and representing uncertainty, probabilities, and beliefs. Uncertainty in multiagent environments. Aspects and applications of game theory, knowledge, and uncertainty in other areas, especially Artificial Intelligence and Economics, will be discussed.

Com S 641. Advanced Topics in Programming Language Semantics. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. *Prereq: 531, 541.* Operational and other Mathematical models of programming language semantics. Type systems and their soundness. Applications of semantics on areas such as program correctness, language design or translation.

Com S 652. Advanced Topics in Distributed Operating Systems. (3-0) Cr. 3. Repeatable. Alt. F., offered 2009. *Prereq: 552.* Concepts and techniques for network and distributed operating systems: Communications protocols, processes and threads, name and object management, synchronization, consistency and replications for consistent distributed data, fault tolerance, protection and security, distributed file systems, design of reliable software, performance analysis.

Com S 657. Advanced Topics in Computer Graphics. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 228, I E/M E/Cpr E/Com S 557.* Modern lighting models: Rendering Equation, Spherical Harmonics, LaFortune, Cook-Torrance. Non-polygonal primitives: volumes, points, particles. Textures: filtering, reflections creation. Graphics hardware: pipeline, performance issues, programmability in vertex and fragment path. Per-pixel lighting. Nonphotorealistic rendering. Radiosity; Ray tracing.

Com S 661. Advanced Topics in Database Systems. (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. *Prereq: 461 or 561.* Advanced topics chosen from the following: database design, data models, query systems, query optimization, incomplete information, logic and databases, multimedia databases; temporal, spatial and belief databases, semistructured data, concurrency control, parallel and distributed databases, information retrieval, data warehouses, wrappers, mediators, and data mining.

Com S 672. Advanced Topics in Computational Models of Learning. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. *Prereq: Com S 572 or 573 or 472 or 474.* Selected topics in Computational Learning Theory (PAC learning, Sample complexity, VC Dimension, Occam Learning, Boosting, active learning, Kolomogorov Complexity, Learning under helpful distributions, Mistake Bound Analysis). Selected topics in Bayesian and nformation Theoretic Models (ML, MAP, MDL, MML). Advanced Statistical methods for machine learning. Selected topics in reinforcement learning.

Com S 673. Advanced Topics in Computational Intelligence. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. *Prereq: Com S 572 or 573 or 472 or 474.* Advanced applications of artificial intelligence in bioinformatics, distributed intelligent information networks and the Semantic Web. Selected topics in distributed learning, incremental learning, multi-task learning, multi-strategy learning; Graphical models, multi-relational learning, and causal inference; Statistical natural language processing; modeling the internet and the web; automated scientific discovery; neural and cognitive modeling.

Com S 681. Advanced Topics in Computer Architecture. (Cross-listed with Cpr E). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 581.* Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

Com S 686. Advanced Topics in High-Speed Networks. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 586.* Advanced topics in IP networks and optical networks. QoS routing and scheduling, multicast, multiprotocol label switching (MPLS), traffic engineering. Optical network architectures, routing and wavelength assignment algorithms, optical multicast, traffic grooming, optical burst switching, lightpath protection/restoration schemes, and IP over WDM.

Com S 699. Research. Cr. arr. Repeatable. *Prereq: Approval of instructor.* Satisfactory-fail only.

Construction Engineering

(Administered by the Department of Civil, Construction and Environmental Engineering)

James Alleman, Chair of Department

Distinguished Professor: Klaiber

Distinguished Professors (Emeritus): Baumann, Cleasby, Handy

University Professor (Emeritus): Lohnes

Professors: Alleman, Fanous, Jaselskis, Kannel, Maze, Nambisan, Ong, Pometto, Porter, Sarkar, Schaefer, Souleyrette, Van Leeuwen, Wipf

Professors (Emeritus): Bergeson, Brewer, Carstens, Greimann, Hardy, Jellinger, Kao, Lee, Mashaw, Mickle, Morgan, Northup, Oulman, Sander

Professor (Collaborator): Surampalli

Associate Professors: Abendroth, Baenziger, Bhandari, Ellis, Gu, Hallmark, Jahren, Koziel, Rehmann, Sritharan, Strong, Sung, Wang, White, Williams

Associate Professors (Emeritus): Chase, Mercier, Sheeler, Ward

Assistant Professors: Aslock, Bolluyt, Ceylan, Gkritza, Grewell, Kandil, Rouse, Shane

Assistant Professors (Adjunct): Phares, Schlorholtz, Smadi, Taylor

Assistant Professors (Collaborators): Boyle, Khanal, Ozsoy

Instructors (Adjunct): Amenson, Gaunt

Senior Lecturers: Cormicle, Sirotiak, Walton

Lecturers: Baker, Cackler, Hawkins, Hunacek, Mescher, Perkins, Smith, Stout

Clinician: Gopalakrishnan

Undergraduate Study

For undergraduate curriculum in construction engineering leading to the degree bachelor of science, see *College of Engineering, Curricula.* This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science, see the *College of Engineering, Curricula.* General objectives, which are common to all departments in engineering, are stated in the *College of Engineering, Objectives of Curricula in Engineering.* The curriculum in construction engineering is designed with the objective to prepare students for life-long careers in the constantly changing technical and managerial environment of the construction industry. Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer's plans and specifications are converted into physical structures and facilities. To achieve this, a construction engineering graduate should have:

- confidence.
- initiative.
- leadership ability.
- the ability to think critically, systematically, and generatively.
- an understanding of the engineering and architectural design process.
- proficiency in construction engineering and the design of construction processes which includes the ability to:
  - apply knowledge of mathematics, science, and engineering.
  - design and conduct experiments, as well as to analyze and interpret data.
  - identify, formulate, and solve engineering problems.
  - design a system, component, or process to meet desired needs.
- an understanding of:
  - the overall construction process.
  - the estimating process.
  - the planning and scheduling process.
  - risk assessment.
  - contracts and laws.
  - business and management.
  - ethical reasoning.
  - contemporary issues in the industry.
  - construction engineering and the industry's impact on Society.- business and construction engineering terminology.
- an ability to:
  - function in multi-disciplinary teams.
  - communicate orally, graphically and in writing.
- a desire for life-long learning and intellectual and professional growth.
- an awareness of modern techniques, skills and technologies for construction.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

- interact with practicing professionals.
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- develop leadership skills by participating in student organizations.
- develop, analyze, and interpret alternative solutions to open-ended problems.
- study abroad.

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student's perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship

program to supplement academic work with work experience. See *Cooperative Education Programs, College of Engineering*.

Construction engineering students are encouraged to participate in life-long learning, continuous professional development, and to achieve professional engineer registration and/or registration as a certified professional constructor. Qualified construction engineering students within 30 credits of completing their undergraduate degree may apply for concurrent enrollment in the Graduate College. See *Civil Engineering Graduate Study* for more information.

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. See *Civil Engineering, Courses and Programs*.

Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs.

Courses primarily for undergraduate students

Con E 121. Cornerstone Learning Community: Orientation to Academic Life. (0-2) Cr. 1. F. Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Teamwork topics include interdisciplinary teamwork, skills for academic success and diversity issues. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources.

Con E 122. Cornerstone Learning Community: Orientation to Professional Life. (0-2) Cr. 1. S. Continuation of Con E 121. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

Con E 221. Contractor Organization and Management of Construction. (4-0) Cr. 4. F.S. *Prereq: Completion of basic program.* Entry level course for construction engineering: integration of significant engineering, economics, and management issues related to efficient construction company operations. Time value of money; methods of evaluating alternative projects; organization; operations; construction company administration; project administration; project management systems; construction contracts; integrated delivery systems (design/build and others); marketing; insurance and bonding; construction safety; labor law; labor relations; productivity; motivation and leadership; contract documents; interpretation and utilization of drawings, specifications, agreements, bidding forms, general conditions, subcontracts, shop drawings and related documents.

Con E 241. Construction Materials and Methods. (2-3) Cr. 3. F.S. *Prereq: 221.* Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems. Blueprint reading and quantity takeoff techniques.

Con E 251. Mechanical/Electrical Materials and Methods. (0-3) Cr. 1. F.S. *Prereq: Credit or enrollment in 241.* Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff. Specialty contractor organization and management.

Con E 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* First professional work period in the cooperative education program. Students must register for this course before commencing work.

Con E 322. Construction Equipment and Heavy Construction Methods. (2-3) Cr. 3. F.S. *Prereq: 241.* Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications. Nonmajor graduate credit.

Con E 340. Concrete and Steel Construction. (2-3) Cr. 3. F.S. *Prereq: E M 324, credit or enrollment in Con E 322.* Planning and field engineering for concrete and steel construction. Design and applications of concrete formwork to construction. Erection of structural steel. Emerging industry themes. Nonmajor graduate credit.

Con E 352. Mechanical Systems in Buildings. (3-0) Cr. 3. F.S. *Prereq: 251, Phys 222.* Comprehensive coverage of mechanical systems, plumbing, fire protection, vertical transportation. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

Con E 353. Electrical Systems in Buildings. (2-0) Cr. 2. F.S. *Prereq: Phys 222 and credit or enrollment in 352.* Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

Con E 380. Engineering Law. (3-0) Cr. 3. F.S. *Prereq: Junior classification.* Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation. Nonmajor graduate credit.

Con E 381. Bidding Construction Projects I. (0-3) Cr. 1. F. *Prereq: Permission from the instructor.* Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialities:
A. Heavy and Highway
B. Building
C. Mechanical
D. Electrical
E. Mechanical and Electrical
F. Miscellaneous

Con E 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of department and Engineering Career Services.* Summer professional work period. Students must register for this course before commencing work.

Con E 397. Engineering Internship. Cr. R. Repeatable. F.S. *Prereq: Permission of department and Engineering Career Services.* Professional work period, one semester maximum per academic year. Students must register for this course before commencing work.

Con E 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: 298, permission of department and Engineering Career Services.* Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Con E 421. Construction Estimating. (2-3) Cr. 3. F.S. *Prereq: 241, Junior classification.* Conceptual estimating. Bid preparation for buildings, highways, heavy, mechanical trades. Estimating costs for material, labor, equipment, overhead, and profit. Quantity surveys, unit costs, production rates, and pricing methods. Subcontract bid analysis and bid procedure. Cost analysis and cost control. Electronic quantity take off methods. Nonmajor graduate credit.

Con E 441. Construction Planning, Scheduling, and Control. (2-2) Cr. 3. F.S. *Prereq: Credit or enrollment in 421.* Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications. Nonmajor graduate credit.

Con E 481. Bidding Construction Projects II. (0-3) Cr. 1. F. *Prereq: Permission from the instructor.* Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.
A. Heavy and Highway
B. Building
C. Mechanical
D. Electrical
E. Mechanical and Electrical
F. Miscellaneous

Con E 487. Construction Engineering Design I. (1-2) Cr. 2. F.S. *Prereq: Con E 340 (B, H), 352 (B, E, M), 353 (B, E, M), 421, 441. Student must be within two semesters of graduation.* The integrated delivery of project services including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

Con E 488. Construction Engineering Design II. (1-5) Cr. 3. F.S. *Prereq: Con E 380. Coreq: 487.* Application of team design concepts to a construction engineering project. Project planning. Detailed analysis. Advanced cost and schedule applications. Contract negotiation. Development of a complete project history. Technical presentations (oral and written).

Con E 490. Independent Study. Cr. 1-5. Repeatable. F.S.SS. *Prereq: Permission of instructor.* Individual study in any phase of construction engineering. Preenrollment contract required.

Con E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: 398, permission of department and Engineering Career Services.* Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Criminal Justice Studies

(Interdepartmental Undergraduate Program)

Matthew J. DeLisi, Program Coordinator

The criminal justice studies minor, a cross-disciplinary course of study in the College of Liberal Arts and Sciences, offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in criminal or juvenile justice.

Students who declare a minor in criminal justice studies are required to complete 15 credits of course work. Students must take five of the following six courses: CJ St 240, 241, 320, 332, 340 or 341. Students are also required to complete a minimum of 3 credits of internship experience (CJ St 460). Completion of the minor requires 18 total credits.

Courses primarily for undergraduate students

CJ St 240. Introduction to the U.S. Criminal Justice System. (3-0) Cr. 3. F. Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the Sociological influences of age, race, gender, and social class on criminal justice system processes.

CJ St 241. Youth and Crime. (Cross-listed with Soc). (3-0) Cr. 3. F. *Prereq: Soc 130 or 134.* An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

CJ St 320. American Judicial Process. (Cross-listed with Pol S). (3-0) Cr. 3. S. *Prereq: Pol S 215.* An overview of the American judicial process. Emphasis on specific topics such as application of constitutional rights to the states (particularly the Fourth, Fifth, Sixth, and Fourteenth Amendments), mechanics of judicial opinions, constitutional Philosophies of Supreme Court Justices, decisions of first impression, and the value and scope of precedent.

CJ St 332. Philosophy of Law. (Cross-listed with Phil). (3-0) Cr. 3. F.S. *Prereq: Phil 201 or 230.* Extent of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility. Nonmajor graduate credit.

CJ St 340. Deviant and Criminal Behavior. (Cross-listed with Soc). (3-0) Cr. 3. S.SS. *Prereq: Soc 130 or 134.* Theory and research on the etiology of types of social deviance; issues relating to crime, antisocial behavior and social policies designed to control deviant behavior.

CJ St 341. Criminology. (Cross-listed with Soc). (3-0) Cr. 3. F. *Prereq: Soc 130 or 134.* The nature of crime and criminology; the concept of crime; Statistics and theories of criminality; major forms of crime; official responses to crime and control of crime.

CJ St 351. Police and Society. (Cross-listed with Soc). (3-0) Cr. 3. F.S.SS. *Prereq: Soc 241 or CJ St 240.* Introduction and overview of law enforcement in the United States. Theory and research on police history, function, and organization; constitutional issues of policing; and critical topics, such as community policing, officer discretion and decision-making, corruption, use of force, and racial profiling. The course illustrates the interconnections between communities, police organizations, citizens, and criminal offenders.

CJ St 352. Punishment, Corrections, and Society. (Cross-listed with Soc). (3-0) Cr. 3. F.S.SS. *Prereq: Soc 241 or CJ St 240.* Introduction and overview of corrections in the United States. Theory and research on probation, parole, intermediate sanctions, prison, inmate Society, inmate behavior and misconduct, capital punishment, recidivism, correctional treatment, rehabilitation, and offender reintegration into Society.

CJ St 402. White-Collar Crime. (Cross-listed with Soc). (3-0) Cr. 3. S.SS. *Prereq: Soc 241 or CJ St 240.* Introduction and overview of white-collar crime as a form of deviance. Theory and research on occupational, corporate, and organizational offending; prevalence, costs, and consequences of white-collar crime; predictors and correlates of white-collar crime; and political, business, and public policy responses to white-collar crime.

CJ St 403. Criminal Offenders. (3-0) Cr. 3. F.S. *Prereq: 240 or 241.* Introduction and overview of criminal offenders. Theory and research on epidemiology, offender typologies, etiology of violence, recidivism, societal costs, correctional supervision, treatment, and prevention of serious antisocial behavior.

CJ St 460. Criminal and Juvenile Justice Practicum. (Cross-listed with Soc). Cr. arr. Repeatable. F.S.SS. *Prereq: Junior or senior classification; permission of criminal justice studies coordinator; major or minor in Sociology, or criminal justice studies minor.* Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor's office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency.

Cross Disciplinary Studies

The College of Liberal Arts and Sciences administers a number of Cross Disciplinary Studies, Interdepartmental Studies, and Certificate Programs which enable students to develop individual programs of study toward majors and minors in a range of disciplines. Information on the requirements for these programs is available in the Academic Advising Office, College of Liberal Arts and Sciences, located in Catt Hall. (see Index, Liberal Arts and Sciences Cross Disciplinary Studies)

Curriculum and Instruction

www.edu.ci.hs.iastate.edu

Carl Smith, Interim Chair of Department

Distinguished Professors (Emeritus): Moyer, Rasmussen

University Professor: Thompson

University Professors (Emeritus): Brown, D. Williams

Professors: Abelson, Andre, Blount, Greenbowe, Martin, G. Miller, W. Miller, Mokhtari, Owen, Phye, Smith, Stuart, Whaley

Professors (Emeritus): Barnhart, Bath, Baum, Breiter, Brun, Burkhalter, Carter, Charles, Coulson, Daly, Dilts, Downs, Duffelmeyer, Henney, Hoerner, Hunter, Keller, McCormick, Rudolph, Schneider, Shhloerke, Smith, Tanner, Thomas, Volker, Williams, Zbaracki

Associate Professors: Allen, Bloom, Caldwell, Carlson, Clough, Foegen, Fuhler, Gentzler, Hargrave, Hausafus, Leigh, Munsen, Niederhauser, Olsen, Payne, Schilling, Torrie

Associate Professors (Emeritus): Amos, Ebert

Associate Professor (Adjunct): Rosenbusch

Assistant Professors: Bang, Blumenfeld, Bruna, Correia, Drake, Esters, Lee, Norton-Meier, Schmidt, Seymour

Assistant Professors (Emeritus): Chatfield, Tartakov

Assistant Professors (Adjunct): Andreotti, McShay

Lecturers: Achter, Billings, Bossard, Breitsprecker, Coldiron, Erickson, Fairchild, Kinley, Land, Laws, Lind, Linduska, Millen, Nelson, Norris, Olson, Sheldon, Stoppel, Swenson, Taylor, Timm, Turner, Tvrdik, Vermeer, Wiebold

Missions and Goals

The mission of the Department of Curriculum and Instruction is to serve the people of Iowa, the Nation, and the World through discovery, learning, and engagement efforts that enhance and develop human potential and equity through education and that promote understanding of learning, teaching, and education as disciplines. In our discovery mission, we strive

- to conduct the highest quality research and scholarship that significantly contribute to educational theory and practice and
- to be known locally, nationally, and internationally as a department of distinction.

In our learning mission, we strive to be a recognized high quality teacher preparation department that

- prepares highly effective teachers and educational leaders;
- prepares graduate students and post doctoral professionals who become leaders in their respective fields; and
- conducts significant ongoing research and evaluation on the process of effective teacher preparation.

In our engagement mission, we strive to develop partnerships within and beyond the university that

- enhance the quality and effectiveness of education in practice and
- serve our discovery and learning missions.

Undergraduate Study

The Department of Curriculum and Instruction provides the professional education coursework that leads to licensure of pre-service teachers. Students major in early childhood education - birth through third grade or elementary education - K-6. Students who are interested in teaching at the secondary level (5-12) major in a specific discipline and complete the courses necessary for their teaching license. Early childhood education and elementary education majors must complete a professional course sequence: C I 201, 204, 332, 406 and Sp Ed 250. Secondary education students must complete a professional course sequence: C I 202, 204, 333, 406 and Sp Ed 450. Some secondary licensure areas also require C I 426.

The department offers a minor in digital learning that may be earned by completing the following courses: C I 201 or 202; Com S 107 or Com S 207 or Cpr E/Mat E 370; C I 280A; 280B; 302; 403; and 407.

The Department of Curriculum and Instruction offers courses that can lead to a reading endorsement for grades K-8 or grades 5-12. Students seeking a K-8 endorsement should see a Curriculum and Instruction academic adviser. The 5-12 endorsement is offered collaboratively with the English Department. Students seeking this endorsement should see an adviser in the English Department. Copies of transcript(s) can also be sent to the Licensure Analyst in the Student Services Office to receive a list of courses needed for an Iowa State University Reading endorsement. Prerequisites for the reading endorsement courses are listed in the catalog course descriptions.

Early Childhood Education

The curriculum in Early Childhood Education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services. Graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences.

Early Childhood Education majors must satisfy a world language requirement for graduation. For detailed information, see College of Human Sciences - Curriculum in Early Childhood Education.

Students who enroll in Early Childhood Education must make application to and be accepted into the teacher education program prior to enrolling

in advanced courses. All early childhood education students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education's mandate for a performance based system of teacher training. Following this same type of system, the State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Iowa State University Teacher Education Standards and the eight State of Iowa Teaching Standards, along with other information about the University Teacher Education Program, can be found at www.teacher.hs. iastate.edu/, the teacher education website. information is also available from the student's academic adviser.

Students in early childhood education must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through designated performance indicators such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experience in at least two different settings is required. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University

Elementary Education

For the undergraduate curriculum in elementary education, leading to the degree bachelor of science, see College of Human Sciences.

The curriculum in elementary education is planned for students preparing to teach at the elementary school level. This program leads to careers in working with school-aged children, kindergarten through sixth grade. Graduates in this curriculum may teach in elementary classrooms in either public or private school districts.

Endorsements in art, English/language arts, English as a Second Language (ESL), health, history, music, basic science, social studies, mathematics, special education (Instructional Strategist I: Mild/Moderate Disabilities K-8), and speech communication/theater are available for elementary education students. An endorsement for teaching world languages in elementary schools is available through the Department of World Languages and Cultures.

Elementary Education majors must satisfy a world language requirement for graduation. For detailed information, see College of Human Sciences - Curriculum in Elementary Education.

Students who enroll in elementary education must make application to and be accepted into the teacher education program prior to enrolling in advanced elementary education courses. For admission and licensure requirements, see College of Human Sciences. Every student must meet the performance outcome standards for teacher licensure. These standards will be assessed in each course. Students will receive both formative and summative evaluations of their progress toward meeting these standards throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found on the department's website (www.ci.hs.iastate.edu/). The same information is also available from the student's academic adviser.

Graduates of the elementary education program will be able to demonstrate through professional practice their understanding of academic disciplines, teaching and learning, the nature of the student, and how to adapt instruction for diversity. More specifically, graduates will be able to demonstrate their understanding of concepts and structures of disciplines, tools of inquiry, how students learn and develop, and the effects of individual differences on learning. Graduates will be able to demonstrate a broad range of instructional strategies, including knowledge of technology applicable to instruction. In their teaching, graduates will demonstrate the ability to stimulate active inquiry with collaboration and supportive interaction among their students. In appropriate settings graduates will demonstrate their ability to develop professional relationships with colleagues, parents, and agencies that support students and their learning.

Secondary Education

For specific requirements for each area of specialization, see Teacher Education and curricula for the college in which the chosen degree major is sought.

Students seeking recommendations for a license to teach in the secondary schools must be admitted to the teacher education program and pursue a program that includes the professional core: C I 202, 204, 333, 406, 426, and Sp Ed 450; special methods; and student teaching in the area of specialization. Note: Students seeking licensure in agriculture and science do not take C I 426. Students seeking a teaching license in physical education must see an advisor in the Department of Kinesiology in the College of Human Sciences. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the teacher education program and be recommended by the College of Human Sciences. Each student must meet the performance outcome standards for teacher licensure. Each standard will be assessed in every major. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found at www.teacher.hs.iastate.edu. For more information, students should contact the academic advisers in their major. Each student will be enrolled in the department in which he or she plans to major, and must meet the graduation requirements of that department and the college in which it is located.

Graduate Study

The Department of Curriculum and Instruction offers work for the degrees Master of Science, Master of Education, and Doctor of Philosophy with a major in education and minor work to students taking major work in other departments. Within the education major in the Department of Curriculum and Instruction a student may earn an education degree with no area of specialization (master's and doctorate) or specialize in elementary education (master's only), historical, philosophical, and comparative studies in education (master's only), special education (master's only), or curriculum and instructional technology (master's and doctorate). The specialization in elementary education (advanced study for licensed teachers) is designed to prepare candidates for teaching and curricular leadership positions in elementary settings. The specialization in historical, philosophical, and comparative studies in education is designed to provide graduate students experiences in analyzing educational problems and issues, critiquing policies that affect education in Society, and making connections between educational practice and learning. The special education specialization is designed to prepare candidates as practitioners and researchers in the field of mild/moderate disabilities or behavioral disorders/learning disabilities. The specialization in curriculum and instructional technology is designed to prepare candidates as researchers and practitioners in the fields of curriculum and instructional technology.

Students may also opt not to select an area of specialization. These students are asked to select a focus area for their graduate study. Focus areas include educational psychology, world language education, literacy education, mathematics education, multicultural education and international curriculum studies, and science education. See the Curriculum and Instruction web site at http://www.ci.hs.iastate.edu/for more information on these focus areas.

A minor is available in curriculum and instructional technology at both the master's and doctoral level. Information about the minors can be found on the web at http://www.ci.hs.iastate.edu/prspstud/grad/Grad2/Degrees.php.

A Master of Arts in Teaching degree program leading to teacher licensure (science only) is available to students who currently have a bachelor's degree in science (or a closely related field). A teacher licensure program in mathematics education is also available to graduate students (Department of Curriculum and Instruction). Teacher licensure at the graduate level is also offered in agricultural education (College of Agriculture and Life Sciences) and family and consumer sciences (College of Human Sciences). The Department of Curriculum and Instruction provides the professional education coursework. Students in a graduate teacher licensure program must complete Sp Ed 501, C I 505, 506, 529, and HPC 504. Mathematics licensure students also take C I 526.

Graduate level teaching endorsements are offered through the Department of Curriculum and Instruction. Graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master's degree can incorporate those courses from a professional certificate program. Endorsement programs include Instructional Strategist I: Mild/Moderate Disabilities (K-8 or 5-12), or Instructional Strategist II: Behavior Disorders/Learning Disabilities, and special education consultant. A graduate level reading endorsement is also available.

Prerequisite to major graduate work in education is preparation substantially equivalent to the completion of one of the undergraduate curricula in education offered at Iowa State University, or graduate preparation in a discipline to be used as a teaching field in a community college or university, and adequate proof that the student ranks above average in scholastic ability and promise of professional competence.

The world language requirement, if any, for the Ph.D. degree will be determined by the student's program of study committee. If no world language is required, the total program must consist of a minimum of 78 semester credits, at least 12 of which must be earned outside the education major, and at least 16 of which must be earned outside the area of specialization. Statistics and research methods may not be included in the 16 credits. Should world language be included, the program of study committee may adjust the minimum program requirement downward, but in no instance may the program of study be less than 72 semester credits. Students whose native language is not English may substitute competence

in English. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores.

Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. Students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, Educational Leadership and Policy Studies, and General Graduate Studies or to graduate level course offerings within other departments.

Curriculum and Instruction (C I)

Courses primarily for undergraduate students

C I 115. First Year Orientation. Cr. R. F. Overview of elementary education curricular opportunities, transitions to college and community life, and university procedures. Required of all first-semester freshmen majoring in elementary education.

C I 201. Digital Learning in the PK-6 Classroom. (2-2) Cr. 3. F.S.Alt. SS., offered 2011. Overview of ways to use instructional technologies to support instruction in PK-6 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, webpage development, digital video and other technologies to facilitate learning and teaching.

C I 202. Digital Learning in the 7-12 Classroom. (2-2) Cr. 3. F.S.Alt. SS., offered 2010. Overview of ways to use instructional technologies to support instruction in 7-12 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, webpage development, digital video and other technologies to facilitate learning and teaching.

C I 204. Social Foundations of American Education. (3-0) Cr. 3. F.S.SS. Goals of schooling, including the roles of teachers today; historical development of schools; educational reforms and alternative forms; and current Philosophical issues. Human relations aspects of teaching and discussions about teaching as a career.

C I 208. Early Childhood Education Orientation. (Cross-listed with HD FS). Cr. 1. F.S. Overview of early childhood education (birth-grade 3) teacher licensure requirements. Program planning and university procedures. Required of all students majoring in early childhood education. Satisfactory-fail only.

C I 215. Sophomore Orientation. Cr. R. F.S. Review of elementary education requirements. Program planning. Required of all sophomores majoring in elementary education.

C I 219. Orientation to Teacher Education for Mathematics, Science and History/Social Sciences Majors. Cr. R. F.S. *Prereq: Students seeking teacher licensure in mathematics, science or history/social sciences in grades 7-12.* Overview of Mathematics, science, and history/social sciences secondary education (grades 7-12), teacher licensure requirements in Iowa and other states. Program and career planning.

C I 245. Strategies in Teaching. (2-0) Cr. 2. F.S. *Prereq: 204; HD FS 220 or 221 or 226 (or concurrent enrollment in one of these courses); concurrent enrollment in C I 268; eligibility for admission to teacher education program.* Introduction to elementary education teaching strategies, classroom management, and curriculum organization. Open to students in the elementary education curriculum or the early childhood education curriculum.

C I 268. Strategies Practicum. (0-2) Cr. 1. F.S. *Prereq: 204.* Clinical experience, to be taken concurrently with 245. Satisfactory-fail only.

C I 280. Pre-Student Teaching Experience. (1-8) Cr. arr. Repeatable. F.S.SS. *Prereq: 280A may be taken alone. For enrollment in 280B-I, 280A must be either a prerequisite or taken concurrently.* Field experience in area educational settings. 2 1/2-hour blocks of time needed for field experience. C I 280 may be taken more than once for credit toward graduation.
A. Teacher Aide. Cr. 1 or 2
B. Educational Computing. Cr. 1 or 2 (2 credits by permission only)
C. Native American Tutoring. Cr. 1
D. Museum Education. Cr. 1
E. Multicultural Youth Experience. Cr. 1 or 2
F. International Student. Cr. 1 or 2 (Permission of instructor required)
I. Mild/Moderate Disabilities. Cr. 1 (concurrent with Sp Ed 330).
L. Early Field Experience. Cr. .5
M. Secondary Science. Cr. 1 or 2
N. CoHort Field Experience. Cr. 1 (permission of department required)
O. Art Education Field Experience. Cr. 1 (Permission of department required)

C I 290. Independent Study. Cr. arr. *Prereq: 6 credits in education, permission of department chair.*

C I 302. Principles and Practices of Digital Learning. (2-2) Cr. 3. F.S. *Prereq: 201 or 202, 245, 268.* Advanced integration of educational technologies into K-12 teaching and learning; designing classroom applications for tool software; implementing technology-based lessons with K-12 students; issues and trends in classroom technology use.

C I 315. Transfer Orientation. Cr. 1. F.S. Overview of elementary education requirements, curricular opportunities, and university procedures. Program planning. Required of all transfer students majoring in elementary education. Satisfactory-fail only.

C I 332. Educational Psychology of Young Learners. (3-0) Cr. 3. F.S. *Prereq: Psych 230 or HD FS 102, open only to majors in Early Childhood Education or Elementary Education.* Psychological theory relevant to classroom learning, cognition, motivation, classroom management and assessment for children from birth to grade 6. Implications of theory for teaching children and for assessing learning in educational settings with young and grade school aged children.

C I 333. Educational Psychology. (Cross-listed with Psych). (3-0) Cr. 3. F.S. *Prereq: Psych 230 or HD FS 102, application to the teacher education program or major in psychology.* Classroom learning with emphasis on theories of learning and cognition, and instructional techniques. Major emphasis on measurement theory and the classroom assessment of learning outcomes.

C I 347. Nature of Science. (Dual-listed with 547). (3-0) Cr. 3. *Prereq: 280M; concurrent enrollment in 418 or instructor permission.* The intersection of issues in the history, philosophy Sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C I 377. The Teaching of Reading and Language Arts in the Primary Grades (K-3). (4-0) Cr. 4. F.S.SS. *Prereq: admission to teacher education program, C I 245, Sp Ed 250, HD FS 240, 226 (El Ed majors) or 221 (ECE majors); concurrent enrollment in 448, 468A, 468C (El Ed majors) or 438, 468F, 468G, Sp Ed 368, HD FS 343 (ECE majors).* Theories, teaching strategies, and instructional materials pertinent to teaching reading, writing, listening, and speaking to children in kindergarten through third grade.

C I 378. The Teaching of Reading and Language Arts in the Intermediate Grades (4-6). (4-0) Cr. 4. F.S.SS. *Prereq: 377; concurrent enrollment in 449, 468B, 468D.* Theories and processes of literacy. Application through reading and writing across the curriculum, integration of language arts, literature-based instruction, and metacognitive strategies.

C I 395. Teaching Reading in Middle and Secondary Schools. (Dual-listed with 595). (3-0) Cr. 3. F. *Prereq: 204 and junior standing.* Analysis and application of strategies to enhance students' literacy development in middle and secondary school settings.

C I 401. Middle School Student Growth and Development. (3-0) Cr. 3. *Prereq: Psych 230.* Study of the physical, emotional, intellectual, and social development of 10 to 15 year old middle school students, with emphasis on implications for schools and teachers. Includes strategies for classroom management and working with parents. Issues of risk, resiliency, substance abuse, suicide, and sexuality will also be examined.

C I 402. Middle School Curriculum Design. (3-0) Cr. 3. *Prereq: 401, admission to teacher education.* Emphasis on the middle school components of interdisciplinary teaming, curriculum frameworks, teacher-based guidance and assessment.

C I 403. Design and Development of Digital Learning Environments. (2-2) Cr. 3. F.S. *Prereq: 302.* Application of principles of instructional design and cognitive theories to development of digital learning environments. Development of expertise with contemporary technologies and approaches to learning. Analysis and discussion of research related to effective use of multimedia in education.

C I 406. Multicultural Foundations of School and Society: Introduction. (3-0) Cr. 3. F.S.SS. *Prereq: 201 or 202, 332 or 333, junior classification, admission to teacher education program.* Awareness and nature of cultural pluralism; need for multicultural education; multicultural concepts and theories; cultural groups - their perceptions, needs, and contributions; problems and issues regarding ethnocentrism, prejudice, and discrimination based on race, ethnicity, socioeconomic class, sex/gender, sexual identity, and language in the school environment; curriculum infusion and transformation, multicultural interaction, design and execution of teaching strategies.

C I 407. Principles and Practices of Distance Learning. (Dual-listed with 507). (2-2) Cr. 3. F.SS. *Prereq: 201 or 202; convenient access to the Web.* Review of flexible and distance learning (FDL) cases in a variety of contexts and pedagogic styles, research into relevant topics. Identification of underlying principles and frameworks for best practice in this field. Offered in FDL modes, utilizing telecommunications and the Internet.

C I 416. Supervised Student Teaching - Elementary. Cr. arr. F.S. *Prereq: GPA 2.5; full admission to teacher education; senior classification; 378, 443, 448, 449; reservation required.* Supervised teaching experience in the elementary grades.
A. Primary grades (K-3).
B. Intermediate grades (4-6).
C. World Language.
D. International Student Teaching - Primary grades.
E. International Student Teaching - Intermediate grades.

C I 417. Student Teaching. (Dual-listed with 517). (Cross-listed with Engl, WLC, Music). Cr. arr. F.S. *Prereq: GPA 2.5; Admission to teacher education, approval of coordinator during semester before student teaching.* Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences.
A. Social Studies-Middle School
B. Physical Sciences
C. Mathematics
D. Biological Sciences
E. English and Literature (Same as Engl 417E)
G. World Language (Same as WLC 417G)
J. Earth Sciences
K. Music-Secondary (Same as Music 417K)
L. Music-Elementary (Same as Music 417L)
M. Science-Basic
N. International Student Teaching
P. Social Studies-High School

C I 418. Secondary Science Methods I: A Research-Based Framework for Teaching Science. (Dual-listed with 518). (2-0) Cr. 2. F. *Prereq: 280M; concurrent enrollment in 347 and 468J.* Development of a research-based framework for teaching science that includes student goals, congruent student actions, the character and role of science inquiry, teaching

behaviors and strategies, contemporary learning theories, and self evaluation.

C I 419. Secondary Science Methods II. (Dual-listed with 519). (2-0) Cr. 2. S. *Prereq: 418 or 518, undergraduate students must register concurrently for 468K.* Advancing a research-based framework for teaching science in a variety of school settings, emphasizing the teacher's role, the development and revision of science curriculum, exceptional learners, content area reading strategies, management strategies, technology and student assessment.

C I 420. Bilingualism, Bilingual Education, and U.S. Mexican Youth. (Dual-listed with 520). (3-0) Cr. 3. F. *Prereq: 406.* Introduction to research on bilingualism and examination of the social, historical, and political contexts of bilingual education in U.S. schools. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and biculturalism for U.S. Mexican youth.

C I 426. Principles of Secondary Education. (Dual-listed with 526). (3-0) Cr. 3. F.S.SS. *Prereq: 202, senior classification, admission to teacher education program.* The curriculum, human relations, student evaluation, support services, classroom management, organization of schools, legal aspects of schools, professionalism, and career planning.

C I 433. Teaching Social Studies in the Primary Grades. (2-0) Cr. 2. F.S. *Prereq: 377, HD FS 221; concurrent enrollment in 438, 439, Sp Ed 355, 455.* Study, development, and application of current methods for providing appropriate social studies learning experiences for primary grade children. Instructional strategies, curriculum content, and formal and informal assessment strategies for diverse learners.

C I 438. Teaching Mathematics in the Primary Grades. (2-0) Cr. 2. F.S. *Prereq: HD FS 221; Math 195; concurrent enrollment in 377, 433, 439, 468A, 468G, Sp Ed 355, 455.* Study, development, and application of current methods for providing appropriate Mathematics learning experiences for primary grade children. Formal and informal assessment strategies and instructional methods for diverse learners.

C I 439. Teaching Science in the Primary Grades. (2-0) Cr. 2. F.S. *Prereq: 377, HD FS 221; concurrent enrollment in 433, 438, 468I, Sp Ed 355, 455.* Study, development, and application of current methods for providing appropriate science learning experiences and processes for primary grade children. Formal and informal assessment strategies and instructional methods for diverse learners.

C I 443. The Teaching of social Studies. (3-0) Cr. 3. F.S.SS. *Prereq: 377.* Study, development, and application of current methods, curriculum materials, and assessment strategies for providing appropriate social studies learning experiences for primary and intermediate grade children.

C I 448. Teaching Children Mathematics. (3-0) Cr. 3. F.S. *Prereq: Math 195, 196; concurrent enrollment in 377, 468A, 468C.* Study, development, and application of current methods for providing appropriate Mathematical learning experiences for primary and intermediate children. Includes critical examination of factors related to the teaching and learning of Mathematics.

C I 449. The Teaching of Science. (3-0) Cr. 3. F.S. *Prereq: 377, concurrent enrollment in 378, 468B, 468D, junior classification.* Procedures for teaching science to children. Emphasis on developmental implications, teaching processes and methods, current programs, and assessment of learning in science.

C I 450. Ethnicity and Learning. (Dual-listed with 550). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 332 or 333, 406.* Examination of cultural relevance in education. Development and application of strategies and techniques for implementing multicultural goals and multiethnic perspectives in PreK-12 school classroom settings.

C I 452. Corrective Reading. (Dual-listed with 552). (3-0) Cr. 3. F.S.SS. *Prereq: 378 or equivalent; undergraduate students must register concurrently for Sp Ed 365, 436; graduate students must have a teaching license.* Identification, analysis and correction of reading problems in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension

C I 456. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 556). (3-0) Cr. 3. F.SS. *Prereq: 201 or 202, 377.* Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C I 468. Supervised Practicum in Teaching. Cr. arr. F.S.SS. *Prereq: Admission to teacher education program.* Observation, application of current methods, and instructional experiences with children in a supervised elementary classroom while engaged in other elementary methods courses.
A. Primary Grades, Reading & Language Arts. Cr. 1
B. Intermediate Grades, Reading & Language Arts. Cr. 1
C. Mathematics. Cr. 1
D. Science. Cr. 1
E. World Language. Cr. 1
F. Primary Grades, Literacy, Inclusive. Cr. 1
G. Primary Grades, Mathematics, Inclusive. Cr. 1
I. Primary Grades, Science, Inclusive. Cr. 1
J. Secondary Science I. Cr. 2
K. Secondary Science II. Cr. 2.
R. Reading Endorsement (Permission of department required; concurrent enrollment in 378) Cr. 1.

C I 480. Field Experience for Secondary Teaching Preparation. (Cross-listed with MUSIC). Cr. arr. Repeatable. F.S. *Prereq: Permission of area coordinator required prior to enrollment.* Observation and participation in a variety of school settings after admission to the teacher preparation program. (S/F grading may be used in some offerings of some sections.)
A. History/Social Sciences
C. Mathematics
K. Music (Same as Music 480K)

C I 486. Methods in Elementary School World Language Instruction. (Cross-listed with WLC, Ling). (3-0) Cr. 3. F. *Prereq: 25 credits in a world language.* Current educational methods and their application in the elementary school classroom. Special emphasis on planning, evaluation, and teaching strategies. Nonmajor graduate credit.

C I 487. Methods in Secondary School World Language Instruction. (Cross-listed with WLC, Ling). (3-0) Cr. 3. F. *Prereq: 25 credits in a world language, admission to the teacher education program.* Theories and principles of contemporary world language learning and teaching. Special emphasis on designing instruction and assessments for active learning.

C I 490. Independent Study. Cr. arr. F.S.SS. *Prereq: GPA of 2.5 or more for preceding semester.*
A. Music Education. (Same as Music 490A.)
B. Vocational and Educational Guidance
C. Curriculum Construction
D. Principles of Education
E. Methods of Teaching
F. Educational Psychology
G. Instructional Technology
H. Honors
I. Foundations of Educational Statistics
J. Multicultural Education
K. History/Social Sciences
L. Literacy Education
M. Mathematics Education
N. World Language
O. Foundations of Education

C I 494. Practice and Theory of Teaching Literature in the Secondary Schools. (Cross-listed with Engl). (3-0) Cr. 3. F.S. *Prereq: Engl 310, 397, 9 other credits in English beyond 250, Psych 333, admission to teacher education program.* Portfolio review. Current theories and practices in the teaching of literature to secondary school students. Integrating literary study and writing. Preparation and selection of materials. Classroom presentation. Unit planning. (Taken concurrently with C I 280, Cr. 2, and Sp Ed 450)

C I 495B. Teaching Speech. (Cross-listed with Sp Cm). (3-0) Cr. 3. F. *Prereq: Sp Cm 313; 9 credits in speech communication; minimum grade point average of 2.5 in speech communication courses.* Problems, methods, and materials related to teaching speech, theatre, and media in secondary schools.

C I 497. Teaching Secondary School Mathematics. (Cross-listed with Math). (3-0) Cr. 3. F. *Prereq: 15 credits in college Mathematics; if in a teacher licensure program, concurrent enrollment in C I 426 or 526.* Theory and methods for teaching Mathematics in grades 7-12. Includes critical examination of instructional strategies, curriculum materials, learning tools, assessment methods, National Standards in Mathematics Education, and equity issues.

C I 498. Methods of Teaching History/Social Sciences. (3-0) Cr. 3. F.S. *Prereq: Concurrent enrollment in 480A; Admission to teacher education and 30 credits in subject-matter field.* Theories and processes of teaching and learning secondary history/social sciences. Emphasis on development and enactment of current methods, assessments, and curriculum materials for providing appropriate learning experiences.

Courses primarily for graduate students, open to qualified undergraduate students

C I 501. Foundations of Digital Learning. (3-0) Cr. 3. F.SS. *Prereq: Graduate classification.* Educational Philosophies and theories of instructional technology. Application of research to the production and use of instructional technology for learning and teaching. Equipment operation.

C I 503. Designing Effective Learning Environments. (3-0) Cr. 3. F. *Prereq: 501.* Introduction to theories and models of instructional design. Design decision-making based on the analysis of performance problems and instructional inputs. Practical experience with the design and development of instructional strategies and evaluation principles.

C I 504. Evaluating Digital Learning Environments. (Cross-listed with HCI). (3-0) Cr. 3. S. *Prereq: 501.* Principles and procedures for analysis, review, and assessment of instructional technology interventions in education and corporate settings. Evaluation methods for planning, organizing, and conducting evaluative studies are applied.

C I 505. Using Technology in Learning and Teaching. (3-0) Cr. 3. F.S.SS. *Prereq: Graduate classification.* Teaching and learning using computers. Selection and evaluation of software and hardware for teaching and learning. Research on computers. Tool software. Telecommunications. Trends in computer-based instruction.

C I 506. Multicultural Foundations of School and Society: Advanced. (3-0) Cr. 3. F.S.SS. *Prereq: 6 graduate credits in education.* Theories, legal bases, and principles of multicultural education. Pluralism and contributing cultures in the United States; presence and contributions of cultural group diversity with implications for educational programs, curriculum development, classroom instruction, materials utilization and development; problems and issues regarding ethnocentrism, prejudice, and discrimination based on race, ethnicity, socioeconomic class, sex/gender, sexual identity, and language in the school environment; curriculum infusion and transformation, multicultural interaction, design and execution of teaching strategies and techniques; inquiry and research on multicultural education issues.

C I 507. Principles and Practices of Distance Learning. (Dual-listed with 407). (2-2) Cr. 3. F.SS. *Prereq: 501, convenient access to the Web.* Review of flexible and distance learning (FDL) cases in a variety of contexts and pedagogic styles, research into relevant topics. Identification of underlying principles and frameworks for best practice in this field. Offered in FDL modes, utilizing telecommunications and the Internet.

C I 508. Algebra in the K-12 Classrooms. (3-0) Cr. 3. F. *Prereq: 448, 497, or graduate Status.* Focus on Algebraic concept explorations and associated procedures. Use of research-based strategies and appropriate technologies to apply fundamental ideas of patterning, coordinate graphing, and relationships among variables into K-12 classrooms. Additional topics facilitate critical examination of K-12 curriculum, pedagogy, and assessment.

C I 509. Geometry in the K-12 Classrooms. (3-0) Cr. 3. S. *Prereq: 448, 497, or graduate Status.* Euclidean and non-Euclidean geometry explorations with a focus on pedagogical issues in the K-12 classroom. Use of research-based strategies and appropriate technologies to teach geometry in K-12 classrooms. Additional topics from discrete Mathematics, history and Philosophy of geometry and fractal geometries.

C I 511. Technology Diffusion, Leadership and Change. (3-0) Cr. 3. S. *Prereq: Admission to graduate study, 501 or equivalent and 505 or equivalent.* Introduction to practices and principles of technology diffusion, leadership and strategic change in education. Frameworks and strategies for professional development and organizational change; current issues such as the digital divide.

C I 512. Research Trends in Digital Learning. (3-0) Cr. 3. F. *Prereq: Admission to graduate study and at least two courses in research and foundations of instructional technology.* Critical review of current research trends to uncover underlying educational technology. Engagement with current projects' techniques and analyses for qualitative and quantitative approaches, including the application of technology for the dissemination of scholarship. Designed as a capstone course to consolidate graduate students' knowledge of current research in curriculum and instructional technology for students in M.S. and Ph.D. programs.

C I 513. Mathematical Problem Solving in K-12 Classrooms. (3-0) Cr. 3. F. *Prereq: 6 credits of Mathematics, 448 or 497 or 597 or permission of instructor.* Strategies for improving problem solving skills across all strands of Mathematics (e.g., geometry, algebra, number theory) will be emphasized. Issues surrounding the appropriate role of problem solving in K-12 Mathematics classrooms will also be discussed, including distinctions among teaching "about," "for," and "through" problem solving.

C I 514. Introduction to the Purposes and Complexities of Science Teaching. (1-2) Cr. 2. SS. *Prereq: Admission to M.A.T. program.* Introduction to critical issues facing science education, science education goals reflecting contemporary purposes of schooling, and how people learn science.

C I 515. Action Research in Education. (3-0) Cr. 3. S. *Prereq: Admission to graduate study, one course in research methods, educational inquiry, statistics, educational psychology, or instructional design.* Philosophy and methods of conducting and communicating action research. Current issues in action research. Use of action research to improve education. Designed primarily for individuals involved in teaching or development of educational materials or student in M.Ed. programs.

C I 516. Antiracist Curriculum Development and Implementation. (2-2) Cr. 3. Alt. S., offered 2011. *Prereq: 9 credits in education.* Introduction to historical, sociological, philosophical and pedagogical foundations of antiracist/multicultural education. Examination of causes of racism, other forms of discrimination, and intergroup conflict from different theoretical perspectives and experiential exercises.

C I 517. Student Teaching. (Dual-listed with 417). Cr. arr. F.S. *Prereq: Full admission to teacher education, approval of coordinator during semester before student teaching.* Supervised student teaching in the liberal arts at the secondary level.
B. Physical Sciences
C. Mathematics
D. Biological Sciences
J. Earth Sciences
M. Science - Basic

C I 518. Science Methods I: A Research-Based Framework for Teaching Science. (Dual-listed with 418). (2-0) Cr. 2. F. *Prereq: 514; concurrent enrollment in 547 and 591D.* Development of a research-based framework for teaching science that includes student goals, congruent student actions, the character and role of science inquiry, teaching behaviors and strategies, contemporary learning theories, and self-evaluation.

C I 519. Secondary Science Methods II. (Dual-listed with 419). (2-0) Cr. 2. S. *Prereq: 418 or 518, concurrent enrollment in 591D.* Advancing a research-based framework for teaching science in a variety of school settings; emphasizing the teacher's role, the development and revision of science curriculum, exceptional learners, content area reading strategies, management strategies, technology, and student assessment.

C I 520. Bilingualism, Bilingual Education, and U.S. Mexican Youth. (Dual-listed with 420). (3-0) Cr. 3. F. *Prereq: 506.* Introduction to research on bilingualism and examination of the social, historical, and political contexts of bilingual education in U.S. schools. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and biculturalism for U.S. Mexican youth.

C I 523. Teaching Mathematics to Struggling Elementary Learners. (3-0) Cr. 3. SS. *Prereq: 438 or 448.* Instructional methods and assessment techniques for elementary students struggling to learn Mathematics. Emphasis on current research and practices for at-risk students and students with disabilities.

C I 524. Design and Development of Media. (2-0) Cr. 2. S. *Prereq: 501; graduate classification.* Principles of the design and production of instructional media; visual development and the creation of various traditional media and emerging technologies. Laboratory experiences in the production of several instructional media.

C I 526. Principles of Secondary Education. (Dual-listed with 426). (3-0) Cr. 3. F.S.SS. *Prereq: 6 credits in education.* The curriculum, human relations, student evaluation, support services, classroom management, organization of schools, legal aspects of schools, professionalism and career planning.

C I 529. Educational Psychology and the Secondary Classroom. (3-0) Cr. 3. SS. *Prereq: Bachelor's degree; admission into a graduate level teacher licensure program.* Analysis of psychological research theory related to learning, cognition, motivation, individual differences, and teaching techniques. Student and classroom assessment to facilitate positive learning outcomes. Adaption and differentiation of instruction to meet individual learners' needs. This course can only be used for teacher licensure programs. It is not acceptable for use in meeting the non-licensure M.Ed., M.S. or Ph.D. requirements.

C I 533. Educational Psychology of Learning, Cognition, and Memory. (Cross-listed with Psych). (3-0) Cr. 3. F. *Prereq: 333 or teacher licensure.* Learning, cognition, and memory in educational/training settings.

C I 541. How People Learn: Implications for Teaching Science. (3-0) Cr. 3. *Prereq: Bachelor's degree.* Current learning theories within science education and their application to science classrooms. Examination of models which assist the implementation of these theories of learning.

C I 546. Advanced Pedagogy in Science Education. (3-0) Cr. 3. S.SS. *Prereq: Bachelor's degree.* Critical examination of pedagogy, emphasizing teacher behaviors and strategies, methods of self-assessment, action research, and current issues and trends in science education.

C I 547. Nature of Science. (Dual-listed with 347). (3-0) Cr. 3. F. *Prereq: Concurrent enrollment in 518 or permission of instructor.* The intersection of issues in the history, philosophy, sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C I 548. Restructuring Science Activities. (3-0) Cr. 3. S.SS. *Prereq: Admission to teacher education or teaching license.* Modification of laboratory activities and other everyday science activities so they are more congruent with how students learn, the nature of science, and the National Science Education Standards.

C I 550. Ethnicity and Learning. (Dual-listed with 450). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification and completion of 506 or permission of instructor.* Examination of cultural relevance in education. Development and application of strategies and techniques for implementing multicultural goals and multiethnic perspectives in PreK-12 school classroom settings.

C I 551. Foundations of Reading and Language Arts. (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Teaching license.* Analyzing, discussing, and researching the theory and practice of current literacy issues.

C I 552. Corrective Reading. (Dual-listed with 452). (3-0) Cr. 3. F.S.SS. *Prereq: 378 or equivalent; undergraduate students must register concurrently for Sp Ed 365, 436; graduate students must have a teaching license.* Identification, analysis, and correction of reading problems in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension.

C I 553. Reading for Adolescents with Mild/Moderate Disabilities. (3-0) Cr. 3. SS. *Prereq: Teaching license.* Instructional strategies for enhancing the comprehension and retention of students with mild/moderate disabilities, in conjunction with content-area reading material.

C I 554. Reading and Responding to Children's Literature. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Senior Status or teaching license.* Research and discussion of issues surrounding the classroom use of literature for children and young adults including censorship, diversity, selection, and the influences of technology.

C I 556. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 456). (3-0) Cr. 3. F.SS. *Prereq: Teaching license.* Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C I 567. Teaching Mathematics to Struggling Secondary Learners. (Cross-listed with Sp Ed). (3-0) Cr. 3. *Prereq: Secondary teaching experience.* Instructional methods and assessment techniques for secondary students struggling to learn Mathematics. Particular emphasis on current research, practices, and trends in mathematics interventions for at-risk students and students with disabilities.

C I 570. Toying with Technology for Practicing Teachers. (Cross-listed with M S E). (2-0) Cr. 2. SS. *Prereq: C I 201 or 202, non-engineering major.* A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on experiences based upon simple systems constructed out of LEGOs and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

C I 578. Pedagogy, Equality of Opportunity, and the Education of Blacks in the United States. (3-0) Cr. 3. *Prereq: Graduate or senior level Status or permission of instructor.* This course takes a nonlinear, reflective view of the historical, social, economic, political, and legal contexts of the education of African Americans in the U.S. Educational theories and Philosophies, Critical Race Theory and Black Feminist Thought form the framework for investigating broad-based, multiple issues of education for African Americans in the U.S. as they are situated in the prevailing dominant views.

C I 588. Supervised Tutoring in Reading. (2-2) Cr. 3. F.S.SS. *Prereq: Graduate Status, teaching license and concurrent enrollment in or completion of one course*

in corrective reading; diagnosis and correction of reading problems. Using formal and informal diagnostic procedures to plan and implement individualized reading instruction. Field experience in tutoring and a related research project.

C I 590. Special Topics. Cr. arr. F.S. *Prereq: 9 graduate credits in education.*
A. Curriculum
B. Instructional Technology
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

C I 591. Supervised Field Experience. (0-2) Cr. arr. F.S.SS. *Prereq: 15 graduate credits in special area.* Supervised on-the-job field experience in special area.
B. World Language Education
C. Elementary Education
D. Secondary Education
F. Multicultural Education

C I 593. Workshops. Cr. arr. F.S. *Prereq: 9 graduate credits in education.*
A. Curriculum
B. Instructional Technology
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

C I 594. Contemporary Curriculum Theory and Principles. (3-0) Cr. 3. F. *Prereq: Graduate standing.* Theoretical and historical perspectives of contemporary curriculum; social, cultural, and epistemological aspects of curriculum theory; political, critical-race, feminist, economic, and postmodernist approaches to understanding curriculum and schooling in the U.S.

C I 595. Teaching Reading in Middle and Secondary Schools. (Dual-listed with 395). (3-0) Cr. 3. F. *Prereq: Graduate Status and teaching license.* Analysis and application of strategies to enhance students' literacy development in middle and secondary school settings. Research paper related to a course topic.

C I 596. Curriculum Problems and Inquiry. (3-0) Cr. 3. S. *Prereq: Graduate standing.* Analysis of contemporary problems of schooling and curriculum; use of qualitative inquiry to study diverse school policies and social problems influencing public education. Emphasis on strategies for teaching for social justice.

C I 597. Teaching Secondary School Mathematics. (3-0) Cr. 3. F. *Prereq: 15 credits in college Mathematics; if in a teacher licensure program, concurrent enrollment in C I 426 or 526.* Theory and methods for teaching Mathematics in grades 7-12. Includes critical examination of instructional strategies, curriculum materials, learning tools, assessment methods, National Standards in Mathematics Education, and equity issues.

C I 599. Creative Component. Cr. arr. F.S.SS. *Prereq: 9 graduate credits in education.*
A. Curriculum
B. Instructional Technology
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

Courses for graduate students

C I 603. Advanced Learning Environments Design. (Cross-listed with HCI). (3-0) Cr. 3. S. *Prereq: 503.* Exploration of advanced aspects of the instructional design process. Application of analysis, design, development and production, evaluation, implementation, and project management principles. Focus on the production and use of instructional technology with an emphasis on the instructional design consulting process. Theory and research in instructional technology provides the foundation for design decisions.

C I 610. Digital Learning in Teacher Education. (2-0) Cr. 2. F. *Prereq: 505.* Research on using technology in teacher education programs. Application examples studied. Field component involving relating material from class to a teacher education situation.

C I 611. Philosophical Foundations of Digital Learning. (3-0) Cr. 3. *Prereq: 12 graduate credits in curriculum and instruction.* Exploration of Philosophies of science that serve as foundations for research and practice in instructional technology, including positivism, post-positivism, interpretivism/constructivism, and critical theory. The roles of language, nature of truth and reality, and acceptable ways of knowing are explored in terms of their implications for instructional technology design, delivery, research, and scholarship.

C I 612. Socio-psychological Foundations of Digital Learning. (3-0) Cr. 3. *Prereq: 12 graduate credits in curriculum and instruction.* Exploration of theories of learning and associated instructional models that are the foundation for research and practice in education and educational technology, including behaviorism, information processing theory, and cognitive science. Emphasis on cognitive and social constructivist paradigms and the creation and use of constructivist learning environments supported by technology.

C I 615. Seminar. (0-2) Cr. 1. F.S. Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research.
A. Curriculum
B. Instructional Technology
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

C I 671. Discourse in Classrooms. (Cross-listed with Ling). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: graduate classification.* Explores both foundational and current literature on discourse in K-12 classrooms; focuses on both discourse as a classroom phenomenon and discourse as an analytic tool for doing research in classrooms; and provides a close look at enacted and hidden curricula through an examination of interactions and communication patterns.

C I 690. Advanced Special Topics. Cr. arr. Repeatable. *Prereq: 9 graduate credits in education.*
A. Curriculum
B. Instructional Technology
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

C I 699. Research. Cr. arr. Repeatable. *Prereq: 9 graduate credits in education.*
A. Curriculum
B. Instructional Technology
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

Historical, Philosophical, and Comparative Studies in Education (H P C)

David Owen, Program Coordinator

This program provides graduate experiences in historical, philosophical, and comparative studies in education. Students develop facility in analyzing educational problems and issues, critiquing policies that affect education in Society, and making connections between educational practice and learning.

Work is offered toward the master of science with thesis or nonthesis option, and the master of education. These degree programs and classes are of benefit to classroom teachers, educational theorists, administrators, university personnel, youth workers, religious educators, and others who seek to understand better the numerous bases of contemporary systems of education. Study in this field also complements work in other areas of specialization in education.

Courses primarily for graduate students, open to qualified undergraduate students

H P C 504. Studies in the Foundations of American Education. (3-0) Cr. 3. F. *Prereq: Admission to graduate licensure program in teacher education or permission of instructor.* An exploration of the social, historical, and Philosophical context of American education today. Emphasis is given to reflection on the varying perspectives on the goals of schooling, roles of teachers, curricular and pedagogical issues, and educational policy and reform proposals. Note: This course does not meet the requirements of the M.Ed., M.S., or Ph.D. core.

H P C 581. Philosophy of Education. (3-0) Cr. 3. SS. *Prereq: Graduate classification.* The bases of American educational theory and practice. Philosophical analysis of the viewpoints on education of selected individuals and groups.

H P C 584. Classics of Educational Philosophy. (3-0) Cr. 3. S. *Prereq: Graduate classification.* Intensive study of influential statements of educational purpose, organization, curriculum, practice, and problems in the development of Western education.

H P C 585. Comparative Education: Traditions. (3-0) Cr. 3. *Prereq: Graduate classification.* Analysis of the cultural traditions of education outside the United States. Emphasis is given to an examination of the principles upon which selected national educational systems have been built. Special attention given to noneuropean traditions.

H P C 588. History of American Education. (3-0) Cr. 3. *Prereq: Graduate classification.* Historical analysis of selected educational policies, such as equal educational opportunity, governance, discipline, and teacher education. Biographies, school records, and government reports are examined. Antecedents to current issues are stressed.

H P C 590. Special Topics. Cr. arr. F.S. *Prereq: 9 graduate credits in education.*
A. History of Education
B. Philosophy of Education
C. Comparative Education

H P C 591. Supervised Field Experience. Cr. arr. *Prereq: 6 graduate credits in special area.* Supervised on-the-job field experience in special areas.

H P C 599. Creative Component. Cr. arr. F.S.

H P C 615. Seminar. (1-3) Cr. arr. Repeatable.
B. Philosophy of Education
C. Comparative Education

H P C 690. Advanced Special Topics. Cr. arr. Repeatable. F.S. Advanced special topics

H P C 699. Research. Cr. arr. Repeatable.

Special Education (Sp Ed)

Courses primarily for undergraduate students

Sp Ed 250. Education of the Exceptional Learner in a Diverse Society. (3-0) Cr. 3. F.S. *Prereq: C I 204.* An overview of students with diverse learning needs. Emphasis on early identification, educational services and strategies in inclusive settings, and preparation for community living in a heterogeneous Society.

Sp Ed 330. Introduction to Instruction for Students with Mild/Moderate Disabilities. (3-0) Cr. 3. F. *Prereq: 250, concurrent enrollment in C I 280I, 377.* Educational services and programming for students with mild/moderate disabilities examined from an historical perspective. Current trends, issues, impact of federal and state laws, and identification procedures. Characteristics of students with mild/moderate disabilities.

Sp Ed 339. Collaborative Partnerships in Special Education. (3-0) Cr. 3. F. *Prereq: Concurrent enrollment in 330.* Collaborative skills used in education of students with mild/moderate disabilities. Includes collaboration between general and special education teachers, parents, paraeducators, and other education professionals and agencies.

Sp Ed 355. Classroom Assessment in Inclusive Primary Settings. (2-0) Cr. 2. F.S. *Prereq: Concurrent enrollment in 455; C I 433, 438, 439, 468G, 468I.* Examination and application of strategies for determining special educational needs, planning and evaluating instructional programs, and monitoring student progress.

Sp Ed 365. Classroom Assessment for Special Education. (3-0) Cr. 3. S. *Prereq: 330. Form*al and informal diagnostic instruments. Determination of special education needs. Planning, adaptation, and formative evaluation of instructional programs for students with mild/moderate disabilities.

Sp Ed 368. Teaching in Inclusive Primary Settings. (1-0) Cr. 1. F.S. *Prereq: Concurrent enrollment in C I 377, 468F.* Federal and state law. Service delivery models. Issues related to providing instruction that meets the needs of diverse learners in inclusive primary settings.

Sp Ed 415. Supervised Student Teaching. Cr. arr. F.S. *Prereq: Full admission to teacher education, senior classification, 355, 455.* Reservation required. Student teaching experience in inclusive primary grade classrooms.

Sp Ed 416. Supervised Student Teaching. Cr. arr. F.S. *Prereq: Full admission to teacher education, senior classification, student in elementary education section. 330, 365, 436, 439, 457; C I 280, 478.* Reservation required.

Sp Ed 436. Instructional Methods for Students with Mild/Moderate Disabilities. (3-0) Cr. 3. S. *Prereq: C I 245, concurrent enrollment in 365.* Evidence-based instructional strategies/techniques in academic areas and materials for individual instruction and classroom management for elementary students with mild/moderate disabilities.

Sp Ed 450. Teaching Secondary Students with Exceptionalities in the General Education Classroom. (2-2) Cr. 3. F.S. Overview of characteristics and needs of exceptional youth and appropriate service delivery options. Legal foundations for special education. Emphasis on co-teaching models, differentiated instruction, accommodations for instruction and assessment, and collaboration among professionals and parents.

Sp Ed 455. Instructional Methods for Inclusive Primary Settings. (2-0) Cr. 2. F.S. *Prereq: Concurrent enrollment in 355; C I 433, 438, 439, 468G, 468I.* Evidence-based instructional strategies and techniques in academic areas that support the learning of students with diverse learning needs. Emphasis on accommodations and alternative teaching strategies to meet individual student needs.

Sp Ed 457. Teaching Exceptional Learners in the General Classroom. (3-0) Cr. 3. F. *Prereq: 250, C I 245.* Evidence-based teaching strategies and instructional accommodations for inclusive education. Emphasis on managing challenging behavior. Nonmajor graduate credit. Nonmajor graduate credit.

Sp Ed 459. Field Experience and Practicum-Students with Mild/Moderate Disabilities. (0-2) Cr. 1. *Prereq: 365, 436, concurrent enrollment in 460.* Observation and involvement with students with mild/moderate disabilities in a resource room program. Satisfactory-fail only.

Sp Ed 460. Special Education Capstone. (1-0) Cr. 1. F. *Prereq: 436, concurrent enrollment in 459.* Discussion and application of evidence-based instructional strategies/techniques in academic and behavioral areas with students who have mild/moderate disabilities. Discussion of issues related to education of students with mild/moderate disabilities.

Sp Ed 490. Independent Study. Cr. arr. F.S. *Prereq: 12 credits in elementary education, permission of department chair.*

Courses primarily for graduate students, open to qualified undergraduate students

Sp Ed 501. Teaching Students with Exceptionalities in General Education. (3-0) Cr. 3. SS. *Prereq: Baccalaureate degree.* Overview of characteristics and needs of exceptional children/youth and appropriate service delivery options. Emphasis on accommodations and modifications for instruction and assessment and collaboration among professionals and parents.

Sp Ed 510. Foundations in Mild/Moderate Disabilities. (3-0) Cr. 3. S. *Prereq: 501 or equivalent.* Historical and legal foundations for special education. Characteristics, prevalence, and etiology of mild/moderate disabilities. Historical and contemporary models of programming for students with disabilities.

Sp Ed 511. Foundations of Behavioral Disorders and Learning Disabilities. (3-0) Cr. 3. S. Study of theory, interventions and special education service delivery models to students with moderate/severe behavior/learning disabilities in the public schools and residential settings.

Sp Ed 515. Assessment of Children and Youth with Disabilities. (3-0) Cr. 3. F. *Prereq: 510 or 511. Form*al and informal methods of assessment for identification/eligibility. IEP development, and progress monitoring. Formative evaluation of academic and behavioral skills, including curriculum-based measurement and functional behavioral assessment.

Sp Ed 517. Research in Special Education. (2-0) Cr. 2. SS. *Prereq: 510, 515.* Critical review of recent literature in education and related behavioral sciences as applied to education of students with disabilities.

Sp Ed 520. Instructional Methods for Mild/Moderate Disabilities. (3-0) Cr. 3. *Prereq: 510, 515.* Evidence-based instructional methods for meeting the academic and behavioral needs of students with mild/moderate disabilities. Includes methods, strategies, and behavior management techniques appropriate for students with mild or moderate disabilities.

Sp Ed 530. Evidence-based Practices in Behavior Disorders. (3-0) Cr. 3. S. *Prereq: 511, 515.* Current research on evidence-based interventions designed to improve the behavior and social skills of students with moderate/severe behavior disorders. Particular emphasis on positive behavioral supports and behavior change strategies.

Sp Ed 540. Evidence-based Practices in Learning Disabilities. (3-0) Cr. 3. S. *Prereq: 511, 515.* Current research on evidence-based interventions designed to improve the academic performance of students with moderate/severe learning disabilities. Particular emphasis on methods for improving reading, written expression, and mathematics, as well as performance in content-area instruction.

Sp Ed 553. Reading for Adolescents with Mild/Moderate Disabilities. (Cross-listed with C I). (3-0) Cr. 3. SS. *Prereq: Teaching license.* Instructional strategies for enhancing the comprehension and retention of students with mild/moderate disabilities, in conjunction with content-area reading material.

Sp Ed 555. Career Education and Transition for Youth with Disabilities. (2-0) Cr. 2. SS. *Prereq: 510 or 511.* Examination of the academic, personal, social, employability, and daily living skills needed for a satisfactory adult life. Exploration of curricula, programs, and services to meet these needs.

Sp Ed 560. Classroom Management/Behavioral Support. (3-0) Cr. 3. F. *Prereq: Teaching license.* Emphasis on positive behavioral supports and understanding behavior and its context through a functional behavioral approach. Design and development of carefully planned behavioral intervention programs for groups and individual students in general and special education settings.

Sp Ed 564. Collaborative Consultation. (3-0) Cr. 3. F. *Prereq: 510, 515, 520 or 530 or 540.* Models of consultation. Characteristics and methods to promote effective collaboration with families, paraprofessionals, other school personnel, and representatives of other agencies. Includes specific attention to IEP development as a collaborative process.

Sp Ed 565. Role of the Consultant. (1-0) Cr. 1. *Prereq: 564.* Explore role of the educational consultant in different settings (State department, area education agency, school district, private). Examine roles in relationship to models (mental health, collaborative, organization).

Sp Ed 567. Teaching Mathematics to Struggling Secondary Learners. (Cross-listed with C I). (3-0) Cr. 3. *Prereq: Secondary teaching experience.* Instructional methods and assessment techniques for secondary students struggling to learn mathematics. Particular emphasis on current research, practices, and trends in mathematics interventions for at-risk students and students with disabilities.

Sp Ed 570. Systems-Level Services for Youth with Behavioral and Learning Disabilities. (3-0) Cr. 3. SS. *Prereq: 511.* Overview of systems (education, juvenile justice, mental health, families, communities) that serve students with special education needs. Emphasis on how these systems work to provide needed programs and services for youth with behavioral and learning disabilities.

Sp Ed 590. Special Topics. Cr. arr. F.S. *Prereq: 15 credits in education, permission of department chair.*

Sp Ed 591. Supervised Field Experience. (0-2) Cr. arr. F.S. *Prereq: 15 graduate credits in special area, admission to the graduate program in special education.* Supervised on-the-job field experience in special areas.
G. Mild/Moderate Disabilities, K-6;
H. Mild/Moderate Disabilities, 7-12;
K. Behavior Disorders/Learning Disabilities, K-12

Sp Ed 599. Creative Component. Cr. arr. F.S.SS. *Prereq: 15 credits in education.*

Courses for graduate students

Sp Ed 615. Seminar. (1-0) Cr. 1. Repeatable. Selected topics in special education. Analysis of current special education research potential. Evaluation of impact upon the profession. Implications for additional research.

Sp Ed 699. Research. Cr. arr. *Prereq: 15 credits in education.*

Design Studies

(Interdepartmental Undergraduate Program)

Kate Schwennsen, Program Coordinator

The Design Studies program brings together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design fields. Students in any college may elect to take a minor in Design Studies.

Core Design Program

Several Design Studies courses are part of the Core Design Program, which is required for all undergraduate students in the College of Design.

Minor—Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Additional information is available in the Student Programs and Services Office, 297 College of Design.

Minor—Digital Media

To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open only to undergraduate students in the College of Design.

Detailed information is available in the Student Programs and Services Office, 297 College of Design.

Courses primarily for undergraduate students

Dsn S 102. Design Studio I. (1-6) Cr. 4. F.S. A core design studio course exploring the interaction of two-and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, contemporary design practices and disciplines in their cultural contexts.

Dsn S 110. Design Exchange Seminar I. (0-2) Cr. 1. F. *Prereq: Member of Design Exchange Learning Community.* Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Satisfactory-fail only.

Dsn S 111. Design Exchange Seminar II. (0-2) Cr. 1. S. *Prereq: Member of the Design Exchange Learning Community.* Development and clarification of career and academic plans. Satisfactory-fail only.

Dsn S 115. Design Collaborative Seminar. (1-0) Cr. 0.5. *Prereq: Member of Design Collaborative Learning Community.* Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Satisfactory-fail only.

Dsn S 131. Design Representation. (1-6) Cr. 4. F.S. An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

Dsn S 181. Origins and Evolution of Modern Design. (Cross-listed with Art H). (3-0) Cr. 3. F.S. History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

Dsn S 183. Design Cultures. (3-0) Cr. 3. F.S. A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary Society. Design processes and design works are presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

Dsn S 221. History of Western Architecture I. (Cross-listed with Arch). (3-0) Cr. 3. F. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Ancient through Renaissance.

Dsn S 222. History of Western Architecture II. (Cross-listed with Arch). (3-0) Cr. 3. S. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.

Dsn S 270. Forces Shaping Our Metropolitan Environment. (Cross-listed with C R P). (3-0) Cr. 3. S. Must be taken prior to completing 9 credits in C R P. Introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

Dsn S 274. The Social and Behavioral Landscape. (Cross-listed with L A). (3-0) Cr. 3. S. Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips.

Dsn S 280. History of Art I. (Cross-listed with Art H). (3-0) Cr. 3. F. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. H. Honors. Cr. 4.

Dsn S 281. History of Art II. (Cross-listed with Art H). (3-0) Cr. 3. S. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. H. Honors. Cr. 4.

Dsn S 291. World Cities and Globalization. (Cross-listed with C R P). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Sophomore classification.* World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.

Dsn S 292. Introduction to Visual Culture Studies. (Cross-listed with ART). (3-0) Cr. 3. F.S. *Prereq: Open to all majors.* An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.

Dsn S 293. Environmental Planning. (Cross-listed with C R P, Env S). (3-0) Cr. 3. F. *Prereq: Sophomore classification.* Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

Dsn S 301. Study Abroad Preparation Seminar. (1-0) Cr. 1. Repeatable. F.S. Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 9 or more credits. Satisfactory-fail only.

Dsn S 302. Design Leadership Seminar. (1-2) Cr. 2. Repeatable. *Prereq: Selection as a peer mentor for the Core Design program. For students* serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Satisfactory-fail only.

Dsn S 303. Design Ambassadors. (1-2) Cr. arr. Repeatable. *Prereq: Admittance into one of the professional programs in the College of Design.* Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Satisfactory-fail only.

Dsn S 310. Practical Experience. Cr. R. *Prereq: Permission of adviser or Coordinator of Design Studies.* Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

Dsn S 320. Urban form. (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: C R P 253 or 270, or permission of instructor.* Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

Dsn S 351. Solar Home Design. (Cross-listed with Arch). (3-0) Cr. 3. S. *Prereq: Arch 202.* Architectural design and technical analysis of residential structures with emphasis on energy construction and solar energy utilization.

Dsn S 371. Landscape Architectural History: 1750 to Present. (Cross-listed with L A). (3-0) Cr. 3. S. Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

Dsn S 373. Landscape Architectural History: Pre-history to 1750. (Cross-listed with L A). (3-0) Cr. 3. F. Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

Dsn S 382. Art and Architecture of Asia. (Dual-listed with 582). (Cross-listed with Art H). (3-0) Cr. 3. Introduction to the history of art and architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition. Museum field trip expenses to be paid by students. Nonmajor graduate credit.

Dsn S 383. Greek and Roman Art. (Dual-listed with 583). (Cross-listed with Art H, Cl St). (3-0) Cr. 3. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

Dsn S 385. Renaissance Art. (Dual-listed with 585). (Cross-listed with Art H). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts;

thirteenth through sixteenth centuries. Nonmajor graduate credit.

Dsn S 394. Women/Gender in Art. (Dual-listed with 594). (Cross-listed with Art H, W S). (3-0) Cr. 3. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture. Nonmajor graduate credit.

Dsn S 397. Internship Search Seminar. (1-0) Cr. 1. F. *Prereq: Sophomore classification or above in one of the College of Design degree programs.* A structured environment to set realistic learning goals, research potential sites, develop a strategy, develop essential job search materials and skills for finding an internship. Successfully obtaining an internship either for credit or non credit is encouraged but not required. Satisfactory-fail only.

Dsn S 404. Advanced Landscape Architectural Design. (Cross-listed with L A). (1-15) Cr. 6. Repeatable. S. *Prereq: L A 401.* Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.

Dsn S 417. Urban Revitalization. (Dual-listed with 517). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: C R P 253 or 270.* Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

Dsn S 425. Growth Management. (Dual-listed with 525). (Cross-listed with C R P). (3-0) Cr. 3. F. *Prereq: Junior classification.* Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

Dsn S 426. Topics in Native American Architecture. (Cross-listed with Am In, Arch). (3-0) Cr. 3. Repeatable. F.S. *Prereq: Junior classification.* History, theory, and principles of Native American/American Indian Architecture, landscape Architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Dsn S 429. International Planning. (Dual-listed with 529). (Cross-listed with C R P). (3-0) Cr. 3. S. *Prereq: Junior classification.* Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

Dsn S 442. Site Development. (Dual-listed with 542). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: C R P 253, 272.* Introduction to site analysis using landscape Architecture and environmental principles, drawing also on basic engineering concepts. Work will evolve from analysis to land development design.

Dsn S 446. Interdisciplinary Design Studio. (Dual-listed with 546). (0-12) Cr. arr. Repeatable. *Prereq: Junior classification in a curriculum in the College of Design and permission of instructor.* Advanced interdisciplinary design projects.

Dsn S 478. Topical Studies in Landscape Architecture. (Dual-listed with 578). (Cross-listed with L A). Cr. arr. Repeatable. F.S.SS. *Prereq: L A 371 or senior classification or graduate standing.* Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
A. Landscape Design
B. Planting Design
C. Construction
D. History, Theory, Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social, Behavioral
N. Natural Resources

Dsn S 481. Art and Architecture of India. (Dual-listed with 581). (Cross-listed with Art H). (3-0) Cr. 3. Survey of Indian-style art and Architecture through history. Examine how art and Architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically. Nonmajor graduate credit.

Dsn S 484. Sustainable Communities. (Dual-listed with 584). (Cross-listed with C R P, Env S). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Senior classification.* The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

Dsn S 487. Nineteenth Century Art. (Dual-listed with 587). (Cross-listed with Art H). (3-0) Cr. 3. European and American art and Architecture from 1780 to 1900 focusing on the major movements of western Europe: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Nonmajor graduate credit.

Dsn S 488. Modern and Contemporary Art and Theory I. (Dual-listed with 588). (Cross-listed with Art H). (3-0) Cr. 3. F. Visual arts and critical theory from Impressionism to Abstract Expressionism. Nonmajor graduate credit.

Dsn S 489. Sequential Art. (Dual-listed with 589). (Cross-listed with Art H). (3-0) Cr. 3. F.SS. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Dsn S 490. Independent Study. Cr. arr. Repeatable. F.S.SS. *Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment.* Independent investigation of a topic of special interest to the student.
A. History
B. Technology
C. Communications
D. Design
E. Entrepreneurship
F. Social/Behavioral
H. Honors

Dsn S 491. Environmental Law and Planning. (Dual-listed with 591). (Cross-listed with C R P, Env S). (3-0) Cr. 3. S. *Prereq: 6 credits in natural sciences.* Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Dsn S 492. Special Topics: Italian Culture. Cr. 1. Repeatable. F.S.SS. *Prereq: Enrollment in the College of Design Rome Study Abroad Program or in Dsn S 301.* Introduction to Italian contemporary culture, including language, fashion, politics, media, and social mores. Taught the semester prior and during study in Rome for students in the College of Design Rome program.

Dsn S 495. Modern and Contemporary Art and Theory II. (Dual-listed with 595). (Cross-listed with Art H). (3-0) Cr. 3. Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.

Dsn S 496. History of Photography. (Dual-listed with 596). (Cross-listed with Art H). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

Dsn S 498. Selected Topics in Art History. (Dual-listed with 598). (Cross-listed with Art H). (3-0) Cr. 3. Repeatable. Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

Dsn S 504. Why Change Anything?. (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate classification.* Introduction to a range of approaches to justifying innovations, changes, and interventions proposed by designers, planners, and artists. Reasons for change and their bases in social, philosophical, and design reasoning; and their usefulness in justifying change to different audiences. Investigation of fallacies, ideologies, and contemporary problems in justifications.

Dsn S 517. Urban Revitalization. (Dual-listed with 417). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Graduate Classification.* Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

Dsn S 525. Growth Management. (Dual-listed with 425). (Cross-listed with C R P). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Graduate classification.* Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

Dsn S 528. Topical Studies in Architecture. (Cross-listed with Arch). (3-0) Cr. arr. Repeatable. F.S.SS. *Prereq: Arch 221, 222 or senior classification or graduate standing.*
A. Studies in Architecture and Culture
B. Technology
C. Communications
D. Design
E. Practice

Dsn S 529. International Planning. (Dual-listed with 429). (Cross-listed with C R P). (3-0) Cr. 3. S. *Prereq: Graduate classification.* Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

Dsn S 542. Site Development. (Dual-listed with 442). (Cross-listed with C R P). (3-0) Cr. 3. S. *Prereq: Graduate classification.* Introduction to site analysis using landscape Architecture and environmental principles, but drawing also on basic engineering concepts. Work will evolve from analysis to land development design based on that analysis.

Dsn S 546. Interdisciplinary Design Studio. (Dual-listed with 446). (0-12) Cr. arr. Repeatable. *Prereq: Admission to a graduate program in the College of Design and permission of instructor.* Advanced interdisciplinary design projects.

Dsn S 558. Sustainability and Green Architecture. (Cross-listed with Arch). (3-0) Cr. 3. F. *Prereq: Graduate standing.* Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, Architects and examples of buildings with green or sustainable designations.

Dsn S 567. Preservation, Restoration, and Rehabilitation. (Cross-listed with Arch). (3-0) Cr. 3. S. *Prereq: Senior classification.* Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the

National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dsn S 571. Design for All People. (Cross-listed with Arch, Geron). (3-0) Cr. 3. S. *Prereq: Senior classification or graduate standing.* Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dsn S 575. Contemporary Urban Design Theory. (Cross-listed with Arch). (3-0) Cr. 3. S. *Prereq: Senior classification or graduate standing.* Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dsn S 578. Topical Studies in Landscape Architecture. (Dual-listed with 478). (Cross-listed with L A). (3-0) Cr. arr. Repeatable. F.S.SS. *Prereq: Senior Classification or graduate standing.* Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
A. Landscape Design
B. Planting Design
C. Construction
D. History, Theory, Criticism
E. Landscape Planning
F. Urban Design

Dsn S 581. Art and Architecture of India. (Dual-listed with 481). (Cross-listed with Art H). (3-0) Cr. 3. F. *Prereq: Graduate classification, permission of instructor.* Survey of Indian-style art and Architecture through history. Examine how art and Architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically.

Dsn S 582. Art and Architecture of Asia. (Dual-listed with 382). (Cross-listed with Art H). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Introduction to the history of art and Architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition. Museum field trip expenses to be paid by students.

Dsn S 583. Greek and Roman Art. (Dual-listed with 383). (Cross-listed with Art H). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

Dsn S 584. Sustainable Communities. (Dual-listed with 484). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Graduate classification.* The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

Dsn S 585. Renaissance Art. (Dual-listed with 385). (Cross-listed with Art H). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* European art including painting, sculpture, Architecture, and crafts; thirteenth through sixteenth centuries.

Dsn S 587. Nineteenth Century Art. (Dual-listed with 487). (Cross-listed with Art H). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* European and American art and Architecture from 1780 to 1900, focusing on the major movements of western Europe: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

Dsn S 588. Modern and Contemporary Art and Theory I. (Dual-listed with 488). (Cross-listed with Art H). (3-0) Cr. 3. F. *Prereq: Graduate classification, permission of instructor.* Visual arts and critical theory from Impressionism to Abstract Expressionism.

Dsn S 589. Sequential Art. (Dual-listed with 489). (Cross-listed with Art H). (3-0) Cr. 3. F.SS. *Prereq: Graduate classification, permission of instructor.* An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Dsn S 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment.* Independent investigation of a topic of special interest to the student.

Dsn S 591. Environmental Law and Planning. (Dual-listed with 491). (Cross-listed with C R P, L A). (3-0) Cr. 3. S. *Prereq: Graduate classification.* Environmental law and policy as applied in planning at the local and State levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Dsn S 594. Women/Gender in Art. (Dual-listed with 394). (Cross-listed with Art H, W S). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Dsn S 595. Modern and Contemporary Art and Theory II. (Dual-listed with 495). (Cross-listed with Art H). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Visual arts and critical theory from Abstract Expressionism to the present.

Dsn S 596. History of Photography. (Dual-listed with 496). (Cross-listed with Art H). (3-0) Cr. 3. *Prereq: Graduate classification, permission of instructor.* Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

Dsn S 598. Selected Topics in Art History. (Dual-listed with 498). (Cross-listed with Art H). (3-0) Cr. 3. Repeatable. *Prereq: Graduate classification, permission of instructor.* Specialized study in the history or criticism of art and/or design.

Dietetics

(Interinstitution Graduate program)

Participating faculty:
Iowa State University:

Colorado State University: Mary Harris

Kansas State University: Deborah D. Canter

Michigan State University: Shoerr

Montana State University: Christina Campbell

North Dakota State University: Ardith Brunt

Oklahoma State University: Nancy Betts

South Dakota State University: Kendra Kattelmann

University of Kansas Medical Center: Linda Griffith

University of Nebraska: Marilyn Schnepf

"Dietetics" is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at tht home institution, the student takes courses from each of the ten institutions: Iowa State University, Colorado State University, Kansas State University,Michigan State University, Montana State University, North Dakota State University, Oklahoma State University, South Dakota State University: Kendra Kattelman, University of Kansas Medical Center, and University of Nebraska.

At Iowa State University, Dietetics is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-Diet) that consists of 36 credits. This is a non-thesis option and a special project or creative component is required. Students typically complete the program in 6-8 semesters while employed full-time. Admission is limited to those who are Registered Dietitians or Registration-eligible Dietitians. A computer with minimum specifications, web access, and an email address are required for completing the program.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See. Graduate College section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36 credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/ business management. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retool for new career opportunities in dietetics practice.

Diet 511. Research Methods. (3-0) Cr. 3. F. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of Diet 511 or FCEdS 511 may count toward graduation.

Diet 530. Nutrition in Wellness. (3-0) Cr. 3. SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only.

Diet 532. Maternal and Child Nutrition. (3-0) Cr. 3. SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

Diet 534. Nutrition Education in the Community. (3-0) Cr. 3. SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. www only.

Diet 538. Nutrition: A Focus on Life Stages. (3-0) Cr. 3. SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.

Diet 540. Nutrition and Physical Activity in Aging. (Cross-listed with Geron). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

Diet 544. Pediatric Clinical Nutrition. (3-0) Cr. 3. F. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ Systems. www only.

Diet 546. Phytochemicals. (3-0) Cr. 3. F. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. www only.

Diet 548. Professional Development Assessment. (Cross-listed with FS HN). (1-0) Cr. 1. F.S.SS. *Prereq: Enrollment in GPIDEA MFCS in Dietetics.* Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Satisfactory-fail only.

Diet 550. Finance and Cost Controls. (3-0) Cr. 3. F. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Overview of the fundamental knowledge of hospitality managerial accounting, cost controls, and financial management. Important topics include financial statement analysis, cost concepts, cost-volume-profit analysis, calculating and controlling food and beverage costs, pricing, and capital budgeting. www only.

Diet 554. Statistics. (3-0) Cr. 3. S.SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. www only. Only one of Diet 554 or Stat 401, 495, 542 may count toward graduation.

Diet 556. Advanced Nutrition: Micronutrients. (3-0) Cr. 3. S. *Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics.* Integration of the molecular, cellular and physiological aspects of vitamins and minerals in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients and non-nutrient components. www only. Only one of Diet 556 or NutrS 502 may count toward graduation.

Diet 558. Advanced Nutrition: Macronutrients. (3-0) Cr. 3. F. *Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics.* Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. www only. Only one of Diet 558 or NutrS 501 may count toward graduation.

Diet 560. Medical Nutrition and Disease. (3-0) Cr. 3. F.S.SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. www only. Only two of Diet 560 or NutrS 561, 564 may count toward graduation.

Diet 565. Malnutrition in Low-Income Countries. (3-0) Cr. 3. SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. www only.

Diet 566. Nutrition Counseling and Education Methods. (2-2) Cr. 3. F.S. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Dual listed with FS HN 466. Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. www only.

Diet 567. Nutrition for Dietitians. (Cross-listed with FS HN). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: 360; BBMB 301, undergraduate course in physiology; enrollment in GP-IDEA MFCS in Dietetics.* Study of the current scientific literature to evaluate current trends and issues in nutrition science and Dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health. www only.

Diet 568. Entrepreneurship in Dietetics. (3-0) Cr. 3. F. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Definition and discussion of entrepreneurship and its importance to economic and business environment. www only.

Diet 570. Nutrition and Human Performance. (3-0) Cr. 3. S. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. www only.

Diet 572. Environmental Scanning and Analysis of Current Issues in Dietetics. (3-0) Cr. 3. S. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Overview of current topics, issues, and trends in Dietetics practice. www only.

Diet 573. Administration of Health Care Organizations. (3-0) Cr. 3. SS. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* A comprehensive review of today's health care institutions and their response to the economics, social, ethical, political, legal, technological, and ecological environments. www only.

Diet 595. Proposal and Grant Writing for the Working Professional. (Cross-listed with FS HN). (1-0) Cr. 1. Alt. F., offered 2009. *Prereq: enrollment in GP-IDEA MFCS in Dietetics.* Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Designed for the working professional. www only. Satisfactory-fail only.

Ecology and Evolutionary Biology

www.grad-college.iastate.edu/EEB/

(Interdepartmental Graduate Major)

Supervisory Committee: G.Courtney, Chair; A. Bronikowski; J. Dekker; J. Downing; J. Nason; D. Otis

The ecology and evolutionary biology (EEB) interdepartmental major is offered through a faculty housed in ten departments of the university. Faculty from the departments of Agronomy, Anthropology; Ecology, Evolution and Organismal Biology; Entomology; Geological and Atmospheric Sciences; Horticulture; Mathematics; Natural Resource Ecology and Management; Plant Pathology; and Statistics cooperate to offer courses and research opportunities leading to the M.S. and Ph.D. degrees with a major in ecology and evolutionary biology.

Applicants should have completed an undergraduate or master of science or arts degree in one of the biological, physical, or Mathematical sciences. Applicants also should have taken undergraduate courses in both basic ecology and evolution.

The EEB major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species.

Cooperating departments offer courses and research opportunities in population, community, and ecosystems ecology; landscape ecology, modeling, and spatial dynamics; systematics, biodiversity, and biogeography; physiological and behavioral ecology; conservation and restoration ecology; agroecology; natural resources ecology and management; evolutionary ecology; population, quantitative and evolutionary genetics; and environmental Statistics, stochastic modeling, and quantitative ecology and evolution. In addition, interdisciplinary courses in ecology and evolution are offered, including a special topics course, a seminar, and an extended field trip.

Students majoring in EEB may prepare themselves for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. Graduates have a broad understanding of ecology and evolutionary biology, experience designing and conducting research, writing grant proposals, and communicating effectively with scientific colleagues at meetings and through publications. All graduates become aware of Societal and ethical issues that surround the discipline.

Information on application procedures, research interests of the faculty, and specific requirements of the major may be obtained from the EEB web site www.grad-college.iastate.edu/EEB/, or by contacting eeboffice@iastate.edu.

Courses for graduate students

EEB 511. Conceptual Foundations in Ecology and Evolutionary Biology. (3-2) Cr. 4. F. *Prereq: Graduate classification.* Introduction to key figures and ideas that have shaped the development of ecology and evolutionary biology. Covers major developments in ecology and evolutionary biology at five levels of biological organization: Genome, Organism, Population, Community, and Ecosystem. Impacts of these developments on current approaches to investigation and argument formulation. Effects of technological advances on the direction of scientific investigations. Introduction to analytical skills important for critical thinking in ecology and evolutionary biology and the impact of accepted lines of scientific reasoning on the objectives and conduct of research, such as explanation and prediction, design of studies as experimentation, and structured or unstructured observation.

EEB 585. Extended Field Trip. (0-6) Cr. 2. Repeatable. S. *Prereq: Graduate classification.* Annual field trip to a region of North America to study the major terrestrial and aquatic ecosystem types of the region. Report required.

EEB 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification and permission of instructor. For students* wishing to conduct in-depth study of a particular topic in ecology and evolutionary biology.

EEB 698. Seminar. (1-0) Cr. 1. Repeatable. F.S. Reports and discussion of recent research and literature.

EEB 699. Research. Cr. arr. Repeatable. F.S.SS. Thesis and dissertation research.

Courses Offered by the Organization for Tropical Studies

ISU graduate students can take courses through the widely recognized Organization for Tropical Studies (OTS) at field sites in Central and South America. Students register for OTS courses and upon successful completion, receive credit from University of Costa Rica which transfers as either OTS 510 or OTS 515. For further information about OTS courses, see www.ots.duke.edu.

For information regarding OTS course offerings, please contact the EEB Program Office at eeboffice@iastate.edu.

OTS 510. Tropical Biology: An Ecological Approach. Cr. 8. This course is designed for students in the early stages of graduate study in biology or a related field, with the goal of training graduate students in research methods by providing intensive field experience in diverse tropical ecosystems.

OTS 515. Topics in Tropical Biology. Cr. 1-8. This course is designated for students enrolled in graduate course offerings through OTS (excluding OTS 510). Examples of graduate courses offered by OTS include Tropical Plant Systematics, Tropical Ecology and Conservation, Molecular Methods in Tropical Ecology, and Tropical Agroecology.

Ecology, Evolution, and Organismal Biology

www.eeob.iastate.edu

Jonathan Wendel, Chair of Department

Distinguished Professors (Emeritus): Tiffany, Ulmer

University Professor: Horner

Professors: Ackerman, L. Clark, W. Clark, Courtney, Danielson, Debinski, Downing, Janzen, Nason, Van der valk, Vleck, Wendel

Professors (Emeritus): Brown, Buttrey, D. Farrar, Jeska, Lersten, Mutchmor, Redmond

Professor (Collaborator): Otis

Associate Professors: Adams, Colbert, Crumpton, Jurik, Moloney, Raich, Wallace, Wilsey

Associate Professors (Emeritus): E. Farrar, Shaw

Associate Professors (Collaborators): Newton, Rosburg

Assistant Professors: Bronikowski, Harpole, Hofmockel, Kelly, Lavrov, Serb, Valenzuela-Castro

Assistant Professors (Adjunct): Bowen, B. Pleasants, J. Pleasants, Roe

Assistant Professors (Collaborators): Koford, Pierce

Lecturers: Folinsbee, Spalding

Undergraduate Study

Within the Biological Sciences, studies of ecology, evolution, and organismal biology are essential in understanding the complex relationships of life on Planet Earth. Ecology focuses on the interactions among organisms as well as the interactions between organisms and their physical environments. Evolutionary theory addresses the origins and interrelationships of species. Organismal biology studies both the diversity of biological organisms and the structure and function of individual organisms.

The EEOB Department offers several undergraduate majors with other departments. Students interested in the areas of ecology, evolution, and organismal biology should major in Biology, Environmental Science, or Genetics. The Biology Major is administered and offered jointly by the EEOB and GDCB departments. The faculty of EEOB, together with those in GDCB and BBMB, administer and offer the Genetics Major. Faculty in EEOB, in cooperation with faculty from other departments on campus, administer and offer the Environmental Science Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. Faculty in the EEOB Department also teach undergraduate courses at Iowa Lakeside Laboratory (see the I*owa Lakeside Laboratory* listing).

The Biology Major, the Environmental Science Major, and the Genetics Major prepare students for a wide range of careers in biological sciences. Some of these careers include conservation of natural resources and biodiversity, human and veterinary medicine, and life science education. These majors are also excellent preparation for graduate study in systematics, ecology, biological diversity, physiology, and related fields. Faculty members in EEOB contribute to the undergraduate courses listed below. The titles and descriptions of these courses are in the Biology section of the catalog.

Biol 101, 110, 111, 155, 173, 204, 211, 211=-L, 212, 212L, 255, 255L, 256, 256L, 258, 265, 307, 312, 313, 313L, 315, 335, 336, 351, 352, 353, 354, 355, 356, 364, 365, 366, 371, 381, 382, 393, 394, 434, 439, 454, 455, 456, 457, 458, 459, 462, 465, 471, 472, 474, 476, 483, 486, 486L, 487, 488, 489, 490, 491, 494, 495, and 498.

Graduate Study

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. EEOB graduate students major in one of several interdepartmental majors including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Environmental Science, Genetics, Interdisciplinary Graduate Studies, Neuroscience, and Toxicology. The EEOB faculty members are active in the interdepartmental graduate majors and teach a wide range of graduate courses. Faculty research programs cover a wide range of specializations including physiology and physiological ecology; Microbiology; animal behavior; evolutionary genetics of plants and animals; modeling of evolutionary and ecological processes; plant and animal systematics; neurobiology; developmental biology; aquatic and wetland ecology; functional, population, community, landscape, and ecosystem ecology; and conservation biology. For further information on faculty research interests check the EEOB web site (www.eeob.iastate.edu). Some EEOB faculty teach graduate courses at Iowa Lakeside Laboratory. Field Station courses are also available through the Gulf Coast Marine Laboratory and the Organization for Tropical Studies (see the *Biology* listing).

Prospective graduate students need a sound background in the physical and biological sciences, as well as in mathematics and English. Interested students should check the Graduate Program link from the EEOB web site for specific admission procedures and updates. The department and majors require submission of Graduate Record Examination (GRE) aptitude test scores. Subject area GRE scores are recommended. International students whose native language is other than English must also submit TOEFL or IELTS scores with their application.

Students who are enrolled in the interdepartmental graduate majors with EEOB affiliation are required to participate in departmental seminars, to participate in research activities, and to show adequate progress and professional development while pursuing their degree. For both the M.S. and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. Requirements and guidelines for study are provided by the Graduate College, the EEOB faculty, and the individual student's major professor and Program of Study Committee. General information about graduate study requirements can be found at the web site for the Graduate College and requirements for the interdepartmental majors can be found by following the links from the EEOB web site above. Although not a formal requirement, the EEOB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Courses primarily for graduate students, open to qualified undergraduate students

EEOB 501l. Freshwater Algae. (Cross-listed with Ia LL). Cr. 4. SS. Structure and taxonomy of freshwater algae based on field collected material; emphasis on genus-level identifications, habitats visited include lakes, fens, streams, and rivers; algal ecology.

EEOB 507. Advanced Animal Behavior. (3-0) Cr. 3. S. *Prereq: Graduate standing, Biol 354, or permission of instructor.* Analysis of current research in animal behavior. Topics covered may include behavioral ecology, mechanisms of behavior, evolution of behavior, applications of animal behavior to conservation biology, and applications of animal behavior to wild animals in captivity.

EEOB 514. Evolutionary Ecology. (3-0) Cr. 3. F. *Prereq: 589, Biol 315; graduate standing.* Evolution of ecological adaptations at the individual, population, community and landscape levels. Emphasis is on evolutionary mechanisms and adaptive strategies; units and mechanisms of evolution, life history strategies, species interactions and organization of communities, behavior, and patterns of distribution, speciation and macroevolution.

EEOB 531. Conservation Biology. (Cross-listed with A Ecl). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Biol 312; Biol 313 or graduate standing.* Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

EEOB 531l. Conservation Biology. (Cross-listed with Ia LL, A Ecl). Cr. 4. Alt. SS., offered 2010. *Prereq: Ia LL 312l.* Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

EEOB 534. General and Comparative Endocrinology. (3-3) Cr. arr. S. *Prereq: Biol 314.* Dual-listed with Biol 434. Graduate study in conjunction with Biol 434. Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones. Laboratory techniques for studying hormonal phenomena.

EEOB 535. Restoration Ecology. (Cross-listed with EnSci, NREM). (2-3) Cr. 3. F. *Prereq: Biol 366 or 474 or graduate standing.* Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

EEOB 535l. Restoration Ecology. (Cross-listed with Ia LL, A Ecl, EnSci). Cr. 4. Alt. SS., offered 2010. *Prereq: A course in ecology.* Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

EEOB 537. Plant Stress Biology. (Cross-listed with Hort, Agron). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Biol 330A or equivalent and BBMB 404-405.* Physiology and molecular biology of plant responses to environmental stress. Emphasis on the role of hormones and hormone interactions in governing stress responses. Lectures are prepared from journal papers that elucidate key mechanisms controlling responses to drought, flooding, salt, nutrient deficiencies, freezing, pathogens and herbivores. Plants studied include genetic model systems and crops of Horticultural and Agronomic value.

EEOB 539. Environmental Physiology. (3-3) Cr. arr. Alt. S., offered 2010. *Prereq: Biol 335 or A Ecl 311, physics recommended.* Dual-listed with Biol 439. Graduate study in conjunction with Biol 439. Physiological adaptations to the environment with emphasis on vertebrates.

EEOB 542. Introduction to Molecular Biology Techniques. (Cross-listed with GDCB, BBMB, BCB, B M S, FS HN, Hort, NutrS, VDPAM, NREM, V MPM). Cr. 1. Repeatable. F.S.SS. *Prereq: Graduate classification.* Workshops in basic molecular biology techniques and related procedures. Satisfactory-fail only.
A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.SS.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonol antibody production. (S.SS.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

EEOB 552. Pteridology. (1-3) Cr. 2. *Prereq: 10 credits in biological sciences.* Morphology, taxonomy, and ecology of the lower vascular plants, with emphasis on ferns.

EEOB 553. Agrostology. (2-3) Cr. 3. Alt. F., offered 2010. *Prereq: Biol 366.* Structure, identification, classification, phylogeny, and economic aspects of grasses and related families.

EEOB 555. Bryophyte and Lichen Biodiversity. (Dual-listed with Biol 455.) Cr. 3. Prereq: Biol 212, Biol 212L. Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning. Nonmajor graduate credit.

EEOB 557. Herpetology. (Cross-listed with A Ecl). (2-3) Cr. 3. F. *Prereq: A Ecl 365, Biol 351.* Dual-listed with Biol 457. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

EEOB 558. Ornithology. (Cross-listed with A Ecl). (2-3) Cr. 3. S. *Prereq: A Ecl 365 or Biol 351.* Dual-listed with Biol 458. Biology, ecology, evolution, and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

EEOB 559. Mammalogy. (Cross-listed with A Ecl). (2-3) Cr. 3. S. *Prereq: Biol 351 or A Ecl 365.* Dual-listed with Biol 459. Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

EEOB 560. Resource Ecology. (2-3) Cr. 3. Alt. S., offered 2010. *Prereq: Biol 212, 212L, 312; Stat 101 or 104 or graduate standing.* Ecological and economical management of sustainable biological resources. Unifying current management concepts and models in wildlife, fisheries, water quality, forestry, recreation, and agriculture. Research problems.

EEOB 561. Plant Diversity and Evolution. (2-6) Cr. 4. *Prereq: 10 credits in biological sciences.* Current concepts of plant phylogeny from the origin of land plants through the origin of angiosperms, with emphasis on morphology, reproduction and evolutionary trends in bryophytes, pteridophytes, and gymnosperms.

EEOB 562. Evolutionary Genetics. (3-0) Cr. 3. Alt. S., offered 2011.*Prereq: Permission of instructor.* Seminar/discussion course covering the genetic basis of evolutionary processes in multicellular organisms.

EEOB 563. Molecular Phylogenetics. (2-3) Cr. 3. F. *Prereq: Biol 313 and 315.* An overview of the theory underlying phylogenetic analysis and the application of phylogenetic methods to molecular datasets. The course emphasizes a hands-on approach to molecular phylogenetics and combines lecture presentations with computer exercises and discussion of original scientific literature.

EEOB 564. Wetland Ecology. (Cross-listed with EnSci). (3-0) Cr. 3. S. *Prereq: 15 credits in biological sciences.* Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands.

EEOB 564l. Wetland Ecology. (Cross-listed with Ia LL, EnSci). Cr. 4. SS. *Prereq: Ia LL 312l.* Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

EEOB 565. Morphometric Analysis. (3-2) Cr. 4. Alt. S., offered 2010. *Prereq: Stat 401.* Dual-listed with Biol 465. A comprehensive overview of the theory and methods for the analysis of biological shape with emphasis on data acquisition, standardization, statistical analysis, and visualization of results. Methods for both landmark and outline data will be discussed.

EEOB 566. Molecular Evolution. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Permission of instructor.* Seminar/discussion course covering the fundamentals of molecular evolution. Emphasis is placed on original scientific literature and current topics, including rates and patterns of genetic divergence; nucleotide and allelic diversity; molecular clocks; gene duplications; genome structure; organellar genomes; polyploidy; transposable elements; and modes and mechanisms of gene and genome evolution.

EEOB 567. Empirical Population Genetics. (3-0) Cr. 3. F. *Prereq: Permission of instructor.* An overview of fundamental population genetic theory and the ecological and evolutionary factors underlying the distribution of genetic variation within and among natural populations. Emphasis on the analysis of inbreeding, breeding systems, parentage, relatedness, spatial autocorrelation, effective population size, hierarchial population models, and phylogeography.

EEOB 568. Advanced Systematics. (Cross-listed with Ent). (2-3) Cr. 3. Alt. S., offered 2011. *Prereq: Permission of instructor.* Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics.

EEOB 569. Biogeography. (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: Biol 315 or equivalent; permission of instructor.* Principles underlying the geographic distribution of organisms throughout the world; biological influences of geological history and tectonic movements; role of climate, migration, dispersal, habitat, and phylogeny on past and present organismal distribution patterns; biogeographic methods.

EEOB 570. Landscape Ecology. (Cross-listed with A Ecl). (2-3) Cr. 3. Alt. F., offered 2010. *Prereq: Permission of instructor; EEOB 588; a course in calculus.* The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

EEOB 573. Techniques for Biology Teaching. (Cross-listed with Ia LL, A Ecl). Cr. arr. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.
A. Animal Biology (Same as A Ecl 573A)
B. Plant Biology
C. Fungi and Lichens
D. Aquatic Ecology
E. Prairie Ecology
F. Wetland Ecology
G. Limnology (Same as A Ecl 573G)
H. Animal Behavior (Same as A Ecl 573H)
I. Insect Ecology
J. Biology of Invertebrates
K. Non-invasive Use of Living Organisms
W. Project WET (Same as A Ecl 573W)

EEOB 575. Field Mycology. (2-6) Cr. 4. Repeatable. SS. *Prereq: 5 credits in biology.* Collection and identification of fungi and relation of their occurrence to environmental factors. Field trips.

EEOB 575l. Field Mycology. (Cross-listed with Ia LL). Cr. 4. Alt. SS., offered 2010. Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungi groups.

EEOB 576. Functional Ecology. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Biol 312.* Dual-listed with Biol 476. The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

EEOB 580l. Ecology and Systematics of Diatoms. (Cross-listed with Ia LL). Cr. 4. SS. Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution including construction of reference and voucher collections and data organization and analysis.

EEOB 581. Environmental Systems I: Introduction to Environmental Systems. (Cross-listed with EnSci). (2-4) Cr. 4. F. *Prereq: 12 credits of natural science including biology and chemistry.* Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

EEOB 584. Ecosystem Ecology. (Cross-listed with EnSci). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Combined 12 credits in biology and chemistry.* Introduction to the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

EEOB 585. Advanced Community Ecology. (2-3) Cr. 3. Alt. F., offered 2010. *Prereq: Biol 312.* Factors controlling species diversity, species abundance,

and the structure and function of communities in space and time. Relationships between species diversity and ecosystem process rates and community stability.

EEOB 586. Aquatic Ecology. (Cross-listed with EnSci). (3-0) Cr. 3. F. *Prereq: EnSci 301 or 312 or 381 or 402.* (Dual-listed with Biol 486.) Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine and wetland ecology.

EEOB 586L. Aquatic Ecology Laboratory. (Cross-listed with EnSci). (0-3) Cr. 1. F. *Prereq: Concurrent enrollment in 586.* (Dual-listed with Biol 486L.) Field trips and laboratory exercises to accompany 586. Hands-on experience with aquatic research and monitoring techniques and concepts.

EEOB 587. Microbial Ecology. (Cross-listed with EnSci, Micro). (3-0) Cr. 3. *Prereq: 6 credits in biology* and six credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

EEOB 589. Population Ecology. (Cross-listed with A Ecl). (2-2) Cr. 3. F. *Prereq: Biol 312, Stat 101 or 104, a course in calculus, or graduate standing.* (Dual-listed with Biol 489.) Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

EEOB 590. Special Topics. Cr. arr. Repeatable. *Prereq: 10 credits in biology, permission of instructor.*
A. Current Topics in Ecology
B. Current Topics in Evolutionary Biology
C. Current Topics in Organismal Biology
I. Iowa Lakeside Laboratory (Cross-listed with Ia LL 590I, A Ecl 590I, Anthr 590I.)

EEOB 596. Ecology and Society. (Cross-listed with Phil). (3-0) Cr. 3. *Prereq: Graduate classification in biological or environmental sciences/studies with at least one course in ecology.* Analysis of conceptual and methodological debates in ecology. Historical development of competing research traditions and Philosophies. Topics include i) methodological issues in ecological science, ii) conceptual issues in theoretical ecology, iii) conceptual issues in applied ecology, iv) relation of ecology to environmental and social issues.

EEOB 599. Creative Component. Cr. arr. Research toward nonthesis master's degree.

Courses for graduate students

EEOB 611. Analysis of Populations. (Cross-listed with A Ecl). (2-2) Cr. 3. Alt. F., offered 2009. *Prereq: Biol 312; Stat 401; a course in calculus.* Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on Statistical inference and computing.

EEOB 641. General Mycology. (2-6) Cr. 4. F. *Prereq: Pl P 407.* First semester of a full-year course. Taxonomy, morphology, ecology, and phylogeny of slime molds and fungi (ooymcetes, chytridiomycetes, zygomycetes, ascomycetes, basidiomycetes, and fungi imperfecti).

EEOB 642. General Mycology. (2-6) Cr. 4. S. *Prereq: 641.* Continuation of 641. Taxonomy, morphology, ecology, and phylogeny of slime molds and fungi (oomycetes, chytridiomycetes, zygomycetes, ascomycetes, basidiomycetes, and fungi imperfecti).

EEOB 679. Light Microscopy. (Cross-listed with GDCB, Micro). (2-9) Cr. 5. Alt. F., offered 2010. *Prereq: Permission of instructor.* Current theories encompassing light optics and their applications for specimen preservation, paraffin and resin sectioning, general staining, histochemistry, cytophotometry, immunocytochemistry, autoradiography, image digitization, processing and presentation, and digital macro- and micrography. Limit of 10 students.

EEOB 680. Scanning Electron Microscopy. (Cross-listed with GDCB, Micro). (2-9) Cr. 5. Alt. F., offered 2009. *Prereq: Permission of instructor.* Current theories encompassing scanning electron optics and their applications for high and low vacuum microscopy, specimen chemical and cryopreservation methods, x-ray microanalysis, backscattered and topographic imaging, image digitization, processing and presentation. Limit of 10 students.

EEOB 681. Transmission Electron Microscopy. (Cross-listed with GDCB, Micro). (2-9) Cr. 5. Alt. S., offered 2011. *Prereq: GDCB 679 and permission of instructor.* Current theories encompassing electron optics and their applications for chemical and physical specimen preservation, ultramicrotomy, general staining and cytochemistry, immunocytochemistry, autoradiography, negative staining and shadowing, x-ray microanalysis, image digitization, processing and presentation.

EEOB 698. Seminar. Cr. 1. Repeatable. Meetings of graduate students and faculty to discuss recent literature and problems under investigation.

EEOB 699. Research. Cr. arr. Repeatable. Research for thesis or dissertation. Satisfactory-fail only.
I. Iowa Lakeside Laboratory. (Cross-listed with Ia LL 699I)

J. Arne Hallam, Chair of Department

Distinguished Professor: W. Huffman

Distinguished Professors (Emeritus): Baumel, Fuller, Harl, Johnson, Ladd, Luckett

University Professors: Lapan, Orazem

University Professor (Emeritus): Wisner

Professors: Babcock, Beghin, Choi, Deiter, Duffy, Edelman, Edwards, Garasky, Ginder, Hallam, Hayes, D. Hennessy, Herriges, Hoffman, Jensen, Jolly, Kliebenstein, Kling, Lawrence, Lence, MacDonald, Miranowski, Moschini, Otto, Schroeter, Tesfatsion, Wang

Professors (Emeritus): J. Adams, R. Adams, Faden, Falk, Fletcher, Hayenga, Julius, Kolmer, Mattila, Meyer, Meyers, Paulsen, Prescott, Starleaf, Stephenson, Stone, Vandewetering

Associate Professors: Bhattacharya, Bunzel, Frankel, Gallagher, Kreider, Quirmbach, Rosenblat, Singh, Weninger, Zheng

Associate Professor (Emeritus): Doak

Assistant Professors: Hart, Oviedo, Zhylyevskyy

Assistant Professors (Adjunct): H. Hennessy, S. Huffman

Senior Lecturers: Alexander, Luvaga

Lecturers: McCullough, Rajan, Roy, Wohlgemuth

Undergraduate Study

The department offers work for the degrees of bachelor of science with a major in agricultural business, bachelor of science with a major in business economics, and bachelor of science with a major in economics. For further discussion of programs in agricultural business, see the statement below under College of Agriculture. For programs in business economics, see the statement below under College of Business. For programs in economics, see the statement below under College of Liberal Arts and Sciences. Visit our web site at www.econ.iastate.edu.

Graduates of the Department of Economics have unique skills that distinguish them from other graduates. They have the ability to think and reason clearly, and can address complex issues using tools and decision making models of economics, mathematics, statistics, as well as concepts from the biological, physical, and social sciences. Graduates develop human relations skills that are essential in the work place and the community. They are able to communicate economic and business concepts to other professionals, collective organizations, governments, and the general public using a variety of means. Graduates understand the interaction of technology, human activity, and the environment. They are able to apply concepts associated with making "optimal" choices among economic alternatives. Graduates are prepared for graduate work in law, economics, and business, as well as the world of work, having learned tools of critical analysis and skills essential to getting and keeping meaningful employment.

College of Agriculture

For the undergraduate curriculum in agricultural business, see *College of Agriculture, Curricula.*

The agricultural business curriculum prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted. A minor in agricultural business will be offered pending administrative approval.

College of Business

For the undergraduate curriculum in business economics, see *College of Business, Curricula.*

The major in business economics provides a high-quality education with a balanced emphasis in both business and economics. Graduates from the business economics major possess a unique mix of analytical and applied business skills well-suited for employment in upper level management and public service positions. Graduates also have solid preparation for graduate studies in law, economics, and in Master of Business Administration (MBA) programs. A double major in business economics and agricultural business is not permitted; a double major in business economics and economics is not permitted, either. A major in business economics with a minor in economics is not permitted.

College of Liberal Arts and Sciences

Candidates for the bachelor of science degree with a major in economics must fulfill requirements established by the College of Liberal Arts and Sciences. (For details of undergraduate curricula in liberal arts and sciences, see *College of Liberal Arts and Sciences, Curriculum.*) The economics curriculum prepares students for advanced studies, professional degrees such as law and business administration, and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service.

Students majoring in economics are required to take either Math 165 and 166 or Math 165 and Econ 207 or Math 160 and Econ 207 within the mathematical and natural sciences group. Students who plan to take postgraduate work in economics should take Math 165 and 166 for the above sequence. Additional requirements are Stat 226 and 326. Twenty-eight credits in economics are required for the bachelor of science degree. Students must complete the following courses in economics: Econ 101, 102, 301, 302, 371, three Econ courses numbered 400-489, plus one additional Econ course selected from an approved departmental list. Economics majors must maintain a C average in 101, 102, 301, and 302, with no grade lower than a C-.

Optimal progress for an economics major would be to complete the principles sequence, Econ 101 and 102, in the freshman year. Math 165, 166, or Math 165, Econ 207, or Math 160, Econ 207 should also be completed in the freshman year, followed by the intermediate theory sequence, Econ 301 and 302, in the sophomore year. Stat 226 and 326 are recommended in the sophomore year.

A minor in economics is offered. Courses to be included in the minimum of 15 hours are Econ 101, 102, and 301.

Communication Proficiency Requirement: The major in economics requires a grade of C or better in each of the following English courses: 150, 250 (or 250H), and 314.

The department participates in the interdepartmental programs in international studies and women's studies.

Learner Outcome Goals

In general, our goal is that all Department of Economics graduates at Iowa State are able to use economic reasoning to think critically; to make decisions and to communicate effectively; to be ethical; to respect the environment, and to be multi-culturally and internationally aware.

Specifically, with respect to:

1. Critical Thinking, all graduates of the Department of Economics are able to:
   a) distinguish factual statements from opinions or value judgements
   b) use scientific methods to analyze and interpret data
   c) distinguish causal relationships from correlations
   d) determine the accuracy of statements
   e) understand the usefulness of abstractions and models
   f) distinguish simplifying and critical assumptions from unnecessary details
   g) objectively critique competing viewpoints to make reasoned judgements
2. Economic Reasoning:
   a) distinguish positive (what is) and normative (what should be) economics
   b) determine the opportunity cost of alternatives
   c) apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues
   d) identify the conditions under which markets allocate resources efficiently or markets fail
   e) apply marginal economic analysis to solve problems
   f) conduct comparative static analyses
   g) pose and test hypotheses
3. Decision Making/Problem Solving:
   a) work effectively alone and in teams to solve problems
   b) use scientific methods to identify optimal choices among economic alternatives
   c) identify decision-makers, objectives, choice variables, incentives, and constraints
   d) identify and apply the solution technique best suited for the specific problem
   e) understand how conclusions depend on assumptions
4. Communications:
   a) communicate economic and business concepts to professionals, organizations, governments, and the general public
   b) obtain information by accessing electronic or traditional media, listening, or by observation
   c) use computer and statistical methods to organize and analyze data
   d) write clearly and effectively
   e) speak clearly and persuasively
   f) prepare and present visual information effectively
5. Ethics:
   a) develop ethical perspectives and sense of moral responsibility and values
   b) discuss contemporary ethical and moral issues in professional and private life
   c) critically evaluate their own arguments and those of others
6. Environment Awareness:
   a) understand the physical and biological properties of the environment and ecological systems
   b) understand how economic activity, such as business or agriculture, impacts the environment
7. International/Multi-Cultural Awareness:
   a) understand cultural diversity within our own nation
   b) understand cultural diversity around the world
   c) know the different economic or agricultural systems in other countries
   d) have human relation skills essential in the work place and the community

Graduate Study

The department offers work toward the degrees master of science and doctor of philosophy with majors in economics and agricultural economics. The department also offers minors to students with majors in other departments.

Students do not need to have an undergraduate major in economics or agricultural economics in order to qualify for graduate work in the department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, calculus, and matrix algebra. Some background in Math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree master of science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree master of science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of coursework, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the individual's committee. Students may select fields of concentration from the following: agricultural economics, financial economics, industrial organization, international economics, human resources, macroeconomics, and environmental and resource economics.

Each student must complete advanced courses in microeconomic and macroeconomic theory, quantitative methods and econometrics, and two fields from the list above. Students must demonstrate competence in theory by passing qualifying examinations. Students must also participate in workshops.

With the cooperation of the College of Law at Drake University, a joint degree consisting of doctor of jurisprudence and master of science in agricultural economics or economics may be pursued concurrently. Other cooperative programs of study may be arranged with the University of Iowa College of Law or other recognized institutions.

The department cooperates in the interdepartmental graduate majors in transportation and sustainable agriculture, and the interdepartmental minor in gerontology.

Courses primarily for undergraduate students

Econ 101. Principles of Microeconomics. (3-0) Cr. arr. F.S.SS. Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value. Recitation section required for 4 credits.

Econ 101H. Principles of Microeconomics. (3-0) Cr. 3. F. Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value. Open only to honors students.

Econ 101L. Laboratory in Principles of Microeconomics. (0-2) Cr. 1. F. *Prereq: Concurrent enrollment in the appropriate section of 101.* Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

Econ 102. Principles of Macroeconomics. (3-0) Cr. 3. F.S.SS. *Prereq: 101 recommended.* Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance.

Econ 102H. Principles of Macroeconomics. (3-0) Cr. 3. S. *Prereq: 101.* Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance. Open only to honors students.

Econ 110. Orientation in Agricultural Business. (1-0) Cr. 0.5. F. Orientation course for freshman and new transfer students in agricultural business. Satisfactory-fail only.

Econ 207. Applied Economic Optimization. (2-2) Cr. 3. S. *Prereq: Math 151, 160, 165 or equivalent.* Application of linear algebra, calculus and unconstrained and constrained optimization techniques to economic problems. Learning outcomes include the ability to (i) identify the objective, decision variables and constraints in economic decision problems, (ii) represent elements of an economic problem in simple mathematical models, (iii) identify and apply mathematical tools that can be used to solve the problems, (iv) identify the strengths and limitations of the solution method, and (v) interpret the economic meaning and implications of the solution.

Econ 230. Farm Business Management. (2-2) Cr. 3. F.S. *Prereq: 101; Acct 284.* Business and economic principles applied to decision making and problem solving in the management of a farm business. Cash flow, partial, enterprise, and whole farm budgeting. Information systems for farm accounting, analysis, and control. Obtaining and managing land, capital, and labor resources. Alternatives for farm business organization and risk management.

Econ 235. Introduction to Agricultural Markets. (3-0) Cr. 3. F.S. *Prereq: 101.* Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools.

Econ 292. Career Seminar. (1-0) Cr. 1. F. *Prereq: Classification in economics or agricultural business.* Career opportunities in the various industries and

government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing.

Econ 297. Internship. Cr. 2. Repeatable. F. *Prereq: Permission of instructor and classification in agricultural business or economics.* Students complete a research report, based on their internship or approved work experience, that examines chosen topics in management, marketing or finance. No more than 4 credits of Econ 297 may be applied toward graduation. Satisfactory-fail only.

Econ 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the department cooperative education coordinator; sophomore classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Econ 301. Intermediate Microeconomics. (3-0) Cr. arr. F.S.SS. *Prereq: 101; Math 160 or 165.* Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive markets; theory of demand for and supply of factors of production; general equilibrium analysis. Recitation required for 4 credits. Nonmajor graduate credit.

Econ 302. Intermediate Macroeconomics. (3-0) Cr. 3. F.S. *Prereq: 101, 102; Math 160 or 165.* Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation. Nonmajor graduate credit.

Econ 308. Agent-Based Computational Economics. (3-0) Cr. 3. *Prereq: 101.* Computational study of economies as evolving systems of autonomous interacting agents. Key ideas from game theory and complex adaptive systems theory for modeling the adaptation, learning, and co-evolution of economic agents in decentralized market economies. Evolution of behavioral norms and interaction networks. Building agent-based computational laboratories for the experimental study of market protocols and agent learning processes. Illustrative economic applications (e.g., financial markets, labor markets, agricultural markets, electricity markets, auction markets, automated internet markets, collective usage of common-pool resources). Nonmajor graduate credit.

Econ 312. History of Economic Thought. (3-0) Cr. 3. S. *Prereq: 101.* The logic and explanatory value of received economic doctrines since the middle of the eighteenth century. The reflection of past economic doctrines in contemporary theory and policy. Discussion of major works by Smith, Ricardo, Mill, Marx, Marshall, Walras, Wicksell, and Keynes.

Econ 320. Labor Economics. (3-0) Cr. 3. F. *Prereq: 101.* Survey of contemporary labor market problems and public policy toward labor. Economic analysis of topics such as labor supply and demand, work incentives and compensation, transfer programs, education and training, mobility, minimum wages, unions, working conditions, benefits, discrimination, unemployment, wage differentials across regions, and labor markets in other countries. Nonmajor graduate credit.

Econ 321. Economics of Discrimination. (Cross-listed with W S). (3-0) Cr. 3. F. *Prereq: 101.* Economic theories of discrimination. Analysis of the economic problems of women and minorities in such areas as earnings, occupations, and unemployment. Public policy concerning discrimination. Poverty measurement and antipoverty programs in the U.S. Nonmajor graduate credit.

Econ 325. Biorenewable Systems. (Cross-listed with A E, An S, TSM, Agron, BusAd). (3-0) Cr. 3. F. *Prereq: Econ 101, Chem 155 or higher, Math 140 or higher.* Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing. Counts as a general elective course for majors in agricultural business, economics, and business economics.

Econ 332. Cooperatives. (3-0) Cr. 3. S. *Prereq: 101.* Survey of cooperative activities with emphasis on agricultural cooperatives, types of cooperatives, methods of organization and operation, principles, legal and tax aspects, cooperative finance, economic possibilities, and limitations of cooperation. Students will learn how to work together in teams to solve problems while role playing directors of cooperative boards. Nonmajor graduate credit.

Econ 333. Advanced Farm Business Management. (3-2) Cr. 3-4. F. *Prereq: 230.* Effective use of strategic planning, decision methods, and computer assistance for solving farm problems. Applications of economic and management theory to analyze farm business decisions using efficiency measures to assess current resource use and direct the farm business analysis, planning, and tax process. Computers as aids in the decision process. Three credits available only to students enrolled in AgPAQ. Laboratory required for 4 credits. Nonmajor graduate credit.

Econ 334. Entrepreneurship in Agriculture. (3-0) Cr. 3. *Prereq: 101.* Introduction to the process of entrepreneurship within the agricultural and food sectors. Emphasis on opportunity recognition and assessment, resource acquisition and feasibility analysis for both private and social enterprises. Students will develop a comprehensive feasibility study for a new business or non-profit organization.

Econ 336. Agricultural Selling. (3-0) Cr. 3. F. *Prereq: 101.* Principles of selling with application to agricultural and food related businesses. Attitudes, value systems, and behavioral patterns that relate to agricultural sales. Electronic marketing, selling strategies, preparing for sales calls, making sales presentations, handling objections, and closing sales. Analysis of the buying or purchasing process. Evaluation of agri-selling as a possible career choice.

Econ 338. Topics in Agricultural Marketing. Cr. arr. *Prereq: 101, 235 recommended for topics B and C.* A given topic can be taken only once. A hands-on application of economic concepts and principles to agricultural commodity markets, marketing methods, risk management, and related agribusiness decisions.
A. Dairy marketing. 2 cr.
B. Livestock marketing. 1 cr.
C. Grain marketing. 1 cr.

Econ 344. Public Finance. (3-0) Cr. 3. S. *Prereq: 101.* The economic role of governments in market economies. Public goods, externalities, income distribution, and income maintenance programs. The effect of taxes on economic behavior, descriptions of the structure of the principal U.S. taxes, and current reform proposals. Nonmajor graduate credit.

Econ 353. Money, Banking, and Financial Institutions. (3-0) Cr. 3. F.S.SS. *Prereq: 101, 102.* Theoretical and applied analysis of money, banking, and financial markets; interest rates and portfolio choice; the banking industry in transition; the money supply process; the Federal Reserve System and the conduct of monetary policy; macro implications of monetary policy; international finance.

Econ 355. International Trade and Finance. (3-0) Cr. 3. F.S. *Prereq: 101, 102.* Explanations of causes of international trade and the impact of trade on welfare and employment patterns. Analysis of government policies towards trade, such as tariffs, quotas, and free trade areas. Theory of balance of payments and exchange rate determination, and the role of government policies. Examination of alternative international monetary arrangements. Nonmajor graduate credit.

Econ 362. Applied Ethics in Agriculture. (Cross-listed with Soc). (3-0) Cr. 3. F. *Prereq: Econ 101 or Soc 130 or Soc 134, junior or senior status in the College of Agriculture and Life Sciences.* Identify major ethical issues and dilemmas in the conduct of agricultural and agribusiness management and decision making. Discuss and debate proper ethical behavior in these issues and situations and the relationship between business and personal ethical behavior.

Econ 370. Comparative Capitalism and Economic Transitions. (3-0) Cr. 3. F. *Prereq: 101, 102.* Theories of capitalism and the economics of transition from a planned to a market economy; the role and the creation of economic institutions supporting different economic systems. An examination of recent experiences of Eastern European countries, the former Soviet Union, China, the European Union, and the United States.

Econ 371. Introductory Econometrics. (4-0) Cr. 4. F.S. *Prereq: 301, 302 or 353, Stat 326.* Introduction to the models and methods used to estimate relationships and test hypotheses pertaining to economic variables. Simple and multiple regression analysis; stochastic regressors; heteroskedasticity; autocorrelation; measurement error; simultaneous equations. Nonmajor graduate credit.

Econ 376. Rural, Urban and Regional Economics. (Cross-listed with C R P). (3-0) Cr. 3. F.S. *Prereq: 101.* Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime. Nonmajor graduate credit.

Econ 378. Economics of Aging. (Cross-listed with HD FS, Geron). (3-0) Cr. 3. S. *Prereq: 3 credits in principles of economics and 3 credits in human development and family studies.* Economic status of the aging, retirement planning and the retirement decision, role of Social Security, public transfer programs for the elderly, intrafamily transfers to/from the elderly, private pensions, financing medical care and housing for the elderly, prospects and issues for the future.

Econ 380. Environmental and Resource Economics. (Cross-listed with Env S). (3-0) Cr. 3. F. *Prereq: 101.* Natural resource availability, use, conservation, and government policy, including energy issues. Environmental quality and pollution control policies.

Econ 385. Economic Development. (3-0) Cr. 3. S. *Prereq: 101, 102.* Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Nonmajor graduate credit.

Econ 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the department cooperative education coordinator; junior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Econ 401. Topics in Microeconomics. (3-0) Cr. 3. *Prereq: 301, Stat 226.* Advanced treatment of selected topics from one or more of the following areas: household production models, factor markets, game theory and imperfect competition, general equilibrium, intertemporal choice, asset markets, income distribution, externalities and public goods, etc. Nonmajor graduate credit.

Econ 402. Topics in Macroeconomics. (3-0) Cr. 3. *Prereq: 301, 302, Stat 226.* Advanced treatment of selected topics from one or more of the following areas: business cycle theory, growth theory, fiscal and monetary policy, coordination issues, open economy macroeconomics, and financial economics. Nonmajor graduate credit.

Econ 415. Firms, Markets and Industry Structure. (2-2) Cr. 3. F.S. *Prereq: 301.* The theory of the firm; determinants of firm boundaries; firm behavior; perfectly competitive markets; welfare and market efficiency;

monopoly and monopsony; price discrimination; oligopoly and oligopsony; strategic market behavior. Nonmajor graduate credit.

Econ 416. Industrial Organization. (3-0) Cr. 3. F. *Prereq: 301, 415.* Game theoretic approaches to competition and strategizing; spatial competition; research and development; entry deterrence; the economics of regulation. Nonmajor graduate credit.

Econ 431. Managerial Economics. (3-0) Cr. 3. S. *Prereq: 301.* Theory of the firm; organizational incentives and efficiency; moral hazard; role of information and decision making under uncertainty; ownership and control; business investment. Nonmajor graduate credit.

Econ 437. Commodity Marketing and Risk Management. (3-0) Cr. 3. S. *Prereq: 235, 301, Stat 326.* The purpose and performance of commodity markets. How commodity marketing institutions function. Merchandising arrangements. Distinguishing features of agricultural commodities. Hedging, arbitrage, and speculation in commodity spot, forward, futures, and options markets. Valuation theory. Nonmajor graduate credit.

Econ 455. International Trade. (3-0) Cr. 3. S. *Prereq: 301.* Rigorous treatment of theories of international trade and international factor movements. Examination of the impact of trade and labor migration on domestic and world welfare and on the distribution of income. Theoretical analysis of government policies towards trade and factor movements, including quotas, tariffs, free trade areas and immigration restrictions. Discussion of contemporary issues and controversies concerning globalization, including multinational firms and labor migration. Nonmajor graduate credit.

Econ 457. International Finance. (3-0) Cr. 3. F. *Prereq: 302.* National income accounting and balance of payments; foreign exchange rates and exchange rate markets; money, interest rates, and exchange rate determination; prices, exchange rates, and output in the short run; international monetary arrangements; fixed versus flexible exchange rates; optimal currency areas; international capital flows; currency and financial crises in emerging markets. Nonmajor graduate credit.

Econ 458. Economic Systems for Electric Power Planning. (Cross-listed with E E). (3-0) Cr. 3. *Prereq: E E 303 or Econ 301.* Evolution of electric power industry. Power system operation and planning and related information systems. Linear and integer optimization methods. Short-term electricity markets and locational marginal prices. Risk management and financial derivatives. Basics of public good economics. Cost recovery models including tax treatment for transmission investments. Nonmajor graduate credit.

Econ 460. Agricultural, Food, and Trade Policy. (Dual-listed with 560). (3-0) Cr. 3. S. *Prereq: 301 or 501.* Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macropolicy, world economy, and international trade on U.S. agriculture. Nonmajor graduate credit.

Econ 466. Agricultural Finance. (3-0) Cr. 3. S. *Prereq: 301, Stat 226, Fin 301 and Econ 353 (recommended).* Financial analysis of agricultural businesses; liquidity, capital structure, and growth and risk of agricultural firms; capital budgeting methods; analysis of land investments, leasing, and costs of credit; financial intermediation and major financial institutions for agriculture; borrower-lender relationships, and asset-liability management techniques by financial intermediaries; public policies affecting agricultural credit markets. Nonmajor graduate credit.

Econ 480. Intermediate Environmental and Resource Economics. (Dual-listed with 580). (3-0) Cr. 3. *Prereq: 301.* Theories of natural resource utilization and allocation. Externalities, public goods, and environmental quality. Planning natural resource use and environmental quality. Methodologies for analyzing natural resource and environmental problems. Nonmajor graduate credit.

Econ 490. Independent Study. Cr. arr. Repeatable. *Prereq: Junior or senior classification, 14 credits in economics.* No more than 9 credits of Econ 490 may be used toward graduation. Satisfactory-fail only.
E. Entrepreneurship
H. Honors

Econ 492. Graduating Senior Survey. (1-0) Cr. R. F.S. *Prereq: Graduating senior.* Final preparations for graduation. The final stages of job searching, interviewing, letter writing, and resume preparation. Outcomes assessment information from graduating seniors including opinion surveys, instructor/advisor/course evaluations, exit interviews, student accomplishment surveys, job placement surveys, and comprehensive skills examinations. Departmental recognition of graduating seniors. Life as an alumnus - expectations and obligations. Convocation and commencement information. Satisfactory-fail only.

Econ 496. Economics Travel Course. Cr. arr. Repeatable. *Prereq: Sophomore status; permission of instructor.* Tour and study of international agricultural and/or nonagricultural economies, markets, and institutions. Locations and duration of tours will vary. Limited enrollment.

Econ 498. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of the department cooperative education coordinator; senior classification.* Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Econ 500. Quantitative Methods in Economic Analysis I. (4-0) Cr. 4. F. *Prereq: 301, 1 year of calculus, Stat 401, and permission of Director of Graduate Education.* Economic applications of selected mathematical and statistical concepts: linear models and matrix algebra; differential calculus and optimization; integral calculus and economic dynamics; probability distributions, estimation, and hypothesis testing in the analysis of economic data.

Econ 501. Microeconomics. (4-0) Cr. 4. F. *Prereq: 301, credit or enrollment in 500 or equivalent background in calculus and statistics.* The theory of the consumer, theory of the firm, perfect and imperfect competition, welfare economics, and selected topics in general equilibrium and uncertainty. This is a Master's level course.

Econ 502. Macroeconomics. (4-0) Cr. 4. F. *Prereq: 302, credit or enrollment in 500 or equivalent background in calculus and statistics.* Models of aggregate supply and demand, theories of consumption and investment, money supply and demand, inflation, rational expectations, stabilization policy, financial markets, and international finance. This is a Master's level course.

Econ 509. Applied Numerical Methods in Economics. (2-2) Cr. 3. *Prereq: 500, 501; or 600, 601.* Use of numerical techniques to solve economic problems. Numerical differentiation and integration numeric solutions of systems of equations, static and dynamic optimization problems including unconstrained optimization, maximum likelihood methods, general nonlinear programming methods, dynamic programming and optimal control, numerical methods for solving functional equations.

Econ 520. Labor Supply and Human Capital formation. (3-0) Cr. 3. *Prereq: 501 or 601.* Labor supply decisions and empirical analysis for agricultural operators and other self-employed and wage-earning households; multiple job holding; resource allocation in productive households; human capital formation by households, firms, and public institutions, which includes schooling, on-the-job training, migration, health, research, raising of children, and implications for household income and welfare; applications to problems in rural areas of developing and developed countries.

Econ 521. Labor Markets. (3-0) Cr. 3. *Prereq: 501 or 601.* Analysis of labor demand and market determination of wages and employment; analysis of distortions in labor markets due to non-competitive forces, legislation, and discrimination; wage inequality, compensation and work incentives; compensating differentials; microeconomic analysis of unemployment and job search.

Econ 530. Advanced Farm Management. (2-0) Cr. 2. *Prereq: 6 credits in Economics.* Offered off campus as demand warrants. Risk management principles applied to agriculture. Sources of risk and uncertainty. Attitudes toward risk. Techniques for analyzing and controlling production, marketing, financial, legal and human risk. Designed for master of agriculture program only.

Econ 532. Business Economics. (3-0) Cr. 3. *Prereq: 101 and enrollment in MBA or BAS program; not for economics majors.* Applications of microeconomic theory and decision analysis. Demand analysis, production and cost analysis, forecasting, pricing, market structures and strategy, capital investment analysis, decision-making under uncertainty, government and business.

Econ 533. Economic and Business Decision Tools. (Cross-listed with BusAd). (3-0) Cr. 3. *Prereq: Econ 501 or 532.* Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools for decision making. The topics include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decisions, discrete choice modeling and statistical bootstrapping, and financial performance evaluation using commercially available software.

Econ 535. Applied Agricultural Marketing. (2-0) Cr. 2. *Prereq: 6 credits in economics.* Off campus. Offered as demand warrants. Market structure and performance in the food and agricultural sector. Vertical coordination systems and pricing systems in agriculture. Market information and price forecasting. Alternative marketing methods and strategies for major Iowa agricultural commodities including the use of futures and options markets. Designed for master of agriculture program only.

Econ 537. Commodity Markets: Analysis and Strategy. (3-0) Cr. 3. *Prereq: 501 or 532 or 601, Econ 571 or Stat 326.* Analysis of exchange-traded and over-the-counter commodity markets, their functions and performance. Evaluation of hedging, speculation, and arbitrage strategies. Valuation of derivatives and comparison with derivatives on financial assets. Efficiency and the role of information in commodity markets. Market regulation.

Econ 545. Public Economics. (3-0) Cr. 3. *Prereq: 501 or 601.* Optimal taxation; excess burden; partial and general equilibrium analysis of tax incidence; social insurance; effects of taxation on labor supply and savings; economics of the health sector.

Econ 553. Applied Research in Monetary and Macroeconomics. (3-0) Cr. 3. *Prereq: 502, 571.* Application of economic theory to the analysis of contemporary issues in macroeconomics, monetary economics, and financial economics. This is a Master's level course.

Econ 555. Issues in International Economics. (3-0) Cr. 3. *Prereq: 501, 502.* Theories of international trade and finance. Emphasis on current policy issues in international economics. This is a Master's level course.

Econ 560. Agricultural, Food, and Trade Policy. (Dual-listed with 460). (3-0) Cr. 3. S. *Prereq: 301 or 501.* Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macroeconomic policy, world economy, and international trade on U.S. agriculture.

Econ 563. Issues in Government Policy Affecting Agriculture. (2-0) Cr. 2. *Prereq: 101.* Off campus. Offered as demand warrants. Government policy and the policy-making process as it affects food, agriculture, and trade. Description and analysis of government policies and programs designed to address production agriculture problems and consumer food concerns. Evaluation of the interaction of agriculture and world trade as affected by U.S. and foreign government policies. Designed for master of agriculture program only.

Econ 571. Intermediate Econometrics. (3-0) Cr. 3. S. *Prereq: 500.* Single and multiple equation regression models; dummy explanatory variables; serial correlation; heteroskedasticity; distributed lags; qualitative dependent variables; simultaneity. Use of econometric models for tests of economic theories and forecasting.

Econ 576. Spatial Economics. (3-0) Cr. 3. *Prereq: 501.* Analysis of location choice by firms, employees, and households emphasizing the role of spatial variations in agglomeration economies, economies of scale, distance, transport, endowments, amenities, and local government. Models of land use, urban form, spatial competition, central place theory, and migration. Techniques of discrete choice analysis, statistical analysis of categorical data, urban system modeling, and interregional computable general equilibrium.

Econ 580. Intermediate Environmental and Resource Economics. (Dual-listed with 480). (3-0) Cr. 3. *Prereq: 301.* Theories of natural resource utilization and allocation. Externalities, public goods, and environmental quality. Planning natural resource use and environmental quality. Methodologies for analyzing natural resource and environmental problems.

Econ 581. Advanced Environmental Economics. (3-0) Cr. 3. *Prereq: 501 or 601.* Interrelationships of natural resource use and the environment. Applied welfare and benefit-cost analyses. Externalities and pollution abatement. Nonmarket valuation of resources. Property rights. Legal and social constraints. Policy approaches.

Econ 590. Special Topics. Cr. arr. Repeatable. Satisfactory-fail only.

Econ 599. Creative Component. Cr. arr. Satisfactory-fail only.

Courses for graduate students

Econ 600. Quantitative Methods in Economic Analysis II. (4-1) Cr. 4. F. *Prereq: 500 and linear algebra.* Unconstrained and equality- and inequality-constrained optimization; the Kuhn-Tucker formulation; abstract spaces; dynamic programming; dynamical systems.

Econ 601. Microeconomic Analysis I. (4-1) Cr. 4. F. *Prereq: 301, previous or concurrent enrollment in 600 and permission of Director of Graduate Education.* Economic theory and methodology; theory of consumer behavior, theory of the competitive firm, supply and factor demand; duality relations in consumer and producer theory, welfare change measures; partial equilibrium analysis, perfect competition, monopoly; choice under uncertainty, the expected utility model, risk aversion; insurance, portfolio and production decisions under risk.

Econ 602. Macroeconomic Analysis. (4-1) Cr. 4. S. *Prereq: 301, 302, previous or concurrent enrollment in 600 and permission of Director of Graduate Education.* Neoclassical aggregate growth models; the overlapping generations model; endogenous growth models; equilibrium business cycle theories; equilibrium job search and matching; models of money; fiscal and monetary policy; income and wealth distribution.

Econ 603. Microeconomic Analysis II. (4-1) Cr. 4. S. *Prereq: 601, 602 and permission of Director of Graduate Education.* General equilibrium analysis, efficiency, and welfare; market failures, externalities, and the theory of the second best; introduction to game theory; adverse selection, signaling, screening and moral hazard.

Econ 604. Advanced Macroeconomic Analysis. (4-1) Cr. 4. F. *Prereq: 601, 602 and permission of Director of Graduate Education.* Topics will be selected from: new Keynesian approaches to business cycle theory; endogenously generated business cycles; models of credit and financial intermediation; mechanism design and time inconsistency issues; political economy models; heterogeneous-agent models with strategic interaction; path dependence, network effects, and lock-in; economies as evolving self-organizing systems.

Econ 605. Advanced Topics in Microeconomics. (3-0) Cr. 3. *Prereq: 603.* Selected topics in microeconomic theory of current significance to the profession.

Econ 606. Advanced Topics in Macroeconomics. (3-0) Cr. 3. *Prereq: 603, and credit or current enrollment in 604.* Selected topics in macroeconomic theory of current significance to the profession.

Econ 615. Theoretical Industrial Organization. (3-0) Cr. 3. *Prereq: 603.* Theoretical analysis of traditional topics in industrial organization. Review of game theory. Monopoly and oligopoly theory, price discrimination, product differentiation, research and development, diffusion of innovation, network externalities, and asymmetric information.

Econ 616. Empirical Methods in Industrial Organization. (3-0) Cr. 3. *Prereq: 603, 671.* Empirical methods in industrial organization. Measurement of market power. Discrete choice models of product differentiation. Empirical studies of price dynamics, entry, collusion, price discrimination, technology adoption, asymmetric information, and auctions.

Econ 618. Game Theory. (3-0) Cr. 3. *Prereq: 603, or 501 and permission of instructor.* Theoretical analysis and applications of strategic games, extensive form games, and cooperative games. Nash equilibrium, correlated equilibrium, Bayesian games, subgame perfect equilibrium, the core, evolutionary equilibrium, repeated games with finite automata, and common knowledge.

Econ 641. Agricultural Economics I. (3-0) Cr. 3. *Prereq: 603.* Advanced treatment of topics in agricultural economics with emphasis on optimization models. Part 1: Applied duality in production and demand models. Flexible representation of production and demand systems. Production efficiency and nonparametric analysis. Production models with risk. Part 2: The role of contracts in the organization and coordination of agricultural production. Distribution of asset ownership, allocation of risk among parties, and the structure of incentive systems. Rationale for cooperative efforts and information sharing. The role of information, insurance, and credit.

Econ 642. Agricultural Economics II. (3-0) Cr. 3. *Prereq: 603.* Advanced treatment of topics and models in agricultural economics with emphasis on equilibrium analysis. Part 1: Application of price theory to agricultural market analysis. Vertical market relations, product differentiation and quality in agri-food markets. Storage, futures markets and commodity prices. Part 2: Market failures and the scope for government intervention in agriculture. Applied welfare analysis of agricultural and environmental policies. Issues and models in international trade of agricultural products.

Econ 653. Financial Economics. (3-0) Cr. 3. *Prereq: 603, 672. Recommended: 674, Stat 551.* Review of decision-making under uncertainty. Portfolio theory. Theoretical foundations of asset valuation models: capital asset pricing model (CAPM), arbitrage pricing theory (APT), representative agent models, pricing of derivative securities. Complete and incomplete asset markets, credit markets, financial intermediaries, the role of government in the financial sector. Market frictions, crashes, bubbles. Applications of asset valuation models, with emphasis on their testable implications.

Econ 654. Advanced Topics in Financial Economics. (3-0) Cr. 3. Repeatable. *Prereq: 603.* Selected topics in financial economics of current significance to the profession.

Econ 655. International Trade. (3-0) Cr. 3. *Prereq: 603.* Theories of international trade; welfare and distributional aspects of trade and commercial policies. Optimal trade policies in the presence of domestic distortions; strategic trade policy; international trade and economic growth.

Econ 657. International Finance. (3-0) Cr. 3. *Prereq: 602.* The intertemporal approach to current account determination; non-traded goods and the real exchange rate; fiscal policy in the open economy; monetary approach to balance of payments and exchange rate determination; sticky price models of the open economy; exchange-rate based stabilizations; capital inflows; financial and balance of payments crises; international business cycles.

Econ 671. Econometrics I. (4-1) Cr. 4. F. *Prereq: 501 and Stat 447 or 542.* Probability and distribution theory for univariate and multivariate normal random variables, introduction to the theory of estimators for linear models, hypothesis testing and inference, introduction to large sample properties of estimators; derivation of common estimators and their properties for the classical and general multiple regression models, hypothesis testing, forecasting, implications of specification errors - missing data, left-out regressors, measurement error, stochastic regressors.

Econ 672. Econometrics II. (4-1) Cr. 4. S. *Prereq: 671.* Identification, estimation, and evaluation of systems of simultaneous equations; qualitative choice and limited dependent variable models; introduction to time series methods and applications, including alternative variance specifications.

Econ 673. Microeconometrics. (3-0) Cr. 3. *Prereq: 672, 601.* Econometric treatment of models arising in microeconometric applications. Methods are primarily concerned with the analysis of cross-section data. Topics may include: systems of demand equations in panel data settings, random utility models of discrete choices, production possibilities frontier estimation, and discrete/continuous models of participation and consumption.

Econ 674. Macroeconometrics. (3-0) Cr. 3. *Prereq: 672, 602.* Time-series econometric techniques and their application to macroeconomics and financial markets. Techniques may include GARCH and ARCH-M models, unit-root tests, nonlinear adjustment models, structural VARs, and cointegration tests.

Econ 675. Advanced Topics in Econometrics. (3-0) Cr. 3. Repeatable. *Prereq: 672 or Stat 543.* Advanced treatment of issues important in econometrics. Topics chosen from asymptotic theory, nonlinear estimation, Bayesian and robust econometrics, econometric time series, limited dependent variables and censored regression models, nonparametric and semiparametric methods, bootstrapping and Monte Carlo techniques.

Econ 680. Advanced Resource Economics. (3-0) Cr. 3. *Prereq: 603.* Dynamic allocation of scarce, exhaustible, and renewable natural resources, including minerals and energy, soil, water, forests, and fish. Social versus private decisions. Market and nonmarket considerations. Technological change. Regulation. Dynamics and uncertainty.

Econ 690. Advanced Topics. Cr. arr. Repeatable. Satisfactory-fail only.

Econ 691. Third-Year Paper. Cr. 3. Under the direction of the major professor, Ph.D. students write a formal research paper as an introduction to the dissertation research process. Satisfactory-fail only.

Econ 693. Workshops. Cr. arr. Repeatable. *Prereq: 6 graduate credits in chosen field.* Satisfactory-fail only.

Econ 699. Research for Thesis or Dissertation. Cr. arr. Repeatable. Satisfactory-fail only.

Educational Leadership and Policy Studies

(www.elps.hs.iastate.edu/elps/homepage.htm)

Laura Rendon, Chair of Department

Distinguished Professor: Schuh

Distinguished Professor (Emeritus): Warren

University Professors: Ebbers, Licklider, Robinson

University Professors (Emeritus): Manatt

Professors: Evans, Hagedorn, Rendon, Smith

Professors (Emeritus): Blake, Boyles, Bryan, Engel, Hopper, Huba, Jones, Kizer, Lagomarcino, Lawrence, Mccandless, Moore, Pellegreno, Vanast

Professors (Collaborators): Barak, Gardner, Pierce

Associate Professors: Hamrick, Laanan, Mcleod, Porter

Associate Professor (Emeritus): Thielen

Associate Professor (Adjunct): Tesfagiorgis

Assistant Professors: Gildersleeve, Marshall, Osei-Kofi, Patton, Starobin

Assistant Professors (Adjunct): Arthur, Gruenewald, Hill, Jackson, Payne

Senior Clinician: Scharff

Lecturers: Bradley, Cooper, Coppernoll, Drake, Duree, Englin, Forsythe, Gansemer-Topf, Holcomb, Kimpston, Saunders, Shahjahan, Steven

Clinician: Book, Ratigan, Westerman-Beatty

Departmental Mission, Vision and Goals statements

Mission:

The mission of the Department of Educational Leadership and Policy Studies is to advance the quality and effectiveness of educational institutions and individuals engaged in education. The department is guided by the missions of Iowa State University and the College of Human Sciences and embodies the concepts of the land-grant tradition of teaching, research, and service. The department is dedicated to enhancing the intellectual, cultural, social, and ethical potential of students and faculty for the benefit of Iowa, the nation, and the world. Specifically, the Department of Educational Leadership and Policy Studies:

•Provides graduate degree and career preparation programs, coursework, and other learning opportunities for students and practitioners.

•Conducts and disseminates basic and applied research for the advancement of educational theory and practice.

•Provides professional service for institutions, individuals, and organizations at all levels of education.

Vision:

Research All Educational Leadership and Policy Studies faculty create and disseminate knowledge and promote educational inquiry that enhances educational practices at local, state, national, and international levels.

Teaching All Educational Leadership and Policy Studies faculty engage in teaching that is consonant with the principles of adult learning and effective teaching that help students develop critical thinking and professionally relevant skills, and that provides a foundation for the application of knowledge to practice.

Service All Educational Leadership and Policy Studies faculty, using their professional expertise, work with educators, educational institutions, and other constituent groups to solve problems.

Advising All Educational Leadership and Policy Studies faculty foster students' professional and personal growth by guiding and inspiring them to formulate and complete relevant programs of study and to conduct high quality research.

Curricula/Program The Educational Leadership and Policy Studies faculty develop and implement futuristic curricula and programs to ensure that students learn to think critically and perform their professional roles in an exemplary fashion.

General Goals:

The general goals of the department, and hence of each of its program areas and affiliated programs, are to:

•Conduct high quality graduate education programs, both on- and off-campus, for students seeking graduate degrees in a major in education and/or seeking professional licensure as school service personnel.

•Establish appropriate conditions, opportunities, and resources with which both faculty and graduate students may engage in scholarly activities.

•Assist the educational enterprise of Iowa in development by utilizing, when appropriate, the talents and expertise of the faculty and graduate student body in such activities as workshops, conferences, and consultation in small groups, both on- and off-campus.

Graduate Study

Degrees The Department of Educational Leadership and Policy Studies -- ELPS -- offers work for the degrees master of science, master of education, certificate of advanced studies, and doctor of philosophy with a major in education. ELPS also offers minor work to students majoring in other fields of study. At the master's level, students may specialize in educational administration; higher education; and research and evaluation. Interested students should consult the specific program area for master's degree information related to that program.

Students may complete the Ph.D. with a major in education and a specialization in educational leadership with emphasis in either educational administration or higher education. Specific information about the requirements of the Ph.D. degree is available from the departmental office or on the web (www.elps.hs.iastate.edu/elps/elpsdoc.htm).

The following information refers only to the Ph.D. program:

Prerequisites Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition it is preferred that students complete a master's degree and 3-5 years of professional experience.

Learning Opportunities Doctoral students in Educational Leadership and Policy Studies will complete seminars, laboratory experiences, field experiences, independent research, and a capstone experience course. In addition to the common experiences noted above, students will each select an intellectual content area that will prepare them to work in the setting of their choice.

Careers Graduates of the doctoral program are prepared to serve as leaders in various educational settings, including school administration, community colleges, public and private colleges and universities, and public and private educational agencies.

Outcomes Graduates of the Ph.D. program, regardless of the emphasis chosen, possess skills and knowledge related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- •Work effectively with individuals and groups.
- •Engage in ethical decision-making and management of resources to accomplish goals.
- •Engage in scholarly inquiry.
- •Express ideas clearly, both orally and in writing.
- •Articulate their values, beliefs, and Philosophy of life.
- •Relate sensitively to individuals from diverse backgrounds.
- •Use the principles of program evaluation and assessment intelligently.
- •Have a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
- •Articulate the concepts, theories, and practices related to the educational content area emphasized in their studies.

Other Related Programs Other graduate programs related to education (including Interdisciplinary Graduate Studies) may be more suited to the interests of potential students on the basis of previous education and experiences as well as future plans and needs. Potential students should refer to programs in the Departments of Agricultural Education and Studies, Curriculum and Instruction, Family and Consumer Sciences Education and Studies, Kinesiology, and Interdisciplinary Graduate Studies, or to graduate level course offerings within the other departments, to determine if these offerings may be more closely matched with their career interests.

The following information refers only to the masters level programs:

Prerequisites Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Educational Administration (EdAdm)

Scott McLeod, Program Coordinator

Degrees and Certificates Several programs are offered: (1) master of science degree, with thesis or creative component, in elementary or secondary school administration; (2) master of education practitioner; (3) advanced study leading to principal's license; (4) certificate of advanced studies providing post-master's training for superintendency licensure; and (5) doctor of philosophy with major in education and specialization in educational leadership. Courses are scheduled with consideration for cohort-collegial teams or groups.

Emphasis The Educational Administration Program places dual emphasis on preparation of professional educational administrators and on the academic/scholarly aspects of educational leadership and management.

Prerequisites Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities Students will complete courses, laboratory experiences, field experiences, and independent research so that they can effectively serve in leadership roles.

Careers Graduates of Master's Degree and Certificate of Advanced Study Programs in Educational Administration are prepared for leadership roles in Pre K-12 school districts and education agencies, typically as building-level principals, assistant principals, curriculum directors, and central office administrators. Doctoral graduates are prepared for PreK-12 leadership roles and academic or leadership positions in higher education.

Outcomes Graduates of the Certificate of Advanced Studies Program will possess administrative and leadership skills necessary for the superintendency and central office administration. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

•Serve as visionary leaders, with effective skills in curricular and instructional leadership.
•Work effectively with individuals and groups, both within the district and community, to create and sustain a positive learning culture.
•Engage in ethical decision-making and effective management of human, material, and financial resources to accomplish district goals.
•Express ideas clearly to various publics, both orally and in writing.
•Articulate their values, beliefs, and Philosophies of education.
•Relate sensitively to individuals from diverse backgrounds.
•Access and utilize research information and technology to assist with organizational improvement.
•Translate educational administration concepts and theories into sound management and leadership practices.

Graduates of the Master's Program with a specialization in educational administration and the Principal Licensure Program possess administrative and leadership skills necessary for PreK-12 building-level leadership roles. Upon program completion, each student will possess the knowledge and skills to:

•Work effectively with all members of the school community to create a shared vision of learning, which builds upon the formation of a shared understanding of the purposes of schooling in a pluralistic Society.

•Demonstrate effective skills in collaborative instructional leadership, including an understanding of curriculum standards, principles of effective teaching practices, and effective assessment practices that lead to improved student learning.

•Implement a system of shared governance and empower faculty, staff, students, and families in the school improvement process.
•Create and sustain a safe and caring school culture that values diversity and maintains a commitment to equity in school practices.
•Engage in ethical and moral leadership practices and the effective management of human, material, and financial resources to accomplish school goals.
•Work collaboratively with internal and external stakeholders in responding to school needs and providing community resources to support the learning process.
•Access research and use data to inform teaching and learning practices and support the process of continuous improvement.
•Apply various technologies to support and enhance administrative and instructional purposes.
•Use leadership skills to transform the school into a learning community that promotes change and sustains school improvement initiatives.
•Engage all members of the school community in critical inquiry and reflection, to promote the belief that learning is a lifelong endeavor for every individual.

Graduates of the Ph.D. Program with a specialization in educational administration will possess skills and knowledge related to the six core domains: leadership, educational research, communication, educational evaluation, educational foundations, and educational technology. By the time of graduation, students will demonstrate the necessary skills and knowledge for those outcomes as listed under the ELPS Ph.D. program outcomes.

Courses primarily for graduate students, open to qualified undergraduate students

EdAdm 541. Principles of Educational Leadership. (3-0) Cr. 3. F.S.SS. *Prereq: Teacher licensure and permission of instructor.* Basic principles of educational organizations, including an understanding of organizational behavior and theoretical approaches to administration. Exploration of substantive elements related to school reform, such as leadership, the change process, current issues in education, and developing a shared vision and mission.

EdAdm 551. Supervision for Learning Environments. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Study of effective classroom instructional practices that reflect current principles of learning. Understanding and practice of supervisory techniques that support teachers in improving the teaching and learning process, including skills in observational data collection, data analysis, collaboration, and conferencing skills.

EdAdm 552. Current Issues in Site-Level Leadership. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Essential tasks of building-level leadership and management in contemporary school settings, including: curriculum and organizational structure, theory and practice of scheduling, financial management, roles and responsibilities of governance, communication and public relations skills, home/parental involvement and relationships, project and crisis management, technology integration, school climate and culture, effective student support programs such as counseling and guidance, attendance and discipline.

EdAdm 554. Leading School Reform. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Study of principles of transformational leadership and collaborative decision-making skills. Leadership activities that facilitate the development of a school culture that embraces change and school reforms that result in high quality schools dedicated to improved student achievement.

EdAdm 556. School Systems as Learning Cultures. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Practical and theoretical perspectives on school administrative problems from critical pedagogical studies and research. Exploration of related issues such as cultural literacy, forms of authority and control, and other historical problems of schools in dealing with minorities and culturally different persons.

EdAdm 557. Human Resource Development for Learning. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Leadership theory and practice that focuses on the professional development of school staff to promote improved student learning. Principles of school personnel evaluation; legal issues related to hiring, retention, and dismissal; evaluation models for professional and classified staff; and effective professional development models to support lifelong learning and reflective practice.

EdAdm 558. Diverse Learning Needs. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Learner needs will be examined from major psycho/social perspectives with stress upon developmental phases of normal growth along with common problems encountered in schools. Issues of racism, gender bias, and Socio-economic problems that influence learner responsiveness to school curricula and administrative regulations, routines, and legal requirements.

EdAdm 559. Curriculum Leadership. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Generic administrative approaches to the design and delivery of elementary and secondary school curricula including the study of the organizations for learning; cognition and learning theories; validation; concepts of balance; school goals, student assessments and reporting of progress, alignment, and professional development; development of curriculum guides; mapping; employing national standards and benchmarks.

EdAdm 575. Education Law and Ethics. (3-0) Cr. 3. F.S.SS. *Prereq: 541.* Examination of constitutional, statutory, and judicial provisions as a basis for the legal operation of educational institutions. Rights and ethical responsibilities of school leaders are examined in relation to their roles and responsibilities with boards, other school personnel, and students.

EdAdm 590. Special Topics. Cr. arr. Repeatable. *Prereq: 9 credits in education.*

EdAdm 591. Supervised Field Experience. Cr. arr. Repeatable. *Prereq: 541 and admission to program and instructor's approval.* Supervised on-the-job field experience in special areas.
A. Elementary Principal
B. Secondary Principal

EdAdm 593. Workshops. Cr. arr. *Prereq: 9 credits in education.*

EdAdm 599. Creative Component Development. Cr. arr. *Prereq: 9 credits in educational administration.*

x*Courses for graduate students*

EdAdm 601. Planning Systems, Operations and School Environments. (3-0) Cr. 3. F.SS. *Prereq: 541.* Planning and management theories, assumptions, strategies, and tactics within belief systems; development of vision and mission positions; strategic goals; objectives and operational tactics to attain them, with emphasis on facility renovation and school construction projects.

EdAdm 602. Human Resource Development and Negotiations. (3-0) Cr. 3. S.SS. *Prereq: 541.* Development and practice of collective negotiations within human resource development concepts and strategies, with emphasis on creating and implementing "win-win" approaches that enhance system productivity and performance. Specific contract language and concepts which enhance system effectiveness will be highlighted.

EdAdm 603. Personnel Evaluation and System Assessment Practices. (3-0) Cr. 3. *Prereq: 541.* Theory, strategies, and systems for supervising programs and personnel in school districts and independent schools. Focuses on the principal, cabinet level administrator, e.g., director, headmaster, or assistant superintendent for instruction.

EdAdm 604. Theories of Leadership. (3-0) Cr. 3. F.SS. *Prereq: 541.* Specific leadership theories and models will be studied with an emphasis on: organization building and constructivist strategies for teachers; developing and assessing internal and external support groups for schools; and organizational capacity building.

EdAdm 605. Current Practices of the Superintendency. (3-0) Cr. 3. S.SS. *Prereq: 541.* The historical development of the American Superintendency in public education, problems and pitfalls, and politics and tensions separating executive actions from board policy formulation; executive challenges among contemporary educational problems of resource acquisition and allocation; collaborative relationships; union/system issues; system changes and capacity building models.

EdAdm 606. The Administration of Technology Systems. (3-0) Cr. 3. F.SS. *Prereq: 541.* The design, acquisition and operations of technology in educational administration; accounting; personnel record keeping and health system interfaces; compensation practices, staff development, and instruction record keeping, maintenance and groups.

EdAdm 607. Advanced Education Law. (3-0) Cr. 3. S.SS. *Prereq: 575.* Emerging issues of school case law and litigation as it pertains to school/student safety; student/teacher relationships; administrative authority/oversight; taxation and abatement; home schooling issues; censorship of books and curricula; student clubs and religious practices.

EdAdm 608. Administrative Problems. (3-0) Cr. 3. F.SS. *Prereq: 541.* A case study approach to the resolution of problems in educational administration. Emphasis on decision-making, conflict resolution, and communication using actual situations.

EdAdm 609. Instructional Management. (3-0) Cr. 3. F.SS. *Prereq: 541.* Theories and practices of instructional management including curriculum audits, classroom observations, and analytical models assessing teacher interactions with students. Strategies of improving assessment of teacher interactions with students. Strategies of improving pupil resiliency and achievement will be highlighted. Mapping of curriculum configurations in classrooms will be applied to the use of national/international standards.

EdAdm 611. Superintendent/Board Relations. (3-0) Cr. 3. F.SS. *Prereq: 541.* An historical analysis of the development of governance systems in American public education, and contemporary issues and problems confronting effective school district governance.

EdAdm 612. School Finance and Business Management. (3-0) Cr. 3. S.SS. *Prereq: 541.* Contemporary business and risk management practices, including: financial management and banking; investment of funds; cash flow projections; accounting practices, and school budget development concepts and usage. The functions and duties of school business personnel will be related to specific business and fiduciary tasks.

EdAdm 615. Seminar. Cr. arr. Repeatable. In-depth study of administrative topics of contemporary interest and importance.
A. Client Focus
B. Research
C. Quality Improvement
D. Special Services
E. Assessment
F. Leadership

EdAdm 690. Advanced Special Topics. Cr. arr. Repeatable. *Prereq: 9 credits in educational administration.*

EdAdm 691. Internship. (Cr. 1-3. Repeatable, maximum of 3 credits. *Prereq: 541, admission to program, and instructor's approval.* Supervised on-the-job field experience in special areas.

EdAdm 699. Dissertation Research. Cr. arr. Repeatable. *Prereq: 9 credits in education.*

Educational Leadership and Policy Studies (EL PS)

Courses for graduate students

EL PS 615. Thematic Seminars. Cr. 1. F.S.SS. *Prereq: Admission to educational leadership doctoral program.*
A. Communication and Team Building
B. Governance, Politics and Policies
C. Law, Equity, Equality
D. Ethics, Justice, and Caring
E. Problem Solving and Planning
F. Critical and Creative Thinking

EL PS 616. Capstone Experience. Cr. 3. F.S. *Prereq: 4 credits of 615.* This experience is designed to explore a topic addressed in one of the thematic seminars. The product of the capstone experience is a written paper of sufficient quality to be submitted to a scholarly journal for review.

Higher Education (Hg Ed)

Frankie Laanan, Program Coordinators

Degrees Higher Education offers work for the master of science degree with thesis and master of education degree (non-thesis) and a specialization in higher education, as well as postgraduate professional development. A community college leadership certificate program and a community college teaching and learning certificate program are also offered.

The Master's Program in Higher Education

Emphasis The Higher Education program provides graduate instruction and leadership development in community college education, student affairs practice, institutional research, post-secondary curriculum, and higher education administration.

Prerequisites Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities Master's students in Higher Education will complete courses, practical experiences, and independent research or a culminating experience that will enable them to serve as leaders in various educational settings.

Careers Master's students in Higher Education are prepared for entry level positions in student affairs administration, general institutional administration, teaching positions in community colleges, and support positions in post-secondary settings.

Outcomes Graduates of the Master's Program in Higher Education with a specialization in student affairs will demonstrate leadership in student affairs settings. By the time of graduation, students will possess the necessary skills and knowledge to:

- Demonstrate effective oral communication.
- Effectively communicate in writing.
- Work effectively with a diverse student population.
- Employ interventions designed to facilitate the development and learning of college students.
- Create, design, and implement programs and interventions.
- Effectively advise students individually and in groups.
- Organize and administrate student services in post-secondary settings.
- Conduct basic assessment, evaluation, and research.

Graduates of the Master's Program in Higher Education with a specialization in community college teaching and learning will possess teaching and learning leadership skills. By the time of graduation students will possess the necessary skills and knowledge to:

- Facilitate college student learning.
- Employ pedagogical techniques.
- Demonstrate a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
- Use technology effectively in learning and organizational processes.
- Articulate the concepts, theories and practices related to the content of higher education as emphasized in their course work.
- Develop curriculum.
- Assess student learning.
- Understand the Philosophy, organization, functions, and current issues of community colleges.

Graduates of the Master's Program in Higher Education with a specialization in community college administration will demonstrate leadership in community college settings. By the time of graduation, students will possess the necessary skills and knowledge to:

- Create positive environments for community college students.
- Perform administrative functions in community college settings.
- Assist community college students with the academic and personal issues they face.
- Develop effective teaching and learning strategies.
- Work effectively with diverse student populations.
- Shape community college curricula.

The Ph.D. Program in Higher Education

Emphasis The Ph.D. in education with a specialization in educational leadership includes an emphasis on higher education. This program is designed to prepare leaders for post-secondary settings and is concerned with advanced study and independent research on various topics related to post-secondary settings. See departmental overview of the Ph.D. degree in educational leadership.

Prerequisites Prerequisite to doctoral work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition, students are expected to have completed a master's degree and 3-5 years of professional work experience in higher education.

Learning Opportunities Doctoral students will complete courses, laboratory experiences, field experiences, independent research, a capstone experience, and a dissertation so that they can Serve as leaders in various post-secondary educational settings such as colleges and universities, private and state educational agencies, and other organizations concerned with post-secondary education.

Careers Typical careers available to graduates include leadership positions in post-secondary institutions, agencies, and other organizations concerned with post-secondary education. Special experiences are available to those who are interested in a career as a faculty member in post-secondary settings.

Outcomes Graduates of the doctoral program with an emphasis in higher education will possess knowledge and skills related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge for these outcomes as listed under ELPS Ph.D. program outcomes.

Courses open to community college faculty members only

Hg Ed 420. Introduction to Vocational Technical Teaching at Community Colleges. (3-0) Cr. 3. F. Examines the competencies for successful teaching in vocational technical programs; a focus on lesson planning, motivating students, teaching methods, time management, and evaluation.

Hg Ed 421. Vocational Technical Teaching Methods at Community Colleges. (3-0) Cr. 3. S. *Prereq: 420.* Develops competencies necessary to identify, develop, implement, and evaluate collaborative learning, learning to learn, and other classroom and lab/clinic teaching techniques.

Hg Ed 422. Vocational Technical Curriculum at Community Colleges. (Dual-listed with 522). (3-0) Cr. 3. F. *Prereq: 421.* With a focus on alignment and

accountability develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges.

Hg Ed 423. Vocational Technical Assessment at Community Colleges. (Dual-listed with 523). (3-0) Cr. 3. S. *Prereq: 422.* With a focus on classroom assessment develops competencies necessary to identify, develop, empower, and evaluate teaching and learning success.

Courses primarily for graduate students, open to qualified undergraduate students

Hg Ed 504. Higher Education in the United States. (3-0) Cr. 3. S. *Prereq: Graduate classification.* Historical development of higher education; diversity, functions, and Philosophies of colleges and universities; federal and state roles; review of general, liberal, technical, graduate, and professional education.

Hg Ed 522. Vocational Technical Curriculum at Community Colleges. (Dual-listed with 422). (3-0) Cr. 3. F. *Prereq: Hg Ed 550.* With a focus on alignment and accountability develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges.

Hg Ed 523. Vocational Technical Assessment at Community College. (Dual-listed with 423). (3-0) Cr. 3. S. *Prereq: 522.* With a focus on classroom assessment develops competencies necessary to identify, develop, empower, and evaluate teaching and learning success.

Hg Ed 540. Foundations of Leadership: Learning, Ethics, Self and Interaction. (2-0) Cr. 2. F. *Prereq: permission of instructor.* Serving as an introduction to developing practicing leaders, this course will create the foundation upon which enduring understanding of leadership will be built. Specifically explored will be learning as the foundation of human enterprise, everyday leadership, determination of common good, roots of individual's actions, sensitivity to others, merits of divergent ideas, questioning the Status quo, ethics as personal responsibility and choosing to grow.

Hg Ed 541. Learning, Leadership, Ethics and Community. (2-0) Cr. 2. S. *Prereq: permission of instructor.* Serving as the second semester in a program to develop practicing leaders, this course will build upon the foundation started first semester to help students embrace the enduring understandings of leadership. Specifically explored will be team learning and the effect on individuals, skills required for a team to move forward, importance of decisions based on the good of the community, reflection as a means of enhancing learning, and interconnectedness of the individual, the community, and the world.

Hg Ed 542. Learning, Leadership, Ethics, and Teams; Knowing, Doing and Being. (2-0) Cr. 2. F. *Prereq: permission of instructor.* The overall purpose of this course is to expand the foundation started in Foundations of Leadership: Learning, Ethics, Self and Interactions and Learning, Leadership, Ethics and Community for developing practicing leadership. The focus will shift from a naive understanding of the concepts of self within a team and community to a more sophisticated understanding of knowing, being and doing leadership.

Hg Ed 543. Learning, Leadership, Ethics and Teams in Action. (2-0) Cr. 2. S. *Prereq: permission of instructor.* The purpose of this last (in a series of four) course is to allow students to put their knowledge, skills, and abilities related to leadership, learning, Ethics and Teams into practice. In addition to planning and implementing a major service learning project, the focus will be on the next wave of the study of leadership - connecting leadership to the research about the brain and human learning.

Hg Ed 544. Foundations of Leadership & Learning. (3-0) Cr. 3. F. *Prereq: graduate student classification.* First of two-course series to help leaders develop the knowledge and skills to engage the collective capacity of a group to think, learn, and achieve important purpose. The foundation for developing deep understanding about leadership, learning, and the relationships therein. Focus on application of recent knowledge about human learning in the professional practice of leadership. Relationship leadership model and relationship to other leadership models, theories, and concepts; current theories of human learning (including expert/novice and transfer of learning), and interrelationships with leadership practice; critical understanding of self; facilitating learning for others; metacognition as a habit of mind; fundamentals of group interaction theories; social interdependence, communication, trusting, trustworthy goals, decision-making, cohesion, controversy, team development; power, resources, and development of community.

Hg Ed 545. Connecting Leadership & Learning in Practice. (3-0) Cr. 3. F. *Prereq: Graduate student classification and completion of Hg Ed 544.* Second of a two-course series designed to help leaders develop the knowledge and skills to best engage the collective capacity of a group to think, learn and achieve important purpose. Builds on foundation course to support students in creating applications of the relationships between leadership and learning. Focus on developing the habits of mind and habits of practice to best use knowledge about human learning in the professional practice of leadership. Applications of relational leadership model; applications of group interaction theories; development and implementation of action plans to achieve measurable goals; application of current theories of human learning as they relate to leadership; exploration of the fundamentals of emotional intelligence and the impacts on leadership; developing critical habits of mind to practice leadership focused on learning.

Hg Ed 550. Teaching, Learning and Leadership. (3-0) Cr. 3. F. *Prereq: Teacher licensure.* Current issues and practices in community college teaching and learning, and the roles and responsibilities of teachers as leaders.

Hg Ed 561. College Teaching. (3-0) Cr. 3. *Prereq: 6 graduate credits.* Educational theories, methods and strategies for the improvement of college instruction. Assist potential college instructors in developing knowledge of protocol, assessment, and the scholarship and art of teaching. Emphasis on the unique challenge of college teaching in a changing student population environment.

Hg Ed 562. Curriculum Development in Colleges. (3-0) Cr. 3. *Prereq: Graduate classification.* Modes of curriculum design, development, and change in colleges. Development of curricular leadership and evaluation strategies.

Hg Ed 568. Global Education Policy Analysis. (3-0) Cr. 3. *Prereq: 504.* Assessment of global education policy issues in education. Analysis of policies, implementation strategies, and policy outcomes.

Hg Ed 570. Current Topics in Student Affairs. Cr. arr. *Prereq: Graduate classification.* Current issues and new directions in student affairs practice. Topics developed to the specific needs of student affairs professionals. Primarily for off-campus.
D. Residential Life
G. Student Affairs Institute
H. Student Diversity

Hg Ed 574. Student Affairs Practice in Higher Education. (3-0) Cr. 3. F. *Prereq: Graduate classification, admission to Higher Education Program.* An introduction to the field of student affairs practice with a consideration of student activities, counseling services, financial aid, admissions, student conduct, academic advising, and residential programs; includes community college programs.

Hg Ed 575. Organization and Administration of Student Affairs. (3-0) Cr. 3. S. *Prereq: Admission to Higher Education Program, 574.* Organization structures, role and function of student affairs staff; policies and decision-making for student affairs practice.

Hg Ed 576. Student Development in Higher Education. (3-0) Cr. 3. F. *Prereq: Admission to Higher Education Program.* Theories of student development and their applications in student affairs programs, services, and activities are reviewed. Emphasis is placed on psychosocial, cognitive developmental, and learning theories.

Hg Ed 577. Campus Environments and Cultures. (3-0) Cr. 3. F. *Prereq: Admission to Higher Education Program.* Study of the impact of the college environment on students and use of environmental theory to create positive learning situations for students.

Hg Ed 578. Students in American Higher Education. (3-0) Cr. 3. F. *Prereq: Admission to Higher Education Program.* The relationship between college students and characteristics from 1950 to the present. Traditional assumptions about the impact of higher education on students will be reviewed and challenged. Campus issues and concerns relative to commuters and residential life. Participants will analyze institutional responses to students through college missions, organizational development, structure, core curriculum and retention.

Hg Ed 579. Counseling and Group Dynamics in Post-secondary Settings. (3-0) Cr. 3. F. *Prereq: 574, 576.* Development of effective, basic counseling skills. Understanding of group dynamics. Ability to work effectively in groups.

Hg Ed 580. Current Topics in Community Colleges. (1-3) Cr. arr. *Prereq: Graduate classification.* Current issues and new directions in community college education. Topics developed to the specific needs of colleges for off-campus.
A. Student Needs
B. General and Liberal Education
C. Counseling and Advising
D. Adult and Continuing Education
E. Development and Remedial Education
F. Student Services
G. Faculty and Staff Evaluation
H. Organization and Administration
I. Learning and Teaching
J. Human Relations

Hg Ed 582. The Comprehensive Community College. (3-0) Cr. 3. *Prereq: Graduate classification.* The community college as a unique social and educational institution: its history, philosophy, functions, programs, faculty and student characteristics, organization and finance, trends, and issues. Reviews current research and exemplary community college practices internationally, nationally, and in Iowa.

Hg Ed 590. Special Topics. Cr. arr. *Prereq: 9 credits in education.* Independent study on specific topics arranged with an instructor.
A. Student Services
B. Community Colleges
C. Current Issues
D. International Higher Education
E. Federal and State Affairs
F. Law in Higher Education
G. Institutional Research

Hg Ed 591. Supervised Field Experience. Cr. arr. Repeatable. *Prereq: 9 credits graduate work.* Supervised on-the-job field experience.

Hg Ed 593. Workshops. Cr. arr. Repeatable. *Prereq: 15 credits in education.*

Hg Ed 598. Capstone Seminar. (3-0) Cr. 3. S. *Prereq: Completion of 30 credits in EL PS.* This course is designed to integrate the learning experiences of students completing the Master's Degree Program in higher education. Such issues as ethics, continuing professional development, career planning and leadership will be explored.

Hg Ed 599. Creative Component. Cr. arr. *Prereq: 9 credits in education.*

Courses for graduate students

Hg Ed 615. Seminars in Higher Education. Cr. arr.
A. Student Services
B. Community Colleges
C. Current Issues
D. International Higher Education
E. Federal and State Affairs
F. Law in Higher Education
G. Institutional Research
H. Research Designs in Higher Education

Hg Ed 664. College Organization and Administration. (3-0) Cr. 3. F. *Prereq: 504.* Administrative organization and behavior: communications, leadership, finance, strategic planning, and institutional governance.

Hg Ed 665. Financing Higher Education. (3-0) Cr. 3. S. *Prereq: 504.* Lectures, discussions, and individual investigation relating to financial administration in colleges and universities. Budgeting, auxiliary enterprises, administration of financial planning, fund raising, examination of theories on expenditures. Designed for persons aspiring to serve as college administrators.

Hg Ed 666. Academic Issues and Cultures. (3-0) Cr. 3. S. *Prereq: 504.* Examination of institutional culture and issues in higher education focusing on the roles and responsibilities of faculty and academic administrators.

Hg Ed 676. Student Development Theory II. (3-0) Cr. 3. S. *Prereq: 576.* Life span approaches to student development, social identity development, and spiritual development with emphasis on application of these theories in student affairs practice.

Hg Ed 690. Advanced Special Topics. Cr. arr. Repeatable. *Prereq: 9 credits in education.*

Hg Ed 699. Research. Cr. arr. Repeatable. *Prereq: 9 credits in education.*

Organizational Learning and Human Resource Development (OLHRD)

Courses primarily for graduate students, open to qualified undergraduate students

OLHRD 541. Adult Learning. (3-0) Cr. 3. Examines how adults acquire and use knowledge, skills, and attitudes within organizational settings; individual differences in learning as well as the principles and elements of the learning organization.

OLHRD 544. Performance Improvement and Change Through Learning Interventions. (3-0) Cr. 3. *Prereq: OLHRD 541, 542.* Examines the characteristics and elements of the performance improvement and change process, with special attention to the roles and responsibilities of employees, managers, and organizations when improving individual and organizational learning.

OLHRD 545. Learning Acquisition, Transfer, and Evaluation. (3-0) Cr. 3. *Prereq: OLHRD 541, 542, 544.* Critical examination of learning acquisition, transfer, and evaluation barriers, partnerships, strategies, and activities; and the roles and responsibilities of human resource development professionals, managers, employees, and organizations in the application and evaluation of learning on the job.

Research and Evaluation (ResEv)

John Schuh and Linda Serra Hagedorn, Program Co-Coordinators

Degree Research and Evaluation offers work for the Master of Science degree with thesis with a specialization in research and evaluation.

Emphasis Research and Evaluation students receive a broad foundation in the areas of quantitative and qualitative research methodology, data analysis, assessment, and evaluation. Students select one area for in-depth study.

Prerequisites Prerequisites to major graduate work in educational leadership are completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities Students in Research and Evaluation will complete courses, laboratory experiences, field experiences, independent research and a thesis.

Careers Graduates are prepared for professional roles in institutional research, assessment of student learning, and program evaluation in post-secondary settings, school districts, and not-for-profit organizations.

Outcomes Graduates of the master's program with a specialization in research and evaluation will be prepared for leadership roles for careers in assessment and evaluation. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Articulate current issues and principles in research, program evaluation, and assessment.
- Implement various conceptual approaches to research, program evaluation, and assessment.
- Effectively use the principles and skills of research data analysis.
- Interpret data and prepare accurate and useful reports.

Courses primarily for graduate students, open to qualified undergraduate students

ResEv 550. Introduction to Educational Research. (3-0) Cr. 3. F.S.SS. Understanding the nature of quantitative and qualitative research; reviewing the literature; developing research problems and questions; research designs; data collection and analysis issues; evaluating research studies.

ResEv 552. Basic Educational Statistics. (3-0) Cr. 3. F. Statistical concepts and procedures for analyzing educational data; descriptive Statistics, correlation, t tests, and chi square with computer applications.

ResEv 553. Intermediate Educational Statistics. (3-0) Cr. 3. *Prereq: 552 or equivalent.* A continuation of Statistical concepts and procedures for analyzing educational data; inferential techniques including simple and multiple regression, multiple ANOVA, etc., with educational computer applications.

ResEv 554. Intermediate Research Methods. (3-0) Cr. 3. SS. *Prereq: 580, 553.* Intermediate quantitative and qualitative research methodology in preparation for carrying out thesis and dissertation research; problem formulation; design; data collection and analysis; interpreting and summarizing research findings.

ResEv 560. Assessing Student Learning. (3-0) Cr. 3. *Prereq: 550 or basic Statistical skills.* The purpose and techniques of formal and informal classroom assessment; rubrics, performance assessment, portfolios, paper and pencil tests, communicating assessment findings; emphasis on both theory and practical applications.**ResEv 570. Surveys in Educational Research.** (3-0) Cr. 3. S. *Prereq: ResEv 552 or equivalent.* Examination of survey design and administration in educational research. Designing surveys; developing, evaluating, and asking survey questions; survey sampling; measuring survey reliability and validity; administering mail and web surveys; decreasing survey nonresponse; conducting post-collection survey data processing; conducting survey research with integrity.

ResEv 580. Qualitative Research Methodology. (3-0) Cr. 3. *Prereq: 550.* Qualitative research procedures in education, particularly historical, philosophical, biographical, ethnographic, and case study; use of sources, principles of qualitative research, methods of data collection and analysis, field techniques, and writing of research results.

ResEv 590. Special Topics. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate standing.* Guided reading and in research and evaluation study on special topic.

ResEv 593. Workshop. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate standing.* Intensive, concentrated exposure to a special educational research or evaluation problem.

ResEv 597. Program Assessment and Evaluation. (3-0) Cr. 3. S. *Prereq: ResEv 550.* Evaluation models and professional standards. Techniques of evaluating educational programs. Emphasis on both theory and practical applications.

Courses for graduate students

ResEv 615. Current Topics in Research and Evaluation. Cr. arr. Repeatable.

ResEv 680. Critical Issues in Interpretive Methodology. (3-0) Cr. 3. S. *Prereq: 580.* An intensive reading and discussion course focusing on contemporary methodological theory for interpretive inquiry; examines how interpretive field work is conducted, how narrative and ethnographic data are theorized and analyzed, and how interpretive texts are written.

ResEv 690. Advanced Special Topics. Cr. arr. Repeatable. *Prereq: Graduate standing.* Guided reading and/or study on special topics of an advanced nature.

ResEv 699. Research. Cr. arr. Repeatable. F.S.SS.

Electrical Engineering

ecpe.ece.iastate.edu

(Administered by the Department of Electrical and Computer Engineering)

Arun Somani, Chair of Department

Distinguished Professors: Somani, Soukoulis

Distinguished Professors (Emeritus): Brown, Fouad, Lord, Nilsson, Pohm

University Professor: Jacobson

University Professor (Emeritus): Jones

Professors: Ajjarapu, Aluru, J. Bowler, Dalal, Geiger, Kamal, Kothari, Kumar, Kushner, Liu, Luecke, Mccalley, Oliver, Rover, Shinar, Weber

Professors (Emeritus): Anderson, Basart, Brearley, Brockman, Comstock, Fanslow, Hale, Horton, Hsieh, Kopplin, Melsa, Potter, Read, Sheble, Smay, Stewart, Swift, Townsend, Venkata

Professor (Adjunct): Shinar

Professor (Emeritus Adjunct): Hillesland

Professors (Collaborators): Jiles, Lee

Associate Professors: N. Bowler, Chang, Chen, Chu, Davidson, Davis, Dickerson, Dogandzic, Elia, Govindarasu, Guan, S. Kim, Song, Tirthapura, Tuttle, Tyagi, Z. Wang

Associate Professors (Emeritus): Bond, Carlson, Coady, Mericle, Pavlat, Scott, Stephenson

Associate Professors (Adjunct): Biswas, Sosonkina

Associate Professors (Collaborators): Ashlock, Salapaka

Assistant Professors: Aliprantis, Bigelow, Chaudhary, Chung, Daniels, Dong, Fayed, Hornbuckle, Jones, J. Kim, Ma, Neihart, Nguyen, Pandey, Qiao, Ramamoorthy, Stoytchev, Vaidya, Vaswani, L. Wang, Ying, Zambreno, Zhang

Assistant Professors (Adjunct): Amin, Bode

Assistant Professors (Collaborators): Balasubramaniam

Senior Lecturer: Mina, Wiersema

Undergraduate Study

For the undergraduate curriculum in electrical engineering leading to the degree bachelor of science, see *College of Engineering, Curricula.* This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The Department of Electrical and Computer Engineering at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent

advances in state-of-the-art technologies, and to prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing. Students are required to choose at least one course sequence which focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students may also take elective courses in computer networking, security, computer architecture, digital systems, and software.

The objective of the electrical engineering program at ISU is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

Expertise: Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in at least one of the following domains of communications and signal processing, controls, electromagnetics, power and energy, electronic devices, semiconductor materials, and analog and digital circuits.

Engagement: Graduates should be engaged in the engineering profession, locally and globally, contributing through the ethical, competent, and creative practice of electrical engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

Learning: Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self study, and they should demonstrate the ability to adapt in a constantly changing field.

Leadership: Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

Teamwork: Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdisciplinary backgrounds by applying engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs.

Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the bachelor of science and master of science degrees or the bachelor of science and master of science degrees. See Graduate Study for more information.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Courses for students who are not in the electrical engineering program: 442, 448. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

The degree master of science with thesis is recommended for students who intend to continue toward the doctor of philosophy degree or to undertake a career in research and development. The nonthesis master of science degree requires a creative component.

The normal prerequisite to major graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student's undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the doctor of philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental graduate minor in complex adaptive systems. Students interested in this program should see the Complex Adaptive Systems section of the catalog for requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental master of science and doctor of philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering is also a participating department in the interdepartmental master of science in information assurance program. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. *(See catalog section on Information Assurance.)*

The Department of Electrical and Computer Engineering offers a graduate certificate in electric power systems engineering. Completion of the certificate requires at least twelve credits selected from 553, 554, 555, 556, and 653. E E 653 is a repeatable course and may be used more than once to satisfy the certificate requirement.

Well qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the bachelor of science and master of science degrees or the bachelor of science and master of business administration degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

Courses primarily for undergraduate students

E E 166. Professional Programs Orientation. (Cross-listed with Cpr E). Cr. R. F.S. (1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

E E 185. Introduction to Electrical Engineering and Problem-Solving I. (2-2) Cr. 3. F.S. *Prereq: Credit or enrollment in Math 142.* Project based examples from electrical engineering. Systematic thinking process for engineering problem solving. Group problem solving. Mathematical, conceptual and computer based projects. Solving engineering problems and presenting solutions through technical reports and oral presentations. Solutions of engineering problems using computation tools and basic programming in C.

E E 186. Introduction to Electrical Engineering and Problem Solving II. (0-2) Cr. 1. S. *Prereq: 185.* Project based and hands on continuation of 185. Group skills needed to work effectively in teams. Individual interactive skills for small and large groups. Learning to use tools and methods for solving electrical engineering problems.

E E 201. Electric Circuits. (3-2) Cr. 4. F.S. *Prereq: Credit or registration in Math 267 and Phys 222.* Emphasis on Mathematical tools. Circuit elements (resistors, inductors, capacitors) and analysis methods including power and energy relationships. Network theorems. DC, sinusoidal steady-state, and transient analysis. AC power. Frequency response. Two port models. Diodes, PSPICE. Laboratory instrumentation and experimentation. Credit for only E E 201 or 442 may be used towards graduation.

E E 224. Signals and Systems I. (3-3) Cr. 4. F.S. *Prereq: 201, Math 267, Phys 222.* Mathematical preliminaries. Introduction to signals and systems. Signal manipulations. System properties. LTI systems, impulse response and convolution. Fourier Series representation and properties. Continuous and discrete-time Fourier Transforms and properties. Sampling and reconstruction. Modulation and demodulation. Applications and demonstrations using Matlab.

E E 230. Electronic Circuits and Systems. (3-3) Cr. 4. F.S. *Prereq: 201, Math 267, Phys 222.* Frequency domain characterization of electronic circuits and systems, transfer functions, sinusoidal steady state response. Time domain models of linear and nonlinear electronic circuits, linearization, small signal analysis. Stability and feedback circuits. Operational amplifiers, device models, linear and nonlinear applications, transfer function realizations. A/D and D/A converters, sources of distortions, converter linearity and spectral characterization, applications. Design and laboratory instrumentation and measurements.

E E 294. Program Discovery. (Cross-listed with Cpr E). Cr. R. *Prereq: 166 or Cpr E 166.* The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today's world. Satisfactory-fail only.

E E 298. Cooperative Education. Cr. R. F.S.SS. *Prereq: Permission of department and Engineering Career Services.* First professional work period in the cooperative education program. Students must register for this course before commencing work.

E E 303. Energy Systems and Power Electronics. (3-0) Cr. 3. F.S. *Prereq: Math 267, Phys 222. Credit or registration in 224 and 230.* Structure of competitive electric energy systems. System operation and economic optimization. Mutual inductance, transformers. Synchronous generators. Balanced three-phase circuit analysis and power calculations. Network calculations and associated numerical algorithms. Two-port circuits. Voltage regulation. Resonance and power factor correction. DC and induction motors. Power electronic circuit applications to power supplies and motor drives. Electronic loads and power quality. Nonmajor graduate credit.

E E 311. Electromagnetic Fields and Waves. (4-0) Cr. 4. F.S. *Prereq: 201, Math 265, Phys 222, credit or registration in Math 267.* Fundamentals and applications of electric and magnetic fields and materials. Electrostatics and magentostatics, potentials, capacitance and inductance, energy, force, torque. Uniform plane electromagnetic waves, Poynting vector. Transmission lines: transient and sinusoidal steady-state conditions, reflection coefficient. Nonmajor graduate credit.

E E 314. Electromagnetics for non Electrical Engineers. (3-0) Cr. 3. *Prereq: Physics 222, 112, or equivalent.* Conceptual study of electomagnetism and its application in engineering and related fields. Em fundamentals, Em spectrum, radiation, radiating systems, wireless, Moderns concepts of physics, transmission lines, high speed effects, waveguides, GPS and other related phenomena will be discussed and explained with the application in mind. Nonmajor graduate credit.

E E 322. Probabilistic Methods for Electrical Engineers. (Cross-listed with Stat). (3-0) Cr. 3. F.S. *Prereq: E E 224.* Introduction to probability with applications to electrical engineers. Sets and events, probability space, conditional probability, total probability and Bayes' rule. Discrete and continuous random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating function, multiple random variables, functions of random variables. Elements of Statistics, hypothesis testing, confidence intervals, least squares. Introduction to random processes.

E E 324. Signals and Systems II. (3-3) Cr. 4. F.S. *Prereq: 224.* Laplace and z-Transforms, properties and inverses. Applications to LTI systems and analog/digital filters. Feedback systems and stability. State-space representation and analysis. Nonmajor graduate credit.

E E 330. Integrated Electronics. (Cross-listed with Cpr E). (3-3) Cr. 4. *Prereq: 201, credit or enrollment in 230, Cpr E 281.* Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells. Credit for only one of E E 330 or 331 may be counted toward graduation. Nonmajor graduate credit.

E E 331. Electronics II. (3-3) Cr. 4. *Prereq: 230, Cpr E 288, E E 224 recommended.* I-V characteristics of diodes, BJTs, and MOSFETs. Diode and transistor circuits. Small-signal analysis and biasing techniques for amplifier circuits. CMOS digital circuit building blocks. Noise and distortion in electronic systems. Various types of sensors and their use in electronic systems. Active filters. Power Amplifiers. DC motor control circuits. Interfacing electronic circuits with programmable microcontrollers. Laboratory exercises and design projects, including a board-level system layout. Credit for only one of E E 330 or 331 may be counted toward graduation.

E E 332. Semiconductor Materials and Devices. (Cross-listed with Mat E). (3-0) Cr. 3. S. *Prereq: Phys 222 and, only for Mat E majors, Mat E 334.* Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED's. Nonmajor graduate credit.

E E 351. Introduction to Energy Systems: An Engineering Perspective. (Cross-listed with E St). (3-0) Cr. 3. Dalal. Energy-scientific, engineering and economic foundations. Energy utilization-global and national. Sectoral analysis of energy consumption. Relationship of energy consumption and production to economic growth and environment. Technology for energy production. Economic evaluation of energy utilization and production. Scientific basis for global warming. Environmental impact of energy production and utilization. Renewable energy.

E E 388. Sustainable Engineering and International Development. (Cross-listed with A E, C E, M E, Mat E). (2-2) Cr. 3. F. *Prereq: Junior classification in engineering.* Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report.

E E 394. Program Exploration. (Cross-listed with Cpr E). Cr. R. *Prereq: 294 or Cpr E 294.* Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Satisfactory-fail only.

E E 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of department and Engineering Career Services.* Summer professional work period. Students must register for this course before commencing work.

E E 397. Engineering Internship. Cr. R. Repeatable. F.S. *Prereq: Permission of department and Engineering Career Services.* One semester maximum per academic year professional work period. Students must register for this course before commencing work.

E E 398. Cooperative Education. Cr. R. F.S.SS. *Prereq: 298, permission of department and Engineering Career Services.* Second professional work period in the cooperative education program. Students must register for this course before commencing work.

E E 408. Interdisciplinary Problem Solving. (Cross-listed with I E, TSM). (3-0) Cr. 3. F.S. *Prereq: Junior or senior classification.* Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

E E 409. Interdisciplinary Systems Effectiveness. (Cross-listed with I E, TSM). (3-0) Cr. 3. F.SS. *Prereq: Junior or senior classification.* Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and project management are compared to traditional solutions. Strategy for improvements discovered using simulations. Nonmajor graduate credit.

E E 414. Microwave Engineering. (Dual-listed with 514). (3-3) Cr. 4. F. *Prereq: 230, 311.* Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators. Nonmajor graduate credit.

E E 417. Electromagnetic Radiation, Antennas, and Propagation. (Dual-listed with 517). (3-3) Cr. 4. S. *Prereq: 311.* Fundamental antenna concepts. Radiation from wire-and aperture-type sources. Radio transmission formulas. Wave and antenna polarization. Antenna arrays. Modern antenna topics. Practical antenna design. Antenna noise. Radiowave propagation in the presence of the earth and its atmosphere. Antenna measurements and computer aided analysis. Nonmajor graduate credit.

E E 418. High Speed System Engineering Measurement and Testing. (Cross-listed with Cpr E). (3-2) Cr. 4. F. *Prereq: 230 and 311.* Measurement of high speed systems and mixed signal systems. Measurement accuracy and error. Network analysis and spectrum analysis used in high speed measurement and testing. Test specification process and parametric measurement. Sampling and digital signal processing concepts. Design for testability. Testing equipment. Applications. Nonmajor graduate credit.

E E 421. Communication Systems I. (3-0) Cr. 3. F. *Prereq: 224, credit or registration in 322.* Frequency domain analysis, spectral filtering, bandwidth. Linear modulation systems. Angle modulation systems. Phase locked loop, super-heterodyne receiver. Sampling and pulse code modulation. Digital data transmission, line coding, pulse shaping, multiplexing. Nonmajor graduate credit.

E E 422. Communication Systems II. (3-0) Cr. 3. *Prereq: 421 and enrollment in 423.* Introduction to probability and random processes; Performance of analog systems with noise; Performance of digital communication with noise; optimum receivers, transmission impairments, and error rates; Introduction to information theory and coding: source coding, channel coding, channel capacity. Nonmajor graduate credit.

E E 423. Communication Systems Laboratory. (0-3) Cr. 1. *Prereq: 421, enrollment in 422.* Construction and evaluation of modulators, demodulators, modems, and other components for analog and digital communications. Design and evaluate wireless communication systems and their key components. Noise measurement. Design and construction of a communication system. Nonmajor graduate credit.

E E 424. Introduction to Digital Signal Processing. (3-3) Cr. 4. *Prereq: 324.* Sampling and reconstruction. Concepts and mathematical tools in discrete-time signal processing with examples from digital signal processing and communications. Discrete-time correlation and matched-filter receivers. Discrete Fourier transform (DFT). Fast Fourier algorithms. Z transforms. Design of finite impulse response (FIR) and infinite impulse response (IIR) filters. Realizations of discrete-time systems and quantization effects. Multi-rate signal processing. Laboratory experiments illustrating DSP implementations and applications. Nonmajor graduate credit.

E E 432. Microelectronics Fabrication Techniques. (Dual-listed with 532). (Cross-listed with Mat E). (2-4) Cr. 4. *Prereq: Phys 222, Math 267. E E 332 or Mat E 334 recommended.* Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS). Nonmajor graduate credit.

E E 435. Analog VLSI Circuit Design. (Cross-listed with Cpr E). (3-3) Cr. 4. S. *Prereq: 324, 330, 332, and either E E 322 or Stat 330.* Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies,

operational amplifiers, references, integrated filters, and data converters. Nonmajor graduate credit.

E E 438. Optoelectronic Devices and Applications. (Dual-listed with 538). (3-0) Cr. 3. *Prereq: 311, 332.* Transmission and reflection of electromagnetic plane waves. Propagation in dielectric and fiber optic waveguides. LED and laser operating principles and applications. Photodetectors and solar cells. Optical modulation and switching. Nonmajor graduate credit.

E E 439. Nanoelectronics. (3-0) Cr. 3. S. *Prereq: E E 332/Mat E 332 or Mat E 331.* Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the leading technologies for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices. Nonmajor graduate credit.

E E 442. Introduction to Circuits and Instruments. (3-2) Cr. 2. F.S. *Prereq: Phys 222, Math 267.* Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive- inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers and applications. Familiarization with common E E instrumentation and demonstration of basic principles. Credit for only 201 or 442 may be counted toward graduation; credit for 442 will not count toward graduation for E E or Cpr E majors. Nonmajor graduate credit.

E E 448. Introduction to AC Circuits and Motors. (3-2) Cr. 2. F.S. *Prereq: 303 or 441 or 442.* Half-semester course. Magnetic circuits. Power transformers. AC steady state and three-phase circuit analysis. Basic principles of operation and control of induction and single-phase motors. Nonmajor graduate credit.

E E 452. Electrical Machines and Power Electronic Drives. (2-3) Cr. 3. S. *Prereq: 303; 330 or 332; credit or registration in E E 324.* Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC, induction, and AC motors. Experiments with converter topologies, DC motors, AC motors and adjustable speed drives. Nonmajor graduate credit.

E E 455. Introduction to Energy Distribution Systems. (3-0) Cr. 3. F. *Prereq: 303, credit or registration in 324.* Overhead and underground distribution system descriptions and characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment. Nonmajor graduate credit.

E E 456. Power System Analysis I. (3-0) Cr. 3. F. *Prereq: 303, credit or registration in 324.* Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow. Nonmajor graduate credit.

E E 457. Power System Analysis II. (3-0) Cr. 3. S. *Prereq: 303, credit or registration in 324.* Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment. Nonmajor graduate credit.

E E 458. Economic Systems for Electric Power Planning. (Cross-listed with Econ). (3-0) Cr. 3. *Prereq: 303 or Econ 301.* Evolution of electric power industry. Power system operation and planning and related information systems. Linear and integer optimization methods. Short-term electricity markets and locational marginal prices. Risk management and financial derivatives. Basics of public good economics. Cost recovery models including tax treatment for transmission investments. Nonmajor graduate credit.

E E 463. Design of Electrical Systems. (1-10) Cr. 5. SS. *Prereq: 322 and completion of 24 credits in the E E core professional program, Engl 314.* Distance-education students only. Team project design experience. Emphasis on defining, planning, and implementing to achieve project objectives to meet a client's need with due consideration to professional and technical considerations of engineering design and implementation. Oral and written presentations of project achievements.

E E 465. Digital VLSI Design. (Cross-listed with Cpr E). (3-3) Cr. 4. S. *Prereq: E E 330.* Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (Soc) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

E E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, Cpr E, Engr, I E, M E, Mat E). (1-4) Cr. 3. Repeatable. F.S. *Prereq: Student must be within two semesters of graduation and receive permission of instructor.* Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

E E 475. Automatic Control Systems. (3-0) Cr. 3. F. *Prereq: 324.* Stability and performance analysis of automatic control systems. The state space, root locus, and frequency response methods for control systems design. PID control and lead-lag compensation. Computer tools for control system analysis and design. Nonmajor graduate credit.

E E 476. Control System Simulation. (2-3) Cr. 3. S. *Prereq: 475.* Computer aided techniques for feedback control system design, simulation, and implementation. Nonmajor graduate credit.

E E 488. Eddy Current Nondestructive Evaluation. (Dual-listed with 588). (Cross-listed with Mat E). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Math 265 and (Mat E 216 or 272 or E E 311 or Phys 364).* Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts.

E E 490. Independent Study. Cr. arr. *Prereq: Senior classification in electrical engineering.* Investigation of an approved topic commensurate with the student's prerequisites.
H. Honors

E E 491. Senior Design Project I and Professionalism. (Cross-listed with Cpr E). (2-3) Cr. 3. F.S. *Prereq: 322 or Cpr E 308, completion of 24 credits in the E E core professional program or 29 credits in the Cpr E core professional program, Engl 314.* Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

E E 492. Senior Design Project II. (Cross-listed with Cpr E). (1-3) Cr. 2. F.S. *Prereq: 491 or Cpr E 491.* Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

E E 494. Portfolio Assessment. (Cross-listed with Cpr E). Cr. R. *Prereq: Credit or enrollment in 491.* Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

E E 496. Modern Optics. (Cross-listed with Phys). (3-0) Cr. 3. *Prereq: Credit or enrollment in Phys 322 and 365.* Review of wave and electromagnetic theory; topics selected from: reflection/refraction, interference, geometrical optics, Fourier analysis, dispersion, coherence, Fraunhofer and Fresnel diffraction, holography, quantum optics, nonlinear optics. Nonmajor graduate credit.

E E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. *Prereq: 398, permission of department and Engineering Career Services.* Third and subsequent professional work periods in the cooperative education programs. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

E E 501. Analog and Mixed-Signal VLSI Circuit Design Techniques. (Cross-listed with Cpr E). (3-3) Cr. 4. F. *Prereq: 435.* Design techniques for analog and mixed-signal VLSI circuits. Amplifiers; operational amplifiers, transconductance amplifiers, finite gain amplifiers and current amplifiers. Linear building blocks; differential amplifiers, current mirrors, references, cascading and buffering. Performance characterization of linear integrated circuits; offset, noise, sensitivity and stability. Layout considerations, simulation, yield and modeling for high-performance linear integrated circuits.

E E 505. CMOS and BiCMOS Data Conversion Circuits. (Cross-listed with Cpr E). (3-3) Cr. 4. Alt. S., offered 2010. *Prereq: 501.* Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

E E 507. VLSI Communication Circuits. (Cross-listed with Cpr E). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 330 or 501.* Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

E E 508. Filter Design and Applications. (3-3) Cr. 4. *Prereq: 501.* Filter design concepts. Approximation and synthesis. Transformations. Continuous-time and discrete time filters. Discrete, active and integrated synthesis techniques.

E E 510. Topics in Electromagnetics. Cr. arr. Repeatable.

E E 511. Modern Optical Communications. (3-0) Cr. 3. S. *Prereq: 311.* Propagation in optical media. Optical fibers. Optical sources and detectors. Fiber optic communications systems. DWDM considerations.

E E 512. Advanced Electromagnetic Field Theory I. (3-0) Cr. 3. F. *Prereq: 413.* Review of Static electric and magnetic fields. Maxwell's equations. Circuit concepts and impedance elements. Propagation and reflection of plane waves in isotropic media. Guided electromagnetic wave. Characteristics of common waveguides and transmission lines. Propagation in anisotropic media. Special theorems and concepts. Radiation and scattering.

E E 513. Advanced Electromagnetic Field Theory II. (3-0) Cr. 3. S. *Prereq: 512.* Green's functions, perturbational and variational techniques. Analysis of microstrip lines and interconnects. Spectral domain approach, waves in layered media. Integral equations. Inverse scattering. Electromagnetic applications.

E E 514. Microwave Engineering. (Dual-listed with 414). (3-3) Cr. 4. F. *Prereq: 230, 311.* Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.

E E 516. Computational Methods in Electromagnetics. (3-0) Cr. 3. S. *Prereq: 311.* Maxwell's equations. Analytical methods. Differential equation based methods. Finite Difference and Finite Difference Time Domain Methods, Boundary Conditions. Finite Element Method, Applications to the Analysis of Practical Devices. Integral Equation Based Methods. Electric and Magnetic Field Integral Equations. Fast Solution Methods.

E E 517. Electromagnetic Radiation, Antennas, and Propagation. (Dual-listed with 417). (3-3) Cr. 4. S. *Prereq: 311.* Fundamental antenna concepts. Radiation from wire-and aperture-type sources. Radio transmission formulas. Wave and antenna polarization. Antenna arrays. Modern antenna topics. Practical antenna design. Antenna noise. Radiowave propagation in the presence of the earth and its atmosphere. Antenna measurements and computer-aided analysis.

E E 518. Microwave Remote Sensing. (Cross-listed with Agron, Mteor). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Math 265 or equivalent or permission of instructor.* Microwave remote sensing of Earth's surface and atmosphere. Overview of relevant electromagnetic theory and antenna theory. Planck emission and the radiative transfer equation. The electrical properties of natural materials at microwave frequencies. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, and soil and vegetation water content.

E E 520. Selected Topics in Communications and Signal Processing. (3-0) Cr. 3. Repeatable. Space-time processing. Multiuser communications, Wireless Communications, statistical signal processing. Pattern recognition. Coding theory. Multirate communications and signal processing. Signal processing and communications applications.

E E 521. Advanced Communications. (3-0) Cr. 3. F. *Prereq: 422, Coreq: 523.* Digital communication systems overview. Characterization of communication channels. Digital modulation and demodulation design and performance analysis. Channel capacity and error-control coding concepts. Waveform design for band-limited channels. Equalization. Wireless fading channels and performance.

E E 523. Random Processes for Communications and Signal Processing. (3-0) Cr. 3. *Prereq: 322, Math 317.* Axioms of probability; Repeated trials; Functions of a random variable and multiple random variables: covariance matrix, conditional distribution, joint distribution, moments, and joint moment generating function; Mean Square estimation; stochastic convergence; Some important stochastic processes: Random walk, Poisson, Wiener, and shot noise; Markov chaines; Power spectral analysis; Selected applications.

E E 524. Digital Signal Processing. (3-0) Cr. 3. F. *Prereq: 322, 424, Math 317.* Review: sampling and reconstruction of signals; discrete-time signals, systems, and transforms. Multi-rate digital signal processing and introduction to filter banks. Optimal linear filtering and prediction. Introductions to adaptive filtering and spectral estimation. Applications.

E E 527. Detection and Estimation Theory. (3-0) Cr. 3. S. *Prereq: 422.* Statistical estimation theory and performance measures: maximum likelihood estimation, Cramer-Rao bound, Bayesian estimation, optimal demodulation, signal design. Introduction to graphical models. Hidden Markov models and Kalman filter. Classical Statistical decision theory, decision criteria, binary and composite hypothesis tests. Error probability and Chernoff bound. Applications.

E E 528. Digital Image Processing. (3-0) Cr. 3. S. *Prereq: 322, 424.* Review of sampling, linear algebra and probability. Classical image processing topics such as image sampling and quantization, image transforms (2D Fourier, KLT, DCT, etc), image enhancement, restoration and filtering. Image analysis topics including edge detection, segmentation, registration and tracking (uses least squares estimation, EM, Kalman filter). Medical image reconstruction from tomographic projections (Radon transform, Fourier slice theorem and reconstruction algorithms using them) and Magnetic Resonance Imaging (MRI). Basic introduction to image and video compression methods.

E E 530. Selected Topics in Electronics, Microelectronics and Photonics. (3-0) Cr. 3. Repeatable. *Prereq: 332.*

E E 532. Microelectronics Fabrication Techniques. (Dual-listed with 432). (2-4) Cr. 4. *Prereq: Phys 222, Math 267. E E 332 or Mat E 331 recommended.* Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

E E 535. Physics of Semiconductors. (Cross-listed with Phys). (3-3) Cr. 4. *Prereq: 311 and 332.* Basic elements of quantum theory, Fermi Statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carriers and recombination, carrier transport at low and high fields, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

E E 536. Physics of Semiconductor Devices. (Cross-listed with Phys). (3-0) Cr. 3. *Prereq: 535.* P-n junctions, band-bending theory, tunneling phenomena, Schottky barriers, heterojunctions, bipolar transistors, field-effect transistors, negative-resistance devices and optoelectronic devices.

E E 538. Optoelectronic Devices and Applications. (Dual-listed with 438). (3-0) Cr. 3. *Prereq: 311 or 332.* Transmission and reflection of electromagnetic plane waves. Propagation in dielectric and fiber optic waveguides. Led and laser operating principles and applications. Photodetectors and solar cells. Optical modulation and switching.

E E 545. Artificial Neural Networks. (3-0) Cr. 3. F. *Prereq: 324.* Introduction to the fundamentals of artificial neural networks (ANNs). Theory and practical implementation of networks. ANNs for pattern recognition, function approximation, prediction. Activation functions, neural net architectures, supervised and unsupervised learning. Various neural network methods and architectures.

E E 547. Pattern Recognition. (3-0) Cr. 3. F. *Prereq: 324.* Mathematical formulation of pattern recognition problems and decision functions. Statistical approaches: Bayes classifier, probability density function estimation and expectation minimization. Clustering (supervised and unsupervised), learning, and neural network algorithms. Fuzzy recognition systems. Feature selection systems. Classifier comparison. Current applications.

E E 553. Steady State Analysis. (3-0) Cr. 3. F. *Prereq: 456, 457.* Power flow, economic dispatch, unit commitment, electricity markets, automatic generation control, sparse matrix techniques, interconnected operation, voltage control.

E E 554. Power System Dynamics. (3-0) Cr. 3. S. *Prereq: 456, 457, 475.* Dynamic performance of power systems with emphasis on stability. Modeling of system components and control equipment. Analysis of the dynamic behavior of the system in response to small and large disturbances.

E E 555. Advanced Energy Distribution Systems. (3-0) Cr. 3. *Prereq: 455.* Transient models of distribution components, automated system planning and distribution automation, surge protection, reliability, power quality, power electronics and intelligent systems applications.

E E 556. Power Electronic Systems. (3-0) Cr. 3. *Prereq: 452.* Converter topologies, AC/DC, DC/DC, DC/AC, AC/AC. Converter applications to do motor drives, power supplies, AC motor drives, power system utility applications (var compensators) and power quality.

E E 565. Systems Engineering and Analysis. (Cross-listed with Aer E, I E). (3-0) Cr. 3. *Prereq: Coursework in basic Statistics.* Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test, evaluation and systems engineering planning and organization. Not available for degrees in industrial engineering.

E E 566. Avionics Systems Engineering. (Cross-listed with Aer E). (3-0) Cr. 3. S. *Prereq: E E 565.* Avionics functions. Applications of systems engineering principles to avionics. Top down design of avionics systems. Automated design tools.

E E 570. Systems Engineering Analysis and Design. (3-0) Cr. 3. *Prereq: 475, 577.* Selected topics in abstract algebra, linear algebra, real analysis, functional analysis, and optimization methods in electrical engineering.

E E 573. Random Signal Analysis and Kalman Filtering. (Cross-listed with Aer E, Math, M E). (3-0) Cr. 3. F. *Prereq: E E 324 or Aer E 331 or M E 370 or 411 or Math 341 or 395.* Elementary notions of probability. Random processes. Autocorrelation and spectral functions. Estimation of spectrum from finite data. Response of linear systems to random inputs. Discrete and continuous Kalman filter theory and applications. Smoothing and prediction. Linearization of nonlinear dynamics.

E E 574. Optimal Control. (Cross-listed with Aer E, Math, M E). (3-0) Cr. 3. S. *Prereq: E E 577.* The optimal control problem. Variational approach. Pontryagin's principle, Hamilton-Jacobi equation. Dynamic programming. Time-optimal, minimum fuel, minimum energy control systems. The regulator problem. Structures and properties of optimal controls.

E E 575. Introduction to Robust Control. (Cross-listed with Math, Aer E, M E). (3-0) Cr. 3. *Prereq: E E 577.* Introduction to modern robust control. Model and signal uncertainty in control systems. Uncertainty description. Stability and performance robustness to uncertainty. Solutions to the H2, Hoo, and l1 control problems. Tools for robustness analysis and synthesis.

E E 576. Digital Feedback Control Systems. (Cross-listed with Aer E, Math, M E). (3-0) Cr. 3. F. *Prereq: E E 475 or Aer E 432 or M E 411 or 414 or Math 415; and Math 267.* Sampled data, discrete data, and the z-transform. Design of digital control systems using transform methods: root locus, frequency response and direct design methods. Design using State-space methods. Controllability, observability, pole placement, state estimators. Digital filters in control systems. Microcomputer implementation of digital filters. Finite wordlength effects. Linear quadratic optimal control in digital control systems. Simulation of digital control systems.

E E 577. Linear Systems. (Cross-listed with Aer E, Math, M E). (3-0) Cr. 3. F. *Prereq: E E 324 or Aer E 331 or M E 414 or Math 415; and Math 307.* State variable and input-output descriptions of linear continuous-time and discrete-time systems. Solution of linear dynamical equations. Controllability and observability of linear dynamical systems. Canonical descriptions of linear equations. Irreducible realizations of rational transfer function matrices. Canonical form dynamical equations. State feedback. State estimators. Decoupling by State feedback. Design of feedback systems. Stability of linear dynamical systems.

E E 578. Nonlinear Systems. (Cross-listed with Aer E, Math, M E). (3-0) Cr. 3. S. *Prereq: E E 577.* Classification of nonlinear control systems. Existence and uniqueness of solutions. Approximate analysis methods. Periodic orbits. Concept of stability and Lyapunov stability theory. Absolute stability of feedback systems. Input-output stability. Passivity.

E E 588. Eddy Current Nondestructive Evaluation. (Dual-listed with 488). (Cross-listed with M S E). (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: Math 265 and Mat E 216 or 272 or E E311 or Phys 364).* Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts.

E E 590. Special Topics. Cr. arr. Repeatable. Formulation and solution of theoretical or practical problems in electrical engineering.
A. Electromagnetic Theory
B. Control Systems
C. Communication Systems
E. Computer Engineering
F. Electric Power
G. Electrical Materials
H. Electronic Devices and Circuits
I. Signal Processing

E E 591. Seminar in Electronics, Microelectronics, and Photonics. Cr. arr. Repeatable.

E E 592. Seminar in Electromagnetics, Microwave, and Nondestructive Evaluation. Cr. 1. Repeatable. *Prereq: Graduate student Status.* Satisfactory-fail only.

E E 594. Seminar in Electric Power. Cr. arr. Repeatable.

E E 596. Seminar in Control Systems. Cr. arr. Repeatable.

E E 597. Seminar in Communications and Signal Processing. Cr. 1. Repeatable. Satisfactory-fail only.

E E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

E E 621. Coding Theory. (3-0) Cr. 3. *Prereq: 521.* Fundamentals of error-control coding techniques: coding gain, linear block codes. Galois fields. Cyclic codes: BCH, Reed-Solomon. Convolutional codes and the Viterbi algorithm. Trellis-coded modulation. Iterative decoding. Recent developments in coding theory.

E E 622. Information Theory. (3-0) Cr. 3. *Prereq: 521, 523. Information* system overview. Entropy and mutual information. Data Compression and source encoding. Discrete memoryless channel capacity. Noisy channel coding theorem. Rate distortion theory. Waveform channels. Advanced topics in information theory.

E E 653. Advanced Topics in Electric Power System Engineering. (3-0) Cr. 3. *Prereq: Permission of instructor.* Advanced topics of current interest in electric power system engineering.

E E 674. Advanced Topics in Systems Engineering. (3-0) Cr. 3. *Prereq: Permission of instructor.* Advanced topics of current interest in the areas of control theory, stochastic processes, digital signal processing, and image processing.

E E 697. Engineering Internship. (Cross-listed with Cpr E). Cr. R. Repeatable. *Prereq: Permission of department chair and Engineering Career Services, graduate classification.* One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

E E 699. Research. Cr. arr. Repeatable.

Engineering

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of Engr 160 and Engr 170 are coordinated through Engineering Student Services in Engineering Academic and Student Affairs. Course-related questions should be directed to the department or unit with responsibility for that course. The following is a list of those responsibilities:

Engr 160 Materials Science and Engineering

Engr 170 Agricultural and Biosystems Engineering

Courses primarily for undergraduate students

Engr 101. Engineering Orientation. Cr. R. F.S. Introduction to the College of Engineering and the engineering profession. Information concerning university and college policies, procedures, and resources. Undeclared sections: Considerations in choosing an engineering curriculum. Opportunities to interact with departments. Declared sections: Introduction to major-specific topics. Satisfactory-fail only.

Engr 104. LEAD Program Orientation. (1-0) Cr. 1. F. Orientation for LEAD Living/Learning Community participants. Applications of problem solving, engineering design, teamwork, study, and time management techniques and skills. Engineering professional development. Satisfactory-fail only.

Engr 105. LEAD Program Seminar. (1-0) Cr. 1. S. Seminar for LEAD Program participants in the residential learning community. Industrial tours and orientation to engineering profession. Satisfactory-fail only.

Engr 131. Learning Community Seminar. (1-0) Cr. R. F.S. Peer-mentored review of course topics in engineering undeclared learning communities. Available to students interested in engineering if in Liberal Arts and Science Open (option) major. Satisfactory-fail only.

Engr 150. Foundations of Leadership Development and Learning. (1-0) Cr. 1. F.S. *Prereq: ELP students only.* Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Satisfactory-fail only.

Engr 160. Engineering Problems with Computer Applications Laboratory. (2-2) Cr. 3. F.S.SS. *Prereq: Satisfactory scores on Mathematics placement examinations; credit or enrollment in Math 142, 165.* Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).
H. Honors. F.

Engr 170. Engineering Graphics and Introductory Design. (2-2) Cr. 3. F.S. *Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in Math 142.* Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods.

Engr 193. Academic Excellence Workshop. (0-3) Cr. 1. F.S. *Prereq: Engineering classification and concurrent enrollment in appropriate course.* Collaborative learning community workshops for LEAD participants. Satisfactory-fail only.
A. Chemistry 155 (Fall only)
B. Chemistry 165 (Spring only)
C. Chemistry 167
D. Mathematics 165
E. Mathematics 166
F. Physics 221
G. Physics 222
I. Engineering Problems-Computer Applications

Engr 320. International Experience Report. Cr. 3. F.S. *Prereq: Satisfactory completion of international work experience of at least ten weeks or nine credits of approved course work taken abroad. Permission of student's department prior to departure.* Critique of work/study abroad experience as it relates to professional development. Taken the semester after completion of work abroad or study abroad. Written report and presentation. Satisfactory-fail only.

Engr 396. Summer Internship. Cr. R. Repeatable. SS. *Prereq: Permission of Engineering Student Services advisor and Engineering Career Services.* Summer professional work period.

Engr 397. Professional Internship. Cr. R. F.S.SS. *Prereq: Permission of adviser and engineering college classification officer.* Professional or interdisciplinary work period in engineering or career-related field. Enrollment limited to one summer and/or one semester per academic year. Satisfactory-fail only.

Engr 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, Cpr E, E E, I E, M E, Mat E). (1-4) Cr. 3. Repeatable. F.S. *Prereq: Student must be within two semesters of graduation and receive permission of instructor.* Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

Engr 490. Independent Study. Cr. arr. Repeatable. *Prereq: Junior or senior classification in engineering, college approval.*
E. Entrepreneurship

Engineering Mechanics

(Administered by the Department of Aerospace Engineering)

Thomas Shih, Chair of Department

Distinguished Professors: Soukoulis, R. B. Thompson

Distinguished Professors (Emeritus): D. Thompson, Young

Professors: Chandra, Chimenti, Durbin, Holger, Kelkar, Levitas, Lu, Oliver, Rajagopalan, Rothmayer, Rudolphi, Sarkar, Schmerr, Shih, Takle, Wang, Wie, Zachary

Professors (Emeritus): Akers, Greer, Inger, Iversen, Jenison, McConnell, McDaniel, Munson, Pierson, Rizzo, Rogge, Rohach, Tannehill, Tsai, Weiss, Wilson

Professors (Adjunct): Hsu, Nakagawa

Associate Professors: Bastawros, Bryden, Dayal, Hilliard, Hindman, Mitra, Sherman, Sturges

Associate Professors (Emeritus): Hermann, Seversike, Trulin, Vogel

Associate Professors (Adjunct): Biner, Cox, Roberts

Associate Professor (Collaborator): Flatau

Assistant Professors: Chung, Holland, Hong, Hu, Jacobson

Assistant Professors (Adjunct): Byrd, Gray

Assistant Professor (Collaborator): Chavez

Senior Lecturers: Deam, Haugli, Schaefer

Lecturer: Boylan

Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and a minimum of 8 research credits. It has strong research emphasis and is recommended for students who anticipate entering a doctoral program later. At least 30 credits of acceptable graduate work are required for the degree.

The master of engineering degree does not require either research credits or a thesis. However, at least two credits of acceptable creative component and at least 26 credits of acceptable graduate coursework are required. A minimum of 30 credits of acceptable graduate work is required for the degree. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

Credits for creative component will be obtained by registering for E M 599. A written report and an oral presentation will be given to the student's graduate committee.

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Courses primarily for undergraduate students

E M 274. Statics of Engineering. (3-0) Cr. 3. F.S.SS. *Prereq: Credit or enrollment in Math 166; credit or enrollment in Phys 111 or 221.* Vector and scalar treatment of coplanar and noncoplanar force systems. Resultants, equilibrium, friction, centroids, second moments of areas, principal second moments of area, radius of gyration, internal forces, shear and bending moment diagrams.
H. Honors. F.S.

E M 324. Mechanics of Materials. (3-0) Cr. 3. F.S.SS. *Prereq: 274.* Plane stress, plane strain, stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, flexural, and combined loadings. Elementary considerations of theories of failure, buckling. Nonmajor graduate credit.

E M 327. Mechanics of Materials Laboratory. (0-2) Cr. 1. F.S.SS. *Prereq: Credit or enrollment in 324.* Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 324. Use of strain measuring devices. Preparation of reports. Students who are not present for the first laboratory meeting of their own sections may qualify for continuation in the course only by attending the first laboratory meeting of some other section of the course. Nonmajor graduate credit.

E M 345. Dynamics. (3-0) Cr. 3. F.S.SS. *Prereq: 274, credit or enrollment in Math 266 or 267.* Particle and rigid body kinematics, Newton's laws of motion, kinetics of plane motion, rigid body problems using work-energy, linear, and angular impulse-momentum principles, vibrations. Nonmajor graduate credit.

E M 350. Introduction to Nondestructive Evaluation Engineering. (3-0) Cr. 3. S. *Prereq: 324, Math 266 or 267, Phys 222.* The Physics of ultrasonic, eddy current, and x-ray testing. Introduction to linear system concepts, wave propagation, electromagnestics and radiation. Models of the generation, scattering and reception of waves in ultrasonics, the electrical impedance changes of eddy current testing, and image formation process for x-rays. Pattern recognition methods for the interpretation of measured responses. Nonmajor graduate credit.

E M 362. Principles of Nondestructive Testing. (Cross-listed with Mat E). (3-0) Cr. 3. S. *Prereq: Phys 112 or 222.* Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; materials to which applicable; types of defects detectable; calibration standards, and reliability safety precautions. Nonmajor graduate credit.

E M 362L. Nondestructive Testing Laboratory. (Cross-listed with Mat E). (0-3) Cr. 1. S. *Prereq: Credit or enrollment in 362.* Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories. Nonmajor graduate credit.

E M 378. Mechanics of Fluids. (2-2) Cr. 3. F.S.SS. *Prereq: 274.* Properties of fluids. Fluid Statics. Kinematics and kinetics of fluid flow. Mass, momentum, and energy conservation laws; dimensional analysis; flow in pipes and channels. Selected laboratory experiments. Nonmajor graduate credit.

E M 417. Experimental Mechanics. (Cross-listed with Aer E). (2-2) Cr. 3. Alt. F., offered 2010. *Prereq: 324.* Introduction of different aspects of measuring deformation, strains, and stress for practical engineering problems. Strain gage theory and application. Selected laboratory experiments. Nonmajor graduate credit.

E M 424. Intermediate Mechanics of Materials. (3-0) Cr. 3. F.S. *Prereq: 324.* Analysis of stresses, strains, and deflections. Torsion and bending of unsymmetrical members. Analysis of thick wall pressure vessels and shrink fit problems. Dynamic load effects, fatigue and fracture mechanics introduction. Work-strain energy methods. Nonmajor graduate credit.

E M 425. Introduction to the Finite Element Method. (3-0) Cr. 3. S. *Prereq: 324, Math 266 or 267.* Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave propagation. Two-dimensional triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one- and two-dimensional problems. Nonmajor graduate credit.

E M 450. Engineering Vibrations. (Cross-listed with M E). (3-0) Cr. 3. F. *Prereq: 324, 345.* Elementary vibration analysis, single and multiple degrees of freedom, energy methods, free and forced vibrations, viscous and other forms of damping transform methods and response to periodic and random force inputs, numerical methods of solution, eigenvalues and modal analysis, energy methods, vibration isolation and suppression, string or cable dynamics, beam bending dynamics, application problems in aerospace and mechanical engineering (as relevant). Nonmajor graduate credit.

E M 451. Engineering Acoustics. (Cross-listed with M E). (2-2) Cr. 3. Alt. S., offered 2010. *Prereq: Phys 221 and Math 266 or 267.* Sound sources and propagation. Noise standards and effects of noise on people. Principles of noise and vibration control used in architectural and engineering design. Characteristics of basic noise measurement equipment. Experience in use of noise measuring equipment, sound power measurements, techniques for performing noise surveys, evaluation of various noise abatement techniques applied to common noise sources. Selected laboratory experiments. Nonmajor graduate credit.

E M 490. Independent Study. Cr. arr. Repeatable. *Prereq: Permission of instructor.*
H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

E M 510. Continuum Mechanics. (3-0) Cr. 3. F. *Prereq: Math 385.* Introduction to Cartesian tensors as linear vector transformations. Kinematics of continuous deformations, Lagrangian and Eulerian descriptions of motion. Fundamental equations or balance laws of continuous media, linear and angular momentum balance. Conservation laws of momentum and energy. Introduction to constitutive equations of classical elastic solids and simple fluids. Formulations and solutions of some canonical problems.

E M 514. Advanced Mechanics of Materials. (Cross-listed with Aer E). (3-0) Cr. 3. F. *Prereq: 324.* Theory of stress and strain, stress-strain relationships. Unsymmetrical bending, curved beams, shear center. Torsion of thin-walled noncircular sections. Equilibrium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders.

E M 516. Mechanics of Deformable Solids. (3-0) Cr. 3. S. *Prereq: E M 510.* Fundamental mechanics of linear elasticity, formulation and solution of simple elastostatic boundary value problems. Kinematics of small deformations, constitutive equations for isotropic and anisotropic media. Field equations for elastic solids, plane strain/plane stress and some classic canonical solutions. Constitutive models of inelastic/plastic solids and selected problems of elastoplasticiy, contact mechanics, fracture mechanics and defects in crystalline solids.

E M 517. Experimental Mechanics. (Cross-listed with Aer E). (3-2) Cr. 4. Alt. S., offered 2010. *Prereq: E M 510 or 514 or 516.* Fundamental concepts for force, displacement, stress, and strain measurements. Strain gages. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro and nano scale regimes.

E M 518. Waves in Elastic Solids with Applications to Ultrasonic Nondestructive Evaluation. (3-0) Cr. 3. F. *Prereq: Math 385.* Propagation of bulk waves, surface waves, and guided waves in isotropic and anisotropic elastic media. Transmission and reflection of waves at plane and curved interfaces. Radiation of sources with application to ultrasonic transducer beam modeling. Elastic wave scattering from cracks and inclusions. Reciprocity principles and their use in the development of an ultrasonic measurement model. Characterization and measurement of material attenuation.

E M 525. Finite Element Analysis. (Cross-listed with Aer E). (3-0) Cr. 3. S. *Prereq: 425, Math 385.* Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use

of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

E M 526. Boundary Element Methods in Engineering. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 514 or 516.* Introductory boundary element methods through plane problems. Singular integrals, Cauchy principal values, integral representations and boundary integrals in one dimension. Direct and indirect formulations. Plane potential and elastostatic problems. Higher order elements, numerical integration. Regularizations. Body forces and infinite regions. Specialized fundamental solutions, half-plane and axisymmetric problems. Diffusion and wave problems. Coupling with finite elements.

E M 543. Introduction to Random Vibrations and Nonlinear Dynamics. (Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 444.* Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to Stationary random excitation. Fatigue failure due to random excitation.

E M 548. Advanced Engineering Dynamics. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 345, Math 266 or 267.* 3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange's equations with constraints, modified Euler's equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints.

E M 550. Fundamentals of Nondestructive Evaluation. (Cross-listed with M S E). (3-2) Cr. 4. S. *Prereq: 324, Math 385.* Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelectrics are analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, x-ray, liquid penetrants, magnetic testing, and visual inspection are performed.

E M 552. Advanced Acoustics. (Cross-listed with M E). (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: 451.* Theoretical acoustics: wave propagation in fluids; acoustic radiation, diffraction and scattering; and architectural acoustics. Applications of basic acoustic theory in noise control and acoustic radiation. Introduction to selected numerical methods in acoustics.

E M 564. Fracture and Fatigue. (Cross-listed with M S E, M E). (3-0) Cr. 3. F. *Prereq: 324 and either Mat E 216 or 272 or 392. Undergraduates: Permission of instructor.* Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

E M 569. Mechanics of Composite and Combined Materials. (Cross-listed with M S E, Aer E). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 324.* Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites.

E M 570. Wind Engineering. (Cross-listed with Aer E). (3-0) Cr. 3. F. *Prereq: 378, 345.* Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

E M 590. Special Topics. Cr. arr. Repeatable. *Prereq: Permission of instructor.*
F. Introduction to Dislocation and Plasticity
H. Mechanics of Thin Films and Adhesives
I. Mechanics of Cellular and Porous Media
J. Other

E M 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

E M 690. Special Topics. Cr. arr. Repeatable. *Prereq: Permission of instructor.*
N. Advanced Experimental Methods
O. Advanced Wave Propagation
P. Advanced Materials
Q. Advanced Computational Methods
R. Reliability and Failure
S. Other

E M 697. Engineering Internship. Cr. R. Repeatable. *Prereq: Permission of DOGE (Director of Graduate Education), graduate classification.* One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

E M 699. Research. Cr. arr. Repeatable.

Engineering Studies

www.eng.iastate.edu/esm/

(Interdepartmental minor)

The College of Engineering offers an undergraduate minor in engineering studies for non-engineering students designed to improve their understanding of engineering. This minor is not intended to train non-engineering students to do the work of practicing, degree-holding engineers. Rather, students who complete the minor in engineering studies will be able to work more effectively in their primary field by better appreciating the nature, capabilities, and limitations of engineering.

The minor in engineering studies is structured so that no student will be excluded due to insufficient preparation in mathematics or the sciences. The required courses in the minor and many of the elective courses are specifically designed to offer a range of prerequisites, so that students from all curricula will find coursework that supports an accessible and intellectually stimulating program of study.

With the exception of E St 260, 265, and 270, courses offered for the minor in engineering studies are also open to students whose major curriculum is in the College of Engineering. However, the minor in engineering studies will be awarded only to students whose degree program is not in engineering.

To receive a minor in engineering studies, students must complete a total of 21 course credits that satisfy the following:

- E St 260, 265, and 270 (3 credits each) are required for all students in the minor in engineering studies.
- Twelve additional credits from an approved list of eligible courses. Some of these approved courses are taught by the College of Engineering; additional courses are taught by other colleges. A minimum of six of those 12 credits must be courses that bear the designation "E St" or are courses offered by engineering departments. Eligible courses will include those 200-level and above courses offered by the departments in the College of Engineering that are expressly designated by that department's curriculum committee for use in the minor in engineering studies.
- A minimum of 6 credits in the minor must be 300-level or above (university requirement)

Courses primarily for undergraduate students

E St 260. Engineering: Getting from Thought to Thing. (2-2) Cr. 3. *Prereq: Students enrolled in minor in Engineering Studies only.* What is engineering, technology and their roles in Society? Investigation of engineering methods through case studies of everyday objects. Explore questions about the impact of technology in Society. Apply engineering methods to design and failure analysis.

E St 265. Survey of the Impacts of Engineering Activity. (3-0) Cr. 3. *Prereq: Students enrolled in minor in Engineering Studies only.* Survey of the economic, environmental, societal, and political benefits and problems resulting from engineering activity. Effects of engineering projects on human health, social structures, and the environment. Examination of improvements in economic opportunities and quality of life resulting from engineering activity. Case studies of the effects of engineering activity.

E St 270. Survey of How Things Work. (2-2) Cr. 3. *Prereq: Students enrolled in minor in Engineering Studies only.* An overview of the similarities and differences of the major engineering disciplines; methods used to manufacture products, build structures, and design systems. Laboratory exercises in measuring properties of basic engineering materials, welding, casting, and machining; case studies in product development; student design exercises.

E St 351. Introduction to Energy Systems: An Engineering Perspective. (Cross-listed with E E). (3-0) Cr. 3. Dalal. Energy-scientific, engineering and economic foundations. Energy utilization-global and national. Sectoral analysis of energy consumption. Relationship of energy consumption and production to economic growth and environment. Technology for energy production. Economic evaluation of energy utilization and production. Scientific basis for global warming. Environmental impact of energy production and utilization. Renewable energy.

E St 490. Independent Study. Cr. arr. F. *Prereq: Permission of instructor.*

Charles Kostelnick, Chair of Department

Distinguished Professor: Swander

Distinguished Professor (Emeritus): Bowers

University Professors: Mendelson, Nakadate

University Professors (Emeritus): Burnett, Daly

Professors: Carlson, Chapelle, Ewald, Freed, Graham, Herndl, Hickok, Kienzler, Kostelnick, Marquart, Owen, Poague, Price-Herndl, Russell, Tremmel, Z. Zimmerman

Professors (Emeritus): Abraham, Anderson-Hsieh, Bataille, Blyler, David, Dearin, Douglas, Geha, Haggard, Herrnstadt, McCarthy, Nostwich, Potter, Silet, Underhill, Vann, Winsor, Zbaracki

Associate Professors: Blakely, Consigny, Goodwin, Haas, Hagge, Hegelheimer, Honeycutt, Kupfer, Larson, LaWare, Levis, Niday, Payne, Pett, Post, Redmond, Roberts, Schwarte, Slagell, Yager

Associate Professor (Adjunct): Betcher

Associate Professors (Emeritus): Galyon, Gwiasda, Matthies, Ross, Whitaker

Assistant Professors: Pendar, Percy, Sauer, Shenk, Sivils, Wiegand, Wilson, D. Zimmerman

Assistant Professors (Emeritus): Kaufmann, McCully, J. Vallier

Assistant Professor (Adjunct): Vrchota

Instructors (Adjunct): Barratt, Mahoney, Myers, Noland, Schmidt

Senior Lecturers: Aune, Benner, Clarke, Demaray, Dewall, Gilchrist, Levis, Liebich, Lowery, McGough, Messenger, Ringlee, Schabel, Tremmel, Vandervalk

Lecturers: Behrens, Boehm, Brottman, Chamberlin, Collins, Coppoc, Corey, Cross, DeBoest, DiSalvo, Fromm, Greenwald, Hagge, House, Hughes, Judge, Kelley, Langenberg, Malven, Meyer, Nelson, Newgaard, Paulson, Reedy, Regenold, Rozendaal, Satterwhite, Smith, Thune, F. Vallier, Walrod, Weiner

Undergraduate Study

The department offers a wide variety of courses for students seeking a degree in English or Technical Communication, as well as for students wishing to broaden their general education. Offerings include classes in introductory college writing, literature, film, creative writing, rhetoric and professional communication, technical communication, English education, linguistics, and teaching English as a second language/applied linguistics.

The discipline of English helps to develop students' understanding of how language functions in literature, mass media, and both personal and professional writing. Students not pursuing an English or Technical Communication major may select English courses to fill electives, to pursue a minor, or to complement their training in other majors.

Graduates majoring in English will possess a broad-based knowledge and understanding of the discipline. They will also understand their particular disciplinary specialization whether it be literary studies, rhetorical studies, teacher education, creative writing, or teaching English as a second language/applied linguistics. Graduates in Technical Communication will learn how to communicate scientific and technical information through coursework both in English and in scientific and technical fields. Graduates in either major will be able to write well-organized, well-reasoned essays that demonstrate their ability to read and think critically.

Introductory writing courses in the department are designed to improve the skills in communication and reading comprehension necessary for successful university work.

Through the Intensive English and Orientation Program, the department offers special courses in English for both undergraduate and graduate students who are native speakers of other languages. (See catalog entries under *English Courses for Native Speakers of Other Languages and English Requirement for International Students*.)

Careers for English Majors

Students who graduate with a major in English often enter fields that require special communication skills, such as publishing, public service, research, business and technical writing, or human resources. An undergraduate major in English can be a solid basis for the professional study of law, medicine, theology, or business management. Students in English Education can qualify to teach English in middle or high school. (See *Index, Teacher Education*.) English majors may also pursue graduate studies in a number of communication-related fields.

Careers for Technical Communication Majors

Students who graduate with a major in Technical Communication will be prepared for careers in scientific and technical writing and editing. They will typically seek positions in companies or nonprofit organizations; in communication-based units of local, state, and federal government; in the documentation units of software developers or publishers; or in such areas as web design and communication consulting. Technical Communication majors may also pursue graduate study in rhetoric and professional communication or other communication-related fields.

English Major Requirements

English majors choose one of three programs of study: Literary Studies, Rhetorical Studies, or English Education. Students interested in creative writing typically choose Literary Studies as a program of study. English majors are required to have, in addition to ISUComm foundation courses, at least 39 credits in English; those in English Education must have 48 credits in English in addition to required teaching-related courses taken in other departments. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate with a major in the English Department, a student must earn at least a C (not a C-) in English 150 and 250 as well as in each of the courses taken to fulfill the program of study. Earning at least a C in ISUComm foundation courses and in one advanced communication course also meets the departmental Communication Proficiency requirement.

Finally, all English majors must take at least one pre-1800 literature course and one pre-1900 literature course.

Distributed Requirements

All English majors, no matter what their program of study, must take nine courses for a total of 27 credits from a list of distributed requirements:

Engl 199: Introduction to the Study of English	R
Engl 497: Capstone Assessment	R
Engl 220: Descriptive English Grammar	3
Engl 225-228:Literature Survey	9
Engl 260: Introduction to Literary Study	3
Engl 310: Rhetorical Analysis	3
Engl 207, 302-309, 313-316 Advanced Comm	3
Engl 340-349, 352, 389: Women's or Multicultural Literature	3
	27

These distributed requirements may not overlap with any advanced study requirements.

Advanced Study Requirements

Each program of study has its own requirements for advanced work:

Literary Studies

Engl 200- or 300-Level—Literary History	3
Engl 300 or above—English Elective	3
Engl 440-460 Literature Seminars	6
	12

Rhetorical Studies

Rhetorical Studies Elective	3
Engl 350 Rhetorical Theories and Issues in Context	3
Engl/Sp Cm 300+Rhetorical Studies Elective	3
Engl 418 Seminar in Argumentation	3
Engl/Sp Cm 400+Rhetorical Studies Elective	3
	12

English Education

Engl 219 Intro to Linguistics	3
Engl 225-228 Literature Surveys, whichever course not taken for Distributed Requirement	3
Engl 353 World Literature: Ancient to Renaissance	3
Engl 354 World Literature: Seventeenth Century to the Present	3
Engl 396 Teaching the Reading of Young Adult Literature	3
Engl 397 Practice & Theory of Teaching Writing in the Secondary Schools	3
Engl 420 History of the English Language	3
Engl 494Prac & Theory of Teaching Literature in the Secondary School	3
	24

There are a number of other course requirements outside of English for English Education majors. These requirements may overlap with General Education requirements for the college:

C I 202 Introduction to Instructional Technology for Grades 7-12	3
C I 204 Social Foundations of American Education	3
C I 280A Pre-Student-Teaching Experience	4
C I 395 Teaching Reading in Middle and Secondary Schools	3
C I 406 Multicultural Gender Fair Education	3
C I 426 Principles of Secondary Education	3
Engl 417E Student Teaching	16
Cl St 353 World Literature	3
Psych 230 Developmental Psychology	3
Psych 333 Educational Psychology	3
Hist or Pol S American History or Government	3
Sp Cm 212 or Thtre 358	3

Technical Communication Major Requirements

Technical Communication majors must take 39 credits within the major as well as 12 credits in a Designated Area of Concentration (DAC) in a technical, scientific, or design field. Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline.

Core Requirements

Engl 310 Rhetorical Analysis	3
Engl 350 Rhetoric Theories and Issues in Context	3
Engl 411 Technology, Rhetoric and Professional Communication	3
Engl 314 Technical Communication	3
Engl 415 Business and Technical Editing	3
Engl 416 Visual Aspects of Business and Technical Communication	3
Engl 477 Seminar in Technical Communication	6

TComm Elective credits, from Engl 309, 313, 332, 418, 477 6

Complementary courses

Engl 220 Descriptive English Grammar	3
200-or 300-level literature course	3
Communication Elective	3
Engl 487 Internship	1-3

Designated Area of Concentration in a Technical, Scientific, or Design Field 12

The DAC is a student-designed grouping of related courses in a technical, scientific, or design field that will meet the student's professional or academic interests. All courses for the 12-credit DAC must be taken outside the English Department and approved by the Technical Communication Program Coordinator. A second major or a minor in areas such as computer science, social science, natural science, entrepreneurial studies, design studies, engineering studies, or another technical, scientific, or design field may substitute for the DAC.

Learning Goals

Graduates of the bachelor's degree programs in the English Department will demonstrate knowledge of the nature, history, current practice and critical issues in their curricular fields. They will employ the terminology, skills, and techniques specific to the field. Specifically, they will demonstrate advanced skills in reading and writing, speaking and argumentation, and research and application of appropriate technology. They will demonstrate the ability to perform professionally as educators, communicators, writers and editors. They will also be able to analyze aspects of culture and society and will become critical thinkers, having an awareness of ethical and humane issues essential to professional careers and to the practice of lifelong learning. (See department's URL for learning goals for specific programs.)

Graduates of advanced degree programs in the department will have, in addition to these

skills, knowledge of theory, methodology, and practice within their disciplines; advanced skills in research, innovation, and creative and critical thinking; and well-developed skills in problem-solving and critical analysis.

Minors and Second Majors
English majors are encouraged to seek a minor or a second major to complement their English studies. To find out the requirements for particular majors or minors, consult the section in this catalog relating to the department offering the major or minor. Students in English Education are particularly encouraged to acquire secondary certification in another teaching area. Consult ISU's certification officer in the College of Education for a list of Iowa Secondary Certification requirements in various subject areas.

Degree Choices
English majors may earn a bachelor of arts or a bachelor of science degree; Technical Communication majors may earn a bachelor of science degree only. For English majors, the B.S. degree requires an extra 12 credits beyond the general education requirements; these credits must be taken in linguistics, natural science, mathematics, social science, or selected courses in exercise and sport science.

English Minor Requirements
The department offers a minor in English, which students may earn by completing at least 18 credits in English courses beyond the 100 level, excluding Engl 250. A student earning an English minor must take 9 of the 18 credits at the 300-level or above and must earn a grade of C (not C-) or higher in each course taken in the minor. No specific courses need be taken; students may design their minor programs around their own interests.

Technical Communication Minor Requirements
The department offers a minor in Technical Communication, which students may earn by completing 18 credits in Technical Communication courses, 6 from Theory and History and 12 additional credits. Half of the 18 credits must be 300-level or above and students must earn a grade of C (not C-) or higher in each course taken in the minor. Although students may design their minor programs around their own interests, they are encouraged to work with a departmental adviser in Technical Communication.

Departmental Awards and Scholarships
Each spring the English Department offers many scholarships and awards for both undergraduate and graduate students. Some undergraduate awards are for returning English and Technical Communication majors only; others are for returning students of any major demonstrating excellence in some aspect of English or Technical Communication. A list of current awards and application forms are available on the English Department website and in 206 Ross Hall early in the Spring Semester. Award winners are announced each year in April.

Other Programs Associated with English
The English Department participates in interdepartmental programs in African American Studies, American Indian Studies, Classical Studies, Latina/o Studies, Linguistics, Speech Communication, Theatre and Women's Studies. (See the *Index for requirements for these interdepartmental programs.*)

Graduate Study

The master of arts degree programs offer various possibilities for the advanced study of writing, language, and literature. Prospective students must first secure admission to the graduate studies program through the English Department. Students can be admitted to the M.A. in English with a specialization in literature which is designed to prepare students for teaching at the secondary, two-year college, or beginning college and university levels; or for further graduate study in language and literature. Students can be admitted to the M.A. in Rhetoric, Composition, and Professional Communication designed to prepare students for technical writing, business communication, editing, and associated professional writing. Students can be admitted to one of the optional specializations for the M.A. in TESL/Applied Linguistics: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESP); Literacy; and Literature in ESL. The master of arts degree requires 30 hours of graduate credits, including a thesis or project (3 credits). The M.A. in English (literature specialization) and the M.A. in TESL/Applied Linguistics have language requirements that may be met through a number of options, including previous foreign language study, graduate linguistics courses, or satisfactory performance on a test-out exam. A student whose native language is other than English is considered to have met the language requirement after satisfying the Graduate College English requirement.

The master of fine arts program in Creative Writing and Environment is unique in its effort to cultivate in its students an interdisciplinary approach to research and writing, as well as develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, and poetry. The program is designed to prepare students for careers as writers, teachers at the college and university level, and editors. Prospective students must first secure admission to the graduate studies program through the English Department. The master of fine arts degree requires 54 hours of graduate credit: a core of creative writing courses, a book-length thesis (6 credits), a fieldwork experiential component (3 credits), and 18 credits in disciplines other than English (such as Landscape Architecture, Anthropology, Environmental Science, among many others) relevant to an individual student's research interests and thesis project.

The doctor of philosophy in Applied Linguistics and Technology focuses on English language teaching and assessment with particular emphasis on issues and practices related to technology use in these areas. It prepares students to hold a variety of academic appointments in departments of applied linguistics and English, and professional opportunities in research and development foundations, international publishing enterprises, and government agencies in the U.S. and around the world where English as a second language is taught and used for specific educational, vocational, and professional purposes. Prospective students must first secure admission to the graduate studies program through the English Department. Candidates are required to complete 72 hours of graduate credit and a dissertation, and to pass a portfolio assessment, a preliminary examination consisting of a dissertation proposal and pilot study and a written response to questions about the proposal or pilot study, and an oral defense of the dissertation.

The doctor of philosophy in Rhetoric and Professional Communication focuses on the theory of rhetoric and the practice of written communication in professional communities such as business, industry, and government. The degree qualifies graduates for academic positions in rhetoric and in business and technical communication, as well as for work in the private sector as professional writing specialists, editors, and communications production managers. Prospective students must first secure admission to the graduate studies program through the English Department. Candidates are required to complete 72 hours of graduate credit and a dissertation, and to pass a portfolio assessment, a preliminary examination consisting of a comprehensive examination and a special field examination, and an oral defense of the dissertation.

The department offers graduate students an opportunity to gain professional experience through professional writing internships, selected departmental research activities, the Intensive English and Orientation Program (IEOP), the ISUComm foundation courses program, the advanced communication program, and the interpersonal and rhetorical communication program. Teaching and research assistantships are available for qualified students. Teaching assistants are responsible for teaching with faculty supervision, classes in ISUComm foundation courses, courses in public speaking, courses in English as a second language, and courses in business and technical communication. Research assistants are assigned to individual faculty members engaged in projects in writing, language, or literature. One or more Pearl Hogrefe Fellowships in Creative Writing covering stipend and tuition are awarded each year to outstanding graduate students. Grannis Scholarships are awarded to new students in the Applied Linguistics and Technology doctoral program. Several Freda Huncke Endowment Graduate Teaching Fellowships are available to first-year Rhetoric and Professional Communication doctoral students. Miller Fellowships are also available to highly qualified students.

With prior written approval from the College of Human Sciences, students may take English courses to meet part of the requirements for certification to teach English in two-year and community colleges. Selected courses may also be used to meet requirements for ESL endorsement (K-12) for teachers.

A graduate minor in the English Department at the M.A. level requires 9 credits of English at the 500 or 600 level in the respective major (English, RCPC, TESL/AL). A graduate minor in the English Department at the M.F.A. or Ph.D. level requires 12 credits at the 500 or 600 level in the respective major (CWE, ALT, RPC).

A graduate certificate in Teaching English as a Second Language is a 12 credit program that includes two prerequisites, one core requirement (Engl 518), and three graduate courses chosen from a list of accepted graduate courses.

Courses primarily for undergraduate students

Engl 010. Intensive English and Orientation Program. (21-0) F.S.SS. *Prereq: Recommendation of the English Department.* Full-time study of English for speakers of other languages. Brochure available from the IEOP Office, 102 Landscape Architecture, or at www.ieop.iastate.edu. Satisfactory-fail only.

Engl 099. Strategies for Non-native Speakers of English. F.S. *Prereq: Recommendation of English Department; placement in sections is determined by examination.*
L. Strategies for Listening. Available P/NP to graduate students at their department's option.
R. Strategies for Reading. Available for P/NP to graduate students at their department's option.

Engl 101. English for Native Speakers of Other Languages. (3-0) Cr. 3. F.S. *Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.).* For undergraduates: Completion of English 101 requirement prepares students for English 150. For graduates: Completion of English 101 satisfies the English requirement of the Graduate College. Engl 101 courses are limited to students who are nonnative speakers of English. Credit from Engl 101 does not count toward graduation.
B. Academic English I. Available P/NP to graduate students at their department's option.
C. Academic English II–Undergraduates.
D. Academic English II–Graduates. Available P/NP to graduate students at their department's option.

Engl 120. Computers and Language. (Cross-listed with Ling). (3-0) Cr. 3. Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

Engl 150. Critical Thinking and Communication. (3-0) Cr. 3. F.S.SS. *Prereq: Concurrent enrollment in Lib 160.* Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio.

Engl 180. Communication Skills for International Teaching Assistants. Cr. arr. Repeatable. F.S. Placement based upon SPEAK/TEACH test results. Persons whose native language is English cannot take 180 for credit. No more than one section of 180 may be taken per semester; up to two sections total. Credit for Engl 180 does not apply toward graduation. Satisfactory-fail only.
A. Speaking Skills. Cr. 3. Emphasis on pronunciation improvement and greater fluency in spoken English for teaching purposes.
B. Intermediate Spoken English. Cr. 3.
C. Advanced Spoken English. Cr. 3. For students who have completed 180A or 180B but have not reached the passing level on the SPEAK/TEACH test.
D. Presentation Skills. Cr. 3. Developing explanations, leading discussions and handling questions in a teaching environment.
E. Supervised Independent Study. Cr. 1. Seminar with individual observation and consultation.

Engl 199. Introduction to the Study of English. (1-0) Cr. R. F.S. 8 weeks. General introduction to the discipline; discussion of the various fields in English; consideration of career opportunities. Satisfactory-fail only.

Engl 201. Introduction to Literature. (3-0) Cr. 3. F.S. *Prereq: Credit in or exemption from 150.* Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

Engl 205. Popular Culture Analysis. (Cross-listed with Sp Cm). (3-0) Cr. 3. F.S. *Prereq: Credit in or exemption from 150.* Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

Engl 207. Introduction to Creative Writing. (3-0) Cr. 3. F.S. *Prereq: Credit in or exemption from 150.* Course introduces students to the fundamentals of writing fiction, poetry, and creative nonfiction. Extensive readings in all three genres. Students learn creative processes through writing exercises, workshops, and conferences.

Engl 219. Introduction to Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F.S. *Prereq: Sophomore classification.* Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

Engl 220. Descriptive English Grammar. (Cross-listed with Ling). (3-0) Cr. 3. F.S. *Prereq: 250.* Overview of grammatical structures and functions. Parts of speech; phrase, clause, and sentence structure; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course.

Engl 225. Survey of British Literature to 1800. (3-0) Cr. 3. *Prereq: 250.* Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

Engl 226. Survey of British Literature since 1800. (3-0) Cr. 3. *Prereq: 250.* Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres and may include texts that reflect and/or critique the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

Engl 227. Survey of American Literature to 1865. (3-0) Cr. 3. *Prereq: 250.* Representative works of American literature from its origins (including indigenous and conquest literatures) through the end of the Civil War in historical, cultural, and literary contexts. Will include multiple genres.

Engl 228. Survey of American Literature since 1865. (3-0) Cr. 3. *Prereq: 250.* Representative works written in the United States since the Civil War in historical, cultural, and literary contexts, with attention to the cultural and ethnic diversity of Americans. Will include multiple genres.

Engl 237. Survey of Film History. (3-0) Cr. 3. F. *Prereq: Credit in or exemption from 150.* A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present.

Engl 240. Introduction to American Indian Literature. (Cross-listed with Am In). (3-0) Cr. 3. F. *Prereq: Credit in or exemption from Engl 150.* Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.

Engl 250. Written, Oral, Visual, and Electronic Composition. (3-0) Cr. 3. F.S.SS. *Prereq: 150 or exemption from 150; sophomore classification or exemption from 150; credit for or concurrent enrollment in Lib 160.* Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of student portfolio.

Engl 250H. Written, Oral, Visual, and Electronic Composition, Honors. (3-0) Cr. 3. F. *Prereq: Exemption from 150 and admission to Freshman Honors Program; credit for or concurrent enrollment in Lib 160.* In-depth analysis, composition, and reflection on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on argumentation: developing claims, generating reasons, providing evidence. Individual sections organized by special topics. Development of student portfolio.

Engl 260. Introduction to Literary Study. (3-0) Cr. 3. F.S. *Prereq: Credit in or exemption from 150.* Basic principles of literary study. Emphasis on writing of interpretive and critical essays. Particular attention to poetry. Designed for English majors.

Engl 302. Business Communication. (3-0) Cr. 3. F.S.SS. *Prereq: 250, junior classification.* Theory, principles and processes of effective written communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, and email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations.
H. Honors.

Engl 303. Free-Lance Writing for Popular Magazines. (3-0) Cr. 3. S. *Prereq: 250, not open to freshmen.* Practical workshop in writing nonfiction articles for popular magazines. Emphasis on writing, market research, preparation of manuscripts, methods of submission. Major goal of the course is production of marketable material.

Engl 304. Creative Writing—Fiction. (Cross-listed with W S). (3-0) Cr. 3. F.S. *Prereq: 250, not open to freshmen.* Progresses from practice in basic techniques of fiction writing to fully developed short stories. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 305. Creative Writing—Nonfiction. (3-0) Cr. 3. F.S. *Prereq: 250, not open to freshmen.* Workshop in writing imaginative essays, both critical and personal. Analytical reading, development of literary techniques. Individual and small group conferences.

Engl 306. Creative Writing—Poetry. (3-0) Cr. 3. F.S. *Prereq: 250, not open to freshmen.* Progresses from traditional to contemporary forms. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 309. Report and Proposal Writing. (3-0) Cr. 3. F.S. *Prereq: 250, junior classification.* Introduction to the theory and practice of preparing and analyzing reports and proposals intended for businesses, governmental agencies, and/or private and corporate foundations. Individual assignments and group projects include text documents and oral presentations.

Engl 310. Rhetorical Analysis. (3-0) Cr. 3. F.S. *Prereq: 250.* Fundamental principles of rhetorical criticism. Focus on selected theories for analyzing cultural texts, including essays, speeches, film, technical and scientific documents, and websites. Emphasis on identifying artifacts, formulating research questions, applying methodologies, and understanding and practicing critical analysis through discussion and in writing.

Engl 312. Biological Communication. (3-0) Cr. 3. F.S. *Prereq: Engl 250.* Emphasis on effective writing and communication methods in the biological sciences, presentation of research data, methods of bibliographic citation, ethical communication, use of oral and visual presentation methods for biological information, manuscript and report preparation. For students in the biological and related life sciences.

Engl 313. Writing for the World Wide Web. (3-0) Cr. 3. F.S. *Prereq: 250.* Rhetorical principles of hypertextual writing and publishing. Group and individual projects using XHTML to construct interactive sites for the World Wide Web. Special emphasis on business and technical applications. Nonmajor graduate credit.

Engl 314. Technical Communication. (3-0) Cr. 3. F.S.SS. *Prereq: 250, junior classification.* Theories, principles, and processes of effective written communication of technical information. Attention to major strategies for analyzing and adapting to audiences in various communication situations and composing technical discourse including organizing visual and verbal information. Extensive practice in many areas of technical communication, including instructions and procedures, proposals and reports, website analysis and design, and individual and team presentations.
H. Honors.

Engl 315. Creative Writing—Screenplays. (3-0) Cr. 3. F. *Prereq: 250, not open to freshmen.* Stresses master scene technique of writing fully developed screenplays. Emphasis on movie techniques, writing, workshop criticism, analytical reading and viewing, and individual conferences. Nonmajor graduate credit.

Engl 316. Creative Writing—Playwriting. (Cross-listed with Thtre). (3-0) Cr. 3. S. *Prereq: Engl 250, not open to freshmen.* Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences. Nonmajor graduate credit.

Engl 330. Science Fiction. (3-0) Cr. 3. *Prereq: 250.* Study of science fiction from its origins in nineteenth-century to the present. May include study of specific types of science fiction, such as classic, cyberpunk, feminist, or apocalyptic narratives; and may include consideration of science fiction film and/or theory.

Engl 332. Visual Communication of Quantitative Information. (Cross-listed with Stat). (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: Stat 101, 104 or 226; Engl 250.* Communicating quantitative information using visual displays; visualizing data; interactive and dynamic data displays; evaluating current examples in the media; color, perception, and representation in graphs; interpreting data displays. Nonmajor graduate credit.

Engl 335. Studies in Film. (3-0) Cr. 3. Repeatable. *Prereq: 250.* Principles of film art and the traditional vocabulary of literature as applied to film. Influence of film on modes of thought and behavior. Nonmajor graduate credit.

Engl 339. Literary Theory and Criticism. (3-0) Cr. 3. F.S. *Prereq: 260 and 3 additional credits in literature.* Study of selected texts of literary criticism, with attention to the purposes and practices of criticism.

Engl 340. Women's Literature. (Cross-listed with W S). (3-0) Cr. 3. *Prereq: 250.* Historical and thematic survey of literature by and about women. May include autobiographies, journals, letters, poetry, fiction, and drama. Nonmajor graduate credit.

Engl 344. U.S. Latino/a Literature. (3-0) Cr. 3. S. *Prereq: 250.* An introduction to the literature of Mexican Americans, Puerto Ricans, Cuban Americans and other Latino/a sub-groups. Special emphasis on themes such as ethnic relations and comparisons with EuroAmerican literary traditions.

Engl 345. Women and Literature: Selected Topics. (Cross-listed with W S). (3-0) Cr. 3. S. *Prereq: Engl 250.* Literature by women and/or dealing with the images of women, e.g., study of individual authors or related schools of authors; exploration of specific themes or genres in women's literature; analysis of recurrent images of women in literature. Nonmajor graduate credit.

Engl 346. American Indian Literature. (Cross-listed with Am In). (3-0) Cr. 3. S. *Prereq: 250.* Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Nonmajor graduate credit.

Engl 347. African American Literature to 1960. (Cross-listed with Af Am). (3-0) Cr. 3. *Prereq: 250.* Intensive study of African American writing, possibly including slave narratives, Harlem Renaissance works, literature of social protest, and forerunners of contemporary works that reveal key thematic, stylistic, and historical range of the literature. Nonmajor graduate credit.

Engl 348. Contemporary African American Literature. (Cross-listed with Af Am). (3-0) Cr. 3. S. *Prereq: 250.* Intensive reading in literature by African Americans from 1960 to the present. Nonmajor graduate credit.

Engl 349. Topics in Multicultural Literatures of the United States. (3-0) Cr. 3. Repeatable. *Prereq: 250.* Literature by writers from U.S. multicultural groups. May include literature of several groups or focus upon one of the following: Asian Americans, African Americans, Latino/a Americans, American Indians. Nonmajor graduate credit.

Engl 350. Rhetorical Theories and Issues in Context. (Cross-listed with Cl St, Sp Cm). (3-0) Cr. 3. S. *Prereq: 250.* Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

Engl 351. Literature and Science. (3-0) Cr. 3. *Prereq: 250.* Study of texts that may include the following topics: the representation of science in literature; the use of literature by science and scientists; reading "scientific" texts as literature; the interactions between literary and scientific ideas. Nonmajor graduate credit.

Engl 352. Gay and Lesbian Literature. (Cross-listed with W S). (3-0) Cr. 3. *Prereq: Engl 250.* Literary portrayals of gay and lesbian lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and gender identity over time. Nonmajor graduate credit

Engl 353. World Literature: Western Foundations through Renaissance. (Cross-listed with Cl St). (3-0) Cr. 3. F.S. *Prereq: 250.* Representative works from the drama, epics, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Engl 354. World Literature: Seventeenth Century to the Present. (3-0) Cr. 3. F. *Prereq: 250.* Global literatures in their various cultural and aesthetic contexts. Representative works, oral and written literature, including poetry, fiction, nonfiction, and drama.

Engl 355. Literature and the Environment. (Cross-listed with Env S). (3-0) Cr. 3. *Prereq: 250.* Study of literary texts that address the following topics, among others: the relationship between people and natural/urban environments, ecocriticism, and the importance of place in the literary imagination. Nonmajor graduate credit.

Engl 358. Myth and Fairytale. (3-0) Cr. 3. *Prereq: 250.* Study of traditional fairytales, myths, and legends from diverse cultures. Nonmajor graduate credit.

Engl 359. Literature and the Arts. (3-0) Cr. 3. *Prereq: 250.* Study of texts that may include the following topics: the relationship between literature and other art forms (including painting, sculpture, dance, music, photography, and film); the representation of the arts in literature; the influences of other art forms on literature; the interrelation of art theory and literary theory. Nonmajor graduate credit.

Engl 360. Studies in American Literature to 1800. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Selected readings in American literature from its beginnings through the colonial period; may reflect themes, genres, or social and cultural contexts.

Engl 362. Studies in 19th Century American Literature. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Selected readings in American literature of the 19th century; may reflect themes, genres, or social and cultural contexts.

Engl 364. Studies in American Literature: 1900 to the Present. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Selected readings in American literature since 1900; may reflect themes, genres, or social and cultural contexts.

Engl 370. Shakespeare. (3-0) Cr. 3. F.S. *Prereq: 250.* Reading and analysis of selected plays. Development of Shakespeare's dramatic art in its social and intellectual context.

Engl 373. Studies in British Literature: The Middle Ages. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Selected readings in medieval literature from its beginnings through the fifteenth century; may reflect themes, genres, or social and cultural contexts.

Engl 374. Studies in British Literature: The Renaissance. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Selected readings in British literature from 1500 to 1660; may reflect themes, genres, or social and cultural contexts.

Engl 375. Studies in British Literature: The Restoration and 18th Century. (3-0) Cr. 3. S. *Prereq: 250; sophomore classification.* Selected readings in British literature from 1660 to 1800; may reflect themes, genres, or social and cultural contexts.

Engl 376. Studies in British Literature: Romantic and Victorian. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.

Engl 378. Studies in British Literature: 1900 to the Present. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Selected readings in British literature since 1900; may reflect themes, genres, or social and cultural contexts.

Engl 389. Postcolonial Literature. (3-0) Cr. 3. *Prereq: 250; sophomore classification.* Historical, thematic and theoretical study of postcolonial literatures from one or more of the following areas: Africa, South Asia, the Caribbean, and the Middle East. Irish and immigrant British writers may also be included.

Engl 393. The History of Children's Literature. (3-0) Cr. 3. F. *Prereq: 250.* Origin and development of English and American children's literature through the early twentieth century. Special emphasis on nature, structure, and enduring themes of fantasy literature.

Engl 395. Study and Travel. Cr. arr. SS. *Prereq: Permission of instructor.* Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.
A. Literature.
B. Creative Writing.
C. Linguistics.
D. Rhetoric and Professional Communication.
E. Teacher Education.

Engl 396. Teaching the Reading of Young Adult Literature. (3-0) Cr. 3. F.S. *Prereq: 250.* Critical study and evaluation of the genre; examination of modes and themes found in the literature; strategies of effective reading; study of the relationship of the genre to children's literature and adult literature; discussion techniques for teachers and parents. Evaluation of literature for use in school programs. Restricted to students seeking teacher licensure. Nonmajor graduate credit.

Engl 397. Practice and Theory of Teaching Writing in the Secondary Schools. (3-0) Cr. 3. F.S. *Prereq: 219 or 220 (Taken concurrently with C I 280. Cr. 2). Students must begin the application process for admission to the University Teacher Education Program and initiate a State of Iowa Department of Criminal Investigation background check prior to the semester in which they plan to take English 397.* Introduction to teaching secondary language arts. Current theories and practices in the teaching of writing to secondary school students. Theories of rhetoric, approaches to teaching, lesson design and planning. Evaluating writing. Professional portfolio preparation.

Engl 404. Creative Writing Workshop—Fiction. (3-0) Cr. 3. Repeatable. F.S. *Prereq: 304.* Individual projects in short fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

Engl 405. Creative Writing Workshop—Nonfiction. (3-0) Cr. 3. Repeatable. F.S. *Prereq: 305.* Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

Engl 406. Creative Writing Workshop—Poetry. (3-0) Cr. 3. Repeatable. F.S. *Prereq: 306.* Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

Engl 411. Technology, Rhetoric, and Professional Communication. (3-0) Cr. 3. S. *Prereq: 310; 302, 309, 313, or 314; junior classification.* Study of the implication of technologies, especially computer technology, for the writing and reading of business, technical, and academic texts. Focus on selected technology-related topics.

Engl 415. Business and Technical Editing. (3-0) Cr. 3. S. *Prereq: 302, 309, or 314; junior classification.* Editing journal articles, research reports, technical manuals, newsletters, and proposals. Attention to editorial levels and styles, project management, editor-author relationships, and electronic editing. Nonmajor graduate credit.

Engl 416. Visual Aspects of Business and Technical Communication. (3-0) Cr. 3. F. *Prereq: 302, 309, or 314; junior classification.* Rhetoric of visual elements in business and technical communication. Issues in the design of text, charts, graphs, diagrams, schematics, illustrations, and other visual displays.

Engl 417. Student Teaching. (Cross-listed with C I). Cr. arr. F.S. *Prereq: 494, admission to teacher education, approval of coordinator the semester prior to student teaching.* Full-time teaching in secondary English: long term and unit planning, lesson planning, classroom teaching practice in English language arts. E. English and Literature (Same as C I 417E.)

Engl 418. Seminar in Argumentation. (3-0) Cr. 3. S. *Prereq: 310, junior classification.* Advanced seminar in theory and analysis with extensive practice in various modes of argument. Nonmajor graduate credit.

Engl 420. History of the English Language. (Cross-listed with Ling). (3-0) Cr. 3. F.S. *Prereq: 219, 220.* Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents. Nonmajor graduate credit.

Engl 422. Women, Men, and the English Language. (Cross-listed with Ling, W S). (3-0) Cr. 3. S. *Prereq: 219.* The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions. Nonmajor graduate credit.

Engl 425. Second Language Learning and Teaching. (Cross-listed with Ling). (3-0) Cr. 3. S. *Prereq: 219; junior classification.* The process of second language learning and principles and techniques of teaching second languages. Learning and teaching in specific situations and for particular purposes. Current applications of technology in teaching and assessment. Nonmajor graduate credit.

Engl 437. Grammatical Analysis. (Dual-listed with 537). (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: 220; junior classification.* Theories and methods for analysis of English syntax with emphasis on recent syntactic theory.

Engl 440. Seminar in British Literature. (3-0) Cr. 3. Repeatable. *Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification.* Selected authors, movements, eras, or genres in British literature. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 441. Seminar in American Literature. (3-0) Cr. 3. *Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification.* Selected authors, movements, eras, or genres in American literature. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 445. Seminar: Literature Crossing Boundaries. (3-0) Cr. 3. *Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification.* Intensive study of selected literature that bridges traditional genre, period, national, or disciplinary boundaries. Readings in criticism; required research paper. Nonmajor graduate credit

Engl 450. Seminar in Drama and Film. (3-0) Cr. 3. Repeatable. *Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification.* Selected playwrights, screenwriters, film directors, dramatic or cinematic movements, genres, or national traditions. Readings in criticism; required research paper. Nonmajor graduate credit.
A. Drama
B. Film
C. Other

Engl 451. Seminar in Poetry. (3-0) Cr. 3. Repeatable. *Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification.* Selected authors, movements, eras, or national literatures. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 452. Seminar in Prose. (3-0) Cr. 3. Repeatable. *Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification.* Selected authors, movements, eras, or national literatures. May include the novel, the short story, the essay, or autobiography. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 460. Seminar in Gender and Ethnicity. (Cross-listed with W S). (3-0) Cr. 3. Repeatable. *Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification.* Selected readings of various authors, movements, eras, or genres. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 477. Seminar in Technical Communication. (3-0) Cr. 3. Repeatable. F.S. *Prereq: 302, 309, or 314 and 6 additional credits in technical communication.* Intensive study of a selected topic that bridges theory and practice in technical communication. Required project that contributes to the understanding of an emerging issue in the profession. Nonmajor graduate credit.

Engl 487. Internship in Business, Technical, and Professional Communication. Cr. R. F, S. *Prereq: 9 credits in 302, 309, 313, 314, 415 (preferred), 416, or 477, senior classification; and permission of coordinator.* An opportunity to write, edit, and design business and technical documents in a professional setting. Projects include reports, proposals, manuals, brochures, newsletters.

Engl 489. Undergraduate Seminar. (Cross-listed with Ling). (3-0) Cr. 3. Repeatable. F. *Prereq: 9 credits in English beyond 250.* Intensive study of a selected topic in literature, criticism, rhetoric, writing, or language. Cross-listing with linguistics acceptable only when offered as a course in linguistics. Nonmajor graduate credit.

Engl 490. Independent Study. Cr. arr. Repeatable. F.S. *Prereq: 9 credits in English beyond 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee.* Designed to meet the needs of students who wish study in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Engl 490 may be used toward graduation.
A. Literature
B. Linguistics, Semantics (Ling 490B)
C. Rhetoric, Teaching of Composition
D. Criticism and Theory of Literature
E. Reading: Instructional Methods and Research
F. Creative Writing
G. Business/Technical Communication
H. Honors

Engl 494. Practice and Theory of Teaching Literature in the Secondary Schools. (Cross-listed with C I). (3-0) Cr. 3. F.S. *Prereq: Engl 310, 397, 9 other credits in English beyond 250, Psych 333, admission to teacher education program.* Portfolio review. Current theories and practices in the teaching of literature to secondary school students. Integrating literary study and writing. Preparation and selection of materials. Classroom presentation. Unit planning. (Taken concurrently with C I 280, Cr. 2, and Sp Ed 450)

Engl 497. Capstone Assessment. Cr. R. F.S. *Prereq: 199.* Must be taken by all seniors in their last semester of classes.

Courses primarily for graduate students, open to qualified undergraduate students

Open on a priority basis to graduate students admitted to one of the degree programs in English; instructor permission required for other students.

Engl 500. Proseminar: Teaching English Composition. (3-0) Cr. 3. F. Required of all new English teaching assistants. Introduction to the teaching of ISUComm Foundation Courses. Foundational and relevant newer composition theory and pedagogical methods related to ISUComm Foundation Courses objectives and their classroom enactment, including development of assignments and supporting activities, and evaluation of student projects.

Engl 503. Theory and Research in Composition. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: 6 credits in English.* In-depth consideration of the theory and practice of critical composition pedagogy. Opportunities for actual classroom application.

Engl 504. Teaching Business and Technical Communication. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 302, 309 or 314.* Theory and practice of teaching college courses in business and technical communication. Some consideration of in-service writing courses for business and government. Emphasis on applicable communication and composition theory, curriculum planning, assignment design, and materials development.

Engl 505. Technology in Business, Technical, and Professional Communication. (3-0) Cr. 3. Alt. S., offered 2011. *Prereq: Graduate classification.* Examination of the role of technology, especially computer technology, in communication practices within academic and workplace settings.

Engl 506. Theory and Research in Professional Communication. (3-0) Cr. 3. S. *Prereq: 6 credits in English.* Introduction to professional communication as a discipline, with emphasis on theories of communication and discourse that inform professional communication research and on trends and developments in that research and the field.

Engl 507. Writing and Analyzing Professional Documents. (3-0) Cr. 3. F. *Prereq: 6 credits in English.* Introduction to the theory and practice of planning, preparing, and presenting information in written, oral, and visual forms prepared for business, science, industry, and government. Guided readings. Team projects. Individual projects.

Engl 508. Advanced Workshop in Academic Writing. (3-0) Cr. 3. Repeatable. Alt. SS., offered 2011. *Prereq: 6 graduate credits.* Hands-on practice in writing academic discourse for publication; rhetorical analyses of student-selected academic journals; discussion of current trends in academic writing; professional perspectives on the referee process and on journal editorial decision making. Focus on the writing of selected short pieces (opinion essays, standard reviews, conference-length papers) and of article-length manuscripts.

Engl 509. Writing Proposals and Grant Applications. (3-0) Cr. 3. F. *Prereq: 6 credits in English composition.* Introduction to the theory and practice of preparing and analyzing proposals and grant applications intended for businesses, governmental agencies, and/or private and corporate foundations. Individual assignments and group projects include text documents and oral presentations.

Engl 510. Introduction to Computers in Applied Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: Graduate classification.* Use of applications software for language teaching, linguistic analysis, and statistical analysis. Issues and problems in applied linguistics related to computer methods.

Engl 511. Introduction to Linguistic Analysis. (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: Graduate classification.* Principles and methods of linguistic analysis with emphasis on phonology, morphology,

and syntax. Description of linguistic variation and current theoretical approaches to linguistics.

Engl 513. Language Assessment Practicum. (3-0) Cr. 3. F.S.SS. *Prereq: 519.* Advanced practicum in language assessment.

Engl 514. Sociolinguistics. (Cross-listed with Ling). (3-0) Cr. 3. S. *Prereq: 511 or an introductory course in linguistics.* Theories and methods of examining language in its social setting. Analysis of individual characteristics (e.g., age, gender, ethnicity, social class, region), interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

Engl 515. Statistical Natural Language Processing. (Cross-listed with Ling, HCI). (3-0) Cr. 3. F. *Prereq: Stat 330 or equivalent, recommended Ling 219 or Ling 511.* Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

Engl 517. Second Language Acquisition. (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: 511 or an introductory course in linguistics.* Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

Engl 518. Teaching English as a Second Language Methods and Materials. (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: 511 or an introductory course in linguistics.* Introduction to approaches, methods, techniques, materials, curricular design, and assessment for various levels of ESL instruction. Attention to issues related to the teaching of listening, speaking, reading, writing, vocabulary, pronunciation, and culture.

Engl 519. Second Language Assessment. (3-0) Cr. 3. S. *Prereq: 517.* Principles of second language assessment including reliability, validity, authenticity and practicality. Constructing, scoring, interpreting, and evaluating second language tests for a variety of situations.

Engl 520. Computational Analysis of English. (Cross-listed with Ling, HCI). (3-0) Cr. 3. F. *Prereq: Engl 510 or 511.* Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

Engl 521. Teaching of Literature and the Literature Curriculum. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 6 credits in literature.* Examination of the roles of the literary work, reader, and teacher in literary study. Responses to literature. Place of literature in language arts. Study and development of curriculum materials for middle school, high school, and college levels of instruction.

Engl 522. Literary Theory and Criticism. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 6 credits in literature.* Examination of the history, logic, and rhetoric of contemporary literary criticism and analysis.

Engl 523. Introduction to Old English Language and Literature. (3-0) Cr. 3. *Prereq: Course in medieval literature or history or history of the English language recommended.* Introductory study of Old English language and literature in prose and poetry, including extracts from Beowulf. Some attention to Anglo-Saxon culture.

Engl 524. Literacy: Issues and Methods for Non-native Speakers of English. (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: 511 or an introductory course in linguistics.* Theoretical and practical issues and techniques in the teaching of literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs.

Engl 525. Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English. (Cross-listed with Ling). (3-0) Cr. 3. S. *Prereq: 511 or an introductory course in linguistics.* Theoretical and practical issues and techniques in the teaching of second language pronunciation, listening, and speaking skills. Topics will be relevant to those intending to teach in various contexts involving both K-12 and adult learners.

Engl 526. Computer-Assisted Language Learning. (Cross-listed with Ling). (3-0) Cr. 3. S. *Prereq: 511 or equivalent.* Theory, research, and practice in computer use for teaching nonnative speakers of English. Methods for planning and evaluating computer-based learning activities.

Engl 527. Discourse Analysis. (Cross-listed with Ling). (3-0) Cr. 3. S. *Prereq: 511 or an introductory course in linguistics.* Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

Engl 528. English for Specific Purposes. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 511 or an introductory course in linguistics.* Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and syllabus and materials development for teaching and assessment.

Engl 529. Multimedia Content Management. (3-0) Cr. 3. Alt. S. *Prereq: 313, 505, or permission of instructor.* Strategies for developing and delivering multimodal content via digital media. Focus on the principles of database design, interface development, usability testing, and collaborative content management within professional communication settings.

Engl 531. Topics in the Study of Literature. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. *Prereq: 6 credits in literature.* Intensive study of literary genres, periods, movements, or themes; e.g., Literature and Historicism, Narrating the Feminine, Allegory.

Engl 532. American Literature to 1865. (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. *Prereq: 6 credits in literature.* Selected texts in American literature from Beginnings to the Civil War. Study may include Native American literature, the literature of European conquest, Colonial and Revolutionary periods, Early Republic, and Jacksonian Era, in critical and cultural contexts.

Engl 533. British Literature to 1830. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. *Prereq: 6 credits in literature.* Selected texts from the Medieval, Renaissance, Restoration, Eighteenth-Century, and/or Romantic periods, in critical and cultural contexts.

Engl 534. American Literature 1865 to the Present. (3-0) Cr. 3. Repeatable. Alt. F., offered 2009. *Prereq: 6 credits in literature.* Selected texts in American literature from the Civil War to the present. Study may include Realism, Naturalism, Modernism, and Postmodernism, with significant attention to race/ethnicity, gender, and identity, and to contemporary critical views. Range of authors and genres.

Engl 535. British Literature 1830 to the Present. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. *Prereq: 6 credits in literature.* Selected texts from the Victorian, Edwardian, Modernist, and/or Contemporary periods, in critical and cultural contexts.

Engl 536. Postcolonial Literatures. (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. *Prereq: 6 credits in literature.* Colonial and postcolonial Anglophone literatures from various locations, such as Africa, Asia, the Caribbean, and the British Isles, in critical and cultural contexts.

Engl 537. Grammatical Analysis. (Dual-listed with 437). (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: 219, 220, or 511; junior classification.* Theories and methods for analysis of English syntax with emphasis on recent syntactic theory.

Engl 538. Fiction. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. *Prereq: 6 credits in literature.* Selected fiction writers in English; range of authors and genres. Emphasis on both male and female writers; attention to the relationships between fiction and cultural change.

Engl 539. Poetry. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. *Prereq: 6 credits in literature.* Selected poets writing in English, considered in representative groups. Some emphasis on twentieth-century poets and poetics.

Engl 540. Drama. (3-0) Cr. 3. Repeatable. F. *Prereq: 6 credits in literature.* Primary texts in dramatic genres from various literary periods, in critical and cultural contexts. Frequently concentrates on the English Renaissance and the Shakespearean stage.

Engl 541. Autobiography, Biography, Memoir. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. *Prereq: 6 credits in literature.* Study of lifewriting, e.g., autobiography, biography, memoir, cross-genre writing, autobiographical criticism. Readings may be arranged by period, nationality, or subgenre (e.g., autobiography of childhood experience, celebrity auto/biography).

Engl 542. Production Processes for Technical Documents. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 302, 309, 313, or 314; junior classification.* Review of the principles of desktop publishing as practiced in the field of technical communication. Focus on theories of print document design and project management, as well as digital prepress techniques needed to produce documents using outside print bureaus. Practice with current desktop publishing software.

Engl 543. Environmental Literature. (3-0) Cr. 3. S. *Prereq: Graduate classification.* An exploration of the major genres that derive from literary encounters with the environment. Readings may come from various cultures and time periods, but about half of the texts will represent canonical American environmental literature from the 19th and 20th centuries.

Engl 544. Multicultural U.S. Literatures. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. *Prereq: 6 credits in literature.* Primary texts by U.S. multicultural writers. Development of U.S. literary traditions, discourses of race and gender, counter-storytelling, myths of origin, phases and movements within the national literary canon. Readings in several genres.

Engl 545. Women's Literature. (Cross-listed with W S). (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. *Prereq: 6 credits in literature.* Primary texts by women writers; historical, thematic, formal, or theoretical approaches; secondary readings; e.g., Nineteenth-Century Women Writers; American Women's Personal Narratives; Southern Women Writers of the U.S.

Engl 546. Issues in the Study of Literature. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. *Prereq: 6 credits in literature.* Intensive study of current and emerging topics and problems concerning literature and its relationship to theory and to language study; e.g., Theory of Metaphor; Renegotiating the Canon; Feminist Theory.

Engl 547. The History of Rhetorical Theory I: From Plato to Bacon. (3-0) Cr. 3. F. *Prereq: 6 credits in English.* Rhetorical theory from the classical period of ancient Greece and Rome through the Middle Ages to the early Renaissance; attention to its relation to the nature of knowledge, communication, practice, and pedagogy.

Engl 548. The History of Rhetorical Theory II: From Bacon to the Present. (3-0) Cr. 3. S. *Prereq: 6 credits in English.* Rhetorical theory from the early modern period (Bacon, Descartes, and Locke) to the present; attention to its relation to the nature of knowledge, communication practice, and pedagogy.

Engl 549. Multimedia Design in Professional Communication. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 505.* Rhetorical principles of information-based multimedia design. Practical understanding of computer applications used in multimedia development. Focus on theoretical and practical elements of producing

multimedia training programs in both education and industry. Work with interactive hypertext, digital audio, and non-linear video editing.

Engl 550. Creative Writing: Craft and Professional. (3-0) Cr. 3. F. *Prereq: Admission into MFA Program in Creative Writing and Environment.* A multigenre craft course required of all incoming students in the *MFA Program in Creative Writing and Environment.* Students develop an understanding of craft and environmental writing across genres (poetry, fiction, nonfiction) as well as learn about editing and publication practice through the lens of a working literacy journal, Flyway: A Journal of Writing and Environment. Other course activities include presentations on the production practices of leading literary journals; individual editing projects; pragmatic tips for finding publication outlets for polished creative work; and a field trip to publishing houses.

Engl 551. Advanced Multi-Genre Creative Writing Workshop. (3-0) Cr. 3. *Prereq: Fourth-semester or equivalent standing in the Creative Writing and Environment M.F.A. program.* Students develop book-length manuscripts of fiction, creative nonfiction, or poetry.

Engl 553. Graduate Workshop: Writing The Long Project. (3-0) Cr. 3. Repeatable. *Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor.* Individual long creative writing project ideas developed in course. Portions of long creative writing project workshopped, revised, discussed in conferences.

Engl 554. Graduate Fiction Workshop. (3-0) Cr. 3. Repeatable. *Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor.* Individual projects in fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

Engl 555. Graduate Nonfiction Workshop. (3-0) Cr. 3. Repeatable. *Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor.* Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

Engl 556. Graduate Poetry Workshop. (3-0) Cr. 3. Repeatable. *Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor.* Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

Engl 557. Studies in Creative Writing. (3-0) Cr. 3. Repeatable. *Prereq: Graduate classification.* Special topics course on ideas, issues, and techniques in creative writing. Subject matter may include specific genres, aspects of the creative writing process, or themes of particular interest. Significant readings and written work required; previous workshop experience helpful.

Engl 558. Teaching Creative Writing. (3-0) Cr. 3. *Prereq: Graduate classification.* Pedagogical approaches that are effective for grade-school through adult-education creative writing teaching. Writing exercises, workshops, text evaluation, and visits from creative writers.

Engl 559. Creative Writing Teaching Internship. Cr. arr. *Prereq: Permission of participating instructors.* Students assist in an introductory creative writing class. Some supervised teaching but mainly evaluation of submissions and individual conferences. Requirements and grades determined by participating instructors.

Engl 560. Environmental Field Experience. (3-0) Cr. 3. Repeatable. *Prereq: Graduate classification.* Students spend a term on a project that requires fieldwork. Projects might include working for a federal, state or private non-profit environmental organization or farm, or living and working in a specified natural area.

Engl 586. Visual Communication in Professional Writing. (3-0) Cr. 3. Alt. F., offered 2009. *Prereq: A course in business or technical communication.* Rhetorical theory and research in graphics, document design, and related principles of visual communication. Methods of designing texts, data displays, illustrations, and other visual elements in business and technical communication.

Engl 587. Internship in Business, Technical, and Professional Communication. (3-0) Cr. arr. Repeatable. F. S. *Prereq: 507 plus 3 additional graduate credits in business and technical writing or composition and rhetoric, permission of instructor. Limited to master's and doctoral degree candidates in the English Department.* An opportunity to write, edit, and design business and technical documents in a professional setting. Projects include reports, proposals, manuals, brochures, newsletters.

Engl 588. Supervised Practicum in Teaching English as a Second Language. (Cross-listed with Ling). (1-5) Cr. 3. F.S.SS. *Prereq: 15 credits toward the TESL/Applied Linguistics master's degree.* Intensive observation of ESL instruction and supervised practice in teaching learners of English in a context appropriate to the practicum student's goals. Seminar discussion of observed practices in relation to language teaching theories and methods.

Engl 589. Supervised Practicum in Literary Editing. (3-0) Cr. 3. S. *Prereq: 552, at least one graduate creative writing workshop, permission of instructor.* Students assume editorial duties for Flyway, a nationally distributed literary journal: overseeing a staff; screening submissions; corresponding with authors; editing and proofing; assisting with layout; communicating with the printer; overseeing a contest; and promoting the magazine.

Engl 590. Special Topics. Cr. arr. Repeatable. *Prereq: Permission of the Graduate Studies Committee according to guidelines available in the department office.*
A. Literature
B. Teaching English as a Second Language (TESL)/Applied Linguistics. (Cross-listed with Ling 590B)
C. Composition and Rhetoric
E. Rhetoric and Professional Communication
F. Creative Writing
G. Applied Linguistics and Technology

Engl 592. Studies in Rhetoric and Professional Communication. (3-0) Cr. 3. Repeatable. *Prereq: 12 hours in rhetoric, linguistics, or literature, excluding 150/250.* Seminar on selected topics in rhetoric and professional communication or composition.

Engl 595. Graduate Study and Travel. Cr. R. *Prereq: Permission of instructor.* Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.
A. Literature
B. Creative Writing
C. Linguistics
D. Rhetoric and Professional Communication
E. Teacher Education

Engl 599. Creative Component. Cr. 3. F.S.SS. *Prereq: Graduate classification, permission of major professor.*

Courses for graduate students

Engl 601. Research Methods in Rhetoric and Professional Communication. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 6 graduate credits in English.* Survey of the major qualitative and quantitative methods used in research on communication and language in academic and nonacademic settings.

Engl 602. Research Design in Rhetoric and Professional Communication. (3-0) Cr. 3. Alt. F., offered 2010. *Prereq: 601.* A workshop for advanced graduate students in rhetoric and professional communication. Focus on qualitative and/or quantitative methods.

Engl 603. Seminar in Advanced Pedagogy in Rhetoric and Composition: Theory and Research. (3-0) Cr. 3. Alt. S., offered 2010. *Prereq: 503 or 504.* Exploration of relationships between theory and practice in current pedagogy. Intensive examination of contemporary theories of poststructuralism, new media, feminism, postcolonialism, or cultural studies and their impact on current pedagogical practice. Participation in pedagogical research and theory building.

Engl 611. Topics in the History of Rhetorical Theory. (3-0) Cr. 3. Repeatable. Alt. F., offered 2009. *Prereq: 547 or 548.* Rhetorical theory, criticism, and/or practice in relation to a historical period; the historical development of a rhetorical concept.

Engl 621. Topics in Current Rhetorical Theory. (3-0) Cr. 3. Repeatable. S. *Prereq: 503 or 506.* Advanced study of a specialized topic or problem in rhetorical theory, criticism, or practice.

Engl 623. Research Methods in Applied Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F. *Prereq: 511, 517, 518, 519.* Survey of research traditions in applied linguistics. Focus on theoretical and practical aspects of quantitative and qualitative approaches to applied linguistic study, including experimental and quasi-experimental methods, classroom observation and research, introspective methods, elicitation techniques, case studies, interactional analysis, ethnography, and program evaluation. Computational tools and resources for linguistic research will be highlighted.

Engl 626. Computer-Assisted Language Testing. (3-0) Cr. 3. F. *Prereq: 510, 511, 519.* Principles and practice for the use and study of computers and the Internet in second language assessment.

Engl 630. Seminar in Technology and Applied Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F.S. *Prereq: Engl 510, 511, 517, 518, others depending on the topic.* Topic changes each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feed back in CALL programs, and advances in language assessment.

Engl 688. Practicum in Technology and Applied Linguistics. (Cross-listed with Ling). (1-5) Cr. 3. F.S.SS. *Prereq: Engl 510, 626, or equivalent; 2nd year PhD student.* Focus on integrating theoretical knowledge with practical expertise. Assess client needs; develop, integrate, and evaluate solutions. Practical understanding of computer applications used in multimedia development. Create web-based or CD-ROM-based multimedia materials. Work with advanced authoring applications.

Engl 699. Research. Cr. arr. Repeatable. F.S.SS. *Prereq: Graduate classification, permission of major professor.* Research.

Entomology

www.ent.iastate.edu

Leslie Lewis, Chair of Department

University Professr (Emeritus): Pedigo

Professors: Bonning, Coats, Courtney, Dewitt, Jurenka, D. Lewis, L. Lewis, Rice, Tollefson, Wintersteen

Professors (Emeritus): Guthrie, Hart, Krafsur, R. Lewis, Mutchmor, Rowley, Showers

Associate Professors: Beetham, Holscher

Assistant Professors: Bartholomay, Gassmann, Oneal

Assistant Professor (Adjunct): Vandyk

Assistant Professors (Collaborators): Hellmich, Sappington, Sumerford

Undergraduate Study

For undergraduate curriculum in Insect Science, see *College of Agriculture, Curricula*.

A degree in Insect Science will provide students with a strong foundation in the biological sciences with an emphasis on insects. This degree prepares students for positions in industry, government, education, and public health. Chemical and seed companies, pest-management or consulting firms, and Horticultural nurseries employ insect scientists. State and federal agencies employ insect science graduates as consultants, extension directors, mosquito abatement agents, and research aides. A significant number of graduates pursue advanced graduate degrees in academia or professional degrees in the medical or veterinary fields.

Graduates understand the evolutionary and ecological relationships of insects with other life forms, and the impact of insects relative to human and animal health, as well as the relationships between insects and humanity's food, fiber, structural, and aesthetic needs and expectations. They are skilled in identifying insects and related groups and understand the biology, ecology, behavior, diversity, and evolutionary relationships of the major groups of insects. Graduates understand the principles and methods available to manage beneficial and pest insect populations. They understand the application of the scientific method in problem solving and the principles of experimental design and analysis. Graduates are able to communicate research and educational materials properly and competently - orally, visually, and in writing - and are able to work effectively with others.

Graduates of the agricultural and Horticultural insect management option are skilled in identifying pests and measuring their impact on plant and animal hosts for the management of these pests. They understand the environmental, legal, and ethical issues involved in insect population management. Graduates of the insect biology option have achieved an understanding of the biochemical and physiological processes governing insect metabolism, growth, and form. They understand the evolutionary and ecological significance of insects. Graduates of this option often enter graduate or professional schools.

The department offers a minor in Insect Science that may be earned by completing Ent 370 and 12 credits in courses selected from an approved list supplied by the department. Entomology administers the Emerging Global Diseases minor (see www.ent.iastate.edu/dept/undergrad/egd). Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and Socioeconomics. One course must be taken from each of three core areas: (Pathogens and Disease) Micro 310 or Biol/Micro 353; (Sociology and Economics) Soc 411, Soc 345, FS HN 342, or Anthr 439; (Arthropod-borne Diseases) Ent 374 or Ent 574. The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellar levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.
