The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at http://www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.
TABLE OF CONTENTS

About the Catalog ................................................................. 7
Academic Conduct ................................................................. 8
Academic Life ........................................................................ 11
Grading ................................................................................... 12
Degree Planning ...................................................................... 17
Progress and Probation .......................................................... 18
Academics .............................................................................. 21

ABOUT THE CATALOG

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New programs may be offered in the term (semester or summer session) following final approval by the Board of Regents, State of Iowa and any required accrediting bodies. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program. The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/Faculty Handbook Curriculum Approvals – Section 10.8. See the Office of the Provost (http://www.provost.iastate.edu) web site for more information.

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum) representatives. Editing begins in late February with course changes due to the Office of the Registrar by June 1. Curriculum and other general information is due to the Office of the Registrar by December 1. Publication is the following February.

See the catalog editing web site (http://www.registrar.iastate.edu/catalog-editing) for more details on how to make changes to the catalog.
ACADEMIC CONDUCT

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Validating Enrollment for regulations concerning attendance to validate students’ enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce their policy at the beginning of the course.

Additional information regarding discretionary accommodation for disability and religion are available at http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml

Veteran Attendance

Students who receive benefits from the Veterans Administration are required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at http://www.veterans.iastate.edu/.

Field Trips/Curricular-Related Activities

Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday-Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (http://classes.iastate.edu).

Excusable Absences for Non-Curricular Reasons

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence. While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student’s work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student’s ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

Extra-Curricular Activities as a Representative of the University

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:

- academic or professional conferences and workshops
- intercollegiate athletic, academic, and judging competitions
- musical, theatrical, dance and other artistic performances
- presentations or programs given to external audiences

Other Extra-Curricular Activities

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

Military Service

Instructors shall excuse absences due to Veteran or military service obligations (including service-related medical appointments, military orders dictating appointments, and National Guard Service obligations). When a student’s military or veteran obligations are for more than two weeks, the student should meet with their adviser to discuss the situation and academic options and work with their instructors to discuss potential accommodations. University procedures are in place for such situations and should be followed. In all instances, students have a responsibility to communicate with their instructors to ensure they are continuing to meet course expectations and requirements. Faculty, staff, and students
are encouraged to utilize the ISU Veterans Center and review information at veterans.iastate.edu (https://www.veterans.iastate.edu).

Court Appearances
Instructors shall excuse absences due to officially mandated court appearances including jury duty.

Academic Dishonesty
Academic dishonesty occurs when a student uses or attempts to use unauthorized information in the taking of an exam or assignment; or submits as their own work themes, reports, drawings, laboratory notes, or other products prepared by another person; or knowingly assists another student in such acts; or plagiarism. Such behavior is abhorrent to the university and students found responsible for academic dishonesty face expulsion, suspension, conduct probation, or reprimand. Instances of academic dishonesty ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.

Examples of specific acts of academic dishonesty include but are not limited to:

1. **Obtaining unauthorized information.** Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework not specifically permitted to do so by the instructor, or by looking at your notes or other written work during an examination when not specifically permitted to do so.

2. **Tendering of information.** Students may not give or sell their work to another person who plans to submit it as their own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, or giving or selling a term paper to another student.

3. **Misrepresentation.** Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing a paper from a term paper service; reproducing another person’s paper (even with modifications) and submitting it as their own; having another student do their computer program or having someone else take their exam.

4. **Bribery.** Offering money or any item or service to a faculty member or any other person to gain academic advantage for yourself or another is dishonest.

5. **Plagiarism.** Unacknowledged use of the information, ideas, or phrasing of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws.

Literary offenses of this kind are known as plagiarism. Plagiarism occurs when a person does not credit the sources from which they borrow ideas, whether these ideas are reproduced exactly or summarized. The method of documentation will differ depending on whether the sources are written, oral, or visual. Ethically, communicators are responsible for providing accurate, detailed information about their sources. Practically, audiences need this information to comprehend and evaluate a message’s content. The Student Guide: English 150 and 250, available for purchase at the University Book Store, describes the process of documenting source materials as do many other reference guides.

Academic dishonesty is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic dishonesty or academic misconduct is therefore subject to appropriate academic penalty; to be determined by the instructor of the course, as well as sanctions under the university Student Disciplinary Regulations (http://www.policy.iastate.edu/policy/SDR). If an instructor believes that a student has behaved dishonestly in a course, the following steps are recommended:

1. Arrange for an opportunity to meet with the student and discuss your conclusions.
2. Allow the student to provide their side of the story, and ask if they admit or deny responsibility for the misconduct.
3. If they deny responsibility, do not yet assign a grade for the assignment or course (leave grade as N for grade processing).
4. If they admit the misconduct, you may assign a grade according to your discretion and what you may have outlined in your syllabus.
5. Refer the case and information to the Dean of Students Office, including related materials such as emails, exams, essays, & websites.
6. When an outcome is determined by the Dean of Students Office, both the student and the instructor will be notified and apprised of the conclusions.

If a student either admits dishonest behavior or is found responsible for academic misconduct by the Office of Student Conduct or the Student Conduct Hearing Board, sanctions are imposed based on the severity of the misconduct, and might include any of the following:

1. **Disciplinary Reprimand:** An official warning followed by written notice to the student that their conduct is in violation of university rules and regulations.

2. **Conduct Probation:** A more severe sanction than a disciplinary reprimand it is a period of review and observation during which the student must demonstrate the ability to comply with university rules,
regulations, and other requirements stipulated for the probation period.

3. **Deferred Suspension**: A suspension, but which is deferred subject to a definite or indefinite period of observation and review. If a student is found responsible for a further violation of the university Student Disciplinary Regulations or an order of a judiciary body, suspension may be recommended to the Dean of Students Office.

4. **Defined Length Suspension**: The student is dropped from the university for a specific length of time. This suspension cannot be for less than one semester or more than two years. Reinstatement may be contingent upon meeting the written requirements specified at the time the sanction was imposed, if any.

5. **Indefinite Suspension**: The student is dropped from the university indefinitely. Reinstatement may be contingent upon meeting the written requirements specified at the time the sanction was imposed, if any. Normally, a student who is suspended indefinitely may not be reinstated for a minimum of two years.

6. **Expulsion**: The student is permanently deprived of the opportunity to continue at the university in any status.

7. **Transcript Notation**: When a student is sanctioned with an expulsion, suspension, or revocation of admission, a notation is made on the student’s academic transcript.

Course and academic outcomes (grades) related to incidents of academic dishonesty are determined and assigned by faculty pursuant to their course policy and/or college specific policy.

A student accused of academic misconduct has the option to stay in the class or to drop the class if the drop is made within the approved time periods and according to the regulations established by the university. If the student chooses to drop the class, the student will be required to sign a statement of understanding that if the student is later found responsible for academic misconduct, then the student will receive an "F" for the course.

Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of seven years, after which the file records are purged. These student records are subject to state and federal laws and regulations guiding confidentiality of student records. However, when the student is expelled, suspended, or their admission is revoked, a notation will appear on the academic transcript that the student has been dropped due to disciplinary action is not eligible to enroll. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the Dean of Students is available at any time to provide advice and assistance to the instructor in deciding a proper course of action to be taken.

### Response to Classroom Disruption

Should any student officially enrolled for credit or audit in a class disrupt the instructor’s ability to ensure a safe environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom disruption, the instructor may, if they find it necessary, explain to the student and the class why the particular action is deemed disruptive. The instructor should also take into consideration complaints of disruptive behavior brought to their attention by students. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention, including suspension from class, use of student disciplinary regulations, or police intervention, as discussed in more detail in the Faculty Handbook. (http://www.provost.iastate.edu)

Although most situations are best resolved without resorting to requests for police intervention, the Department of Public Safety should be called when the disruptive behavior prohibits the continuation of the class. The Department of Public Safety may also be called if any person enters or remains in the classroom after being asked by the instructor to leave.

### Course Ownership

#### Ownership of Course-related Presentations

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell the notes or recordings must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Conduct Code as published on the Policy Library web site at https://www.policy.iastate.edu/policy/SDR#4.2.25.

### Recording and Transmission of Classes

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on their classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases the recordings may be preserved and used for other classes as well.

<tr>
<td>S</td>
<td>Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (required-credit) courses, and in courses numbered 290, 490, 590, and 690.</td>
</tr>
<tr>
<td>T</td>
<td>Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.</td>
</tr>
<tr>
<td>X</td>
<td>The course was officially dropped by the student after the first week of the term.</td>
</tr>
</tbody>
</table>

N

No report was submitted by the instructor. An N is not a recognized grade or mark, it merely indicates the instructor has not submitted a grade and that a grade report has been requested. A nonreport (N) will automatically change to a grade of ‘F’ after one calendar year whether or not the undergraduate student enrolled during that period. If the N is outstanding at the time of graduation, it will be converted to a grade of ‘F’. Undergraduate students will not graduate with N on their permanent record. Repeating a course will not resolve the N.

I

Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student’s control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.***

*See Pass Not Pass Grading.

***See Incomplete Marks in the Grade Policies tab.

Policy Information

Grades represent the permanent official record of a student’s academic performance. The grading system at Iowa State University operates according to the following regulations:

1. **Student performance or status** is recorded by the grades and marks described below. A student’s grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor’s degree.

2. Students who want to **protest a grade submitted by an instructor** should follow the procedures described in the section, Appeal of Academic Grievances.
3. Incomplete Marks - If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (downloadable from the Office of the Registrar forms [http://www.registrar.iastate.edu/forms] website) to document the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year or the student’s graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete by communicating directly with the student by e-mail or postal mail. A copy of this communication must be retained by the instructor until after the I is resolved in case there are any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter the Incomplete (I) electronically as part of the end of term final grade submission.

Resolution of an Incomplete: When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade, which becomes part of the student’s cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, may not be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor’s department head and the dean of the instructor’s college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above. The Grade Report to the Registrar form should be used to initiate the request to change the grade to an Incomplete. The Grade Report form should be completed and forwarded by the instructor to his/her Dean for approval. The Dean will forward the Grade Report form to the Office of the Registrar if approved.

Incompletes in all courses must be resolved by the middle of the student’s term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

4. To change a grade or mark already reported to the registrar, the instructor submits the Grade Report to the Registrar form. This form is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

5. Midterm Grades. The registrar will collect C, D+, D, D- and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisers using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of midterm grades is to provide the student and adviser with a timely warning that the student’s academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

6. Grades in all courses attempted remain on each student’s record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

7. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average.

8. Repeating Courses.

- The most recent grade for a course a student repeats will be used in computing the student’s cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student’s record.
- Students may repeat any course for which an F grade, an NP grade, or any passing grade was received.
- Beyond 15 credits of repeats, all grades will be included in computing the cumulative grade point average. Please refer to items #1 and #7 above regarding how to calculate the grade point average.
- Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.
- Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student’s adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.
- Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.
- A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be
applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.

- Repeated courses may affect any federal financial aid. See the Financial Aid website (http://www.financialaid.iastate.edu) for further information.

**Pass-Not Pass Grading**

Students may choose to attempt a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who are not on academic probation (P) at the beginning of the semester are eligible. A special (nondegree) student must obtain approval from their academic adviser and college dean.
2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.
3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.
4. Courses offered on a satisfactory-fail basis may not be taken P-NP.
5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser’s signature in the P-NP approval section of the form.
6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.
7. Changes to or from a P-NP basis may not be done after the last day to drop (usually the Friday of week 10 of the term) without college approval. Changes from a P-NP basis to a Graded basis that occur after the last day to drop will still count against a student’s 9 maximum allowable P-NP credits.
8. Registration on a P-NP basis is not indicated on the instructor’s class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.
9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student’s grade point average (GPA).
10. When students change their curriculum, any P credits that they have acumulated will be accepted by the new department if such credits are in courses normally accepted by the department.
11. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student’s degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student’s degree program.

**Examinations**

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   a. The course is multi-sectioned.
   b. A common departmentally developed examination will be administered to all students in all sections at the same time.
   c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.
   Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
   a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not
give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.

b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.

c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.

d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.

e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.

f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Dead Week
For each Fall and Spring semester, the last full week of classes before final examinations is designated as Dead Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Dead Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Dead Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Dead Week must be listed on the syllabus provided at the start of the course.
- Mandatory final examinations may not be given during the Dead Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.
- No in-class quizzes or exams may be given on the Thursday and Friday of Dead Week. Quizzes/exams that are administered outside of class such as take-home exams, online exams, or exams given in the testing centers must: 1) open no later than Wednesday at noon of Dead Week, and 2) only cover material presented on or before the Tuesday of Dead Week.

Exceptions to this policy include the following:

- Classes that only meet on Thursdays or Fridays
- Lab components of courses
- Half-semester courses
- Make-up exams due to excused absences
- Regularly used formative assessments intended to enhance student engagement and guide course delivery

All other exceptions require approval by the Office of the Senior Vice President and Provost.

- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Dead Week period. Any exception to these restrictions must be authorized in advance by the Office of the Senior Vice President for Student Affairs.

Instructors are reminded that most students are enrolled in several courses each semester, and the widespread violation of this policy can cause student workloads to be excessive as students begin their preparation for final examinations.

Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

Policy approved by Faculty Senate, Senior Vice President and Provost, and President, 2013; Amended and approved by Faculty Senate, Senior Vice President and Provost, and President, 2017.

Scholastic Recognition
The university recognizes those students who are doing exceptionally well in several ways, including the following.
1. **Dean's List.** Each semester the university issues a dean's list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean’s list is issued for summer school. The list can be viewed from the Office of the Registrar website (http://www.registrar.iastate.edu).

2. **Top 2 Percent.** Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student’s permanent record.

3. **Graduation with Distinction.** Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate “with distinction” provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits.

   Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student’s official transcript and diploma and in the commencement program.

   Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

4. **Honors Program.** Students who are full members of the University Honors Program need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student’s permanent record and diploma, and in the commencement program.

### Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

### Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.
PROGRESS AND PROBATION

Additional Academic Standards Regulations

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate. Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval. The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

Changing colleges: A student on academic probation (P) may transfer to another program in the university before period 3 begins (before the last day to drop a course.) For students on academic probation (P), transfer during period 3 (after the last day to drop a course) can only occur under exceptional circumstances and with the approval of the chair of the new program and the dean of the new college. A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.

Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of the term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.

Special (nondegree) students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university's academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee’s judgment, the student’s academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student’s ISU cumulative grade point average, are subject to Iowa State University’s academic standards.

Maintaining Satisfactory Progress

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student’s semester grade point average (GPA), the student’s cumulative ISU GPA, and the student’s transfer GPA (if below 2.00.)

Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student’s permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

- Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or
They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university. Academic probation is an indication of very serious academic difficulty. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both. Academic probation status is not a part of the student’s permanent academic record.

Students on academic probation and warning are required to meet with their adviser and to complete the Academic Intervention Self Assessment form, which can be accessed here: http://www.dso.iastate.edu/asc/ai/students/

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.

2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

• Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA.
• Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).

Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Academic Dismissal for dismissal policy.

Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal

Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student’s academic record as a permanent notation. The official transcript of a student who has been dismissed includes a “Not Permitted to Register” notation.

Summer Academic Standards Regulations

Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:

All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student’s grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Summer Cumulative GPA:

A student who was on academic probation (P) at the beginning of summer term based only on cumulative GPA, who raises his or her
cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA < 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

**Summer Option for Students in Dismissal Status:**

Starting with the 2019-20 University Catalog, Summer Option will no longer be an option for students in dismissal status.
ACADEMICS

Classification

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school. See Grades for information about the grading system at Iowa State University.

Classification in all colleges except Veterinary Medicine is as follows:

- **Sophomore**: 30 credit hours earned
- **Junior**: 60 credit hours earned
- **Senior**: 90 credit hours earned

Students who have a bachelor's degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special (nondegree) student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special (nondegree) student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as an undergraduate special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special (nondegree) students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Degree Planning

ISU Degree Audit

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp). The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student's curriculum.

Students should use the degree audit information to help them review progress towards their degree(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will meet all degree requirements upon successful completion of the courses on the student’s schedule that term.

In addition, through AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp), students may request a degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress course work applies toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

Two Bachelor's Degrees

Students may receive two bachelor's degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form, Request for Double Major/ Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will have access to the student's information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor's Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.
Double Major/Curriculum
A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, "Request for a Double Major/Curriculum or Two Degrees." This form, available from advisers and classification offices, should be completed at least one term prior to graduation. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student's rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student's registration adviser, but both advisers will have access to the student's information. Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

Second Major (Curriculum) Completed after the Bachelor's Degree
After receiving a bachelor's degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean's office.

Changing Curriculum or Major
A student's freedom to change their major, and the procedure that should be followed, depend on the student's academic standing and on policies of individual colleges as approved by the provost.

1. If students have never been dismissed and reinstated, they may change their major by consulting first with their adviser. Procedures for changing curriculum or major are as follows:
   a. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
   b. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.

2. Students on academic probation (P) may be restricted by rules outlined in the section on Additional Academic Standards Regulations.

3. Students who have been reinstated may not transfer to another college within the university during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

Declaring a Minor
Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students' transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. See /colleges/curricula/#minors for additional information regarding policies which govern minors. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

Undergraduate Certificates
An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.
An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student’s transcript and a printed certificate will be awarded.

**Appeal of Academic Grievances**

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an appeal more than one year following completion of the course, and may not initiate the appeal of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal appeal, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor’s department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal within 45 calendar days in writing to the dean of the instructor’s college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair’s decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor’s college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward within 45 calendar days a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within fifteen calendar days of receipt of the written notice of the appeal.

Within ten calendar days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost’s decision may be made within 45 calendar days to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Student Government. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

**Graduation**

Seniors must file a graduation application with the Graduation Office, 210 Enrollment Services Center. Students will be notified of their graduation status approximately mid semester of their graduation term. For graduation application instructions and deadlines, go to the Graduation and Commencement website (http://www.graduation.iastate.edu).

Iowa State University commencement ceremonies are held at the end of fall and spring semesters. Undergraduate students expected to graduate at the end of summer semester are invited to participate in the spring ceremony preceeding their graduation term or the fall ceremony following their graduation term. In addition to the formal University commencement ceremony, the undergraduate colleges host graduation activities take place at the end of fall and spring semesters. For
more information see www.registrar.iastate.edu/graduation/ (http://www.registrar.iastate.edu/graduation)

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. Registration for the term has been completed and the date of graduation is correct on the degree audit printout.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State; and student has met all special grade point average requirements established by their college, department, or program in specified courses.
   a. Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.
   b. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.
5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.
7. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their transcripts. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.

Class Attendance
In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validating Enrollment for regulations concerning attendance to validate students’ enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course.

Additional information regarding discretionary accommodation for disability and religion are available at http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml

Veteran Attendance
In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not deny access to classes or facilities to a Veteran or eligible dependent due to a late payment from the Veterans Administration. This is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapter 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.). For the purposes of this policy, "Denial of Access" shall be defined as "to prohibit the entry, participation, or attendance to an event or facility otherwise afforded to all registered students.” More information about this policy is available at https://catalog.iastate.edu/tuitionfees/#feepaymenttext.

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at http://www.veterans.iastate.edu. (http://www.registrar.iastate.edu/veterans)

Field Trips/Curricular-Related Activities
Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday -Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot
be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (http://classes.iastate.edu).

**Excusable Absences for Non-Curricular Reasons**

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence. While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student’s work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student’s ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

**Extra-Curricular Activities as a Representative of the University**

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:

- academic or professional conferences and workshops
- intercollegiate athletic, academic, and judging competitions
- musical, theatrical, dance and other artistic performances
- presentations or programs given to external audiences

**Other Extra-Curricular Activities**

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

**Military Service**

Instructors shall excuse absences due to performing required National Guard or other United States military service obligations (other than annual training). When a student is called to active duty for more than two weeks, instructors should meet with the student and the student’s adviser to discuss the situation and academic options. University procedures are in place for such situations and should be followed.

**Court Appearances**

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

**Examinations and Evaluation**

**Evaluation Procedures**

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

**Retention of Records**

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

**Examinations**

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.

2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   a. The course is multi-sectioned.
   b. A common departmentally developed examination will be administered to all students in all sections at the same time.
c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted. Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:

a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.

b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.

c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.

d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.

e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.

f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

**Dead Week**

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Dead Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Dead Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Dead Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Dead Week must be listed on the syllabus provided at the start of the course.

- Mandatory final examinations may not be given during the Dead Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.

- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Dead Week period. Any exception to these restrictions must be authorized in advance by Office of the Dean of Students.

**Scholastic Recognition**

The university recognizes those students who are doing exceptionally well in several ways, including the following.
1. **Dean’s List.** Each semester the university issues a dean’s list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean’s list is issued for summer school. The list can be viewed from the Office of the Registrar website (http://www.registrar.iastate.edu).

2. **Top 2 Percent.** Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student’s permanent record.

3. **Graduation with Distinction.** Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits.

4. **Cumulative grade point recognition.** Students who graduate with a cumulative grade point average of 3.50 or higher are recognized as follows:
   - Summa Cum Laude: cumulative grade point average of 3.90 or higher.
   - Magna Cum Laude: cumulative grade point average of 3.70 to 3.89.
   - Cum Laude: cumulative grade point average of 3.50 to 3.69.

   This recognition appears on the student’s official transcript and diploma and in the commencement program.

5. **Candidates for the bachelor of liberal studies degree** may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

6. **Honors Program.** Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student’s permanent record and diploma, and in the commencement program.
ACCREDITATION AND ADMINISTRATION

Accreditation

Iowa State University is accredited by the Higher Learning Commission.

Higher Learning Commission
230 South LaSalle St., Suite 7-500
Chicago, IL 60604-1411

Board of Regents, State of Iowa
www.regents.iowa.gov/ (http://www.regents.iowa.gov)

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale, Iowa.

Officers of Administration

Wendy Wintersteen, Ph.D.
President of the University

Jonathan A. Wickert, Ph.D.
Senior Vice President and Provost

Pamela Elliott Cain, B.S., CPA
Interim Senior Vice President for University Services
Interim Chief Financial Officer

Martino Harmon, Ph.D.
Senior Vice President for Student Affairs

John D. Lawrence, Ph.D.
Vice President for Extension and Outreach

Sarah M. Nusser, Ph.D.
Vice President for Research

Daniel Robison, Ph.D.
Dean of the College of Agriculture and Life Sciences

David P. Spalding, M.B.A.
Dean of the Ivy College of Business

Luis Rico-Gutierrez, M.S.
Dean of the College of Design

Sarah Rajala, Ph.D.
Dean of the College of Engineering

Laura D. Jolly, Ph.D.
Dean of the College of Human Sciences

Beate Schmittmann, Ph.D.
Dean of the College of Liberal Arts and Sciences

Dan Grooms, D.V.M., Ph.D.
Dean of the College of Veterinary Medicine

William R. Graves, Ph.D.
Dean of the Graduate College

M. Beth McNeil, M.S.
Dean of the Library

Dawn Bratsch-Prince, Ph.D.
Associate Provost for Faculty

Ann Marie VanDerZanden, Ph.D.
Associate Provost for Academic Programs

Vernon J. Hurte, Ph.D.
Dean of Students
ADMISSIONS

Office of Admissions
Executive Director of Admissions and New Student Programs
Katharine Johnson Suski

Admission
When to Apply
Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date. Application deadlines are available at [www.admissions.iastate.edu](http://www.admissions.iastate.edu).

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply
Applications for admission are available online at [www.admissions.iastate.edu](http://www.admissions.iastate.edu).

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Undergraduate Admission Directly from High School
Admission decisions are made by admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see [www.admissions.iastate.edu](http://www.admissions.iastate.edu) for current application fee information). In addition, applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the TOEFL, IELTS, PTE, ACT, or SAT. Detailed information concerning test score requirements can be found at [http://www.admissions.iastate.edu/intl/requirements.php](http://www.admissions.iastate.edu/intl/requirements.php).

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based upon the mathematical formula listed below:

**Regent admission Index Formula:**

\[
\text{RAI Score} = \left( \frac{\text{ACT composite score} \times 3}{100} \right) + \left( \frac{\text{Cumulative GPA}}{4} \times 30 \right) + \left( \frac{\text{Number of years of core courses in high school}}{2} \times 5 \right)
\]

Note: For purposes of calculating the RAI, SAT scores will be ACT composite equivalents; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

Applicants who are admitted with less than a 245 RAI score may be required to participate in the first-year Smart Start Program as a condition of their enrollment.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.
E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation
Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts
Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics
Three years, including one year each of algebra, geometry, and advanced algebra

Science
Three years, including at least two years of courses which emphasize elements of biology, chemistry, or physics

Social Studies
Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering
In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission - Nondegree Undergraduate
Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree may not enroll in graduate credits. To take courses listed as available for graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

Nondegree applicants are held to the same standards of admission as degree-seeking applicants, including English language proficiency.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree undergraduate students in the College of Liberal Arts and Sciences. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students - Undergraduate and Graduate
Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Reentry Students.

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry Students for more information.

Undergraduate Admission by Transfer from Other Educational Institutions
Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university's English communication requirement. This can
be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities will be admitted provided they have achieved a minimum 2.25 transfer grade point average (on a 4.00 grading scale) for all college work previously attempted. Applicants who have earned an associate’s degree will be required to have earned a minimum 2.00 transfer grade point average.

Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices
Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

A. Students from regionally accredited colleges and universities.

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

—credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

—credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor’s degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

C. Students from colleges and universities not regionally accredited.

Courses completed at colleges and universities that are not regionally accredited will be evaluated according to the recommendations made by the American Association of Collegiate Registrars and Admissions Offices or the American Council on Education.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the
Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State’s requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

**Articulation/Transfer Agreements**

**A. Iowa Regent Universities General Education Articulation Agreement.**

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State’s College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language, diversity, and library requirements).

**B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.**

Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

**C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.**

Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University. College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

---

**Additional Transfer Credit Policies**

**A. Students with credit obtained during military service.**

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication A Guide to the Evaluation of Educational Experiences in the Armed Services.

**B. Students with credit obtained through non-college sponsored instruction.**

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication The National Guide to Educational Credit for Training Programs.

**C. Students with credit obtained through correspondence courses.**

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

**D. College Level Examination Program (CLEP).**

Iowa State University will award credit for each of the following 15 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, German Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at [www.admissions.iastate.edu/cbe/cbe_clep.php](http://www.admissions.iastate.edu/cbe/cbe_clep.php).

**E. Students with "test-out" credit.**
D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/equiv (https://www.admissions.iastate.edu/equiv)) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student's college, based on relevance to the students' program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student's Iowa State cumulative grade point average.

A student who has earned an associate's degree and is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Registrar's Office before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of Credit By Examination Programs (CBE)

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State’s policies for awarding credit for each of these
Advanced Placement (AP) Program of the College Board
This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Detailed information concerning the Advanced Placement Program can be found at https://apstudent.collegeboard.org/home.

International Baccalaureate Examinations
The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Detailed information concerning the IB Program can be found at http://ibo.org/iba/.

Departmental Examinations
Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested.

If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students’ grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements.

Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program
CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students’ degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acct 284; engineering majors should consult with their academic adviser before registering for this examination); Biology (Biol 101, not for biology or engineering majors); Calculus (Math 165); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); and Principles of Microeconomics (Econ 101).

In addition, Iowa State University will award up to 9 semester credit hours for CLEP French Language, up to 9 semester credit hours for CLEP German Language, and up to 9 semester credit hours for CLEP Spanish Language.

Information about testing centers and registration can be found at https://clep.collegeboard.org/search/test-centers. For information on whether to take any of the CLEP tests, contact your academic adviser. Additional information on the CLEP exam is available at https://clep.collegeboard.org/.

Policies and Procedures Governing CBE Tests
1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.
3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Credit by examination will not be granted if it duplicates courses previously passed or failed.

5. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

6. There is a nonrefundable fee for all departmental tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

7. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

8. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.

9. Listed below are policies for transferring CBE from another college or university to Iowa State University:

   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State's AP and CLEP policies.

   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State's IB policies.

   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

10. Credit earned from CBE will be posted to the student's academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

11. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

12. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Alpha listing of undergraduate majors, minors, certificates.
COLLEGES AND CURRICULA

Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission.

Bachelor’s Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A minimum of 120-semester credits and a cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer student from another college or university is required to have a 2.25 cumulative grade point average at the time of entrance. A transfer student who has earned an associate’s degree is required to have a 2.00 cumulative grade point average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, and will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor’s degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student’s major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor’s degrees if the student meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Undergraduate Certificates

All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass-not pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index or individual colleges for information).

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:
Communication instruction and practice are distributed over the student’s entire undergraduate experience, both in and out of the classroom, from the first year through the senior year. Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student’s major.

Active learning and higher-order thinking are fostered through communication. Faculty across the university share responsibility for the student’s progress in communication practices. Both faculty and students engage in ongoing assessment for continuous improvement of the student’s communication practices.

Iowa State University’s communication curriculum, based on these five principles, seeks to enrich the student’s understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

**Foundation Courses**
To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Communication Proficiency Grade Requirement: At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250; some majors/degree programs may set higher requirements for communication proficiency.

**Upper-Level Curricula**
Continuing development of communication skills will be directed by the student’s major department. Using the university’s basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;

- advanced composition course(s) appropriate to the student’s major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course-specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

**Library Study**
Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

For undergraduate students, LIB 160 Information Literacy is a one-credit graduation requirement course that provides a foundation of information literacy and library research skills and concepts. Librarians also work each semester with ISU course instructors to teach course-related instruction sessions for undergraduate students in the effective use of library resources in course-relevant fields of study.

Each semester librarians work with ISU course instructors to teach course-related instruction sessions for graduate students in library research skills, information literacy concepts, and the effective use of library resources and research tools in course-relevant fields of study. For more information, call the Library at 515 294-4527.

**U.S. Diversity and International Perspective Requirements**
One of Iowa State University’s goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements...
in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students’ fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student’s college or requirements of the student’s major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

• articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
• analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
• analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
• analyze the perspectives of groups and individuals affected by discrimination
• analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students’ understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are “studying abroad” from their home country’s perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

• analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
• describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
• analyze and evaluate the influence of global issues in their own lives.
• describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
• communicate competently in a second language.

Curriculum Requirements

The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and the student’s adviser in planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

Catalog in Effect

A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous five years, provided it covers a period of the student’s enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Special Programs

Honors Program

The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The program enables honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet them. An honors program may include substitutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.
Other benefits. Members of the Honors Program have 24-hour access to the Jischke Honors Building as a quiet place to study, use the computers, and visit with other honors students. Students also have off-campus opportunities such as attending honors semesters and conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

First-Year Honors Program
Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an honors education, consists of honors sections of English 250 and Library 160, an FHP seminar, and honors advisers. Students may also choose to participate in the Honors Mentor Program, which introduces students to scholarship and research. Participants are matched with faculty members conducting research in an area of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or www.honors.iastate.edu (http://www.honors.iastate.edu).

Dual-degree Programs
Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor’s degree from Iowa State. (See Index, Preprofessional Study.)

Iowa Lakeside Laboratory
Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, www.continuetolearn.uiowa.edu/lakesidelab (http://www.continuetolearn.uiowa.edu/lakesidelab).

Regent Universities Student Exchange Program
Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)
Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student’s academic adviser in advance of application. Detailed information and applications forms are available from:

National Student Exchange
1080 Hixson-Lied Student Success Center

Study Abroad
Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. It’s an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles. The skills students gain while studying abroad will make them top candidates for internship placements and full-time positions post-graduation.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center (SAC) is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, volunteer opportunities, and scholarships.

With over 50 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able
to find a program that meets their needs and interests so they can
discover for themselves why study abroad is the most exciting academic
adventure.

Exchange Programs offer students the opportunity to study abroad at a
partner university while paying Iowa State tuition.

Semester in Australia, Germany, Ireland, Italy, New Zealand, Scotland and
Wales offers unlimited placement opportunities for students to study at
some of our most popular destinations for the fall, spring, or summer.

Programs led by our faculty offer Iowa State courses around the world.
Short-term options can take you from the Antarctica to Uganda and to
more than 40 other destinations.

For additional information, contact or stop by the Study Abroad Center.
No appointment necessary!

Study Abroad Center

The main undergraduate academic programs of each college are listed
below, together with the degrees awarded upon completion. In many
cases certain majors, minors, options, or electives allow for increased
specialization within the programs. Programs which are administered
jointly by two colleges are listed within both colleges.

College of Agriculture and Life Sciences

• Agricultural Business, B.S.
• Agricultural Studies, B.S.
• Agricultural Systems Technology, B.S.
• Agricultural and Life Sciences Education, B.S.
• Agriculture and Society, B.S.
• Agronomy, B.S.
• Animal Ecology, B.S.
• Animal Science, B.S.
• Biochemistry, B.S.
• Biology, B.S.
• Culinary Food Science, B.S.
• Dairy Science, B.S.
• Diet and Exercise, B.S./M.S.
• Dietetics, B.S.
• Environmental Science, B.S.
• Environmental Studies, B.S.*
• Food Science, B.S.
• Forestry, B.S.
• Genetics, B.S.
• Global Resource Systems, B.S.
• Horticulture, B.S.
• Industrial Technology, B.S.
• International Agriculture, B.S.*
• Microbiology, B.S.
• Nursing, B.S.N.
• Nutritional Science, B.S.
• Seed Science, B.S.*

* A secondary major must be taken in conjunction with a primary major.

College of Liberal Arts and Sciences

• Advertising, B.A.
• Anthropology, B.A., B.S.
• Biochemistry, B.S.
• Bioinformatics and Computational Biology, B.S.
• Biological/Pre-Medical Illustration, B.A.
• Biology, B.S.
• Biophysics, B.S.
• Chemistry, B.A., B.S.
• Classical Studies (See Interdisciplinary Studies, below)
• Communication Studies, B.A.
• Computer Science, B.S.
• Criminal Justice Studies, B.A.
• Data Science, B.S.
• Earth Science, B.A., B.S.
• Economics, B.S.
• English, B.A., B.S.
• Environmental Science, B.S.
• Environmental Studies, B.A., B.S.*
• French (see World Languages and Cultures, below)
• Genetics, B.S.
• Geology, B.S.
• German (see World Languages and Cultures, below)
• History, B.A., B.S.
• Interdisciplinary Studies, B.A., B.S.
  • Classical Studies
    • U.S. Latino/a Studies
• International Studies, B.A., B.S.*
• Journalism and Mass Communication, B.S.
• Liberal Studies, B.L.S (a general studies degree)
• Linguistics, B.A.
• Mathematics, B.S.
• Meteorology, B.S.
• Music, B.A., B.Mus.
• Performing Arts, B.A.
• Philosophy, B.A.
• Physics, B.S.
• Political Science, B.A.
• Psychology, B.A., B.S.
• Public Relations, B.S.
• Religious Studies, B.A.
• Sociology, B.A., B.S.
• Software Engineering, B.S.
• Spanish (See World Languages and Cultures, below)
• Speech Communication, B.A.
• Statistics, B.S.
• Technical Communication, B.S.
• Theatre (See Performing Arts)
• U.S. Latino/a Studies (See Interdisciplinary Studies, above)
• Women’s and Gender Studies, B.A., B.S.
• World Languages and Cultures B.A.:
  • French
  • German
  • Spanish

*A secondary major must be taken in conjunction with a primary major.

**The College of Design participates in this interdepartmental major.**

**College of Engineering**

• Aerospace Engineering, B.S.
• Agricultural Engineering, B.S.
• Biological Systems Engineering, B.S.
• Chemical Engineering, B.S.
• Civil Engineering, B.S.
• Computer Engineering, B.S.
• Construction Engineering, B.S.
• Cyber Security Engineering, B.S.
• Electrical Engineering, B.S.
• Industrial Engineering, B.S.
• Materials Engineering, B.S.
• Mechanical Engineering, B.S.
• Software Engineering, B.S.

**College of Human Sciences**

• Apparel Merchandising, and Design, B.S.
• Athletic Training
• Child, Adult, and Family Services, B.S.
• Culinary Food Science, B.S.
• Diet and Exercise, B.S./M.S.
• Dietetics, B.S.
• Early Childhood Education, B.S.
• Early Childhood Education and Programming, B.S.
• Elementary Education, B.S.
• Event Management, B.S.
• Family and Consumer Sciences Education and Studies, B.S.
• Financial Counseling and Planning, B.S.
• Food Science, B.S.
• Hospitality Management, B.S.
• Kinesiology and Health, B.S.
• Nursing, B.S.N.
• Nutritional Science, B.S.

**College of Veterinary Medicine**
• Veterinary Medicine, D.V.M.

**Minors**

1. All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.

2. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

3. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

4. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.

5. Courses taken for a minor may not be taken on a pass-not pass basis.

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student’s transcript. Lists of undergraduate minors offered by each college appear in the college description. Specific requirements and/or restrictions are available from the department or program offering the minor.

**Minors by College**

This list may not be inclusive. Check the college web sites for more information.

**Agriculture and Life Sciences**
- Agricultural Biochemistry
- Agricultural Business
- Agricultural Systems Technology
- Agriculture and Life Sciences Education
- Agronomy
- Animal Ecology
- Animal Science
- Biology
- Emerging Global Diseases*
- Entrepreneurial Studies*
- Environmental Studies
- Feed Technology*
- Food and Society
- Food Safety*
- Food Science
- Forestry
- Genetics
- Horticulture
- Industrial Technology
- Insect Science
- International Agriculture
- Learning and Leadership Sciences*
- Meat Science
- Microbiology
- Nutrition
- Sustainability*

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

**Liberal Arts and Sciences:**
- Advertising
- African American Studies
- American Indian Studies
- Anthropology
- Astronomy
- Biochemistry
- Bioinformatics and Computational Biology
- Biological Illustration
- Biology
- Chemistry
- Chinese Studies
- Classical Studies
- Communication Studies

• Mathematics
• Meteorology
• Military Studies (Army Reserve Officers’ Training Corps)*
• Music
• Music Technology
• Performing Arts
• Philosophy
• Physics
• Political Science
• Psychology
• Public Relations
• Religious Studies
• Russian Studies
• Sociology
• Spanish
• Speech Communication
• Statistics
• Sustainability*
• Teaching English as a Second Language
• Technical Communication
• U.S. Latino/a Studies
• Wind Energy*
• Women’s and Gender Studies
• World Film Studies

*The College of Liberal Arts and Sciences participates in these interdepartmental minors.

Business
• Accounting
• Business Analytics
• Business and Technology Consulting
• Entrepreneurial Studies*
• Finance
• General Business (non-business majors)
• International Business
• Management
• Management Information Systems

• Marketing
• Supply Chain Management

*The Ivy College of Business participates in this interdisciplinary minor.

Design
• Critical Studies in Design (http://www.design.iastate.edu/programs-minors/minors/critical-studies-design)
• Design Studies
• Digital Media
• Entrepreneurial Studies*
• Environmental Studies*
• Geographic Information Science* (https://www.design.iastate.edu/programs-minors/minors/gis)
• Gerontology*
• Illustration (https://www.design.iastate.edu/programs-minors/minors/illustration)
• International Studies*
• Sustainability*
• Textile Design* (https://www.design.iastate.edu/programs-minors/minors/textile-design)
• Urban Studies* (https://www.design.iastate.edu/programs-minors/minors/urban-studies)

*The College of Design participates in these interdepartmental secondary majors and minors.

Engineering

For Engineering Majors:
• Biomedical Engineering
• Energy Systems
• Engineering Sales
• Entrepreneurial Studies*
• Feed Technology*
• Nondestructive Evaluation
• Nuclear Engineering
• Sustainability*
• Wind Energy*

*The College of Engineering participates in these interdisciplinary minors.

Human Sciences
• Apparel Merchandising, and Design (http://www.aeshm.hs.iastate.edu/majors/amd/#minor)
• Child, Adult, and Family Services
• Culinary Food Science
• Dance (http://www.kin.hs.iastate.edu/programs/dance/minor)
• Educational Services in Family and Consumer Sciences
• Event Management (http://www.aeshm.hs.iastate.edu/majors/event-management/#minor)
• Exercise Science (http://www.kin.hs.iastate.edu/h/programs/minors/exercise-science)
• Financial Counseling and Planning
• Food and Society
• Food Science
• Food Safety* (interdepartmental minor)
• Gerontology* (interdisciplinary minor)
• Health Promotion (http://www.kin.hs.iastate.edu/programs/minors/health-promotion)
• Hospitality Management
• Learning and Leadership Sciences*
• Learning Technologies (http://www.education.iastate.edu/undergraduate-studies/learning-technologies-minor)
• Kinesiology (http://www.kin.hs.iastate.edu/programs/minors/kinesiology)
• Nutrition
• Textile Science and Product Performance

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. See undergraduate majors, minors, certificates for more information.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student’s transcript and a printed certificate will be awarded.

Iowa State University also offers certificates from the Graduate College.

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the preveterinary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may
also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor's degree in specific ISU majors, by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in professional CLS/MT school can be used to partially fulfill the requirements for the bachelor's degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT program is affiliated with Iowa State University:

St. Luke’s Methodist Hospital, Cedar Rapids, Iowa. Program Director: Carol Collingsworth. Medical Director: Lileah Harris, MD

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree.

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor's degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor's degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master's degree or a bachelor's degree, depending upon the size of the institution and whether an upper or middle entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor's degree in health administration, or they may spend four years earning a bachelor's degree in any department before entering a master's degree program at the University of Iowa or other university. Courses required for admission to master's degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.

Human Medicine

Physicians study, diagnoses, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student’s interests and provide appropriate preparation for an alternative career.

Law

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D) degree. A bachelor's degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor's degree should reflect a student's passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student's development of critical thinking skills, including analytical written and oral skills. An understanding of business, social sciences, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should
include accounting, management, political science, psychology, criminal justice, economics, philosophy, English literature, and history. The completion of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

**Library and Information Science**

Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master’s degree programs in library and information science provide the professional preparation. Iowa State students may earn a bachelor's degree in any department before entering a professional master’s degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field.

**Occupational Therapy**

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor's degree in any major at Iowa State University, and then enter a master's or doctoral degree program at another university.

**Optometry**

Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor's degree. Students wishing to earn the bachelor's degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

**Pharmacy**

Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceutical. Students may complete prepharmacy courses at Iowa State University. Many schools do not require a bachelor’s degree for admission, however most students complete at least 3 years of college before admission to pharmacy schools. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail four years of study.

**Physical Therapy**

Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Usually, students earn a bachelor’s degree at ISU before entering professional school to earn a doctoral degree. The bachelor's degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

**Physician Assistant**

A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master's degree level. Applicants must have had health-care experience with direct patient contact experience. Students must have earned a bachelor’s degree before entering a PA program. The degree can be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, psychology, and statistics.

**Podiatry**

Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor’s degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor’s degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the
first year in an accredited podiatric college in order to complete the requirements for the bachelor’s degree.

**Theology or Religious Studies**

The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor’s degree for admission.

The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

**Veterinary Medicine**

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu.)

Students may pursue their preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student’s vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree; the most effective progress toward a bachelor’s degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preveterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preveterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor’s degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.
Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates of the College of Agriculture and Life Sciences include: agribusiness and industry, production agriculture, biological and environmental sciences, value-added processing, natural resource management, rural development, public agencies, education, animal and human health professions, and graduate studies.

**High School Preparation**

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or Chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

**Core Curriculum and Electives**

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. To graduate with a degree from the College of Agriculture and Life Sciences a student must complete while at Iowa State University a minimum of 18 credits from the College’s departmental offerings, program offerings, and cross-listed program offerings. Twelve or more of those 18 credits must be 300-level or above. Some curricula within the College may have more restrictive requirements.

Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

<table>
<thead>
<tr>
<th>Interpersonal and public communication skills</th>
<th>10</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 credits of English composition with grades of C or better</td>
<td></td>
</tr>
<tr>
<td>3 credits of speech fundamentals with grades of C or better</td>
<td></td>
</tr>
<tr>
<td>1 credit of LIB 160 Information Literacy</td>
<td></td>
</tr>

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

**Professional, Interpersonal and Cross-cultural Communications**

- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

**Problem-Solving/Critical Thinking**

- Apply a holistic approach to solving complex issue-laden problems.
- Apply a rational and objective process to:
  - Distinguish verifiable facts from value claims,
  - Determine the accuracy of statements,
• Identify assumptions and detect bias,
• Distinguish relevant from irrelevant information,
• Prioritize needs.
• Summarize, analyze, and interpret research data and policy issues.

Leadership
• Organize, facilitate, and participate effectively in a group, team, or organization.
• Define a problem or opportunity, implement an action plan, work towards a goal and justify actions taken.

Entrepreneurship
• Demonstrate innovativeness and creativity.
• Identify and pursue opportunities that produce value.
• Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning
• Articulate how continued learning after graduation will enrich their lives.
• Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics
• Define and assess their ethical perspective, moral responsibility, and values.
• Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness
• Explain the physical and biological interactions within ecosystems
• Explain how human activities impact the environment and how societies are affected by environmental change.

International/Multi-Cultural Awareness
• U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
  • Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
  • Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,
  • Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
  • Analyze the perspectives of groups and individuals affected by discrimination,
  • Analyze how cultural diversity and cooperation among social groups affect U.S. society.
• International Perspectives – Students should achieve two of the following outcomes. They should be able to:
  • Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
  • Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve,
  • Analyze and evaluate the influence of global issues in their own lives,
  • Describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events,
  • Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

Electives
Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements. No more than 9 credits of 490 coursework from any Iowa State University curriculum may be applied toward graduation, although some individual curricula may establish a more restrictive use of 490 credits toward fulfillment of graduation requirements.

Advising
Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students’ interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences.
This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu (http://www.ag.iastate.edu).

**Graduate Study**

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

- Biorenewable Resources and Technology
- Ecology and Evolutionary Biology
- Environmental Science
- Genetics and Genomics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

For details, consult the Graduate College section of this catalog.

**Departments of the College**

- Agricultural and Biosystems Engineering
- Agricultural Education and Studies
- Agronomy
- Animal Science
- Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology
- Ecology, Evolution, and Organismal Biology
- Economics
- Entomology
- Food Science and Human Nutrition
- Genetics, Development and Cell Biology
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology and Microbiology
- Sociology
- Statistics

**Majors in the College of Agriculture and Life Sciences**

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions.

**Primary Majors**

- Agricultural Biochemistry
- Agricultural Business
- Agricultural and Life Sciences Education
- Agricultural Studies
- Agriculture and Society
- Agricultural Systems Technology
- Agronomy
- Animal Ecology
- Animal Science
- Biology
- Culinary Food Science
- Dairy Science
- Diet and Exercise
- Dietetics
- Environmental Science
- Food Science
- Forestry
- Genetics
- Global Resource Systems
- Horticulture
- Industrial Technology
- Microbiology
- Nursing
- Nutritional Science

**Secondary Majors***

- Environmental Studies
- International Agriculture
- Seed Science

* A secondary major must be taken in conjunction with a primary major.

**Minors**

- Agricultural Biochemistry
- Agricultural Business
- Agricultural Education and Studies
- Agricultural Systems Technology
- Agronomy
Animal Ecology
Animal Science
Biology
Culinary Food Science
Emerging Global Diseases*
Entrepreneurial Studies*
Environmental Studies
Food and Society
Food Safety*
Food Science
Forestry
Genetics
Horticulture
Industrial Technology
Insect Science
International Agriculture
Learning and Leadership Sciences
Meat Science
Microbiology
Nutrition
Sustainability* (http://www.las.iastate.edu/sustainability)

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificate
Occupational Safety

See statement on minors in the Colleges and Curricula section of this catalog.

Special Programs
Agriculture Exploration
Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preveterinary Medicine
Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preveterinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements).

Students who are undecided about choice of major may enroll in general preveterinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preveterinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program
The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs
Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.

Study Abroad and International Travel Opportunities
Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities on all seven continents. Students can enroll in CALS travel courses, spend a semester or more at a partner university abroad or develop an independent academic opportunity like research, service learning or working abroad. Travel ranges from two weeks to a year and students travel to over 30 countries annually. For additional information, contact the Office of Global Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs
Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.
Biochemistry (AGLS)

The department of Biochemistry, Biophysics & Molecular Biology (http://www.bbmb.iastate.edu) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

A program that combines a bachelor of science and masters of science in biochemistry or biophysics is offered.

Biochemistry Major in the College of Agriculture and Life Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture and Life Sciences, Curricula. Biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in biochemistry, chemistry, physics, and mathematics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and animal and plant biotechnology.

† Arranged with instructor.

The College of Agriculture and Life Sciences requires the following:

University Requirements: Select approved courses to meet U.S. Diversity 3 cr. and International Perspectives 3 cr. Credits can dual assign with Humanities and Social Science choices.

Communications Proficiency

* Students may elect to take either 211L, 212L or 313L.

'Student choice' are for courses in Humanities, Ethnics, Social Sciences, Agriculture Sciences, and Electives.

Courses primarily for undergraduates:

**BBMB 101: Introduction to Biochemistry**

(1-0) Cr. 1. F.

Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

**BBMB 102: Introduction to Biochemistry Laboratory**

(0-2) Cr. 1. S.

Prereq: Credit or enrollment in CHEM 177 and CHEM 177L or CHEM 201 and CHEM 201L

Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. Laboratory experimentation covers biochemical concepts and the study of bio-molecules including proteins, lipids and nucleic acids. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

**BBMB 110: Biochemistry Learning Community Orientation**

Cr. 1. F.

Prereq: Co-enrollment with BBMB 101 strongly recommended.

Overview of the program of study, academic planning, resources on campus for the successful transition to Iowa State, team building, leadership, and community-focussed activities. For members of the Biochemistry & Biophysics Learning Community. Offered on a satisfactory-fail basis only.

**BBMB 111: Biochemistry Learning Community**

Cr. 1. S.

Prereq: Enrollment in BBMB102 is highly recommended.

Overview of career-building and research resources within BBMB and across ISU, including internships, lab skills, independent research, and leadership opportunities. For members of the Biochemistry & Biophysics Learning Community. Offered on a satisfactory-fail basis only.

**BBMB 120: The Biochemistry of Beer**

(Cross-listed with FS HN). (2-0) Cr. 2. F.

An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. Natural science majors are limited to elective credit only.
BBMB 121: Medicines, Drugs and You
Cr. 2. S.
Prereq: One year of high school chemistry or CHEM 50 and biology.
An introduction to how medicines treat disease, what drug molecules look like, how they function, how they can be toxic, modern therapeutics ranging from over-the-counter pain relievers, antibiotics and anti-depressants, to anti-cancer chemotherapies, a discussion of illegal drugs from toxicity to mechanism of action and potential therapeutic benefits. Intended for students of all majors.

BBMB 201: Chemical Principles in Biological Systems
(2-0) Cr. 2. S.
Prereq: Credit or enrollment in CHEM 332
Survey of chemical principles as they apply in biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics or agricultural biochemistry.

BBMB 221: Structure and Reactions in Biochemical Processes
(3-0) Cr. 3. F.S.
Prereq: CHEM 163, CHEM 167, or CHEM 177
Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301: Survey of Biochemistry
(3-0) Cr. 3. S.SS.
Prereq: CHEM 231 or CHEM 331
A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 316: Principles of Biochemistry
(3-0) Cr. 3. F.S.
Prereq: CHEM 231 or CHEM 331; BIOL 212; BIOL 313 and BIOL 314 strongly recommended.
Understanding biological systems at the molecular level; chemistry of biological macromolecules, enzyme function and regulation, metabolic pathways; integration of metabolism in diverse living systems. For students in biology and related majors who do not require the more rigorous treatment of biochemistry found in BBMB 404/405. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 404: Biochemistry I
(3-0) Cr. 3. F.
Prereq: CHEM 332
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure; enzymology; carbohydrate metabolism. Course offered online. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

BBMB 405: Biochemistry II
(3-0) Cr. 3. S.
Prereq: BBMB 404
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Course available online. Credit for both BBMB 420 and the BBMB 404 - BBMB 405 sequence may not be applied toward graduation.

BBMB 411: Techniques in Biochemical Research
(2-8) Cr. 4. F.
Prereq: Credit or enrollment in BBMB 404 or BBMB 504 and BBMB 505; CHEM 211
Laboratory experimentation and techniques for studying biochemistry, including: chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids. Scientific communication and technical writing are emphasized.
BBMB 420: Mammalian Biochemistry  
(3-0) Cr. 3. F.  
Prereq: CHEM 332, BIOL 314  
Structure and function of proteins; enzymology; biological oxidation;  
chemistry and metabolism of carbohydrates, lipids, amino acids and  
nucleic acids; protein synthesis and the genetic code; relationship  
of biochemistry to selected animal diseases. Biochemistry of higher  
animals emphasized. Not acceptable for credit toward a major in  
aricultural biochemistry or biochemistry. Acceptable for credit toward a  
major in biophysics. Credit for both BBMB 420 and the BBMB 404-405  
sequence may not be applied toward graduation.

BBMB 430: Procaryotic Diversity and Ecology  
(Dual-listed with BBMB 530). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S.,  
offered odd-numbered years.  
Prereq: MICRO 302, MICRO 302L  
Survey of the diverse groups of procaryotes emphasizing important and  
distinguishing metabolic, phylogenetic, morphological, and ecological  
features of members of those groups.

BBMB 440: Laboratory in Microbial Physiology, Diversity, and Genetics  
(Cross-listed with MICRO). (2-6) Cr. 4. F.S.  
Prereq: MICRO 302, MICRO 302L, CHEM 332, BIOL 313L  
Fundamental techniques and theory for studying the cellular  
mechanisms, genetic processes and diversity of microbial life.  
Experimental techniques will include isolation and physiological  
characterization of bacteria that inhabit different environments as well as  
an emphasis on genetic and molecular techniques to understand antibiotic resistance processes and mechanisms. Also included are  
techniques for phylogenetic characterization, measuring gene expression,  
and genetic manipulation of bacteria. Essential components for the  
effective communication of scientific results are also emphasized.

BBMB 461: Molecular Biophysics  
(Dual-listed with BBMB 561). (2-0) Cr. 2. S.  
Prereq: Credit or enrollment in MATH 166 and CHEM 178 and PHYS 222 or  
PHYS 112.  
Physical methods for the study of molecular structure and organization of  
biological materials. X-ray diffraction, nuclear magnetic resonance,  
hydrodynamics and fluorescence spectroscopy. Registration for the  
graduate credit commits the student to graduate-level examinations,  
which differ from undergraduate-level examinations in the number and/or  
difficulty of questions.

BBMB 490: Independent Study  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor.  
Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 490H: Independent Study, Honors  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor.  
Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 499: Undergraduate Research  
Cr. 1-5. Repeatable. F.S.S.  
Prereq: Permission of faculty member with whom student proposes to work.  
Independent research under faculty guidance.

Courses primarily for graduate students, open to qualified undergraduates:

BBMB 504: Amino Acids and Proteins  
(2-0) Cr. 2. F.  
Prereq: CHEM 332 or equivalent  
Review of amino acids and proteins, including atomic interactions,  
thermodynamics, structure and properties of amino acids, post-  
translational modifications, protein expression, purification and analysis,  
protein secondary, tertiary and quaternary structure, protein folding,  
oxygen transport and hemoglobin, models for equilibrium binding,  
elementary reactions and enzyme kinetics, biosynthesis of amino acids:  
pathways and mechanisms.

BBMB 505: Bioenergetics and Metabolism  
(2-0) Cr. 2. F.  
Prereq: CHEM 211, CHEM 332; a previous course in biochemistry is strongly recommended  
Examination of catabolic pathways involved in the oxidation of organic  
and inorganic molecules, and energy metabolism involving inputs from  
light or other non-light sources. Central metabolism and glycolysis,  
fermentation, aerobic and anaerobic respiration, photosynthesis.

BBMB 506: Membrane Biochemistry  
(2-0) Cr. 2.  
Prereq: CHEM 332 or equivalent  
Analysis of the structure, function, and synthesis of membranes.  
Bacterial and eukaryotic membrane characteristics. Membrane transport  
and signaling mechanisms. Analysis of the structure and function of  
lipids and membrane proteins.

BBMB 507: Biochemistry of Nucleic Acids  
(2-0) Cr. 2. S.  
Prereq: CHEM 332 or equivalent  
Analysis of the chemical structure, function, synthesis, and  
metabolism of nucleic acids. Chemical characterization of nucleotides,  
polynucleotides, DNA, and RNA. Analysis of transcription, translation, and  
the genetic code.
BBMB 510: Molecular Biology and Biochemistry of RNA
(2-0) Cr. 2. F.
Prereq: BIOL 313, BBMB 405, BBMB 502, BBMB 506 and 507 or Gen 409, or equivalent
Biochemical processes that define structure and function of nucleic acids. Emphasis on the molecular processes that take place during synthesis, processing, and function of different RNA species; review of recent advances in RNA research.

BBMB 530: Procaryotic Diversity and Ecology
(Dual-listed with BBMB 430). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 532: Enzyme Kinetics and Mechanisms
Cr. 2. Alt. S., offered odd-numbered years.
Prereq: BBMB 504
Advanced concepts of enzyme kinetics and catalysis. Experimental methods for determining kinetic and chemical reaction mechanisms. Enzyme structure/function relationships and the role of dynamics in catalysis.

BBMB 542A: Introduction to Molecular Biology Techniques: DNA Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

BBMB 542B: Introduction to Molecular Biology Techniques: Protein
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.S.
Prereq: Graduate classification
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

BBMB 542C: Introduction to Molecular Biology Techniques: Cell Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

BBMB 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

BBMB 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

BBMB 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

BBMB 542G: Introduction to Molecular Biology Techniques: Genomic
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

BBMB 561: Molecular Biophysics
(Dual-listed with BBMB 461). (2-0) Cr. 2. S.
Prereq: Credit or enrollment in MATH 166 and CHEM 178 and PHYS 222 or PHYS 112.
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 561L: Laboratory in Molecular Biophysics
(1-3) Cr. 2. S.
Prereq: Credit or enrollment in BBMB 461/BBMB 561
Practice in methods of X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy as applied to macromolecules.
BBMB 569: Bioinformatics III (Structural Bioinformatics) (Cross-listed with BCB, COM S, CPR E, GDCB). (3-0) Cr. 3. F. 
Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

BBMB 590: Special Topics
Cr. arr.
By arrangement.

BBMB 593: Workshop in Biochemistry and Biophysics
Cr. 1. Repeatable. F.S.
Prereq: Permission and signature of course administrator required.
Workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry. Spring only. BBMB Undergraduate Research Symposium participation. Scheduled class meetings are required in addition to attending the symposium.

Courses for graduate students:

BBMB 615: Molecular Immunology (Cross-listed with MICRO, V MPM). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: BBMB 405 or BBMB 506 and BBMB 507
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

BBMB 645: Molecular Signaling (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: BBMB 405 or BBMB 420, or BBMB 506 and BBMB 507
Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone; growth factor and extracellular matrix activators; protein kinases; caspase and transcription factor downstream signals; lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

BBMB 661: Current Topics in Neuroscience (Cross-listed with GDCB, NEURO). (2-0) Cr. 2-3. Repeatable. Alt. S., offered even-numbered years.
Prereq: NEURO 555 (or comparable course) or permission of instructor
Topics may include molecular and cellular neuroscience, neurodevelopment, neuroplasticity, neurodegenerative diseases, cognitive neuroscience, sensory biology, neural integration, membrane biophysics, neuroethology, techniques in neurobiology and behavior.

BBMB 675: Nucleic Acid Structure and Function (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: BBMB 405 or BBMB 506 and BBMB 507
In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 676: Biochemistry of Gene Expression in Eucaryotes (Cross-listed with MCDB). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: BBMB 404 and BBMB 504, and BBMB 506 and BBMB 507; or BBMB 405 or BBMB 505 and or GDCB 511
Analysis of the biochemical processes involved in expression of eucaryotic genes and the regulation thereof, including RNA polymerase, transcriptional regulatory proteins, enhancers and silencers, chromosome structure, termination, RNA processing, RNA transport, RNA turnover, small RNAs, translational regulation, protein turnover.

BBMB 681: Advanced Seminar
Cr. 1. Repeatable. F.S.
Prereq: Permission of instructor
Student presentations.

BBMB 682: Departmental Seminar
Cr. R. F.S.
Prereq: Permission of instructor
Faculty, staff and invited guest research seminar.

BBMB 696: Research Seminar (Cross-listed with AGRON, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

BBMB 696: Seminar in Molecular, Cellular, and Developmental Biology (Cross-listed with GDCB, MCDB, MICRO, V MPM). (2-0) Cr. 1-2. Repeatable. F.S.
Student and faculty presentations.

BBMB 699: Research
Cr. arr. Repeatable. F.S.
Prereq: Permission of instructor
Agricultural Business

The Department of Economics offers coursework for a Bachelor of Science degree in Agricultural Business. The major in Agricultural Business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in Agricultural Business with a minor in Economics is not permitted; however, a double major in Agricultural Business and Economics is permitted. A minor in Agricultural Business is also possible.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

Eligible Agricultural Business majors may chose to enhance their degree with courses from the College of Business by selecting one of three 'business options' from finance, marketing, or supply chain management.

Minor - Agricultural Business

The Department of Economics offers a minor in Agricultural Business. Courses to be included in the minimum of 15 credits include the following:

<table>
<thead>
<tr>

Curriculum in Agricultural Business

The major in Agricultural Business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 18 credits must be earned from courses taught by the Department of Economics at ISU.
### International Perspective (http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current): 3 cr.
3 cr. from approved list.

3 cr. from approved list.

### Communication/Library: 13 cr.
- **ENGL 150**: Critical Thinking and Communication 3 cr.
- **ENGL 250**: Written, Oral, Visual, and Electronic Composition 3 cr.
- One of the following 3 cr.
  - **ENGL 302**: Business Communication
  - **ENGL 309**: Proposal and Report Writing
  - **ENGL 314**: Technical Communication
- One of the following 3 cr.
  - **SP CM 212**: Fundamentals of Public Speaking
  - **AGEDS 311**: Presentation and Sales Strategies for Agricultural Audiences
- **LIB 160**: Information Literacy 1 cr.

Communication Proficiency Requirement: A grade of C or better in ENGL 250, a C or better in either ENGL 302 or ENGL 309 or ENGL 314), and a C or better in the speech fundamentals course (SP CM 212 or AGEDS 311).

Nine credits of ECON 230-289, 300-389, 400-489 courses.

Three credits of 400-489 level ECON courses.

Total Credits 29

### Electives: 22-24 cr.

Agricultural Business majors seeking a double major in Economics must take an additional 9 credits of economics courses beyond those required for the Economics major for a total of 47 credits in economics, and must earn a minimum GPA of 2.0 across ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics, with no grade in these lower than a C#.

### Agricultural and Life Sciences Education

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.
The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision-making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/.

**Curriculum in Agricultural and Life Sciences Education**

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

**Teacher Certification Option**

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and a minimum grade of C- in selected courses.

**International Perspective: 3 cr. from approved list**

U.S. Diversity: 3 cr. from approved list

**Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

**Interpersonal and Public Communication 10 cr.**:

**AGEDS 499**  Undergraduate Research  
**AGEDS 327**  Survey of Agriculture and Life Sciences Communication  
**AGEDS 402**  Methods of Teaching in Agriculture and Life Sciences  

**Total Credits**  40-48  
† Arranged with instructor.

Visit the departmental website at [www.AgEds.iastate.edu/](http://www.AgEds.iastate.edu/).

**Graduate Study**

The department offers the degrees of master of science and doctor of philosophy, with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor's degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Courses primarily for undergraduates:

AGEDS 110: Orientation
(1-0) Cr. 1. F.S.
Orientation to the department. Careers in agriculture.

AGEDS 110A: Agriculture and Life Sciences Education (Fall only)
(1-0) Cr. 1. F.S.
Orientation to the department. Careers in agriculture.

AGEDS 110B: Agricultural Studies (Fall only)
(1-0) Cr. 1. F.S.
Orientation to the department. Careers in agriculture.

AGEDS 110C: Agricultural and Life Sciences exploration
(1-0) Cr. 1. F.S.
Orientation to the department. Careers in agriculture.

AGEDS 111: Dean s Leadership Seminar
(1-0) Cr. 1. F.
Prereq: Permission of the Associate Dean for Academic Programs, College of Agriculture and Life Sciences
Introduction to leadership in agriculture and the life sciences, problem solving applied to current case studies, global perspective required by leaders, and designing programs to respond to societal needs in the agricultural and life sciences.

AGEDS 112: Agriculture Biotechnology Colloquium
(1-0) Cr. 1. S.
Prereq: Enrollment as an agricultural excellence scholar
The scientific basis of biological and social sciences in agriculture.

AGEDS 113: Access to Success Seminar I
(1-0) Cr. 1. Repeatable. F.S.
Course provides career skills, learning strategies and social and academic integration techniques to student members of Step Forward Learning Community. Utilization of campus resources, encouragement of self-exploration, and development of academic skills. Offered on a satisfactory-fail basis only.

AGEDS 116: Initial Field Experience in Agricultural Education
(1-2) Cr. 1. F.
Prereq: AGEDS majors only.
Field experience in a formal education setting designed to explore teaching as a career through guided observation and interviews, reflection, and on-campus dialogue.
AGEDS 211: Early Field Based Experience
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.SS.
Prereq: AGEDS 110
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211A: High School Agriculture Programs
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.SS.
Prereq: AGEDS 110
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211C: Agricultural Industries and Agencies
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.SS.
Prereq: AGEDS 110
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 215: Career Seminar
(1-0) Cr. 1. F.S.
Prereq: Sophomore classification

AGEDS 310: Foundations of Agricultural Education Programs
(3-0) Cr. 3. F.S.
Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

AGEDS 311: Presentation and Sales Strategies for Agricultural Audiences
(3-0) Cr. 3. F.S.
Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

AGEDS 312: Science With Practice
(1-6) Cr. 3. Repeatable. F.S.
Prereq: College of Agriculture and Life Sciences majors only
A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include journals, micro-reflections, formal presentations, and a comprehensive portfolio.

AGEDS 315: Personal, Professional, and Entrepreneurial Leadership in Agriculture
(3-0) Cr. 3. F.S.
Leadership principles and strategies to influence and motivate team members to achieve personal, professional, and entrepreneurial goals in production agriculture, agricultural education, and agricultural organizations.

AGEDS 327: Survey of Agriculture and Life Sciences Communication
(2-2) Cr. 3. F.S.
Prereq: ENGL 250 or equivalent.
Development of written, oral, visual and electronic communications relevant to agriculture and life sciences. Students develop a set of communication skills applicable to agriculture and life science contexts and for various audiences.

AGEDS 388: Agricultural Mechanics Applications
(2-3) Cr. 3. Repeatable, maximum of 2 times. F.S.SS.
Introduction to SMAW (Arc), GMAW (Mig), GTAW (Tig), Oxy-Fuel welding, Oxy-Fuel cutting, and Plasma cutting theories and applications. Emphasis will be on theoretical foundation of welding, safety, welding skill development, and management of equipment, and materials. Introduction to small engines and applications. Emphasis will be on theory of operating systems, maintenance, troubleshooting, failure analysis, and safety.

AGEDS 398: Cooperative Education
Cr. R. F.S.SS.
Prereq: Permission of the department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AGEDS 401: Planning Agriculture and Life Sciences Education Programs
(Dual-listed with AGEDS 501). (3-0) Cr. 3. F.
Prereq: AGEDS 310
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 402: Methods of Teaching in Agriculture and Life Sciences
(Dual-listed with AGEDS 502). (3-0) Cr. 3. F.
Prereq: Concurrent enrollment in AGEDS 401
Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.
AGEDS 412: Internship in Agricultural Education and Studies  
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior classification in AGEDS and permission of instructor  
A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural, communications and/or environmental practices and principles.

AGEDS 414: Developing Agricultural Education Programs in Non-Formal Settings  
(2-0) Cr. 2. S.  
Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies.

AGEDS 416: Pre-Student Teaching Experience in Agricultural Education  
Cr. 1. F.S.  
**Prereq:** AGEDS 211, AGEDS 402 and admission to teacher education program  
A forty hour field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AGEDS 417: Supervised Teaching in Agriculture and Life Sciences  
Cr. 1-16. Repeatable. F.S.  
**Prereq:** AGEDS 211, AGEDS 402 and admission to teacher education program  
Supervised teaching in public schools.

AGEDS 450: Farm Management and Operation  
(2-4) Cr. 3. Repeatable, maximum of 9 credits. F.S.SS.  
**Prereq:** Econ 235, Econ 230, junior classification  
Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm’s livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor.

AGEDS 451: Agricultural Law  
(3-0) Cr. 3. S.  
**Prereq:** Senior classification  
The legal framework impinging upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers.

AGEDS 461: Technology Transfer and the Role of Agricultural and Extension Education  
(Dual-listed with AGEDS 561). (3-0) Cr. 3. S.  
Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs. Meets International Perspectives Requirement.

AGEDS 475: Agri-Marketing and Communications Competition  
(2-0) Cr. 1-2. Repeatable, maximum of 6 credits. F.S.  
**Prereq:** Admission by invitation.  
Specialized training in communication and agricultural marketing knowledge and skills in preparation for intercollegiate competition. Maximum of 6 credits can be applied toward graduation.

AGEDS 488: Methods of Teaching Agricultural Mechanics  
(2-3) Cr. 3. F.S.  
Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials.

AGEDS 490: Independent Study in Agricultural Education and Studies  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior or senior classification, permission of instructor

AGEDS 490A: Philosophy, Curriculum, and Methods  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior or senior classification, permission of instructor

AGEDS 490B: Leadership, Evaluation, and Administration  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior or senior classification, permission of instructor

AGEDS 490C: Business, Industry, and Production Agriculture  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior or senior classification, permission of instructor

AGEDS 490D: Extension and International Agriculture  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior or senior classification, permission of instructor

AGEDS 490E: Instructional Technology  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior or senior classification, permission of instructor

AGEDS 490F: Environmental Issues  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq:** Junior or senior classification, permission of instructor
AGEDS 490G: Entrepreneurship
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490H: Independent Study in Agricultural Education and Studies, Honors
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 490I: Communications
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, permission of instructor

AGEDS 496: Agricultural Travel Course
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

AGEDS 496A: International
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.
Meets International Perspectives Requirement.

AGEDS 496B: Domestic
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

AGEDS 499: Undergraduate Research
Cr. arr. F.S.SS.
Prereq: Permission of instructor, adviser, and departmental chair
Research experience in agricultural education and studies with application to selected problems.

Courses primarily for graduate students, open to qualified undergraduates:

AGEDS 501: Planning Agriculture and Life Sciences Education Programs
(Dual-listed with AGEDS 401). (3-0) Cr. 3. F.
Prereq: AGEDS 310
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 502: Methods of Teaching in Agriculture and Life Sciences
(Dual-listed with AGEDS 402). (3-0) Cr. 3. F.
Prereq: Concurrent enrollment in AGEDS 401
Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 510: Introduction to Research in Agricultural Education
(3-0) Cr. 3. S.
Prereq: Graduate classification
Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AGEDS 511: Professional Agricultural Presentation Practices
(3-0) Cr. 3. F.S.S.
Prereq: Graduate Classification
The identification and use of key planning, delivery and evaluation of presentations using audience engagement techniques focused on research-based principles and field-based practices of professional presenters in agriculture and the life sciences.

AGEDS 517: Student Teacher Education Practicum
Cr. 2-6. F.S.
Prereq: AGEDS 590B, AGEDS 501, AGEDS 502 Admission to the University Teacher Education program
Supervised 5th-12th grade public and private schools teaching practicum for graduate students in Masters degree teacher certification program. NA

AGEDS 520: Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources
(3-0) Cr. 3. S.
Prereq: Graduate classification
Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AGEDS 524: Program Development and Evaluation in Agricultural and Extension Education
(3-0) Cr. 3. F.
Prereq: Graduate classification
Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.
AGEDS 533: Introduction to Learning Theory in Agricultural Education
(3-0) Cr. 3. S.
Prereq: Graduate classification
Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

AGEDS 550: Foundations of Agricultural Education
(3-0) Cr. 3. F.
Prereq: Graduate classification
Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.

AGEDS 561: Technology Transfer and the Role of Agricultural and Extension Education
(Dual-listed with AGEDS 461). (3-0) Cr. 3. S.
Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs. Meets International Perspectives Requirement.

AGEDS 590: Special Topics in Agricultural Education
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590A: Curriculum
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590B: Methods
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590C: Philosophy
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590D: Evaluation
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590E: Administration
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590F: Leadership
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590G: Guidance
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590I: Instructional Technology
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590J: Extension
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590K: International Agriculture
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 590L: Program Planning
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593: Workshop in Agricultural Education
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593A: Curriculum
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593B: Methods
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593C: Evaluation
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593D: Administration
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593E: Leadership
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593F: Extension
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education

AGEDS 593G: Program Planning
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 12 credits in agricultural education
AGEDS 593H: Instructional Technology  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: 12 credits in agricultural education

AGEDS 593M: Biotechnology Workshop  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: 12 credits in agricultural education

AGEDS 599: Creative Component  
Cr. arr. Repeatable. F.S.SS.  
For nonthesis masters degree programs.

Courses for graduate students:

AGEDS 615: Seminar in Agricultural Education  
(1-0) Cr. 1. Repeatable. F.S.SS.  
Offered on a satisfactory-fail basis only.

AGEDS 615A: Writing for publication  
(1-0) Cr. 1. Repeatable. F.S.SS.  
Offered on a satisfactory-fail basis only.

AGEDS 615B: Ethics  
(1-0) Cr. 1. Repeatable. F.S.SS.  
Offered on a satisfactory-fail basis only.

AGEDS 615C: Grant writing  
(1-0) Cr. 1. Repeatable. F.S.SS.  
Offered on a satisfactory-fail basis only.

AGEDS 615D: Career planning  
(1-0) Cr. 1. Repeatable. F.S.SS.  
Offered on a satisfactory-fail basis only.

AGEDS 615E: Contemporary issues  
(1-0) Cr. 1. Repeatable. F.S.SS.  
Offered on a satisfactory-fail basis only.

AGEDS 617: Professional Internship for Agricultural Educators  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.  
Prereq: Permission of instructor  
Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Offered on a satisfactory-fail basis only.

AGEDS 625: Leadership, Administration, Supervision and Management of Agricultural Education Programs  
(3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: Graduate classification  
Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.

AGEDS 699: Research  
Cr. arr. Repeatable.

Agricultural Studies  
Undergraduate Study

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications  
2. problem solving and critical thinking  
3. leadership  
4. entrepreneurship  
5. life-long learning  
6. ethics  
7. environmental awareness  
8. U.S. diversity  
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/ (http://www.ageds.iastate.edu)

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.
Total Degree Requirement: 120 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective:
3 cr. from approved list.

U.S. Diversity:
3 cr. from approved list.

Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library 13 cr.:
- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
- AGEDS 327 Survey of Agriculture and Life Sciences Communication 3
- LIB 160 Information Literacy 1

Total Credits 13

Humanities and Social Sciences: 6 cr.
- ECON 101 Principles of Microeconomics 3
- Plus 3 credit hours from approved humanities list 3

Total Credits 6

Ethics: 3 cr.
3 cr. from approved list.

Math Physical and Life Sciences: 17 cr.
- BIOL 101 Introductory Biology 3
  or BIOL 211 Principles of Biology I
- CHEM 163 College Chemistry 4
  or CHEM 177 General Chemistry I
- CHEM 163L Laboratory in College Chemistry 1
  or CHEM 177L Laboratory in General Chemistry I
- MATH 104 Introduction to Probability 3
  or MATH 150 Discrete Mathematics for Business and Social Sciences
- STAT 104 Introduction to Statistics 3

Total Credits 17

Agricultural Sciences and Economics: 43 cr.
- AGEDS 110B Agricultural Studies (Fall only)
- AGEDS 215 Career Seminar 1
- AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
- AGEDS 450 Farm Management and Operation 3
- AGEDS 451 Agricultural Law 3
- AGRON 181 Introduction to Crop Science 3
- AGRON 182 Introduction to Soil Science 3
- AGRON 280 Crop Development, Production and Management 3
- AN S 101 Working with Animals 2
- AN S 114 Survey of the Animal Industry 2
- ECON 230 Farm Business Management 3
- ECON 235 Introduction to Agricultural Markets 3
- Econ 300 Level from Department Approved List 3
- NREM 120 Introduction to Renewable Resources 3
  or NREM 130 Natural Resources and Agriculture

And 6 credit hours from AN S, any level.
n
Total Credits 42

Other Required Course:
Electives: Select courses to get to 120 credits.
No more than 4 cr. of or 397 may count toward graduation.
No more than 6 cr. of 490 may count toward graduation.

Preveterinary Studies
Preparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.

Students will develop the necessary skills to become effective leaders with companies, local, national and international non-governmental organizations (NGOs), and government agencies that work on agricultural, food and environmental related issues. Graduates can work as public policy analysts, government relations, public relations, program analyst, program specialists, marketing, sales, agriculture, educators, and executive directors.

**Curriculum in Agriculture & Society**

Administered by the Department of Sociology

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications Proficiency (C or better):**

- 6 credits of English Composition
- 3 credits of Speech Fundamentals

**Communication/Library:**

- ENGL 150 Critical Thinking and Communication
- ENGL 250 Written, Oral, Visual, and Electronic Composition
- SP CM 212 Fundamentals of Public Speaking
- or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
- PR 305 Publicity Methods
- or AGEDS 327 Survey of Agriculture and Life Sciences Communication
- LIB 160 Information Literacy

**Humanities and Social Sciences: 6 cr.**

- 3 credits from approved humanities list
- 3 credits from approved social science list

**Ethics: 3 cr.**

- 3 cr. from approved list.

**Life Sciences: 6 cr.**

- BIOL 101 Introductory Biology
- or BIOL 211 Principles of Biology I
- Three credits from approved life sciences list

**Total Credits**

6

**Mathematical and Physical Sciences: 12 cr.**

- MATH 150 Discrete Mathematics for Business and Social Sciences
- or MATH 140 College Algebra
- STAT 101 Principles of Statistics
- or STAT 104 Introduction to Statistics

---

* A 2.00 grade point average is required.

**Agriculture and Society**

**College of Agriculture—Agriculture & Society**

This undergraduate degree emphasizes the application of social science knowledge to issues related to agriculture and society. The interdisciplinary major draws largely on courses from sociology, political science and economics. Its goal is to prepare students to become leaders in addressing complex issues related to the social and human dimensions of agriculture at both the local and global level. Students will learn social science concepts and skills to understand, analyze and communicate complex ideas, information and data related to agricultural systems.

Internships are an important part of the Agriculture & Society major. The curriculum offers the flexibility needed to accommodate the special interests and needs of each student.

The curriculum is designed to provide students with the following skills and competencies:

1. Recognize, analyze and evaluate the critical human and social factors (e.g. practices, policies, laws, institutions) impacting agriculture.
2. Understand the social dimensions of agriculture and its connections with food and environmental systems.
3. Develop problem solving, critical thinking, and leadership skills to positively influence human impacts on agriculture.
4. Understand the perspectives of diverse stakeholders and develop strategies to communicate clearly and effectively to a range of audiences.
Five credit hours from:

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

Agricultural Systems Technology

The Department of Agricultural and Biosystems Engineering offers a bachelor of science degree in Agricultural Systems Technology (AST). Students majoring in AST choose between two options: Agricultural and Biosystems Management or Machine Systems. The department also offers a minor in Agricultural Systems Technology.

Required AST courses are taught under the course designator TSM (Technology Systems Management).

Successful AST graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of a safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach where AST graduates apply science, technology and engineering principles to manage complex agricultural and other production systems, including how the constituent sub-systems are interrelated and the broader impact of these systems.

Graduates find careers within a variety of agricultural industries, businesses, and organizations in the fields of agricultural machinery; off-road equipment; food, feed and grain processing; water quality; biorenewable resources; precision agriculture; or livestock production systems.

Common job duties of AST Agricultural and Biosystems Management graduates include:

- technical support
- operations management
- production supervision
- elevator management

Common job duties of AST Machine Systems graduates include:

- precision agricultural support
- testing or sales management
- technical support
- maintenance supervision

For more information about the AST degree: http://www.abe.iastate.edu/undergraduate-students/agricultural-systems-technology/

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

TSM 201: Preparing for Workplace Seminar  
(Cross-listed with A B E). (1-0) Cr. 1. F.S.  
Prereq: Sophomore classification in AE, AST, BSE, or ITEC  
8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, and engineering/technical knowledge. Resumes; Cover Letters; Behavioral Based Interviewing; Industry Speakers; Preparation for internships experiences.

TSM 210: Fundamentals of Technology  
(3-0) Cr. 3. F.S.  
Prereq: TSM 115 or equivalent; and MATH 140 or higher  
Introduction to problem solving related to fundamental agricultural and/or industrial technology systems and mathematical tools needed for data analysis. Basic laws of energy, force, and mass applied to technology systems such as: mechanical power transmission; heating, ventilation and air conditioning; electrical circuits. Introduction to engineering economics: using the time value of money to make economic decisions.

TSM 214: Managing Technology Projects  
(2-0) Cr. 1. F.S.  
Prereq: TSM 201 or A B E 201; and sophomore classification in A E, AST, BSE, or ITEC.  
8 week course. Introduction to project management principles. Use of project management in technology-based projects for academic, industry, and personal use.

TSM 216: Advanced Technical Graphics, Interpretation, and CAD  
(1-2) Cr. 2. F.S.  
Prereq: TSM 116  
Advanced computer-aided-design topics incorporating 3D design and documentation used in manufacturing settings. Topics include: geometric dimensioning and tolerancing, weldments, sheet metal parts, advanced visualization, feature based design of parts and assemblies.

TSM 240: Introduction to Manufacturing Processes for Metals  
(1-4) Cr. 3. F.S.  
Prereq: MATH 145  
A study of selected materials and related processes used in metals manufacturing. Lecture and laboratory activities focus on materials, properties, and processes.

TSM 241: Introduction to Manufacturing Processes for Plastics  
(1-2) Cr. 2. F.S.  
Prereq: MATH 145  
A study of selected materials and related processes used in plastics manufacturing. Lecture and laboratory activities focus on materials, properties, and processes.

TSM 270: Principles of Injury Prevention and Safety  
(3-0) Cr. 3. F.S.  
Basic foundations of injury causation and prevention from a personal perspective in home, motor vehicle, and the public environment, and a management perspective within the work environment. Offered online only.

TSM 310: Total Quality Improvement  
(3-0) Cr. 3. S.  
Prereq: STAT 101 or STAT 104, junior classification  
Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - emphasis on team work and problem solving skills.

TSM 322: Preservation of Grain Quality  
(3-0) Cr. 3. S.  
Prereq: MATH 140 or higher  
Principles and management for grain quality preservation. Quality measurement. Drying and storage. Fans and airflow through grain. Handling methods.

TSM 322L: Preservation of Grain Quality Laboratory  
(0-3) Cr. 1. S.  
Prereq: Credit or enrollment for credit in TSM 322  

TSM 324: Soil and Water Conservation Management  
(2-2) Cr. 3. S.  
Prereq: MATH 140 or MATH 151  
Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

TSM 325: Biorenewable Systems  
(Cross-listed with A B E). (3-0) Cr. 3. F.  
Prereq: CHEM 163 or higher; MATH 140 or higher  
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.
TSM 327: Animal Production Systems  
(3-0) Cr. 3. F.  
Prereq: TSM 210  
Confined animal feeding operations. Environmental controls for animal production. Response of animals to the environment. Heat and moisture balance in animal housing. Ventilation, water, feed handling, air pollution, odor and waste management systems.

TSM 330: Agricultural Machinery and Power Management  
(2-3) Cr. 3. S.  
Prereq: MATH 145 or MATH 151; and TSM 210  
Selection, sizing, and operational principles of tractors and machinery systems. Cost analysis and computer techniques applied to planning and management of agricultural machine systems. Principles, operation, and application of agricultural machinery.

TSM 335: Tractor Power  
(3-3) Cr. 4. F.  
Prereq: TSM 210, MATH 145  
Theory and construction of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

TSM 337: Fluid Power Systems Technology  
(2-2) Cr. 3. S.  
Prereq: TSM 210  
Fundamental fluid power principles. Fluid properties. Function and performance of components such as pumps, valves, actuators, hydrostatic transmission. Analysis of fluid power circuits and systems. Introduction to electrohydraulics. Simulation of hydraulic systems with software. Course includes lab using fluid power trainers.

TSM 340: Advanced Automated Manufacturing Processes  
(2-2) Cr. 3. F.  
Prereq: TSM 210, TSM 216, TSM 240, MATH 151  
NC programming operations for CNC mills and lathes. Transfer of parts descriptions into detailed process plans, tool selection, and NC codes. Computer assisted CAD/CAM NC programming for 2D/3D machining and machining of student programmed NC code in lab.

TSM 363: Electrical Power Systems and Electronics for Agriculture and Industry  
(3-3) Cr. 4. F.S.  
Prereq: TSM 210, MATH 145  
Fundamental electrical power theory and applications, code requirements, and safety considerations. Single-phase and three-phase circuits design, analysis, and safety; electric motor performance characteristics; motor controls; electrical conductor and safety equipment selection; lighting system technology and design; and electric power usage. Emphasis on agricultural and industrial applications.

TSM 370: Occupational Safety  
(3-0) Cr. 3. F.S.  
Prereq: TSM 270, junior standing  
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards.

TSM 371: Occupational Safety Management  
(2-0) Cr. 2. S.  
Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 372: Legal Aspects of Occupational Safety and Health  
(2-0) Cr. 2. F.  
Prereq: TSM 371  
A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers’ compensation, as well as common liability issues.

TSM 376: Fire Protection and Prevention  
(3-0) Cr. 3. F.  
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 393: Topics in Technology  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393A: Topics in Technology: Agriculture and Biosystems Management  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393B: Topics in Technology: Machine Systems  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393C: Topics in Technology: Manufacturing  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393D: Topics in Technology: Occupational Safety  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393E: Topics in Technology: Chemical Application Systems  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.
TSM 393F: Topics in Technology: Agricultural Safety and Health
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393G: Topics in Technology: Electronic Integration for Agriculture and Production Systems
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393I: Topics in Technology: Irrigation Systems Management
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393J: Topics in Technology: Machinery Management Using Precision Agriculture Technology
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 397: Internship in Technology
Cr. R. Repeatable. F.S.S.S.
Prereq: At least 45 credits of coursework, AST or I Tec major, and approval of internship coordinator
A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399: Work Experience in Technology
Cr. 2. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: TSM 397 in the preceding semester and approval of internship coordinator
Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 maybe be used toward the total credits required for graduation.

TSM 415: Applied Project Management in Technology
(1-2) Cr. 2. F.S.
Prereq: Senior classification with less than 32 credits remaining; TSM 214; and credit or enrollment for credit in TSM 310.
Implementation of project management principles using case studies and teamwork; problem definition in a technology context; development of charter for technology capstone project.

TSM 416: Technology Capstone
(1-4) Cr. 3. F.
Prereq: TSM 415 in previous semester
Application of project management tools to a technology capstone project; development and evaluation of potential project solutions using tools from the technology curriculum; problem resolution emphasizing communication, critical analysis, and planning techniques; presentation of project through oral presentation and written reports with input from client, faculty, and other stakeholders.

TSM 433: Precision Agriculture
(Dual-listed with TSM 533). (2-2) Cr. 3. F.
Prereq: Junior standing.

TSM 440: Cellular Lean Manufacturing Systems
(2-2) Cr. 3. F.
Prereq: TSM 310
Introduction to lean tools and techniques that reduce costs and improve business performance: JIT, VSM, SMED, Kaizen, Standard Work, Cycle Time Reduction, Takt Time, A3, etc. Emphasis on lean thinking and competency development through application: simulations, case studies, industry guests and mentors, teamwork and industry-related lean projects.

TSM 443: Statics and Strength of Materials for Technology
(2-2) Cr. 3. S.
Prereq: PHYS 111; and MATH 145 or MATH 151
Application of standard analytic and computer based techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444: Facility Planning
(3-0) Cr. 3. F.
Prereq: TSM 216; TSM 240; and STAT 101 or STAT 104
Fundamental principles and practices in designing, evaluating, and organizing new or existing facilities. Emphasis on AutoCAD-based facility design and production flow analysis, activity relationship analysis, lighting analysis, time studies, materials handling, supporting services design, and optimal facility location analysis.
TSM 455: Feed Processing and Technology  
(Dual-listed with TSM 555). Cr. 3. F.  
**Prereq: Junior classification**  
Introduction to formula feed manufacturing and the animal feed industry. Overview of feed ingredients and formulation, understanding and operation of feed production processing equipment including principles of conveying, grinding, mixing, conditioning, pelleting, and other processing techniques, and the formulation of concentrates, premixes, and rations. Students will become knowledgeable about the manufacturing of various animal feed types such as pelleted and extruded feed, aqua (fish) feed, liquid feeds, poured and pressed blocks, steam flaked feed, and pet food, and their effect on animal performance and health.

TSM 457: Feed Safety, Ingredient Quality and Analytics  
(Dual-listed with TSM 557). Cr. 3. S.  
**Prereq: Junior classification**  
Concepts of feed and grain safety and quality, including hazards and risks associated with common feeds and feed ingredients. Methods to monitor, manage, and mitigate hazards and risks in the context of feed and grain industries. Government regulations applicable to feed and grain safety. Differences between safety and quality factors, how they are measured and then used for decision-making (marketing, processing, or safe-use).

TSM 465: Automation Systems  
(2-2) Cr. 3. S.  
**Prereq: TSM 363**  
Theory and applications of automation systems. Emphasizes features, capabilities, design and programming skills of Programmable Logic Controller (PLC) based industrial control systems. Introduction to industrial robots and sensors.

TSM 470: Industrial Hygiene: Physical, Chemical, and Biological Hazards  
(3-0) Cr. 3. S.  
**Prereq: MATH 151 or higher**  
A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace.

TSM 471: Safety Laboratory  
(0-2) Cr. 1. S.  
**Prereq: Credit or enrollment for credit in TSM 470**  
Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplaces.

TSM 477: Risk Analysis and Management  
(Dual-listed with TSM 577). (3-0) Cr. 3. F.  
**Prereq: MATH 151; and STAT 101 or STAT 104**  
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today's complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 490: Independent Study  
Cr. 1-4. Repeatable.  
**Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department**  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490H: Independent Study: Honors  
Cr. 1-4. Repeatable.  
**Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department**  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490I: Independent Study: Manufacturing  
Cr. 1-4. Repeatable.  
**Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department**  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490J: Independent Study: Agriculture and Biosystems Management  
Cr. 1-4. Repeatable.  
**Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department**  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490M: Independent Study: Machine Systems  
Cr. 1-4. Repeatable.  
**Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department**  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490O: Independent Study: Occupational Safety  
Cr. 1-4. Repeatable.  
**Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department**  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.
TSM 493: Workshop in Technology
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493A: Workshop in Technology: Agriculture and Biosystems Management
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493B: Workshop in Technology: Machine Systems
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493C: Workshop in Technology: Manufacturing
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493D: Workshop in Technology: Occupational Safety
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 495: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up
(Cross-listed with A B E). Cr. 1-2. Repeatable. F.S.SS.
Prereq: Permission of instructor
Preparation for, or follow-up of, study abroad experience (496). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 496 the following term or have had taken 496 the previous term.
Meets International Perspectives Requirement.

TSM 496: Agricultural and Biosystems Engineering Department Study Abroad
(Cross-listed with A B E). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 495.
Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:

TSM 533: Precision Agriculture
(Dual-listed with TSM 433). (2-2) Cr. 3. F.
Prereq: Junior standing.

TSM 540: Advanced Design and Manufacturing
(3-0) Cr. 3. S.
Prereq: Permission of instructor
Application of six sigma philosophy to advance product design and process control. Application of value steam mapping to the existing manufacturing system to develop future continuous improvement plans. Application of Taguchi Parameter design methodologies for optimizing the performance of manufacturing processes. Application of Taguchi Tolerance Design methodologies for product design.

TSM 555: Feed Processing and Technology
(Dual-listed with TSM 455). Cr. 3. F.
Prereq: Junior classification
Introduction to formula feed manufacturing and the animal feed industry. Overview of feed ingredients and formulation, understanding and operation of feed production processing equipment including principles of conveying, grinding, mixing, conditioning, pelleting, and other processing techniques, and the formulation of concentrates, premixes, and rations. Students will become knowledgeable about the manufacturing of various animal feed types such as pelleted and extruded feed, aqua (fish) feed, liquid feeds, poured and pressed blocks, steam flaked feed, and pet food, and their effect on animal performance and health.

TSM 557: Feed Safety, Ingredient Quality and Analytics
(Dual-listed with TSM 457). Cr. 3. S.
Prereq: Junior classification
Concepts of feed and grain safety and quality, including hazards and risks associated with common feeds and feed ingredients. Methods to monitor, manage, and mitigate hazards and risks in the context of feed and grain industries. Government regulations applicable to feed and grain safety. Differences between safety and quality factors, how they are measured and then used for decision-making (marketing, processing, or safe-use).

TSM 575: Safety and Public Health Issues in Modern Society
(2-0) Cr. 2. Repeatable, maximum of 2 times.
Exploration and analysis of current safety and public health issues impacting society. The focus will be on topics that impact individuals in work, public, and home environments.
TSM 577: Risk Analysis and Management
(Dual-listed with TSM 477). (3-0) Cr. 3. F.
Prereq: MATH 151; and STAT 101 or STAT 104
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 590: Special Topics in Technology
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590A: Special Topics in Technology: Agriculture and Biosystems Management
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590B: Special Topics in Technology: Machine Systems
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590C: Special Topics in Technology: Manufacturing
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590D: Special Topics in Technology: Occupational Safety
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 593: Workshop in Technology
Cr. 1-3. Repeatable.
Prereq: Permission of instructor

TSM 599: Creative Component
Cr. 1-3. Repeatable, maximum of 6 credits.
A discipline-related problem to be identified and completed under the direction of the program adviser. Three credits required for all nonthesis master’s degree students.

Courses for graduate students:

TSM 601: Graduate Seminar
(Cross-listed with A B E). (1-0) Cr. 1. F.
Keys to starting a successful graduate research project. Effective literature review, formulating research questions, and setting goals. Practicing effectively communicating research and science. Effective strategies for scholarly writing, responding to feedback, peer-reviewing, successful publishing in journals, and curating scholarly output.

TSM 652: Program and Learner Evaluation
(3-0) Cr. 3.
Prereq: STAT 401 or equivalent
Techniques for evaluating learners, facilities, programs, and staff utilizing theories for developing measurement instruments. Outcomes assessment is emphasized.

TSM 655: Academic Leadership in Technology and Engineering
(3-0) Cr. 3.
Prereq: Permission of instructor
A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

TSM 657: Curriculum Development in Technology and Engineering
(3-0) Cr. 3.
Prereq: Permission of instructor
Basic concepts, trends, practices, and factors influencing curriculum development, techniques, organization and procedures. Emphasis will be given to course development using the backward design process.

TSM 694: Teaching Practicum
(Cross-listed with A B E). Cr. 1-3. Repeatable. F.S.
Prereq: Graduate classification and permission of instructor
Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

TSM 697: Internship in Technology
Cr. R.
Prereq: permission of major professor and approval by department chair, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

TSM 699: Research
Cr. arr.

Agronomy
Undergraduate Study
Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life. The
Department of Agronomy offers a major leading to a degree of bachelor of science (BS) in agronomy. Graduates have the theoretical and practical knowledge needed for efficient and sustainable crop production. They are skilled in critical thinking, problem solving, and communicating and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing agronomists globally.

An agronomy major prepares students for employment in crop production and soil management, yield forecasting, precision farming, plant breeding, agricultural business and industry, agricultural service organizations, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, grain inspectors, integrated pest management, land appraisal, agricultural finance, and in other science-based professional positions.

An agronomy major also prepares students for graduate school. We offer a concurrent BS/MBA degree. About a quarter of our students immediately continue into research-based MS and PhD programs. As an undergraduate, there are many opportunities to be involved in research

Department of Agronomy website - http://www.agron.iastate.edu/.

Curriculum in Agronomy

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. A minimum of 15 credits of agronomy courses must be earned at Iowa State and not transferred from other institutions.

International Perspective: 3 cr.

3 cr. from approved International Perspective list: http://www.registrar.iastate.edu/students/div-ip-guide/international-perspectives-current

U.S. Diversity: 3 cr.

3 cr. from approved U.S. Diversity list: http://www.registrar.iastate.edu/students/div-ip-guide/us-diversity-courses

Communication/Library: 13 cr.

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

| ENGL 150 | Critical Thinking and Communication | 3 |
| ENGL 250 | Written, Oral, Visual, and Electronic Composition | 3 |
| SP CM 212 | Fundamentals of Public Speaking | 3 |

| LIB 160 | Information Literacy | 1 |

One of the following:

| ENGL 302 | Business Communication | 3 |
| ENGL 309 | Proposal and Report Writing | 3 |
| ENGL 314 | Technical Communication | 3 |

Humanities: 3 cr.

3 cr. from approved humanities list: http://www.cals.iastate.edu/student-services/humanities

Social Sciences: 3 cr.

3 cr. from approved social sciences list: http://www.cals.iastate.edu/student-services/social-sciences

Ethics: 3 cr.

3 cr. from approved ethics list: http://www.cals.iastate.edu/student-services/ethics

Mathematical Sciences: 6 cr.

| MATH 140 | College Algebra | 3 |
| STAT 104 | Introduction to Statistics | 3 |

Physical Sciences: 8 cr.

| CHEM 163 | College Chemistry and Laboratory in College Chemistry | 5 |
| CHEM 231 & 231L | Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry | 4 |

Life and Biological Sciences: 7 cr.

| BIOL 212 & 212L | Principles of Biology II and Principles of Biology Laboratory II | 4 |
| AGRON 320 or BIOL 313 | Genetics, Agriculture and Biotechnology or Principles of Genetics | 3 |

Supporting Sciences: 15 cr.

Courses cannot be used to fulfill any other university, college or Agronomy requirements. At least 9 cr. must be in courses numbered 300 or above.

This requirement can be met in one of three ways:

a. Complete at least 3 credits in basic or mathematics-intensive discipline (ACCT, BBMB, BIOL, CHEM, COM S, ECON, All Engineering, GEOL, GEN, MATH, MTEOR, PHYS, STAT) as well as at least 6 additional credits in BIOL, BBMB, ENSCI, ENT, GEOL, HORT, GEN,
Agronomy, NREM, PL, P, TSM. The other 6 credits can be a combination of the above department's courses and/or AGRON.

b. Complete the courses needed to fulfill a second major that complements the student's academic and professional goals.

c. By the end of the third semester before graduation, petition the Agronomy Curriculum Committee with a specific set of courses designed around "keeper of the land", "builder of genetic diversity", "explorer of plant life", "developer of bio-energy", "confronter of world hunger", "designer of sustainable systems".

Agronomy Core: 47 cr.

**AGRON 457 Agroecology Field Course**

Students minoring in agronomy can take the following courses: AGRON 331, AGRON 370, AGRON 490, and AGRON 496; but only one (1) credit from these courses can be used in the minor program.

**Graduate Study**

**Introduction**

Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life. The Department of Agronomy administers Master of Science (MS) and Doctor of Philosophy (PhD) degree programs in four different graduate majors that emphasize different disciplines of agronomy. These majors are: Agricultural Meteorology; Crop Production and Physiology; Plant Breeding; and Soil Science. A fifth graduate major, Agronomy, offers both an MS and a Graduate Certificate through distance education suitable for professionals working in industry or government, as well as a graduate minor for on-campus students.

**Admission**

To be fully admitted, prospective graduate students must have an undergraduate GPA of at least a 3.00 GPA (4.00 scale) or rank in the upper one-half of their undergraduate class. Provisional and restricted admission demand that students fulfill certain requirements. Non-native English speakers must take the Test of English as a Foreign Language (TOEFL). Students applying to the Agricultural Meteorology and Plant Breeding graduate majors must take the Graduate Record Examination (GRE). For all of the majors except Agronomy, a faculty member of the graduate major must agree to be the major professor before the student is admitted.

**Program of Study**

The academic courses used to satisfy requirements for a graduate degree compose a student’s Program of Study (POS). The POS must be approved by the student’s POS Committee. For the MS in Agronomy, the POS Committee must be composed of at least two faculty who are both members of the Graduate Major in Agronomy. For the other four majors at the MS degree level, at least three faculty must serve on a POS Committee. Two of the three must be members of the major, and at least one must be a member of a different graduate major. At the PhD level the POS Committee must have at least five members, of which at least three must be faculty in the major, and at least one a member of a different graduate major. If the student is pursuing a graduate minor, either as part of an MS or PhD, a graduate faculty member representing the minor must serve on the POS Committee.

**Agronomy**

The POS for the MS in Agronomy is fixed and consists of the following:
AGRON 501  Crop Growth and Development  3
AGRON 502  Chemistry, Physics, and Biology of Soils  3
AGRON 503  Climate and Crop Growth  3
AGRON 511  Crop Improvement  3
AGRON 512  Soil-Plant Environment  3
AGRON 513  Quantitative Methods for Agronomy  3
AGRON 514  Integrated Pest Management  3
AGRON 531  Crop Ecology and Management  3
AGRON 532  Soil Management  3
AGRON 533  Crop Protection  3
AGRON 591  Agronomic Systems Analysis  3
AGRON 592  Current Issues in Agronomy  3
AGRON 594  Agronomy MS Practicum  1
AGRON 599M  Agronomy  arr  †

† Arranged with instructor.

All Other Degrees
The courses in each student’s POS will vary depending on the major and the student’s interests. Every on–campus student must include AGRON 601 in their POS. Note that only a maximum of three 400–level courses or up to one 300–level and two 400–level courses may be included on the POS. If a 300–level course is listed on the POS it cannot be an AGRON course.

Agricultural Meteorology
Students with a major in Agricultural Meteorology must include AGRON 698 in their POS. Students are encouraged to include the following courses: AGRON 505; AGRON 577; MTEOR 605; a modeling course such as AGRON 508, AGRON 518, AGRON 525, AGRON 677, GEOL 516, or MTEOR 552; and a course in statistics.

Crop Production and Physiology
The Graduate Major in Crop Production and Physiology has defined five Core Areas.
Core Area 1 (molecular biology / biochemistry): BBMB 404, BBMB 405, BBMB 542A–G, BBMB 607, and PLBIO 545.
Core Area 2 (growth and development): AGRON525, AGRON551, BIOL 454, BIOL 428, and GDCB 528.
Core Area 3 (plant physiology and metabolism): AGRON508, AGRON516, AGRON519, AGRON 525, AGRON 538, AGRON 553, AGRON 556, BBMB 645, and PLBIO 513.
Core Area 4 (crop ecology and management): AGRON 509, AGRON 515, AGRON 530, AGRON 553, AGRON 556, BIOL 472, BIOL 474, EEOB 570, EEOB 582, EEOB 584, EEOB 589, HORT 524, PL P 577, and PL P 594.
Core Area 5 (statistics / quantitative methods): AGRON 526, STAT 401, STAT 402, STAT 407, STAT 505, STAT 512, CRP 551, and NREM 546.

To major in Crop Production and Physiology, at least one course from three of the Core Areas must be included in the POS for the MS. For the PhD, at least one course from each of the Core Areas must be included. A single course cannot be used for more than one Core Area. Students are also encouraged to consider AGRON 698.

Plant Breeding
The Graduate Major in Plant Breeding has both a resident and distance–education MS program. The following courses are recommended for students with a major in Plant Breeding: AGRON 521, AGRON 522, AGRON 523, AGRON 524, AGRON 528, AGRON 561, AGRON 600A, AGRON 698, GEN 510, STAT 401, and STAT 402. For the distance program, the following courses are recommended: AGRON 501, AGRON 506, AGRON 513, AGRON 520, AGRON 521, AGRON 523, AGRON 524, AGRON 528, AGRON 544, and AGRON 599. Resident students pursuing the PhD also often include AGRON 621 and AGRON 625 in their POS.

Soil Science
Students pursuing a major in Soil Science may specialize in one of six areas: soil chemistry; soil fertility; soil management; soil microbiology and biochemistry; soil morphology and genesis; or soil physics. If a specialization is chosen, the major professor must be in the designated specialty area. For the PhD, the POS must include one credit of AGRON 600B. Students are also encouraged to consider including AGRON 698 in their POS.

Master of Science
The general requirements for an MS degree include:

• a minimum of 30 credits from academic courses and research activities;
• at least 22 credits earned at ISU;
• two–thirds or more of earned credits related to the major; and
• completion of a final oral examination.

Both non–thesis and thesis options for an MS degree in Agricultural Meteorology, Crop Production and Physiology, Plant Breeding, and Soil Science are available. Students in the Agronomy major must choose the non–thesis option.

Students in Agricultural Meteorology working towards the MS must meet with their POS Committee at least twice. Besides the final oral examination, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. The student must also present a short written report on how the proposed research will help them master established Enduring Understandings in Agricultural Meteorology.

Creative Component
If the non–thesis MS degree is chosen, then the student must:
1. register for at least two credits of AGRON 599 that will be used to complete a “creative component;” and 
2. pass a comprehensive final oral examination. 

The creative component is work that presents “substantial evidence of individual accomplishment.” The POS Committee and the student will specify the creative component, how it will be documented, and how it will be evaluated. The POS Committee also has flexibility in determining the format of the final oral examination. For Agricultural Meteorology, the final oral exam must include an evaluation of the student’s mastery of the Enduring Understandings in Agricultural Meteorology.

**Thesis**

In the thesis option the student must:
1. pursue a research project culminating in a written thesis; and 
2. pass a comprehensive final oral examination.

A minimum of three research credits of AGRON 699 must be listed on the POS to account for work on an MS thesis. The thesis is submitted to the POS Committee prior to the final oral examination. During the final oral examination, the student will present and defend the thesis in the presence of the POS Committee. Students in Agricultural Meteorology must also demonstrate mastery of the Enduring Understandings in Agricultural Meteorology. The presentation (also called the “exit seminar”) is open to the general public. Only POS Committee members may attend the examination that follows the presentation.

**Doctor of Philosophy**

The general requirements for a PhD degree include:

- a minimum of 72 credits from academic courses and research activities;
- at least 36 of these credits earned at ISU;
- completion of a preliminary oral examination;
- a written PhD dissertation; and
- completion of a comprehensive final oral examination.

Note that the 72 credits can include the credits earned in pursuit of an MS degree. If an MS was earned at another institution, those courses earned at the other institution can be listed along with the ISU courses, but only if the POS Committee determines that the courses are appropriate. Students in Agricultural Meteorology working towards the PhD must meet with their POS Committee at least three times. Besides the final oral examination and another for the preliminary exam, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. If a student will pursue a PhD without first completing an MS, then during the first meeting of the POS Committee the student must also present a short written report that illustrates connections between the Enduring Understandings in Agricultural Meteorology and their planned research.

**Qualification Exam**

**Agricultural Meteorology**

Students in Agricultural Meteorology must take and pass a qualification exam once they have decided to pursue a PhD. The qualification exam must be passed before taking the preliminary exam. The format of the qualification exam is as follows. The student will produce a written report that demonstrates their knowledge of the Enduring Understandings in Agricultural Meteorology. If the student has come from another university the report must present research completed at ISU and not at the previous institution (such as a thesis). This report will be submitted to all of the faculty in the major. The student will then make an oral presentation to faculty and other students in the major that summarizes and defends the written report. After the oral presentation, the faculty will meet to determine whether or not the student passed the exam, and whether the student can re–take the exam if the student failed. The faculty will provide written feedback to the student, suggesting areas where improvement is needed and a course of action. The qualification exam can be taken only two times during a student’s graduate career at ISU. If a student who had entered the PhD program without an MS degree takes the qualification exam and fails the exam, the student can: take the qualification exam again, if so allowed by the faculty; or continue their graduate career in pursuit of an MS degree. In the latter case, the student could take the qualification exam one more time after an MS degree has been completed.

**All Other Majors**

A qualification exam is not required for students in the Crop Production and Physiology, Plant Breeding, or Soil Science majors.

**Preliminary Exam**

All students pursuing a PhD must take and pass a preliminary oral examination.

**Agricultural Meteorology**

For students in Agricultural Meteorology the preliminary exam consists of a defense of the student’s proposed dissertation research to the POS Committee. Besides an oral defense, the student must also submit a written report on their proposed research. If the student fails the preliminary exam, the POS Committee must also decide if the student can re–take the exam. The preliminary exam can only be taken twice.

**Crop Production and Physiology**

Students in Crop Production and Physiology may be asked to take a written preliminary examination. If a student fails the written preliminary examination, the POS Committee may require the student to retake the exam, to answer additional written questions, or proceed with the oral examination. The nature of the preliminary oral exam is determined by the student’s POS Committee.
Plant Breeding
Students in Plant Breeding must pass a uniform written preliminary examination that consists of five questions, each from one of five topical areas. Faculty members in Plant Breeding evaluate each answer. Evaluators assign a pass or fail grade to the answer. If an evaluator assigns a failing grade to a question, the evaluator shall clearly indicate the strengths and weaknesses of the answer and provide written information (e.g., references, rationale) to the student which clearly outlines an acceptable response to the question. Failure to provide such written information may invalidate that grade and be considered sufficient cause to exclude the grade in the overall evaluation of the student's answer. Students who receive two pass grades for a question will have successfully completed that topic, and students must pass each topic to pass the exam. If two valid grades are not in agreement (e.g., one passing grade and one failing grade), additional faculty members will evaluate the answer until there are two valid assessments that are in agreement. Students who do not pass a topic have the opportunity to repeat that topic on the next regularly scheduled exam date. The number of attempts for each topic has not been specified. The examination is offered the last Thursday and Friday of each January and September when one or more students have signed up to take the exam. Students may choose to attempt questions for all five topics, or for subsets of the topics. If a student decides to attempt questions for only certain topics, the student must specify which topics in writing at least one month prior to the scheduled exam date. The nature of the preliminary oral exam is determined by the student's POS Committee.

Soil Science
Students in Soil Science must pass a written preliminary examination. Exam questions are authored by members of the POS Committee. The format of each question is left open and they may be formulated as open- or closed-book problems. A reasonable period for completion may be set by the author of the question. The student's responses are formally scored or ranked only by the POS Committee member who authored the question. A copy of the student's responses to all questions is submitted to all POS Committee members at least one month prior to the scheduled exam date. The nature of the preliminary oral exam is determined by the student's POS Committee.

Doctoral Dissertation and Final Oral Examination
All students must include at least three AGRON 699 credits in their POS for work on their PhD dissertation. During the required final oral examination, a student presents and defends the dissertation. This presentation (also called the “exit seminar”) is open to the general public. Only POS Committee members may attend the examination that follows the presentation.

Graduate Certificate in Agronomy for distance students
The Graduate Certificate in Agronomy is for distance students and is comprised of the first six courses in the Master of Science in Agronomy Distance Curriculum. All six courses are required for certificate completion.

</table>
AGRON 160: Water Resources of the World
(Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.
Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment. Meets International Perspectives Requirement.

AGRON 180: Global Agriculture in a Changing World
(3-0) Cr. 3. F.
A scientific investigation of the global distribution of climate, soils and agricultural production and consumption. Physical processes that connect natural resources to agriculture and the environment. How global change drives increasing demand for agricultural production. Meets International Perspectives Requirement.

AGRON 181: Introduction to Crop Science
(3-0) Cr. 3. F.S.
Basic structure and function of plants, origin and classification, growth and development. Fundamentals of photosynthesis, plant water use, plant nutrition and genetics that regulate plant growth, development and responses to the environment.

AGRON 182: Introduction to Soil Science
(3-0) Cr. 3. F.S.
Prereq: Chem 163
Introduction to physical, chemical, and biological properties of soils; soil formation, classification and global distribution; soil health, soils and humanity and sustainable land management.

AGRON 183: Basic Skills for Agronomists
(0-3) Cr. 1. F.
Developing the skills that agronomists employ in their work with crops, soil, and the environment through activities involving tools and methodologies used by agronomists. Enrollment is restricted to first-year students majoring in agronomy.

AGRON 206: Introduction to Weather and Climate
(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.
Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

AGRON 210: Professional Development in Agronomy: Career Planning
(1-0) Cr. 1. F.
Prereq: Sophomore classification
Career planning, résumé and cover letter preparation, and interviewing techniques. Career orientation through invited speakers.

AGRON 217: Weed Identification
(1-2) Cr. 1. F.S.
Prereq: BIOL 101 or equivalent

AGRON 259: Organic Compounds in Plants and Soils
(3-0) Cr. 3. S.
Prereq: CHEM 163, BIOL 212, MATH 140, AGRON 182
Structure, function, and transformations of organic compounds significant in plant and soil environments.

AGRON 279: Field Exploration of Agronomy
(2-3) Cr. 3. F.
Prereq: AGRON 181 or equivalent and AGRON 182 or equivalent
Field-based investigation of Iowa's agronomic systems. Application of principles learned in introductory soils, crops and agronomy courses. For students majoring in Agronomy.

AGRON 280: Crop Development, Production and Management
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent and AGRON 182 or equivalent
Overview of crops and cropping systems in the context of global and US agriculture. Focus on agronomic principles, constraints and opportunities as they apply to various locations in Iowa, the USA and the world.

AGRON 281: Crop Physiology
(3-0) Cr. 3. S.
Prereq: Agron 181 or equivalent
Science governing plant growth and development in the context of cropping and genetic improvements.

AGRON 282: Soil Conservation and Land Use
(3-0) Cr. 3. F.S.
Prereq: Agron 182 or equivalent
Principles of soil conservation and land use with emphasis on best management practices and use of soil maps and databases such as Web Soil Survey.

AGRON 283: Pesticide Application Certification
(Cross-listed with ENT, FOR, HORT). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.
AGRON 298: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of faculty member or student's adviser, sophomore classification
Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

AGRON 310: Professional Development in Agronomy: Work Experience
Cr. R. F.S.S.
Professional work experience in agronomy. See adviser for departmental requirements. Offered on a satisfactory-fail basis only.

AGRON 311: Professional Internship in Agronomy
(1-0) Cr. 1. F.
Prereq: Permission of adviser
A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science. For students majoring in Agronomy.

AGRON 316: Crop Structure-Function Relationships
(3-0) Cr. 3. F.S.
Prereq: BIOL 212 recommended
Basic principles concerning the growth, development, and production of crop communities in relation to their environment.

AGRON 317: Principles of Weed Science
(3-0) Cr. 3. F.

AGRON 320: Genetics, Agriculture and Biotechnology
(Cross-listed with GEN). (3-0) Cr. 3. F.S.
Prereq: BIOL 212
Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

AGRON 330: Crop and Seed Identification Laboratory
(0-4) Cr. 2. F.
Prereq: AGRON 181 or equivalent.
Identification, agronomic and binomial classification of crops, weeds, and diseases. Analysis of crop seed samples for contaminants of weed and other crop seeds.

AGRON 331: Intercollegiate Crops Team
(0-6) Cr. 2. Repeatable. F.S.
Prereq: Permission of instructor. AGRON 330 recommended
Intensive training in preparation for intercollegiate competition in national crops contests.

AGRON 334: Forage Crop Management
(3-0) Cr. 3. S.
Prereq: AGRON 181 or equivalent
Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. Students enrolling for graduate credit will be expected to complete an additional class project.

AGRON 338: Seed Science and Technology
(Cross-listed with HORT). (2-3) Cr. 3. F.
Prereq: AGRON 181 (or equivalent) or HORT 221; BIOL 212
Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

AGRON 342: World Food Issues: Past and Present
(Cross-listed with ENV S, FS HN). (3-0) Cr. 3. F.S.SS.
Prereq: Junior classification
Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/undernutrition, poverty, hunger, access, and distribution. Meets International Perspectives Requirement.

AGRON 342H: World Food Issues: Past and Present, Honors
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
Prereq: Junior classification
Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Meets International Perspectives Requirement.

AGRON 351: Turfgrass Establishment and Management
(Cross-listed with HORT). (3-0) Cr. 3. F.
Prereq: HORT 221 or AGRON 181 (or equivalent) or BIOL 211
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadways, and seed and sod production. The biology and control of turfgrass pests.
AGRON 351L: Turfgrass Establishment and Management Laboratory
(Cross-listed with HORT). (0-3) Cr. 1. F.
Prereq: Credit or enrollment in HORT 351
Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor.

AGRON 354: Soils and Plant Growth
(Cross-listed with HORT). (3-0) Cr. 3. F.S.
Prereq: AGRON 182 or equivalent and BIOL 101
Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development.

AGRON 354L: Soils and Plant Growth Laboratory
(Cross-listed with HORT). (0-3) Cr. 1. F.S.
Prereq: Agron or Hort major with credit or enrollment in AGRON 354
Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.

AGRON 360: Environmental Soil Science
(Cross-listed with ENSCI). (2-2) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or ENSCI 250 or GEOL 201
Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

AGRON 370: Field Experience in Soil Description and Interpretation
(0-3) Cr. 1. Repeatable, maximum of 4 times. F.S.
Prereq: AGRON 182 or equivalent and permission of instructor
Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.

AGRON 388: Agronomic Sciences in Theory and Practice
(1-0) Cr. 1. F.
Prereq: Junior or senior classification
How science works: Hypotheses, data integrity, classification, interpretations, ethics, and communications.

AGRON 392: Systems Analysis in Crop and Soil Management
(2-3) Cr. 3. F.S.
Prereq: AGRON 316 and AGRON 354
Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

AGRON 398: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of faculty member or student's adviser; junior classification
Student register for this course in order to retain full-time status while on a professional work experience. The student must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

AGRON 402I: Watershed Hydrology and Surficial Processes
(Cross-listed with ENSCI, IA LL). Cr. 4. SS.
Prereq: Four courses in physical or biological sciences or engineering
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed.

AGRON 404: Global Change
(Dual-listed with AGRON 504). (Cross-listed with ENSCI, ENV S, MTEOR). (3-0) Cr. 3. S.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

AGRON 405: Environmental Biophysics
(Dual-listed with AGRON 505). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MATH 165 and some exposure to computer programming (any language)
The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

AGRON 406: World Climates
(Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. S.
Prereq: AGRON 206/MTEOR 206
Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement.
AGRON 407: Mesoscale Meteorology
(Dual-listed with AGRON 507). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Math 166 and MTEOR 443

AGRON 410: Professional Development in Agronomy: Senior Forum
(1-0) Cr. 1. F.S.
Prereq: Senior classification, AGRON 210
Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.

AGRON 421: Introduction to Plant Breeding
(Cross-listed with HORT). (3-0) Cr. 3. F.
Prereq: GEN 320 or BIOL 313
Fundamental principles of plant breeding and cultivar development, breeding methods for self-pollinated, cross-pollinated and clonal crops.

AGRON 446: International Issues and Challenges in Sustainable Development
(Cross-listed with GLOBE, INTST). Cr. 3. F.
Prereq: 3-credit biology course, Sophomore or higher classification, permission of instructor
Interdisciplinary study and analysis of agricultural systems, sustainable management, and impact on plants and animal biodiversity. International field experience in evaluating different agricultural systems and impact on biodiversity may be required. A program fee is charged to students for international study abroad.
Meets International Perspectives Requirement.

AGRON 450: Issues in Sustainable Agriculture
(Cross-listed with ENV S). (3-0) Cr. 3. F.
Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices.

AGRON 452: GIS for Geoscientists
(Dual-listed with AGRON 552). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. F.S.
Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

AGRON 459: Environmental Soil and Water Chemistry
(Dual-listed with AGRON 559). (Cross-listed with ENSCI). (3-3) Cr. 4. F.
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended
An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 463: Soil Formation and Landscape Relationships
(Dual-listed with AGRON 563). (Cross-listed with ENSCI). (3-0) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or AGRON 260
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

AGRON 463I: Soil Formation and Landscape Relationships
(Dual-listed with AGRON 563I). (Cross-listed with ENSCI, IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Prereq: AGRON 182 (or equivalent)
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only AGRON 563 or 563I may be applied for graduation.

AGRON 463L: Soil Formation and Landscape Relationships Laboratory
(0-3) Cr. 1. S.
Prereq: Credit or enrollment in Agron 463
Laboratory exercise in soil formation with landscape relationships including pedon description with soil mapping.

AGRON 477: Soil Physics
(Dual-listed with AGRON 577). (Cross-listed with ENSCI). (3-0) Cr. 3. S.
Prereq: AGRON 182 or equivalent and MATH 166 recommended
The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.
AGRON 484: Organic Agricultural Theory and Practice
(Dual-listed with AGRON 584). (Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 9 cr. in biological or physical sciences
Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 485: Soil and Environmental Microbiology
(Dual-listed with AGRON 585). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 488: GIS for Geoscientists II
(Dual-listed with AGRON 588). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

AGRON 490: Independent Study
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490E: Independent Study: Entrepreneurship
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490G: Independent Study: General
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490H: Independent Study: Honors
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490Z: Independent Study: Service Learning
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation
Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 491: Seed Science Internship Experience
(Cross-listed with HORT). Cr. 1-2. Repeatable, maximum of 1 times.
F.S.S.S.
Prereq: Agron 338, advanced approval and participation of employer and instructor
A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

AGRON 493: Workshop in Agronomy
Cr. arr. Repeatable, maximum of 4 times.
Prereq: Permission of instructor
Workshop experience in crops, soils, or agricultural meteorology.

AGRON 496: Agricultural Travel Course
Cr. arr. Repeatable.
Prereq: Permission of instructor
Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 496A: International Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor
Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings. Meets International Perspectives Requirement.
AGRON 496B: Domestic Tour
Cr. arr. Repeatable.
**Prereq:** Permission of instructor
Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 497: Agroecology Field Course
(3-0) Cr. 3. F.
**Prereq:** Jr. or Sr. classification with at least 8 credits in Agronomy
A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

AGRON 498: Cooperative Education
Cr. R. F.S.S.
**Prereq:** Permission of faculty member or student's adviser; senior classification
Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

AGRON 500: Orientation Seminar
(2-0) Cr. 1. F.
**Prereq:** International agronomy graduate students only
An introduction to Iowa and U.S. agriculture for international scholars in agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.

AGRON 501: Crop Growth and Development
(3-0) Cr. 3. F.S.
**Prereq:** AGRON 181 or equivalent, MATH 140, CHEM 163, BIOL 101
Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield. Required course for the Master of Science in Agronomy degree program and Agronomy Graduate Certificate program.

AGRON 502: Chemistry, Physics, and Biology of Soils
(3-0) Cr. 3. F.Alt. S., offered odd-numbered years.
**Prereq:** AGRON 181 or equivalent, AGRON 182 or equivalent, BIOL 101, CHEM 163, MATH 140
Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program and Agronomy Graduate Certificate program.

AGRON 503: Climate and Crop Growth
(3-0) Cr. 3. F.S.
**Prereq:** AGRON 181 or equivalent and MATH 140
Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction and crop risk management. Basic meteorological principles are also presented to support these applied concepts. Required course for the Master of Science in Agronomy degree program and Agronomy Graduate Certificate program.

AGRON 504: Global Change
(Dual-listed with AGRON 404). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. S.
**Prereq:** Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

AGRON 505: Environmental Biophysics
(Dual-listed with AGRON 405). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
**Prereq:** MATH 165 and some exposure to computer programming (any language)
The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

AGRON 506: Crop Genetics
(Cross-listed with HORT). Cr. 3. F.
Introduction to genetics of reproductive systems, recombination, segregation and linkage analysis, inbreeding, quantitative inheritance, fertility regulation, and polyploidy to prepare students for subsequent courses in crop improvement. Enrollment is restricted to off-campus MS in Plant Breeding students.
AGRON 507: Mesoscale Meteorology
(Dual-listed with AGRON 407). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Math 166 and Mteor 454
The physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Semester project and in-class presentation required.

AGRON 508: Biophysical Crop Ecology
(3-0) Cr. 3. Alt. S., offered even-numbered years.
The physics behind how humans use plant photosynthesis to convert energy from the sun into useful products. Techniques for quantifying and predicting ecological interactions in the soil-plant-atmosphere continuum.

AGRON 509: Agroecosystems Analysis
(Cross-listed with SOC, SUSAG). (3-4) Cr. 4. F.
Prereq: Senior or above classification; permission of instructor
Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing both field visits and classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation.

AGRON 510: Crop Improvement
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

AGRON 511: Crop Improvement
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent, MATH 140, CHEM 163, BIOL 101
Basic principles in the genetic improvement of crop plants. Methods of cultivar development in self-pollinated and cross-pollinated crop species. Required course for the Master of Science in agronomy degree program and agronomy graduate certificate program.

AGRON 512: Soil-Plant Environment
(3-0) Cr. 3. S.
Prereq: AGRON 502. Recommended AGRON 501
Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management. Required course for the Master of Science in agronomy degree program and agronomy graduate certificate program.

AGRON 513: Quantitative Methods for Agronomy
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent, MATH 140, STAT 104
Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of SAS and Excel for organization, analyzing, and presenting data. Required course for the Master of Science in Agronomy degree program.

AGRON 514: Integrated Pest Management
(3-0) Cr. 3. F.S.
Prereq: AGRON 181 or equivalent, AGRON 501, MATH 140, CHEM 163, BIOL 101; AGRON 502 and AGRON 503 recommended
Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management. Required course for the Master of Science in Agronomy degree program and Agronomy Graduate Certificate program.

AGRON 515: Integrated Crop and Livestock Production Systems
(Cross-listed with A B E, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AGRON 516: Crop Physiology
(3-0) Cr. 3. S.
Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.
AGRON 518: Microwave Remote Sensing
(Cross-listed with EE, MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.
*Prereq: Math 265*
Microwave remote sensing of Earth's surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.

AGRON 519: Herbicide Physiology and Biochemistry
(2-0) Cr. 2. Alt. S., offered even-numbered years.
*Prereq: AGRON 316 (or equivalent) and AGRON 317*
Herbicide mechanisms of action, selectivity, uptake, and translocation. Specific sites of herbicide action as they affect plant physiology. Herbicide resistance in weeds and crops. Implications of herbicides on weed management.

AGRON 520: Plant Breeding Methods
Cr. 3. S.
*Prereq: AGRON 506*
Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and clonal crops.

AGRON 521: Principles of Cultivar Development
(3-0) Cr. 3. F.
*Prereq: AGRON 421 and STAT 401*
Theoretical and practical exploration of breeding methods to develop clonal, pureline, inbred and hybrid cultivars. Principles and strategies to set breeding objectives, parental selection and germplasm management, population development, generation advancements, multiple trait selection, experimental designs in breeding programs; seed production and certification. Introduce tools available to a breeder.

AGRON 522: Field Methods in Plant Breeding
(0-6) Cr. 1-2. Alt. SS., offered odd-numbered years.
*Prereq: AGRON 521*
Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Offered on a satisfactory-fail basis only.

AGRON 523: Molecular Plant Breeding
(2-2) Cr. 3. S.
*Prereq: AGRON 421 or AGRON 521, GDCB 542A*
Plant breeding in the era of sequenced genomes and transformation. High throughput genomic technologies will be presented in relation to various applications in plant breeding.

AGRON 524: Applied Plant Molecular Genetics & Biotechnology
Cr. 3. F.
*Prereq: AGRON 506*
Basic principles and applied techniques used in the genetic improvement of crop plants. Discussion of structure and function of genes that control traits of value. Types of molecular markers, analysis of quantitatively inherited traits, genome mapping, analyses of databases.

AGRON 525: Crop and Soil Modeling
(3-0) Cr. 3. F.
*Prereq: MATH 165 or Math 181 or equivalent; AGRON 316 or Agron 354 or equivalent.*
Understanding basic crop physiology and soil processes through the use of mathematical and statistical approaches. Structure of crop models, dynamics and relationship among components such as leaf-level photosynthesis, canopy architecture, root dynamics and soil carbon and nitrogen pools.

AGRON 526: Field Plot Technique
(3-2) Cr. 4. S.
*Prereq: STAT 401*
Planning experiments for agricultural research, analysis of data, and concepts in data interpretation.

AGRON 528: Quantitative Genetics for Plant Breeding
(3-0) Cr. 3. S.
*Prereq: AGRON 506 or AGRON 513*
An introduction to the application of quantitative genetics to plant breeding programs.

AGRON 530: Ecologically Based Pest Management Strategies
(Cross-listed with ENT, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

AGRON 531: Crop Ecology and Management
(3-0) Cr. 3. F.
*Prereq: AGRON 501, AGRON 502, AGRON 503; AGRON 512 and AGRON 514 recommended*
Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints, and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.
AGRON 532: Soil Management  
(3-0) Cr. 3. F.  
Prereq: AGRON 501, AGRON 503, AGRON 512. Recommended AGRON 513  
Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

AGRON 533: Crop Protection  
(3-0) Cr. 3. F.S.S.  
Prereq: AGRON 514  
Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 534: Seed and Variety, Testing and Technology  
(Cross-listed with STB). (2-0) Cr. 2.  
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

AGRON 535: Introduction to the Seed Industry  
(Cross-listed with STB). Cr. 1.  
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities. Management tasks and roles will be analyzed and related to the public policy issues that shape the seed industry. Current issues in the seed industry including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility will be discussed.

AGRON 536: Quantitative Methods for Seed  
(Cross-listed with STB). (2-0) Cr. 2. F.  
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation, analysis of variance, and graphical representation of data. Use of spreadsheets and statistical software for manipulating, analyzing and presenting data.

AGRON 538: Seed Physiology and the Environment  
(Cross-listed with HORT). (2-0) Cr. 2. Alt. F., offered even-numbered years.  
Prereq: AGRON 316; CHEM 231 or CHEM 331  
Physiological aspects of seed development, maturation, longevity, dormancy, and germination of agronomic and horticultural crops and their interactions with field and storage environments. Emphasis on current literature and advanced methodology.

AGRON 539: Seed Conditioning and Storage  
(Cross-listed with STB). (2-0) Cr. 2.  
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal points within the overall operations of a seed company.

AGRON 541: Applied Agricultural Meteorology  
Cr. 2-3. F.S.SS.  
Prereq: AGRON 206 or upper division Biological Science  
Applied concepts in agricultural meteorology. Basic concepts of weather and of crop/climate relationships influencing production, protection, yield and associated production risk factors. Self study sections are available to resident and to distant education students all semesters. Credit for only one of Agron 503 or 541 may be applied toward graduation.

AGRON 544: Host-Pest Interactions  
Cr. 3. F.  
Prereq: AGRON 501  
Incorporation of the principles of integrated pest management and crop protection. Management systems (biological, cultural, chemical) and strategies which practice principles of weed science, plant pathology, and entomology. Enrollment is restricted to off-campus students in Agronomy MS in Plant Breeding.
AGRON 546: Strategies for Diversified Farming Systems  
(Cross-listed with HORT, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: SUSAG 509  
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

AGRON 547: Seed Production  
(Cross-listed with STB). (2-0) Cr. 2.  
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Survey of the differences in seed production strategies between crops and the impact of these differences on seed production.

AGRON 551: Growth and Development of Perennial Grasses  
(Cross-listed with HORT). (2-0) Cr. 2. Alt. S., offered even-numbered years.  
Prereq: Junior or senior or graduate classification or permission of instructor  
Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

AGRON 552: GIS for Geoscientists  
(Dual-listed with AGRON 452). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. F.S.  
Prereq: GEOL 100, GEOL 201 or equivalent  
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

AGRON 553: Soil-Plant Relationships  
(Cross-listed with ENSCI). (3-0) Cr. 3. S.  
Prereq: AGRON 354  
Composition and properties of soils in relation to the nutrition and growth of plants.

AGRON 554: Advanced Soil Management  
(2-0) Cr. 2. Alt. F., offered odd-numbered years.  
Prereq: AGRON 354; MATH 165  
Implications of soil management on the soil environment and root activity. Effect of soil physical properties on soil erosion.

AGRON 555: Environmental Soil Mineralogy  
(Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: AGRON 473, CHEM 178. Recommend: GEOL 311  
Structure and behavior of clay minerals, humic substances and biochar in soil environments, with emphasis on reactions and environmental implications.

AGRON 556: Agroecosystem Nutrient Cycles  
(3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: 3 credits in chemistry and 6 credits in biology; Recommended: ENSCI 382, ENSCI 553, or upper-level coursework in nutrient cycles  
Major, biologically important agroecosystem nutrient cycles as linked to energy (carbon) and water. Effects of agricultural production and management on cycling within systems and transfer among system at local, regional and global scales will be emphasized.

AGRON 558: Laboratory Methods in Soil Chemistry  
(Dual-listed with AGRON 459). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: AGRON 354 and CHEM 211  
Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

AGRON 559: Environmental Soil and Water Chemistry  
(Dual-listed with AGRON 459). (Cross-listed with ENSCI). (3-3) Cr. 4. F.  
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended  
An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 561: Population and Quantitative Genetics for Breeding  
(Cross-listed with AN S). (4-0) Cr. 4. F.  
Prereq: STAT 401  
Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.
AGRON 563: Soil Formation and Landscape Relationships  
(Dual-listed with AGRON 463). (Cross-listed with ENSCI). (3-0) Cr. 3. S.  
**Prereq:** AGRON 182 (or equivalent) or AGRON 260  
Relationships between soil formation, geomorphology, and environment.  
Soil description, classification, geography, mapping, and interpretation for  
land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON  
463I may be applied for graduation.

AGRON 563I: Soil Formation and Landscape Relationships  
(Dual-listed with AGRON 463I). (Cross-listed with ENSCI, IA LL). Cr. 2. Alt.  
SS., offered even-numbered years.  
**Prereq:** AGRON 182 (or equivalent)  
Relationships between soil formation, geomorphology, and environment.  
Soil description, classification, geography, mapping, and interpretation for  
land use. Credit for only Agron 563 or 563I may be applied for graduation.

AGRON 570: Risk Assessment for Food, Agriculture and Veterinary  
Medicine  
(Cross-listed with TOX, VDPAM). (3-0) Cr. 3. Alt. F., offered odd-numbered  
years.  
**Prereq:** Statistics 300-level or higher.  
Risk assessment principles as applied to biological systems. Exposure  
and effects characterization in human and animal health and ecological  
risk assessment. Risk analysis frameworks and regulatory decision-  
making. Introduction to quantitative methods for risk assessment using  
epidemiological and distributional analysis. Uncertainty analysis.

AGRON 575: Soil Formation and Transformation  
(Cross-listed with ENSCI). (3-0) Cr. 3. F.  
**Prereq:** AGRON 463 or equivalent  
Advanced study of soil formation, emphasizing relationships among soils,  
landscapes, environment, humans, and land use.

AGRON 577: Soil Physics  
(Dual-listed with AGRON 477). (Cross-listed with ENSCI). (3-0) Cr. 3. S.  
**Prereq:** AGRON 182 or equivalent and MATH 166 recommended  
The physical soil system: the soil components and their physical  
interactions; transport processes involving water, air, and heat.

AGRON 578: Laboratory Methods in Soil Physics  
(Cross-listed with ENSCI). (0-3) Cr. 1. S.  
**Prereq:** concurrent enrollment in AGRON 477 or AGRON 577  
Methods of measuring soil physical properties such as texture, density,  
and water content, and transport of heat, water, and gases.

AGRON 584: Organic Agricultural Theory and Practice  
(Dual-listed with AGRON 484). (Cross-listed with HORT, SUSAG). (3-0) Cr.  
3. Alt. S., offered odd-numbered years.  
**Prereq:** 9 cr. in biological or physical sciences  
Understanding of the historical origins and ecological theories  
underpinning the practices involved in organic agriculture.  
Interdisciplinary examination of crop and livestock production and socio-  
economic processes and policies in organic agriculture from researcher  
and producer perspectives.

AGRON 585: Soil and Environmental Microbiology  
(Dual-listed with AGRON 485). (Cross-listed with ENSCI, MICRO). (2-3) Cr.  
3. F.  
**Prereq:** AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended  
The living organisms in the soil and what they do. Emphasis on soil biota  
composition, the carbon cycle and bioremediation, soil-plant-microbial  
relationships, and environmental issues.

AGRON 588: GIS for Geoscientists II  
(Dual-listed with AGRON 488). (Cross-listed with ENSCI, GEOL). (2-2) Cr.  
3. Alt. S., offered even-numbered years.  
**Prereq:** GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM  
446, AE 408 or equivalent  
GIS course with focus on the spatial analysis and modeling of raster  
data and triangulated irregular network (TIN) data. Uses ArcGIS and  
various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene.  
Includes practical exercises during lectures, lab exercises, homework  
assignments, and (for GEOL 588) a class project.

AGRON 590: Special Topics  
Cr. arr. Repeatable.  
**Prereq:** 15 credits in agronomy  
Literature reviews and conferences on selected topics in crops, soils, or  
agricultural meteorology according to needs and interest of student.

AGRON 591: Agronomic Systems Analysis  
(3-0) Cr. 3. S.  
**Prereq:** AGRON 511, AGRON 513, AGRON 531, AGRON 532, AGRON 533  
Analysis of cropping systems from a problem-solving perspective. Case  
studies will be used to develop the students' ability to solve agronomic  
problems. Required course for the Master of Science in Agronomy degree  
program.
AGRON 592: Current Issues in Agronomy
(3-0) Cr. 3. F.S.
Prereq: AGRON 501, AGRON 503, AGRON 511, AGRON 512, AGRON 513, AGRON 514
Critical analysis and discussion of agricultural practices, programs, and policies of current interest to the field of agronomy. Leadership skill development through consideration of technical, social, and ethical components underlying controversial topics. Enhancement of communication proficiency through debate and writing in order to define problems, articulate possible solutions, and propose appropriate courses of action. Required course for the Master of Science in agronomy degree program.

AGRON 593: Workshop in Agronomy
Cr. arr. Repeatable.
Prereq: Graduate classification

AGRON 594: Agronomy MS Practicum
(1-0) Cr. 1. SS.
Prereq: AGRON 501, AGRON 502, AGRON 503, AGRON 514 (or current enrollment. Recommended: AGRON 511, AGRON 512, AGRON 513
Practical field and laboratory experiences integrating coursework in climatology, crops, and soils. Includes lectures, labs and local agribusiness tours.

AGRON 595: Seed Quality, Production, and Research Management
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager’s tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

AGRON 599: Creative Component
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599A: Agricultural Meteorology
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599B: Crop Production and Physiology
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599C: Plant Breeding
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599D: Soil Chemistry
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599E: Soil Fertility
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599F: Soil Management
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599G: Soil Microbiology and Biochemistry
Cr. arr.
Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.
AGRON 599H: Soil Morphology and Genesis
Cr. arr.
*Prereq: Nonthesis M.S. option only*
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599I: Soil Physics
Cr. arr.
*Prereq: Nonthesis M.S. option only*
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599K: Seed Science
Cr. arr.
*Prereq: Nonthesis M.S. option only*
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599L: Weed Science
Cr. arr.
*Prereq: Nonthesis M.S. option only*
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599M: Agronomy
Cr. arr.
*Prereq: Nonthesis M.S. option only*
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

Courses for graduate students:

AGRON 600: Seminar
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 600A: Seminar: Plant Breeding
(1-0) Cr. 1. Repeatable, maximum of 6 times. S.
Instruction and practice in giving scientific presentations related to the fields of plant breeding, genetics, or genomics, with an emphasis on effective communication and presentation techniques.

AGRON 600B: Seminar: Soils
(1-0) Cr. 1. Repeatable, maximum of 6 times. S.
Reports and discussion of recent literature and research.

AGRON 600C: Seminar: Crop Production and Physiology
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 601: Agronomic Science Presentations
(3-0) Cr. 2. S.
*Prereq: graduate status in agronomic science, permission of instructor.*
Experience in critical communications in exchange of ideas through oral and poster presentations and scientific questioning/evaluation.

AGRON 605: Boundary-Layer Meteorology
(Cross-listed with MTEOR). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
*Prereq: MTEOR 443 or equivalent-level course in engineering fluids*
Atmospheric boundary-layer structure and dynamics. Diurnal and seasonal variations, turbulent fluxes and turbulence kinetic energy. Measurements and empirical relations for wind and temperature near the ground. Numerical simulation and applications to wind energy.

AGRON 610: Foundations of Sustainable Agriculture
(Cross-listed with A B E, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F.
*Prereq: Graduate classification, permission of instructor*
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

AGRON 621: Advanced Plant Breeding
(3-0) Cr. 3. S.
*Prereq: AGRON 521, AGRON 526, AGRON 561, GEN 410*
Genetics of breeding populations, means of genotypes and breeding populations, mapping quantitative trait loci, variation in breeding populations, genetic design, genotype by environment interaction, selection in breeding populations, recurrent selection, marker-assisted selection, best linear unbiased prediction, genome-wide association studies, genomic selection, heterosis and hybrid prediction, and multiple traits.

AGRON 625: Genetic Strategies in Plant Breeding
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
*Prereq: AGRON 521 and GDCB 510*
Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.
AGRON 655: Advanced Soil Fertility
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: AGRON 553
Evaluation of soil fertility and fertilizers; theory and applications.

AGRON 677: Advanced Soil Physics
(2-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: AGRON 577 and MATH 266; COM S 207 recommended
The flow and distribution of water, chemicals, and heat in soils. Physical principles and applications.

AGRON 685: Advanced Soil Biochemistry
(Cross-listed with ENSCI, MICRO). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: AGRON 585
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

AGRON 696: Research Seminar
(Cross-listed with BBMB, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

AGRON 698: Agronomy Teaching Practicum
Cr. 1-2. Repeatable. F.S.S.
Prereq: Graduate classification in agronomy and permission of instructor
Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only.

AGRON 699: Research
Cr. arr. Repeatable.

AGRON 699A: Agricultural Meteorology
Cr. arr. Repeatable.

AGRON 699B: Crop Production and Physiology
Cr. arr. Repeatable.

AGRON 699C: Plant Breeding
Cr. arr. Repeatable.

AGRON 699D: Soil Chemistry
Cr. arr. Repeatable.

AGRON 699E: Soil Fertility
Cr. arr. Repeatable.

AGRON 699F: Soil Management
Cr. arr. Repeatable.

AGRON 699G: Soil Microbiology and Biochemistry
Cr. arr. Repeatable.

AGRON 699H: Soil Morphology and Genesis
Cr. arr. Repeatable.

AGRON 699I: Soil Physics
Cr. arr. Repeatable.

AGRON 699J: Plant Physiology
Cr. arr. Repeatable.

AGRON 699K: Seed Science
Cr. arr. Repeatable.

AGRON 699L: Weed Science
Cr. arr. Repeatable.

Animal Ecology

The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology major understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Four specific options prepare students for careers in interpretation of natural resources, fisheries and aquatic sciences, pre-veterinary and wildlife care, and wildlife. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university’s affiliate field stations: Rod and Connie French Conservation Camp in Montana, Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department’s Student Services Center.

Preveterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.
Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Students preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Criminal Justice Studies).

Curriculum in Animal Ecology

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications Proficiency (with a C or better):**

6 cr. of English composition

3 cr. of speech fundamentals

**Communication/Library 16 cr.**

* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) may be required at additional costs.

*** In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

* To complete degree program in four years students must maintain an average of 16 credits per semester.
** Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.

*** In scheduling coursework, students should pay attention to courses with limited offerings, (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course). It is critical that students take A ECL 371 fall semester of the junior year and A ECL 451 fall semester of the senior year.

Courses primarily for undergraduates:

A ECL 312: Ecology
(Cross-listed with BIOL, ENSCI). (3-3) Cr. 4. F.SS.
*Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L*
Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

A ECL 312I: Ecology
(Cross-listed with ENSCI, IA LL). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

A ECL 321: Fish Biology
(2-3) Cr. 3. S.
*Prereq: A ECL 365*
Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes.

A ECL 326I: Ornithology
(Cross-listed with IA LL). Cr. 2. SS.
The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

A ECL 333: Fisheries Techniques
(Cross-listed with NREM). (1-3) Cr. 2. F.
*Prereq: BIOL 212*
Introduction to techniques used in the collection and interpretation of fish population data in the field and in the lab. Course objectives include an understanding of population survey methodology and improving student critical thinking and teamwork skills. Laboratory focuses on field trips and hands-on sampling experience.

A ECL 365: Vertebrate Biology
(Cross-listed with BIOL). (3-2) Cr. 4. F.
*Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L*
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

A ECL 366: Natural History of Iowa Vertebrates
(2-3) Cr. 3. S.
*Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L*
Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region's ecological and economic health.

A ECL 371: Ecological Methods
(Cross-listed with BIOL). (2-3) Cr. 3. F.
*Prereq: A ECL 312; STAT 101 or STAT 104*
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

A ECL 401: Intro to Aquatic Animal Medicine
(Cross-listed with BM S). (1-2) Cr. 1. S.
8 week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

A ECL 404I: Behavioral Ecology
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered even-numbered years.
*Prereq: Two semesters of biology*
Animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

A ECL 415: Ecology of Freshwater Invertebrates, Plants, and Algae
(Dual-listed with A ECL 515). (2-3) Cr. 3. Alt. F. offered even-numbered years.
*Prereq: A ECL 312*
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.
A ECL 418: Stream Ecology
(Dual-listed with A ECL 518). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 419I: Vertebrate Ecology and Evolution
(Cross-listed with IA LL). Cr. 4. SS.
Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology.

A ECL 420I: Amphibians and Reptiles
(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Prereq: Two semesters of biology
Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.

A ECL 425: Aquatic Insects
(Dual-listed with A ECL 525). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312 or equivalent
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 440: Fishery Management
(Dual-listed with A ECL 540). (2-3) Cr. 3. F.
Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 442: Aquaculture
(Dual-listed with A ECL 542). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: BIOL 211 and BIOL 212.
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A ECL 451: Wildlife Ecology and Management
(2-3) Cr. 3. S.
Prereq: A ECL 371
Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods.

A ECL 454: Principles of Wildlife Disease
(Dual-listed with A ECL 554). (3-0) Cr. 3. S.
Prereq: Junior standing and at least 10 credits in biological sciences at the 300+ level
Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health.

A ECL 455: International Wildlife Issues
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A ECL 365, A ECL 312 or graduate standing; NREM 120
Biological, political, social, and economic factors affecting the management of international wildlife resources. Meets International Perspectives Requirement.

A ECL 457: Herpetology
(Cross-listed with BIOL). (2-0) Cr. 2. F.
Prereq: BIOL 351 or BIOL 365
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 457L: Herpetology Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. F.
Prereq: BIOL 351 or BIOL 365
Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 458: Ornithology
(Cross-listed with BIOL). (2-0) Cr. 2. S.
Prereq: A ECL 365 or BIOL 351
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.
A ECL 458L: Ornithology Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.
Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

A ECL 459: Mammalogy
(Cross-listed with BIOL). (2-0) Cr. 2. S.
Prereq: BIOL 351 or A ECL 365
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

A ECL 459L: Mammalogy Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.
Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

A ECL 471: Introductory Conservation Biology
(Cross-listed with BIOL). Cr. 3.
Prereq: BIOL 312
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 480: Studies in Marine Biology
Cr. 1-8. Repeatable. SS.
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A ECL 486: Aquatic Ecology
(Dual-listed with A ECL 586). (Cross-listed with BIOL, ENSCI). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

A ECL 486L: Aquatic Ecology Laboratory
(Dual-listed with A ECL 586L). (Cross-listed with BIOL, ENSCI). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

A ECL 489: Population Ecology
(Dual-listed with A ECL 589). (Cross-listed with BIOL). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

Courses primarily for graduate students, open to qualified undergraduates:

A ECL 515: Ecology of Freshwater Invertebrates, Plants, and Algae
(Dual-listed with A ECL 415). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A ECL 312
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 516: Avian Ecology
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A ECL 365, A ECL 312, or graduate standing
Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation.

A ECL 518: Stream Ecology
(Dual-listed with A ECL 418). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 520: Fisheries Science
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A ECL 312, A ECL 321
Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine.

A ECL 523I: Fish Ecology
(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.
A ECL 525: Aquatic Insects
(Dual-listed with A ECL 425). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312 or equivalent
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 526I: Advanced Field Ornithology
(Cross-listed with IA LL). Cr. 2. SS.
Prereq: Concurrent registration in IA LL 326I
Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

A ECL 531: Conservation Biology
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: BIOL 312; BIOL 313 or graduate standing
Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 531I: Conservation Biology
(Cross-listed with EEOB, IA LL). Cr. 4. Alt. SS., offered even-numbered years.
Prereq: IA LL 312I
Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

A ECL 535I: Restoration Ecology
(Cross-listed with EEOB, ENSCI, IA LL). Cr. 4. Alt. SS., offered even-numbered years.
Prereq: A course in ecology
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

A ECL 540: Fishery Management
(Dual-listed with A ECL 440). (2-3) Cr. 3. F.
Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.
A ECL 573I: Techniques for Biology Teaching: Insect Ecology
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573W: Techniques for Biology Teaching: Project WET
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 586: Aquatic Ecology
(Dual-listed with A ECL 486). (Cross-listed with EEOB, ENSCI). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

A ECL 586L: Aquatic Ecology Laboratory
(Dual-listed with A ECL 486L). (Cross-listed with EEOB, ENSCI). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

A ECL 589: Population Ecology
(Dual-listed with A ECL 489). (Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

A ECL 590: Graduate Independent Study
(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor

A ECL 590I: Special Topics: Graduate Independent Study
(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor

A ECL 599: Creative Component
Cr. arr.
Prereq: Nonthesis M.S. option only

A ECL 611: Analysis of Populations
(Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312; STAT 401; a course in calculus
Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

A ECL 698: Animal Ecology Teaching Practicum
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification in animal ecology and permission of instructor
Graduate student experience in the animal ecology teaching program. Offered on a satisfactory-fail basis only.

A ECL 699: Research
Cr. arr. Repeatable.

A ECL 699I: Research
(Cross-listed with ANTHR, EEOB, GDCB, IA LL). Cr. 1-4. Repeatable.

Animal Science

The Department of Animal Science Undergraduate Program intends for its graduates to be able to explain the symbiotic relationship of animals and humans, to contribute to the solution of complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding global community. Graduates of our program will be knowledgeable about sustainable animal production practices that also ensure animal health and well-being and stewardship of natural resources.

To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The overarching goals of the degree program are to provide a comprehensive animal science education in: science, animal management, and agri-business. Faculty in our program strive to create an environment for students to develop effective communication skills, develop skills that enable students to gather and integrate information to solve problems, become self-learners, become leaders and team builders, and to become aware of domestic and global issues driving changes in the animal industries. Learner outcomes for these goals, for each of our courses, and other information defining the program can be found at our web site: http://www.ans.iastate.edu/stud/ugrad/. Our program is designed to provide career skills appropriate to job market needs. Our faculty goals include providing superior academic advising to enable students to fulfill their objectives.

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science. A double major in animal and dairy science is not permitted. However, combining either the animal science or dairy science majors with other curricula is permitted. A limit of 6 credits each in Intercollegiate Judging (Animal Science 475).
or any independent study course (490 courses) can be applied toward a degree. A limit of 4 credits of Undergraduate Teaching Experience (Animal Science 497) can be applied toward a degree.

Within the animal science major, specialized options in animal products, companion animal management, equine management, livestock management, pre-professional studies, and pre-veterinary medicine are available. The department offers a minor in Animal Science and a minor in Meat Science. Both the animal science curricula and dairy science curricula allow complementary work toward admission to veterinary medical school and other professional schools, which may be done while satisfying requirements for the bachelor of science degree. A program that combines bachelor of science and master of science in animal science is offered. In addition, a program that combines a bachelor of science and master of business administration is offered.

The Department facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspectives

Approved International Perspectives course 3

U.S. Diversity

Approved U. S. Diversity course 3

Communications Proficiency (with a C or better)

English composition 6

Speech fundamentals 3

Total Credits 9

Communication/Library

ENGL 150 Critical Thinking and Communication 3

ENGL 250 Written, Oral, Visual, and Electronic Composition 3

LIB 160 Information Literacy 1

One course from the following: 3

SP CM 212 Fundamentals of Public Speaking

One course from the following: 3

AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences

AGEDS 327 Survey of Agriculture and Life Sciences Communication

COMST 214 Professional Communication

ENGL 302 Business Communication

ENGL 309 Proposal and Report Writing

ENGL 312 Biological Communication

ENGL 314 Technical Communication

Total Credits 13

Humanities and Social Sciences

Approved Humanities course 3

Approved Social Science course 3

Total Credits 6

Ethics

Approved Ethics course 3

Mathematical Sciences

One course from the following: 3-4

MATH 140 College Algebra

MATH 150 Discrete Mathematics for Business and Social Sciences

MATH 160 Survey of Calculus

MATH 165 Calculus I

MATH 181 Calculus and Mathematical Modeling for the Life Sciences

One course from the following: 3-4

STAT 101 Principles of Statistics

STAT 104 Introduction to Statistics

STAT 226 Introduction to Business Statistics I

Total Credits 6-8

Physical Sciences

A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Biological Sciences

BIOL 211 Principles of Biology I 3

BIOL 211L Principles of Biology Laboratory I 1

BIOL 212 Principles of Biology II 3

BIOL 212L Principles of Biology Laboratory II 1

BIOL 313 Principles of Genetics 3

or GEN 320 Genetics, Agriculture and Biotechnology

Total Credits 15-16

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science adviser.

Minor - Meat Science

The department offers a minor in Meat Science. The minor requires:

*Important Note:* This is only one of many equally-sound schedule sequences.

Free electives and specified group electives are chosen to complement the student's "specialized degree option" or other career interest. Lists of courses that satisfy group requirements are maintained in the Animal science advising offices. Degree options include: General Animal Science, Animal Products, Companion Animal Management, Equine Management, Livestock Management, Pre-Graduate Studies and Pre-Veterinary Medicine.

**Animal Science, B.S. - pre-veterinary medicine**

**Graduate Study**

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal science; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas.
Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCDB (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Courses primarily for undergraduates:

**AN S 101: Working with Animals**
(1-2) Cr. 2. F.S.
A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

**AN S 110: Orientation in Animal Science and ISU**
(2-0) Cr. 1. F.S.
Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

**AN S 114: Survey of the Animal Industry**
(2-0) Cr. 2. F.S.
Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

**AN S 116: Practicum in Safe Equine Handling and Welfare**
(0-3) Cr. 1. F.SS.
Development of best practices for safe horse handling and practical equine health care tasks. Course will focus on equine welfare and human safety as well as provide training in necessary every day skills needed to own a horse or to work at a horse farm. Certificate of Safe Equine Handling and Welfare available upon course completion. Offered on satisfactory-fail grading basis only. Offered on a satisfactory-fail basis only.

**AN S 190: Livestock Handling, Safety and Welfare**
Cr. 2.
Prereq: AN S 101
Understanding of animal perception to develop best care practices involved in handling of livestock species (beef, sheep, swine, dairy, equine, poultry). Intensive development of skills associated with handling and moving healthy and compromised livestock in respect to human and animal welfare. Integration of scientific and theoretical knowledge of biosecurity and animal-human interactions as it related to livestock handling and movement.

**AN S 199: Marketing and Management of Livestock Events**
(0-2) Cr. 1. Repeatable. F.S.
Prereq: Credit or enrollment in AN S 101 or AN S 114
Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

**AN S 199A: Marketing and Management of Livestock Events: Beef**
(0-2) Cr. 1. Repeatable. F.S.
Prereq: Credit or enrollment in AN S 101 or AN S 114
Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

**AN S 199E: Marketing and Management of Livestock Events: Horses**
(0-2) Cr. 1. Repeatable. F.S.
Prereq: Credit or enrollment in AN S 101 or AN S 114
Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

**AN S 207: The Art and Heritage of Livestock**
(3-0) Cr. 3.
Using art as a venue to understand the legacy and heritage of livestock production and livestock’s contribution to civilization and society; livestock’s contributions to warfare, social class, industry, economies, etc.; history of the impact of livestock on painting, poetry, music, sculpture, advertising, pop culture, movies, religion and sports in society.
AN S 210: Career Preparation in Animal Science
(0-2) Cr. 1. F.S.
Prereq: Sophomore classification in An S
Life skill development emphasized in the context of career preparation. Assist students with career goal clarification, interview skills, resume and cover letter preparation. Internship development, job shadowing, and exploration of career option.

AN S 211: Issues Facing Animal Science
(0-2) Cr. 1. F.S.
Prereq: AN S 114, sophomore classification
Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail basis only.

AN S 214: Domestic Animal Physiology
(3-0) Cr. 3. F.S.
Prereq: BIOL 212, CHEM 163 or CHEM 177
Introduction to anatomy and physiology of the muscular, renal, skeletal, neural, mammary, cardiovascular, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

AN S 214L: Domestic Animal Anatomy and Physiology Lab
(0-2) Cr. 1. F.S.
Basic anatomy of domestic animals.

AN S 216: Equine Science
(2-2) Cr. 3. F.S.
Prereq: AN S 101 or AN S 114; one course in biology
Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

AN S 217: Equine Farm Practicum
(1-2) Cr. 2. F.
Prereq: Credit or experience equivalent to AnS 116 and credit or concurrent enrollment in AN S 216.
Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, horse health care, weekly farm management, and related topics.

AN S 223: Poultry Science
(2-2) Cr. 3. F.
Prereq: AN S 101, AN S 114
Introduction to modern production trends with a focus on broiler, layer, and turkey industries. Topics covered include breeds, handling, management, physiology, nutrition, genetics, health & disease, and products. Weekly labs meet off campus.

AN S 224: Companion Animal Science
(2-2) Cr. 3. S.
Prereq: Course in biology
Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

AN S 225: Swine Science
(2-2) Cr. 3. F.S.
Prereq: AN S 101, AN S 114
Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle. Only AN S 280 and AN S 280L or AN S 225 may count toward graduation.

AN S 226: Beef Cattle Science
(2-2) Cr. 3. F.
Prereq: AN S 101, AN S 114
Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

AN S 229: Sheep Science
(2-2) Cr. 3. S.
Prereq: AN S 101, AN S 114
Introduction to principles, practices and decisions necessary when raising sheep through their production cycle.

AN S 235: Dairy Cattle Science
(2-2) Cr. 3. F.
Prereq: AN S 101, AN S 114
Introduction to principles, practices and decisions necessary when raising dairy cattle through the vertically integrated production cycle.

AN S 270: Foods of Animal Origin
(2-0) Cr. 2. F.S.SS.
Prereq: BIOL 212, CHEM 163 or CHEM 177
Principles, practices and issues impacting the production, processing and preservation of safe, wholesome, nutritious, and palatable meat, dairy, and egg products. Product evaluation, classification, value, and utilization.

AN S 270L: Foods of Animal Origin Laboratory
(0-2) Cr. 1. F.S.
Prereq: Credit or current enrollment in AN S 270
Determination of composition and quality of meat, eggs and milk based on industry and USDA standards. Fundamentals of processing foods of animal origin to add value, maintain quality and ensure safety.
AN S 280: Basic Swine Science  
(2-0) Cr. 2.  
Prereq: AN S 101 AN S 114  
Basic disciplines and concepts involved in swine production including;  
industry structure, trends and statistics; production phases and  
buildings; genetic improvement; reproduction; nutrition; health and  
biosecurity; nutrient management; marketing and meat quality and career  
opportunities in the swine industry. Only AN S 280 and AN S 280L or AN S  
225 may count toward graduation.

AN S 305: Livestock Evaluation  
(0-6) Cr. 3. F.  
Prereq: Junior classification; AN S 270L recommended  
Fall semester leads to 475A or D. Breeding animal and market animal  
evaluation of beef, swine and sheep using contemporary techniques and  
tools. Communication and decision-making skills are practiced in the  
context of making selection decisions.

AN S 306: Equine Evaluation  
(0-6) Cr. 3. F.  
Prereq: sophomore classification or permission of instructor  
Detailed visual evaluation of conformation and performance of the equine  
athlete. Decision-making skills are practiced in the context of making  
selection choices. Development of written and oral communication skills  
as students defend their judgments. Industry trends will be addressed.

AN S 313: Exercise Physiology of Animals  
(2-0) Cr. 2. F.S.  
Prereq: AN S 214, BIOL 211, one course in chemistry  
Physiological adaptations to athletic training in canine and equine  
athletes. Topics of emphasis include exercise-related adaptations in  
metabolism, locomotion, the cardiovascular system, musculoskeletal  
system, and endocrine system. The roles of nutrition and conditioning  
programs are assessed.

AN S 317: Fundamentals of Equine Behavior and Training  
(0-6) Cr. 1-3.  
Modifying the behavior of the horse using systematic approaches to  
horse training emphasizing the psychology of training horses. Equipment  
and its use and preparation of horses for competition. A maximum of 4  
credits of An S 317 may be applied toward graduation.

AN S 317A: Fundamentals of Equine Behavior and Training: Young Horses at Halter  
(0-6) Cr. 1. F.  
Modifying the behavior of the horse using systematic approaches to  
horse training emphasizing the psychology of training horses. Equipment  
and its use and preparation of horses for competition. A maximum of 4  
credits of An S 317 may be applied toward graduation.

AN S 317B: Fundamentals of Equine Behavior and Training: Yearlings  
(0-6) Cr. 3.  
Prereq: Permission of instructor  
Modifying the behavior of the horse using systematic approaches to  
horse training emphasizing the psychology of training horses. Equipment  
and its use and preparation of horses for competition. A maximum of 4  
credits of An S 317 may be applied toward graduation.

AN S 317C: Fundamentals of Equine Behavior and Training: Two-year olds and older  
(0-6) Cr. 3.  
Modifying the behavior of the horse using systematic approaches to  
horse training emphasizing the psychology of training horses. Equipment  
and its use and preparation of horses for competition. A maximum of 4  
credits of An S 317 may be applied toward graduation.

AN S 319: Animal Nutrition  
(3-0) Cr. 3. F.S.  
Prereq: AN S 214, course in organic chemistry or biochemistry  
Structure and function of organic and inorganic nutrients. Digestion,  
absorption, metabolism and utilization of nutrients for maintenance  
and productive functions. Essential nutritive requirements of domestic  
livestock, poultry, and companion animals. Sources of nutrients,  
application of energy systems and concepts, and regulation of feed  
intake in animals.

AN S 320: Animal Feeds and Feeding  
(2-2) Cr. 3. F.S.  
Prereq: AN S 319  
Composition, physical properties, and storage and processing of  
feedstuffs. Nutrient requirements of and diet formulation, and preparation  
systems for food and companion animal species at varying stages of  
age, activity or production. Manual and computer methodologies for diet  
formulation.

AN S 324: Food Processing for Companion Animals  
(3-0) Cr. 3. F.  
Prereq: AN S 319, Junior Classification  
Food processing and nutrition for carnivorous companion animals.  
Topics covered include meat processing and meat preservation for  
companion animal diets, regulatory standards, cutting edge technologies  
for processing meat for companion animals, dietary needs of carnivorous  
companion animals, effect of different processing methods on safety and  
nutrient bioavailability.
**AN S 331: Domestic Animal Reproduction**  
(3-0) Cr. 3. F.S.  
*Prereq: AN S 214 or BIOL 255 256 or BIOL 335 or B M S 329*  
Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes.

**AN S 332: Laboratory Methods in Animal Reproduction**  
(0-2) Cr. 1. F.S.  
*Prereq: Credit or enrollment in AN S 331*  
Reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of semen collection and artificial insemination; pregnancy testing.

**AN S 332A: Laboratory Methods in Animal Reproduction: Livestock, Companion, and Laboratory Animals**  
(0-2) Cr. 1. F.S.  
*Prereq: Credit or enrollment in AN S 331*  
Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of semen collection and artificial insemination; pregnancy testing.

**AN S 332E: Laboratory Methods in Animal Reproduction: Equine**  
(0-2) Cr. 1. S.  
*Prereq: Credit or enrollment in AN S 331*  
Reproductive anatomy with emphasis on the physiology of normal reproductive function; breeding season management; ways to control and improve reproduction; semen collection, evaluation, and processing; artificial insemination; pregnancy testing; parturition in the mare, foal care.

**AN S 333: Embryo Transfer and Related Technologies**  
(3-0) Cr. 3. F.  
*Prereq: AN S 331 or AN S 332*  
Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer.

**AN S 334: Embryo Transfer Laboratory**  
(0-3) Cr. 1. F.  
*Prereq: Credit or concurrent enrollment in AN S 333; or AN S 332; permission of instructor*  
Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, embryo sexing, rectal palpation, and ultrasonography will be demonstrated and/or performed.

**AN S 335: Dairy Cattle Evaluation**  
(0-6) Cr. 3. S.  
*Prereq: Sophomore classification*  
Evaluation of breeding dairy replacement animals and lactating for dairy cows. Emphasis placed on familiarity with anatomical terms/structures, the use of comparative terminology, decision-making skills, and presentation of oral reasons. Trips to dairy cattle farms. Livestock handling. (Introduction and skills development course for AN S 475B.).

**AN S 336: Domestic Animal Behavior and Well-Being**  
(2-2) Cr. 3. F.  
*Prereq: One course in physiology*  
Principles of behavior relative to animal care, management and environmental design to ensure animal well-being. Examination of basic neural-endocrine mechanisms involved in the animal’s response to its environment. Awareness of animal protection, law and legislation. Methods to objectively assess animal well-being.

**AN S 337: Lactation**  
(3-0) Cr. 3. S.  
*Prereq: AN S 214*  

**AN S 345: Growth and Development of Domestic Animals**  
(3-0) Cr. 3. S.  
*Prereq: AN S 214; BIOL 313 or GEN 320*  
Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.
AN S 352: Genetic Improvement of Domestic Animals
(2-2) Cr. 3. F.S.
Prereq: One course in statistics, BIOL 211, course in genetics
Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation.

AN S 360: Fresh Meats
(3-0) Cr. 3. F.
Prereq: AN S 270; a course in organic or biochemistry
Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat.

AN S 382: Swine Environment Management
(1-0) Cr. 1.
Prereq: AN S 225 or 280 and 280L. Recommended TSM 210.
Response of swine to thermal environment, ventilation system design and analysis, heating and cooling systems, and examples of various designs for all phases of production. Troubleshooting ventilation systems and energy analysis of production units.

AN S 383: Swine Manure and Nutrient Management
(1-0) Cr. 1.
Prereq: An S 225 or An S 280 and An S 280L.
Function, application, and advantages and disadvantages of nutrient management systems. Manure production rates, manure handling systems, storage and manure management planning for land application and odor mitigation strategies.

AN S 384: Swine Health and Biosecurity
(1-0) Cr. 1.
Prereq: AN S 225 or AN S 280 and AN S 280L. Recommended a course in microbiology.
Overview of standard biosecurity protocols and identification of behavior and clinical signs of illness in pigs. Treatment administration and prevention methods. Introduction to immune system function and basic swine disease transmission.

AN S 399: Animal Science Internship
Cr. arr. Repeatable. F.S.SS.

AN S 399A: Animal Science Internship: Graded Internship Experience
Cr. 2-6. Repeatable. F.S.SS.
Prereq: Permission of the instructor
Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component.

AN S 399B: Animal Science Internship: Supervised Internship Experience
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of the instructor
Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component. This course is designed for those students who are completing a semester long internship located off campus.

AN S 411: Addressing Issues in Animal Science
(0-2) Cr. 1. F.S.
Prereq: Senior classification in An S
Life skill development emphasized in the context of exploring one's perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected.

AN S 415: Equine Systems Management
(2-2) Cr. 3. F.S.
Prereq: AN S 216, AN S 319, AN S 320, AN S 331
Identification and development of financial and production goals in a horse business. Scientific approach to make decisions in management of enterprises in the horse industry.

AN S 419: Advanced Animal Nutrition
(2-0) Cr. 2. F.
Prereq: AN S 214, AN S 319
Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition.

AN S 424: Companion Animal Systems Management
(2-2) Cr. 3. S.
Prereq: AN S 224, AN S 319, AN S 320, AN S 331, AN S 352
Decisions facing the administrator of a companion animal enterprise. Financial and business goal identification, problem clarification, and resource allocation to manage the companion animal system.

AN S 425: Swine Systems Management
(2-2) Cr. 3. F.
Prereq: AN S 225, AN S 270, AN S 270L, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended
Decisions facing the administrator of a swine enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the swine enterprise.
AN S 426: Beef Feedlot Systems Management
(2-2) Cr. 3. S.
Prereq: AN S 226, AN S 270, AN S 270L, AN S 320; recommended: ECON 230 or equivalent
Decisions facing the administrator of a feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise.

AN S 429: Sheep Systems Management
(2-2) Cr. 3. S.
Prereq: AN S 229, AN S 319, AN S 320, AN S 331, AN S 352; AGRON 334 recommended; ECON 230 or equivalent recommended
Decisions facing the administrator of a sheep enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the sheep enterprise.

AN S 434: Dairy Systems Management
(3-0) Cr. 3. F.
Prereq: AN S 235, AN S 319, AN S 331, AN S 320, AN S 337, AN S 352; ECON 230 or equivalent recommended
The scientific foundation of dairy cattle management. The impact of dairy farm management practices on the biological processes of the cow. Integrates concepts from the disciplines of lactation, reproduction, nutrition, genetics, and animal health.

AN S 435: Applied Dairy Farm Evaluation
(2-2) Cr. 3. S.
Prereq: AN S 434; ECON 230
Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications.

AN S 441: International Animal Agriculture
(Cross-listed with GLOBE). (3-0) Cr. 3. S.
Prereq: Two courses from AN S 223, AN S 225, AN S 226, AN S 229, AN S 235
An overview of animal agriculture with emphasis in developing countries. Historical, economic, environmental, and political considerations will be assessed and evaluated. Issues related to gender, resilience and sustainability for different production systems including alternative livestock species, will be investigated. The role of animal source foods in attainment of global food security will be discussed. Meets International Perspectives Requirement.

AN S 460: Processed Meats
(Dual-listed with AN S 560). (2-2) Cr. 3. S.
Prereq: AN S 270
Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 475: Intercollegiate Judging Training and Competition
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475A: Intercollegiate Judging Training and Competition: Meat Animals
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock. Maximum of 6 credits may be applied toward graduation.

AN S 475B: Intercollegiate Judging Training and Competition: Dairy Cattle
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of dairy cattle, in particular heifers and lactating dairy cows. Development and advancement of decision-making skills, comparative techniques, and presentation of oral reasons. Maximum of 6 credits may be applied toward graduation.

AN S 475C: Intercollegiate Judging Training and Competition: Meats
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock/meat products. Maximum of 6 credits may be applied toward graduation.

AN S 475D: Intercollegiate Judging Training and Competition: Meat Animal Evaluation
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.
AN S 475E: Intercollegiate Judging Training and Competition: Horses
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation of horses. Emphasis placed on familiarly with anatomical terms/structures, the use of comparative terminology, and decision making skills. Maximum of 6 credits may be applied toward graduation.

AN S 475F: Intercollegiate Judging Training and Competition: Management Systems
(0-4) Cr. 1-2. Repeatable. F.S.
Prereq: permission of instructor
Specialized training in evaluation of livestock/domesticated animal production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 480: Animal Industry Leadership Fellows
Cr. 1. Repeatable. F.S.
Prereq: A. AN S 226; permission of instructor C. AN S 225; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480A: Animal Industry Leadership Fellows: Beef
Cr. 1. Repeatable. F.S.
Prereq: AN S 226; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480C: Animal Industry Leadership Fellows: Pork
Cr. 1. Repeatable. F.S.
Prereq: AN S 225; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480G: Animal Industry Leadership Fellows: Poultry
Cr. 1. Repeatable. F.S.
Prereq: AN S 223; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. Central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 489: Issues in Food Safety
(Cross-listed with FS HN, HSP M, VDPAM). (1-0) Cr. 1. S.
Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HSP M 233; FS HN 419 or FS HN 420; FS HN 403
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

AN S 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490A: Independent Study: Animal Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490B: Independent Study: Dairy Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490C: Independent Study: Meat Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.
AN S 490D: Independent Study: Companion Animal Science  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of the instructor  
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490E: Independent Study: Equine Science  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of the instructor  
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490G: Independent Study: Poultry Science  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of the instructor  
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490H: Independent Study: Honors  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of the instructor  
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490I: Independent Study: Entrepreneurship  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of the instructor  
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 493: Workshop in Animal Science  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry.

AN S 495: Agricultural Travel Course Preparation  
Cr. R. Repeatable. F.S.  
Prereq: Permission of instructor  
Limited enrollment. Students enrolled in this course will also register for Agron 495 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

AN S 496: Agricultural Travel Course  
Cr. arr. Repeatable.  
Prereq: Permission of instructor, 30 college credits  
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

AN S 496A: Agricultural Travel Course: International Tour  
Cr. arr. Repeatable.  
Prereq: Permission of instructor, 30 college credits  
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students. Meets International Perspectives Requirement.

AN S 496B: Agricultural Travel Course: Domestic tour  
Cr. arr. Repeatable.  
Prereq: Permission of instructor, 30 college credits  
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.
AN S 497: Undergraduate Teaching Experiences in Animal Science
Cr. 1-2. Repeatable, maximum of 4 credits. F.S.S.
Prereq: Permission of instructor
Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

AN S 500: Computer Techniques for Biological Research
(2-0) Cr. 1. F.
Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 500A: Computer Techniques for Biological Research: UNIX and SAS
(2-0) Cr. 1. F.
First half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 500B: Computer Techniques for Biological Research: Problem solving using matrix algebra
(2-0) Cr. 1. F.
Second half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 501: Survey of Animal Disciplines
(1-0) Cr. 1. F.
Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Offered on a satisfactory-fail basis only.

AN S 503: Seminar in Animal Production
(1-0) Cr. 1. Repeatable. F.
Prereq: Permission of instructor
Discussion and evaluation of current topics in animal production and management.

AN S 515: Integrated Crop and Livestock Production Systems
(Cross-listed with A B E, AGRON, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AN S 517: Gut Microbiome: Implications for Health and Diseases
(Cross-listed with FS HN, MICRO, V MPM). Cr. 3.
Prereq: Basic knowledge in microbiology
Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health.

AN S 518: Digestive Physiology and Metabolism of Non Ruminants
(Cross-listed with NUTRS). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: AN S 419 or NUTRS 501
Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

AN S 520: Digestive Physiology and Metabolism of Ruminants
(Cross-listed with NUTRS). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: AN S 419 or NUTRS 501
Digestive physiology and nutrient metabolism in ruminant and preruminant animals.

AN S 533: Physiology and Endocrinology of Animal Reproduction
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: General physiology course
Development of structure and function of the reproductive system. Physiologic and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, maternal recognition, fertilization and early embryonic development.

AN S 536: Perinatology
(2-0) Cr. 2. S.
Prereq: One course in physiology; one course in biochemistry
Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.
AN S 537: Topics in Animal Behavior, Welfare
(3-0) Cr. 3.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537A: Topics in Animal Behavior, Welfare: Animal Behavior
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537C: Topics in Animal Behavior, Welfare: Animal Welfare
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537D: Topics in Animal Behavior, Welfare: Immune and Stress
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester, the students’ focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 540: Livestock Immunogenetics
(Cross-listed with MICRO, V MPM). (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

AN S 549: Advanced Vertebrate Physiology I
(Cross-listed with KIN, NUTRS). (4-0) Cr. 4. F.
Prereq: recommended: an undergraduate physiology course and a biochemistry course
Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

AN S 552: Advanced Vertebrate Physiology II
(Cross-listed with KIN, NUTRS). (3-0) Cr. 3. S.
Prereq: BIOL 335; credit or enrollment in BBMB 404 or BBMB 420 Cardiovascular, renal, respiratory, and digestive physiology.

AN S 556: Current Topics in Genome Analysis
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: BBMB 405 or GDCB 510
Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes.

AN S 560: Processed Meats
(Dual-listed with AN S 460). (2-2) Cr. 3. S.
Prereq: AN S 270
Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 561: Population and Quantitative Genetics for Breeding
(Cross-listed with AGRON). (4-0) Cr. 4. F.
Prereq: STAT 401
Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.
AN S 562: Methodologies for Population/Quantitative Genetics
(2-0) Cr. 2. S.
Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562A: Methodologies for Population/Quantitative Genetics: Linear Models and Genetic Prediction
(2-0) Cr. 2. S.
Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562B: Methodologies for Population/Quantitative Genetics: Advanced Genetic Prediction & Parameter Estimation
(2-0) Cr. 2. S.
Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 570: Advanced Meat Science and Applied Muscle Biology
(2-2) Cr. 3. S.
Prereq: AN S 460
Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. Oral research reports and a research proposal.

AN S 571: Advanced Meat Processing Principles and Technology
(2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: AN S 460 or AN S 570
Physical/chemical relationships during processing. Effects of modern technology, non-meat additives and preservation techniques on quality and safety of processed meat. Laboratory demonstration of principles and technology.

AN S 590: Special Topics
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590A: Special Topics: Animal Breeding
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590B: Special Topics: Animal Nutrition
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590C: Special Topics: Meat Animal Production
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590D: Special Topics: Dairy Production
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590E: Special Topics: Meat Science
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590F: Special Topics: Physiology of Reproduction
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590G: Special Topics: Muscle Biology
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.
AN S 590H: Special Topics: Poultry Nutrition
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590I: Special Topics: Poultry Products
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590J: Special Topics: Experimental Surgery
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590K: Special Topics: Professional Topics
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590L: Special Topics: Teaching
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590M: Special Topics: Molecular Biology
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590N: Special Topics: Ethology
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 599A: Creative Component: Animal Breeding and Genetics
Cr. 1-8. F.S.SS.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599B: Creative Component: Animal Nutrition
Cr. 1-8. F.S.SS.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599C: Creative Component: Animal Physiology
Cr. 1-8. F.S.SS.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599D: Creative Component: Animal Science
Cr. 1-8. F.S.SS.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599E: Creative Component: Meat Science
Cr. 1-8. F.S.SS.
Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for graduate students:

AN S 603: Seminar in Animal Nutrition
(1-0) Cr. 1. Repeatable. F.S.
Prereq: Permission of instructor
Discussion of current literature; preparation and submission of abstracts.

AN S 618: Vitamins and Minerals
Cross-listed with NUTRS). Cr. 2. Alt. S., offered even-numbered years.
Prereq: Biochemistry, physiology, basic nutrition
Understanding molecular aspects of vitamin and mineral metabolism and homeostasis in humans and animals. An in-depth examination of the chemistry of vitamins and minerals, including genetic mutations, proteins involved in absorption and excretion, and their necessity in biological processes.
AN S 619: Advanced Nutrition and Metabolism - Protein
(Cross-listed with NUTRS). (2-0) Cr. 2. F.
Prereq: BBMB 405
Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.

AN S 620: Advanced Nutrition and Metabolism - Energy
(Cross-listed with NUTRS). (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: BBMB 405
Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research.

AN S 633: Seminar in Animal Reproduction
(1-0) Cr. 1. Repeatable. F.
Prereq: Permission of instructor
Discussion of current literature and preparation of reports and seminars on selected topics concerning animal physiology.

AN S 652: Animal Breeding Strategies
(2-0) Cr. 2.
Prereq: AN S 561
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652A: Animal Breeding Strategies: Breeding Goals and Response to Selection
(2-0) Cr. 2.
Prereq: AN S 561
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652B: Animal Breeding Strategies: Design and Evaluation of Animal Breeding Programs
(2-0) Cr. 2.
Prereq: AN S 561
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 653: Applied Animal Breeding Strategies
(2-0) Cr. 2. F.
Prereq: AN S 561 recommended
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

AN S 653A: Applied Animal Breeding Strategies: Swine and Poultry
(2-0) Cr. 2. F.
Prereq: AN S 561 recommended
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

AN S 653B: Applied Animal Breeding Strategies: Beef and Dairy
(2-0) Cr. 2. F.
Prereq: AN S 561 recommended
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

AN S 655: Advanced Computational Methods in Animal Breeding and Genetics
(3-1) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: AN S 500, AN S 562, Com S 207
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.
AN S 655A: Computational Strategies for Predicting Breeding Values
(3-1) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: AN S 500, AN S 562, COM S 207
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs.

AN S 655B: Computational Strategies for Genetic Parameter Estimation
(3-1) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: AN S 500, AN S 562, COM S 207
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 656: Statistical Methods for Mapping Quantitative Trait Loci
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: AN S 562, STAT 447
Statistical methods for mapping quantitative trait loci in out-bred populations. Methods based on modeling covariances between relatives. Likelihood based methods using half-sib and full-sib families and extended pedigrees. Bayesian methods applied.

AN S 658: Seminar in Animal Breeding and Genetics
(1-0) Cr. 1. Repeatable. F.S.
Presentation of current research related to animal breeding and genetics.

AN S 670: Molecular Biology of Muscle
(Cross-listed with KIN). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Alt. S., offered odd-numbered years.
Prereq: BBMB 405, BBMB 420
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

AN S 684: Seminar in Meat Science
(1-0) Cr. 1. Repeatable. S.
Prereq: Permission of instructor
Discussion and evaluation of current topics in research publications in meat science.

AN S 685: Seminar in Muscle Biology
(1-0) Cr. 1. Repeatable. S.
Prereq: Permission of instructor
Reports and discussion of recent literature and current investigations.

AN S 695: Seminar in Animal Science
(1-0) Cr. 1. Repeatable. S.
Reports and discussion of current issues and research in animal science. One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Offered on a satisfactory-fail basis only.

AN S 699: Research
Cr. arr. Repeatable.
AN S 699A: Research: Animal Breeding
Cr. arr. Repeatable.
AN S 699B: Research: Animal Nutrition
Cr. arr. Repeatable.
AN S 699C: Research: Meat Animal Production
Cr. arr. Repeatable.
AN S 699D: Research: Dairy Production
Cr. arr. Repeatable.
AN S 699E: Research: Meat Science
Cr. arr. Repeatable.
AN S 699F: Research: Physiology of Reproduction
Cr. arr. Repeatable.
AN S 699G: Research: Muscle Biology
Cr. arr. Repeatable.
AN S 699H: Research: Poultry Nutrition
Cr. arr. Repeatable.
AN S 699I: Research: Poultry Products
Cr. arr. Repeatable.
AN S 699J: Research: Animal Ethology
Cr. arr. Repeatable.

Biology
Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation’s leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology
jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

**Customizing a degree**

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology. The major’s curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student’s career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

- **Pre-medical and Human Health Professions**—This area emphasizes preparation for further study in medical school or allied health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

- **Pre-veterinary**—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

- **Molecular and Cellular Biology**—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

- **Ecology and Conservation Biology**—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth’s biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

- **Evolution and Biodiversity**—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

**Other opportunities**

- **Teacher licensure**—Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

- **Undergraduate research**—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government
laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience--Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations
In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major.

Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory--The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations--Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies--Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Undergraduate Study
Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Principles of Biology I</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 211L</td>
<td>Principles of Biology Laboratory I</td>
<td>1</td>
</tr>
<tr>
<td>BIOL 212</td>
<td>Principles of Biology II</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 212L</td>
<td>Principles of Biology Laboratory II</td>
<td>1</td>
</tr>
</tbody>
</table>

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of advanced biological science courses at the 300 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 211/L and BIOL212/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9 credits must be taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program's website has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements
Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that
college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements—Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212. (Students in the College of Agriculture and Life Sciences are required to earn a C or better in ENGL 150, as well.)

Minor
A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology and includes the completion of the specific courses listed below and 7 credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must apply only to the minor. For more information, see the Biology Program web site or contact the Student Services Office in 103 Bessey Hall.

Total Credits: 8

Graduate Study
Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Curriculum in Biology
Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.
All graded courses minimum C; 2.00 GPA average required.

Mathematical Sciences 7 cr.
Students in College of Agriculture and Life Sciences must have a Math and Statistics.

MATH 160 or 165 and STAT 101 or 104
Or
### MATH 165 & MATH 166
Calculus I and Calculus II

Or

STAT 101 or 104 and STAT 301

### Physical Sciences
General Chemistry: 5 cr. minimum

- **CHEM 163**
  - College Chemistry
  - **& 163L**
    - and Laboratory in College Chemistry
    - **5**

Or

- **CHEM 177**
  - General Chemistry I
  - **& 177L**
    - and Laboratory in General Chemistry I
    - **5**

- **CHEM 178**
  - General Chemistry II
  - **& 178L**
    - and Laboratory in General Chemistry II
    - **4**

Organic Chemistry: 4 cr. minimum

- **CHEM 231**
  - Elementary Organic Chemistry
  - **& 231L**
    - and Laboratory in Elementary Organic Chemistry
    - **4**

Or

- **CHEM 331**
  - Organic Chemistry I
  - **& 331L**
    - and Laboratory in Organic Chemistry I
    - **4**

Biochemistry: 3 cr.

- **BBMB 316**
  - Principles of Biochemistry
  - **3**

Or

- **BBMB 404**
  - Biochemistry I
  - **3**

- **BBMB 420**
  - Mammalian Biochemistry
  - **3**

Physics: 5 cr. minimum

- **PHYS 115**
  - Physics for the Life Sciences
  - **& 115L**
    - and Laboratory in Physics for the Life Sciences
    - **5**

Or

- **PHYS 111**
  - General Physics
  - **& PHYS 112**
    - and General Physics
    - **10**

### Humanities and Social Sciences
Chosen from approved lists.

### LAS - Biology
Note: Students must have completed 3 years of a single world language or take 4-8 credits of university level world language.

- **Humanities**
  - **12**

- **Social Sciences**
  - **9**

- **Total Credits**
  - **21**

### Humanities and Social Sciences
Chosen from approved lists.

### CALS - Biology
Note: Students in CALS - Biology must take an approved speech course and an approved Math and Statistics course.

- **Humanities**
  - **3**

- **Social Sciences**
  - **3**

- **Ethics**
  - **3**

- **Total Credits**
  - **9**

* Students should meet with a Biology Program Adviser to determine the proper plans for chemistry, math and physics before selecting those options above.

Students must have 120 credits minimum to graduate students are required to take 21 credits in advanced biology of which 9 credits must be from the Biology Program (BIOL), and 2 advanced BIOL courses must have a lab or field component.

Courses primarily for undergraduates:

BIOL 101: Introductory Biology
(3-0) Cr. 3. F.S.SS.
Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

BIOL 110: Introduction to Biology
Cr. 1. F.
Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

BIOL 111: Opportunities in Biology
(1-0) Cr. 0.5. S.
Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Offered on a satisfactory-fail basis only.

BIOL 112: Transfer Student Orientation
Cr. R. F.S.
Orientation to opportunities in Biology. Review of degree requirements and other information. Intended for students transferring from other academic institutions. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

BIOL 155: Human Biology
(3-0) Cr. 3. F.S.
A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173: Environmental Biology
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 201: Introduction to Environmental Issues
(Cross-listed with ENSCI, ENV S). (2-0) Cr. 2. F.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

BIOL 204: Biodiversity
(Cross-listed with ENV S). (4-0) Cr. 2. S.
Prereq: One course in life sciences
Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course.

BIOL 211: Principles of Biology I
(3-0) Cr. 3. F.S.
Prereq: High school biology
Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L: Principles of Biology Laboratory I
(0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in BIOL 211
Laboratory to accompany 211.

BIOL 212: Principles of Biology II
(3-0) Cr. 3. F.S.
Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177
Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.
BIOL 212L: Principles of Biology Laboratory II  
(0-3) Cr. 1. F.S.  
Prereq: credit or enrollment in BIOL 212  
Laboratory to accompany 212.

BIOL 251: Biological Processes in the Environment  
(Cross-listed with ENSCI). (3-0) Cr. 3. S.  
Prerequisites of Biology from the level of macromolecules to the biosphere.  
Biological processes that affect environmental systems: including  
metabolism, energy pathways, biochemical reactions in cells, plant and  
microbial structure and function, element and water cycles.

BIOL 255: Fundamentals of Human Anatomy  
(3-0) Cr. 3. F.  
Prereq: High School Biology and Chemistry, or BIOL 101  
An introduction to human anatomy, beginning with cells and tissues,  
surveying all body systems, relating form to function. Systems covered  
include: integumentary, bones and joints, muscles, nervous, sensory,  
endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and  
reproductive. Pre-Medical students should consider Biol 351 for their  
anatomy background. Does not satisfy biology major requirements.

BIOL 255L: Fundamentals of Human Anatomy Laboratory  
(0-3) Cr. 1. F.  
Prereq: Credit or enrollment in BIOL 255  
Investigation of human anatomy using models and dissections of  
preserved organs and model mammals. Pre-Medical students should  
consider 351 for their anatomy background. Does not satisfy biology  
major requirements.

BIOL 256: Fundamentals of Human Physiology  
(3-0) Cr. 3. S.  
Prereq: High School Biology and Chemistry, or BIOL 101, or BIOL 255  
(recommended)  
An introduction to human physiology, studying the function of all  
body systems. Systems covered include: integumentary, bones and joints,  
muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune,  
respiratory, digestive, urinary, and reproductive. Pre-Medical students  
should consider 335 for their physiology background. Does not satisfy  
biology major requirements.

BIOL 256L: Fundamentals of Human Physiology Laboratory  
(0-3) Cr. 1. S.  
Prereq: Credit or enrollment in BIOL 256  
Student-conducted experiments investigating concepts of human  
physiology with computer data acquisition and analysis. Interpretation  
of experimental results and preparation of lab reports. Pre-Medical students  
should consider 335 for their anatomy and physiology background. Does  
not satisfy biology major requirements.

BIOL 307: Women in Science and Engineering  
(Cross-listed with WGS). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: 200 level course in science, engineering or women’s studies; ENGL  
250  
The interrelationships of women and science and engineering examined  
from historical, sociological, philosophical, and biological perspectives.  
Factors contributing to under-representation; feminist critiques of  
science; examination of successful strategies. Does not satisfy biology  
major advanced credit requirements.  
Meets U.S. Diversity Requirement

BIOL 312: Ecology  
(Cross-listed with A ECL, ENSCI). (3-3) Cr. 4. F.SS.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
Fundamental concepts and principles of ecology dealing with organisms,  
populations, communities, and ecosystems. Laboratory and field  
exercises examine ecological principles and methods as well as illustrate  
habitats.

BIOL 313: Principles of Genetics  
(Cross-listed with GEN). (3-0) Cr. 3. F.S. SS.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
Introduction to the principles of transmission and molecular genetics of  
plants, animals, and bacteria. Recombination, structure and replication  
of DNA, gene expression, cloning, quantitative genetics, and population  
genetics. Students may receive graduation credit for no more than one  
of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L,  
and Agron 320.

BIOL 313L: Genetics Laboratory  
(Cross-listed with GEN). (0-3) Cr. 1. F.S.  
Prereq: Credit or enrollment in BIOL 313  
Laboratory to accompany 313. Students may receive graduation credit  
for no more than one of the following: Biol 313 and 313L, Gen 320, Gen  
313, Gen 320, and Agron 320.

BIOL 314: Principles of Molecular Cell Biology  
(3-0) Cr. 3. F.S.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L  
Integration of elementary principles of metabolism, bioenergetics, cell  
structure, and cell function to develop a molecular view of how the cell  
works.

BIOL 315: Biological Evolution  
(3-0) Cr. 3. F.S.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L  
The mechanisms of evolution. Topics in microevolution: population  
genetics, natural selection, genetic variation, and adaptation.  
Macroevolution: speciation, extinction, phylogeny, and major evolutionary  
patterns.
BIOL 322: Introduction to Bioinformatics and Computational Biology
(Cross-listed with BCBIO, GEN). (3-0) Cr. 3. F.
Prereq: BIOL 212
Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

BIOL 328: Molecular and Cellular Biology of Human Diseases
Cr. 3. F.
Prereq: BIOL 212
Survey of molecular, genetic, and cellular aspects of human diseases. Fundamental concepts of cell biology and how they are linked to the pathologies of different classes of human diseases. Recent scientific advances with an emphasis on new methods of diagnosis and treatment.

BIOL 335: Principles of Human and Other Animal Physiology
(3-0) Cr. 3. S.
Prereq: BIOL 211, BIOL 212
Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached from an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of organismal physiology, energy and water balances, physiology of rest exercise, and environmental stress.

BIOL 335L: Principles of Human and Other Animal Physiology Laboratory
(0-3) Cr. 1. S.
Optional laboratory to accompany Biology 335. Student-conducted experiments investigating concepts of physiology.

BIOL 336: Ecological and Evolutionary Animal Physiology
Cr. 3.
Prereq: BIOL 211, BIOL 212
Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.

BIOL 344: Human Reproduction
(Cross-listed with WGS). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: BIOL 212
Biology of human reproduction, including reproductive systems, hormones, and endocrinology of pregnancy, presented from a clinically-oriented perspective. Reviews health-related conditions such as infertility, sexually-transmitted diseases, and complicated pregnancy.

BIOL 349: The Genome Perspective in Biology
(Cross-listed with GEN). (2-2) Cr. 3. S.
Prereq: GEN 313 or GEN 320
Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems.

BIOL 350: Comprehensive Human Anatomy
(3-0) Cr. 3. F.
Prereq: Credit in BIOL 211 and BIOL 212
Comprehensive survey of human anatomy, emphasizing structural and functional relationships of major organ systems. Compartmental study of normal anatomy; practical clinical application of anatomical regions.

BIOL 351: Comparative Chordate Anatomy
(3-4) Cr. 5. S.
Prereq: BIOL 212, junior classification
The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates, comparisons of anatomic structures among major groups, and the adaptive significance of anatomic structures. Laboratory involves dissection of representative species.

BIOL 352: Vertebrate Histology
(3-3) Cr. 4. S.
Prereq: BIOL 212
Microscopic structure of vertebrate tissues and organs, with an introduction to histological techniques.

BIOL 353: Introductory Parasitology
(Cross-listed with MICRO, V PTH). (3-0) Cr. 3. S.
Prereq: BIOL 212
Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

BIOL 354: Animal Behavior
(3-0) Cr. 3. F.
Prereq: BIOL 212
Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care).

BIOL 354L: Laboratory in Animal Behavior
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in BIOL 354
Laboratory techniques for observation, description and analysis of animal activities; independent projects.
BIOL 355: Plants and People
(3-0) Cr. 3. S.
Prereq: Credit in BIOL 211 and BIOL 211L
Uses of plants and fungi by humans and the importance of plants in the past, present, and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

BIOL 356: Dendrology
(Cross-listed with FOR). (2-2) Cr. 3. F.
Prereq: BIOL 211
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed.

BIOL 357: Biology of Plants
Cr. 3. F.
Prereq: BIOL 211 and BIOL 212 (BIOL 211L and 212L recommended)
Study of the general biology of plants, including plant cells and functions, basic anatomy of tissues, meristems, and organs; adaptive morphological features. Review of processes of photosynthesis, respiration, basic plant metabolic functions, and plant reproduction. Survey of evolutionary aspects of all major groups of land plants, and relationships of plants to their environment. Intended for Biology and other life science undergraduate majors.

BIOL 364: Invertebrate Biology
Cr. 3-4. F.
Prereq: BIOL 211, 212
Emphasis on diversity, development, physiology, and behavior of invertebrate organisms- the "spineless wonders" of the world. Laboratory involves hands-on study and investigation of living invertebrates.

BIOL 365: Vertebrate Biology
(Cross-listed with A ECL). (3-2) Cr. 4. F.
Prereq: BIOL 211, 211L, 212, 212L
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

BIOL 366: Plant Systematics
(2-4) Cr. 4. S.
Prereq: BIOL 211
Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, and identification and field study of local plants.

BIOL 370: GIS for Ecology and Environmental Science
(Cross-listed with ENSCI). Cr. 1-6. Repeatable. F.S.
Prereq: Six credits in biological and/or physical sciences, and permission of instructor.
Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only.

BIOL 371: Ecological Methods
(Cross-listed with A ECL). (2-3) Cr. 3. F.
Prereq: A ECL 312; STAT 101 or STAT 104
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

BIOL 381: Environmental Systems I: Introduction to Environmental Systems
(Dual-listed with EEOB 581). (Cross-listed with ENSCI, ENV S). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 382: Environmental Systems II: Analysis of Environmental Systems
(Dual-listed with EEOB 582). (Cross-listed with ENSCI). (2-2) Cr. 3. S.
Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 393: North American Field Trips in Biology
Cr. 1-4. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
BIOL 393A: North American Field Trips in Biology: Pre-trip Seminar
(1-0) Cr. 1. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trips to North American locations of interest to biologists.

BIOL 393B: North American Field Trips in Biology: North American Field trip
Cr. 1-3. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application
Extended field trip under supervision of faculty member, usually during break periods, to North American locations of interest to biologists.
Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
Report required.

BIOL 394: International Field Trips in Biology
Cr. 1-4. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
Meets International Perspectives Requirement.

BIOL 394A: International Field Trips in Biology: Pre-trip Seminar
(1-0) Cr. 1. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trip to international locations of interest to biologists.
Meets International Perspectives Requirement.

BIOL 394B: International Field Trips in Biology: Field Trip to International Location
Cr. 1-3. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, under supervision of faculty member, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
Meets International Perspectives Requirement.

BIOL 402: Introduction to Pathology
(Cross-listed with V PTH). (3-0) Cr. 3. F.

Prereq: BIOL 211 and BIOL 212 with labs
Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury.

BIOL 414: Life History and Reproductive Strategies
(Dual-listed with EEOB 514). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: BIOL 315 or equivalent recommended.
Evolution of ecological adaptations at the individual, population, and species level. Emphasis is on evolutionary mechanisms and adaptive strategies related to life histories and reproduction; age and size at maturity; lifespan and senescence; offspring size/number trade-offs; sex and mating systems; sex determination and sex ratios.

BIOL 423: Developmental Biology
(3-0) Cr. 3. S.

Prereq: BIOL 313
Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates.
Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

BIOL 423L: Developmental Biology Laboratory
(0-3) Cr. 1. Repeatable, maximum of 4 times. S.

Prereq: Credit or enrollment in BIOL 423 or permission of the instructor.
Experiments and explorations illustrating fundamental principles of multicellular development.

BIOL 428: Topics in Cell Biology
(3-0) Cr. 3. S.

Prereq: BIOL 314
Selected topics on biological structure and function at the cellular level.
Emphasis on dynamic nature and regulation of cellular organization and the integration of cellular processes (systems biology). Original research articles will demonstrate interdisciplinary research strategies and how scientific investigation leads to knowledge and understanding of cell biology.

BIOL 430: Principles of Plant Physiology
(3-0) Cr. 3.

Prereq: BIOL 313 or GEN 320; BIOL 314 or BBMB 301; CHEM 231 or CHEM 332; PHYS 106, PHYS 115, or PHYS 111
An overview of classical and current concepts, principles, and approaches regarding the basic mechanisms of plant function underlying growth, development, and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism, and photosynthesis.
BIOL 434: Endocrinology  
(Dual-listed with EEOB 534). (3-0) Cr. 3. S.  
**Prereq:** BIOL 211, BIOL 212  
Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones.

BIOL 436: Neurobiology  
(3-0) Cr. 3. F.  
**Prereq:** BIOL 212  
Basic principles of brain function and development. Signaling of nerve cells, synaptic transmission, structure/function of ion channels and receptors, memory and synaptic plasticity, movement and central control, sensation and sensory processing, construction of neural circuits, early brain development, complex brain functions in health and disease.

BIOL 444: Bioinformatic Analysis  
(Cross-listed with BCB, BCBIO, COM S, CPR E, GEN). (4-0) Cr. 4. F.  
**Prereq:** MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).  
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

BIOL 451: Plant Evolution and Phylogeny  
(Dual-listed with EEOB 551). (3-3) Cr. 4. F.  
**Prereq:** BIOL 315 or equivalent.  
Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies.

BIOL 454: Plant Anatomy  
(3-3) Cr. 4. F.  
**Prereq:** BIOL 212L; BIOL 366 recommended  
Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds.

BIOL 455: Bryophyte and Lichen Biodiversity  
(Dual-listed with EEOB 555). (2-3) Cr. 3. S.  
**Prereq:** BIOL 211, BIOL 211L  
Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning.

BIOL 456: Principles of Mycology  
(Cross-listed with MICRO). (2-3) Cr. 3. F.  
**Prereq:** 10 credits in biological sciences  
Morphology, diversity and ecology of fungi; their relation to agriculture and industry and human health.

BIOL 457: Herpetology  
(Cross-listed with A ECL). (2-0) Cr. 2. F.  
**Prereq:** BIOL 351 or BIOL 365  
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 457L: Herpetology Laboratory  
(Cross-listed with A ECL). (0-3) Cr. 1. F.  
**Prereq:** BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457  
Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 458: Ornithology  
(Cross-listed with A ECL). (2-0) Cr. 2. S.  
**Prereq:** A ECL 365 or BIOL 351  
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

BIOL 458L: Ornithology Laboratory  
(Cross-listed with A ECL). (0-3) Cr. 1. S.  
**Prereq:** BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.  
Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.
**Biology**

**BIOL 459: Mammalogy**
(Dual-listed with EEOB 559). (Cross-listed with A ECL). (2-0) Cr. 2. S.
Prereq: BIOL 351 or A ECL 365
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

**BIOL 459L: Mammalogy Laboratory**
(Cross-listed with A ECL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.
Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

**BIOL 462: Evolutionary Genetics**
(Cross-listed with GEN). (3-0) Cr. 3. F.
Prereq: BIOL 315
The genetic basis of evolutionary processes in eukaryotic organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

**BIOL 464: Wetland Ecology**
(Dual-listed with EEOB 564). (Cross-listed with ENSCI). (3-0) Cr. 3. S.
Prereq: 15 credits in biological sciences.

**BIOL 465: Macroevolution**
(Dual-listed with EEOB 565). Cr. 3. Alt. S., offered even-numbered years.
Prereq: BIOL 315
The history and diversity of life on earth; evolutionary patterns and processes above the species level. Diversity from a phylogenetic perspective. Empirical exercises include: phylogeny estimation, ancestral states, estimating diversification rates, evaluating the tempo and mode of evolution, biogeographic patterns, and trait associations across the tree of life.

**BIOL 471: Introductory Conservation Biology**
(Cross-listed with A ECL). Cr. 3.
Prereq: BIOL 312
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

**BIOL 472: Community Ecology**
(3-0) Cr. 3. S.
Prereq: BIOL 312
The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates.

**BIOL 474: Plant Ecology**
(3-0) Cr. 3. S.
Prereq: BIOL 312
Principles of plant population and community ecology.

**BIOL 476: Functional Ecology**
(Dual-listed with EEOB 576). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312
The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

**BIOL 480: Studies in Marine Biology**
Cr. 1-8. Repeatable.
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

**BIOL 481: Summer Field Studies**
Cr. 1-8. Repeatable.
Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

**BIOL 482: Tropical Biology**
Cr. 1-4. Repeatable, maximum of 8 credits.
Prereq: One year of college biology; knowledge of Spanish desirable but not required
Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.
BIOL 484: Ecosystem Ecology
(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: Combined 12 credits in biology, chemistry, and physics.  
Introduction of the study of ecosystems and the biological and physical  
facets that influence their properties and dynamics. Conceptual  
foundations for ecosystem studies. Interactions among organisms,  
biological diversity, and ecosystem attributes. Quantitative analyses  
of accumulations, transformations, and fluxes of nutrients, water, and  
energy within and among ecosystems. Global change issues.

BIOL 486: Aquatic Ecology  
(Dual-listed with EEOB 586). (Cross-listed with A ECL, ENSCI). (3-0) Cr. 3. F.  
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301  
Structure and function of aquatic ecosystems with application to fishery  
and pollution problems. Emphasis on lacustrine, riverine, and wetland  
ecology.

BIOL 486L: Aquatic Ecology Laboratory  
(Dual-listed with EEOB 586L). (Cross-listed with A ECL, ENSCI). (0-3) Cr. 1. F.  
Prereq: Concurrent enrollment in BIOL 486  
Field trips and laboratory exercises to accompany 486. Hands-on  
experience with aquatic research and monitoring techniques and  
concepts.

BIOL 487: Microbial Ecology  
(Dual-listed with EEOB 587). (Cross-listed with ENSCI, GEOL, MICRO).  
(3-0) Cr. 3. F.  
Prereq: Six credits in biology and 6 credits in chemistry  
Introduction to major functional groups of autotrophic and heterotrophic  
microorganisms and their roles in natural and environmental systems.  
Consequences of microbial activity on water chemistry, weathering, and  
precipitation/dissolution reactions will be emphasized.

BIOL 488: Identification of Aquatic Organisms  
(0-3) Cr. 1. F.S.  
On-line taxonomic and identification exercises to accompany 486. Instruction and practice in the identification of algae, aquatic  
macrophytes, zooplankton, and benthos.

BIOL 489: Population Ecology  
(Dual-listed with EEOB 589). (Cross-listed with A ECL). (2-2) Cr. 3. Alt. F.,  
offered even-numbered years.  
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate  
standing  
Concepts and theories of population dynamics with emphasis on models  
of growth, predation, competition, and regulation.

BIOL 490: Independent Study  
Cr. 1. Repeatable, maximum of 9 credits. F.S.SS.  
Prereq: Permission of instructor.  
Independent study opportunities for undergraduate students in the  
biological sciences. No more than 9 credits in Biol 490 may be counted  
toward graduation and, of those, only 2 credits may be applied toward the  
Biology advanced course requirement.

BIOL 491: Undergraduate Teaching Experience  
Cr. 1-2. Repeatable.  
Prereq: Permission of supervising staff  
For students registering to be undergraduate teaching assistants. Offered  
on a satisfactory-fail basis only. A maximum of 2 credits of BIOL 491 may  
be applied toward the Biology advanced course requirement.

BIOL 492: Preparing for Graduate School in the Biological Sciences  
(1-0) Cr. 1. F.  
Prereq: For life science majors; Minimum requirement: sophomore standing.  
For students considering pursuing a graduate degree in the biological  
sciences. Professional development topics including the defining of  
academic and career areas of interest, finding and evaluating appropriate  
programs of graduate study, the graduate school application process, and  
developing a curriculum vita. Exploration of learning opportunities at field  
stations, research internships, and independent research activities.

BIOL 494: Biology Internship  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: 8 credits in biology and permission of instructor  
Professional experiences in biological sciences. Intended for Biology  
majors. No more than 9 credits in BIOL 494 may be counted toward  
gratuation and, of those, only 6 credits may be applied toward the  
Biology advanced course requirement.

BIOL 495: Undergraduate Seminar  
Cr. 1-3. Repeatable. F.S.  
Prereq: Permission of instructor  
Content varies from year to year and may include detailed discussion of  
special topics in biology, current issues in biology, or careers in biology.

BIOL 498: Cooperative Education  
Cr. R. Repeatable. F.S.SS.  
Prereq: Permission of the Biology Program cooperative education coordinator  
Required of all cooperative education students. Students must register  
for this course prior to commencing each work period.
BIOL 499: Undergraduate Research Experience
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.
Prereq: Permission of instructor.
Research opportunities for undergraduate students in the biological sciences. Intended for Biology majors. No more than 9 credits in Biol 499 may be counted toward graduation and, of those, only 6 credits may be applied toward the Biology advanced course requirement.

Community Development
Interinstitutional Graduate Program
http://www.agonline.iastate.edu/programs/community-development-ms

Community Development deals with challenges faced by communities in the United States and other countries, particularly those in rural areas. Global economic restructuring and the devolution of government services have produced an environment in which Community Developers are called on to think and act in innovative ways.

Community Development is a progressive field, actively promoting positive social, economic, cultural and environmental change. It encourages people to see the "whole picture," engaging citizens in democratic decision making and action.

In the Great Plains IDEA Community Development Master’s degree program, a diverse faculty from several institutions teaches critical thinking, ethical consideration, careful planning and involvement of all stakeholders. A Master’s degree in Community Development equips the student with a breadth of perspective and depth of cutting-edge material in the field.

The Great Plains IDEA online Master’s program is ideal for Community Development students and practitioners. Students seeking a professional career in Community Development can attain the necessary knowledge base without commuting or relocating. Community Development practitioners who wish to augment their training can use the skill set gained through the Community Development Master’s degree to work most effectively in, or to advance beyond, their current position.

A Master’s degree in Community Development is ideal for professionals in a wide variety of fields:
- Community and Regional Planning
- Sociology
- Economics
- Political science
- Geography
- Local Planning Departments
- Community Economic Development Organizations
- Cooperative Extension Services
- Housing Agencies
- Parks & Recreation
- Tribal Programs
- Non-Profit Organizations focusing on Community Enhancement

Students select one university to be their "home institution," this is the university to which you apply, enroll and pay tuition. Students must meet the admissions requirements of the home institution. Contact the Campus Coordinators Casey Smith and Michelle Zander at agonlineservice.iastate.edu or 800-747-4478 for more information.

Participating Institutions:
- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development is an inter-institutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student may take courses from any of the teaching institutions: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, an email address and program forms are required for participating in the program.

Registration
Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU. See http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=70 for program requirements.

Courses primarily for graduate students, open to qualified undergraduates:

C DEV 502: Community and Natural Resource Management
(3-0) Cr. 3.
Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices. Enhancement of ability of community development professionals to work with communities to plan, develop and monitor conversation and development of natural resources with multiple functions.
C DEV 503: Community Development I: Principles and Strategies of Community Change
(3-0) Cr. 3.
Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to conceptual models from diverse disciplines. Exploration of professional practice principles, and student construction of their personal framework for practicing community development.

C DEV 504: Community Analysis: Introduction to Methods
(3-0) Cr. 3.
Introduction to research methods relevant to community development. Formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

C DEV 505: Community Development II: Organizing for Community Change
(3-0) Cr. 3.
Examines role of civil society in community planning efforts. Comparative approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

C DEV 506: Community and Regional Economic Analysis I
(3-0) Cr. 3.
Introduction to concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, and analytical tools. Strategies for local economic development will also be explored.

C DEV 507: Introduction to Native Communities
(3-0) Cr. 3.
A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities. Basic understanding within the context of community development of the diversity of the tribal structures and cultures and the unique history and jurisdictional considerations of these nations. Working with tribes, Federal and Indian relations, and governance and cultural issues.

C DEV 508: Ecological Economics
(3-0) Cr. 3.
Approaches economy and community by looking at the inherent interdependence, jointness, and potential complimentarity between ecology and economy (utility) of a place.

C DEV 509: Building Native Community and Economic Capacity
(3-0) Cr. 3.
Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

C DEV 510: Indian Country Agriculture and Natural Resources
(3-0) Cr. 3.
Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

C DEV 512: Sustainable Communities
(3-0) Cr. 3.
Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.

C DEV 513: Economic Development Strategies and Programs
(3-0) Cr. 3.
Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.

C DEV 520: Community Development Orientation
(2-0) Cr. 2.
Introduction to the Community Development program. Focus on on-line delivery methods, graduate level research and writing, technology skills.

C DEV 521: Housing and Development
Cr. 3. S.
Prereq: None.
Review and evaluation of historical and current housing issues, production, and financial systems, including consideration of racial, ethnic, income, and gender issues as they relate to the role of housing developments and programs in community development.

C DEV 522: Community Leadership and Capacity Building
(3-0) Cr. 3.
Defining leadership and applying it to the workplace. Understanding of potential link between leadership and community capacity. Identifying strategies for leadership development in communities.
C DEV 523: Grantwriting for Community Development Professionals  
(3-0) Cr. 3.  
Basic Grant Development and Management will introduce students to the grant-getting process and provide an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results.

C DEV 524: Non-Profit Management in Community Development  
(3-0) Cr. 3.  
Understanding of how non-profit organizations are run in order that they may participate more fully in community development efforts. Learning skills necessary to assist organizations to manage community development projects and programs, such as, budgeting, planning, personnel, facilities, volunteer management, and fundraising.

C DEV 525: Role of Tribal Colleges in Economic Development  
(3-0) Cr. 3.  
Focus on role of tribally-chartered colleges and universities in economic development within Native communities. Social capital analytic framework to examine and evaluate tribal college model of economic development.

C DEV 526: Immigration and Community Inclusion  
(3-0) Cr. 3.  
Mechanisms for community inclusion and exclusion in relation to immigration will be examined. Aspects of ethnicity, religion, occupation and transnationalism are addressed in terms of community mechanism for incorporating immigrants as community assets.

C DEV 527: Public and Non-Profit Budgeting  
Cr. 3. SS.  
Introduction to the fundamental theories and practices of budgeting in the public and non-profit sectors. Topics covered include overview of budgeting and budget reform, taxation, expenditures, budget preparation and adoption, budget implementation, and performance budgeting.

C DEV 530: Toward Ethical Engagement  
(3-0) Cr. 3.  
Understanding what ethics are and identify ethical dimensions of a problem. Ability to employ ethical analysis and engagement strategies in public problem-solving.

C DEV 532: Community and Regional Economic Analysis II  
(3-0) Cr. 3.  
Prereq: C DEV 506  
Substantive grounding in the theories and practice of measuring community economic dynamics; build solid foundation skills for applied community economic analysis.

C DEV 542: The Policy and Politics of Coastal Areas  
(Cross-listed with POL S). (3-0) Cr. 3.  
Exploration of political implications of coastal policy. Issues include: "Carrying capacity," zoning, regulation of human development activities, tradeoffs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

C DEV 590: Special Topics in Community Development  
Cr. 1-3. Repeatable, maximum of 4 times. F.S.SS.  
Special topics in Community Development. Independent Study, must get instructor approval.

C DEV 599: Creative Component  
Cr. arr.  
Students work with major professor to conduct research and carry out work on their creative component. Instructor permission required.

C DEV 699: Thesis Research  
Cr. 1-6. F.S.SS.  
Thesis Research.

Culinary Food Science (AGLS)  
The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor.

Administered by the Department of Food Science and Human Nutrition  
Total Degree Requirement: 120 cr.  
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr.
from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives: 3 cr.**  
**U.S. Diversity: 3 cr.**  
**Communications and Library: 10 cr.**

Total Credits: 15

### Dairy Science

Students majoring in Dairy Science will complete the degree requirements listed below. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

#### International Perspectives

Approved International Perspectives course

#### U.S. Diversity

Approved U.S. Diversity course

### Communications Proficiency

#### Communication/Library

| ENGL 150 Critical Thinking and Communication | 3 |
| ENGL 250 Written, Oral, Visual, and Electronic Composition | 3 |
| LIB 160 Information Literacy | 1 |

One course from the following:

| AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences | 3 |
| COMST 214 Professional Communication |  |
| SP CM 212 Fundamentals of Public Speaking |  |

Total Credits: 10

---

**Electives 0-8 cr.** Select from any university coursework to earn at least 120 total credits.

Go to FS HN courses.

A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

Diet and Exercise (AGLS)

Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

**Total Degree Requirements: 125 cr. for bachelor's degree and 37-41 cr. for master’s degree**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications and Library: 10 cr.**

Go to FS HN courses.

Go to KIN courses.
Dietetics (AGLS)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Total Credits: 12

**Electives: 0-12 cr.**  
Select from any university coursework to earn at least 120 total credits.

**Admission to the dietetics program:** Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN courses.

### Undergraduate Study

#### Minor - Insect Science

The department offers a minor in Insect Science that may be earned by completing ENT 370 Insect Biology and 12 credits in courses selected from an approved list supplied by the department.

#### Minor - Emerging Global Diseases

Entomology administers the Emerging Global Diseases minor (see http://www.ent.iastate.edu/egd). Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and socioeconomics. One course must be taken from each of three core areas:

The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

#### Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellular levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive

### Entomology

---

* Choose elective courses to total equal to or greater than 120 credits.

**Note:** This sequence is only an example, and the number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.
grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 590 Special Topics (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of ENT 600 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four additional courses of ENT 590 Special Topics (selected from topics A through D and F through I, M through N inclusive), and at least 1 credit of ENT 600 Seminar. At least one 590 must be taken from each of these subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 590K Special Topics: Teaching Experience. Both semesters or ENT 590K Special Topics: Teaching Experience, one semester and ENT 590L Special Topics: Extension Internship, the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (500 level and above) for a total of 9 credits to be determined by the student's POS committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular Entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; microbiology; molecular, cellular and developmental biology; sustainable agriculture; and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit is available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate students can be viewed on the department's website at www.ent.iastate.edu (http://www.ent.iastate.edu/assessment). Curriculum assessment for the department can be viewed here: http://www.ent.iastate.edu/assessment.

Courses primarily for undergraduates:
ENT 201: Introduction to Insects
(1-0) Cr. 1. F.S.SS.
5 weeks. Classroom section spring only. World Wide Web section of course offered summer and fall semesters. Biological and ecological aspects of insects.

ENT 211: Insects and Society
(2-0) Cr. 2. F.S.
Prereq: ENT 201

ENT 214: Insects in Forensic Science
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: none
Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology.

ENT 220: Introduction to Forensic Science
(Cross-listed with CJ ST). (3-0) Cr. 3. S.
Prereq: none
Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced.

ENT 283: Pesticide Application Certification
(Cross-listed with AGRON, FOR, HORT). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

ENT 370: Insect Biology
(2-3) Cr. 3. F.
Prereq: BIOL 101 or BIOL 211

ENT 371: Introduction to Insect Ecology
(Cross-listed with IA LL). (3-3) Cr. 4. Alt. SS., offered odd-numbered years.
Field and laboratory study of insects, their diversity, life history; emphasis on ecology and behavior.

ENT 372: Livestock Entomology
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Classroom and off-campus videotape sections. 12 weeks. Recognition, biology, behavior, economic importance, and management of insects and other arthropods affecting livestock and poultry production.

ENT 374: Insects and Our Health
(Cross-listed with MICRO). (3-0) Cr. 3. S.
Prereq: 3 credits in biological sciences
Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease.
Meets International Perspectives Requirement.

ENT 374L: Insects and Our Health Laboratory
(Cross-listed with MICRO). (0-3) Cr. 1. Alt. S., offered even-numbered years.
Prereq: Credit or enrollment in ENT 374
Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

ENT 375: Plant Protection Using Natural Enemies
(Dual-listed with ENT 575). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: ENT 370 or ENT 376
Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

ENT 376: Fundamentals of Entomology and Pest Management
(2-3) Cr. 3. S.
Prereq: BIOL 101 or BIOL 211
Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological backlash.

ENT 425: Aquatic Insects
(Dual-listed with ENT 525). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312 or equivalent
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.
ENT 450: Pesticides in the Environment  
(Dual-listed with ENT 550). (3-0) Cr. 3. S.  
Prereq: 9 credits of biological sciences  
Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

ENT 452: Integrated Management of Diseases and Insect Pests of Turfgrasses  
(Dual-listed with ENT 552). (Cross-listed with HORT, PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: HORT 351  
Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

ENT 466: Ecosystem Service Management  
(Dual-listed with ENT 566). (Cross-listed with ENSCI, NREM). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: permission of instructor  
Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 471: Insect Ecology  
(Dual-listed with ENT 571). (2-3) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: 9 credits biological sciences  
The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

ENT 490: Independent Study  
Cr. 1-3. Repeatable, maximum of 9 credits.  
Prereq: 15 credits in biological sciences, junior or senior classification  
A maximum of 9 credits of all (university-wide) 490 credits may be applied toward graduation.

ENT 490E: Independent Study: Research or work experience.  
Cr. 1-3. Repeatable, maximum of 9 credits.  
Prereq: 15 credits in biological sciences, junior or senior classification  
A maximum of 9 of all (university-wide) 490 credits may be used toward graduation.

ENT 490U: Independent Study: Laboratory teaching experience  
Cr. 1-3. Repeatable, maximum of 9 credits.  
Prereq: 15 credits in biological sciences, junior or senior classification. For students registering to be undergraduate laboratory assistants.  
A maximum of 9 of all (university-wide) 490 credits may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ENT 511: Integrated Management of Tropical Crops  
(Cross-listed with HORT, PL P). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221  
Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

ENT 525: Aquatic Insects  
(Dual-listed with ENT 425). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: BIOL 312 or equivalent  
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 530: Ecologically Based Pest Management Strategies  
(Cross-listed with AGRON, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

ENT 550: Pesticides in the Environment  
(Dual-listed with ENT 450). (Cross-listed with TOX). (3-0) Cr. 3. S.  
Prereq: 9 credits of biological sciences  
Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

ENT 552: Integrated Management of Diseases and Insect Pests of Turfgrasses  
(Dual-listed with ENT 452). (Cross-listed with HORT, PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: HORT 351  
Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.
ENT 555: Insect Physiology  
(3-3) Cr. 4. Alt. S., offered even-numbered years.  
**Prereq: ENT 370**  
Life processes of the insects, including reviews of current problems in insect physiology.

ENT 566: Ecosystem Service Management  
(Dual-listed with ENT 466). (Cross-listed with ENSCI, NREM). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
**Prereq: permission of instructor**  
Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 568: Advanced Systematics  
(Cross-listed with EEOB). (2-3) Cr. 3. Alt. S., offered irregularly.  
**Prereq: Permission of instructor**  
Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics.

ENT 570: Plant-Insect Interaction  
(2-0) Cr. 2. Alt. F., offered odd-numbered years.  
**Prereq: 9 credits in biological sciences**  
Physiological, behavioral, ecological, and evolutionary factors that govern interactions between insects and plants, applications of this knowledge to agriculture, and important results from the study of natural systems. Additional topics covered during the semester include: tritrophic interactions, biological control of plants by insects, and pollination biology. Student-led discussions and draws on both the primary and secondary literature.

ENT 571: Insect Ecology  
(Dual-listed with ENT 471). (2-3) Cr. 3. Alt. F., offered even-numbered years.  
**Prereq: 9 credits biological sciences**  
The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

ENT 574: Medical Entomology  
(3-3) Cr. 4. Alt. S., offered even-numbered years.  
**Prereq: 9 credits in biological sciences**  
Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease.

ENT 575: Plant Protection Using Natural Enemies  
(Dual-listed with ENT 375). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
**Prereq: ENT 370 or ENT 376**  
Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

ENT 576: Systematic Entomology  
(3-6) Cr. 5. Alt. F., offered even-numbered years.  
**Prereq: ENT 370**  
Classification, distribution, and natural history of insects, including fundamentals of phylogenetic systematics, biogeography, taxonomic procedures, and insect collection and curation.

ENT 590: Special Topics  
Cr. 1-3. Repeatable.  
**Prereq: 15 credits in biological sciences.**  

ENT 590A: Special Topics: Biological Control and Pathology.  
Cr. 1-3. Repeatable.

ENT 590B: Special Topics: Chemical Ecology and Behavior.  
Cr. 1-3. Repeatable.

ENT 590C: Special Topics: Ecology and Pest Management.  
Cr. 1-3. Repeatable.

ENT 590D: Special Topics: Evolution and Systematics.  
Cr. 1-3. Repeatable.

ENT 590E: Special Topics: Special Research Topics.  
Cr. 1-3. Repeatable.

ENT 590F: Special Topics: Medical and Veterinary Entomology.  
Cr. 1-3. Repeatable.

ENT 590G: Special Topics: Molecular Entomology.  
Cr. 1-3. Repeatable.

ENT 590I: Special Topics: Toxicology  
Cr. 1-3. Repeatable.

ENT 590K: Special Topics: Teaching Experience.  
Cr. 1-3. Repeatable.

ENT 590L: Special Topics: Extension Internship.  
Cr. 1-3. Repeatable.

ENT 590M: Special Topics: Immature Insects.  
Cr. 1-3. Repeatable.

Cr. 1-3. Repeatable.

Courses for graduate students:
ENT 600: Seminar
Cr. 1. F.S.S.
Presentation of research results.

ENT 675: Insecticide Toxicology
(Cross-listed with TOX). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: ENT 555 or TOX 501
Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides.

ENT 699: Research
Cr. arr. Repeatable.

Environmental Science

College of Agriculture and Life Sciences

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.
2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 32 credits

Elective 12 Elective 9
15 15

1 Students complete at least 27 credits in Environmental Science including ENSCI 110, 201, 250, 381, 382, and 15 additional credits of approved ENSCI coursework.

2 Students complete at least 15 credits in humanities and social science including at least 3 credits each in ethics, humanities, social science, U.S. Diversity, and International Perspectives from approved lists.

3 Students choose one course from the following Earth Science related courses: AGRON 182, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, CHEM 331 & 331L, BBMB 221, or AGRON 259.

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master’s degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (https://enscigrad.iastate.edu/).

Courses primarily for undergraduates:

ENSCI 110: Orientation to Environmental Science
(1-0) Cr. 1. F.
Prereq: Freshman classification in EnSci
Overview of Environmental Science curriculum and discussion of professional opportunities. Offered on a satisfactory-fail basis only.

ENSCI 201: Introduction to Environmental Issues
(Cross-listed with BIOL, ENV S). (2-0) Cr. 2. F.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

ENSCI 202: Exploration of Environmental and Sustainability Issues
(1-0) Cr. 1. F.
Prereq: Credit or enrollment in ENSCI 201
Exploration of specific environmental and sustainability issues; designed to complement ENSCI 201. Offered on a satisfactory-fail basis only.

ENSCI 203: Exploration of Environmental Science
(1-0) Cr. 1. S.
Prereq: ENSCI 202.
Continued exploration of specific environmental science issues developed in ENSCI 202. Topics may vary in different years. Offered on a satisfactory-fail basis only.

ENSCI 250: Environmental Geography
(Cross-listed with ENV S). (3-0) Cr. 3. F.
The distribution, origins and functions of the earth’s physical systems and the spatial relationship between human activity and the natural world.

ENSCI 251: Biological Processes in the Environment
(Cross-listed with BIOL). (3-0) Cr. 3. S.
Principles of Biology from the level of macromolecules to the biosphere. Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles.

ENSCI 301: Natural Resource Ecology and Soils
(Cross-listed with NREM). (3-3) Cr. 4. F.
Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes.
ENSCI 312: Ecology
(Cross-listed with A ECL, BIOL). (3-3) Cr. 4. F.SS.
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

ENSCI 312I: Ecology
(Cross-listed with A ECL, IA LL). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

ENSCI 324: Energy and the Environment
(Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.
Prereq: CHEM 163 or CHEM 177, MATH 140
Exploration of the origin of Earth’s energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities.

ENSCI 345: Natural Resource Photogrammetry and Geographic Information Systems
(Cross-listed with NREM). (2-3) Cr. 3. S.
Prereq: Junior classification
Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses.

ENSCI 360: Environmental Soil Science
(Cross-listed with AGRON). (2-2) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or ENSCI 250 or GEOL 201
Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

ENSCI 370: GIS for Ecology and Environmental Science
(Cross-listed with BIOL). Cr. 1-6. Repeatable. F.S.
Prereq: Six credits in biological and /or physical sciences, and permission of instructor.
Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only.

ENSCI 381: Environmental Systems I: Introduction to Environmental Systems
(Dual-listed with ENSCI 581). (Cross-listed with BIOL, ENV S). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 382: Environmental Systems II: Analysis of Environmental Systems
(Dual-listed with ENSCI 582). (Cross-listed with BIOL). (2-2) Cr. 3. S.
Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 384: Introduction to Ecosystems
(3-0) Cr. 3. S.
Prereq: 12 credits of natural science including biology and chemistry
Biological and physical processes affecting material and energy flows in natural and managed ecosystems. Understanding and predicting climate and management impacts on ecosystem services and sustainability.

ENSCI 390: Internship in Environmental Science
Cr. arr. Repeatable. F.S.SS.
Prereq: Approval of the Environmental Science coordinator
Supervised off-campus work experience in the field of environmental science. Offered on a satisfactory-fail basis only.
ENSCI 391: Apprenticeship
Cr. arr. Repeatable. F.S.S.
Prereq: Approval of the Environmental Science Coordinator
Practical experience in an approved setting such as a research laboratory, government office, or private office. Offered on a satisfactory-fail basis only.

ENSCI 402: Watershed Hydrology
(Dual-listed with ENSCI 502). (Cross-listed with GEOL, MTEOR, NREM). (2-3) Cr. 3. F.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

ENSCI 402I: Watershed Hydrology and Surficial Processes
(Cross-listed with AGRON, IA LL). Cr. 4. SS.
Prereq: Four courses in physical or biological sciences or engineering
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed.

ENSCI 404: Global Change
(Dual-listed with ENSCI 504). (Cross-listed with AGRON, ENV S, MTEOR). (3-0) Cr. 3. S.
Prereq: Four courses in physical or biological sciences or engineering
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENSCI 405: Environmental Biophysics
(Dual-listed with ENSCI 505). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MATH 165 and some exposure to computer programming (any language)
The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

ENSCI 406: World Climates
(Dual-listed with AGRON, MTEOR). (3-0) Cr. 3. S.
Prereq: AGRON 206/MTEOR 206
Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement.

ENSCI 407: Watershed Management
(Dual-listed with ENSCI 507). (Cross-listed with ENV S, NREM). (3-3) Cr. 4. S.
Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 408I: Aquatic Ecology
(Dual-listed with ENSCI 508I). (Cross-listed with IA LL). Cr. 4. SS.
Prereq: Courses in ecology, chemistry, and physics
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 409: Field Methods in Hydrogeology
(Dual-listed with ENSCI 509). (Cross-listed with IA LL). (0-4) Cr. 3. Alt. SS., offered even-numbered years.
Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 411: Hydrogeology
(Dual-listed with ENSCI 511). (Cross-listed with GEOL). (3-2) Cr. 4. F.
Prereq: Four courses in biological or physical sciences
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.
ENSCI 412: Micropaleontology
(Cross-listed with GEOL). Cr. 3. Alt. F., offered even-numbered years.
Prereq: GEOL 102 and GEOL 102L
Evolution, identification and utility of major microfossil groups from the Mesozoic to present. Focus on Cenozoic applications including biostratigraphy, paleoclimate, and paleothermometry using assemblages, stable isotopes, Mg/Ca, and molecular fossils. Laboratory includes processing and analysis of specific microfossils. Major groups covered include foraminifera, calcareous nanofossils, sponge spicules, diatoms, radiolarians, and silicoflagellates.

ENSCI 413: Applied and Environmental Geophysics
(Dual-listed with ENSCI 513). (Cross-listed with C E, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

ENSCI 414: Applied Groundwater Flow Modeling
(Dual-listed with ENSCI 514). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: GEOL 411 or C E 473; MATH 165 or MATH 181
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 415: Paleoclimatology
(Dual-listed with ENSCI 515). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: Four courses in biological or physical science
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods, utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years).

ENSCI 416: Hydrologic Modeling and Analysis
(Dual-listed with ENSCI 516). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: Four courses in Earth science, meteorology, or engineering; junior standing.
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

ENSCI 418: Stream Ecology
(Dual-listed with ENSCI 518). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 419: Aqueous and Environmental Geochemistry
(Dual-listed with ENSCI 519). (Cross-listed with GEOL). (2-2) Cr. 3. S.
Prereq: CHEM 178, CHEM 178L; junior classification
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 420: Environmental Engineering Chemistry
(Dual-listed with ENSCI 520). (Cross-listed with C E). (2-3) Cr. 3. F.
Prereq: C E 326, CHEM 178
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

ENSCI 422I: Prairie Ecology
(Cross-listed with IA LL). Cr. 4. SS.
Prereq: Familiarity with basic principles in biological sciences and ecology
Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects.
ENSCI 424: Air Pollution
(Dual-listed with ENSCI 524). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in
statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with ENSCI 524A). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in
statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424B: Air Pollution: Climate change and causes
(Dual-listed with ENSCI 524B). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in
statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424C: Air Pollution: Transportation Air Quality
(Dual-listed with ENSCI 524C). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics.
Senior classification or above

ENSCI 424D: Air Pollution: Off-gas treatment technology
(Dual-listed with ENSCI 524D). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424E: Air Pollution: Agricultural sources of pollution
(Dual-listed with ENSCI 524E). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 426: Stable Isotopes in the Environment
(Dual-listed with ENSCI 526). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S.,
offered even-numbered years.
Prereq: Four courses in biological or physical science
Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 427: Watershed Modeling and Policy
(Dual-listed with ENSCI 537). (Cross-listed with A B E). (2-2) Cr. 3. Alt. F.,
offered odd-numbered years.
Prereq: CE 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

ENSCI 446: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with ENSCI 546). (Cross-listed with NREM). (2-3) Cr. 3. F.
Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

ENSCI 452: GIS for Geoscientists
(Dual-listed with ENSCI 552). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3.
F.S.
Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 459: Environmental Soil and Water Chemistry
(Dual-listed with ENSCI 559). (Cross-listed with AGRON). (3-3) Cr. 4. F.
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360, GEOL 100 and AGRON 354 recommended
An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

ENSCI 461I: Introduction to GIS
(Cross-listed with ENSCI 537). (Cross-listed with A B E). (2-2) Cr. 3. Alt. I.
Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management.
ENSCI 463: Soil Formation and Landscape Relationships  
(Dual-listed with ENSCI 563). (Cross-listed with AGRON). (3-0) Cr. 3. S.  
**Prereq:** AGRON 182 (or equivalent) or AGRON 260  
Relationships between soil formation, geomorphology, and environment.  
Soil description, classification, geography, mapping, and interpretation for  
land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON  
463I may be applied for graduation.

ENSCI 463I: Soil Formation and Landscape Relationships  
(Dual-listed with ENSCI 563I). (Cross-listed with AGRON, IA LL). Cr. 2. Alt.  
SS., offered even-numbered years.  
**Prereq:** AGRON 182 (or equivalent)  
Relationships between soil formation, geomorphology, and environment.  
Soil description, classification, geography, mapping, and interpretation for  
land use. Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 464: Wetland Ecology  
(Dual-listed with ENSCI 564). (Cross-listed with BIOL). (3-0) Cr. 3. S.  
**Prereq:** 15 credits in biological sciences.  
Ecology, classification, creation and restoration, and management of  
wetlands. Emphasis on North American temperate wetlands.

ENSCI 466: Ecosystem Service Management  
(Dual-listed with ENSCI 566). (Cross-listed with ENT, NREM). (3-0) Cr. 3.  
Alt. S., offered odd-numbered years.  
**Prereq:** permission of instructor  
Land use and conservation techniques for improving ecosystem services  
including: pollination of crops, biological control of pests, prevention  
of erosion and water quality improvement.

ENSCI 468: Applied Geostatistics for Geoscientists  
(Dual-listed with ENSCI 568). (Cross-listed with GEOL, MTEOR). Cr. 3. F.  
**Prereq:** GEOL 452, C R P 351, C R P 452, NREM 345, or NREM 446  
Introduction to geospatial data collection, analysis, interpretation, and  
presentation. Geospatial techniques including geographic information  
systems (GIS), remote sensing (RS), and global positioning systems  
(GPS). Study of applied geostatistical analysis (e.g., interpolation  
and spatial regression).

ENSCI 477: Soil Physics  
(Dual-listed with ENSCI 577). (Cross-listed with AGRON). (3-0) Cr. 3. S.  
**Prereq:** AGS 182 or equivalent and MATH 166 recommended  
The physical soil system: the soil components and their physical  
interactions; transport processes involving water, air, and heat.

ENSCI 479: Surficial Processes  
(Dual-listed with ENSCI 579). (Cross-listed with GEOL). (2-3) Cr. 3. F.  
**Prereq:** GEOL 100 and GEOL 100L; or GEOL 201; or equivalent experience.  
The study of physical processes that shape Earth’s surface. Topics  
include weathering, sediment transport, and landform genesis with  
emphasis on fluvial, glacial, hillslope, eolian, and coastal processes.  
Applications to engineering and environmental problems. Laboratory  
includes topographic map interpretation and local field trips.

ENSCI 480: Engineering Analysis of Biological Systems  
(Cross-listed with ABE). (2-2) Cr. 3. F.  
**Prereq:** ABE 380 or permission of the instructor  
Systems-level quantitative analysis of biological systems, including  
applications in foods, feeds, biofuels, bioenergy, and other biological  
systems. Introduction to economic analysis and life-cycle assessment  
of these systems at multiple production scales. Applying these tools  
to evaluate and improve cost and sustainability performance of these  
biological systems. Students enrolled in ABE 580 will be required to  
answer additional exam questions and report on two journal articles.

ENSCI 484: Ecosystem Ecology  
(Cross-listed with BIOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
**Prereq:** Combined 12 credits in biology, chemistry, and physics.  
Introduction of the study of ecosystems and the biological and physical  
factors that influence their properties and dynamics. Conceptual  
foundations for ecosystem studies. Interactions among organisms,  
biological diversity, and ecosystem attributes. Quantitative analyses  
of accumulations, transformations, and fluxes of nutrients, water, and  
energy within and among ecosystems. Global change issues.

ENSCI 485: Soil and Environmental Microbiology  
(Dual-listed with ENSCI 585). (Cross-listed with AGRON, MICRO). (2-3) Cr.  
3. F.  
**Prereq:** AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended  
The living organisms in the soil and what they do. Emphasis on soil biota  
composition, the carbon cycle and bioremediation, soil-plant-microbial  
relationships, and environmental issues.

ENSCI 486: Aquatic Ecology  
(Dual-listed with ENSCI 586). (Cross-listed with A ECL, BIOL). (3-0) Cr. 3. F.  
**Prereq:** Biol 312 or EnSci 381 or EnSci 402 or NREM 301  
Structure and function of aquatic ecosystems with application to fishery  
and pollution problems. Emphasis on lacustrine, riverine, and wetland  
ecology.
ENSCI 486L: Aquatic Ecology Laboratory  
(Dual-listed with ENSCI 586L). (Cross-listed with A ECL, BIOL). (0-3) Cr. 1. F.  
Prereq: Concurrent enrollment in BIOL 486  
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 487: Microbial Ecology  
(Dual-listed with ENSCI 587). (Cross-listed with BIOL, GEOL, MICRO). (3-0) Cr. 3. F.  
Prereq: Six credits in biology and 6 credits in chemistry  
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

ENSCI 488: GIS for Geoscientists II  
(Dual-listed with ENSCI 588). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent  
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

ENSCI 490: Independent Study  
Cr. arr. Repeatable. F.S.S.S.  
Prereq: Permission of the instructor and approval of the Environmental Science coordinator

ENSCI 490H: Independent Study: Honors  
Cr. arr. Repeatable. F.S.S.S.  
Permission of instructor and approval of Environmental Science coordinator.

ENSCI 495: Current Topics and Case Studies in Environmental Science  
Cr. 1-3.  
Prereq: Junior classification in Environmental Science, permission of instructor  
Current topics and case studies related to the analysis and management of environmental systems. Individual and/or group projects.

ENSCI 496: Travel Course  
Cr. arr. Repeatable.  
Prereq: Permission of instructor  
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings. A. International Tour B. Domestic Tour.

ENSCI 496A: Travel Course: International Tour  
Cr. arr. Repeatable.  
Prereq: Permission of instructor  
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 496B: Travel Course: Domestic Tour  
Cr. arr. Repeatable.  
Prereq: Permission of instructor  
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 498: Cooperative Education  
Cr. R. Repeatable. F.S.S.S.  
Prereq: Permission of Environmental Science Coordinator  
Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

ENSCI 502: Watershed Hydrology  
(Dual-listed with ENSCI 402). (Cross-listed with GEOL, MTEOR, NREM). (2-3) Cr. 3. F.  
Prereq: Four courses in physical or biological sciences or engineering; junior standing  
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.
ENSCI 504: Global Change
(Dual-listed with ENSCI 404). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. S.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENSCI 505: Environmental Biophysics
(Dual-listed with ENSCI 405). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MATH 165 and some exposure to computer programming (any language)
The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

ENSCI 507: Watershed Management
(Dual-listed with ENSCI 407). (Cross-listed with NREM). (3-3) Cr. 4. S.
Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 508I: Aquatic Ecology
(Cross-listed with IA LL, NREM). Cr. 4. SS.
Prereq: Courses in ecology, chemistry, and physics
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 509: Field Methods in Hydrogeology
(Dual-listed with ENSCI 409). (Cross-listed with GEOL). (0-4) Cr. 3. Alt. SS., offered even-numbered years.
Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 511: Hydrogeology
(Dual-listed with ENSCI 411). (Cross-listed with GEOL). (3-2) Cr. 4. F.
Prereq: Four courses in biological or physical sciences
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

ENSCI 513: Applied and Environmental Geophysics
(Dual-listed with ENSCI 413). (Cross-listed with C E, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

ENSCI 514: Applied Groundwater Flow Modeling
(Dual-listed with ENSCI 414). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: GEOL 411 or C E 473; MATH 165 or MATH 181
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 515: Paleoclimatology
(Dual-listed with ENSCI 415). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: Four courses in biological or physical science
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~ 1 million years).
ENSCI 516: Hydrologic Modeling and Analysis  
(Dual-listed with ENSCI 416). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: Four courses in earth science, meteorology, or engineering; junior standing  
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

ENSCI 518: Stream Ecology  
(Dual-listed with ENSCI 418). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: A ECL 486  
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 519: Aqueous and Environmental Geochemistry  
(Dual-listed with ENSCI 419). (Cross-listed with GEOL). (2-2) Cr. 3. S.  
Prereq: CHEM 178, CHEM 178L; junior classification  
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 520: Environmental Engineering Chemistry  
(Dual-listed with ENSCI 420). (Cross-listed with C E). (2-3) Cr. 3. F.  
Prereq: C E 326, CHEM 178  
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

ENSCI 521: Environmental Biotechnology  
(Cross-listed with C E). (2-2) Cr. 3. F.  
Prereq: C E 326  
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

ENSCI 522: Water Pollution Control Processes  
(Cross-listed with C E). (2-2) Cr. 3.  
Prereq: C E 421 or C E 521  
Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

ENSCI 523: Physical-Chemical Treatment Process  
(Cross-listed with C E). (2-2) Cr. 3.  
Prereq: C E 520  
Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

ENSCI 524: Air Pollution  
(Dual-listed with ENSCI 424). (Cross-listed with A B E, C E). (1-0) Cr. 1.  
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524A: Air Pollution: Air quality and effects of pollutants  
(Dual-listed with ENSCI 424A). (Cross-listed with A B E, C E). (1-0) Cr. 1.  
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524B: Air Pollution: Climate change and causes  
(Dual-listed with ENSCI 424B). (Cross-listed with A B E, C E). (1-0) Cr. 1.  
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524C: Air Pollution: Transportation Air Quality  
(Dual-listed with ENSCI 424C). (Cross-listed with A B E, C E). (1-0) Cr. 1.  
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.
ENSCI 524D: Air Pollution: Off-gas treatment technology
(Dual-listed with ENSCI 424D). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

ENSCI 524E: Air Pollution: Agricultural sources of pollution
(Dual-listed with ENSCI 424E). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 526: Stable Isotopes in the Environment
(Dual-listed with ENSCI 426). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Four courses in biological or physical science
Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 528: Solid and Hazardous Waste Management
(Cross-listed with C E). (3-0) Cr. 3.
Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing
Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

ENSCI 531: Design and Evaluation of Soil and Water Conservation Systems
(Cross-listed with A B E). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356
Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

ENSCI 532: Nonpoint Source Pollution and Control
(Cross-listed with A B E). (3-0) Cr. 3.
Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

ENSCI 533: Erosion and Sediment Transport
(Cross-listed with A B E, NRE M). (2-3) Cr. 3. F.
Prereq: C E 372 or GEOL/ENSCI/MTEOR 402, MATH 166 or equivalent
Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

ENSCI 534: Contaminant Hydrogeology
(Cross-listed with GEOL). (3-0) Cr. 3. S.
Prereq: GEOL 511 or equivalent
ENSCI 535: Restoration Ecology
(Cross-listed with EEOB, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 366 or BIOL 474 or graduate standing
Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

ENSCI 535I: Restoration Ecology
(Cross-listed with AECL, EEOB, IALL). Cr. 4. Alt. SS., offered even-numbered years.
Prereq: A course in ecology
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

ENSCI 536: Design and Evaluation of Soil and Water Monitoring Systems
(Cross-listed with ABE). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: ABE 431
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

ENSCI 537: Watershed Modeling and Policy
(Dual-listed with ENSCI 437). (Cross-listed with ABE). (2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CE 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

ENSCI 546: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with ENSCI 446). (Cross-listed with NREM). (2-3) Cr. 3. F.
Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

ENSCI 552: GIS for Geoscientists
(Dual-listed with ENSCI 452). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F.S.
Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 553: Soil-Plant Relationships
(Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 354
Composition and properties of soils in relation to the nutrition and growth of plants.

ENSCI 558: Laboratory Methods in Soil Chemistry
(Dual-listed with ENSCI 459). (Cross-listed with AGRON). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: AGRON 354 and CHEM 211
Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

ENSCI 559: Environmental Soil and Water Chemistry
(Dual-listed with ENSCI 459). (Cross-listed with AGRON). (3-3) Cr. 4. F.
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended
An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.
ENSCI 563: Soil Formation and Landscape Relationships
(Dual-listed with ENSCI 463). (Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or AGRON 260
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

ENSCI 563I: Soil Formation and Landscape Relationships
(Dual-listed with ENSCI 463I). (Cross-listed with AGRON, IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Prereq: AGRON 182 (or equivalent)
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 564: Wetland Ecology
(Dual-listed with ENSCI 464). (Cross-listed with EEOB). (3-0) Cr. 3. S.
Prereq: 15 credits in biological sciences.

ENSCI 564I: Wetland Ecology
(Cross-listed with EEOB, IA LL). Cr. 4. SS.
Prereq: IA LL 312I
Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

ENSCI 566: Ecosystem Service Management
(Dual-listed with ENSCI 466). (Cross-listed with ENT, NREM). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor
Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENSCI 568: Applied Geostatistics for Geoscientists
(Dual-listed with ENSCI 468). (Cross-listed with GEOL, MTEOR). Cr. 3. F.
Prereq: GEOL 452, C R P 351, C R P 452, NREM 345, or NREM 446
Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression).

ENSCI 571: Surface Water Hydrology
(Cross-listed with C E). (3-0) Cr. 3. S.
Prereq: C E 372
Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination.

ENSCI 572: Analysis and Modeling Aquatic Environments
(Cross-listed with C E). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: C E 372
Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

ENSCI 573: Groundwater Hydrology
(3-0) Cr. 3. F.
Prereq: C E 372

ENSCI 575: Soil Formation and Transformation
(Cross-listed with AGRON). (3-0) Cr. 3. F.
Prereq: AGRON 463 or equivalent
Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

ENSCI 577: Soil Physics
(Dual-listed with ENSCI 477). (Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 182 or equivalent and MATH 166 recommended
The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 578: Laboratory Methods in Soil Physics
(Cross-listed with AGRON). (0-3) Cr. 1. S.
Prereq: concurrent enrollment in AGRON 477 or AGRON 577
Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.
ENSCI 579: Surficial Processes
(Dual-listed with ENSCI 479). (Cross-listed with GEOL). (2-3) Cr. 3. F.
Prereq: GEOL 100 and GEOL 100L; or GEOL 201; or equivalent experience.
The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.

ENSCI 581: Environmental Systems I: Introduction to Environmental Systems
(Dual-listed with ENSCI 381). (Cross-listed with EEOB). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 582: Environmental Systems II: Analysis of Environmental Systems
(Dual-listed with ENSCI 382). (Cross-listed with EEOB). (2-2) Cr. 3. S.
Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 584: Ecosystem Science
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Combined 12 credits in biology, chemistry, and physics.
Advanced studies of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations and modern approaches to ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

ENSCI 585: Soil and Environmental Microbiology
(Dual-listed with ENSCI 485). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

ENSCI 586: Aquatic Ecology
(Dual-listed with ENSCI 486). (Cross-listed with A ECL, EEOB). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

ENSCI 586L: Aquatic Ecology Laboratory
(Dual-listed with ENSCI 486L). (Cross-listed with A ECL, EEOB). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 587: Microbial Ecology
(Dual-listed with ENSCI 487). (Cross-listed with EEOB, GEOL, MICRO). (3-0) Cr. 3. F.
Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

ENSCI 588: GIS for Geoscientists II
(Dual-listed with ENSCI 488). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

ENSCI 590: Special Topics
Cr. arr. Repeatable. F.S.SS.
Prereq: Permission of major professor in Environmental Science faculty
Literature reviews and conference in accordance with needs and interest of the student.

ENSCI 599: Creative Component
Cr. arr. Repeatable. F.S.SS.
Prereq: Permission of major professor in Environmental Science faculty
Creative component for nonthesis master of science degree.

Courses for graduate students:
ENSCI 685: Advanced Soil Biochemistry
(Cross-listed with AGRON, MICRO). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: AGRON 585
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

ENSCI 698: Seminar in Environmental Science
Cr. 1-3. Repeatable. S.
Reports and discussion of recent research and literature.

ENSCI 699: Research
Cr. arr. Repeatable. F.S.S.

Food Science (AGLS)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. There are two options in food science, and both options are approved by the Institute of Food Technologists: food science and technology option, and food science and industry option.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Students select one of the following options and complete all requirements for that option: food science and technology option or food science and industry option. Courses listed below are required for all of the options, except where specified by option below.

Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications and Library: 10 cr.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
SP CM 212 Fundamentals of Public Speaking 3
Total Credits 10

Humanities and Social Sciences: 6-12 cr.
Select Humanities course from approved list 3
ECON 101 Principles of Microeconomics 3
If H Sci student, select:

Additional Humanities course
Additional Humanities or Social Science course

Ethics: 3 cr.
FS HN 342 World Food Issues: Past and Present 3

Mathematical Sciences: 7-12 cr.
Food science and technology option:

MATH 165 Calculus I 4
MATH 166 Calculus II 4
Select at least 3 credits from:
STAT 101 Principles of Statistics 3
STAT 104 Introduction to Statistics 3
STAT 105 Introduction to Statistics for Engineers 3

Total Credits 11-12

Food science and industry option:
Select at least 4 credits from:

MATH 160 Survey of Calculus 4
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences 4
Select at least 3 credits from:
STAT 101 Principles of Statistics 3
STAT 104 Introduction to Statistics 3
STAT 105 Introduction to Statistics for Engineers 3

Total Credits 7-8

Physical Sciences: 14-20 cr.
Food science and technology option:

CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
PHYS 111 General Physics 5
or PHYS 115 & 115L Physics for the Life Sciences and Laboratory in Physics for the Life Sciences 5

Total Credits 20

Food science and industry option:
Select from:

CHEM 163 College Chemistry 5
CHEM 163L College Chemistry and Laboratory in College Chemistry 5
CHEM 177 General Chemistry I 5
CHEM 177L General Chemistry I and Laboratory in General Chemistry I 5
CHEM 178 General Chemistry II 5
CHEM 178L General Chemistry II and Laboratory in General Chemistry II 5
Food Science (AGLS)

CHEM 231  Elementary Organic Chemistry  3
CHEM 231L  Laboratory in Elementary Organic Chemistry  1
PHYS 111  General Physics  5
or PHYS 115  Physics for the Life Sciences  3
& 115L  Laboratory in Physics for the Life Sciences  1

Total Credits: 14-17

Biological Sciences: 12-13 cr.
Food science and technology option:
BBMB 301  Survey of Biochemistry  3
or BBMB 316  Principles of Biochemistry  3
BIOL 211  Principles of Biology I  3
BIOL 212  Principles of Biology II  3
MICRO 302  Biology of Microorganisms  3
MICRO 302L  Microbiology Laboratory  1

Total Credits: 13

Food science and industry option:
BBMB 301  Survey of Biochemistry  3
or BBMB 316  Principles of Biochemistry  3
BIOL 211  Principles of Biology I  3
BIOL 212  Principles of Biology II  3
MICRO 201  Introduction to Microbiology  2-3
or MICRO 302  Biology of Microorganisms  3
MICRO 201L  Introductory Microbiology Laboratory  1
or MICRO 302L  Microbiology Laboratory  1

Total Credits: 12-13

Food Science and Human Nutrition: 49 cr.
FS HN 101  Food and the Consumer  3
FS HN 110  Professional and Educational Preparation  1
FS HN 167  Introduction to Human Nutrition  3
FS HN 203  Contemporary Issues in Food Science and Human Nutrition  1
FS HN 207  Processing of Foods: Basic Principles and Applications  2
FS HN 311  Food Chemistry  3
FS HN 311L  Food Chemistry Laboratory  1
FS HN 315  Professional Development for Food Science Majors  2
FS HN 351  Introduction to Food Engineering Concepts  3
FS HN 403  Food Laws and Regulations  2
FS HN 405  Food Quality Assurance  2
FS HN 406  Sensory Evaluation of Food  3
FS HN 407  Microbiological Safety of Foods of Animal Origins  3
FS HN 410  Food Analysis  3
FS HN 411  Food Ingredient Interactions and Formulations  2
FS HN 412  Food Product Development  3
FS HN 420  Food Microbiology  3
FS HN 421  Food Microbiology Laboratory  3
FS HN 471  Food Processing  3
FS HN 472  Food Processing Laboratory  2
FS HN 480  Professional Communication in Food Science and Human Nutrition  1

Total Credits: 49

Select 6 credits from the following business courses:
ACCT 215  Legal Environment of Business  3
ACCT 284  Financial Accounting  3
ACCT 285  Managerial Accounting  3
ECON 301  Intermediate Microeconomics  3
ECON 320  Labor Economics  3
MGMT 310  Entrepreneurship and Innovation  3
MGMT 370  Management of Organizations  3
MGMT 371  Organizational Behavior  3
MGMT 414  International Management  3
MGMT 472  Management of Diversity  3
MIS 301  Management Information Systems  3
MKT 340  Principles of Marketing  3
MKT 447  Consumer Behavior  3
MKT 448  Global Marketing  3

Total Credits: 6

Electives: 0-12 cr. Select from any university coursework to earn at least 120 total credits.

Go to FS HN courses.

Food Science, B.S. - Food science & industry option

First Year

Fall  Credits  Spring  Credits
FS HN 101  3  FS HN 167  3
FS HN 110  3  CHEM 178 (if CHEM 177 was taken) or elective  3
CHEM 163 or 177  4  BIOL 212  3

### Notes
- This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.
The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including biodiversity, recreation, water, wilderness, wildlife, and wood and fiber. Conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, natural resource conservation and restoration, or sustainable materials science and technology. All options lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation’s forest lands and related ecosystems - private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment.

In consultation with their adviser, students can select elective courses related to elective courses in the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in the sustainable materials science and technology option can be selected to emphasize wood production, bio-renewable materials, wood fiber, business and marketing, and quality assurance. Elective courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FOR 201</td>
<td>Forest Biology</td>
<td>2</td>
</tr>
<tr>
<td>FOR 202</td>
<td>Sustainable Materials: Wood Utilization</td>
<td>2</td>
</tr>
<tr>
<td>FOR 203</td>
<td>Resource Measurements/Evaluation</td>
<td>2</td>
</tr>
</tbody>
</table>
That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

**Forestry Minor**

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

- ENSCI 345 Natural Resource Photogrammetry and Geographic Information Systems 3
- FOR 302 Silviculture 4
- FOR 356 Dendrology 3
- FOR 416 Forest Insects and Diseases 3
- FOR 416L Forest Insects and Diseases Laboratory 1
- FOR 442 Dynamics of Forest Stands 3
- FOR 451 Forest Resource Economics and Quantitative Methods 4
- FOR 452 Ecosystem Management 3
- FOR 475 Urban Forestry 3
- NREM 120 Introduction to Renewable Resources 3
- NREM 301 Natural Resource Ecology and Soils 4
- NREM 345 Natural Resource Photogrammetry and Geographic Information Systems 3
- NREM 390 Fire Ecology and Management 3
- NREM 407 Watershed Management 4
- NREM 446 Integrating GPS and GIS for Natural Resource Management 3
- NREM 471 Agroforestry Systems; Local and Global Perspectives 3

Sustainable materials science and technology emphasis: FOR 280 Wood Properties and Identification and an additional 12 credits from the following courses:

- FOR 480 Wood Anatomy and Fiber Analysis 3
- FOR 481 Conversion of Lignocellulosic Materials 3
- FOR 485 Wood and Natural Fiber Composites 3
- FOR 486 Drying Processes for Wood and Other Lignocellulosic Materials 3
- FOR 487 Physical Properties of Wood 4
- NREM 490B Independent Study: Forestry 1-4

**Curriculum in Forestry**

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications Proficiency (with a C or better):**

*To complete degree program in 4 years students must maintain an average of 16 credits per semester.*
Initial math course is determined on the basis of high school math and placement test scores. A non-credit math course (MATH 10) may be required at additional course.

In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

Note: In addition to coursework listed above, students must complete departmental requirements for Practical Work Experience requirement (NREM 104). See https://www.nrem.iastate.edu/workexperience

Courses primarily for undergraduates:

FOR 201: Forest Biology
(2-0) Cr. 2. F.
Prereq: Concurrent enrollment in FOR 202, FOR 203, FOR 204, FOR 205, and FOR 206
Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities.

FOR 202: Sustainable Materials: Wood Utilization
(2-0) Cr. 2. F.
Prereq: Concurrent enrollment in FOR 201, FOR 203, FOR 204, FOR 205, and FOR 206
Basis for use of wood as an industrial raw material for lumber, composites, pulp and paper, energy and chemicals. Implications of use of alternative renewable and non-renewable materials for societal infrastructure and consumer goods.

FOR 203: Resource Measurements/Evaluation
(2-0) Cr. 2. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 204, FOR 205, and FOR 206; MATH 140
Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood).

FOR 204: Forest Ecosystem Decision-Making
(2-0) Cr. 2. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 205, and FOR 206
Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.

FOR 205: Integrated Forestry Laboratory
(0-8) Cr. 3. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 206
Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

FOR 206: Fall Forestry Camp
Cr. 4. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 205
Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

FOR 280: Wood Properties and Identification
(3-3) Cr. 4. S.
Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

FOR 283: Pesticide Application Certification
(Cross-listed with AGRON, ENT, HORT). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

FOR 290: Special Problems
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290A: Special Problems: Leadership in Forestry Teams (LIFT) Learning Community
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290B: Special Problems: Forest Ecosystem Management
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290C: Special Problems: Natural Resource Conservation
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290D: Special Problems: Urban and Community Forestry
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor
FOR 290E: Special Problems: Wood Science and Technology  
Cr. 1-4. Repeatable.  
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 302: Silviculture  
(3-3) Cr. 4. S.  
Prereq: FOR 201, FOR 356, NREM 301  
Manipulation of forest vegetation based on ecological principles for the production of goods and services.

FOR 356: Dendrology  
(Cross-listed with BIOL). (2-2) Cr. 3. F.  
Prereq: BIOL 211  
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed.

(Cross-listed with NREM). (0.5-1) Cr. 1. S.  
Prereq: BIOL 212  
Survey of the major plant families, general, and representative species of the forest herbaceous layer. Functional ecology and restoration.

FOR 416: Forest Insects and Diseases  
(Cross-listed with PL P). (3-0) Cr. 3. F.  
Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent  
Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests.

FOR 416L: Forest Insects and Diseases Laboratory  
(Cross-listed with PL P). (0-3) Cr. 1. F.  
Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent.  
Credit or enrollment in PL P 416.  
Laboratory experience working with insect and fungal pests of trees.

FOR 442: Dynamics of Forest Stands  
(Dual-listed with FOR 542). (2-3) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: NREM 301, FOR 302, STAT 101 or their equivalents  
Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management.

FOR 451: Forest Resource Economics and Quantitative Methods  
(3-3) Cr. 4. S.  
Prereq: FOR 203, MATH 150  
Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Application of mathematical and statistical models to the solution of managerial problems.

FOR 452: Ecosystem Management  
(Dual-listed with FOR 552). (Cross-listed with NREM). (2-3) Cr. 3. S.  
Prereq: Senior classification, and NREM 120 or its equivalent  
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

FOR 454: Forestry Practicum  
(1-4) Cr. 3. S.  
Prereq: 20 credits in student’s major at 300 level or above  
Integrated decision-making related to the conservation, management, and preservation of private and public forests, wildlands, urban/community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client.

FOR 475: Urban Forestry  
(Cross-listed with HORT). (2-3) Cr. 3. F.  
Prereq: Junior or senior classification, 3 credits in biology  
Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management).

FOR 480: Wood Anatomy and Fiber Analysis  
(2-3) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: FOR 280 or permission of instructor  
Microscopic anatomy and ultrastructure of wood and other industrial lignocellulosic materials. Microscopy techniques for fiber analysis. Comparison of fiber properties.
FOR 481: Conversion of Lignocellulosic Materials
(2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: FOR 280 or equivalent

FOR 485: Wood and Natural Fiber Composites
(2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: FOR 280 or TSM 240
Consolidation behavior of wood and other lignocellulosic materials. Principles of adhesion. Manufacturing processes for wood and lignocellulose composites such as plywood, oriented strand products, laminated lumber, particleboard, medium density fiberboard, and bast fiber products. Extrusion processing of natural fiber/plastic composites.

FOR 486: Drying Processes for Wood and Other Lignocellulosic Materials
(2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: FOR 280 or TSM 240
Principles of moisture relations in hygroscopic materials; adsorption, desorption, equilibrium moisture content. Transport processes in natural materials such as wood. Drying processes for wood and other lignocellulosic materials. Influence of moisture on dimensional stability and durability of wood and lignocellulosic composites.

FOR 487: Physical Properties of Wood
(3-3) Cr. 4. Alt. S., offered even-numbered years.
Prereq: FOR 280
Mechanical, thermal, electrical, and acoustical properties of wood. Lumber grading and stress rating, nondestructive evaluation of wood and wood composite products.

Courses primarily for graduate students, open to qualified undergraduates:

FOR 542: Dynamics of Forest Stands
(Dual-listed with FOR 442). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: NREM 301, FOR 302, STAT 101 or their equivalents
Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management.

FOR 552: Ecosystem Management
(Dual-listed with FOR 452). (Cross-listed with NREM). (2-3) Cr. 3. S.
Prereq: Senior classification, and NREM 120 or its equivalent
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

FOR 599: Creative Component
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599A: Creative Component: Forest Biology
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599B: Creative Component: Forest Biometry
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599C: Creative Component: Forest and Recreation Economics
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599D: Creative Component: Forest Management and Administration
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599E: Creative Component: Wood Science
Cr. 1-12. Repeatable, maximum of 12 credits.

Courses for graduate students:

FOR 696: Research Seminar
(Cross-listed with AGRON, BBMB, GDCB, HORT, PLBIO). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

FOR 699: Research
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699A: Research: Forest Biology - Wood Science
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699B: Research: Forest Biometry
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699C: Research: Forest Economics
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699D: Research: Forest Management and Administration
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699E: Research: Wood Science
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699F: Research: Plant Physiology
Cr. 1-12. Repeatable, maximum of 12 credits.

Genetics

Dr. Scott Nelson, Chair, Genetics Major Committee
Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

**Undergraduate Study**

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/ biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

**Curriculum in Genetics - Requirements**

**Total Degree Requirement: 120 cr.**

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. **Genetics and Life Sciences**

A grade of C– or better is required in all Genetics and Life Science courses.

**A. Courses required of all Genetics majors**

**Total Credits: 35-36**

2. **Advanced Sciences Electives: 6 cr. from program approved list**

A grade of C- or better is required in each course. No more than 3 cr. of GEN 490, 490R, 490H, 492, 496, 499, or 499H may be used to meet this requirement.
3. Mathematical Sciences
Complete at least one calculus course from MATH, minimum of 4 credits.

- MATH 160 Survey of Calculus
- MATH 165 Calculus I
- MATH 181 Calculus and Mathematical Modeling for the Life Sciences

Complete at least one course from STAT, minimum of 3 credits.

- STAT 101 Principles of Statistics
- STAT 104 Introduction to Statistics

Complete at least one additional course from MATH or STAT, minimum of 4 credits.

- MATH 166 Calculus II
- STAT 301 Intermediate Statistical Concepts and Methods

Total Credits: 11-12

4. Supporting Sciences
CHEM 177 General Chemistry I
CHEM 177L Laboratory in General Chemistry I
CHEM 178 General Chemistry II
CHEM 331 Organic Chemistry I
CHEM 331L Laboratory in Organic Chemistry I
CHEM 332 Organic Chemistry II
CHEM 332L Laboratory in Organic Chemistry II
PHYS 111 General Physics
or PHYS 221 Introduction to Classical Physics I
PHYS 112 General Physics
or PHYS 222 Introduction to Classical Physics II

Choose one of the following options: 6-7

Option 1
- BBMB 404 Biochemistry I
- BBMB 405 Biochemistry II
- BBMB 411 Techniques in Biochemical Research
- CHEM 211 Quantitative and Environmental Analysis
  & 211L and Quantitative and Environmental Analysis Laboratory
- CHEM 325 Chemical Thermodynamics

Option 2
- BBMB 420 Mammalian Biochemistry
- BBMB 411 Techniques in Biochemical Research

Total Credits: 33-34

5. International Perspectives: 3 cr. from university approved list
This course can satisfy both the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list
This course can satisfy both the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Information Literacy
A. Courses required of all Genetics majors

- ENGL 150 Critical Thinking and Communication
- ENGL 250 Written, Oral, Visual, and Electronic Composition
  or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors
- LIB 160 Information Literacy
- One advanced English writing course from program approved list

Total Credits: 10

B. Course required of majors in the College of Agriculture and Life Sciences only.
A grade of C or better is required by the college.

- SP CM 212 Fundamentals of Public Speaking
- or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences

Total Credits: 3

8. General Education electives
Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

- Humanities course from college approved list
- Social Science course from college approved list
Ethics course from college approved list 3

Total Credits 9

B. College of Liberal Arts and Sciences

Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list 12

Social Science courses from college approved list 9

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.

Total Credits 21

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used only to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

**GEN 110: Genetics Orientation**  
(1-0) Cr. 1. F.  
This course is intended for first year students and others new to the genetics major. Discussion of university policies and resources, requirements of the major, career opportunities, and other topics related to the first year experience.

**GEN 112: Genetics Orientation for Transfer Students**  
(0.5-0) Cr. 0.5. S.  
Eight-week course for external transfer students and internal change of major students. Discussion of university policies and resources, requirements of the major, and career opportunities. Only one of GEN 110 or 112 may count toward graduation.

**GEN 298: Cooperative Education**  
Cr. R. F.S.S.  
*Prereq: Permission of department cooperative education coordinator; sophomore classification*  
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**GEN 313: Principles of Genetics**  
(Cross-listed with BIOL). (3-0) Cr. 3. F.S.S.  
*Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L*  
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

**GEN 313L: Genetics Laboratory**  
(Cross-listed with BIOL). (0-3) Cr. 1. F.  
*Prereq: Credit or enrollment in BIOL 313*  
Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

**GEN 320: Genetics, Agriculture and Biotechnology**  
(Cross-listed with AGRON). (3-0) Cr. 3. F.S.  
*Prereq: BIOL 212*  
Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

**GEN 322: Introduction to Bioinformatics and Computational Biology**  
(Cross-listed with BCBIO, BIOL). (3-0) Cr. 3. F.  
*Prereq: BIOL 212*  
Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.
GEN 340: Human Genetics
(3-0) Cr. 3. F.S.S.
Prereq: BIOL 313 or GEN 313
Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

GEN 349: The Genome Perspective in Biology
(Cross-listed with BIOL). (2-2) Cr. 3. S.
Prereq: GEN 313 or GEN 320
Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems.

GEN 398: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 402: Microbial Genetics and Genomics
(Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: MICRO 302, BIOL 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics.

GEN 409: Molecular Genetics
(3-0) Cr. 3. F.S.
Prereq: BIOL 313 or GEN 313
Principles of molecular genetics and analysis of gene expression, including elements of the Central Dogma (DNA replication, transcription, and translation) and gene regulation. Utilizing examples from the primary literature to illustrate experimental design, data analysis, and interpretation.

GEN 410: Analytical Genetics
(3-0) Cr. 3. F.S.
Prereq: BIOL 313 or GEN 313

GEN 444: Bioinformatic Analysis
(Cross-listed with BCB, BCBIO, BIOL, COM S, CPR E). (4-0) Cr. 4. F.
Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

GEN 462: Evolutionary Genetics
(Cross-listed with BIOL). (3-0) Cr. 3. F.
Prereq: BIOL 315
The genetic basis of evolutionary processes in eukaryotic organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

GEN 490: Independent Study
Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: GEN 313, junior or senior classification, permission of instructor
Independent study in any area of genetics. Students may use no more than 9 credits of university-wide 490 credits (including Gen 490) toward the total of 120 credits required for graduation.

GEN 491: Undergraduate Seminar, Professional Practice in Genetics Disciplines
(1-0) Cr. 1. F.S.
Prereq: BIOL/GEN 313; credit or enrollment in GEN 409 or GEN 410; Junior Classification
Intended to develop career objectives and obtain positions appropriate to the goals of students, in particular juniors, in preparation for position searches in the senior year. Discussion of various career paths in genetics disciplines; identification of experiences to enhance entry to specific careers; exposure to professional practices not covered elsewhere including literature database management, scientific figure preparation for publication, the peer-review journal system, the federal competitive grants system, laboratory budgets and management, authorship and collaborations, etc.; preparation of effective curricula vitae and application letters; and verbal scientific discourse appropriate to interview interactions and other professional settings.
GEN 492: Undergraduate Teaching Experience  
Cr. 1-2. Repeatable, maximum of 9 credits. F.S.  
Prereq: BIOL 212, junior or senior classification, permission of instructor  
For students registering to be undergraduate laboratory or classroom assistants. Offered on a satisfactory-fail basis only. No more than 2 credits of GEN 492 may be applied toward the Genetics advanced course requirement.

GEN 495: Special Topics in Genetics  
(1-0) Cr. 1-3. Repeatable, maximum of 3 credits. F.S.  
Prereq: GEN 313; permission of instructor  
Content varies from year to year. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 496: Attendance and Critique of Genetics Seminars  
Cr. 1. Repeatable, maximum of 3 credits. F.S.  
Prereq: GEN 313, junior or senior classification, permission of instructor  
Attendance and critique of departmental seminars in BBMB, GDCB, or EEOB. Offered on a satisfactory-fail basis only. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 498: Cooperative Education  
Cr. R. F.S.S.  
Prereq: Permission of department cooperative education coordinator; senior classification  
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 499: Genetics Research  
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.S.  
Prereq: GEN 313, junior or senior classification, permission of instructor  
Independent research in any area of genetics. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 499H: Genetics Research for Honors  
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.S.  
Prereq: GEN 313, junior or senior classification, permission of instructor  
Independent research in any area of genetics; for Honors students only. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

Global Resource Systems

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global resource issues. Students develop a core set of technical competencies in a resource area selected from the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural internship experience. They carry out a senior project related to their resource specialization within the context of the world region. The undergraduate experience culminates with a senior capstone course, where students work with real-world clients to address global resource challenges.

Multidisciplinary themes are developed in the context of the physical, biological and socio-economic factors affecting global resource systems. In this context, resource systems include natural, food and agricultural, environmental, cultural and human, political and institutional, financial and built, and social resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team. They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing an additional major, minor or certificate program offered through the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 129 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
3 cr. from approved list

U.S. Diversity: 3 cr.
3 cr. from approved list

Communications Proficiency:

English composition (6 credits with a grade of C or higher; see courses below.)
Speech fundamentals (3 credits with a grade of C or higher; see courses below.)

### GLOBE 110: Orientation

(1-0) Cr. 1. F.

### GLOBE 120: Geography of Global Resource Systems

(3-0) Cr. 3. F.
A survey of geographic concepts with a specific focus on the distribution of natural and human-generated resources and the demand for those resources on a global scale.
Meets International Perspectives Requirement.

### GLOBE 201: Global Resource Systems

(3-0) Cr. 3. F.S.
A comparative analysis of global resources and the various natural and human systems affecting those resources. Assessed service-learning component.

### GLOBE 211: Issues in Global Resource Systems

(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.
Discussion of topics of current importance in global resource systems.
Offered on a satisfactory-fail basis only. A maximum of 3 credits of 211 may be used towards degree requirements.

### GLOBE 220: Globalization and Sustainability

(Cross-listed with ANTHR, ENV S, M E, MAT E, SOC). (3-0) Cr. 3. F.S.
An introduction to understanding the key global issues in sustainability.
Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.
Meets International Perspectives Requirement.

### GLOBE 221: Apprenticeship

Cr. R. Repeatable. F.S.S.S.
*Prereq: Approval by the Global Resource Systems Faculty Coordinator*
Practical work experience in approved domestic or international settings such as with a company, research laboratory, governmental agency or non-governmental organization. Offered on a satisfactory-fail basis only.
GLOBE 290: Independent Study
Cr. 1-2. Repeatable. F.S.S.
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for first-year students and sophomores.

GLOBE 290H: Independent Study, Honors
Cr. 1-2. Repeatable. F.S.S.
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for first-year students and sophomores.

GLOBE 303: Agricultural, Food and Natural Global Resource Systems
(3-0) Cr. 3. F.
Prereq: GLOBE 201, ECON 101 or ECON 102
In-depth analysis of the opportunities, constraints and consequences of agricultural, food and natural resource systems. Topics integrate global natural resources with agriculture and food systems, nutrition and health, sustainable development, and societal structures, including gender, migration and urbanization. Course content utilizes a systems approach.

GLOBE 304: Socio-Economic Global Resource Systems
(3-0) Cr. 3. S.
Prereq: GLOBE 201, ECON 101 or ECON 102
In-depth analysis of the opportunities, constraints and consequences of social, economic and political global resource systems. Topics integrate agriculture and food production, globalization, population, economic planning, energy, security, trade, and policy and their role in defining different world regions. Course content utilizes a systems approach.

GLOBE 320: Global Resource Systems Internship Preparation
(1-0) Cr. 1. S.
Prereq: Permission of instructor.
Students enrolled in this course intend to enroll in Globe 321 or 322 in the following term. Topics provide a pre-departure orientation, including logistical, academic, cultural, and personal requirements for completion of an experiential supervised work experience.

GLOBE 321: Internship - Global
Cr. 3-6. Repeatable. F.S.S.
Prereq: GLOBE 320, Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
A supervised learning experience including an analysis of an international location's resource system via immersion in a foreign culture lasting at least five weeks. The experience should focus on the region consistent with the student's degree track. Course expenses paid by student. A maximum of 12 credits of GLOBE 321 and 322 may be used for degree requirements.

GLOBE 322: Internship - United States
Cr. 3-6. Repeatable. F.S.S.
Prereq: GLOBE 320, Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
A supervised learning experience including an analysis of a domestic location's resource system via immersion in a different culture within the United States lasting at least five weeks. Designed for international students and for students who are not in a position to leave the United States. Course expenses paid by student. A maximum of 12 credits of Globe 321 and 322 may be used for degree requirements.

GLOBE 335: The Economics of Global Agricultural Food and Bio-energy
(Cross-listed with ECON). (3-0) Cr. 3.
Prereq: ECON 101
Applied economic analysis of the determinants of world agricultural production, marketing, and use in feed, food, fiber, biofuel, and other applications, and global food processing and consumption. Analysis of market case studies and various data on global agricultural production and transformation, land and resource use, demography, economic activity, nutrition and health trends.
Meets International Perspectives Requirement.

GLOBE 385: Economic Development
(Cross-listed with ECON). (3-0) Cr. 3.
Prereq: ECON 101, ECON 102
Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid.
Meets International Perspectives Requirement.
GLOBE 398: Cooperative Education  
Cr. R. F.S.S.  
Prereq: Permission of faculty coordinator for the major.  
Students must complete GLOBE 398 Cooperative Education Approval Form and register for GLOBE 398 before commencing each work period. Work periods for students in cooperative education related to Global Resource Systems. Offered on a satisfactory-fail basis only.

GLOBE 401: Senior Project  
Cr. 3. F.S.S.  
Prereq: Senior classification in Global Resource Systems  
Research project in collaboration with faculty that complements and furthers a student's experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation.

GLOBE 401H: Senior Project, Honors  
Cr. 3. F.S.S.  
Prereq: Senior classification in Global Resource Systems  
Research project in collaboration with faculty that complements and furthers a student's experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation.

GLOBE 402: Responses to Global Resource System Challenges  
(3-0) Cr. 3. S.  
Capstone analysis of critical global resource challenges facing both developed and developing countries. Students will use research skills to investigate specific global resource issues and use communications skills to work as a team to integrate their research, develop an interdisciplinary perspective, and evaluate potential solutions to resource challenges.

GLOBE 441: International Animal Agriculture  
(Cross-listed with AN S). (3-0) Cr. 3. S.  
Prereq: Two courses from AN S 223, AN S 225, AN S 226, AN S 229, AN S 235  
An overview of animal agriculture with emphasis in developing countries. Historical, economic, environmental, and political considerations will be assessed and evaluated. Issues related to gender, resilience and sustainability for different production systems including alternative livestock species, will be investigated. The role of animal source foods in attainment of global food security will be discussed. Meets International Perspectives Requirement.

GLOBE 446: International Issues and Challenges in Sustainable Development  
(Cross-listed with AGRON, INTST). Cr. 3. F.S.  
Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor  
Interdisciplinary study and analysis of agricultural systems, sustainable management, and impact on plants and animal biodiversity. International field experience in evaluating different agricultural systems and impact on biodiversity may be required. A program fee is charged to students for international study abroad. Meets International Perspectives Requirement.

GLOBE 490: Independent Study  
Cr. 1-4. Repeatable. F.S.S.  
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator  
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

GLOBE 490A: Independent Study: General  
Cr. 1-4. Repeatable. F.S.S.  
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator  
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

GLOBE 490E: Independent Study: Entrepreneurship  
Cr. 1-4. Repeatable. F.S.S.  
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator  
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

GLOBE 490H: Independent Study: Honors  
Cr. 1-4. Repeatable. F.S.S.  
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator  
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.
GLOBE 490Z: Independent Study: Service Learning
Cr. 1-4. Repeatable. F.S.S.
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. Assessed service-learning component. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

GLOBE 494: Service Learning
Cr. arr. F.S.S.
Prereq: Permission of instructor.
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling a professional ethics and accomplishing student learning goals. Course expenses paid by student. Assessed service-learning component.

GLOBE 494A: Service Learning: International
Cr. arr. Repeatable, maximum of 12 credits. F.S.S.
Prereq: Permission of instructor.
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling a professional ethics and accomplishing student learning goals. Course expenses paid by student. Assessed service-learning component.

GLOBE 494B: Service Learning: Domestic
Cr. arr. Repeatable, maximum of 12 credits. F.S.S.
Prereq: Permission of instructor.
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling a professional ethics and accomplishing student learning goals. Course expenses paid by student. Assessed service-learning component.

GLOBE 494C: Service Learning: U.S. Diversity Project
Cr. 3. Repeatable. F.S.S.
Prereq: Permission of Instructor
Selected projects that result in outcomes benefiting a non-Iowa State University entity, while instilling professional ethics and accomplishing student learning goals. Academic work under faculty supervision may include written reports, presentations, and guided readings. Course expenses paid by student. Assessed service-learning component.
Meets U.S. Diversity Requirement

GLOBE 495: Global Resource Systems Study Abroad Course Preparation
Cr. 1-2. Repeatable. F.S.
Prereq: Permission of instructor
Global resource systems topics will include the agricultural industries, climate, crops, culture, economics, food, geography, government, history, livestock, marketing, natural resources, public policies, soils, and preparation for travel to locations to be visited. Students enrolled in this course intend to register for Globe 494A, 496 or 497 the following term.

GLOBE 496: Global Resource Systems Study Abroad
Cr. 2-4. Repeatable. F.S.S.
Prereq: Permission of instructor
Extended field trips abroad to study global resource systems. Location and duration of trips will vary. Pre-trip sessions arranged through Globe 495. Trip expenses paid by student.
Meets International Perspectives Requirement.

GLOBE 497: Deans Global Ag and Food Leadership Program
Cr. 1-4. Repeatable. F.S.S.
Prereq: Permission of instructor
An integrated agricultural and food production and policy program that allows students to assess, analyze and evaluate complex, country-specific situations and to develop their skills, knowledge and abilities via team-oriented projects that involve complex issues such as development of effective foreign food aid and agricultural and food production systems, drivers of world hunger, sustainable resource management and efficacy of policy, and the role of the USA and the United Nations and other development agencies in these systems. International location and duration of program will vary. Pre-trip sessions arranged through Globe 495. Trip expenses paid by students.
Meets International Perspectives Requirement.

GLOBE 499: Undergraduate Research
Cr. arr. F.S.S.
Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
Research projects in collaboration with faculty.

Horticulture
To meet the educational needs of a student population with interests ranging from the biology of plants to landscape design/installation to fruit and vegetable production to golf course construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses.

The Department of Horticulture offers six options within the horticulture major:
1. Greenhouse Plant Production
2. Horticultural Food Crop Production and Management
3. Landscape Design, Installation, and Management
4. Public Horticulture
5. Horticulture Research
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management practices for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, fertilizer cooperatives, agricultural chemical companies, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

**Minors**

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. Both minors are earned by taking HORT 221 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above.

The Horticulture minor is a broad-based minor that does not focus within a specific area of horticulture. The 12 additional credits for this minor can be selected from the full list of Horticulture courses.

The Landscape Management minor focuses on landscape management including plant selection, landscape installation and management, and turfgrass management. The 12 additional credits for this minor can be selected from the following courses: HORT 240 Trees, Shrubs, and Woody Vines for Landscaping, HORT 281 Landscape Graphics, HORT 330 Herbaceous Ornamental Plants, HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs, HORT 342 Landscape Plant Installation, Establishment, and Maintenance, HORT 351 Turfgrass Establishment and Management or HORT 444 Landscape Construction Management.

**Curriculum in Horticulture**

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Options.

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. The requirements appear under Undergraduate Minors.

**Total Degree Requirement: 129 credits (cr.)**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**Biological Sciences: 18 cr.**

Horticulture

Total Credits
Minimum of 30

Soil Sciences: 3 cr.
AGRON 182 Introduction to Soil Science 3

Total Credits 3

Electives
No more than 4 cr. of Hort 490 may count toward graduation.

Options

Greenhouse Plant Production
The following courses are required to meet the Horticulture requirement:

HORT 240 Trees, Shrubs, and Woody Vines for Landscaping 3
HORT 322 Plant Propagation 3
HORT 330 Herbaceous Ornamental Plants 3
HORT 331 Hydroponic Food Crop Production 3
HORT 332 Greenhouse and Nursery Operations and Management 4
HORT 434 Floriculture Crop Production 3
HORT 435 Landscape Plant Production 3

Other recommended courses are:
HORT 391 Horticultural Management Experience
HORT 424 Sustainable and Environmental Horticulture Systems
HORT 476 Horticultural Postharvest Technology

Required for option:
ACCT 284 Financial Accounting 3

And select 9 cr. hours from the following:
ACCT 215 Legal Environment of Business
ACCT 285 Managerial Accounting
ACCT 316 Business Law
AGRON 206 Introduction to Weather and Climate
COM S 103 Computer Literacy and Applications

### Horticulture Research

The following courses are required for this option:

- AGEDS 312 Science With Practice 3
- HORT 322 Plant Propagation 3

**Biological Sciences:**

- BIOL 430 Principles of Plant Physiology 3

**Other recommended courses:**

- HORT 240 Trees, Shrubs, and Woody Vines for Landscaping
- HORT 330 Herbaceous Ornamental Plants
- HORT 331 Hydroponic Food Crop Production
- HORT 332 Greenhouse and Nursery Operations and Management
- HORT 342 Landscape Plant Installation, Establishment, and Maintenance
- HORT 391 Horticultural Management Experience

**Mathematical Sciences Requirement:**

- MATH 165 Calculus I
  - or MATH 181 Calculus and Mathematical Modeling for the Life Sciences
- MATH 166 Calculus II

**Physical Sciences Requirement:**

- BBMB 301 Survey of Biochemistry
  - or BBMB 404 Biochemistry I
- CHEM 177 General Chemistry I
- CHEM 177L Laboratory in General Chemistry I
- CHEM 178 General Chemistry II
- CHEM 178L Laboratory in College Chemistry II
- CHEM 331 Organic Chemistry I
- CHEM 331L Laboratory in Organic Chemistry I
- CHEM 332 Organic Chemistry II
- CHEM 332L Laboratory in Organic Chemistry II
- PHYS 111 General Physics
  - & PHYS 112 and General Physics

And select 5 cr. hours from the following:

- BBMB 404 Biochemistry I
- BBMB 405 Biochemistry II
- BBMB 411 Techniques in Biochemical Research
- BIOL 313 Principles of Genetics
- BIOL 313L Genetics Laboratory
- BIOL 314 Principles of Molecular Cell Biology
- BIOL 315 Biological Evolution
- CHEM 211 Quantitative and Environmental Analysis
- CHEM 211L Quantitative and Environmental Analysis Laboratory
- CHEM 316 Instrumental Methods of Chemical Analysis
- CHEM 316L Instrumental Analysis Laboratory
- CHEM 321L Laboratory in Physical Chemistry
- CHEM 322L Laboratory in Physical Chemistry
- CHEM 324 Introductory Quantum Mechanics
- COM S 107 Windows Application Programming
  - or COM S 20 Fundamentals of Computer Programming
- GEN 409 Molecular Genetics
- GEN 410 Analytical Genetics

### Landscape Design, Installation and Management

The following courses are required to meet the Horticulture requirement:

- HORT 240 Trees, Shrubs, and Woody Vines for Landscaping 3
- HORT 281 Landscape Graphics 2
- HORT 330 Herbaceous Ornamental Plants 3
- HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs 2
- HORT 342 Landscape Plant Installation, Establishment, and Maintenance 3
- HORT 351 Turfgrass Establishment and Management 3
- HORT 380 Principles of Garden Composition 2
- HORT 381 Beginning Garden Composition Studio 2
- HORT 444 Landscape Construction Management 3
- HORT 481 Advanced Garden Composition 2

**Other recommended courses are:**

- HORT 322 Plant Propagation
HORT 332  Greenhouse and Nursery Operations and Management  
HORT 391  Horticultural Management Experience  

Required for option:

ACCT 284  Financial Accounting 3

And select 9 cr. hours from the following: 9

ACCT 215  Legal Environment of Business
ACCT 285  Managerial Accounting
ACCT 316  Business Law
AGEDS 310  Foundations of Agricultural Education Programs
AGEDS 401  Planning Agriculture and Life Sciences Education Programs
COMST 102  Introduction to Interpersonal Communication
COMST 214  Professional Communication
COMST 317  Small Group Communication
ECON 101  Principles of Microeconomics
ECON 234  Small Business Management
ECON 334  Entrepreneurship in Agriculture
ENGL 220  Descriptive English Grammar
ENGL 303  Free-Lance Writing for Popular Magazines
ENGL 305  Creative Writing: Nonfiction
ENGL 309  Proposal and Report Writing
ENGL 313  Rhetorical Website Design
ENGL 415  Business and Technical Editing
ENGL 416  Visual Aspects of Business and Technical Communication
ENSCI 446  Integrating GPS and GIS for Natural Resource Management
ENSCI 461I  Introduction to GIS
FIN 301  Principles of Finance
JL MC 201  Reporting and Writing for the Mass Media
JL MC 310  Fundamentals of Photojournalism
MGMT 370  Management of Organizations
MGMT 371  Organizational Behavior
MGMT 471  Personnel and Human Resource Management
P R 220  Principles of Public Relations
SP CM 312  Business and Professional Speaking
SP CM 313  Communication in Classrooms and Workshops

Public Horticulture

The following courses are required to meet the Horticulture requirement:

HORT 240  Trees, Shrubs, and Woody Vines for Landscaping 3
HORT 282  Educating Youth Through Horticulture 3
HORT 322  Plant Propagation 3
HORT 330  Herbaceous Ornamental Plants 3

Other recommended courses:

HORT 281  Landscape Graphics
HORT 332  Greenhouse and Nursery Operations and Management
HORT 341  Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs
HORT 342  Landscape Plant Installation, Establishment, and Maintenance
HORT 351  Turfgrass Establishment and Management
HORT 351L  Turfgrass Establishment and Management Laboratory
HORT 376  Fundamentals of Field Production of Horticultural Food Crops
HORT 380  Principles of Garden Composition
HORT 381  Beginning Garden Composition Studio
HORT 391  Horticultural Management Experience

Turfgrass Management

The following courses are required to meet the Horticulture requirement:

HORT 240  Trees, Shrubs, and Woody Vines for Landscaping 3
HORT 351  Turfgrass Establishment and Management 3
HORT 351L  Turfgrass Establishment and Management Laboratory 1

**Graduate Study**

The graduate major in horticulture leads to the M.S. (thesis and non-thesis option) and Ph.D. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics and genomics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

**Courses primarily for undergraduates:**

**HORT 110: Professional and Educational Development in Horticulture.**

(1-0) Cr. 1. F.

Intended for first-year students and others new to the horticulture curriculum. Introduction to professional and educational development within horticulture. Focus is on university and career acclimation. Assessed service-learning component.
HORT 121: Home Horticulture  
(3-0) Cr. 3. F.S.  
Growing plants in and around the home including requirements for growing indoor plants, plant propagation, landscape design, and maintaining trees, lawns, flower, fruit, and vegetable gardens. Recitation includes demonstrations and hands-on activities that illustrate principles of designing, growing and maintaining plants for both indoor and outdoor gardens.

HORT 131: Floral Design  
(1-2) Cr. 2. S.  
Introduces basic geometric design of fresh arrangements, corsages, and holiday arrangements. Includes use of tools and supplies.

HORT 193: Topics in Horticulture  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193A: Topics in Horticulture: Greenhouse Crops  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193B: Topics in Horticulture: Nursery Crops  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193C: Topics in Horticulture: Turfgrass  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193D: Topics in Horticulture: Fruit Crops  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193E: Topics in Horticulture: Vegetable Crops  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193F: Topics in Horticulture: Cross-Commodity  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193G: Topics in Horticulture: Landscape Horticulture  
Cr. arr. Repeatable. F.S.S.  
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 221: Principles of Horticulture Science  
(2-2) Cr. 3. F.S.  
Prereq: Biol 211 or concurrent enrollment  
Biological principles of growing horticultural crops including anatomy, reproduction, light, temperature, water, nutrition, and growth and development. Laboratory exercises emphasize environmental factors and permit detailed observation of plant growth.

HORT 225: Spanish for Horticulture  
(3-0) Cr. 3. S.  
Introduction to basic conversation and communication skills in Spanish, and cross-cultural skills for working with Spanish speakers in the Horticulture industry, emphasizing the use of vocabulary and expressions common in the workplace.

HORT 240: Trees, Shrubs, and Woody Vines for Landscaping  
(2-2) Cr. 3. F.  
Identification of trees, shrubs, and woody vines. Factors influencing the horticultural use of woody plants. Field trips outside of regular class time may be required.

HORT 276: Understanding Grape and Wine Science  
(Cross-listed with FS HN). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: High school biology and chemistry.  
A scientific introduction to viticulture (grape-growing) and enology (wine-making). Topics include grape species and varieties, viticulture practices, fruit quality, geography, history, principles of fermentation and aging, wine classification, appreciation, evaluation, storage and service, regulations, wine as food. No wine tasting.

HORT 281: Landscape Graphics  
(0-4) Cr. 2. F.  
Introduction to computer and hand rendering techniques of landscape graphics. Students will gain proficiency in plan view and elevation graphics. Intensive studio and computer based instruction.
HORT 282: Educating Youth Through Horticulture
(2-3) Cr. 3. Alt. S., offered even-numbered years.
Planning, developing, and implementing science-based educational programs in a garden setting. Through hands-on experiences students will learn about horticulture, learning theory, and the application of science principles as they pertain to educating youth. Assessed service-learning component.

HORT 283: Pesticide Application Certification
(Cross-listed with AGRON, ENT, FOR). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

HORT 291: Horticulture Professional Development
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of instructor
Intensive training in preparation for intercollegiate competition in turfgrass, planting, design, plant identification, installation, cost estimating, and other skills at national contests in horticulture. Students must compete in related national competition to earn credit. Offered on a satisfactory-fail basis only. Only one credit of HORT 291A, 291B, or 291C may count toward Horticulture credits for graduation. A maximum of four credits of any combination of HORT 291A, 291B, and 291C may count toward credits for graduation.

HORT 291A: Horticulture Professional Development: Turfgrass Competition
(0-2) Cr. 1. Repeatable, maximum of 4 credits. F.
Prereq: Permission of instructor
Intensive training in preparation for intercollegiate competition in turfgrass, planting, design, plant identification, installation, cost estimating, and other skills at national contests in horticulture. Students must compete in related national competition to earn credit. Offered on a satisfactory-fail basis only. Only one credit of HORT 291A, 291B, or 291C may count toward Horticulture credits for graduation. A maximum of four credits of any combination of HORT 291A, 291B, and 291C may count toward credits for graduation.

HORT 291B: Horticulture Professional Development: Landscape Competition
(1-0) Cr. 1. Repeatable, maximum of 4 credits. S.
Prereq: Permission of instructor
Intensive training in preparation for intercollegiate competition in planting, design, plant identification, installation, cost estimating, and other skills at national contests in horticulture. Students must compete in related national competition to earn credit. Offered on a satisfactory-fail basis only. Only one credit of HORT 291A, 291B, or 291C may count toward Horticulture credits for graduation. A maximum of four credits of any combination of HORT 291A, 291B, and 291C may count toward credits for graduation.

HORT 291C: Horticulture Professional Development: Cross-Commodity
(0-2) Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of instructor
Intensive training in preparation for intercollegiate competition in planting, plant identification and other skills at national contests in horticulture. Students must compete in related national competition to earn credit. Offered on a satisfactory-fail basis only. Only one credit of HORT 291A, 291B, or 291C may count toward Horticulture credits for graduation. A maximum of four credits of any combination of HORT 291A, 291B, and 291C may count toward credits for graduation.

HORT 321: Horticulture Physiology
(3-0) Cr. 3. F.
Prereq: HORT 221 or BIOL 211
Principles of plant physiology relating to growth and development of horticultural plants including plant water relations, membrane transport, photosynthesis, photomorphogenesis, respiration, and phytohormones. Emphasis on plant’s responses to environmental factors (temperature, water, and light) including cellular and whole-plant physiology under stressful environments.

HORT 322: Plant Propagation
(2-2) Cr. 3. S.
Prereq: HORT 221 or BIOL 211
Fundamental principles underlying sexual and asexual propagation of plants; practice in reproducing plants by use of seeds, cuttings, layering, grafting and budding and tissue culture.

HORT 330: Herbaceous Ornamental Plants
(2-2) Cr. 3. F.
Prereq: HORT 221 or by permission of instructor
Identification, botanical characteristics, origins, propagation, uses and general culture of herbaceous annual and perennial plants for Midwestern gardens and landscapes.
HORT 331: Hydroponic Food Crop Production  
(2-2) Cr. 3. F.  
*Prereq: HORT 221 or AGRON 181 or 3 credits in biological sciences*  
Principles and practices of hydroponic systems, crop production and culture, aquaponic systems, and new food crops for hydroponic systems will be discussed. Laboratories will focus on demonstration and participation in practices and procedures used in hydroponic food crop production. Assessed service-learning component.

HORT 332: Greenhouse and Nursery Operations and Management  
(3-3) Cr. 4. S.  
*Prereq: HORT 221*  
Operation and management of greenhouses, nurseries, and other controlled environment agriculture structures and facilities. Principles of site selection, facility design and methods of monitoring and manipulating environmental, cultural, and management factors such as light, temperature, fertility, substrate, etc., to maximize production efficiency. Emphasis placed on the principles of production of both ornamental and food crops. Greenhouse analysis project required.

HORT 338: Seed Science and Technology  
(Cross-listed with AGRON). (2-3) Cr. 3. F.  
*Prereq: AGRON 181 (or equivalent) or HORT 221; BIOL 212*  
Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

HORT 341: Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs  
(2-0) Cr. 2. S.  
*Prereq: HORT 240 or L A 221 or L A 222*  
Cultivars of the most prevalent and economically important woody landscape plants will be taught. The importance of cultivars to the nursery and landscaping professions and suggestions for their proper usage will be discussed.

HORT 342: Landscape Plant Installation, Establishment, and Maintenance  
(2-3) Cr. 3. F.  
*Prereq: HORT 240 or L A 221 or L A 222*  
Principles and practices involved with establishment and maintenance of managed landscapes. Laboratory work involves site evaluation, installation techniques, postplant care, and maintenance of established landscape plants.

HORT 351: Turfgrass Establishment and Management  
(Cross-listed with AGRON). (3-0) Cr. 3. F.  
*Prereq: HORT 221 or AGRON 181 (or equivalent) or BIOL 211*  
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests.

HORT 351L: Turfgrass Establishment and Management Laboratory  
(Cross-listed with AGRON). (0-3) Cr. 1. F.  
*Prereq: Credit or enrollment in HORT 351*  
Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor.

HORT 354: Soils and Plant Growth  
(Cross-listed with AGRON). (3-0) Cr. 3. F.S.  
*Prereq: AGRON 182 or equivalent and BIOL 101*  
Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development.

HORT 354L: Soils and Plant Growth Laboratory  
(Cross-listed with AGRON). (0-3) Cr. 1. F.S.  
*Prereq: Agron or Hort major with credit or enrollment in AGRON 354*  
Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.

HORT 376: Fundamentals of Field Production of Horticultural Food Crops  
(3-0) Cr. 3. F.  
*Prereq: HORT 221 or AGRON 181*  
An introduction to field production of fruit and vegetable crops and the theoretical and practical knowledge required for successfully producing them. Topics will include basic principles and practices of fruit and vegetable production, site selection, soil techniques, irrigation management, equipment and tools, integrated pest management, season extension strategies, postharvest handling and food safety, marketing, and basic business planning for fruit and vegetable enterprises. Additionally, this course will prepare students for HORT 461 and HORT 471, that are advanced level courses focusing on fruit and vegetable production.

HORT 380: Principles of Garden Composition  
(2-0) Cr. 2. S.  
Functional and aesthetic aspects of landscape planning as a basis for design decisions; emphasis on spatial design and plant selection. Includes site analysis, development process, and design principles.
HORT 381: Beginning Garden Composition Studio  
(0-4) Cr. 2. S.  
Prereq: HORT 281 and HORT 240 or HORT 330, concurrent enrollment in HORT 380  
Introduction to landscape design process. Intensive studio-based projects implementing principles of landscape design, concept development, and graphic communication.

HORT 391: Horticultural Management Experience  
Cr. 1. Repeatable. F.S.S.
Prereq: HORT 221 or permission of instructor  
A structured work experience for the student to gain insight into management operations associated with production and management of horticultural crops. A report of 10 or more pages describing the student's experience is required. One credit is given for each term the student is enrolled in the course. A maximum of two credits may be used toward the horticultural sciences course requirements, and two additional credits may be used toward the 128 credits required for graduation.

HORT 398: Cooperative Education  
Cr. R. Repeatable. F.S.S.  
Prereq: Permission of department resource and career center coordinator  
Students must register for this course before commencing each work period.

HORT 421: Introduction to Plant Breeding  
(Cross-listed with AGRON). (3-0) Cr. 3. F.  
Prereq: GEN 320 or BIOL 313  
Fundamental principles of plant breeding and cultivar development, breeding methods for self-pollinated, cross-pollinated and clonal crops.

HORT 424: Sustainable and Environmental Horticulture Systems  
(Dual-listed with HORT 524). (Cross-listed with ENV S). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

HORT 434: Floriculture Crop Production  
(2-3) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: HORT 332  
Principles and practices of flowering and ornamental greenhouse crop production. Emphasis is placed on production of flowering potted plants, cut flowers, and foliage crops produced in greenhouses and other controlled environments. An overnight class field trip outside scheduled class time is required.

HORT 435: Landscape Plant Production  
(2-3) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: HORT 332  
Principles and practices of producing herbaceous and woody landscape plants for gardens, landscapes, restoration and other outdoor uses. Emphasis is placed on the production of: seedling plugs and rooted cuttings; container grown herbaceous annuals and perennials; trees, shrubs, and vines; and native plants. An overnight class field trip outside scheduled class time is required.

HORT 444: Landscape Construction Management  
(2-3) Cr. 3. S.  
Principles and practices of residential landscape construction. Encompasses project management, landscape estimating and overview of common landscape materials. Laboratory work involves field trips and project installation.

HORT 445: Horticulture Management and Administration  
(2-0) Cr. 2. F.  
Prereq: HORT 221 and junior or senior classification  
In-depth presentation and discussion of skills and strategies needed to manage a horticultural enterprise. Topics include motivating employees, managing meetings, conducting performance appraisals, dealing with conflict, and managing an increasingly diverse work force.

HORT 451: Professional Turfgrass Management  
(2-0) Cr. 2. Alt. S., offered odd-numbered years.  
Prereq: HORT 351  
Turfgrass science including the study of (1) specific information on soil chemistry and soil modification as they relate to the development and maintenance of turfgrass areas, (2) specialized management practices used in athletic field care, professional lawn care, and golf course industries, and (3) construction methods for golf courses and sports fields.

HORT 452: Integrated Management of Diseases and Insect Pests of Turfgrasses  
(Dual-listed with HORT 552). (Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: HORT 351  
Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.
HORT 453: Sports Turf Management
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: HORT 351
Management techniques for today’s specialized athletic fields. The horticultural and budgetary aspects of football, soccer, baseball, and softball fields will be presented. Field trips and laboratory exercises will develop a practical understanding of actual principles in field development, construction, and management.

HORT 454: Turf & Landscape Irrigation
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Irrigation systems and principles for turf and landscape environments. Topics include design, installation, equipment, management, and troubleshooting of irrigation systems for golf, athletic fields, residential lawns and landscapes. Participation in practical exercises and local field trips to irrigation sites is required.

HORT 461: Fruit Crop Production and Management
(2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: HORT 221
Principles and practices of small fruit, tree fruit, and nut culture and production. Morphology, physiology of growth and development, plant establishment, pest management, pruning, training, harvesting, storage, and marketing of commercial temperate fruit and nut crops. Emphasis on sustainable practices. Participation in practical exercises and local field trips is required.

HORT 471: Vegetable Production and Management
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: HORT 221
Principles of vegetable production with emphasis on sustainable production practices, market outlets, business aspects, and risk management. Topics will include crop classification and rotation; planting methods; crop climatic conditions, physiological growth & development; soil, water, and pest management; cover cropping; season extension strategies; harvest and postharvest management and marketing. Course involves visits to growers fields to observe/experience their production enterprise.

HORT 471L: Vegetable Production and Management Lab
(0-3) Cr. 1. Alt. S., offered even-numbered years.
Prereq: Junior or Senior status and concurrent enrollment in HORT 471 is required.
Hands-on training in the area of vegetable crop production. Students will have an opportunity to grow a variety of vegetables in a heated greenhouse and also conduct greenhouse and lab experiments. The lab also involves visits to vegetable production sites in Iowa to observe/experience and learn from growers and other agricultural professionals.

HORT 475: Urban Forestry
(Cross-listed with FOR). (2-3) Cr. 3. F.
Prereq: Junior or senior classification, 3 credits in biology
Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management).

HORT 476: Horticultural Postharvest Technology
(Dual-listed with HORT 576). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: HORT 221
Study of pre- and post-harvest factors, procedures, and challenges that affect market quality of horticultural commodities. Emphasis on storage and handling technologies to preserve quality and extend storage life of edible and ornamental horticultural crops. Field trips outside scheduled class time required.

HORT 481: Advanced Garden Composition
(0-4) Cr. 2. F.
Prereq: HORT 240 and HORT 330 and HORT 380 and HORT 381
Priority given to Landscape Design Installation and Management option students. Development of residential landscapes using design principles and the design process. Projects encompass site analysis, concept development, preliminary design, final design, and graphic presentation techniques. Techniques will include hand and computer rendering.

HORT 484: Organic Agricultural Theory and Practice
(Dual-listed with HORT 584). (Cross-listed with AGRON). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 9 cr. in biological or physical sciences
Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

HORT 490: Independent Study
Cr. arr. Repeatable.
Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.
HORT 490A: Independent Study: Greenhouse Crops  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490B: Independent Study: Nursery Crops  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490C: Independent Study: Turfgrass  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490D: Independent Study: Fruit Crops  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490E: Independent Study: Vegetable Crops  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490F: Independent Study: Cross-Commodity  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490G: Independent Study: Landscape Horticulture  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490H: Independent Study: Honors  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490I: Independent Study: International Study  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.

HORT 490J: Independent Study: Entrepreneurship  
Cr. arr. Repeatable.  
Prereq: Junior or Senior classification in horticulture or permission of instructor  
Investigation of topic holding special interest to the student.  
Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 129 credits required for graduation.
HORT 491: Seed Science Internship Experience  
(Cross-listed with AGRON). Cr. 1-2. Repeatable, maximum of 1 times. F.S.SS.  
Prereq: Agron 338, advanced approval and participation of employer and instructor  
A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

HORT 493: Workshop in Horticulture  
Cr. arr. Repeatable.  
Off campus. Offered as demand warrants. Workshops in horticulture.

HORT 494: Service Learning  
Cr. arr. Repeatable, maximum of 12 credits. F.S.SS.  
Prereq: Permission of instructor  
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation. Assessed service-learning component.

HORT 494A: Service Learning: International  
Cr. arr. Repeatable, maximum of 12 credits. F.S.SS.  
Prereq: Permission of instructor  
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation. Assessed service-learning component.

HORT 494B: Service Learning: Domestic  
Cr. arr. Repeatable, maximum of 12 credits. F.S.SS.  
Prereq: Permission of instructor  
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation. Assessed service-learning component.

HORT 495: Horticulture Travel Course Preparation  
Cr. R. Repeatable. F.S.SS.  
Prereq: Permission of instructor  
Limited enrollment. Students enrolled in this course also intend to register for Hort 496 the following term. Topics include preparation for safe international travel, the horticultural/agricultural industries, climate, crops, economics, geography, history, marketing, soils, culture, traditions, and horticultural/agricultural development of the country to be visited. Students enroll in this course the term immediately before travel to the foreign country.

HORT 496: Horticulture Travel Course  
Cr. 1-4. Repeatable. F.S.SS.  
Prereq: Permission of instructor  
Limited enrollment. Study and tour of production methods in major horticultural regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, cultures, and history of horticultural crops. Location and duration of tours will vary. Tour expenses paid by students.  
Meets International Perspectives Requirement.  

Courses primarily for graduate students, open to qualified undergraduates:

HORT 506: Crop Genetics  
(Cross-listed with AGRON). Cr. 3. F.  
Introduction to genetics of reproductive systems, recombination, segregation and linkage analysis, inbreeding, quantitative inheritance, fertility regulation, and polyploidy to prepare students for subsequent courses in crop improvement. Enrollment is restricted to off-campus MS in Plant Breeding students.

HORT 511: Integrated Management of Tropical Crops  
(Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221  
Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects.  
Meets International Perspectives Requirement.

HORT 524: Sustainable and Environmental Horticulture Systems  
(Dual-listed with HORT 424). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable.
HORT 530: Research Orientation
(1-3) Cr. 2. F.
Instruction in scientific methods and communication skills.

HORT 538: Seed Physiology and the Environment
(Cross-listed with AGRON), (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: AGRON 316; CHEM 231 or CHEM 331
Physiological aspects of seed development, maturation, longevity, dormancy, and germination of agronomic and horticultural crops and their interactions with field and storage environments. Emphasis on current literature and advanced methodology.

HORT 542: Introduction to Molecular Biology Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

HORT 542A: Introduction to Molecular Biology Techniques: DNA Techniques
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

HORT 542B: Introduction to Molecular Biology Techniques: Protein Techniques
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.SS.
Prereq: Graduate classification
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

HORT 542C: Introduction to Molecular Biology Techniques: Cell Techniques
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

HORT 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

HORT 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

HORT 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

HORT 542G: Introduction to Molecular Biology Techniques: Genomic Techniques
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

HORT 543: Seed Physiology
(Cross-listed with STB), (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality.

HORT 546: Strategies for Diversified Farming Systems
(Cross-listed with AGRON, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: SusAg 509
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.
HORT 551: Growth and Development of Perennial Grasses
(Cross-listed with AGRON). (2-0) Cr. 2. Alt. S., offered even-numbered
years.
Prereq: Junior or senior or graduate classification or permission of instructor
Selected topics on anatomy, morphology, and physiology relative to
growth and development of perennial grasses. Emphasis on growth and
development characteristics peculiar to grasses and variations of such
characteristics under natural and managed conditions.

HORT 552: Integrated Management of Diseases and Insect Pests of
Turfgrasses
(Dual-listed with HORT 452). (Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt.
S., offered even-numbered years.
Prereq: HORT 351
Identification and biology of important diseases and insect pests of
turfgrasses. Development of integrated pest management programs in
various turfgrass environments.

HORT 576: Horticultural Postharvest Technology
(Dual-listed with HORT 476). (2-3) Cr. 3. Alt. F., offered odd-numbered
years.
Prereq: HORT 221
Study of pre- and post-harvest factors, procedures, and challenges that
affect market quality of horticultural commodities. Emphasis on storage
and handling technologies to preserve quality and extend storage life of
edible and ornamental horticultural crops. Field trips outside scheduled
class time required.

HORT 584: Organic Agricultural Theory and Practice
(Dual-listed with HORT 484). (Cross-listed with AGRON, SUSAG). (3-0) Cr.
3. Alt. S., offered odd-numbered years.
Prereq: 9 cr. in biological or physical sciences
Understanding of the historical origins and ecological theories
underpinning the practices involved in organic agriculture.
Interdisciplinary examination of crop and livestock production and socio-
conomic processes and policies in organic agriculture from researcher
and producer perspectives.

HORT 590: Special Topics
Cr. arr. Repeatable.
Prereq: a major or minor in horticulture

HORT 593: Workshop in Horticulture
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593A: Workshop in Horticulture: Greenhouse Crops
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593B: Workshop in Horticulture: Nursery Crops
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593C: Workshop in Horticulture: Turfgrass
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593D: Workshop in Horticulture: Fruit Crops
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593E: Workshop in Horticulture: Vegetable Crops
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593F: Workshop in Horticulture: Cross-Commodity
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593G: Workshop in Horticulture: Landscape Horticulture
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 599: Creative Component
Cr. arr. Repeatable.

Courses for graduate students:

HORT 610: Graduate Seminar
Cr. 1. Repeatable. F.S.
Offered on a satisfactory-fail basis only.

HORT 690: Advanced Topics
Cr. arr. Repeatable.

HORT 696: Research Seminar
(Cross-listed with AGRON, BBMB, FOR, GDCB, PLBIO). Cr. 1. Repeatable.
Research seminars by faculty and graduate students. Offered on a
satisfactory-fail basis only.

HORT 698: Horticulture Teaching Practicum
(1-0) Cr. 1. S.
Prereq: Graduate student classification
Discussions are intended to foster the development of graduate students
as teaching assistants and future horticulture/plant science teachers.
Topics include establishing a classroom presence, improving lectures,
motivating students, dealing with difficult or disruptive students, and
developing a teaching philosophy. Offered on a satisfactory-fail basis
only.

HORT 699: Thesis and Dissertation Research
Cr. arr. Repeatable.
HORT 699A: Thesis and Dissertation Research: Greenhouse Crops
Cr. arr. Repeatable.

HORT 699B: Thesis and Dissertation Research: Nursery Crops
Cr. arr. Repeatable.

HORT 699C: Thesis and Dissertation Research: Turfgrass
Cr. arr. Repeatable.

HORT 699D: Thesis and Dissertation Research: Fruit Crops
Cr. arr. Repeatable.

HORT 699E: Thesis and Dissertation Research: Vegetable Crops
Cr. arr. Repeatable.

HORT 699F: Thesis and Dissertation Research: Cross-Commodity
Cr. arr. Repeatable.

HORT 699G: Thesis and Dissertation Research: Landscape Horticulture
Cr. arr. Repeatable.

HORT 699I: Thesis and Dissertation Research: Biotechnology
Cr. arr. Repeatable.

Industrial Technology

The Department of Agricultural and Biosystems Engineering offers a bachelor of science degree in Industrial Technology (ITec), as well as an undergraduate certificate in Occupational Safety. Students majoring in ITec choose between two options: Manufacturing or Occupational Safety. The department also offers a minor in Industrial Technology.

Required ITec courses are taught under the course designator TSM (Technology Systems Management).

Successful ITec graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach that uses science and engineering principles to focus on the way the constituent parts of a manufacturing system interrelate, how they work over time, and how they fit the context of larger systems. Graduates find careers within a variety of industries, businesses, and organizations in the fields of advanced manufacturing; robotics; automation and controls; electronics; lean manufacturing; quality management; safety management, loss prevention; or industrial hygiene.

Common job duties of ITec Manufacturing graduates include:

• quality management
• production supervision
• product process design
• facility planning and management

Common job duties of ITec Occupational Safety graduates include:

• development, management, and evaluation of safety programs and systems
• hazard identification and mitigation
• loss prevention

The certificate in occupational safety is designed to meet the needs of the students who will find themselves in management roles with responsibilities that include safety. The certificate program prepares technically-oriented managers to meet their professional safety responsibilities.

For more information about the Industrial Technology degree: http://www.abe.iastate.edu/undergraduate-students/industrial-technology/

For more information about the occupational safety certificate: http://www.abe.iastate.edu/home/certificate-in-occupational-safety/

Total Degree Requirement: 120 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

---

**Minor - Industrial Technology**

The Department of Agricultural and Biosystems Engineering offers a minor in industrial technology which may be earned by completing a minimum of 18 credits of technology systems management courses, which includes:

- TSM 115 Solving Technology Problems
- TSM 210 Fundamentals of Technology
- 9 credits from:
  - TSM 216 Advanced Technical Graphics, Interpretation, and CAD
  - TSM 240 Introduction to Manufacturing Processes for Metals
  - TSM 270 Principles of Injury Prevention and Safety
  - TSM 310 Total Quality Improvement
  - TSM 337 Fluid Power Systems Technology
  - TSM 340 Advanced Automated Manufacturing Processes
  - TSM 363 Electrical Power Systems and Electronics for Agriculture and Industry
  - TSM 370 Occupational Safety
  - TSM 371 Occupational Safety Management
  - TSM 372 Legal Aspects of Occupational Safety and Health
  - TSM 440 Cellular Lean Manufacturing Systems

For the undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science or for the undergraduate curriculum in industrial technology leading to the degree of bachelor of science.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering.

### Certificate in Occupational Safety

The Department of Agricultural and Biosystems Engineering offers a undergraduate certificate in occupational safety ([http://www.abe.iastate.edu/undergraduate-students/industrial-technology/certificate-in-occupational-safety](http://www.abe.iastate.edu/undergraduate-students/industrial-technology/certificate-in-occupational-safety)) which may be earned by completing a minimum of 20 credits of technology systems management courses, which includes:

- TSM 270 Principles of Injury Prevention and Safety
- TSM 370 Occupational Safety
- TSM 371 Occupational Safety Management
- TSM 372 Legal Aspects of Occupational Safety and Health
- TSM 470 Industrial Hygiene: Physical, Chemical, and Biological Hazards
- 6 credits from a departmentally approved list
- TSM 493D Workshop in Technology: Occupational Safety (Note: This course needs to be the last course taken toward completion of the Occupational Safety Certificate)

Courses primarily for undergraduates:
TSM 110: Introduction to Technology
(1-0) Cr. 1. F.
Prereq: AST or I Tec majors only or permission of instructor
Team-oriented introduction to agricultural systems technology and industrial technology. Internships, careers, competencies, academic success strategies, transition to academic life.

TSM 111: Experiencing Technology
(0-2) Cr. 1. S.
Prereq: AST or I Tec majors only or permission of instructor
Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of technology. Internships, competencies, industry visits.

TSM 114: Developing Responsible Learners and Effective Leaders
(Cross-listed with CON E, FS HN, HORT, NREM). (2-0) Cr. 2. S.
Prereq: NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

TSM 115: Solving Technology Problems
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment for credit in MATH 140 or higher
Solving technology problems and presenting solutions through data analysis and technical report writing. Problem solving cycle, unit conversion, unit factor method, SI units, significant digits, graphing, curve fitting and computer programming. Use of modern hardware and software tools for applied data-driven problem solving.

TSM 116: Introduction to Design in Technology
(2-2) Cr. 3. F.S.
Prereq: TSM 116
Use of parametric solid modeling software to create three dimensional solid models and document parts and assemblies. Includes national and international standards for documentation, design projects, and teamwork. Rapid prototyping design creation, 3D printing, assemblies, rendering, and detailing technical drawings.

TSM 201: Preparing for Workplace Seminar
(Cross-listed with A B E). (1-0) Cr. 1. F.S.
Prereq: Prereq: Sophomore classification in AE, AST, BSE, or I TEC
8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, and engineering/technical knowledge. Resumes; Cover Letters; Behavioral Based Interviewing; Industry Speakers; Preparation for internships experiences.

TSM 210: Fundamentals of Technology
(3-0) Cr. 3. F.S.
Prereq: TSM 115 or equivalent; and MATH 140 or higher
Introduction to problem solving related to fundamental agricultural and/or industrial technology systems and mathematical tools needed for data analysis. Basic laws of energy, force, and mass applied to technology systems such as: mechanical power transmission, heating, ventilation and air conditioning; electrical circuits. Introduction to engineering economics: using the time value of money to make economic decisions.

TSM 214: Managing Technology Projects
(2-0) Cr. 1. F.S.
Prereq: TSM 201 or A B E 201; and sophomore classification in A E, AST, BSE, or I TEC.
8 week course. Introduction to project management principles. Use of project management in technology-based projects for academic, industry, and personal use.

TSM 216: Advanced Technical Graphics, Interpretation, and CAD
(1-2) Cr. 2. F.S.
Prereq: TSM 116
Advanced computer-aided-design topics incorporating 3D design and documentation used in manufacturing settings. Topics include: geometric dimensioning and tolerancing, weldments, sheet metal parts, advanced visualization, feature based design of parts and assemblies.

TSM 240: Introduction to Manufacturing Processes for Metals
(1-4) Cr. 3. F.S.
Prereq: MATH 145
A study of selected materials and related processes used in metals manufacturing. Lecture and laboratory activities focus on materials, properties, and processes.

TSM 241: Introduction to Manufacturing Processes for Plastics
(1-2) Cr. 2. F.S.
Prereq: MATH 145
A study of selected materials and related processes used in plastics manufacturing. Lecture and laboratory activities focus on materials, properties, and processes.

TSM 270: Principles of Injury Prevention and Safety
(3-0) Cr. 3. F.S.
Basic foundations of injury causation and prevention from a personal perspective in home, motor vehicle, and the public environment, and a management perspective within the work environment. Offered online only.
TSM 310: Total Quality Improvement
(3-0) Cr. 3. S.
Prereq: STAT 101 or STAT 104, junior classification
Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - emphasis on teamwork and problem solving skills.

TSM 322: Preservation of Grain Quality
(3-0) Cr. 3. S.
Prereq: MATH 140 or higher
Principles and management for grain quality preservation. Quality measurement. Drying and storage. Fans and airflow through grain. Handling methods.

TSM 322L: Preservation of Grain Quality Laboratory
(0-3) Cr. 1. S.
Prereq: Credit or enrollment for credit in TSM 322

TSM 324: Soil and Water Conservation Management
(2-2) Cr. 3. S.
Prereq: MATH 140 or MATH 151
Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

TSM 325: Biorenewable Systems
(Cross-listed with A B E). (3-0) Cr. 3. F.
Prereq: CHEM 163 or higher, MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

TSM 327: Animal Production Systems
(3-0) Cr. 3. F.
Prereq: TSM 210
Confined animal feeding operations. Environmental controls for animal production. Response of animals to the environment. Heat and moisture balance in animal housing. Ventilation, water, feed handling, air pollution, odor and waste management systems.

TSM 330: Agricultural Machinery and Power Management
(2-3) Cr. 3. S.
Prereq: MATH 145 or MATH 151; and TSM 210
Selection, sizing, and operational principles of tractors and machinery systems. Cost analysis and computer techniques applied to planning and management of agricultural machine systems. Principles, operation, and application of agricultural machinery.

TSM 335: Tractor Power
(3-3) Cr. 4. F.
Prereq: TSM 210, MATH 145
Theory and construction of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

TSM 337: Fluid Power Systems Technology
(2-2) Cr. 3. S.
Prereq: TSM 210
Fundamental fluid power principles. Fluid properties. Function and performance of components such as pumps, valves, actuators, hydrostatic transmission. Analysis of fluid power circuits and systems. Introduction to electrohydraulics. Simulation of hydraulic systems with software. Course includes lab using fluid power trainers.

TSM 340: Advanced Automated Manufacturing Processes
(2-2) Cr. 3. F.
Prereq: TSM 210, TSM 216, TSM 240, MATH 151
NC programming operations for CNC mills and lathes. Transfer of parts descriptions into detailed process plans, tool selection, and NC codes. Computer assisted CAD/CAM NC programming for 2D/3D machining and machining of programmed NC code in lab.

TSM 363: Electrical Power Systems and Electronics for Agriculture and Industry
(3-3) Cr. 4. F.S.
Prereq: TSM 210, MATH 145
Fundamental electrical power theory and applications, code requirements, and safety considerations. Single-phase and three-phase circuits design, analysis, and safety; electric motor performance characteristics; motor controls; electrical conductor and safety equipment selection; lighting system technology and design; and electric power usage. Emphasis on agricultural and industrial applications.

TSM 370: Occupational Safety
(3-0) Cr. 3. F.S.
Prereq: TSM 270, junior standing
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards.
TSM 371: Occupational Safety Management  
(2-0) Cr. 2. S.  
Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 372: Legal Aspects of Occupational Safety and Health  
(2-0) Cr. 2. F.  
Prereq: TSM 371  
A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers' compensation, as well as common liability issues.

TSM 376: Fire Protection and Prevention  
(3-0) Cr. 3. F.  
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 393: Topics in Technology  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393A: Topics in Technology: Agriculture and Biosystems Management  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393B: Topics in Technology: Machine Systems  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393C: Topics in Technology: Manufacturing  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393D: Topics in Technology: Occupational Safety  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393E: Topics in Technology: Chemical Application Systems  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393F: Topics in Technology: Agricultural Safety and Health  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393G: Topics in Technology: Electronic Integration for Agriculture and Production Systems  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393I: Topics in Technology: Irrigation Systems Management  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 393J: Topics in Technology: Machinery Management Using Precision Agriculture Technology  
Cr. 1-4. F.S.SS.  
Offered as demand warrants. Web-based instruction.

TSM 397: Internship in Technology  
Cr. R. Repeatable. F.S.SS.  
Prereq: At least 45 credits of coursework, AST or I Tec major, and approval of internship coordinator  
A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399: Work Experience in Technology  
Cr. 2. Repeatable, maximum of 4 credits. F.S.SS.  
Prereq: TSM 397 in the preceding semester and approval of internship coordinator  
Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 maybe be used toward the total credits required for graduation.

TSM 415: Applied Project Management in Technology  
(1-2) Cr. 2. F.S.  
Prereq: Senior classification with less than 32 credits remaining; TSM 214; and credit or enrollment for credit in TSM 310.  
Implementation of project management principles using case studies and teamwork; problem definition in a technology context; development of charter for technology capstone project.

TSM 416: Technology Capstone  
Cr. 1-4. F.S.  
Prereq: TSM 415 in previous semester  
Application of project management tools to a technology capstone project; development and evaluation of potential project solutions using tools from the technology curriculum; problem resolution emphasizing communication, critical analysis, and planning techniques; presentation of project through oral presentation and written reports with input from client, faculty, and other stakeholders.
TSM 433: Precision Agriculture  
(Dual-listed with TSM 533). (2-2) Cr. 3. F.  
**Prereq: Junior standing.**  

TSM 440: Cellular Lean Manufacturing Systems  
(2-2) Cr. 3. F.  
**Prereq: TSM 310**  
Introduction to lean tools and techniques that reduce costs and improve business performance: JIT, VSM, SMED, Kaizen, Standard Work, Cycle Time Reduction, Takt Time, A3, etc. Emphasis on lean thinking and competency development through application: simulations, case studies, industry guests and mentors, teamwork and industry-related lean projects.

TSM 443: Statics and Strength of Materials for Technology  
(2-2) Cr. 3. S.  
**Prereq: PHYS 111; and MATH 145 or MATH 151**  
Application of standard analytic and computer based techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444: Facility Planning  
(3-0) Cr. 3. F.  
**Prereq: TSM 216; TSM 240; and STAT 101 or STAT 104**  
Fundamental principles and practices in designing, evaluating, and organizing new or existing facilities. Emphasis on AutoCAD-based facility design and production flow analysis, activity relationship analysis, lighting analysis, time studies, materials handling, supporting services design, and optimal facility location analysis.

TSM 455: Feed Processing and Technology  
(Dual-listed with TSM 555). Cr. 3. F.  
**Prereq: Junior classification**  
Introduction to formula feed manufacturing and the animal feed industry. Overview of feed ingredients and formulation, understanding and operation of feed production processing equipment including principles of conveying, grinding, mixing, conditioning, pelleting, and other processing techniques, and the formulation of concentrates, premixes, and rations. Students will become knowledgeable about the manufacturing of various animal feed types such as pelleted and extruded feed, aqua (fish) feed, liquid feeds, poured and pressed blocks, steam flaked feed, and pet food, and their effect on animal performance and health.

TSM 457: Feed Safety, Ingredient Quality and Analytics  
(Dual-listed with TSM 557). Cr. 3. S.  
**Prereq: Junior classification**  
Concepts of feed and grain safety and quality, including hazards and risks associated with common feeds and feed ingredients. Methods to monitor, manage, and mitigate hazards and risks in the context of feed and grain industries. Government regulations applicable to feed and grain safety. Differences between safety and quality factors, how they are measured and then used for decision-making (marketing, processing, or safe-use).

TSM 465: Automation Systems  
(2-2) Cr. 3. S.  
**Prereq: TSM 363**  
Theory and applications of automation systems. Emphasizes features, capabilities, design and programming skills of Programmable Logic Controller (PLC) based industrial control systems. Introduction to industrial robots and sensors.

TSM 470: Industrial Hygiene: Physical, Chemical, and Biological Hazards  
(3-0) Cr. 3. S.  
**Prereq: MATH 151 or higher**  
A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace.

TSM 471: Safety Laboratory  
(0-2) Cr. 1. S.  
**Prereq: Credit or enrollment for credit in TSM 470**  
Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplaces.

TSM 477: Risk Analysis and Management  
(Dual-listed with TSM 577). (3-0) Cr. 3. F.  
**Prereq: MATH 151; and STAT 101 or STAT 104**  
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 490: Independent Study  
Cr. 1-4. Repeatable.  
**Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department**  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.
TSM 490H: Independent Study: Honors
Cr. 1-4. Repeatable.
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490I: Independent Study: Manufacturing
Cr. 1-4. Repeatable.
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490J: Independent Study: Agriculture and Biosystems Management
Cr. 1-4. Repeatable.
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490M: Independent Study: Machine Systems
Cr. 1-4. Repeatable.
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490O: Independent Study: Occupational Safety
Cr. 1-4. Repeatable.
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 493: Workshop in Technology
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493A: Workshop in Technology: Agriculture and Biosystems Management
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493B: Workshop in Technology: Machine Systems
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493C: Workshop in Technology: Manufacturing
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493D: Workshop in Technology: Occupational Safety
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 495: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up
(Cross-listed with ABE). Cr. 1-2. Repeatable. F.S.SS.
Prereq: Permission of instructor
Preparation for, or follow-up of, study abroad experience (496). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 496 the following term or have had taken 496 the previous term.
Meets International Perspectives Requirement.

TSM 496: Agricultural and Biosystems Engineering Department Study Abroad
(Cross-listed with ABE). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 495.
Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:

TSM 533: Precision Agriculture
(Dual-listed with TSM 433). (2-2) Cr. 3. F.
Prereq: Junior standing.
TSM 540: Advanced Design and Manufacturing  
(3-0) Cr. 3. S.  
Prereq: Permission of instructor  
Application of six sigma philosophy to advance product design and process control. Application of value stream mapping to the existing manufacturing system to develop future continuous improvement plans. Application of Taguchi Parameter design methodologies for optimizing the performance of manufacturing processes. Application of Taguchi Tolerance Design methodologies for product design.

TSM 555: Feed Processing and Technology  
(Dual-listed with TSM 455). Cr. 3. F.  
Prereq: Junior classification  
Introduction to formula feed manufacturing and the animal feed industry. Overview of feed ingredients and formulation, understanding and operation of feed production processing equipment including principles of conveying, grinding, mixing, conditioning, pelleting, and other processing techniques, and the formulation of concentrates, premixes, and rations. Students will become knowledgeable about the manufacturing of various animal feed types such as pelleted and extruded feed, aqua (fish) feed, liquid feeds, poured and pressed blocks, steam flaked feed, and pet food, and their effect on animal performance and health.

TSM 557: Food Safety, Ingredient Quality and Analytics  
(Dual-listed with TSM 457). Cr. 3. S.  
Prereq: Junior classification  
Concepts of feed and grain safety and quality, including hazards and risks associated with common feeds and feed ingredients. Methods to monitor, manage, and mitigate hazards and risks in the context of feed and grain industries. Government regulations applicable to feed and grain safety. Differences between safety and quality factors, how they are measured and then used for decision-making (marketing, processing, or safe-use).

TSM 575: Safety and Public Health Issues in Modern Society  
(2-0) Cr. 2. Repeatable, maximum of 2 times.  
Exploration and analysis of current safety and public health issues impacting society. The focus will be on topics that impact individuals in work, public, and home environments.

TSM 577: Risk Analysis and Management  
(Dual-listed with TSM 477). (3-0) Cr. 3. F.  
Prereq: MATH 151; and STAT 101 or STAT 104  
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 590: Special Topics in Technology  
Cr. 1-4. Repeatable, maximum of 4 credits.  
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590A: Special Topics in Technology: Agriculture and Biosystems Management  
Cr. 1-4. Repeatable, maximum of 4 credits.  
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590B: Special Topics in Technology: Machine Systems  
Cr. 1-4. Repeatable, maximum of 4 credits.  
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590C: Special Topics in Technology: Manufacturing  
Cr. 1-4. Repeatable, maximum of 4 credits.  
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590D: Special Topics in Technology: Occupational Safety  
Cr. 1-4. Repeatable, maximum of 4 credits.  
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 593: Workshop in Technology  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor

TSM 599: Creative Component  
Cr. 1-3. Repeatable, maximum of 6 credits.  
A discipline-related problem to be identified and completed under the direction of the program adviser. Three credits required for all nonthesis master’s degree students.

Courses for graduate students:

TSM 601: Graduate Seminar  
(Cross-listed with A B E). (1-0) Cr. 1. F.  
Keys to starting a successful graduate research project. Effective literature review, formulating research questions, and setting goals. Practicing effectively communicating research and science. Effective strategies for scholarly writing, responding to feedback, peer-reviewing, successful publishing in journals, and curating scholarly output.
TSM 652: Program and Learner Evaluation
(3-0) Cr. 3.
Prereq: STAT 401 or equivalent
Techniques for evaluating learners, facilities, programs, and staff utilizing theories for developing measurement instruments. Outcomes assessment is emphasized.

TSM 655: Academic Leadership in Technology and Engineering
(3-0) Cr. 3.
Prereq: Permission of instructor
A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

TSM 657: Curriculum Development in Technology and Engineering
(3-0) Cr. 3.
Prereq: Permission of instructor
Basic concepts, trends, practices, and factors influencing curriculum development, techniques, organization and procedures. Emphasis will be given to course development using the backward design process.

TSM 694: Teaching Practicum
(Cross-listed with A B E). Cr. 1-3. Repeatable. F.S.
Prereq: Graduate classification and permission of instructor
Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

TSM 697: Internship in Technology
Cr. R.
Prereq: permission of major professor and approval by department chair, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

TSM 699: Research
Cr. arr.

International Agriculture
Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major
International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Minor
A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor can not be used for meeting requirements for the major.
For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

**Curriculum in International Agriculture**

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.

**Microbiology**

**Undergraduate Microbiology Major**

Interested in the study of small things that have a big impact? Then Microbiology may be the place for you.

Our mission in the Microbiology Program is to instill a comprehensive understanding of microbiology and its relevance to human society and global health, and to cultivate the concepts and skills necessary to succeed in microbiology-related careers.

Iowa State University offers:

- Extensive hands-on laboratory experiences that develop problem solving & technical skills used in a variety of professional careers
- Application of science to issues in the modern world
- Excellent preparation for human medicine and veterinary medicine
- Preparation for employment in a variety of professional settings
- Research opportunities and interaction with professors from across Iowa State University Departments of Animal Science, Plant Pathology and Microbiology, Biochemistry & Molecular Biology, Biology, Veterinary Microbiology, Veterinary Pathology, Food Science, Entomology, and Geology
- Degrees in microbiology at both the undergraduate (B.S.) level and graduate (M.S., PhD., see Graduate Major) level

**Career opportunities:**

Opportunities after graduation include the following:

- Biomedical research scientist
- Biotechnology firms
- Biorenewables industry
- Forensic scientist
- Pharmaceutical and vaccine development companies
- Immunologist
- Agricultural microbiology and plant pathology
- International agricultural research centers
- Government laboratories (CDC, NADC, USDA)
- Infectious disease
- Food safety and food technology
- Water quality
- Ecology and environmental microbiology
- Botanical gardens & nurseries
- Technical brewer
- Science writer
- Public health agencies
- Public policy organizations

Interested in Human medicine or Veterinary medicine? A microbiology degree prepares students for advanced study in Dentistry, Medical Laboratory Science, Optometry, Pharmacy, Physician Assistant Programs, and Physician or Veterinary education. Go to micro.iastate.edu (https://www.micro.iastate.edu) to find more information about the Microbiology Program.

**Curriculum in Microbiology**

www.micro.iastate.edu (http://www.micro.iastate.edu)

Administered by an interdepartmental committee.

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

International Perspectives Courses (https://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current)

**U.S. Diversity: 3 cr.**

U.S. Diversity Courses (https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses)

**Electives: 7-12**

**Communications Proficiency:**

| English composition - with a C or better | 6 |
| Speech fundamentals - with a C or better | 3 |
**Microbiology**

Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micrograd.iastate.edu.

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.
Courses primarily for undergraduates:

**MICRO 101: Microbial World**
(3-0) Cr. 3. F.
*Prereq: High school biology or equivalent*
Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

**MICRO 110: Professional and Educational Preparation in Microbiology**
(1-0) Cr. 1. F.
An introduction to curriculum and research opportunities in microbiology at Iowa State. Topics include: easing the transition to life as a university student, development of specific goals, strengthening interpersonal communication, professional portfolio creation and resume building. Offered on a satisfactory-fail basis only.

**MICRO 201: Introduction to Microbiology**
(2-0) Cr. 2. F.S.
*Prereq: One semester of college-level biology*
Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for Micro 302 in advanced courses.

**MICRO 201L: Introductory Microbiology Laboratory**
(0-3) Cr. 1. F.S.
*Prereq: Credit or enrollment in MICRO 201 or MICRO 302*
Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

**MICRO 302: Biology of Microorganisms**
(3-0) Cr. 3. F.S.S.
*Prereq: BIOL 211, credit or enrollment in BIOL 212; 1 semester of chemistry*
Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

**MICRO 302L: Microbiology Laboratory**
(0-3) Cr. 1. F.
*Prereq: Credit or enrollment in MICRO 302*
Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

**MICRO 310: Medical Microbiology**
(3-0) Cr. 3. F.
*Prereq: MICRO 302 (or MICRO 201 if a B or better was obtained)*
Study of infection by bacterial and viral pathogenic agents of humans with an overview of immune responses in controlling disease.

**MICRO 310L: Medical Microbiology Laboratory**
(0-3) Cr. 1. F.
*Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L; credit or enrollment in MICRO 310*
Microbiological tools and techniques to isolate, identify, and characterize medically significant microorganisms in relation to human diseases. Emphasis on the virulence factors of pathogenic organisms as compared to the normal flora.

**MICRO 320: Molecular and Cellular Bacteriology**
(4-0) Cr. 4. S.
*Prereq: MICRO 302, BIOL 313, credit or enrollment in CHEM 332*
A systems perspective of bacterial growth, survival, and cellular differentiation by integrating physiological and genetic principles. Emphasis is on prokaryotes although unicellular eukaryotes are also discussed. Topics include the structure, function, and assembly of cell components, molecular and genomic techniques, bioenergetics and metabolism, regulation of gene expression, genetic adaptation, stress tolerance, biofilms, and cell-cell interactions and communications.

**MICRO 353: Introductory Parasitology**
(Cross-listed with BIOL, V PTH). (3-0) Cr. 3. S.
*Prereq: BIOL 212*
Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

**MICRO 374: Insects and Our Health**
(Cross-listed with ENT). (3-0) Cr. 3. S.
*Prereq: 3 credits in biological sciences*
Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease.
Meets International Perspectives Requirement.

**MICRO 374L: Insects and Our Health Laboratory**
(Cross-listed with ENT). (0-3) Cr. 1. Alt. S., offered even-numbered years.
*Prereq: Credit or enrollment in ENT 374*
Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.
MICRO 402: Microbial Genetics and Genomics  
(Dual-listed with MICRO 502). (Cross-listed with GEN). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: MICRO 302, BIOL 313  
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics.

MICRO 407: Microbiological Safety of Foods of Animal Origins  
(Dual-listed with MICRO 507). (Cross-listed with FS HN). (3-0) Cr. 3. S.  
Prereq: MICRO 420  
Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

MICRO 408: Virology  
(3-0) Cr. 3. F.  
Prereq: BIOL 313 or BBMB 301. BIOL 314 recommended  
The molecular virology and epidemiology of human, animal, plant and insect viruses.

MICRO 419: Foodborne Hazards  
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: MICRO 201 or MICRO 302, a course in biochemistry  
Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service learning component. Only one of FS HN 419 and FS HN 519 may count toward graduation.

MICRO 420: Food Microbiology  
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. F.  
Prereq: MICRO 201 or MICRO 302  
Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.

MICRO 421: Food Microbiology Laboratory  
(Cross-listed with FS HN). (0-6) Cr. 3. S.  
Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420  
Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

MICRO 430: Procaryotic Diversity and Ecology  
(Dual-listed with MICRO 530). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: MICRO 302, MICRO 302L  
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 440: Laboratory in Microbial Physiology, Diversity, and Genetics  
(Cross-listed with BBMB). (2-6) Cr. 4. F.S.  
Prereq: MICRO 302, MICRO 302L, CHEM 332, BIOL 313L  
Fundamental techniques and theory for studying the cellular mechanisms, genetic processes and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments as well as an emphasis on genetic and molecular techniques to understand antibiotic resistance processes and mechanisms. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of bacteria. Essential components for the effective communication of scientific results are also emphasized.

MICRO 450: Undergraduate Capstone Colloquium  
(2-0) Cr. 2. S.  
Prereq: SP CM 212 and senior standing in Microbiology  
Required of all undergraduate majors in microbiology. Students demonstrate mastery of core courses in microbiology through discussion of current literature in microbiology and immunology, issues in scientific conduct, and bioethics in microbiology. Students present current papers in a journal club format and gain experience in writing and reviewing grant proposals.

MICRO 451: Survey in Microbiology  
Cr. R. F.  
Prereq: Junior or Senior standing in Microbiology  
Preparations for graduation. Topics include job search strategies, career information, mock interviews, graduate and professional school application processes and guidelines as well as outcomes assessment activities.
MICRO 456: Principles of Mycology
(Cross-listed with BIOL). (2-3) Cr. 3. F.
Prereq: 10 credits in biological sciences
Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health.

MICRO 475: Immunology
(Dual-listed with MICRO 575). (3-0) Cr. 3. S.
Prereq: MICRO 310
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 475 or VMPM 520, but not both, may be applied to graduation.

MICRO 475L: Immunology Laboratory
(1-4) Cr. 1. S.
Prereq: Credit or enrollment in MICRO 310 or MICRO 475 or MICRO 575
Techniques in primary culture and tumor cell growth, measures of lymphocyte function, serological techniques and flow cytometry. Half semester course.

MICRO 477: Bacterial-Plant Interactions
(Dual-listed with MICRO 577). (Cross-listed with PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: 3 credits in microbiology or plant pathology
Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

MICRO 485: Soil and Environmental Microbiology
(Dual-listed with MICRO 585). (Cross-listed with AGRON, ENSCI). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

MICRO 487: Microbial Ecology
(Dual-listed with MICRO 587). (Cross-listed with BIOL, ENSCI, GEOL). (3-0) Cr. 3. F.
Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

MICRO 490: Independent Study
Cr. 1-5. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490A: Independent Study: Laboratory Research
Cr. arr. Repeatable. F.S.S.
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490B: Independent Study: Literature Review
Cr. arr. Repeatable. F.S.S.
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490C: Independent Study: Instructional Assistant
Cr. arr. Repeatable. F.S.S.
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490G: Independent Study: General
Cr. arr. Repeatable. F.S.S.
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 495: Internship
Cr. 1-2. F.S.
Prereq: At least 6 credits of 300-level or above coursework in microbiology, approval of academic adviser
Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Offered on a satisfactory-fail basis only.
Courses primarily for graduate students, open to qualified undergraduates:

MICRO 502: Microbial Genetics and Genomics
(Dual-listed with MICRO 402). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: MICRO 302, Biol 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics.

MICRO 507: Microbiological Safety of Foods of Animal Origins
(Dual-listed with MICRO 407). (Cross-listed with FS HN). (3-0) Cr. 3. S.
Prereq: MICRO 420
Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

MICRO 509: Plant Virology
(Dual-listed with MICRO 509). (Cross-listed with PL P). (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: BIOL 313 or BBMB 301. BIOL 314 recommended.
Taxonomy, molecular mechanisms, host-interactions, vector transmission, epidemiology, detection, control and exploitation of plant viruses. Course will consist of a mixture of lectures, and student-led presentations using primary literature.

MICRO 517: Gut Microbiome: Implications for Health and Diseases
(Cross-listed with AN S, FS HN, V MPM). Cr. 3.
Prereq: Basic Knowledge in microbiology
Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health.

MICRO 525: Intestinal Microbiology
(Cross-listed with V MPM). Cr. 3. Alt. S., offered even-numbered years.
Prereq: Micro 302, BIOL 313
Overview of commensal microbiota in the health and well-being of vertebrates. Topics include diversity of intestinal structure, microbial diversity/function, innate immune development, community interactions and metabolic diseases associated with alterations of the intestinal microbiome.

MICRO 530: Procaryotic Diversity and Ecology
(Dual-listed with MICRO 430). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 540: Livestock Immunogenetics
(Cross-listed with AN S, V MPM). (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

MICRO 551: Microbial Diversity and Phylogeny
(1-0) Cr. 1. F.
Prereq: MICRO 302, BIOL 313
Comparisons among the three kingdoms of life (Bacterica, Archaea, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics.

MICRO 552: Bacterial Molecular Genetics and Physiology
(1-0) Cr. 1. F.
Prereq: MICRO 302, BIOL 313
Review of genetics and selected physiological topics of model bacteria.

MICRO 553: Pathogenic Microorganisms
(1-0) Cr. 1. F.
Prereq: MICRO 302, BIOL 313
Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.
MICRO 554: Virology
(1-0) Cr. 1. S.
Prereq: MICRO 302, BIOL 313
Introduction to virus life cycles including entry, gene expression strategies, replication, and mechanisms to modify and overcome host defenses. The roles of specific viruses and sub-viral agents in animal and plant disease will also be included.

MICRO 555: Fungal Biology
(1-0) Cr. 1. S.
Prereq: GEN 313 or GEN 320 or equivalent.
Ecology, genetics, physiology and diversity of fungi, from yeasts to mushrooms, and their importance in human affairs.

MICRO 556: Ecology of Microorganisms
(1-0) Cr. 1. S.
Prereq: MICRO 302, BIOL 313
The study of microorganisms in their natural environments, with a focus on terrestrial and aquatic ecosystems, including eukaryotic hosts; interactions within biofilms and communities, including intercellular communication and symbioses; microbial adaptations to extreme environments; and metagenomic, genomic, molecular and microscopy techniques for the study of microbes in natural systems.

MICRO 575: Immunology
(Dual-listed with MICRO 475). (Cross-listed with V MPM). (3-0) Cr. 3. S.
Prereq: MICRO 310
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 575 or V MPM 520, but not both, may be applied toward graduation.

MICRO 577: Bacterial-Plant Interactions
(Dual-listed with MICRO 477). (Cross-listed with PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: 3 credits in microbiology or plant pathology
Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

MICRO 585: Soil and Environmental Microbiology
(Dual-listed with MICRO 485). (Cross-listed with AGRON, ENSCI). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

MICRO 586: Medical Bacteriology
(Cross-listed with V MPM). (4-0) Cr. 4. F.
Prereq: 310
Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

MICRO 587: Microbial Ecology
(Dual-listed with MICRO 487). (Cross-listed with EEOB, ENSCI, GEOL). (3-0) Cr. 3. F.
Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

MICRO 590: Special Topics
Cr. 1-5. Repeatable. F.S.SS.
Prereq: Permission of instructor
Courses for graduate students:

MICRO 604: Seminar
(1-0) Cr. 1. Repeatable. F.S.
Course will expose students to the breadth of subdisciplines within microbiology, offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Offered on a satisfactory-fail basis only.

MICRO 608: Molecular Virology
(Cross-listed with PL P, V MPM). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BBMB 405 or GDCB 511
Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis.
MICRO 615: Molecular Immunology
(Cross-listed with BBMB, V MPM). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: BBMB 405 or BBMB 506 and BBMB 507
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

MICRO 625: Mechanisms of Bacterial Pathogenesis
(Cross-listed with V MPM). (4-0) Cr. 4. Alt. S., offered odd-numbered years.
Prereq: Credit in Biochemistry and Microbiology
Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

MICRO 626: Advanced Food Microbiology
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

MICRO 627: Rapid Methods in Food Microbiology
(Cross-listed with FS HN, TOX). (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

MICRO 685: Advanced Soil Biochemistry
(Cross-listed with AGRON, ENSCI). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: AGRON 585
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

MICRO 690A: Current Topics: Microbiology
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690B: Current Topics: Immunology
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690C: Current Topics: Infectious Diseases
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Permission of instructor
Colloquia or advanced study of specific topics in a specialized field.

MICRO 692: Molecular Biology of Plant-Pathogen Interactions
(Cross-listed with PL P). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: PL P 506 or BBMB 405 or GEN 411 or MICRO 402 or strong background in molecular biology
Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete a research proposal writing and peer review exercise.

MICRO 697: Graduate Research Rotation
Cr. arr. Repeatable. F.S.
Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

MICRO 698: Seminar in Molecular, Cellular, and Developmental Biology
(Cross-listed with BBMB, GDCB, MCDB, V MPM). (2-0) Cr. 1-2. Repeatable. F.S.
Student and faculty presentations.

MICRO 699: Research
Cr. arr. Repeatable.

Nutritional Science (AGLS)
Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs.
addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions.

The department also offers a nutrition minor.

Administered by the Department of Food Science and Human Nutrition

- Pre-Health Professional and Research Option
- Family Health Option
- Food Service Option
- Global Health and Policy Option
- Health Coach Option
- Nutrition and Wellness Option

PRE-HEALTH PROFESSIONAL AND RESEARCH OPTION

Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications and Library: 13 cr.

| ENGL 150 | Critical Thinking and Communication | 3 |
| ENGL 250 | Written, Oral, Visual, and Electronic Composition | 3 |
| ENGL 314 | Technical Communication | 3 |
| LIB 160 | Information Literacy | 1 |
| SP CM 212 | Fundamentals of Public Speaking | 3 |

Total Credits 13

Humanities and Social Sciences: 6-12 cr.
Select Humanities courses from approved list 3
Select Social Science course from approved list 3
If H Sci student, select:
  - Additional Humanities course 6
  - Additional Humanities or Social Science course 3

Ethics 3 cr.
FS HN 342 World Food Issues: Past and Present 3

Mathematical Sciences: 6-12 cr.
Select at least 3 credits from: 3-8

| MATH 140 | College Algebra |
| MATH 143 | Preparation for Calculus |
| MATH 160 | Survey of Calculus |

|MATH 165 | Calculus I |
|MATH 165 & MATH 166 | Calculus I and Calculus II |
|MATH 181 | Calculus and Mathematical Modeling for the Life Sciences |

Select at least 3 credits from: 3-4

| STAT 101 | Principles of Statistics |
| STAT 104 | Introduction to Statistics |

Total Credits 17

Physical Sciences: 17 cr.

| CHEM 177 | General Chemistry I | 4 |
| CHEM 177L | Laboratory in General Chemistry I | 1 |
| CHEM 178 | General Chemistry II | 3 |
| CHEM 178L | Laboratory in College Chemistry II | 1 |

**Total Credits**: 37

### Electives: 0-12 cr. Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to [www.fshn.hs.iastate.edu](http://www.fshn.hs.iastate.edu)

### COMMON CORE FOR FAMILY HEALTH, FOOD SERVICE, GLOBAL HEALTH AND POLICY, HEALTH COACH, AND NUTRITION AND WELLNESS OPTIONS

**Total Degree Requirement**: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

### International Perspectives: 3 cr.

* Choose elective courses to total equal to or greater than 120 credits.

** Seed Science Secondary Major **

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study focus on seeds including production, conditioning, pathology, physiology, quality control, marketing, and seed plant designs.

### Curriculum in Seed Science (Secondary Major)

**Total Degree Requirement:** 128 cr.

**Complete Communication and Library requirements of primary major and 3 cr. from the following:**

<table>

International Perspectives, U.S. Diversity, Humanities, Ethics & Social Sciences (met with primary major).

Remaining credits (student choice).

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

---

**Sustainable Agriculture**

**Interdepartmental Graduate Major**

The Sustainable Agriculture interdepartmental major is offered through faculty in 21 departments – Agricultural and Biosystems Engineering; Agricultural Education and Studies; Agronomy; Animal Science; Anthropology; Civil, Construction and Environmental Engineering; Community and Regional Planning; Ecology, Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Industrial and Manufacturing Systems Engineering; Journalism and Mass Communication; Landscape Architecture; Mechanical Engineering; Natural Resource Ecology and Management; Plant Pathology; Political Science; Sociology; and Veterinary Diagnostic and Production Animal Medicine. Faculty in these departments cooperate to offer courses and direct research leading to M.S. and Ph.D. degrees with a major in Sustainable Agriculture.

The Sustainable Agriculture major is designed to balance depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning. Students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture.

Applicants applying to the MS program must have a bachelor’s degree in one of the life, social, or engineering sciences, or a bachelor’s degree plus equivalent experience in these areas. Applicants applying to the PhD program must have a master’s degree and either an undergraduate or
master's degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent.

Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on application procedures (https://susag.iastate.edu/admissions), curriculum requirements (https://susag.iastate.edu/academics), and faculty research areas (https://www.susag.iastate.edu/faculty) is available on the Sustainable Agriculture website (https://susag.iastate.edu).

Courses primarily for graduate students, open to qualified undergraduates:

**SUSAG 509: Agroecosystems Analysis**
(Cross-listed with AGRON, SOC). (3-4) Cr. 4. F.

*Prereq: Senior or above classification; permission of instructor*

Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing both field visits and classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation.

**SUSAG 515: Integrated Crop and Livestock Production Systems**
(Cross-listed with ABE, AGRON, ANS). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

*Prereq: SUSAG 509*

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

**SUSAG 530: Ecologically Based Pest Management Strategies**
(Cross-listed with AGRON, ENT, PL P). (3-0) Cr. 3. Alt. F., offered even-numbered years.

*Prereq: SUSAG 509*

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

**SUSAG 546: Strategies for Diversified Food and Farming Systems**
(Cross-listed with AGRON, HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

*Prereq: SUSAG 509*

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

**SUSAG 571: Agroforestry Systems**
(Cross-listed with NRE). (3-0) Cr. 3. Alt. S., offered even-numbered years.

*Prereq: 6 credits in biological science at 300 level or above*

Concepts of sustainable land use, agroecological dynamics, and component interactions of agroforestry systems. Agroforestry systems in temperate and tropical regions. Design and evaluation techniques for agroforestry systems. Ecological, socioeconomic and political aspects of agroforestry.

Meets International Perspectives Requirement.

**SUSAG 584: Organic Agricultural Theory and Practice**
(Cross-listed with AGRON, HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

*Prereq: 9 cr. in biological or physical sciences*

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socioeconomic processes and policies in organic agriculture from researcher and producer perspectives.

**SUSAG 590: Special Topics**
Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification, permission of instructor*

For students wishing to conduct in-depth study of a particular topic in sustainable agriculture.

**SUSAG 599: Creative Component**
Cr. arr. F.S.SS.

Pre-enrollment contract required. For MS students pursuing the non-thesis degree option. Final product is a creative component.

Courses for graduate students:

**SUSAG 600: Sustainable Agriculture Colloquium**
(1-0) Cr. 1. Repeatable. F.S.

Weekly seminar for graduate students in the Sustainable Agriculture program.

**SUSAG 610: Foundations of Sustainable Agriculture**
(Cross-listed with ABE, AGRON, ANTHR, SOC). (3-0) Cr. 3. F.

*Prereq: Graduate classification, permission of instructor*

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

**SUSAG 699: Research**
Cr. arr. Repeatable. F.S.SS.

MS and PhD thesis and dissertation research.
The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary food science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science

Visit the department website at: www.fshn.hs.iastate.edu (http://www.fshn.hs.iastate.edu).

**Undergraduate Study**

**Culinary Food Science**
Culinary food science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary food science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/culinary-science/

**Dietetics**
The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor's and Master's degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a $30 fee for a statement of verification of completion of the DPD. For information about verification statements policies, see the dietetics program website: http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/.

Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

**Diet and Exercise**
A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

**Food Science**
Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

Two options are available in food science: food science and technology and food science and industry. Both options are approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry.
Students who have an interest in graduate study or research are encouraged to select the food science and technology option. Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/

Students in food science have the opportunity to pursue a Master of Business Administration (http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.

**Nutritional Science**

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/nutritional-science/

**Departmental Learning Outcomes**

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/outcomes/

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

**Minors - Undergraduate**

The department offers coursework for a variety of minors (http://www.fshn.hs.iastate.edu/undergraduate-programs/minors). Minors available include:

- culinary food science
- food safety (interdepartmental minor)
- food science
- nutrition
- food and society

All minors have the following requirements:

- At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
- The minor must include at least 9 credits that are not used to meet any other college or university requirement.
- The same courses may not be applied to two different minors.

**Prerequisites:** Students must complete prerequisite requirements for courses included in the minor.

**Graduate Study**

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy. Degree options include:

- food science and technology (http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology) (MS and PhD)
- meat science (http://www.ans.iastate.edu/section/meat/?pg=degree) (MS and PhD; co-major in animal science)
- nutritional sciences (http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences) (MS and PhD; interdepartmental graduate program)
- family and consumer sciences/dietetics (http://www.fshn.hs.iastate.edu/graduate-program/mfcs-dietetics) (MS only)
• diet and exercise (http://www.hs.iastate.edu/academics/majors-list/diet-and-exercise) (BS/MS)
• nutritional sciences (BS/MS)

Prerequisite to major work is a baccalaureate degree in food science, nutrition, other physical/biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology, Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master's degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; and 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate

The department offers coursework for graduate minors in:

• food science/technology (http://www.fshn.iastate.edu/graduate-program/food-science-technology/#minor-in-food-science-and-technology)
• nutritional sciences (http://www.fshn.iastate.edu/graduate-program/nutritional-sciences/#minor-in-nutritional-sciences)

Food Science and Technology Graduate Minor students must complete the following:

• 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
• 9 credits of graduate level food science coursework as approved by the POS committee.
• Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

• 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
• 9 credits of graduate level nutrition courses as approved by the POS Committee.
• NUTRS 501

Certificate - Undergraduate

Health Coach (http://www.fshn.iastate.edu/undergraduate-programs/health-coach-certificate)

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (http://www.fshn.iastate.edu/graduate-program/food-safety-defense)
The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program.

Dietetics Internship (http://www.dietetics.iastate.edu)

The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a "Graduate Certificate in Dietetics Internship" which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) credential. There is a nonrefundable application fee of $75.

Courses primarily for undergraduates:

**FS HN 101: Food and the Consumer**
(3-0) Cr. 3. F.S.SS.
**Prereq: High school biology and chemistry or 3 credits each of biology and chemistry**

**FS HN 102: Nutrition for Sport Performance**
(1-0) Cr. 1. F.S.
A scientific evaluation of dietary needs, dietary supplementation, and pop-culture claims relative to physical/sport performance. Discussion of safe and effective practices to enhance physical/sport performance.

**FS HN 104: Introduction to Professional Skills in Culinary Science**
(0-6) Cr. 1. S.
Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

**FS HN 110: Professional and Educational Preparation**
(1-0) Cr. 1. F.S.
Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation as well as enhancement of communication skills. Offered on a satisfactory-fail basis only.

**FS HN 111: Fundamentals of Food Preparation**
(2-0) Cr. 2. F.S.
**Prereq: FS HN 101 or FS HN 167; high school chemistry or CHEM 160; concurrent enrollment in FSHN 115**

**FS HN 115: Food Preparation Laboratory**
(0-3) Cr. 1. F.S.
**Prereq: Credit or enrollment in FS HN 111 or FS HN 214**
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety.

**FS HN 120: The Biochemistry of Beer**
(Cross-listed with BBMB). (2-0) Cr. 2. F.
An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. Natural science majors are limited to elective credit only.

**FS HN 167: Introduction to Human Nutrition**
(3-0) Cr. 3. F.S.SS.
**Prereq: High school biology or 3 credits of biology**
Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

**FS HN 203: Contemporary Issues in Food Science and Human Nutrition**
(1-0) Cr. 1. F.S.
Introduction to presentation of published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, and communication.
FS HN 207: Processing of Foods: Basic Principles and Applications
(1-3) Cr. 2. S.
Prereq: FS HN 101
Lecture and lab-based instruction on principles of food processing for preservation, raw food materials and their impact on food processing, food product-based discussion and activities highlighting required unit operations and resulting food quality and safety; water, heat, acidity, and oxygen effect on processing, separation and mixing operations, packaging materials properties and methods, and cleaning and sanitation in processing plants.

FS HN 214: Scientific Study of Food
(3-0) Cr. 3. F.S.
Prereq: FS HN 167 or FS HN 265; CHEM 231 or CHEM 331; plus concurrent enrollment in FS HN 115 or 215

FS HN 215: Advanced Food Preparation Laboratory
(0-6) Cr. 2. F.S.
Prereq: Credit or enrollment in FS HN 214
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation.

FS HN 242: The US Food System
(3-0) Cr. 3. S.
Exploration of the components of our food system including food production, food processing, and food access and the social, political and ethical influences on these components. Controversial topics related to how food is produced, processed, marketed and consumed will be discussed.
Meets U.S. Diversity Requirement

FS HN 264: Fundamentals of Nutritional Biochemistry and Metabolism
(3-0) Cr. 3. F.
Prereq: FS HN 167; CHEM 163, CHEM 163L; BIOL 211
Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies.

FS HN 265: Nutrition for Active and Healthy Lifestyles
(3-0) Cr. 3. S.SS.
Prereq: FS HN 167, plus credit or enrollment in BBMB 301 or credit in FS HN 264

FS HN 276: Understanding Grape and Wine Science
(Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: High school biology and chemistry.
A scientific introduction to viticulture (grape-growing) and enology (wine-making). Topics include grape species and varieties, viticulture practices, fruit quality, geography, history, principles of fermentation and aging, wine classification, appreciation, evaluation, storage and service, regulations, wine as food. No wine tasting.

FS HN 308: Dairy Products: Current Issues and Controversies
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Course will address milk chemistry, microbiology, handling, processing, regulations, organic production, and nutrition; dispel myths about dairy foods; improve critical thinking and communication skills. Students will participate in structured controversies.

FS HN 311: Food Chemistry
(3-0) Cr. 3. F.
Prereq: ENGL 250; CHEM 231 or CHEM 331; credit or enrollment in BBMB 301
The structure, properties, and chemistry of food constituents and animal and plant commodities.

FS HN 311L: Food Chemistry Laboratory
(0-3) Cr. 1. F.
Prereq: Credit or concurrent enrollment in FSHN 311.
The laboratory practices of structure, properties, and chemistry of food constituents.

FS HN 314: Foundations of Culinary Food Science
(1-0) Cr. 1. S.
Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

FS HN 315: Professional Development for Food Science Majors
(2-0) Cr. 2. F.
Prereq: Food Science major with at least a junior level status
Preparation for internships and careers in Food Science. Importance of soft skills and application of those skills to potential job situations.
FS HN 340: Foundations of Dietetic Practice
(1-0) Cr. 1. F.
Prereq: DIET or PDEX classification
Introduction to the profession of dietetics and responsibilities associated
with dietetic professional practice. Emphasis on exploring career options
in dietetics and preparation for a dietetic internship. Leadership and
professional career development for the dietitian is addressed through
self reflection, creation of materials for post-baccalaureate programs and job shadowing experience. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only.

FS HN 342: World Food Issues: Past and Present
(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.S.
Prereq: Junior classification
Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts.
Investigation of various causes and consequences of overnutrition/undernutrition, poverty, hunger, access, and distribution.
Meets International Perspectives Requirement.

FS HN 351: Introduction to Food Engineering Concepts
(3-0) Cr. 3. S.
Prereq: MATH 160 or equivalent, PHYS 111 or equivalent, FS HN 207 or permission of the instructor.
Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer.

FS HN 360: Advanced Nutrition and the Regulation of Metabolism
(3-0) Cr. 3. F.
Prereq: ENGL 250, FS HN 265, 3 credits in biochemistry; 3 credits in physiology recommended
Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and the regulation of metabolism; nutrient-gene interactions.

FS HN 361: Nutrition and Health Assessment
(1-3) Cr. 2. S.
Prereq: FS HN 265; 3 credits in statistics; 3 credits in physiology recommended
The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status.

FS HN 362: Nutrition in Growth and Development
(3-0) Cr. 3. S.
Prereq: FS HN 360; credit or enrollment in a course in physiology
Molecular, biochemical and physiological basis to understand the nutritional aspects of human development and aging. Nutrient needs and various disease states at each stage of human life cycle.

FS HN 364: Nutrition and Prevention of Chronic Disease
(3-0) Cr. 3. F.
Prereq: FS HN 264 or FS HN 265 or accepted into Nursing major
Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed.

FS HN 365: Obesity and Weight Management
(3-0) Cr. 3. S.
Prereq: BIOL 256 and BIOL 256L, or BIOL 306, or accepted into Nursing major
Multifactorial aspects of obesity, maintenance of healthy weight, and the relationship of weight status and chronic disease prevention. Traditional and novel nutrition and exercise theories as well as current popular diet and exercise trends will be discussed.

FS HN 366: Communicating Nutrition Messages
(3-0) Cr. 3. S.
Prereq: FS HN 264 or FS HN 265
Theory and application of adult learning and behavior change as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to various models. Factors to consider in developing the nutrition education/intervention practicum experience. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach (print, radio, TV, newspaper, consumer publications, websites, community venues). Development of nutrition messages using various forms of media for a target population.

FS HN 367: Medical Terminology for Health Professionals
(1-0) Cr. 1. F.S.S.
An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations. (offered online only).

FS HN 403: Food Laws and Regulations
(2-0) Cr. 2. S.S.
Prereq: 3 credits in food science coursework at 200 level or above
FS HN 405: Food Quality Assurance  
(Dual-listed with FS HN 505). (2-0) Cr. 2. S.  
Prereq: FS HN 214 or FS HN 311; STAT 101 or STAT 104  
Fundamentals of food quality management programs and the establishment of decision-making processes. Emphasis on statistical process and quality control procedures and their applications to food systems. Development of procedures, specifications, grades, and standards (government and industry) to determine the quality of foods in the marketplace.

FS HN 406: Sensory Evaluation of Food  
(Dual-listed with FS HN 506). (2-3) Cr. 3. F.  
Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics  
Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data.

FS HN 407: Microbiological Safety of Foods of Animal Origins  
(Dual-listed with FS HN 507). (Cross-listed with MICRO). (3-0) Cr. 3. S.  
Prereq: MICRO 420  
Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

FS HN 408: Dairy Products Evaluation  
(0-3) Cr. 1. S.  
Prereq: Permission of instructor  
Gain experience in identifying quality defects in dairy products including milk, cottage cheese, cheddar cheese, strawberry yogurt, butter, and vanilla ice cream. Intensive training for the National Collegiate Dairy Products Evaluation competition and for dairy product evaluation in the food industry.

FS HN 410: Food Analysis  
(2-3) Cr. 3. F.  
Prereq: FS HN 214 or FS HN 311 or CHEM 211  
An introduction to the theory and application of chemical and instrumental methods for determining the constituents of food. Use of standard procedures for food analysis and food composition data bases.

FS HN 411: Food Ingredient Interactions and Formulations  
(1-3) Cr. 2. F.S.  
Prereq: FSHN 214 or FS HN 311 and FS HN 115, FS HN 215 or FS HN 311L.  
Application of food science principles to ingredient substitutions in food products. Laboratory procedures for standard formulations and instrumental evaluation, with emphasis on problem-solving and critical thinking.

FS HN 412: Food Product Development  
(Dual-listed with FS HN 512). (1-6) Cr. 3. S.  
Prereq: FS HN 311 or FS HN 411; senior classification  
Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Some pilot plant experiences. Emphasis on teamwork and effective communication.

FS HN 419: Foodborne Hazards  
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: MICRO 201 or MICRO 302, a course in biochemistry  
Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service learning component. Only one of FS HN 419 and FS HN 519 may count toward graduation.

FS HN 420: Food Microbiology  
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. F.  
Prereq: MICRO 201 or MICRO 302  
Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.

FS HN 421: Food Microbiology Laboratory  
(Cross-listed with MICRO). (0-6) Cr. 3. S.  
Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420  
Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

FS HN 442: Issues in Food and Society  
(2-0) Cr. 2. F.  
Prereq: FS HN 242, FS HN 342  
In-depth discussion, synthesis, and analysis of domestic and international food issues including: food systems from farm to fork, poverty and world hunger, overnutrition, population, agriculture and the environment, ethics, biotechnology, and policy.
FS HN 460: Global Nutrition
(Dual-listed with NUTRS 560 FS HN 560). (3-0) Cr. 3.
An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 461: Medical Nutrition and Disease I
(4-0) Cr. 4. F.
Prereq: FS HN 360, FS HN 361, FS HN 367; plus BIOL 256 and 256L or BIOL 306 or BIOL 335
(Dual-listed with NutrS 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 463: Community Nutrition
(3-0) Cr. 3. F.
Prereq: FS HN 265 or FS HN 360; FS HN 366 recommended
Dual-listed with NutrS 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis on written and oral communication at the lay and professional level. Field trip.
Meets U.S. Diversity Requirement

FS HN 464: Medical Nutrition and Disease II
(3-0) Cr. 3. S.
Prereq: FS HN 461
(Dual-listed with NutrS 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 466: Nutrition Counseling and Education Methods
(Dual-listed with FS HN 566). (2-2) Cr. 3. F.
Prereq: FS HN 361 and FS HN 362
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

FS HN 467: Molecular Basis of Nutrition in the Development, Prevention, and Treatment of Disease
(3-0) Cr. 3. S.
Prereq: FS HN 360 or equivalent
Understanding the molecular basis for the role of nutrients, nutrient-derivatives, and bioactive compounds in the development, prevention, and treatment of common diseases including diabetes, cancer, vascular disease, obesity, neurological disease, aberrant mineral metabolism, and autoimmune disease. Translating this understanding into practical approaches for improving the health of individuals and populations.

FS HN 471: Food Processing
(3-0) Cr. 3. F.
Prereq: FS HN 351 or A E 451 or CH E 357; MICRO 201 or 302.
Principles and application of food processing using both thermal (ex., blanching, pasteurization, canning, drying, freezing, evaporation, aseptic processing, extrusion) and non-thermal (ex., high pressure, irradiation, pulsed electric field, fermentation) unit operations. Emphasis on microbial inactivation, process heat and mass balance, and numerical problem solving.

FS HN 472: Food Processing Laboratory
(1-3) Cr. 2. F.
Prereq: Credit or enrollment in FS HN 471 or A E 451 or CH E 357
Hands-on and demonstration laboratory activities related to food processing principles and applications using lab and pilot-scale equipment. Laboratory experiences include important food processing operations, e.g., blanching/ pasteurization, canning, freezing, drying, corn wet milling, fermentation, baking etc. Emphasis on mass balance, interpreting data, writing reports, and presentations. Occasional field trips.

FS HN 480: Professional Communication in Food Science and Human Nutrition
(1-0) Cr. 1. F.S.
Prereq: FS HN 203, senior classification in the department
Presentation of current topics using written and oral communication to a lay audience. Emphasis on communication skills for the profession.

FS HN 489: Issues in Food Safety
(Cross-listed with AN S, HSP M, VDPAM). (1-0) Cr. 1. S.
Prereq: FS HN 203, senior classification in the department
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.
FS HN 490: Independent Study
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490A: Independent Study: Dietetics
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490B: Independent Study: Food Science
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490C: Independent Study: Nutrition
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490D: Independent Study: International Experience
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490E: Independent Study: Entrepreneurship
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490F: Independent Study: Honors
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 491: Supervised Work Experience
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491A: Supervised Work Experience: Dietetics
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491B: Supervised Work Experience: Food Science
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491C: Supervised Work Experience: Nutrition
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491D: Supervised Work Experience: Culinary Science
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 492: Research Concepts in Human Nutrition
(1-3) Cr. 2. F.
Prereq: senior classification or permission of instructor; FS HN 360
Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.

FS HN 493: Food Preparation Workshop
(1-3) Cr. 1-3.
Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.
FS HN 495: Practicum
(1-3) Cr. 2. F.S.
Prereq: Senior classification in Nutritional Science-Nutrition and Wellness option or permission of instructor; FS HN 366; credit or enrollment in FS HN 463.
Students will develop, implement and assess a community-based project that engages groups in learning and practicing concepts related to nutrition and wellness. Assessed service learning component. Offered on a satisfactory-fail basis only.

FS HN 496: Food Science and Human Nutrition Travel Course
(Dual-listed with FS HN 596). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled and 1 credit for pre-departure class, if offered.) Limited enrollment. Tour and study of food industry, culinary science, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 496A: Food Science and Human Nutrition Travel Course: International travel
(Dual-listed with FS HN 596A). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.
Meets International Perspectives Requirement.

FS HN 496B: Food Science and Human Nutrition Travel Course: Domestic travel
(Dual-listed with FS HN 596B). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 498: Cooperative Education
Cr. R. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Permission of department chair.
Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only.

FS HN 499: Undergraduate Research
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of staff member with whom student proposes to work
Research under staff guidance. A maximum of 6 credits of FS HN 499 may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

FS HN 505: Food Quality Assurance
(Dual-listed with FS HN 405). (2-0) Cr. 2. S.
Prereq: FS HN 214 or FS HN 311; STAT 101 or STAT 104
Fundamentals of food quality management programs and the establishment of decision-making processes. Emphasis on statistical process and quality control procedures and their applications to food systems. Development of procedures, specifications, grades, and standards (government and industry) to determine the quality of foods in the marketplace.

FS HN 506: Sensory Evaluation of Food
(Dual-listed with FS HN 406). (2-3) Cr. 3. F.
Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics
Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data.

FS HN 507: Microbiological Safety of Foods of Animal Origins
(Dual-listed with FS HN 407). (Cross-listed with MICRO). (3-0) Cr. 3. S.
Prereq: MICRO 420
Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

FS HN 509: Sensory Evaluation of Wines
Cr. 2. S.
Prereq: Must be at least 21 years of age; senior or graduate status.
Principles of sensory evaluation and their application to wine evaluation. Sensory testing methods such as discrimination tests, ranking, descriptive analysis and scoring of wines will be covered. Students will have the opportunity to evaluate and learn about major types and styles of wines of the world. Lab fee.

FS HN 511: Integrated Food Science
(3-0) Cr. 3. F.
Prereq: 3 credits in each of organic chemistry, physics, mathematics, and microbiology.
Critical review of the key principles of food science and applications in the chemistry, microbiology, and processing of food. Understanding of the impact of processing on the quality of foods with respect to composition, quality and safety.
FS HN 512: Food Product Development
(Dual-listed with FS HN 412). (1-6) Cr. 3. S.
Prereq: FS HN 311 or FS HN 411; senior classification
Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Some pilot plant experiences. Emphasis on teamwork and effective communication.

FS HN 516: Advanced Nutrition I
(2-0) Cr. 2. F.S.S.
Prereq: Acceptance in the Master’s of Professional Practice in Dietetics program.
Examination of current literature relative to molecular, cellular, and physiologic aspects of macronutrient and micronutrient metabolism. Integration of current evidence-based information, including peer-reviewed literature, to inform advanced professional nutrition practice.

FS HN 517: Gut Microbiome: Implications for Health and Diseases
(Cross-listed with AN S, MICRO, V MPM). Cr. 3.
Prereq: Basic Knowledge in microbiology
Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health.

FS HN 518: Advanced Nutrition II
(2-0) Cr. 2. F.S.S.
Prereq: Acceptance in the Master’s of Professional Practice in Dietetics program.
Principles of research design/methods and interpreting results/statistics in the current peer-reviewed scientific literature. Critical evaluation of the evidence-base to inform advanced professional nutrition practice.

FS HN 521: Microbiology of Food
(3-0) Cr. 3. F.
Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products.

FS HN 522: Advanced Food Microbiology and Biotechnology
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: Food microbiology, a course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will cover basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Students will be introduced to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and down-stream processing techniques, and regulatory aspects of food biotechnology. Offered online only.

FS HN 523: A Multidisciplinary Overview of Food Safety and Security
(2-0) Cr. 2. F.S.S.
Prereq: A course in biology or chemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. Offered online only.

FS HN 524: Food Microbiology
(3-0) Cr. 3. F.
Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products.

FS HN 525: Principles of HACCP
(2-0) Cr. 2. F.
Prereq: Undergraduate biology and chemistry courses; enrollment in GP-IDEA Food Safety and Defense Certificate or permission of instructor.
A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. Offered online only.

FS HN 526: Ethnic Foods: Food Safety, Food Protection and Defense
(2-0) Cr. 2. SS.
Prereq: Graduate standing; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. Offered online only.
FS HN 527: Microbiology of Fermented Foods
(2-0) Cr. 2. SS.
Prereq: Food microbiology; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. Offered online only.

FS HN 528: Food Protection and Defense-Essential Concepts
(2-0) Cr. 2. S.
Prereq: Enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. Offered online only.

FS HN 529: Foodborne Toxicants
(Cross-listed with TOX). (2-0) Cr. 2. F.
Prereq: A course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxicants of current interest, design of HAACP plans for use in food industries targeting foodborne toxicants, discussion of toxicants from a food defense perspective. Offered online only.

FS HN 538: Advanced Medical Nutrition Therapy
(3-0) Cr. 3. F.S.SS.
Prereq: Acceptance in the Master's of Professional Practice in Dietetics program.
Nutritional biochemistry and physiology related to selected pathophysiology of disease with emphasis on treatment of complex medical problems. The nutrition care process will be utilized. Evidenced-based practice will be integrated into each disease state covered. Offered WWW only.

FS HN 542: Introduction to Molecular Biology Techniques
(Cross-listed with B M S, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

FS HN 542A: Introduction to Molecular Biology Techniques: DNA Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

FS HN 542B: Introduction to Molecular Biology Techniques: Protein
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.
Prereq: Graduate classification
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

FS HN 542C: Introduction to Molecular Biology Techniques: Cell Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

FS HN 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

FS HN 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

FS HN 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.
FS HN 542G: Introduction to Molecular Biology Techniques: Genomic
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

FS HN 554: Dietetic Internship I
(0-22) Cr. 5. S.SS.
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 555: Dietetic Internship II
(0-18) Cr. 5. F.S.
Prereq: Concurrent enrollment or successful completion of FS HN 554
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 556: Dietetic Internship III
(0-22) Cr. 5. F.S.
Prereq: Concurrent enrollment or successful completion of FS HN 554 and FS HN 555
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 560: Global Nutrition
(Dual-listed with FS HN 460). (Cross-listed with NUTRS). (3-0) Cr. 3.
An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 566: Nutrition Counseling and Education Methods
(Dual-listed with FS HN 466). (Cross-listed with DIET). (2-2) Cr. 3. F.
Prereq: FS HN 361 and FS HN 362
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

FS HN 575: Processed Foods
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: FS HN 214 or FS HN 311; a course in nutrition
This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease.

FS HN 580: Orientation to Food Science and Nutrition Research
(1-0) Cr. 1. F.
Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN. Offered on a satisfactory-fail basis only.

FS HN 581: Seminar
(1-0) Cr. 1. S.
Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Intended for graduate students in their first or second semester in FS HN.

FS HN 590: Special Topics
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
FS HN 590A: Special Topics: Nutrition
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
FS HN 590B: Special Topics: Food Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
FS HN 590C: Special Topics: Teaching
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 595: Grant Writing for the Professional
(Cross-listed with DIET). (3-0) Cr. 3. SS.
Prereq: enrollment in GP-IDEA MFCS in Dietetics
Grant writing, identifying external funding, managing grants, preparing manuscripts for peer-reviewed publication, and preparing papers and poster for presentation at professional meetings.

FS HN 596A: Food Science and Human Nutrition Travel Course:
International travel
(Dual-listed with FS HN 496A). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.
FS HN 596B: Food Science and Human Nutrition Travel Course: Domestic travel
(Dual-listed with FS HN 496B). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 597: Nutritional Aspects of Oncology
(Cross-listed with DIET, NUTRS). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: B.S. in nutrition, dietetics, biology, or related discipline.
Understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management.

FS HN 599: Creative Component
Cr. arr.
Nonthesis option only.

Courses for graduate students:

FS HN 606: Advanced Food Analysis and Instrumentation
(2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: FS HN 311, or FS HN 410, or FS HN 511 or equivalent.
Instrumental methods for measuring chemical and physical properties of foods, food quality and functionality. Techniques for methods development, sample preparation, optimization of operating conditions, and data analysis needed to obtain accurate, reproducible results by means of instrumentation.

FS HN 611: Advanced Food Processing
(Cross-listed with BRT). (3-0) Cr. 3. F.
Prereq: FS HN 311, or FS HN 471/472 or equivalent, or FS HN 511.
Recent advances in the science and technology of food processing and preservation; examples include both thermal and non-thermal processes, including cold plasma, nanotechnology, food packaging, and extrusion. Advances in extraction and separation technologies, waste management, by-product utilization, biorenewables and sustainability in food processing industry will also be discussed. Students to research on select topics and present.

FS HN 612: Advanced Food Chemistry
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: FS HN 311, or FS HN 411, or FS HN 511, or BBMB 404, or equivalent.
Structure, chemical and physical properties of lipids, proteins and carbohydrates, and their food and industrial applications. Changes in functionalities during processing and storage.

FS HN 626: Advanced Food Microbiology
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

FS HN 627: Rapid Methods in Food Microbiology
(Cross-listed with MICRO, TOX). (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and “next generation” testing formats now in development.

FS HN 681: Seminar
(1-0) Cr. 1. Repeatable, maximum of 2 credits. F.S.SS.
Presentation of thesis or dissertation research. Must be taken once for each graduate program; once for the M.S. program and once for the Ph.D. program.

FS HN 682: Seminar Reflection
Cr. R. Repeatable. F.S.
Active listening and critical thinking activities related to research seminars in food science and human nutrition. Required each semester for all FSHN graduate students. Electronic documentation.

FS HN 690: Special Problems
Cr. arr. Repeatable. F.S.SS.
Prereq: FS HN 502 or FS HN 503 or FS HN 504 or FS HN 553 or FS HN 554
FS HN 695: Grant Proposal Writing
(Cross-listed with NUTRS). (1-0) Cr. 1. F.
Prereq: 3 credits of graduate course work in food science and/or nutritional sciences
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutritional sciences. Discussion of the role of successful grant writing in career development.

FS HN 699: Research in Food Science and Technology
Cr. arr. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.
Natural Resource Ecology and Management

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

Contact the department for information about minors from the Department of Natural Resource Ecology and Management.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in biorenewable resources technology, ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey's Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.
Forestry
The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Courses primarily for undergraduates:

A ECL 312: Ecology
(Cross-listed with BIOL, ENSCI). (3-3) Cr. 4. F.S.S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

A ECL 312I: Ecology
(Cross-listed with ENSCI, IA LL). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

A ECL 321: Fish Biology
(2-3) Cr. 3. S.
Prereq: A ECL 365
Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes.

A ECL 326I: Ornithology
(Cross-listed with IA LL). Cr. 2. SS.
The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

A ECL 333: Fisheries Techniques
(Cross-listed with NREM). (1-3) Cr. 2. F.
Prereq: BIOL 212
Introduction to techniques used in the collection and interpretation of fish population data in the field and in the lab. Course objectives include an understanding of population survey methodology and improving student critical thinking and teamwork skills. Laboratory focuses on field trips and hands-on sampling experience.

A ECL 356: Vertebrate Biology
(Cross-listed with BIOL). (3-2) Cr. 4. F.
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L
Evolution, ecology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

A ECL 366: Natural History of Iowa Vertebrates
(2-3) Cr. 3. S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L
Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region’s ecological and economic health.

A ECL 371: Ecological Methods
(Cross-listed with BIOL). (2-3) Cr. 3. F.
Prereq: A ECL 312, STAT 101 or STAT 104
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

A ECL 401: Intro to Aquatic Animal Medicine
(Cross-listed with B M S). (1-2) Cr. 1. S.
8 week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.
A ECL 404I: Behavioral Ecology
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered even-numbered years.
Prereq: Two semesters of biology
Animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

A ECL 415: Ecology of Freshwater Invertebrates, Plants, and Algae
(Dual-listed with A ECL 515). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A ECL 312
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 418: Stream Ecology
(Dual-listed with A ECL 518). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 419I: Vertebrate Ecology and Evolution
(Cross-listed with IA LL). Cr. 4. SS.
Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology.

A ECL 420I: Amphibians and Reptiles
(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Prereq: Two semesters of biology
Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.

A ECL 425: Aquatic Insects
(Dual-listed with A ECL 525). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312 or equivalent
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 440: Fishery Management
(Dual-listed with A ECL 540). (2-3) Cr. 3. F.
Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 442: Aquaculture
(Dual-listed with A ECL 542). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: BIOL 211 and BIOL 212.
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A ECL 451: Wildlife Ecology and Management
(2-3) Cr. 3. S.
Prereq: A ECL 371
Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods.

A ECL 454: Principles of Wildlife Disease
(Dual-listed with A ECL 554). (3-0) Cr. 3. S.
Prereq: Junior standing and at least 10 credits in biological sciences at the 300+ level
Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health.

A ECL 455: International Wildlife Issues
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A ECL 365, A ECL 312 or graduate standing; NREM 120
Biological, political, social, and economic factors affecting the management of international wildlife resources. Meets International Perspectives Requirement.

A ECL 457: Herpetology
(Cross-listed with BIOL). (2-0) Cr. 2. F.
Prereq: BIOL 351 or BIOL 365
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.
A ECL 457L: Herpetology Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. F.
Prereq: BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457
Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 458: Ornithology
(Cross-listed with BIOL). (2-0) Cr. 2. S.
Prereq: A ECL 365 or BIOL 351
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

A ECL 458L: Ornithology Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.
Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

A ECL 459: Mammalogy
(Cross-listed with BIOL). (2-0) Cr. 2. S.
Prereq: BIOL 351 or A ECL 365
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

A ECL 459L: Mammalogy Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. S.
Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL/BIOI 459 or BIOI 459 required.
Laboratory focuses on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

A ECL 471: Introductory Conservation Biology
(Cross-listed with BIOL). Cr. 3.
Prereq: BIOL 312
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 480: Studies in Marine Biology
Cr. 1-8. Repeatable. SS.
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A ECL 486: Aquatic Ecology
(Dual-listed with A ECL 586). (Cross-listed with BIOL, ENSCI). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fisheries and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

A ECL 486L: Aquatic Ecology Laboratory
(Dual-listed with A ECL 586L). (Cross-listed with BIOL, ENSCI). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOI 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

A ECL 489: Population Ecology
(Dual-listed with A ECL 589). (Cross-listed with BIOL). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

Courses primarily for graduate students, open to qualified undergraduates:

A ECL 515: Ecology of Freshwater Invertebrates, Plants, and Algae
(Dual-listed with A ECL 415). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A ECL 312
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 516: Avian Ecology
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A ECL 312, A ECL 365, or graduate standing
Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation.

A ECL 518: Stream Ecology
(Dual-listed with A ECL 418). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.
A ECL 520: Fisheries Science
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
*Prereq: A ECL 312, A ECL 321*
Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine.

A ECL 523I: Fish Ecology
(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

A ECL 525: Aquatic Insects
(Dual-listed with A ECL 425). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
*Prereq: BIOL 312 or equivalent*
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 526I: Advanced Field Ornithology
(Cross-listed with IA LL). Cr. 2. SS.
*Prereq: Concurrent registration in IA LL 326I*
Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

A ECL 531: Conservation Biology
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.
*Prereq: BIOL 312; BIOL 313 or graduate standing*
Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 531I: Conservation Biology
(Cross-listed with EEOB, IA LL). Cr. 4. Alt. SS., offered even-numbered years.
*Prereq: IA LL 312I*
Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

A ECL 535I: Restoration Ecology
(Cross-listed with EEOB, ENSCI, IA LL). Cr. 4. Alt. SS., offered even-numbered years.
*Prereq: A course in ecology*
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

A ECL 540: Fishery Management
(Dual-listed with A ECL 440). (2-3) Cr. 3. F.
*Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486*
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 542: Aquaculture
(Dual-listed with A ECL 442). (3-0) Cr. 3. Alt. S., offered even-numbered years.
*Prereq: BIOL 211 and BIOL 212*
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A ECL 551: Behavioral Ecology
(2-2) Cr. 3. Alt. F., offered odd-numbered years.
*Prereq: a course in ecology or animal behavior*
The study of how an animal's behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior.

A ECL 554: Principles of Wildlife Disease
(Dual-listed with A ECL 454). (3-0) Cr. 3. S.
*Prereq: Graduate classification*
Ecological and epidemiological aspects of disease as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationship among wildlife, domestic animal, and human health.

A ECL 573: Techniques for Biology Teaching
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.
A ECL 573A: Techniques for Biology Teaching: Animal Biology  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable  
for inclusion in elementary, middle, high school, and community college  
biology and environmental courses. Exercises will be built around  
common organisms and ecosystems in Iowa. Field trips.

A ECL 573G: Techniques for Biology Teaching: Limnology  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable  
for inclusion in elementary, middle, high school, and community college  
biology and environmental courses. Exercises will be built around  
common organisms and ecosystems in Iowa. Field trips.

A ECL 573I: Techniques for Biology Teaching: Insect Ecology  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable  
for inclusion in elementary, middle, high school, and community college  
biology and environmental courses. Exercises will be built around  
common organisms and ecosystems in Iowa. Field trips.

A ECL 573W: Techniques for Biology Teaching: Project WET  
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.  
The development and implementation of laboratory exercises suitable  
for inclusion in elementary, middle, high school, and community college  
biology and environmental courses. Exercises will be built around  
common organisms and ecosystems in Iowa. Field trips.

A ECL 576: Aquatic Ecology  
(Dual-listed with A ECL 486). (Cross-listed with EEOB, ENSCI). (3-0) Cr. 3.  
F.  
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301  
Structure and function of aquatic ecosystems with application to fishery  
and pollution problems. Emphasis on lacustrine, riverine, and wetland  
ecology.

A ECL 586L: Aquatic Ecology Laboratory  
(Dual-listed with A ECL 486L). (Cross-listed with EEOB, ENSCI). (0-3) Cr. 1.  
F.  
Prereq: Concurrent enrollment in BIOL 486  
Field trips and laboratory exercises to accompany 486. Hands-on  
experience with aquatic research and monitoring techniques and  
concepts.

A ECL 589: Population Ecology  
(Dual-listed with A ECL 489). (Cross-listed with EEOB). (2-2) Cr. 3. Alt. F.,  
offered even-numbered years.  
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate  
standing  
Concepts and theories of population dynamics with emphasis on models  
of growth, predation, competition, and regulation.

A ECL 590: Graduate Independent Study  
(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.  
Prereq: Graduate classification and permission of instructor

A ECL 590I: Special Topics: Graduate Independent Study  
(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.  
Prereq: Graduate classification and permission of instructor

A ECL 599: Creative Component  
Cr. arr.  
Prereq: Nonthesis M.S. option only

Courses for graduate students:

A ECL 611: Analysis of Populations  
(Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: BIOL 312; STAT 401; a course in calculus  
Quantitative techniques for analyzing vertebrate population data  
to estimate parameters such as density and survival. Emphasis on  
statistical inference and computing.

A ECL 698: Animal Ecology Teaching Practicum  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: Graduate classification in animal ecology and permission of instructor  
Graduate student experience in the animal ecology teaching program.  
Offered on a satisfactory-fail basis only.

A ECL 699: Research  
Cr. arr. Repeatable.

A ECL 699I: Research  
(Cross-listed with ANTHR, EEOB, GDCB, IA LL). Cr. 1-4. Repeatable.

Courses primarily for undergraduates:

FOR 201: Forest Biology  
(2-0) Cr. 2. F.  
Prereq: Concurrent enrollment in FOR 202, FOR 203, FOR 204, FOR 205, and  
FOR 206  
Discussion of ecological concepts, individual tree structure and growth,  
variation and diversity in tree populations. Physical environment of trees  
and forests, ecological processes in forest communities, and introduction  
to different regional forest communities.
FOR 202: Sustainable Materials: Wood Utilization
(2-0) Cr. 2. F.
Prereq: Concurrent enrollment in FOR 201, FOR 203, FOR 204, FOR 205, and FOR 206
Basis for use of wood as an industrial raw material for lumber, composites, pulp and paper, energy and chemicals. Implications of use of alternative renewable and non-renewable materials for societal infrastructure and consumer goods.

FOR 203: Resource Measurements/Evaluation
(2-0) Cr. 2. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 204, FOR 205, and FOR 206; MATH 140
Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood).

FOR 204: Forest Ecosystem Decision-Making
(2-0) Cr. 2. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 205, and FOR 206
Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.

FOR 205: Integrated Forestry Laboratory
(0-8) Cr. 3. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 206
Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

FOR 206: Fall Forestry Camp
Cr. 4. F.
Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 205
Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

FOR 280: Wood Properties and Identification
(3-3) Cr. 4. S.
Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

FOR 283: Pesticide Application Certification
(Cross-listed with AGRON, ENT, HORT). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

FOR 290: Special Problems
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290A: Special Problems: Leadership in Forestry Teams (LIFT) Learning Community
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290B: Special Problems: Forest Ecosystem Management
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290C: Special Problems: Natural Resource Conservation
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290D: Special Problems: Urban and Community Forestry
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290E: Special Problems: Wood Science and Technology
Cr. 1-4. Repeatable.
Prereq: Freshman or Sophomore classification, permission of instructor

FOR 302: Silviculture
(3-3) Cr. 4. S.
Prereq: FOR 201, FOR 356, NREM 301
Manipulation of forest vegetation based on ecological principles for the production of goods and services.

FOR 356: Dendrology
(Cross-listed with BIOL). (2-2) Cr. 3. F.
Prereq: BIOL 211
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed.

(Cross-listed with NREM). (0.5-1) Cr. 1. S.
Prereq: BIOL 212
Survey of the major plant families, general, and representative species of the forest herbaceous layer. Functional ecology and restoration.
FOR 416: Forest Insects and Diseases
(Cross-listed with PL P). (3-0) Cr. 3. F.
Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent.
Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests.

FOR 416L: Forest Insects and Diseases Laboratory
(Cross-listed with PL P). (0-3) Cr. 1. F.
Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent.
Credit or enrollment in PL P 416.
Laboratory experience working with insect and fungal pests of trees.

FOR 442: Dynamics of Forest Stands
(Dual-listed with FOR 542). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: NREM 301, FOR 302, STAT 101 or their equivalents
Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management.

FOR 451: Forest Resource Economics and Quantitative Methods
(3-3) Cr. 4. S.
Prereq: FOR 203, MATH 150
Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Application of mathematical and statistical models to the solution of managerial problems.

FOR 452: Ecosystem Management
(Dual-listed with FOR 552). (Cross-listed with NREM). (2-3) Cr. 3. S.
Prereq: Senior classification, and NREM 120 or its equivalent
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

FOR 454: Forestry Practicum
(1-4) Cr. 3. S.
Prereq: 20 credits in student’s major at 300 level or above
Integrated decision-making related to the conservation, management, and preservation of private and public forests, wildlands, urban/community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client.

FOR 475: Urban Forestry
(Cross-listed with HORT). (2-3) Cr. 3. F.
Prereq: Junior or senior classification, 3 credits in biology
Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management).

FOR 480: Wood Anatomy and Fiber Analysis
(2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: FOR 280 or permission of instructor
Microscopic anatomy and ultrastructure of wood and other industrial lignocellulosic materials. Microscopy techniques for fiber analysis. Comparison of fiber properties.

FOR 481: Conversion of Lignocellulosic Materials
(2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: FOR 280 or equivalent

FOR 485: Wood and Natural Fiber Composites
(2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: FOR 280 or TSM 240
Consolidation behavior of wood and other lignocellulosic materials. Principles of adhesion. Manufacturing processes for wood and lignocellulose composites such as plywood, oriented strand products, laminated lumber, particleboard, medium density fiberboard, and bast fiber products. Extrusion processing of natural fiber/plastic composites.

FOR 486: Drying Processes for Wood and Other Lignocellulosic Materials
(2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: FOR 280 or TSM 240
Principles of moisture relations in hygroscopic materials; adsorption, desorption, equilibrium moisture content. Transport processes in natural materials such as wood. Drying processes for wood and other lignocellulosic materials. Influence of moisture on dimensional stability and durability of wood and lignocellulosic composites.

FOR 487: Physical Properties of Wood
(3-3) Cr. 4. Alt. S., offered even-numbered years.
Prereq: FOR 280
Mechanical, thermal, electrical, and acoustical properties of wood. Lumber grading and stress rating, nondestructive evaluation of wood and wood composite products.
Courses primarily for graduate students, open to qualified undergraduates:

FOR 542: Dynamics of Forest Stands
(Dual-listed with FOR 442). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: NREM 301, FOR 302, STAT 101 or their equivalents
Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management.

FOR 552: Ecosystem Management
(Dual-listed with FOR 452). (Cross-listed with NREM). (2-3) Cr. 3. S.
Prereq: Senior classification, and NREM 120 or its equivalent
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

FOR 599: Creative Component
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599A: Creative Component: Forest Biology
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599B: Creative Component: Forest Biometry
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599C: Creative Component: Forest and Recreation Economics
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599D: Creative Component: Forest Management and Administration
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599E: Creative Component: Wood Science
Cr. 1-12. Repeatable, maximum of 12 credits.

Courses for graduate students:

FOR 696: Research Seminar
(Cross-listed with AGRON, BBMB, GDCB, HORT, PLBIO). Cr. 1. Repeatable.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

FOR 699: Research
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699A: Research: Forest Biology - Wood Science
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699B: Research: Forest Biometry
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699C: Research: Forest Economics
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699D: Research: Forest Management and Administration
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699E: Research: Wood Science
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699F: Research: Plant Physiology
Cr. 1-12. Repeatable, maximum of 12 credits.

Courses primarily for undergraduates:

NREM 104: Practical Work Experience
Cr. R.
Three months of relevant work experience in natural resources, animal ecology, or forestry. Study at a summer biological station may be applicable. See adviser for specific requirements and approval process.

NREM 110: Orientation in Natural Resource Ecology and Management
Cr. 1. F.
Orientation to the University and to the Department of Natural Resource Ecology and Management. Discussion of departmental learning outcomes, strategies for academic success and academic planning. Offered on a satisfactory-fail basis only.

NREM 111: NREM Transitions Learning Community Seminar
(1-0) Cr. 1. Repeatable. F.S.
Enrollment limited to members of the NREM Transitions Learning Community. Designed to assist new transfer students and continuing sophomore students with their transition to the academic expectations and professional development aspects of the natural resource program. Offered on a satisfactory-fail basis only.

NREM 120: Introduction to Renewable Resources
(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

NREM 130: Natural Resources and Agriculture
(Cross-listed with ENV S). (3-0) Cr. 3. S.
Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

NREM 181: Artistry in Wood
(1-0) Cr. 1. Alt. S., offered even-numbered years.
A survey of the artistry of wood as appreciated in spatial scale from microscopic anatomy to engineered wood structures. Anatomical and physical properties that render wood as a medium for artistic expression. The works of local artists, designers and engineers will be featured. The University Museums collection and Art on Campus will be explored.
NREM 207: Natural Resource Management under the North American Model of Conservation
(1-0) Cr. 1. F.
Introduction to North American model of conservation, current funding for natural resource management, role of hunting and angling in the North American model, critique and refinement of the model for the 21st century, and introduction to natural resource leadership, and outdoor skills and recreation. Offered on a satisfactory-fail basis only.

NREM 211: Careers in Natural Resources
Cr. 1. F.S.
Prereq: Sophomore classification
Career planning exploration in natural resources. Discussion of the job application process, including techniques for successful interviewing and development of an effective resume. Offered on a satisfactory-fail basis only.

NREM 240: Quantitative Problem Solving in Natural Resources
Cr. 3. S.
Prereq: STAT 101 or STAT 104, or permission from the instructor
Applied quantitative problem-solving skills for natural resource management. Focus on group and individual exercises, with practical problems in geography, hydrology, forestry and ecology. Laboratory includes field data collection and computer data processing and modeling.

NREM 270: Foundations in Natural Resource Policy and History
(Cross-listed with ENV S, L A). (3-0) Cr. 3. F.
The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.

NREM 301: Natural Resource Ecology and Soils
(Cross-listed with ENSCI). (3-3) Cr. 4. F.
Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes.

NREM 303: Internship
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of department mentor and sophomore standing
Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians.

NREM 303I: Undergraduate Internships
(Cross-listed with IA LL). Cr. 1-5. Repeatable. SS.
Prereq: Permission of instructor and sophomore standing
Placement with county conservation boards, camps, parks, etc. for experience as interpreters, rangers, and technicians.

NREM 305: Seminar
(2-0) Cr. 1-3. Repeatable. F.S.
Prereq: Permission of instructor
Current topics in natural resources or related issues.

NREM 315: Genetics for Natural Resource Managers
(3-0) Cr. 3. F.
Prereq: Prereq: Biol 211 and 212.
Introduction into how genetic techniques and technologies can aid the management of the earth's biotic resources. Topics include an overview of DNA structure, function and inheritance; tools and techniques for measuring genetic diversity; genetic management of wild and captive populations: DNA forensics as management tool. The goal of this course is to prepare managers/biologists to interpret genetic data as they relate to natural resource conservation.

NREM 330: Principles of Interpretation
(2-3) Cr. 3. S.
Prereq: 6 credits in biological sciences
History, objectives, forms, and techniques of interpretation in the settings of county, state, national parks, and zoos. Principles of effective communication as they apply to natural resource fields including wildlife management, forestry, and wildlife rehabilitation. Planning and use of effective communications and outreach campaigns to manage and conserve natural resources.

NREM 333: Fisheries Techniques
(Cross-listed with A ECL). (1-3) Cr. 2. F.
Prereq: BIOL 212
Introduction to techniques used in the collection and interpretation of fish population data in the field and in the lab. Course objectives include an understanding of population survey methodology and improving student critical thinking and teamwork skills. Laboratory focuses on field trips and hands-on sampling experience.

NREM 345: Natural Resource Photogrammetry and Geographic Information Systems
(Cross-listed with ENSCI). (2-3) Cr. 3. S.
Prereq: Junior classification
Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses.
NREM 357: Midwestern Prairie Plants
(1-2) Cr. 1. F.
Offered 1st half semester only. Survey of the major plant families, genera, and representative species of Midwestern prairies with emphasis on plant identification. Prairie management for multiple species of plants and wildlife.

(Cross-listed with FOR). (0.5-1) Cr. 1. S.
Prereq: BIOL 212
Survey of the major plant families, general, and representative species of the forest herbaceous layer. Functional ecology and restoration.

NREM 380: Field Ecology Research and Teaching
Cr. 3. F.
Prereq: Completion or current enrollment in A ECL/BIOL/ENSCI 312 or NREM 301; or eligibility for admission into Elementary Education program
Students work in teams to conduct ecological research projects at a local field site, and develop related teaching modules/lesson plans. Research and teaching activity objectives, methods, and results are shared with diverse audiences as presentations, written reports, and web-based documents, and used to engage K-12 students and community members via field days and visits to schools and other institutions.

NREM 385: Natural Resource Policy
(Dual-listed with NREM 585). (3-0) Cr. 3. S.
Prereq: Graduate classification or permission of instructor
Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance.

NREM 390: Fire Ecology and Management
(3-0) Cr. 3. F.
Characteristics and role of fire in forest ecosystems. Major topics covered include fuels, fire weather, fire behavior, fire danger rating systems, fire control, prescribed burning, and fire dynamics in major ecosystem types.

NREM 402: Watershed Hydrology
(Dual-listed with NREM 502). (Cross-listed with ENSCI, GEOL, MTEOR). (2-3) Cr. 3. F.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

NREM 407: Watershed Management
(Dual-listed with NREM 507). (Cross-listed with ENSCI, ENV S). (3-3) Cr. 4. S.
Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 408I: Aquatic Ecology
(Dual-listed with NREM 508I NREM 408I). (Cross-listed with IA LL). Cr. 4. SS.
Prereq: Courses in ecology, chemistry, and physics
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

NREM 446: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with NREM 546). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 452: Ecosystem Management
(Dual-listed with NREM 552). (Cross-listed with FOR). (2-3) Cr. 3. S.
Prereq: Senior classification, and NREM 120 or its equivalent
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

NREM 460: Controversies in Natural Resource Management
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
Prereq: NREM 120, and A ECL 312 or NREM 301, and Junior classification
Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed.

NREM 465: Landscape Change and Conservation
(Dual-listed with NREM 565). (Cross-listed with L A). (3-0) Cr. 3. F.
Prereq: L A 202
Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.
NREM 466: Ecosystem Service Management
(Dual-listed with NREM 566). (Cross-listed with ENSCI, ENT). (3-0) Cr. 3.
Alt. S., offered odd-numbered years.
Prereq: permission of instructor
Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

NREM 471: Agroforestry Systems; Local and Global Perspectives
(Dual-listed with NREM 571). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: 6 credits in biological science at 300 level or above
Concepts of sustainable land use, agroecological dynamics, and component interactions of agroforestry systems. Agroforestry systems in temperate and tropical regions. Design and evaluation techniques for agroforestry systems. Ecological, socioeconomic and political aspects of agroforestry.
Meets International Perspectives Requirement.

NREM 485: Undergraduate Seminar
Cr. 1. Repeatable, maximum of 2 times. F.S.
Prereq: Junior or Senior classification in Animal Ecology or Forestry majors (instructor may grant permission for students in other majors to register for course)
Weekly seminars on current research topics in natural resource ecology and management. Style and best practice in oral research communication. Skills and principles for evaluating research merit and quality of technical communication. Offered on a satisfactory-fail basis only.

NREM 489: Survey of Remote Sensing Technologies
(Dual-listed with NREM 589). (Cross-listed with E E, GEOL, MTEOR). (3-0) Cr. 3. F.
Prereq: Four courses in physical or biological sciences or engineering
Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S.

NREM 489L: Satellite Remote Sensing Laboratory
(Dual-listed with NREM 589L). (Cross-listed with E E, GEOL, MTEOR). (0-3) Cr. 1. F.
Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/EE 489/589
Processing and analysis of satellite sensor data (optical and radar).
Provides practical applications in an environmental context.

NREM 490: Independent Study
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Junior or senior classification, permission of instructor

NREM 490A: Independent Study: Animal Ecology
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Junior or senior classification, permission of instructor

NREM 490B: Independent Study: Forestry
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Junior or senior classification, permission of instructor

NREM 490E: Independent Study: Entrepreneurship
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Junior or senior classification, permission of instructor

NREM 490H: Independent Study: Honors Program
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Junior or senior classification, permission of instructor

NREM 490I: Iowa Lakeside Laboratory
(Cross-listed with ANTHR, IA LL). Cr. 1-6. Repeatable, maximum of 9 credits.
Prereq: 8 credits in biology and permission of instructor
Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

NREM 496: Travel Course
(Dual-listed with NREM 596). Cr. 1-5. Repeatable, maximum of 3 times.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 496A: Travel Course: International
(Dual-listed with NREM 596A). Cr. 1-5. Repeatable, maximum of 3 times.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.
Meets International Perspectives Requirement.

NREM 496B: Travel Course: Domestic
(Dual-listed with NREM 596B). Cr. 1-5. Repeatable, maximum of 3 times.
Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 498: Cooperative Education
Cr. 1-3.
Prereq: Permission of departmental chair
Required of all cooperative education students. Students must register prior to commencing each work period.
Courses primarily for graduate students, open to qualified undergraduates:

**NREM 502: Watershed Hydrology**  
(Dual-listed with NREM 402). (Cross-listed with ENSCI, GEOL, MTEOR).  
(2-3) Cr. 3. F.  
*Prereq: Four courses in physical or biological sciences or engineering; junior standing*  
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

**NREM 504: Forest Landscapes, Wildlife, and Silviculture**  
(2-3) Cr. 3. Alt. F., offered odd-numbered years.  
*Prereq: Permission of instructor*  
Desired forest habitat conditions for fish and wildlife. Silvicultural approaches to protecting/improving such habitats. Focus on key forest elements related to animal species, groups and overall diversity. The lab focuses on team observations and discussions of diverse habitats including one weekend field trip.

**NREM 505: Seminar**  
(2-0) Cr. 1-3. Repeatable, maximum of 3 times. F.S.  
*Prereq: Permission of instructor or graduate classification*  
Current topics in natural resources research and management.

**NREM 507: Watershed Management**  
(Dual-listed with NREM 407). (Cross-listed with ENSCI). (3-3) Cr. 4. S.  
*Prereq: A course in general biology*  
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

**NREM 508I: Aquatic Ecology**  
(Cross-listed with ENSCI, IA LL). Cr. 4. SS.  
*Prereq: Courses in ecology, chemistry, and physics*  
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

**NREM 533: Erosion and Sediment Transport**  
(Cross-listed with A B E, ENSCI). (2-3) Cr. 3. F.  
*Prereq: C E 372 or GEOL/ENSCI/MTEOR 402, MATH 166 or equivalent*  
Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

**NREM 535: Restoration Ecology**  
(Cross-listed with EEOB, ENSCI). (2-3) Cr. 3. Alt. F., offered even-numbered years.  
*Prereq: BIOL 366 or BIOL 474 or graduate standing*  
Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

**NREM 542: Introduction to Molecular Biology Techniques**  
(Cross-listed with BM S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.  
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

**NREM 542A: Introduction to Molecular Biology Techniques: DNA Techniques**  
(Cross-listed with BM S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.  
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

**NREM 542B: Introduction to Molecular Biology Techniques: Protein Techniques**  
(Cross-listed with BM S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.  
*Prereq: Graduate classification*  
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

**NREM 542C: Introduction to Molecular Biology Techniques: Cell Techniques**  
(Cross-listed with BM S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.  
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.
NREM 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

NREM 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

NREM 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

NREM 542G: Introduction to Molecular Biology Techniques: Genomic
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

NREM 546: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with NREM 446). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 552: Ecosystem Management
(Dual-listed with NREM 452). (Cross-listed with FOR). (2-3) Cr. 3. S.
Prereq: Senior classification, and NREM 120 or its equivalent
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

NREM 565: Landscape Change and Conservation
(Dual-listed with NREM 465). (Cross-listed with L A). (3-0) Cr. 3. F.
Prereq: L A 202
Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 566: Ecosystem Service Management
(Dual-listed with NREM 466). (Cross-listed with ENSCI, ENT). (3-0) Cr. 3.
Alt. S., offered odd-numbered years.
Prereq: permission of instructor
Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

NREM 570: Advanced Decision-making in Natural Resource Allocation
(2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: FOR 451 or two courses in economics
Analytical approach to economic aspects of forest resource management problems. Theory and application of economic decision-making criteria to traditional and modern forest resource management issues. Current problems in the allocation of forest resources.

NREM 571: Agroforestry Systems
(Dual-listed with NREM 471). (Cross-listed with SUSAG). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: 6 credits in biological science at 300 level or above
Concepts of sustainable land use, agroecological dynamics, and component interactions of agroforestry systems. Agroforestry systems in temperate and tropical regions. Design and evaluation techniques for agroforestry systems. Ecological, socioeconomic and political aspects of agroforestry.
Meets International Perspectives Requirement.

NREM 580: Research Orientation
(2-0) Cr. 2. F.
Prereq: 20 credits in biological sciences and a course in statistics
Research design, proposal preparation, and technical writing.

NREM 585: Natural Resource Policy
(Dual-listed with NREM 385). (3-0) Cr. 3. S.
Prereq: Graduate classification or permission of instructor
Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance.
NREM 589: Survey of Remote Sensing Technologies
(Dual-listed with NREM 489). (Cross-listed with E E, GEOL, MTEOR). (3-0)
Cr. 3. F.
*Prereq: Four courses in physical or biological sciences or engineering
Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S.

NREM 589L: Satellite Remote Sensing Laboratory
(Dual-listed with NREM 489L). (Cross-listed with E E, GEOL, MTEOR). (0-3)
Cr. 1. F.
*Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/EE 489/589
Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context.

NREM 590: Special Topics
Cr. 1-4. Repeatable, maximum of 4 credits.
*Prereq: Permission of instructor

NREM 590A: Special Topics: Animal Ecology
Cr. 1-4. Repeatable, maximum of 4 credits.
*Prereq: Permission of instructor

NREM 590B: Special Topics: Forestry
Cr. 1-4. Repeatable, maximum of 4 credits.
*Prereq: Permission of instructor

NREM 593: Workshop
Cr. 1-3. Repeatable.
*Prereq: Graduate classification

NREM 596: Travel Course
(Dual-listed with NREM 496). Cr. 1-5. Repeatable, maximum of 3 times.
*Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 596A: Travel Course: International
(Dual-listed with NREM 496A). Cr. 1-5. Repeatable, maximum of 3 times.
*Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement.

NREM 596B: Travel Course: Domestic
(Dual-listed with NREM 496B). Cr. 1-5. Repeatable, maximum of 3 times.
*Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 598: Natural Resource Ecology and Management Teaching Practicum
Cr. 1. F.S.S.
*Prereq: Graduate classification as M.S. candidate in a NREM major and permission of instructor.
Graduate student experience in teaching. Student must plan and present at least one unit of subject matter in a course or extension workshop. Teaching practicum must be documented by the student and approved by the student’s POS committee. Offered on a satisfactory-fail basis only.

NREM 599: Creative Component
Cr. arr.

Courses for graduate students:

NREM 600: Seminar
Cr. 1. Repeatable. F.S.
Current topics in natural resources research and management.

NREM 698: Natural Resource Ecology and Management Teaching Practicum
Cr. 1. F.S.
*Prereq: Graduate classification as a Ph.D. candidate in a NREM major and permission of instructor.
Graduate student experience in teaching. Student must plan and present substantive subject matter for a minimum of three weeks in lecture and/or laboratory formats, or a series of extension seminars/workshops. Teaching practicum must be documented by the student and approved by the student’s POS committee. Offered on a satisfactory-fail basis only.

NREM 699: Research
Cr. 1-12. Repeatable, maximum of 12 credits.

Plant Pathology and Microbiology

Undergraduate Study
The department participates in the interdepartmental undergraduate Microbiology major. See /collegeofagricultureandlifesciences/microbiology/ for more information.

Graduate Study
The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates
in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Courses primarily for undergraduates:

**MICRO 101: Microbial World**
(3-0) Cr. 3. F.
*Prereq: High school biology or equivalent*
Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

**MICRO 110: Professional and Educational Preparation in Microbiology**
(1-0) Cr. 1. F.
An introduction to curriculum and research opportunities in microbiology at Iowa State. Topics include: easing the transition to life as a university student, development of specific goals, strengthening interpersonal communication, professional portfolio creation and resume building. Offered on a satisfactory-fail basis only.

**MICRO 201: Introduction to Microbiology**
(2-0) Cr. 2. F.S.
*Prereq: One semester of college-level biology*
Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for Micro 302 in advanced courses.

**MICRO 201L: Introductory Microbiology Laboratory**
(0-3) Cr. 1. F.S.
*Prereq: Credit or enrollment in MICRO 201 or MICRO 302*
Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

**MICRO 302: Biology of Microorganisms**
(3-0) Cr. 3. F.S.S.
*Prereq: BIOL 211, credit or enrollment in BIOL 212; 1 semester of chemistry*
Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

**MICRO 302L: Microbiology Laboratory**
(0-3) Cr. 1. F.
*Prereq: Credit or enrollment in MICRO 302*
Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

**MICRO 310: Medical Microbiology**
(3-0) Cr. 3. F.
*Prereq: MICRO 302 (or MICRO 201 if a B or better was obtained)*
Study of infection by bacterial and viral pathogenic agents of humans with an overview of immune responses in controlling disease.

**MICRO 310L: Medical Microbiology Laboratory**
(0-3) Cr. 1. F.
*Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L; credit or enrollment in MICRO 310*
Microbiological tools and techniques to isolate, identify, and characterize medically significant microorganisms in relation to human diseases. Emphasis on the virulence factors of pathogenic organisms as compared to the normal flora.

**MICRO 320: Molecular and Cellular Bacteriology**
(4-0) Cr. 4. S.
*Prereq: MICRO 302, BIOL 313, credit or enrollment in CHEM 332*
A systems perspective of bacterial growth, survival, and cellular differentiation by integrating physiological and genetic principles. Emphasis is on prokaryotes although unicellular eukaryotes are also discussed. Topics include the structure, function, and assembly of cell components, molecular and genomic techniques, bioenergetics and metabolism, regulation of gene expression, genetic adaptation, stress tolerance, biofilms, and cell-cell interactions and communications.
MICRO 353: Introductory Parasitology  
(Cross-listed with BIOL, V PTH). (3-0) Cr. 3. S.  
**Prereq:** BIOL 212  
Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

MICRO 374: Insects and Our Health  
(Cross-listed with ENT). (3-0) Cr. 3. S.  
**Prereq:** 3 credits in biological sciences  
Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease.  
Meets International Perspectives Requirement.

MICRO 374L: Insects and Our Health Laboratory  
(Cross-listed with ENT). (0-3) Cr. 1. Alt. S., offered even-numbered years.  
**Prereq:** Credit or enrollment in ENT 374  
Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

MICRO 402: Microbial Genetics and Genomics  
(Dual-listed with MICRO 502). (Cross-listed with GEN). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
**Prereq:** MICRO 302, Biol 313  
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics.

MICRO 407: Food Microbiology Laboratory  
(Cross-listed with FS HN). (0-6) Cr. 3. S.  
**Prereq:** MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420  
Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

MICRO 419: Foodborne Hazards  
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
**Prereq:** MICRO 201 or MICRO 302, a course in biochemistry  
Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service learning component. Only one of FS HN 419 and FS HN 519 may count toward graduation.

MICRO 420: Food Microbiology  
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. F.  
**Prereq:** MICRO 201 or MICRO 302  
Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.

MICRO 421: Food Microbiology Laboratory  
(Cross-listed with FS HN). (0-6) Cr. 3. S.  
**Prereq:** MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420  
Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

MICRO 430: Procaryotic Diversity and Ecology  
(Dual-listed with MICRO 530). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
**Prereq:** MICRO 302, MICRO 302L  
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 440: Laboratory in Microbial Physiology, Diversity, and Genetics  
(Cross-listed with BBMB). (2-6) Cr. 4. F.S.  
**Prereq:** MICRO 302, MICRO 302L, CHEM 332, BIOL 313L  
Fundamental techniques and theory for studying the cellular mechanisms, genetic processes and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments as well as an emphasis on genetic and molecular techniques to understand antibiotic resistance processes and mechanisms. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of bacteria. Essential components for the effective communication of scientific results are also emphasized.
MICRO 450: Undergraduate Capstone Colloquium  
(2-0) Cr. 2. S.  
Prereq: SP CM 212 and senior standing in Microbiology  
Required of all undergraduate majors in microbiology. Students demonstrate mastery of core courses in microbiology through discussion of current literature in microbiology and immunology, issues in scientific conduct, and bioethics in microbiology. Students present current papers in a journal club format and gain experience in writing and reviewing grant proposals.

MICRO 451: Survey in Microbiology  
Cr. R. F.  
Prereq: Junior or Senior standing in Microbiology  
Preparations for graduation. Topics include job search strategies, career information, mock interviews, graduate and professional school application processes and guidelines as well as outcomes assessment activities.

MICRO 456: Principles of Mycology  
(Cross-listed with BIOL). (2-3) Cr. 3. F.  
Prereq: 10 credits in biological sciences  
Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health.

MICRO 475: Immunology  
(Dual-listed with MICRO 575). (3-0) Cr. 3. S.  
Prereq: MICRO 310  
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 475 or V MPM 520, but not both, may be applied to graduation.

MICRO 475L: Immunology Laboratory  
(1-4) Cr. 1. S.  
Prereq: Credit or enrollment in MICRO 310 or MICRO 475 or MICRO 575  
Techniques in primary culture and tumor cell growth, measures of lymphocyte function, serological techniques and flow cytometry. Half semester course.

MICRO 477: Bacterial-Plant Interactions  
(Dual-listed with MICRO 577). (Cross-listed with PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: 3 credits in microbiology or plant pathology  
Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

MICRO 485: Soil and Environmental Microbiology  
(Dual-listed with MICRO 585). (Cross-listed with AGRON, ENSCI). (2-3) Cr. 3. F.  
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended  
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

MICRO 487: Microbial Ecology  
(Dual-listed with MICRO 587). (Cross-listed with BIOL, ENSCI, GEOL). (3-0) Cr. 3. F.  
Prereq: Six credits in biology and 6 credits in chemistry  
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

MICRO 490: Independent Study  
Cr. 1-5. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor  
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490A: Independent Study: Laboratory Research  
Cr. arr. Repeatable. F.S.S.  
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor  
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490B: Independent Study: Literature Review  
Cr. arr. Repeatable. F.S.S.  
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor  
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490C: Independent Study: Instructional Assistant  
Cr. arr. Repeatable. F.S.S.  
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor  
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.
MICRO 490G: Independent Study: General
Cr. arr. Repeatable. F.S.S.
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490H: Independent Study, Honors
Cr. 1-5. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 495: Internship
Cr. 1-2. F.S.
Prereq: At least 6 credits of 300-level or above coursework in microbiology, approval of academic adviser
Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

MICRO 502: Microbial Genetics and Genomics
(Dual-listed with MICRO 402). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: MICRO 302, Biol 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics.

MICRO 507: Microbiological Safety of Foods of Animal Origins
(Dual-listed with MICRO 407). (Cross-listed with FS HN). (3-0) Cr. 3. S.
Prereq: MICRO 420
Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

MICRO 509: Plant Virology
(Dual-listed with MICRO 509). (Cross-listed with PL P). (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: BIOL 313 or BBMB 301. BIOL 314 recommended.
Taxonomy, molecular mechanisms, host-interactions, vector transmission, epidemiology, detection, control and exploitation of plant viruses. Course will consist of a mixture of lectures, and student-led presentations using primary literature.

MICRO 517: Gut Microbiome: Implications for Health and Diseases
(Cross-listed with AN S, FS HN, V MPM). Cr. 3.
Prereq: Basic Knowledge in microbiology
Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health.

MICRO 525: Intestinal Microbiology
(Cross-listed with V MPM). Cr. 3. Alt. S., offered even-numbered years.
Prereq: Micro 302, BIOL 313
Overview of commensal microbiota in the health and well-being of vertebrates. Topics include diversity of intestinal structure, microbial diversity/function, innate immune development, community interactions and metabolic diseases associated with alterations of the intestinal microbiome.

MICRO 530: Procaryotic Diversity and Ecology
(Dual-listed with MICRO 430). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 540: Livestock Immunogenetics
(Cross-listed with AN S, V MPM). (2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

MICRO 551: Microbial Diversity and Phylogeny
(1-0) Cr. 1. F.
Prereq: MICRO 302, BIOL 313
Comparisons among the three kingdoms of life (Bacterica, Archaea, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics.
MICRO 552: Bacterial Molecular Genetics and Physiology  
(1-0) Cr. 1. F.  
**Prereq: MICRO 302, BIOL 313**  
Review of genetics and selected physiological topics of model bacteria.

MICRO 553: Pathogenic Microorganisms  
(1-0) Cr. 1. F.  
**Prereq: MICRO 302, BIOL 313**  
Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.

MICRO 554: Virology  
(1-0) Cr. 1. S.  
**Prereq: MICRO 302, BIOL 313**  
Introduction to virus life cycles including entry, gene expression strategies, replication, and mechanisms to modify and overcome host defenses. The roles of specific viruses and sub-viral agents in animal and plant disease will also be included.

MICRO 555: Fungal Biology  
(1-0) Cr. 1. S.  
**Prereq: GEN 313 or GEN 320 or equivalent.**  
Ecology, genetics, physiology and diversity of fungi, from yeasts to mushrooms, and their importance in human affairs.

MICRO 556: Ecology of Microorganisms  
(1-0) Cr. 1. S.  
**Prereq: MICRO 302, BIOL 313**  
The study of microorganisms in their natural environments, with a focus on terrestrial and aquatic ecosystems, including eukaryotic hosts; interactions within biofilms and communities, including intercellular communication and symbioses; microbial adaptations to extreme environments; and metagenomics, genomic, molecular and microscopy techniques for the study of microbes in natural systems.

MICRO 575: Immunology  
(Dual-listed with MICRO 475). (Cross-listed with V MPM). (3-0) Cr. 3. S.  
**Prereq: MICRO 310**  
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 575 or V MPM 520, but not both, may be applied toward graduation.

MICRO 577: Bacterial-Plant Interactions  
(Dual-listed with MICRO 477). (Cross-listed with PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
**Prereq: 3 credits in microbiology or plant pathology**  
Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

MICRO 585: Soil and Environmental Microbiology  
(Dual-listed with MICRO 485). (Cross-listed with AGRON, ENSCI). (2-3) Cr. 3. F.  
**Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended**  
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

MICRO 586: Medical Bacteriology  
(Cross-listed with V MPM). (4-0) Cr. 4. F.  
**Prereq: 310**  
Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

MICRO 587: Microbial Ecology  
(Dual-listed with MICRO 487). (Cross-listed with EEOB, ENSCI, GEOL).  
(3-0) Cr. 3. F.  
**Prereq: Six credits in biology and 6 credits in chemistry**  
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

MICRO 590: Special Topics  
Cr. 1-5. Repeatable. F.S.SS.  
**Prereq: Permission of instructor**

**Courses for graduate students:**

MICRO 604: Seminar  
(1-0) Cr. 1. Repeatable. F.S.  
Course will expose students to the breadth of subdisciplines within microbiology, offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Offered on a satisfactory-fail basis only.
MICRO 608: Molecular Virology  
(Cross-listed with PL P, V MPM). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
*Prereq: BBMB 405 or GDCB 511*  
Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis.

MICRO 615: Molecular Immunology  
(Cross-listed with BBMB, V MPM). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
*Prereq: BBMB 405 or BBMB 506 and BBMB 507*  
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

MICRO 625: Mechanisms of Bacterial Pathogenesis  
(Cross-listed with V MPM). (4-0) Cr. 4. Alt. S., offered odd-numbered years.  
*Prereq: Credit in Biochemistry and Microbiology*  
Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

MICRO 626: Advanced Food Microbiology  
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
*Prereq: FS HN 420 or FS HN 421 or FS HN 504*  
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

MICRO 627: Rapid Methods in Food Microbiology  
(Cross-listed with FS HN, TOX). (2-0) Cr. 2. Alt. F., offered even-numbered years.  
*Prereq: FS HN 420 or FS HN 421 or FS HN 504*  
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

MICRO 685: Advanced Soil Biochemistry  
(Cross-listed with AGRON, ENSCI). (2-0) Cr. 2. Alt. S., offered even-numbered years.  
*Prereq: AGRON 585*  
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

MICRO 690: Current Topics  
Cr. 1-3. Repeatable. F.S.SS.  
*Prereq: Permission of instructor*  
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690A: Current Topics: Microbiology  
Cr. 1-3. Repeatable. F.S.SS.  
*Prereq: Permission of instructor*  
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690B: Current Topics: Immunology  
Cr. 1-3. Repeatable. F.S.SS.  
*Prereq: Permission of instructor*  
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690C: Current Topics: Infectious Diseases  
Cr. 1-3. Repeatable. F.S.SS.  
*Prereq: Permission of instructor*  
Colloquia or advanced study of specific topics in a specialized field.

MICRO 692: Molecular Biology of Plant-Pathogen Interactions  
(Cross-listed with PL P). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
*Prereq: PL P 506 or BBMB 405 or GEN 411 or MICRO 402 or strong background in molecular biology*  
Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete a research proposal writing and peer review exercise.

MICRO 697: Graduate Research Rotation  
Cr. arr. Repeatable. F.S.  
Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

MICRO 698: Seminar in Molecular, Cellular, and Developmental Biology  
(Cross-listed with BBMB, GDCB, MCDB, V MPM). (2-0) Cr. 1-2. Repeatable.  
F.S.  
Student and faculty presentations.

MICRO 699: Research  
Cr. arr. Repeatable.

Courses primarily for undergraduates:
PL P 408: Principles of Plant Pathology
(Dual-listed with PL P 508). (2-2) Cr. 3. F.S.
Prereq: 8 credits in life sciences, including BIOL 211 or 212.
Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

PL P 416: Forest Insects and Diseases
(Cross-listed with FOR). (3-0) Cr. 3. F.
Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent.
Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests.

PL P 416L: Forest Insects and Diseases Laboratory
(Cross-listed with FOR). (0-3) Cr. 1. F.
Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent.
Credit or enrollment in PL P 416.
Laboratory experience working with insect and fungal pests of trees.

PL P 452: Integrated Management of Diseases and Insect Pests of Turfgrasses
(Dual-listed with PL P 552). (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: HORT 351
Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

PL P 477: Bacterial-Plant Interactions
(Dual-listed with PL P 577). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: 3 credits in microbiology or plant pathology
Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

PL P 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor
A maximum of 6 credits of PL P 490 may be used toward the total of 128 credits required for graduation.

PL P 490A: Independent Study: Plant Pathology
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor
A maximum of 6 credits of PL P 490 may be used toward the total of 128 credits required for graduation.

PL P 490H: Independent Study: Honors
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor
A maximum of 6 credits of PL P 490 may be used toward the total of 128 credits required for graduation.

PL P 494: Seed Pathology
(Dual-listed with PL P 594). (2-0) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: PL P 408
Significance of biotic and abiotic diseases that affect the production and utilization of seeds, during each phase of the seed life cycle: growing, harvesting, conditioning, storing, and planting seed. Mechanisms of seed infection and seed-to-seedling transmission are considered for fungi, bacteria, viruses/viroids, and nematodes. Aspects of epidemiology, management, and host-pathogen relationships are discussed. Emphases include the role of seed health testing in the global seed industry for quality control and phytosanitary certification, as well as the use of seed treatments to manage seedborne and soilborne pathogens and pests. Concurrent enrollment in PL P 494L/594L (Seed Pathology Laboratory) is strongly encouraged (on-campus students only). Credit may not be obtained for both PL P 494/594 and STB/PL P 592.

PL P 494L: Seed Pathology Laboratory
(Dual-listed with PL P 594L). (0-3) Cr. 1. Alt. F., offered odd-numbered years.
Prereq: PL P 408
Laboratory in seed pathology. Seed health testing methods; effects of seed treatments and seed conditioning on seedborne pathogens.

PL P 494L: Seed Pathology Laboratory
(Dual-listed with PL P 594L). (0-3) Cr. 1. Alt. F., offered odd-numbered years.
Prereq: PL P 408
Laboratory in seed pathology. Seed health testing methods; effects of seed treatments and seed conditioning on seedborne pathogens.

Courses primarily for graduate students, open to qualified undergraduates:

PL P 506: Plant-Pathogen Interactions
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: PL P 408 or PL P 416, BIOL 313
Baum, Whitham. Introduction to mechanisms of plant-parasite interaction. Genetics and molecular genetics of plant disease resistance and pathogenicity.
**PL P 508: Principles of Plant Pathology**  
(Dual-listed with PL P 408). (2-2) Cr. 3. F.S.  
*Prereq: 8 credits in life sciences, including BIOL 211 or 212.*  
Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

**PL P 509: Plant Virology**  
(2-0) Cr. 2. Alt. S., offered odd-numbered years.  
*Prereq: BIOL 313 or BBMB 301. BIOL 314 recommended.*  
Taxonomy, molecular mechanisms, host-interactions, vector transmission, epidemiology, detection, control and exploitation of plant viruses. Course will consist of a mixture of lectures, and student-led presentations using primary literature.

**PL P 511: Integrated Management of Tropical Crops**  
(Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
*Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221*  
Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

**PL P 512: Lifestyles of plant pathogenic fungi and oomycetes.**  
(2-0) Cr. 2. Alt. S., offered odd-numbered years.  
*Prereq: PL P 408 or MICRO 456 or equivalent.*  
Exploration of the major groups of plant pathogenic fungi and oomycetes, focusing on the diseases they cause as well as pathogen ecology, diagnosis, crop resistance, and fungicide resistance.

**PL P 530: Ecologically Based Pest Management Strategies**  
(Cross-listed with AGRON, ENT, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on understanding ecological processes.

**PL P 543: Ecology and Epidemiology of Plant Diseases**  
(2-2) Cr. 3. Alt. F., offered odd-numbered years.  
*Prereq: PL P 408 or PL P 416*  
Nutter. Theory and practice related to the ecology and epidemiology of plant disease epidemics. Interactions among host and pathogen populations as affected by the environment are quantified with respect to time and space. Analysis of ecological and host and pathogen genetic factors that alter the course of plant disease epidemics. Risk assessment theory, disease forecasting, and modeling the impact of biotic plant stresses on yield and quality are also emphasized.

**PL P 552: Integrated Management of Diseases and Insect Pests of Turfgrasses**  
(Dual-listed with PL P 452). (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
*Prereq: HORT 351*  
Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

**PL P 574: Plant Nematology**  
(2-0) Cr. 2. Alt. SS., offered odd-numbered years.  
*Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent.*  
Morphology, anatomy, identification, management, and life cycles of common plant-parasitic nematodes; host parasite interactions; recent advances in plant nematology.
PL P 594: Seed Pathology
(Dual-listed with PL P 494). (2-0) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: PL P 408
Significance of biotic and abiotic diseases that affect the production and utilization of seeds, during each phase of the seed life cycle: growing, harvesting, conditioning, storing, and planting seed. Mechanisms of seed infection and seed-to-seedling transmission are considered for fungi, bacteria, viruses/viroids, and nematodes. Aspects of epidemiology, management, and host-pathogen relationships are discussed. Emphases include the role of seed health testing in the global seed industry for quality control and phytosanitary certification, as well as the use of seed treatments to manage seedborne and soilborne pathogens and pests. Concurrent enrollment in PL P 494L/594L (Seed Pathology Laboratory) is strongly encouraged (on-campus students only). Credit may not be obtained for both PL P 494/594 and STB/PL P 592.

PL P 594L: Seed Pathology Laboratory
(Dual-listed with PL P 494L). (0-3) Cr. 1. Alt. F., offered odd-numbered years.
Prereq: PL P 408
Laboratory in seed pathology. Seed health testing methods; effects of seed treatments and seed conditioning on seedborne pathogens.

PL P 599: Creative Component
Cr. arr. Repeatable. F.S.SS.
Prereq: For non-thesis Master of Science students.
Independent study related to the student’s area of specialization and approved by the student’s major professor.

Courses for graduate students:

PL P 608: Molecular Virology
(Cross-listed with MICRO, V MPM). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BBMB 405 or GDCB 511
Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis.

PL P 628: Improving Professional Presentation Skills
(2-0) Cr. 2. F.
Prereq: Graduate student status.
Skill building to improve oral presentation fundamentals for graduate students in biological sciences. Principles and guidance in both personal speaking style and maximizing impact of presentation software. In-depth lectures and class discussions on all aspects of presentation skills. Video and anonymous peer review of individual speeches.

PL P 691: Field Plant Pathology
(0-6) Cr. 2. Repeatable. Alt. SS., offered even-numbered years.
Prereq: PL P 408 or PL P 416
Diagnosis of plant diseases, plant disease assessment methods, and the integration of disease management into commercial crop production practices. Objectives are to familiarize students with common diseases of Midwest crops and landscape plants, and to provide experience in disease diagnosis. Field trips include commercial operations, agricultural research facilities, and ornamental plantings.

PL P 692: Molecular Biology of Plant-Pathogen Interactions
(Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: PL P 506 or BBMB 405 or GEN 411 or MICRO 402 or strong background in molecular biology
Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete a research proposal writing and peer review exercise.

PL P 694: Colloquium in Plant Pathology
(2-0) Cr. 2. Repeatable. S.
Prereq: PL P 408 or PL P 416, permission of instructor
Advanced topics in plant pathology, including biological control, cultural control, resistance gene deployment, genetic engineering for disease resistance, chemical control, integrated pest management, emerging diseases, fungal genetics, insect vector biology, professional communications, etc.

PL P 698: Seminar
Cr. 1. Repeatable. F.S.

PL P 699: Thesis and Dissertation Research
Cr. arr. Repeatable.
F.S.SS.
Objectives of the Curriculum in Business

The instructional objective of the Ivy College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

Organization of Curriculum

The undergraduate curriculum in business is divided into three areas: a general education program, a pre-professional business program, and a professional business program. The general education program provides a broad spectrum of liberal arts coursework. The pre-professional business requirements provide a foundation in pre-business coursework. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The nine majors offered for the degree bachelor of science (B.S.) are accounting, actuarial science, business economics, entrepreneurship, finance, management, management information systems, marketing, and supply chain management. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Curriculum Changes

Iowa State University students who want to change their curriculum to the Ivy College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the Ivy College of Business during enrollment period three. See Making Schedule Changes.

Admission Standards to Professional Programs

All new entering students and curriculum change students are enrolled in the pre-business curriculum. To enter the professional program in the Ivy College of Business, students must complete any required ENGL 099 Strategies for Nonnative Speakers of English courses, any required ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, and the following foundation courses or their approved substitutions:

<table>

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade point average of 2.5 in the foundation courses listed above. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. Students must have a minimum ISU cumulative GPA of 3.50 in at least 12 graded credits or full member of the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of ACCT 285 Managerial Accounting, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Admission requirements are subject to change. Applications and the current requirements for admission to the Ivy College of Business are available at https://online.bus.iastate.edu/professionalprogram/.
Academic Standards and Graduation Requirements

Policies for students enrolled in the Ivy College of Business may be obtained at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the Ivy College of Business.

Students are responsible for knowing and adhering to these Ivy College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2019-2020 catalog:

1. A minimum of 122 semester credits are required. For the Actuarial Science major, a minimum of 131 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year institution.
3. A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.
4. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
5. No more than two transfer classes can be applied to the major.
6. Students must achieve communication proficiency by earning a grade of C or better in ENGL 250 and one additional from ENGL 150 or ENGL 302.
7. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
8. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
10. General education courses may not be taken P/NP.
11. No more than 9 elective credits may be taken P/NP.
12. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

Advising System

Each student in the Ivy College of Business has an assigned academic adviser who helps facilitate student progress toward graduation while supporting the academic standards of the College. Students enter as Pre-Business majors and are guided toward their entrance to the Professional Program (business major) with assistance from professional advisers who continue to work with them through graduation.

Advisers, as part of the Undergraduate Programs Office staff, provide academic services to Business students including development of academic plans, study abroad planning, accessing pertinent University services and resources, and meeting their overall educational objectives.

The College encourages students to attend an orientation program prior to their entry, where information is shared and evaluated to help set the student out on the academic path appropriate to their goals, preparation, interests, and capabilities.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Currently enrolled students who have completed 12 graded credits at Iowa State University and earned a GPA of 3.50 or above are eligible to apply for membership to the University Honors Program (UHP). UHP students in the Ivy College of Business will work with designated advisers to incorporate elements of breadth, depth, and leadership into their business education through completion of academic, co-curricular, and personal/professional development experiences. In addition, to graduate with Honors in the Ivy College of Business, students must complete a minimum of two honors-designated courses, two 300-level honors seminars, an honors project, 50 credits of 300-level or higher coursework, and maintain a cumulative GPA of 3.50 or above. Additional details of requirements can be found on the Ivy College of Business Honors website.

Internships

Credit and non-credit internships in business may be approved for Ivy College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. A career coordinator from the Business Career Services Office will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the Ivy College of Business may complete additional majors in the Ivy College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the Ivy College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the
following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the Ivy College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Second Majors and Minors

International Business Secondary Major
A student in the Ivy College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits of international business courses, one year of the same university-level world language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor in International Business
Students with a major in the Ivy College of Business may earn a minor in International Business by completing 15 credits of approved coursework and an approved study abroad experience of 12 weeks, or one year of foreign language study and completion of an approved study tour course offered by the Ivy College of Business. The minor must include at least 6 credits numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minor in Business & Technology Consulting
*Effective spring 2020
The Department of Marketing also offers a minor for any student with a major in the Ivy College of Business. The Business and Technology Consulting minor prepares you for a career as a business consultant. Every year consulting companies attract talented graduates across the world. As a consultant, you gain broad exposure to business issues, solve different business problems, make an impact on major businesses, and become an expert in a specific business functional area. The minor provides a systematic process for students to strengthen problem-solving skills and prepare them to become better communicators and future leaders.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in course numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minors for Business Students
Students with a major in the Ivy College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Minor for Non-Business Students
The Ivy College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 284</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>MGMT 370</td>
<td>Management of Organizations</td>
<td></td>
</tr>
<tr>
<td>SCM 301</td>
<td>Supply Chain Management</td>
<td></td>
</tr>
</tbody>
</table>

The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A “C” average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the Ivy College of Business are eligible for a general business minor only—not a specialization in a business department.

Non-Business students may not take more than 9 cr. of 300 or 400 level Business courses.
Undergraduate Certificates

Professional Sales Certificate
*Effective spring 2020*

The certificate in professional sales is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling. The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Students need to fulfill the course prerequisites set by the Ivy College of Business. A minimum of 9 credits used for the certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business course for the certificate.

Entrepreneurial Studies Cross-Disciplinary Minor

The Ivy College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include, MGMT 310 Entrepreneurship and Innovation (3 credits), either MGMT 313 Feasibility Analysis and Business Planning or MGMT 410 Social Entrepreneurship (3 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available at https://www.business.iastate.edu/undergraduate/majors-minors/entrepreneurial-studies-minor/.

Non-degree Seeking Students

Students who wish to take courses in the Ivy College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements.

Upper Division Courses for Students Outside the College

Students from outside the Ivy College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college’s admission requirements to the professional program, as long as they meet course prerequisites.

Graduate Study

Six programs are offered at the master’s level: a master of business administration (MBA), a master of accounting (MAcc), a master of business analytics (MoBA), a master of finance (MFin), a master of real estate development (MRED), and a master of science in information systems (MSIS). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (MBA) is the professional management education program for those pursuing careers in business. The goal of the MBA program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The MBA program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, business analytics, finance, information systems, marketing, or supply chain management. The Ivy College of Business also offers a business administration minor to students with majors outside the college.

A concurrent BS/MBA is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biosystems, chemical, civil, computer, electrical, industrial, mechanical, or software engineering. A concurrent BS/MBA is available to eligible undergraduate students majoring in agronomy, agricultural systems technology, animal science, chemistry, computer science, food science, and industrial design, industrial technology. A concurrent DVM/MBA degree is available to eligible Veterinary Medicine students.

Double degree programs are offered with apparel, merchandising, and design (MA/MSAMD) architecture (MArch/MBA), community and regional planning (MBA/MCRP), finance (MBA/MFin), information systems (MBA/MSIS), and statistics (MBA/MS Statistics).

The master of accounting (MAcc) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making. Additionally, the MAcc program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa. The 30 hour program requires 15 hours of graduate accounting courses, an international topics course, and 12 hours of non-accounting graduate credits, including a communications course. Students may pursue a specialization in Financial Reporting and Assurance, Data Analytics, Managerial Decision Making, Global Business, or Tax.

The master of business analytics (MoBA) is an interdisciplinary program that addresses the challenges of dealing with data analytics and business intelligence in the “Big Data” environment. The goal is to develop managers who will master analytics in ways that
lead to increased profits for their company. This blended program offers both online and face-to-face education in a comprehensive approach that draws from Business, Computer Science, Electrical and Computer Engineering, Statistics, and Industrial and Manufacturing Systems Engineering. It provides a foundation in data analytics project management, statistical and predictive modeling, consumer sentiment analysis, knowledge discovery, analytical reporting, segmentation analysis and data visualization. The program requires 30 credits of graduate level courses over a 21 month period. Students start the program with a one-week on-campus initiation class. Students then revisit campus once during the middle and once at the end of the program, while taking online classes during the rest of the time.

A certificate in business analytics is also available for working professionals. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face.

The master of finance (MFin) is designed to provide students with in-depth coverage of financial topics and a strong quantitative skill set. Students will learn financial analysis, valuation, modeling, and risk management techniques. The 30-credit program requires 24 finance credits, of which 6 are finance electives. The remaining 6 credits are electives selected from any related area.

A certificate in finance is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken face-to-face.

The master of science in information systems (MSIS) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. The 30 credit program includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

A certificate in supply chain management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken on-line.

A certificate in enterprise cybersecurity management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face.

A certificate in entrepreneurship and innovation is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face.

The Ivy College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Technology and Business, and Transportation.

**Ph.D in Business and Technology**

The Ivy College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of five specializations—entrepreneurship (ENTSP), information systems (IS), management (MGMT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by a 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information contact the Graduate Programs office in the Ivy College of Business.

Total Credits: 24

*All above core courses must be complete before Mgmt 478.

**BUSINESS MAJOR: 18-29 CR.** (depending on major)

**ELECTIVES: 0-17 CR.** (depending on major)

**Notes:**

1. Accounting, Actuarial Science, Finance, and Business Economics majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Bus Econ majors will take MATH 160 Survey of Calculus and ECON 207 Applied Economic Optimization instead of MATH 150 Discrete Mathematics for Business and Social Sciences and MATH 151 Calculus for Business and Social Sciences. Accounting majors will take ACCT 301 The Accounting Cycle concurrent with ACCT 285 Managerial Accounting as part of the Supporting Courses. Management Information Systems majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.

2. Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curricula.

3. Students may satisfy the Global Perspectives requirement by taking six credit hours from the University International Perspectives list or three credit hours from the International Perspectives list and three credit hours from the Ivy College of Business Global Perspectives list. Approved list of courses is available at http://www.business.iastate.edu/undergraduate/majors or from the Undergraduate Programs Office in the Ivy College of Business.

4. Courses used for the International Perspectives and U.S. Diversity requirements may also be used to fulfill other curriculum requirements.

**Professional Programs**
The curriculum in accounting is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

Bachelor of Science

The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the Ivy College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting, actuarial science, business economics, entrepreneurship, finance, management, management information systems, marketing, or supply chain management.

Majors

Accounting
Actuarial Science
Business Economics
Entrepreneurship
Finance

International Business (second major only)
Management
Management Information Systems
Marketing
Supply Chain Management

Accounting

For undergraduate curriculum in business, major in accounting.

The Department of Accounting offers a major in accounting. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (BS) degree, and 21 additional credits in the major.

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

The primary purpose of accounting is to provide useful information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, controlling, and reporting the activities of the firm. Accounting information is needed by external users in order to make investment decisions, to grant or withhold credit, and in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to think critically and creatively about accounting problems
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession.

The requirements for the accounting major are met by successful completion of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 383</td>
<td>Intermediate Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 384</td>
<td>Accounting Information Systems and Analytics</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 386</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
</tbody>
</table>
See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 316 Business Law. The Department of Accounting should be consulted for information on alternative plans of study.

The department also offers a minor for Ivy College of Business students with a different major. They are required to take 16 credits from a list of approved courses, of which 9 credits need to stand alone.

CPA Note: The accounting major requires 21 credits of accounting beyond ACCT 284 Financial Accounting and ACCT 285 Managerial Accounting. The State of Iowa CPA exam requirement is 24 hours beyond principles, therefore, students will need 3 additional credits beyond major requirements to qualify for the CPA exam. ACCT 316 Business Law is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam.

While students may sit for the CPA exam in Iowa after completing the required accounting course work and earning a bachelor's degree, CPA candidates must complete a total of 150 credits in order to be certified or licensed to practice in Iowa. Qualified students should consider taking the Masters of Accounting (MAcc) to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the MAcc Program as early as possible to complete their graduate degree in an efficient manner. Students planning certification outside Iowa must check local rules, as each state determines its own exam qualification and licensing requirements.

® Courses in these requirements may also be used as Global Perspective.

# US Diversity courses may be used to satisfy HUM/SOC SCI.
All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in accounting. The requirements to enter the professional program are:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU.
5. 122 Credits minimum and a Cumulative GPA of at least 2.00
6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

Graduate Study

The department offers a graduate degree, the master of accounting (MAcc). This is a 30-hour degree which also offers up to two optional 12 credit hour specializations within those 30 hours. Specializations are offered in Financial Reporting and Assurance, Data Analytics, Managerial Decision Making, Global Business, or Tax. The program requires 15 hours of graduate accounting courses, ENGL 592C Core Studies: Professional Communication or its equivalent, at least 9 hours of non-accounting graduate electives, and an international course from an approved list. Included in the 15 required hours of graduate accounting courses is one 3-credit required course, ACCT 598 Financial Accounting: Theory and Contemporary Issues.

The MAcc is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The MAcc program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the MAcc. Contact the coordinator of the MAcc program for details.

The department participates in the full-time and part-time Master of Business Administration (MBA) program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.

Courses primarily for undergraduates:

**ACCT 215: Legal Environment of Business**
(3-0) Cr. 3. F.S.S.
*Prereq: Sophomore classification*
General history, structure, and principles of the US legal system. The legal system, as an agency of social control and tool for resolving disputes. The court systems, Constitution, torts, crimes, intellectual property, contracts, property rights, employment law, basic business entity law, bankruptcy, administrative agencies, environmental law and agency law.

**ACCT 284: Financial Accounting**
(3-0) Cr. 3. F.S.S.
Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

**ACCT 285: Managerial Accounting**
(3-0) Cr. 3. F.S.S.
*Prereq: ACCT 284*
Understanding of fixed and variable costs and their role in planning, control and performance evaluation. Examination of alternative costing methods. Making decisions by identifying and developing relevant information. Development of spreadsheet skills.

**ACCT 301: The Accounting Cycle**
(1-0) Cr. 1. F.S.S.
*Prereq: ACCT 284*
Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process.

**ACCT 315: Business Data Streams and Issues**
(Cross-listed with MIS). Cr. 3. Alt. F., offered even-numbered years. Alt. S., offered odd-numbered years. SS.
*Prereq: COM S 113, MIS 301, ACCT 284*
Identification of open data sources and other private data sources. Develop methods of data access, collection, and sharing; develop methods to validate and standardize data sources; develop methods to assess data worthiness (risk).
ACCT 316: Business Law  
(3-0) Cr. 3. F.S.  
Prereq: ACCT 215  
Continuation of 215. The Uniform Commercial Code as applied to sales contracts and negotiable instruments. Property law, wills and estates, insurance, secured transactions, corporation law, partnership law and antitrust law.

ACCT 383: Intermediate Managerial Accounting  
(3-0) Cr. 3. F.S.  
Prereq: ACCT 285 or ACCT 501; and ACCT 301  
Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities.

ACCT 384: Accounting Information Systems and Analytics  
(3-0) Cr. 3.  
Prereq: ACCT 285 or ACCT 501; ACCT 301 and MIS 301  
Concepts and procedures underlying creating, sharing, reporting, storing, and analyzing accounting data. Information technology internal controls and audit techniques. Trends in accounting information systems.

ACCT 386: Intermediate Accounting I  
(3-0) Cr. 3. F.S.  
Prereq: ACCT 285 and ACCT 301  
The conceptual framework of financial accounting. Communication of financial information on the income and retained earnings statements, statement of cash flows, and the balance sheet. Accounting concepts relating to current and operational assets of the firm.

ACCT 387: Intermediate Accounting II  
(3-0) Cr. 3. F.S.  
Prereq: Minimum of C- in ACCT 386  

ACCT 483: Application and Communication in Managerial Accounting  
(Dual-listed with ACCT 583). Cr. 3.  
Prereq: ACCT 383 or ACCT 581  
Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, data visualization, and oral presentation skills.

ACCT 484: Advanced Accounting Information Systems  
(Dual-listed with ACCT 584). (3-0) Cr. 3.  
Prereq: ACCT 384  
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 485: Principles of Federal Income Tax  
(3-0) Cr. 3. F.S.  
Prereq: Minimum of C- in ACCT 386 or ACCT 501  
Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis / cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning.

ACCT 487: Volunteer Income Tax Assistance  
(Dual-listed with ACCT 587). (0-2) Cr. 1. Repeatable, maximum of 3 credits. S.  
Prereq: ACCT 285 or ACCT 501  
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 488: Governmental and Non-profit Institution Accounting  
(Dual-listed with ACCT 588). (3-0) Cr. 3.  
Prereq: ACCT 386  
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 489: Corporate Social Responsibility Reporting  
(Dual-listed with ACCT 589). (3-0) Cr. 3. S.  
Prereq: ACCT 386 or ACCT 501  
Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions.

ACCT 490: Independent Study  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: ACCT 285, senior classification, permission of instructor
ACCT 495: Advanced Accounting Problems
(Dual-listed with ACCT 595). (3-0) Cr. 3.
Prereq: ACCT 387
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 496: Accounting in the Global Economy
(Dual-listed with ACCT 596). (3-0) Cr. 3.
Prereq: ACCT 386 or ACCT 501
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 497: Introduction to Auditing
(3-0) Cr. 3. F.S.
Prereq: ACCT 384, ACCT 387 and STAT 326
The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing.

ACCT 498: Capstone in Accounting
(2-0) Cr. 2. F.
Prereq: ACCT 383, ACCT 384, ACCT 387, credit or enrollment in ACCT 485.
Integrative studies in accounting. Development of critical thinking, ethical reasoning, professional research and teamwork skills. Written, visual, and oral communication with corporate stakeholders.

Courses primarily for graduate students, open to qualified undergraduates:

ACCT 501: Financial Accounting
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or departmental permission
A general introduction to financial accounting information. Topics covered include the use and analysis of financial information, the regulatory environment, the role of International Financial Reporting Standards (IFRS), and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

ACCT 571: Real Estate Law
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission.
Fundamentals of real estate finance and development from a legal perspective and in a transactional setting. Topics include land acquisition and finance, choice of entity, tax aspects, management, disposition of real property, and recent legal developments. Legal responsibilities of owners, designers, and contractors are also examined by highlighting typical contractual relationships in place throughout the design and construction process.

ACCT 581: Accounting for Decision Making
(3-0) Cr. 3.
Prereq: ACCT 501 or equivalent

ACCT 582: Corporate Governance and Top Management
(Cross-listed with MGMT). (3-0) Cr. 3.
Prereq: MGMT 503 or permission
Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

ACCT 583: Application and Communication in Managerial Accounting
(Dual-listed with ACCT 483). Cr. 3.
Prereq: ACCT 383 or ACCT 581
Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, data visualization, and oral presentation skills.

ACCT 584: Advanced Accounting Information Systems
(Dual-listed with ACCT 484). (3-0) Cr. 3.
Prereq: ACCT 384
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.
ACCT 585: Taxes and Business Strategy  
(3-0) Cr. 3.  
_Prereq: ACCT 485_  
Integration of concepts from accounting, finance, and economics to determine how taxes affect business decisions. Provides students with a conceptual framework for thinking about business tax planning and applies it to various common business decisions.

ACCT 586: Advanced Federal Taxation  
(3-0) Cr. 3.  
_Prereq: ACCT 485_  
Advanced coverage of federal taxation including issues related to the taxation of corporations, partnerships, estates and trusts, and their owners. Includes coverage of rules, concepts, background, and planning opportunities related to a number of common transactions involving these entities.

ACCT 587: Volunteer Income Tax Assistance  
(Dual-listed with ACCT 487). (0-2) Cr. 1. Repeatable, maximum of 3 credits. S.  
_Prereq: ACCT 285 or ACCT 501_  
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 588: Governmental and Non-profit Institution Accounting  
(Dual-listed with ACCT 488). (3-0) Cr. 3.  
_Prereq: ACCT 386_  
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 589: Corporate Social Responsibility Reporting  
(Dual-listed with ACCT 489). (3-0) Cr. 3. S.  
_Prereq: ACCT 386 or ACCT 501_  
Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions.

ACCT 590: Special Topics  
Cr. 1-3. Repeatable. F.S.S.S.  
_Prereq: Permission of instructor_  
For students wishing to do individual research in a particular area of accounting.

ACCT 591: Fraud Examination and Prevention  
(3-0) Cr. 3.  
_Prereq: ACCT 497 or ACCT 501_  
Principles and methodology of fraud detection and deterrence. Addresses the causes and elements of fraud, asset theft, corruption, financial statement mis-representation, internal controls for fraud prevention, investigative evidence gathering, and legal aspects of fraud.

ACCT 592: Financial Statement Analysis  
(3-0) Cr. 3.  
_Prereq: ACCT 386 or ACCT 501_  
Presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics include the financial reporting system, the primary financial statements, effects of accounting method choice on reported financial data, and firm valuation.

ACCT 594: Business Valuation  
(3-0) Cr. 3.  
_Prereq: ACCT 387 or ACCT 592_  
Using financial statement analysis to value the firm. Topics covered include assessing how well a firm's financial statements reflect the economic effects of its resource management strategies and constructing proforma financial information that will serve as inputs to valuation models.

ACCT 595: Advanced Accounting Problems  
(Dual-listed with ACCT 495). (3-0) Cr. 3.  
_Prereq: ACCT 387_  
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 596: Accounting in the Global Economy  
(Dual-listed with ACCT 496). (3-0) Cr. 3.  
_Prereq: ACCT 386 or ACCT 501_  
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 597: Advanced Auditing and Assurance Services  
(3-0) Cr. 3.  
_Prereq: ACCT 497_  
A study of advanced auditing and assurance issues. Topics include auditor independence, audit risk analysis, internal control evaluation and reporting, fraud detection, data analytic applications in auditing, audit reporting, auditors’ legal liability, and non-financial information assurance.
(3-0) Cr. 3. F.
Prereq: ACCT 386 or ACCT 501

ACCT 599: Creative Component
Cr. 2.
Prereq: Admission to the Master of Accounting Program
This course prepares students to complete their creative component project option in the Master of Accounting degree.

Business Administration
The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Management, Marketing, Supply Chain Management, and Information Systems and Business Analytics, by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study
The Ivy College of Business offers a professional graduate degree program in business administration, the master of business administration (MBA), which is described below. The college also has five specialized master degree programs: the master of accounting (MAcc), the master of business analytics (MoBA), the master of finance (MFin), the master of real estate development (MRED), and the master of science in information systems (MSIS). The college also offers a PhD in business and technology, with specializations in information systems, management, marketing, supply chain management, and entrepreneurship. Finally, the Ivy College of Business is a participating member of the following interdepartmental programs: master of engineering management, master of science in transportation, master of science in seed technology and business, master of science and PhD in human computer interaction, and master of science in information assurance.

Master of Business Administration (MBA)
The Ivy College of Business offers a 48 credit program leading to a non-thesis master of business administration degree with a specialization in accounting, finance, information systems, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The MBA is the professional management education program for those pursuing careers in business.

Students may enroll in the MBA on either a full-time or part-time basis. The part-time MBA is designed for employed professionals. Part-time MBA classes are held in the evenings in downtown Des Moines.

Students working toward the MBA are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, professional responsibilities, and strategic management), as well as advanced elective coursework. Two courses on professional skills development are also required for full-time MBA students.

Courses for the MBA are provided by the departments of Accounting, Economics, Finance, Management, Marketing, and Supply Chain and Information Systems. Courses from other departments may also be chosen to meet specific student interests.

A concurrent BS/MBA is available to eligible undergraduate students majoring in aerospace, agricultural, biosystems, chemical, civil, computer, electrical, industrial, software or mechanical engineering. A concurrent BS/MBA is available to eligible undergraduate students majoring in Agricultural Systems Technology, Agronomy, Animal Science, Chemistry, Food Science, and Industrial Technology. The Ivy College of Business and the College of Veterinary Medicine offer a concurrent MBA/DVM degree.

Double master’s degree programs are offered with architecture (MArch/MBA), apparel, merchandising, and design (MBA/MSAMD) community and regional planning (MBA/MCRP), information systems (MBA/MSIS), finance (MBA/MFin), and statistics (MBA/MS-Statistics).

The Ivy College of Business also offers a business administration minor to students with majors outside the college.

The MBA program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and two letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time MBA. Although applications will be considered after this date, candidates are encouraged to submit their application materials by July 1 (March 1 for international students). Part-time MBA applications are considered for fall, spring, or summer entry.
Ph.D. in Business and Technology

The Ivy College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of five specializations—entrepreneurship (ENTSP), information technology (IS), management (MGMT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These may include:

- Financial or managerial accounting (min. 3 Cr)
- Corporate finance (min. 3 Cr)
- Management information systems (min. 3 Cr)
- Marketing (min. 3 Cr)
- Supply chain management (min. 3 Cr)
- Economics – micro and macro (min. 6 Cr)

Students can choose one of five areas of specialization—ENTSP, IS, MGMT, MKT, or SCM.

The entrepreneurship (ENTSP) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on preparing students to conduct and publish scholarly research in the fields of Entrepreneurship, Innovation, and Technology Management.

The information systems (IS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the IS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

The management (MGMT) specialization applies a broad range of theoretical perspectives from the social sciences and diverse research methods to the study of organizational behavior, human resources, strategy, and entrepreneurship. The curriculum takes a multidisciplinary approach to analyze individuals and teams, the formulation and implementation of strategy, the effective use of human resources, social responsibility and ethics, entrepreneurship, innovation and technology, and the challenges of the global business environment. The program emphasizes personalized attention and the development of scholars who can contribute with high-quality theoretical and empirical research in these and related areas.

The marketing (MKT) area focuses on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses’ customer base.

The supply chain management (SCM) specialization focuses on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today’s world, where competition occurs across supply chain networks, SCM also involves integrating business processes across firms.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student’s PhD committee. Each student must complete advanced courses in his/her area of specialization, a minor area that supports the major area, and research methods courses. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the PhD program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Courses primarily for undergraduates:
BUSAD 102: Business Learning Team Orientation
(1-0) Cr. 1. F.S.
A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Only one of BusAd 102 or BusAd 103 may be counted towards graduation.

BUSAD 103: Orientation
(1-0) Cr. 1. F.S.
A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Only one of BUSAD 102 or BUSAD 103 may be counted toward graduation.

BUSAD 203: Business Careers and Employment Preparation
(1-0) Cr. 1.
Prereq: BUSAD 101 or 102
Explore careers in business and issues relevant to career readiness and professional development. Identifying individual and team strengths, values, developing and implementing a professional job search, resume and professional correspondence, interviewing, evaluating offers, business etiquette, networking and transitioning from student to employee.

BUSAD 250: Introduction to Business
(3-0) Cr. 3.
Prereq: COM S 113X
Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

BUSAD 292: Entrepreneurship & Innovation Learning Community (EILC) Seminar
(1-0) Cr. 1.
Prereq: Current member of or have applied to be a member of Entrepreneurship and Innovation Learning Community (see www.isupcenter.org/ELC for more information)
Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

BUSAD 391: Professional Experiential Learning
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience.
Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391A: Professional Experiential Learning: Domestic Internship
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience
Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391B: Professional Experiential Learning: International Internship
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience
Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391C: Professional Experiential Learning: Domestic Travel and Study
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience
Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391D: Professional Experiential Learning: International Travel and Study
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience
Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391E: Professional Experiential Learning: Other Experiential Learning Experience
Cr. 1. Repeatable, maximum of 6 credits.
Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience
Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.
BUSAD 398: Cooperative Education  
Cr. R. Repeatable, maximum of 3 times.  
**Prereq:** Permission of department  
Required of all cooperative education students engaged in full-time internship/co-op. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Offered on a satisfactory-fail basis only.

BUSAD 490: Independent Study  
Cr. 1-3. Repeatable.  
**Prereq:** Professional program in Business; permission of instructor; for 490H: Admission to the Business Honors Program

BUSAD 490A: Independent Study: International Business  
Cr. 1-3. Repeatable.  
**Prereq:** Professional program in Business; permission of instructor

BUSAD 490E: Independent Study: Entrepreneurship  
Cr. 1-3. Repeatable.  
**Prereq:** senior classification, permission of instructor

BUSAD 490G: Independent Study: General  
Cr. 1-3. Repeatable.  
**Prereq:** Professional program in Business; permission of instructor

BUSAD 490H: Independent Study: Honors  
Cr. 1-3. Repeatable.  
**Prereq:** Admission to the Business Honors Program

Courses primarily for graduate students, open to qualified undergraduates:

BUSAD 501: Strategic Management  
(Cross-listed with STB). (2-0) Cr. 2.  
**Prereq:** Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

BUSAD 502: Quantitative Business Analysis and Decision Making  
(3-0) Cr. 3.  
**Prereq:** Enrollment in MBA program or departmental permission  
Introduction to the sources and statistical analysis of data as well as optimization models for use in making business decisions. Data collection, descriptive and inferential statistics including hypothesis testing, analysis of variance, multiple regression, linear programming and simulation.

BUSAD 503: Information Systems  
(Cross-listed with STB). (2-0) Cr. 2.  
**Prereq:** Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases, reading, and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical and data-driven competitive environment.

BUSAD 504: Marketing and Logistics  
(Cross-listed with STB). (3-0) Cr. 3.  
**Prereq:** Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BUSAD 507: Organizational Behavior  
(Cross-listed with STB). (2-0) Cr. 2.  
**Prereq:** Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BUSAD 508: Accounting and Finance  
(Cross-listed with STB). (3-0) Cr. 3.  
**Prereq:** Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.  
Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.
BUSAD 509: Seed Trade, Policy and Regulation
(Cross-listed with STB). (3-0) Cr. 3.
Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.
Cultural, financial, economic, political, legal/regulatory environments shaping an organization’s international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BUSAD 590: Special Topics in Business
(3-0) Cr. 3. Repeatable.
Prereq: Enrollment in MBA program or departmental permission.
A special topics course covering contemporary issues in business. Topics vary by semester.

BUSAD 591: Professional Experiential Learning
Cr. 1-3. Repeatable.
Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience
Academically supervised travel and/or work experiences in a business related discipline.

BUSAD 592: MBA Professional Skills Development
Cr. R.
Prereq: Admission to Full-time MBA Program
Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical for success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Offered on a satisfactory-fail basis only.

BUSAD 594: MBA Professional Skills Development II
Cr. R.
Prereq: BUSAD 592
A second course designed to improve the professional skills of first-year MBA students. Emphasis on building effective communications and networking skills. Students will participate in professional workshops, company visits, executive speaker seminars, service learning projects, business case competitions, and related activities. Offered on a satisfactory-fail basis only.

BUSAD 598: Cooperative Education
Cr. R.
Prereq: Permission of instructor
Professional work experience. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

BUSAD 599: Creative Component
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599A: Creative Component: Accounting
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599C: Creative Component: Finance
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599E: Creative Component: Management
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599F: Creative Component: Marketing
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599I: Creative Component: Agribusiness
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599J: Creative Component: General Business
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599K: Creative Component: Management Information Systems
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599M: Creative Component: Supply Chain Management
Cr. 3.
Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

Courses for graduate students:
BUSAD 644: Business Research Methods
(3-0) Cr. 3. F.
Prereq: In PhD program in the College of Business or consent of instructor
A survey of the wide variety of research methods used in business.
Methods will be presented and discussed with emphasis on applicability
in different research situations.

BUSAD 699: Research
Cr. 3-6. Repeatable. F.S.S.
Prereq: Graduate classification, permission of major professor
Research.

Business Economics
Cooperative Major between the Ivy College of Business and the
Department of Economics

The objective of the Business Economics major is to provide a high
quality education with a balanced emphasis in both business and
economics. Such an education should equip graduates with a unique
set of skills distinguishing them from other graduates. In particular, they
will have the ability to use both business and economic reasoning to
think critically and address complex issues using tools and decision
making models of economics, business, mathematics, statistics, as well
as concepts from the biological, physical, and social sciences; to make
decisions and to communicate effectively.

# Students majoring in Business Economics (BUSEC) will take MATH 160 and ECON 207 instead of MATH 150 and MATH 151.
@ Courses in these requirements may also be used as Global Perspective, Humanities or Social Science.
% Students in the Management Information Systems major (MIS) will take MIS 207 instead of an elective. Students in Accounting, Finance or Business Economics majors will take STAT 326 instead of an elective.
## Core Block Courses: Students take the Core Block Courses containing their MAJOR core course first. All Blocks must be completed prior to taking MGMT 478 in the last semester.
BLOCK A: ACCT 285, ACCT 301, MIS 301
BLOCK B: FIN 301 and SCM 301
BLOCK C: MGMT 370 and MKT 340

Professional Program Requirements:
1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU.
5. 122 Credits minimum and a Cumulative GPA of at least 2.00
6. A grade of C or higher in ENGL 250, and a C or better in either ENGL 150 or ENGL 302.

Finance

For undergraduate curriculum in business, major in finance.

The Department of Finance offers a major in finance. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (B.S.) degree, and 21 additional credits in the major.

Finance is a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include corporate financial management, investments, portfolio management, insurance, real estate, banking, and risk management. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as the finance member of a team
4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

In addition to the basic business requirements, finance majors must also complete:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU.
5. 122 Credits minimum and a Cumulative GPA of at least 2.00
6. Grade of “C” or higher in 2 of the 3 required ENGL courses.

Graduate Study

The Finance Department offers a Master of Finance (MFin) degree. The MFin is a non-thesis, non-creative component curriculum designed to provide students with in-depth coverage of finance topics and a strong quantitative skill set. Students will learn financial analysis and valuation, advanced regression techniques and programming approaches for data analysis, time series analysis and forecasting, optimization techniques, modelling of financial and risk variables, simulation techniques, and tools for effective risk management. The 30 credit program requires 18 core credits. Another 12 credits of electives are required, six of which must be in finance courses.

The department also participates in a full-time and part-time Master of Business Administration (MBA) program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in finance.

Courses primarily for undergraduates:

FIN 301: Principles of Finance
(3-0) Cr. 3. F.S.SS.
Prereq: ACCT 284, ECON 101, STAT 226
Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.
FIN 310: Corporate Finance  
(3-0) Cr. 3. F.S.SS.  
Prereq: FIN 301  
Theory used in a firm's investment and financing decisions. Analysis of environment in which financial decisions are made; applications of analytical techniques to financial management problems.

FIN 320: Investments  
(3-0) Cr. 3. F.S.SS.  
Prereq: FIN 301  
Introduction to securities and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, measurement of return and risk, behavior of security prices, valuation of stocks and bonds, mutual funds, portfolio selection techniques, and performance evaluation.

FIN 327: Fixed Income Securities  
(3-0) Cr. 3.  
Prereq: FIN 301  
Valuation of fixed income securities, including pricing conventions, term structure of interest rates, default, duration, and hedging of interest rate risk with derivatives. Analysis of bond market sectors, including treasury, agency, corporate, sovereign, municipal, and residential mortgage bonds.

FIN 330: Financial Markets and Institutions  
(3-0) Cr. 3. F.S.  
Prereq: FIN 301  
Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing an integrated understanding of markets and financial service providers including global linkages.

FIN 361: Personal Risk Management and Insurance  
(3-0) Cr. 3. F.S.  
Prereq: ECON 101  
Risk concepts and the use of insurance by individuals and families. Emphasis on the insurance mechanism and methods of dealing with income, property, and liability risks.

FIN 371: Real Estate Principles  
(3-0) Cr. 3. SS.  
Prereq: ECON 101  
Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments.

FIN 415: Business Financing Decisions  
(3-0) Cr. 3.  
Prereq: FIN 301  
In depth study of the firm's external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project.

FIN 424: Financial Futures and Options  
(3-0) Cr. 3.  
Prereq: FIN 320 and STAT 326  
Advanced study of pricing and using derivatives - instruments deriving value from fundamental items such as commodities, currency exchange rates, market indices, equities and bonds. Addresses basic building blocks of derivatives (i.e., forwards, futures, options and swaps) and relevant current topics and issues.

FIN 425: Security Analysis and Portfolio Management  
(3-0) Cr. 3. F.S.  
Prereq: FIN 320, STAT 326 and permission of instructor  
Advanced study of security analysis, security selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio’s performance relative to standard benchmarks is also required.

FIN 428: Advanced Fixed Income Analysis and Portfolio Management  
(Dual-listed with FIN 528). (3-0) Cr. 3.  
Prereq: FIN 327, FIN 320, STAT 326  
Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 435: Venture Capital, Private Equity, and Mergers and Acquisitions  
(3-0) Cr. 3. S.  
Prereq: FIN 310, FIN 320, STAT 326  
An advanced investments class that focuses on alternative investments. Topics include techniques for valuing public and private firms, venture capital finance, investment banking, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.
FIN 445: Bank Management Decisions
(3-0) Cr. 3. F.S.
Prereq: STAT 326, and FIN 330 or ECON 353
Analysis of operations of depository financial institutions from management viewpoint. Emphasis on evaluating performance, policy formation, asset and liability management, the role of capital, and the operating environment.

FIN 450: Analytical Methods in Finance
Cr. 3. F.S.
Prereq: STAT 326, and ECON 301 or FIN 301
Applied empirical methods commonly employed in the analysis of firm and market data. Specific applications to financial and agricultural markets. Experiential learning experience using lectures with frequent in-class computer work sessions. Experience with financial and agricultural data sources. Application and interpretation of empirical techniques.

FIN 462: Corporate Risk Management and Insurance
(3-0) Cr. 3. F.
Prereq: FIN 301 and STAT 326
Analysis of an organization's approaches to the management of price, credit, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements.

FIN 464: Risk Management Derivatives
(3-0) Cr. 3.
Advanced models for options and bond pricing. Geometric Brownian motion, risk-neutral pricing, no-arbitrage pricing models, exotic options, pricing options through simulation, and applications of derivatives to hedging market and credit risk exposure. Risk management tools and how they are applied within financial institutions such as banks, insurance companies, mutual funds, and hedge funds, as well as the corporate enterprise. Topics include the Basel accords, volatility modelling, value-at-risk analysis, extreme value theory, credit default swaps, and portfolio simulation.

FIN 472: Real Estate Finance
(3-0) Cr. 3.
Prereq: FIN 301 and STAT 326
Introduction to the techniques of assessing the value of real estate and real estate financing instruments.

FIN 474: Real Estate Investment
(3-0) Cr. 3. F.S.
Prereq: FIN 301, FIN 371
Introduction to theories and methods of investment analysis applied to real estate. Studies cash flow analysis, alternative measures of investment performance, the impact of the financing decision on real estate investment risks and return, and various real estate financing techniques. Covers cases involving more complex financing and capital markets tools used in real estate.

FIN 480: International Finance
(3-0) Cr. 3. F.S.
Prereq: FIN 310, FIN 320 or FIN 330
Advanced study of currency market equilibrium, use and analysis of currency derivatives, hedging currency risk, and additional topics, which could include multinational capital budgeting, taxation, raising capital internationally, international portfolio diversification, international capital market equilibrium, political and country risk, financing international trade, multinational corporate treasury management, and current issues.

FIN 490: Independent Study
Cr. 1-3. Repeatable.
Prereq: FIN 301, STAT 326 and permission of instructor

FIN 499: Finance Internship
(3-0) Cr. 1-3. F.S.S.S.
Prereq: GPA 2.5; permission of internship coordinator; STAT 326; FIN 499A: FIN 330; FIN 499B: FIN 361; FIN 499C: FIN 301 plus 3 additional credits in finance; FIN 499D: FIN 320; FIN 499E: FIN 310
Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499A: Finance Internship:Banking
(3-0) Cr. 1-3. F.S.S.S.
Prereq: GPA 2.5; permission of internship coordinator; STAT 326.
Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499B: Insurance
(3-0) Cr. 1-3. F.S.S.S.
Prereq: GPA 2.5; permission of internship coordinator; FIN 361 and STAT 326
Supervised experience in a private sector insurance organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.
FIN 499C: Real Estate
(3-0) Cr. 1-3. F.S.S.S.
Prereq: GPA 2.5; permission of internship coordinator; FIN 301 plus 3 additional credits in finance and STAT 326;
Supervised experience in a private sector real estate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499D: Investments
(3-0) Cr. 1-3. F.S.S.S.
Prereq: GPA 2.5; permission of internship coordinator; FIN 320 and STAT 326
Supervised experience in a private sector investment organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499E: Corporate
(3-0) Cr. 1-3. F.S.S.S.
Prereq: GPA 2.5; permission of internship coordinator; FIN 310 and STAT 326
Supervised experience in a private sector corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

FIN 501: Financial Valuation and Corporate Financial Decisions
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or departmental permission.
Shareholder wealth maximization as the goal of the firm within a social responsibility context, financial Math, valuation of securities, the global financial market place as the test of value, estimation of cost of capital, global capital investment decisions, capital structure policy, working capital management.

FIN 510: Advanced Corporate Finance
(3-0) Cr. 3.
Prereq: FIN 501
Examines corporate financial decisions, including theory and associated empirical evidence. Topics include agency conflicts, corporate governance, executive compensation, becoming publicly traded, raising capital through public and private offerings, capital structure, financial distress and bankruptcy, leasing, dividend policy, corporate control, restructuring, and risk management.

FIN 515: Case Studies in Financial Decision Making
(3-0) Cr. 3.
Prereq: FIN 501
This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

FIN 520: Investments
(3-0) Cr. 3.
Prereq: FIN 501
Analysis of risk and return for individual securities and portfolios of securities. Topics include the market environment, mechanics of trading, measurement of return and risk, valuation of stocks and bonds, mutual funds, optimal asset allocation, market efficiency, portfolio performance evaluation, and risk management.

FIN 528: Advanced Fixed Income Analysis and Portfolio Management
(Dual-listed with FIN 428). (3-0) Cr. 3.
Prereq: FIN 327, FIN 320, STAT 326
Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 530: Financial Analysis and Valuation
(3-0) Cr. 3.
Prereq: FIN 501
Valuation of public and private firms through analysis of financial statements and other information. Study of drivers of value creation, industry analysis, patterns of growth, models for forecasting and analyzing firm cash flows, estimating and adjusting cost of capital, alternative methods of cash flow valuation, the calculation and use of valuation multiples, and valuing mergers and acquisitions.

FIN 534: Financial Derivatives
(3-0) Cr. 3. F.
Prereq: Graduate classification
An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered.
FIN 535: Venture Capital, Private Equity, and Mergers and Acquisitions
(3-0) Cr. 3.
Prereq: FIN 501
Advanced investments class focusing on alternative investments. Topics include the nature and scope of investment banking, techniques for valuing public and private firms, venture capital finance, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.

FIN 550: Financial Econometrics
(3-0) Cr. 3.
Prereq: FIN 501, ECON 571
Analysis, modeling, and forecasting of time series data, volatility modeling and forecasting, maximum likelihood estimation, robust standard error computation, specification testing, estimation under alternative distributional assumptions, and Monte Carlo simulation. Applications include tests of asset pricing models, analysis of asset volatility, corporate event studies, and value at risk analysis.

FIN 564: Advanced Derivatives and Risk Management
(3-0) Cr. 3.
Prereq: FIN 501, FIN 534
Risk management tools and how they are applied within financial institutions and the corporate enterprise. Focus on measuring exposure to stock market risk, interest rate risk, currency risk, and credit risk and how these exposures may be managed. Topics include bank risk management regulations, volatility modeling, value at risk analysis, extreme value theory, credit default swaps, and portfolio simulation.

FIN 572: Real Estate Finance
(3-0) Cr. 3.
Prereq: FIN 501 or enrollment in MRED
Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

FIN 574: Real Estate Investment
(3-0) Cr. 3.
Prereq: FIN 501; enrollment in the MRED or instructor permission.
Introduction to theories and methods of investment analysis applied to real estate. Designed as second course in the sequence of real estate finance and investments. Basics of income-producing properties, the valuations of those properties using pro-forma, risk management and various other issues about the finance and investment of income-producing properties. Study of analysis of sustainable real estate development from capital budgeting perspective. Discussion of the financing practices in real estate and land development.

FIN 575: Real Estate Securitization and Portfolio Management
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission.
Mechanics, incentives and importance of securitization in firms’ efforts to raise capital with application to residential and commercial real estate. Design and implementation of portfolio management strategies of private-market real estate investments. Additional topics include devising alpha strategies, approaches to diversification, creating investment plans to achieve different risk profiles and performance measurement and analysis.

FIN 576: Real Estate Market Analysis
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission.
Introduction to the structure of real estate markets. Topics include determinants of supply and demand in space and capital markets, house price dynamics and causes and consequences of market cycles. Discussion of likely behavior of U.S. real estate markets and comparisons with markets in other countries.

FIN 578: MRED Capstone Project
(Cross-listed with CRP). (3-0) Cr. 3.
Prereq: Enrollment in MRED.
Refinement of students’ problem-solving, communication and negotiation skills. Students work on an actual case. Teams will apply knowledge acquired in the classroom to some aspect of a current development on-the-ground and in-process project.

FIN 590: Special Topics
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: Permission of instructor
For students wishing to do individual research in a particular area of finance.

Management

For undergraduate curriculum in business, major in management.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The instructional objectives of the Management Department are to provide students with foundational knowledge of organizations, organizational leadership activities, and the ideals and activities of business entrepreneurship. Management majors will have an understanding of (1) employee work-related attitudes, behaviors, and human resource management practices within firms (2) challenges and strategies in international business, and (3) the foundations of entrepreneurship and innovation. Students will demonstrate
awareness for the role of diversity, ethics and technology in business decision-making, the impact of external forces and global issues on organizations. Students will display the ability to think critically, to communicate effectively and to contribute constructively to effective team performance.

Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management concepts, theories, techniques, and skills are applicable to business functional areas and are essential for successful organizations regardless of whether the venture thrives in character as large or small, well-established or entrepreneurial start-up. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. In addition to the basic business foundation and core courses, a management student has to take 9 hours of elective courses OR has the OPTION of participating in a human resource management track. Management majors are required to complete 18 credit hours of management or department-approved courses. Included in these 18 credits are three required courses:

### REQUIRED (9 CREDITS)
- ENTSP 310: Entrepreneurship and Innovation 3
- MGMT 414: International Management 3
- MGMT 471: Personnel and Human Resource Management 3

### ELECTIVE COURSES (9 CREDITS)
- ENTSP 313: Feasibility Analysis and Business Planning 3
- ENTSP 320: Corporate Entrepreneurship, Innovation and Technology Management 3
- ENTSP 367: International Entrepreneurship 3
- ENTSP 410: Social Entrepreneurship 3
- ENTSP 485: Trends and Theories of Entrepreneurship 3
- MGMT 422X: Negotiation and Conflict Resolution 3
- MGMT 472: Management of Diversity 3
- MGMT 473X: Advanced Human Resource Management 1 3

OR Students have the option of specializing in the following track:

### OPTIONAL HUMAN RESOURCE MANAGEMENT TRACK (9 CREDITS)
- MGMT 422X: Negotiation and Conflict Resolution 3
- MGMT 472: Management of Diversity 3
- MGMT 473X: Advanced Human Resource Management 1 3

The department also offers a minor for non-Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Management, B.S.

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.

# US Diversity courses may be used to satisfy HUM/SOC SCI.
All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in management. The requirements to enter the professional program are:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:
1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU.
5. 122 Credits minimum and a Cumulative GPA of at least 2.00
6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

Graduate Study

The Department of Management participates in the full-time and part-time Master of Business Administration (MBA) and in the PhD in Business and Technology. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives.

The PhD in Business and Technology with a Management (MGMT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on management issues relating to organizational behavior, human resources, strategy, and entrepreneurship.

Courses primarily for undergraduates:

**MGMT 310: Entrepreneurship and Innovation**
(Cross-listed with ENTSP). (3-0) Cr. 3. F.S.
*Prereq: Sophomore classification*
Review of the entrepreneurial process with emphasis on starting a new business. How to analyze opportunities, develop an innovative product, organize, finance, market, launch, and manage a new venture. Deals with the role of the entrepreneur and the importance of a business plan. Speakers and field project.

**MGMT 313: Feasibility Analysis and Business Planning**
(Cross-listed with ENTSP). (3-0) Cr. 3. F.S.
*Prereq: MGMT 310*
Developing an idea for a new business venture, conducting a feasibility study, researching the potential market, analyzing the competition, and writing a formal business plan. Basic business functions are discussed in terms of their application to conducting feasibility analysis and writing a business plan for an entrepreneurial venture.

**MGMT 320: Corporate Entrepreneurship, Innovation and Technology Management**
(Cross-listed with ENTSP). Cr. 3. Repeatable, maximum of 2 times. F.S.
*Prereq: MGMT 310*
Entrepreneurial approaches aimed at the identification, development and exploitation of technical and organizational innovations, the management of new product or process developments, and the effective management of new ventures in the context of mid-size to large corporations in manufacturing as well as in service industries. Development of an awareness and understanding of the range, scope, and complexity of issues related to the creation of a corporate environment that is supportive of entrepreneurial endeavors as well as to gain insights concerning the effective implementation of technological and organizational innovations in corporate settings.

**MGMT 367: International Entrepreneurship**
(Cross-listed with ENTSP). (3-0) Cr. 3.
*Prereq: Sophomore classification*
The essentials of operating an entrepreneurial firm in an international environment. Topics include understanding the role of entrepreneurship in economic development, starting and developing a business in an international market, financing international ventures, international management issues and exchange rates. Meets International Perspectives Requirement.

**MGMT 370: Management of Organizations**
(3-0) Cr. 3. F.S.S.
*Prereq: ECON 101 or ECON 102*
A management functions approach is used to explain what managers do in organizations; how they deal with external constituents, how they structure their companies, and how they deal with employees. A contingency approach is used as a framework for understanding how to increase the effectiveness and efficiency of organizations in today’s dynamic, highly competitive business environment.
MGMT 371: Organizational Behavior  
(3-0) Cr. 3. F.S.  
Prereq: Sophomore classification  
The study of individual attributes, interpersonal relations, and employee attitudes in organizations. Instructional emphasis is placed on how management concepts such as reward systems, job design, leadership, teams, etc., can be used to manage employee attitudes and behavior.

MGMT 372: Responsible Management and Leadership in Business  
(3-0) Cr. 3. F.S.  
Prereq: PHIL 230  
Professional responsibilities of executives in terms of personal conduct and individual integrity, executive leadership style and values, formal organizational ethics policies, board and chief executive leadership roles, governance reform and ethics, corporate social responsibility, stakeholder management, strategies for sustainable development, pursuit of societal and corporate goals, and the manager as architect of corporate values and culture.

MGMT 410: Social Entrepreneurship  
(Cross-listed with ENTSP). (3-0) Cr. 3. F.S.  
Prereq: Sophomore classification  
Introduction to issues related to the role of social entrepreneurship in helping to solve social problems, including innovation, opportunity recognition, planning and the launch of new non-profit organizations.

MGMT 414: International Management  
(3-0) Cr. 3. F.S.  
Prereq: MGMT 370 or MGMT 371  
The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries.

MGMT 471: Personnel and Human Resource Management  
(3-0) Cr. 3. F.S.  
Prereq: MGMT 371  
Recruitment and selection, utilization, and development of people in organizations. Examination of each personnel function; interrelationships among the functions.

MGMT 472: Management of Diversity  
(3-0) Cr. 3. F.S.  
Prereq: Junior classification  
One of the most crucial problems in organizations today is the management of diversity. Attempts to define the difference between equal employment opportunity/affirmative action, which has a legal basis, and diversity which has an educational basis. Organized around the concepts of: (1) cultural diversity and cultural unity; (2) development of skills and tools to manage diversity; and (3) structure of diversity development programs in organizations. Meets U.S. Diversity Requirement

MGMT 478: Strategic Management  
(3-0) Cr. 3. F.S.SS.  
Prereq: ACCT 285, FIN 301; MGMT 370 or MGMT 371; MKT 340, SCM 301 and graduating senior  
Strategy formulation, implementation, and evaluation and control in today's organizations. Emphasis is on strategic planning and decision making using the case method and/or projects.

(Cross-listed with ENTSP). (3-0) Cr. 3.  
Prereq: MGMT 310; MGMT 313 or MGMT 320  
Experiential learning through student-identified project. Students identify, propose and execute an experiential learning project that will be completed during the semester. The course provides application oriented learning of entrepreneurship. The course project must include a significant experiential learning activity, such as launching a venture or business, writing a business plan, or completing an internship in an entrepreneurial setting. Requires a field project.

MGMT 485: Trends and Theories of Entrepreneurship  
(Cross-listed with ENTSP). (3-0) Cr. 3. F.S.SS.  
Prereq: MGMT 310; MGMT 313 or MGMT 320  
A broad examination of historical, literary, and business perspectives on entrepreneurship. The entrepreneurial process is studied by examining the role of individuals, new ventures, and established organizations in the discovery, evaluation, and exploitation of economic opportunities. Emphasis is placed on tracing the evolution of entrepreneurship theories over time, as well as analyzing current trends related to the study of entrepreneurship.

MGMT 490: Independent Study  
Cr. 1-3. Repeatable.  
Prereq: senior classification, permission of instructor  
Courses primarily for graduate students, open to qualified undergraduates:
MGMT 502: Organizational Behavior
(3-0) Cr. 3. F.
Prereq: Enrollment in MBA program or departmental permission
Understanding human behavior in organizations and the nature of sustainable organizations from a managerial perspective. Special emphasis is placed on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

MGMT 503: Professional Responsibility in Business and Society
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or departmental permission, ACCT 501, FIN 501, MGMT 502, MKT 501
Ethical and social responsibilities of top managers in corporations. Topics include stakeholder management, corporate social responsibilities, strategies for sustainable development, pursuit of societal and corporate goals, board and chief executive leadership roles, governance reform and ethics, and executive leadership style and values. The presentation of course concepts is facilitated by the use of cases, discussion scenarios, and ethical dilemmas.

MGMT 504: Strategic Management
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or departmental permission, ACCT 501, FIN 501, MGMT 502, MKT 501
Critical analysis of case studies in strategic management with an emphasis on integrative decision making. Strategy implementation in light of the global, legal, economic, cultural, and political contexts of business.

MGMT 522: Negotiation and Conflict Resolution
Cr. 3.
Theory and practice of negotiation in a variety of settings, while focusing on understanding the behavior of individuals, groups and organizations in the context of competitive situations. Team work and team building is integrated to better understand interdependent relationships and processes.

MGMT 525: Human Resource Management Analytics
Cr. 3.
Prereq: Enrolled in the MBA or other master's program in the College of Business
An organization's competitive advantage resides in the talent and commitment of its people. This course is designed to provide students with an overview of human resources management and is designed to provide students with fundamentals for understanding how managers should staff organizations, train and develop their employees, and understand compensation systems. Moreover, as organizations now collect a myriad of data, this course will train students to make sense of that data to determine whether or not an organization's selection procedures are effective, whether or not to invest more/less money into training and develop programs, and whether or not its compensation structure facilitates satisfied and committed employees. Performance management, managing careers, and mentoring also are important to job performance and career satisfaction and will be discussed.

MGMT 530: Leadership and Conflict Resolution
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission
Introduction to the theory and practice of leadership and negotiation. Emphasis on the science of influencing and resolving conflict, and securing an agreement between two or more interdependent parties. Behavior of individuals, groups, and organizations in the context of demanding situations.

MGMT 566: Entrepreneurship and New Business Creation
(3-0) Cr. 3.
Prereq: Graduate classification or permission of instructor
The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspective, starting and developing a new business, financing the venture, managing the growing firm, and special issues.

MGMT 567: International Entrepreneurship
(3-0) Cr. 3.
Essentials of operating an entrepreneurial firm in an international environment. Topics include international entrepreneurship, starting and developing a business in an international market, financing international ventures, international management issues, exchange rates, and culture.
MGMT 569: Technology Entrepreneurship  
(3-0) Cr. 3.  
Prereq: Graduate standing or instructor’s permission  
Identification of high-potential, technology-intensive commercial opportunities, resources gathering, and risk management under environmental uncertainty. Focus on technology ventures and firms that use technology strategically across several industries. Topics include key success factors and forecasting analysis across main value-chain activities.

MGMT 570: Managing Employee Attitudes and Behaviors  
(3-0) Cr. 3. F.S.S.  
Prereq: MGMT 371 or MGMT 502 or PSYCH 450  
Advanced topics germane to the management of individuals and groups over their work lives; sustained work commitment, motivation and job/career satisfaction, absenteeism, turnover, stress, leadership and career development (e.g., career ladders, mentoring).

MGMT 571: Seminar in Personnel and Human Resources Management  
(3-0) Cr. 3. S.  
Prereq: MGMT 371 or MGMT 502 or SOC 420  
Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, philosophies, and behavioral science research.

MGMT 572: Personality and Management  
(3-0) Cr. 3.  
Prereq: Graduate standing or permission of instructor  
Personality and individual differences have significant implications for human resource management, organizational behavior and strategic management. Research has shown that these characteristics affect many core management topics including motivation, leadership, and decision making. Surveys the literature relating personality and individual differences to management and organizations. Students will complete a wide variety of personality assessments and get their results, and reflect on how personality and individual differences can be practically relevant in the modern work environment.

MGMT 581: Contemporary Topics in Strategy  
(3-0) Cr. 3. F.  
Prereq: MGMT 504 or permission of instructor  
Discussion of concepts and techniques used in long range strategic planning. Examination of planning practices in business and not-for-profit organizations. Topics include environmental scanning, industry analysis, forecasting, corporate and competitive strategies, and tactics.

MGMT 582: Corporate Governance and Top Management  
(Cross-listed with ACCT). (3-0) Cr. 3.  
Prereq: MGMT 503 or permission  
Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

MGMT 583: Strategic Management of Innovation  
(3-0) Cr. 3.  
Prereq: MGMT 504 or permission of instructor  
Critical analysis and discussion of cases focused on strategic management of innovation. Assessment of a firm's innovative capabilities and competitive dynamics to manage innovative processes. Practical applications through emphasis on implementation including internal corporate venturing, management of the corporate R&D function, and institutionalization of innovation.

MGMT 590: Special Topics  
Cr. 1-3. Repeatable. F.S.S.  
Prereq: Permission of instructor  
For students wishing to do individual research in a particular area of management.

Courses for graduate students:

MGMT 601: Philosophy of Science  
(3-0) Cr. 3.  
Prereq: enrollment in the PhD program  
This course provides a philosophical introduction to the theoretical and empirical development of scientific knowledge. It focuses on a variety of basic problems common to the social sciences: the nature of explanation, the structure of theories, forms of knowledge, scientific laws, nature of theory and ethics. The purpose of the course is to help doctoral students define a research context by addressing the purposes, assumptions and primary components of scientific inquiry.

MGMT 602: Organizational Theory  
(3-0) Cr. 3.  
Prereq: enrollment in the PhD program  
This seminar involves the examination of the core theories and perspectives in organizational theory, as well as their applications and extensions. This material addresses the fundamental rationale for organizations in modern society, basic processes of organizing and organizational structure, a consideration of inter-organizational relationships and the external environment, and a variety of factors that help determine organizational effectiveness.
MGMT 603: Strategic Management of Technology and Innovation
(3-0) Cr. 3.
Prereq: MGMT 601
This course will offer a critical review of organizational decision making with respect to technology and innovation. Students will learn how technological change can alter the basis of competition; how competitive strategy drives technology investment decisions; how market-orientation should be the other backbone of technological innovation; and best practices of organizing and managing the new product development process to achieve strategic goals.

MGMT 604: Seminar in Organizational Behavior
(3-0) Cr. 3.
Prereq: enrollment in the PhD program
The purpose of this seminar is to introduce behavioral science literature relevant to the study of behavior in organizational settings. The course will focus on the individual's role within organizations and cover topics such as individual differences, motivation, leadership, decision-making, learning, risk taking, interpersonal relations, etc. Both theoretical and empirical contributions will be examined, with emphasis on integration of diverse theoretical perspectives.

MGMT 605: Seminar in Strategic Management
(Cross-listed with ENTSP). Cr. 3. Alt. F., offered odd-numbered years.
Critical review of theory and research in the field of strategic management. Introduction to representative conceptual and empirical research. Review theories that provide the foundation for management research, and review current research in associate research streams. The review will cover fundamental questions in strategy.

MGMT 650: Research Practicum I
(1-0) Cr. 1.
Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MGMT 651: Research Practicum
(1-0) Cr. 1.
Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MGMT 699: Dissertation
Cr. 1-12.
Prereq: Graduate classification, permission of dissertation supervisor
Research.

Management Information Systems

For undergraduate curriculum in business, major in management information systems.

The Department of Supply Chain and Information Systems offers a major in management information systems. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (BS) degree, and 18 additional credits in the major.

Management Information Systems is the analysis and use of information systems and technologies to support problem solving and decision making within and across organizations. Organizations and companies use data, most often in digital form, to conduct nearly every part of their businesses and functions. The program provides students with the core knowledge related to every dimension of information systems and technologies, including the creation and implementation of software and databases, to information security, analytics, and the user interface. The program takes a balanced approach to the management information systems major, with both technical and managerial coursework.

The study of Management Information Systems prepares students for professional careers with a wide variety of firms and roles, ranging from small start-up firms to large multinational corporations. Common job titles include business analyst and systems analyst. Students are also pursuing careers in Information Technology consulting.

The MIS major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives. The required core courses are:

<table>
<thead>
<tr>

<tr>
<td>MIS 320</td>
<td>Database Management Systems</td>
<td>3</td>
</tr>
<tr>
<td>MIS 340</td>
<td>Project Management</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 12

The remaining 6 credits can be taken from the department approved electives, preferably with the specified clusters that focus on specific IT job related knowledge and skills (application development, IT infrastructure and security, business analytics, and supply chain technology). Students are encouraged to take electives that cover multiple clusters to enhance marketability and career flexibility.

The department also offers a minor for non-Management information Systems majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. The 15 credits must include MIS 301 Management Information Systems.
Students with declared majors have priority over students with declared minors in courses with space constraints.

Total Credits: 121-124

Students must be admitted to the professional program in business to major in management information systems. The requirements to enter the professional program are:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU.
5. 122 Credits minimum and a Cumulative GPA of at least 2.00
6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

**Graduate Study**

The Department of Supply Chain and Information Systems participates in the MS in Information Systems (MSIS), the full-time and part-time Master of Business Administration (MBA) and the PhD in Business and Technology programs. The department also participates in an interdepartmental MS in Information Assurance as well as in a master’s and PhD program in Human Computer Interaction.

The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are graduate electives. Students may obtain a specialization in technology and innovation management within the MBA program.

The MSIS is a 30-credit (minimum) curriculum designed around three interrelated areas — business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The MSIS program will educate students on applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

The PhD in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas — core, specialization, minor, and research methods — and the dissertation. The Management of Information Systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies.
Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Courses primarily for undergraduates:

**MIS 207: Fundamentals of Computer Programming**  
(Cross-listed with COM S). (3-1) Cr. 3. F.S.SS.  
*Prereq: MATH 150 or placement into MATH 140 or higher*  
An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/MIS 207 and Com S 227.

**MIS 301: Management Information Systems**  
(3-0) Cr. 3.  
*Prereq: COM S 113 or BUSAD 150*  
The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

**MIS 307: Intermediate Business Programming**  
(3-0) Cr. 3.  
*Prereq: MIS 207/COM S 207 or COM S 227; credit or enrollment in MIS 301*  
Introduction to the concepts and use of data structures, file accesses and object oriented programming methodologies in contemporary business environments. Application development environments will be covered.

**MIS 310: Information Systems Analysis**  
(3-0) Cr. 3.  
*Prereq: credit or enrollment in MIS 301*  
Critical analysis of business processes, data and process modeling, feasibility studies, CASE tools, and developing system design specifications.

**MIS 315: Business Data Streams and Issues**  
(Cross-listed with ACCT). Cr. 3. Alt. F., offered even-numbered years. Alt. S., offered odd-numbered years.SS.  
*Prereq: COM S 113, MIS 301, ACCT 284*  
Identification of open data sources and other private data sources. Develop methods of data access, collection, and sharing; develop methods to validate and standardize data sources; develop methods to assess data worthiness (risk).

**MIS 320: Database Management Systems**  
(3-0) Cr. 3.  
*Prereq: Credit or enrollment in MIS 301*  
Database design, development, and implementation. Focus on data models, both classical and object oriented. Uses relational and/or object oriented database management systems.

**MIS 340: Project Management**  
(Cross-listed with SCM). (3-0) Cr. 3.  
*Prereq: credit or enrollment in MIS 301*  
Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods.

**MIS 368: Marketing Analytics**  
(Cross-listed with MKT). (3-0) Cr. 3. F.S.  
*Prereq: MKT 340*  
Use of different tools to conduct various analyses to support marketing strategies. Topics include data visualization and exploration, forecasting, social media analytics and other marketing techniques. Development of skills such as structuring problems, and synthesizing results from quantitative analyses.

**MIS 407: Advanced Business Programming**  
(3-0) Cr. 3.  
*Prereq: MIS 307*  
Advanced software development and topics in contemporary programming languages. Topics include basic syntax, advanced programming techniques, file structures and management, database access, algorithm design, web forms and graphical user interfaces.

**MIS 434: Electronic Commerce Strategy**  
(3-0) Cr. 3.  
*Prereq: MIS 301, MKT 340, SCM 301*  
Overview of business strategies and technologies used for electronic commerce. Emphasis is on the strategic, operational, and technical issues associated with global electronic commerce using class lecture/discussion and case studies.
MIS 435: Information Systems Infrastructure  
(3-0) Cr. 3.  
**Prereq:** MIS 301  
Overview of Internet and telecommunications technology used in business applications. Understand Internet and network protocols, network and application architectures, design, and implementation.

MIS 436: Introduction to Business Analytics  
(3-0) Cr. 3.  
**Prereq:** MIS 320  
Introduction to the field of business analytics (BA). Students will examine BA processes and techniques used in transforming data to knowledge and creating value for organizations. Business cases, presentations by business professionals, class lectures and discussions on data analysis, design and modeling, and extensive hands-on analytical exercises.

MIS 439: Topics in Management of Information Systems  
(3-0) Cr. 3. Repeatable.  
**Prereq:** MIS 301, permission of instructor  
A variety of topics will be covered and topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 440: Supply Chain Information Systems  
(Cross-listed with SCM). (3-0) Cr. 3.  
**Prereq:** MIS 301, SCM 301  
Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

MIS 445: Enterprise Systems and Architecture  
(3-0) Cr. 3.  
**Prereq:** MIS 301  
Contemporary theories, concepts, and practices in network infrastructure, network design, and information security. Design, install, and administer a complex network infrastructure. Study security threats and attacks and countermeasures. Investigate exposure to attacks, firewalls, and development of intrusion detection systems. Other security topics such as risk management, IT audit, and security regulations will also be addressed.

MIS 446: Advanced Business Analytics  
(3-0) Cr. 3.  
**Prereq:** MIS 301 and MIS 320  
Projects-based course which provides an in-depth understanding of BA methods, data mining, text mining, web-mining, and predictions through the use of specific BA tools. For students who are interested in understanding advanced techniques and applications of data analytics and acquiring hands-on skills for making intelligent business decisions in data-rich organizations.

MIS 447: Information Systems Development  
(3-0) Cr. 3.  
**Prereq:** MIS 301 and MIS 310  
Design of business systems using contemporary tools and methods such as SQL, CASE tools, OOD tools, etc. Focuses on synthesizing concepts from earlier MIS courses.

MIS 450: Enterprise Resource Planning Systems in Supply Chain  
(Cross-listed with SCM). (3-0) Cr. 3.  
**Prereq:** SCM 301, MIS 301 or I E 148, I E 341  
Examination of the role of enterprise resource planning systems (ERP) in the supply chain. Hands-on experience with a major software application in use by many corporations to manage and improve the efficiency of their supply chains and operations. Students will develop a more process-centric perspective about how a supply chain operates and how ERP enables and supports such operations.

MIS 490: Independent Study  
Cr. 1-3. Repeatable.  
**Prereq:** MIS 301, senior classification, permission of instructor

MIS 495: Case Practicum  
(3-0) Cr. 3. Repeatable. F.S.  
**Prereq:** MIS 301  
Students explore different practical scenarios related information systems projects and cases. Students acquire necessary skills and knowledge to solve practical issues associated with presented cases and problems. Students compete at different venues around the country.

Courses primarily for graduate students, open to qualified undergraduates:
MIS 501: Management Information Systems  
(3-0) Cr. 3.  
Prereq: Enrollment in MBA program or departmental permission.  
This course exposes the student to current theories and practices appropriate for understanding the role and application of information systems for individuals, organizations, and society within a globally competitive context. The course focuses on information technology and its uses in improving work practices, products, and tools for individuals and organizations. The course also addresses issues pertaining to current and emerging topics in the development and use of technology, the role of technology in and its alignment with organizational strategy and sustainable business practices, information system planning and the development of enterprise architectures, and human interface and personal characteristics in the design and use of technology.

MIS 515: Business Data  
Cr. 3. F.  
Understanding the issues and challenges of data from multiple sources, different velocities, in large volumes with questionable veracity.

MIS 532: Advanced Business Software Development  
(3-0) Cr. 3.  
A survey of business-oriented programming languages with emphasis on state-of-the-art development techniques for business software. Topics include object-oriented and Internet programming issues and methods.

MIS 533: Data Management for Decision Makers  
(3-0) Cr. 3.  
Prereq: MIS 501  
Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

MIS 534: Electronic Commerce  
(3-0) Cr. 3.  
Prereq: MIS 501  
Overview of how modern communication technologies including the internet and world wide web have revolutionized the way we do business. Provides an understanding of various internet technologies and how companies are using the internet for commercial purposes. Explores future scenarios on the use of these technologies and their impact on various industries and the society.

MIS 535: Networks and Information Security Management  
(3-0) Cr. 3.  
Prereq: MIS 501  
Issues involved in the management of telecommunications function. Overview of communications technology used in various business applications, local area network, wide area network, broad band network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning for telecommunications, including network planning and analysis.

MIS 536: Business Analytics Foundation  
(3-0) Cr. 3.  
Introduction to Business Analytics (BA) concepts and tools. Hands-on lab exercises and business case studies in data preparation, data querying and data visualization. Also covers various modeling techniques in predictive and prescriptive analytics.

MIS 537: Project Management  
(3-0) Cr. 3.  
Prereq: MIS 501  
Prepares students to support team activities in the general project management environment and provides them with a working understanding of the full scope of project management activities. Students will also have practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. The course follows the recommended content areas of the Project Management Institute, and provides students with a recognized foundational training in project management.

MIS 538: Business Process Systems  
(3-0) Cr. 3.  
Prereq: MIS 501  
Examine current and historical perspectives on business process management. Topics include process identification, mapping, and improvement. Additional topics will address business process automation and integration, business process outsourcing. Investigate current and potential tools and methods for business process management. Include process management projects.

MIS 539: Topics in Management of Information Systems  
(3-0) Cr. 3. Repeatable.  
Prereq: MIS 501  
A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.
MIS 544: Social Media Business Applications and Analytics  
Cr. 3. SS.  
Prereq: NONE  
This course is designed to educate students about the role of new collaborative social technologies and analysis of social media data. Exploration of strategic and operational applications of social media and tools that support the analysis of social network and social media data. Application of text analysis and social network theory. None

MIS 546: Advanced Business Analytics  
(3-0) Cr. 3. F.S.  
An in-depth discussion of various advanced topics in Business Analytics (BA) such as Big Data Analytics, Text Analytics, and Web Analytics. Extensive hands-on exercises of using BA tools to solve real-world problems. Preparation for students’ capstone projects.

MIS 547: Teams, Communication, and Project Management  
Cr. 3. SS.  
Provides business analytics students with an intensive preparation in teamwork and project management skills necessary to prosper in the program and carry forward into their professional lives. The course topics include project management, team management, in class exercises, and case studies. Practical experience using project management techniques and tools.

MIS 556: Business Analytics Capstone Project  
Cr. 3. S.  
Prereq: MIS 547 or departmental permissions  
Synthesize analytics concepts, skills, and practices learned during the program of study to complete a course project. Projects proposals relevant to a firm are proposed and accepted midway through the program. Student cohort teams will complete the capstone project under the supervision of an advisory team of faculty. At the completion of the course teams will present their project marking the completion of the program of study. Offered on a satisfactory-fail basis only.

MIS 568: Marketing Analytics  
(Cross-listed with MKT). Cr. 3. F.S.  
Integration of various concepts to solve problems using appropriate tools. Specifically, the course consist of the following three components: (a) help students develop consultative problem-solving skills; (b) introduce various newly developed consumer behavior theories; (c) provide an overview of quantitative models in the field of marketing analytics. Hands-on experiences to enhance skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from complicated analyses.

MIS 590: Special Topics  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
For students wishing to do individual research in a particular area of MIS.

MIS 598: Research Seminar in Management Information Systems  
(3-0) Cr. 3.  
Prereq: Graduate classification  
Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

MIS 599: Creative Component  
Cr. 3.  
Prereq: Graduate classification, permission of supervisory committee chair  
Preparation and writing of creative component.

Courses for graduate students:

MIS 601: Introduction to Information Systems Research I  
(3-0) Cr. 3.  
Prereq: MIS 501 or equivalent, enrollment in PhD program  
The state of behavioral research in the IS function. MIS activities in an organization span the following three major areas: design and implementation of the MIS, use of the MIS, and management of the MIS function. Each of these processes is carried out at several levels: individual, group, organizational and inter-organizational. Identify behavioral issues of relevance for the cells defined by the process and level dimensions. Reading and discussion of the research literature surrounding the development, use, and implications of information technology.

MIS 602: Introduction to Information Systems Research II  
(3-0) Cr. 3.  
Prereq: MIS 501 or equivalent, enrollment in PhD program  
Three fundamental areas of Information Systems, namely, infrastructure, management, and processes. Infrastructure studies examine the IT architecture including computing, communication, data, and application. Management focuses on addressing the value added notion of IT. Finally processing addresses topics related to enabling role of IT in myriad of areas.
**MIS 603: Seminar on IT Strategy and Structure**  
(3-0) Cr. 3.  
*Prereq: MIS 601*  
Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm's external environment.

**MIS 604: Collaboration, Knowledge, and Intelligence in Organizations**  
(3-0) Cr. 3.  
*Prereq: MIS 601*  
Research issues in the emerging areas of collaboration, knowledge management, and enterprise intelligence. Topics will include emerging and contemporary technologies of Data Mining, Knowledge Discovery from Databases, Web Mining, organizational memory, and knowledge management.

**MIS 605: Technical Research Methods in Information Systems**  
Cr. 3. S.  
*Prereq: MIS 501 or equivalent, enrollment in PhD program*  
Focuses on analytical modeling and empirical analyses using methods drawn from economics, management science, and statistics/econometrics, etc. Example topics include economics of information goods; impact of information technologies on firm performance and policy outcomes; and analysis of data generated from social media and business transactions.

**MIS 606: Economic Research Methods in Information Systems**  
Cr. 3. S.  
*Prereq: MIS 501 or equivalent, enrollment in PhD program*  
Focuses on analytical modeling and empirical analyses using methods drawn from economics, management science, and statistics/econometrics, etc. Example topics include economics of information goods; impact of information technologies on firm performance and policy outcomes; and analysis of data generated from social media and business transactions.

**MIS 605: Research Practicum I**  
(1-0) Cr. 1.  
*Prereq: enrollment in the PhD program*  
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

**MIS 651: Research Practicum II**  
(1-0) Cr. 1.  
*Prereq: enrollment in the PhD program*  
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

**MIS 655: Organizational and Social Implications of Human Computer Interaction**  
(Cross-listed with HCI). (3-0) Cr. 3.  
*Prereq: Graduate classification*  
Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a proscriptive and prescriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

**MIS 699: Research**  
Cr. 3-6. Repeatable.  
*Prereq: Graduate classification, permission of dissertation supervisor*  
Research.

---

**Marketing**

**For undergraduate curriculum in business, major in marketing.**

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (BS) degree, and 18 credits in the major.

A major in marketing acquaints students with the managerial decisions and actions that surround the satisfaction of customer needs in the purchase and use of goods and services. Examples of marketing decisions areas are product development, pricing, marketing communication, marketing analytics, and personal selling. Completion of the major prepares students for careers such as product manager, marketing analyst, digital marketing specialist, marketing consultant, advertising or promotions manager, marketing researcher, sales representative or manager, and special events manager; in the public and private sectors. Some graduates also find careers in the retail industry, be it store management, market analysis, or purchasing.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. Students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required
to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses (see below).

Required and elective marketing major courses can be combined into three distinct tracks: marketing management, marketing analytics, and sales. See departmental lists for courses in each track.

The Department of Marketing also offers a minor for any student with a major in the Ivy College of Business. The Business and Technology Consulting minor, effective spring 2020, prepares you for a career as a business consultant. Every year consulting companies attract talented graduates across the world. As a consultant, you gain broad exposure to the business issues, solve different business problems, make an impact on major businesses, and become an expert in a specific business functional area. The minor provides a systematic process for students to strengthen problem-solving skills and prepare them to become better communicators and future leaders.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

The department also offers a minor for non-Marketing majors in the Ivy College of Business. The minor required 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

The certificate in professional sales, effective spring 2020, is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling. The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Students need to fulfill the course prerequisites set by the Ivy College of Business. A minimum of 9 credits used for the certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business course for the certificate.

Graduate Study

The Department of Marketing participates in the full-time and part-time Master of Business Administration (MBA) and the PhD in Business and Technology. The MBA is a 48-credit professional degree program. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in marketing.

The PhD in Business and Technology with a Marketing (MKT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on marketing issues relating to strategic decision making, understanding consumer preferences and behaviors, and using data analytics for increasing the performance of the firm.

Courses primarily for undergraduates:

**MKT 340: Principles of Marketing**

(3-0) Cr. 3. F.S.SS.

*Prereq: credit or current enrollment in ECON 101*

The role of marketing in society. Markets, marketing institutions, and marketing functions with emphases on product, price, marketing communication, and marketing channel decisions.

**MKT 351: Services Marketing**

(3-0) Cr. 3. F.

*Prereq: MKT 340*

In-depth appreciation and understanding of the unique challenges inherent in creating, managing, and delivering quality services. Students will be introduced to and have the opportunity to work with concepts, tools, and strategies that address these challenges.

**MKT 361: Social Media Marketing Strategy**

Cr. 3.

*Prereq: MKT 340*

The course will cover marketing, advertising and communications strategies in the new media landscape where traditional media (e.g., television, print) and the online social media (i.e., Web 2.0; e.g., online social networks, user-generated content, blogs, forums) coexist. Students will be expected to have knowledge about the fundamentals of traditional advertising methods and strategies. With this background knowledge, the primary focus of this course will be on understanding social media, how to build social media marketing strategies, and how to track their effectiveness. This course will not look at more tactical aspects of advertising/communications such as creative, message management, and publicity. This will first and foremost be a marketing strategy course.
MKT 368: Marketing Analytics
(Cross-listed with MIS). (3-0) Cr. 3. F.S.
Prereq: MKT 340
Use of different tools to conduct various analyses to support marketing strategies. Topics include data visualization and exploration, forecasting, social media analytics and other marketing techniques. Development of skills such as structuring problems, and synthesizing results from quantitative analyses.

MKT 410: Promotional Strategy
(3-0) Cr. 3. F.S.
Prereq: Credit or enrollment in MKT 447
Principles, concepts, and problems involved in the development and implementation of promotional strategies. Coordination of a variety of promotional elements: advertising, sales promotion, direct marketing, public relations and publicity of web communications, and personal selling.

MKT 442: Sales Management
(3-0) Cr. 3. F.S.
Prereq: MKT 340
Functional aspects of sales force management; personal selling methods; procedures for recruiting, selecting, and training new salespeople; compensation and expense control systems; problems of sales force motivation and supervision; methods of territorial and quota assignment; sales department budgets; distributor-dealer relations; other selected topics.

MKT 443: Strategic Marketing Management
(3-0) Cr. 3. F.S. SS.
Prereq: MKT 444, MKT 447
Analysis of major elements of strategic marketing management. May include case studies or business simulations involving decision making using marketing tools from previous courses. (For marketing majors only).

MKT 444: Marketing Research
(3-0) Cr. 3. F.S.
Prereq: MKT 340, STAT 226
Marketing research techniques: problem formulation, research design, questionnaire construction, sampling, data collection procedures, and analysis and interpretation of data related to marketing decisions.

MKT 445: Customer Relationship Management
(3-0) Cr. 3. F.S.
Prereq: MKT 340
Examines how customer data can be used to enhance decisions relating to acquisition, development and retention. Topics include customer lifetime value, customer as assets, customer loyalty programs and customization.

MKT 446: Retailing
(3-0) Cr. 3. F.S.
Prereq: MKT 340
Basic areas of retail management: buying, merchandising, retail promotion, store location, store layout, credit management, and inventory control. Emphasis on practical application of retail management principles.

MKT 447: Consumer Behavior
(3-0) Cr. 3. F.S.
Prereq: MKT 340
Study of how consumers select, purchase, use, and dispose of goods and services. Includes analyses of how markets and others influence these processes. Application of concepts and methods of the behavioral sciences to marketing management decision making.

MKT 448: Global Marketing
(3-0) Cr. 3. F.S.
Prereq: MKT 340
Marketing from a global perspective and familiarity with the problems and perspectives that global companies face. Concepts and principles of marketing strategies, market assessment, identify marketing opportunities, entry decision, emerging markets, effects of political, legal, economic and cultural environments, and decisions relating to segmentation, positioning, branding, product, price, distribution and promotions in a global setting.

MKT 449: Marketing Seminar
(3-0) Cr. 3.
Prereq: MKT 340
Analysis of current issues and problems in marketing with emphasis on new theoretical and methodological developments. Additional seminars may be offered.

MKT 450: Advanced Professional Selling
(3-0) Cr. 3.
Prereq: MKT 340
Analysis of the theory and practice of personal selling with the context of relationship marketing and salesforce automation. Topics include: goal setting, prospecting, time/territory management, questioning, presentations, objections, commitment and customer service; simulations of selling situations.
MKT 451: Sales and Distribution Strategy  
(3-0) Cr. 3. F.S.  
Prereq: MKT 340  
Focuses on marketing channels, the downstream part of a value chain, companies that come together to bring products and services from their point of origin to the point of consumption. Topics include channel institutions, channel design, channel coordination and implementation. Highlights international and technological aspects of marketing channels so that students can successfully develop and manage marketing channels in a contemporary business environment.

MKT 453: Brand Management  
(3-0) Cr. 3. F.S.  
Prereq: MKT 447  
Examines the role of brands and branding in market environments characterized by intense competition and consumer power. Covers issues relating to why branding is important to firms, what brands represent to consumers, and what should be done to manage them effectively.

MKT 490: Independent Study  
Cr. 1-3. Repeatable.  
Prereq: MKT 340, senior classification; permission of instructor

MKT 492: Comparative Marketing  
(3-0) Cr. 3. SS.  
Prereq: MKT 340  
Provides experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a marketing plan) based on information collected in the foreign country. Students attend briefings by experts/officials of private and public organizations.

Courses primarily for graduate students, open to qualified undergraduates:

MKT 501: Marketing  
(3-0) Cr. 3.  
Prereq: Enrollment in MBA program or departmental permission  
An analytical approach to the study of marketing issues and challenges of business firms and nonprofit organizations. Emphasis on the influence of the global marketplace and the marketing environment on marketing decision making; the determination of the organization’s products, prices, channels and communication strategies; an orientation that ensures sustainability of marketing operations; and the organization’s system for planning and controlling its marketing effort.

MKT 540: Advanced Marketing Management  
(3-0) Cr. 3. F.S.  
Prereq: MKT 501  
Strategic marketing and decision making, with emphasis on cases utilizing qualitative and quantitative techniques and marketing models.

MKT 541: International Marketing  
(3-0) Cr. 3. F.  
Prereq: MKT 501, MKT 509  
Scope and nature of global marketing operation; the context of international environment in which firms operate. Recent developments of international business activities, and a framework for better understanding of the basic forces driving international business and marketing operations. Development of market entry strategies and global marketing mix policies, as well as export operations. Organizational issues related to the globalization of the firm.

MKT 542: New Product Strategy and Analytics  
(3-0) Cr. 3. S.  
Prereq: MKT 501  
Principles and concepts of new product development and introduction; decision areas include market definition and structure, idea generation, concept evaluation, test marketing, launch tracking, and global product planning; models and techniques of new product evaluation used by consumer product companies.

MKT 543: Services Marketing  
(3-0) Cr. 3.  
Prereq: MKT 501 and instructor permission  
In-depth appreciation and understanding of the unique challenges inherent in managing and delivering quality services. Students will be introduced to and have the opportunity to work with tools and strategies that address these challenges.

MKT 544: Marketing Research  
(3-0) Cr. 3. S.  
Prereq: MKT 501, BUSAD 502 or STAT 401  
Marketing research methods are examined with emphasis on the use of advanced research methods in business research. Application of advanced sampling, measurement, and data analysis methods in research on market segmentation, market structure, consumers' perceptions and decision processes, marketing communication, new product development, and pricing.
MKT 545: Integrated Marketing Communication
(3-0) Cr. 3.
Prereq: MKT 501
Introduces the student to the field of marketing communications. Covers a number of topics and areas essential for understanding how to design and evaluate communication strategies necessary for the successful marketing of products and services. An integrated marketing communications (IMC) perspective is employed in covering material, with a corresponding focus on various elements of an IMC strategy, including advertising, promotions, point-of-purchase communications, direct marketing techniques, and other topics.

MKT 546: Customer Relationship and Business-To-Business Marketing
(3-0) Cr. 3.
Prereq: MKT 501
Core concepts and issues involved in customer relationship strategy and management in consumer and business-to-business markets. Emphasis on customer opportunity analyses, customer relationship management tools and strategies.

MKT 547: Consumer Behavior
(3-0) Cr. 3. S.
Prereq: MKT 501
The behavior of consumers. Intensive review of literature from relevant disciplines. Applications of concepts and methods of the behavioral sciences to marketing management decision making.

MKT 549: Global Marketing Planning and Execution
(3-0) Cr. 3.
Prereq: MKT 501
Allows students to develop the ability to plan and execute a B2B business by integrating aspects of marketing with other business functions in the international context. Product strategy, innovation, foreign market entry, supply strategies for foreign markets, pricing strategy, market research, customer service, international payments, managing international subsidiaries, licensing, distribution strategy, and responding to changing international environmental conditions. Involves a simulation-based instruction in planning and managing an international B2B business.

MKT 551: Marketing Channels
(3-0) Cr. 3.
Prereq: MKT 501
Design of marketing channels, developing and managing relationships with resellers, and evaluating channel performance. Emphasis on international and technological aspects of marketing channels.

MKT 552: Marketing Insights
Cr. 3.
Integrate various concepts to solve problems in marketing. Enhance skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from complicated analyses. Topics include problem definition, issue tree dis-aggregation and the Pyramid Principle. The course will also provide an overview of various newly developed marketing theories and analytical tools.

MKT 558: Marketing Analytics
(Cross-listed with MIS). Cr. 3. F.S.
Integration of various concepts to solve problems using appropriate tools. Specifically, the course consist of the following three components: (a) help students develop consultative problem-solving skills; (b) introduce various newly developed consumer behavior theories; (c) provide an overview of quantitative models in the field of marketing analytics. Hands-on experiences to enhance skills such as formulating problems, structuring and prioritizing problems, synthesizing results and communicating intuition from complicated analyses.

MKT 568: Marketing Analytics
(3-0) Cr. 3.
Prereq: Permission of instructor
For students wishing to do individual research in a particular area of marketing.

Courses for graduate students:

MKT 601: Seminar in Consumer Behavior
(3-0) Cr. 3.
Prereq: MGMT 601
A rigorous foundation of the major conceptual and methodological paradigms in the consumer-behavior literature. Seeks to aid students in understanding the psychological, sociological, and anthropological roots of consumer behavior research. Read the latest research in the area reported in leading consumer behavior/psychology journals.

MKT 602: Marketing Strategy
(3-0) Cr. 3.
Prereq: MGMT 601
Review major contributions and recent developments in marketing strategy research and practice. Review commonly used modeling approaches and research methods to study strategic interaction between firms seeking to build competitive advantages. Provide an overview of empirical research regarding measurement, level and persistence of business success and implications of findings for theory and strategy development.
MKT 603: Customer Management Strategy and Implementation  
(3-0) Cr. 3.  
Prereq: Mkt 601  
Addresses key strategy and implementation issues behind customer management. Topics such as typology of CM strategies, antecedents and outcomes; environmental and managerial influences on strategy formation; technology and impact on CM strategy; and value of CM strategy. Examine theories and concepts behind important CM issues such as customer satisfaction, customer loyalty and customer profitability.

MKT 604: Marketing Issues in Inter-Organizational Relations  
(3-0) Cr. 3.  
Prereq: MGMT 602  
Inter-firm and network competition; relationship among suppliers, distributors, alliance partners, external employees, and internal employees. Theories including agency theory, network theory, relationship marketing, channels of distribution theories on cooperation versus competition, IOS theories.

MKT 606: Seminar in Consumer Behavior II  
Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: MKT 601  
A rigorous foundation of the major conceptual and methodological paradigms in the consumer-behavior literature. Seeks to further develop and study issues contained in MKT 601.

MKT 644: Research Methods  
(3-0) Cr. 3.  
Prereq: Knowledge of introductory statistics, Stat 401, enrollment in the PhD program  
Introduction to methodological issues that arise when addressing a wide variety of research questions in organizational and consumer studies. Address measurement issues (scales, reliability and construct validity), design (for experiments, surveys, or qualitative studies), sampling, and analysis (univariate and multivariate statistical procedures). Measurement issues in cross-cultural and international research will also be covered. It is assumed that students entering the course have knowledge of introductory statistics.

MKT 650: Research Practicum I  
(1-0) Cr. 1.  
Prereq: enrollment in the PhD program  
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MKT 651: Research Practicum II  
(1-0) Cr. 1.  
Prereq: enrollment in the PhD program  
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MKT 699: Dissertation  
Cr. 12.  
Prereq: Graduate classification, permission of dissertation supervisor  
Research.

Supply Chain Management

For undergraduate curriculum in business, major in supply chain management.

The Department of Supply Chain and Information Systems offers a major in supply chain management. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (B.S.) degree, and 18 additional credits in the major.

Supply Chain Management is an integrated program of study concerned with the efficient flow of materials, products, and information within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. The program provides students with the core knowledge related to a wide variety of supply chain activities, including demand planning, manufacturing planning and control, purchasing, transportation management, warehouse management, inventory control, material handling, product and service support, information technology, and strategic supply chain management. The program takes a balanced approach to supply chain education, requiring courses in operations, logistics, and purchasing for all students.

The study of supply chain management prepares students for professional careers with manufacturers, retail distributors, logistics service providers (including carriers and non-asset based 3PLs), and consulting firms. The curriculum provides the required theoretical and conceptual base and analytical methods for making sound operational and strategic business decisions related to all activities in a supply chain.

The Supply Chain Management major requires students to take 18 credit hours in the supply chain management area. This requirement is met by completion of the following courses:

Core (15 credits)

SCM 424  Process Management, Analysis, and Improvement  3
The department also offers a minor for non-Supply Chain Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Supply Chain Management, B.S.

**Total Credits:** 122

\@ Courses in these requirements may also be used as Global Perspective.

\# US Diversity courses may be used to satisfy HUM/SOC SCI.

\* All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in supply chain management. The requirements to enter the professional program are:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:

1. Grade of “C” or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU.

5. 122 Credits minimum and a Cumulative GPA of at least 2.00

6. Grade of “C” or higher in 2 of the 3 required ENGL courses.
Graduate Study

The Department of Supply Chain and Information Systems participates in the full-time and part-time Master of Business Administration (MBA) and in the PhD in Business and Technology programs. The department also participates in the interdepartmental MS in Transportation program.

The MBA program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Students can obtain a specialization in Supply Chain Management within the MBA program.

The PhD in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management (SCM) as their major area of specialization. The primary objective of the SCM specialization is to prepare students for careers in research universities. The SCM domain is broad and includes the design, development and control of business processes for the conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems also included. However, in today's world, with competition across supply chain networks, SCM also involves integrating business processes across firms. Research in this area is therefore interdisciplinary in nature and addresses both intra- and inter-organizational issues.

Ph.D. core curriculum 6

Doctoral seminars and research practicum in the area of specialization 14

Minor area (9 cr.) plus electives (3 cr.) 12

Research methods courses 12

Dissertation 12

Total Credits 56

Courses primarily for undergraduates:

SCM 301: Supply Chain Management
(3-0) Cr. 3.

Prereq: ECON 101 and STAT 226

Various supply chain activities and integration of supply chain management with supply and demand, both within and between firms. Exposure to a wide range of supply chain management terminology, analytical tools, and theories related to four key elements of supply chain management: purchasing, operations, distribution, and integration. Specific topics include strategic sourcing, supply management, demand forecasting, resource planning, inventory management, process management, logistics, location analysis, process integration, and performance measurement.

SCM 340: Project Management
(Cross-listed with MIS). (3-0) Cr. 3.

Prereq: credit or enrollment in MIS 301

Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods.

SCM 424: Process Management, Analysis, and Improvement
(3-0) Cr. 3.

Prereq: SCM 301

The design, analysis, and management of production processes to improve performance. Performance measures and their relationships; process design and evaluation; and managerial levers for improving and controlling process performance.

SCM 428: Special Topics in Operations Management
(3-0) Cr. 3.

Prereq: SCM 301

In-depth analysis of current issues, problems, and systems in operations management with emphasis on new theoretical and methodological developments. Topics may include in different semesters, supply chain management, productivity and quality improvement, management of technology and innovation, information technology in operations management, quick response manufacturing, and service operations management.

SCM 440: Supply Chain Information Systems
(Cross-listed with MIS). (3-0) Cr. 3.

Prereq: MIS 301, SCM 301

Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

SCM 450: Enterprise Resource Planning Systems in Supply Chain
(Cross-listed with MIS). (3-0) Cr. 3.

Prereq: SCM 301, MIS 301 or IE 148, IE 341

Examination of the role of enterprise resource planning systems (ERP) in the supply chain. Hands-on experience with a major software application in use by many corporations to manage and improve the efficiency of their supply chains and operations. Students will develop a more process-centric perspective about how a supply chain operates and how ERP enables and supports such operations.
SCM 453: Supply Chain Planning and Control
(3-0) Cr. 3. F.
Prereq: SCM 301
Supply chain planning and control is the process which synchronizes demand with manufacturing and distribution. This course will cover sales and operations planning with emphasis on forecasting, master scheduling, materials requirements planning, inventory management and demand planning. Linking business plans and information systems for integration and distribution channels are also covered.

SCM 460: Decision Tools for Logistics and Operations Management
(3-0) Cr. 3.
Prereq: SCM 301
Technical tools and skills required for problem solving and decision making in logistics and operations management. Transportation and network planning, inventory decision making, facility location planning, vehicle routing, scheduling, and production planning. Quantitative tools include linear and integer programming, non-linear programming, and simulation. Emphasis on the use of PC-based spreadsheet programs.

SCM 461: Principles of Transportation
(3-0) Cr. 3.
Prereq: SCM 301
Economic, operating, and service characteristics of the various modes of transportation, with a special emphasis on freight transportation. Factors that influence transport demand, costs, market structures, carrier pricing, and carrier operating and service characteristics and their influence on other supply chain costs and supply chain performance.

SCM 462: Transportation Carrier Management
(3-0) Cr. 3.
Prereq: Credit or enrollment in SCM 461
Analysis of transport users' requirements. Carrier management problems involving ownership and mergers, routes, competition, labor, and other decision areas.

SCM 466: Global Trade Management
(3-0) Cr. 3. F.S.
Prereq: SCM 301
Logistics systems and legal framework for the international movement of goods. Operational characteristics of providers of exporting and importing services. The effects of government trade policies on global logistics.

SCM 471: Sustainable Supply Chain Management
Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.
Prereq: SCM 301
The global nature of a supply chain causes many sustainability issues. This course will consider how supply chain design and execution affect sustainability. Some discussion of governmental policy will be included.

SCM 486: Principles of Purchasing and Supply Management
(3-0) Cr. 3.
Prereq: SCM 301
Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements.

SCM 490: Independent Study
Cr. 1-3. Repeatable.
Prereq: SCM 301, senior classification, permission of instructor

SCM 491: International Live Case and Study Tour
Cr. 3. S.
Prereq: SCM 301
Students follow supply chain of major firm from overseas manufacturer to domestic point-of-sale. Students are expected to complete projects and present findings to senior leadership.

SCM 495: Case Practicum
(3-0) Cr. 3. Repeatable. F.S.
Prereq: SCM 301
Students explore different practical scenarios related supply chain projects and cases. Students acquire necessary skills and knowledge to solve practical issues associated with presented cases and problems. Students compete at different venues around the country.

Courses primarily for graduate students, open to qualified undergraduates:

SCM 501: Supply Chain Management
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or departmental permission
Introduction to supply chain management including aspects of operations, logistics and global supply chain strategy development. Topic areas include lean manufacturing and value stream mapping; supplier development and measurement; sustainable supply chain operations; process measurement, management and improvement; supply chain risk and uncertainty; visibility and integration in the supply chain; and inventory control.
SCM 513: Biorenewables Supply Chain Management
(Cross-listed with BRT). Cr. 3. Repeatable, maximum of 1 times. S.
Prereq: Graduate Standing or Qualified Undergraduate with Instructor Permission
Evaluation of supply chain logistics related to the field of biorenewables. Unique challenges associated with the biorenewables supply chain are emphasized and examined: cost analysis, market demand & prices, life cycle analysis, environmental impacts, as well as the technological, social, and political factors related to society.

SCM 520: Decision Models for Supply Chain Management
(3-0) Cr. 3.
Prereq: SCM 501 or permission of instructor
The application of decision models for supply chain management. Topics include business applications of decision theory, inventory theory, business forecasting, optimization models, transportation and network models, routing problems, and project management.

SCM 524: Strategic Process Analysis and Improvement
(3-0) Cr. 3.
Prereq: SCM 501 or permission of instructor
Analysis, management, and improvement of the business processes used to produce and deliver products and services that satisfy customer needs. Process attributes that managers can control to influence the key operational performance measures of throughput time, inventory, cost, quality, and flexibility are discussed. Topics such as theory of constraints, lean production, and six sigma are included.

SCM 553: Supply Chain Planning and Control
Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.
Prereq: SCM 501 or permission of instructor
Supply chain planning and control is the process which synchronizes demand with manufacturing and distribution. Sales and operations planning with emphasis on forecasting, master scheduling, materials requirements planning, inventory management and demand planning. Linking business plans and information systems for integration and distribution channels are also covered. Emphasis on the strategic advantages of linking business plans and demand forecasts.

SCM 560: Strategic Logistics Management
(3-0) Cr. 3.
Prereq: SCM 501 or permission of instructor
Positions logistics vis-a-vis supply chain management (SCM). Presents different perspectives on SCM vs. logistics. Describes primary logistics functions: transportation, warehousing, facility location, customer service, order processing, inventory management and packaging. Benefits of and obstacles to the integration of these functions.

SCM 561: Transportation Management and Policy
(3-0) Cr. 3.
Prereq: SCM 501 or permission of instructor
Analysis of contemporary issues and strategies in transportation management and policy. Emphasis on evaluation of the impacts of transportation policies, new technologies, and strategic carrier and shipper management practices on the freight transportation industry and logistics systems.

SCM 563: Purchasing and Supply Management
(3-0) Cr. 3.
Prereq: SCM 501 or permission of instructor
Mechanics, procedures and tools used in purchasing. Recruiting, selecting, developing and managing supply chain partners in order to achieve competitive advantage via superior supply chain management. Factors and information needs for making supply management decisions.

SCM 590: Special Topics
Cr. 1-3. Repeatable.
Prereq: Graduate classification and permission of instructor
For students who wish to do individual research in a particular area of supply chain management.

Courses for graduate students:

SCM 601: Theoretical Foundations of Supply Chain Management
(3-0) Cr. 3.
Prereq: MGMT 601 or permission of instructor
An overview of the development of supply chain management (SCM) theory, including review of seminal articles in logistics, operations, and purchasing management and theories from allied disciplines (e.g., economics, marketing, sociology, strategic management). Analysis of trends in SCM research topics and methodologies. Identification of emerging and future areas for research and theory development.

SCM 602: Seminar in Supply Chain Strategy
(3-0) Cr. 3.
Prereq: SCM 601 or concurrent enrollment
Review of research literature on supply chain strategy, including the impact of technology, global economic and social factors, and intra- and inter-organizational integration on supply chain strategy formation. The role of SCM in overall corporate strategy and the impact of SCM on firm performance will also be addressed.
SCM 603: Seminar in Purchasing
(3-0) Cr. 3.
Prereq: SCM 601 or concurrent enrollment
Review of classic purchasing theories. Discussion of contemporary supply management strategy; the role of supply management and its relationship with other functional areas; its impact on logistics and transportation issues; management of supply uncertainties.

SCM 604: Seminar in Logistics Management
(3-0) Cr. 3.
Prereq: SCM 601 or concurrent enrollment
Integration of network, economic, and systems theory in the design, management, and control of logistics systems in the context of integrated supply chain management. Functional areas addressed include transportation, inventory order fulfillment, distribution, and warehousing. Facility location analysis will also be covered.

SCM 605: Seminar in Operations Management
(3-0) Cr. 3.
Prereq: SCM 601 or concurrent enrollment
Review of the research literature on methods of organizing, planning, controlling, and improving manufacturing systems to achieve the desired performance objectives related to cost, quality, speed, and flexibility. The relationship between the performance of the manufacturing system and the performance of the supply chain system will also be discussed.

SCM 609: Special Topics in SCM
Cr. 3. Repeatable. Alt. F., offered irregularly. Alt. S., offered irregularly. Prereq: SCM 601 or permission of instructor.
Review of current issues in SCM. Provides opportunities to read and discuss research articles that made important contributions in SCM literature.

SCM 650: Research Practicum I
(1-0) Cr. 1.
Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

SCM 651: Research Practicum II
(1-0) Cr. 1.
Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

SCM 699: Dissertation
Cr. 12.
Prereq: Graduate classification, permission of dissertation supervisor
Research.

International Business
Administered by the Department of Management

The international business secondary major is designed to provide students with an understanding of the international business environment. Students are expected to develop an understanding of factors associated with international business issues as applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The major is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this major should strengthen their placement opportunities with companies that are engaged in international business and trade.

For students with a primary major in the Ivy College of Business, the requirements for this secondary major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits), an approved international experience, and completion of the requirements of their primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.

Students interested in this major should meet with their academic adviser in the Undergraduate Programs Office. For information on potential international experiences, see the Ivy College of Business international programs coordinator, also located in the Undergraduate Programs Office.
Objectives of the Curricula in Design

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

Organization of Curricula

All undergraduate programs in the College of Design share a common foundation curriculum, the Core Design Program, followed by degree-specific curricula. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous, inclusive base for the college's professional and non-professional programs. It creates a shared language, experience, and community for programs, faculty, and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple degree programs, and experiment with interdisciplinary work.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students’ ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the degree programs, is composed to ensure that students receive a well-rounded undergraduate education.

High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended, though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability
- 3 years of mathematics to develop problem-solving skills, including 1 year each of algebra, geometry, and advanced algebra
- 3 years of science, including at least two of the following:
  - 1 year of biology, 1 year of chemistry, or 1 year of physics
- 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government

Admission Standards to Enrollment-Managed Professional Programs

Admission into the enrollment-managed professional programs of Architecture, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, academic performance, and a written essay.

Students may apply directly to the professional program in Community and Regional Planning and to the programs in Art and Design and Interdisciplinary Design. Transfer students from two-year institutions also may apply to these three programs.

Advising

Each student receives personal assistance from an academic adviser within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisers. Once admitted to professional programs, students are assigned to faculty advisers within the student's curriculum area. Advisers help students develop a program of study and access pertinent university resources, and provide information on career choice.

The college's career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program, which provides opportunities for outstanding students to individualize their programs of study. Honors students in the College of Design will work with the Honors Program chair or Honors academic adviser to choose from academic and
co-curricular experiences that offer breadth and depth in their learning, as well as opportunities for personal, community, and professional development.

See Honors Program.

**Departments of the College**

- Architecture
- Art and Visual Culture
- Community and Regional Planning
- Graphic Design
- Interior Design
- Landscape Architecture

**Requirements in the College of Design**

All students in the College of Design are expected to meet the following requirements.

**Core Design Program**

**Cr. Fall/Spring**

<table>
<thead>
<tr>

</table>

* Students enrolled in the Design Exchange Learning Community take DSN S 110 in place of DSN S 115.

** General education credits in the Core Design Program may count toward the minimum credits.

*** Students who intend to apply to the Architecture program are strongly advised to take MATH 145 Applied Trigonometry and PHYS 111 General Physics during their Core year. While these specific courses are not required to apply to the program, they are required to advance in the B.Arch. program beyond the first semester. Students who intend to apply to the Industrial Design program are advised to take PHYS 101 Physics for the Nonscientist Physics for the Nonscientist, ECON 101 Principles of Microeconomics Principles of Microeconomics and a math course during their Core year.

**Liberal Education Electives: 6 cr.**

(C- or better grade). Includes courses in the fields of English (composition) and speech communication (interpersonal and rhetorical). According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 (or ENGL 250H).

**Mathematics, physical sciences, and biological sciences 6 cr.**

Includes courses in the fields of agronomy, astronomy and astrophysics, biology, chemistry, civil engineering, computer science, geology, mathematics, physics, and statistics.

**Humanities: 6 cr.**

Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.

**Social Sciences: 6 cr.**

Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women's studies, and university studies.

**General Education Electives: 9 cr.**

9 cr. from any of the above areas, 6 cr. of course level 300-400.

**Minor in Critical Studies in Design**

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, media and technology, design in everyday life, and models of professional practice. The minor is open to undergraduates in all university majors.

**Total minor requirements: 15 cr.**

<table>

or another 100-200 level History/theory course offered in the College of Design

Nine credit hours from approved list.

**Total Credits**

15

At least six of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the 15 credits must not be used to meet any other college or university requirements except the credit requirement for graduation.
Undergraduate Curricula

**Majors**
- Art and Design
- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Studio Arts
- Interdisciplinary Design
- Interior Design
- Landscape Architecture
- Biological / Pre-Medical Illustration (BPMI)* (http://www.design.iastate.edu/bioillustration)

*The College of Design participates in this interdepartmental major.

**Secondary Majors**
- Environmental Studies*
- International Studies*

**Minors**
- Critical Studies in Design (https://www.design.iastate.edu/programs-minors/minors/critical-studies-design)
- Design Studies (https://www.design.iastate.edu/programs-minors/minors/design-studies)
- Digital Media
- Entrepreneurial Studies*
- Environmental Studies*
- Geographic Information Science* (https://www.design.iastate.edu/programs-minors/minors/gisc)
- Gerontology*
- Illustration (https://www.design.iastate.edu/programs-minors/minors/illustration)
- International Studies*
- Sustainability*
- Textile Design* (https://www.design.iastate.edu/programs-minors/minors/textile-design)
- Urban Studies* (https://www.design.iastate.edu/programs-minors/minors/urban-studies)

*The College of Design participates in these interdepartmental secondary majors and minors.

**Minor in Critical Studies in Design**
The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore:

- historical and contemporary issues
- cultural production
- media and technology
- design in everyday life
- models of professional practice

**Minor in Design Studies**
The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work: three credits selected from College of Design history/theory course offerings and twelve additional credits selected from any College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

**Minor in Digital Media**
Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of coursework from an approved list. At least nine of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above and may not be used to meet the requirements of the major.

**Minor in Entrepreneurial Studies**
The College of Design is an active participant in the Entrepreneurial Studies Minor for undergraduate students.

**MINOR IN Geographic Information Science**
The undergraduate minor in Geographic Information Science (GISC) is an interdisciplinary program that provides students with opportunities to engage the theory, processes, techniques and tools that use spatial
data and computational technology to create cutting-edge analysis and mapping approaches for a wide range of fields, such as urban planning, architecture, landscape architecture, design, community development, agriculture, environmental sciences, natural resources, sociology, criminology, anthropology, political science, environmental studies and others.

The minor is open to undergraduates in all university majors with a minimum overall GPA of 2.0 prior to enrolling.

**MINOR IN Urban Studies**

The undergraduate minor in Urban Studies is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks. Students can pursue interests in:

- urban history
- urban design
- neighborhood revitalization
- economic development
- social movements
- global urbanization

The minor is open to undergraduates in all university majors except Community & Regional Planning.

**Graduate Curricula**

The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

**Majors**

- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Visual Arts
- Interior Design
- Landscape Architecture
- Sustainable Environments*
- Transportation*
- Urban Design*

**Double Degree Programs**

- Architecture / Business
- Architecture / Community and Regional Planning
- Architecture / Urban Design
- Architecture / Sustainable Environments
- Community and Regional Planning / Landscape Architecture
- Community and Regional Planning / Public Administration
- Community and Regional Planning / Sustainable Agriculture
- Community and Regional Planning / Business
- Community and Regional Planning / Urban Design
- Community and Regional Planning / Sustainable Environments
- Integrated Visual Arts / Sustainable Environments
- Landscape Architecture / Urban Design
- Landscape Architecture / Sustainable Environments

**Minor**

- Gerontology*

*The College of Design participates in this interdepartmental graduate program.

**Certificate**

Geographic Information Systems

**Architecture**

http://www.design.iastate.edu/architecture

The undergraduate program in architecture is an accredited five-year curriculum leading to the Bachelor of Architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth-year students.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four-year professional program. Admission to the professional degree program is based on the applicant’s performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources.

**Objectives of the Bachelor of Architecture program:**

The department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural
designs that address those questions; that they develop a working method for designing using communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tuned and made sustainable; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program after completion of the Core Design Program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software. Information will be provided to students about computer requirements at the time of acceptance to the program.

Curriculum in Architecture

The Department offers undergraduate and graduate degree programs:

A 167.5-credit undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree. (B. Arch.) A 102-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture. (M.S. Arch.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Total B. Arch. Requirement: 167.5 cr.
Only 65 cr from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications: 7 cr.
(C or better grade in ENGL 150 and ENGL 250)

**Fall 18 | Spring 15**

**Total Credits: 167.5 or 168**
Admission into the Bachelor of Architecture Program requires the completion of at least 30 credits, including the following courses: DSN S 102, 131, 183, 110 or 115, 6 credits of Social Sciences/ Humanities, at least 3 credits of MATH 145 or 5 credits of PHYS 11, ENGL 150 (or test-out credit), LIB 160. A portfolio review and essay will also be significant factors.

Graduate Study
The Department of Architecture offers two graduate degrees in architecture: a three-year accredited professional degree (M.Arch.) and a two-semester to three-semester research degree (M.S. in Arch.). Both degrees encourage interdisciplinary work within the College of Design and across related fields within the university. Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch. / M.C.R.P) and the College of Business (M.Arch. / M.B.A.). Financial support in the form of teaching and research assistantships is available competitively.

Master in Architecture
M.Arch. is an accredited professional degree in architecture. It is designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold four-year pre-professional degree in architecture.

The M.Arch. program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts addressing environmental, social and technological issues. We believe that even though the scale of the architect’s action might be limited, the range of information needed to make creative, intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary learning, and teamwork.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years including the first summer term. The curriculum starts with an intensive three-semester course sequence that places equal emphasis on three study areas: architectural design and media, science and technology, and theory and history seminars on the built environment. While this learning framework shapes the whole curriculum, the remaining four semesters have a more open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a number of options, including study abroad, specialized studios with a variety of faculty, and the opportunity to do an independent project.

Students with undergraduate degrees in architecture or other related design fields may be given advanced standing in the program; advanced standing students may waive up to the whole first year. Students admitted to the program hold undergraduate degrees in a broad range of fields such as art history, history, literature, interior design, economics, mathematics, computer science, anthropology, and medicine. These students must complete the full three years of the curriculum.

Master of Science in Architecture
M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the listed study areas. These study areas are: Sustainability and Green Design, Rural and Urban Studies, Representation and Digital Media, Design Inquiry, Advanced Building Design, Architectural and Construction History, and Building
Science and Construction. The degree is also open for applicants with non-professional degrees in various fields depending on the study area proposed by the applicant.

**Area of Study: 9 cr.**

**Electives: 6 cr.**

**Total Credits: 30**

**Dual degree**

Double degree programs are offered with Master of Design in Sustainable Environments (M.Arch./M.Des.S.E.), and Master of Urban Design (M.Arch/M.U.D.). Information about our programs and how to apply can be obtained from the department’s web page at: www.design.iastate.edu/architecture.

Financial support in the form of teaching and research assistantships is available.

**Courses primarily for undergraduates:**

**ARCH 201: Architectural Design I**

(1-15) Cr. 6. F.

*Prereq: Completion of the pre-professional program and admission into the professional program in Architecture*

Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

**ARCH 201H: Architectural Design I, Honors**

(1-15) Cr. 6-7. F.

*Prereq: Completion of the pre-professional program and admission into the professional program in Architecture*

Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Field trips to relevant architectural sites.

**ARCH 202: Architectural Design II**

(1-15) Cr. 6. S.

*Prereq: ARCH 201; MATH 142; PHYS 111*

Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Field trips to relevant architectural sites.

**ARCH 202H: Architectural Design II, Honors**

(1-15) Cr. 6-7. S.

*Prereq: ARCH 201, MATH 142 and PHYS 111*

Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Field trips to relevant architectural sites.

**ARCH 220: Contemporary Architecture**

(3-0) Cr. 3. F.

Survey of global architectural ideas and practices from 1960 to the present. Emphasis will be given to recent movements and architectural manifestations, as well as close examinations of socio-cultural conditions for contemporary practice.

**ARCH 221: History of Pre-Modern Architecture**

(3-0) Cr. 3. F.

Survey of pre-modern western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750. Meets International Perspectives Requirement.

**ARCH 230: Design Communications I**

(2-2) Cr. 3. F.

*Prereq: Admission to the professional program in architecture*

Investigations of various design media and their applications to design. Exercises to develop representational skills and perceptual sensitivity.

**ARCH 231: Advanced Design Representation**

Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.

*Prereq: ARCH 230; Junior, Senior or graduate standing*

Advanced investigations of various design media and their applications to design. Emphasis on careful consideration of media, mixed-media strategies and development of craft.
ARCH 301: Architectural Design III
(1-15) Cr. 6. F.
Prereq: ARCH 202
Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

ARCH 301H: Architectural Design III, Honors
(1-15) Cr. 6-7. F.
Prereq: ARCH 202
Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

ARCH 302: Architectural Design IV
(1-15) Cr. 6. S.
Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses
Continuation of ARCH 301, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

ARCH 302H: Architectural Design IV, Honors
(1-15) Cr. 6-7. S.
Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses
Continuation of ARCH 301, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

ARCH 321: History of the American City
(3-0) Cr. 3.
Prereq: Sophomore classification
Study of the development of the built environment and urban condition in the United States from the colonial period to today. Primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender. Credit counts toward fulfillment of History, Theory, Culture requirements.
Meets U.S. Diversity Requirement

ARCH 322: Histories and Theories of Modern Architecture
(3-0) Cr. 3. S.
Prereq: Sophomore Classification
Survey of global architectural ideas, theories and practices in their social, cultural and representational contexts from 1750 to 1960. Emphasis on European examples with additional material on the global spread of modernism.
Meets International Perspectives Requirement.

ARCH 334: Computer-aided Architectural Design
(2-2) Cr. 3.
Exploration of current and potential applications of computing in architectural design. Projects engage digital design methods, data and media workflows.

ARCH 335: Three-Dimensional Studio
(1-4) Cr. 3. Repeatable, maximum of 6 credits.
This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three-dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

ARCH 345: Building Science and Technology I
(Dual-listed with ARCH 545). (2-0) Cr. 2. F.
Prereq: Undergraduate: Admission to the professional program in architecture; concurrent enrollment in ARCH 345L; graduate: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545L
First course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental forces and systems (solar orientation, climate, daylighting, natural ventilation, human comfort and occupancy patterns), materials and assemblies (drawing conventions, building codes, and physical properties of materials) and fundamental structural principles (forces/loads, equilibrium, and stability). Readings and project presentations.

ARCH 345L: Building Science and Technology I Lab
(0-2) Cr. 1. F.
Prereq: Admission to the professional program in architecture; concurrent enrollment in ARCH 345.
Laboratory to accompany Arch 345 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.
ARCH 346: Building Science and Technology II  
(Dual-listed with ARCH 546). (3-0) Cr. 3. S.  
Prereq: Undergraduate: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346L. Graduate: ARCH 505, ARCH 545, ARCH 545L, and ARCH 595; concurrent enrollment in ARCH 506, ARCH 546L and ARCH 596.  
Second course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental systems (heat transfer in the building envelope, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and building energy calculation methods), materials & assemblies (building envelope systems, accessibility, egress, and material properties), and structural systems (structural system selection/comparison, and design and analysis of “form-active” compression and tension structures). Readings and project presentations.

ARCH 346L: Building Science and Technology II Lab  
(0-4) Cr. 2. S.  
Prereq: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346.  
Laboratory to accompany Arch 346 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 347: Building Science and Technology III  
(Dual-listed with ARCH 547). (3-0) Cr. 3. F.  
Prereq: Undergraduate: ARCH 346, Arch 346L; concurrent enrollment in ARCH 347L. Graduate: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 507 and ARCH 547L.  
Third course in a sequence focused on architectural building technologies. Lectures and labs cover: multistory building framing, assembly, and enclosure systems, sizing and selecting structural framing components (foundations, columns, beams, etc.), and an environmental design process that demonstrates the ability to integrate climate into the control of thermal, luminous, ventilative and acoustic environments. Introduction to plumbing and rain water collection systems.

ARCH 347L: Building Science and Technology III Lab  
(0-4) Cr. 2.  
Prereq: ARCH 346, Arch 346L; concurrent enrollment in ARCH 347.  
Laboratory to accompany Arch 347 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 348: Building Science and Technology IV  
(Dual-listed with ARCH 548). (3-0) Cr. 3. S.  
Prereq: Undergraduate: ARCH 347, Arch 347L; concurrent enrollment in ARCH 348L. Graduate: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548L.  
Fourth course in a sequence focused on architectural building technologies. Lectures and labs cover: ability to demonstrate active environmental HVAC control systems design, use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems, constructed building assemblies and details (building envelope details for waterproofing and enclosure, advanced material properties, costs, and serviceability), and structural design for multi-story structures (design and documenting various framing patterns, integration with other building systems, and lateral stability strategies for wind and seismic).

ARCH 348L: Building Science and Technology IV Lab  
(0-4) Cr. 2. S.  
Prereq: ARCH 347, Arch 347L; concurrent enrollment in ARCH 348.  
Laboratory to accompany Arch 348 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 351: Whole Building Energy Performance Modeling  
(2-2) Cr. 3.  
Prereq: ARCH 202, 245, 341. Open to non-majors by permission of instructor.  
Architectural design, design evaluation and technical analysis using energy, daylighting, and natural ventilation performance modeling tools. Emphasis will be given to whole building energy efficiency including passive and active systems integration.

ARCH 371: Human Behavior and Environmental Theory  
(3-0) Cr. 3.  
Prereq: Completion of the pre-professional program and admission into the professional program in architecture  
Exploration of theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

ARCH 401: Architectural Design V  
(1-15) Cr. 6. F.  
Prereq: ARCH 302  
A rigorous examination of how buildings participate sustainably in socio-political and environmental systems. Student projects consider in a comprehensive proposal how issues of physical site, socio-economic context, programming, structure, form, materiality, and building systems are interconnected through the design process and within the built environment. Projects typically focus on a smaller scale urban public building that is closely connected to its physical, environmental, and social context.
ARCH 401H: Architectural Design V, Honors
(1-15) Cr. 6-7. F.
Prereq: ARCH 302
A rigorous examination of how buildings participate sustainably in socio-
political and environmental systems. Student projects consider in a
comprehensive proposal how issues of physical site, socio-economic
context, programming, structure, form, materiality, and building systems
are interconnected through the design process and within the built
environment. Projects typically focus on a smaller scale urban public
building that is closely connected to its physical, environmental, and
social context.

ARCH 402: Architectural Design VI
(1-15) Cr. 6. S.
Prereq: ARCH 401 and minimum 2.0 GPA in previous studio courses
An examination of the relationship between architecture and the
city. Studio projects stress analysis and interpretation of the diverse
forces and conditions that impact and inform architecture in the urban
environment. Urban design project. Study abroad option.
Meets International Perspectives Requirement.

ARCH 402H: Architectural Design VI, Honors
(1-15) Cr. 6-7. S.
Prereq: ARCH 401H and minimum 2.0 GPA in previous studio courses
An examination of the relationship between architecture and the
city. Studio projects stress analysis and interpretation of the diverse
forces and conditions that impact and inform architecture in the urban
environment. Urban design project. Study abroad option.
Meets International Perspectives Requirement.

ARCH 403: Architectural Design VII
(1-15) Cr. 6. F.
Prereq: ARCH 402
A rigorous examination of architecture's relationship with culture and
technology. Studio projects stress the interpretation and integration
of contextual and historical considerations, as well as structural,
environmental, and communication systems, in a comprehensive design
proposal.

ARCH 403H: Architectural Design VII, Honors
(1-15) Cr. 6-7. F.
Prereq: ARCH 402H
A rigorous examination of architecture's relationship with culture and
technology. Studio projects stress the interpretation and integration
of contextual and historical considerations, as well as structural,
environmental, and communication systems, in a comprehensive design
proposal.

ARCH 404: Architectural Design VIII
(1-15) Cr. 6. S.
Prereq: ARCH 403
Advanced forum for architectural research and/or design. Choice
of thematic studios or student initiated research and design.
Experimentation and innovation are encouraged. DSN S 446 or DSN S
546, for 6 cr. each time taken, can be substituted for this class and be
taken up to a maximum of 12 credits.

ARCH 404H: Architectural Design VIII, Honors
(1-15) Cr. 6-7. S.
Prereq: ARCH 403
Advanced forum for architectural research and/or design. Choice
of thematic studios or student initiated research and design.
Experimentation and innovation are encouraged. DSN S 446 or DSN S
546, for 6 cr. each time taken, can be substituted for this class and be
taken up to a maximum of 12 credits.

ARCH 417: Big and Tall: A History of Construction
(Dual-listed with ARCH 517). (3-0) Cr. 3. Repeatable, maximum of 6
credits.
Prereq: For Arch 417, Junior or Senior Classification, for Arch 517, Graduate
classification
History, theory, and principles of construction from ancient times through
today. Analytic project or term paper and weekly readings with discussion
questions. Credit counts toward fulfillment of History, Theory, Culture
requirements.

ARCH 420: Topics in American Architecture
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Junior classification
History, theory, and principles of American architecture and urban
design considering relationships to the culture, visual arts, site, and
surroundings. Credit counts toward fulfillment of History, Theory, Culture
requirements. A maximum of 6 credits of ARCH 420 may be applied to
degree program.
Meets U.S. Diversity Requirement

ARCH 422: Topics in Medieval Architecture
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Junior classification
History, theory, and principles of medieval architecture and urban
design considering relationships to the culture, visual arts, site, and
surroundings. Credit counts toward fulfillment of History, Theory, Culture
requirements. A maximum of 6 credits of ARCH 422 may be applied to
degree program.
Meets International Perspectives Requirement.
ARCH 423: Topics in Renaissance to Mid-Eighteenth Century Architecture
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Junior classification
History, theory, and principles of renaissance to mid-eighteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 423 may be applied to degree program.
Meets International Perspectives Requirement.

ARCH 424: Topics in Nineteenth Century Architecture
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Junior classification
History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 424 may be applied to degree program.

ARCH 425: Topics in Twentieth Century Architecture
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Junior classification
History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 425 may be applied to degree program.

ARCH 426: Topics in Native American Architecture
(Cross-listed with AM IN). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Junior classification
History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 426 may be applied to degree program.
Meets U.S. Diversity Requirement

ARCH 429: Topics in Italian Architecture and Urbanism
(3-0) Cr. 3. S.
Prereq: Junior classification
History, theory and principles of Italian architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 431: Analytical Drawing
(1-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.
Prereq: ARCH 230 and ARCH 302
Exploration of 2- and 3-dimensional representations. Emphasis on on-site freehand sketching, perspective and orthographic drawing, rendering of shadows and textures, and use of diverse media.

ARCH 432: Advanced Computer Lighting and Rendering
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ARCH 230 and ARCH 301
Exploration of the computer as a design and communication tool. Emphasis on lighting and rendering techniques.

ARCH 433: Digital Fabrication
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.
Prereq: ARCH 230 and ARCH 301
Exploration of the computer as a design and manufacturing tool. Emphasis on developing digital fabrication technologies and workflows.

ARCH 434: Advanced Computer-aided Architectural Design
(1-4) Cr. 3.
Prereq: ARCH 334 or by Instructor Permission.
Specialized investigations of the computer as a design tool. Development of computer software and workflows for architectural and environmental problem solving.

ARCH 436: Advanced Design Media
(2-2) Cr. 3. Repeatable. F.S.S.
Prereq: ARCH 230
Special topics in design media applications.

ARCH 437: Architectural Photography
(3-0) Cr. 3.
Prereq: ARCH 202
Emphasis on use of the camera and lighting in photographing drawings and interior and exterior building environments.
ARCH 439: Computational Design Theory  
(Dual-listed with ARCH 539). (3-0) Cr. 3.  
Prereq: Arch 221, Arch 222 or senior classification or graduate standing  
Seminar discussion of critical readings and theories surrounding computational design; This course surveys the history and development of digital computing and its use in design from early thought experiments, to computer-aided design systems, to present day artificial intelligences and robotics. The potentials and consequences of emerging computational design systems are discussed.

ARCH 445: Building Science and Technology V  
(2-0) Cr. 2. F.  
Prereq: ARCH 348, Arch 348L; concurrent enrollment in ARCH 445L.  
Final course in a sequence of architectural building technology courses comprising environmental systems, materials/assembly, and building structures topics. Using both lectures and labs, the three interrelated modules each emphasize a particular building technology subject with an overall focus on synthesizing and integrating building technologies together in sustainable design strategies. Topics include: integration of active environmental control and service systems into the design of larger scale buildings, the development of construction details for building shell and interiors, and the design and analysis of various long-span structural systems.

ARCH 445L: Building Science and Technology V Lab  
(0-2) Cr. 1. F.  
Prereq: ARCH 348, Arch 348L; concurrent enrollment in ARCH 445.  
Laboratory to accompany Arch 445 and must be taken concurrently.  
Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 482: Professional Practice  
(Dual-listed with ARCH 582). (3-0) Cr. 3. F.  
Prereq: Junior classification and ARCH 371  
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 486: Design: Made in Italy  
(3-0) Cr. 3. S.  
An investigation of the history of Italian design in its contemporary form as part of International study abroad program in Rome. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 490: Independent Study  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490A: Independent Study: Design Communications.  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490B: Independent Study: Design  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490C: Independent Study: Building Science and Technology  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490D: Independent Study: Architectural History  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490E: Independent Study: Behavioral Studies  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490F: Independent Study: Practice  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

ARCH 490H: Independent Study: Honors  
Cr. 1-9. Repeatable.  
Prereq: Written approval of instructor and department chair on required form  
Independent investigation.

Courses primarily for graduate students, open to qualified undergraduates:

ARCH 505: Architectural Design and Media I: Mapping, Programming, Building  
(0-10) Cr. 5. F.  
Prereq: Admission to the M Arch program. Concurrent enrollment in ARCH 545, ARCH 545L and ARCH 595.  
An introduction to comprehensive architectural design projects that focuses on three interrelated design skills: mapping, programming and building. Projects establish a framework for designing buildings that considers multiple factors such as environmental forces, construction methods, building codes, urban regulations, social relationships, and cultural values.
ARCH 506: Architectural Design and Media II: Materiality and Representation  
(0-10) Cr. 5. S.  
Prereq: ARCH 505, ARCH 545, ARCH 545L, ARCH 595 and concurrent enrollment in ARCH 546, ARCH 546L, and ARCH 596  
Small-scale architectural design projects that investigate design representation through analogue and digital means. The projects explore different representation strategies to help students develop an understanding of the particular modes of architectural representation that advance the designer’s knowledge of space as a complex interaction between materials with inherent physical characteristics, mobile socializing bodies, and changing environmental cycles.

ARCH 507: Architectural Design and Media III: Design in Detail  
(0-10) Cr. 5. SS.  
Prereq: ARCH 506, ARCH 546, ARCH 546L, ARCH 596 and concurrent enrollment in ARCH 581  
Design projects that emphasize the multi-faceted role of the architectural detail in the design process through first, understanding the historical specificity of building construction and detailing; second, utilizing working drawing as a mode of communication; and third, designing with details.

ARCH 517: Big and Tall: A History of Construction  
(Dual-listed with ARCH 417). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: For Arch 417, Junior or Senior Classification, for Arch 517, Graduate classification  
History, theory, and principles of construction from ancient times through today. Analytic project or term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 521: Celluloid Cities, Urbanism in Film  
(3-0) Cr. 3.  
Prereq: Junior classification  
Urban theory and history as manifested in popular films and videos, both fiction and documentary. Term projects require students to make short videos. (Experience with video-making not necessary.) Credit counts towards fulfillment of History, Theory, Culture requirement.

ARCH 522: Complex Adaptive Systems Theory for the Design of Built Environments  
(3-0) Cr. 3.  
Prereq: Graduate or Senior Classification  
The principles of complex adaptive systems theory are studied and then applied towards the design of resilient and responsive built environments. Topics cover a broad spectrum, including urban informalities, tactical approaches, the capacity of digital infrastructures to coordinate distributed human practices, and emergent phenomena. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 525: Meaning and Form in Architecture  
(3-0) Cr. 3.  
Prereq: Graduate or Senior classification  
Seminar on critical analysis of meaning and form in architecture and human-made environment in various cultural contexts examined from historical and theoretical perspectives. Analytic term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.  
Meets International Perspectives Requirement.

ARCH 527: History, Theory, and Criticism of Chinese Architecture  
(Dual-listed with ARCH 427). (3-0) Cr. 3. F.  
Prereq: For Arch 427, Senior classification, for Arch 527, Graduate classification  
The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of History, Theory, Culture.  
Meets International Perspectives Requirement.

ARCH 528: Topical Studies in Architecture  
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.  
Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing  
Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 528A: Studies in Architecture: Culture  
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.  
Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing  
Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 528B: Studies in Architecture: Technology  
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.  
Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing n/a.

ARCH 528C: Studies in Architecture: Communications  
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.  
Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing n/a.
ARCH 528E: Studies in Architecture: Practice  
(3-0) Cr. 2-3. Repeatable, maximum of 6 times.  
Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

ARCH 531: Drawing Culture  
(3-0) Cr. 3.  
Prereq: Arch 221, Arch 222 or senior classification or graduate standing  
Exploration of theories and practices that center on drawing as a fundamental means of knowing.

ARCH 534: Topics in Computer-aided Architectural Design  
(1-4) Cr. 3. Repeatable, maximum of 6 credits. F.  
Prereq: ARCH 434 or permission of instructor  
Emphasis on advanced, exploratory approaches to design computing. Projects highlight experimentation and integration of multiple media types.

ARCH 535: Advanced Three-Dimensional Studio  
(1-4) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: ARCH 335 or Graduate classification  
Advanced investigation of sculptural expression with emphasis on individual projects.

ARCH 539: Computational Design Theory  
(Dual-listed with ARCH 439). (3-0) Cr. 3.  
Prereq: Arch 221, Arch 222 or senior classification or graduate standing  
Seminar discussion of critical readings and theories surrounding computational design; This course surveys the history and development of digital computing and its use in design from early thought experiments, to computer-aided design systems, to present day artificial intelligences and robotics. The potentials and consequences of emerging computational design systems are discussed.

ARCH 545: Building Science and Technology I  
(Dual-listed with ARCH 345). (2-0) Cr. 2. F.  
Prereq: Undergraduate: Admission to the professional program in architecture; concurrent enrollment in ARCH 345L; graduate: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545L  
First course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental forces and systems (solar orientation, climate, daylighting, natural ventilation, human comfort and occupancy patterns), materials and assemblies (drawing conventions, building codes, and physical properties of materials) and fundamental structural principles (forces/loads, equilibrium, and stability). Readings and project presentations.

ARCH 545L: Building Science and Technology I Lab  
(0-6) Cr. 3. F.  
Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545. Laboratory to accompany Arch 545 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format. Readings and project presentations.

ARCH 546: Building Science and Technology II  
(Dual-listed with ARCH 346). (3-0) Cr. 3. S.  
Prereq: Undergraduate: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346L. Graduate: ARCH 505, ARCH 545, ARCH 545L, and ARCH 595; concurrent enrollment in ARCH 506, ARCH 546L and ARCH 596.  
Second course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental systems (heat transfer in the building envelope, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and building energy calculation methods), materials & assemblies (building envelope systems, accessibility, egress, and material properties), and structural systems (structural system selection/comparison, and design and analysis of “form-active” compression and tension structures). Readings and project presentations.

ARCH 546L: Building Science and Technology II Lab  
(0-4) Cr. 2. S.  
Prereq: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346. Laboratory to accompany Arch 546 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 547: Building Science and Technology III  
(Dual-listed with ARCH 347). (3-0) Cr. 3. F.  
Prereq: Undergraduate: ARCH 346, Arch 346L; concurrent enrollment in ARCH 347L. Graduate: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 601 and ARCH 547L.  
Third course in a sequence focused on architectural building technologies. Lectures and labs cover: multistory building framing, assembly, and enclosure systems, sizing and selecting structural framing components (foundations, columns, beams, etc.), and an environmental design process that demonstrates the ability to integrate climate into the control of thermal, luminous, ventilative and acoustic environments. Introduction to plumbing and rain water collection systems.
ARCH 547L: Building Science and Technology III Lab
(0-2) Cr. 1. F.
Prereq: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 547 and ARCH 601.
Laboratory to accompany Arch 547 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 548: Building Science and Technology IV
(Dual-listed with ARCH 348). (3-0) Cr. 3. S.
Prereq: Undergraduate: ARCH 347, ARCH 347L; concurrent enrollment in ARCH 348L. Graduate: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548L.
Fourth course in a sequence focused on architectural building technologies. Lectures and labs cover: ability to demonstrate active environmental HVAC control systems design, use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems, constructed building assemblies and details (building envelope details for waterproofing and enclosure, advanced material properties, costs, and serviceability), and structural design for multi-story structures (design and documenting various framing patterns, integration with other building systems, and lateral stability strategies for wind and seismic).

ARCH 548L: Building Science and Technology IV Lab
(0-2) Cr. 1. S.
Prereq: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548.
Laboratory to accompany Arch 548 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 558: Sustainability and Green Architecture
(3-0) Cr. 3.
Prereq: Graduate or Senior classification
Issues of sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment. Issues of green and sustainable architecture as related to critical thinking about methods of building material selection and systems, the environment of the United States and the world, and examples of green or sustainable building designs.

ARCH 567: Preservation, Restoration, and Rehabilitation
(3-0) Cr. 3. S.
Prereq: Senior classification
Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 568: Historic Preservation
(3-0) Cr. 3. F.
Prereq: Senior classification
The history and theory of the Historic Preservation movement including an overview of the National Trust for Historic Preservation; the National Register of the Historic Places; the National Park Service; federal programs, funding sources, preservation law, national landmarks, and historic districts. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 571: Design for All People
(Cross-listed with GERON). (3-0) Cr. 3. S.
Prereq: Graduate or Senior classification
Principles and procedures of inclusive design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of History, Theory, Culture requirements. Meets U.S. Diversity Requirement

ARCH 575: Contemporary Urban Design Theory
(3-0) Cr. 3.
Prereq: Graduate or Senior classification
Current urban design theory and its application to urban problems. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 576: Study Abroad Options
Cr. 1-12. Repeatable, maximum of 12 credits. SS.
Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus. Meets International Perspectives Requirement.
ARCH 581: Making and Material Practice  
(1-12) Cr. 5. SS.  
Prereq: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596  
Planning and execution of a project serving a community need. Learning occurs through both theory and active involvement in on-site work. Projects connect previous coursework to practical applications and community involvement.

ARCH 582: Professional Practice  
(Dual-listed with ARCH 482). (3-0) Cr. 3. F.  
Prereq: Junior classification and ARCH 371  
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 583: Research in Practice  
(3-0) Cr. 3. S.  
Prereq: Graduate or Senior classification  
Foundational course in the methods and conceptual tools of design research in the context of practice. Through team and individual guided projects, students generate, analyze and represent knowledge in design-related communications and contexts. Alternative models of practice, client groups and communities are addressed within projects that precede, feed, follow, or overlap with architectural contracts.

ARCH 590: Special Topics  
Cr. 1-5. Repeatable.  
Prereq: Written approval of instructor and department chair on approved form  
Investigation of architectural issues having a specialized nature.

ARCH 595: Seminar on the Built Environment I: History  
(5-0) Cr. 5. F.  
Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505, ARCH 545, and ARCH 545L  
Introduction to historical canons and traditions of architecture and urbanism. Discussion of the relationship between historical inquiry and contemporary practice. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects.

ARCH 596: Seminar on the Built Environment II: Landscape and Society  
(5-0) Cr. 5. S.  
Prereq: ARCH 505, ARCH 545, ARCH 545L, ARCH 595 and concurrent enrollment in ARCH 506, ARCH 546, and ARCH 546L  
Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment.

ARCH 597: Seminar on the Built Environment III: Theory  
(3-0) Cr. 3. F.  
Prereq: Graduate or Senior classification  
Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space. Credit counts toward fulfillment of History, Theory, Culture requirements.  
Meets International Perspectives Requirement.

ARCH 598: Seminar on the Built Environment IV: Topical Study  
(3-0) Cr. 3. S.  
Prereq: Graduate or Senior classification  
A research seminar which considers a topic within contemporary discourses on the built environment outside of Europe and North America. The topic will be studied from multiple perspectives highlighting the historical and theoretical relationships between architecture, global cultures, geography, landscape, and urban planning. Credit counts toward fulfillment History, Theory, Culture requirements.

Courses for graduate students:

ARCH 601: Sustainable Building Design  
(0-12) Cr. 6. F.  
Prereq: ARCH 507, ARCH 546, ARCH 546L, and ARCH 596 and concurrent enrollment in ARCH 547 and ARCH 547L  
Design projects that are developed through integrative design strategies that explore the relationship between buildings and environmental forces to maximize non-wasteful, efficient use of resources such as energy, water and building materials. Projects will include investigations of the impact of solar energy, airflow, building materials, passive and active systems and wall sections on spatial quality and form making. Design decisions will be quantitatively validated through energy modeling and performance simulation.
ARCH 602: Community, Building and the Environment  
(0-12) Cr. 6. S.  
Prereq: ARCH 601, ARCH 643, ARCH 597 and concurrent enrollment in ARCH 644  
Design projects that explore the relationships between architectural, cultural, and environmental landscapes. Emphasis on regional sites, socio-economic conditions, and sustainable design and planning practices at multiple scales. Projects stress engagement with local circumstances and stakeholders; systemic interconnections and strategies; and the application of interdisciplinary research.

ARCH 603: Integrative Design  
(0-12) Cr. 6. F.  
Prereq: ARCH 601  
Rigorous examination of architecture’s relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations while demonstrating broad integration and consideration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies. This course fulfills the Graduate College Creative Component Requirement.

ARCH 604: Design Studio Options  
(0-12) Cr. 6. Repeatable, maximum of 12 credits. S.  
Prereq: ARCH 602  
Design studio selected by the students, which may include but is not limited to: independent design study, interdisciplinary design studio, study abroad, and design build. DSN S 546 for 6 cr. may be substituted for this course.

ARCH 690: Independent Design Study  
(1-15) Cr. 6. Repeatable.  
Prereq: Admission to the M. S. in Arch. program  
Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Committee.

ARCH 698: Graduate Seminar  
Cr. R. Repeatable. F.S.  
Prereq: Admission to the M. Arch. or M. S. in Arch. programs  
Special topics and guest speakers.

ARCH 699: Research  
(1-18) Cr. 3-9. Repeatable.  
Research.

Art and Design

The Bachelor of Arts in Art and Design is a four-year degree program with two options: Art and Culture or Visual Culture Studies. Both options require students to complement their studio art or visual culture studies coursework with study in a second area, within or outside of the College of Design. This can include a second major or minor, or an alternative program of study approved by your academic adviser.

Many students pursue this BA degree in conjunction with a second major or minor such as journalism, advertising, business, history, or psychology.

The two Art and Design curricula provide a solid liberal arts educational experience that can be a springboard into a wide array of graduate school and career opportunities, including art criticism, art history, art sales, corporate art collections, gallery/museum studies, and art therapy.

Art and Culture Option

The Art and Culture option provides a general studies degree in which students combine studio art with another area of interest. Students create their own programs of study, which may include another major or minor in addition to the concentration emphasizes studio art.

Visual Culture Studies Option

The Visual Culture Studies option provides concentrated study of art and design history, theory, and criticism. Courses may include up to nine (9) credits of museum or gallery internship, for those students interested in museum studies. Students also create their own programs of study, which may include another major or minor in addition to the concentration in visual culture studies.

This curriculum offers two concentrations: Art and Culture and Visual Culture Studies. Both concentrations are combined with an approved program of study, which may consist of a second major or a minor.

Art and Culture Concentration

The curriculum in Art and Design: Art and Culture Concentration leads to a 120.5-credit undergraduate Bachelor of Arts degree.

Total Degree Requirements: 120.5 credits

Only 65 credits from a two-year institution can apply, and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspectives: 3 credits

U.S. Diversity: 3 credits

Communication: 10 credits

(C or better grade in ENGL 150 and ENGL 250)

### Humanities: 6 credits
6 credits from College of Design General Education Approved Course List

### Social Sciences: 6 credits
6 credits from College of Design General Education Approved Course List

### Math/Physics/Biol. Sciences: 6 credits
6 credits from College of Design General Education Approved Course List

**General Education Courses: 9 credits**
6 credits at level 300-400 from College of Design General Education Approved Course List
3 credits from College of Design General Education Approved Course List

**College of Design Core: 11.5-12 credits**
- DSN S 102  Design Studio I  4
- DSN S 115  Design Collaborative Seminar  0.5-1
  or DSN S 110  Design Exchange Seminar I
- DSN S 131  Drawing I  4
- DSN S 183  Design in Context  3

**Art History and Theory: 15 credits**
- ART H 280  History of Art I  3
- ART H 281  History of Art II  3
- Six credits from 300-level or above from ART H  6
- Three credits from courses in ART H, or approved history courses in ARCH, CRP, or LA  3

**Art and Culture Concentration: 12 credits**
12 credits from 200-level or above in College of Design studio courses.

**Program of Study: 30 credits**
30 credits from an approved program of study, including 6 credits at 300-400 level.

**Electives: 15 credits**

**Visual Culture Studies Concentration**

**Total Degree Requirements: 119 credits**

6 credits foreign language. 24 credits in approved History/Theory/Criticism courses from departments in the College of Design. May include up to 9 credits Museum/Gallery Internship. 12 credits must be at 300 level or above. 4 credits ART H 499 Visual Culture Studies Writing and Methods Seminar.

**Program of Study: 24 credits**
24 credits from an approved program of study, including 6 credits at 300-400 level.

**Electives: 15 credits**

#### Biological/Pre-Medical Illustration

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "communicating science through art," the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, free-
lance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences.

Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

Communication Proficiency Requirement: Students must have credit for ENGL 150; earn a C or better in ENGL 250 or equivalent composition courses; and earn a C or better in one advanced writing course numbered ENGL 302 through ENGL 316.

Students in BPM I must complete a senior project or an internship experience (BPM I 497) in which they design and produce artwork that is suitable for publication or public display.

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses.

The biological sciences must include:

Courses primarily for undergraduates:

BPM I 323: Scientific Illustration Principles and Techniques
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.

Prereq: DSN S 131, ARTIS 230, or equivalent, and 3 credits in biological sciences; or permission of the instructor

Studio basics and professional techniques in black & white, continuous tone, and color. Introduction to professional practice and principles of communicating science through art. Emphasis on tools, materials, and rendering.
BPM I 326: Illustration and Illustration Software  
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.  
Prereq: ARTIS 323/BPM I 323, or permission of the instructor  
An introduction to digital illustration software. Application of painting, drawing and image making techniques using vector and raster based programs.

BPM I 327: Illustration as Communication  
(Cross-listed with ARTIS). (0-6) Cr. 3.  
Prereq: ARTIS 326/BPM I 326, or permission of the instructor  
Investigation of illustration as a form of communication. Emphasis on problem solving, effective composition, and advancement of rendering skills.

BPM I 337: Application of Scientific Illustration Techniques  
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: ARTIS 327  
Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

BPM I 395: Field Illustration  
Cr. 1-3. Repeatable, maximum of 6 credits. S.SS.  
Prereq: Permission of instructor  
A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BPM I 398: Cooperative Education  
Cr. R. F.S.SS.  
Prereq: Permission of the program cooperative education coordinator, junior classification  
Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BPM I 435I: Illustrating Nature I Sketching  
(Cross-listed with IA LL). Cr. 2. SS.  
Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

BPM I 436I: Illustrating Nature II Photography  
(Cross-listed with IA LL). Cr. 2. SS.  
Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

BPM I 490: Independent Study  
Cr. 1-3. Repeatable, maximum of 3 credits.  
Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment

BPM I 491: Portfolio Design and Professional Development  
Cr. 2. S.  
Prereq: BPMI 337, junior or senior classification in the BPMI curriculum.  
Portfolio and professional preparation including identity package development, writing and speaking. Career-readiness, professional practice, leadership, networking, exploring research subfields within scientific visualization. Creating print and digital visual materials, learning approaches for entering the field, and developing business practice skills. Final portfolio materials presented at the end of the term.

BPM I 494: Special Topics in Illustration  
Cr. 1-3. Repeatable.  
Intensive exploration of illustration techniques in a studio or field setting.

BPM I 497: Illustration Internship  
Cr. 1-6. Repeatable, maximum of 6 credits.  
Prereq: Junior or senior classification in BPM I, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment  
Offered on a satisfactory-fail basis only.

Community and Regional Planning  
www.design.iastate.edu/community-and-regional-planning (http://www.design.iastate.edu/communityplanning)  
Community and regional planning is a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity, and the management of growth and change of all kinds.

Graduates of the Community and Regional Planning department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, and collaboration, and in synthesizing and applying knowledge to practice. Graduates are expected to be able to assess...
the impact of plans and alternatives based on equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Our students gain an education that, when combined with experience, supports eligibility for membership in the American Institute of Certified Planners.

Curriculum in Community and Regional Planning
The Department of Community and Regional Planning administers the 128-credit-hour undergraduate program leading to the Bachelor of Science. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

The BS in Community and Regional Planning program can be completed in two to four years. Students may apply for admission to the program at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student’s cumulative GPA and a departmental review of course work. Transfer applications from students in programs in sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 credits
Only 65 credits from a two-year institution may apply which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; completion of all requirements listed below.

International Perspective: 3 credits
U.S. Diversity: 3 credits
Communication: 13 credits

Undergraduate Minors

The Department of Community and Regional Planning offers 15-credit minors in Urban Studies and Geographic Information Science (GISC).

The Urban Studies minor is earned by completing both C R P 201 (The North American Metropolis) and C R P 291 (World Cities and Globalization), plus 9 additional credit hours from the approved list of courses. At least 6 credit hours must be in courses numbered 300 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least nine credits that are not used to meet any other department, college or university requirement except the credit requirement for graduation. The Urban Studies minor is open to students from any college and any major.

**Graduate Study**

The department offers the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. Students may design their own area of concentration with the assistance of their major professor. The primary focus of the MCRP degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (24 credits), electives (18-20 credits), and one of the following: capstone studio (6 credits), professional report (4 credits), or thesis (6 credits). The required core consists of CRP 532, 561, 563, 564, 566, 568 and 592. Students select electives in consultation with their Program of Study (POS) committee.

Admission to the MCRP program is by application to the department and to the Graduate College. Students with a bachelor's degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department's Director of Graduate Education (DOGE) in writing prior to the first day class of the student's first semester in the program to have credits waived. Students are encouraged to complete an internship in a
planning office. No foreign language is required for the degree Master of Community and Regional Planning.

Double degree programs are offered with architecture (MCRP/MArch), business administration (MCRP/MBA), landscape architecture (MCRP/MLA) and sustainable agriculture (MCRP/MS). The department also participates in the interdepartmental major in transportation (see Transportation). Information about our programs and how to apply can be obtained from the department's webpage at: www.design.iastate.edu/community-and-regional-planning (http://www.design.iastate.edu/CRP), or send an email to crp@iastate.edu.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications, and program management. The program is open to graduate students in all disciplines of the university. Information about the graduate certificate may be obtained from the department office and from the department's webpage at: www.design.iastate.edu/programs-minors/certificates/gis-certificate/ (https://www.design.iastate.edu/programs-minors/certificates/gis-certificate).

Courses primarily for undergraduates:

**C R P 201: The North American Metropolis**
(3-0) Cr. 3. F.S.
Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today.
Meets U.S. Diversity Requirement

**C R P 251: Fundamentals of Geographic Information Systems**
Cr. 3. F.
Fundamentals of the concepts, models, functions and operations of Geographic Information Systems (GIS). Principles of spatial problems, spatial questions and hypotheses and their solutions based on spatial data, GIS tools and techniques. Integration of concepts and applications through lectures and facilitated labs. Applications from a variety of areas including design; physical, social, and human science; engineering; agriculture; business and medicine, landscape architecture, architecture, urban planning, geology, forestry, biology, and ecology.

**C R P 291: World Cities and Globalization**
(3-0) Cr. 3. F.S.
World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.
Meets International Perspectives Requirement.

**C R P 293: Environmental Planning**
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

**C R P 301: Urban Analytical Methods**
(3-2) Cr. 4. S.
**Prereq: STAT 101**
An introduction to the methods and analytical techniques used by planners to study community change. Course includes identification of key sources of planning information and data. Students learn to use quantitative methods for analysis of population, land use, economic and transportation data. Students learn to apply basic analytic methods to community problems and learn the art of effective written, graphic, and oral presentation of data.

**C R P 320: Urban Geography**
(3-0) Cr. 3. F.S.
An introduction to urban geography. Study of urban centers, including people and infrastructure. Investigation of the origin and evolution of urban areas and the processes that shape urban change. Topics include urban form, and the social, economic, political, cultural, and institutional factors that shape cities.

**C R P 330: Practicum**
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
**Prereq: Major in community and regional planning**
Structured work experience under close supervision of a professional planner. Practical planning experience; relationships between theory and practice, professional responsibilities, and the scope of various planning roles.

**C R P 331: Professional Practice Seminar**
(2-0) Cr. 2. F.
**Prereq: CRP 301 and junior classification**
Preparation for working as a planning professional; development of resume and portfolio; discussion of professional ethics and expectations of employers and clients; presentations from planning professionals, and discussion of the range of career choices within the planning profession.
C R P 351: Intermediate Geographic Information Systems  
Cr. 3. F.S.  
Prereq: CRP 251X  
Intermediate GIS for design and non-design students to learn concepts of digital management and representation of spatial data, including spatial problems, data sources and structures, simple spatial operations and cartographic issues. Gain skill set to effectively display feature and tabular data, query features using logical expressions, edit spatial and attribute data, associate tables with joins and relates, produce maps, reports, and graphs.

C R P 376: Rural, Urban and Regional Economics  
(Cross-listed with ECON). (3-0) Cr. 3.  
Prereq: ECON 101  
Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime.

C R P 383: Theory of the Planning Process  
(3-0) Cr. 3. F.  
Prereq: Junior classification  
The nature of planning and its relation to social and economic planning; levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.

C R P 391: Field Travel  
Cr. 1-2. Repeatable. F.S.  
Prereq: CRP major and permission of instructor  
Observation of professional practice and community or regional problems and issues. Offered on a satisfactory-fail basis only.

C R P 410: Professional Work Experience  
Cr. R. F.S.S.  
Prereq: Permission of department chair  
Approved professional work experience.

C R P 416: Urban Design and Practice  
(Dual-listed with C R P 516). (3-6) Cr. 6. S.  
Prereq: C R P 301  
Principles of urban design and their application to residential and commercial development in studio projects.

C R P 417: Urban Revitalization  
(Dual-listed with C R P 517). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: Junior classification  
Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 421: Financing Historic Preservation Projects  
(3-0) Cr. 3. F.  
Investigation of the financial tools and incentives used to promote the rehabilitation and redevelopment of historic buildings and neighborhoods in cities and towns. Study of broader economic and social impacts on communities. Examinations of completed preservation projects around the United States.

C R P 429: Planning in Developing Countries  
(Dual-listed with C R P 529). (3-0) Cr. 3. F.S.  
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 432: Community Planning Studio  
(1-6) Cr. 4-6. F.S.  
Prereq: C R P 201, C R P 301, C R P 383, or permission of instructor.  

C R P 435: Planning in Small Towns  
(Dual-listed with C R P 535). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: Junior classification  
Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today’s society.

C R P 436: Community Economic Development  
(Dual-listed with C R P 536). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.
C R P 437: Public Participation in Planning
(3-0) Cr. 3. S.
Rationale and need for public participation in community planning and development. Techniques used to garner participation, and the ability to integrate techniques into a broader participatory process. Techniques covered will include public hearings, public meetings, social action construct, advisory committees, scenario building, social media and asset mapping. Students will also work with a community to demonstrate skills learned. None

C R P 442: Site Development
(Dual-listed with C R P 542). (3-0) Cr. 3. S.
Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

C R P 445: Transportation Policy and Planning
(Dual-listed with C R P 545). (3-0) Cr. 3. F.
**Prereq: Junior classification; CRP 545 prerequisite: Graduate classification**
Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 449: Geodesign
(Dual-listed with C R P 549). (3-0) Cr. 3. S.
**Prereq: CRP 251 or equivalent or permission of the instructor**
Geodesign combines design creativity with scientific thinking based on spatial data. Special focus on sustainable development of future neighborhoods, communities, cities and/or countries. Students learn the geodesign process and implement a set of techniques and technologies that enable project conceptualization, data collection and visualization, spatial analysis, design creation, impact evaluation and stakeholder participation. Final project involves developing cases for analysis using ESRI ArcGIS Online and GeoPlanner software.

C R P 451: Introduction to Geographic Information Systems
(2-2) Cr. 3. F.S.SS.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 452: Geographic Data Management and Planning Analysis
(Dual-listed with C R P 552). (2-2) Cr. 3. F.S.
**Prereq: C R P 351 or equivalent**
Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 453: Smart Cities
Cr. 3. S.
Introduction to concepts of smart cities. Study of novel technologies for smart governance, sustainable energy, innovative ways for citizens’ engagement, improved safety, mobility and healthy living. Examples of national and international smart cities. Living Lab experience.

C R P 454: Fundamentals of Remote Sensing
(Dual-listed with C R P 554). (Cross-listed with L A). (3-0) Cr. 3. F.
**Prereq: CRP 351 or equivalent or permission of the instructor**
Introduction to remote sensing techniques needed for basic analysis of satellite images, including: filtering and conflation techniques, stacking, pan sharpening, image rectification, image enhancement, unsupervised and supervised classification. Practical applications in a variety of topics to understand how to interpret images.

C R P 456: GIS Programming and Automation
(Dual-listed with C R P 556). (2-2) Cr. 3. F.
**Prereq: CRP 351 or CRP 551 or NREM 345 or NREM 546 or GEOL 552**
Introduction to automated geoprocessing in Geographic Information Systems. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests.

C R P 458: Web Mapping/GIS
(Dual-listed with C R P 558). (Cross-listed with L A). (2-2) Cr. 3.
**Prereq: CRP 451/551, LA 302, GEOL 452/552 or instructor permission.**
Use and development of online mapping tools to support participatory GIS, Volunteered Geographic Information, information sharing, geodesign and decision making actions. Geoprocessing and Web Scripting/coding and user interface design. Laboratory emphasis practical applications and uses of Web GIS.

C R P 460: Social Justice and Planning
(Dual-listed with C R P 560). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Investigation of the topic of social justice as it relates to the challenge of planning more socially just urban societies, emphasizing the importance of social justice issues to planning in a globalized world. Includes a range of issues and case studies of local social justice initiatives, both US and global. Students will complete individual service learning projects as part of the course requirement.
C RP 475: Grant Writing  
(Dual-listed with C RP 575). (1-0) Cr. 1. F.  
A short introduction to effective grant writing for the public and non-
profit sectors. Includes identifying appropriate funding sources for an 
an organization, identifying goals and objectives, and budgeting.

C RP 479: Public Finance and Planning  
(Dual-listed with C RP 579). (3-0) Cr. 3. S.  
Effective management of state and local government finance critical 
to successful community and regional planning. Economic concepts, 
topics in budgeting, revenue, expenditure, and financing, analytical 
techniques, economic impact, and case studies. Understanding of 
economic assessment in planning and understanding of various linkages 
between planning and public finance.

C RP 484: Sustainable Communities  
(Dual-listed with C RP 584). (Cross-listed with ENV S). (3-0) Cr. 3. S.  
Prereq: Junior classification  
The history and theory of sustainable community planning. Procedural 
and substantive dimensions. Case studies of communities engaged in 
sustainability planning. Use and development of indicators.

C RP 490: Independent Study  
Cr. 1-3. Repeatable. F.S.S.  
Prereq: Written approval of instructor and department chair on required form  
Investigation of an approved topic commensurate with student’s interest 
and ability. Offered on a satisfactory-fail basis only.

C RP 490H: Independent Study: Honors  
Cr. 1-3. Repeatable. F.S.S.  
Prereq: Written approval of instructor and department chair on required form  
Investigation of an approved topic commensurate with student’s interest 
and ability. Offered on a satisfactory-fail basis only.

C RP 491: Environmental Law and Planning  
(Dual-listed with C RP 591). (Cross-listed with ENV S, L A). (3-0) Cr. 3. S.  
Prereq: 6 credits in natural sciences  
Environmental law and policy as applied in planning at the local and 
state levels. Brownfields, environmental justice, water quality, air quality, 
wetland and floodplain management, and local government involvement 
in ecological protection through land use planning and other programs.

C RP 492: Planning Law, Administration and Implementation  
(3-0) Cr. 3. F.  
Prereq: Junior classification  
The basis in constitutional, common, and statutory law for the powers 
of plan implementation. Problems of balancing public and private 
interests as revealed in the study of leading court cases. Administration 
of planning agencies and programs.

C RP 494: Senior Seminar in Planning  
Cr. 1-3. Repeatable, maximum of 2 times. F.S.  
Prereq: Senior classification  
An advanced forum for seniors that focuses upon recent trends and 
important issues affecting planning today. Topics addressed will vary. A 
demonstration of understanding of current issues and their effects upon 
planning applications is expected.

Courses primarily for graduate students, open to qualified 
undergraduates:

C RP 510: Professional Work Experience  
Cr. R. F.S.S.S.  
Prereq: Permission of department chair  
Approved professional work experience.

C RP 511: Documenting the Historic Built Environment  
Cr. 3-4. F.  
Prereq: Knowledge of GIS helpful but not required.  
Principals and methods for researching, identifying, recording, 
and analyzing buildings, districts, and sites that are historically or 
architecturally significant. Classroom and fieldwork components will use 
real-world historic places as case studies.

C RP 516: Urban Design and Practice  
(Dual-listed with C RP 416). (3-6) Cr. 6. S.  
Prereq: C RP 301  
Principles of urban design and their application to residential and 
commercial development in studio projects.

C RP 517: Urban Revitalization  
(Dual-listed with C RP 417). (3-0) Cr. 3. Alt. S., offered odd-numbered 
years.  
Prereq: Junior classification  
Planning methods available to further revitalization and preservation 
efforts, with particular attention to housing and neighborhoods. 
Relationship between neighborhood change and urban development 
process; public policy implications.

C RP 521: Historic Preservation Planning: Theory and Practice  
(3-0) Cr. 3. S.  
Prereq: None  
Introduction to the history, theory, and practice of historic preservation 
and cultural resource management. Cases exploring preservation in US 
and global contexts; politics of preservation; preservation technologies; 
and relationship of preservation to other community issues.
C R P 526: Real Estate Development
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission.
Overview of the real estate development process. Topics include the history of real estate development, roles of planning and market forces in real estate development, and financial management of real estate development. Projects involve analysis of market niches, market penetration rates, lease rates, synergism and tenant mix, and the go/no go decision applied to residential, commercial, and mixed-use development.

C R P 527: Sustainable Community Development
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission.
Introduces the central principles of sustainable community design and its implementation in the residential and commercial real estate development sectors. Topics include current practices and regulatory mandates, with a focus on the importance of private participation in the development of sustainable communities.

C R P 528: Financing Historic Preservation Projects and Revitalizing Communities
(3-0) Cr. 3.
Prereq: Enrollment in the MRED or instructor permission.
Investigation of the financial tools and incentives used to promote the rehabilitation and redevelopment of historic buildings and neighborhoods in cities and towns. Study of broader economic and social impacts on communities. Examinations of completed preservation projects around the United States.

C R P 529: Planning in Developing Countries
(Dual-listed with C R P 429). (3-0) Cr. 3. F.S.
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 530: Practicum
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Graduate classification in Community and Regional Planning
Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in functioning specialties. Offered on a satisfactory-fail basis only.

C R P 532: Community Planning Studio
(3-6) Cr. 4-6. F.
Prereq: C R P 564 or equivalent
Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

C R P 535: Planning in Small Towns
(Dual-listed with C R P 435). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: Junior classification
Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society.

C R P 536: Community Economic Development
(Dual-listed with C R P 436). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 542: Site Development
(Dual-listed with C R P 442). (3-0) Cr. 3. S.
Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

C R P 545: Transportation Policy and Planning
(Dual-listed with C R P 445). (3-0) Cr. 3. F.
Prereq: Junior classification; C R P 545 prerequisite: Graduate classification
Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.
C R P 549: Geodesign
(Dual-listed with C R P 449). (3-0) Cr. 3. S.
Prereq: CRP 251 or equivalent or permission of the instructor
Geodesign combines design creativity with scientific thinking based on spatial data. Special focus on sustainable development of future neighborhoods, communities, cities and/or countries. Students learn the geodesign process and implement a set of techniques and technologies that enable project conceptualization, data collection and visualization, spatial analysis, design creation, impact evaluation and stakeholder participation. Final project involves developing cases for analysis using ESRI ArcGIS Online and GeoPlanner software.

C R P 550: Making Resilient Environments
(Cross-listed with SUS E). (3-0) Cr. 3. S.
Prereq: senior or graduate standing.
Major theories and ideas revolving around the concept of resilience. Assessing the social and political processes associated with policy making for resilience. Application of the concept of resilience in order to understand and evaluate environments. Evaluate the different approaches toward resilience and develop an understanding of the relationship between sustainability and resilience. Case studies of communities that proactively prepare for, absorb, recover from, and adapt to actual or potential future adverse events.

C R P 551: Introduction to Geographic Information Systems
(2-2) Cr. 3. F.S.SS.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 552: Geographic Data Management and Planning Analysis
(Dual-listed with C R P 452). (2-2) Cr. 3. F.S.
Prereq: C R P 351 or equivalent
Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 553: Analytical Planning/GIS
(2-2) Cr. 3. F.
Prereq: C R P 451/C R P 551
Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques.

C R P 554: Fundamentals of Remote Sensing
(Dual-listed with C R P 454). (Cross-listed with L A). (3-0) Cr. 3. F.
Prereq: CRP 351 or equivalent or permission of the instructor
Introduction to remote sensing techniques needed for basic analysis of satellite images, including: filtering and conflation techniques, stacking, pan sharpening, image rectification, image enhancement, unsupervised and supervised classification. Practical applications in a variety of topics to understand how to interpret images.

C R P 556: GIS Programming and Automation
(Dual-listed with C R P 456). (2-2) Cr. 3. F.
Prereq: CRP 351 or CRP 551 or NREM 345 or NREM 546 or GEOL 552
Introduction to automated geoprocessing in Geographic Information Systems. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests.

C R P 558: Web Mapping/GIS
(Dual-listed with C R P 458). (Cross-listed with L A). (2-2) Cr. 3.
Prereq: CRP 451/551, LA 302. GEOL 452/552 or instructor permission.
Use and development of online mapping tools to support participatory GIS, Volunteered Geographic Information, information sharing, geodesign and decision making actions. Geoprocessing and Web Scripting/coding and user interface design. Laboratory emphasis practical applications and uses of Web GIS.

C R P 560: Social Justice and Planning
(Dual-listed with C R P 460). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Investigation of the topic of social justice as it relates to the challenge of planning more socially just urban societies, emphasizing the importance of social justice issues to planning in a globalized world. Includes a range of issues and case studies of local social justice initiatives, both US and global. Students will complete individual service learning projects as part of the course requirement.

C R P 561: Planning Theory
(3-0) Cr. 3. S.
Use and development of theory/action relationship in planning practice. Competing normative theories of planning and their evolution, key components and fundamental critiques. Exploration of planning frameworks and approaches, including comprehensive planning; incrementalism; advocacy; communicative rationality; and others.
C R P 563: Planning the American Metropolis
(3-0) Cr. 3. F.
Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

C R P 564: Introduction to Analytical Methods for Planning
(3-0) Cr. 3. F.
Applications of analytical methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Introduction to descriptive statistics. Sources of planning information and data including primary and secondary data types and sources. Demographic analysis, population projection techniques for planning at local and regional levels.

C R P 566: Policy Analysis and Planning
(3-0) Cr. 3. F.
Principles and methods for analyzing community problems and policies including forecasting, efficiency and equity measures, cost/benefit, political feasibility, and sensitivity analysis. Examination of social, political, economic, and environmental values and their manifestation in decision making methods used in planning. Application of tools used to analyze planning problems, project evaluation and public policies.

C R P 568: Planning and Development
(3-0) Cr. 3. S.
Prereq: C R P 564 or equivalent
Exploration and evaluation of the techniques, processes, and professional skills required to effectively manage land use change at various scales. Land classification systems; land supply and needs inventory for residential uses and commercial and employment centers; capacity and needs analysis for public infrastructure. Includes land use planning project(s) designed to apply the methods explored in this and other courses.

C R P 575: Grant Writing
(Dual-listed with C R P 475). (1-0) Cr. 1. F.
A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 578: MRED Capstone Project
(Cross-listed with FIN). (3-0) Cr. 3.
Prereq: Enrollment in MRED.
Refinement of students’ problem-solving, communication and negotiation skills. Students work on an actual case. Teams will apply knowledge acquired in the classroom to some aspect of a current development on-the-ground and in-process project.

C R P 579: Public Finance and Planning
(Dual-listed with C R P 479). (3-0) Cr. 3. S.
Effective management of state and local government finance critical to successful community and regional planning. Economic concepts, topics in budgeting, revenue, expenditure, and financing, analytical techniques, economic impact, and case studies. Understanding of economic assessment in planning and understanding of various linkages between planning and public finance.

C R P 584: Sustainable Communities
(Dual-listed with C R P 484). (3-0) Cr. 3. S.
Prereq: Junior classification

C R P 590: Special Topics
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590A: Special Topics: Planning Law, Administration and Implementation
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590B: Special Topics: Economic Development
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590C: Special Topics: Urban Design
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590D: Special Topics: Housing and Urban Revitalization
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590H: Special Topics: Environmental Planning
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590I: Special Topics: Land Use and Transportation Planning
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and written approval of instructor and department chair on required form
Courses for graduate students:

C R P 698: Capstone Studio
(1-6) Cr. 4. S.
Prereq: Permission of instructor.
Synthesis and integration of core planning knowledge into professional work in a team setting.

C R P 699: Research
Cr. arr. Repeatable.

Interdisciplinary Design

The Bachelor of Arts in Interdisciplinary Design is a 122.5-credit non-professional undergraduate degree program that combines design studios and the liberal arts in a four-year curriculum focused on educating students to use design and critical thinking skills to generate ideas, solve complex problems, and be creative and innovative makers. The program provides each student flexibility in exploring across multiple disciplines to learn design methods, theory, and application that drive the design process. The core of the degree program is a series of lectures, seminars, and studios. Students have hands-on experiences grappling with design challenges that vary in complexity and scale. Courses are taught by faculty from multiple design disciplines. Seniors complete a capstone project, called Launchpad, and a portfolio and professional development course in preparation for graduate school or the job market. The program works well with a second major or minor, can be completed on a part-time schedule, and is transfer-friendly. Students with transfer credit should speak to academic advisor about how these credits can apply to degree requirements.

The curriculum developed out of a shared philosophy across the college's disciplines that designers have the capacity to think strategically and creatively about society’s increasing economic, social, and environmental challenges. Innovation and entrepreneurship are encouraged, integrated, and valued. Our graduates pursue a wide range of professional career paths in design practice, digital media, and entrepreneurship. Upon completion, students may enter graduate programs in the design professions or other fields in which design thinking, skills in making, and critical analysis are valued.

Curriculum for Bachelor of Arts in Interdisciplinary design

Total Degree Requirement: 122.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 6 cr. in Design History/Theory/Criticism and 6 cr. in Design Skills credit; 16 technical cr.; 21 P-NP cr. of free electives; 2.00 minimum GPA average; completion of all requirements listed below.
**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications: 13 cr.**

(C or Better in ENGL 150 and ENGL 250)

Courses primarily for undergraduates:

**DES 230: Design Thinking**  
(3-0) Cr. 3. F.S.  
Introduction to the phenomenon of design thinking as it appears in various design fields, including methodologies of reasoning and problem solving; patterns of creativity and individual style; and the interaction of art, science, and technology.

**DES 241: Interdisciplinary Foundation Studio I**  
(0-8) Cr. 4. F.  
**Prereq: Completion of College of Design Core Program.**  
Integration of contemporary strategies, methods, and approaches to design. Move through cycles of ideation, iteration, communication and revision, including the use of non-traditional materials and processes. Emphasis on the specific issues of interdisciplinary design practices and an ethical understanding of the materials of drawing.

**DES 242: Interdisciplinary Foundation Studio II**  
(0-8) Cr. 4. S.  
**Prereq: Completion of College of Design Core Program.**  
Development and practice of mental flexibility in creative processes leading to high-quality design solutions and develop fluency in "bias toward action." Move conceptual works quickly into visible and tangible forms that can be shared, tested, and evaluated based on quality. Multiple studio projects that will move at a fast pace and be iterative.

**DES 250: Design Forum**  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. F.S.SS.  
**Prereq: DSN S 102, DSN S 131, DSN S 183 and credit or concurrent enrollment in DES 230**  
Introduction of themes and issues that are relevant to the design fields through theoretical readings, case studies, and visiting lecturers.

**DES 259: Design Field Study**  
Cr. R. Repeatable.  
**Prereq: Enrollment in or 2 credits of DES 240.**  
Off-campus tours of areas of interest within the design professions such as design offices, museums, buildings, and neighborhoods. Offered on a satisfactory-fail basis only.

**DES 330: Visual Literacy for Design Critique**  
(3-0) Cr. 3. S.  
**Prereq: DSN S 102 or DSN S 183 or 3 credits of ART H or equivalent.**  
Students will learn to interpret, analyze and evaluate visual materials, use images and text effectively to communicate ideas, and understand issues surrounding the creation and use of images and visual media for design critique. Precedent study and critique of sample student design work to understand principles of visual literacy and how to apply them to the presentation of design work. Emphasis on peer-to-peer discussion and in-class participation. Lecture and discussion format.

**DES 333: Time-Based Digital Media**  
(Cross-listed with DSN S). (3-0) Cr. 3. S.  
**Prereq: DSN S 232 or equivalent.**  
Introduction to various time-based digital media tools to develop basic skills including sequencing, storytelling, animation, sound editing, and video production.

**DES 340: Design Studio II**  
(0-8) Cr. 2. Repeatable.  
**Prereq: 4 credits of DES 240 or equivalent.**  
Half-semester course. Studio projects of increasing complexity requiring interdisciplinary approaches to contemporary challenges and opportunities. Continued development of students’ abilities to generate ideas and communicate those ideas visually, orally, and through writing. Field trip.

**DES 491: Portfolio and Professional Preparation**  
(2-4) Cr. 4. F.  
**Prereq: classification as DES major; 4 credits of DES 240**  
Preparation of printed and online portfolio of student work and materials for job search and/or graduate school applications. Guidance for interviewing, professional networking, business etiquette, and resume writing. Workshops and lectures.

**DES 495: Capstone Experience**  
(1-6) Cr. 4. S.  
**Prereq: classification as DES major; 2 credits of DES 340**  
Launchpad to design careers. Comprehensive interdisciplinary design work in three areas: design research, design management, design leadership. Demonstration of design skills and project planning and development.

**Graphic Design**  
http://www.design.iastate.edu/graphicdesign/index.php

**Undergraduate Study**  
The department offers the degree Bachelor of Fine Arts (B.F.A.) in Graphic design.
B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, visual organization and communication media, and interaction design. Graphic design graduates effectively integrate abstract thinking skills such as communication design theory, history, methodology, and technology. Components of visual communication including typography, symbology, time-based media, information design, branding, image creation, and other communication systems are integrated with an understanding of professional practice.

Curriculum in Graphic Design

The Curriculum in Graphic Design leads to a 123.5-credit undergraduate Bachelor of Fine Arts in Graphic Design including the 30-credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

A 30-graduate-credit program is offered leading to the Master of Arts with a specialization in Graphic Design for students planning to undertake a professional degree. (NOTE: Applicants without a degree background in graphic design may be required to complete up to 18 additional credits of coursework).

A 64-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions, see Graduate Study under Graphic Design in the Courses and Programs section.

Total Degree Requirement: 123.5 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits
U.S. Diversity: 3 credits
Communications: 10 credits

| General Education | 3 | |

| 15 | 16 | 3 |

Admission into the BFA in Graphic Design Program is based on departmental resources and will be determined by overall cumulative grade point average following completion of 29.5 credits including DSN S 120, 131, ENGL 150 or 250, and other general education requirements. A portfolio review and essay will also be significant factors.

### Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design, Master of Arts (M.A.) in Graphic Design, and Master of Arts (M.A.) in Graphic Design with a specialization in environmental graphic design.

### M.F.A. in Graphic Design

The Master of Fine Arts in Graphic Design is recognized as the terminal degree in the field and requires a minimum of 64-credits. M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. Students and faculty work collaboratively on a required thesis; integrating theory, creation, research, and design problem solving.

### The M.A. in Graphic Design

This 30-credit degree focuses on preparing students for professional practice. This degree is well suited for individuals whose undergraduate degree is not within graphic design. The degree includes seminar courses in art and design, a studio concentration, a history course, a business practice course, courses outside of graphic design, and the completion of a Creative Component in graphic design.

The degree acquaints students with theory, research and methodology for professional practice and the opportunity to apply these in studio investigations. Through studios focused on design thinking this degree will prepare students to practice in the quickly evolving field of graphic design. This program values cultural and intellectual diversity in its students, whose individual strengths are realized through a balanced and structured curriculum.

### The M.A. in Graphic Design with a specialization in environmental graphic design

This 34-credit degree focuses on preparing student for 3-dimensional visual communication. Credits include a seminar course in art and design, a studio concentration, a history course, courses in design methods, and the completion of a Creative Component in environmental graphic design, an extensive EGD project that synthesizes what they have learned in the program. This program is ideal for students with an undergraduate degree in architecture, interior design, landscape graphic design, or graphic design, that have an interest in expanding their skills. Applicants without a degree or background in environmental graphic design may be required to complete up to 15 additional credits of coursework.

This degree provides a comprehensive exposure to all aspects of the discipline, including wayfinding, exhibit design, interaction, information design, and placemaking. This program offers interdisciplinary opportunities in architecture, interior design, landscape architecture, planning, art and visual culture, and industrial design. Our Institute for Design Research and Outreach coordinates community design projects, which engage students in real world experiences. The M.A. in Art and Design, with specialization in Environmental Graphic Design is the first and only program of its kind in the United States.

### Graphic Design Graduate Program

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space
available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Graphic Design, College of Design, Iowa State University, Ames, IA 50011-3092.

**MFA in Graphic Design Degree Requirement**

**Potential Prerequisites (based on Application materials), 6 cr.**

- ARTGR 587 Graphic Design History/Theory/ Criticism I 3
- ARTGR 588 Graphic Design History/Theory/ Criticism II 3

**Graphic Design Requirements, 27 cr.**

- ARTGR 511 Graduate Graphic Design Studio I 3
- ARTGR 512 Audience and Perception 3
- ARTGR 521 Graphic Design Graduate Studio II 3
- ARTGR 522 Critical Media 3
- ARTGR 530 User Engagement 3
- ARTGR 540 Design for Behavioral Change. 3
- ARTGR 610 Thesis Preparation Studio 3
- ARTGR 620 Graduate Thesis Studio I 3
- ARTGR 630 Graduate Thesis Studio II 3

**Total Credits** 27

**Students may select additional credits from graphic design option studios. Choose from:**

- ARTGR 564 Digital Imaging 3
- ARTGR 572 Photography and Narrative Message 3
- ARTGR 573 Multimedia Design 3
- ARTGR 574 Exhibition Design 3
- ARTGR 575 Advanced Typography 3
- ARTGR 576 Graphic Design Methodology 3
- ARTGR 578 Design for E-Commerce/Graphic Applications 3
- ARTGR 579 Wayfinding Design 3
- ARTGR 584 Selected Studies in Graphic Design 1-3
- ARTGR 591 Publication Design: Magazines 3
- ARTGR 592 Publication Design: Books 3

**Graphic Design Seminar Requirements, 10 cr.**

- ARTGR 520 Design & Cultural Semiotics 3
- ARTGR 531X Graphic Design Thesis Preparation 1

**Total Credits** 10

**Elective Focus Area, 12 cr.**

Outside of graphic design but supports area of research, may be studio (ex. DSN S 546) or other class outside the College of Design: See Graphic Design MFA Suggested Minor Course List

May also include ISU Preparing Future Faculty (PFF): 3-11 cr.

**Art History, Theory, Criticism, 12 cr.**

- ART H 501 Issues in Visual and Material Culture Seminar 3
- Seminar in College of Design such as ARTID 551A 3
- Grad-level Art History or other College of Design History Course (outside ARTGR) 6

**Total Credits** 12

**Thesis, 3-6 cr.**

- ARTGR 699 Research-Thesis 3-6

**Total 64-67 cr. (not including any potential prerequisites)**

Courses primarily for undergraduates:

**ARTGR 270: Graphic Design Studio I**

(0-6) Cr. 3. F.

*Prereq: DSN S 102, DSN S 131 and enrollment in ARTGR 275; admission to the graphic design program through department review*

Basic design concepts and color principles used for visual communication.

**ARTGR 271: Graphic Design Studio II**

(0-6) Cr. 3. S.

*Prereq: ART 230, ARTGR 270, ARTGR 275 and enrollment in ARTGR 276*

Principles of typographic composition, structure and hierarchy. Formal and conceptual principles of symbology.

**ARTGR 272: Digital Photography for Graphic Design**

(0-6) Cr. 3. F.S.

*Prereq: Concurrent enrollment in ARTGR 270 OR ARTGR 271*

This course will address the development of “seeing” as a medium design, expression, and visual communication including compositional dynamics, advanced digital image manipulation, software usage and support, digital camera operations along with scanning and other digital input devices, color management, digital format for presentation and printing with digital ready formats.
ARTGR 273: Typography I
(0-6) Cr. 3. F.
Prereq: Concurrent enrollment in ARTGR 270
Emphasizes foundational typographic principles from letterform construction to hierarchies of extended text, directed toward typographic vocabulary, and typographic organization. Students will also understand both classical and contemporary typographic forms, as well as having the ability to construct typographic compositions and systems.

ARTGR 274: Typography II
(0-6) Cr. 3. S.
Prereq: Concurrent enrollment in ARTGR 271
Advances the skills and principles learned in Graphic Design Typography I. Exploration of more complex problems that address typographic hierarchy, context, sequence and typography and image.

ARTGR 275: Graphic Technology I
(0-4) Cr. 2. F.
Prereq: concurrent enrollment in ARTGR 270
Basic 2-dimensional computer skills for graphic design.

ARTGR 276: Graphic Technology II
(0-4) Cr. 2. S.
Prereq: ARTGR 275 and concurrent enrollment in ARTGR 271
Basic 3-dimensional computer skills for graphic design.

ARTGR 281: Visual Communication and Branding
(3-0) Cr. 3. F.
Introduction to basic principles of visual communication that contribute to the successful comprehension of intended visual messages; these include promotional messages, such as corporate branding and marketing campaigns, as well as informational messages, such as those used in computer interface design or in the clear presentation of diagrammatic data. Emphasis is placed on sensitivity to the diversity of the intended American or global audience, and to the cross-cultural differences that may affect the ways that visual messages are interpreted. Methods for creating brand experiences are explored as they apply to both small and large enterprises, ranging from personal brand to corporate brand identities.

ARTGR 370: Graphic Design Studio III
(0-6) Cr. 3. F.
Prereq: ARTGR 271, ARTGR 276, and credit or concurrent enrollment in ARTGR 387
Creation and design of images and symbols for communication. Application and integration of typography with images and symbols.

ARTGR 371: Graphic Design Studio IV
(0-6) Cr. 3. S.
Prereq: ARTGR 370 and ARTGR 387
Development and preparation of design concepts for application to the printing and electronic publishing process. Creative problem-solving skills, introduction to systems design.

ARTGR 372: Graphic Design Materials and Processes
(3-0) Cr. 3. S.
Prereq: Credit or concurrent enrollment in ARTGR 371
Lecture about the processes and materials involved in graphic design arts reproduction. Course covers pre-press, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

ARTGR 377: Graphic Design Internship Seminar
(1-0) Cr. 1. S.
Prereq: Credit or concurrent enrollment in ARTGR 370 or ARTGR 371
Procedural and ethical concerns related to the graphic design internship. Personal goals, preparation of resume and plans for internship. Study and tours of areas of interest within the graphic design profession.

ARTGR 378: Critical Issues in Graphic Design
(2-0) Cr. 2.
Prereq: Credit or concurrent enrollment in ARTGR 370
Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ARTGR 387: Graphic Design History/Theory/ Criticism I
(Dual-listed with ARTGR 587). (3-0) Cr. 3. F.
Late nineteenth century to the 1990s. This course will explore the cultural, social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics.
Meets International Perspectives Requirement.

ARTGR 388: Graphic Design History/Theory/ Criticism II
(Dual-listed with ARTGR 588). (3-0) Cr. 3. S.
Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice.
Meets U.S. Diversity Requirement.
ARTGR 391: Graphic Design Field Study
(0-1) Cr. 1. Repeatable, maximum of 2 credits.
Prereq: Concurrent enrollment in 300 or 400 level graphic design studio course
Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Offered on a satisfactory-fail basis only.

ARTGR 463: 3D Motion Graphics
(Dual-listed with ARTGR 563). (0-6) Cr. 3. S.
Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470
3D visualization in a Motion Graphics context. Emphasis on design in 3D computer animation as it relates to various electronic media.

ARTGR 464: Digital Imaging
(Dual-listed with ARTGR 564). (0-6) Cr. 3. F.
Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371 or ARTGR 470
Studio in experimental techniques using the digital drawing tablet combined with manual drawing mediums, exploring the digital tablet, scanner, and camera as ways to collect and make images, conceptual and compositional development of digital techniques and software, and connecting digital techniques to visual processes and ideation. Students will have a better understanding of different ways of working digitally while exploring image-making processes.

ARTGR 470: Graphic Design Studio V
(0-6) Cr. 3. F.
Prereq: ARTGR 371
Advanced design systems as applied to corporate identity and environmental graphic design. Symbology as an integrated component of communication systems.

ARTGR 471: Graphic Design Capstone
(0-6) Cr. 3. S.
Prereq: ARTGR 470 or permission of instructor
Experience design and innovation in a multi-disciplinary design studio. Class will use unique research, design, evaluation, creativity, and innovation methodologies to solve human problems on special topics. Designed solutions will be in the form of products, artifacts, interfaces, information, and human environments.

ARTGR 472: Photography and Narrative Message
(Dual-listed with ARTGR 572). (0-6) Cr. 3.
Prereq: Enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 471
Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph's intended message.

ARTGR 473: Multimedia Design
(Dual-listed with ARTGR 573). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design
The design of visual, aural and textual communication for electronic media.

ARTGR 474: Exhibition Design
(Dual-listed with ARTGR 574). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design
Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 475: Advanced Typography
(Dual-listed with ARTGR 575). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate classification in College of Design
Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 476: Graphic Design Methodology
(Dual-listed with ARTGR 576). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371 or ARTGR 470 Graduate: graduate enrollment in College of Design
Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 477: Graphic Design Practicum
(0-6) Cr. 3.
Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470
Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ARTGR 478: Design for E-Commerce/Graphic Applications
(Dual-listed with ARTGR 578). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: Graduate enrollment in College of Design
The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.
ARTGR 479: Wayfinding Design  
(Dual-listed with ARTGR 579). (0-6) Cr. 3.  
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470. Graduate: Graduate enrollment in College of Design  
Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 480: Graphic Design Internship  
(3-0) Cr. 3. SS.  
Prereq: ARTGR 377, 12 credits in graphic design; permission of instructor, registration in advance of enrollment  
Graphic design experience in an off-campus professional environment.

ARTGR 481: Graphic Design Professional Practices  
(3-0) Cr. 3. S.  
Prereq: Credit or concurrent enrollment in ARTGR 470  
Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.

ARTGR 482: Professional Presentation  
(0-4) Cr. 2. S.  
Prereq: ARTGR 470 and concurrent enrollment in ARTGR 471  
Exploration and development of the graphic design portfolio and resume in electronic, print, and photographic form.

ARTGR 484: Selected Studies in Graphic Design  
(Dual-listed with ARTGR 584). Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.  
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470. Graduate: graduate enrollment in College of Design.  
Special issues related to graphic design. Topics vary each time offered.

ARTGR 490: Independent Study  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490A: Independent Study: Theory, Criticism, and Methodology  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490B: Independent Study: Two-Dimensional Design  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490C: Independent Study: Three-Dimensional Design  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490H: Independent Study: Honors  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490I: Internship/Cooperative (in-depth experience other than ArtGr 480)  
Cr. 1-6. Repeatable.  
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 491: Publication Design: Magazines  
(Dual-listed with ARTGR 591). (0-6) Cr. 3.  
Prereq: Graduate enrollment in College of Design  
The philosophy, concepts and structures of magazine design.

ARTGR 492: Publication Design: Books  
(Dual-listed with ARTGR 592). (0-6) Cr. 3.  
Prereq: Graduate enrollment in College of Design  
The philosophy, concepts and structures of book design.

ARTGR 493: Workshop  
Cr. 1-3. Repeatable.  
Prereq: Evidence of satisfactory experience in area of specialization  
Intensive 2 to 4 week studio exploration. Topics vary each time offered.
ARTGR 494: Graphic Design in Europe Seminar
(1-0) Cr. 1.
Prereq: Permission of instructor and planned enrollment in ARTGR 495.
Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only.

ARTGR 495: Graphic Design Abroad
(Dual-listed with ARTGR 595). Cr. 3. SS.
Prereq: Permission of instructor
International study abroad program with visits to design studios, art museums, and educational facilities.

ARTGR 496: Graphic Design Field Study
Cr. R. Repeatable.
Prereq: Concurrent enrollment in a graphic design studio and permission of instructor.
Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Offered on a satisfactory-fail basis only.

ARTGR 497: Graphic Design Field Study
(0-1) Cr. 1. Repeatable. F.S.SS.
Prereq: Acceptance to the undergraduate or graduate programs in graphic design.
Introduction to places related to graphic design in urban environments such as museums and design studios. Culture and context of design in the urban environment. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

ARTGR 510: Graphic Design Theory
(3-0) Cr. 3. F.
Prereq: Graduate classification in College of Design or permission of instructor.
This course will investigate graphic design as a tool to represent and create imageability in the mind of the audience, through relevant readings in graphic design theory and principles of visual organization in various media.

ARTGR 511: Graduate Graphic Design Studio I
(0-6) Cr. 3. F.
Prereq: Graduate classification in College of Design or permission of instructor.
Theory and investigation of systems, structures, principles of visual organization for communication through the experimental application of traditional and non-traditional media. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ARTGR 512: Audience and Perception
(0-6) Cr. 3. F.
Prereq: Graduate classification in College of Design or permission of instructor.
Theory and investigation of systems, structures, principles of visual organization for communication through the experimental application of traditional and non-traditional media. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ARTGR 520: Design & Cultural Semiotics
(3-0) Cr. 3. S.
Prereq: Graduate classification in College of Design or permission of instructor.
Introduction to semiotics as it relates to art, design and culture. Historical and contemporary vantage points and the importance of designers as makers of meaning. Key concepts of semiotics and the interrelationship between message, meaning, design and culture.

ARTGR 521: Graphic Design Graduate Studio II
(0-6) Cr. 3. S.
Prereq: Enrollment in the Graphic Design Graduate Program.
In this advanced graduate graphic design studio led by a variety of faculty, students will be introduced to a range of research topics, methods and ideas that are predicated on learning through the process of creation.

ARTGR 522: Critical Media
(0-6) Cr. 3. S.
Prereq: Enrollment in the Graphic Design Graduate Program.
Advanced theory and investigation of critical media and application of principles of visual organization for communication. Through hypothetical design work with critical media tools, studio problems will examine and be informed by social, cultural, environmental, or technological factors.

ARTGR 530: User Engagement
(0-6) Cr. 3.
Prereq: Graduate enrollment in the Graphic Design Program or graduate enrollment in College of Design or permission of instructor.
The exploration and design of interface/interaction with products, systems, and technologies.

ARTGR 540: Design for Behavioral Change.
(0-6) Cr. 3.
Prereq: Graduate enrollment in the Graphic Design Program or graduate enrollment in College of Design or permission of instructor.
The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.
ARTGR 563: 3D Motion Graphics
(Dual-listed with ARTGR 463). (0-6) Cr. 3. S.
Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470.
3D visualization in a Motion Graphics context. Emphasis on design in 3D computer animation as it relates to various electronic media.

ARTGR 564: Digital Imaging
(Dual-listed with ARTGR 464). (0-6) Cr. 3. F.
Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470.
Studio in experimental techniques using the digital drawing tablet combined with manual drawing mediums, exploring the digital tablet, scanner, and camera as ways to collect and make images, conceptual and compositional development of digital techniques and software, and connecting digital techniques to visual processes and ideation. Students will have a better understanding of different ways of working digitally while exploring image-making processes.

ARTGR 570: Advanced Studies in Visual Communication
(0-6) Cr. 3. F.
Prereq: Graduate classification in College of Design.
Theory and investigation of systems, structures, principles of visual organization, and typography for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ARTGR 571: Signs, Symbols, Images
(0-6) Cr. 3. S.
Prereq: Graduate Classification in College of Design.
Investigation and application of signs, symbols and semiotic theory for communication. Studio problems influenced by social, cultural, environmental, or technological factors.

ARTGR 572: Photography and Narrative Message
(Dual-listed with ARTGR 472). (0-6) Cr. 3.
Prereq: Enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 471.
Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph's intended message.

ARTGR 573: Multimedia Design
(Dual-listed with ARTGR 473). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design.
The design of visual, aural and textual communication for electronic media.

ARTGR 574: Exhibition Design
(Dual-listed with ARTGR 474). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design.
Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 575: Advanced Typography
(Dual-listed with ARTGR 475). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate classification in College of Design.
Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 576: Graphic Design Methodology
(Dual-listed with ARTGR 476). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design.
Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 578: Design for E-Commerce/Graphic Applications
(Dual-listed with ARTGR 478). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design.
The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ARTGR 579: Wayfinding Design
(Dual-listed with ARTGR 479). (0-6) Cr. 3.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design.
Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 584: Selected Studies in Graphic Design
(Dual-listed with ARTGR 484). Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.S.
Prereq: Undergraduate: Concurrent enrollment in ARTGR 370, ARTGR 371, or ARTGR 470 Graduate: graduate enrollment in College of Design.
Special issues related to graphic design. Topics vary each time offered.
ARTGR 587: Graphic Design History/Theory/ Criticism I
(Dual-listed with ARTGR 387). (3-0) Cr. 3. F.
Late nineteenth century to the 1990s. This course will explore the
cultural, social, political, industrial, and technological forces that have
influenced the practice of graphic design in Britain, Europe, and the
United States. Students will study the historical issues and problems
facing designers, their clients, and their publics.
Meets International Perspectives Requirement.

ARTGR 588: Graphic Design History/Theory/ Criticism II
(Dual-listed with ARTGR 388). (3-0) Cr. 3. S.
Critical issues that affect the contemporary practice of graphic design
as it relates to the United States. Students will study a variety of issues
that include, but are not exclusive to, new media, gender, class, design
and the public sphere, design as social action, postmodern design theory,
sustainability, and ethical practice.
Meets U.S. Diversity Requirement

ARTGR 589: Design and Ethics
(Cross-listed with HCI). (3-0) Cr. 3. S.
Prereq: Graduate classification or permission of instructor.
Issues in ethics and decision-making as they relate to technology, design,
design research, HCI, and the design industry.

ARTGR 590: Special Topics
Cr. arr.
Prereq: Bachelor's degree in graphic design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.

ARTGR 590A: Special Topics: Theory, Criticism, and Methodology
Cr. arr.
Prereq: Bachelor's degree in graphic design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.

ARTGR 590B: Special Topics: Two-Dimensional Design
Cr. arr.
Prereq: Bachelor's degree in graphic design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.

ARTGR 590C: Special Topics: Three-Dimensional Design
Cr. arr.
Prereq: Bachelor's degree in graphic design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.

ARTGR 591: Publication Design: Magazines
(Dual-listed with ARTGR 491). (0-6) Cr. 3.
Prereq: Graduate enrollment in College of Design
The philosophy, concepts and structures of magazine design.

ARTGR 592: Publication Design: Books
(Dual-listed with ARTGR 492). (0-6) Cr. 3.
Prereq: Graduate enrollment in College of Design
The philosophy, concepts and structures of book design.

ARTGR 593: Workshop
Cr. 1-3. Repeatable.
Prereq: Graduate classification; evidence of satisfactory experience in area of
specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTGR 595: Graphic Design Abroad
(Dual-listed with ARTGR 495). Cr. 3. SS.
Prereq: Permission of instructor
International study abroad program with visits to design studios, art
museums, and educational facilities.

ARTGR 599: Creative Component
Cr. arr. Repeatable.

Courses for graduate students:

ARTGR 610: Thesis Preparation Studio
(0-6) Cr. 3. S.
Prereq: ARTGR 531, Graduate enrollment in the College of Design.
Initial development and exploration of graduate thesis topic, investigation
of design research and creative scholarship. Determine Faculty
Committee and Program of Study and file forms with Graduate College.

ARTGR 611: Teaching in Higher Education and Design Practice
(3-0) Cr. 3.
Prereq: Graduate classification
Introduction to teaching methods, curriculum design, project
development, and business strategies for Design Education and
Professional Practice.
ARTGR 620: Graduate Thesis Studio I
(0-6) Cr. 3. F.
Prereq: ArtGr 610.
Advanced creative scholarship in specialized area of focus within graphic design. Culminates in a development plan, preliminary design work, and supporting documentation.

ARTGR 630: Graduate Thesis Studio II
(0-6) Cr. 3. S.
Prereq: ArtGr 620
Advanced research component in specialized area of focus within graphic design. Advances a development plan, preliminary design work, and supporting documentation.

ARTGR 672: Graphic Design and Human Interaction
(0-6) Cr. 3. F.S.
Prereq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor
The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

ARTGR 672C: Consumer Experience Design and Branding.
(0-6) Cr. 3.
Prereq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor
The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

ARTGR 690: Advanced Topics
Cr. arr. Repeatable.

ARTGR 698: Current Issues in Graphic Design
Cr. 1-3. Repeatable, maximum of 9 credits.
Prereq: Graduate enrollment in College of Design or permission of instructor
Selected issues in contemporary graphic design. Topics and readings vary each time offered.

ARTGR 699: Research-Thesis
Cr. arr. Repeatable.

Industrial Design
http://www.design.iastate.edu/industrialdesign/index.php

BID Bachelor of Industrial Design
Students in this program take a carefully defined sequence of courses developed to give them exposure and practice in the areas of theory and skill required by industrial design. These include drawing, form development, history, creative thinking, engineering principles, research, design methodology, human factors, computer-aided design, manufacturing, and commercial factors. In their third year, students will select electives from concentration tracks arranged around specialty areas and current issues in the profession. The upper-level studio classes are reserved for study abroad, internships, and sponsored projects with students from other departments and colleges.

Curriculum in Industrial Design
The curriculum in Industrial Design leads to a 132.5-credit undergraduate Bachelor of Industrial Design including the 30.5-credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

A 45-graduate-credit post-professional graduate program is also offered leading to the degree Master of Industrial Design. (NOTE: Applicants without a degree or background in industrial design may be required to complete up to 18 additional credits of coursework.)

Total Degree Requirements: 132.5 credits
Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits
U.S. Diversity: 3 credits
Communications: 10 credits

**Graduate Study**

**The Master of Industrial Design (M.I.D.)**

Innovation requires breaking boundaries and making connections between diverse disciplines. As a creative profession, industrial design deals with the design of innovative, sustainable and durable solutions for people, nonhumans, economy and society which may take many forms from tangible artifacts to expansive system designs. The Master of Industrial Design (M.I.D.) program at Iowa State University specifically emphasizes strategy and innovation with a strong focus on empathetic human-centered design research. It is centralized on the creation and application of new knowledge through in-depth investigations culminating in a written thesis. At the same time, students expand their design practice skills using innovative methodologies, collaboratively throughout the entire design process. Students explore, generate, transfer and implement multidisciplinary information and technologies into foundational knowledge for the discipline of industrial design.

**The M.I.D. is traditionally recognized as a terminal degree in industrial design.** The graduate program is designed to offer significant mix of skills and experiences, including faculty-directed research programs, internships, international travel, industry-sponsored coursework and design teaching experience. The graduate research focuses on three main areas: 1) Innovation through Design, 2) Design as Strategy, and 3) Human-Centered Design. These areas are defined by the existing faculty members’ research and creative activities, and focus on developing a new type of industrial designer mastering in any one of these specializations. Program faculty have extensive expertise in design thinking, human-centered research methods, cultural issues, product realization, design management, eco-design, social responsibility, and entrepreneurship.

The M.I.D. is a 63-credit study, distributed across three consecutive years. Applicants are required to have design and/or engineering degrees from accredited institutions or relevant industry experience.

**M.I.D. Program Philosophy**

The goal of the Industrial Design graduate program is to create an agile program that addresses current and emerging issues in design strategy, innovation and human-centered design. Its position, in one of the most comprehensive design colleges in the country, facilitates the integration of methodologies and skillsets from multiple disciplines. Additionally, ties to the nationally ranked College of Engineering, the College of Business and industry collaborators create some truly unique degree specializations. Students are able to explore advanced concepts in such areas as extended manufacturer responsibility, supply chain and logistics, international vendor relations, advanced materials and biopolymers, and alternative business models.

Summer: Study Abroad/Internship/Research Assistantship (optional)

Courses primarily for undergraduates:

**IND D 201: Industrial Design Studio I**  
(0-12) Cr. 6. F.  
*Prereq: Admission to the industrial design program, enrollment in IND D 231.*
Product scale form development and visual communication.

**IND D 202: Industrial Design Studio II**  
(0-12) Cr. 6. S.  
*Prereq: IND D 201*
Through a progressive series of structured exercises and projects, IND D 202 covers basic modeling principles and three dimensional form development required for industrial design activity. These activities include explorative studies in: assembly, disassembly, process efficiency, structures, materials identification, hand fabrication, and testing. Students will work in a variety of media including: paper, foam core, polystyrene, and wood.

**IND D 231: Introduction to Industrial Design**  
(3-0) Cr. 3. F.  
*Prereq: DSN S 102 and DSN S 131; enrollment in 201; admission to the industrial design program through department review or permission of instructor.*
The history, definition, scope, and basic principles of industrial design. Overview of technical, artistic, and sociological context of the profession.

**IND D 232: Creative Thinking for Industrial Design**  
(3-0) Cr. 3. S.  
*Prereq: IND D 231*
Exploration of strategies, methods, and processes associated with creative thinking skills and problem solving. Discussion of the nature of creativity and its implications in different contexts that cross content boundaries.

**IND D 251: Activity-Centered Industrial Design**  
(3-0) Cr. 3.  
*Prereq: Admitted to Industrial Design Program and by permission of the instructor*
Introduction to design for complex and dynamic situations that include people, products, activities and environments. Emphasizes the relationship between internal and external factors that impact pleasure and performance in these systems. Includes an overview of human diversity and examines the role of the industrial designer in developing the artifacts of daily activity.  
Meets U.S. Diversity Requirement

**IND D 260: Engineering: Getting from Thought to Thing**  
(Cross-listed with ENGR). (3-0) Cr. 3. F.S.
What is engineering, technology and their roles in society? Investigation of engineering methods through case studies of everyday objects. Explore questions about the impact of technology in society. Apply engineering methods to design and failure analysis.

**IND D 270: Survey of How Things Work**  
(Cross-listed with ENGR). (3-0) Cr. 3. F.S.
Removing mysteries surrounding science and technology. Identify key concepts from applied science and technology to obtain better understanding on how things work. Review and explain the principles behind the technologies which define our modern way of life. A survey of broad range of technology could include: cell phones, GPS, radio, television, computers, ultrasound, microwave ovens, automobile, bioengineering and other industrial and consumer technologies. Common day technology examples illustrating scientific knowledge and applications.

**IND D 301: Industrial Design Studio III**  
(0-12) Cr. 6. F.  
*Prereq: IND D 201*
Systematic design methodology and integration of creative thinking techniques.

**IND D 302: Industrial Design Studio IV**  
(0-12) Cr. 6. F.S.  
*Prereq: IND D 301 or permission of instructor*
Exploration of commercial factors in industrial design. Meets Industrial Design Experiential Learning Requirements.

**IND D 332: Design Research Methods**  
(3-0) Cr. 3. F.  
*Prereq: IND D 231 or permission of instructor.*
Survey of qualitative and quantitative methods with an emphasis on contextual user-centered research. Integration of user data collection, visualization, and synthesis as a source for design. Experience of a small-scale research practice related to industrial design.
IND D 334: Materials and Processes for Industrial Design
(3-0) Cr. 3. S.
Prereq: IND D 201 and IND D 231.
Introduction to materials and manufacturing methods for mass production and distribution of products.

IND D 341: Computer Aided Industrial Design I
(0-6) Cr. 3. F.S.
Prereq: IND D 301
Emphasis on the computer as an industrial design and visualization tool.

IND D 351: Applied Human Factors Lab
(0-1) Cr. 1. F.
Prereq: IND D 231 and enrollment in ARTID 251
Theory and application of human factors issues in the industrial design field, specifically their impact on the relationship of the user, the product, and the product systems.

IND D 387: History of Industrial Design I
(3-0) Cr. 3. F.
Prereq: 30 credits earned at ISU
Introduction to contemporary and historic factors influencing industrial design craft and practice. Discussion of social, political, cultural and technological context for industrial design.
Meets U.S. Diversity Requirement

IND D 388: History and Culture of Industrial Design II
(3-0) Cr. 3. S.
Prereq: 30 credits earned at ISU.
Critical examination of meanings of objects from the perspectives of history, design, material culture, philosophy and cultural studies. Discussion of social, political, cultural and technological context for industrial design.

IND D 397: Industrial Design Internship
(0-12) Cr. 6. F.S.SS.
Prereq: IND D 202, 18 credits in industrial design, permission of instructor.
Professional industrial design, off-campus experience. Meets Industrial Design Experiential Learning Requirements.

IND D 401: Industrial Design Studio
(0-12) Cr. 6. F.S.
Prereq: IND D 301 or permission of instructor
Advanced topics focused on industrial design applications. Topics vary each time offered. Meets Industrial Design Experiential Learning Requirements.

IND D 490: Special Topics
Cr. arr. Repeatable. F.S.SS.
Prereq: Completion of industrial design studio or permission of instructor.
Advanced topics focused on industrial design applications. Topics vary each time offered. A. Theory, Criticism, Methodology B. Experimental Techniques C. Three Dimensional Design D. Distributed Collaboration.

IND D 490A: Special Topics: Theory, Criticism, Methodology
Cr. arr. Repeatable. F.S.SS.
Prereq: Completion of industrial design studio or permission of instructor.
Advanced topics focused on industrial design applications. Topics vary each time offered.

IND D 490B: Special Topics: Experimental Techniques
Cr. arr. Repeatable. F.S.SS.
Prereq: Completion of industrial design studio or permission of instructor.
Advanced topics focused on industrial design applications. Topics vary each time offered.

IND D 490C: Special Topics: Three-Dimensional Design
Cr. arr. Repeatable. F.S.SS.
Prereq: Completion of industrial design studio or permission of instructor.
Advanced topics focused on industrial design applications. Topics vary each time offered.

IND D 490D: Special Topics: Distributed Collaboration
Cr. arr. Repeatable. F.S.SS.
Prereq: Completion of industrial design studio or permission of instructor.
Advanced topics focused on industrial design applications. Topics vary each time offered.

IND D 495: Study Abroad Option
(0-12) Cr. 6. F.S.SS.
Prereq: IND D 202 and permission of instructor
International study abroad program. Visits to design studios, showrooms, museums and manufacturing facilities. Meets Industrial Design Experiential Learning Requirements.

IND D 499: Senior Project
(0-12) Cr. 6. S.
Prereq: IND D 495 or IND D 507 and senior standing
Advanced practice in specialized area of industrial design. Topics vary.
Courses primarily for graduate students, open to qualified undergraduates:
IND D 501: Industrial Design Studio Intensive I
(0-12) Cr. 6. F.
Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program.
Basic concepts and techniques for industrial design. Emphasis on form development, structure, function and communication.

IND D 502: Industrial Design Studio Intensive II
(0-12) Cr. 6. S.
Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program.
Advanced concepts and techniques for industrial design. Emphasis on systematic design methodology and commercial factors, and visual and verbal communication of design problems and solutions.

IND D 503: Industrial Design Studio I
(0-12) Cr. 6. F.
Prereq: Admission to the industrial design graduate program or completion of Graduate Intensive Track.
Advanced, project-based application of industrial design concepts and techniques.

IND D 504: Industrial Design Studio II
(0-12) Cr. 6. S.
Prereq: IND D 502.
Advanced, project based application of industrial design concepts and techniques, with an emphasis on service and system design, and its implications for the community.

IND D 507: Industrial Design Practicum
(0-12) Cr. 6. F.S.
Prereq: Evidence of satisfactory experience in area of specialization; admitted by application and written permission of instructor only.
Studio project focused on topics generated with external partners. Topics vary. Meets Industrial Design Experiential Learning Requirements.

IND D 511: Colloquium
(1-0) Cr. 1. Repeatable. F.S.
Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program.
Presentation and discussion of creative activity carried out in various design disciplines and their relationship to industrial design. Seminar sessions focusing on exemplary pieces of design research undertaken by faculty and graduate students in the design field.

IND D 532: Design Thinking
(3-0) Cr. 3. F.S.
Prereq: Senior or graduate standing in any ISU program, or permission of the instructor.
Exploration of design thinking process, toolkits, and mindsets as creative problem solving approaches for systems, products, and processes, across diverse contexts. Strategies for problem-solution co-evolution process, with a focus on collaborative and interdisciplinary design to investigate real-world problems and opportunities.

IND D 534: Product Realization for Industrial Design
(3-0) Cr. 3. S.
Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program.
Introduction to materials and manufacturing methods for products. Exploration of emerging materials and new applications.

IND D 540: Visual Communication for Industrial Design
(0-6) Cr. 3. F.S.
Prereq: Advanced standing in any ISU program
Exploration of multiple visual communication techniques primarily used in industrial design with a focus on visually breaking down complex information.

IND D 541: Computer Aided Industrial Design
(0-6) Cr. 3. F.S.
Prereq: Completion of industrial design studio or permission of instructor.
Exploration of the computer as an industrial design and visualization tool. Advanced concepts in computer to machine interface for manufacture.

IND D 543: Portfolio and Professional Practice
(1-4) Cr. 3. F.S.
Prereq: Advanced standing in the industrial design program.
Discussion of industrial design practice and career planning. Development and preparation of personal promotional materials for a range of media.

IND D 551: Human Factors
(3-0) Cr. 3. S.
Prereq: IND D 532
Human factors issues and the study of relationships between the user, the product, and the human body and its physical functions. Investigations of bio-mechanics, anthropometry, instrumental displays and control, and their measurement as they relate to the design process.
## IND D 590: Special Topics
(1-4) Cr. 3. Repeatable. F.S.S.
Prereq: Completion of industrial design studio or permission of instructor.
Advanced topics focused on industrial design applications. Topics include theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration. Meets Industrial Design Experiential Learning Requirements.

## IND D 592: Special Projects
Cr. arr. Repeatable. F.S.S.
Prereq: Completion of industrial design studio or permission of instructor.
Planned projects in topics related to theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration.

## IND D 593: Experiential Learning Special Projects
Cr. arr. Repeatable. F.S.S.
Prereq: Completion of industrial design studio or permission of instructor.
Project based topics related to theory, criticism, methodology, experimental learning, three dimensional design, distributed collaboration that supports experiential learning.

## IND D 595: Study Abroad Option
(0-12) Cr. 6. Repeatable. F.S.S.
Prereq: Completion of industrial design studio or permission of instructor.
International study abroad program. Visits to design studios, showrooms, museums and manufacturing facilities. Meets Industrial Design Experiential Learning Requirements.

## IND D 597: Internship
(0-12) Cr. 6. Repeatable. F.S.S.
Prereq: Completion of Industrial Design studio or permission of instructor.
Professional industrial design, off-campus experience. Meets Industrial Design Experiential Learning Requirements.

Courses for graduate students:

## IND D 601: Graduate Project I
(0-12) Cr. 6. F.
Prereq: IND D 632
Advanced creative component in specialized area of focus within industrial design. Culminates in a development plan and supporting documentary.

## IND D 602: Graduate Project II
(0-12) Cr. 6. S.
Prereq: IND D 601
Advanced creative component in specialized area of focus within industrial design. Culminates in a physical or digital artifact and supporting documentation.

## IND D 631: Design Research Methods
(3-0) Cr. 3. F.
Prereq: Senior or graduate standing in any ISU program, or permission of the instructor
User-centered research methods to examine the impact of design on humans, environments, and social contexts. Examination and critique of current research methods employed in industrial design, service design and user experience (UX) design.

## IND D 632: Thesis Preparation
(3-0) Cr. 3. S.
Prereq: IND D 631
Exploration and formulation of graduate thesis or project topics, with proposed studies and investigations. Introduction to structuring a design research prospectus and university requirements for graduation. Determine Faculty Committee and Program of Study and file forms with Graduate College.

## IND D 699: Thesis
(0-12) Cr. 6. Repeatable. F.S.S.
Prereq: IND D 632
Advanced research component in specialized area of focus within industrial design. Culminates in a thesis document.

### Integrated Studio Arts

The Department of Art and Visual Culture offers degree programs focused on visual art and visual culture and offers courses in art history, studio arts, and art education. Degree offerings include the Bachelor of Arts in Art and Design, Bachelor of Fine Arts in Integrated Studio Arts, and Master of Fine Arts in Integrated Visual Arts.

### Undergraduate Study

#### BFA Integrated Studio Arts

Students select from studio options including ceramics, digital media, drawing, furniture design, illustration, jewelry and metalsmithing, scientific illustration, two- and three-dimensional mixed media, painting, photography, printmaking, textiles, and new genres. Over the four-year course of study students will develop a portfolio and prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem-solving, critical thinking, and skill development, drawing on contemporary developments, historical and cultural theory, and studio practice.

Transfer students with studio credits from other colleges and universities must present a portfolio of work created in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior
to registration for classes. Arrangements for this process must be made with the department’s professional advisers.

**Undergraduate Curriculum**

The Curriculum in Integrated Studio Arts leads to a 126.5-credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts. Admission into the program requires the completion of at least 30.0 credits, including the following courses: DSN S 102, DSN S 110 or 115, DSN S 131, and DSN S 183; 6 credits of Social Sciences/Humanities; 6 credits of Math/Science; ENGL 150 (or test-out credit); LIB 160. Review of the student's portfolio and essay will also be significant factors.

Admission into the professional program is subject to the approval of a faculty committee following the completion of the College of Design Core Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

**Total Degree Requirement: 126.5 cr.**

Only 65 credits from a two-year institution can apply, and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

**International Perspective: 3 credits**

**U.S. Diversity: 3 credits**

**Communication: 10 credits**

(C or better grade ENGL 150 and ENGL 250)

Post-Baccalaureate Undergraduate Certificate

Iowa State's Post-Baccalaureate Undergraduate Certificate program in Integrated Studio Arts (ISA) prepares students for either graduate study or career advancements by providing a focused environment for advancing aesthetic, technical, creative, and conceptual skills. While a bachelor's degree in visual arts is not required, a strong portfolio of artwork and a written statement of purpose are required for admission. Download application requirements at (https://www.design.iastate.edu/wp-content/uploads/2019/01/Postbaccalaureate_ISA_2019-20.pdf) (PDF) or view online at (https://www.design.iastate.edu/art-and-visual-culture/degrees/post-baccalaureate-undergraduate-certificate).

Curriculum

Post-baccalaureate students will work with a faculty adviser to create a tailored 25-credit program of study including:

- 15 credits of 300/400-level Integrated Studio courses
- Six (6) credits of 300/400-level art history courses
- Three-credit elective selected from a list of options
- ARTIS 491: One-credit capstone exhibition course

For the capstone experience, you will be expected to produce an artist's statement and a written assessment of your learning that will be reviewed, along with your art, by the arts faculty.

This 25-credit certificate program must be completed in two (2) years. Students interested in developing a body of work for admission to graduate school or for professional practice will be ideal candidates.

Application Requirements

To apply for this program, please submit the following materials.

1. Digital portfolio in PowerPoint format:
   - Twenty (20) images of recent work with no more than four (4) of the 20 images being details
   - Descriptions on each PPT image slide need to include title, date, size and medium
2. One-page statement of intent
3. Current resume
4. Name and contact information of three (3) references

Application Deadlines

Contact the College of Design for application deadlines.

Admission into the BFA in Integrated Studio Arts requires the completion of 30.0 credits including the following courses DSN S 102, DSN S 131, DSN S 183, DSN S 110 or 115, 6 credits in Social Science/Humanities, 6 credits Math/Science, ENGL 150, LIB 160. A portfolio review and essay will also be significant factors.

### Graduate Study

The department offers the Master of Fine Arts (MFA) in Integrated Visual Arts. The MFA curriculum in Integrated Visual Arts requires a minimum of 60 credits. The program of study includes seminar classes, a studio concentration, history and criticism courses, elective courses outside the department or area of study, and the completion of a thesis exhibition and written thesis statement.

MFA graduates in Integrated Visual Arts link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio practice, business, higher education, or new interdisciplinary fields. The MFA is recognized as the terminal degree. A required thesis exhibition is composed of two parts: a substantial exhibition; and a written thesis statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A written thesis with no exhibition component may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

### Studio Courses: 39 credits

### Seminar Courses: 6 credits

(Students take 2 sections of ARTIS 571, or 1 section of ARTIS 571 and ARTIS 511)

| Graduate Seminar ARTIS 571 | 3 |

### Related Courses (outside of IVA program): 3 credits

Total: 60 Credits

#### Courses primarily for undergraduates:

**ARTIS 201: Creative Visual Thinking**

(0-6) Cr. 3. F.S.

Exploration of the nature of visual perception in relation to issues of visual communication, problem solving, envisioning information, and visual thinking. Studio assignments to be digitized and sent to instructor electronically for evaluation and critique.

**ARTIS 202: Studio Fundamentals: Wood**

(0-8) Cr. 2. F.S.

*Prereq: Open to all students, sophomore level and above. Required of all ISA BFA majors*

Half-semester course. Introduction to wood’s physical properties, its potential as an expressive medium, and basic wood working hand tools and techniques.

**ARTIS 203: Studio Fundamentals: Jewelry/Metalsmithing**

(0-8) Cr. 2. F.S.

*Prereq: Open to all students, sophomore level and above. Required of all ISA BFA majors*

Half semester course. Introduction to basic jewelry/metals design and fabrication. Forming, texturing, and joining techniques (soldering/riveting) will be explored and applied to two projects.

**ARTIS 204: Studio Fundamentals: Ceramics**

(0-8) Cr. 2. F.S.

*Prereq: Open to all students, sophomore level and above. Required of all ISA BFA majors*

Half-semester course providing an introduction to ceramic techniques including hand-building, high fire and low fire glaze applications and expressive approaches that will be applied to two projects. The emphasis is on creative communication through ceramics.

**ARTIS 206: Studio Fundamentals: Printmaking**

(0-8) Cr. 2. F.S.

*Prereq: Open to all students, sophomore level and above. Required of all ISA BFA majors*

Introduction to relief, monoprint, lithographic and intaglio printing as methods for visual communication and expression.
ARTIS 208: Color
(0-8) Cr. 2. F.S.
Prereq: Open to all students, sophomore level and above. Required for all ISA BFA majors.
Half-semester course. Introduction to color theory and color systems using various media for visual communication and creative expression.

ARTIS 210: Studio Fundamentals: Photo
(0-8) Cr. 2. F.S.
Prereq: Open to all students, sophomore level and above. Required for all ISA BFA majors.
Introduction to film camera operation and traditional black and white darkroom methods for visual communication and creative expression. Film cameras required for class but may be checked out for short periods during semester.

ARTIS 212: Studio Fundamentals: Computers
(0-6) Cr. 3. F.S.
Prereq: Open to all students, sophomore level and above. Required for all ISA BFA majors.
Introduction to digital media tools and concepts and digital fabrication processes to create two dimensional, three dimensional, and time-based artworks. Students will be introduced to major digital art and design software packages.

ARTIS 213: Studio Fundamentals: Painting
(0-8) Cr. 2. F.S.
Prereq: Open to all students, sophomore level and above. Required for all ISA BFA majors.
Half-semester course. Introduction to preparation of painting grounds, color mixing, manipulation of paint and pictorial space as methods for visual communication and expression.

ARTIS 214: Studio Fundamentals: Textiles
(0-8) Cr. 2. F.S.
Prereq: Open to all students, sophomore level and above. Required for all ISA BFA majors.
Half semester course. Introduction to two-dimensional and three-dimensional textile techniques used for visual communication and expression.

ARTIS 227: Introduction to Creative Digital Photography
(0-6) Cr. 3.
Prereq: DSN S 102, DSN S 131 and DSN S 183 or permission of instructor.
This course will include the functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of "seeing" as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera with the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

ARTIS 227H: Introduction to Creative Digital Photography: Honors
(0-6) Cr. 3-4.
Prereq: DSN S 102, DSN S 131 and DSN S 183
This course will include the functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of "seeing" as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera with the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

ARTIS 230: Drawing II
(0-6) Cr. 3. F.S.
Prereq: DSN S 102, DSN S 183 and DSN S 131
A continuation of DSN S 131. Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.

ARTIS 233: Watercolor Painting
(0-6) Cr. 3.
Prereq: ARTIS 230
Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 233H: Watercolor Painting: Honors
(0-6) Cr. 3-4.
Prereq: ARTIS 230
Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.
ARTIS 238: Painting I
(0-6) Cr. 3. F.S.
Prereq: ARTIS 230
Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ARTIS 238H: Painting I: Honors
(0-6) Cr. 3-4. F.S.
Prereq: ARTIS 230
Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ARTIS 305: Collage, Assemblage, and the Found Object
(Dual-listed with ARTIS 505). (0-6) Cr. 3. Repeatable.
Prereq: 6 credits of 200 level studio or permission of instructor
Using techniques of collage and assemblage, this course will explore the significance of recycling, sustainable methods of art making, and thrift-store culture as medium and subject matter for artists. Through selected readings, slide presentations, and studio activities, we will address the environmental cause and effect of materials and methods, consumption and waste, and one’s personal responsibility as stewards for the planet we share. Emphasis will be on conceptual development.

ARTIS 308: Computer Modeling, Rendering and Virtual Photography
(0-6) Cr. 3.
Prereq: ARTIS 230 or permission of instructor
Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ARTIS 308H: Computer Modeling, Rendering and Virtual Photography: Honors
(0-6) Cr. 3-4.
Prereq: ARTIS 230 or permission of instructor
Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ARTIS 310: Sources and Methods of Visual Art
(1-4) Cr. 3.
Study and application of methods used by contemporary artists for the purpose of generating ideas for new work. Field trip.

ARTIS 311: Contemporary Issues in Studio Art
Cr. 3.
Exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an experimental and applied knowledge base for understanding each student’s place in the contemporary art world.

ARTIS 320: Introduction to Furniture Design
(0-6) Cr. 3.
Prereq: ARTIS 202 or permission of instructor.
Design and production of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop a deeper understanding of wood and the issues of sustainability in furniture design.

ARTIS 320H: Introduction to Furniture Design: Honors
(0-6) Cr. 3-4.
Prereq: ARTIS 202 or permission of instructor.
Design and production of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop a deeper understanding of wood and the issues of sustainability in furniture design.

ARTIS 322: Intermediate Ceramics Studio
(0-6) Cr. 3.
Prereq: ARTIS 204 or permission of instructor.
Investigation of expressive forms and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze-making research and electric kiln firing.

ARTIS 322H: Intermediate Ceramics Studio: Honors
(0-6) Cr. 3-4.
Prereq: ARTIS 204 or permission of instructor.
Investigation of expressive forms and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze-making research and electric kiln firing.

ARTIS 323: Scientific Illustration Principles and Techniques
(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable.
Prereq: DSN S 131, ARTIS 230, or equivalent, and 3 credits in biological sciences; or permission of the instructor
Studio basics and professional techniques in black & white, continuous tone, and color. Introduction to professional practice and principles of communicating science through art. Emphasis on tools, materials, and rendering.
ARTIS 324: Jewelry/Metalsmithing II  
(0-6) Cr. 3.
*Prereq: ARTIS 203 or permission of instructor*
Continued study of traditional and contemporary metalsmithing fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 324H: Jewelry/Metalsmithing II: Honors  
(0-6) Cr. 3-4.
*Prereq: ARTIS 203 or permission of instructor*
Continued study of traditional and contemporary metalsmithing fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 325: Integrated Studio Arts Seminar  
(2-0) Cr. 2. Repeatable, maximum of 6 credits.  
*Prereq: Open to ISA BFA majors*
Contemporary issues in studio arts explored through lectures, presentations and critiques.

ARTIS 326: Illustration and Illustration Software  
(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable.  
*Prereq: ARTIS 323/BPM I 323, or permission of the instructor*
An introduction to digital illustration software. Application of painting, drawing and image making techniques using vector and raster based programs.

ARTIS 327: Illustration as Communication  
(Cross-listed with BPM I). (0-6) Cr. 3.  
*Prereq: ARTIS 326/BPM I 326, or permission of the instructor*
Investigation of illustration as a form of communication. Emphasis on problem solving, effective composition, and advancement of rendering skills.

ARTIS 329: Creative Photography  
(0-6) Cr. 3. Repeatable, maximum of 6 credits.  
*Prereq: ARTIS 210 or permission of instructor*
Continuation and expansion of concepts and processes from introductory photography. The class begins with advanced film camera techniques and experimentation with medium format cameras. It then moves into digital and color photography while also addressing output and presentation. Emphasis will be on the use of photography for visual communication and creative expression.

ARTIS 329H: Creative Photography, Honors  
(0-6) Cr. 3-4. Repeatable, maximum of 6 credits.  
*Prereq: ARTIS 210 or permission of instructor*
Continuation and expansion of concepts and processes from introductory photography. The class begins with advanced film camera techniques and experimentation with medium format cameras. It then moves into digital and color photography while also addressing output and presentation. Emphasis will be on the use of photography for visual communication and creative expression.

ARTIS 330: Drawing III: Life Drawing  
(0-6) Cr. 3. Repeatable.  
*Prereq: ARTIS 230*
Drawing from the human figure.

ARTIS 330H: Drawing III: Life Drawing, Honors  
(0-6) Cr. 3-4. Repeatable.  
*Prereq: ARTIS 230*
Drawing from the human figure.

ARTIS 331: Alternative materials for Artist/Designer  
(3-0) Cr. 3. Repeatable. F.S.  
*Prereq: 200 level ISA studio courses, or permission of instructor*
Exploration of alternative materials (primarily non-metallics, both natural and manufactured) applicable to the design and creation of small designed objects and adornment. Students will learn additive and reductive processes, experiment with found object inclusion, rubber mold-making, and resin casting. A series of finished pieces will result. Open to all majors in the College of Design.

ARTIS 337: Application of Scientific Illustration Techniques  
(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable, maximum of 6 credits. S.  
*Prereq: ARTIS 327*
Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

ARTIS 338: Painting II  
(0-6) Cr. 3. Repeatable.  
*Prereq: ARTIS 238 or ARTIS 213 and ARTIS 230*
Painting using acrylic and oil media; composition and expression.

ARTIS 338H: Painting II: Honors  
(0-6) Cr. 3-4. Repeatable.  
*Prereq: ARTIS 238 or ARTIS 213 and ARTIS 230*
Painting using acrylic and oil media; composition and expression.
ARTIS 345: Woven Textile Structures
(0-6) Cr. 3. Repeatable.
Prereq: ARTIS 214 or permission of instructor
Introduction to woven textile construction using commercial and hand-dyed yarns. Emphasis on technical development of weaving as a means for personal expression as well as an understanding of its role within the applied arts.

ARTIS 345H: Woven Textile Structures, Honors
(0-6) Cr. 3-4. Repeatable.
Prereq: ARTIS 214 or permission of instructor
Introduction to woven textile construction using commercial and hand-dyed yarns. Emphasis on technical development of weaving as a means for personal expression as well as an understanding of its role within the applied arts.

ARTIS 346: Natural Dyes
(0-6) Cr. 3. Repeatable. F.S.
Introduction to natural dyes. Course includes a historical overview of natural dyes with attention to global perspectives. Emphasis on technical skill development and application of research in the creation of contemporary textile artwork, apparel and home furnishings.

ARTIS 346H: Natural Dyes: Honors
(0-6) Cr. 3-4. Repeatable. F.S.
Introduction to natural dyes. Course includes a historical overview of natural dyes with attention to global perspectives. Emphasis on technical skill development and application of research in the creation of contemporary textile artwork, apparel and home furnishings.

ARTIS 347: Printed Textile Design
(0-6) Cr. 3. Repeatable. F.S.
Prereq: ARTIS 214 or permission of instructor
Textile hand-printing methods on fabric including block, stencil and screen-printing using synthetic and natural dyes, discharging agents and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Emphasis on research and development of surface design techniques as a means for personal expression.

ARTIS 347H: Printed Textile Design: Honors
(0-6) Cr. 3-4. Repeatable. F.S.
Prereq: ARTIS 214 or permission of instructor
Textile hand-printing methods on fabric including block, stencil and screen-printing using synthetic and natural dyes, discharging agents and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Emphasis on research and development of surface design techniques as a means for personal expression.

ARTIS 356: Relief Printmaking: Digital/Traditional
(Dual-listed with ARTIS 556). (0-6) Cr. 3-4. Repeatable, maximum of 6 credits. F.S.
Prereq: For ARTIS 356: ARTIS 206 and credit or enrollment in ARTIS 230, or instructor permission; For ARTIS 556: Graduate classification or instructor permission
In-depth exploration of digital or traditional design and block cutting processes (computer/laser cutter/CNC router or drawing/chisels). Use relief printmaking to create a unified body of prints from those blocks. Emphasis is on experimental and creative use of printmaking with study of contemporary trends.

ARTIS 356H: Relief Printmaking: Digital/Traditional, Honors
(0-6) Cr. 3-4. Repeatable, maximum of 6 credits. F.S.
Prereq: ARTIS 206 and credit or enrollment in ARTIS 230, or instructor permission
Explore the techniques and aesthetic qualities of black and white and color relief printmaking with woodcuts, computer/laser cutter/CNC router blocks, or photopolymer plates. Emphasis is on experimental and creative use of printmaking with study of contemporary trends.

ARTIS 357: Intaglio and Monotype Printmaking: Digital / Traditional
(Dual-listed with ARTIS 557). (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S.
Prereq: For ARTIS 357: ARTIS 206 and credit or enrollment in ARTIS 230, or instructor permission; For ARTIS 557: Graduate classification or instructor permission
Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 357H: Intaglio and Monotype Printmaking: Digital / Traditional, Honors
(0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S.
Prereq: ARTIS 206 and credit or enrollment in ARTIS 230, or instructor permission
Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.
ARTIS 358: Lithography: Digital / Traditional
(Dual-listed with ARTIS 558). (0-6) Cr. 3. Repeatable. F.S.
Prereq: For ARTIS 358: ARTIS 206 and credit or enrollment in ARTIS 230, or instructor permission; For ARTIS 558: Graduate classification or instructor permission
Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ARTIS 358H: Lithography: Digital / Traditional, Honors
(0-6) Cr. 3-4. Repeatable. F.S.
Prereq: ARTIS 206 and credit or enrollment in ARTIS 230, or instructor permission
Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ARTIS 360: Sustainable Design and Fabrication of Furniture
(0-6) Cr. 3. F.S.
An introduction to issues of design and fabrication of furniture focusing on sustainability. Exploration of the effect of consumers on design and how this affects our environment and our global society.

ARTIS 362: Artists, Designers and Sustainable Development
(0-6) Cr. 3. S.
Prereq: Junior level standing in University
The artist/designer's role in sustainable development with a focus on cultural understanding of the collaborating communities. Class discussion, visual exercises, and the creation of creative collaborative service-learning projects such as product design, habitat design, and visual arts projects. Preorientation for travel to Ghana in ARTIS 363. Meets International Perspectives Requirement.

ARTIS 363: Studio Abroad: Ghana
(0-6) Cr. 3. SS.
Prereq: ARTIS 362
Traveling studio to Ghana, West Africa; an experiential tour of arts and history combined with design focused collaborative service-learning projects. Projects may include product development, design consultation, sustainable building design, and learning and teaching of visual arts. Student teams will develop projects in partnership with Ghanaians. Meets International Perspectives Requirement.

ARTIS 399: BFA Professional Practice
(2-0) Cr. 2. S.
Prereq: Junior classification in ISA BFA curriculum.
Introduction to professional practices including development of portfolio (visual and written components). Lecture and presentation topics include applying to graduate school, internships, applying for jobs, grants/funding opportunities, professional networking, exhibition opportunities, and best practices for studio artists. Half-semester course. Required of all ISA majors.

ARTIS 407: Principles of 3D Character Animation
(Dual-listed with ARTIS 507). (0-6) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed.

ARTIS 407H: Principles of 3D Character Animation: Honors
(0-6) Cr. 3-4. Repeatable, maximum of 9 credits.
Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed.

ARTIS 408: Principles of 3D Animation
(0-6) Cr. 3. Repeatable.
Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed.

ARTIS 408H: Principles of 3D Animation: Honors
(0-6) Cr. 3-4. Repeatable.
Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed.
ARTIS 409: Computer/Video Game Design and Development  
(Dual-listed with ARTIS 509). (0-6) Cr. 3. Repeatable, maximum of 12 credits.  
Prereq: Permission of instructor. Programming emphasis: COM S 227, COM S 228, COM S 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and ARTIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: Junior classification  
Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of indie development and computer/video game history will be discussed.

ARTIS 420: Advanced Furniture Design  
(Dual-listed with ARTIS 520). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  
Prereq: ARTIS 320  
Design and creation of increasingly complex furniture forms with consideration of precedents and innovative techniques and approaches. Continued development of a unique personal approach to the design and making of furniture. Refined sensitivity to wood, and continued consideration of various sustainable practices.

ARTIS 420H: Advanced Furniture Design: Honors  
(0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S.  
Prereq: ARTIS 320  
Design and creation of increasingly complex furniture forms with consideration of precedents and innovative techniques and approaches. Continued development of a unique personal approach to the design and making of furniture. Refined sensitivity to wood, and continued consideration of various sustainable practices.

ARTIS 422: Ceramics Studio  
(Dual-listed with ARTIS 522). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  
Prereq: For ARTIS 422: ARTIS 322; For ARTIS 522: graduate classification in the MFA program in Integrated Visual Arts; or permission of instructor  
Creation of a body of work in personal ceramic forms and unique surface treatments. Gas Kiln firings, research into contemporary ceramic artists and development of a body of increasingly skilled work are emphasized. Students are expected to be capable of independent studio work and take responsibility for kiln firings.

ARTIS 422H: Ceramics Studio: Honors  
(0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S.  
Prereq: ARTIS 322  
Creation of a body of work in personal ceramic forms and unique surface treatments. Gas Kiln firings, research into contemporary ceramic artists and development of a body of increasingly skilled work are emphasized. Students are expected to be capable of independent studio work and take responsibility for kiln firings.

ARTIS 424: Jewelry/Metalsmithing III  
(Dual-listed with ARTIS 524). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  
Prereq: For ARTIS 424: ARTIS 324 or permission of instructor; For ARTIS 524: Graduate Classification in the MFA program in Integrated Visual Arts, or instructor permission  
Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. Processes introduced include raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.

ARTIS 424H: Jewelry/Metalsmithing III: Honors  
(0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S.  
Prereq: ARTIS 324 or permission of instructor  
Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. Processes introduced include raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.

ARTIS 429: Advanced Photography  
(Dual-listed with ARTIS 529). (0-6) Cr. 3. Repeatable. F.S.  
Prereq: ARTIS 329  
Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern.

ARTIS 429H: Advanced Photography: Honors  
(0-6) Cr. 3-4. Repeatable. F.S.  
Prereq: ARTIS 329  
Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern.

ARTIS 430: Drawing IV  
(Dual-listed with ARTIS 530). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.  
Prereq: ARTIS 330  
Figurative and/or non-figurative drawing with advanced work in media, composition, and theory.
ARTIS 430H: Drawing IV: Honors
(0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S.
Prereq: ARTIS 330
Figurative and/or non-figurative drawing with advanced work in media, composition, and theory.

ARTIS 431: Character and Scene Design
(Dual-listed with ARTIS 531). Cr. 3. F.
Prereq: For ARTIS 431: DSN S 131, plus ARTIS 230, ARTIS 330, or instructor permission after portfolio review. For ARTIS 531: Graduate classification in the MFA program in Integrated Visual Arts; or instructor permission after portfolio review.
Drawing directed toward designing characters and environments to be used for telling stories in a variety of contexts. Emphasis on ideation, research, concept art and other process work over finished art.

ARTIS 432: Sequential Narrative Drawing
(Dual-listed with ARTIS 532). (0-6) Cr. 3. S.
Prereq: For ARTIS 432: DSN S 131, plus ARTIS 230, ARTIS 330, or instructor permission after portfolio review. For ARTIS 532, Graduate classification in the MFA program in Integrated Visual Arts; or instructor permission after portfolio review.
Studio course in drawing focusing on the fundamentals of communicating a narrative through sequential images in a variety of applications. Emphasis will be placed on visual research, ideation, concept art and process sketching.

ARTIS 438: Painting III
(Dual-listed with ARTIS 538). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.
Prereq: ARTIS 338
Figurative and non-figurative painting with advanced work in media, composition, and theory.

ARTIS 438H: Painting III: Honors
(0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S.
Prereq: ARTIS 338
Figurative and non-figurative painting with advanced work in media, composition, and theory.

ARTIS 447: Printed Textile Design
(Dual-listed with ARTIS 547). (0-6) Cr. 3. Repeatable. F.S.
Prereq: For ARTIS 447: ARTIS 347 or permission of instructor; For ARTIS 547: Graduate classification.
Exploration of hand-printing methods on fabric including block, stencil, and screen-printing using dyes, discharging agents, and pigments. Individualized research and development of surface design techniques as means for personal expression.

ARTIS 448: Digital Textile Design
(Dual-listed with ARTIS 548). (0-6) Cr. 3. Repeatable. F.S.
Prereq: Junior classification in either College of Design or Apparel, Merchandising, Design
This hands-on studio course will allow students to explore digital printing technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications.

ARTIS 458: Advanced Printmaking
(0-6) Cr. 3. Repeatable. F.S.
Prereq: ARTIS 356, ARTIS 357, or ARTIS 358, and permission of instructor
Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

ARTIS 458H: Advanced Printmaking: Honors
(0-6) Cr. 3-4. Repeatable. F.S.
Prereq: ARTIS 356, ARTIS 357, or ARTIS 358, and permission of instructor
Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

ARTIS 462: Community-Engaged Arts Management.
(1-4) Cr. 3. F.S.
Introduction to aspects of community arts management and art gallery operations. Class meets at ISU Design on Main Gallery, a community arts space in the Main Street Cultural District of Ames. Students will staff the gallery and assist in the conception, design and realization of exhibitions.

ARTIS 473: Video Art
(Dual-listed with ARTIS 573). (0-6) Cr. 3.
Prereq: ARTIS 212 or permission of instructor for enrollment in ARTIS 473; graduate standing or permission of instructor for enrollment in ARTIS 573
Usage of professional video editing software and application of best practices for video production and post-production to realize original artworks. Creation of narrative and non-narrative videos and site specific video installations. Prominent examples in the history of video art provide context for the coursework. Non-repeatable for graduate students.

ARTIS 475: Interactive Art
(Dual-listed with ARTIS 575). (0-6) Cr. 3.
Prereq: For ARTIS 475: ARTIS 212 or Permission of Instructor; for ARTIS 575: Graduate standing or permission of instructor.
Create software and integrate the sensors required to create interactive artworks, video games, and installations. Prominent examples in the history of interactive art provide context for the coursework.
ARTIS 482: Selected Topics in Studio Art
(Dual-listed with ARTIS 582). Cr. 1-3. Repeatable. F.S.
Prereq: Permission of instructor
Special issues related to studio art. Topics vary each time offered.

ARTIS 490: Independent Study
Cr. 1-6. Repeatable. F.S.S.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490B: Independent Study: Ceramics
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490C: Independent Study: Computer Art and Design
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490D: Independent Study: Drawing
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490E: Independent Study: Textiles
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490F: Independent Study: Illustration
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490G: Independent Study: Metals
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490H: Independent Study: Honors
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490I: Independent Study: Painting
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490J: Independent Study: Photography
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490K: Independent Study: Printmaking
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490L: Independent Study: Furniture
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490M: Independent Study: Mixed Media
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
ARTIS 491: Post Baccalaureate Capstone Course
Cr. 1. F.S.
Prereq: Enrollment in Post Baccalaureate Program.
Exhibition of artwork completed in the Post Baccalaureate program, required for fulfillment of certificate. Offered on a satisfactory-fail basis only.

ARTIS 493: Workshop
Cr. 1-3. Repeatable. SS.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493B: Workshop: Ceramics
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493C: Workshop: Computer Art and Design
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493D: Workshop: Drawing
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493E: Workshop: Textiles
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493F: Workshop: Illustration
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493G: Workshop: Metals
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493H: Workshop: Honors
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493I: Workshop: Painting
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493J: Workshop: Photography
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493K: Workshop: Printmaking
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493L: Workshop: Furniture
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493M: Workshop: Mixed Media
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 494: Integrated Studio Arts in Europe Seminar
(1-0) Cr. 1.
Prereq: Permission of instructor and planned enrollment in ARTIS 495
Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.
Meets International Perspectives Requirement.
ARTIS 495: Integrated Studio Arts in Europe
(Dual-listed with ARTIS 595). Cr. 3.
*Prereq: Graduate classification, ARTIS 494 or equivalent, permission of instructor*
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ARTIS 496: Art and Design Field Study
Cr. R. Repeatable.
*Prereq: Concurrent enrollment in an art and design studio or integrated studio arts course and permission of instructor*
Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Offered on a satisfactory-fail basis only.

ARTIS 497: Studio Internship
Cr. 1-6. Repeatable, maximum of 6 credits.
*Prereq: Advanced classification in a department curriculum*
Written approval of supervising instructor and department chair on required form in advance of semester of enrollment. Supervised experience with a cooperating artist or studio. Offered on a satisfactory-fail basis only.

ARTIS 499: BFA Exhibition
(1-0) Cr. 1. S.
*Prereq: ARTIS 399 and senior classification in the ISA BFA Curriculum.*
Capstone experience for the BFA degree, including the refinement of a final portfolio (visual and written components). Guest lecturers cover range of topics relevant to the professional practice of art and design. Course culminates in the planning, design and installation of the BFA group exhibition in a formal gallery setting. Half-semester course. Required of all ISA majors.

Courses primarily for graduate students, open to qualified undergraduates:

ARTIS 505: Collage, Assemblage, and the Found Object
(Dual-listed with ARTIS 305). (0-6) Cr. 3. Repeatable.
*Prereq: 6 credits of 200 level studio or permission of instructor*
Using techniques of collage and assemblage, this course will explore the significance of recycling, sustainable methods of art making, and thrift-store culture as medium and subject matter for artists. Through selected readings, slide presentations, and studio activities, we will address the environmental cause and effect of materials and methods, consumption and waste, and one's personal responsibility as stewards for the planet we share. Emphasis will be on conceptual development.

ARTIS 507: Principles of 3D Character Animation
(Dual-listed with ARTIS 407). (0-6) Cr. 3. Repeatable, maximum of 9 credits.
*Prereq: ARTIS 308*
Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed.

ARTIS 508: Computer Aided Animation and Visualization
(0-6) Cr. 3. Repeatable, maximum of 6 credits.
*Prereq: ARTIS 408 or graduate classification and permission of instructor*
Further investigations begun in ARTIS 408. Attention given to the workflow and management of creating animation and visualizations.

ARTIS 509: Computer/Video Game Design and Development
(Dual-listed with ARTIS 409). (0-6) Cr. 3. Repeatable, maximum of 12 credits.
*Prereq: Permission of instructor. Programming emphasis: COM S 227, COM S 228, COM S 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and ARTIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: Junior classification*
Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed.

ARTIS 511: Seminar in Teaching
(3-0) Cr. 3.
*Prereq: Graduate classification*
Readings and discussion of university level design education issues, studio/classroom observation, development of a teaching philosophy, lesson planning and presentation.

ARTIS 520: Advanced Furniture Design
(Dual-listed with ARTIS 420). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.
*Prereq: ARTIS 320*
Design and creation of increasingly complex furniture forms with consideration of precedents and innovative techniques and approaches. Continued development of a unique personal approach to the design and making of furniture. Refined sensitivity to wood, and continued consideration of various sustainable practices.
ARTIS 522: Ceramics Studio
(Dual-listed with ARTIS 422). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.
Prereq: For ARTIS 422: ARTIS 322; For ARTIS 522: graduate classification in the MFA program in Integrated Visual Arts; or permission of instructor
Creation of a body of work in personal ceramic forms and unique surface treatments. Gas Kiln firings, research into contemporary ceramic artists and development of a body of increasingly skilled work are emphasized. Students are expected to be capable of independent studio work and take responsibility for kiln firings.

ARTIS 524: Jewelry/Metalsmithing III
(Dual-listed with ARTIS 424). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.
Prereq: For ARTIS 424: ARTIS 324 or permission of instructor; For ARTIS 524: Graduate Classification in the MFA program in Integrated Visual Arts, or instructor permission
Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. Processes introduced include raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.

ARTIS 529: Advanced Photography
(Dual-listed with ARTIS 429). (0-6) Cr. 3. Repeatable. F.S.
Prereq: ARTIS 329
Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern.

ARTIS 530: Drawing IV
(Dual-listed with ARTIS 430). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.
Prereq: ARTIS 330
Figurative and/or non-figurative drawing with advanced work in media, composition, and theory.

ARTIS 531: Character and Scene Design
(Dual-listed with ARTIS 431). Cr. 3. F.
Prereq: For ARTIS 431: DSN S 131, plus ARTIS 230, ARTIS 330, or instructor permission after portfolio review. For ARTIS 531: Graduate classification in the MFA program in Integrated Visual Arts; or instructor permission after portfolio review.
Drawing directed toward designing characters and environments to be used for telling stories in a variety of contexts. Emphasis on ideation, research, concept art and other process work over finished art.

ARTIS 532: Sequential Narrative Drawing
(Dual-listed with ARTIS 432). (0-6) Cr. 3. S.
Prereq: For ARTIS 432: DSN S 131, plus ARTIS 230, ARTIS 330, or instructor permission after portfolio review. For ARTIS 532, Graduate classification in the MFA program in Integrated Visual Arts; or instructor permission after portfolio review.
Studio course in drawing focusing on the fundamentals of communicating a narrative through sequential images in a variety of applications. Emphasis will be placed on visual research, ideation, concept art and process sketching.

ARTIS 538: Painting III
(Dual-listed with ARTIS 438). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.
Prereq: ARTIS 338
Figurative and non-figurative painting with advanced work in media, composition, and theory.

ARTIS 547: Printed Textile Design
(Dual-listed with ARTIS 447). (0-6) Cr. 3. Repeatable. F.S.
Prereq: For ARTIS 447: ARTIS 347 or permission of instructor; For ARTIS 547: Graduate classification.
Exploration of hand-printing methods on fabric including block, stencil, and screen-printing using dyes, discharging agents, and pigments. Individualized research and development of surface design techniques as means for personal expression.

ARTIS 548: Digital Textile Design
(Dual-listed with ARTIS 448). (0-6) Cr. 3. Repeatable. F.S.
Prereq: Junior classification in either College of Design or Apparel, Merchandising, Design
This hands-on studio course will allow students to explore digital printing technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications.

ARTIS 556: Relief Printmaking: Digital/Traditional
(Dual-listed with ARTIS 356). (0-6) Cr. 3-4. Repeatable, maximum of 6 credits. F.S.
Prereq: For ARTIS 356: ARTIS 206 and credit or enrollment in ARTIS 230, or instructor permission; For ARTIS 556: Graduate classification or instructor permission
In-depth exploration of digital or traditional design and block cutting processes (computer/laser cutter/CNC router or drawing/chisels). Use relief printmaking to create a unified body of prints from those blocks. Emphasis is on experimental and creative use of printmaking with study of contemporary trends.
ARTIS 557: Intaglio and Monotype Printmaking: Digital / Traditional
(Dual-listed with ARTIS 357). (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S.
Prereq: For ARTIS 357: ARTIS 206 and credit or enrollment in ARTIS 230, or
instructor permission; For ARTIS 557: Graduate classification or instructor
permission
Explore the techniques and aesthetic qualities of black and white and
color intaglio printmaking primarily through etching, aquatint, laser-cut
plates and collagraph processes. Students will generate imagery through
traditional drawing, collage and digital processes. Unique, one-of-a-kind
black and white and color prints from Plexiglas will also be introduced.
Emphasis is on experimental and creative use of printmaking for artistic
expression.

ARTIS 558: Lithography: Digital / Traditional
(Dual-listed with ARTIS 358). (0-6) Cr. 3. Repeatable. F.S.
Prereq: For ARTIS 358: ARTIS 206 and credit or enrollment in ARTIS 230, or
instructor permission; For ARTIS 558: Graduate classification or instructor
permission
Examine the techniques and aesthetic qualities of lithography primarily
through hand-drawn and photographic plates. Students may generate
imagery through traditional drawing, collage or digital processes.
Emphasis is on experimental and creative use of printmaking for artistic
expression. For those taking the course for a second semester, focus is
on stone lithography and increased work with color.

ARTIS 571A: Graduate Seminar: Grants, Residencies, Exhibitions,
Entrepreneurialism
(3-0) Cr. 3.
Prereq: Admission into graduate program in the College of Design
Professional opportunities and avenues of support available to studio
artists. Skill development in preparing visual portfolios and writing
applications and statements for grants, residencies and exhibitions.
Comprehensive development of strategies needed to advance one's
career as a professional studio artist. Students learn to create and apply
a personalized plan that will guide them toward a successful studio
practice as an emerging, mid-career and established artist.

ARTIS 571B: Graduate Seminar: Critique and Creative Process
(3-0) Cr. 3.
Prereq: Admission into graduate program in the College of Design
Ongoing weekly critiques and dialog about sources, methods, and
progress of studio projects. Graduate students will learn to articulate
their ideas from concept to creation. The interaction of students
different levels in a broad spectrum of studio courses will reveal
commonalities and connections among all of the visual arts, accelerating
individual creative development.

ARTIS 573: Video Art
(Dual-listed with ARTIS 473). (0-6) Cr. 3.
Prereq: ARTIS 212 or permission of instructor for enrollment in ARTIS 473;
graduate standing or permission of instructor for enrollment in ARTIS 573
Usage of professional video editing software and application of best
practices for video production and post-production to realize original
artworks. Creation of narrative and non-narrative videos and site specific
video installations. Prominent examples in the history of video art provide
context for the coursework. Non-repeatable for graduate students.

ARTIS 575: Interactive Art
(Dual-listed with ARTIS 475). (0-6) Cr. 3.
Prereq: For ARTIS 475: ARTIS 212 or Permission of Instructor; for ARTIS 575:
Graduate standing or permission of instructor.
Create software and integrate the sensors required to create interactive
artworks, video games, and installations. Prominent examples in the
history of interactive art provide context for the coursework.

ARTIS 582: Selected Topics in Studio Art
(Dual-listed with ARTIS 482). Cr. 1-3. Repeatable. F.S.
Prereq: Permission of instructor
Special issues related to studio art. Topics vary each time offered.

ARTIS 590: Special Topics
Cr. arr. F.S.SS.
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.

ARTIS 590B: Special Topics: Ceramics
Cr. arr.
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.

ARTIS 590C: Special Topics: Computer Art and Design
Cr. arr.
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.

ARTIS 590D: Special Topics: Drawing
Cr. arr.
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory
equivalency in specialized area
Written approval of instructor and department chair on required form in
advance of semester of enrollment.
ARTIS 590E: Special Topics: Textiles  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590F: Special Topics: Illustration  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590G: Special Topics: Metals  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590I: Special Topics: Painting  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590J: Special Topics: Photography  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590K: Special Topics: Printmaking  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590L: Special Topics: Furniture  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590M: Special Topics: Mixed Media  
Cr. arr.  
Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 593: Workshop  
Cr. 1-3. Repeatable. SS.  
Prereq: Graduate classification and permission of instructor  
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593B: Workshop: Ceramics  
Cr. 1-3. Repeatable.  
Prereq: Graduate classification and permission of instructor  
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593C: Workshop: Computer Art and Design  
Cr. 1-3. Repeatable.  
Prereq: Graduate classification and permission of instructor  
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593D: Workshop: Drawing  
Cr. 1-3. Repeatable.  
Prereq: Graduate classification and permission of instructor  
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593E: Workshop: Textiles  
Cr. 1-3. Repeatable.  
Prereq: Graduate classification and permission of instructor  
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593F: Workshop: Illustration  
Cr. 1-3. Repeatable.  
Prereq: Graduate classification and permission of instructor  
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593G: Workshop: Metals  
Cr. 1-3. Repeatable.  
Prereq: Graduate classification and permission of instructor  
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.
ARTIS 593I: Workshop: Painting
Cr. 1-3. Repeatable.
Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593J: Workshop: Photography
Cr. 1-3. Repeatable.
Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593K: Workshop: Printmaking
Cr. 1-3. Repeatable.
Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593L: Workshop: Furniture
Cr. 1-3. Repeatable.
Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593M: Workshop: Mixed Media
Cr. 1-3. Repeatable.
Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 595: Integrated Studio Arts in Europe
(Dual-listed with ARTIS 495). Cr. 3.
Prereq: Graduate classification, ARTIS 494 or equivalent, permission of instructor
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

Courses for graduate students:

ARTIS 605: Research Methods
(3-0) Cr. 3.
Prereq: Permission of instructor
Research strategies related to fine art and technology. Application of selected methods to specific issues.

ARTIS 607: Intermedia
(0-6) Cr. 3. F.S.
Prereq: Graduate classification and permission of instructor
Exploration and application of media with various materials, methods and ideas.

ARTIS 697: Studio Internship
Cr. arr.
Prereq: Graduate classification and approval of POS committee
Supervised off-campus learning experience with a prominent artist, designer, or firm.

ARTIS 698: Current Issues in Studio Arts
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.
Prereq: Graduate classification and permission of instructor
Selected issues in contemporary studio arts. Topics and readings vary each time offered.

ARTIS 699: Research
Cr. arr. Repeatable.
Research in Integrated Studio Arts.

ARTIS 699A: Research: Thesis
Cr. arr. Repeatable.
Research thesis.

ARTIS 699B: Research: Thesis-exhibition
Cr. arr. Repeatable.
Research exhibition.

**Interior Design**

http://www.design.iastate.edu/interiordesign/index.php

The department offers the degree Bachelor of Fine Arts (BFA) in Interior Design.

**BFA Interior Design.** Emphasis is on the student’s application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, and physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting, and computer-aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction, and application of human factors. The curriculum is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional-level education

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present their portfolio upon admission and prior
to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Critical Studies in Design, Design Studies, and Digital Media.

Curriculum in Interior Design

The Curriculum in Interior Design leads to a 129.5-credit undergraduate Bachelor of Fine Arts in Interior Design including a 30.5-credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance and a portfolio of original work.

A 34-graduate-credit program is offered leading to the Master of Arts, for students planning to undertake professional or design research-oriented pursuits. (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions, see Graduate Study under Interior Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires completion of the 30.5-credit Core Design Program, including the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>

<td>LIB 160</td>
<td>Information Literacy</td>
<td>1</td>
</tr>
</tbody>
</table>

Admission is based on department resources and will be determined by a formal review at the end of the Core Design Program.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 129.5 cr.

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

(C or better grade ENGL 150 and ENGL 250)

Total: 16 credits, 12-14 total credits.
Graduate Study

The department offers the degrees of Master of Fine Arts (MFA) in Interior Design, and Master of Arts (MA) in Art and Design, with degree specialization in Interior Design.

The MA in Art and Design with specialization in Interior Design requires a minimum of 34 credits, including a studio concentration and work in research methods and human factors. Candidates focus on research in an area of specialization culminating in a written thesis composed of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the PhD. Applicants without a degree in interior design may be required to complete up to 40 additional credits of course work.

MFA graduates in Interior Design are proficient in visual communication skills, design theory, human factors, and space planning. The MFA degree is considered a terminal degree in the interior design field. The degree requires completion of a written thesis composed of original research.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.00 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Interior Design, 146 College of Design, 715 Bissell Road, Iowa State University, Ames, Iowa, 50011-1066.

Master of Fine Arts (MFA)

Studio Courses: 18 credits
ARTID 668 Advanced Experimental Interior Design 4
Studio Options 10
Field Trip R

Human Factors: 15 credits
ARTID 551 Design Humanics 3
Human Factors Options 6

Methods, Theory & Electives: 21 credits
ARTID 552 Design Methods: Design Methods 2
ARTID Methods Option 2-3
ARTID 660 Research Methods 3
ARTID History Theory Option 3
ARTID 554 Interior Design Teaching Practicum 3
Electives 3-4

Thesis: 6 credits
6 credits thesis 6
ARTID 699A Thesis

Related Courses (outside of IVA program): 3 cr.
Total: 60 credits

Courses primarily for undergraduates:

ARTID 250: Fundamentals of Interior Design
(2-0) Cr. 2. F.
The profession, issues, and the role of interior design.

ARTID 251: Human Factors in Design
(3-0) Cr. 3. F.

ARTID 255: Forces That Shape Interior Space
(3-0) Cr. 3. F.S.
A survey of variables influencing the nature and function of “interior” environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form and space.

ARTID 259: Sophomore Field Study
Cr. R.
Prereq: Enrollment in interior design studio course
Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.
ARTID 261: Graphic Communication for Interior Design I
(2-4) Cr. 3. F.
Prereq: Admission to the interior design program through program review and enrollment in ARTID 265
Perspective drawing, design sketching, and presentation drawings. Introduction to technical drawing conventions, and design drawings. Emphasis on drawing layout, line quality, and lettering. Use of various rendering media and techniques on 2D and 3D drawings. Overview of presentation techniques, both visual and verbal.

ARTID 263: Graphic Communication for Interior Design II
(2-4) Cr. 3. S.
Prereq: ARTID 261, enrollment in ARTID 267
Computer visualization techniques and applications; projects employing computer graphic methods.

ARTID 265: Interior Design Studio I
(1-6) Cr. 4. F.
Prereq: Credit or enrollment in ARTID 250 and ARTID 261; admission to the interior design program through program review
Enhanced creative interior design problem solving. Emphasis on research, spatial composition theories and graphic ideation and communication as applied to the interior design of small scale environments. Modeling and manual visualization techniques.

ARTID 267: Interior Design Studio II
(1-6) Cr. 4. S.
Prereq: ARTID 265
Human factors issues including ergonomics, human behavior and the requirements of special groups. Color theories related to interior spaces. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques.

ARTID 265: Interior Finish Materials and Systems
(3-0) Cr. 3. S.
Prereq: Completion of the College of Design Core.
Exploration of concepts, materials, and assemblies associated with development of interior elements including floors, walls, ceiling, windows, and finishes. Fiber, plastic, sheet metal, and other surfacing materials. Attention to related human factors, testing, detailing, specifications writing and end-use application.

ARTID 352: Interior Environmental Control Systems
(3-0) Cr. 3. S.
Prereq: Completion of the College of Design Core.
Exploration of concepts, materials, assemblies associated with building service systems. Overview of electrical, lighting, acoustical, HVAC, plumbing and other non-structural building features. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application.

ARTID 353: Interior Building Systems and Details
(3-0) Cr. 3. F.
Prereq: Completion of the College of Design Core.
Exploration of building construction concepts, materials, and assemblies and their influence on interior design. Attention to human factors, codes, detailing, and other interior design issues related to buildings.

ARTID 355: Interior Design History/Theory/Criticism I
(3-0) Cr. 3. S.
Theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture, from a critical, historical and multicultural perspective. Focus on pre-1850.

ARTID 356: Interior Design History/Theory/Criticism II
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in ARTID 355 or permission of instructor
Advanced theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture from a critical, historical, and multicultural perspective. Focus on mid-nineteenth and twentieth century.

ARTID 357: Made in Italy
(2-0) Cr. 2. F.
Prereq: Participation in Study Abroad Rome program
An investigation of the 20th century roots of modern Italian design and its contemporary form. Lectures and seminar presentations highlight major Italian designers and internationally significant design in the 20th century. Focus is on innovative design that exhibits a synthesis of formal and social functions. Meets International Perspectives Requirement.

ARTID 359: Junior Field Study
Cr. R. F.
Prereq: Enrollment in third year interior design studio course
Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms, and museums. Offered on a satisfactory-fail basis only.
ARTID 360: Sophomore Interior Design Internship Seminar  
(1-0) Cr. 1. S.  
Prereq: Sophomore classification in interior design program.  
Procedural and ethical concerns relating to interior design internship.  
Preparation of documents for internship search. Formulation of personal internship and career goals.  

ARTID 361: Junior Interior Design Internship Seminar  
(1-0) Cr. 1. S.  
Prereq: junior classification in interior design program.  
Procedural and ethical concerns relating to interior design internship.  
Refinement of placement credentials and personal goals. Internship search process and agreements.  

ARTID 365: Interior Design Studio III  
(1-6) Cr. 4. F.  
Prereq: ARTID 263, ARTID 267, and enrollment in ARTID 359  

ARTID 367: Interior Design Studio IV  
(1-6) Cr. 4-5. S.  
Prereq: ARTID 365  
Emphasis on three-dimensional spatial development in large scale, multiple scale unit institutional projects. Inclusion of extensive design documentation. Expansion of alternative manual and computer-based visualization methods. Teamwork.  

ARTID 367H: Interior Design Studio IV: Honors  
(1-6) Cr. 4-5. S.  
Prereq: ARTID 365  
Emphasis on three-dimensional spatial development in large scale, multiple scale unit institutional projects. Inclusion of extensive design documentation. Expansion of alternative manual and computer-based visualization methods. Teamwork.  

ARTID 459: Senior Field Study  
Cr. R.  
Prereq: Enrollment in fourth year interior design studio course  
Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.  

ARTID 460: Interior Design Internship  
Cr. 3. SS.  
Prereq: ARTID 350, 360, and 365  
Professional interior design off-campus experience.  

ARTID 461: Interior Design Professional Practices  
(2-0) Cr. 2. S.  
Prereq: ARTID 460  
Organization and general management of the interior design office: agreements, business procedures, and professional ethics. Professional interior design issues and concerns.  

ARTID 461H: Interior Design Professional Practices: Honors  
(2-0) Cr. 2. S.  
Prereq: ARTID 460  
Organization and general management of the interior design office: agreements, business procedures, and professional ethics. Professional interior design issues and concerns.  

ARTID 463: Environments for the Aging  
(Dual-listed with ARTID 563). (Cross-listed with GERON, HD FS). (3-0) Cr. 3. S.  
Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies or permission of instructor  
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (on-line course offering via Distance Education).  
Meets U.S. Diversity Requirement  

ARTID 465: Interior Design Studio V  
(Dual-listed with ARTID 565). (1-6) Cr. 4. F.  
Prereq: ARTID 460, or permission of instructor, and enrollment in ARTID 459  
Design research and refined problem solving methods including functional analysis, programming and detailing.  

ARTID 467: Interior Design Studio VI  
(Dual-listed with ARTID 567). (1-6) Cr. 4. S.  
Prereq: ARTID 465  
Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design.
ARTID 468: Interior Design in an Urban Setting
(1-4) Cr. 3. S.
Prereq: Enrollment or credit in third year studio courses
Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context.

ARTID 468H: Interior Design in an Urban Setting: Honors
(1-4) Cr. 3-4. S.
Prereq: Enrollment or credit in third year studio courses
Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context.

ARTID 490: Independent Study
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTID 490H: Independent Study, Honors
Cr. 1-6. Repeatable.
Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTID 493: Workshop
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS.
Prereq: Evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduates:

ARTID 551: Design Humanities
(3-0) Cr. 3. Repeatable, maximum of 15 credits. F.S.
Prereq: Instructor permission
An exploration of human nature as broadly defined and as applied to design of the built environment. Consideration of human characteristics, responses and performance, at varying scales, as sources of design insight. Topics vary each time offered.

ARTID 551A: Design Humanities: Sensory Perception & Ergonomic Factors
(3-0) Cr. 3. Repeatable, maximum of 9 credits. F.S.
Prereq: Instructor permission
Human factors related to the nature, performance and accommodation of the individuals and small groups, including sensation and perception, physical requirements, anthropometrics, safety and other issues connecting human needs and built environmental responses. Topics vary each time offered.

ARTID 551B: Design Humanities: Emotional, Behavioral & Contextual Factors
(3-0) Cr. 3. Repeatable, maximum of 9 credits. F.S.
Prereq: Instructor permission
Human factors issues related to the nature, performance and accommodation of medium to large groups and settings. Emphasis on psychological, sociological, cultural, interpersonal safety, and related human needs and built environmental responses. Topics vary each time offered.

ARTID 552: Design Methods: Design Methods
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S.
Prereq: Permission of instructor
Survey of methodologies and methodological tools for varied end uses and drawn from wide ranging sources. Emphasis on their organization and application to design of the human environment. Topics vary each time offered.

ARTID 552A: Design Methods: Investigation Analysis
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S.
Prereq: Permission of instructor
Methods of design research, analysis, programming and theory formulation.

ARTID 552B: Design Methods: Synthesis
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S.
Prereq: Permission of instructor
Methods of synthesizing design concepts and solutions.

ARTID 552C: Design Methods: Communication
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S.
Prereq: Permission of instructor
Methods of managing, translating, communicating and otherwise utilizing text, image, abstract and other forms of information.

ARTID 552D: Design Methods: Procedural Alternatives
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S.
Prereq: Permission of instructor
New and specialized methodological trends, including subject or setting-specific methods.
ARTID 554: Interior Design Teaching Practicum  
Cr. 3. Repeatable. F.S.SS.  
Prereq: ARTID 668 and permission of instructor  
Supervised practical application of interior design theory, materials, and practice to the educational process.

ARTID 559: Graduate Interior Design Field Study  
Cr. 1-3. Repeatable.  
Prereq: Graduate enrollment or permission of instructor  
Study and tours of places of interior design-related interest such as manufacturers, design studios, related professional offices, showrooms, museums, and historical sites.

ARTID 560: Interior Design Internship  
Cr. 3. F.S.SS.  
Prereq: Permission of instructor.  
Professional interior design off-campus experience.

ARTID 563: Environments for the Aging  
(Dual-listed with ARTID 463). (Cross-listed with GERON, HD FS). (3-0) Cr. 3. S.  
Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies or permission of instructor  
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (on-line course offering via Distance Education).  
Meets U.S. Diversity Requirement

ARTID 565: Interior Design Studio V  
(Dual-listed with ARTID 465). (1-6) Cr. 4. F.  
Prereq: ARTID 460, or permission of instructor, and enrollment in ARTID 459  
Design research and refined problem solving methods including functional analysis, programming and detailing.

ARTID 567: Interior Design Studio VI  
(Dual-listed with ARTID 467). (1-6) Cr. 4. S.  
Prereq: ARTID 465  
Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design.

ARTID 568: Experimental Interior Design  
(0-8) Cr. 4. Repeatable, maximum of 16 credits. F.S.  
Prereq: Graduate classification and permission of instructor  
Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

ARTID 569: Advanced Studies in Interior Design  
Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or permission of instructor  
Examination of special issues with emphasis on their translation into design application.

ARTID 569A: Advanced Studies in Interior Design: Design Theory  
Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or permission of instructor  
Examination of special issues with emphasis on their translation into design application.

ARTID 569B: Advanced Studies in Interior Design: Advanced Color  
Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or permission of instructor  
Examination of special issues with emphasis on their translation into design application.

ARTID 569C: Advanced Studies in Interior Design: Sustainable Technology  
Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or permission of instructor  
Examination of special issues with emphasis on their translation into design application.

ARTID 569D: Advanced Studies in Interior Design: Variable Topics  
Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or permission of instructor  
Examination of special issues with emphasis on their translation into design application.

ARTID 590: Special Topics  
Cr. arr.  
Prereq: Bachelor's degree in interior design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment

ARTID 593: Workshop  
Cr. 1-3. Repeatable. F.S.SS.  
Prereq: Graduate classification; evidence of satisfactory experience in area of specialization  
Intensive 2 to 4 week studio exploration. Topics vary each time offered.
ARTID 598: Research Forum  
Cr. 1-3. Repeatable, maximum of 9 times. F.S.  
*Prereq: Concurrent enrollment in ARTID 565, ARTID 567, ARTID 568, ARTID 665, or ARTID 668, and permission of instructor*  
Presentation and discussion of cross-disciplinary design research theory, methods, and application. Focus on the investigation, application, and communication of types of design research.

ARTID 599: Creative Component  
Cr. arr. Repeatable.

Courses for graduate students:

ARTID 660: Research Methods  
Cr. 3. S.  
*Prereq: Permission of instructor*  
Research strategies related to design. Application of selected methods to specific issues. Open to non-majors.

ARTID 668: Advanced Experimental Interior Design  
Cr. 4. Repeatable, maximum of 16 credits. F.S.  
*Prereq: Graduate classification and permission of instructor*  
Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

ARTID 690: Advanced Topics  
Cr. arr. Repeatable.  
*Prereq: M.F.A classification, permission of instructor*  

ARTID 697: Design Practicum  
Cr. arr. Repeatable, maximum of 9 credits. F.S.S.  
*Prereq: Approval of POS committee*  
Applied, off campus, professional interior design-related experience.

ARTID 699: Research  
Cr. arr. Repeatable.

ARTID 699A: Thesis  
Cr. arr. Repeatable.

ARTID 699B: Thesis-Exhibition  
Cr. arr. Repeatable.

ARTID A560: Interior Design Internship  
Cr. 3. F.S.S.  
*Prereq: Permission of instructor*  
Professional interior design off-campus experience.

**Landscape Architecture**

Landscape architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The department offers graduate and undergraduate degree programs and cooperates in the undergraduate minors in Design Studies, Critical Studies in Design, and Digital Media.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester’s credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems.
To enhance the study of landscape architecture in off-campus settings, the department requires students to choose from among the following options during the spring and summer of their fourth year: a professional internship; the College of Design Rome Program; an independent study abroad experience; or National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design’s Career Services Office.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 30 credits and a four-year professional program of 119.5 credits.

### Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 30 credits and a four-year professional program of 119.5 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first-professional degree programs in landscape architecture at the bachelor’s and master’s levels.

### Total Degree Requirement: 149.5 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

### International Perspective: 3 credits

### U.S. Diversity: 3 credits

### Communications: 10 credits

(C or better grade in ENGL 150 and ENGL 250)

Additionally: Each student needs to take 3 credits of a US Diversity (usually covered by LA 272) and 3 credits of an International Perspectives course (usually covered by LA 373). Students also need to take at least 6 credits of 300 level or above in the combined areas of communication, science, math, humanities, and social science (6 total from all the areas).

### Graduate Study

The department offers the Master of Landscape Architecture (MLA), an accredited professional degree designed for students with or without an undergraduate degree in landscape architecture. The degree provides skills and knowledge as measured by the Landscape Architectural Accreditation Board (LAAB) and the licensing exam for students seeking to practice as a licensed professional in the public or private sectors. The MLA degree also offers competency for students interested in post-professional study as it provides the skills and knowledge for the application of research and/or scholarly methods to professional practice.
The MLA program offers three concentration tracks in the following topical areas — Theory/Urbanism, Technology/Ecology, Advocacy/Community — through coursework and an optional thesis and creative component. The concentration in one of the three tracks will be determined by the student in consultation with his/her adviser. Concentration electives may be selected from within the college and university from an approved list and up to three (3) credits from within the department. In their final year, students may undertake a creative component or thesis option with the approval of their major professor and the department Graduate Committee.

Students are also able to pursue double degrees with Master of Community and Regional Planning (MLA/MCRP), Master of Urban Design (MLA/MUD), and Master of Design in Sustainable Environments (MLA/MDesSE). Students interested in the double-degree programs should contact the departments to receive a detailed description of requirements.

The department also offers courses in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

**Design and Planning: 33 credits**

- L A 601 Design Representation 3
- L A 602 Studio I – Land/Form & Plant/Scapes 6
- L A 603 Studio II – Living Systems 6
- L A 604 Studio III – City Matters 6
- L A 605 Studio IV – LandWorks/LandDigits 6
- DSN S 546 Interdisciplinary Design Studio 6

or 2 cr. L A 580 Thesis, Creative Comp. Tutorial + 4 cr. L A 599 Creative Comp. or L A 699 Thesis

**Theory/History/Urbanism: 14 credits**

- L A 571 Landscape Architectural Theory 3
- L A 590D Special Topics: History/Theory/Criticism 3

or L A 578D: LA History elective*

Concentration Theory Elective *** 3

- L A 543 Colloquium I 1
- L A 545 Colloquium II 1

**Technology/Ecology/Materiality: 14 credits**

- L A 557 Computer Applications 3
- L A 583 Landscape TopoGraphics 3
- L A 581 Landscape Structure 3
- L A 542 Professional Practice & Enterprise 2
- L A 522 Advanced Plant Technology 3

**Advocacy/Planning/Policy: 9 credits**

- SUS E 531 Human Dimensions of Sustainability 3
- L A 593 Environmental Justice in Built Environments 3
- Planning Elective** 3

**Concentration Electives: 9 credits**

Elective: 3 credits

**Total 82 credits**

Approved Distribution Electives:

- LA History elective (3 credits)*
- Courses offered on term-by-term basis
  - L A 590D: Special Topics: History
  - L A 578D: Landscape Architecture: History

Planning elective (3 credits)**

- L A 591: Environmental Law and Planning
- C R P 561: Planning Theory for Practice
- C R P 592: Land Use and Development Regulation Law
- C R P 529: International Planning in Developing Countries

Theory elective (3 credits)***

Theory course in your concentration area (Theory, Technology or Advocacy) — Select from CRP, ARCH, MUD, SUS E, IND D, or other relevant field in the college or university.

Concentration Track Electives

1. Theory/History/Urbanism MLA/MUD
2. Advocacy/Planning/Community MLA/CRP
3. Technology/Ecology/Materiality MLA/MDesSE

Concentration track electives from approved list on separate sheet.

Students may also take courses from other departments across college.

**Elective**

3 credit non-LA course from college or university courses (incl. LA 509: Field Trip)

**Courses primarily for undergraduates:**

- L A 171: City Play!
  
  (3-0) Cr. 3.

  Exploration of play in cities. Introduction to two important concepts: how play has become a central theme in the economic development and sustainability of cities around the world; and, how the design of cities needs to make room for equitable access to play for everyone.

  Meets U.S. Diversity Requirement

**L A 201: Studio: Landscape Interpretation and Representation**

(0-12) Cr. 6. F.

*Prereq: Enrollment in the professional program*

Reading and representing varied landscapes; development of aesthetic sensitivity to the geomorphology, vegetation, and cultural influences on these landscapes. Small-scale interventions and exploration of landscape phenomena and change. Emphasis on a variety of documentation and drawing techniques.

**L A 202: Studio: Site Design I**

(0-12) Cr. 6. S.

*Prereq: L A 201*

Fundamental issues of landscape planning and design at a site scale. Projects introduce a variety of (objective and subjective) site inquiry methods, space and place making, and sensitive integration of architecture and landscape for specific land uses. User needs, precedent study, programming, site engineering, planting design, and outdoor space design expressed through a variety of three-dimensional modeling, graphic, and written media.

**L A 211: Digital Design Methods for Landscape Architecture**

(3-0) Cr. 3. S.

Introduction of computer applications and standards used by landscape architects and other design professions and their place in a replicable work flow. Foundational knowledge and basic skills in a range of industry-standard 2D, 3D, and 4D computer applications used for design development and communication.

**L A 221: Native Plants of the Savanna Ecotone**

(2-3) Cr. 3. F.

*Prereq: Enrollment in the professional program*

Observation and study of the wetland, prairie, and woodland vegetation native to the savanna ecotone. Emphasis on plant communities, their distribution, structure, habitat and aesthetics. Plant identification and use in landscape design. Precedent and case studies of vegetation preservation, restoration and use in built works.

**L A 222: Introduced Plants of the Midwest**

(2-3) Cr. 3. S.

*Prereq: L A 221*

Identification, observation, and study of plants introduced to cultivation in the Midwest region. Plant cultural requirements, including adaptations to climate changes, solar exposure, and soil conditions. Investigation of history of plant introduction and use in designed landscape, including consequent impacts of plant introduction such as plant invasion. Introduction to planting design at the site scale, including matching plant cultural requirements to site conditions, functional uses of plants and expressive composition using plant form, texture and color.

**L A 241: Developing Identity as a Landscape Architect**

(1-0) Cr. 1. F.

*Prereq: Enrollment in the professional program*

Development of life skills for conflict resolution, effective interpersonal communication, and CPR/First Aid. Examination of personal values as they relate to the backgrounds, abilities, attitudes, and values of others; exploration of how these influence personal decision-making and group interaction. Reading, discussion, class activities, journal-keeping, writing. Offered on a satisfactory-fail basis only.

**L A 270: Foundations in Natural Resource Policy and History**

(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.

The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.

**L A 272: Cultural Landscape Studies**

(3-0) Cr. 3. F.

*Prereq: Enrollment in the professional program*

Exploration of landscapes, from broad settlement patterns to individual sites. Investigation of relationships between vernacular and designed landscapes. Landscapes considered as modes of cultural production that shape and are shaped by social, political, and economic processes. Lectures, reading, field studies, and writing.

Meets U.S. Diversity Requirement

**L A 274: The Social and Behavioral Landscape**

(3-0) Cr. 3. S.

Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips.

Meets U.S. Diversity Requirement

**L A 281: Investigating Landscape Form, Process, and Detail**

(1-6) Cr. 3. F.

*Prereq: Enrollment in professional program*

Exploration of the poetics and principles of landscape construction. Investigation and interpretation of landform and geomorphic processes such as the hydrologic cycle, erosion, and sedimentation. Close observation and representation of detail design, with an emphasis on material types, their connections, and weathering. Readings, field studies, and drawings in analog and digital media.
L A 282: Landscape Dynamics
(2-2) Cr. 3. S.
Prereq: Sophomore standing
Understand design implications presented by geotechnical and ecological processes in the landscape including ecology, vegetation, soils and water. Understand the influence of landforms, geology, plants, soils, and water on the creation of landscape designs. Course relates current issues including water quality impairment, erosion, and invasive species with design strategies such as stormwater management, soil quality management, and plant community restoration. Field trips.

L A 301: Site Design II
(0-12) Cr. 6. F.
Prereq: L A 202
Development of half-acre to hundred-acre landscape design and planning proposals, potentially in collaboration with students in other programs. Apply critical methodological frameworks to shape site systems while providing appropriate support for diverse user groups and creating culturally meaningful places. Assess and interpret a program of use, organize and objective site inventory and analysis, develop functional and poetic design strategies for infrastructure and natural systems, and craft artistic and functionally explicit landscape architectural proposals. Development of appropriate technique and high level of craft in representations to support design thinking process and final scheme presentation.

L A 302: Ecological Design at the Regional Scale
(0-12) Cr. 6. S.
Prereq: L A 282, L A 301, L A 381 and NREM 120
Application of ecological theories and processes in design and planning at the hundred plus-acre scale specifically focusing on urban and urban fringe landscapes. Apply advanced landscape analysis of soil, water, and vegetation utilizing geographic information systems. Particular focus on stream and wetland restoration, mitigation, and regulations and developing design representations for public use.

L A 309: Field Travel
Cr. 1. Repeatable, maximum of 2 times. F.S.S.S.
Prereq: Enrollment in the professional program and permission of instructor
Observation of and reflection on professional practice and landscapes in urban, rural, and wilderness areas. Offered on a satisfactory-fail basis only.

L A 322: Fundamentals of Planting Design
(2-3) Cr. 3.
Prereq: L A 221
The art and techniques of creating plant compositions in the landscape that respond to cultural and biophysical contexts. Investigation of soil properties and plant/soil relationships relevant to the built environment. Methods of site inventory and analysis, developing plant palettes and composing plant assemblages that address expressive and functional needs. Introduction to the techniques of preparing planting plans, including standards for plant selection, plant lists and plant specification.

L A 341: Contemporary Landscape Architecture
(1-0) Cr. 1. S.
Prereq: L A 301
Exploration of contemporary landscape architectural practice through individualized research into practicing firms. Preparation of paper and presentation outlining broad framework and specific parameters of a selected area of contemporary practice using specific projects as examples. Work may result in invitation of current practitioner(s) as a lecture series or event. Resume and portfolio preparation in advance of required off-campus semester (L A 444 A, B or C).

L A 371: History of Modern Landscapes, 1750 to Present
(3-0) Cr. 3. S.
Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

L A 373: Gardens and Landscapes from Antiquity to 1750
(3-0) Cr. 3. F.
Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers. Meets International Perspectives Requirement.
L A 381: Shaping the Land
(3-0) Cr. 3. F.
Prereq: L A 282 and MATH 143 or MATH 145
Design of landforms to achieve aesthetic, functional, and safety goals. Landform changes to accommodate human uses and activities. Impacts and implications of landform transformation on the surrounding environment. Surface and subsurface drainage design, storm water runoff best management practices, contour manipulation to incorporate slopes, swales, culverts, pads, retaining walls, walks, steps, terraces, buildings, and other structures in the landscape. Road layout and alignment, parking lot design, and earthwork volume estimates. Design communication using CAD, perspectives, cross-sections, contour maps, landform models, and narratives. Class exercises, case study precedents, and preliminary construction documents.

L A 401: Community Design
(0-12) Cr. 6. F.
Prereq: L A 402
Physical planning and design of places utilizing community-based methods. Projects address social and cultural dimensions of placemaking such as reuse of abandoned sites, in-fill development, and community visioning. Emphasis on development of user-client relationship skills and design research. Integrated seminar component.

L A 401H: Community Design: Honors
(0-12) Cr. 7. F.
Prereq: L A 402
Physical planning and design of places utilizing community-based methods. Projects address social and cultural dimensions of placemaking such as reuse of abandoned sites, in-fill development, and community visioning. Emphasis on development of user-client relationship skills and design research. Integrated seminar component.

L A 402: Urban Design
(0-12) Cr. 6. F.
Prereq: L A 302
Comprehensive planning and design for urban sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component.

L A 402H: Urban Design: Honors
(0-12) Cr. 7. F.
Prereq: L A 302
Comprehensive planning and design for urban sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component.

L A 403H: Senior Thesis Preparation Tutorial
Cr. 2. F.
Prereq: L A 402, permission of thesis advisor, enrollment in Honors program
Preparation for senior thesis.

L A 404: Advanced Landscape Architectural Design
(0-12) Cr. 6. Repeatable, maximum of 2 times. S.
Prereq: L A 401
Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.

L A 404H: Advanced Landscape Architectural Design: Honors
(0-12) Cr. 6-7. Repeatable, maximum of 2 times. S.
Prereq: L A 401
Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.

L A 405H: Senior Thesis
(0-15) Cr. 6. S.
Prereq: L A 401, L A 402, L A 403, enrollment in Honors program and permission of adviser, chair and thesis adviser
Individual advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are expected.

L A 417: Urban and Peri-urban Watershed Assessment
(Dual-listed with L A 517). (Cross-listed with ENV S). (2-3) Cr. 3. F.
Prereq: Junior classification and 6 credits of natural science
Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.
L A 442: Professional Practice
(Dual-listed with L A 542). (2-0) Cr. 2. S.
Prereq: L A 481
Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion.

L A 444: Landscape Architecture Independent Educational Enrichment
Cr. R. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444A: Landscape Architecture Independent Educational Enrichment: Professional Internship
Cr. R. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444B: Landscape Architecture Independent Educational Enrichment: Study Abroad
Cr. R. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444C: Landscape Architecture Independent Educational Enrichment: National Student Exchange
Cr. R. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 454: Fundamentals of Remote Sensing
(Dual-listed with L A 554). (Cross-listed with C R P). (3-0) Cr. 3. F
Prereq: CRP 351 or equivalent or permission of the instructor
Introduction to remote sensing techniques needed for basic analysis of satellite images, including: filtering and conflation techniques, stacking, pan sharpening, image rectification, image enhancement, unsupervised and supervised classification. Practical applications in a variety of topics to understand how to interpret images.

L A 458: Web Mapping/GIS
(Dual-listed with L A 558). (Cross-listed with C R P). (2-2) Cr. 3.
Prereq: CRP 451/551, LA 302. GEOL 452/552 or instructor permission.
Use and development of online mapping tools to support participatory GIS, Volunteered Geographic Information, information sharing, geodesign and decision making actions. Geoprocessing and Web Scripting/coding and user interface design. Laboratory emphasis practical applications and uses of Web GIS.

L A 459: Digital Design Methods for Landscape Architecture
(Dual-listed with L A 559). (3-0) Cr. 3. S.
Introduction to digital tools used by landscape architects for design communication, visualization, and design development, with emphasis on 3D modeling and workflow interoperability.

L A 461I: Introduction to GIS
(Cross-listed with ENSCI, ENV S, IA LL). Cr. 4. SS.
Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management.

L A 478: Topical Studies in Landscape Architecture
(Dual-listed with L A 578). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478A: Topical Studies in Landscape Architecture: Landscape Design
(Dual-listed with L A 578A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478B: Topical Studies in Landscape Architecture: Planting Design
(Dual-listed with L A 578B). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478C: Topical Studies in Landscape Architecture: Construction
(Dual-listed with L A 578C). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.
L A 478D: Topical Studies in Landscape Architecture: History/Theory/Criticism
(Dual-listed with L A 578D). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478E: Topical Studies in Landscape Architecture: Landscape Planning
(Dual-listed with L A 578E). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478F: Topical Studies in Landscape Architecture: Urban Design
(Dual-listed with L A 578F). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478G: Topical Studies in Landscape Architecture: Graphics
(Dual-listed with L A 578G). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478H: Topical Studies in Landscape Architecture: Honors
Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478I: Topical Studies in Landscape Architecture: Interdisciplinary Studies
(Dual-listed with L A 578I). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478J: Topical Studies in Landscape Architecture: International Studies
(Dual-listed with L A 578J). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 478K: Topical Studies in Landscape Architecture: Computer Applications
(Dual-listed with L A 578K). Cr. 2-3. Repeatable. F.S.S.
Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478L: Topical Studies in Landscape Architecture: Ecological Design
(Dual-listed with L A 578L). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections.

L A 478M: Topical Studies in Landscape Architecture: Landscape Architecture: Social/Behavioral
(Dual-listed with L A 578M). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections.

L A 478N: Topical Studies in Landscape Architecture: Natural Resources
(Dual-listed with L A 578N). Cr. 2-3. Repeatable, maximum of 3 times.
F.S.S.
Prereq: L A 202 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections.

L A 481: Landscape Construction
(3-0) Cr. 3. F.
Prereq: L A 381
Development of construction details with emphasis on materials and their aesthetic and functional uses as building materials. Explore characteristics and uses of construction materials and application of wood systems, paving systems, retaining walls, masonry and concrete systems, and metals; investigate structural theory of wood systems. Preliminary preparation of construction documents.

L A 482: Advanced Landscape Construction
(3-0) Cr. 3. S.
Prereq: L A 481
Advanced site construction issues, including proposal preparation, construction documentation, project scheduling, estimating, and specification writing.

L A 490: Independent Study
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.
**L A 490A: Independent Study: Landscape Design**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490B: Independent Study: Planting Design**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490C: Independent Study: Construction**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490D: Independent Study: History/Theory/Criticism**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490E: Independent Study: Landscape Planning**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490F: Independent Study: Urban Design**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490G: Independent Study: Graphics**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490H: Independent Study: Honors**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490I: Independent Study: Interdisciplinary Studies**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490J: Independent Study: International Studies**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490K: Independent Study: Computer Applications**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490L: Independent Study: Ecological Design**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490M: Independent Study: Social/Behavioral**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 490N: Independent Study: Natural Resources**
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.
Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.

**L A 491: Environmental Law and Planning**
(Dual-listed with L A 591). (Cross-listed with C R P, ENV S). (3-0) Cr. 3. S.
Prereq: 6 credits in natural sciences
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Courses primarily for graduate students, open to qualified undergraduates:

**L A 509: Field Travel**
Cr. 1. Repeatable, maximum of 2 times.
Prereq: Enrollment in the professional program and permission of instructor
Observation of and reflection on professional and academic practice and landscapes. Field study and travel to conferences and educational events. Reading and final report. Offered on a satisfactory-fail basis only.

**L A 517: Urban and Peri-urban Watershed Assessment**
(Dual-listed with L A 417). (2-3) Cr. 3. F.
Prereq: Junior classification and 6 credits of natural science
Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.
L A 522: Advanced Plant Technology
(2-2) Cr. 3. F.
Prereq: Junior or graduate standing
Introduction to the science that supports green technologies. Plant and soil design for performance in the built environment. Design studies and lab explorations will complement readings, lecture and project case study presentations by practitioners. Green streets, green roofs, biophyto-remediation and other technologies are introduced. Final project integrates scientific and technical knowledge in a holistic landscape design.

L A 541: Design Inquiry
(3-0) Cr. 3. S.
Prereq: Graduate standing
Examination of design inquiry and introduction to research methods relevant to design. Consideration of where knowledge comes from, and how different research methods help create knowledge in various contexts. Readings, discussions, and sketch problems. Preparation of a written research proposal.

L A 542: Professional Practice
(Dual-listed with L A 442). (2-0) Cr. 2. S.
Prereq: L A 481
Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion.

L A 543: Colloquium I: Landscape Architecture Research
(0-1) Cr. 1. S.
Prereq: Graduate standing.
Graduate forum on current research in landscape architecture. Weekly presentations of scholarly and professional work by department faculty. Readings, discussions, and development of student research focus. Offered on a satisfactory-fail basis only.

L A 545: Colloquium II: Interdisciplinary Research
Cr. 1. Repeatable. F.
Prereq: LA 543 or graduate standing.
Student-run graduate forum on current research in landscape architecture and related disciplines. Weekly presentations by invited faculty from the departments across the College of Design, University, and professional guests. Readings, discussions, and writing. Offered on a satisfactory-fail basis only.

L A 554: Fundamentals of Remote Sensing
(Dual-listed with L A 454). (Cross-listed with C R P). (3-0) Cr. 3. F.
Prereq: CRP 351 or equivalent or permission of the instructor
Introduction to remote sensing techniques needed for basic analysis of satellite images, including: filtering and conflation techniques, stacking, pan sharpening, image rectification, image enhancement, unsupervised and supervised classification. Practical applications in a variety of topics to understand how to interpret images.

L A 557: Landscape Parametrics & Design Coding
(3-0) Cr. 3. F.
Prereq: Junior classification
Introduction to parametric landscape design through traditional and visual computer programming of the landscape palette. Geometric parameters for terrain, vegetation, water, weather and lighting effects are modeled and developed algorithmically. Computational thinking, logic and computer graphics interactivity are combined to produce stand-alone software application prototypes that address core landscape design principles.

L A 558: Web Mapping/GIS
(Dual-listed with L A 458). (Cross-listed with C R P). (2-2) Cr. 3.
Prereq: CRP 451/551, LA 302. GEOL 452/552 or instructor permission.
Use and development of online mapping tools to support participatory GIS, Volunteered Geographic Information, information sharing, geodesign and decision making actions. Geoprocessing and Web Scripting/coding and user interface design. Laboratory emphasis practical applications and uses of Web GIS.

L A 559: Digital Design Methods for Landscape Architecture
(Dual-listed with L A 459). (3-0) Cr. 3. S.
Introduction to digital tools used by landscape architects for design communication, visualization, and design development, with emphasis on 3D modeling and workflow interoperability.

L A 567: Advanced GIS Landscape Modeling
(0-6) Cr. 3.
Prereq: L A 302 or C R P 451/C R P 551
Application of Geographic Information Systems (GIS) modeling techniques to landscape planning and management issues. Selection, acquisition, and conversion of digital landscape data. Modeling applications for studio projects, outreach projects, and research projects.
L A 571: Landscape Architectural Theory
(3-0) Cr. 3. F.
Prereq: graduate classification or permission of instructor
Examination of the development of landscape architectural ideas in their historical contexts and in relation to social and cultural practices. Emphasis on exposure to key modern and contemporary texts and projects in landscape architecture, architecture, art, and related fields. Readings, discussions, and writings.

L A 578: Topical Studies in Landscape Architecture
(Dual-listed with L A 478). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578A: Topical Studies in Landscape Architecture: Landscape Design
(Dual-listed with L A 478A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578B: Topical Studies in Landscape Architecture: Planting Design
(Dual-listed with L A 478B). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578C: Topical Studies in Landscape Architecture: Construction
(Dual-listed with L A 478C). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578D: Topical Studies in Landscape Architecture: History/Theory/Criticism
(Dual-listed with L A 478D). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578E: Topical Studies in Landscape Architecture: Landscape Planning
(Dual-listed with L A 478E). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578F: Topical Studies in Landscape Architecture: Urban Design
(Dual-listed with L A 478F). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578G: Topical Studies in Landscape Architecture: Graphics
(Dual-listed with L A 478G). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578H: Topical Studies in Landscape Architecture: Interdisciplinary Studies
(Dual-listed with L A 478H). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578I: Topical Studies in Landscape Architecture: International Studies
(Dual-listed with L A 478I). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections.

L A 578J: Topical Studies in Landscape Architecture: Computer Applications
Cr. 2-3. Repeatable. F.S.S.
Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578K: Landscape Architecture: Computer Applications
Cr. 2-3. Repeatable. F.S.S.
Prereq: L A 202 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections.

L A 578L: Topical Studies in Landscape Architecture: Ecological Design
(Dual-listed with L A 478L). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.
Prereq: L A 202 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
LA 578M: Topical Studies in Landscape Architecture: Landscape Architecture: Social/Behavioral  
(Dual-listed with LA 478M). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.  
Prereq: LA 202 or senior classification or graduate standing  
Offerings vary with each term; check with department for available sections.

LA 578N: Topical Studies in Landscape Architecture: Natural Resources  
(Dual-listed with LA 478N). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.  
Prereq: LA 202 or senior classification or graduate standing  
Offerings vary with each term; check with department for available sections.

LA 580: Thesis, Creative Component Tutorial  
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.  
Prereq: Permission of major professor  
Hands-on participation in a creative or research activity in the student's area of specialization. Development of a detailed prospectus that defines the thesis or creative component.

LA 583: Landscape TopoGraphics  
(3-0) Cr. 3. F.  
Prereq: LA 602  
Design of landforms to achieve aesthetic, functional, and safety goals. Impacts and implications of landform transformation on the surrounding environment. Design communication using CAD, perspectives, cross-sections, contour maps, landform models, and narratives. Class exercises, case study precedents, and preliminary construction documents.

LA 587: Landscape Structures  
(1-4) Cr. 3. S.  
Prereq: LA 583  
Introduction to construction practices in landscape architecture. Emphasis on the aesthetic and functional components of built environments including materials, assemblies and techniques; integrate the principles of sustainability as they relate to current and emerging construction methods, materials and technologies. Introduction to the preparation of construction documents.

LA 590: Special Topics  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Graduate standing  
Investigation of a topic of special interest to the student.

LA 590A: Special Topics: Landscape Design  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.

LA 590B: Special Topics: Planting Design  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.

LA 590C: Special Topics: Construction  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.

LA 590D: Special Topics: History/Theory/Criticism  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.

LA 590E: Special Topics: Landscape Planning  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.

LA 590F: Special Topics: Urban Design  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.

LA 590G: Special Topics: Graphics  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.

LA 590I: Special Topics: Interdisciplinary Studies  
Cr. 1-6. Repeatable, maximum of 2 times. F.S.SS.  
Prereq: Approval of instructor and Director of Graduate Education on required form  
Investigation of a topic of special interest to the student.
L A 590J: Special Topics: International Studies
Cr. 1-6. Repeatable, maximum of 2 times. F.S.S.
Prereq: Approval of instructor and Director of Graduate Education on required form
Investigation of a topic of special interest to the student.

L A 590K: Special Topics: Computer Applications
Cr. 1-6. Repeatable, maximum of 2 times. F.S.S.
Prereq: Approval of instructor and Director of Graduate Education on required form
Investigation of a topic of special interest to the student.

L A 590L: Special Topics: Ecological Design
Cr. 1-6. Repeatable, maximum of 2 times. F.S.S.
Prereq: Approval of instructor and Director of Graduate Education on required form
Investigation of a topic of special interest to the student.

L A 590M: Special Topics: Social/Behavioral
Cr. 1-6. Repeatable, maximum of 2 times. F.S.S.
Prereq: Approval of instructor and Director of Graduate Education on required form
Investigation of a topic of special interest to the student.

L A 590N: Special Topics: Natural Resources
Cr. 1-6. Repeatable, maximum of 2 times. F.S.S.
Prereq: Approval of instructor and Director of Graduate Education on required form
Investigation of a topic of special interest to the student.

L A 591: Environmental Law and Planning
(Dual-listed with L A 491). (Cross-listed with C R P). (3-0) Cr. 3. S.
Prereq: 6 credits in natural sciences
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

L A 594: Environmental Justice in Built Environments
(3-0) Cr. 3. S.
Prereq: Graduate standing or senior classification.
Examination of the equitable distribution of environmental burdens and benefits for sustainable and resilient cities. Focus on impact of climate change, social exclusion, and physical isolation on cumulative risk amongst vulnerable populations. Synthesis of recent social and environmental research to develop innovative physical planning and urban design strategies that support healthy behaviors.

L A 599: Creative Component
Cr. 1-8. Repeatable, maximum of 8 credits. F.S.S.
Prereq: Permission of major professor
Comprehensive study and original development of a project selected by the student and approved by the major professor. Completed project must be submitted to and approved by a graduate faculty committee as evidence of mastery of the principles of landscape architecture.

Courses for graduate students:

L A 601: Studio I: Design Representation
(3-0) Cr. 3. F.
Prereq: Graduate standing
Introduction to history, techniques, and conventions of landscape architecture representation. Production of design drawings that facilitate critical thinking, the testing of design ideas, and effective communication. Use of two- and three-dimensional media, both analog and digital.

L A 602: Studio II: Land Form and Plant Scape
(0-12) Cr. 6. S.
Prereq: L A 601
Landscape design integrating knowledge of land patterns, plant ecosystems, and human processes. Project involve landform and plants at varied scale of design. Emphasis on competencies in design based in natural process, human behavior, and representation.

L A 603: Studio III: Performance Landscapes
(0-12) Cr. 6. S.
Prereq: L A 602
Theory and methods of landscape design at a variety of scales to achieve desired cultural and biophysical impacts. Development and use of performance metrics drawn from design, humanities, and science. Construction of integrated rhetorical structures of representation and analysis and critical viewpoints to create rigorous design "arguments" and meaningful, just and vibrant environments.

L A 604: Studio IV: City Matters
(0-12) Cr. 6. S.
Prereq: L A 603
Exploration of sociopolitical, ecological, and visual-spatial conditions of the urban environment through design at multiple scales. Focus on urban projects that highlight the complexity of human, ecological, and emerging infrastructural systems. Development of innovative strategies for sustainable, healthy, and just cities. Special attention is paid to new technologies and building material in cities.
L A 605: Studio V: Land Works/Land Digits
(0-12) Cr. 6.
Prereq: L A 604
Landscape design focusing on broadening the representational palette for landscape architectural concepts applied to complex sites at multiple scales. Emphasis on ideation and technical competency through advanced conceptualization, performance metrics, and skills in design research, digital representation, and teamwork.

L A 699: Thesis Research
Cr. 1-8. Repeatable, maximum of 8 credits. F.S.S.
Prereq: Permission of major professor
Advanced and original scholarship in a specialized area. Culminates in a thesis document submitted to and approved by a graduate faculty committee as evidence of mastery of research in landscape architecture.

Design Studies
Interdepartmental Undergraduate Program
http://www.design.iastate.edu

The Design Studies programs bring together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design, art and planning fields.

Core Design Program
Four Design Studies courses constitute the Core Design Program: Design Studio I (DsnS 102), Design Representation (DsnS 131), Design Cultures (DsnS 183) and Design Collaborative (Dsn S 115). Full or partial credit of the Core Design program is required for all undergraduate students in the College of Design.

Minor—Critical Studies in Design
The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.

Minor—Design Studies
The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multi-disciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minor—Digital Media
The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of design, art and planning. This minor is open to all undergraduate students at Iowa State University.

Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

Total Credits 11.5

Courses primarily for undergraduates:

DSN S 102: Design Studio I
(1-6) Cr. 4.
A foundation design studio exploring two and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Creative processes, visual order, materials, and critical thinking are investigated through studio projects. Lectures and discussions cover the topics introduced in studios.

DSN S 110: Design Exchange Seminar I
(0-2) Cr. 1. F.
Prereq: Member of Design Exchange Learning Community
Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 111: Design Exchange Seminar II
(0-2) Cr. 1. S.
Prereq: Member of the Design Exchange Learning Community
Development and clarification of career and academic plans. Offered on a satisfactory-fail basis only.

DSN S 115: Design Collaborative Seminar
(1-0) Cr. 0.5.
Prereq: Member of Design Collaborative Learning Community
Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.
**DSN S 131: Drawing I**
(1-6) Cr. 4.
An introduction to methods of visual thinking and drawing through studio experiences and lectures. All design fields utilize visual communication and drawing. Focus on the use of drawing as a method for creative problem solving, design development and visual communication. Explore, from observation and imagination, the use of fast sketching and in-depth drawing, using various scales, mediums and processes.

**DSN S 145: Diversity in Art**
Cr. 1. Repeatable, maximum of 3 credits. S.
Prereq: None
Discussion on issues of diversity and inclusion utilizing the Art on Campus and University's Permanent Collection. Topics include ethnic heritage, family background, religious traditions, and interpersonal relationships, with a significant focus on instilling visual analysis skills. None

**DSN S 183: Design in Context**
(3-0) Cr. 3.
Explores designed media, objects, places, spaces, structures, and systems as products of varied and often intersecting contexts. Using historical and contemporary case studies, investigates how cultural, economic, environmental, spatial, social, and temporal contexts, among others, affect design. Explores in particular how design addresses complex and multifaceted problems.

**DSN S 232: Digital Design Communications**
(3-0) Cr. 3.
Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

**DSN S 301: Study Abroad Preparation Seminar**
(1-0) Cr. 1. Repeatable.
Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 9 or more credits. Offered on a satisfactory-fail basis only.

**DSN S 302: Design Leadership Seminar**
(1-2) Cr. 2. Repeatable, maximum of 4 credits.
Prereq: Selection as a peer mentor for the Core Design program.
For students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Offered on a satisfactory-fail basis only.

**DSN S 303: Design Ambassadors**
(1-2) Cr. 1-2. Repeatable, maximum of 4 credits.
Prereq: Admittance into one of the professional programs in the College of Design
Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Offered on a satisfactory-fail basis only.

**DSN S 310: Practical Experience**
Cr. R.
Prereq: Permission of adviser or Coordinator of Design Studies
Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less. Offered on a satisfactory-fail basis only.

**DSN S 332: Multi-Dimensional Digital Design Communication**
Cr. 3.
Prereq: Arch 230, ARTGR 275, DSN S 232, or permission of the instructor
Investigations if interoperable digital-design tools, techniques and methods directed at human scale interactive hybrid design from ideation to visualization, synthesis to analysis, and realization to fabrication.

**DSN S 333: Time-Based Digital Media**
(Cross-listed with DES). (3-0) Cr. 3. S.
Prereq: DSN S 232 or equivalent.
Introduction to various time-based digital media tools to develop basic skills including sequencing, storytelling, animation, sound editing, and video production.

**DSN S 445: Public Art/Public Space**
(3-0) Cr. 3.
Prereq: Junior Standing, DSN S 102, DSN S 131, DSN S 183
Exploration of the history, precedents, and practice of public art and public space with a focus on developments since 1970 in the United States and abroad. Course includes development of a proposal for a site specific work of art.
Meets U.S. Diversity Requirement

**DSN S 446: Interdisciplinary Design Studio**
(0-12) Cr. 4-6. Repeatable, maximum of 18 credits.
Prereq: Junior classification in a curriculum in the College of Design and permission of instructor
Advanced interdisciplinary design projects.
DSN S 446H: Interdisciplinary Design Studio: Honors
(0-12) Cr. 5-7. Repeatable, maximum of 18 credits.
Prereq: Junior classification in a curriculum in the College of Design and permission of instructor
Advanced interdisciplinary design projects.

DSN S 478D: Landscape Architecture: History/Theory/Criticism
(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478E: Landscape Architecture: Landscape Planning
(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478G: Landscape Architecture: Graphics
(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478I: Landscape Architecture: Interdisciplinary Studies
(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478J: Landscape Architecture: International Studies
(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478K: Computer Applications
(Dual-listed with DSN S 578). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S.
Prereq: L A 371 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 490: Independent Study
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.

DSN S 490A: Independent Study: History
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.

DSN S 490B: Independent Study: Technology
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.

DSN S 490C: Independent Study: Communications
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.

DSN S 490D: Independent Study: Design
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.

DSN S 490E: Independent Study: Entrepreneurship
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.

DSN S 490F: Independent Study: Social/Behavioral
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.

DSN S 490G: Independent Study: Outreach
Cr. 1-4. Repeatable, maximum of 9 credits.
Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.
Sustainable Environments

Master of Design in Sustainable Environments

The Master of Design in Sustainable Environments (MDesSE) is an advanced interdisciplinary degree that focuses on holistic design strategies for the production of sustainable, resilient environments and artifacts. MDesSE students and faculty constitute a multidisciplinary, highly interactive community that is deeply engaged in understanding, promoting, and conceiving sustainable practices in design, planning, and artistic production. Students from a variety of backgrounds such as design, art, planning, education, engineering, science, etc., engage in research projects and are challenged to develop individual sustainable design strategies for issues of current relevance that conserve resources, ameliorate ecological problems, and promote social, political, and economic justice.

Coursework focuses on developing skills in modes of representation and information dissemination; foundational and emerging theoretical discourse; as well as research methods and design interventions. The degree concludes with an integrated capstone experience through a student-defined thematic project. Capstone projects are situated in different parts of the world and include themes that draw upon each student’s specific area of interest while being informed by the theories, skills, methods, and tactics learned throughout the MDesSE program.

The Master of Design in Sustainable Environments degree consists of 35 credits, typically distributed over three semesters (fall, spring, and summer); however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in art (BFA, MFA), architecture (BArch, MArch), graphic design (BFA, MFA), interior design (BFA, MFA), industrial design (BID, MID), landscape architecture (BLA, MLA), community and regional planning (BSCRP, MCRP, MUP), or engineering. Graduate students can also pursue the following double degrees in the College of Design: MArch/MDesSE, MCRP/MDesSE, MFA in IVA/MDesSE and MLA/MDesSE.
Courses primarily for graduate students, open to qualified undergraduates:

**SUS E 501: Sustainable Design Studio I**  
(3-6) Cr. 6.  
*Prereq: Graduate standing or senior classification with instructor permission.*  
Exploring the challenges faced in implementing social, environmental, and economic sustainable solutions, this studio engages students in an interdisciplinary, team-oriented and project-based learning environment. Projects will include theoretical investigations and applications of an interdisciplinary design process through brief readings and discussions.

**SUS E 502: Sustainable Design Studio II**  
(0-10) Cr. 5.  
*Prereq: SUS E 501, SUS E 512, SUS E 531*  
This advanced studio provides a community-based context for an interdisciplinary design team to work on a variety of faculty-directed projects including funded, basic, and applied research. Coursework addresses sustainable design at multiple scales, engaging both systems and artifacts. Field trips.

**SUS E 511: Sustainable Design Colloquium I**  
(3-0) Cr. 3.  
*Prereq: Admission to MDSE program*  
Study and discuss practices of sustainable design and design research. Investigate responsibilities, roles, technologies and methods for studying and advancing the art and science of designing sustainable environments.

**SUS E 512: Sustainable Design Colloquium II**  
(1-0) Cr. 1.  
*Prereq: SUS E 511*  
A graduate student-led seminar designed to foster the knowledge and skills to support innovation, entrepreneurship, and leadership in the field of sustainable design. Invitation of outside speakers.

**SUS E 513: Sustainable Design Colloquium III**  
Cr. 3.  
*Prereq: Sus E 540, Sus E 502*  
Research expands and integrates findings from the prerequisite courses. Students develop independently-defined research to produce a comprehensive and conclusive written document.

**SUS E 521: Foundation of Sustainable Design**  
(3-0) Cr. 3.  
*Prereq: Graduate standing or senior classification with instructor permission.*  
Introduction to the broad frameworks and tools for implementing sustainability among a variety of environments, industries, and enterprises. Investigates the role and opportunity for sustainable design strategies.

**SUS E 531: Human Dimensions of Sustainability**  
(3-0) Cr. 3.  
*Prereq: Graduate standing or senior classification with instructor permission.*  
This seminar provides students from multiple disciplines with a grounding in designers’ interactions with clients, consumers, communities, cultures, and biospheres. Through a review of literature and the production of new case studies in sustainable design, students discover and represent conditions in which products of design operate across scales, markets, social conditions, geographic domains, academic disciplines, and zones of professional responsibility.

**SUS E 540: Methods for Sustainable Design**  
(3-0) Cr. 3. S.  
*Prereq: senior or graduate standing.*  
Overview of qualitative, quantitative and design research methods. In-depth application of methods relevant to capstone project proposal development (SUS E 502). Proposal must address research questions, articulation of research methods and preliminary findings grounded within contemporary theoretical discourse on Sustainable Environments.

**SUS E 550: Making Resilient Environments**  
(Cross-listed with C R P). (3-0) Cr. 3. S.  
*Prereq: senior or graduate standing.*  
Major theories and ideas revolving around the concept of resilience. Assessing the social and political processes associated with policy making for resilience. Application of the concept of resilience in order to understand and evaluate environments. Evaluate the different approaches toward resilience and develop an understanding of the relationship between sustainability and resilience. Case studies of communities that proactively prepare for, absorb, recover from, and adapt to actual or potential future adverse events.

**Urban Design**

The Master of Urban Design (M.U.D.) is an advanced, interdisciplinary program of study that focuses on contemporary challenges of urbanism at local, regional and global scales. Courses are taught by faculty from Architecture, Community and Regional Planning, and Landscape Architecture; with an understanding that urban environments should be engaged through an integrated design process that includes ecological, social, material, economic, and urban policy factors.

The urban design degree reflects a deep commitment to resilient urban environments within the context of an increasingly concentrated, connected and, diverse urban world. Accordingly, the coursework engages emerging urbanization topics including:
- The formation of more adaptable, flexible and resilient cities;
- the exponential growth of megacities and steady decline of investments in traditional urban economies in the twenty-first century;
- The transformation of Industrial landscapes, particularly within the Midwestern context, and the global impact of transnational economic operations.
- the spatialization of informal economies, practices, and services across the south-north global divide;
- and, a reexamination of the potentials of hard and soft infrastructures, principles of the circular economy and a reframing of the urban-rural divide.

The program consists of 36 credits, typically distributed over three semesters (fall, spring and summer), however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in architecture (BArch, MArch), landscape architecture (BLA, MLA) or planning (BSCRP, MCRP, MUP). Graduate students can also pursue the following double degrees in the College of Design: M Arch/MUD, MCRP/MUD and MLA/MUD.

</table>

Courses primarily for graduate students, open to qualified undergraduates:

URB D 501: Urban Design Local Studio
(3-6) Cr. 6.
Prereq: Graduate standing or senior classification with instructor permission
Analysis and observation of urban morphology, culture, and infrastructure through urban design projects set in Midwestern cities. Students learn, interpret, and propose design interventions to address urban challenges related to changing socio-political, economic, and environmental contexts. Field trips.

URB D 502: Urban Design Global Studio
(1-10) Cr. 6.
Prereq: Graduate standing or senior classification with instructor permission.
Students develop proposals for urban design interventions in an international context at multiple scales using investigation, analysis, observation, and interaction. Field trips.

URB D 511: North American Urbanization
(3-0) Cr. 3.
Prereq: Graduate standing or senior classification with instructor permission.
Focus on the historical role of planning and urban design in the shaping of North American cities and regions, from the colonial period to the late twentieth century. Examine the legacy of planning and design by exploring the intersection of geographic space, politics, and policy. Investigate the factors and the processes that produce the built environment.

URB D 512: Urban Design Colloquium
Cr. R. Repeatable.
Prereq: enrollment in the Urban Design program
Special topics and guest speakers. Offered on a satisfactory-fail basis only.

URB D 513: Urbanism Research
Cr. 3.
Prereq: Urb D 502
Research expands and integrates discourse and design findings from various Urban Design degree courses. Students develop independently-defined research to produce a comprehensive and conclusive final document that incorporates text, visuals and/or other media.

URB D 521: Foundations of Urban Design
(3-0) Cr. 3.
Prereq: Graduate standing, senior classification with instructor permission.
Introduction to the ways that urban designers think about the city with a focus on how history, theory, and a wide range of contextual factors inform urban design practice. Field trip.
URB D 522: Contemporary Urban Design Practices  
(3-0) Cr. 3.  
*Prereq: Graduate standing or senior classification with instructor permission.*  
Study of emerging trends and practices in urban design using a range of current media communication platforms. Course will be conducted in a combination of lecture, seminar formats. Graduate level readings, discussions, research, and development of projective scenarios.

URB D 531: Methods of Urban Design Workshop  
(3-0) Cr. 3.  
*Prereq: Graduate standing or senior classification with instructor permission.*  
An exploration of contemporary urban design methods derived from significant urban projects and (re)development initiatives. Selected case studies to articulate and evaluate methods for implementing urban design goals and objectives in a variety of urbanized contexts. Case studies will build on a combination of analytical research, lectures, student presentations, and field trips.

URB D 532: Urban Design Media Workshop  
(3-0) Cr. 3.  
*Prereq: Graduate standing or senior classification with instructor permission.*  
An introduction to visual representation tools and techniques for generating and communicating urban design concepts, processes, and analytics. Project and exercises utilize traditional and contemporary approaches to drawing, modeling, and mapping, as well as desktop publishing tools.

URB D 533: Urbanism Theory and Methods  
(3-0) Cr. 3.  
*Prereq: Graduate standing or senior classification with instructor permission.*  
This course examines how socio-political and economic forces shape the contemporary built environment. The course highlights various methods urban designers use to affect change and, in turn, how these impact stakeholders and communities. Students develop critical awareness of the impact of their decision making on the city.
Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students’ critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, mechanical engineering and software engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: aerospace engineering, agricultural engineering, biological systems engineering, civil engineering, computer engineering, electrical engineering, industrial engineering and mechanical engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences.

Accreditation

Twelve undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. These twelve programs are: aerospace, agricultural, biological systems, chemical, civil, computer, construction, electrical, industrial, materials, mechanical and software engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.
Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Engineering Basic Program

Please see “Basic Program for Engineering Curricula” section.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

Engineering Minors

The College of Engineering offers four undergraduate minors which are open only to students in the College of Engineering. These are minors in biomedical engineering, energy systems, engineering sales and nondestructive evaluation. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The biomedical engineering minor is a 16 credit interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and Biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Biomedical Engineering in Courses and Programs.

The energy systems minor is a 15 credit program that provides engineering students with focused educational opportunities in the broad area of energy systems. Students will understand broad energy perspectives, the language of energy systems and the economic, environmental, and policy issues related to energy. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Energy Systems in Courses and Programs or see http://www.me.iastate.edu/energy-systems-minor/.

The engineering sales minor is a 15 credit minor that complements the technical training in the student’s major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) open to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

Engineering Minor (Interdisciplinary)

The College of Engineering offers undergraduate minors in wind energy and nuclear engineering which are open to all students at ISU who meet the prerequisites. The wind energy minor is a 15 credit minor which enables students to acquire an interdisciplinary knowledge of the wind energy industry. There are two required courses; the remaining credits are chosen from a list of elective courses that are related to wind energy. The minor is administered by a supervisory faculty committee from several departments. For minor course requirements, refer to Wind Energy Minor in Courses and Programs. The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also transfer courses that have been evaluated as substitutes for ISU courses may be used toward the minor. For minor course requirements, refer to Nuclear Engineering in Courses and Programs.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.
Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to provide a resource contact person for students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. Transfer students may also complete orientation online. All entering students are encouraged to attend orientation which includes meeting with an academic adviser to register for classes. Placement assessments given during the orientation program help determine the student's current level of proficiency which enables the academic adviser to prepare an appropriate course schedule for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering’s International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional semester to complete curriculum requirements. Cooperative programs are a mechanism by which a student may work full-time for one semester per academic or calendar year. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student's potential as a future full-time employee. Both domestic and international co-op programs are allowed. Cooperative education students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (398) for fall or spring and are considered full-time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for the summer.

Enrollment in the program allows students to gain practical work experience in their career field while attending college. Internship students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (396) for the summer are considered to be full-time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Engagement. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

The College of Engineering has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study abroad, visit the Engineering International Engagement website: http://www.engineering.iastate.edu/studyabroad/

Departments of the College

For information on undergraduate options refer to the following curriculum sections, and for graduate specializations or certificate programs, refer to the Courses and Programs section of the catalog.

- Aerospace Engineering
- Agricultural and Biosystems Engineering
- Chemical and Biological Engineering
- Civil, Construction and Environmental Engineering
- Electrical and Computer Engineering
- Industrial and Manufacturing Systems Engineering
- Materials Science and Engineering
- Mechanical Engineering

Degree Programs

Aerospace Engineering
Agricultural Engineering
Biological Systems Engineering
Chemical Engineering
Civil Engineering
Computer Engineering
A grade of C or better is required for any transfer credit course applied to the Basic Program. Grades from transfer courses will not be used in computing the Basic Program GPA.

Students enrolled in the College of Engineering who have not met the above requirements may enroll for no more than two semesters in 200-level engineering courses. Students not enrolled in the College of Engineering may take engineering courses as long as they meet the prerequisites and space is available; only the first two semesters of engineering courses at the 200-level and above taken at ISU while a student is not enrolled in the College of Engineering can be applied toward an engineering degree.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing MATH 143 Preparation for Calculus before enrolling in MATH 165 Calculus I.

The Department of English may recommend placement in one or more sections of ENGL 099 or ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates deficiencies. Satisfactory completion of the recommended English course(s) will be required of students to complete their Basic Program.

### Basic Program for Engineering Curricula

The Basic Program is a set of courses that provides a foundation common to all engineering curricula. Students normally enroll in most of the Basic Program courses during their first year. Before enrolling in engineering courses at the 200-level and above, students enrolled in the College of Engineering must do the following:

1. Complete the Basic Program with a Basic Program grade point average (GPA) of at least 2.00.
2. Earn an ISU cumulative GPA of at least 2.00.

### Basic Program

ENGR 101: Engineering Orientation  
Cr. R. F.S.  
Introduction to the College of Engineering and the engineering profession. Information concerning university and college policies, procedures, and resources. Undeclared sections: Considerations in choosing an engineering curriculum. Opportunities to interact with departments. Declared sections: Introduction to major-specific topics. Offered on a satisfactory-fail basis only.

ENGR 104: LEAD Program Orientation  
(1-0) Cr. 1. F.  
Orientation for LEAD Learning/Living Community participants. Introduction to college and university resources, tools and techniques to promote academic, professional and social/cultural development and success. Focus on building support networks with peers, faculty, and staff. Introduction to core engineering competencies including but not limited to initiative, communication, teamwork, and cultural adaptability. Offered on a satisfactory-fail basis only.

ENGR 105: LEAD Program Seminar  
(1-0) Cr. 1. S.  
Seminar for LEAD Learning/Living Community participants. Focus on professional development and exposure to various engineering disciplines through hands-on lab experiences, industry visits and networking opportunities with alumni, faculty, and staff. Development of core competencies: engineering/technical knowledge, communication and teamwork. Offered on a satisfactory-fail basis only.

ENGR 121: Learning Skills for Engineering  
Cr. R. F.S.  
Exploration of personal and academic strategies that promote academic and career success. Offered on a satisfactory-fail basis only.

ENGR 131: Learning Community Seminar  
Cr. R. F.S.  
Peer-mentored review of course topics in engineering undeclared learning communities. Offered on a satisfactory-fail basis only.

ENGR 150: Foundations of Leadership Development and Learning  
(1-0) Cr. 1. F.S.  
Prereq: ELP students only  
Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Offered on a satisfactory-fail basis only.
ENGR 160: Engineering Problems with Computer Applications Laboratory
(2-2) Cr. 3. F.S.SS.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations
Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

ENGR 160H: Engineering Problems with Computer Applications Laboratory
(2-2) Cr. 3. F.S.SS.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165
Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

ENGR 250: Leadership in Engineering Teams
(1-0) Cr. 1. F.S.
Building and sustaining decision-making engineering teams. Students will explore the interrelated processes of discerning purpose, thinking systemically, developing reflective judgment, and exercising leadership by mobilizing and setting the direction for adaptive change within a team. Industry-based examples and information from engineering and natural resource sciences will be infused into the course.

ENGR 260: Engineering: Getting from Thought to Thing
(Cross-listed with IND D). (3-0) Cr. 3. F.S.
Prereq: MATH 166, PHYS 222
What is engineering, technology and their roles in society? Investigation of engineering methods through case studies of everyday objects. Explore questions about the impact of technology in society. Apply engineering methods to design and failure analysis.

ENGR 265: Survey of the Impacts of Engineering Activity
(3-0) Cr. 3. F.S.
Survey of the economic, environmental, societal, and political benefits and problems resulting from engineering projects on human health, social structures, and the environment. Examination of improvements in economic opportunities and quality of life resulting from engineering activity. Case studies of the effects of engineering activity.

ENGR 270: Survey of How Things Work
(Cross-listed with IND D). (3-0) Cr. 3. F.S.
Removing mysteries surrounding science and technology. Identify key concepts from applied science and technology to obtain better understanding on how things work. Review and explain the principles behind the technologies which define our modern way of life. A survey of broad range of technology could include: cell phones, GPS, radio, television, computers, ultrasound, microwave ovens, automobile, bioengineering and other industrial and consumer technologies. Common day technology examples illustrating scientific knowledge and applications.

Cr. 3. F.S.
Prereq: Satisfactory completion of international work experience of at least ten weeks or nine credits of approved course work taken abroad. Permission of student’s department prior to departure
Critique of work/study abroad experience as it relates to professional development. Taken the semester after completion of work abroad or study abroad. Written report and presentation. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement.

ENGR 327: Voices of Public Policy
(3-0) Cr. 3. F.
Prereq: Sophomore classification in engineering
Role and impact of legislative process, partisan politics, government, lobbyists, the media, expert testimony and grassroots activism on public policy. Critical analysis of context; of claims, assumptions, premises, and evidence of both sides; represented and disenfranchised populations; the ethical issues to develop personal position and courses of action to impact public policy process.

ENGR 340: Introduction to Wind Energy: System Design & Delivery
(3-0) Cr. 3. F.
Prereq: MATH 166, PHYS 222
ENGR 350: Dean's Leadership Seminar  
(1-0) Cr. 1. F.S.  
Prereq: Selection based on demonstrated commitment to leadership development; for junior status or above.  
Understanding the complexities of leadership in building an organization, decision-making styles, communication, managing change, building trust, shared responsibility leadership, creating legacy, prioritizing, effective use of authority, conflict, ethics, integrity, transparency, accountability. Offered on a satisfactory-fail basis only. May not apply toward a degree in Engineering.

ENGR 466: Multidisciplinary Engineering Design  
(Cross-listed with A B E, AER E, B M E, CPR E, E E, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.  
Prereq: Student must be within two semesters of graduation; permission of instructor.  
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

ENGR 467: Multidisciplinary Engineering Design II  
Prereq: Student must be within two semesters of graduation or receive permission of instructor.  
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

ENGR 490E: Entrepreneurship  
Cr. 1-3. Repeatable, maximum of 3 credits.  
Prereq: Junior or senior classification in engineering, college approval

ENGR 490L: Independent Study  
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS.  
Leadership.

Aerospace Engineering  
Undergraduate Study  
For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science. The Aerospace Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, structural, and transportation challenges play major roles.

Make To Innovate (M:2:I) is an exciting new program in the Aerospace Engineering Department that engages students in hands-on projects to augment their understanding of engineering fundamentals.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended for students who participate in alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years.

Undergraduate Mission and Educational Objectives  
The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement:  
The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:  
The objectives of the Aerospace Engineering program at ISU are to produce graduates:

• Who actively contribute to the field of aerospace, related fields or other disciplines;
• Are critical thinkers and lifelong learners; and
• Are aware of the societal, economic and environmental impact of their work.
## Curriculum in Aerospace Engineering

Leading to the degree bachelor of science.

### Total credits required: 129.0.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

### International Perspectives \(^1\): 3 cr.

### U.S. Diversity \(^1\): 3 cr.

### Communication Proficiency/Library requirement:

AER E 426  Design of Aerospace Structures
AER E 432  Flight Control Systems II
AER E 433  Spacecraft Dynamics and Control
AER E 442  V/STOL Aerodynamics and Performance
AER E 446  Computational Fluid Dynamics
AER E 448  Fluid Dynamics of Turbomachinery
AER E 451  Astrodynamics II
AER E 463  Introduction to Multidisciplinary Design Optimization
AER E 464  Spacecraft Systems
AER E 468  Large-Scale Complex Engineered Systems (LSCES)
AER E 481  Advanced Wind Energy Technology and Design

One of the following:

ENGL 314  Technical Communication (C or better in this course)
ENGL 309  Proposal and Report Writing (C or better in this course)

Technical Electives (see below)  3
Career Electives (see below)  6

Total Credits  33

Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding Aer E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships/Flight Experience:
AER E 192  Aerospace Seminar  R
AER E 301  Flight Experience  R

Co-op and internships are optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (http://www.aere.iastate.edu/students/undergraduate_program)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Aerospace Engineering, B.S.
major in aerospace engineering and minor work to students taking major work in other departments. For all graduate degrees, it is possible to establish a co-major program with another graduate degree-granting department. Within the aerospace program, students can specialize in one or more of the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

Master of Science and Master of Engineering
The Master of Science degree requires a thesis and has strong research emphasis. The Master of Science degree is recommended for students who anticipate entering a doctoral program later. The Master of Engineering degree does not require either research credits or a thesis and is intended for students who do not anticipate pursuing a doctoral degree. The Master of Engineering degree can be completed with coursework only or with a combination of coursework and creative component. Credits for creative component will be obtained by registering for AerE 599 Creative Component. A written report and an oral presentation will be given to the student’s graduate committee.

At least 30 credits of acceptable graduate work are required for both the Master of Science and the Master of Engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu/files/2015/04/AerE-Graduate-Handbook-Revised-S15.pdf).

Bachelor of Science/Master of Science Concurrent Degree Program
The department offers concurrent BS/MS and BS/ME degree programs (http://www.aere.iastate.edu/students/concurrent-degrees) and a concurrent BS/MBA degree program which offer an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master’s degree before completing a bachelor’s degree. The concurrent degree programs reduce by one year the normal time period for completing both degrees separately.

Preparation for Graduate Work
The normal prerequisite for major graduate work in aerospace engineering is the completion of an undergraduate curriculum substantially equivalent to that required of aerospace engineering students at this university. Due to the diversity of interests of aerospace faculty, students whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite aerospace background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses are offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Graduate Minor Work
Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

Courses primarily for undergraduates:

AER E 160: Aerospace Engineering Problems With Computer Applications Laboratory
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

AER E 160H: Aerospace Engineering Problems With Computer Applications Laboratory: Honors
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

AER E 161: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment in AER E 160 or equivalent course
Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks.

AER E 161H: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering: Honors
(2-2) Cr. 3. F.S.
Prereq: AER E 160 or equivalent course
Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks.
AER E 192: Aerospace Seminar
Cr. R. S.
Vectors, differentiation, integration, matrices, and systems of linear equations.

Cr. R. S.
Vectors, differentiation, integration, matrices, and systems of linear equations.

AER E 261: Introduction to Performance and Design
(3-0) Cr. 3. F.S.
Prereq: MATH 166, PHYS 221, credit or enrollment in AER E 161
Aerodynamics of the airplane, lift and drag, drag polar, propulsion characteristics of turbojets and piston props, level flight, range, endurance, climbing flight, turning flight, take-off and landing, design examples.

AER E 265: Scientific Balloon Engineering and Operations
(Cross-listed with MTEOR). (0-2) Cr. 1. Repeatable. F.
Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.

AER E 290: Aerospace Engineering Independent Study: Independent Study
Cr. 1-2. Repeatable.
Prereq: Sophomore classification, approval of the department

AER E 290A: Aerospace Engineering Independent Study: Flight ground instruction
Cr. 1-2. Repeatable.
Prereq: Sophomore classification, approval of the department

AER E 290B: Aerospace Engineering Independent Study: In-flight training
Cr. 1-2. Repeatable.
Prereq: AER E 301

AER E 290C: Aerospace Engineering Independent Study: Other
Cr. 1-2. Repeatable.
Prereq: AER E 301

AER E 294: Make to Innovate I
Cr. 1. Repeatable, maximum of 3 credits. F.S.
Prereq: Restricted to Freshman and Sophomore classifications, Instructor permission required.
Multidisciplinary projects to engage students in the fundamentals of engineering, project management, systems engineering, teamwork, and oral and visual communication. Students will define and attain their team objectives and milestones that are approved by the instructor. Can only be used toward graduation in these cases. To make credit deficiencies in 100 or 200 level courses. No more than 2 credits of Aer E 294X can be used to make-up credit deficiencies in 100 or 200 level courses. Cannot be used in any category or technical electives in the Aer E curriculum

AER E 301: Flight Experience
Cr. R. F.S.
Prereq: Credit or enrollment in AER E 355
Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Ten hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Offered on a satisfactory-fail basis only.

AER E 310: Aerodynamics I: Incompressible Flow
(3-0) Cr. 3. F.S.
Prereq: Grade of C- or better in AER E 261 and MATH 265

AER E 311: Aerodynamics II: Compressible Flow
(3-0) Cr. 3. F.S.
Prereq: AER E 310, M E 231

AER E 321: Flight Structures Analysis
(3-0) Cr. 3. F.S.
Prereq: E M 324, Credit or enrollment in MATH 266 or 267
AER E 322: Aerospace Structures Laboratory
(1-2) Cr. 2. F.S.
Prereq: Credit or enrollment in AER E 321

AER E 331: Flight Control Systems I
(3-0) Cr. 3. F.S.
Prereq: AER E 355
Linear system analysis. Control system designs using root-locus and frequency response methods. Applications in flight control systems.

AER E 344: Aerodynamics and Propulsion Laboratory
(2-2) Cr. 3. F.S.
Prereq: AER E 310, Coreq: AER E 311

AER E 351: Astrodynamics I
(3-0) Cr. 3. F.S.
Prereq: E M 345

AER E 355: Aircraft Flight Dynamics and Control
(3-0) Cr. 3. F.S.
Prereq: AER E 261, MATH 267, E M 345
Aircraft rigid body equations of motion, linearization, and modal analysis. Longitudinal and lateral-directional static and dynamic stability analysis. Flight handling characteristics analysis. Longitudinal and lateral-directional open loop response to aircraft control inputs. Aircraft flight handling qualities.

AER E 361: Computational Techniques for Aerospace Design
(2-2) Cr. 3. F.S.
Prereq: AER E 310, MATH 267, E M 324, E M 345
Advanced programming, workstation environment, and development of computational tools for aerospace analysis and design. Technical report writing.

AER E 362: Aerospace Systems Integration
(3-0) Cr. 3. F.S.
Prereq: Junior standing in Aerospace Engineering or permission of instructor
Emphasis on impact of component interfaces in aerospace systems. Understand how changes in variables associated with individual components impact the performance of the aerospace system. Specific integration challenges include: capturing implicit disciplinary interactions (e.g. structures/aerodynamics, propulsion/aerodynamics, etc.), propagating tolerances through the system (i.e. uncertainty modeling), balancing component attributes in the system objective.

AER E 381: Introduction to Wind Energy
(3-0) Cr. 3. S.
Prereq: MATH 166, PHYS 221
Basic introduction to the fundamentals of Wind Energy and Wind Energy conversion systems. Topics include but not limited to various types of wind energy conversion systems and the aerodynamics, blade and tower structural loads, kinematics of the blades and meteorology.

AER E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 398: Cooperative Education
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services.
Professional work period. One semester per academic or calendar year. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 411: Aerospace Vehicle Propulsion I
(3-0) Cr. 3. F.S.
Prereq: AER E 311, AER E 344

AER E 412: Aerospace Vehicle Propulsion II
(3-0) Cr. 3. S.
Prereq: AER E 311
AER E 417: Experimental Mechanics
(Dual-listed with AER E 517). (Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 324; MAT E 273
Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

AER E 421: Advanced Flight Structures
(2-2) Cr. 3. F.S.
Prereq: AER E 321, MATH 266 or MATH 267
Analysis of indeterminate flight structures including finite element laboratory. Static analysis of complex structural components subject to thermal and aerodynamic loads. Analytical and finite element solutions for stresses and displacements of membrane, plate stress, plate structures. Buckling of beams, frames, and plate structures. Introduction to vibration of flight structures. Steady state and transient structural response using normal modal analysis.

AER E 422: Vibrations and Aeroelasticity
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: E M 324 or AER E 321

AER E 423: Composite Flight Structures
(2-2) Cr. 3. S.
Prereq: E M 324; MAT E 273
Fabrication, testing and analysis of composite materials used in flight structures. Basic laminate theory of beams, plates and shells. Manufacturing and machining considerations of various types of composites. Testing of composites for material properties, strength and defects. Student projects required.

AER E 426: Design of Aerospace Structures
(Dual-listed with AER E 526). (2-2) Cr. 3. F.
Prereq: E M 324
Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability.

AER E 432: Flight Control Systems II
(3-0) Cr. 3. F.
Prereq: AER E 331

AER E 433: Spacecraft Dynamics and Control
(3-0) Cr. 3. F.
Prereq: EM 345
Three-dimensional rotational kinematics and attitude dynamics of a rigid body in space. Stability analysis of a spinning spacecraft with or without energy dissipation. Attitude dynamics and stability of a satellite in circular orbit. Introduction to spacecraft attitude determination and control systems (ADCS). Simulation of spacecraft attitude-dynamics and control problems of practical interest using MATLAB.

AER E 442: V/STOL Aerodynamics and Performance
(3-0) Cr. 3. F.
Prereq: AER E 261
Introduction to the aerodynamics, performance, stability, control and critical maneuvering characteristics of V/STOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vectored engines.

AER E 446: Computational Fluid Dynamics
(3-0) Cr. 3. F.
Prereq: AER E 311, AER E 361 and proficiency in at least one programming language

AER E 448: Fluid Dynamics of Turbomachinery
(Cross-listed with M E). (3-0) Cr. 3. S.
Prereq: AER E 311 or M E 335
Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines. Conceptual and preliminary design of axial and radial flow compressors and turbines using velocity triangles and through-flow approaches.
AER E 451: Astrodynamics II  
(3-0) Cr. 3. F.S.  
Prereq: AER E 351  
Orbit determination and prediction using Gibe’s and Gauss’ methods. Advanced orbit maneuvers, triple-, and fixed-impulse; universal variables; Kepler’s problem. Earth gravity field models and gravity harmonics, orbit perturbations, advanced dynamics, variational methods, relative orbital mechanics, and Clohessy-Wiltshire equations.

AER E 461: Modern Design Methodology with Aerospace Applications  
(2-2) Cr. 3. F.S.  
Prereq: AER E 361, AER E 311, AER E 321, AER E 322, AER E 344, AER E 351, AER E 355  
Introduction to modern engineering design methodology. Computational constrained optimal design approach including selection of objective function, characterization of constraint system, materials and strength considerations, and sensitivity analyses.

AER E 462: Design of Aerospace Systems  
(1-4) Cr. 3. F.S.  
Prereq: AER E 461  
Fundamental principles used in engineering design of aircraft, missile, and space systems. Preliminary design of aerospace vehicles.  
Engineering Ethics.

AER E 463: Introduction to Multidisciplinary Design Optimization  
(Dual-listed with AER E 563). (3-0) Cr. 3. F.  
Prereq: senior standing in College of Engineering or permission of instructor  
Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multi-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods.

AER E 464: Spacecraft Systems  
(3-0) Cr. 3. S.  
Prereq: AER E 351  
An examination of spacecraft systems including attitude determination and control, power, thermal control, communications, propulsion, guidance, navigation, command and data handling, and mechanisms. Explanation of space and operational environments as they impact spacecraft design. Includes discussion of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues.

AER E 466: Multidisciplinary Engineering Design  
(Cross-listed with A B E, B M E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.  
Prereq: Student must be within two semesters of graduation; permission of instructor.  
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

AER E 467: Multidisciplinary Engineering Design II  
Prereq: Student must be within two semesters of graduation or receive permission of instructor.  
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

AER E 468: Large-Scale Complex Engineered Systems (LSCES)  
(Dual-listed with AER E 568). (Cross-listed with I E). (3-0) Cr. 3. S.  
Prereq: senior standing in College of Engineering or permission of AerE 468 instructor  
Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.

AER E 480: Ultrasonic Nondestructive Evaluation  
(Cross-listed with E M). (3-0) Cr. 3. S.  
Prereq: E M 324, MATH 266 or MATH 267, PHYS 222  
Introduction to stress/strain, Hooke’s law, and elastic wave propagation in two dimensions in isotropic media. Ultrasonic plane-wave reflection and transmission; and simple straight-crested guided waves. Transducer construction, behavior, and performance. Simple signal analysis and discrete signal processing. The last few weeks of the course are devoted to case studies.
AER E 481: Advanced Wind Energy: Technology and Design
(3-0) Cr. 3. S.
Prereq: AER E 381 or senior classification in engineering or junior in engineering with a course in fluid mechanics
Advanced topics in wind energy, emphasis on current practices. Theoretical foundations for horizontal and vertical axis wind turbine. Design codes for energy conversion systems design, aerodynamic and structural load estimation, wind resource characterization, wind farm design, optimization.

AER E 483: Aeroacoustics
(Dual-listed with AER E 583). Cr. 3.
Prereq: AER E 311 or M E 335; and MATH 266 or MATH 267

AER E 490: Aerospace Engineering Independent Study
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490B: Aerospace Engineering Independent Study: Propulsion
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490C: Aerospace Engineering Independent Study: Aerospace Structures
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490D: Aerospace Engineering Independent Study: Flight Dynamics
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490E: Aerospace Engineering Independent Study: Spacecraft Systems
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490F: Aerospace Engineering Independent Study: Flight Control Systems
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490G: Aerospace Engineering Independent Study: Aeroelasticity
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490H: Aerospace Engineering Independent Study: Independent Study, Honors
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490I: Aerospace Engineering Independent Study: Design
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490K: Aerospace Engineering Independent Study: Wind Engineering
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 490O: Aerospace Engineering Independent Study: Other
Cr. 1-6. Repeatable.
Prereq: Junior or senior classification, approval of the department

AER E 499: Senior Project
Cr. 1-2. Repeatable. F.S.
Prereq: Senior classification, credit or enrollment in AER E 491
Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduates:

AER E 501: Advanced Engineering Analysis
(3-0) Cr. 3. F.
Prereq: Math 267 or equivalent
Linear ordinary differential equations with variable coefficients; hyperbolic, parabolic, and elliptic equations; tensors. None
AER E 511: Wind Energy System Design  
(Cross-listed with WESEP). (3-0) Cr. 3.  
**Prereq:** WESEP 501 and WESEP 502  
Advanced design, control, and operation of wind plants. Topics include electromechanical energy conversion systems, aerodynamic and aeroelastic loads, optimal control of wind farms, life cycle management strategies, tall tower design, and prediction of component residual life.

AER E 514: Advanced Mechanics of Materials  
(Cross-listed with E M). (3-0) Cr. 3. F.  
**Prereq:** E M 324  

AER E 517: Experimental Mechanics  
(Dual-listed with AER E 417). (Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered even-numbered years.  
**Prereq:** E M 324; MAT E 273  
Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

AER E 521: Airframe Analysis  
(3-0) Cr. 3. F.  
**Prereq:** AER E 421 or E M 424  
Analysis of static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

AER E 522: Design and Analysis of Composite Materials  
(3-0) Cr. 3. F.  
**Prereq:** E M 324  
Composite constituent materials, micro-mechanics, laminate analysis, hygro-thermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of composites, short fiber composites, and demonstration laboratory.

AER E 524: Numerical Mesh Generation  
(3-0) Cr. 3. F.  
**Prereq:** MATH 385, proficiency in programming  
Introduction to modern mesh generation techniques. Structured and unstructured mesh methods, algebraic and PDE methods, elliptic and hyperbolic methods, variational methods, error analysis, Delaunay triangulation, data structures, geometric modeling with B-spline and NURBS surfaces, surface meshing.

AER E 525: Finite Element Analysis  
(Cross-listed with E M). (3-0) Cr. 3. S.  
**Prereq:** E M 425, MATH 385  
Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

AER E 526: Design of Aerospace Structures  
(Dual-listed with AER E 426). (2-2) Cr. 3. F.  
**Prereq:** E M 324  
Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability.

AER E 531: Automatic Control of Flight Vehicles  
(3-0) Cr. 3. S.  
**Prereq:** AER E 331  
Applications of classical and modern linear control theory to automatic control of flight vehicles. Spacecraft attitude control. Control of flexible vehicles. Linear-quadratic regulator design applications.

AER E 532: Compressible Fluid Flow  
(Cross-listed with M E). (3-0) Cr. 3. S.  
**Prereq:** AER E 310, 311 or equivalent  

AER E 541: Incompressible Flow Aerodynamics  
(3-0) Cr. 3. F.  
**Prereq:** AER E 310 or M E 335 or equivalent  
AER E 545: Experimental Flow Mechanics and Heat Transfer  
(3-0) Cr. 3. F.  
Prereq: AER E 310 or M E 335 or E M 378  
Similitude and dimensional analysis. Measurement uncertainty analysis; Fluid mechanical apparatus: wind tunnel and water tunnels. Various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies: Pressure gauge and transducers; Pitot tube; hot wire anemometry; Shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Tomographic PIV, Holograph PIV and microscopic PIV); laser induced fluorescence; pressure sensitive painting; temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive applications and laboratory experiments will be included.

AER E 546: Computational Fluid Mechanics and Heat Transfer I  
(Cross-listed with M E). (3-0) Cr. 3. F.  
Prereq: AER E 310 or M E 335, and programming experience  

AER E 547: Computational Fluid Mechanics and Heat Transfer II  
(Cross-listed with M E). (3-0) Cr. 3. S.  
Prereq: AER E 546 or equivalent  
Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

AER E 551: Orbital Mechanics  
(3-0) Cr. 3. F.  
Prereq: AER E 351  

AER E 556: Guidance and Navigation of Aerospace Vehicles  
(3-0) Cr. 3. F.  
Prereq: AER E 331  

AER E 563: Introduction to Multidisciplinary Design Optimization  
(Dual-listed with AER E 463). (3-0) Cr. 3. F.  
Prereq: senior standing in College of Engineering or permission of instructor  
Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multi-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods.

AER E 564: Fracture and Fatigue  
(Cross-listed with E M, M E, M S E). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392.  
Undergraduates: Permission of instructor  
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

AER E 565: Systems Engineering and Analysis  
(Cross-listed with E E, I E). (3-0) Cr. 3.  
Prereq: Coursework in basic statistics  
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

AER E 566: Avionics Systems Engineering  
(Cross-listed with E E). (3-0) Cr. 3. S.  
Prereq: E E 565  
Avionics functions. Applications of systems engineering principles to avionics. Top-down design of avionics systems. Automated design tools.

AER E 568: Large-Scale Complex Engineered Systems (LSCES)  
(Dual-listed with AER E 468). (Cross-listed with I E). (3-0) Cr. 3. S.  
Prereq: senior standing in College of Engineering or permission of AerE 468 instructor  
Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.
AER E 569: Mechanics of Composite and Combined Materials
(Cross-listed with E M, M S E). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: E M 324

AER E 570: Wind Engineering
(Cross-listed with E M). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: E M 378, E M 345
Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

AER E 572: Turbulence
(Cross-listed with CH E). (3-0) Cr. 3.
Prereq: AER E 541 or M E 538

AER E 573: Random Signal Analysis and Kalman Filtering
(Cross-listed with E E, M E, MATH). (3-0) Cr. 3.
Prereq: E E 324 or AER E 331 or M E 370 or M E 411 or MATH 341

AER E 574: Optimal Control
(Cross-listed with E E, M E). (3-0) Cr. 3. S.
Prereq: E E 577

AER E 575: Introduction to Robust Control
(Cross-listed with E E, M E). (3-0) Cr. 3.
Prereq: E E 577

AER E 576: Digital Feedback Control Systems
(Cross-listed with E E, M E). (3-0) Cr. 3. F.
Prereq: E E 475 or AER E 432 or M E 411 or MATH 415; and MATH 267

AER E 577: Linear Systems
(Cross-listed with E E, M E, MATH). (3-0) Cr. 3. F.
Prereq: E E 324 or AER E 331 or MATH 415; and MATH 207

AER E 578: Nonlinear Systems
(Cross-listed with E E, M E, MATH). (3-0) Cr. 3. S.
Prereq: E E 577

AER E 581: Perturbation Methods
(3-0) Cr. 3. F.
Prereq: MATH 267
AER E 583: Aeroacoustics
(Dual-listed with AER E 483). Cr. 3.
Prereq: AER E 311 or M E 335; and MATH 266 or MATH 267

AER E 590: Aerospace Engineering Independent Study: Special Topics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590B: Aerospace Engineering Independent Study: Propulsion
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590C: Aerospace Engineering Independent Study: Aerospace Structures
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590D: Aerospace Engineering Independent Study: Flight Dynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590E: Aerospace Engineering Independent Study: Spacecraft Systems
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590F: Aerospace Engineering Independent Study: Aerospace Dynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590G: Aerospace Engineering Independent Study: Hypersonics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590H: Aerospace Engineering Independent Study: Viscous Aerodynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590I: Aerospace Engineering Independent Study: Design
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590J: Aerospace Engineering Independent Study: Advanced Topics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590K: Aerospace Engineering Independent Study: Computational Aerodynamics
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590L: Aerospace Engineering Independent Study: Optimization
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590M: Aerospace Engineering Independent Study: Non Destructive Evaluation
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590N: Aerospace Engineering Independent Study: Wind Engineering
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 591: Graduate Student Seminar Series
Cr. R. Repeatable.
Presentation of professional topics by department graduate students. Development of presentation skills used in a professional conference setting involving question and answer format.

AER E 599: Creative Component
Cr. 1-5. Repeatable.

Courses for graduate students:

AER E 640: Stability of Fluid Flow
(3-0) Cr. 3.
Prereq: AerE 541
Theoretical methods of stability analysis; linear analysis of exchange of stability and over stability; bifurcation of equilibria; most dangerous modes and pattern formation; shear flow stability theorems. Physical mechanisms. Tollmein-Schlichting waves, disintegration of capillary jets, Benard convection, Taylor-Couette flow, centrifugal instability, double diffusion.

AER E 647: Advanced Computational Fluid Dynamics
(Cross-listed with M E). (3-0) Cr. 3. S.
Prereq: AER E 547

AER E 690: Aerospace Engineering Independent Study: Advanced Topics
Cr. 1-5. Repeatable.

AER E 690A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics
Cr. 1-5. Repeatable.

AER E 690B: Aerospace Engineering Independent Study: Propulsion
Cr. 1-5. Repeatable.

AER E 690C: Aerospace Engineering Independent Study: Aerospace Structures
Cr. 1-5. Repeatable.

AER E 690D: Aerospace Engineering Independent Study: Flight Dynamics
Cr. 1-5. Repeatable.
AER E 690F: Aerospace Engineering Independent Study: Flight Control Systems
Cr. 1-5. Repeatable.

AER E 690G: Aerospace Engineering Independent Study: Aeroelasticity
Cr. 1-5. Repeatable.

AER E 690H: Aerospace Engineering Independent Study: Viscous Aerodynamics
Cr. 1-5. Repeatable.

AER E 690I: Aerospace Engineering Independent Study: Design
Cr. 1-5. Repeatable.

AER E 690J: Aerospace Engineering Independent Study: Hypersonics
Cr. 1-5. Repeatable.

AER E 690K: Aerospace Engineering Independent Study: Computational Aerodynamics
Cr. 1-5. Repeatable.

AER E 690L: Aerospace Engineering Independent Study: Non Destructive Evaluation
Cr. 1-5. Repeatable.

AER E 690M: Aerospace Engineering Independent Study: Wind Engineering
Cr. 1-5. Repeatable.

AER E 697: Engineering Internship
Cr. R. Repeatable.
Prereq: Permission of DOGE (Director of Graduate Education), graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

AER E 699: Research
Cr. arr. Repeatable.

Agricultural Engineering

For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science. The Agricultural Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Goal: To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their agricultural engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a bachelor of science curriculum in biological systems engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. A concurrent bachelor of science and master of business administration program is also offered by the department. Refer to Graduate Study for more information.

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 126.0cr Land and Water Resources Engineering Option, 128.0cr Power and Machinery Engineering Option, 128.0cr Animal Production Systems Engineering Option.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr. 1
U.S. Diversity: 3 cr. 1
Communication Proficiency/Library requirement: (Minimum GPA of 2.00 in this set of courses.)

ENGL 150 Critical Thinking and Communication (Must have a C or better in this course) 3
ENGL 250 Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course) 3

Math/Science Elective 3

Total Credits 39

**Co-op/Internships (Optional)**

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

2. U.S. Diversity, International Perspectives and Social Science/Humanities courses may not be taken Pass/Not Pass.

3. Choose from department approved list. ([http://www.abe.iastate.edu/undergraduate-students/agricultural-engineering/ae-curricula](http://www.abe.iastate.edu/undergraduate-students/agricultural-engineering/ae-curricula))

See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

The department also offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

Graduate Study

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

Courses primarily for undergraduates:

**A B E 102: Learning Communities**
Cr. 0.5. F.
8 week learning communities course focusing on student success, engineering, and department curriculum. Building community within the ABE Department. Offered on a satisfactory-fail basis only.

**A B E 110: Experiencing Agricultural and Biosystems Engineering**
(0-2) Cr. 1. S.
Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

**A B E 160: Systematic Problem Solving and Computer Programming**
(2-2) Cr. 3. S.
Prereq: Credit or enrollment in MATH 143 or MATH 165
Engineering approach to problem solution and presentation in the context of real world problems. Introduction to basic principles from statics, projectile motion, conservation of mass and energy and electricity and magnetism. Use of spreadsheet programs and computer programming language(s) to solve and present engineering problems. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, EE 185, IE 148, M E 160 and S E 185 may count towards graduation.

**A B E 170: Engineering Graphics and Introductory Design**
(2-2) Cr. 3.
Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

**A B E 201: Preparing for Workplace Seminar**
(Cross-listed with TSM). (1-0) Cr. 1. F.S.
Prereq: Sophomore classification in AE, AST, BSE, or I TEC
8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, and engineering/technical knowledge. Resumes; Cover Letters; Behavioral Based Interviewing; Industry Speakers; Preparation for internships experiences.
ABE 216: Fundamentals of Agricultural and Biosystems Engineering
(2-2) Cr. 3. F.
Prereq: ABE 160 or permission of the instructor
Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.

ABE 218: Project Management & Design in Agricultural and Biosystems Engineering
(1-2) Cr. 2. S.
Prereq: ABE 216
Project management - critical path, Gantt charts, resource allocations, basic project budgeting, and project management software. Engineering design approaches. Open-ended design projects to demonstrate the preceding principles through application of technical concepts taught in prerequisite coursework.

ABE 271: Engineering Applications of Parametric Solid Modeling
(1-2) Cr. 1. F.S.
Prereq: ABE 170 or TSM 116 or equivalent
8 week-course. Creating, editing, and documenting parts and assembly models using Solidworks.

ABE 272: Parametric Solid Models, Drawings, and Assemblies Using Creo Parametric
(1-2) Cr. 1. F.S.
Prereq: ABE 170 or TSM 116 or equivalent
8 week-course. Applications of Creo Parametric software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation (standard drawing views, dimensions, and notes) and for the geometric analysis of parts and assemblies.

ABE 273: CAD for Process Facilities and Land Use Planning
(1-2) Cr. 1. F.S.
Prereq: ENGR 170 or TSM 116 or equivalent
8-week course. Application of 2-D AutoCAD software to create and interpret 2-D drawings and 3-D models of facilities. Topics include geometric construction, design documentation: (using views, dimension, notes), and AutoCAD specific features (i.e. Layers, Blocks, Standards, Styles).

ABE 316: Applied Numerical Methods for Agricultural and Biosystems Engineering
(2-2) Cr. 3. F.
Prereq: ABE 160; MATH 266 or MATH 267
Computer aided solution of agricultural engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

ABE 325: Biorenewable Systems
(Cross-listed with TSM). (3-0) Cr. 3. F.
Prereq: CHEM 163 or higher; MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

ABE 340: Functional Analysis of Soil, Crop, and Machine Systems
(2-2) Cr. 3. F.
Prereq: ABE 216

ABE 342: Agricultural Tractor Power
(2-3) Cr. 3. S.
Prereq: ChE 381 or M E 231
Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms.

ABE 363: Agri-Industrial Applications of Electric Power and Electronics
(3-2) Cr. 4. F.S.
Prereq: ABE 216

ABE 380: Principles of Biological Systems Engineering
(2-2) Cr. 3. S.
Prereq: ABE 316
Engineering analysis of biological systems, through the study of mass, energy, and information transport. Quantification and modeling of biological interactions, biological activities and bioreactor operations. Includes hands-on laboratory experiences.
A B E 388: Sustainable Engineering and International Development
(Cross-listed with C E, E E). (2-2) Cr. 3. F.
Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

A B E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

A B E 398: Cooperative Education
Cr. R. Repeatable. F.S.
Prereq: A B E 218 and permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

A B E 403: Modeling, Simulation, and Controls for Agricultural and Biological Systems
(Dual-listed with A B E 503). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267
Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 410: Electronic Systems Integration for Agricultural Machinery & Production Systems
(Dual-listed with A B E 510). Cr. 3. S.
Prereq: Credit or enrollment in E M 378 or M E 335, A B E 216 or M E 270
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A B E 413: Fluid Power Engineering
(Cross-listed with M E). (2-2) Cr. 3. F.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A B E 424A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with A B E 524A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424B: Air Pollution: Climate change and causes
(Dual-listed with A B E 524B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424C: Air Pollution: Transportation Air Quality
(Dual-listed with A B E 524C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424D: Air Pollution: Off-gas treatment technology
(Dual-listed with A B E 524D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

A B E 424E: Air Pollution: Agricultural sources of pollution
(Dual-listed with A B E 524E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 431: Design and Evaluation of Soil and Water Conservation Systems
(Dual-listed with A B E 531). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356
Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A B E 432: Nonpoint Source Pollution and Control
(Dual-listed with A B E 532). (3-0) Cr. 3.
Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

A B E 436: Design and Evaluation of Soil and Water Monitoring Systems
(Dual-listed with A B E 536). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 431
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 437: Watershed Modeling and Policy
(Dual-listed with A B E 537). (Cross-listed with ENSCI). (2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CE 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 451: Food and Bioprocess Engineering
(Dual-listed with A B E 551). (3-0) Cr. 3. S.
Prereq: A B E 216 and credit or enrollment in M E 436 or CH E 357; or FS HN 351 and MATH 266 or MATH 267
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.
A B E 466: Multidisciplinary Engineering Design
(Cross-listed with AER E, B M E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

A B E 469: Engineering for Grain Storage, Preservation, Handling, and Processing Systems
(Dual-listed with A B E 569). (2-3) Cr. 3. S.
Prereq: A B E 216
Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities.

A B E 472: Design of Environmental Modification Systems for Animal Housing
(Dual-listed with A B E 572). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 216, M E 231
Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A B E 475: Design in Animal Production Systems Engineering
(2-0) Cr. 2. F.S.
Prereq: A B E 271, A B E 272, or A B E 273; E M 324 and enrollment in APSE option of AE program.
Application of engineering fundamentals to the independent solution of an animal production systems engineering problem with well defined criteria and constraints in either environmental control, structural design, manure management, or air quality/mitigation.

A B E 478: Wood Frame Structural Design
(Dual-listed with A B E 578). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M E 231, E M 324

A B E 480: Engineering Analysis of Biological Systems
(Dual-listed with A B E 580). (Cross-listed with ENSCI). (2-2) Cr. 3. F.
Prereq: A B E 380 or permission of the instructor
Systems level quantitative analysis of biological systems, including applications in foods, feeds, biofuels, bioenergy, and other biological systems. Introduction to economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance of these biological systems. Students enrolled in ABE 580 will be required to answer additional exam questions and report on two journal articles.

A B E 490: A B E Independent Study
Cr. 1-5. Repeatable.
Independent Study.

Cr. 1-5. Repeatable.
Independent Study.

A B E 490B: A B E Independent Study: Biorenewable Resources
Cr. 1-5. Repeatable. F.S.SS.
Independent study.

A B E 490E: A B E Independent Study: Environmental Bioprocessing Engineering
Cr. 1-5. Repeatable. F.S.SS.
Independent study in environmental bioprocessing engineering.

A B E 490F: A B E Independent Study: Food Engineering
Cr. 1-5. Repeatable. F.S.SS.
Independent study in food engineering.

A B E 490G: A B E Independent Study: General Topics in A B E
Cr. 1-5. Repeatable. F.S.SS.
Independent study in general A B E topics.

A B E 490H: A B E Independent Study: Honors
Cr. 1-5. Repeatable.
Guided instructing in agricultural and biosystems engineering for honors students.

A B E 490L: A B E Independent Study: Land & Water Resources Engineering
Cr. 1-5. Repeatable.
Guided instruction in land and water resources engineering.

A B E 490M: A B E Independent Study: Advanced Machinery Systems Engineering
Cr. 1-5. Repeatable.
Guided instruction in advance machinery systems engineering.
A B E 495: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up  
(Cross-listed with TSM). Cr. 1-2. Repeatable. F.S.S.  
Prereq: Permission of instructor  
Preparation for, or follow-up of, study abroad experience (496). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 496 the following term or have had taken 496 the previous term.  
Meets International Perspectives Requirement.

A B E 496: Agricultural and Biosystems Engineering Department Study Abroad  
(Cross-listed with TSM). Cr. 1-4. Repeatable. F.S.S.  
Prereq: Permission of instructor  
Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 495.  
Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:

A B E 503: Modeling, Simulation, and Controls for Agricultural and Biological Systems  
(Dual-listed with A B E 403). (2-2) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267  
Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 504: Instrumentation for Agricultural and Biosystems Engineering  
(Dual-listed with A B E 404). (2-2) Cr. 3. F.  
Prereq: A B E 316 and A B E 363  
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 506: Applied Computational Intelligence  
(2-2) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: A B E 316 or equivalent, MATH 166, STAT 305  
Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A B E 510: Electronic Systems Integration for Agricultural Machinery & Production Systems  
(Dual-listed with A B E 410). Cr. 3. S.  
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A B E 511: Bioprocessing and Bioproducts  
(3-0) Cr. 3. F.  
Prereq: A B E 216 or equivalent, MATH 160 or MATH 165, one of CHEM 167 or higher, BIOL 173 or BIOL 211 or higher or BRT 501, senior or graduate classification  

A B E 515: Integrated Crop and Livestock Production Systems  
(Cross-listed with AGRON, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: SUSAG 509  
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.
Agricultural Engineering

A B E 524: Air Pollution
(Dual-listed with A B E 424). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with A B E 424A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524B: Air Pollution: Climate change and causes
(Dual-listed with A B E 424B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524C: Air Pollution: Transportation Air Quality
(Dual-listed with A B E 424C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above

A B E 524D: Air Pollution: Off-gas treatment technology
(Dual-listed with A B E 424D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

A B E 524E: Air Pollution: Agricultural sources of pollution
(Dual-listed with A B E 424E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 531: Design and Evaluation of Soil and Water Conservation Systems
(Dual-listed with A B E 431). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356
Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A B E 532: Nonpoint Source Pollution and Control
(Dual-listed with A B E 432). (Cross-listed with ENSCI). (3-0) Cr. 3.
Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

A B E 533: Erosion and Sediment Transport
(Cross-listed with ENSCI, NREM). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: C E 372 or GEOL/ENSCI/MTEOR 402, MATH 166 or equivalent
Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

A B E 536: Design and Evaluation of Soil and Water Monitoring Systems
(Dual-listed with A B E 436). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 431
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.
A B E 537: Watershed Modeling and Policy
(Dual-listed with A B E 437). (Cross-listed with ENSCI). (2-2) Cr. 3. Alt. F., offered odd-numbered years.
*Prereq: CE 372 or equivalent*
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 551: Food and Bioprocess Engineering
(Dual-listed with A B E 451). (3-0) Cr. 3. S.
*Prereq: A B E 216 and credit or enrollment in M E 436 or CH E 357; or FS HN 351 and MATH 266 or MATH 267*
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A B E 569: Engineering for Grain Storage, Preservation, Handling, and Processing Systems
(Dual-listed with A B E 469). (2-3) Cr. 3. S.
*Prereq: A B E 216*
Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities.

A B E 572: Design of Environmental Modification Systems for Animal Housing
(Dual-listed with A B E 472). (3-0) Cr. 3. Alt. S., offered even-numbered years.
*Prereq: A B E 216, M E 231*
Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A B E 578: Wood Frame Structural Design
(Dual-listed with A B E 478). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
*Prereq: M E 231, E M 324*

A B E 580: Engineering Analysis of Biological Systems
(Dual-listed with A B E 480). (2-2) Cr. 3. F.
*Prereq: A B E 380 or permission of the instructor*
Systems-level quantitative analysis of biological systems, including applications in foods, feeds, biofuels, bioenergy, and other biological systems. Introduction to economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance of these biological systems. Students enrolled in ABE 580 will be required to answer additional exam questions and report on two journal articles.

A B E 590: Advanced Topics
Cr. arr. Repeatable.
Advanced topics.
A B E 694: Teaching Practicum
(Cross-listed with TSM). Cr. 1-3. Repeatable. F.S.
Prereq: Graduate classification and permission of instructor
Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

A B E 697: Engineering Internship
Cr. R. Repeatable.
Prereq: Permission of department chair, graduate classification
One semester and one summer maximum per academic year professional work period.

A B E 699: Research
Cr. arr. Repeatable.
Research.

A B E 699B: Research: Biosystems Engineering
Cr. arr. Repeatable.
Guided graduate research in biosystems engineering.

A B E 699C: Research: Computer Aided Design
Cr. arr. Repeatable.
Guided graduate research in computer-aided design.

A B E 699E: Research: Environmental Systems
Cr. arr. Repeatable.
Guided graduate research in environmental systems.

A B E 699F: Research: Food Engineering
Cr. arr. Repeatable.
Guided graduate research in food engineering.

A B E 699O: Research: Occupational Safety
Cr. arr. Repeatable.
Guided graduate research in occupational safety.

A B E 699P: Research: Power and Machinery Engineering
Cr. arr. Repeatable.
Guided graduate research in power and machinery engineering.

A B E 699Q: Research: Structures
Cr. arr. Repeatable.
Guided graduate research in structures.

A B E 699R: Research: Process Engineering
Cr. arr. Repeatable.
Guided graduate research in process engineering.

A B E 699S: Research: Environment and Natural Resources
Cr. arr. Repeatable.
Guided graduate research in environment and natural resources.

A B E 699U: Research: Waste Management
Cr. arr. Repeatable.
Guided graduate research in waste management.

Biological Systems Engineering

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

Goal: To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent bachelor of science and master of business administration program is also offered by the department.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering. Additionally, the department offers bachelor of science curricula in agricultural systems...
Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required:
128.0 cr Biorenewable Resources Option
127.0 cr Bioenvironmental Engineering Option
128.0 cr Food Engineering Option
128.0 cr Open Option.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr.

1

U.S. Diversity: 3 cr.

1

Communication Proficiency/Library requirement:
(Minimum GPA of 2.00 in this set of courses.)

6 credits from Social Sciences and Humanities courses-department approved list | 6

Total Credits | 12

Basic Program: 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section. Within the Biological Systems Engineering Basic Program, students are required to complete CHEM 167 and CHEM 167L or the sequence of CHEM 177, CHEM 177L, and CHEM 178. This is a departmental requirement within the College of Engineering Basic Program requirements. The CHEM 178 course will show as completing the chemistry portion of the Basic Program and the credits will be applied towards a student’s classification.

Sequence I, II & III Elective 9

Total Credits 13

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

   U.S. Diversity, International Perspectives and Social Science/ Humanities courses may not be taken Pass/Not Pass.

2. Choose from department approved list. (http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester for Biological Systems Engineering.

### Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major, the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

### Courses primarily for undergraduates:
