For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

### Prerequisites

- **A B E 160**: Prerequisite: Credit or enrollment in MATH 143 or MATH 165
- **A B E 170**: Prerequisite: Sophomore classification in AE, AST, BSE, or I TEC
- **A B E 201**: Pre-requisite: Sophomore classification in AE, AST, BSE, or I TEC
- **A B E 216**: A B E 160 or permission of the instructor
- **A B E 218**: A B E 216
- **A B E 271**: A B E 170 or TSM 116 or equivalent

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

**Graduate Study**

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major, the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

### Prerequisites

- **A B E 160**: Prerequisite: Credit or enrollment in MATH 143 or MATH 165
- **A B E 170**: Prerequisite: Sophomore classification in AE, AST, BSE, or I TEC
- **A B E 201**: Pre-requisite: Sophomore classification in AE, AST, BSE, or I TEC
- **A B E 216**: A B E 160 or permission of the instructor
- **A B E 218**: A B E 216
- **A B E 271**: A B E 170 or TSM 116 or equivalent

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

</table>
A B E 272: Parametric Solid Models, Drawings, and Assemblies Using Creo Parametric
(1-2) Cr. 1. F.S.
Prereq: A B E 170 or TSM 116 or equivalent
8 week-course. Applications of Creo Parametric software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation (standard drawing views, dimensions, and notes) and for the geometric analysis of parts and assemblies.

A B E 273: CAD for Process Facilities and Land Use Planning
(1-2) Cr. 1. F.S.
Prereq: ENGR 170 or TSM 116 or equivalent.
8-week course. Application of 2-D AutoCAD software to create and interpret 2-D drawings and 3-D models of facilities. Topics include geometric construction, design documentation: (using views, dimension, notes), and AutoCAD specific features (i.e. Layers, Blocks, Standards, Styles).

A B E 316: Applied Numerical Methods for Agricultural and Biosystems Engineering
(2-2) Cr. 3. F.S.
Prereq: A B E 160; MATH 266 or MATH 267
Computer aided solution of agricultural engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

A B E 325: Biorenewable Systems
(Cross-listed with TSM). (3-0) Cr. 3. F.
Prereq: CHEM 163 or higher; MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

(2-2) Cr. 3. F.
Prereq: A B E 216

A B E 342: Agricultural Tractor Power
(2-3) Cr. 3. S.
Prereq: Ch E 381 or M E 231
Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms.

A B E 363: Agri-Industrial Applications of Electric Power and Electronics
(3-2) Cr. 4. F.S.
Prereq: A B E 216

A B E 380: Principles of Biological Systems Engineering
(2-2) Cr. 3. S.
Prereq: A B E 316
Engineering analysis of biological systems, through the study of mass, energy, and information transport. Quantification and modeling of biological interactions, biological activities and bioreactor operations. Includes hands-on laboratory experiences.

A B E 388: Sustainable Engineering and International Development
(Cross-listed with C E, E E). (2-2) Cr. 3. F.
Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs).
Course readings, final project/design report.
Meets International Perspectives Requirement.

A B E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

A B E 398: Cooperative Education
Cr. R. Repeatable. F.S.
Prereq: A B E 218 and permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.
A B E 403: Modeling, Simulation, and Controls for Agricultural and Biological Systems
(Dual-listed with A B E 503). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267
Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 404: Instrumentation for Agricultural and Biosystems Engineering
(Dual-listed with A B E 504). (2-2) Cr. 3. F.
Prereq: A B E 316 and A B E 363
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 410: Electronic Systems Integration for Agricultural Machinery & Production Systems
(Dual-listed with A B E 510). Cr. 3. S.
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A B E 413: Fluid Power Engineering
(Cross-listed with M E). (2-2) Cr. 3. F.
Prereq: Credit or enrollment in E M 378 or M E 335, A B E 216 or M E 270

A B E 415: Agricultural & Biosystems Engineering Design I
(1-2) Cr. 2. F.S.
Prereq: A B E 316 (majors only)
Identification of current design problems in ag & biosystems engineering. Development of alternate solutions using creativity and engineering analysis and synthesis techniques.
A B E 424E: Air Pollution: Agricultural sources of pollution
(Dual-listed with A B E 524E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 431: Design and Evaluation of Soil and Water Conservation Systems
(Dual-listed with A B E 531). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356
Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A B E 432: Nonpoint Source Pollution and Control
(Dual-listed with A B E 532). (3-0) Cr. 3.
Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

A B E 436: Design and Evaluation of Soil and Water Monitoring Systems
(Dual-listed with A B E 536). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 431
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 437: Watershed Modeling and Policy
(Dual-listed with A B E 537). (Cross-listed with ENSCI). (2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CE 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 451: Food and Bioprocess Engineering
(Dual-listed with A B E 551). (3-0) Cr. 3. S.
Prereq: A B E 216 or credit or enrollment in M E 435 or CH E 357; or FS HN 351 and MATH 266 or MATH 267
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A B E 466: Multidisciplinary Engineering Design
(Cross-listed with AER E, B M E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

A B E 469: Engineering for Grain Storage, Preservation, Handling, and Processing Systems
(Dual-listed with A B E 569). (2-3) Cr. 3. S.
Prereq: A B E 216
Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities.
A B E 472: Design of Environmental Modification Systems for Animal Housing
(Dual-listed with A B E 572). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 216, M E 231
Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A B E 475: Design in Animal Production Systems Engineering
(2-0) Cr. 2. F.S.
Prereq: A B E 271, A B E 272, or A B E 273; E M 324 and enrollment in APSE option of AE program.
Application of engineering fundamentals to the independent solution of an animal production systems engineering problem with well defined criteria and constraints in either environmental control, structural design, manure management, or air quality/mitigation.

A B E 478: Wood Frame Structural Design
(Dual-listed with A B E 578). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M E 231, E M 324

A B E 480: Engineering Analysis of Biological Systems
(Dual-listed with A B E 580). (Cross-listed with ENSCI). (2-2) Cr. 3. F.
Prereq: A B E 380 or permission of the instructor
Systems-level quantitative analysis of biological systems, including applications in foods, feeds, biofuels, bioenergy, and other biological systems. Introduction to economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance of these biological systems. Students enrolled in ABE 580 will be required to answer additional exam questions and report on two journal articles.

A B E 490: A B E Independent Study
Cr. 1-5. Repeatable.
Independent Study.

Cr. 1-5. Repeatable.
Independent Study.

A B E 490B: A B E Independent Study: Biorenewable Resources
Cr. 1-5. Repeatable. F.S.SS.
Independent study.

A B E 490E: A B E Independent Study: Environmental Bioprocessing Engineering
Cr. 1-5. Repeatable. F.S.SS.
Independent study in environmental bioprocessing engineering.

A B E 490F: A B E Independent Study: Food Engineering
Cr. 1-5. Repeatable. F.S.SS.
Independent study in food engineering.

A B E 490G: A B E Independent Study: General Topics in A B E
Cr. 1-5. Repeatable.
Independent study in general A B E topics.

A B E 490H: A B E Independent Study: Honors
Cr. 1-5. Repeatable.
Guided instructing in agricultural and biosystems engineering for honors students.

A B E 490L: A B E Independent Study: Land & Water Resources Engineering
Cr. 1-5. Repeatable.
Guided instruction in land and water resources engineering.

A B E 490M: A B E Independent Study: Advanced Machinery Systems Engineering
Cr. 1-5. Repeatable.
Guided instruction in advanced machinery systems engineering.

A B E 495: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up
(Cross-listed with TSM). Cr. 1-2. Repeatable. F.S.SS.
Prereq: Permission of instructor
Preparation for, or follow-up of, study abroad experience (496). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 496 the following term or have had taken 496 the previous term. Meets International Perspectives Requirement.
A B E 496: Agricultural and Biosystems Engineering Department Study Abroad
(Cross-listed with TSM). Cr. 1-4. Repeatable. F.S.S.
Prereq: Permission of instructor
Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 495.
Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:

A B E 503: Modeling, Simulation, and Controls for Agricultural and Biological Systems
(Dual-listed with A B E 403). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267
Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 504: Instrumentation for Agricultural and Biosystems Engineering
(Dual-listed with A B E 404). (2-2) Cr. 3. F.
Prereq: A B E 316 and A B E 363
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 506: Applied Computational Intelligence
(2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A B E 316 or equivalent, MATH 166, STAT 305
Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A B E 510: Electronic Systems Integration for Agricultural Machinery & Production Systems
(Dual-listed with A B E 410). Cr. 3. S.
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A B E 511: Bioprocessing and Bioproducts
(3-0) Cr. 3. F.
Prereq: A B E 216 or equivalent, MATH 160 or MATH 165, one of CHEM 167 or higher, BIOL 173 or BIOL 211 or higher or BRT 501, senior or graduate classification

A B E 515: Integrated Crop and Livestock Production Systems
(Cross-listed with AGRON, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A B E 524: Air Pollution
(Dual-listed with A B E 424). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with A B E 424A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A B E 524B: Air Pollution: Climate change and causes
(Dual-listed with A B E 424B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524C: Air Pollution: Transportation Air Quality
(Dual-listed with A B E 424C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics.
Senior classification or above.

A B E 524D: Air Pollution: Off-gas treatment technology
(Dual-listed with A B E 424D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524E: Air Pollution: Agricultural sources of pollution
(Dual-listed with A B E 424E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 531: Design and Evaluation of Soil and Water Conservation Systems
(Dual-listed with A B E 431). (Cross-listed with ENSECI). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356
Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A B E 532: Nonpoint Source Pollution and Control
(Dual-listed with A B E 432). (Cross-listed with ENSECI). (3-0) Cr. 3. S.
Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

A B E 533: Erosion and Sediment Transport
(Cross-listed with ENSECI, NREM). (2-3) Cr. 3. F.
Prereq: C E 372 or GEOL/ENSECI/MTEOR 402, MATH 166 or equivalent
Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

A B E 536: Design and Evaluation of Soil and Water Monitoring Systems
(Dual-listed with A B E 436). (Cross-listed with ENSECI). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 431
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 537: Watershed Modeling and Policy
(Dual-listed with A B E 437). (Cross-listed with ENSECI). (2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CE 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 551: Food and Bioprocess Engineering
(Dual-listed with A B E 451). (3-0) Cr. 3. S.
Prereq: A B E 216 and credit or enrollment in M E 436 or CH E 357; or FS HN 351 and MATH 266 or MATH 267
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.
A B E 569: Engineering for Grain Storage, Preservation, Handling, and Processing Systems
(Dual-listed with A B E 469). (2-3) Cr. 3. S.
Prereq: A B E 216
Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities.

A B E 572: Design of Environmental Modification Systems for Animal Housing
(Dual-listed with A B E 472). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 216, M E 231
Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A B E 578: Wood Frame Structural Design
(Dual-listed with A B E 478). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M E 231, E M 324

A B E 580: Engineering Analysis of Biological Systems
(Dual-listed with A B E 480). (2-2) Cr. 3. F.
Prereq: A B E 380 or permission of the instructor
Systems-level quantitative analysis of biological systems, including applications in foods, feeds, biofuels, bioenergy, and other biological systems. Introduction to economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance of these biological systems. Students enrolled in ABE 580 will be required to answer additional exam questions and report on two journal articles.

A B E 590: Special Topics in Agricultural & Biosystems Engineering
Cr. 1-3. Repeatable.
Guided instruction and self-study on special topics relevant to agricultural and biosystems engineering.

Courses for graduate students:

A B E 601: Graduate Seminar
(Cross-listed with TSM). (1-0) Cr. 1. F.
Keys to starting a successful graduate research project. Effective literature review, formulating research questions, and setting goals. Practicing effectively communicating research and science. Effective strategies for scholarly writing, responding to feedback, peer-reviewing, successful publishing in journals, and curating scholarly output.

A B E 610: Foundations of Sustainable Agriculture
(Cross-listed with AGRON, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F.
Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

A B E 690: Advanced Topics
Cr. arr. Repeatable.
Advanced topics.

A B E 694: Teaching Practicum
(Cross-listed with TSM). Cr. 1-3. Repeatable. F.S.
Prereq: Graduate classification and permission of instructor
Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

A B E 697: Engineering Internship
Cr. R. Repeatable.
Prereq: Permission of department chair, graduate classification
One semester and one summer maximum per academic year professional work period.

A B E 699: Research
Cr. arr. Repeatable.
Research.

A B E 699B: Research: Biosystems Engineering
Cr. arr. Repeatable.
Guided graduate research in biosystems engineering.

A B E 699C: Research: Computer Aided Design
Cr. arr. Repeatable.
Guided graduate research in computer-aided design.

A B E 699E: Research: Environmental Systems
Cr. arr. Repeatable.
Guided graduate research in environmental systems.

A B E 699F: Research: Food Engineering
Cr. arr. Repeatable.
Guided graduate research in food engineering.
A B E 699O: Research: Occupational Safety  
Cr. arr. Repeatable.  
Guided graduate research in occupational safety.

A B E 699P: Research: Power and Machinery Engineering  
Cr. arr. Repeatable.  
Guided graduate research in power and machinery engineering.

A B E 699Q: Research: Structures  
Cr. arr. Repeatable.  
Guided graduate research in structures.

A B E 699R: Research: Process Engineering  
Cr. arr. Repeatable.  
Guided graduate research in process engineering.

A B E 699S: Research: Environment and Natural Resources  
Cr. arr. Repeatable.  
Guided graduate research in environment and natural resources.

A B E 699U: Research: Waste Management  
Cr. arr. Repeatable.  
Guided graduate research in waste management.

Biomedical Engineering  
Undergraduate Study

Minor supervised by an interdisciplinary faculty committee, administered by Chemical and Biological Engineering. The Biomedical engineering minor is a unique opportunity for engineering students to acquire a multi-disciplinary engineering and life sciences background for entering the field of biomedical engineering.

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core biology and engineering relevant to further study in biomedical engineering along with an introduction to the application of engineering principles to biomedical problems from a multidisciplinary perspective as well as the applications within the majors of the participating departments. Minor requirements are as follows:

A minimum of 16 cr. meeting the six requirements below with a minimum of 9 of those credits not being used to meet degree requirements and a minimum of 6 cr. at the 300 level or above. For most students this last stipulation will probably result in 18 cr. being taken.

| Professional Elective ***                        | 1-3     |
| Total Credits                                    | 16-18   |

* A second (Introductory) engineering course from a department other than that of your major that is not duplicative of material in a course taken in your own department. The topic of the course should have ready application to later B M E-related electives in that discipline (MATE 273; E M 274 or 324; CH E 210; E E 201, 230; or other courses approved by Minor Chair).

** 300-500 level engineering course with clear biomedical engineering application (B M E 341, 450, 450L, 490; B M E/CH E 440, CH E 542; B M E/ M A T E 456; I E 571; I E 447 or other courses approved by Minor Chair).

*** 300-500 level engineering or life sciences course with clear biomedical engineering application OR B M E 490 OR departmental 490 with biomedical engineering topic OR 200+-level life sciences laboratory course (If a 200-level course is chosen here, the student will need to meet the required 6 cr. of 300+ courses by substitution of a higher-level course for the other requirements or by taking an additional course.), OR 300-500 level B M E courses, which may be offered on-line from the University of Iowa.

Courses primarily for undergraduates:

B M E 220: Introduction to Biomedical Engineering  
(Cross-listed with CH E). (3-0) Cr. 3. S.  
_Preq: BIOL 212, ENGR 160 or equiv, MATH 166, CHEM 167 or CHEM 178, PHYS 222_  
Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics.

B M E 341: BioMEMs and Nanotechnology  
(3-0) Cr. 3.  
_Preq: B M E 220_  
Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nano-wires, and stimuli-responsive biomaterials.
B M E 341L: BioMEMS and Nanotechnology Laboratory
(0-3) Cr. 1.
Prereq: B M E 220, concurrent enrollment in B M E 341
Introductory laboratory course accompanying B M E 341. Design, fabrication, and characterization of BioMEMS lab-on-a-chip devices and nanoscale techniques for bioengineering. Student group projects.

B M E 352: Molecular, Cellular and Tissue Biomechanics
(3-0) Cr. 3.
Prereq: B M E 220, E M 324, MAT E 273
Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and non-living systems. Laws of motion, free-body diagrams and simple force analysis of musculoskeletal system. Biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

B M E 428: Image Processing with Biomedical Applications
(3-0) Cr. 3.
Prereq: E E 324

B M E 440: Biomedical Applications of Chemical Engineering
(Cross-listed with CH E). (3-0) Cr. 3.
Prereq: CH E 210, MATH 266 or MATH 267, PHYS 222
Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

B M E 450L: Biosensing Laboratory
(Cross-listed with E E). (0-3) Cr. 1.
Prereq: B M E 220, concurrent enrollment in B M E 450
Laboratory course accompanying B M E 450. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors.

B M E 456: Biomaterials
(Cross-listed with MAT E). (3-0) Cr. 3. F.
Prereq: CHEM 178 and MAT E 216 or MAT E 273 or MAT E 392
Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

B M E 466: Multidisciplinary Engineering Design
(Cross-listed with A B E, AER E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

B M E 490: Independent Study
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: permission of chair for the bioengineering minor
Investigation of biomedical engineering topics of special interest to student and supervising faculty member with a final written report.

Chemical Engineering
http://www.cbe.iastate.edu/

Administered by the Department of Chemical and Biological Engineering
For undergraduate curriculum in chemical engineering leading to the degree bachelor of science. The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and
agricultural products; chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer’s influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates who have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments; and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multidisciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and societal context, and recognition of the need for, and an ability to engage in lifelong learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

**Program Educational Objectives**

The objectives of the Chemical Engineering Program at Iowa State University are to produce graduates who:

- will excel in careers as professional chemical engineers in the businesses and industries related to chemical engineering;
- will successfully pursue research and advanced studies in chemical engineering, or in related fields such as chemistry or biology, or in related professional fields such as medicine, law, and business.

**Cooperative Education**

A cooperative education program is available to students in chemical engineering.

**Curriculum in Chemical Engineering**

Administered by the Department of Chemical and Biological Engineering

Leading to the degree bachelor of science.

**Total credits required: 129 cr. See also Basic Program and Special Programs.**

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communication Proficiency/Library requirement:**

The CBE Department requires a grade of a C or better for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA.

**Social Sciences and Humanities: 15 cr.**

Complete a total of 15 cr. with at least 6 cr. but not more than 9 cr. from the same department.

**Basic Program: 27 cr.**

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

1. Co-op/Internship is optional

2. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

3. Choose from department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks). BBMB 303X General Biochemistry may not be used for a technical elective. See department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks) for approved course substitutions for BBMB 303X.

4. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

5. Students who substitute CHEM 201/201L credit for CHEM 177/CHEM 177L/CHEM 178L credit cannot also receive credit for CHEM 178. Credit for CHEM 178 must be earned through an Advanced Chemistry Elective that is taken in addition to the 3 credits of Advanced Chemistry required for all students.

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in
this category at the 300-level or above to qualify for the B.S. degree in chemical engineering.

Pass-Not Pass Policy
A maximum of nine Pass-Not Pass semester credits may be used to meet graduation requirements. Courses offered on a Satisfactory-Fail basis may not be taken on a Pass-Not Pass basis. Pass-Not Pass credits can be applied toward requirements for a B.S. degree in chemical engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not Pass credits are not acceptable for technical elective courses or for courses used to satisfy the US diversity or international perspectives requirements.

* Choose from department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks).

**Graduate Study**

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor's degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the master of science degree. The master of science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework, 12 within Ch E and 3 outside). The master of engineering requirements are the same for total credits but include a special project or coursework rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework, at least 16 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree can refer to the department's home page and/or the department's Graduate Student Handbook for degree options and credit requirements.

Well-qualified juniors and seniors in chemical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.

**Courses primarily for undergraduates:**

**CH E 104: Chemical Engineering Learning Community**
Cr. R. F.

*Prerequisite: Enrollment in Chemical Engineering Learning Team*

(1-0) Curriculum in career planning and academic course support for Freshmen learning team.
CH E 160: Chemical Engineering Problems with Computer Applications Laboratory
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

CH E 202: Chemical Engineering Seminar
(1-0) Cr. 1. F.
Prereq: Credit or enrollment in CH E 210.
Professionalism in the context of the engineering/technical workplace. Introduction to chemical engineering career opportunities. Process and workplace safety. Development and demonstration of key workplace competencies: teamwork, professionalism and ethical responsibility, ability to engage in life-long learning, and knowledge of contemporary issues. Resumes; professional portfolios; preparation for internship experiences. Restricted to CHE majors.

CH E 204: Chemical Engineering Continuing Learning Community
Cr. R.
Prereq: Enrollment in Chemical Engineering Learning Team
Curriculum and career planning, academic course support for learning community.

CH E 205: Chemical Engineering Progress Assessment
Cr. R. F.S.
Prereq: CHEM 178, MATH 166; credit or enrollment in CH E 160 and CH E 210
Assessment of proficiency in general chemistry, calculus (including infinite series and applications of derivatives and integrals), and material balances, and an ability to use the principles of science and mathematics to identify, formulate, and solve engineering problems. Offered on a satisfactory-fail basis only.

CH E 210: Material and Energy Balances
(3-0) Cr. 3. F.S.
Prereq: Chem 178, Math 166, CH E 160
Introduction to chemical processes. Physical behavior of gases, liquids, and solids. Application of material and energy balances to chemical engineering equipment and processes.

CH E 220: Introduction to Biomedical Engineering
(Cross-listed with B M E). (3-0) Cr. 3. S.
Prereq: BIOL 212, ENGR 160 or equiv, MATH 166, CHEM 167 or CHEM 178, PHYS 222
Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics.

CH E 310: Computational Methods in Chemical Engineering
(3-0) Cr. 3. F.S.
Prereq: CH E 160, CH E 205, CH E 210, MATH 265
Numerical methods for solving systems of linear and nonlinear equations, ordinary differential equations, numerical differentiation and integration, and nonlinear regression using chemical engineering examples.

CH E 325: Chemical Engineering Laboratory I
(0-4) Cr. 2. F.S.
Prereq: CH E 357, CH E 381; credit or enrollment in ENGL 314 or ENGL 309 or ENGL 312 or JL MC 347
Experiments covering fundamental material and energy balances, momentum and energy transport operations, and thermodynamics. Computer applications.

CH E 356: Transport Phenomena I
(3-0) Cr. 3. F.S.
Prereq: CH E 205, CH E 210, PHYS 221; credit or enrollment in MATH 267
Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling.

CH E 357: Transport Phenomena II
(3-0) Cr. 3. F.S.
Prereq: CH E 356
Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion.

CH E 358: Separations
(3-0) Cr. 3. F.S.
Prereq: CH E 310, CH E 357, CH E 381
Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer.
CH E 381: Chemical Engineering Thermodynamics
(3-0) Cr. 3. F.S.
Prereq: MATH 267, PHYS 222, CHEM 325; credit or enrollment in CH E 310
Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria.

CH E 382: Chemical Reaction Engineering
(3-0) Cr. 3. F.S.
Prereq: CH E 310, CH E 381; credit or enrollment in CH E 357
Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors.

CH E 391: Foreign Study Orientation
(3-0) Cr. 3. S.
Prereq: CH E 357, CH E 381; credit or enrollment in ENGL 314 or ENGL 309 or ENGL 312 or JL MC 347
Offered on a satisfactory-fail basis only. Credit for graduation allowable only upon completion of CH E 392.
Meets International Perspectives Requirement.

CH E 392: Foreign Study Program
Cr. 4. SS.
Prereq: CH E 358, CH E 382, CH E 391
Study of chemical engineering including laboratories and lectures at collaborating international universities. Comparative study of U.S. and international manufacturing facilities. Expenses required.
Meets International Perspectives Requirement.

CH E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer.
Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

CH E 398: Cooperative Education
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year.
Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

CH E 406: Environmental Chemodynamics
(Dual-listed with CH E 506). (3-0) Cr. 3.
Prereq: CHE 357, CH E 381
Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment.

CH E 408: Surface and Colloid Chemistry
(Dual-listed with CH E 508). (3-0) Cr. 3.
Prereq: CH E 381
Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis.

CH E 415: Biochemical Engineering
(Dual-listed with CH E 515). (3-0) Cr. 3.
Prereq: CH E 357, CHEM 331; BBMB 301 or BBMB 303 or BBMB 404
Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

CH E 420: Chemical Process Safety
(3-0) Cr. 3. F.S.
Prereq: CH E 357, CH E 381
Application of transport phenomena, thermodynamics, and chemical kinetics to the study of safety, health, and loss prevention. Government regulations, industrial hygiene, relief sizing, runaway reactions, toxic release, and dispersion models will be used. Fires, explosions, risk assessment, hazard identification, case studies, accident investigations, and design considerations will be studied.

CH E 421: Process Control
(3-0) Cr. 3. F.S.
Prereq: CH E 358, CH E 382, Math 267
Control of industrial chemical processes. Device applications and limitations. Dynamics of chemical process components and process control systems.

CH E 426: Chemical Engineering Laboratory II
(0-4) Cr. 2. F.S.
Prereq: CH E 325, CH E 358, CH E 382
Experiments in heat and mass transfer, staged operations, chemical reactor performance, unit processes. Computer applications. Only one of CH E 426 or 427 may count toward graduation.

CH E 427: Biological Engineering Laboratory
(0-4) Cr. 2. S.
Prereq: CH E 325, CH E 358, CH E 382; BBMB 301 or BBMB 303 or BBMB 404
Experiments on biological applications in chemical engineering. Only one of CH E 426 or CH E 427 may count toward graduation.
CH E 430: Process and Plant Design
(2-4) Cr. 4. F.S.
Prereq: CH E 358, CH E 382
Synthesis of chemical engineering processes, equipment and plants.
Cost estimation and feasibility analysis.

CH E 440: Biomedical Applications of Chemical Engineering
(Dual-listed with CH E 540). (Cross-listed with B M E). (3-0) Cr. 3.
Prereq: CH E 210, MATH 266 or MATH 267, PHYS 222
Applications of material and energy balances, transport phenomena,
chemical reaction engineering, and thermodynamics to problems in
biomedical engineering and applied physiology; survey of biomedical
engineering; biomaterials; biomedical imaging.

CH E 447: Polymers and Polymer Engineering
(Dual-listed with CH E 547). (3-0) Cr. 3.
Prereq: CHEM 331; CH E 382 or MAT E 351
Chemistry of polymers, addition and condensation polymerization.
Physical and mechanical properties, polymer rheology, production
methods. Applications of polymers in the chemical industry.

CH E 490: Undergraduate Research/Independent Study
(0-18) Cr. 1-6. Repeatable, maximum of 6 credits.
Prereq: Permission of department
Investigation of topics of special interest to student and faculty with a
final written report or presentation. Election of course and topic must be
approved in advance by Department with completion of Study Proposal.
No more than 6 credits of ChE 490 may be counted towards technical
electives.

CH E 490H: Undergraduate Research/Independent Study, Honors
(0-18) Cr. 1-6. Repeatable, maximum of 6 credits.
Prereq: Permission of Department
Investigation of topics of special interest to student and faculty with a
final written report or presentation. Election of course and topic must be
approved in advance by Department with completion of Study Proposal.
No more than 6 credits of ChE 490 may be counted towards technical
electives.

Courses primarily for graduate students, open to qualified
undergraduates:

CH E 506: Environmental Chemodynamics
(Dual-listed with CH E 406). (3-0) Cr. 3.
Prereq: CHEM 357, CH E 381
Examines the mechanisms and rates of chemical transport across air,
water, and soil interfaces. Applications of transport and thermodynamic
fundamentals to movement of chemicals in the environment.

CH E 508: Surface and Colloid Chemistry
(Dual-listed with CH E 408). (3-0) Cr. 3.
Prereq: CH E 381
Examines the factors underlying interfacial phenomena, with an
emphasis on the thermodynamics of surfaces, structural aspects, and
electrical phenomena. Application areas include emulsification, foaming,
detergency, sedimentation, fluidization, nucleation, wetting, adhesion,
and electrophoresis.

CH E 515: Biochemical Engineering
(Dual-listed with CH E 415). (3-0) Cr. 3.
Prereq: CH E 357, CHEM 331; BBMB 301 or BBMB 303 or BBMB 404
Application of basic chemical engineering principles in biochemical
and biological process industries such as enzyme technology and
fermentation.

CH E 540: Biomedical Applications of Chemical Engineering
(Dual-listed with CH E 440). (3-0) Cr. 3.
Prereq: CH E 210, MATH 266 or MATH 267, PHYS 222
Applications of material and energy balances, transport phenomena,
chemical reaction engineering, and thermodynamics to problems in
biomedical engineering and applied physiology; survey of biomedical
engineering; biomaterials; biomedical imaging.

CH E 542: Polymeric Biomaterials
(3-0) Cr. 3.
Prereq: CHEM 331 or a polymers class
Polymeric biomaterials, overview of biomaterial requirements, different
classes of polymers used as biomaterials, specific bioapplications of
polymers.

CH E 545: Analytical and Numerical Methods
(3-0) Cr. 3. F.
Prereq: CH E 358, MATH 267
Analysis of equipment and processes by analytic and/or numerical
solution of descriptive differential equations. Operational and series
techniques, boundary value problems, numerical interpolation and
approximation, integration techniques.

CH E 547: Polymers and Polymer Engineering
(Dual-listed with CH E 447). (3-0) Cr. 3.
Prereq: CHEM 331; CH E 382 or MAT E 351
Chemistry of polymers, addition and condensation polymerization.
Physical and mechanical properties, polymer rheology, production
methods. Applications of polymers in the chemical industry.
CH E 554: Integrated Transport Phenomena
(4-0) Cr. 4. F.
Prereq: CH E 357, CH E 381, Math 267, credit or enrollment in CH E 545
Conservation equations governing diffusive and convective transport of momentum, thermal energy and chemical species. Transport during laminar flow in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled with chemical reactions and phase change. Scaling and approximation methods for mathematical solution of transport models. Diffusive fluxes; conservation equations for heat and mass transfer; scaling and approximation techniques; fundamentals of fluid mechanics; unidirectional flow; creeping flow; laminar flow at high Reynolds number; forced-convection heat and mass transfer in confined and unconfined laminar flows.

CH E 562: Bioseparations
(3-0) Cr. 3.
Prereq: CH E 357 or advanced standing in a science major
Principles and techniques for separation and recovery of biologically-produced molecules, especially proteins. Relationship between the chemistry of biological molecules and efficient separation and preservation of biological activity. Includes centrifugation and filtration, membrane processing, extraction, precipitation and crystallization, chromatography, and electrophoresis.

CH E 572: Turbulence
(Cross-listed with AER E). (3-0) Cr. 3.
Prereq: AER E 541 or M E 538

CH E 583: Advanced Thermodynamics
(3-0) Cr. 3. F.
Prereq: CH E 381
Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-reaction equilibria/stability.

CH E 587: Advanced Chemical Reactor Design
(3-0) Cr. 3. S.
Prereq: CH E 382
Analysis of complex reactions and kinetics. Fixed bed, fluidized bed, and other industrial reactors. Analysis and design of non-ideal flow mixing, and residence times. Heterogeneous reactors.

CH E 590: Independent Study
Cr. 2-6. Repeatable.
Investigation of an approved topic on an individual basis.

CH E 595: Special Topics
Cr. 2-3. Repeatable.

CH E 595A: Special Topics: Separations
Cr. 2-3. Repeatable.

CH E 595B: Special Topics: Advanced Control Theory
Cr. 2-3. Repeatable.

CH E 595C: Special Topics: Crystallization
Cr. 2-3. Repeatable.

CH E 595D: Special Topics: Thermodynamics
Cr. 2-3. Repeatable.

CH E 595E: Special Topics: Protein Engineering/Bioseparations
Cr. 2-3. Repeatable.

CH E 595F: Special Topics: Biological Engineering
Cr. 2-3. Repeatable.

CH E 595G: Special Topics: Materials and Biomaterials
Cr. 2-3. Repeatable.

CH E 595H: Special Topics: Surfaces
Cr. 2-3. Repeatable.

CH E 595I: Special Topics: Combinatorial Design
Cr. 2-3. Repeatable.

CH E 599: Creative Component
Cr. arr. Repeatable.

Courses for graduate students:

CH E 601: Seminar
Cr. R. Repeatable. F.S.
Offered on a satisfactory-fail basis only.

CH E 625: Metabolic Engineering
(3-0) Cr. 3.
Prereq: CH E 382, CHEM 331
Principles of metabolic engineering. Emphasis on emerging examples in biorenewables and plant metabolic engineering. Overview of biochemical pathways, determination of flux distributions by stoichiometric and labeling techniques; kinetics and thermodynamics of metabolic networks; metabolic control analysis; genetic engineering for overexpression, deregulation, or inhibition of enzymes; directed evolution; application of bioinformatics, genomics, and proteomics.
CH E 632: Multiphase Flow
(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M E 538
Single particle, multiparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions.

CH E 642: Principles and Applications of Molecular Simulation
(3-0) Cr. 3.
Prereq: CH E 545

CH E 652: Advanced Transport
(3-0) Cr. 3.
Prereq: CH E 552 and CH E 553
Advanced topics in momentum transport, fluid mechanics, and mass transport including study of recent literature.

CH E 688: Catalysis and Catalytic Processes
(Cross-listed with BR C). (3-0) Cr. 3.
Prereq: CH E 382
Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

CH E 692: Independent Study
Cr. 2-6. Repeatable.
Investigation of an approved topic on an individual basis. Election of course and topic must be approved in advance by Program of Study Committee.

CH E 695: Advanced Topics
Cr. arr. Repeatable.

CH E 695A: Advanced Topics: Separations
Cr. arr. Repeatable.

CH E 695B: Advanced Topics: Advanced Statistical Modeling and Control
Cr. arr. Repeatable.

CH E 695C: Advanced Topics: Crystallization
Cr. arr. Repeatable.

CH E 695D: Advanced Topics: Thermodynamics
Cr. arr. Repeatable.

CH E 695E: Advanced Topics: Protein Engineering/Bioseparations
Cr. arr. Repeatable.

CH E 695F: Advanced Topics: Biological Engineering
Cr. arr. Repeatable.

CH E 695G: Advanced Topics: Materials and Biomaterials
Cr. arr. Repeatable.

CH E 695H: Advanced Topics: Surfaces
Cr. arr. Repeatable.

CH E 695I: Advanced Topics: Combinatorial Design
Cr. arr. Repeatable.

CH E 695J: Advanced Topics: Polymeric and Nanostructured Materials
Cr. arr. Repeatable.

CH E 695L: Advanced Topics: Catalysis, Reaction Engineering, and Renewable Energy
Cr. arr. Repeatable.

CH E 697: Engineering Internship
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of major professor, graduate classification
One semester and one summer maximum per academic year professional work period.

CH E 698: Chemical Engineering Teaching Practicum
(1-0) Cr. 1. F.
Prereq: Graduate student classification and permission of instructor
Discussions intended to foster the development of graduate students as teaching assistants and future chemical engineering instructors. Topics include classroom and laboratory instruction, grading, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

CH E 698A: Chemical Engineering Teaching Practicum: Teaching Practicum
(1-0) Cr. 1. F.
Prereq: Graduate student classification and permission of instructor
Discussions intended to foster the development of graduate students as teaching assistants and future chemical engineering instructors. Topics include classroom and laboratory instruction, grading, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

CH E 698B: Chemical Engineering Teaching Practicum: Teaching Experience
(1-0) Cr. 1. Repeatable. F.S.SS.
Prereq: CH E 698A
Participation in the instruction of a CH E course under the mentorship of a CBE faculty member. Typical activities may include lecture preparation and delivery, laboratory instruction, design of assessments, problem-solving sessions, office hours, and grading. Offered on a satisfactory-fail basis only.
Civil Engineering

http://www.ccee.iastate.edu/

Administered by the Department of Civil, Construction and Environmental Engineering

For undergraduate curriculum in civil engineering leading to the degree bachelor of science. The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Civil engineers apply principles of motion and materials to plan, design, construct, maintain, and operate public and private facilities, while working under economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, waste management, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes planning, designing, and executing surveying operations and locating, delimiting, and delineating physical and cultural features on the earth's surface. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on campus is supplemented by inspection trips, which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health; providing an ample safe water supply; managing solid and hazardous waste; treating and disposing of domestic and industrial wastewaters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and controlling water quality, soil contamination, and air pollution. The environmental option for the civil engineering degree replaces some of the courses and electives in the general curriculum with further courses in chemistry, biology, and microbiology as well as specific topics in environmental engineering and design.

The civil engineering curriculum equips students with a broad education that includes technical skills in analysis and design and professional practices such as communication, teamwork, leadership, and ethics.

Program educational objectives: By three to five years after graduation, graduates of the civil engineering program will have:

1. Pursued successful careers and expertise in civil engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment and study abroad programs. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and either a master of science in Civil Engineering or a master of business administration in the College of Business Administration. These students would have an opportunity to graduate in five years with both degrees.

Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 129. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication Proficiency/Library requirement

**Notes.**

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list (http://www.ccee.iastate.edu/academics/advising/civil-engineering-student-forms). At least six of eleven credits must be C E or Con E courses for the Engineering Topics Electives.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. Students who transfer in with CHEM 167/CHEM 167L will be able to take CHEM 178/CHEM 178L to complete the program’s Chemistry requirement.

See also: A 4-year plan of study grid showing course template by semester for Civil Engineering

**Curriculum in Civil Engineering with Environmental Option**

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

**Total credits required: 130.** Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communication Proficiency/Library requirement:**

Graduate Study

The Department of Civil, Construction and Environmental Engineering offers graduate programs for the degrees of master of engineering, master of science, and doctor of philosophy with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, transportation engineering, and intelligent infrastructure engineering. The department also offers graduate minors of 9 to 15 credits of coursework to students from other engineering departments.

Candidates for the degrees of master of engineering and master of science are required to complete a total of 30 acceptable graduate credits. The master of engineering degree involves all course work. The master of science degree requires the preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree are required to complete a minimum of 72 acceptable graduate credits. Normal prerequisite for major graduate work in civil engineering is the completion of an undergraduate curriculum substantially equivalent to that required of engineering students at this university. Due to the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student’s background and area of interest. The department participates in the interdepartmental graduate programs in transportation, environmental science, wind energy science, engineering and policy and biorenewable resources and technology.

The department also offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 graduate credits (nine credits of "core courses" and three credits of approved "elective courses").

The environmental engineering or environmental systems certificate requires 12 graduate credits (six credits of "core courses", six credits of approved "elective courses") and a seminar course or an approved equivalent.

Additional information about graduate programs, research and admission criteria are available on the department’s website http://www.ccee.iastate.edu/academics/graduate/.

Courses primarily for undergraduates:

C E 105: Introduction to the Civil Engineering Profession
(1-0) Cr. 1. F.S.
Overview of the civil engineering profession in regards to its nature and scope. Exploration of the various specialty areas within civil engineering through team activities. Review and guidance in relation to academic degree options, career avenues and professional practices involving communication, teamwork, leadership, ethics, networking, life-long learning goals, and mentoring.

C E 111: Fundamentals of Surveying I
(2-3) Cr. 3. F.S.
Prereq: MATH 165, C E 160, credit or enrollment in C E 170

C E 120: Civil Engineering Learning Community
Cr. R. Repeatable.
Integration of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. Offered on a satisfactory-fail basis only.

C E 160: Engineering Problems with Computational Laboratory
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment in MATH 165

C E 170: Graphics for Civil Engineering
(0-4) Cr. 2. F.S.
Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.
C E 206: Engineering Economic Analysis and Professional Issues in Civil Engineering
(3-0) Cr. 3. F.S.
Prereq: MATH 166, ENGL 250; C E 105; ECON 101 recommended
Engineering/managerial analysis of the economic aspects of project proposals. Alternative sources of funds; time value of money; expenditure of capital funds and methods of evaluating alternative projects. Professionalism, licensure, liability, ethics, leadership, social responsibility, creative and critical thinking, and applications/impacts of regulations in civil engineering.

C E 306: Project Management for Civil Engineers
(2-3) Cr. 3. F.S.
Prereq: ENGL 250, C E 105
Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents, plan reading, and in estimating quantities.

C E 326: Principles of Environmental Engineering
(2-2) Cr. 3. F.S.
Prereq: CHEM 177 or CHEM 178, MATH 166, credit or enrollment in E M 378
Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control.

C E 332: Structural Analysis I
(2-2) Cr. 3. F.S.
Prereq: E M 324
Loads, shear, moment, and deflected shape diagrams for beams and framed structures. Deformation calculations. Approximate methods. Application of consistent deformation methods to continuous beams and frames. Application of displacement or slope deflection methods to continuous beams and frames without sway. Influence lines for determinate and indeterminate structures. Computer applications to analyze beams and frames. Validation of computer results.

C E 333: Structural Steel Design I
(3-1) Cr. 3. F.S.
Prereq: C E 332, E M 327

C E 334: Reinforced Concrete Design I
(2-2) Cr. 3. F.S.
Prereq: C E 332, E M 327
ACI design methods for structural concrete members. Emphasis on the analysis and design for flexure of singly reinforced and doubly reinforced sections, T-section, one-way slabs, short columns, and isolated footings. Analysis and design for shear, and serviceability. Bond, anchorage, and development of reinforcement.

C E 355: Principles of Transportation Engineering
(3-0) Cr. 3. F.S.
Prereq: C E 111
Introduction to planning, design, and operations of transportation facilities. Road user, vehicle and roadway characteristics. Technological, economic and environmental factors. Asset management, transportation planning, capacity analysis, traffic control, geometric design, traffic safety.

C E 360: Geotechnical Engineering
(2-3) Cr. 3. F.S.
Prereq: E M 324, credit or enrollment in GEOL 201
Introduction to geotechnical engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity.

C E 372: Engineering Hydrology and Hydraulics
(3-0) Cr. 3. F.S.
Prereq: E M 378, a course in statistics from the approved department list
The hydrologic cycle: precipitation, infiltration, runoff, evapotranspiration, groundwater, and streamflow. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required.

C E 382: Design of Concretes
(2-3) Cr. 3. F.S.
Prereq: E M 274
Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing; principles of pavement thickness design.

C E 383: Design of Portland Cement Concrete
(0-2) Cr. 1. F.S.
Prereq: E M 274
For Con E students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete. Credit for both C E 382 and C E 383 may not be applied for graduation.
C E 388: Sustainable Engineering and International Development
(Cross-listed with A B E, E E). (2-2) Cr. 3. F.
Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report.
Meets International Perspectives Requirement.

C E 395: Global Perspectives in Transportation
Cr. 3. Repeatable, maximum of 2 times. S.
Prereq: CE 355 or equivalent
Background on historical civil engineering design and construction. Impacts of historical, cultural, social, economic, ethical, environmental, and political conditions on the design and construction of various infrastructure projects outside the United States. Global road safety and intermodal operations. Addressing transportation problems in a large metropolitan area.
Meets International Perspectives Requirement.

C E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Summer professional work period. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

C E 398: Cooperative Education (Co-op)
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

C E 403: Program and Outcome Assessment
Cr. R. F.S.
Prereq: Verification of undergraduate application for graduation by the end of the first week of class. Permission of instructor for students who are scheduled for summer graduation
Assessment of C E Curriculum and educational objectives. Assessments to be reviewed by the CE Department to incorporate potential improvements. Offered on a satisfactory-fail basis only.

C E 413: Applied and Environmental Geophysics
(Dual-listed with C E 513). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

C E 417: Land Surveying
(2-3) Cr. 3. S.
Prereq: C E 111
Legal principles affecting the determination of land boundaries, public domain survey systems. Locating sequential and simultaneous conveyances. Record research, plat preparation, and land description. Study of selected court cases.

C E 420: Environmental Engineering Chemistry
(Dual-listed with C E 520). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: C E 326, CHEM 178
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 421: Environmental Biotechnology
(Dual-listed with C E 521). (2-2) Cr. 3. F.
Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

C E 424: Air Pollution
(Dual-listed with C E 524). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with C E 524A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
C E 424B: Air Pollution: Climate change and causes
(Dual-listed with C E 524B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424C: Air Pollution: Transportation Air Quality
(Dual-listed with C E 524C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

C E 424D: Air Pollution: Off-gas treatment technology
(Dual-listed with C E 524D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above.
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 428: Water and Wastewater Treatment Plant Design
(2-2) Cr. 3. S.
Prereq: C E 326
Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management.

C E 439: Seismic Methods in Geology, Engineering, and Petroleum Exploration
(Dual-listed with C E 539). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment.

C E 446: Bridge Design
(Dual-listed with C E 546). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: C E 333, C E 334
Bridge design in structural steel and reinforced concrete. Application of AASHTO Bridge Design Specifications. Analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches.

C E 448: Building Design
(Dual-listed with C E 548). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: C E 333, C E 334

C E 449: Structural Health Monitoring
(Dual-listed with C E 549). (3-0) Cr. 3.
Prereq: Senior classification in Engineering or permission of instructor
Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 449 and an additional design project or more in-depth analysis and design.

C E 451: Urban Transportation Planning Models
(Dual-listed with C E 551). (3-0) Cr. 3. F.
Prereq: C E 355, STAT 101 or STAT 105
Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems.

C E 453: Highway Design
(2-2) Cr. 3. F.
Prereq: C E 306, C E 355
Introduction to highway planning and design. Design, construction, and maintenance of highway facilities. Level-of-service, stopping sight distance, highway alignment, earthwork and pavement design. Design project, oral reports and written reports. Computer applications.

C E 460: Foundation Engineering
(3-0) Cr. 3. F.S.
Prereq: C E 360
C E 467: Geomaterials Stabilization  
(Dual-listed with C E 567). (2-2) Cr. 3. S.  
Prereq: C E 360, C E 382 or C E 383  
Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.

C E 473: Groundwater Hydrology  
(Dual-listed with C E 573). (3-0) Cr. 3. F.  
Prereq: C E 372  

C E 483: Pavement Analysis and Design  
(Dual-listed with C E 583). (3-0) Cr. 3. S.  
Prereq: C E 360 and C E 382  
Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 484: Advanced Design of Concretes  
(Dual-listed with C E 584). (2-3) Cr. 3.  
Prereq: C E 382  
Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, lightweight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. A term project is required for graduate level only.

C E 485: Civil Engineering Design  
(2-2) Cr. 3. F.S.  
Prereq: C E 206, C E 306, C E 326, C E 333 or C E 334, C E 355, C E 360, C E 372, C E 382, SP CM 212. Course enrollment limited to final graduating semester.  
The civil engineering design process, interacting with the client, identification of the engineering problems, development of a technical proposal, identification of design criteria, cost estimating, planning and scheduling, codes and standards, development of feasible alternatives, selection of best alternative, and oral presentation.

C E 488: Sustainable Civil Infrastructure Systems  
(Dual-listed with C E 588). (3-0) Cr. 3. S.  
Prereq: Junior or higher classification in engineering or science  
Sustainable planning, life cycle analysis, appropriate engineering design, investment levels and overall rating of civil engineering infrastructure systems, including highway, bridge, airport, rail, dam, power and port facilities. Complementary assessment of future civil infrastructure sustainability impacts and challenges in relation to autonomous and electric vehicle development. Overview regarding US and global availability and supply of critical infrastructure commodities (e.g., cement, stone, metals, phosphorus, uranium, etc.). Directed course readings and multiple project/design reports.

C E 490: Independent Study  
Cr. 1-3. Repeatable. F.S.S.  
Prereq: Permission of instructor  
Independent study in any phase of civil engineering. Pre-enrollment contract required. No more than 6 credits of C E 490 may be counted towards engineering topics electives.

C E 490H: Independent Study: Honors  
Cr. 1-3. Repeatable. F.S.S.  
Prereq: Permission of instructor  
Independent study in any phase of civil engineering. Pre-enrollment contract required. No more than 6 credits of C E 490H may be counted towards engineering topics electives.

Courses primarily for graduate students, open to qualified undergraduates:

C E 501: Preconstruction Project Engineering and Management  
(3-0) Cr. 3. F.  
Prereq: Credit or enrollment in CON E 422 or C E 306 or graduate standing  
Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Emphasis is on managing complex projects using 5-dimensional project management theory.
C E 502: Construction Project Engineering and Management
(3-0) Cr. 3. S.
Prereq: Credit or enrollment in CON E 422 or C E 594A or permission of instructor
Application of engineering and management control techniques to complex construction projects. Construction project control techniques, project administration, construction process simulation, quality management, and productivity improvement programs.

C E 503: Construction Finance and Business Management
(3-0) Cr. 3. S.
Prereq: Credit or enrollment in CON E 422 or C E 594A or permission of instructor

C E 505: Design of Construction Systems
(3-0) Cr. 3. F.
Prereq: C E 333, C E 360, CON E 322, CON E 340 or graduate standing
Advanced design of concrete formwork and falsework systems. Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

C E 506: Case Histories in Construction Documents
(3-0) Cr. 3.
Prereq: Graduate standing or permission of instructor
Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510: Information Technologies for Construction
(3-0) Cr. 3.
Prereq: Graduate standing or permission of instructor
Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 513: Applied and Environmental Geophysics
(Dual-listed with C E 413). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

C E 520: Environmental Engineering Chemistry
(Dual-listed with C E 420). (Cross-listed with ENSCI). (2-3) Cr. 3. F.
Prereq: C E 326, CHEM 178
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 521: Environmental Biotechnology
(Dual-listed with C E 421). (Cross-listed with ENSCI). (2-2) Cr. 3. F.
Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

C E 522: Water Pollution Control Processes
(Cross-listed with ENSCI). (2-2) Cr. 3.
Prereq: C E 421 or C E 521
Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

C E 523: Physical-Chemical Treatment Process
(Cross-listed with ENSCI). (2-2) Cr. 3.
Prereq: C E 520
Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.
C E 524: Air Pollution
(Dual-listed with C E 424). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with C E 424A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524B: Air Pollution: Climate change and causes
(Dual-listed with C E 424B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524C: Air Pollution: Transportation Air Quality
(Dual-listed with C E 424C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

C E 524D: Air Pollution: Off-gas treatment technology
(Dual-listed with C E 424D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524E: Air Pollution: Agricultural sources of pollution
(Dual-listed with C E 424E). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524F: Air Pollution: Agricultural sources of pollution
(Dual-listed with C E 424F). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 528: Solid and Hazardous Waste Management
(Cross-listed with ENSCI). (3-0) Cr. 3.
Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing
Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

C E 532: Structural Analysis II
(3-0) Cr. 3. F.
Prereq: C E 332
Analysis of indeterminate structural problems by the consistent deformation and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Special topics for the stiffness method.

C E 533: Structural Steel Design II
(3-0) Cr. 3.
Prereq: C E 333

C E 534: Reinforced Concrete Design II
(2-2) Cr. 3.
Prereq: C E 334

C E 535: Prestressed Concrete Structures
(3-0) Cr. 3.
Prereq: C E 334
Design of prestressed concrete structures, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, and statically indeterminate structures.

C E 539: Seismic Methods in Geology, Engineering, and Petroleum Exploration
(Dual-listed with C E 439). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment.
C E 541: Dynamic Analysis of Structures  
(3-0) Cr. 3.  
Prereq: E M 345 and credit or enrollment in C E 532  
Linear and nonlinear response. Modal analysis. Response spectra.  
Seismic analysis.  

C E 542: Structural Analysis by Finite Elements  
(3-0) Cr. 3.  
Prereq: C E 532  

C E 545: Seismic Design  
(3-0) Cr. 3.  
Prereq: C E 333, C E 334  

C E 546: Bridge Design  
(Dual-listed with C E 446). (2-2) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: C E 333, C E 334  
Bridge design in structural steel and reinforced concrete. Application of AASHTO Bridge Design Specifications. Analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches.  

C E 547: Analysis and Design of Plate and Slab Structures  
(3-0) Cr. 3.  
Prereq: C E 334, E M 514, MATH 266  
Bending and buckling of thin plate components in structures utilizing classical and energy methods. Analysis of shell roofs by membrane and bending theories.  

C E 548: Building Design  
(Dual-listed with C E 448). (2-2) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: C E 333, C E 334  

C E 549: Structural Health Monitoring  
(Dual-listed with C E 449). (3-0) Cr. 3.  
Prereq: Senior classification in Engineering or permission of instructor  
Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 449 and an additional design project or more in-depth analysis and design.  

C E 551: Urban Transportation Planning Models  
(Dual-listed with C E 451). (3-0) Cr. 3. F.  
Prereq: C E 355, STAT 101 or STAT 105  
Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems.  

C E 552: Traffic Safety, Operations, and Maintenance  
(3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: C E 355  
Engineering aspects of highway traffic safety. Reduction of crash incidence and severity through highway design and traffic control. Accident analysis. Safety in highway design, maintenance, and operation.  

C E 553: Traffic Engineering  
(3-0) Cr. 3. F.  
Prereq: C E 355  
Driver, pedestrian, and vehicular characteristics. Traffic characteristics; highway capacity; traffic studies and analyses. Principles of traffic control for improved highway traffic service. Application of appropriate computing software and tools.  

C E 556: Transportation Data Analysis  
(3-0) Cr. 3.  
Prereq: C E 355, a Statistics course at the 300 level or higher  
Analysis of transportation data, identification of data sources and limitations. Static and dynamic data elements such as infrastructure characteristics, flow and operations-related data elements. Spatial and temporal extents data for planning, design, operations, and management of transportation systems. Summarizing, analyzing, modeling, and interpreting data. Use of information technologies for highways, transit, and aviation systems.
C E 557: Transportation Systems Analysis
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: C E 355, 3 credits in statistics or probability
Travel studies and analysis of data. Transportation systems forecasts and analyses. Statewide, regional, and local transportation system planning. Network level systems planning and operations. Optimization of systems.

C E 558: Transportation Systems Development and Management
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: C E 355
Study of designated problems in traffic engineering, transportation planning, and development. Forecasting and evaluation of social, economic, and environmental impacts of proposed solutions; considerations of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

C E 559: Transportation Infrastructure/Asset Management
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: C E 355
Engineering management techniques for maintaining and managing infrastructure assets. Systematic approach to management through value engineering, engineering economics, and life cycle cost analysis. Selection and scheduling of maintenance activities. Analysis of network-wide resource needs. Project level analysis.

C E 560: Fundamentals of Soil Mechanics
(3-0) Cr. 3.
Prereq: C E 360
Nature of soil deposits, seepage, settlement and secondary compression, consolidation theories and analysis, failure theories, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, liquefaction of soil, pore pressure parameters, selection of soil parameters.

C E 561: Applied Foundation Engineering
(3-0) Cr. 3.
Prereq: C E 460
Analysis and design of shallow and deep foundations, lateral earth pressure theories and retaining structures, field investigations, in-situ testing, and foundations on problematic soils. Foundation engineering reports.

C E 562: Site Evaluations for Civil Engineering Projects
(2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: C E 360
Identification and mapping of engineering soils from aerial photos, maps, and soil surveys. Planning subsurface investigations, geomaterials prospecting, geotechnical hazards, geomorphology, in situ testing and sampling, geophysical site characterization, instrumentation and monitoring, interpretation of engineering parameter values for design.

C E 563: Experimental Methods in Geo-Engineering
(2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: C E 360
Principles of geo-engineering laboratory testing including the conduct, analysis, and interpretation of permeability, consolidation, triaxial, direct and ring shear, and direct simple shear tests. Issues regarding laboratory testing versus field testing and acquisition, transport, storage, and preparation of samples for geotechnical testing. Field and laboratory geotechnical monitoring techniques, including the measurements of deformation, strain, total stress and pore water pressure.

C E 564: Application of Numerical Methods to Geotechnical Design
(3-0) Cr. 3.
Prereq: C E 560
Application of numerical methods to analysis and design of foundations, underground structures, and soil-structure interaction. Application of slope stability software. Layered soils, bearing capacity and settlement for complex geometries, wave equation for piles, and foundation vibrations.

C E 565: Fundamentals of Geomaterials Behavior
(2-3) Cr. 3. S.
Prereq: C E 382
Atoms and molecules, crystal chemistry, clay minerals, structure of solids, phase transformations and phase equilibria. Surfaces and interfacial phenomena, colloid chemistry, mechanical properties. Applications to soils and civil engineering materials. Overview of state-of-the-art instrumental techniques for analysis of the physicochemical properties of soils and civil engineering materials.

C E 566: Geomaterials Stabilization
(Dual-listed with C E 467). (2-2) Cr. 3. S.
Prereq: C E 360, C E 382 or C E 383
Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.
C E 568: Dynamics of Soils and Foundations
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: C E 360, E M 345

C E 569: Ground Improvement
(3-0) Cr. 3.
Prereq: C E 360
Classification of ground improvement methods. Dynamic compaction, vibrocompaction, preloading using fill surcharge, vacuum or a combination of both and prefabricated vertical drains, vibro replacement or stone columns, dynamic replacement, sand compaction piles, geotextile confined columns, rigid inclusion, column supported embankment, microbial methods, particulate and chemical grouting, lime and cement columns, jet grouting, and deep cement mixing.

C E 570: Applied Hydraulic Design
(2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: C E 372
Flow characteristics in natural and constructed channels; principles of hydraulic design of culverts, bridge waterway openings, spillways, hydraulic gates and gated structures, pumping stations, and miscellaneous water control structures; pipe networks, mathematical modeling. Design project.

C E 571: Surface Water Hydrology
(Cross-listed with ENSCI). (3-0) Cr. 3. S.
Prereq: C E 372
Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination.

C E 572: Analysis and Modeling Aquatic Environments
(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: C E 372
Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

C E 573: Groundwater Hydrology
(Dual-listed with C E 473). (3-0) Cr. 3. F.
Prereq: C E 372

C E 576: Environmental Flows
(3-0) Cr. 3.
Prereq: E M 378 or equivalent
Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

C E 581: Geotechnical and Materials Engineering Seminar
Cr. R. Repeatable.
Prereq: Graduate classification
(1-0) Students and outside/invited speakers give weekly presentations about the ongoing research work and Geotechnical and Materials Engineering issues. Offered on a satisfactory-fail basis only.

C E 583: Pavement Analysis and Design
(Dual-listed with C E 483). (3-0) Cr. 3. S.
Prereq: C E 360 and C E 382
Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 584: Advanced Design of Concretes
(Dual-listed with C E 484). (2-3) Cr. 3.
Prereq: C E 382
Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, lightweight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. A term project is required for graduate level only.
C E 586: Advanced Asphalt Materials  
(2-3) Cr. 3.  
Prereq: C E 382  

C E 587: Advanced Portland Cement Concretes  
(2-3) Cr. 3.  
Prereq: C E 382 or C E 383  
Hydraulic cements, aggregates, admixtures, and concrete mix design; cement hydration and microstructure development; fresh, early-age, and mechanical properties of concrete; concrete distress examination, damage mechanism, and prevention.

C E 588: Sustainable Civil Infrastructure Systems  
(Dual-listed with C E 488). (3-0) Cr. 3. F.  
Prereq: Junior or higher classification in engineering or science  
Sustainable planning, life cycle analysis, appropriate engineering design, investment levels and overall rating of civil engineering infrastructure systems, including highway, bridge, airport, rail, dam, power and port facilities. Complementary assessment of future civil infrastructure sustainability impacts and challenges in relation to autonomous and electric vehicle development. Overview regarding US and global availability and supply of critical infrastructure commodities (e.g., cement, stone, metals, phosphorus, uranium, etc.). Directed course readings and multiple project/design reports.

C E 589: Pavement Preservation and Rehabilitation  
(Dual-listed with C E 489). Cr. 3. F.S.  
Prereq: C E 382  
Overview of pavement preservation and pavement rehabilitation techniques. Overview and selection of materials used in pavement preservation and rehabilitation strategies. Evaluating suitability of pavement preservation and pavement rehabilitation strategies based on existing structure, pavement distresses and non-condition factors. Use of recycled pavement materials in pavement reconstruction techniques.

C E 590: Special Topics  
Cr. 1-5. Repeatable. F.S.S.S.  
Pre-enrollment contract required.

C E 591: Seminar in Environmental Engineering  
Cr. R. Repeatable. F.S.  
Prereq: Graduate classification  
(1-0) Contemporary environmental engineering issues. Outside speakers. Review of ongoing research in environmental engineering. Offered on a satisfactory-fail basis only.

C E 594: Special Topics in Construction Engineering and Management  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics:

C E 594A: Special Topics Construction Engineering and Mgt.: Planning and Scheduling  
Cr. 3. F.  
Prereq: C E 306 or graduate standing  
Studies in planning and scheduling including scheduling and estimating. Credit may not be applied for graduation for Construction Engineering undergraduate students.

C E 594B: Special Topics Construction Engineering and Mgt.: Computer Applications for Planning and Scheduling  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Studies in computer applications for planning and scheduling.

C E 594C: Special Topics Construction Engineering and Mgt.: Cost Estimating  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Studies in cost estimating.

C E 594D: Special Topics Construction Engineering and Mgt.: Computer Applications for Cost Estimating  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Studies in computer applications for cost estimating.

C E 594E: Special Topics Construction Engineering and Mgt.: Project Controls  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Studies in project controls.

C E 594F: Special Topics Construction Engineering and Mgt.: Computer Applications for Project Controls  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Studies in computer applications for project controls.

C E 594G: Special Topics Construction Engr and Mgt: Integration of Planning, Scheduling and Project Controls  
Cr. 1-3. Repeatable.  
Prereq: Permission of instructor  
Studies in integration of planning, scheduling and project controls.
C E 594J: Special Topics Construction Engineering and Mgt.: Trenchless Technologies
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Studies in trenchless technologies.

C E 594K: Special Topics Construction Engineering and Mgt.: Electrical and Mechanical Construction
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Studies in electrical and mechanical construction.

C E 594L: Special Topics Construction Engineering and Mgt.: Construction Topics - LEED for New Construction
Cr. 3. SS.
Prereq: CON E 352 or C E 306 or graduate standing or permission of instructor
Studies in advanced building construction topics including LEED.

C E 594M: Special Topics Construction Engineering and Mgt.: Design Build Construction
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Studies in design build construction.

C E 594N: Special Topics Construction Engineering and Mgt.: Industrial Construction
Cr. 3.
Prereq: Graduate standing or permission of instructor
Studies in industrial construction.

C E 594O: Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction
Cr. 3.
Prereq: CON E 322 or C E 306 or graduate standing
Studies in highway and heavy construction.

C E 594P: Special Topics Construction Engineering and Mgt.: Advanced Building Energy Systems and Technologies
Cr. 3. F.
Prereq: CON E 352 or graduate standing or permission of instructor
Studies in advanced building technologies including building energy modeling, building energy performance and efficiency assessments, and demand side management for smart grid applications.

C E 594Q: Special Topics Construction Engineering and Mgt.: Construction Quality Control
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Studies in construction quality control.

C E 594R: Special Topics Construction Engineering and Mgt.: Risk Management
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Studies in risk management.

C E 594S: Special Topics Construction Engineering and Mgt.: Building Information Modeling
Cr. 1-3. Repeatable.
Prereq: Permission of instructor
Studies in building information modeling.

C E 595: Research Methods in Construction Engineering and Management
(1-0) Cr. 1.
Prereq: Graduate standing or permission of instructor
Assigned readings and reports on research methods to solve construction engineering and management problems such as alternative project delivery methods, asset management, data mining, construction procurement, robotics, project controls, automation, construction visualization, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

C E 595A: Research Methods Seminar in Construction Engineering and Management: Qualitative Methods
(1-0) Cr. 1.
Prereq: Graduate standing or permission of instructor
Assigned readings and reports on qualitative research methods to assess and solve construction engineering and management problems.

C E 595B: Research Methods Seminar in Construction Engineering and Management: Quantitative Methods
(1-0) Cr. 1.
Prereq: Graduate standing or permission of instructor
Assigned readings and reports on quantitative research methods to assess and solve construction engineering and management problems.

C E 595C: Research Methods Seminar in Construction Engineering and Management: Technical Reporting
(1-0) Cr. 1.
Prereq: Graduate standing or permission of instructor
Assigned readings and reports on research methods for planning and preparation of technical reports with construction engineering and management projects.

C E 596: Special Topics in Transportation Engineering
Cr. arr. Repeatable.
Prereq: C E 355
C E 596B: Special Topics in Transportation Engineering: Geographic Information Systems in Transportation
Cr. arr. Repeatable.
Prereq: C E 355

C E 596C: Special Topics in Transportation Engineering: Hazardous Materials Transportation
Cr. arr. Repeatable.
Prereq: C E 355

C E 596D: Special Topics in Transportation Engineering: Transportation and Public Works
Cr. arr. Repeatable.
Prereq: C E 355

C E 596E: Special Topics in Transportation Engineering: Sustainable Transportation
Cr. arr. Repeatable.
Prereq: C E 355

C E 596F: Special Topics in Transportation Engineering: Freight Transportation
Cr. arr. Repeatable.
Prereq: C E 355

C E 599: Creative Component
Cr. 1-3. Repeatable.
Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis.

Courses for graduate students:

C E 622: Advanced Topics in Environmental Engineering
(2-0) Cr. 2. Repeatable.
Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:

C E 622A: Advanced Topics in Environmental Engineering: Water Pollution Control
(2-0) Cr. 2. Repeatable.
Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:

C E 622B: Advanced Topics in Environmental Engineering: Water Treatment
(2-0) Cr. 2. Repeatable.
Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:

C E 622C: Advanced Topics in Environmental Engineering: Solid and Hazardous Waste
(2-0) Cr. 2. Repeatable.
Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:

C E 622D: Advanced Topics in Environmental Engineering: Water Resources
(2-0) Cr. 2. Repeatable.
Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:

C E 622E: Advanced Topics in Environmental Engineering: Instrumental Methods for Environmental Analyses
(2-0) Cr. 2. Repeatable.
Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering.

C E 650: Advanced Topics in Transportation Engineering
(3-0) Cr. 3. Repeatable.
Prereq: Permission of Transportation Engineering graduate faculty

C E 650A: Advanced Topics in Transportation Engineering: Highway Design
(3-0) Cr. 3. Repeatable.
Prereq: Permission of Transportation Engineering graduate faculty

C E 650B: Advanced Topics in Transportation Engineering: Traffic Operations
(3-0) Cr. 3. Repeatable.
Prereq: Permission of Transportation Engineering graduate faculty

C E 650C: Advanced Topics in Transportation Engineering: Data Analysis
(3-0) Cr. 3. Repeatable.
Prereq: Permission of Transportation Engineering graduate faculty
Topics in transportation engineering related to data analysis.

C E 690: Advanced Topics
Cr. 1-3. Repeatable. F.S.SS.
Pre-enrollment contract required.

C E 697: Engineering Internship
Cr. R. Repeatable.
Prereq: Permission of coop advisor, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.
C E 699: Research
Cr. 1-30. Repeatable.
Prereq: Pre-enrollment contract required

Computer Engineering
www.ece.iastate.edu (http://www.ece.iastate.edu)

Administered by the Department of Electrical and Computer Engineering
For the undergraduate curriculum in computer engineering leading to
the degree Bachelor of Science. The Computer Engineering program is
accredited by the Engineering Accreditation Commission of ABET, http://
www.abet.org.

The Department of Electrical and Computer Engineering (ECpE) at Iowa
State University provides undergraduate students with the opportunity
to learn electrical and computer engineering fundamentals, study
applications of the most recent advances in state-of-the-art technologies,
and to prepare for the practice of computer engineering. The student-
faculty interaction necessary to realize this opportunity occurs within
an environment that is motivated by the principle that excellence in
undergraduate education is enhanced by an integrated commitment to
successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software
systems, embedded systems, networking, information security, computer
architecture, and VLSI.

Students also may take elective courses in control systems,
electromagnetics, microelectronics, VLSI, power systems, and
communications and signal processing.

The program objectives for the computer engineering programs describe
accomplishments that graduates are expected to attain within five
years after graduation. Graduates will have applied their expertise
to contemporary problem solving, be engaged professionally, have
continued to learn and adapt, and have contributed to their organizations
through leadership and teamwork. More specifically, the objectives for
expertise, engagement, learning, leadership and teamwork are defined
below for each program.

The objectives of the computer engineering program at Iowa State
University are:

• Graduates, within five years of graduation, should demonstrate
  engagement in the engineering profession, locally and globally,
  by contributing to the ethical, competent, and creative practice of
  engineering or other professional careers.

• Graduates, within five years of graduation, should demonstrate
  sustained learning and adapting to a constantly changing field
  through graduate work, professional development, and self study.

• Graduates, within five years of graduation, should demonstrate
  leadership and initiative to ethically advance professional and
  organizational goals, facilitate the achievements of others, and obtain
  substantive results.

• Graduates, within five years of graduation, should demonstrate
  a commitment to teamwork while working with others of diverse
  cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department
provides opportunities for each student to have experience with
broadening activities. Through the cooperative education and internship
program, students have the opportunity to gain practical industry
experience. Students have the opportunity to participate in advanced
research activities, and through international exchange programs,
students learn about engineering practices in other parts of the world.
Well-qualified juniors and seniors in computer engineering who are
interested in graduate study may apply for concurrent enrollment in the
Graduate College to simultaneously pursue both the Bachelor of Science
and Master of Science, the Bachelor of Science and Master of Business
Administration, or the Bachelor of Science and Master of Engineering
degrees.

Curriculum in Computer Engineering
Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 127
Any transfer credit courses applied to the degree program require a grade
of C or better (but will not be calculated into the ISU cumulative GPA, Basic
Program GPA or Core GPA). See also Basic Program and Special Programs.
Note: Department does not allow Pass/Not Pass credits to be used to meet
graduation requirements.

International Perspectives: 3 cr.1
U.S. Diversity: 3 cr.1

Communication Proficiency/Library requirement:

Computer Engineering Technical Electives ³ 9

Technical Electives ³ 6

Total Credits 32

Seminar/Co-op/Internships:

CPR E 166 Professional Programs Orientation R

CPR E 294 Program Discovery R

CPR E 394 Program Exploration R

CPR E 494 Portfolio Assessment R

Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses
may not be taken Pass/Not Pass, but are used to meet the general education electives.

2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

3. From department approved lists. (http://www.ece.iastate.edu/academics/bachelors-degree-requirements)

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The Master of Engineering degree is course-work only. It is recommended for off-campus students.

The Master of Science degree with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers three graduate certificate programs in embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering also is a participating department in the interdepartmental certificate, Master of
Engineering, and Master of Science in Information Assurance programs. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

Courses primarily for undergraduates:

CPR E 131: Introduction to Computer Security Literacy
(Cross-listed with INFAS). (1-0) Cr. 1.
Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 166: Professional Programs Orientation
(Cross-listed with E E). Cr. R. F.S.
(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.

CPR E 184: Computer Engineering Learning Community
Cr. 1. F.
Prereq: Member of CPR E Learning Community
Integration of first-year students into the Computer Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Computer Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors.

CPR E 185: Introduction to Computer Engineering and Problem Solving I
(2-2) Cr. 3.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

CPR E 186: Introduction to Computer Engineering and Problem Solving II
(0-2) Cr. 1. S.
Prereq: CPR E 185
Project based examples from computer engineering. Group skills needed to work effectively in teams. Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers.

CPR E 230: Cyber Security Fundamentals
(2-2) Cr. 3. F.
Prereq: COM S 227, E E 285, or MIS 207.
Introduction to computer and network infrastructures used to support cyber security. Basic concepts of computer and network configuration used to secure environments. Computer virtualization, network routing and address translation, computer installation and configuration, network monitoring, in a virtual environment. Laboratory experiments and exercises including secure computer and network configuration and management.

CPR E 231: Cyber Security Concepts and Tools
(2-2) Cr. 3. S.
Prereq: CPR E 230
Basic concepts of practical computer and Internet security and the tools used to protect and attack systems and networks. Computer and network security methods including: user authentication, access control, firewalls, intrusion detection, use of vulnerability assessment tools and methods, and penetration testing. Ethics and legal issues in cyber security will also be covered. Laboratory experiments and exercises including evaluating systems for vulnerabilities, understanding potential exploits of the systems, and defenses for the systems.

CPR E 261: Transfer Orientation
(Cross-listed with E E). Cr. R.
Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.
CPR E 281: Digital Logic
(3-3) Cr. 4. F.S.
Prereq: sophomore classification
Number systems and representation. Boolean algebra and logic minimization. Combinational and sequential logic design. Arithmetic circuits and finite state machines. Use of programmable logic devices. Introduction to computer-aided schematic capture systems, simulation tools, and hardware description languages. Design of simple digital systems.

CPR E 288: Embedded Systems I: Introduction
(3-2) Cr. 4. F.S.
Prereq: CPR E 281, COM S 207 or COM S 227 or E E 285
Embedded C programming. Interrupt handling. Memory mapped I/O in the context of an application. Elementary embedded design flow/methodology. Timers, scheduling, resource allocation, optimization, state machine based controllers, real time constraints within the context of an application. Applications laboratory exercises with embedded devices.

CPR E 294: Program Discovery
(Cross-listed with E E). Cr. R.
Prereq: CPR E 166 or E E 166
The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today’s world. Offered on a satisfactory-fail basis only.

CPR E 308: Operating Systems: Principles and Practice
(3-3) Cr. 4. F.S.
Prereq: CPR E 381 or COM S 321
Operating system concepts, processes, threads, synchronization between threads, process and thread scheduling, deadlocks, memory management, file systems, I/O systems, security. Linux-based lab experiments.

CPR E 310: Theoretical Foundations of Computer Engineering
(3-1) Cr. 3. F.S.
Prereq: COM S 228
Propositional logic and methods of proof; set theory and its applications; mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering.

CPR E 315: Applications of Algorithms in Computer Engineering
(3-0) Cr. 3. F.S.SS.
Prereq: CPR E 310
Solving computer engineering problems using algorithms. Emphasis on problems related to the core focus areas in computer engineering. Real world examples of algorithms used in the computer engineering domain. Algorithm engineering. Prototyping of algorithms.

CPR E 329: Software Project Management
(Cross-listed with S E). (3-0) Cr. 3.
Prereq: COM S 309

CPR E 330: Integrated Electronics
(Cross-listed with E E). (3-3) Cr. 4.
Prereq: E E 201, credit or enrollment in E E 230, CPR E 281

CPR E 332: Cyber Defense Competition
(Cross-listed with INFAS). (0-2) Cr. 1. Repeatable. S.
Participation in cyber defense competition driven by scenario-based network design. Includes computer system setup, risk assessment and implementation of security systems, as well as defense of computer and network systems against trained attackers. Team based. Offered on a satisfactory-fail basis only.

CPR E 339: Software Architecture and Design
(Cross-listed with S E). (3-0) Cr. 3.
Prereq: S E 319

CPR E 381: Computer Organization and Assembly Level Programming
(3-2) Cr. 4. F.S.
Prereq: CPR E 288
Introduction to computer organization, evaluating performance of computer systems, instruction set design. Assembly level programming: arithmetic operations, control flow instructions, procedure calls, stack management. Processor design. Datapath and control, scalar pipelines, introduction to memory and I/O systems.
CPR E 388: Embedded Systems II: Mobile Platforms
(3-2) Cr. 4.
**Prereq:** CPR E 288
Contemporary programming techniques for event driven systems. Mobile platforms and operating systems. Location and motion sensors based user interfaces. Threading and scheduling. Resource management - measurement and control techniques - for memory and energy. Client-server application design. Distributed applications. Laboratory includes exercises based on a mobile platform.

CPR E 394: Program Exploration
(Cross-listed with E E). Cr. R.
**Prereq:** CPR E 294 or E E 294
Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.

CPR E 396: Summer Internship
Cr. R. Repeatable. SS.
**Prereq:** Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

CPR E 398: Cooperative Education (Co-op)
Cr. R. Repeatable. F.S.
**Prereq:** Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

CPR E 412: Formal Methods in Software Engineering
(Cross-listed with COM S, S E). (3-0) Cr. 3.
**Prereq:** COM S 311, STAT 330; for graduate credit: graduate standing or permission of instructor
A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

CPR E 416: Software Evolution and Maintenance
(Cross-listed with S E). (3-0) Cr. 3.
**Prereq:** COM S 309
Practical importance of software evolution and maintenance, systematic defect analysis and debugging techniques, tracing and understanding large software, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance, experimental studies and quantitative measurements of software evolution. Written reports and oral presentation.

CPR E 418: High Speed System Engineering Measurement and Testing
(Cross-listed with E E). (3-2) Cr. 4. F.
**Prereq:** E E 230 and E E 311

CPR E 419: Software Tools for Large Scale Data Analysis
(Cross-listed with S E). (3-3) Cr. 4.
**Prereq:** CPR E 308 or COM S 352, COM S 309
Software tools for managing and manipulating large volumes of data, external memory processing, large scale parallelism, and stream processing, data interchange formats. Weekly programming labs that involve the use of a parallel computing cluster.

CPR E 421: Software Analysis and Verification for Safety and Security
(Cross-listed with S E). Cr. 3. F.S.
**Prereq:** COM S 309; CPR E 310 or COM S 230
Significance of software safety and security; various facets of security in cyber-physical and computer systems; threat modeling for software safety and security; and categorization of software vulnerabilities. Software analysis and verification: mathematical foundations, data structures and algorithms, program comprehension, analysis, and verification tools; automated vs. human-on-the-loop approach to analysis and verification; and practical considerations of efficiency, accuracy, robustness, and scalability of analysis and verification. Cases studies with application and systems software; evolving landscape of software security threats and mitigation techniques. Understanding large software, implementing software analysis and verification algorithms.

CPR E 424: Introduction to High Performance Computing
(Cross-listed with COM S, MATH). (2-2) Cr. 3. F.
**Prereq:** MATH 265; MATH 207 or MATH 317; or permission of instructor.
Unix, serial programming of scientific applications, OpenMP for shared-memory parallelization. No Unix, Fortran or C experience required.
CPR E 425: High Performance Computing for Scientific and Engineering Applications
(Cross-listed with COM S). (2-2) Cr. 3.
Prereq: COM S 311, ENGL 250, SP CM 212
Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports.

CPR E 426: Introduction to Parallel Algorithms and Programming
(Dual-listed with CPR E 526). (Cross-listed with COM S). (3-2) Cr. 4. F.
Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311
Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

CPR E 430: Network Protocols and Security
(Dual-listed with CPR E 530). (Cross-listed with INFAS). (3-0) Cr. 3.
Prereq: CPR E 381 or equivalent
Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CPR E 431: Basics of Information System Security
(3-0) Cr. 3. S.
Prereq: credit or enrollment in CPR E 308 or COM S 352
Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Network security mechanisms such as intrusion detection, firewalls, IPSEC, and related protocols. Ethics and legal issues in information security. Wireless security. Programming and system configuration assignments.

CPR E 435: Analog VLSI Circuit Design
(Cross-listed with E E). (3-3) Cr. 4. S.
Prereq: E E 330
Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters.

CPR E 444: Bioinformatic Analysis
(Cross-listed with BCB, BCBIO, BIOL, COM S, GEN). (4-0) Cr. 4. F.
Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

CPR E 450: Distributed Systems and Middleware
(Dual-listed with CPR E 550). (3-0) Cr. 3.
Prereq: CPR E 308 or COM S 352
Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications.

CPR E 454: Distributed Systems
(Dual-listed with CPR E 554). (Cross-listed with COM S). (3-1) Cr. 3.
Prereq: CPR E 308 or COM S 352; for graduate credit: graduate standing or permission of instructor
Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

CPR E 458: Real Time Systems
(Dual-listed with CPR E 558). (3-0) Cr. 3.
Prereq: CPR E 308 or COM S 352

CPR E 465: Digital VLSI Design
(Cross-listed with E E). (3-3) Cr. 4. F.
Prereq: E E 330
Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project.
CPR E 466: Multidisciplinary Engineering Design
(Cross-listed with A B E, AER E, B M E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

CPR E 467: Multidisciplinary Engineering Design II
Prereq: Student must be within two semesters of graduation or receive permission of instructor.
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

CPR E 480: Graphics Processing and Architecture
(3-3) Cr. 4. S.
Prereq: CPR E 381 or COM S 321
Introduction to hardware architectures for computer graphics and their programming models. System-level view, including framebuffers, video output devices, displays, 2D and 3D graphics acceleration, and device interfacing. Architectural design of GPUs, from 2D and 3D sprite engines to 3D rendering pipelines to unified shader architectures. Computing models for graphics processors. GPGPU and GPU computing.

CPR E 483: Hardware Software Integration
(3-3) Cr. 4. S.
Prereq: CPR E 381
Embedded system design using hardware description language (HDL) and field programmable gate array (FPGA). HDL modeling concepts and styles are introduced; focus on synthesizability, optimality, reusability and portability in hardware design description. Introduction to complex hardware cores for data buffering, data input/output interfacing, data processing. System design with HDL cores and implementation in FPGA. Laboratory-oriented design projects.

CPR E 488: Embedded Systems Design
(3-3) Cr. 4.
Prereq: CPR E 381 or COM S 321
Embedded microprocessors, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform-based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations.

CPR E 489: Computer Networking and Data Communications
(3-2) Cr. 4. F.S.
Prereq: CPR E 381 or E E 324
Modern computer networking and data communications concepts. TCP/IP OSI protocols, client server programming, data link protocols, local area networks, and routing protocols.

CPR E 490: Independent Study
Cr. arr. Repeatable.
Prereq: Senior classification in computer engineering
Investigation of an approved topic.

CPR E 490H: Independent Study: Honors
Cr. arr. Repeatable.
Prereq: Senior classification in computer engineering
Investigation of an approved topic.

CPR E 491: Senior Design Project I and Professionalism
(Cross-listed with E E). (2-3) Cr. 3. F.S.
Prereq: E E 322 or CPR E 308, completion of 24 credits in the E E core professional program or 29 credits in the CPR E core professional program, ENGL 314
Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

CPR E 492: Senior Design Project II
(Cross-listed with E E). (1-3) Cr. 2. F.S.
Prereq: CPR E 491 or E E 491
Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or CPR E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

CPR E 494: Portfolio Assessment
(Cross-listed with E E). Cr. R.
Prereq: CPR E 394 or E E 394, credit or enrollment in CPR E 491 or E E 491
Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.
Courses primarily for graduate students, open to qualified undergraduates:

**CPR E 501: Analog and Mixed-Signal VLSI Circuit Design Techniques**
(Cross-listed with E E). (3-3) Cr. 4. F.
Prereq: E E 435

**CPR E 505: CMOS and BiCMOS Data Conversion Circuits**
(Cross-listed with E E). (3-3) Cr. 4. Alt. S., offered even-numbered years.
Prereq: E E 501
Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

**CPR E 506: Design of CMOS Phase-Locked Loops**
(Cross-listed with E E). (3-3) Cr. 4.
Prereq: E E 435 or E E 501 or instructor approval
Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

**CPR E 507: VLSI Communication Circuits**
(Cross-listed with E E). (3-3) Cr. 4. Alt. S., offered odd-numbered years.
Prereq: E E 435 or E E 501
Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

**CPR E 511: Design and Analysis of Algorithms**
(Cross-listed with COM S). (3-0) Cr. 3.
Prereq: COM S 311

**CPR E 513: Foundations and Applications of Program Analysis**
(Cross-listed with COM S). Cr. 3.
Prereq: COM S 331, COM S 342
Algorithms and tools for automatically reasoning about code and program executions to predict software behavior. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation and symbolic execution. Applications of program analysis to improve software security, performance and testing. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

**CPR E 522: Cognitive Radio Networks**
(Cross-listed with E E). (3-0) Cr. 3. Alt. F., offered irregularly.
Prereq: Permission of instructor
Topics on cognitive radio networks: Cognitive Radio Networks Architecture; Software Defined Radio Architecture; Spectrum Sensing; Spectrum Management; Spectrum Sharing; Spectrum Mobility; Applications of Cognitive Radio Networks.

**CPR E 525: Numerical Analysis of High Performance Computing**
(Cross-listed with COM S, MATH). (3-0) Cr. 3. S.
Prereq: CPR E 308 or MATH 481; experience in scientific programming; knowledge of FORTRAN or C
Introduction to parallelization techniques and numerical methods for distributed memory high performance computers. A semester project in an area related to each student’s research interests is required.

**CPR E 526: Introduction to Parallel Algorithms and Programming**
(Dual-listed with CPR E 426). (Cross-listed with COM S). (3-2) Cr. 4. F.
Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311
Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

**CPR E 528: Probabilistic Methods in Computer Engineering**
(3-0) Cr. 3.
Prereq: CPR E 315 or COM S 311
The application of randomization and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data set algorithms.
CPR E 529: Data Analytics in Electrical and Computer Engineering  
(Cross-listed with E E). (3-0) Cr. 3. S.  
**Prereq:** E E 322 or equivalent  
Introduces a variety of data analytics techniques, particularly those relevant for electrical and computer engineers, from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques.

CPR E 530: Network Protocols and Security  
(Dual-listed with CPR E 430). (Cross-listed with INFAS). (3-0) Cr. 3. S.  
**Prereq:** CPR E 381 or equivalent  
Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CPR E 531: Information System Security  
(Cross-listed with INFAS). (3-0) Cr. 3. S.  
**Prereq:** CPR E 489 or CPR E 530 or COM S 586 or MIS 535  
Computer, software, and data security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

CPR E 532: Information Warfare  
(Cross-listed with INFAS). (3-0) Cr. 3. S.  
**Prereq:** CPR E 531  

CPR E 533: Cryptography  
(Cross-listed with INFAS, MATH). (3-0) Cr. 3. S.  
**Prereq:** MATH 301 or CPR E 310 or COM S 230  
Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

CPR E 534: Legal and Ethical Issues in Information Assurance  
(Cross-listed with INFAS, POL S). (3-0) Cr. 3. S.  
**Prereq:** Graduate classification; CPR E 531 or INFAS 531  
Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.

CPR E 535: Steganography and Digital Image Forensics  
(Cross-listed with INFAS, MATH). (3-0) Cr. 3. S.  
**Prereq:** E E 524 or MATH 317 or MATH 407 or COM S 230  
Basic principles of covert communication, steganalysis, and forensic analysis for digital images. Steganographic security and capacity, matrix embedding, blind attacks, image forensic detection and device identification techniques. Related material on coding theory, statistics, image processing, pattern recognition.

CPR E 536: Computer and Network Forensics  
(Cross-listed with INFAS). (3-0) Cr. 3. S.  
**Prereq:** CPR E 489 or CPR E 530  
Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

CPR E 537: Wireless Network Security  
(Cross-listed with INFAS). (3-0) Cr. 3. S.  
**Prereq:** Credit or enrollment in CPR E 489 or CPR E 530  
Introduction to the physical layer and special issues associated with the security of wireless networks. The basics of wireless communication systems (antennas and propagation, modulation, multiple access, channel modeling, specific security issues of the wireless link), jamming and countermeasures (spread spectrum technologies, channel coding, interleaving), authentication and confidentiality (basics of classic cryptography, common authentication and encryption algorithms). Detailed case studies on authentication, encryption and privacy flaws, and good practices based on the most common wireless technologies, including WiFi, GSM/3G, Bluetooth, and RFID. Individual or team-based class projects.

CPR E 538: Reverse Engineering and Security Testing  
(Cross-listed with INFAS). (2-3) Cr. 3. S.  
**Prereq:** COM S 321 or CPR E 381, COM S 352 or CPR E 308  
Techniques and tools for understanding the behavior of software/hardware systems based on reverse engineering. Flaw hypothesis, black, grey, and white box testing as well as other methods for testing the security of software systems. Discussion of counter-reverse engineering techniques.
CPR E 539: Cyber Physical System Security for the Smart Grid  
(3-0) Cr. 3. S.  
Introduction to cyber security, cyber physical system (CPS), and smart grid automation technologies; supervisor control and data acquisition (SCADA) systems; cyber risk modeling, vulnerability analysis, impact analysis, defense and mitigation techniques; cyber security of wide-area monitoring, protection, and control; security and privacy in advanced metering infrastructure (AMI), cyber security compliance and best practices, CPS security test-beds and attack-defense hands-on laboratory experiments.

CPR E 541: High-Performance Communication Networks  
(3-0) Cr. 3.  
Prereq: CPR E 489 or CPR E 530  
Computer architectures and protocols designed for high-performance networking environments; software defined networking (SDN) and supporting protocols; cloud and data center networks; network traffic management and congestion control strategies; quality of service; high-speed access network protocols.

CPR E 542: Optical Communication Networks  
(3-0) Cr. 3. S.  
Prereq: CPR E 489  
Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing; network architectures and protocol for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control; survivability; access networks; metro networks.

CPR E 543: Wireless Network Architecture  
(3-0) Cr. 3.  
Prereq: Credit or enrollment in CPR E 489 or CPR E 530  
Introduction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking. Operation and management of Medium Access Control in Wireless Local Area Networks (WLAN) and Wireless Metropolitan Area Networks (WMAN); recent developments in IEEE 802.11 & 802.16 and Bluetooth; Mobile IP; Mobile TCP.

CPR E 544: Fundamentals of Bioinformatics  
(Cross-listed with BCB, COM S, GDCB). (4-0) Cr. 4. F.  
Prereq: MATH 165 or STAT 401 or equivalent  
A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies.

CPR E 545: Fault-Tolerant Systems  
(3-0) Cr. 3.  
Prereq: CPR E 381  
Faults and their manifestations, errors, and failures; fault detection, location and reconfiguration techniques; time, space, and information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; clock synchronization; fault-tolerant networks; fault tolerance in real-time systems; reliable software design; checkpointing and rollback recovery; atomic actions; replica management protocols; and reliability evaluation techniques and tools.

CPR E 546: Wireless and Sensor Networks  
(3-0) Cr. 3.  
Prereq: CPR E 489 or CPR E 530  
Fundamental and well-known protocols for wireless ad hoc and sensor networks at various layers, including physical layer issues, MAC (medium access control) layer protocols, routing protocols for wireless ad hoc and sensor networks, data management in sensor networks, coverage and connectivity, localization and tracking, security and privacy issues. Introduction to TinyOS and the nesC language. Hands-on experiments with Crossbow Mote sensor devices.

CPR E 547: Resource Allocation in Communication Networks  
(3-0) Cr. 3.  
Analytical approach to resource allocation on communication networks (e.g. the Internet, multihop wireless networks, etc.). Network utility maximization and the internet congestion control algorithm. Layering as optimization decomposition: a cross-layer design approach in multihop wireless networks. Capacity of ad hoc wireless networks.

CPR E 549: Advanced Algorithms in Computational Biology  
(Cross-listed with COM S). (3-0) Cr. 3.  
Prereq: COM S 311 and either COM S 228 or COM S 208  
Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

CPR E 550: Distributed Systems and Middleware  
(Dual-listed with CPR E 450). (3-0) Cr. 3.  
Prereq: CPR E 308 or COM S 352  
Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications.
CPR E 554: Distributed Systems
(Dual-listed with CPR E 454). (Cross-listed with COM S). (3-1) Cr. 3.
Prereq: COM S 311, COM S 352; for graduate credit: graduate standing or permission of instructor
Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

CPR E 556: Scalable Software Engineering
(3-0) Cr. 3.
Prereq: COM S 309
Design and analysis techniques scalable to large software, project-based learning of problem solving techniques, automation tools for high productivity and reliability of software, analysis-based measurement and estimation techniques for predictable software engineering.

CPR E 557: Computer Graphics and Geometric Modeling
(Cross-listed with COM S, M E). (3-0) Cr. 3. F.
Prereq: M E 421, programming experience in C

CPR E 558: Real Time Systems
(Dual-listed with CPR E 458). (3-0) Cr. 3.
Prereq: CPR E 308 or COM S 352

CPR E 559: Security and Privacy in Cloud Computing
(Cross-listed with COM S). Cr. 3.
Prereq: COM S 352 or CPR E 308, and COM S 486 or CPR E 489 or CPR E 530
Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects.

CPR E 560: Data-Driven Security and Privacy
(Cross-listed with COM S, INFAS). Cr. 3. Alt. S., offered irregularly.
Prereq: CPR E 531; COM S 474 or COM S 573
Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms.

CPR E 566: Physical Design of VLSI Systems
(3-0) Cr. 3.
Prereq: CPR E 465

CPR E 567: Bioinformatics I (Bioinformatics Algorithms)
(Cross-listed with BCB, COM S). (3-0) Cr. 3.
Prereq: COM S 228; COM S 330; credit or enrollment in BIOL 315, STAT 430
Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

CPR E 569: Bioinformatics III (Structural Bioinformatics)
(Cross-listed with BBMB, BCB, COM S, GDCB). (3-0) Cr. 3. F.
Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

CPR E 570: Bioinformatics IV (Systems Biology)
(Cross-listed with BCB, COM S, GDCB, STAT). (3-0) Cr. 3. S.
Prereq: BCB 567 or COM S 311, COM S 228, GEN 409, STAT 430
CPR E 575: Computational Perception
(Cross-listed with COM S, HCI). (3-0) Cr. 3. S.
Prereq: Graduate standing or permission of instructor
Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

CPR E 581: Computer Systems Architecture
(Cross-listed with COM S). (3-0) Cr. 3. F.
Prereq: CPR E 381
Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

CPR E 582: Computer Systems Performance
(3-0) Cr. 3.
Prereq: CPR E 381, CPR E 310 and STAT 330
Review of probability and stochastic processes concepts; Markovian processes; Markovian queues; renewal theory; semi-Markovian queues; queueing networks, applications to multiprocessor architectures, computer networks, and switching systems.

CPR E 583: Reconfigurable Computing Systems
(Cross-listed with COM S). (3-0) Cr. 3.
Prereq: Background in computer architecture, design, and organization
Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

CPR E 584: Models and Techniques in Embedded Systems
(3-0) Cr. 3.
Industry-standard tools and optimization strategies; practical embedded platforms and technology (reconfigurable platforms, multi-core platforms, low-power platforms); instruction augmentation, memory-mapped accelerator design, embedded software optimization. Students will be encouraged to compete as teams in an embedded system design competition.

CPR E 585: Developmental Robotics
(Cross-listed with HCI). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: knowledge of C/C++ programming language.
An introduction to the emerging interdisciplinary field of Developmental Robotics, which crosses the boundaries between robotics, artificial intelligence, developmental psychology, and philosophy. The main goal of this field is to create autonomous robots that are more intelligent, more adaptable, and more useful than the robots of today, which can only function in very limited domains and situations.

CPR E 586: Pervasive Computing
(3-0) Cr. 3.
Prereq: CPR E 489 or CPR E 530
Fundamentals of pervasive computing, including location and context awareness, mobile and location services, ubiquitous data access, low power computing and energy management, middleware, security and privacy issues.

CPR E 588: Embedded Computer Systems
(3-0) Cr. 3.
Prereq: CPR E 308

CPR E 590: Special Topics
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in computer engineering.

CPR E 592: Seminar in Computer Engineering
Cr. 1-4. Repeatable.
Prereq: Permission of instructor
Projects or seminar in Computer Engineering.

CPR E 594: Selected Topics in Computer Engineering
(3-0) Cr. 3. Repeatable.

CPR E 598: Electrical and Computer Engineering Learning Community Seminar
(Cross-listed with E E). Cr. R. F.S.
Prereq: Electrical and Computer Engineering Graduate Student
Introduction to graduate study in Electrical and Computer Engineering at Iowa State University. Building networks, introduction to core requirements, and tools and techniques for success. Offered on a satisfactory-fail basis only. ECpE
CPR E 599: Creative Component
Cr. arr. Repeatable.

Courses for graduate students:

CPR E 626: Parallel Algorithms for Scientific Applications
(Cross-listed with COM S). (3-0) Cr. 3.
Prereq: CPR E 526
Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.

CPR E 632: Information Assurance Capstone Design
(Cross-listed with INFAS). (3-0) Cr. 3.
Prereq: INFAS 531, INFAS 532, INFAS 534
Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attack each other’s secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report.

CPR E 681: Advanced Topics in Computer Architecture
(Cross-listed with COM S). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: CPR E 581. Repeatable with Instructor permission
Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

CPR E 697: Engineering Internship
(Cross-listed with E E). Cr. R. Repeatable.
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

CPR E 699: Research
Cr. arr. Repeatable.

Construction Engineering
Administered by the Department of Civil, Construction and Environmental Engineering

The curriculum in construction engineering, leading to a bachelor of science degree can be referenced here: http://catalog.iastate.edu/collegeofengineering/constructionengineering/#curriculumtext. The Construction Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Program educational objectives: By three to five years after graduation, graduates of the construction engineering program will have:

1. Pursued successful careers and expertise in construction engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess a strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical, or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer’s plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by encouraging students to:

- interact with practicing professionals
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers
- develop leadership skills by participating in student organizations
• develop, analyze, and interpret alternative solutions to open-ended problems
• study abroad

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study abroad programs.

Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering (http://www.ccee.iastate.edu/academics/graduate) Graduate Study for more information.

Curriculum in Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering; leading to the degree bachelor of science.

Total credits required: Building Option - 127.0, Heavy Option - 126.0, Electrical - 127.0, Mechanical - 127.0 cr.
The Construction Engineering program requires a grade of a C or better for any transfer credit course that is applied to the degree program (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

International Perspectives: 3 cr. ¹
U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirements:

Co-op/Internships - Optional
1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (http://www.ccee.iastate.edu/academics/advising/construction-engineering-student-forms).
3. See Basic Program for Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program https://www.engineering.iastate.edu/classification/students/basic-program/

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. This specialization focuses on project management including and beyond the traditional iron triangle of scope, technical, and schedule to include context and financing, enabling project management of more complex projects. Three graduate degrees including, Master of Engineering (30 credits), Master of Science (30 credits), and Doctor of Philosophy (72 credits) are offered. The Master of Engineering degree is a coursework only option and the other degree programs require a research component at a level adjusted to the degree sought. All degrees are offered on-campus and some degrees may be completed off-campus through distance education. All degrees require C E 501, C E 502, C E 503, and six to nine credits additional credits. Course options include but are not limited to:

- C E 501: Preconstruction Project Engineering and Management
- C E 502: Construction Project Engineering and Management
- C E 503: Construction Finance and Business Management
- C E 505: Design of Construction Systems
- C E 594A: Special Topics Construction Engineering and Mgt.: Planning and Scheduling
- C E 594L: Special Topics Construction Engr and Mgt.: Adv Building Construction Topics - LEED for New Construction
- C E 594N: Special Topics Construction Engineering and Mgt.: Industrial Construction
- C E 594O: Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction
- C E 594P: Special Topics Construction Engineering and Mgt.: Advanced Building Energy Systems and Technologies

Undergraduate students may also qualify for the concurrent bachelor of science/master of science (BS/MS) degree program. Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs. A graduate certificate is also available which requires 12 credits of coursework. Courses required for the certificate are C E 501, C E 502, and C E 503. For additional information see Civil Engineering, Graduate Programs, https://www.ccee.iastate.edu/academics/graduate/.

Courses primarily for undergraduates:

- CON E 121: Cornerstone Learning Community: Orientation to Academic Life
  (0-2) Cr. 1. F.
  Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Introduction to construction industry professionals. Teamwork topics include interdisciplinary teamwork, skills for academic success, diversity issues and leadership. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources.
CON E 122: Cornerstone Learning Community: Orientation to Professional Life
(0-2) Cr. 1. S.
Continuation of Con E 121. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research, leadership. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

CON E 222: Contractor Organization and Management of Construction
(2-2) Cr. 3. F.S.
Prereq: Completion of basic program
Entry level course for construction engineering: integration of significant engineering and management issues related to construction company operations. Company organization and operations; construction and project administration; construction contracts; delivery systems; construction safety; contract documents.

CON E 241: Construction Materials and Methods
(2-3) Cr. 3. F.S.
Prereq: Completion of basic program
Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems. Blueprint reading and quantity takeoff techniques.

CON E 251: Mechanical/Electrical Materials and Methods
(0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in CON E 241
Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff.

CON E 322: Construction Equipment and Heavy Construction Methods
(2-2) Cr. 3. F.S.
Prereq: CON E 222 and CON E 241, or C E 306 in lieu of CON E 222 and 241
Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications.

CON E 340: Concrete and Steel Construction
(2-2) Cr. 3. F.S.
Prereq: E M 324 and CON E 222, or CE 306 in lieu of CON E 222

CON E 352: Mechanical Systems in Buildings
(2-2) Cr. 3. F.S.
Prereq: CON E 222, CON E 251, PHYS 222; or permission of instructor
Comprehensive coverage of mechanical systems, plumbing, fire protection. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

CON E 353: Electrical Systems in Buildings
(2-2) Cr. 3. F.S.
Prereq: PHYS 222 and credit or enrollment in CON E 352; or permission of instructor
Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

CON E 354: Building Energy Performance
Cr. 3. F.
Prereq: CON E 352 or permission of instructor
Energy performance of buildings, building shells, HVAC, electrical and other building systems. Analysis and evaluation of building performance, energy efficiency, environmental quality, first costs, and operating costs. Strategies to exceed energy code requirements through the ASHRAE Standard 90.1.

CON E 380: Engineering Law
(3-0) Cr. 3. F.S.
Prereq: Junior classification
Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation.

CON E 381: Bidding Construction Projects I
(0-3) Cr. 1.
Prereq: Permission of the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 381A: Bidding Construction Projects I: Heavy and Highway
(1-0) Cr. 1. F.
Prereq: Permission of the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.
CON E 381B: Bidding Construction Projects I: Building  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 381C: Bidding Construction Projects I: Mechanical  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 381D: Bidding Construction Projects I: Electrical  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 381E: Bidding Construction Projects I: Mechanical and Electrical  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 381F: Bidding Construction Projects I: Miscellaneous  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 398: Cooperative Education (Co-op)  
Cr. R. Repeatable. F.S.  
*Prereq: Permission of department and Engineering Career Services*  
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

CON E 422: Construction Cost Estimating and Cost Engineering  
(2-2) Cr. 3. F.S.  
*Prereq: CON E 241, CON E 251, I E 305*  

CON E 441: Construction Planning, Scheduling, and Control  
(2-2) Cr. 3. F.S.  
*Prereq: Credit or enrollment in CON E 422*  
Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications.

CON E 481: Bidding Construction Projects II  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481A: Bidding Construction Projects II: Heavy and Highway  
(1-0) Cr. 1. F.  
*Prereq: Permission of the instructor*  
Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481B: Bidding Construction Projects II: Building  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481C: Bidding Construction Projects II: Mechanical  
(0-3) Cr. 1.  
*Prereq: Permission of the instructor*  
Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.
CON E 481D: Bidding Construction Projects II: Electrical  
(0-3) Cr. 1.  
Prereq: Permission of the instructor  
Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481E: Bidding Construction Projects II: Mechanical and Electrical  
(0-3) Cr. 1.  
Prereq: Permission of the instructor  
Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481F: Bidding Construction Projects II: Miscellaneous  
(0-3) Cr. 1.  
Prereq: Permission of the instructor  
Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 487: Construction Engineering Design I  
(2-2) Cr. 3. F.S.  
Prereq: CON E 340 (B, H), CON E 382 (B, E, M), CON E 353 (B, E, M), CON E 422, CON E 441. Student must be within two semesters of graduation  
The integrated delivery of project services as a team, including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

CON E 488: Construction Engineering Design II  
(1-5) Cr. 3. F.S.  
Prereq: CON E 340 (B, H), CON E 352 (B, E, M), CON E 353 (B, E, M), CON E 422, CON E 441. Student must be within two semesters of graduation  
Application of team design concepts to a construction engineering project. Project planning. Advanced construction and project management.

CON E 490: Independent Study  
Cr. 1-3. Repeatable. F.S.S.  
Prereq: Permission of instructor  
Individual study in any phase of construction engineering. Pre-enrollment contract required.

For the undergraduate curriculum in cyber security engineering leading to the degree Bachelor of Science.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of cyber security engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The program objectives for the cyber security engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for the program.

The objectives of the cyber security engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate peer-recognized expertise in computer security principles together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and operation of the physical, software and human components of a system, including system integration and implementation.
- Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Cyber Security Engineering  
www.ece.iastate.edu (http://www.ece.iastate.edu)  
Administered by the Department of Electrical and Computer Engineering
experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in cyber security engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.

**Curriculum in Cyber Security Engineering**

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

**Total credits required: 125**

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communication Proficiency/Library requirement:**

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.

2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

3. From department approved lists. (http://www.ece.iastate.edu/academics/bachelors-degree-requirements)

4. Co-op / Internships are optional

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Cyber Security Minor
The minor is intended for students studying computer engineering, computer science, software engineering, or management information systems with the goal of enabling them to work in cyber security. The minor consists of a series of lab based courses that are designed to provide students with both the technical background and the hands-on experiences along with the theoretical background to allow them to compete for jobs in cyber security.

The minor requires 15 credits, including no more than 6 credits used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

Total Credits 15

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective courses in computer networking, security, computer architecture, digital systems, and software.

The program objectives for the electrical engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the electrical engineering program at ISU are:

1. Graduates, within five years of graduation, should demonstrate peer-recognized expertise together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of electrical and electronic devices and systems.
2. Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
3. Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self study.
4. Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.

**Objectives**
The minor in cyber security is designed to prepare students with the technical skills for entry into cybersecurity positions in industry or government agencies.

A few years after graduation, students completing the cyber security minor should be:

1. Contributing to their communities and society in the area of cyber security technology and applications and demonstrating an understanding of contemporary security issues, both technological and societal.
2. Advancing in their careers through application of their knowledge of cyber security
3. Working effectively as team members and demonstrating ethics and responsible behavior
4. Applying cyber security methods and concepts to the general area of their BS degree
5. Continuing their professional development through life-long learning

**Learning Outcomes**
After earning the minor in cyber security students will

1. Demonstrate the ability to apply knowledge of cyber security concepts, tools and technologies to computer systems.
2. Understand cyber security risks, threats and countermeasures and apply this understanding to develop cyber defense strategies.
3. Demonstrate the ability to design cyber security systems to meet organizational needs within realistic constraints such as economic, environmental, social, and ethical expectations.
4. Demonstrate the ability to function on teams.

**Electrical Engineering**
For the undergraduate curriculum in electrical engineering leading to the degree Bachelor of Science. The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.
• Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Courses for students who are not in the electrical engineering program: E E 442 Introduction to Circuits and Instruments, E E 448 Introduction to AC Circuits and Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

**Curriculum in Electrical Engineering**

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

**Total credits required: 128.** Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

**Note:** Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

Electrical Engineering

Electrical Engineering

Core Elective: one of the following:

- E E 330 Integrated Electronics
- E E 332 Semiconductor Materials and Devices

Total Credits: 41

Note: E E 321 and E E 332 are 3-credit courses, whereas E E 324 and E E 330 are 4-credit courses. The core credit requirement (41 credits) assumes 7 credits taken for these options. Any core credit surplus or deficiency can be used as credits for E E technical electives.

Other Remaining Courses: 29 cr.

- E E 491 Senior Design Project I and Professionalism 3
- E E 492 Senior Design Project II 2
- I E 305 Engineering Economic Analysis 3

One of the following:

- ENGL 309 Proposal and Report Writing (C or better in this course) 3
- ENGL 314 Technical Communication (C or better in this course)

E E/Cpr E Technical Electives including one approved sequence 12

Technical Electives 3

Total Credits: 29

Seminar/Co-op/Internships:

- E E 166 Professional Programs Orientation R
- E E 294 Program Discovery R
- E E 394 Program Exploration R
- E E 494 Portfolio Assessment R

Co-op or internship is optional

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

3. From department approved lists (http://www.ece.iastate.edu/academics/bachelors-degree-requirements).

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in power systems engineering.

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s website.

Courses primarily for undergraduates:

E E 166: Professional Programs Orientation
(Cross-listed with CPR E). Cr. R. F.S.
(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

E E 185: Introduction to Electrical Engineering and Problem-Solving I
(2-2) Cr. 3. F.S.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

E E 186: Introduction to Electrical Engineering and Problem Solving II
(0-2) Cr. 1. S.
Prereq: E E 185
Project based and hands on continuation of 185. Group skills needed to work effectively in teams. Individual interactive skills for small and large groups. Learning to use tools and methods for solving electrical engineering problems.
E E 201: Electric Circuits

(3-3) Cr. 4. F.S.

Prereq: Credit or enrollment in MATH 267 and PHYS 222

Emphasis on mathematical tools. Circuit elements (resistors, inductors, capacitors) and analysis methods including power and energy relationships. Network theorems. DC, sinusoidal steady-state, and transient analysis. AC power. Frequency response. Two port models. Diodes, PSPICE. Laboratory instrumentation and experimentation. Credit for only E E 201 or 442 may be used towards graduation.

E E 224: Signals and Systems I

(3-3) Cr. 4. F.S.

Prereq: E E 201, MATH 267, PHYS 222

E E 230: Electronic Circuits and Systems

(3-3) Cr. 4. F.S.

Prereq: E E 201, MATH 267, PHYS 222

E E 251: Transfer Orientation

(Cross-listed with CPR E). Cr. R.

Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

E E 285: Problem Solving Methods and Tools for Electrical Engineering

(3-3) Cr. 4.

E E 294: Program Discovery

(Cross-listed with CPR E). Cr. R.

Prereq: CPR E 166 or E E 166

The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today's world. Offered on a satisfactory-fail basis only.

E E 303: Energy Systems and Power Electronics

(3-0) Cr. 3. F.S.

Prereq: MATH 267, PHYS 222; credit or enrollment in E E 230

E E 311: Electromagnetic Fields and Waves

(4-0) Cr. 4. F.S.

Prereq: E E 201, MATH 265, PHYS 222, credit or enrollment in MATH 267

E E 314: Electromagnetics for non Electrical Engineers

(3-0) Cr. 3.

Prereq: PHYS 222, PHYS 112, or equivalent

Conceptual study of electromagnetism and its application in engineering and related fields. EM fundamentals, EM spectrum, radiation, radiating systems, wireless, modern concepts of physics, quantum computing, transmission lines, high speed effects, waveguides, GPS and other related phenomena will be discussed and explained with the application in mind.

E E 321: Communication Systems I

(3-0) Cr. 3. F.

Prereq: E E 224

E E 322: Probabilistic Methods for Electrical Engineers
(Cross-listed with STAT). (3-0) Cr. 3. F.S.
Prereq: E E 224
Introduction to probability with applications to electrical engineers. Sets and events, probability space, conditional probability, total probability and Bayes’ rule. Discrete and continuous random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating function, multiple random variables, functions of random variables. Elements of statistics, hypothesis testing, confidence intervals, least squares. Introduction to random processes.

E E 324: Signals and Systems II
(3-3) Cr. 4. F.S.
Prereq: E E 224

E E 330: Integrated Electronics
(Cross-listed with CPR E). (3-3) Cr. 4.
Prereq: E E 201, credit or enrollment in E E 230, CPR E 281

E E 332: Semiconductor Materials and Devices
(Cross-listed with MAT E). (3-0) Cr. 3.
Prereq: PHYS 222; MAT E majors: MAT E 317; CPR E and E E majors: E E 230
Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED’s.

E E 333: Electronic Systems Design
(3-3) Cr. 4. F.
Prereq: E E 230, credit or enrollment in CPR E 288
Further topics in electronic systems design: Use of sensors and actuators. High-power amplifying and switching components. Linear and switched-mode power supplies. Linear and switched-mode amplifiers. Interfacing electronic components with programmable microcontrollers. Printed circuit board technology and design tools. Laboratory exercises and design projects incorporating printed circuit technology.

E E 351: Analysis of Energy Systems
(3-0) Cr. 3.
Prereq: PHYS 222

Meets International Perspectives Requirement.

E E 388: Sustainable Engineering and International Development
(Cross-listed with A B E, C E). (2-2) Cr. 3. F.
Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report.

Meets International Perspectives Requirement.

E E 391: Open Laboratory and Design Studio
(2-2) Cr. 2.
Prereq: E E 224
Studio-based activity (guided problem-based learning and design) focusing on elements of design, measurement, data capture, and data interpretation. Team building, engineering professionalism, engineering process of review and critique, and presentation. Open design activities that may include working with other studios.

E E 394: Program Exploration
(Cross-listed with CPR E). Cr. R.
Prereq: CPR E 294 or E E 294
Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.

E E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.
E E 398: Cooperative Education (Co-op)
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

E E 414: Microwave Engineering
(Dual-listed with E E 514). (3-3) Cr. 4. F.
Prereq: E E 230, E E 311
Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.

E E 417: Electromagnetic Radiation, Antennas, and Propagation
(Dual-listed with E E 517). (3-3) Cr. 4. S.
Prereq: E E 311

E E 418: High Speed System Engineering Measurement and Testing
(Cross-listed with CPR E). (3-2) Cr. 4. F.
Prereq: E E 230 and E E 311

E E 419: Magnetism and Magnetic Materials
(Dual-listed with E E 519). (Cross-listed with MAT E). (3-0) Cr. 3. F.
Prereq: E E 311 or MAT E 317 or PHYS 364

E E 422: Communication Systems II
(3-0) Cr. 3.
Prereq: E E 321, E E 322, enrollment in E E 423
Introduction to probability and random processes; Performance of analog systems with noise; Performance of digital communication with noise; optimum receivers, transmission impairments, and error rates; Introduction to information theory and coding: source coding, channel coding, channel capacity.

E E 423: Communication Systems Laboratory
(0-3) Cr. 1.
Prereq: E E 321, enrollment in E E 422
Construction and evaluation of modulators, demodulators and other components for analog and digital communications. Design, simulate, and evaluate wireless communication systems and their key components. Noise measurement.

E E 424: Introduction to Digital Signal Processing
(3-3) Cr. 4.
Prereq: E E 224

E E 432: Microelectronics Fabrication Techniques
(Dual-listed with E E 532). (Cross-listed with MAT E). (2-4) Cr. 4.
Prereq: credit or enrollment in E E 332
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

E E 435: Analog VLSI Circuit Design
(Cross-listed with CPR E). (3-3) Cr. 4. S.
Prereq: E E 330
Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters.
E E 437: Electronic Properties of Materials
(Dual-listed with E E 537). (Cross-listed with MAT E). Cr. 3. S.
Prereq: E E 332 or MAT E 317 or PHYS 322
Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

E E 438: Optoelectronic Devices and Applications
(Dual-listed with E E 538). (3-0) Cr. 3.
Prereq: E E 311, E E 332

E E 439: Nanoelectronics
(3-0) Cr. 3. S.
Prereq: E E 332 or MAT E 334
Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the leading technologies for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices.

E E 442: Introduction to Circuits and Instruments
(3-2) Cr. 2. F.S.
Prereq: PHYS 222, MATH 267
Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive-inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers and applications. Familiarization with common E E instrumentation and demonstration of basic principles. Credit for only 201 or 442 may be counted toward graduation; credit for 442 will not count toward graduation for E E or Cpr E majors.

E E 448: Introduction to AC Circuits and Motors
(3-2) Cr. 2. F.S.
Prereq: E E 442
Half-semester course. Basics of DC machines, stepper motors, AC induction motors, and synchronous generators. AC steady state analysis, transformers, and three-phase circuit analysis.

E E 450: Biosensing
(Cross-listed with B M E). (3-0) Cr. 3.
Prereq: B M E 220
Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including deposition films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

E E 450L: Biosensing Laboratory
(Cross-listed with B M E). (0-3) Cr. 1.
Prereq: B M E 220, concurrent enrollment in B M E 450
Laboratory course accompanying B M E 450. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors.

E E 451: Engineering Acoustics
(Cross-listed with E M, M E). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: PHYS 221 and MATH 266 or MATH 267
The basics of acoustic wave propagation in fluids with an emphasis on sound propagation in air. Topics include transmission and reflection of sound at a boundary; role of acoustic sources in directing sound fields; diffraction of sound around solid objects; reverberation of sound in a room; and the measurement of sound fields.

E E 452: Electrical Machines and Power Electronic Drives
(2-3) Cr. 3. S.
Prereq: E E 303, E E 324
Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC, induction, and AC motors. Experiments with converter topologies, DC motors, AC motors and adjustable speed drives.

E E 455: Introduction to Energy Distribution Systems
(3-0) Cr. 3. F.
Prereq: E E 303, credit or registration in E E 324
Overhead and underground distribution system descriptions and characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment.
E E 456: Power System Analysis I
(3-0) Cr. 3. F.
Prereq: E E 303, credit or registration in E E 324
Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow.

E E 457: Power System Analysis II
(3-0) Cr. 3. S.
Prereq: E E 303, credit or registration in E E 324
Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment.

(Cross-listed with ECON). (3-0) Cr. 3.
Prereq: E E 303 or ECON 301

E E 459: Electromechanical Wind Energy Conversion and Grid Integration
(Dual-listed with E E 559). (3-0) Cr. 3.
Prereq: Credit or enrollment in E E 452; E E 456
Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

E E 465: Digital VLSI Design
(Cross-listed with CPR E). (3-3) Cr. 4. F.
Prereq: E E 330
Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project.

E E 466: Multidisciplinary Engineering Design
(Cross-listed with A B E, AER E, B M E, CPR E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

E E 467: Multidisciplinary Engineering Design II
Prereq: Student must be within two semesters of graduation or receive permission of instructor.
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

E E 475: Automatic Control Systems
(3-0) Cr. 3. F.
Prereq: E E 324
Stability and performance analysis of automatic control systems. The state space, root locus, and frequency response methods for control systems design. PID control and lead-lag compensation. Computer tools for control system analysis and design.

E E 476: Control System Simulation
(2-3) Cr. 3. S.
Prereq: E E 475
Computer aided techniques for feedback control system design, simulation, and implementation.
E E 488: Eddy Current Nondestructive Evaluation  
(Dual-listed with E E 588). (Cross-listed with MAT E). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: MATH 265 and (MAT E 216 or MAT E 273 or MAT E 392 or E E 311 or PHYS 364)  
Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects.  
Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a ‘virtual’ eddy current instrument will demonstrate key concepts.

E E 489: Survey of Remote Sensing Technologies  
(Dual-listed with E E 589). (Cross-listed with GEOL, MTEOR, NREM). (3-0) Cr. 3. F.  
Prereq: Four courses in physical or biological sciences or engineering  
Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S.

E E 489L: Satellite Remote Sensing Laboratory  
(Dual-listed with E E 589L). (Cross-listed with GEOL, MTEOR, NREM). (0-3) Cr. 1. F.  
Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/EE 489/589  
Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context.

E E 490: Independent Study  
Cr. arr. Repeatable.  
Prereq: Senior classification in electrical engineering  
Investigation of an approved topic commensurate with the student’s prerequisites.

E E 490H: Independent Study: Honors  
Cr. arr.  
Prereq: Senior classification in electrical engineering  
Investigation of an approved topic commensurate with the student’s prerequisites.

E E 491: Senior Design Project I and Professionalism  
(Cross-listed with CPR E). (2-3) Cr. 3. F.S.  
Prereq: E E 322 or CPR E 308, completion of 24 credits in the E E core professional program or 29 credits in the Cpr E core professional program, ENGL 314  
Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

E E 492: Senior Design Project II  
(Cross-listed with CPR E). (1-3) Cr. 2. F.S.  
Prereq: CPR E 491 or E E 491  
Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

E E 494: Portfolio Assessment  
(Cross-listed with CPR E). Cr. R.  
Prereq: CPR E 394 or E E 394, credit or enrollment in CPR E 491 or E E 491  
Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

E E 496: Modern Optics  
(Cross-listed with PHYS). (3-0) Cr. 3. S.  
Prereq: Credit or enrollment in PHYS 322, PHYS 365, and PHYS 480  
Review of wave and electromagnetic theory; topics selected from: reflection/refraction, interference, geometrical optics, Fourier analysis, dispersion, coherence, Fraunhofer and Fresnel diffraction, holography, quantum optics, nonlinear optics.

Courses primarily for graduate students, open to qualified undergraduates:

E E 501: Analog and Mixed-Signal VLSI Circuit Design Techniques  
(Cross-listed with CPR E). (3-3) Cr. 4. F.  
Prereq: E E 435  

E E 505: CMOS and BiCMOS Data Conversion Circuits  
(Cross-listed with CPR E). (3-3) Cr. 4. Alt. S., offered even-numbered years.  
Prereq: E E 501  
Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.
E E 506: Design of CMOS Phase-Locked Loops
(Cross-listed with CPR E). (3-3) Cr. 4.
Prereq: E E 435 or E E 501 or instructor approval
Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

E E 507: VLSI Communication Circuits
(Cross-listed with CPR E). (3-3) Cr. 4. Alt. S., offered odd-numbered years.
Prereq: E E 435 or E E 501
Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

E E 508: Filter Design and Applications
(3-3) Cr. 4.
Prereq: E E 501

E E 509: Mixed-Signal IC Testing and Built In Self Test
(3-0) Cr. 3.
Prereq: E E 424 or equivalent and E E 435 or E E 501
Introduction to mixed-signal IC testing; measurement uncertainty and test validity; IEEE standard test algorithms; high performance test and built-in self test challenges; new mixed-signal test algorithms and techniques to reduce data acquisition to relax instrumentation requirements, to simplify test setup, to improve test validity, and/or to enable co-testing of heterogeneous functions.

E E 510: Topics in Electromagnetics
Cr. 1-3. Repeatable.
Prereq: E E 311

E E 511: Modern Optical Communications
(3-0) Cr. 3. S.
Prereq: E E 311
E E 518: Microwave Remote Sensing
(Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.
**Prereq:** Math 265
Microwave remote sensing of Earth's surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.

E E 519: Magnetism and Magnetic Materials
(Dual-listed with E E 419). (Cross-listed with M S E). (3-0) Cr. 3. F.
**Prereq:** E E 311 or MAT E 317 or PHYS 364

E E 520: Selected Topics in Communications and Signal Processing
(3-0) Cr. 3. Repeatable.

E E 521: Advanced Communications
(3-0) Cr. 3. F.
**Prereq:** E E 422, credit or enrollment in E E 523

E E 522: Cognitive Radio Networks
(Cross-listed with CPR E). (3-0) Cr. 3. Alt. F., offered irregularly.
**Prereq:** Permission of instructor
Topics on cognitive radio networks: Cognitive Radio Networks Architecture; Software Defined Radio Architecture; Spectrum Sensing; Spectrum Management; Spectrum Sharing; Spectrum Mobility; Applications of Cognitive Radio Networks.

E E 523: Random Processes for Communications and Signal Processing
(3-0) Cr. 3.
**Prereq:** E E 322, MATH 317
Axioms of probability; Repeated trials; Functions of a random variable and multiple random variables: covariance matrix, conditional distribution, joint distribution, moments, and joint moment generating function; Mean square estimation; stochastic convergence; Some important stochastic processes: Random walk, Poisson, Wiener, and shot noise; Markov chains; Power spectral analysis; Selected applications.

E E 524: Digital Signal Processing
(3-0) Cr. 3. F.
**Prereq:** E E 322, E E 424, MATH 317

E E 525: Data Analytics in Electrical and Computer Engineering
Cr. 3. S.
**Prereq:** E E 322 or equivalent
Introduction to a variety of data analytics techniques – particularly those relevant for electrical and computer engineers – from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques.

E E 527: Detection and Estimation Theory
(3-0) Cr. 3. S.
**Prereq:** E E 422

E E 528: Digital Image Processing
(3-0) Cr. 3. S.
**Prereq:** E E 322, E E 424
Review of sampling, linear algebra and probability. Classical image processing topics such as image sampling and quantization, image transforms (2D Fourier, KLT, DCT, etc), image enhancement, restoration and filtering. Image analysis topics including edge detection, segmentation, registration and tracking (uses least squares estimation, EM, Kalman filter). Medical image reconstruction from tomographic projections (Radon transform, Fourier slice theorem and reconstruction algorithms using them) and Magnetic Resonance Imaging (MRI). Basic introduction to image and video compression methods.
E E 529: Data Analytics in Electrical and Computer Engineering
(Cross-listed with CPR E). (3-0) Cr. 3. S.
Prereq: E E 322 or equivalent
Introduces a variety of data analytics techniques particularly those relevant for electrical and computer engineers from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques.

E E 530: Selected Topics in Electronics, Microelectronics and Photonics
(3-0) Cr. 3. Repeatable.
Prereq: E E 332

E E 532: Microelectronics Fabrication Techniques
(Dual-listed with E E 432). (Cross-listed with M S E). (2-4) Cr. 4.
Prereq: credit or enrollment in E E 332
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

E E 535: Physics of Semiconductors
(Cross-listed with PHYS). (3-3) Cr. 4.
Prereq: E E 311 and E E 332
Basic elements of quantum theory, Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carriers and recombination, carrier transport at low and high fields, space charge limited current, photo-conductivity in solids, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density, photo-conductivity, diffusion length of carriers.

E E 536: Physics of Semiconductor Devices
(Cross-listed with PHYS). (3-0) Cr. 3.
Prereq: E E 535
P-n junctions, band-bending theory, tunneling phenomena, Schottky barriers, heterojunctions, bipolar transistors, field-effect transistors, negative-resistance devices and optoelectronic devices.

E E 537: Electronic Properties of Materials
(Dual-listed with E E 437). (Cross-listed with M S E). Cr. 3. S.
Prereq: E E 332 or MAT E 317 or PHYS 322
Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

E E 538: Optoelectronic Devices and Applications
(Dual-listed with E E 438). (3-0) Cr. 3.
Prereq: E E 311, E E 332

E E 547: Pattern Recognition
(3-0) Cr. 3. F.
Prereq: E E 324

E E 552: Energy System Planning
(3-0) Cr. 3.
Prereq: E E 456, E E 457 or equivalent

E E 553: Steady State Analysis
(3-0) Cr. 3. F.
Prereq: E E 456, E E 457
Power flow, economic dispatch, unit commitment, electricity markets, automatic generation control, sparse matrix techniques, interconnected operation, voltage control.

E E 554: Power System Dynamics
(3-0) Cr. 3. S.
Prereq: E E 456, E E 457, E E 475
Dynamic performance of power systems with emphasis on stability. Modeling of system components and control equipment. Analysis of the dynamic behavior of the system in response to small and large disturbances.
E E 555: Advanced Energy Distribution Systems  
(3-0) Cr. 3.  
Prereq: E E 455  
Transient models of distribution components, automated system planning and distribution automation, surge protection, reliability, power quality, power electronics and intelligent systems applications.

E E 556: Power Electronic Systems  
(3-0) Cr. 3.  
Prereq: E E 452  
Converter topologies, AC/DC, DC/DC, DC/AC, AC/AC. Converter applications to do motor drives, power supplies, AC motor drives, power system utility applications (var compensators) and power quality.

E E 559: Electromechanical Wind Energy Conversion and Grid Integration  
(Dual-listed with E E 459). (3-0) Cr. 3.  
Prereq: Credit or enrollment in E E 452, E E 456  
Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

E E 565: Systems Engineering and Analysis  
(Cross-listed with AER E, I E). (3-0) Cr. 3.  
Prereq: Coursework in basic statistics  
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test, evaluation and systems engineering planning and organization. Not available for degrees in industrial engineering.

E E 566: Avionics Systems Engineering  
(Cross-listed with AER E). (3-0) Cr. 3. S.  
Prereq: E E 565  
Avionics functions. Applications of systems engineering principles to avionics. Top down design of avionics systems. Automated design tools.

E E 570: Systems Engineering Analysis and Design  
(3-0) Cr. 3.  
Prereq: E E 475, E E 577  
Selected topics in abstract algebra, linear algebra, real analysis, functional analysis, and optimization methods in electrical engineering.

E E 571: Introduction to Convex Optimization  
(3-0) Cr. 3.  
Introduction to convex optimization problems emerging in electrical engineering. Efficiently solving convex optimization problems with the use of interior point algorithms software. Review of linear algebra, convex functions, convex sets, convex optimization problems, duality, disciplined convex programming, applications to optimal filtering, estimation, control and resources allocations, sensor network, distributed systems.

E E 573: Random Signal Analysis and Kalman Filtering  
(Cross-listed with AER E, M E). (3-0) Cr. 3. F.  
Prereq: E E 324 or AER E 331 or M E 370 or M E 411 or MATH 341  

E E 574: Optimal Control  
(Cross-listed with AER E, M E). (3-0) Cr. 3. S.  
Prereq: E E 577  

E E 575: Introduction to Robust Control  
(Cross-listed with AER E, M E). (3-0) Cr. 3.  
Prereq: E E 577  

E E 576: Digital Feedback Control Systems  
(Cross-listed with AER E, M E). (3-0) Cr. 3. F.  
Prereq: E E 475 or AER E 432 or M E 411 or MATH 415; and MATH 267  
E E 577: Linear Systems
(Cross-listed with AER E, M E, MATH). (3-0) Cr. 3. F.
Prereq: E E 324 or AER E 331 or MATH 415; and MATH 207

E E 578: Nonlinear Systems
(Cross-listed with AER E, M E, MATH). (3-0) Cr. 3. S.
Prereq: E E 577

E E 588: Eddy Current Nondestructive Evaluation
(Dual-listed with E E 488). (Cross-listed with M S E). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: MATH 265 and (MAT E 216 or MAT E 273 or MAT E 392 or E E 311 or PHYS 364)
Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts.

E E 589: Survey of Remote Sensing Technologies
(Dual-listed with E E 489). (Cross-listed with GEOL, MTEOR, NREM). (3-0) Cr. 3. F.
Prereq: Four courses in physical or biological sciences or engineering
Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S.

E E 589L: Satellite Remote Sensing Laboratory
(Dual-listed with E E 489L). (Cross-listed with GEOL, MTEOR, NREM). (0-3) Cr. 1. F.
Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/EE 489/589
Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context.

E E 590: Special Topics
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590A: Special Topics: Electromagnetic Theory
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590B: Special Topics: Control Systems
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590C: Special Topics: Communication Systems
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590E: Special Topics: Computer Engineering
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590F: Special Topics: Electric Power
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590G: Special Topics: Electrical Materials
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590H: Special Topics: Electronic Devices and Circuits
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590I: Special Topics: Signal Processing
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 591: Seminar in Electronics, Microelectronics, and Photonics
Cr. 1-3. Repeatable.

E E 594: Seminar in Electric Power
Cr. 1-3. Repeatable.

E E 596: Seminar in Control Systems
Cr. 1-3. Repeatable.

E E 597: Seminar in Communications and Signal Processing
Cr. 1. Repeatable.
Offered on a satisfactory-fail basis only.
E E 598: Electrical and Computer Engineering Learning Community Seminar  
(Cross-listed with CPR E). Cr. R. F.S.  
*Prereq: Electrical and Computer Engineering Graduate Student*  
Introduction to graduate study in Electrical and Computer Engineering at Iowa State University. Building networks, introduction to core requirements, and tools and techniques for success. Offered on a satisfactory-fail basis only. ECpE

E E 599: Creative Component  
Cr. arr. Repeatable.

**Courses for graduate students:**

E E 621: Coding Theory  
(3-0) Cr. 3.  
*Prereq: E E 521*  

E E 622: Information Theory  
(3-0) Cr. 3.  
*Prereq: E E 521, E E 523*  
Information system overview. Entropy and mutual information. Data Compression and source encoding. Discrete memoryless channel capacity. Noisy channel coding theorem. Rate distortion theory. Waveform channels. Advanced topics in information theory.

E E 653: Advanced Topics in Electric Power System Engineering  
(3-0) Cr. 3. Repeatable.  
*Prereq: Permission of instructor*  
Advanced topics of current interest in electric power system engineering.

E E 674: Advanced Topics in Systems Engineering  
(3-0) Cr. 3. Repeatable.  
*Prereq: Permission of instructor*  
Advanced topics of current interest in the areas of control theory, stochastic processes, digital signal processing, and image processing.

E E 697: Engineering Internship  
(Cross-listed with CPR E). Cr. R. Repeatable.  
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

E E 699: Research  
Cr. arr. Repeatable.

**Energy Systems Minor**

Energy systems are pervasive in our society. A list of energy-related subjects and applications in the engineering curriculum would be nearly endless, but here are some examples:

- Mechanical engineers have a core area in thermo-fluids where courses in thermodynamics, fluid mechanics, and heat transfer form a base for energy systems.
- Electrical engineers address power transmission and distribution as well as electric motors and power systems.
- Civil engineers develop structures for wind turbines and hydroelectric dams.
- Construction engineers need to understand how building systems impact energy utilization.
- Chemical engineers develop alternative fuels and clean burning technologies.
- Material engineers develop new materials for batteries and fuel cells.
- Aerospace engineers develop wind turbines.
- Industrial engineers address manufacturing efficiency and energy reduction.
- Agricultural engineers develop biorenewable energy sources.

Energy systems are also a significant focus of the grand challenges of engineering (http://www.engineeringchallenges.org), and this minor will help our students address these issues in their engineering careers.

The goal of the minor in energy systems is to provide ISU engineering students with focused educational opportunities in the broad area of energy systems. Successful energy systems minor students will understand broad energy perspectives, the language of energy systems, and the economic, environmental, and policy issues related to energy in the two required courses (six credits) for the minor (Econ 380 and EE 351 OR ME 433). Note that credit for both EE 351 and ME 433 is no longer accepted. The remaining nine credits in the minor can be selected from a list of approved engineering courses related to energy systems to give students the opportunity to extend their knowledge.

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following course list. A complete list of approved elective courses can be found below.

**Required Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 380</td>
<td>Energy, Environmental and Resource Economics</td>
<td>3</td>

</tr>
</tbody>
</table>

**Electives: Choose from list of approved courses as outlined below** | 9       |

**Total Credits** | 15       |
The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Approved list of electives are as follows:**

- A B E 325 Biorenewable Systems
- A B E 342 Agricultural Tractor Power
- A B E 363 Agri-Industrial Applications of Electric Power and Electronics
- A B E 380 Principles of Biological Systems Engineering
- A B E 413 Fluid Power Engineering
- A B E 472 Design of Environmental Modification Systems for Animal Housing
- A B E 480 Engineering Analysis of Biological Systems
- A B E 572 Design of Environmental Modification Systems for Animal Housing
- A B E 580 Engineering Analysis of Biological Systems
- AER E 381 Introduction to Wind Energy
- AER E 481 Advanced Wind Energy: Technology and Design
- AER E 570 Wind Engineering
- BRT 501 Fundamentals of Biorenewable Resources
- BRT 515 Biorenewables Law and Policy
- BRT 516 International Biorenewables Law & Policy
- BRT 535 Thermochemical Processing of Biomass
- CH E 356 Transport Phenomena I
- CH E 357 Transport Phenomena II
- CH E 358 Separations
- CH E 381 Chemical Engineering Thermodynamics
- CH E 382 Chemical Reaction Engineering
- CH E 415 Biochemical Engineering
- CH E 515 Biochemical Engineering
- CH E 554 Integrated Transport Phenomena
- CH E 583 Advanced Thermodynamics
- CH E 587 Advanced Chemical Reaction Engineering
- CON E 352 Mechanical Systems in Buildings
- CON E 353 Electrical Systems in Buildings
- CON E 354 Building Energy Performance
- E E 303 Energy Systems and Power Electronics
- E E 448 Introduction to AC Circuits and Motors
- E E 452 Electrical Machines and Power Electronic Drives
- E E 455 Introduction to Energy Distribution Systems
- E E 456 Power System Analysis I
- E E 457 Power System Analysis II
- E E 458 Economic Systems for Electric Power Planning
- E E 459 Electromechanical Wind Energy Conversion and Grid Integration
- E M 552 Energy System Planning
- E M 553 Steady State Analysis
- E M 554 Power System Dynamics
- E M 555 Advanced Energy Distribution Systems
- E M 556 Power Electronic Systems
- E M 559 Electromechanical Wind Energy Conversion and Grid Integration
- E M 570 Wind Engineering
- ECON 458 Economic Systems for Electric Power Planning
- ENGR 340 Introduction to Wind Energy: System Design & Delivery
- ENSCI 480 Engineering Analysis of Biological Systems
- I E 543 Wind Energy Manufacturing
- M E 332 Engineering Thermodynamics II
- M E 335 Fluid Flow
- M E 413 Fluid Power Engineering
- M E 436 Heat Transfer
- M E 437 Introduction to Combustion Engineering
- M E 441 Fundamentals of Heating, Ventilating, and Air Conditioning
- M E 442 Heating and Air Conditioning Design
- M E 444 Elements and Performance of Power Plants
- M E 448 Fluid Dynamics of Turbomachinery
- M E 449 Internal Combustion Engines
- M E 530 Advanced Thermodynamics
- M E 532 Compressible Fluid Flow
- M E 535 Thermochemical Processing of Biomass
- M E 536 Advanced Heat Transfer
- M E 538 Advanced Fluid Flow
- M E 542 Advanced Combustion
- M E 545 Thermal Systems Design
- MAT E 311 Thermodynamics in Materials Engineering
- M S E 520 Thermodynamics and Kinetics in Multicomponent Materials
- NUC E 401 Nuclear Radiation Theory and Engineering
- NUC E 421 Nuclear Criticality Safety
- NUC E 441 Probabilistic Risk Assessment
- NUC E 461 Radiation Detection, Measurement and Simulation
- [http://www.me.iastate.edu/energy-systems-minor/](http://www.me.iastate.edu/energy-systems-minor/)

**Engineering Mechanics**

Administered by the Department of Aerospace Engineering

**Undergraduate Study**

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

**Graduate Study**

The department offers graduate programs that lead to the degrees master of science, master of engineering, and doctor of philosophy with
major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and has strong research emphasis. The master of science degree is recommended for students who anticipate entering a doctoral program later. The master of engineering degree does not require either research credits or a thesis. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

The master of engineering degree does require a creative component which will be obtained by registering for E M 599 Creative Component. A written report and an oral presentation will be given to the student's graduate committee.

At least 30 credits of acceptable graduate work are required for both the master of science and the master of engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf).

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Courses primarily for undergraduates:

**E M 274: Engineering Statics**
(3-0) Cr. 3. F.S.SS.
Prereq: PHYS 221, credit or enrollment in MATH 166
Vector analysis; analysis of force systems; resultant in two and three dimensions; free-body diagrams; equilibrium; analysis of trusses, frames, and machines; friction, belts and pulleys; shear and bending moment in beams, centroid and center of mass; second moments of areas.

**E M 324: Mechanics of Materials**
(3-0) Cr. 3. F.S.SS.
Prereq: E M 274
Plane stress, plane strain, stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, flexural, and combined loadings. Elementary considerations of theories of failure, buckling.

**E M 327: Mechanics of Materials Laboratory**
(0-2) Cr. 1. F.S.SS.
Prereq: E M 324
Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 324. Use of strain measuring devices. Preparation of reports.

**E M 345: Engineering Dynamics**
(Cross-listed with M E). (3-0) Cr. 3. F.S.SS.
Prereq: E M 274, credit or enrollment in MATH 266 or MATH 267
Particle and rigid body kinematics, Newton's laws of motion, kinetics of plane motion, rigid body problems using work-energy, linear, and angular impulse-momentum principles, vibrations.

**E M 362: Principles of Nondestructive Testing**
(Cross-listed with MAT E). (3-0) Cr. 3. S.
Prereq: PHYS 112 or PHYS 222
Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests, materials to which applicable, types of defects detectable, calibration standards, and reliability safety precautions.

**E M 362L: Nondestructive Testing Laboratory**
(Cross-listed with MAT E). (0-3) Cr. 1. S.
Prereq: Credit or enrollment in MAT E 362
Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories.

**E M 378: Mechanics of Fluids**
(2-2) Cr. 3. F.S.SS.
Prereq: E M 274

Courses primarily for graduate students, open to qualified undergraduates:
E M 517: Experimental Mechanics
(Dual-listed with E M 417). (Cross-listed with AER E). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 324, MAT E 273
Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

E M 518: Waves in Elastic Solids with Applications to Ultrasonic Nondestructive Evaluation
(3-0) Cr. 3. F.
Prereq: MATH 385

E M 525: Finite Element Analysis
(Cross-listed with AER E). (3-0) Cr. 3. S.
Prereq: E M 425, MATH 385
Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

E M 526: Boundary Element Methods in Engineering
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 514 or E M 516

E M 543: Introduction to Random Vibrations and Nonlinear Dynamics
(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation.

E M 548: Advanced Engineering Dynamics
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: E M 345, MATH 266 or MATH 267
3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange's equations with constraints, modified Euler's equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints.

E M 550: Nondestructive Evaluation
(Cross-listed with M S E). (3-0) Cr. 3. S.
Prereq: E M 324, MATH 385
Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, and computed tomography are analyzed. Computer-based experiments on a selection of methods: ultrasonics, eddy currents, x-rays are assigned for student completion.

E M 552: Advanced Acoustics
(Cross-listed with M E). (3-0) Cr. 3. Alt. F., offered irregularly.
Prereq: E M 451
Theoretical acoustics: wave propagation in fluids; acoustic radiation, diffraction and scattering; nonlinear acoustics; radiation force; cavitation; and ray acoustics.

E M 564: Fracture and Fatigue
(Cross-listed with AER E, M E, M S E). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392.
Undergraduates: Permission of instructor
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.
Courses for graduate students:

E M 690: Engineering Mechanics Special Topics
Cr. 1-6. Repeatable.
Prereq: Permission of instructor

Cr. 1-6. Repeatable.
Prereq: Permission of instructor

Cr. 1-6. Repeatable.
Prereq: Permission of instructor

E M 690Q: Engineering Mechanics Special Topics: Advanced Materials
Cr. 1-6. Repeatable.
Prereq: Permission of instructor

E M 690R: Engineering Mechanics Special Topics: Advanced Computational Methods
Cr. 1-6. Repeatable.
Prereq: Permission of instructor

E M 690S: Engineering Mechanics Special Topics: Other
Cr. 1-6. Repeatable.
Prereq: Permission of instructor

E M 697: Engineering Internship
Cr. R. Repeatable.
Prereq: Permission of DOGE (Director of Graduate Education), graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

E M 699: Research
Cr. arr. Repeatable.

Engineering Sales Minor

With approximately 15% of engineering job postings involving product sales, marketing or customer field support, a minor in engineering sales can be a critical step towards a great job offer. Besides being one of the best paid positions in engineering, technical sales offers substantial travel opportunities and the ability to solve customers' engineering problems in the field working with people. Talk to your adviser to see how
just a few additional courses could fit into your schedule and fast-track your job prospects.

To fill this need, the Department of Industrial and Manufacturing Systems Engineering has developed a minor in sales engineering. The engineering sales minor is a 15 credit minor that complements the technical training in the student's major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is available only to engineering students and is administered by a supervisory faculty committee. No more than 6 of the 15 credits can be used to meet any other department, college or university requirements.

Requirements:

- IE 450 Technical Sales for Engineers I
- IE 451 Technical Sales for Engineers II
- Mkt 340 Principles of Marketing
- Mkt 442 Sales Management, or Mkt 447 Consumer Behavior or Mkt 450 Advanced Professional Selling

AND

One of the following:

- IE 305 Engineering Economic Analysis
- Fin 301 Principles of Finance
- C E 206 Engineering Economic Analysis and Professional Issues in Civil Engineering

The objectives of the minor are to provide a broad understanding of the technical sales process, primarily from the business-to-business perspective. At the conclusion of the minor, students will be able to:

- Calculate a return on investment and communicate this to the customer
- Determine payback period for a given solution and communicate this to the customer
- Perform a market segmentation
- Develop a client value analysis
- Perform prospecting and business-to-business marketing
- Identify decision makers and processes
- Manage a sales process
- Use sales automation software
- Apply knowledge of underlying international sales issues
- Prepare written and verbal sales presentations
- Provide information about product/service pricing
- Lead a team selling process
- Establish sales channel management procedures
- Develop sound distribution strategies and global sales processes
- Formulate bid strategies/negotiation strategies
- Employ good time management skills

Those students interested in pursuing this minor should contact an academic adviser in their home department and fill out a REQUEST FOR MINOR form. Evaluation of all students requesting this minor will be conducted in the Department of Industrial and Manufacturing Systems Engineering. Any questions should be directed to Ms. Devna Popejoy-Sheriff at devna@iastate.edu.

Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering

The undergraduate curriculum in industrial engineering leads to the degree Bachelor of Science.

The Industrial Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

The Industrial Engineering (IE) Program educates its future graduates to accomplish its program educational objectives (PEO's) in their early careers. Specifically, the IE Program prepares its majors so that, within a few years after graduation, graduates' attainments are

1. effective industrial engineering solutions and appropriate communications with stakeholders regarding such solutions.

2. contributions to team goals through productive team interactions and leadership.

3. new skills and knowledge that advance professional practice and enable career advancement.

Details on industrial engineering program outcomes that foster the attainment of these objectives are available at appropriate sections of: www.imse.iastate.edu (http://www.imse.iastate.edu)

The industrial engineering undergraduate curriculum provides students with fundamental knowledge in mathematics and science, engineering science, social science, and humanities as well as professional industrial engineering course work. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships.
Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. or M.Eng. degrees in Industrial Engineering, or B.S. and M.B.A. degrees.

**Engineering Sales**
The Engineering Sales Minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor is earned by completing 15 credits including:

GRADUATE STUDY

The department offers programs for the degrees Master of Engineering (M.Eng.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) with a major in industrial engineering. A minor is available to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in industrial engineering. The M.S. and Ph.D. degrees are designed to improve the student's capability to conduct research as well as advancing their professional expertise. In conjunction with the Department of Mechanical Engineering, the department offers a certificate in advanced manufacturing.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution. Because of the diversity of industrial engineering topics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering; e.g., mathematics or physics. However, completion of a math sequence of calculus through differential equations is expected.

The graduate program offers advanced study in advanced manufacturing, ergonomics/human factors, operations research/analytics, systems engineering and engineering management.

Well-qualified juniors and seniors in industrial engineering who are interested in graduate study may apply for concurrent enrollment to simultaneously pursue both the industrial engineering bachelor's degree
and an M.Eng or M.S. degree. Another attractive concurrent degree option is the industrial engineering bachelor's degree concurrent with a Master of Business Administration degree from the business college. For additional information about graduate degree programs, admission criteria, and procedures refer to https://www.imse.iastate.edu/graduate-program/.

Courses primarily for undergraduates:

**I E 101: Industrial Engineering Profession**
Cr. R. F.S.
(1-0) Introduce students to the industrial engineering profession, its scope, industrial engineering tools, and future trends. Offered on a satisfactory-fail basis only.

**I E 148: Information Engineering**
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment in MATH 143

**I E 222: Design & Analysis Methods for System Improvements**
(3-0) Cr. 3. S.
Prereq: I E 248; credit or enrollment in I E 271.
Study of system improvement methods and strategies. Specific areas of lean system improvements include continuous improvement, setup reduction, workplace organization, and inventory and waste reduction. Methods and strategies to analyze and quantify the impact of changes.

**I E 248: Engineering System Design, Manufacturing Processes and Specifications**
(2-2) Cr. 3. F.
Prereq: MATH 166 and PHYS 221. Credit or enrollment in I E 101 and MAT E 273.
Introduction to metrology, engineering drawings and specifications. Engineering methods for designing and improving systems. Theory, applications, and quality issues related to machining processes.

**I E 271: Applied Ergonomics and Work Design**
(3-0) Cr. 3. S.
Prereq: PHYS 221
Basic concepts of ergonomics and work design. Their impact on worker and work place productivity, and cost. Investigations of work physiology, biomechanics, anthropometry, work methods, and their measurement as they relate to the design of human-machine systems.

**I E 305: Engineering Economic Analysis**
(3-0) Cr. 3. F.S.SS.
Prereq: MATH 166
Economic analysis of engineering decisions under uncertainty. Financial engineering basics including time value of money, cash flow estimation, and asset evaluation. Make versus buy decisions. Comparison of project alternatives accounting for taxation, depreciation, inflation, and risk.

**I E 312: Optimization**
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in MATH 267.
Concepts, optimization and analysis techniques, and applications of operations research. Formulation of mathematical models for systems, concepts, and methods of improving search, linear programming and sensitivity analysis, network models, and integer programming.

**I E 341: Production Systems**
(3-0) Cr. 3. F.
Prereq: STAT 231; credit or enrollment in I E 312
Introduction of key concepts in the design and analysis of production systems. Topics include inventory control, forecasting, material requirement planning, project planning and scheduling, operations scheduling, and other production systems such as Just-In-Time (JIT), warehousing, and global supply chains.

**I E 348: Solidification Processes**
(Cross-listed with MAT E). (2-2) Cr. 3. S.
Prereq: I E 248 and MAT E 273, or MAT E 215
Theory and applications related to metal casting, welding, polymer processing, powder metallurgy, and composites manufacturing, and related rapid manufacturing processes.

**I E 361: Statistical Quality Assurance**
(Cross-listed with STAT). (2-2) Cr. 3. F.S.
Prereq: STAT 231, STAT 301, STAT 326 or STAT 401

**I E 396: Summer Internship**
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.
IE 398: Cooperative Education (Co-op)
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

IE 403: Introduction to Sustainable Production Systems
(Dual-listed with IE 503). (3-0) Cr. 3.
Prereq: Credit or enrollment IE 341
Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material recovery (recycling) and product/component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs. traditional models for local and global production systems.

IE 405: Advanced Engineering Economy for Complex Engineering Projects
(Dual-listed with IE 505). (3-0) Cr. 3.
Prereq: MATH 265, MATH 267, STAT 231 and IE 305, or permission by instructor

IE 413: Stochastic Modeling, Analysis and Simulation
(4-0) Cr. 4. F.
Prereq: MATH 267, STAT 231
Development and analysis of simulation models using a simulation language. Application to various areas of manufacturing and service systems such as assembly, material handling, and customer queues. Utilizing model output to make important business decisions. Fitting of data to statistical distributions. Introduction to Markov processes and other queuing models.

IE 432: Industrial Automation
(2-3) Cr. 3. S.
Prereq: Phys 222
Overview of electrical circuit theory and its relationship to industrial control systems. Theory and application of transducers in the form of sensors and actuators, with applications in manufacturing, distribution and mechanical systems. Programmable Logic Controllers (PLC), their programming and use for automation solutions. Introduction of automated identification systems such as Radio Frequency Identification (RFID) and Bar Coding technologies.

IE 441: Industrial Engineering Design
(1-6) Cr. 3. F.S.
Prereq: IE 248, IE 271, IE 361; credit or enrollment in IE 341, IE 413, and IE 448
A large, open-ended design project related to an enterprise. Application of engineering design principles including problem definition, analysis, synthesis, and evaluation.

IE 446: Geometric Variability in Manufacturing
(Dual-listed with IE 546). (3-0) Cr. 3.
Prereq: IE 348, or MATH 216, or ME 324
Assessment, accommodation, and control of geometric variability in manufacturing processes, specifically composites, metalcasting, welding, machining, powder metallurgy and additive processing. Techniques include the design of the component, tooling, process plan and inspection methodology.

IE 447: Biomedical Design and Manufacturing
(Dual-listed with IE 547). (3-0) Cr. 3.
Prereq: Undergraduate students with three semesters or less before graduation while graduate standing for graduate students
Exploration of biology, materials, body mechanics, manufacturing, quality control, and ethics and the intersection of these subjects as they relate to biomedical manufacturing.

IE 448: Manufacturing Systems Engineering
(3-0) Cr. 3. S.
Prereq: IE 248, IE 305
Fixturing and tooling requirements for manufacturing process planning, geometric dimensioning and tolerancing, computer aided inspection, cellular and flexible manufacturing, and facility layout. Lean manufacturing principles and controlled flow production.
I E 449: Computer Aided Design and Manufacturing
(Dual-listed with I E 549). (3-0) Cr. 3.
Prereq: I E 248 or similar manufacturing engineering course, MATH 265.
Representation and interpretation of curves, surfaces and solids. Parametric curves and surfaces and solid modeling. Use of CAD software and CAD/CAM integration. Computer numerical control, CNC programming languages, and process planning.

I E 450: Technical Sales for Engineers I
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in I E 305.
Sales process methodology, techniques for building professional relationships, sales automation software, prospecting and account development, market analysis and segmentation, responding to RFQ’s and RFP’s in written and verbal form. Developing technical value propositions and competitive positioning, evaluating organizational decision processes and people, technical marketing strategies, sales closing strategies.

I E 451: Technical Sales for Engineers II
(3-0) Cr. 3. S.
Prereq: I E 450
Case studies and experiential lessons on the development and application of technical sales strategies. Specific topics include developing pricing and distribution strategies, managing a sales staff and channel, developing sales teams and global sales plans, bid and negotiation strategies, time management skills, and implementing sales automation technologies.

I E 466: Multidisciplinary Engineering Design
(Cross-listed with A B E, AER E, B M E, CPR E, E E, ENGR, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

I E 467: Multidisciplinary Engineering Design II
Prereq: Student must be within two semesters of graduation or receive permission of instructor.
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

I E 468: Large-Scale Complex Engineered Systems (LSCES)
(Dual-listed with I E 568). (Cross-listed with AER E). (3-0) Cr. 3. S.
Prereq: senior standing in College of Engineering or permission of AerE 468 instructor
Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.

I E 481: e-Commerce Systems Engineering
(Dual-listed with I E 581). (3-0) Cr. 3.
Prereq: I E 148
Design, analysis, and implementation of e-commerce systems. Information infrastructure, enterprise models, enterprise processes, enterprise views. Data structures and algorithms used in e-commerce systems, SQL, exchange protocols, client/server model, web-based views.

I E 483: Data Mining
(Dual-listed with I E 583). (3-0) Cr. 3.
Prereq: I E 148, I E 312, and STAT 231
Foundations of classification, data clustering and association rule mining. Techniques for data mining, including probabilistic and statistical methods, optimization algorithms and deep learning with neural networks, visualization techniques, and mathematical programming. Advanced topics include web-mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project is required.
I E 487: Big Data Analytics and Optimization
(Dual-listed with I E 587). Cr. 3. S.
Prereq: IE 312, Stat 231
Optimization and statistical learning related to big data problems. Modern modeling for data-driven optimization problems and their applications in big data analytics. Fast algorithms for optimization and statistical learning and their implementation. Applications in large-scale text analysis, energy/smart grid systems, image recognition, surveillance video analysis and social network data analysis.

I E 490: Independent Study
Cr. 1-5. Repeatable.
Prereq: Senior classification, permission of instructor
Independent study and work in the areas of industrial engineering design, practice, or research.

I E 490H: Independent Study: Honors
Cr. 1-5. Repeatable.
Prereq: Senior classification, permission of instructor
Independent study and work in the areas of industrial engineering design, practice, or research.

Courses primarily for graduate students, open to qualified undergraduates:

I E 501: I E Graduate Seminar
Cr. R. Repeatable.
Prereq: Enrollment in graduate program in Industrial Engineering. Research presentations by internal and external scholars.
Principles and practices for research tasks at the M.S. level including proposal writing, presentations, paper preparation, and project management. Offered on a satisfactory-fail basis only.

I E 503: Introduction to Sustainable Production Systems
(Dual-listed with I E 403). (3-0) Cr. 3.
Prereq: Credit or enrollment I E 341
Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material recovery (recycling) and product/component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs. traditional models for local and global production systems.

I E 505: Advanced Engineering Economy for Complex Engineering Projects
(Dual-listed with I E 405). (3-0) Cr. 3.
Prereq: MATH 265, MATH 267, STAT 231 and I E 305, or permission by instructor

I E 508: Design and Analysis of Allocation Mechanisms
(3-0) Cr. 3.
Prereq: I E 312 or MATH 307
Market-based allocation mechanisms from quantitative economic systems perspective. Pricing and costing models designed and analyzed with respect to decentralized decision processes, information requirements, and coordination. Financial Engineering Techniques. Case studies and examples from industries such as regulated utilities, semiconductor manufacturers, and financial engineering services.

I E 510: Network Analysis
(3-0) Cr. 3.
Prereq: I E 312
Formulation and solution of deterministic network flow problems including shortest path, minimum cost flow, and maximum flow. Network and graph formulations of combinatorial problems including assignment, matching, and spanning trees. Introduction to deterministic and stochastic dynamic programming.

I E 513: Analysis of Stochastic Systems
(3-0) Cr. 3.
Prereq: STAT 231
Introduction to modeling and analysis of manufacturing and service systems subject to uncertainty. Topics include the Poisson process, renewal processes, Markov chains, and Brownian motion. Applications to inventory systems, production system design, production scheduling, reliability, and capacity planning.

I E 514: Production Scheduling
(3-0) Cr. 3.
Prereq: I E 312, I E 341
Introduction to the theory of machine shop systems. Complexity results for various systems such as job, flow and open shops. Applications of linear programming, integer programming, network analysis. Enumerative methods for machine sequencing. Introduction to stochastic scheduling.
I E 519: Simulation Modeling and Analysis
(3-0) Cr. 3.
Prereq: COM S 311, STAT 401
Event scheduling, process interaction, and continuous modeling techniques. Probability and statistics related to simulation parameters including run length, inference, design of experiments, variance reduction, and stopping rules. Aspects of simulation languages.

I E 531: Quality Control and Engineering Statistics
(Cross-listed with STAT). (3-0) Cr. 3.
Prereq: STAT 401; STAT 342 or STAT 447
Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feedback control; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

I E 533: Reliability
(Cross-listed with STAT). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: STAT 342 or STAT 432 or STAT 447
Probabilistic modeling and inference in engineering reliability; lifetime models, product limit estimator, probability plotting, maximum likelihood estimation for censored data, Bayesian methods in reliability, system reliability models, competing risk analysis, acceleration models and analysis of accelerated test data; analysis of recurrence and degradation data; planning studies to obtain reliability data.

I E 534: Linear Programming
(3-0) Cr. 3.
Prereq: I E 312
Formulation of optimization problems as mathematical models, including linear programming, integer programming concepts, multi-objective optimization, and bilevel optimization. Introduction to classic optimization algorithms, including Simplex, cutting plane, and branch-and-bound. Basic concepts of duality theory and sensitivity analysis. Using computer solvers (Matlab and Gusek) to obtain optimal solutions to optimization models.

I E 537: Reliability and Safety Engineering
(3-0) Cr. 3.
Prereq: STAT 231 or STAT 401

I E 541: Inventory Control and Production Planning
(3-0) Cr. 3.
Prereq: I E 341
Economic Order Quantity, dynamic lot sizing, newsboy, base stock, and (Q,r) models. Material Requirements Planning, Just-In-Time (JIT), variability in production systems, push and pull production systems, aggregate and workforce planning, and capacity management. Supply Chain Contracts.

I E 543: Wind Energy Manufacturing
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Undergraduate engineering degree or permission of instructor.
Materials, processes and systems required to produce the major components (blades, towers, nacelles) of megawatt scale wind turbines. Transportation, manufacturing siting and procurement decisions as it relates to these large components in an expanding industry.

I E 545: Rapid Prototyping and Manufacturing
(3-0) Cr. 3.
Prereq: Prereq: I E 248 or similar manufacturing engineering course, MATH 265. Undergraduates at Senior Standing if given permission by instructor.
Introduction to rapid prototyping processes and other rapid manufacturing methodologies. Operating principles and characteristics of current and developing rapid prototyping processes. Use of rapid prototypes in product design, development, and service. Selection of rapid prototyping systems based on rapid methodologies used in manufacturing processes and rapid tooling approaches.

I E 546: Geometric Variability in Manufacturing
(Dual-listed with I E 446). (3-0) Cr. 3.
Prereq: I E 348, or MAT E 216, or M E 324
Assessment, accommodation, and control of geometric variability in manufacturing processes, specifically composites, metalcasting, welding, machining, powder metallurgy and additive processing. Techniques include the design of the component, tooling, process plan and inspection methodology.

I E 547: Biomedical Design and Manufacturing
(Dual-listed with I E 447). (3-0) Cr. 3.
Prereq: Undergraduate students with three semesters or less before graduation while graduate standing for graduate students
Exploration of biology, materials, body mechanics, manufacturing, quality control, and ethics and the intersection of these subjects as they relate to biomedical manufacturing.
I E 549: Computer Aided Design and Manufacturing
(Dual-listed with I E 449). (3-0) Cr. 3.
*Prereq: Prereq: I E 248 or similar manufacturing engineering course, MATH 265.*
Representation and interpretation of curves, surfaces and solids. Parametric curves and surfaces and solid modeling. Use of CAD software and CAD/CAM integration. Computer numerical control, CNC programming languages, and process planning.

I E 560: Engineering Risk Analysis
(3-0) Cr. 3.
*Prereq: Coursework in basic probability and statistics*
Overview of probabilistic risk analysis, modeling risks, and risk management. Topics include probability, influence diagrams, subjective probability assessment, fault tree analysis, decision making with uncertainty, risk perception, risk communication, and intelligent adversary. Use of Monte Carlo simulation to combine different sources of uncertainty and risk to generate probability distributions over an outcome. Application of probabilistic risk analysis to business investments, engineering systems, critical infrastructure, defense and security, and health systems.

I E 561: Total Quality Management
(3-0) Cr. 3.
*Prereq: Course in quality control*
Perspectives for how to analyze and implement total quality management in different organizations, to include manufacturing firms, service industries, the non-profit sector, and government agencies. Topics include the different viewpoints of quality (from the customer, workforce, and process perspective); aligning quality in an organization’s goals; performance measurement; quality in supply chain management; and reliability. Some advanced statistical elements of quality control will also be discussed.

I E 563: Engineering and Systems Management
(3-0) Cr. 3.
*Prereq: Course in probability and statistics.*
Introduction to engineering management concepts and examples relevant to the engineering manager today. Topics include decision trees and associated probabilities; personnel issues and challenges; working with management, client and the project team; personality types; and documents/forms that are useful for the engineering manager. Case studies, and a group project required.

I E 564: Decision Analysis
(3-0) Cr. 3.
*Prereq: Course in probability and statistics.*
Application of normative decision theory to problems with uncertainty and/or multiple objectives. The first decision framework will be a single-objective decision problem with uncertainty that takes into account a decision maker’s attitude towards risk. The second decision framework will be a multi-criteria decision problem in which a decision maker has multiple objectives. Topics include utility theory, value of information, sensitivity analysis, value-focused thinking, cost-effectiveness analysis, influence diagrams, and behavioral decision making. Examples will be drawn from business, systems engineering and design, and government.

I E 565: Systems Engineering and Analysis
(Cross-listed with AER E, E E). (3-0) Cr. 3.
*Prereq: Coursework in basic statistics*
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

I E 566: Applied Systems Engineering
(3-0) Cr. 3.
*Prereq: I E 565*
Design for reliability, maintainability, usability, supportability, producibility, disposability, and life cycle costs in the context of the systems engineering process. Students will be required to apply the principles of systems engineering to a project including proposal, program plan, systems engineering management plan, and test and evaluation plan. Not available for degrees in industrial engineering.

I E 568: Large-Scale Complex Engineered Systems (LSCES)
(Dual-listed with I E 468). (Cross-listed with AER E). (3-0) Cr. 3. S.
*Prereq: senior standing in College of Engineering or permission of AerE 468 instructor*
Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.
I E 570: Systems Engineering and Project Management  
(3-0) Cr. 3.  
*Prereq: Coursework in basic statistics*  
Systems view of projects and the processes by which they are implemented. Focuses on qualitative and quantitative tools and techniques of project management. Topics will include organizational structure types; project selection methodologies; simulation and optimization; and earned value management. Case studies will be included, and a group project required.

I E 571: Occupational Biomechanics  
(3-0) Cr. 3.  
*Prereq: E M 274, STAT 231*  

I E 572: Design and Evaluation of Human-Computer Interaction  
(3-0) Cr. 3.  
*Prereq: I E 271 or graduate classification*  
Human factors methods applied to interface requirements, design, prototyping, and evaluation. Concepts related to understanding user characteristics, design principles, usability analysis, methods and techniques for design and evaluation of the interface. The evaluation and design of the information presentation characteristics of a wide variety of interfaces: web sites (e-commerce), mobile applications, and information presentation systems (cockpits, instrumentation, etc.).

I E 576: Human Factors in Product Design  
(3-0) Cr. 3.  
*Prereq: I E 572 or I E 577*  
Investigation of the human interface to consumer and industrial systems and products, providing a basis for their design and evaluation. Discussions of human factors in the product design process: modeling the human during product use; usability; human factors methods in product design evaluation; user-device interface; safety, warnings, and instructions for products; considerations for human factors in the design of products for international use.

I E 577: Human Factors  
(3-0) Cr. 3.  
*Prereq: I E 271 or graduate classification*  
Physical and psychological factors affecting human performance in systems. Signal detection theory, human reliability modeling, information theory, and performance shaping applied to safety, reliability, productivity, stress reduction, training, and human/equipment interface design. Laboratory assignments related to system design and operation.

I E 581: e-Commerce Systems Engineering  
(Dual-listed with I E 481). (3-0) Cr. 3.  
*Prereq: I E 148*  
Design, analysis, and implementation of e-commerce systems. Information infrastructure, enterprise models, enterprise processes, enterprise views. Data structures and algorithms used in e-commerce systems, SQL, exchange protocols, client/server model, web-based views.

I E 582: Enterprise Modeling and Integration  
(3-0) Cr. 3.  
*Prereq: 3 credits in information technology or information systems*  
The design and analysis of enterprise models to support information engineering of enterprise-wide systems. Representation of system behavior and structure including process modeling, information modeling, and conceptual modeling. Applications in enterprise application integration, enterprise resource planning systems, product data management systems, and manufacturing execution systems.

I E 583: Data Mining  
(Dual-listed with I E 483). (3-0) Cr. 3.  
*Prereq: I E 148, I E 312, and STAT 231*  
Foundations of classification, data clustering and association rule mining. Techniques for data mining, including probabilistic and statistical methods, optimization algorithms and deep learning with neural networks, visualization techniques, and mathematical programming. Advanced topics include web-mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project is required.

I E 585: Requirements and Architecture Engineering  
(3-0) Cr. 3.  
*Prereq: 3 credits in information technology or information systems*  
Principles and practices for requirements engineering as part of the product development process with emphasis on software systems engineering. Problem definition, problem analysis, requirements analysis, requirements elicitation, validation, specifications. Case studies using requirements engineering methods and techniques.
I E 587: Big Data Analytics and Optimization
(Dual-listed with I E 487). Cr. 3. S.
Prereq: IE 312, Stat 231
Optimization and statistical learning related to big data problems. Modern modeling for data-driven optimization problems and their applications in big data analytics. Fast algorithms for optimization and statistical learning and their implementation. Applications in large-scale text analysis, energy/smart grid systems, image recognition, surveillance video analysis and social network data analysis.

I E 588: Information Systems for Manufacturing
(3-0) Cr. 3.
Prereq: I E 148, I E 448
Design and implementation of systems for the collection, maintenance, and usage of information needed for manufacturing operations, such as process control, quality, process definition, production definitions, inventory, and plant maintenance. Topics include interfacing with multiple data sources, methods to utilize the information to improve the process, system architectures, and maintaining adequate and accurate data for entities internal and external to the enterprise to achieve best manufacturing practices.

I E 590: Special Topics
Cr. 1-3. Repeatable.
Advanced study of a research topic in the field of industrial engineering.

I E 599: Creative Component
Cr. arr.
Offered on a satisfactory-fail basis only.

Courses for graduate students:

I E 613: Stochastic Production Systems
(3-0) Cr. 3.
Prereq: I E 513
Modeling techniques to evaluate performance and address issues in design, control, and operation of systems. Markov models of single-stage make-to-order and make-to-stock systems. Approximations for non-Markovian systems. Impact of variability on flow lines. Open and closed queuing networks.

I E 632: Integer Programming
(3-0) Cr. 3.
Prereq: I E 534
Integer programming including cutting planes, branch and bound, and Lagrangian relaxation. Introduction to complexity issues and search-based heuristics.

I E 633: Stochastic Programming
(3-0) Cr. 3.
Prereq: I E 513 or STAT 447, I E 534 or equivalent
Mathematical programming with uncertain parameters; modeling risk within optimization; multi-stage recourse and probabilistically constrained models; solution and approximation algorithms including Benders decomposition and progressive hedging; and applications to planning, allocation and design problems.

I E 634: Computational Optimization
(3-0) Cr. 3.
Prereq: I E 534 or equivalent.
Theory, algorithm, and computer implementation of optimization models. Simplex, Benders decomposition, computational complexity, mixed integer linear program, linear program with complementarity constraints, inverse optimization, bilevel discrete optimization. CPLEX, Matlab, and Tomlab will be used for computer implementation.

I E 642: Simultaneous Engineering in Manufacturing Systems
(3-0) Cr. 3.
Prereq: I E 549 or M E 415
Current engineering methods for the product life cycle process. Feature-based design, computer-aided process planning, and data-driven product engineering.

I E 671: Research Practicum in Human Factors and Ergonomics
(3-0) Cr. 3. Repeatable.
Prereq: I E 571 or I E 577 or IE 572
Research topic development, literature evaluation, experimental design, use of bioinstrumentation, data collection, basic data interpretation, statistical analysis, manuscript preparation.
I E 673: Spine Biomechanics  
(3-0) Cr. 3. Repeatable, maximum of 3 times. Alt. F., offered odd-numbered years.  
Prereq: I E 571 or equivalent  
Gross and fine anatomy of spine, mechanism of pain, epidemiology, in vitro testing, psychophysical studies, spine stability models, bioinstrumentation: intradiscal pressure, intra-abdominal pressure and electromyography. Biomechanics of lifting and twisting, effects of vibration, effects of posture/lifting style, lifting belts, physical models, optimization models, mathematical models, muscle models, finite element models, current trends in medical management and rehabilitation, chiropractic.

I E 681: Cognitive Engineering  
(Cross-listed with HCI). (3-0) Cr. 3.  
Prereq: I E 572 or I E 577 or PSYCH 516 or HCI/PSYCH 521 or equivalent  
Provides an overview of human cognitive capabilities and limitations in the design of products, work places, and large systems. Contexts vary broadly and could range from simple use of mobile devices to an air-traffic control or nuclear plant command center. Course focuses on what we can infer about users’ thoughts and feelings based on what we can measure about their performance and physiological state. Covers the challenge of designing automated systems.

I E 690: Advanced Topics  
Cr. 1-3. Repeatable.  
Prereq: Permission of the instructor  
Advanced topics related to Ph.D. research in industrial engineering under the direction of the instructor.

I E 697: Engineering Internship  
Cr. R. Repeatable. F.S.S.  
Prereq: Permission of department  
One Fall OR Spring semester combined with one summer, maximum per academic year. Excludes Fall/Spring combination. Professional work period. Offered satisfactory/fail basis only. (With Instructor Permission). Offered on a satisfactory-fail basis only.

I E 699: Research  
Cr. arr. Repeatable.

Materials Engineering
For the undergraduate curriculum in materials engineering leading to the degree bachelor of science. The Materials Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/. Materials engineering is a broadly-based discipline relating the composition, structure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), nanotechnologies, consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

The objectives of the materials engineering program are to produce graduates who:

- practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
- engage in advanced study in materials and related or complementary fields

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates have the opportunity to gain experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research. Graduates can develop a global perspective of engineering through various study abroad opportunities supported by the department. Classes provide hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, design, and professional practice experience. Students tailor their programs to their goals and interests through the selection of a specialization from the three available: ceramic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

Curriculum in Materials Engineering
Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.
Total credits required: 128 cr. Any transfer credit courses applied to the
degree program require a grade of C or better (but will not be calculated
into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also
Basic Program and Special Programs.

International Perspectives: 3 cr. 1

U.S. Diversity: 3 cr. 1

Communication Proficiency/Library requirement:

General Education Electives: 15 cr.

Complete 12 cr. from approved list with a minimum of 3 cr. from 200+
level courses and maximum of 9 cr from the same designator2. Also
complete the one selected course (3 cr.) from the four choices shown
above to complete your communication proficiency requirement (must
have a grade of C or better in this course).

Basic Program: 27 cr. 3

A minimum GPA of 2.00 is required for this set of courses, including any
transfer courses (please note that transfer course grades will not be
calculated into the Basic Program GPA). See Requirement for Entry into
Professional Program in College of Engineering Overview section.

Metallic Materials:
### Polymeric Materials:
- MAT E 350: Polymers and Polymer Engineering, 3 credits
- MAT E 351: Introduction to Polymeric Materials, 3 credits
- MAT E 453: Physical and Mechanical Properties of Polymers, 3 credits
- MAT E 454: Polymer Composites and Processing, 3 credits

### Other Courses: 24 cr.
- STAT 305: Engineering Statistics, 3 credits
- In-department electives from list of materials courses, 2 credits
- Technical electives from approved departments, 12 credits
- Non-remedial course, 3 credits

Total Credits: 24

### Seminar/Co-op/Internships
Co-op and internships are optional
- MAT E 301: Materials Engineering Professional Planning, R

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

See also: A 4-year plan of study grid showing course template by semester.

### Areas of specialization:
- Ceramic Materials: 321, 322, 425, 433
- Metallic Materials: 341, 342, 443, 444
- Polymeric Materials: 350, 351, 453, 454

Well qualified juniors in materials engineering who are interested in graduate study may apply for concurrent enrollment during their senior year in the Graduate College to simultaneously pursue both bachelor of science and master of science degrees. See Materials Science and Engineering for more information.

### Courses primarily for undergraduates:
MAT E 101: Materials Science & Engineering Learning Community Seminar
Cr. R. F.
Prereq: Enrollment in Materials Science Engineering Learning Community
Introduction to the Materials Science & Engineering Department and resources available to support student success. Offered on a satisfactory-fail basis only.

MAT E 214: Structural Characterization of Materials
(2-2) Cr. 3. F.S.
Prereq: MAT E 215, PHYS 221
Structural characterization of ceramic, electronic, polymeric and metallic materials. Techniques include optical and electron microscopy, x-ray diffraction, and thermal analysis. Identification of materials type, microstructure, and crystal structure.

MAT E 215: Introduction to Materials Science and Engineering I
(3-0) Cr. 3. F.S.
Prereq: Math 165 AND (CHEM 177 or CHEM 167)

MAT E 215L: Introduction to Materials Science and Engineering I - Lab
(0-2) Cr. 1. F.S.
Prereq: Credit or enrollment in MAT E 215 or MAT E 273 or MAT E 392
Materials Engineering majors only. Laboratory exercise in materials.

MAT E 216: Introduction to Materials Science and Engineering II
(3-0) Cr. 3. F.S.
Prereq: MAT E 215, MAT E 273 or MAT E 392; credit or enrollment in PHYS 222
Materials Engineering majors only. Fundamentals of ceramic, polymeric, and composite materials; degradation, electronic, thermal, magnetic, and optical properties of materials. Materials for energy, biomaterials, and nanomaterials.

MAT E 216L: Introduction to Materials Science and Engineering II - Lab
(0-2) Cr. 1. F.S.
Prereq: Credit or enrollment in 216
Materials Engineering majors only. Laboratory exercise in materials.

MAT E 220: Globalization and Sustainability
(Cross-listed with ANTHR, ENV S, GLOBE, M E, SOC). (3-0) Cr. 3. F.S.
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement.

MAT E 273: Principles of Materials Science and Engineering
(3-0) Cr. 3. F.S.
Prereq: CHEM 167 or CHEM 177; MATH 165

MAT E 301: Materials Engineering Professional Planning
Cr. R. S.
Prereq: Junior or senior classification in materials engineering
Preparation for a career in materials engineering or graduate school; experiential learning, resumes, interviewing, Myers-Briggs Type Indicator, leadership, international opportunities, professional ethics, graduate school preparation and opportunities, and alternative career paths (med school, law school, etc.). Offered on a satisfactory-fail basis only.

MAT E 311: Thermodynamics in Materials Engineering
(3-0) Cr. 3. F.S.
Prereq: CHEM 178, MAT E 216, and credit or enrollment in MATH 267
Basic laws of thermodynamics applied to phase equilibria, transformations, and reactions in multicomponent multiphase materials systems; thermodynamic descriptions of heterogeneous systems; binary and ternary phase diagrams; interfaces, surfaces, and defects.
MAT E 314: Kinetics and Phase Equilibria in Materials  
(3-0) Cr. 3. F.S.  
Prereq: MAT E 216, MAT E 311  
Kinetic phenomena and phase equilibria relevant to the origins and stability of microstructure in metallic, ceramic and polymeric systems. Application of thermodynamics to the understanding of stable and metastable phase equilibria, interfaces and their effects on stability: defects and diffusion, empirical rate equations for transformation kinetics, driving forces and kinetics of nucleation, diffusional and diffusionless phase transformations.

MAT E 317: Introduction to Electronic Properties of Ceramic, Metallic, and Polymeric Materials  
(3-0) Cr. 3. F.  
Prereq: MAT E 216 and PHYS 222  

MAT E 319: Mechanics of Structures and Materials  
Cr. 3. F.S.  
Prereq: PHYS 221, credit or enrollment in MATH 166  
Fundamentals of engineering mechanics as applied to materials. Forces and moments; stresses in loaded bodies; elasticity and stress analysis including stress / strain relationships; failure of materials including the mechanics of creep, fracture, and fatigue. Only one of MAT E 319 or E M 324 may be used for graduation requirements.

MAT E 321: Introduction to Ceramic Science  
(3-0) Cr. 3. F.  
Prereq: MAT E 216  
Ceramic crystal structures, defects, diffusion and transport. Phase equilibria and microstructures. Thermal, electronic, optical and magnetic properties of ceramics.

MAT E 322: Introduction to Ceramic Processing  
(2-3) Cr. 3. S.  
Prereq: MAT E 214, MAT E 321  

MAT E 332: Semiconductor Materials and Devices  
(Cross-listed with E E). (3-0) Cr. 3. S.  
Prereq: PHYS 222; MAT E majors: MAT E 317; CPR E and E E majors: E E 230  
Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED's.

MAT E 334: Electronic & Magnetic Properties of Metallic Materials  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: MAT E 317  

MAT E 341: Metals Processing  
(2-2) Cr. 3. F.  
Prereq: Mat E 214 and either MAT E 215, 273 or 392  
Theory and practice of metal processing, including casting; powder metallurgy; additive manufacturing; rolling; forging; extrusion; drawing; material removal; joining; surface modification; and heat treatment. Use of processing software.

MAT E 342: Structure/Property Relations in Nonferrous Metals  
(3-0) Cr. 3. S.  
Prereq: MAT E 215 or 273 or 392  
Processing of metals and alloys to obtain desired mechanical properties by manipulation of their microstructure and composition of constituent phase(s). Relevance of defects to mechanical properties, plastic flow. Strengthening mechanisms in metals and alloys. Microstructure, heat treatment and mechanical properties of engineering alloys. Metal-matrix composites.

MAT E 348: Solidification Processes  
(Cross-listed with I E). (2-2) Cr. 3. S.  
Prereq: I E 248 and MAT E 273, or MAT E 215  
Theory and applications related to metal casting, welding, polymer processing, powder metallurgy, and composites manufacturing, and related rapid manufacturing processes.
MAT E 350: Polymers and Polymer Engineering.  
(3-0) Cr. 3. S.  
Prereq: MAT E 216  
Fundamental concepts of soft matter, including polymer, colloid and surfactant. Their physical and chemical properties, rheology and production methods. Applications of polymers in the chemical industry. Related topics in surface, diffusion and stability.

MAT E 351: Introduction to Polymeric Materials  
(3-0) Cr. 3. F.S.  
Prereq: MAT E 216  
Introduction to polymeric materials, synthesis, structure and properties. Relationship between polymer composition, processing and properties.

MAT E 362: Principles of Nondestructive Testing  
(Cross-listed with E M). (3-0) Cr. 3. S.  
Prereq: PHYS 112 or PHYS 222  
Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests, materials to which applicable, types of defects detectable, calibration standards, and reliability safety precautions.

MAT E 362L: Nondestructive Testing Laboratory  
(Cross-listed with E M). (0-3) Cr. 1. S.  
Prereq: Credit or enrollment in MAT E 362  
Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories.

MAT E 391: Introduction to US Women's roles in Industry and Preparation for Summer Study  
(3-0) Cr. 3. S.  
Introduction to the historical role of women as related to US industry, family and community with emphasis on the years 1830 - 1945, but also related to the current climate. Topics completed in 392 with arranged lectures at Brunel University. Orientation for Brunel summer study program. Offered on a satisfactory-fail basis only. Credit for graduation allowable only upon completion of Mat E 392.  
Meets U.S. Diversity Requirement

MAT E 392: Principles of Materials Science and Engineering  
(3-0) Cr. 3. SS.  
Prereq: MAT E 391, Math 165, CHEM 167 or CHEM 177  
Meets International Perspectives Requirement.

MAT E 396: Summer Internship  
Cr. R. Repeatable. SS.  
Prereq: Permission of department and Engineering Career Services  
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

MAT E 398: Cooperative Education (Co-op)  
Cr. R. Repeatable. F.S.  
Prereq: Permission of department and Engineering Career Services  
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

MAT E 413: Materials Design and Professional Practice I  
(2-2) Cr. 3. F.S.  
Prereq: Senior Classification. Mat E 413-414 sequence is intended for students in their final two semesters before graduation.  
Fundamentals of materials engineering design, information sources, team behavior, professional preparation, quantitative design including finite-element analysis and computer aided design, materials selection, informatics and combinatorial methods. Analysis of design problems, development of solutions, selected case studies. Oral presentation skills. Preparations for spring project.

MAT E 414: Materials Design and Professional Practice II  
(2-2) Cr. 3. F.S.  
Prereq: Mat E 413  
Integration of materials processing, structure/composition, properties and performance principles in materials engineering problems. Multiscale design of materials, materials processing, case studies including cost analysis, ethics, risk and safety. Team projects specified by either industry or academic partners. Written and oral final project reports.
MAT E 418: Mechanical Behavior of Materials
(3-0) Cr. 3. F.S.
Prereq: MAT E 216, MAT E 319
Mechanical behavior of ceramics, metals, polymers, and composites. Relationships between materials processing and atomic aspects of elasticity, plasticity, fracture, and fatigue. Life prediction, stress-and failure analysis.

MAT E 419: Magnetism and Magnetic Materials
(Dual-listed with M S E 519). (Cross-listed with E E). (3-0) Cr. 3. F.
Prereq: E E 311 or MAT E 317 or PHYS 364

MAT E 425: Glass Science and Engineering
(2-3) Cr. 3. F.
Prereq: MAT E 214, MAT E 321
Composition, structure, properties manufacturing, and applications of inorganic glasses. Mechanical, structural, thermal, optical, ionic, electronic, and biological applications of inorganic glasses, especially silicate glasses. Contemporary topics in glass science and engineering such as glass optical fiber communication and flat panel display technologies. Laboratory exercises in the preparation and characterization of silicate glasses.

MAT E 432: Microelectronics Fabrication Techniques
(Dual-listed with M S E 532). (Cross-listed with E E). (2-4) Cr. 4.
Prereq: credit or enrollment in E E 332
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

MAT E 433: Advanced Ceramics and Electronic Materials
(2-3) Cr. 3. S.
Prereq: MAT E 317, MAT E 321

MAT E 437: Electronic Properties of Materials
(Dual-listed with M S E 537). (Cross-listed with E E). Cr. 3. S.
Prereq: E E 332 or MAT E 317 or PHYS 322
Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

MAT E 443: Physical Metallurgy of Ferrous Alloys
(2-3) Cr. 3. F.
Prereq: credit or enrollment in 314

MAT E 444: Corrosion and Failure Analysis
(2-2) Cr. 3. S.
Prereq: MAT E 214, 215 or 273 or 392
Corrosion and corrosion control of metallic systems. Corrosion fundamentals, classification of different types of metallic corrosion, corrosion properties of various engineering alloys, corrosion control. Failure analysis. Characteristics of common types of metallic failures, case studies of failures, designing to reduce failure risk.

MAT E 453: Physical and Mechanical Properties of Polymers
(2-3) Cr. 3. F.
Prereq: MAT E 214, MAT E 351
Overview of polymer chemical composition, microstructure, thermal and mechanical properties, rheology, and principles of polymer material selection. Intensive laboratory experiments include chemical composition studies, microstructural characterization, thermal analysis, and mechanical testing.
MAT E 454: Polymer Composites and Processing
(Dual-listed with M S E 554). (3-0) Cr. 3. S.
Prereq: MAT E 351
Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications.

MAT E 456: Biomaterials
(Dual-listed with M S E 556). (Cross-listed with B M E). (3-0) Cr. 3. F.
Prereq: CHEM 178 and MAT E 216 or MAT E 273 or MAT E 392
Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

MAT E 457: Chemical and Physical Metallurgy of Rare Earth Metals
(Dual-listed with M S E 557). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: MAT E 311 or CHEM 325
Electronic configuration, valence states, minerals, ores, beneficiation, extraction, separation, metal preparation and purification. Crystal structures, phase transformations and polymorphism, and thermochemical properties of rare earth metals. Chemical properties: inorganic and organometallic compounds, alloy chemistry, nature of the chemical bonding. Physical properties: mechanical and elastic properties, magnetic properties, resistivity, and superconductivity.

MAT E 466: Multidisciplinary Engineering Design
(Cross-listed with A B E, AER E, B M E, CPR E, E E, ENGR, I E, M E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

MAT E 467: Multidisciplinary Engineering Design II
Prereq: Student must be within two semesters of graduation or receive permission of instructor.
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

MAT E 481: Computational Modeling of Materials
(Dual-listed with M S E 581). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: MATH 265 and MAT E 311 or CH E 381 or CHEM 325 or PHYS 304
Introduction to the basic methods used in the computational modeling and simulation of materials, from atomistic simulations to methods at the mesoscale. Students will be expected to develop and run sample programs. Topics to be covered include, for example, electronic structure calculations, molecular dynamics, Monte Carlo, phase-field methods, etc.

MAT E 488: Eddy Current Nondestructive Evaluation
(Dual-listed with M S E 588). (Cross-listed with E E). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: MATH 265 and (MAT E 216 or MAT E 273 or MAT E 392 or E E 311 or PHYS 364)
Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts.

MAT E 490: Independent Study
Cr. arr. Repeatable.
Investigation of individual research or special topics.

MAT E 490C: Independent Study: Approved Student Submitted Proposal
Cr. arr. Repeatable. F.S.SS.
Prereq: permission of department
Independent study that is being proposed to be used toward graduation or minor requirements as a technical elective. This requires a proposal to the department's Curriculum Committee before the semester starts.
Materials Science and Engineering

Graduate Majors

The department offers work toward the following advanced degrees:
Master of Engineering in Materials Science and Engineering, Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of science degrees.

The requirements for the M. Eng., M.S. and Ph.D. degrees are established by the student's program of study committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research (M.S. and Ph.D. only), proposal (M.S. and Ph.D. only), preliminary oral examination (Ph.D. only), dissertation (M.S. and Ph.D. only), and a final oral examination (M.S. and Ph.D. only). Academic coursework requirements include 30 credits for the M.Eng. degree, 18 credits of coursework and an additional 12 credits of research for the M.S. degree, and 27 coursework credits for the Ph.D., with an additional minimum of 36 credits of research.

There are no foreign language requirements for any of the graduate degrees administered by the Department of Materials Science and Engineering. Graduate students wishing to declare a formal minor in materials science and engineering will have at least one materials science and engineering faculty member serving on their program of study committee. For the M. Eng., M.S. and Ph.D. degrees, they will take a minimum of 12 materials science and engineering course credits for the M. Engr., 9 for the M.S. degree and a minimum of 15 materials science and engineering course credits for the Ph.D. degree.

Courses primarily for graduate students, open to qualified undergraduates:

M S E 510: Fundamentals of Structure and Chemistry of Materials
(3-0) Cr. 3. F.
Prereq: MATH 165, PHYS 221, and CHEM 167
M S E 519: Magnetism and Magnetic Materials
(Dual-listed with MAT E 419). (Cross-listed with E E). (3-0) Cr. 3. F.
Prereq: E E 311 or MAT E 317 or PHYS 364

M S E 520: Thermodynamics and Kinetics in Multicomponent Materials
(3-0) Cr. 3. F.
Prereq: MAT E 311 or CHEM 321, MATH 266 or MATH 267
A review of the fundamental principles of heat, work, basic thermodynamic relations, and criteria for equilibrium. Analytical treatments for the thermodynamic description of multicomponent chemical solutions and reacting systems are developed and employed to predict phase equilibria in materials systems. Builds on the thermodynamic construction to treat the kinetics of chemical reactions and phase transformations. Topics include general first order and second order transitions, along with chemical diffusion. Detailed examples involving nucleation and diffusion limited growth, spinodal decomposition, martensitic transformations, magnetic and electric transitions, and glass formation will be considered.

M S E 521: Mechanical Behavior and Manufacturing of Polymers and Composites
(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M E 324 or MAT E 272 and E M 324

M S E 530: Solid State Science
(3-0) Cr. 3. S.
Prereq: MAT E 334 or E E 332 or PHYS 322

M S E 532: Microelectronics Fabrication Techniques
(Dual-listed with MAT E 432). (Cross-listed with E E). (2-4) Cr. 4.
Prereq: credit or enrollment in E E 332
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

M S E 537: Electronic Properties of Materials
(Dual-listed with MAT E 437). (Cross-listed with E E). Cr. 3. S.
Prereq: E E 332 or MAT E 317 or PHYS 322
Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

M S E 540: Mechanical Behavior of Materials
(3-0) Cr. 3. S.
Prereq: MAT E 418, MATH 266 or MATH 267
Mechanical behavior of materials with emphasis on micromechanics of deformation in three generic regimes: elasticity, plasticity, and fracture. A materials science approach is followed to understand and model the mechanical behavior that combines continuum mechanics, thermodynamics, kinetics, and microstructure. Some topics include elastic properties of materials, permanent deformation mechanisms at different temperatures (e.g., via dislocation motion and creep), and fracture in ductile and brittle materials. Specific classes of materials that are studied: metals, ceramics, polymers, glasses and composites.

M S E 550: Nondestructive Evaluation
(Cross-listed with E M). (3-2) Cr. 4. S.
Prereq: E M 324, MATH 385
Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, and computed tomography are analyzed. Computer-based experiments on a selection of methods: ultrasonics, eddy currents, x-rays are assigned for student completion.
M S E 551: Characterization Methods in Materials Science
(2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MAT E 214
Characterization of ceramic, metal, polymer and glassy materials using modern analytical techniques. Spectroscopic (IR, Raman, UV/VIS/NIR, and NMR), thermal (DSC, DTA/TGA, and DMA) methods, mechanical and rheological testing, magnetic and electrical characterization, and powder characterization.

M S E 552: Scanning and Auger Electron Microscopy
(2-3) Cr. 3. F.
Prereq: PHYS 222

M S E 553: Physical and Mechanical Properties of Polymers
(Dual-listed with M S E 453). (2-3) Cr. 3. F.
Prereq: MAT E 351
Overview of polymer chemical composition, microstructure, thermal and mechanical properties, rheology, and principles of polymer materials selection. Intensive laboratory experiments include chemical composition studies, microstructural characterization, thermal analysis, and mechanical testing.

M S E 554: Polymer Composites and Processing
(Dual-listed with MAT E 454). (3-0) Cr. 3. S.
Prereq: MAT E 351
Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications.

M S E 556: Biomaterials
(Dual-listed with MAT E 456). (3-0) Cr. 3. F.
Prereq: CHEM 178 and MAT E 216 or MAT E 273 or MAT E 392
Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

M S E 557: Chemical and Physical Metallurgy of Rare Earth Metals
(Dual-listed with MAT E 457). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: MAT E 311 or CHEM 325
Electronic configuration, valence states, minerals, ores, beneficiation, extraction, separation, metal preparation and purification. Crystal structures, phase transformations and polymorphism, and thermochemical properties of rare earth metals. Chemical properties: inorganic and organometallic compounds, alloy chemistry, nature of the chemical bonding. Physical properties: mechanical and elastic properties, magnetic properties, resistivity, and superconductivity.

M S E 564: Fracture and Fatigue
(Cross-listed with AER E, E M, M E). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392.
Undergraduates: Permission of instructor
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

M S E 569: Mechanics of Composite and Combined Materials
(Cross-listed with AER E, E M). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: E M 324

M S E 581: Computational Modeling of Materials
(Dual-listed with MAT E 481). (3-0) Cr. 3. Alt. F, offered odd-numbered years.
Prereq: MATH 265 and MAT E 311 or CH E 381 or CHEM 325 or PHYS 304
Introduction to the basic methods used in the computational modeling and simulation of materials, from atomistic simulations to methods at the mesoscale. Students will be expected to develop and run sample programs. Topics to be covered include, for example, electronic structure calculations, molecular dynamics, Monte Carlo, phase-field methods, etc.
M S E 588: Eddy Current Nondestructive Evaluation
(Dual-listed with MAT E 488). (Cross-listed with E E). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: MATH 265 and (MAT E 216 or MAT E 273 or MAT E 392 or E E 311 or PHYS 364)
Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts.

M S E 590: Special Topics
Cr. arr. Repeatable.
Prereq: Permission of instructor

M S E 599: Creative Component
Cr. arr. Repeatable.

Courses for graduate students:

M S E 601: Materials Seminar
(1-0) Cr. 1. Repeatable. F.S.
Prereq: MSE Graduate Student Status
Seminar course - presentations given on a weekly basis by leading U.S. and International researchers that are experts in their respective fields closely related to Materials Science. Offered on a satisfactory-fail basis only.

M S E 620: Fundamentals of Phase Transformations
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: M S E 520
Explores various advanced theoretical treatments of the energetics and kinetics of multicomponent materials. Topics include analytical and computational descriptions of thermodynamic quantities, experimental measurement of essential physical properties, analytical and computational treatments of kinetic processes, and the use of theoretical predictions of phase equilibria and evolution in materials systems.

M S E 630: Physical Properties of Solids
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: M S E 530
Advanced course in the behavior of solids within the framework of solid state physics and chemistry. Includes magnetic, dielectric, transport, and optical phenomena in solids. Influence of phase transformations and crystal symmetry on the physical properties.

M S E 651: Powder Diffraction Methods
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M S E 510

M S E 652: Transmission Electron Microscopy
(2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M S E 510
Theory and application of transmission electron microscopy to inorganic materials. Specimen preparation, selected area and convergent beam electron diffraction, bright field/dark field/high resolution imaging. Compositional analysis using X-ray and electron energy loss spectroscopy.

M S E 690: Advanced Topics in Materials Science
Cr. arr. Repeatable.
Prereq: Permission of Materials Science

M S E 697: Engineering Internship
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of department, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

M S E 699: Research
Cr. arr. Repeatable.

Mechanical Engineering

For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science. The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing devices and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are
The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:

1. Graduates will have utilized a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will have become effective collaborators and innovators, leading or participating in efforts to address social, technical and business challenges.
3. Graduates will have engaged in life-long learning and professional development through self-study, continuing education or graduate and professional studies in engineering, business, law or medicine.

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. The mechanical engineering disciplinary areas emphasized are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student's unique educational goals, whether they include immediate entry into industry or further professional or graduate study.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum. Students also develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.

Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Curriculum in Mechanical Engineering
Administered by the Department of Mechanical Engineering. Leading to the degree bachelor of science.

Total credits required: 129 cr.
Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communication Proficiency/Library requirement:

<table>
<thead>
<tr>
<th>Course</th>

Iowa State University – 2019-2020

| MATH 166 | Calculus II | 4 |
| PHYS 221 | Introduction to Classical Physics I | 5 |
| **Total Credits** | | 27 |

**Mechanical Engineering Foundations: 25 cr.**

A minimum GPA of 2.00 for the complete group of Foundations courses is required before students are permitted to enroll in the following Mechanical Engineering Core courses (please note that transfer course grades will not be calculated into the ME Foundations GPA): ME 324, ME 325, ME 332, ME 335, ME 370 and ME 421.

| MATH 265 | Calculus III | 4 |
| **4 credits from the following:** | | |
| MATH 267 | Elementary Differential Equations and Laplace Transforms | 4 |
| MATH 266 & MATH 268 | Elementary Differential Equations and Laplace Transforms | |
| PHYS 222 | Introduction to Classical Physics II | 5 |
| E M 274 | Engineering Statics | 3 |
| E M 324 | Mechanics of Materials | 3 |
| MAT E 273 | Principles of Materials Science and Engineering | 3 |
| M E 231 | Engineering Thermodynamics I | 3 |
| **Total Credits** | | 25 |

**Mechanical Engineering Core: 38 cr.**

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Core GPA):

| M E 345 | Engineering Dynamics | 3 |
| E E 442 | Introduction to Circuits and Instruments | 2 |
| E E 448 | Introduction to AC Circuits and Motors | 2 |
| M E 270 | Introduction to Mechanical Engineering Design | 3 |
| M E 324 | Manufacturing Engineering | 3 |
| M E 324L | Manufacturing Engineering Laboratory | 1 |
| M E 325 | Mechanical Component Design | 3 |
| M E 332 | Engineering Thermodynamics II | 3 |
| M E 335 | Fluid Flow | 4 |
| M E 370 | Engineering Measurements | 3 |
| M E 421 | System Dynamics and Control | 4 |
| M E 436 | Heat Transfer | 4 |
| **One Senior Capstone Design course from the following:** | | 3 |
| M E 415 | Mechanical Systems Design | |
| M E 442 | Heating and Air Conditioning Design | |
| M E 466 | Multidisciplinary Engineering Design | |

| M E 486 | Appropriate Technology Design | |
| **Total Credits** | | 38 |

**Other Remaining Courses: 24 cr.**

Complete 15 cr. Technical Electives

| M E 170 | Engineering Graphics and Introductory Design | 3 |
| STAT 305 | Engineering Statistics | 3 |
| **Complete one of the following communication courses with a minimum grade of C:** | | 3 |
| ENGL 302 | Business Communication | |
| ENGL 309 | Proposal and Report Writing | |
| ENGL 314 | Technical Communication | |
| SP CM 212 | Fundamentals of Public Speaking | |
| **Total Credits** | | 24 |

**Seminar/Co-op/Internships:**

| M E 202 | Mechanical Engineering - Professional Planning | R |

Co-op/Internship optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list of technical electives (http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/tech-electives) and general education electives (http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/general-education). Note: electives used to meet graduation requirements may not be taken Pass-Not Pass (P-NP).

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

**Transfer Credit Requirements**

The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program. The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, 3 must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level M E technical electives. No more than 3 credits of independent study shall be applied to meet the 12 credit requirement.
See also: A 4-year plan of study grid showing course template by semester.

**Energy Systems Minor**
The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found below. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

http://www.me.iastate.edu/energy-systems-minor/

Graduate Study

The department offers programs for the degrees Master of Engineering (M. Eng.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the student’s capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

Well-qualified juniors and seniors in mechanical engineering who are interested in graduate study may apply for concurrent enrollment in the
Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Graduate Programs Office and on the department's website (http://www.me.iastate.edu/).

The program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student’s program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.

Program requirements can be found on the department webpage (http://www.me.iastate.edu/) and in the Mechanical Engineering Graduate Student Handbook.

Courses primarily for undergraduates:

**M E 160: Mechanical Engineering Problem Solving with Computer Applications**
(2-2) Cr. 3. F.S.
Prereq: M E majors only. MATH 142 or MATH 143 or MATH 145; credit or enrollment in MATH 165.
Introduction to the field of Mechanical Engineering through problem-solving in a range of topics including statics, mechanics of materials and thermo-fluids. Techniques to professionally present and communicate solutions. Use of MATLAB computer programming to aid problem solving, including curve fitting and graphing. Only one of M E 160, ENGR 160, Aer E 160, C E 160, CPR E 185, E E 185, S E 185 and I E 148 may count towards graduation.

**M E 170: Engineering Graphics and Introductory Design**
(2-2) Cr. 3. F.S.
Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142 or MATH 143 or MATH 145
Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods.

**M E 190: Learning Communities**
(1-0) Cr. 1. Repeatable. F.S.
Enrollment in M E learning communities.

**M E 202: Mechanical Engineering - Professional Planning**
Cr. R. F.S.
Prereq: Credit or Enrollment in M E 231
Preparation for a career in mechanical engineering; discussion of opportunities for leadership, undergraduate research, experiential learning.

**M E 220: Globalization and Sustainability**
(Cross-listed with ANTHR, ENV S, GLOBE, MAT E, SOC). (3-0) Cr. 3. F.S.
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement.

**M E 231: Engineering Thermodynamics I**
(3-0) Cr. 3. F.S.SS.
Prereq: MATH 166, CHEM 167, PHYS 221
Fundamental concepts based on zeroth, first and second laws of thermodynamics. Properties and processes for ideal gases and solid-liquid-vapor phases of pure substances. Applications to vapor power cycles. Credit for either M E 231 or 330, but not both, may be applied toward graduation.

**M E 270: Introduction to Mechanical Engineering Design**
(1-6) Cr. 3. F.S.
Prereq: M E 160 or equivalent, M E 170 or equivalent, PHYS 221
Overview of mechanical engineering design with applications to thermal and mechanical systems. Introduction to current design practices used in industry. Semester-long team project focused on addressing societal needs. Past projects include designing human powered charging systems and products for developing nations.
M E 324: Manufacturing Engineering
(3-0) Cr. 3. F.S.SS.
Prereq: M E 270, E M 324, MAT E 273 and M E 324L
Fundamentals of manufacturing processes including forming, machining, casting and welding with emphasis on design considerations in manufacturing. Mechanical behavior of metallic materials. Modern manufacturing practices.

M E 324L: Manufacturing Engineering Laboratory
(0-2) Cr. 1. F.S.SS.
Prereq: M E 270, MAT E 273
Laboratory exercises in metrology, mechanical testing (tensile/compression and hardness tests), computer aided design (CAD), machining operations, metal welding, metal casting, and bulk/sheet metal forming.

M E 325: Mechanical Component Design
(3-0) Cr. 3. F.S.SS.
Prereq: M E 170, E M 324, and STAT 305
Philosophy of design and design methodology. Consideration of stresses and failure models useful for static and fatigue loading. Analysis, selection and synthesis of machine elements.

M E 332: Engineering Thermodynamics II
(3-0) Cr. 3. F.S.SS.
Prereq: M E 231
Gas power cycles. Fundamentals of gas mixtures, psychrometry, and thermochemistry. Applications to one-dimensional compressible flow, refrigeration, air conditioning and combustion processes.

M E 335: Fluid Flow
(3-2) Cr. 4. F.S.SS.
Prereq: M E 345, MATH 265, MATH 266 or MATH 267, credit or enrollment in M E 332.
Incompressible and compressible fluid flow fundamentals. Dimensional analysis and similitude. Internal and external flow applications. Lab experiments emphasizing concepts in thermodynamics and fluid flow. Written reports are required.

M E 345: Engineering Dynamics
(Cross-listed with E M). (3-0) Cr. 3. F.S.SS.
Prereq: E M 274, credit or enrollment in MATH 266 or MATH 267
Particle and rigid body kinematics, Newton's laws of motion, kinetics of plane motion, rigid body problems using work-energy, linear, and angular impulse-momentum principles, vibrations.

M E 370: Engineering Measurements
(2-3) Cr. 3. F.S.SS.
Prereq: E E 442, STAT 305
Fundamentals of design, selection, and operation of components of measuring systems. Measurement processes, data acquisition systems, analysis of data, and propagation of measurement uncertainty.

M E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

M E 398: Cooperative Education (Co-op).
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

M E 401: Human Centered Design, Pre-Departure Course.
Cr. 1. Alt. S., offered irregularly.
Prereq: Acceptance into Study Abroad Program.
A pre-departure course for M E 402. Safety and health issues while on site; travel logistics; required travel documents and deadlines; cultural norms. Offered on a satisfactory-fail basis only.

(1-4) Cr. 3. Alt. SS., offered irregularly.
Prereq: M E 401
Design methodology and field engineering principles for use in engineering problem solving in developing nations; application of principals will be on site. Awareness of culture, use of local artisans, crafts people and engineers will be emphasized for the purpose of ensuring sustainable and appropriate technology. Meets International Perspectives Requirement.

M E 410: Mechanical Engineering Applications of Mechatronics
(2-2) Cr. 3. Alt. S., offered irregularly.
Prereq: E E 442, E E 448, credit or enrollment in M E 421
Fundamentals of sensor characterization, signal conditioning and motion control, coupled with concepts of embedded computer control. Digital and analog components used for interfacing with computer controlled systems. Mechanical system analysis combined with various control approaches. Focus on automation of hydraulic actuation processes. Laboratory experiences provide hands-on development of mechanical systems.
M E 411: Automatic Controls  
(2-2) Cr. 3. F.  
**Prereq: M E 421**  
Methods and principles of automatic control. Pneumatic, hydraulic, and electrical systems. Representative applications of automatic control systems. Mathematical analysis of control systems.

M E 412: Ethical Responsibilities of a Practicing Engineer  
(3-0) Cr. 3. F.  
**Prereq: Credit or enrollment in M E 325**  
The study of ethics in engineering design and the engineering profession. A comprehensive look at when ethical decisions must be made and an approach to make them. The approach takes into account moral, legal, technical, experiential, and standards to aid in ethical decision making. Each area will be studied through lectures, debates, guest speakers, class discussion, and case studies.

M E 413: Fluid Power Engineering  
(Cross-listed with A B E). (2-2) Cr. 3. F.  
**Prereq: Credit or enrollment in E M 378 or M E 335, A B E 216 or M E 270**  

M E 415: Mechanical Systems Design  
(0-6) Cr. 3. F.S.  
**Prereq: M E 324, M E 325**  
Mechanical Engineering Capstone Design course. Team approach to solving design problems involving mechanical systems. Teams will use current design practices they will encounter in industry. Document decisions concerning form and function, material specification, manufacturing methods, safety, cost, and conformance with codes and standards. Solution description includes oral and written reports. Projects often worked with industry sponsors.

M E 416: Mechanism Design and Analysis  
Cr. 3. S.  
**Prereq: M E 325**  
An introduction to the design and analysis of mechanisms and the use of prescribed design methodologies to identify design requirements and achieve desired motion profiles. Topics include fundamental mechanism kinematics; graphical and analytical mechanism synthesis methods; velocity and acceleration analysis; and the design of linkages, cams and gear trains. Significant amount of team-based problem solving and the development of physical and computational models to assist in the design process.

M E 417: Advanced Machine Design  
(Dual-listed with M E 517). (3-0) Cr. 3. S.  
**Prereq: M E 325, MAT E 273**  
Stress life, strain life, and fracture mechanics approaches to fatigue life and design with metals, polymers and ceramics. Introduction to material selection in design of machine components. Thermal and structural considerations in design of machine components and hybrid materials. Course project and relevant literature review required for graduate credit.

M E 418: Mechanical Considerations in Robotics  
(Dual-listed with M E 518). (3-0) Cr. 3. S.  
**Prereq: Credit or enrollment in M E 421**  
Three dimensional kinematics, dynamics, and control of robot manipulators, hardware elements and sensors. Laboratory experiments using industrial robots.

M E 419: Computer-Aided Design  
(3-0) Cr. 3. F.  
**Prereq: M E 325**  
Theory and applications of computer-aided design. Computer graphics programming, solid modeling, assembly modeling, and finite element modeling. Mechanical simulation, process engineering, rapid prototyping and manufacturing integration.

M E 421: System Dynamics and Control  
(3-2) Cr. 4. F.S.SS.  
**Prereq: E E 442, E E 448, M E 345, MATH 267**  
Modeling and simulation of mechanical, electrical, fluid, and/or thermal systems. Development of equations of motion and dynamic response characteristics in time and frequency domains. Fundamentals of classical control applications, including mathematical analysis and design for closed loop control systems. Introduction to computer interfacing for simulation, data acquisition, and control. Laboratory exercises for hands-on system investigation and control implementation.
M E 425: Optimization Methods for Complex Designs
(Dual-listed with M E 525). (3-0) Cr. 3. F.
Prereq: M E 160, MATH 265
Optimization involves finding the 'best' according to specified criteria. Review of a range of optimization methods from traditional nonlinear to modern evolutionary methods such as Genetic algorithms. Examination of how these methods can be used to solve a wide variety of design problems across disciplines, including mechanical systems design, biomedical device design, biomedical imaging, and interaction with digital medical data. Students will gain knowledge of numerical optimization algorithms and sufficient understanding of the strengths and weaknesses of these algorithms to apply them appropriately in engineering design. Experience includes code writing and off-the-shelf routines. Numerous case-studies of real-world situations in which problems were modeled and solved using advanced optimization techniques.

M E 427: Vehicle Dynamics and Suspension Design
Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MATH 265, MATH 267, and E M 345
Analysis and evaluation of the performance of cars, trucks and other surface vehicles. Computer simulation of ride, braking, and directional response. Considerations in the design and fabrication of suspension systems.

M E 433: Alternative Energy
(3-0) Cr. 3. F.
Prereq: PHYS 221/PHYS 222 and CHEM 167
Basic principles, performance, and cost analysis of alternative energy systems including biofuels, bioenergy, wind, solar, fuel cells, storage and other alternative energy systems. Performance analysis and operating principles of systems and components, and economic analysis for system design and operation will be taught. Emphasis is on alternative energy technologies needed to meet our future energy needs at various scales ranging from household to city to national levels.

M E 436: Heat Transfer
(3-2) Cr. 4. F.S.SS.
Prereq: M E 335

M E 437: Introduction to Combustion Engineering
(3-0) Cr. 3. S.
Prereq: Credit in M E 332 or equivalent and credit or enrollment in M E 335 or equivalent.
Introduction to the fundamentals of combustion and the analysis of combustion systems for gaseous, liquid, and solid fuels—including biomass fuels. Combustion fundamentals are applied to the analysis of engines; turbines; biomass cookstoves; suspension, fixed-bed, and fluidized-bed furnaces; and other combustion devices.

M E 441: Fundamentals of Heating, Ventilating, and Air Conditioning
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in M E 436
Space conditioning and moist air processes. Application of thermodynamics, heat transfer, and fluid flow principles to the analysis of heating, ventilating, and air conditioning components and systems. Performance and specification of components and systems.

M E 442: Heating and Air Conditioning Design
(1-5) Cr. 3. S.
Prereq: M E 441 or with Instructor Permission
Design criteria and assessment of building environment and energy requirements. Design of heating, ventilating, and air conditioning systems. System control and economic analysis. Oral and written reports required.

M E 444: Elements and Performance of Power Plants
(3-0) Cr. 3. S.
Prereq: M E 332, credit or enrollment in M E 335
Basic principles, thermodynamics, engineering analysis of power plant systems. Topics include existing power plant technologies, the advanced energyplex systems of the future, societal impacts of power production, and environmental and regulatory concerns.

M E 448: Fluid Dynamics of Turbomachinery
(Cross-listed with AER E). (3-0) Cr. 3. S.
Prereq: AER E 311 or M E 335
Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines. Conceptual and preliminary design of axial and radial flow compressors and turbines using velocity triangles and through-flow approaches.

M E 449: Internal Combustion Engines
(3-1) Cr. 3. F.
Prereq: M E 335
Basic principles, thermodynamics, combustion, and exhaust emissions of spark-ignition and compression-ignition engines. Laboratory determination of fuel properties and engine performance. Effects of engine components and operating conditions on performance. Written reports required.
ME 451: Engineering Acoustics
(Cross-listed with EE, EM). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: PHYS 221 and MATH 266 or MATH 267
The basics of acoustic wave propagation in fluids with an emphasis on sound propagation in air. Topics include transmission and reflection of sound at a boundary; role of acoustic sources in directing sound fields; diffraction of sound around solid objects; reverberation of sound in a room; and the measurement of sound fields.

ME 456: Machine Vision
(Dual-listed with ME 556). Cr. 3. Repeatable. Alt. S., offered irregularly.
Prereq: MATH 317, ME 421 or permission of instructor
Practical imaging processing techniques, geometric optics, and mathematics behind machine vision, as well as the most advanced 3D vision techniques. Experience with practical vision system development and analysis. Assignments include individual bi-weekly homework; weekly readings and lectures; and a semester-long research project on design and experiment vision systems.

ME 466: Multidisciplinary Engineering Design
(Cross-listed with ABE, AER E, CPR E, EE, ENGR, I E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

ME 475: Modeling and Simulation
(3-0) Cr. 3. S.
Prereq: ME 421, credit or enrollment in ME 436
Introduction to computer solution techniques required to simulate flow, thermal, and mechanical systems. Methods of solving ordinary and partial differential equations and systems of algebraic equations; interpolation, numerical integration; finite difference and finite element methods.

ME 479: Sustainability Science for Engineering Design
(3-0) Cr. 3. Alt. S., offered irregularly.
Prereq: Any engineering design course
Scientific principles and quantitative methods concerning sustainability. Analysis of environmental issues associated with engineering design and product manufacturing in an economic and social context. Heuristic and analytical methods for assessing the sustainability of existing or potential product/service designs. Application to a design problem in teams.

ME 484: Technology, Globalization and Culture
(Dual-listed with ME 584). (Cross-listed with WLC). (3-0) Cr. 3. F.
Prereq: junior or senior classification for ME 484; graduate classification for ME 584
Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists. Meets International Perspectives Requirement.

ME 486: Appropriate Technology Design
(3-0) Cr. 3. Alt. F., offered irregularly.
Prereq: ME 231, ME 270, enrollment in ME 335; or permission of instructor.
Hands-on design experience utilizing knowledge acquired in core mechanical engineering courses. Emphasis with engineering problem formulation and solution, oral and written communication, team decision-making and ethical conduct. Design projects include engineering considerations in appropriate technology which have multidisciplinary components in economics and sociology.

ME 490: Independent Study
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of students and faculty. Election of course and topic must be approved in advance by supervising faculty.
M E 490H: Independent Study: Honors
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of students and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490J: Independent Study: Thermodynamics and Energy Utilization
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of students and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490M: Independent Study: Nuclear Engineering
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of students and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490O: Independent Study: Design and Optimization
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of student and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490P: Independent Study: Dynamic Systems and Controls
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of student and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490Q: Independent Study: Materials Processing and Mechanics
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of student and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490R: Independent Study: Thermo-fluids
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of student and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490S: Independent Study: Emerging Areas
Cr. 1-6. Repeatable.
Prereq: Senior classification
Investigation of topics holding special interest of students and faculty.
Election of course and topic must be approved in advance by supervising faculty.

M E 490Z: Independent Study: Laboratory Makeup
Cr. 1-3. Repeatable.
Prereq: Department permission
This section is designed specifically for transfer and study abroad students who need to make up a lab to fulfill course requirements.

Courses primarily for graduate students, open to qualified undergraduates:

Cr. 3. S.
Prereq: Graduate standing.
Economics and policy for U.S. energy systems, with an emphasis on connections to engineering. Topics include: economic analysis of conventional energy commodity markets and technologies, deregulated electricity markets, and emerging energy technologies; demand forecasting; economic and environmental policy in energy; integrated assessment; and semester-specific contemporary issues. Economics majors may not apply this course towards graduation.

M E 511: Advanced Control Design
(3-0) Cr. 3. S.
Prereq: M E 411
Application of control design methods using continuous, discrete, and frequency-based models. Approaches include classical, pole assignment, model reference, internal model, and adaptive control methods. Mechanical design projects.

M E 517: Advanced Machine Design
(Dual-listed with M E 417). (3-0) Cr. 3. S.
Prereq: M E 325, MAT E 273
Stress life, strain life, and fracture mechanics approaches to fatigue life and design with metals, polymers and ceramics. Introduction to material selection in design of machine components. Thermal and structural considerations in design of machine components and hybrid materials. Course project and relevant literature review required for graduate credit.

M E 518: Mechanical Considerations in Robotics
(Dual-listed with M E 418). (3-0) Cr. 3. S.
Prereq: Credit or enrollment in M E 421
Three dimensional kinematics, dynamics, and control of robot manipulators, hardware elements and sensors. Laboratory experiments using industrial robots.
M E 520: Material and Manufacturing Considerations in Design
(3-0) Cr. 3. Alt. F., offered irregularly.
Prereq: M E 324, M E 325

M E 521: Mechanical Behavior and Manufacturing of Polymers and Composites
(Cross-listed with M S E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M E 324 or MAT E 272 and E M 324

M E 525: Optimization Methods for Complex Designs
(Dual-listed with M E 425). (3-0) Cr. 3. F.
Prereq: M E 160, MATH 265
Optimization involves finding the 'best' according to specified criteria. Review of a range of optimization methods from traditional nonlinear to modern evolutionary methods such as Genetic algorithms. Examination of how these methods can be used to solve a wide variety of design problems across disciplines, including mechanical systems design, biomedical device design, biomedical imaging, and interaction with digital medical data. Students will gain knowledge of numerical optimization algorithms and sufficient understanding of the strengths and weaknesses of these algorithms to apply them appropriately in engineering design. Experience includes code writing and off-the-shelf routines. Numerous case-studies of real-world situations in which problems were modeled and solved using advanced optimization techniques.

M E 527: Mechanics of Machining and Finishing Processes
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: M E 324

M E 528: Micro/Nanomanufacturing
(3-0) Cr. 3. Alt. S., offered irregularly.
Prereq: M E 324
Concepts and applications of micro/nanotechnology appropriate to the manufacturing field. An overview of micro/nano-fabrication techniques including mechanical, EDM, laser and lithography. MEMS device fabrication. Scaling laws. Top down and bottom up approaches of nanomanufacturing. Experimental or theoretical project leading to potential submission of a manuscript for journal or conference.

M E 530: Advanced Thermodynamics
(3-0) Cr. 3. F.
Prereq: M E 332
Fundamentals of thermodynamics from the classical viewpoint with emphasis on the use of the first and second laws for analysis of thermal systems. Generalized thermodynamic relationships. Computer applications of thermodynamic properties and system analysis. Selected topics.

M E 531: Advanced Energy Systems and Analysis
Cr. 3. F.
Prereq: any undergraduate thermodynamics course; mathematics through differential equations
Introduction to energy systems including economic and thermodynamic principles. Various production systems will be analyzed. Application to transportation and building systems will be emphasized. Sustainability, climate change and other current energy system topics.

M E 532: Compressible Fluid Flow
(Cross-listed with AER E). (3-0) Cr. 3. S.
Prereq: AER E 310, 311 or equivalent

M E 535: Thermochemical Processing of Biomass
(Cross-listed with BRT). (3-0) Cr. 3. S.
Prereq: Undergraduate course work in thermodynamics and transport phenomena
Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels.
M E 536: Advanced Heat Transfer
(3-0) Cr. 3. S.
Prereq: M E 436
Advanced treatment of heat transmission by conduction, convection, and radiation.

M E 538: Advanced Fluid Flow
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in M E 436
Detailed analysis of incompressible/compressible, viscous/inviscid, laminar/turbulent, and developing fluid flows on a particle/control volume basis.

M E 542: Advanced Combustion
(3-0) Cr. 3. S.
Prereq: M E 332 or CH E 381

M E 543: Introduction to Random Vibrations and Nonlinear Dynamics
(Cross-listed with E M). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation.

M E 545: Thermal Systems Design
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: M E 436
Integrating thermodynamics, fluid mechanics, and heat transfer to model thermal equipment and to simulate thermal systems. Second law and parametric analysis; cost estimation, life cycle analysis and optimization. Some computer programming required.

M E 546: Computational Fluid Mechanics and Heat Transfer I
(Cross-listed with AER E). (3-0) Cr. 3. F.
Prereq: AER E 310 or M E 335, and programming experience

M E 547: Computational Fluid Mechanics and Heat Transfer II
(Cross-listed with AER E). (3-0) Cr. 3. S.
Prereq: AER E 546 or equivalent
Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

M E 550: Advanced Biosensors: Fundamentals and Applications
Cr. 3. Alt. S., offered even-numbered years.
Prereq: Graduate status. Recommend a basic background in engineering and one or more introductory biology courses.
3 credits (Spring, 2016) Extensive overview of biosensors including biological/biomedical microelectromechanical (Bio-MEMs) systems and bioanalytical devices with an introduction to fundamental principles, detection methods, and miniaturization techniques. Fundamental biosensor theory including biorecognition, transduction, signal acquisition, and post processing/data analysis will be discussed. Distinct sensing modalities (e.g., electrochemical, optical, thermal and mass based), biorecognition agents (e.g., enzymes, antibodies, aptamers, whole cells/tissues, genetically engineered proteins) and advanced transduction materials (e.g., carbon nanotubes, graphene, quantum/carbon dots, and polymers/hydrogels) and their use in the context of specific applications (e.g., biomedical, environmental, food safety) will be reviewed in detail. Additionally, students will design a theoretical biosensor and present their design in a written proposal and oral presentation. None

M E 552: Advanced Acoustics
(Cross-listed with E M). (3-0) Cr. 3. Alt. F., offered irregularly.
Prereq: E M 451
Theoretical acoustics: wave propagation in fluids; acoustic radiation, diffraction and scattering; nonlinear acoustics; radiation force; cavitation; and ray acoustics.

M E 556: Machine Vision
(Dual-listed with M E 456). Cr. 3. Repeatable. Alt. S., offered irregularly.
Prereq: MATH 317, M E 421 or permission of instructor
Practical imaging processing techniques, geometric optics, and mathematics behind machine vision, as well as the most advanced 3D vision techniques. Experience with practical vision system development and analysis. Assignments include individual bi-weekly homework; weekly readings and lectures; and a semester-long research project on design and experiment vision systems.
M E 557: Computer Graphics and Geometric Modeling
(Cross-listed with COM S, CPR E). (3-0) Cr. 3. F.
Prereq: M E 421, programming experience in C

M E 561: Scanning Probe Microscopy
(2-2) Cr. 3. Alt. F., offered irregularly.
Prereq: First year physics, chemistry
Introduction to the scanning probe microscope (SPM, also known as atomic force microscope or AFM) and associated measurement techniques. Overview or instrumentation system, basic principles of operation, probe-sample interaction and various operational modes to obtain micro/nanoscale structure and force spectroscopy of material surfaces. Examples of SPM significance and applications in science and engineering research, nanotechnology and other industries. Laboratory work involving use of a scanning probe microscope system is an integral part of the course.

M E 563: Micro and Nanoscale Mechanics
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: EM 324 and M E 325
Review of Fundamentals: (Elasticity, Electromagnetism, Mechanical response), Mechanics of thermally, electrostatically and magnetically actuated microsystems, Mechanics and design of nanostructured materials, mechanics of surface stress engineering and its implications to sensors and thin film structures.

M E 564: Fracture and Fatigue
(Cross-listed with AER E, E M, M S E). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392.
Undergraduates: Permission of instructor
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

M E 566: Phase Transformation in Elastic Materials
(Cross-listed with E M). (3-0) Cr. 3. S.
Prereq: EM 510 or EM 516 or EM 514

M E 573: Random Signal Analysis and Kalman Filtering
(Cross-listed with AER E, E E). (3-0) Cr. 3. F.
Prereq: E E 324 or AER E 331 or M E 370 or M E 411 or MATH 341

M E 574: Optimal Control
(Cross-listed with AER E, E E). (3-0) Cr. 3. S.
Prereq: E E 577

M E 575: Introduction to Robust Control
(Cross-listed with AER E, E E). (3-0) Cr. 3.
Prereq: E E 577

M E 576: Digital Feedback Control Systems
(Cross-listed with AER E, E E). (3-0) Cr. 3. F.
Prereq: E E 475 or AER E 432 or M E 411 or MATH 267; and MATH 207

M E 577: Linear Systems
(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. F.
Prereq: E E 324 or AER E 331 or MATH 415; and MATH 207
M E 578: Nonlinear Systems  
(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. S.  
Prereq: E E 577  

M E 580: Virtual Environments, Virtual Worlds, and Application  
(Cross-listed with HCI). (3-0) Cr. 3. F.  
Prereq: Senior or Graduate status.  
A systematic introduction to the underpinnings of Virtual Environments (VE), Virtual Worlds, advanced displays and immersive technologies; and an overview of some of the applications areas particularly virtual engineering.

M E 584: Technology, Globalization and Culture  
(Dual-listed with M E 484). (Cross-listed with WLC). (3-0) Cr. 3. F.  
Prereq: junior or senior classification for M E 484; graduate classification for M E 584  
Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.  
Meets International Perspectives Requirement.

M E 585: Fundamentals of Predictive Plant Phenomics  
(Cross-listed with BCB, GDCB). Cr. 4. F.  
Prereq: Acceptance into the P3 program or instructor permission.  
Principles of engineering, data analysis, and plant sciences and their interplay applied to predictive plant phenomics. Transport phenomena, sensor design, image analysis, graph models, network data analysis, fundamentals of genomics and phenomics. Multidisciplinary laboratory exercises. None

M E 590: Special Topics  
Cr. 1-8. Repeatable.

M E 590Q: Special Topics: Independent Literature Investigation  
Cr. 1-8. Repeatable.

M E 590T: Special Topics: Biological and Nanoscale Sciences  
Cr. 1-8. Repeatable.

M E 590U: Special Topics: Complex Fluid Systems  
Cr. 1-8. Repeatable.

M E 590V: Special Topics: Clean Energy Technologies  
Cr. 1-8. Repeatable.

M E 590W: Special Topics: Design and Manufacturing Innovation  
Cr. 1-8. Repeatable.

M E 590Z: Special Topics: Simulation and Visualization  
Cr. 1-8. Repeatable.

M E 599: Creative Component  
Cr. arr. Repeatable.

Courses for graduate students:

M E 600: Seminar  
Cr. R. Repeatable.  
(1-0).

M E 625: Surface Modeling  
(3-0) Cr. 3. Alt. S., offered irregularly.  
Prereq: M E 557, programming experience in C  

M E 632: Multiphase Flow  
(Cross-listed with CH E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: M E 538  
Single particle, multiparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions.

M E 637: Convection Heat Transfer  
(3-0) Cr. 3. Alt. F., offered irregularly.  
Prereq: M E 436  
Convection heat transfer to internal or external flows under laminar or turbulent conditions. Dimensionless parameters. Classical solutions of Newtonian viscous flows. Forced and free convection. Special topics.

M E 638: Radiation Heat Transfer  
(3-0) Cr. 3. Alt. F., offered irregularly.  
Prereq: M E 436  
Non-destructive Evaluation Engineering Minor

Minor supervised by an interdisciplinary faculty committee, administered by Aerospace Engineering. The NDE minor is a unique opportunity for engineering students to acquire a multidisciplinary engineering qualification in the rapidly evolving field of Nondestructive Evaluation.

Undergraduate Study

Students interested in completing the NDE engineering minor must be enrolled in the College of Engineering at Iowa State University. They must submit the "Request for Minor" form and complete the minimum prescribed 16 credit-hours of course work defined below. Acceptance is based on approval by the administering department, Aerospace Engineering.

The course requirements for the undergraduate minor in NDE are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT E/E M 362</td>

Total Credits: 16-20

A combined average grade of C or higher is required in courses applied to the minor and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Nuclear Engineering Minor**

http://www.me.iastate.edu/students/degrees-and-programs/engineering-minors/

Minor administered by Mechanical Engineering

The nuclear engineering undergraduate minor allows engineering students to acquire a formal background in nuclear engineering topics that will not only benefit them, but also fulfill a societal need for future hiring of engineers. Through this program, students can enroll in a formal minor that enables them to acquire a basic and fundamental knowledge of nuclear sciences and engineering, thus enabling them to pursue employment in any one of a number of fields associated with the construction, operation or regulation of nuclear power generation.

Students completing this minor acquire a body of knowledge in the fundamentals of nuclear science and engineering. The required courses selected ensures that all graduates of the nuclear engineering minor obtain a minimum body of knowledge in nuclear science and engineering that would allow them to apply their specialized field of engineering knowledge to nuclear-related applications, such as nuclear plant and site construction, nuclear power plant operations, nuclear safety and radiation protection.

The supporting courses that are listed in this program provide an opportunity for students to build upon the knowledge gained in the required courses by taking either more advanced courses or more specialized courses dealing with specific areas of nuclear engineering.

**Undergraduate Study**

Students interested in completing the nuclear engineering minor must be enrolled at Iowa State University and have the appropriate technical background. They should complete and submit the "Request for Minor" form for submission to the Nuclear Engineering program director. The selection process is based on approval by the administering department, Mechanical Engineering.

The course requirements for the undergraduate minor in nuclear engineering are:

Total Credits: 15

* Students have the option of enrolling in these web-based distance courses offered at select universities. It is the responsibility of the student to arrange for enrollment and payment for these courses. Courses must be successfully completed with a “C” or higher in order to be considered for transfer credit. Contact the Nuclear Engineering program director for more information.

The minor must include at least nine credits which are beyond the total used to meet curriculum requirements for the bachelors degree in engineering.
Courses primarily for undergraduates:

**NUC E 401: Nuclear Radiation Theory and Engineering**

(3-0) Cr. 3. F.

*Prereq: PHYS 222, MATH 266 or MATH 267*

**NUC E 402: Nuclear Reactor Engineering**

(3-0) Cr. 3. S.

*Prereq: NUC E 401, permission of Nuclear Engineering program director*  

**NUC E 405: Radiation Protection and Shielding**

(3-0) Cr. 3.

*Prereq: NUC E 401, permission of Nuclear Engineering program director*  
WWW only. Basic principles and concepts of radiation protection and design: dosimetric units and response functions, hazards of radiation dose, radiation sources, basic methods for dose evaluation, and shielding design techniques for photons and neutrons.

**NUC E 410: Nuclear Reactor Theory**

(3-0) Cr. 3. F.

*Prereq: NUC E 401, permission of Nuclear Engineering program director*  
WWW only. An introduction to neutron diffusion theory, neutron moderation, conditions for criticality of nuclear reactors.

**NUC E 421: Nuclear Criticality Safety**

Cr. 3. F.

*Prereq: NUC E 401*

Nomenclature, theory, and practice of nuclear criticality safety. Review of nuclear criticality accidents, analytical methods used in criticality analysis, review of standards and regulations, and developing criticality safety evaluations.

**NUC E 430: Nuclear Energy and Society**

(3-0) Cr. 3. Alt. S., offered even-numbered years.

*Prereq: NUC E 401*

The relationship between nuclear energy and society is examined from the perspective of significant events in the commercial nuclear power industry. Event analysis includes differences and similarities of technologies along with environmental impact. Political, social, media and regulatory responses for each event are discussed along with the impact on future plant design.

**NUC E 441: Probabilistic Risk Assessment**

(3-0) Cr. 3. S.

*Prereq: STAT 305 or equivalent*

**NUC E 461: Radiation Detection, Measurement and Simulation**

(3-0) Cr. 3. S.

*Prereq: NUC E 401*

**NUC E 490: Independent Study**

Cr. 1-3. Repeatable, maximum of 3 credits.

*Prereq: Junior Classification*

Investigation of nuclear engineering topics. Election of course and topic must be approved in advance by supervising faculty.

---

**Software Engineering**

For the undergraduate curriculum in Software Engineering ([http://www.se.iastate.edu](http://www.se.iastate.edu)) leading to the degree Bachelor of Science. The Software Engineering Program is accredited by the Engineering Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org).

The Bachelor of Science degree in software engineering is jointly administered by the College of Engineering and the College of Liberal Arts and Sciences. The Software Engineering program provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of state-of-the-art software technologies and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers many elective choices in software engineering. Students may also take elective courses in computer engineering and computer science.

**Program Educational Objectives**

Within five years of graduation, the graduates should:

1. attain a **productive career** in Software Engineering or related fields;

2. attain **leadership** roles and become **effective collaborators** to advance professional and organizational goals;

3. engage in **lifelong learning** and professional development;
4. encourage and support diversity and inclusiveness in their workplace.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) peer-recognized expertise, (b) engagement in professional practice, (c) sustained learning, (d) leadership and (e) teamwork.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the College of Engineering and the College of Liberal Arts and Sciences provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

The Software Engineering program is an interdisciplinary program delivered jointly by the College of Engineering and the College of Liberal Arts & Sciences.

Leading to the degree bachelor of science.

Total credits required: 125 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements. International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.

Communication Proficiency/Library requirement:

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism and S E 492 Senior Design Project II and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved lists. (http://www.se.iastate.edu/academics)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives (http://www.se.iastate.edu/academics).

*Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

**Basic Program** - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA) Must receive a C or better grade in required English classes.

**General Educational Elective courses to be selected in consultation with SE advisers from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as international perspectives and U.S. diversity, language, arts and humanities, and social sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives and Supplementary Electives must be selected from the program-approved list ([http://www.se.iastate.edu/academics](http://www.se.iastate.edu/academics)).

¹ Core Professional Curriculum (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Core GPA)

² Students who take the 4-credit lab courses CPR E 288, CPR E 308, and CPR E 381 instead of the corresponding 3-credit alternatives can apply the additional credits toward Supplementary Electives. The total number of credits required in the Software Engineering Program remains the same for all students.

**Courses primarily for undergraduates:**

**S E 101: Software Engineering Orientation**
Cr. R.
Introduction to the procedures, policies, and resources of Iowa State University and the Software Engineering Program. Offered on a satisfactory-fail basis only.

**S E 166: Careers in Software Engineering**
Cr. R.
Overview of the nature and scope of the software engineering profession, relationship of coursework to careers, and program of study planning. Offered on a satisfactory-fail basis only.
S E 185: Problem Solving in Software Engineering
(2-2) Cr. 3.
Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

S E 309: Software Development Practices
(Cross-listed with COM S). (3-1) Cr. 3. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165
A practical introduction to methods for managing software development. Process models, requirements analysis, structured and object-oriented design, coding, testing, maintenance, cost and schedule estimation, metrics. Programming projects.

S E 319: Construction of User Interfaces
(Cross-listed with COM S). (3-0) Cr. 3. F.S.
Prereq: COM S 228

S E 329: Software Project Management
(Cross-listed with CPR E). (3-0) Cr. 3.
Prereq: COM S 309

S E 339: Software Architecture and Design
(Cross-listed with CPR E). (3-0) Cr. 3.
Prereq: S E 319

S E 342: Principles of Programming Languages
(Cross-listed with COM S). (3-1) Cr. 3. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165; COM S 230 or CPR E 310

S E 362: Object-Oriented Analysis and Design
(Cross-listed with COM S). (3-0) Cr. 3. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165; ENGL 250
Object-oriented requirements analysis and systems design. Design notations such as the Unified Modeling Language. Design Patterns. Group design and programming with large programming projects.

S E 396: Summer Internship
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

S E 398: Cooperative Education (Co-op)
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.
S E 409: Software Requirements Engineering
(3-0) Cr. 3.
Prereq: COM S 309; for graduate credit: graduate standing or permission of instructor
The requirements engineering process including elicitation, requirements analysis fundamentals, requirements specification and communication, and requirements evaluation. Modeling of functional and nonfunctional requirements, traceability, and requirements change management. Case studies and software projects.

S E 412: Formal Methods in Software Engineering
(Cross-listed with COM S, CPR E). (3-0) Cr. 3.
Prereq: COM S 311, STAT 330; for graduate credit: graduate standing or permission of instructor
A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

S E 416: Software Evolution and Maintenance
(Cross-listed with CPR E). (3-0) Cr. 3.
Prereq: COM S 309
Practical importance of software evolution and maintenance, systematic defect analysis and debugging techniques, tracing and understanding large software, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance, experimental studies and quantitative measurements of software evolution. Written reports and oral presentation.

S E 417: Software Testing
(Cross-listed with COM S). (3-0) Cr. 3.
Prereq: COM S 309; COM S 230 or CPR E 310; ENGL 250, SP CM 212
An introduction to software testing principles and techniques. Test models, test design, test adequacy criteria; regression, integration, and system testing; and software testing tools.

S E 419: Software Tools for Large Scale Data Analysis
(Cross-listed with CPR E). (3-3) Cr. 4.
Prereq: CPR E 308 or COM S 352, COM S 309
Software tools for managing and manipulating large volumes of data, external memory processing, large scale parallelism, and stream processing, data interchange formats. Weekly programming labs that involve the use of a parallel computing cluster.

S E 421: Software Analysis and Verification for Safety and Security
(Cross-listed with CPR E). Cr. 3. F.S.
Prereq: COM S 309; CPR E 310 or Com S 230
Significance of software safety and security; various facets of security in cyber-physical and computer systems; threat modeling for software safety and security; and categorization of software vulnerabilities. Software analysis and verification: mathematical foundations, data structures and algorithms, program comprehension, analysis, and verification tools; automated vs. human-on-the-loop approach to analysis and verification; and practical considerations of efficiency, accuracy, robustness, and scalability of analysis and verification. Cases studies with application and systems software; evolving landscape of software security threats and mitigation techniques. Understanding large software, implementing software analysis and verification algorithms.

S E 490: Independent Study
Cr. arr. Repeatable.
Prereq: Senior classification in software engineering
Investigation of an approved topic.

S E 491: Senior Design Project I and Professionalism
(2-3) Cr. 3.
Prereq: S E 329 and S E 339, CPR E 308 or COM S 352, ENGL 309 or ENGL 314
Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; project poster. First of two-semester team-oriented, project design and implementation experience.

S E 492: Senior Design Project II
(1-3) Cr. 2.
Prereq: S E 491
Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in S E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements.

S E 494: Software Engineering Portfolio Development
Cr. R. F.S.
Prereq: Credit or enrollment in S E 491
Portfolio assessment for Software Engineers. Guidelines and Advice to improve software engineering portfolios and to better use portfolios as a tool to enhance career opportunities.

Systems Engineering

Systems Engineering Master's Degree
Administered by the Department of Industrial and Manufacturing Systems Engineering

The Systems Engineering Program focuses on developing an individual's analytical skills to design, evaluate, and build modern complex
Engineered systems. Engineers who can conceptualize, model, and integrate hardware, software, data, and humans are critical in technology driven multi-disciplinary design teams. The Iowa State University Master of Engineering in Systems Engineering Program is designed to train engineers to excel in the technology driven design environment commonly found in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

**Admission Requirements**

Unrestricted admission requires (1) a 3.0 grade point average from an ABET accredited undergraduate engineering program, (2) minimum of two years of engineering experience or current full-time employment as an engineer, (3) calculus, engineering statistics, and engineering economy. A GRE is not required for this program.

Applicants for admission to the Systems Engineering Program apply through the Graduate College at Iowa State University. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to 9 credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (http://www.elo.iastate.edu/how-elo-works/admission-and-enrollment)

The Master of Engineering in Systems Engineering Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

**Degree Requirements (10 courses total = 30 credits)**

**Intro Core (required first year)**

<table>

</tbody>
</table>

Other focus areas in related disciplines, such as systems engineering, human factors, supply chain management, or manufacturing, may be substituted for supporting courses. A program of study is developed by the student and academic adviser to fit individual needs.

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.
HUMAN SCIENCES

Laura Jolly, Dean, Dean’s Chair
Brenda J. Lohman, Associate Dean Research and Graduate Education
Robert D. Reason, Interim Associate Dean Undergraduate Academic Affairs
Debra Sellers, Associate Dean and Director of Human Sciences Extension and Outreach

www.hs.iastate.edu/ (http://www.hs.iastate.edu)

The College of Human Sciences provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences (CHS), founded in 2005, fosters innovative synergies in teaching and learning in addition to the discovery of new knowledge. Members of the college work to enhance human potential in many ways, and strive to improve the quality of people’s lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Departments/School

• Apparel, Events, and Hospitality Management (http://www.aeshm.hs.iastate.edu)
• Food Science and Human Nutrition (http://www.fshn.hs.iastate.edu)
• Human Development and Family Studies (http://www.hdfs.hs.iastate.edu)
• Kinesiology (http://www.kin.hs.iastate.edu)
• School of Education (http://www.education.iastate.edu)

Recommended High School Preparation

Recommended preparation for students entering most departments in the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social sciences and/or humanities. In addition, students interested in Elementary Education are advised to complete two or more years of high school study in one foreign language.

Information for Prospective Students

Each student in the College of Human Sciences works closely with an academic advisor who is associated with the program in which the student is majoring. Advisors assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisors attempt to assist students as they develop their schedule of classes to meet their goals, interests, and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Students who enter in spring or summer terms are also offered orientation sessions which are held prior to the beginning of the student’s first term. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Undecided Students

The College of Human Sciences offers an academic support program for students who are considering several majors at Iowa State University. This program is administered to undecided Human Sciences students through the MINDS Learning Community. Students in the MINDS Learning Community take coursework together, including an orientation and career exploration course which is taught by college advisers. This course provides opportunities for students to evaluate their interests, skills, and strengths while also receiving additional support through a peer mentor program. All undecided majors in the College of Human Sciences are required to participate in MINDS Learning Community and will sign up for the program during orientation. For more information, visit the MINDS webpage: http://www.hs.iastate.edu/prospective/learning-communities/minds/

Planned Transfer Programs

By planning carefully, students may begin their education at another college and then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Recruitment Office.

Accreditation and Licensure

The following program-specific accreditation/licensure/registrations have been attained by departments or School of Education within the college:

Department of Apparel, Events, and Hospitality Management:

Apparel, Merchandising, and Design major is endorsed by the American Apparel and Footwear Association’s Education Foundation. The Design primary option is accredited by the National Association of Schools in Art and Design.

Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration.
**Department of Food Science and Human Nutrition:**

The Food Science degree, including Industry and Technology options are approved by the Institute of Food Technologists.

The Didactic Program in Dietetics and Dietetics Internship are accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics.

The Baccalaureate Degree in Nursing at Iowa State University is pursuing initial accreditation by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. Applying for accreditation does not guarantee that accreditation will be granted. The program has interim approval from the Iowa Board of Nursing.

**Department of Human Development and Family Studies:**

The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC), Academy for Early Childhood Programs, is licensed by the Iowa Department of Human Services, and maintains a 5 Star Rating from the Iowa Quality Rating System.

The Early Childhood Education Program (administered in collaboration with the School of Education) and the Family and Consumer Sciences Education Teacher Licensure Program are accredited by the Iowa Department of Education and students may be recommended for licensure to the Iowa Board of Educational Examiners.

Financial Counseling and Planning (FCP) is a registered education program with the Certified Financial Planner Board of Standards and the Association for Financial Counseling and Planning Education. With these registrations FCP students are eligible to sit for the Certified Financial Planner™ and Accredited Financial Counselor® examinations.

**Department of Kinesiology:**

The Athletic Training program is accredited by the Commission on Accreditation of Athletic Training Education.

The Physical Education Educator Preparation Program is recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

**School of Education - Educator Preparation**

All Iowa State University Educator Preparation Programs are recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

Each student will be enrolled in the School or Department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.

All candidates must meet the program completion requirements of the Iowa State University Educator Preparation Program in order to be recommended for teacher or educational leadership licensure by Iowa State University.

For details about Teacher Education programs, requirements, and endorsement areas, see Teacher Education. (http://www.education.iastate.edu/undergraduate-studies)

For details about Educational Leadership programs and requirements, see Educational Leadership (http://www.education.iastate.edu/graduate-studies/gradprograms/elop.html)

**Undergraduate Core Curriculum**

**Purpose**

The College of Human Sciences has established core learning outcomes to provide the unifying foundation critical to personal and professional success for all College of Human Sciences undergraduate students. Assessment of College of Human Sciences’ core learning outcomes will measure student competence in four (4) areas. Assessment results will be used by CHS faculty and staff to enhance student learning experiences.

**Four components**

The core identifies the expected minimum outcomes that each undergraduate in the college must meet:

Communication - Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats without distracting errors in usage or convention.

Self-Assessment/Self Reflection - Consistently and realistically analyze and evaluate one’s own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy.

Critical Thinking - Generate, acquire and evaluate information based on scientific evidence, creative processes, and logical and ethical reasoning to make decisions and solve problems in one’s personal, professional and community endeavors.

Social Justice - Articulate and demonstrate a clear concept of a just society in which individuals and groups equitably share in societal benefits within a global community.
Expectations for Departments/School of Education/Programs

Departments/schools/programs formally participate in outcomes assessment. Programs identify courses at three levels (introductory, intermediate, and advanced) where at least one significant educational activity is identified and assessed. Increased achievement and level of mastery at advanced levels is discussed and incorporated through continuous improvement efforts.

General Education

Students in the College of Human Sciences are required to complete a program in general education which is integrated in their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses related to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

I. Communication Skills (10 cr.): ENGL 150, ENGL 250; LIB 160; and 3 credits in oral communication

II. Biological and physical sciences and mathematical disciplines (9 cr.): at least 3 credits in mathematical disciplines

III. Social sciences and humanities (15 cr.): at least 6 credits in social sciences and at least 6 credits in humanities

Double Majors

Undergraduate students may elect a second major from the departments or school and program areas listed above, or from a major field offered for the bachelor’s degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, prerequisites and supporting courses.

Two Bachelor’s Degrees

Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index, Bachelor’s Degree, Two.

International Programs

The College of Human Sciences encourages students to participate in international programs that will help them to become life-long learners of other cultures and perspectives, to enhance their global citizenship, and to expand their opportunities for employment after graduation. The College offers short-term faculty-led study abroad programs, semester-long exchange programs, international student teaching sites, and dietetic internship rotations.

International opportunities change each year, and students should visit http://intl.hs.iastate.edu to review the list of available programs and to explore which offerings are designed for specific majors. The College offers several study abroad scholarships and last year over $68,000 was awarded to support student participation in our international programs.

Faculty members also bring diversity and global perspectives to instruction through research and collaborations with scholars and institutions abroad, and the College employs faculty members from many different countries.

Honors Program

High achieving students, with a grade point average of above 3.50, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and work one on one with a faculty member to complete an honors project. For further information, contact the College Honors Committee or academic adviser. See www.hs.iastate.edu/academics/honors/ (http://www.hs.iastate.edu/academics/honors/%20%20) or look in the Index, under Honors Program.

Human Sciences Extension and Outreach

Students may prepare for a career in the Cooperative Extension System by enrolling in a curriculum in the College of Human Sciences that provides them with a subject matter base for conducting educational
programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the Associate Dean and Director of Iowa State University Human Sciences Extension and Outreach, and/or the Iowa State University Extension and Outreach 4-H Youth Development Program Leader.

**Undergraduate Majors**

For more information about a major, see:

1. The curriculum descriptions in this section of the catalog
2. The department catalog section under Courses and Programs
3. Department websites.

**Apparel, Events, and Hospitality Management**

**Apparel, Merchandising, and Design**

Options: Merchandising; Creative and Technical Design; and Product Development. See Curriculum in Apparel, Merchandising, and Design

**Event Management**

See Curriculum in Event Management

**Hospitality Management**

See Curriculum in Hospitality Management

**Food Science and Human Nutrition**

**Culinary Food Science**

See Curriculum in Culinary Food Science

**Diet and Exercise B.S./M.S.**

Jointly administered with the Department of Kinesiology. See Curriculum in Diet and Exercise

**Dietetics**

See Curriculum in Dietetics

**Food Science**

Options: Food Science and Industry; Food Science and Technology. See Curriculum in Food Science

**Nursing**

See Curriculum in Nursing (http://fshn.hs.iastate.edu/undergraduate-programs/nursing)

**Nutritional Science**

Options: Pre-Health Professional and Research; Family Health; Food Service; Global Health and Policy; Health Coach; and Nutrition and Wellness. See Curriculum in Nutritional Science.

**Human Development and Family Studies**

**Child, Adult, and Family Services**

Options: Child Programs; Youth Programs; and Adult/Family Programs. See Curriculum in Child, Adult, and Family Services

**Early Childhood Education - Unified**

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education

**Family and Consumer Sciences Education and Studies**

Options: Communications; Professional Studies; Teacher Licensure. See Curriculum in Family and Consumer Sciences Education and Studies

**Financial Counseling and Planning**

See Curriculum in Financial Counseling and Planning

**Affiliated Program: Early Childcare Education and Programming**

Offered by the Great Plains Interactive Distance Education Alliance (GPIDEA). See Curriculum in Early Childcare Education and Programming

**Kinesiology**

**Athletic Training**

See Curriculum in Athletic Training

**Diet and Exercise B.S./M.S.**

Jointly administered with the Department of Food Science and Human Nutrition. See Curriculum in Diet and Exercise

**Kinesiology & Health**

Options: Community and Public Health; Exercise Science; Physical Activity and Health Promotion; Physical Education Teacher Education; and Pre-Health Professions. See Curriculum in Kinesiology & Health

**School of Education**

**Early Childhood Education - Unified**

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education (http://www.education.iastate.edu/undergraduate-studies/early-childhood-education)

**Elementary Education**

Administered by the School of Education. See Curriculum in Elementary Education (http://www.education.iastate.edu/undergraduate-studies/elementary-education)
K-12/Secondary Education

The Secondary Education program has three routes, an undergraduate route, a post bachelor route, and a graduate route.

• Undergraduate Secondary Education
  Offered in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Index, Teacher Education

• Post-Bachelor Secondary Education
  Coordinated by departments/programs across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Index, Teacher Education

• Graduate Secondary Education in the School of Education
  Masters of Arts in Teaching in Science Education and Masters of Education in Mathematics Education are coordinated by the School of Education. Other education programs, such as agriculture education, family consumer sciences education, and physical education teacher education, offer masters programs to pursue program completion through their own departments.

International Studies (secondary major only)

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see Index, International Studies).

Undergraduate Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel, Merchandising, and Design - (select "Program Information")
See http://www.aeshm.hs.iastate.edu/majors/amd/#minor

Child, Adult, and Family Services - See http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#child-adult-and-family-services

Culinary Food Science - See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Dance - See http://www.kin.hs.iastate.edu/programs/dance/minor/

Educational Services in Family and Consumer Sciences - See http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#educational-services-in-family-and-consumer-sciences

Event Management - (select "Program Information") See http://www.aeshm.hs.iastate.edu/majors/event-management/#minor

Exercise Science - See http://www.kin.hs.iastate.edu/programs/minors/exercise-science/

Financial Counseling and Planning - See http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#financial-counseling-and-planning

Food and Society – See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Food Safety (interdepartmental minor) - See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Food Science - See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Gerontology (interdisciplinary minor) - See http://www.gerontology.iastate.edu/programs/ugrad-minor/

Health Promotion - See http://www.kin.hs.iastate.edu/programs/minors/health-promotion/

Hospitality Management - (select "Program Information") See http://www.aeshm.hs.iastate.edu/majors/hospitality-management/#minor

Learning and Leadership Sciences

Learning Technologies - See http://www.education.iastate.edu/undergraduate-studies/learning-technologies-minor/

Kinesiology - See http://www.kin.hs.iastate.edu/programs/minors/kinesiology/

Nutrition - See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Graduate Programs

The College of Human Sciences offers a variety of programs leading to a Master’s degree, a Ph.D., or a graduate certificate. Each unit offers a variety of program options, as well as opportunities for interdisciplinary study in the areas of gerontology, toxicology, nutritional studies, and
genetics. Multiple opportunities for on-campus and distance education programs are available.

**Preparation for Graduate Study**

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in business; government agencies; and public and private agencies and institutions; as well as for teaching, research, and extension positions in colleges and universities.

**Information for Prospective Students**

Graduate study in the College of Human Sciences is conducted through collaboration with the Graduate College, and application is completed through the Graduate College. Details regarding the application process and general information about graduate studies at ISU are found in the Graduate College section of this catalog. Details regarding the curricula and specific expectations for each program are found on department websites.

Each graduate student in the College of Human Sciences works closely with an academic advisor and a Program of Study (POSC) committee. The POSC assists students in developing academic programs tailored to meet individual needs, guide research and/or internship activities, and provide information and guidance about career choices. Graduate assistantship support is available for many students and involves them in research, teaching, and administrative experiences. Incoming students are encouraged to work with departmental advisors to develop appropriate class and assistantship activities.

**Graduate Curricula**

Information about curricula and degree options for each College of Human Sciences unit is available on the unit websites below.

- Apparel, Events, and Hospitality Management – http://www.aeshm.hs.iastate.edu/graduate-programs/
- Food Science & Human Nutrition – http://www.fshn.hs.iastate.edu/graduate-program/
- Human Development & Family Studies – http://www.hdfs.hs.iastate.edu/graduate/
- Kinesiology – http://www.kin.hs.iastate.edu/graduate/
- School of Education - http://www.education.iastate.edu/graduate-studies/

**Distance Education Opportunities**

The College of Human Sciences offers several online courses and programs. Degrees include PhD, Master’s, Undergraduate, and Certificates. Many courses incorporate a blended or hybrid approach, where online students interact with students on campus in real time using webinar services. Some degree programs are provided with a combination of online and condensed schedules that require limited time on campus. Details about these offerings are found on the website at http://www.online.hs.iastate.edu/graduate-programs/.

Of these programs, six Certificates, one Undergraduate, and four Masters programs are offered through collaboration with the Great Plains Interactive Distance Education Alliance (GP-IDEA; http://www.gpidea.org/). These online programs allow students to earn a graduate degree from ISU while taking courses and interacting with students from a number of participating universities. The CHS also offers a Masters of Family and Consumer Sciences-Comprehensive degree online where students have the flexibility to design a program of study the best meets their professional goals.

**Undergraduate Certificates**

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. At Iowa State University, an undergraduate certificate is awarded concurrently or after baccalaureate requirements are finished. The following undergraduate certificate is available in the College of Human Sciences:

Health Coach Certificate - see http://www.fshn.hs.iastate.edu/undergraduate-programs/health-coach-certificate

**Graduate Certificates**

Graduate certificates provide formal recognition of focused graduate study in an area of specialization that is less comprehensive than required for a master’s degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master’s or doctoral degree. The following graduate certificates are available in the College of Human Sciences:

Applied Research Methods in Human Sciences Certificate - see http://www.education.iastate.edu/graduate-studies/gradprograms/appliedresearch/

Community College Teaching Certificate - see http://www.education.iastate.edu/graduate-studies/gradprograms/ccteaching/

Development and Family Sciences Advanced Research Design and Methods - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/#developmental-and-family-sciences-advanced-research-design-and-methods
Apparel, Events, and Hospitality Management Department

The Apparel, Events, and Hospitality Management department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student’s major area of study whether it be Apparel, Merchandising, and Design; Event Management; Hospitality Management; agriculture, business, design education, engineering, liberal arts and sciences or minor areas of study including entrepreneurial studies, design studies, or international studies.

Apparel, Events, and Hospitality Management, otherwise known as AESHM, is composed of three majors:

- Apparel, Merchandising, and Design
- Event Management
- Hospitality Management

Through each of these three programs, students gain skills and knowledge to help them succeed in the real world. In addition to coursework, they complete an internship that closely relates to their career aspirations.

Graduates of these programs are the managers of your favorite resorts, the designers of your best jeans, and the coordinators of lavish events. From fine dining to fine apparel, our students, alumni, faculty, and staff have an eye for the original and a taste for quality.

Courses primarily for undergraduates:

**AESHM 112: Orientation for AESHM**
(1-0) Cr. 1. F.S.
Prereq: Concurrent enrollment with AESHM 113

Orientation policies and procedures of university and college. Guest speakers representing the university. Some online lectures.

**AESHM 113: Professional Development for AESHM**
(1-0) Cr. 1-2. F.

Career exploration, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components. Orientation to policies and procedures of college, department, and program.
AESHM 113E: Professional Development for AESHM: Event and Hospitality Management - Directions Learning Community

(2-0) Cr. 2. F.
Career exploration in Event Management and Hospitality Management, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components for first year students. Orientation to policies and procedures of College of Human Sciences; AESHM department; and Event Management and Hospitality Management programs. Field Trip.

AESHM 113N: Professional Development for AESHM: Common Threads Learning Community

(1-0) Cr. 1. F.
Career exploration in Apparel Merchandising and Design, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components for first year students. Orientation to policies and procedures of College of Human Sciences; and AESHM department and AMD programs.

AESHM 170: Supervised Work Experience I

Cr. 1. Repeatable, maximum of 2 times. F.S.S.S.
Prereq: Adviser permission required
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170D: Supervised Work Experience I: Hospitality

Cr. 1. Repeatable, maximum of 2 times. F.S.S.S.
Prereq: Adviser permission required
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170F: Supervised Work Experience I: Event Management

Cr. 1. Repeatable, maximum of 2 times. F.S.S.S.
Prereq: Adviser permission required
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170N: Supervised Work Experience I: Apparel

Cr. 1. Repeatable, maximum of 2 times. F.S.S.S.
Prereq: Adviser permission required, freshman classification
Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 175: Financial Applications for Retail and Hospitality Industries

(2-0) Cr. 2. S.
Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel and hospitality industries.

AESHM 175D: Financial Applications for Retail and Hospitality Industries: Hospitality Management

(2-0) Cr. 2. S.
Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the hospitality industries.

AESHM 175N: Financial Applications for Retail and Hospitality Industries: Retail Merchandising

(2-0) Cr. 2. S.
Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel industries.

AESHM 180: First Year Student Field Study

Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor
Study of and tours of regional areas of interest to A M D, HSP M, or EVENT majors. Trip to regional location under supervision of faculty member. Locations vary, 2- to 3-day trip. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 180E: First Year Student Field Study: Hospitality and Event Management

Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor
Study of and tours of regional areas of interest to majors in the HSP M and EVENT majors. Trip to regional location under supervision of faculty member. Locations vary, 2- to 3-day trip. Journal entries and final report/analysis are required. Cost associated with trip.
AESHM 180N: First Year Student Field Study: Apparel, Merchandising, and Design
Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor
Study of and tours of regional areas of interest to A M D majors. Trip to regional location under supervision of faculty member. Locations vary; 2- to 3-day trip. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 211: Leadership Experiences and Development (LEAD)
(3-0) Cr. 3. S.
Introduction to leadership behaviors. Development and utilization of leadership behaviors to positively impact school life, community life, and work life.

AESHM 213: Transitions: Pre-Professional Strategies and Career Explorations
(1-0) Cr. 1. F.S.
Prereq: Transfer student or change-of-major in A M D, EVENT, or HSP M majors
Fast track pre-professional development strategies, career exploration, and multi-dimensional academic and extracurricular planning for students in transition including transfer and change of majors.

AESHM 213E: Transitions: Pre-Professional Strategies and Career Explorations
(1-0) Cr. 1. F.S.
Prereq: Transfer student or change-of-major in EVENT or HSP M majors
Fast track pre-professional development strategies, career exploration, and multi-dimensional academic and extracurricular planning for students in transition including transfer and change of majors.

AESHM 213N: Transitions: Pre-Professional Strategies and Career Explorations
(1-0) Cr. 1. F.S.
Prereq: Transfer student or change of major in A M D major
Fast track pre-professional development strategies, career exploration, and multi-dimensional academic and extracurricular planning for students in transition including transfer and change of majors.

AESHM 222: Creativity on Demand
(3-0) Cr. 3. S.
Learn to use creativity strategies to solve everyday problems related to personal and professional lives. Application of creative thinking techniques to view things from different perspectives; identify unique opportunities; and generate and evaluate original ideas.

AESHM 238: Human Resource Management
(3-0) Cr. 3. F.S.
Prereq: A M D 275 or AESHM 270, or AESHM 287 or concurrent enrollment; sophomore classification
Principles and practices of human resource management relevant to human science-related organizations. Emphasis on the entry-level manager’s role.

AESHM 270: Supervised Work Experience II
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Adviser permission required; sophomore classification
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 270D: Supervised Work Experience II: Hospitality
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Adviser permission required; sophomore classification; 6 cr in AESHM or HSP M, credits in AESHM 170
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, AESHM 270, and 470 may be applied toward graduation.

AESHM 270F: Supervised Work Experience II: Event Management
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Adviser permission required; sophomore classification; 6 cr in AESHM, HSP M, or EVENT; employer location should be different than employer location used for AESHM 170 and 470.
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 270N: Supervised Work Experience II: Apparel
Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Minimum 2.0 GPA; Adviser permission required. Sophomore AMD classification
Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 272: Fashion Show Production and Promotion
(2-2) Cr. 1-3. Repeatable, maximum of 4 credits. F.S.
Prereq: Application and instructor permission, application form available from the AESHM Department office
Planning and production of fashion show including developing budgets, public relations, advertising, fund-raising, choreography, staging, lighting, and food. Promotion of fashion show and similar events. Maximum of 4 credits can be applied to graduation.
AESHM 280: Orientation to U.S. Field Study  
Cr. R. Repeatable, maximum of 2 times. F.S.  
Orientation to the field study location during the semester preceding the trip.

AESHM 281: Orientation to International Field Study  
Cr. 1. Repeatable, maximum of 2 times. F.S.  
Orientation to the field study location during the semester preceding the trip.

AESHM 287: Principles of Management in Human Sciences  
(3-0) Cr. 3. F.S.  
Introduction to management concepts and principles with application to human sciences-related businesses and organizations. Includes service quality management, professionalism, and social responsibility.

AESHM 311: Seminar on Careers and Internships  
(1-0) Cr. 1. F.S.  
Prereq: AESHM 113; Sophomore classification. Good academic standing  
Internship and career planning, professional expectations and responsibilities. Résumé development, cover letters, interviewing techniques, and business etiquette.

AESHM 311E: Seminar on Careers and Internships: Event Management and Hospitality Management  
(1-0) Cr. 1. F.S.  
Prereq: AESHM 113E; Sophomore classification.  
Internship and career planning, professional expectations and responsibilities. Résumé development, business letters/professional correspondence, interviewing techniques, and business etiquette.

AESHM 311N: Seminar on Careers and Internships: Apparel, Merchandising, and Design  
(1-0) Cr. 1. F.S.  
Prereq: AESHM 113N; Sophomore classification.  
Internship and career planning, professional expectations and responsibilities. Résumé development, cover letters, interviewing techniques, and business etiquette.

AESHM 340: Hospitality and Apparel Marketing Strategies  
(3-0) Cr. 3. F.S.  
Prereq: ECON 101  
Application of marketing principles to the hospitality-, events-, and apparel-related industries. Emphasis on the role of marketing in an organization's overall strategic planning. Development and evaluation techniques available to hospitality, events, apparel, and related businesses, including advertising, sales promotion, packaging, and public relations.

AESHM 342: Aesthetics of Consumer Experience  
(3-0) Cr. 3. F.S.  
Prereq: Sophomore classification  
Design principles, aesthetic concepts, and research applied to consumer experiences, with an emphasis on hospitality and retail environments and events. Influence of individual differences and cultural patterns on aesthetic preferences.  
Meets U.S. Diversity Requirement

AESHM 380: U.S. Field Study  
(Dual-listed with AESHM 580). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.  
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application  
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 380D: U.S. Field Study: Hospitality Management  
(Dual-listed with AESHM 580D). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.  
Prereq: 9 credits in AESHM or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application  
Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 380F: U.S. Field Study: Event Management  
(Dual-listed with AESHM 580F). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.  
Prereq: 9 credits in EVENT, AESHM, or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application  
Study and tours of areas of interest to majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 380N: U.S. Field Study: Apparel, Merchandising, and Design  
(Dual-listed with AESHM 580N). Cr. 1-3. Repeatable, maximum of 3 times. F.S.S.  
Prereq: 9 credits in A M D or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application  
Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.
AESHM 381: International Field Study  
(Dual-listed with AESHM 581). Cr. 1-3. Repeatable. F.S.SS.  
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application  
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.  
Meets International Perspectives Requirement.  

AESHM 381D: International Field Study: Hospitality Management  
(Dual-listed with AESHM 581D). Cr. 1-3. Repeatable. F.S.SS.  
Prereq: 9 credits in AESHM and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application  
Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.  
Meets International Perspectives Requirement.  

AESHM 381F: International Field Study: Event Management  
(Dual-listed with AESHM 581F). Cr. 1-3. Repeatable. F.S.SS.  
Prereq: 9 credits in AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application  
Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.  
Meets International Perspectives Requirement.  

AESHM 381N: International Field Study: Apparel, Merchandising, and Design  
(Dual-listed with AESHM 581N). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.  
Prereq: 9 credits in A M D and/or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application  
Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.  
Meets International Perspectives Requirement.  

AESHM 398: Cooperative Education  
Cr. R. Repeatable. F.S.SS.  
Prereq: Permission of adviser; junior classification  
Required of all cooperative education students seeking full-time status. Students register for this course prior to commencing each work period.  

AESHM 411: Seminar on Current Issues  
Cr. 1. F.S.  
Prereq: Permission of instructor.  
Trends, issues, research, and scholarship in apparel, events, and hospitality management.  

AESHM 411E: Seminar on Current Issues: Events and Hospitality  
Cr. 1. F.S.  
Prereq: senior classification in AESHM.  
Trends, issues, research, and scholarship in events and hospitality management.  

AESHM 411N: Seminar on Current Issues: Apparel  
(1-0) Cr. 1. Repeatable, maximum of 2 times. F.S.  
Prereq: AESHM 470N  
Trends, issues, research, and scholarship in apparel.  

AESHM 421: Developing Global Leadership: Maximizing Human Potential  
(3-0) Cr. 3. S.  
Development of leadership in a global environment. Focus on global concerns that impact on the well-being of individuals, families, and communities. Strategies for working with individuals, families and communities in other countries and cultures. Taking local action on global issues. Participation in a service activity.  
Meets International Perspectives Requirement.  

AESHM 470: Supervised Professional Internship  
Cr. 3-6. Repeatable. F.S.SS.  
Supervised work experience with a cooperating firm or organization.  

AESHM 470F: Supervised Professional Internship: Event Management  
Cr. 3-6. Repeatable. F.S.SS.  
Prereq: AESHM 311, EVENT 271; employer/location should be different than employer/location used for AESHM 170 and 270  
Supervised work experience with a cooperating firm or organization. No more than 12 credits from AESHM 170, 270, and 470 may be applied toward graduation.  

AESHM 470N: Supervised Professional Internship: Apparel  
Cr. 3-6. Repeatable. F.S.SS.  
Prereq: AESHM 311, 9 credits in A M D, and minimum 2.0 GPA; permission by application; junior or senior classification; employer/location should be different than employer/location for AESHM 170 and 270  
Supervised work experience with a cooperating firm or organization. No more than 12 credits from AESHM 170, 270, and 470 may be applied toward graduation.
AESHM 472: Fashion Show Management
(2-2) Cr. 2-3. Repeatable, maximum of 5 credits. F.S.
Prereq: Permission of instructor
Provide leadership and communicate direction for planning and production of fashion show, including developing budgets, publicity, advertising, fundraising, choreography, staging, lighting, and food. Maximum of 5 credits can be applied to graduation.

AESHM 474: Entrepreneurship in Human Sciences
(3-0) Cr. 3. F.S.
Prereq: A M D 275 or AESHM 287 or ACCT 284 or 3 cr in MKT or permission of instructor
Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 497: Cooperative Education
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of adviser; senior or graduate classification
Required of cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

AESHM 510: Quantitative Research Methods in Apparel and Hospitality
Cr. 3. Alt. S., offered odd-numbered years. Alt. SS., offered odd-numbered years.
Prereq: STAT 401 or equivalent; Graduate standing in the Department; Permission of instructor
Overview of quantitative research methods in apparel and hospitality fields. Topics include types of quantitative research design, sampling design, measurement, validity issues, power and precision analysis, methods of data gathering and analysis techniques, and interpretation of statistical results. Use of statistical packages. Development of research plan.

AESHM 511: Seminar
Cr. 1-3. Repeatable, maximum of 6 times.
Prereq: 6 graduate credits in A M D, AESHM, or HSP M. Permission of instructor
Discussion of scholarship and current issues. Topics vary.

AESHM 512: Qualitative Research Methods in Apparel, Events, and Hospitality
Cr. 3. Alt. SS., offered even-numbered years.
Prereq: Graduate status
Introduction to and hands-on experiences with a variety of qualitative research methods specific to apparel, events and hospitality research. Students will develop skills at research design, data, collection, analysis, and write-up for qualitative inquiry.

AESHM 570: Practicum
Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 570A: Apparel Merchandising and Design
Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 570B: Hospitality Management
Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 574: Entrepreneurship in Human Sciences
(3-0) Cr. 3. F.S.
Prereq: A M D 275 or AESHM 287 or ACCT 284 or 3 cr in MKT or permission of instructor
Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 580: U.S. Field Study
(Dual-listed with AESHM 380). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.
AESHM 580D: U.S. Field Study: Hospitality Management
(Dual-listed with AESHM 380D). Cr. 1-3. Repeatable, maximum of 3 times.
F.S.S.S.
Prereq: 9 credits in AESHM or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580F: U.S. Field Study: Event Management
(Dual-listed with AESHM 380F). Cr. 1-3. Repeatable, maximum of 3 times.
F.S.S.S.
Prereq: 9 credits in EVENT, AESHM, or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580N: U.S. Field Study: Apparel, Merchandising, and Design
(Dual-listed with AESHM 380N). Cr. 1-3. Repeatable, maximum of 3 times.
F.S.S.S.
Prereq: 9 credits in A M D or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 581: International Field Study
(Dual-listed with AESHM 381). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 581D: International Field Study: Hospitality Management
(Dual-listed with AESHM 381D). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in AESHM and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 581F: International Field Study: Event Management
(Dual-listed with AESHM 381F). Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 9 credits in AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

AESHM 581N: International Field Study: Apparel, Merchandising, and Design
(Dual-listed with AESHM 381N). Cr. 1-3. Repeatable, maximum of 3 times.
F.S.S.S.
Prereq: 9 credits in A M D and/or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application
Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.
Meets International Perspectives Requirement.

Courses for graduate students:

AESHM 611: Seminar
Cr. 1-3. Repeatable.
Prereq: 6 graduate credits in AESHM, A M D, or HSP M. Permission of instructor
Scholarship and current issues. Topics vary.

AESHM 670: Teaching Practicum
Cr. 1-3. Repeatable. F.S.S.S.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.
AESHM 670A: Teaching Practicum: Apparel Merchandising and Design
Cr. 1-3. Repeatable. F.S.S.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

AESHM 670B: Teaching Practicum: Hospitality Management
Cr. 1-3. Repeatable. F.S.S.
Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

Apparel, Merchandising, and Design
Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in A M D at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level). The major in apparel, merchandising, and design provides a broad-based program of study with flexibility in creating program options. Courses are required in general education, and apparel industry professional core. To complete the program, a student selects a primary option from design, product development/sourcing and merchandising. Merchandising and product development require selection of an additional secondary option.

Minors are available in apparel, merchandising, and design; textile science and product performance; a textile design minor in collaboration with the College of Design; and a merchandising certificate.

Undergraduate Study
The program offers study for the degree of Bachelor of Science with a major in apparel, merchandising, and design (A M D). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, source and present textile and apparel products to meet the needs of consumers. Students understand the issues involved in textile and apparel production and marketing, both nationally and internationally. Graduates appreciate the interdependence of nations and cultures as producers and consumers of textile products.

The A M D major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, A M D core classes, and structured clusters of courses to form an option in merchandising, product development/sourcing, or design. The combinations of primary options, secondary areas of concentration, and electives allow students to individualize their programs.

An option in merchandising prepares students for the planning, development, and presentation of market-oriented product lines and events. Career opportunities are in product development, sourcing, buying, promotion, and management in both manufacturing and retailing sectors with a focus on the textile and apparel industry. An option in creative and technical design is appropriate for those interested in the aesthetic and creative aspects of design, product or line development, promotion of textiles and apparel, technical design, apparel engineering, product development, sourcing, and quality assurance. An option in product development/sourcing is appropriate for those interested in both designing and merchandising products or lines for consumer groups, sourcing and manufacturing. Instead of a portfolio review for admission, students in the design and product development options have a review of their first year design skills (A M D 206 Design Selective Advancement) after completing A M D 121 Apparel Assembly, A M D 131 Overview of the Fashion Industry, A M D 178 Introduction to Fashion Design Studio, and A M D 204 Textile Science. The A M D 206 Design Selective Advancement project is scored by design industry professionals and determines if/when students move forward into the Design option.

The program offers a concurrent B.S. and M.S. degree that allows students to obtain a B.S. and M.S. degree in apparel, merchandising, and design in 5 years. Application for admission to the Graduate College should be made in the junior year.

For additional courses of interest, see Apparel, Events, and Hospitality Management.

Grade Point Requirement
All students majoring in apparel, merchandising, and design are required to earn a C- or better in all AESHM and A M D courses applied toward the degree, including transfer credits.

Communication Proficiency Requirement
Undergraduate English proficiency is certified when the student has received a grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Students who receive a C-, D+, D, or D- in ENGL 150 Critical Thinking and Communication or ENGL 250 Written, Oral, Visual, and Electronic
Composition may take one of the following, with permission from the English Department, instead of repeating the lower-level course:

ENGL 302 Business Communication 3
ENGL 309 Proposal and Report Writing 3
ENGL 314 Technical Communication 3

Minor

A minor in apparel, merchandising, and design requires (15-17 cr) of the following:

Select from:

<table>
<thead>
<tr>

Apparel, Merchandising, and Design, B.S. -- product development sourcing product innovation primary option
Graduate Study

The program offers work for the concurrent Bachelor of Science and Master of Science; Master of Science (thesis and non-thesis options; on-campus and hybrid); and Doctor of Philosophy (on-campus and distance hybrid) with a major in apparel, merchandising, and design. For all programs the field of study is highly interdisciplinary; programs of study are tailored to students' background and interests. The program offers a concurrent B.S. and M.S. degree that allows students to obtain both the B.S. and M.S. degrees in apparel, merchandising, and design in 5 years. Application for admission to the Graduate College should be submitted in fall semester of the junior year.

Graduates understand how textiles and apparel are essential in meeting individual and societal needs and understand the interdependence of nations and cultures as producers and consumers. Graduates understand diverse philosophies of scholarship and apply multiple methods to creative activity, research, and teaching. Strong writing and oral communication skills help graduates disseminate scholarship and compete successfully for awards and grants.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Master's and doctoral graduates have experience working in team-oriented and interactive environments. Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice. They bring a strong sense of ethics to research, teaching, and business endeavors.

Program emphases for graduate study include creative design and functional design; product development; consumer behavior; entrepreneurship; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultures; U.S. dress and textiles from the 19th into the 21st centuries; textiles and sustainability.

Courses primarily for undergraduates:

**A M D 120: Apparel Construction Techniques**
(3-0) Cr. 3. SS.
Assemble components and completed garments with the use of basic sewing equipment. Learn basic construction techniques, applications and vocabulary. Students will need access to a home sewing machine, iron, computer and the internet. Not available for credit for A M D majors.

**A M D 121: Apparel Assembly Processes**
(1-4) Cr. 3. F.S.
Prereq: A M D 204 concurrent recommended
Principles of garment assembly. Use of mass production equipment and methods to analyze, develop and assemble garments.

**A M D 131: Fashion Products and Markets**
(3-0) Cr. 3. F.

**A M D 165: Dress, Appearance, and Diversity in Society**
(3-0) Cr. 3. F.S.
Examination of diversity among consumers and introduction to forecasting trends in dress. Introduction to social justice issues. Meets U.S. Diversity Requirement

**A M D 178: Introduction to Apparel Design Studio**
(1-4) Cr. 3. F.S.
Introduction to the elements and principles of design in fashion and apparel including skill development in fashion illustration, technical drawing, and fabric rendering using traditional media. Application of written and verbal presentations to communicate fashion and apparel design concepts and terminology. Fashion presentation and introduction to portfolio development.

**A M D 204: Textile Science**
(3-2) Cr. 4. F.S.
Textile fibers, yarns, fabrication, coloration, and finishes. Quality and performance application to textile products. Lab work included.

**A M D 205: Design Selective Advancement**
Cr. R. Repeatable, maximum of 2 times. F.S.
Prereq: Completion or enrollment in A M D 121, A M D 131, A M D 178, and A M D 204 and enrollment in major
Project review and skill assessment related to 2-dimensional and 3-dimensional visualization, apparel assembly, basic product knowledge, design problem solving, illustration, textiles. Offered on a satisfactory-fail basis only.

**A M D 210: Computer Applications in Digital Design and Management**
(2-2) Cr. 3. F.S.
Prereq: A M D 245 or concurrent; AESHM 113N
Applications of skills in Photoshop, Illustrator, InDesign, Google Sketchup, Excel, and website development. Introduction to digital product design and line development. Focus on elements and principles of design. Introduction to digital portfolio development for design and merchandising. In-class demonstrations and online lectures.
A M D 225: Patternmaking I: Drafting and Flat Pattern
(1-4) Cr. 3. F.S.
Application of patternmaking tools and their functions, measurement
techniques, pattern labeling, and patternmaking communication
documents. Sloper drafting and flat pattern manipulation methods for
women's apparel. Design and construction of original garments using
drafted slopers and flat pattern manipulation methods to enable the
analysis of fit.

A M D 231: Product Development and Manufacturing
(3-2) Cr. 4. F.S.
Prereq: A M D 204
Analysis of apparel product development, sourcing, and manufacturing
processes. Focus on materials and specifications relative to quality,
performance, cost, and price. Applications of software for PLM.

A M D 245: Aesthetics and Brand Image
(3-0) Cr. 3. F.S.
Prereq: A M D 131, A M D 165, A M D 204 or concurrent
Elements and principles of design. Analysis of sensory, expressive,
and symbolic aspects that build brand image, with a focus on fashion
products and promotional settings.

A M D 257: Museum Studies
(3-0) Cr. 3. F.
Prereq: Sophomore standing
Overview of museums including history, functions, and philosophy.
Collection and curatorial practices. Funding and governance issues.
Hands-on object research and exhibit development. Required field trip.

A M D 275: Retail Merchandising
(3-0) Cr. 3. F.S.
Prereq: 3 credits in Math
Principles of merchandising as applied to retail-, service-, events-, and
hospitality-related businesses. Study of the planning, development, and
presentation of apparel- and hospitality-related products, services, and
experiences. Industry and market research, planning of new offerings,
and development of promotional and competitive strategies for various
retail formats.

A M D 278: Fashion Illustration
(0-6) Cr. 3. F.S.
Prereq: A M D 178, A M D 210 or concurrent enrollment, A M D 245 or
concurrent enrollment. Permission of instructor.
Development of fashion plates and focused apparel lines/collections.
Proficiency in drawing the fashion figure, technical drawings/flats, and
apparel using a variety of media. Continuation of fashion presentation
and portfolio development.

A M D 290: Independent Study
Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Freshmen or Sophomore Classification; Permission of instructor,
adviser, and department chair.
Independent study on topics of special interest to the student, facilitated
by approved faculty member. Total number of A M D 290 and A M D 490
credits applied to graduation cannot exceed 9 credits.

A M D 305: Quality Assurance of Textiles and Apparel
(Dual-listed with A M D 505). (2-2) Cr. 3. F.
Prereq: A M D 231, one course in natural science (chemistry with lab
preferred); STAT 101, STAT 226, or STAT 401
Principles of product and materials evaluation and quality assurance.
Developing specifications and using standard practices for evaluating
materials, product characteristics, performance, and quality.

A M D 310: Computer Aided Apparel Patternmaking
(0-6) Cr. 3. F.S.
Prereq: A M D 210, A M D 225; Permission of instructor.
Computer-aided patternmaking technology used in pattern drafting,
grading, marker making, and 3-D virtual prototyping.

A M D 321: Computer Integrated Textile and Fashion Design
(0-6) Cr. 3. F.S.
Prereq: A M D 210, A M D 278 or concurrent enrollment. Permission of
instructor
Analysis and advanced use of computer-aided design software for textile
and fashion design for various target markets. Digital presentation and
portfolio development.

A M D 325: Patternmaking II: Draping
(0-6) Cr. 3. F.S.
Prereq: A M D 206, A M D 225; permission of instructor.
Principles of patternmaking through basic draping techniques on industry
standard body forms. Apparel design through analysis of fit and design;
problem solving and interaction of fabric characteristics with style
features.

A M D 328: Design Seminar
(Dual-listed with A M D 528). Cr. arr. Repeatable. F.S.SS.
Prereq: Vary with topic.
Focus on artisanal textile, apparel, or surface and structural design
techniques. Design processes for specialty fabrics and markets. Topics
vary by term.
A M D 329: Digital Textile Printing for Apparel Design  
(2-2) Cr. 3. F.S.  
*Prereq: A M D 321; A M D 325 or concurrent*  
Overview of the use of digital printing in the textile and apparel industry, color matching, repeat print patterns, engineered prints, and creation of apparel prototypes.

A M D 354: History of European and North American Dress  
(3-0) Cr. 3. F.  
*Prereq: 3 credits from Hist or Art H*  
Survey of history of dress from ancient times up to the American Civil War; focus on European and North American dress. Emphasis on connection of dress to the social, cultural, environmental, and technological contexts of the Western world. Meets International Perspectives Requirement.

A M D 356: History of Twentieth Century Fashion  
(3-0) Cr. 3. S.  
*Prereq: A M D 165 or 3 credits in anthropology, psychology, or sociology.*  
Survey of major design and technological developments from the American Civil War through the 20th Century. Emphasis on fashion as a system of design and production, culture of consumption, fashion change, and trends in art, society, and culture.

A M D 362: Cultural Perspectives of Dress  
(3-0) Cr. 3. S.  
*Prereq: A M D 165 or 3 credits in anthropology, psychology, or sociology.*  
Analysis of multiple factors related to dress in selected societies, including technology, cultural identity, aesthetics, social organization, ritual, stability and change. Applications to fair trade and social responsibility. Meets International Perspectives Requirement.

A M D 372: Sourcing and Global Issues  
(3-0) Cr. 3. F.S.  
*Prereq: A M D 231, A M D 275; ECON 101 or ECON 102 recommended*  
Evaluation of key issues facing textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability. Meets International Perspectives Requirement.

A M D 376: Merchandise Planning and Buying  
(3-2) Cr. 4. F.S.  
*Prereq: A M D 275; COM S 113; 3 credits from ACCT 284, MATH 104, MATH 105, MATH 140, MATH 150, or equivalent.*  
Calculations and computer application in the planning and control of merchandise. Emphasis on retail math as it pertains to assortment planning, the six-month buying plan process, and other buying concepts and strategies. Online modules.

A M D 377: Visual Presentation and Promotions  
(3-0) Cr. 3. F.S.  
*Prereq: A M D 245 or AESHM 342; AESHM 340 or MKT 340*  
Principles of visual aspects of brand development and management; emphasis on branding, visual merchandising, design/layout of retail spaces. Includes applications such as visual communication and documentation using Adobe Creative Suite(R), hands-on display projects, and brand case studies.

A M D 393: Apparel, Merchandising, and Design Workshop  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.  
*Prereq: A M D Junior or Senior Classification and Permission of Instructor.*  
Intensive 2 to 8 week workshop exploration. Topics vary each time offered. Maximum of 6 credits applied to graduation.

A M D 404: Advanced Textile Science  
(Dual-listed with A M D 504). (2-2) Cr. 3. S.  
*Prereq: A M D 204, CHEM 163 and CHEM 163L or equivalent*  

A M D 415: Technical Design Processes  
(2-2) Cr. 3. F.  
*Prereq: A M D 225; A M D 231*  
Garment development and analysis of fit, performance, quality, cost. Exploration of alternative materials, construction methods, grading; specifications and portfolio development.

A M D 426: Creative Design Processes  
(1-4) Cr. 3. S.  
*Prereq: A M D 206, A M D 321, A M D 325 or concurrent*  
Exploration of the creative process and sources of inspiration with emphasis on wearable art; experimentation of advanced design problem solving, alternative materials, fabric manipulation, and pattern-making techniques.

A M D 431: Apparel Production Management  
(3-0) Cr. 3. S.  
*Prereq: A M D 231; A M D 121 recommended; A M D 372 or concurrent.*  
Procedures and experiences related to application and use of process controls: method analysis, work measurement, costing, pricing, and production planning. Resource management, technology applications, and quality assurance.
A M D 457: Textile Conservation and Collection Management
(Dual-listed with A M D 557). (3-0) Cr. 3. Alt. F., offered irregularly.Alt. S.,
offered irregularly.
Prereq: A M D 204
Condition assessment, repair, and stabilization of textiles and apparel in
museum collections. Dry and aqueous cleaning. Examination of storage
and exhibition techniques, materials, and conditions. Experience with
cataloging and management practices.

A M D 458: Queer Fashions, Styles, and Bodies
(Dual-listed with A M D 558). (3-0) Cr. 3. S.
Prereq: A M D 165; or 3 credits in Women's and Gender Studies or Sociology;
or permission of instructor
This course focuses on analyzing the dressed and undressed body of
individuals in the queer community in various cultural contexts with
a focus on material culture. We will disentangle concepts related to
gender and sexuality and the changing definitions and representations of
individuals who identify in the queer community focusing on appearance,
fashion, and the body. Historic and current representations of fashion,
styles, and appearances will be analyzed and discussed. Attention will
be paid to how sexuality and gender intersect with and/or shape other
identities including race, ability, body size, and class. We will examine the
complex structures, systems, and ideologies that uphold discrimination
and unequal distribution of power and resources as related to the course
material. Attention will mostly be given to North American perspectives.
We will use material culture to explore how objects related to fashioning
the body reveal stories about the owners and consumers.

A M D 467: Consumer Studies in Apparel and Fashion Products
(3-0) Cr. 3. F.
Prereq: A M D 165; AESHM 340 or MKT 340; STAT 101 or STAT 104 or STAT
226;
Application of concepts and theories from the social sciences to the
study of consumer behavior related to dress, textile and apparel products,
and retail experiences. Experience in conducting consumer research.

A M D 475: Retail Information Analysis
(2-2) Cr. 3. F.S.
Prereq: A M D 376
Evaluation of information needed to make effective retail decisions.
Use of technology in analyzing and interpreting retail systems data.
Application of concepts related to forecasting, consumer demand,
assortment planning, market research, data mining, database interface,
pattern recognition, supply-chain/logistics management, retail
technology applications.

A M D 477: Omni-Channel Retailing
(3-0) Cr. 3. S.
Prereq: 3 credits in marketing or A M D 275 or AESHM 287
A customer-centric view of marketing with a focus on the retailer-
customer relationship and omni-channel strategies. Analysis and
evaluation of integrated retail applications and strategies using
digital media, including store formats, e-commerce, catalog, mobile,
crowdsourcing, and social media.

A M D 490: Independent Study
Cr. arr. Repeatable. F.S.S.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and
department chair
Independent Study. Maximum of 9 credits of both A M D 290 and A M D
490 can be applied toward graduation.

A M D 490A: Independent Study: Textile Science
Cr. arr. Repeatable. F.S.S.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and
department chair

A M D 490B: Independent Study: Historical, Cultural, and Museum
Studies of Dress and Textiles
Cr. arr. Repeatable. F.S.S.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and
department chair

A M D 490C: Independent Study: Textile and Apparel Design
Cr. arr. Repeatable. F.S.S.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and
department chair

A M D 490E: Independent Study: Merchandising, Aesthetics, and
Entrepreneurship
Cr. arr. Repeatable. F.S.S.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and
department chair

A M D 490F: Independent Study: Sociological, Psychological, and
Consumer Behavioral Aspects of Dress
Cr. arr. Repeatable. F.S.S.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and
department chair

A M D 490H: Independent Study: Honors
Cr. arr. Repeatable. F.S.S.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and
department chair
Cr. arr. Repeatable. F.S.SS.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair

A M D 490R: Independent Study: Professional Practice
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair.

A M D 490S: Independent Study: Production and Quality Assurance
Cr. arr. Repeatable. F.S.SS.
Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair.

A M D 490W: Independent Study: Fashion Show, Fashion Public Relations and Marketing
Cr. arr. Repeatable. F.S.SS.
Prereq: Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair.

A M D 495: Senior Design Studio
(Dual-listed with A M D 595). (0-6) Cr. 3. F.
Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition.

A M D 496: Fashion Product Development and Prototyping
(3-0) Cr. 3. S.
Prereq: A M D 231, A M D 245, A M D 275
Applying consumer, aesthetic, and quantitative trend information to develop value-added fashion products and product lines with merchandising/promotion campaigns for diverse target markets. Multi-function team projects. Development of a prototype and presentation to industry representatives.

A M D 499: Undergraduate Research
Cr. 1-3. Repeatable. F.S.SS.
Prereq: Senior classification, 15 credits in A M D. Permission of instructor, adviser, and department chair
Research experience in textiles and clothing with application to a selected problem.

Courses primarily for graduate students, open to qualified undergraduates:

A M D 504: Advanced Textile Science
(Dual-listed with A M D 404). (2-2) Cr. 3. S.
Prereq: A M D 204, CHEM 163 and CHEM 163L or equivalent

A M D 505: Quality Assurance of Textiles and Apparel
(Dual-listed with A M D 305). (2-2) Cr. 3. F.
Prereq: A M D 231, one course in natural science (chemistry with lab preferred); STAT 101, STAT 226, or STAT 401

A M D 510: Foundation of Scholarship in Apparel, Merchandising, and Design
(3-0) Cr. 3. F.
Prereq: Graduate classification or permission of instructor
Overview of scholarship in apparel, merchandising, and design with emphasis on current and future directions. Fundamentals of writing literature reviews. Examination of ethical issues in scholarship and academic life. Introduction to creativity, sustainability, and entrepreneurship. Development of teaching units.

A M D 521: Digital Technologies in Textile and Apparel Design
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Research Methods course. Permission of instructor.
Digital technologies in textile and apparel design. Theories and practices of mass customization and personalization, digital textile printing, 3D body scanning, creating avatars from body scans, and fitting digital apparel designs.

A M D 525: Experimental Patternmaking
Cr. 3. Alt. F., offered even-numbered years.
Prereq: AMD 121 or equivalent, AMD 225 or equivalent, AMD 510 or taking concurrently, permission of instructor
Research, analyze, and apply experimental patternmaking techniques to original garments suitable for entry into a juried competition/exhibitions. Compare, contrast, and organize a framework of research patternmaking principles through content analysis or other appropriate research techniques. Documentation of learning and design process.

A M D 528: Design Seminar
(Dual-listed with A M D 328). Cr. arr. Repeatable. F.S.SS.
Prereq: Vary with topic.
Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term.
A M D 545: Consumer Aesthetics and Retail Branding
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: One course in design elements and principles, psychology, consumer behavior, or marketing
Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, environmental psychology, and marketing literature.

A M D 554: Dress History Research Methods
Cr. 3. Alt. S., offered odd-numbered years.
Using a variety of sources and methods of analysis, students will develop their ability to read and interpret primary and secondary sources and to understand the methodology underpinnings and process of constructing dress history.

A M D 557: Textile Conservation and Collection Management
(Dual-listed with A M D 457). (3-0) Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.
Prereq: A M D 204
Condition assessment, repair, and stabilization of textiles and apparel in museum collections. Dry and aqueous cleaning. Examination of storage and exhibition techniques, materials, and conditions. Experience with cataloging and management practices.

A M D 558: Queer Fashions, Styles, and Bodies
(Dual-listed with A M D 458). (3-0) Cr. 3. S.
Prereq: A M D 165; or 3 credits in Women's and Gender Studies or Sociology; or permission of instructor
This course focuses on analyzing the dressed and undressed body of individuals in the queer community in various cultural contexts with a focus on material culture. We will disentangle concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer community focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention will be paid to how sexuality and gender intersect with and/or shape other identities including race, ability, body size, and class. We will examine the complex structures, systems, and ideologies that uphold discrimination and unequal distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal stories about the owners and consumers.

A M D 565: Sustainability: Theory and Practical Application
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: 3 credits in research methods; basic knowledge of apparel industry and product development; permission of instructor.
Overview of current sustainability theory, research, and methodology. Emphasis on the evaluation and discussion of current sustainability literature and sustainable practice of apparel, textiles, and related products and services through people, processes, and the environment. Development and presentation of original scholarly and creative design work under various sustainability frameworks.

A M D 567: Consumer Behavior and Apparel
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A M D 467 or MKT 447; STAT 401
Application of concepts and theories from the social sciences to the study of consumer behavior. Experience in conducting research; manuscript writing.

A M D 572: Sourcing and Global Issues
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A course in merchandising, marketing, or economics

A M D 576: Industry Applications in Merchandising and Management
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A M D 376 or equivalent; A M D 275 or equivalent; or permission of instructor
Using the case study method, students apply merchandising theory, principles, and practices to industry scenarios. Emphasis on problem solving, creative thinking, data analysis, and data interpretation involved in business operations. Focus on the development of leadership skills while functioning in small and large groups.

A M D 577: E-Commerce for Apparel and Hospitality Companies
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: Course in marketing or permission of instructor
Analysis of technology and consumer trends, industry practices, and marketing strategies for e-commerce including big data, data mining, and social media. Evaluation and development of apparel or hospitality company websites. Theory application to the development of multi-channel business strategies.
A M D 590: Special Topics
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590A: Special Topics: Textile Science
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590B: Special Topics: Historical, Cultural, and Museum Studies of Dress and Textiles
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590C: Special Topics: Textile and Apparel Design
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590E: Special Topics: Merchandising, Aesthetics, and Entrepreneurship
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590F: Special Topics: Sociological, Psychological, and Consumer Behavioral Aspects of Dress
Cr. arr. Repeatable.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

Cr. arr. Repeatable. F.S.S.S.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590S: Special Topics: Production and Quality Assurance
Cr. arr. Repeatable. F.S.S.S.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590W: Special Topics: Fashion Show, Fashion Public Relations and Marketing
Cr. arr. Repeatable. F.S.S.S.
Prereq: Permission of director of graduate education, adviser, and instructor(s)
Individually designed A M D-related projects that reflect the special interests of the student.

A M D 595: Senior Design Studio
(Dual-listed with A M D 495). (0-6) Cr. 3. F.
Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition.

A M D 599: Creative Component
Cr. arr. Repeatable.
Prereq: 9 graduate credits in A M D

Courses for graduate students:

A M D 611: Seminar
Cr. 1-3. Repeatable.
Prereq: 6 graduate credits in A M D. Permission of instructor
Discussion of scholarship and current issues. Topics vary.

A M D 625: Design Theory and Process
(2-4) Cr. 4. Alt. S., offered odd-numbered years.
Prereq: Permission of instructor.
Analysis and application of design theory and creative processes, including strategies for solving aesthetic, functional, and/or technology-focused design problems. Creation and dissemination of design scholarship.
A M D 665: Social Science Theories of Appearance
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 6 credits in sociology or psychology
Analysis of social science theories and concepts applicable to appearance research. Emphasis on qualitative research and philosophy of knowledge, including postmodern, symbolic interaction, semiotic, and feminist theories. Collection and analysis of qualitative data.

A M D 676: Merchandising Theory and Research Applications
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A M D 275 or equivalent; statistics course recommended.
Review of current merchandising theory, research, and methodology. Emphasis on the evaluation and discussion of current and seminal merchandising literature, understanding research processes, interpretation of findings, assessing implications of research for future directions in merchandising, and the development and presentation of original scholarly work.

A M D 690: Advanced Topics
Cr. arr. Repeatable.
Prereq: Enrollment in doctoral program, permission of instructor; and approval of D.O.G.E

A M D 699: Research
Cr. arr. Repeatable.

Athletics
Administered by the Department of Kinesiology.

Courses primarily for undergraduates:

ATH 101: Intercollegiate Athletics
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101B: Intercollegiate Athletics: Basketball (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101C: Intercollegiate Athletics: Basketball (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101D: Intercollegiate Athletics: Cross Country (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101E: Intercollegiate Athletics: Cross Country (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101F: Intercollegiate Athletics: Football (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101G: Intercollegiate Athletics: Golf (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101H: Intercollegiate Athletics: Gymnastics (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.
ATH 101K: Intercollegiate Athletics: Softball (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101M: Intercollegiate Athletics: Swimming/Diving (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101O: Intercollegiate Athletics: Tennis (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101P: Intercollegiate Athletics: Track and Field (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101Q: Intercollegiate Athletics: Track and Field (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101R: Intercollegiate Athletics: Volleyball (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101S: Intercollegiate Athletics: Wrestling (men)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101T: Intercollegiate Athletics: Golf (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101U: Intercollegiate Athletics: Soccer (women)
Cr. 1. Repeatable, maximum of 4 credits. F.S.
Prereq: Permission of head coach
Limited to 1 credit per year to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

Athletic Training

This major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). The program is CAATE accredited and students are prepared for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found at http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements.

Iowa State University’s Athletic Training Program is transitioning to a Professional Master’s degree program. The last cohort of undergraduate athletic training students will be admitted into the bachelor’s degree program in spring 2018. Pending approval of curriculum committees and Board of Regents, we anticipate offering a 3+2 athletic training program with the first cohort of Master of Science students starting summer session 2020. Pre-Athletic Training students will continue to have an undergraduate curriculum in the Department of Kinesiology. For more information, please contact the program director, Dr. Mary Meier, at mary@iastate.edu.

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery,
learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals
The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.
3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

Undergraduate Study
The Department of Kinesiology offers two Bachelor of Science degrees: Athletic Training and Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the component courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Athletic Training
Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination. Most states have licensure requirements to practice athletic training. The Athletic Training education program at Iowa State University, accredited since 2001, includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation. The Athletic Training Program utilizes a competitive admission process for undergraduate students.

Curriculum in Athletic Training
This major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). The program is CAATE accredited and students are prepared for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources.

19 18-19
Students must complete a 3-credit course in US Diversity and a 3-credit course in International Perspectives. Check ISU homepage for list of approved courses. You must complete a minimum of 46 credits in 300/400 level courses and a total of 124 credits for graduation.

Four year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. This is a SAMPLE plan - use the degree audit as "official" documentation of progress towards your degree.

Courses primarily for undergraduates:

A TR 218: Orientation to Athletic Training Clinical Experience
(0-2) Cr. 0.5. Repeatable, maximum of 1 credits. F.S.
Pre-athletic training clinical experience designed to orientate students to the athletic training profession prior to enrolling in athletic training course sequence. Students will observe athletic trainers in various athletic training clinical sites. Open to pre-athletic training students only. Offered on a satisfactory-fail basis only.

A TR 219: Clinical Practicum in Athletic Training
(0-2) Cr. 1. F.
Athletic training clinical experiences designed to review human anatomical structures including origin, insertion, action, innervations of muscles. Students will gain experience with palpation of these structures to help identify location of anatomical landmarks. Students will also gain experience identifying bones, ligaments, and tendons. Open to athletic training students only.

A TR 220: Basic Athletic Training
(1-2) Cr. 2.
Prereq: BIOL 155 or BIOL 255 and BIOL 256
Introduction to methods of prevention and immediate care of athletic injuries. Basic information concerning health supervision of athletes, and some basic wrapping and strapping techniques for common injuries. Non A TR majors only.

A TR 221: Pre-Athletic Training Clinical Practicum
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in A TR 222
Athletic training clinical observation experiences to accompany A TR 222. Utilize knowledge to evaluate, analyze and demonstrate appropriate taping, wrapping and basic skill techniques. Open to students interested in the athletic training option. Offered on a satisfactory-fail basis only.

A TR 222: Basic Athletic Training for Athletic Trainers
(2-2) Cr. 3. F.
Prereq: BIOL 255, BIOL 255L
Provides pre-athletic training students with the knowledge of the profession of a certified athletic trainer, factors associated with injury prevention, treatment, emergency care of athletic injuries, protective equipment, basic organization, administrative, and legal concepts in the athletic training setting. To be taken concurrently with A TR 221.

A TR 223: Clinical Practicum in Athletic Training
(0-3) Cr. 1. F.
Prereq: Permission of Athletic Training Program Director
Athletic training clinical experiences for athletic training students during pre-season intercollegiate football. Clinical experiences include: Professional Rescuer CPR, AED certification, emergency splinting and spineboarding, medical record keeping and HIPPA regulations, environmental conditions, prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, mouthpiece formation, and anatomy review. Offered on a satisfactory-fail basis only.

A TR 224: Evaluation of Athletic Injuries I
(2-3) Cr. 3. F.
Prereq: Permission of athletic training program director
Sport injury assessment procedures and evaluation techniques for lower body injuries. Includes an overview of mechanisms of injury, general musculoskeletal disorders, and spine or neurological dysfunction. Designed for students in the athletic training major.

A TR 225: Athletic Injuries I Clinical Practicum
(0-3) Cr. 1. F.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 224. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.
A TR 226: Evaluation of Athletic Injuries II
(2-3) Cr. 3. S.
Prereq: Permission of athletic training program director
Sport injury assessment procedures and evaluation techniques for lower body injuries. Includes an overview of common illnesses of athletes and sport specific injuries. Designed for students in the athletic training major.

A TR 227: Athletic Injuries II Clinical Practicum
(0-3) Cr. 1. S.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 226. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 240: Introduction to Taping, Equipment, and Bracing Techniques
(0-3) Cr. 1. F.
Prereq: Permission of athletic training program director
Basic information and laboratory instruction regarding basic taping techniques, athletic equipment fitting procedures, and the use and proper fitting of prophylactic braces. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 323: Therapeutic Modalities for Athletic Trainers
(2-2) Cr. 3. F.
Prereq: Permission of athletic training program director
Theory and technique of therapeutic modalities used in the management of injuries.

A TR 324: Therapeutic Modalities Clinical Practicum
(0-3) Cr. 1. F.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 323. Open to students in athletic training major. Offered on a satisfactory-fail basis only.

A TR 326: Rehabilitation of Athletic Injuries
(2-2) Cr. 3. S.
Prereq: Permission of athletic training program director
Theory and practical application of rehabilitation principles used in the management of athletic injuries.

A TR 327: Rehabilitation of Athletic Injuries Clinical Practicum
(0-3) Cr. 1. S.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 326. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 425: Organization and Administration of Athletic Training
(3-0) Cr. 3. F.
Prereq: Permission of athletic training program director; senior classification
Current administrative, professional, and legal issues pertaining to athletic training. Job search techniques and strategies including preparation of materials for athletic training students.

A TR 450: Medical Concerns for the Athletic Trainer
(3-0) Cr. 3. F.
Prereq: Permission of athletic training program director
Current medical issues and concerns, including pathology of illness and injury, dermatological conditions, exposure to allied health care professionals, and pharmacological indications in relation to the profession of athletic training and in patient/athlete care.

A TR 488: Evidence Based Practice in Athletic Training
Cr. 2. F.S.
Prereq: Permission of athletic training program director
Clinical experiences in application of athletic training techniques under the supervision of certified athletic trainers. Introduction and utilization of evidence-based practice methodology via online instruction and integration of evidence-based practice into the clinical experience.

A TR 489: Review of Athletic Training Competencies and Clinical Proficiencies
Cr. 1. F.S.
Prereq: Senior classification, permission of athletic training program director
Preparation for professional endorsement and certification by review of required competencies and clinical proficiencies. Required for endorsement or approval to sit for Board of Certification Exam. Offered on a satisfactory-fail basis only.

Courses primarily for undergraduates:

DANCE 120: Modern Dance I
(0-3) Cr. 1. F.S.
Introduction and practice of basic dance concepts, including preparatory techniques and guided creativity problems. No previous modern dance experience required. Offered on a satisfactory-fail basis only.

DANCE 130: Ballet I
(0-3) Cr. 1. F.S.
Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment. No previous ballet experience required. Offered on a satisfactory-fail basis only.

DANCE 140: Jazz I
(0-3) Cr. 1. F.S.
Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Offered on a satisfactory-fail basis only.
DANCE 150: Tap Dance I  
(0-3) Cr. 1. F.  
Instruction and practice in basic tap technique and terminology. No previous tap experience required. Offered on a satisfactory-fail basis only.

DANCE 160: Ballroom Dance I  
(0-2) Cr. 1. F.S.  
Instruction and practice in foxtrot, waltz, swing, cha cha, rhumba, tango, and selected contemporary dances. Offered on a satisfactory-fail basis only.

DANCE 199: Dance Continuum  
Cr. 0.5-2. Repeatable, maximum of 6 credits. S.  
Prereq: Permission of instructor  
Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Offered on a satisfactory-fail basis only.

DANCE 211: Fundamentals and Methods of Social and World Dance  
(1-3) Cr. 1. S.  
Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for kinesiology and health majors, open to others.

DANCE 220: Modern Dance Composition  
(1-3) Cr. 2. F.  
Prereq: DANCE 120 or previous modern dance experience  
Theory and practice of the creative skills involved in solo and small group composition.

DANCE 222: Modern Dance II  
(0-3) Cr. 1. F.  
Prereq: DANCE 120 or previous modern dance experience  
Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations.

DANCE 223: Modern Dance III  
(0-3) Cr. 1. S.  
Prereq: DANCE 222  
Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles.

DANCE 224: Concert and Theatre Dance  
(Cross-listed with THTRE). (0-3) Cr. 0.5-2. Repeatable, maximum of 6 credits. F.S.  
Prereq: By audition only  
Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Offered on a satisfactory-fail basis only.

DANCE 232: Ballet II  
(0-3) Cr. 1. S.  
Prereq: Previous ballet experience  
Technical skills in the classical movement vocabulary. Emphasis on alignment, techniques, sequence development, and performing quality.

DANCE 233: Ballet III  
(0-3) Cr. 1. F.  
Prereq: DANCE 232  
Concentration on technical proficiency at the intermediate level. Pointe work and partnering opportunities available.

DANCE 242: Jazz II  
(0-3) Cr. 1. S.  
Prereq: Previous jazz dance experience  
Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation.

DANCE 250: Yoga Movement  
(0-2) Cr. 1. Repeatable. F.S.  
Mixed-level Hatha Yoga class that emphasizes iyengar style yoga. Yoga Movement is designed for developing awareness and personal practice with yoga poses and relaxation techniques. Attention will be paid to postural alignment to safely develop strength, endurance, flexibility, balance, and reduce stress. The practice develops awareness and consciousness in the physical body to help unite body and mind. Class will include introduction to other somatic practices, asanas (poses), breathing practices, meditation, yoga philosophy and deep relaxation.

DANCE 270: Dance Appreciation  
(3-0) Cr. 3. F.S.  
Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.  
Meets International Perspectives Requirement.

DANCE 320: Sound and Movement  
(2-2) Cr. 3. S.  
Prereq: DANCE 220  
Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods.

DANCE 360: History and Philosophy of Dance  
(3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: DANCE 270  
Study of the history of dance from early to modern times with emphasis on the theories and philosophies of contemporary modern dance, dancers, and dance educators.
DANCE 370: Advanced Studies in Dance
Cr. 1-3. Repeatable, maximum of 8 credits. F.S.
Prereq: 2 credits in dance
Advance registration required. Designed to meet special interests and talents of students to include both group and independent study in various aspects of dance as a performing art including production, choreography, and performance.

DANCE 384: Teaching Children's Dance
(1-3) Cr. 2. S.
Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children in expressive movement experiences.

DANCE 385: Methods of Teaching Dance
(1-3) Cr. 2. F.
Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance.

DANCE 386: Teaching Dance Technique and Composition
(1-3) Cr. 2.
Prereq: DANCE 320
Teaching yoga, body therapies, mindfulness and dance composition to enhance the physical and mental performance of the individual.

DANCE 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance.

DANCE 490A: Independent Study: Dance
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance.

DANCE 490H: Independent Study in Dance - Honors
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance for those admitted to the honors program.

Courses primarily for undergraduates:

H S 110: Personal and Consumer Health
(3-0) Cr. 3. F.S.
Physical, mental, emotional and social aspects of health as a basis for understanding and promoting health, and preventing poor health conditions. Study of personal responsibility on the long-term benefits of maintaining a high level of wellness and health. Identification and mitigation of negative lifestyle habits.

H S 215: Drug Education
(3-0) Cr. 3. F.S.
Prereq: PSYCH 101 or PSYCH 230
Discussion of use, abuse and addiction of mood modifying substances in contemporary society. Includes study of tobacco, alcohol, and other drugs.

H S 275: Health Education in the Elementary School
(3-0) Cr. 3. F.S.
Prereq: HD FS 102 or HD FS 226
The application of instructional strategies related to health education and physical education for teachers at the elementary level. Credit for both H S 275 and 375 may not be applied toward graduation.

H S 285: Pre-Internship in Kinesiology and Health
(Cross-listed with KIN). Cr. 1-2. F.S.
Prereq: Kinesiology and Health major and permission of internship coordinator.
Pre-internship experience with a health organization based on option. Offered on a satisfactory-fail basis only.

H S 290: Independent Study
Cr. 1. Repeatable, maximum of 3 credits. F.S.
Prereq: 2nd semester freshmen, sophomores and permission from instructor.
Study under supervision of faculty.

H S 305: Instructor's First Aid and Cardio-pulmonary Resuscitation
(1-2) Cr. 2. F.S.
Prereq: H S 105
Discussion and practice of skills needed to teach first aid and cardiopulmonary resuscitation. ARC certification available.

H S 310: Community and Public Health
(3-0) Cr. 3. F.S.
Prereq: H S 110
Introduction to community health problems, programs of prevention, environmental health agencies, and health services. Study of local, state, and national community health agencies, their purposes and functions.
H S 350: Human Diseases
(3-0) Cr. 3. F.S.SS.
Prereq: H S 110 and BIOL 255, BIOL 256
Discussion of disease process and ill-health in the twentieth century. Emphasis on epidemiology, prevention, treatment, and the understanding of the etiology of communicable and noncommunicable diseases.

H S 375: Teaching-Learning Process in Health Education
(3-0) Cr. 3. F.
Prereq: H S 105, H S 110, H S 215
Principles, methods, materials, and resources involved in the teaching of health. Includes organization and development of the health education curriculum (K-12). Credit for both H S 275 and 375 may not be applied toward graduation.

H S 380: Worksite Health Promotion
(3-0) Cr. 3. F.S.
Prereq: KIN 258, KIN 366
The design and implementation of worksite health promotion programs and the benefits these programs have for both employees and employers. Review of various health risk appraisals and planning theory-based incentive programs designed to promote positive lifestyles.

H S 385: Preparation and Search Strategies for Kinesiology and Health Internships
(Cross-listed with KIN). Cr. 0.5. F.S.
Prereq: Junior classification; to be taken minimum of two semesters prior to required internship.
Preparation of relevant material for a successful internship/career search. Specific internship timeline, process, procedures will be reviewed.

H S 417: Supervised Teaching in Health Education in the Secondary School
Cr. 16. F.S.
Prereq: H S 375
Advance registration required.

H S 417A: Supervised Teaching in Health Education in the Secondary School: Initial Endorsement
Cr. 16. F.S.
Prereq: H S 375
Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering.

H S 417B: Supervised Teaching in Health Education in the Secondary School: Additional Endorsement
Cr. arr. F.S.
Prereq: H S 375
Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering.

H S 430: Community Health Program Development
(3-0) Cr. 3. F.
Techniques of needs assessment, program design, administration, and evaluation of community health education programs in various settings.

H S 464: Physical Activity Epidemiology
(Dual-listed with H S 564). (3-0) Cr. 3. F.S.
Prereq: KIN 358 or H S 350; STAT 101 or STAT 587.
Understanding health benefits of physical activity on chronic disease prevention and health promotion throughout the life span, from clinical and public health perspectives. Discussion and application of real-life physical activity assessment, research, guidelines, and promotion in population levels.

H S 485: Internship in Health Studies
Cr. 8-16.
Prereq: Senior classification and advanced registration.
Advance registration required. Supervised experience in health related agencies. Offered on a satisfactory-fail basis only.

H S 485A: Internship in Health Studies: Community and Public Health
Cr. 8-16. F.S.SS.
Prereq: All required courses and C- or better in HS 310 and HS 430.
Kinesiology and Health majors only. Cumulative GPA 2.0.
Observation and practice in selected community and public health agencies. Offered on a satisfactory-fail basis only.

H S 485B: Internship in Health Studies: Physical Activity and Health Promotion
Cr. 8-16. F.S.SS.
Prereq: All required courses and C- or better in KIN 485 and KIN 467.
Kinesiology and Health majors only. Cumulative GPA 2.0.
Observation and practice in selected physical activity and health promotion agencies. Offered on a satisfactory-fail basis only.

H S 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits in health studies and permission of coordinator
Courses primarily for graduate students, open to qualified undergraduates:

H S 564: Physical Activity Epidemiology
(Dual-listed with H S 464). (3-0) Cr. 3. F.S.
Prereq: KIN 358 or H S 350; STAT 101 or STAT 587.
Understanding health benefits of physical activity on chronic disease prevention and health promotion throughout the life span, from clinical and public health perspectives. Discussion and application of real-life physical activity assessment, research, guidelines, and promotion in population levels.
Courses primarily for undergraduates:

**KIN 101: Swimming I**  
(0-3) Cr. 1. F.S.SS.  
Basic course for nonswimmers. Emphasis on two fundamental strokes and personal water safety skills. Offered on a satisfactory-fail basis only.

**KIN 102: Swimming II**  
(0-3) Cr. 1. F.S.  
Prereq: KIN 101 or equivalent skill  
Intermediate course. Emphasis on learning and improving five basic strokes and personal water safety skills. Offered on a satisfactory-fail basis only.

**KIN 108: Aquatic Fitness**  
(0-3) Cr. 1. F.S.  
Prereq: KIN 102 or equivalent skill  
Water related exercises, activities, and swimming workouts to improve physical fitness. Offered on a satisfactory-fail basis only.

**KIN 122: Badminton**  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental badminton skills and strategic game play. Offered on a satisfactory-fail basis only.

**KIN 129: Bowling**  
(0-2) Cr. 1. F.S.SS.  
Introduction to bowling skills and strategic game play. Offered on a satisfactory-fail basis only.

**KIN 135: Golf**  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental golf skills and strategic game play. Offered on a satisfactory-fail basis only.

**KIN 144: Racquetball**  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental racquetball skills and strategic game play. Offered on a satisfactory-fail basis only.

**KIN 153: Ice Skating**  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental ice skating skills and strategic game play. Offered on a satisfactory-fail basis only.

**KIN 158: Tennis**  
(0-2) Cr. 1. F.S.SS.  
Introduction to basic skills (forehand, backhand, service) and basic knowledge of game play. Offered on a satisfactory-fail basis only.

**KIN 163: Physical Fitness**  
(0-3) Cr. 1. F.S.SS.  
Evaluation of fitness status. Exercises, activities, and programs to improve physical fitness. Improve physical fitness and weight control. Offered on a satisfactory-fail basis only. Credit for only KIN 163 or 258 may be applied toward graduation.

**KIN 164: Walking for Fitness**  
(0-3) Cr. 1. F.S.SS.  
Fitness walking as an activity to improve health and fitness; values of this type of activity as a lifetime endeavor with knowledge and usage of pedometers. Offered on a satisfactory-fail basis only.

**KIN 165: Running for Fitness**  
(0-2) Cr. 1. F.S.SS.  
Running as a physical activity to improve physical fitness and health. Promotion of this activity as a lifetime endeavor. Offered on a satisfactory-fail basis only.

**KIN 166: Weight Training**  
(0-3) Cr. 1. F.S.SS.  
Introduction to fundamental skills of weight training and strategic game play. Offered on a satisfactory-fail basis only.

**KIN 168: Judo**  
(0-2) Cr. 1. F.S.  
Fundamentals of self defense, focusing on throwing with the hands, hips and feet as well as applying pins, chokes and arm-bars. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self control, & indomitable spirit. Emphasis on learning a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

**KIN 170: Taekwondo/Karate I**  
(0-2) Cr. 1. F.S.  
Teaches fundamentals of self-defense, focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.
KIN 171: Tae Kwon Do/Karate II
(0-2) Cr. 1. F.S.
Teaches advanced application of self-defense focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 173: Hap Ki Do/Martial Self-Defense
(0-2) Cr. 1. F.S.
Teaches fundamentals of self-defense focusing on joint locks, pressure points and throwing techniques to escape from an attacker. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 182: Volleyball
(0-2) Cr. 1. F.S.SS.
Introduction to fundamental volleyball skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 185: Soccer
(0-2) Cr. 1. F.S.SS.
Introduction to fundamental soccer skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 210: Concepts of Fitness and Wellness
(2-0) Cr. 2. F.S.
Coverage of behavioral skills needed to adopt and maintain lifestyles conducive to fitness and wellness. Provides students with knowledge and skills needed to adopt and maintain healthy lifestyles. Includes self-assessments and content on physical activity, nutrition, weight control, stress management and other lifestyle behaviors related to health. For non-kinesiology majors.

KIN 214: Building Comprehensive School Physical Activity Programs
Cr. 1. Repeatable, maximum of 2 credits. S.
Prereq: Freshman Classification
Service learning with practical experience in school research focused on promoting physical activity and wellness in youth. Offered on a satisfactory-fail basis only.

KIN 231: Fundamentals of Tumbling and Gymnastics
(0-3) Cr. 1. F.
Prereq: Eligibility for admission to KIN teacher education program

KIN 232: Fundamentals of Team Sports
(0-3) Cr. 1. F.
Prereq: Eligibility for admission to KIN teacher education program
Fundamentals of indoor and outdoor team sports, for example basketball, volleyball, flag football, and soccer. Skill enhancement, analysis, understanding practice and the development of progressions.

KIN 236: Fundamentals of Individual Sports and Fitness
(0-3) Cr. 1. S.
Prereq: Eligibility for admission to KIN teacher education program
Fundamentals of individual sports and fitness, for example disc golf, bowling, badminton, and weight training. Skill enhancement, analysis, understanding practice and the development of progressions.

KIN 242: Planning for Success in a Health Career
Cr. 0.5. F.S.
Prereq: KIN H major in PHP option with sophomore status or above.
Exploration of various health fields to clarify career goals and prepare a parallel career plan outside of medicine. Facilitate preparation of relevant materials for professional and graduate school admission. Offered on a satisfactory-fail basis only.

KIN 252: Disciplines and Professions in Kinesiology and Health
(1-0) Cr. 1. F.S.
Overview of the various disciplines and professions that comprise the field of Kinesiology (the study of human movement) and help students determine the career option that best fits their interests.

KIN 253: Orientation and Learning Community in Kinesiology and Health
(1-0) Cr. 1. F.S.
Prereq: Concurrent enrollment or credit in KIN 252
Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only.
KIN 258: Principles of Physical Fitness and Conditioning  
(1-3) Cr. 2. F.S.  
Introduction to five components of fitness: cardiorespiratory, muscular strength, muscular endurance, flexibility, and body composition. Students will be introduced to basic exercise prescription and evaluation principles, develop skills to assess each component of fitness, and learn different exercise modalities to enhance each component. Credit for only one of the following courses may be applied toward graduation: KIN 163, 258.

KIN 259: Leadership Techniques for Fitness Programs  
(2-2) Cr. 3. F.S.  
Prereq: KIN 258  
Development of exercise leadership skills for a variety of activities. Includes planning, promotion, and teaching techniques for developing fitness in others using a variety of exercise modalities including group fitness and weight training. Kinesiology and health majors only.

KIN 266: Advanced Strength Training and Conditioning  
(1-2) Cr. 2. F.S.  
Prereq: KIN 258  
This course is designed to enhance the student's current level of knowledge and expertise to an advanced level in the area of strength training and conditioning. The course will prepare students interested in taking the National Strength and Conditioning Association Certified and Conditioning Specialist's exam. The course will focus on the assessment and implementation of training programs with strong emphasis on the areas of resistance training, metabolic training, flexibility, reaction time, speed, and agility. Kinesiology and health majors only and permission of instructor needed.

KIN 280: Directed Field Experience in Elementary Physical Education  
(0-3) Cr. 1. F.S.  
Observing, planning, and facilitating movement experiences of children in an elementary school setting. Offered on a satisfactory-fail basis only.

KIN 281: Directed Field Experience in Secondary Physical Education  
(0-3) Cr. 1. F.S.  
Prereq: Admission to Educator Preparation Program  
Observing, planning, and facilitating movement experiences of students in a middle and/or high school setting. Offered on a satisfactory-fail basis only.

KIN 282: Field Experience with Educational Outreach  
(0-2) Cr. 1. F.S.  
Prereq: Admission to Educator Preparation Program  
Planning and facilitating physical education experiences for children in a community outreach setting. Experiences take place on campus. Offered on a satisfactory-fail basis only.

KIN 284: Elementary and Pre-school Movement Education  
(2-3) Cr. 3. F.S.  
Prereq: 3 credits in human development and family studies  
Approaches to teaching movement skills, health-related fitness and school-based physical activities (in the classroom, in PE, during recess) to pre-school and elementary school age children are covered. Emphasis is placed on planning and conducting developmentally appropriate movement experiences for preschool and elementary aged children throughout the school day based upon educational psychology, exercise psychology and motor development research. Practical experience is provided. Credit in only one of the following courses may be applied toward graduation: KIN 284, 312.

KIN 285: Pre-Internship in Kinesiology and Health  
(Cross-listed with H S). Cr. 1-2. F.S.  
Prereq: Kinesiology and Health major and permission of internship coordinator  
Pre-internship experience with a health organization based on option. Offered on a satisfactory-fail basis only.

KIN 290: Independent Study  
Cr. 1. Repeatable, maximum of 3 credits. F.S.  
Prereq: 2nd semester freshmen, sophomores and permission from instructor  
Study under supervision of faculty.

KIN 312: Movement Education in Elementary School Physical Education  
(2-2) Cr. 3. F.  
Prereq: Admission to Educator Preparation Program, KIN 280  
Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Credit for only one of KIN 284 or KIN 312 may be applied toward graduation.

KIN 313: Teaching Secondary Physical Education  
(2-3) Cr. 3. S.  
Prereq: Admission to Educator Preparation Program, KIN 281  
Current theory, practice and research on teaching focusing on management, instructional, and learning styles of students in secondary schools.

KIN 315: Coaching Theory and Administrative Issues  
(3-0) Cr. 3. F.S.SS.  
Study in the theory, ethics, strategy, and mechanics of coaching various interscholastic and/or intercollegiate sports. Emphasis on formulating a philosophy, identifying goals and psychological aspects, teaching skills, and developing strategies.
KIN 345: Management of Health-Fitness Programs and Facilities
(3-0) Cr. 3. F.S.
Application of management concepts to the fitness industry, e.g., understanding customers, marketing, program management, financial management, legal issues, and evaluation and planning.

KIN 355: Biomechanics
(3-0) Cr. 3. F.S.S.
Prereq: PHYS 111 or PHYS 115
Mechanical basis of human performance; application of mechanical principles to exercise, sport and other physical activities.

KIN 358: Physiology of Exercise
(3-0) Cr. 3. F.S.S.
Prereq: BIOL 255, BIOL 255L, BIOL 256 and BIOL 256L
Physiological basis of human performance; effects of physical activity on body functions.

KIN 359: Exercise Physiology Lab
(0-2) Cr. 1.
Prereq: Concurrent enrollment in KIN 358
Learning lab techniques in Exercise Physiology and engaging in the experimental process.

KIN 360: Sociology of Physical Activity and Health
(3-0) Cr. 3. F.S.
Prereq: SOC 134
Provide an overview of sociology to enhance students understanding of societal forces influencing behavior; Provide insights about people, environments, organization and policies that impact Kinesiology professionals.

KIN 363: Basic Electrocardiography
(2-0) Cr. 2. Alt. F., offered even-numbered years.
Understanding of human electrocardiography, including normal and abnormal 12-lead ECGs and arrhythmia identification.

KIN 365: Sport Psychology
(3-0) Cr. 3. F.S.
Prereq: PSYCH 101 or PSYCH 230

KIN 366: Exercise Psychology
(3-0) Cr. 3. F.S.S.
Prereq: PSYCH 101 or PSYCH 230

KIN 372: Motor Control and Learning Across the Lifespan
(3-0) Cr. 3. F.S.S.
Prereq: PSYCH 101 or PSYCH 230, BIOL 255, BIOL 256
Introduction to major concepts of neuromotor control, behavioral motor control and motor learning in the child, adult and older adult, with emphasis on the adult system.

KIN 385: Preparation and Search Strategies for Kinesiology and Health Internships
(Cross-listed with H S). Cr. 0.5. F.S.
Prereq: Junior classification; to be taken minimum of two semesters prior to required internship.
Preparation of relevant material for a successful internship/career search. Specific internship timeline, process, procedures will be reviewed.

KIN 391: Service Learning Leadership Experience
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Applied service learning experiences designed to provide students with opportunities to apply classroom knowledge to real world applications. Students will gain professional skills and programming experience while supporting health, education and wellness programming in school, work site or community settings. Offered on a satisfactory-fail basis only.

KIN 395: Adapted Physical Education
(Dual-listed with KIN 595). (2-2) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280/281
Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. KIN 595 may not be taken by students who previously earned credit in KIN 395.

KIN 399: Recreational Sport Management
(3-0) Cr. 3. F.
Prereq: SOC 134
The role of sport in developing fitness, recreational opportunities, and tourism, with special emphasis on issues related to youth sport, volunteerism, and the marketing of sport events and facilities.
KIN 417: Supervised Teaching in Physical Education in the Secondary School
Cr. arr. F.S.
Prereq: KIN 281, KIN 282, KIN 313, KIN 355, KIN 395, KIN 471, KIN 475; admission to Teacher Education; approval before enrolling in the course.
Supervised teaching in the secondary schools.

KIN 418: Supervised Teaching in Physical Education in the Elementary School
Cr. 8. F.S.
Prereq: KIN 280, KIN 282, KIN 312, KIN 355, KIN 395, KIN 471, KIN 475.
Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering.
Supervised teaching in the elementary schools.

KIN 445: Legal Aspects of Sport
(3-0) Cr. 3. S.
Students will understand legal concepts and terminology relevant to sport/activity, identify strategies for limiting liability in sport/fitness programs, and identify solutions for elimination of discriminatory practices in sport and physical activity.

KIN 455: Research Topics in Biomechanics
(3-0) Cr. 3.
Prereq: KIN 355 or permission of instructor
Examination of biomechanics and kinesiology research literature to evaluate the application of mechanical principles and analyses to human movement in exercise, sport, physical activity, and activities of daily living and to assess research outcomes and their implications for motor performance, movement energetic, musculoskeletal loading, and injury.

KIN 458: Principles of Fitness Assessment and Exercise Prescription
(3-2) Cr. 4. F.S.
Prereq: KIN 258, KIN 358
Principles of cardiac risk factor identification and modification; risk classification of potential exercise clients; fitness assessments; developing comprehensive exercise prescriptions for individuals.

KIN 459: Internship in Exercise Leadership
(0-3) Cr. 1. F.S.
Prereq: C- or better in KIN 259, CPR certification, concurrent enrollment in KIN 458
Observation and practice of exercise leadership techniques in an on-campus adult fitness program.

KIN 462: Medical Aspects of Exercise
(3-0) Cr. 3. F.S.
Prereq: KIN 358
The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions. Environmental and nutritional aspects of exercise.

KIN 467: Exercise and Health: Behavior Change
(Dual-listed with KIN 567). (3-0) Cr. 3. F.S.
Prereq: Introductory course with emphasis on exercise psychology (i.e., KIN 366 or equivalent)
Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations.

KIN 471: Measurement in Physical Education
(Dual-listed with KIN 571). (3-0) Cr. 3. S.
Prereq: Admission to Educator Preparation Program, KIN 280 and KIN 281
Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. KIN 571 may not be taken by students who previously earned credit in KIN 471.

KIN 472: Neural Basis of Human Movement
(Dual-listed with KIN 572). (3-0) Cr. 3. S.
Prereq: KIN 372 or PSYCH 310
Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.

KIN 473: Physical Dimensions of Aging
Cr. 3. F.
Prereq: KIN 355 or KIN 358 or KIN 372
Understanding the physiological, behavioral, and cognitive changes associated with aging with focus on the effects of physical activity on the aging human system. Discussions of what it means to become older, what a person can expect during the aging process, and what kind of control a person has over the aging process.
KIN 475: Physical Education Curriculum Design and Program Organization
(Dual-listed with KIN 575). (3-0) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280 and 281
Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.

KIN 480: Functional Anatomy
(3-0) Cr. 3. F.S.
Prereq: KIN 355; BIOL 155 or BIOL 255 and BIOL 256
The structure and function of human muscular, skeletal and nervous systems. The relationship of these systems to efficient and safe human motion.

KIN 481: Biomechanics Lab
(0-2) Cr. 1.
Prereq: KIN 355
Learning lab techniques in Biomechanics and engaging in the experimental process.

KIN 483: Exercise Psychology Lab
(0-2) Cr. 1.
Prereq: KIN 366
Learning lab techniques in Exercise Psychology and engaging in the experimental process.

KIN 484: Assessment and Control of Locomotion
(0-2) Cr. 1.
Prereq: KIN 372
Learning lab techniques in Motor Control and engaging in the experimental process.

KIN 485: Internship in Kinesiology
Cr. 8-16.
Prereq: Senior classification and advance registration.
Observation and practice in exercise/fitness agencies. Offered on a satisfactory-fail basis only.

KIN 485A: Internship in Exercise Science
Cr. 8-16.
Prereq: Prereq: All required courses and C- or better in KIN 458, KIN 459 and KIN 462, Kinesiology and Health majors only. Cumulative GPA 2.0.
Observation and practice in selected exercise science agencies. Offered on a satisfactory-fail basis only.

KIN 485G: Internship in Kinesiology: General
Cr. 8-16.
Prereq: Senior classification and advance registration.
Observation and practice in exercise/fitness agencies. Offered on a satisfactory-fail basis only.

KIN 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits from KIN advanced core and permission of coordinator
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 490A: Independent Study: Exercise and Sport Science
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits from KIN advanced core and permission of coordinator
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 490H: Independent Study: Honors
Cr. 1-2. Repeatable, maximum of 4 credits.
Prereq: 6 credits from KIN advanced core and permission of coordinator
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 494: Practicum in Motivational Interviewing for Health
Cr. 1-2. Repeatable, maximum of 6 credits. F.S.
Prereq: Junior/Senior status and permission of instructor
This supervised practicum course is designed for students interested in learning how to conduct ‘motivational interviewing’ for behavior change and health coaching applications. Students will learn strategies of motivational interviewing and have opportunities to practice applying these skills with adult clients. Offered on a satisfactory-fail basis only.

KIN 494A: Practicum in Motivational Interviewing for Health: Principles of Motivational Interviewing
Cr. 1. F.S.SS.
Prereq: Junior/Senior status and permission of instructor
Introduction to the principles of ‘motivational interviewing’ for behavior change and health coaching applications. Students interested in gaining practical experience in health coaching should enroll in the associated practicum course (KIN 494B). Offered on a satisfactory-fail basis only.

KIN 494B: Practicum in Motivational Interviewing for Health: Supervised Experience
Cr. 1-2. Repeatable, maximum of 5 credits. F.S.
Prereq: KIN 494A Permission of Instructor
This supervised practicum course is designed for students interested in gaining experience in applying ‘motivational interviewing’ strategies in behavior change and health coaching applications. Students will have opportunities to practice motivational interviewing skills with adult clients and receive on-going support and assistance needed to refine their skills. Offered on a satisfactory-fail basis only.
KIN 495: Special Topics in Kinesiology
Cr. 1-3.
Prereq: Junior or Senior classification
Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

KIN 501: Research Methods in Physical Activity
(3-0) Cr. 3. Repeatable.
Prereq: Graduate classification in kinesiology and health
Methods and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

KIN 505: Research Laboratory Techniques in Exercise Physiology
(0-4) Cr. 2.
Prereq: KIN 358 or equivalent course with basic laboratory experience
Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

KIN 510: Advanced Medical Aspects of Exercise
(2-0) Cr. 2.
Prereq: KIN 358
The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

KIN 511: Physical Activity Strategies for Youth
Cr. 3.
Provide adequate opportunities to develop a more in-depth understanding of (a) the challenges in youth physical activity (PA), (b) the relevant theoretical models that are popular in youth PA, (c) the strategies that can be implemented to promote PA in youth.

KIN 512: Movement Education in Elementary School Physical Education
(2-2) Cr. 3. F.
Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Emphasis on evaluating published research on physical education and school-wide physical activity.

KIN 515: Injury Biomechanics
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: KIN 355 or permission of instructor.
Utilization of biomechanical principles to model injury mechanisms. Introduction to tissue mechanics of bone, articular cartilage, ligament, tendon, muscle, and nerve. Biomechanics of lower extremity, upper extremity, and head/neck/trunk injuries.

KIN 516: Quantitative Analysis of Human Movement
(3-1) Cr. 3.
Prereq: KIN 355
Application of the principles of mechanics to the analysis of human motion. Investigation of the effects of kinematics and kinetics on the human body with special emphasis on exercise and sport applications. Includes consideration of two-dimensional and three-dimensional imaging techniques and force measurements.

KIN 517: Musculoskeletal Modeling
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: KIN 355 or permission from instructor
Systematic problem-solving approaches and design of computer programs for biomechanical analyses. Estimation of anthropometric parameters and mechanical properties of muscles, bones, and joints. Integration of anthropometrics, kinematics, EMG, and muscle mechanics into simulations of human movement.

KIN 518: Student Teaching in Elementary Physical Education
(0-8) Cr. 8. F.S.
Prereq: KIN 512, KIN 570, KIN 575
Student teaching for 8 weeks in an elementary school.

KIN 519: Student Teaching in Secondary Physical Education
(0-8) Cr. 8. F.S.
Prereq: KIN 512, KIN 570, KIN 575
Student teaching for 8 weeks in a middle or high school.

KIN 520: The Social Analysis of Sport
(3-0) Cr. 3.
Prereq: KIN 360; open to majors only or by permission of instructor
Sociological analysis of sport with emphasis on sociological theory, sports structure, and function in modern industrialized society; the systems of sport in regard to their role structure, formal organization, and professionalization and its differentiation along social class, age, and sex.

KIN 521: Advanced Topics in Exercise and Sport Psychology
(3-0) Cr. 3.
Prereq: KIN 365 or KIN 366, 3 courses in psychology; open to majors only or by permission of instructor
Aspects of psychology which form a basis for understanding and explaining behavior in the context of exercise and sport. Emphasis on evaluating published research, particularly theory and research methodology. Student presentations.
KIN 549: Advanced Vertebrate Physiology I
(Cross-listed with AN S, NUTRS). (4-0) Cr. 4. F.
Prereq: recommended: an undergraduate physiology course and a biochemistry course
Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

KIN 550: Advanced Physiology of Exercise I
(2-3) Cr. 3.
Prereq: KIN 505
Concepts and methods of assessing neurological, muscular, cardiovascular, and respiratory adjustments to exercise.

KIN 551: Advanced Physiology of Exercise II
(2-3) Cr. 3.
Prereq: KIN 505
Analysis of factors affecting work capacity and performance. Human energy metabolism concepts and measurement.

KIN 552: Advanced Vertebrate Physiology II
(Cross-listed with AN S, NUTRS). (3-0) Cr. 3. S.
Prereq: BIOL 335; credit or enrollment in BBMB 404 or BBMB 420
Cardiovascular, renal, respiratory, and digestive physiology.

KIN 558: Physical Fitness - Principles, Programs and Evaluation
(2-3) Cr. 3.
Prereq: KIN 358
Physiological principles of physical fitness, design and administration of fitness programs; testing, evaluation, and prescription; electrocardiogram interpretation.

KIN 560: Principles of Motor Control and Learning
(2-3) Cr. 3.
Prereq: KIN 372
Theoretical perspectives of motor control and learning will be examined as well as factors that facilitate motor learning. Motor control and learning will also be addressed by studying functional tasks such as reach and grasp, posture and locomotor, handwriting, catching and/or speech.

KIN 561: Motor Development and Physical Activity
(2-0) Cr. 2-3.
Prereq: PSYCH 230
Addresses theories and underlying mechanisms of motor development and motor control applied to typically and atypically developing children. Developmental control of balance, locomotion, reach-to-grasp, and other functional skills will be discussed, as will the role of physical activity in a child’s life.

KIN 567: Exercise and Health: Behavior Change
(Dual-listed with KIN 467). (3-0) Cr. 3. F.S.
Prereq: Introductory course with emphasis on exercise psychology (i.e., KIN 366 or equivalent)
Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations.

KIN 570: Physical Activity Assessment for Health Related Research
(2-2) Cr. 3.
This course will cover the broad scope of research in physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques since accurate measures are needed to more accurately assess the health benefits from physical activity and to evaluate the effectiveness of behavioral interventions designed to promote physical activity.

KIN 571: Measurement in Physical Education
(Dual-listed with KIN 471). (3-0) Cr. 3. S.
Prereq: Admission to Educator Preparation Program, KIN 280 and KIN 281
Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. KIN 571 may not be taken by students who previously earned credit in KIN 471.

KIN 572: Neural Basis of Human Movement
(Dual-listed with KIN 472). (3-0) Cr. 3. S.
Prereq: KIN 372 or PSYCH 310
Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.

KIN 575: Physical Education Curriculum Design and Program Organization
(Dual-listed with KIN 475). (3-0) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280 and 281
Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.
KIN 590: Special Topics  
Cr. 1-3. Repeatable.

KIN 590A: Special Topics: Physical Education  
Cr. 1-3. Repeatable.

KIN 590B: Special Topics: Health and Exercise Promotion  
Cr. 1-3. Repeatable.

KIN 590D: Special Topics: Exercise Physiology  
Cr. 1-3. Repeatable.

KIN 590E: Special Topics: Sport Sociology  
Cr. 1-3. Repeatable.

KIN 590F: Special Topics: Sport/Exercise Psychology  
Cr. 1-3. Repeatable.

KIN 590G: Special Topics: Motor Behavior  
Cr. 1-3. Repeatable.

KIN 590H: Special Topics: Biomechanics  
Cr. 1-3. Repeatable.

KIN 590I: Special Topics: Research Ethics  
Cr. 1-3. Repeatable.

KIN 591: Supervised Field Experience  
Cr. 1-6.  
Prereq: 10 graduate credits in kinesiology and/or related areas  
Supervised on-the-job field experience in special areas.

KIN 591A: Supervised Field Experience: Physical Education  
Cr. 1-6.  
Prereq: 10 graduate credits in kinesiology and/or related areas  
Supervised on-the-job field experience in special areas.

KIN 591B: Supervised Field Experience: Health and Exercise Promotion  
Cr. 1-6.  
Prereq: 10 graduate credits in kinesiology and/or related areas  
Supervised on-the-job field experience in special areas.

KIN 591D: Supervised Field Experience: Exercise Physiology  
Cr. 1-6.  
Prereq: 10 graduate credits in kinesiology and/or related areas  
Supervised on-the-job field experience in special areas.

KIN 592: Practicum in College Teaching  
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.S.S.  
Supervised experience with teaching an upper division, classroom-based course. Offered on a satisfactory-fail basis only.

KIN 599: Adapted Physical Education  
(Dual-listed with KIN 395). (2-2) Cr. 3. F.  
Prereq: Admission to Educator Preparation Program, KIN 280/281  
Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. KIN 595 may not be taken by students who previously earned credit in KIN 395.

KIN 599: Creative Component  
Cr. 1-3. Repeatable.

Courses for graduate students:

KIN 615: Seminar  
Cr. 1-3. Repeatable.

KIN 620: Advance Research Methods in Physical Activity  
(3-0) Cr. 3. S.  
Prereq: KIN 501, STAT 402 and STAT 587. Doctoral students only  
Culminating seminar designed to synthesize statistical and design courses with practical research issues using data from physical activity.

KIN 670: Molecular Biology of Muscle  
(Cross-listed with AN S). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Alt. S., offered odd-numbered years.  
Prereq: BBMB 405, BBMB 420  
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

KIN 699: Research  
Cr. 1-6. Repeatable.

Courses primarily for undergraduates:

A TR 218: Orientation to Athletic Training Clinical Experience  
(0-2) Cr. 0.5. Repeatable, maximum of 1 credits. F.S.  
Pre-athletic training clinical experience designed to orientate students to the athletic training profession prior to enrolling in athletic training course sequence. Students will observe athletic trainers in various athletic training clinical sites. Open to pre-athletic training students only. Offered on a satisfactory-fail basis only.
A TR 219: Clinical Practicum in Athletic Training
(0-2) Cr. 1. F.
Athletic training clinical experiences designed to review human anatomical structures including origin, insertion, action, innervations of muscles. Students will gain experience with palpation of these structures to help identify location of anatomical landmarks. Students will also gain experience identifying bones, ligaments, and tendons. Open to athletic training students only.

A TR 220: Basic Athletic Training
(1-2) Cr. 2.
Prereq: BIOL 155 or BIOL 255 and BIOL 256
Introduction to methods of prevention and immediate care of athletic injuries. Basic information concerning health supervision of athletes, and some basic wrapping and strapping techniques for common injuries. Non A TR majors only.

A TR 221: Pre-Athletic Training Clinical Practicum
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in A TR 222
Athletic training clinical observation experiences to accompany A TR 222. Utilize knowledge to evaluate, analyze and demonstrate appropriate taping, wrapping and basic skill techniques. Open to students interested in the athletic training option. Offered on a satisfactory-fail basis only.

A TR 222: Basic Athletic Training for Athletic Trainers
(2-2) Cr. 3. F.
Prereq: BIOL 255, BIOL 255L
Provides pre-athletic training students with the knowledge of the profession of a certified athletic trainer, factors associated with injury prevention, treatment, emergency care of athletic injuries, protective equipment, basic organization, administrative, and legal concepts in the athletic training setting. To be taken concurrently with A TR 221.

A TR 223: Clinical Practicum in Athletic Training
(0-3) Cr. 1. F.
Prereq: Permission of Athletic Training Program Director
Athletic training clinical experiences for athletic training students during pre-season intercollegiate football. Clinical experiences include: Professional Rescuer CPR, AED certification, emergency splinting and spineboarding, medical record keeping and HIPPA regulations, environmental conditions, prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, mouthpiece formation, and anatomy review. Offered on a satisfactory-fail basis only.

A TR 224: Evaluation of Athletic Injuries I
(2-3) Cr. 3. F.
Prereq: Permission of athletic training program director
Sport injury assessment procedures and evaluation techniques for lower body injuries. Includes an overview of mechanisms of injury, general musculoskeletal disorders, and spine or neurological dysfunction. Designed for students in the athletic training major.

A TR 225: Athletic Injuries I Clinical Practicum
(0-3) Cr. 1. F.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 224. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 226: Evaluation of Athletic Injuries II
(2-3) Cr. 3. S.
Prereq: Permission of athletic training program director
Sport injury assessment procedures and evaluation techniques for lower body injuries. Includes an overview of common illnesses of athletes and sport specific injuries. Designed for students in the athletic training major.

A TR 227: Athletic Injuries II Clinical Practicum
(0-3) Cr. 1. S.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 226. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 240: Introduction to Taping, Equipment, and Bracing Techniques
(0-3) Cr. 1. F.
Prereq: Permission of athletic training program director
Basic information and laboratory instruction regarding basic taping techniques, athletic equipment fitting procedures, and the use and proper fitting of prophylactic braces. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 323: Therapeutic Modalities for Athletic Trainers
(2-2) Cr. 3. F.
Prereq: Permission of athletic training program director
Theory and technique of therapeutic modalities used in the management of injuries.

A TR 324: Therapeutic Modalities Clinical Practicum
(0-3) Cr. 1. F.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 323. Open to students in athletic training major. Offered on a satisfactory-fail basis only.
A TR 326: Rehabilitation of Athletic Injuries
(2-2) Cr. 3. S.
Prereq: Permission of athletic training program director
Theory and practical application of rehabilitation principles used in the management of athletic injuries.

A TR 327: Rehabilitation of Athletic Injuries Clinical Practicum
(0-3) Cr. 1. S.
Prereq: Permission of athletic training program director
Athletic training clinical experience to accompany A TR 326. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 425: Organization and Administration of Athletic Training
(3-0) Cr. 3. F.
Prereq: Permission of athletic training program director, senior classification
Current administrative, professional, and legal issues pertaining to athletic training. Job search techniques and strategies including preparation of materials for athletic training students.

A TR 450: Medical Concerns for the Athletic Trainer
(3-0) Cr. 3. F.
Prereq: Permission of athletic training program director
Current medical issues and concerns, including pathology of illness and injury, dermatological conditions, exposure to allied health care professionals, and pharmacological indications in relation to the profession of athletic training and in patient/athlete care.

A TR 488: Evidence Based Practice in Athletic Training
Cr. 2. F.S.
Prereq: Permission of athletic training program director
Clinical experiences in application of athletic training techniques under the supervision of certified athletic trainers. Introduction and utilization of evidence-based practice methodology via online instruction and integration of evidence-based practice into the clinical experience.

A TR 489: Review of Athletic Training Competencies and Clinical Proficiencies
Cr. 1. F.S.
Prereq: Senior classification, permission of athletic training program director
Preparation for professional endorsement and certification by review of required competencies and clinical proficiencies. Required for endorsement or approval to sit for Board of Certification Exam. Offered on a satisfactory-fail basis only.

Courses primarily for undergraduates:

DANCE 120: Modern Dance I
(0-3) Cr. 1. F.S.
Introduction and practice of basic dance concepts, including preparatory techniques and guided creativity problems. No previous modern dance experience required. Offered on a satisfactory-fail basis only.

DANCE 130: Ballet I
(0-3) Cr. 1. F.S.
Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment. No previous ballet experience required. Offered on a satisfactory-fail basis only.

DANCE 140: Jazz I
(0-3) Cr. 1. F.S.
Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Offered on a satisfactory-fail basis only.

DANCE 150: Tap Dance I
(0-3) Cr. 1. F.
Instruction and practice in basic tap technique and terminology. No previous tap experience required. Offered on a satisfactory-fail basis only.

DANCE 160: Ballroom Dance I
(0-2) Cr. 1. F.S.
Instruction and practice in foxtrot, waltz, swing, cha cha, rhumba, tango, and selected contemporary dances. Offered on a satisfactory-fail basis only.

DANCE 199: Dance Continuum
Cr. 0.5-2. Repeatable, maximum of 6 credits. S.
Prereq: Permission of instructor
Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Offered on a satisfactory-fail basis only.

DANCE 211: Fundamentals and Methods of Social and World Dance
(1-3) Cr. 1. S.
Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for kinesiology and health majors, open to others.

DANCE 220: Modern Dance Composition
(1-3) Cr. 2. F.
Prereq: DANCE 120 or previous modern dance experience
Theory and practice of the creative skills involved in solo and small group composition.
DANCE 222: Modern Dance II
(0-3) Cr. 1. F.
Prereq: DANCE 120 or previous modern dance experience
Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations.

DANCE 223: Modern Dance III
(0-3) Cr. 1. S.
Prereq: DANCE 222
Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles.

DANCE 224: Concert and Theatre Dance
(Cross-listed with THTRE). (0-3) Cr. 0.5-2. Repeatable, maximum of 6 credits. F.S.
Prereq: By audition only
Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Offered on a satisfactory-fail basis only.

DANCE 232: Ballet II
(0-3) Cr. 1. S.
Prereq: Previous ballet experience
Technical skills in the classical movement vocabulary. Emphasis on alignment, techniques, sequence development, and performing quality.

DANCE 233: Ballet III
(0-3) Cr. 1. F.
Prereq: DANCE 232
Concentration on technical proficiency at the intermediate level. Pointe work and partnering opportunities available.

DANCE 242: Jazz II
(0-3) Cr. 1. S.
Prereq: Previous jazz dance experience
Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation.

DANCE 250: Yoga Movement
(0-2) Cr. 1. Repeatable. F.S.
Mixed-level Hatha Yoga class that emphasizes Iyengar style yoga. Yoga Movement is designed for developing awareness and personal practice with yoga poses and relaxation techniques. Attention will be paid to postural alignment to safely develop strength, endurance, flexibility, balance, and reduce stress. The practice develops awareness and consciousness in the physical body to help unite body and mind. Class will include introduction to other somatic practices, asanas (poses), breathing practices, meditation, yoga philosophy and deep relaxation.

DANCE 270: Dance Appreciation
(3-0) Cr. 3. F.S.
Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.
Meets International Perspectives Requirement.

DANCE 320: Sound and Movement
(2-2) Cr. 3. S.
Prereq: DANCE 220
Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods.

DANCE 360: History and Philosophy of Dance
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: DANCE 270
Study of the history of dance from early to modern times with emphasis on the theories and philosophies of contemporary modern dance, dancers, and dance educators.

DANCE 370: Advanced Studies in Dance
Cr. 1-3. Repeatable, maximum of 8 credits. F.S.
Prereq: 2 credits in dance
Advance registration required. Designed to meet special interests and talents of students to include both group and independent study in various aspects of dance as a performing art including production, choreography, and performance.

DANCE 384: Teaching Children's Dance
(1-3) Cr. 2. S.
Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children in expressive movement experiences.

DANCE 385: Methods of Teaching Dance
(1-3) Cr. 2. F.
Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance.

DANCE 386: Teaching Dance Technique and Composition
(1-3) Cr. 2.
Prereq: DANCE 320
Teaching yoga, body therapies, mindfulness and dance composition to enhance the physical and mental performance of the individual.

DANCE 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance.
DANCE 490A: Independent Study: Dance
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance.

DANCE 490H: Independent Study in Dance - Honors
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance for those admitted to the honors program.

Courses primarily for undergraduates:

H S 105: First Aid and Emergency Care
(1-2) Cr. 2. F.S.SS.
Discussion and application of the basic techniques of utilizing bloodborne pathogen safety measures, administering first aid and cardiopulmonary resuscitation. ARC layperson certification available.

H S 110: Personal and Consumer Health
(3-0) Cr. 3. F.S.
Physical, mental, emotional and social aspects of health as a basis for understanding and promoting health, and preventing poor health conditions. Study of personal responsibility on the long-term benefits of maintaining a high level of wellness and health. Identification and mitigation of negative lifestyle habits.

H S 215: Drug Education
(3-0) Cr. 3. F.S.
Prereq: PSYCH 101 or PSYCH 230
Discussion of use, abuse and addiction of mood modifying substances in contemporary society. Includes study of tobacco, alcohol, and other drugs.

H S 275: Health Education in the Elementary School
(3-0) Cr. 3. F.S.
Prereq: HD FS 102 or HD FS 226
The application of instructional strategies related to health education and physical education for teachers at the elementary level. Credit for both H S 275 and 375 may not be applied toward graduation.

H S 285: Pre-Internship in Kinesiology and Health
(Cross-listed with KIN). Cr. 1-2. F.S.
Prereq: Kinesiology and Health major and permission of internship coordinator.
Pre-internship experience with a health organization based on option. Offered on a satisfactory-fail basis only.

H S 290: Independent Study
Cr. 1. Repeatable, maximum of 3 credits. F.S.
Prereq: 2nd semester freshmen, sophomores and permission from instructor.
Study under supervision of faculty.

H S 305: Instructor's First Aid and Cardio-pulmonary Resuscitation
(1-2) Cr. 2. F.S.
Prereq: H S 105
Discussion and practice of skills needed to teach first aid and cardiopulmonary resuscitation. ARC certification available.

H S 310: Community and Public Health
(3-0) Cr. 3. F.S.
Prereq: H S 110
Introduction to community health problems, programs of prevention, environmental health agencies, and health services. Study of local, state, and national community health agencies, their purposes and functions.

H S 350: Human Diseases
(3-0) Cr. 3. F.S.SS.
Prereq: H S 110 and BIOL 255, BIOL 256
Discussion of disease process and ill-health in the twentieth century. Emphasis on epidemiology, prevention, treatment, and the understanding of the etiology of communicable and noncommunicable diseases.

H S 375: Teaching-Learning Process in Health Education
(3-0) Cr. 3. F.
Prereq: H S 105, H S 110, H S 215
Principles, methods, materials, and resources involved in the teaching of health. Includes organization and development of the health education curriculum (K-12). Credit for both H S 275 and 375 may not be applied toward graduation.

H S 380: Worksite Health Promotion
(3-0) Cr. 3. F.S.
Prereq: KIN 258, KIN 366
The design and implementation of worksite health promotion programs and the benefits these programs have for both employees and employers. Review of various health risk appraisals and planning theory-based incentive programs designed to promote positive lifestyles.

H S 385: Preparation and Search Strategies for Kinesiology and Health Internships
(Cross-listed with KIN). Cr. 0.5. F.S.
Prereq: Junior classification; to be taken minimum of two semesters prior to required internship.
Preparation of relevant material for a successful internship/career search. Specific internship timeline, process, procedures will be reviewed.
H S 417: Supervised Teaching in Health Education in the Secondary School
Cr. 16. F.S.
Prereq: H S 375
Advance registration required.

H S 417A: Supervised Teaching in Health Education in the Secondary School: Initial Endorsement
Cr. 16. F.S.
Prereq: H S 375
Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering.

H S 417B: Supervised Teaching in Health Education in the Secondary School: Additional Endorsement
Cr. arr. F.S.
Prereq: H S 375
Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering.

H S 430: Community Health Program Development
(3-0) Cr. 3. F.
Techniques of needs assessment, program design, administration, and evaluation of community health education programs in various settings.

H S 464: Physical Activity Epidemiology
(Dual-listed with H S 564). (3-0) Cr. 3. F.S.
Prereq: KIN 358 or H S 350; STAT 101 or STAT 587.
Understanding health benefits of physical activity on chronic disease prevention and health promotion throughout the life span, from clinical and public health perspectives. Discussion and application of real-life physical activity assessment, research, guidelines, and promotion in population levels.

H S 485: Internship in Health Studies
Cr. 8-16.
Prereq: Senior classification and advanced registration.
Advance registration required. Supervised experience in health related agencies. Offered on a satisfactory-fail basis only.

H S 485A: Internship in Health Studies: Community and Public Health
Cr. 8-16. F.S.SS.
Prereq: All required courses and C- or better in HS 310 and HS 430. Kinesiology and Health majors only. Cumulative GPA 2.0.
Observation and practice in selected community and public health agencies. Offered on a satisfactory-fail basis only.

H S 485B: Internship in Health Studies: Physical Activity and Health Promotion
Cr. 8-16. F.S.SS.
Prereq: All required courses and C- or better in KIN 485 and KIN 467. Kinesiology and Health majors only. Cumulative GPA 2.0.
Observation and practice in selected physical activity and health promotion agencies. Offered on a satisfactory-fail basis only.

H S 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits in health studies and permission of coordinator

Courses primarily for graduate students, open to qualified undergraduates:

H S 564: Physical Activity Epidemiology
(Dual-listed with H S 464). (3-0) Cr. 3. F.S.
Prereq: KIN 358 or H S 350; STAT 101 or STAT 587.
Understanding health benefits of physical activity on chronic disease prevention and health promotion throughout the life span, from clinical and public health perspectives. Discussion and application of real-life physical activity assessment, research, guidelines, and promotion in population levels.

Courses primarily for undergraduates:

KIN 101: Swimming I
(0-3) Cr. 1. F.S.SS.
Basic course for nonswimmers. Emphasis on two fundamental strokes and personal water safety skills. Offered on a satisfactory-fail basis only.

KIN 102: Swimming II
(0-3) Cr. 1. F.S.
Prereq: KIN 101 or equivalent skill
Intermediate course. Emphasis on learning and improving five basic strokes and personal water safety skills. Offered on a satisfactory-fail basis only.

KIN 108: Aquatic Fitness
(0-3) Cr. 1. F.S.
Prereq: KIN 102 or equivalent skill
Water related exercises, activities, and swimming workouts to improve physical fitness. Offered on a satisfactory-fail basis only.

KIN 122: Badminton
(0-2) Cr. 1. F.S.SS.
Introduction to fundamental badminton skills and strategic game play. Offered on a satisfactory-fail basis only.
KIN 129: Bowling  
(0-2) Cr. 1. F.S.SS.  
Introduction to bowling skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 135: Golf  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental golf skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 144: Racquetball  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental racquetball skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 153: Ice Skating  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental ice skating skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 158: Tennis  
(0-2) Cr. 1. F.S.SS.  
Introduction to basic skills (forehand, backhand, service) and basic knowledge of game play. Offered on a satisfactory-fail basis only.

KIN 163: Physical Fitness  
(0-3) Cr. 1. F.S.SS.  
Evaluation of fitness status. Exercises, activities, and programs to improve physical fitness. Improve physical fitness and weight control. Offered on a satisfactory-fail basis only. Credit for only KIN 163 or 258 may be applied toward graduation.

KIN 164: Walking for Fitness  
(0-3) Cr. 1. F.S.SS.  
Fitness walking as an activity to improve health and fitness; values of this type of activity as a lifetime endeavor with knowledge and usage of pedometers. Offered on a satisfactory-fail basis only.

KIN 165: Running for Fitness  
(0-2) Cr. 1. F.S.SS.  
Running as a physical activity to improve physical fitness and health. Promotion of this activity as a lifetime endeavor. Offered on a satisfactory-fail basis only.

KIN 166: Weight Training  
(0-3) Cr. 1. F.S.SS.  
Introduction to fundamental skills of weight training and strategic game play. Offered on a satisfactory-fail basis only.

KIN 168: Judo  
(0-2) Cr. 1. F.S.  
Fundamentals of self defense, focusing on throwing with the hands, hips and feet as well as applying pins, chokes and arm-bars. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self control & indomitable spirit. Emphasis on learning a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 170: Tae Kwon Do/Karate I  
(0-2) Cr. 1. F.S.  
Teaches fundamentals of self-defense, focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 171: Tae Kwon Do/Karate II  
(0-2) Cr. 1. F.S.  
Teaches advanced application of self-defense focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 173: Hap Ki Do/Martial Self-Defense  
(0-2) Cr. 1. F.S.  
Teaches fundamentals of self-defense focusing on joint locks, pressure points and throwing techniques to escape from an attacker. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health & citizenship. Offered on a satisfactory-fail basis only.

KIN 182: Volleyball  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental volleyball skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 185: Soccer  
(0-2) Cr. 1. F.S.SS.  
Introduction to fundamental soccer skills and strategic game play. Offered on a satisfactory-fail basis only.
KIN 210: Concepts of Fitness and Wellness  
(2-0) Cr. 2. F.S.  
Coverage of behavioral skills needed to adopt and maintain lifestyles conducive to fitness and wellness. Provides students with knowledge and skills needed to adopt and maintain healthy lifestyles. Includes self-assessments and content on physical activity, nutrition, weight control, stress management and other lifestyle behaviors related to health. For non-kinesiology majors.

KIN 214: Building Comprehensive School Physical Activity Programs  
Cr. 1. Repeatable, maximum of 2 credits. S.  
Prereq: Freshman Classification  
Service learning with practical experience in school research focused on promoting physical activity and wellness in youth. Offered on a satisfactory-fail basis only.

KIN 231: Fundamentals of Tumbling and Gymnastics  
(0-3) Cr. 1. F.  
Prereq: Eligibility for admission to KIN teacher education program  

KIN 232: Fundamentals of Team Sports  
(0-3) Cr. 1. F.  
Prereq: Eligibility for admission to KIN teacher education program  
Fundamentals of indoor and outdoor team sports, for example basketball, volleyball, flag football, and soccer. Skill enhancement, analysis, understanding practice and the development of progressions.

KIN 236: Fundamentals of Individual Sports and Fitness  
(0-3) Cr. 1. S.  
Prereq: Eligibility for admission to KIN teacher education program  
Fundamentals of individual sports and fitness, for example disc golf, bowling, badminton, and weight training. Skill enhancement, analysis, understanding practice and the development of progressions.

KIN 242: Planning for Success in a Health Career  
Cr. 0.5. F.S.  
Prereq: KIN H major in PHP option with sophomore status or above.  
Exploration of various health fields to clarify career goals and prepare a parallel career plan outside of medicine. Facilitate preparation of relevant materials for professional and graduate school admission. Offered on a satisfactory-fail basis only.

KIN 252: Disciplines and Professions in Kinesiology and Health  
(1-0) Cr. 1. F.S.  
Overview of the various disciplines and professions that comprise the field of Kinesiology (the study of human movement) and help students determine the career option that best fits their interests.

KIN 253: Orientation and Learning Community in Kinesiology and Health  
(1-0) Cr. 1. F.S.  
Prereq: Concurrent enrollment or credit in KIN 252  
Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only.

KIN 258: Principles of Physical Fitness and Conditioning  
(1-3) Cr. 2. F.S.  
Introduction to five components of fitness: cardiorespiratory, muscular strength, muscular endurance, flexibility, and body composition. Students will be introduced to basic exercise prescription and evaluation principles, develop skills to assess each component of fitness, and learn different exercise modalities to enhance each component. Credit for only one of the following courses may be applied toward graduation: KIN 163, 258.

KIN 259: Leadership Techniques for Fitness Programs  
(2-2) Cr. 3. F.S.  
Prereq: KIN 258  
Development of exercise leadership skills for a variety of activities. Includes planning, promotion, and teaching techniques for developing fitness in others using a variety of exercise modalities including group fitness and weight training. Kinesiology and health majors only.

KIN 266: Advanced Strength Training and Conditioning  
(1-2) Cr. 2. F.S.  
Prereq: KIN 258  
This course is designed to enhance the student’s current level of knowledge and expertise to an advanced level in the area of strength training and conditioning. The course will prepare students interested in taking the National Strength and Conditioning Association Certified and Conditioning Specialist’s exam. The course will focus on the assessment and implementation of training programs with strong emphasis on the areas of resistance training, metabolic training, flexibility, reaction time, speed, and agility. Kinesiology and health majors only and permission of instructor needed.

KIN 280: Directed Field Experience in Elementary Physical Education  
(0-3) Cr. 1. F.S.  
Observing, planning, and facilitating movement experiences of children in an elementary school setting. Offered on a satisfactory-fail basis only.
KIN 281: Directed Field Experience in Secondary Physical Education
(0-3) Cr. 1. F.S.
Prereq: Admission to Educator Preparation Program
Observing, planning, and facilitating movement experiences of students in a middle and/or high school setting. Offered on a satisfactory-fail basis only.

KIN 282: Field Experience with Educational Outreach
(0-2) Cr. 1. F.S.
Prereq: Admission to Educator Preparation Program
Planning and facilitating physical education experiences for children in a community outreach setting. Experiences take place on campus. Offered on a satisfactory-fail basis only.

KIN 284: Elementary and Pre-school Movement Education
(2-3) Cr. 3. F.S.
Prereq: 3 credits in human development and family studies
Approaches to teaching movement skills, health-related fitness and school-based physical activities (in the classroom, in PE, during recess) to pre-school and elementary school age children are covered. Emphasis is placed on planning and conducting developmentally appropriate movement experiences for preschool and elementary aged children throughout the school day based upon educational psychology, exercise psychology and motor development research. Practical experience is provided. Credit in only one of the following courses may be applied toward graduation: KIN 284, 312.

KIN 285: Pre-Internship in Kinesiology and Health
(Cross-listed with H S). Cr. 1-2. F.S.
Prereq: Kinesiology and Health major and permission of internship coordinator.
Pre-internship experience with a health organization based on option. Offered on a satisfactory-fail basis only.

KIN 290: Independent Study
Cr. 1. Repeatable, maximum of 3 credits. F.S.
Prereq: 2nd semester freshmen, sophomores and permission from instructor.
Study under supervision of faculty.

KIN 312: Movement Education in Elementary School Physical Education
(2-2) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280
Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Credit for only one of KIN 284 or KIN 312 may be applied toward graduation.

KIN 313: Teaching Secondary Physical Education
(2-3) Cr. 3. S.
Prereq: Admission to Educator Preparation Program, KIN 281
Current theory, practice and research on teaching focusing on management, instructional, and learning styles of students in secondary schools.

KIN 315: Coaching Theory and Administrative Issues
(3-0) Cr. 3. F.S.S.S.
Study in the theory, ethics, strategy, and mechanics of coaching various interscholastic and/or intercollegiate sports. Emphasis on formulating a philosophy, identifying goals and psychological aspects, teaching skills, and developing strategies.

KIN 345: Management of Health-Fitness Programs and Facilities
(3-0) Cr. 3. F.S.
Application of management concepts to the fitness industry, e.g., understanding customers, marketing, program management, financial management, legal issues, and evaluation and planning.

KIN 355: Biomechanics
(3-0) Cr. 3. F.S.S.S.
Prereq: PHYS 111 or PHYS 115
Mechanical basis of human performance; application of mechanical principles to exercise, sport and other physical activities.

KIN 358: Physiology of Exercise
(3-0) Cr. 3. F.S.S.S.
Prereq: BIOL 255, BIOL 255L, BIOL 256 and BIOL 256L
Physiological basis of human performance; effects of physical activity on body functions.

KIN 359: Exercise Physiology Lab
(0-2) Cr. 1.
Prereq: Concurrent enrollment in KIN 358
Learning lab techniques in Exercise Physiology and engaging in the experimental process.

KIN 360: Sociology of Physical Activity and Health
(3-0) Cr. 3. F.S.
Prereq: SOC 134
Provide an overview of sociology to enhance students understanding of societal forces influencing behavior; Provide insights about people, environments, organization and policies that impact Kinesiology professionals.

KIN 363: Basic Electrocardiography
(2-0) Cr. 2. Alt. F., offered even-numbered years.
Understanding of human electrocardiography, including normal and abnormal 12-lead ECGs and arrhythmia identification.
### KIN 365: Sport Psychology
(3-0) Cr. 3. F.S.

*Prereq: PSYCH 101 or PSYCH 230*

### KIN 366: Exercise Psychology
(3-0) Cr. 3. F.S.S.

*Prereq: PSYCH 101 or PSYCH 230*

### KIN 372: Motor Control and Learning Across the Lifespan
(3-0) Cr. 3. F.S.S.

*Prereq: PSYCH 101 or PSYCH 230, BIOL 255, BIOL 256*

Introduction to major concepts of neuromotor control, behavioral motor control and motor learning in the child, adult and older adult, with emphasis on the adult system.

### KIN 385: Preparation and Search Strategies for Kinesiology and Health Internships
(Cross-listed with H S). Cr. 0.5. F.S.

*Prereq: Junior classification; to be taken minimum of two semesters prior to required internship.*

Preparation of relevant material for a successful internship/career search. Specific internship timeline, process, procedures will be reviewed.

### KIN 391: Service Learning Leadership Experience
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.

Applied service learning experiences designed to provide students with opportunities to apply classroom knowledge to real world applications. Students will gain professional skills and programming experience while supporting health, education and wellness programming in school, work site or community settings. Offered on a satisfactory-fail basis only.

### KIN 395: Adapted Physical Education
(Dual-listed with KIN 595). (2-2) Cr. 3. F.

*Prereq: Admission to Educator Preparation Program, KIN 280/281*

Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. KIN 595 may not be taken by students who previously earned credit in KIN 395.

### KIN 399: Recreational Sport Management
(3-0) Cr. 3. F.

*Prereq: SOC 134*

The role of sport in developing fitness, recreational opportunities, and tourism, with special emphasis on issues related to youth sport, volunteerism, and the marketing of sport events and facilities.

### KIN 417: Supervised Teaching in Physical Education in the Secondary School
Cr. arr. F.S.

*Prereq: KIN 281, KIN 282, KIN 313, KIN 355, KIN 395, KIN 471, KIN 475; admission to Teacher Education; approval before enrolling in the course.*

Supervised teaching in the secondary schools.

### KIN 418: Supervised Teaching in Physical Education in the Elementary School
Cr. 8. F.S.

*Prereq: KIN 280, KIN 282, KIN 312, KIN 355, KIN 395, KIN 471, KIN 475. Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering*

Supervised teaching in the elementary schools.

### KIN 445: Legal Aspects of Sport
(3-0) Cr. 3. S.

Students will understand legal concepts and terminology relevant to sport/activity, identify strategies for limiting liability in sport/fitness programs, and identify solutions for elimination of discriminatory practices in sport and physical activity.

### KIN 455: Research Topics in Biomechanics
(3-0) Cr. 3.

*Prereq: KIN 355 or permission of instructor*

Examination of biomechanics and kinesiology research literature to evaluate the application of mechanical principles and analyses to human movement in exercise, sport, physical activity, and activities of daily living and to assess research outcomes and their implications for motor performance, movement energetic, musculoskeletal loading, and injury.

### KIN 458: Principles of Fitness Assessment and Exercise Prescription
(3-2) Cr. 4. F.S.

*Prereq: KIN 258, KIN 358*

Principles of cardiac risk factor identification and modification; risk classification of potential exercise clients; fitness assessments; developing comprehensive exercise prescriptions for individuals.
KIN 459: Internship in Exercise Leadership
(0-3) Cr. 1. F.S.
Prereq: C- or better in KIN 259, CPR certification, concurrent enrollment in KIN 458
Observation and practice of exercise leadership techniques in an on-campus adult fitness program.

KIN 462: Medical Aspects of Exercise
(3-0) Cr. 3. F.S.
Prereq: KIN 358
The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions. Environmental and nutritional aspects of exercise.

KIN 467: Exercise and Health: Behavior Change
(Dual-listed with KIN 567). (3-0) Cr. 3. F.S.
Prereq: Introductory course with emphasis on exercise psychology (i.e., KIN 366 or equivalent)
Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations.

KIN 471: Measurement in Physical Education
(Dual-listed with KIN 571). (3-0) Cr. 3. S.
Prereq: Admission to Educator Preparation Program, KIN 280 and 281
Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. KIN 571 may not be taken by students who previously earned credit in KIN 471.

KIN 472: Neural Basis of Human Movement
(Dual-listed with KIN 572). (3-0) Cr. 3. S.
Prereq: KIN 372 or PSYCH 310
Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.

KIN 473: Physical Dimensions of Aging
Cr. 3. F.
Prereq: KIN 355 or KIN 358 or KIN 372
Understanding the physiological, behavioral, and cognitive changes associated with aging with focus on the effects of physical activity on the aging human system. Discussions of what it means to become older, what a person can expect during the aging process, and what kind of control a person has over the aging process.

KIN 475: Physical Education Curriculum Design and Program Organization
(Dual-listed with KIN 575). (3-0) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280 and 281
Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.

KIN 480: Functional Anatomy
(3-0) Cr. 3. F.S.
Prereq: KIN 355; BIOL 155 or BIOL 255 and BIOL 256
The structure and function of human muscular, skeletal and nervous systems. The relationship of these systems to efficient and safe human motion.
KIN 485A: Internship in Exercise Science
Cr. 8-16.
Prereq: Prereq: All required courses and C- or better in KIN 458, KIN 459 and KIN 462, Kinesiology and Health majors only. Cumulative GPA 2.0.
Observation and practice in selected exercise science agencies. Offered on a satisfactory-fail basis only.

KIN 485G: Internship in Kinesiology: General
Cr. 8-16.
Prereq: Senior classification and advance registration.
Observation and practice in exercise/fitness agencies. Offered on a satisfactory-fail basis only.

KIN 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits from KIN advanced core and permission of coordinator
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 490A: Independent Study: Exercise and Sport Science
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits from KIN advanced core and permission of coordinator
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 490H: Independent Study: Honors
Cr. 1-2. Repeatable, maximum of 4 credits.
Prereq: 6 credits from KIN advanced core and permission of coordinator
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 494: Practicum in Motivational Interviewing for Health
Cr. 1-2. Repeatable, maximum of 6 credits. F.S.
Prereq: Junior/Senior status and permission of instructor
This supervised practicum course is designed for students interested in learning how to conduct ‘motivational interviewing’ for behavior change and health coaching applications. Students will learn strategies of motivational interviewing and have opportunities to practice applying these skills with adult clients. Offered on a satisfactory-fail basis only.

KIN 494A: Practicum in Motivational Interviewing for Health: Principles of Motivational Interviewing
Cr. 1. F.S.SS.
Prereq: Junior/Senior status and permission of instructor
Introduction to the principles of ‘motivational interviewing’ for behavior change and health coaching applications. Students interested in gaining practical experience in health coaching should enroll in the associated practicum course (KIN 494B). Offered on a satisfactory-fail basis only.

KIN 494B: Practicum in Motivational Interviewing for Health: Supervised Experience
Cr. 1-2. Repeatable, maximum of 5 credits. F.S.
Prereq: KIN 494A Permission of Instructor
This supervised practicum course is designed for students interested in gaining experience in applying ‘motivational interviewing’ strategies in behavior change and health coaching applications. Students will have opportunities to practice motivational interviewing skills with adult clients and receive on-going support and assistance needed to refine their skills. Offered on a satisfactory-fail basis only.

KIN 495: Special Topics in Kinesiology
Cr. 1-3.
Prereq: Junior or Senior classification
Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

KIN 501: Research Methods in Physical Activity
(3-0) Cr. 3. Repeatable.
Prereq: Graduate classification in kinesiology and health
Methods and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

KIN 505: Research Laboratory Techniques in Exercise Physiology
(0-4) Cr. 2.
Prereq: KIN 358 or equivalent course with basic laboratory experience
Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

KIN 510: Advanced Medical Aspects of Exercise
(2-0) Cr. 2.
Prereq: KIN 358
The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

KIN 511: Physical Activity Strategies for Youth
Cr. 3.
Provide adequate opportunities to develop a more in-depth understanding of (a) the challenges in youth physical activity (PA), (b) the relevant theoretical models that are popular in youth PA, (c) the strategies that can be implemented to promote PA in youth.
KIN 512: Movement Education in Elementary School Physical Education  
(2-2) Cr. 3. F.  
Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Emphasis on evaluating published research on physical education and school-wide physical activity.

KIN 515: Injury Biomechanics  
(3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: Kin 355 or permission of instructor.  
Utilization of biomechanical principles to model injury mechanisms. Introduction to tissue mechanics of bone, articular cartilage, ligament, tendon, muscle, and nerve. Biomechanics of lower extremity, upper extremity, and head/neck/trunk injuries.

KIN 516: Quantitative Analysis of Human Movement  
(3-1) Cr. 3.  
Prereq: KIN 355  
Application of the principles of mechanics to the analysis of human motion. Investigation of the effects of kinematics and kinetics on the human body with special emphasis on exercise and sport applications. Includes consideration of two-dimensional and three-dimensional imaging techniques and force measurements.

KIN 517: Musculoskeletal Modeling  
(3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: KIN 355 or permission from instructor  
Systematic problem-solving approaches and design of computer programs for biomechanical analyses. Estimation of anthropometric parameters and mechanical properties of muscles, bones, and joints. Integration of anthropometrics, kinematics, EMG, and muscle mechanics into simulations of human movement.

KIN 521: Advanced Topics in Exercise and Sport Psychology  
(3-0) Cr. 3.  
Prereq: KIN 365 or KIN 366, 3 courses in psychology; open to majors only or by permission of instructor  
Aspects of psychology which form a basis for understanding and explaining behavior in the context of exercise and sport. Emphasis on evaluating published research, particularly theory and research methodology. Student presentations.

KIN 549: Advanced Vertebrate Physiology I  
(Cross-listed with AN S, NUTRS). (4-0) Cr. 4. F.  
Prereq: recommended: an undergraduate physiology course and a biochemistry course  
Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

KIN 550: Advanced Physiology of Exercise I  
(2-3) Cr. 3.  
Prereq: KIN 505  
Concepts and methods of assessing neurological, muscular, cardiovascular, and respiratory adjustments to exercise.

KIN 555: Physical Fitness - Principles, Programs and Evaluation  
(2-3) Cr. 3.  
Prereq: KIN 358  
Physiological principles of physical fitness, design and administration of fitness programs; testing, evaluation, and prescription; electrocardiogram interpretation.

KIN 560: Principles of Motor Control and Learning  
(2-3) Cr. 3.  
Prereq: KIN 372  
Theoretical perspectives of motor control and learning will be examined as well as factors that facilitate motor learning. Motor control and learning will also be addressed by studying functional tasks such as reach and grasp, posture and locomotor, handwriting, catching and/or speech.
KIN 561: Motor Development and Physical Activity  
(2-0) Cr. 2-3.  
Prereq: PSYCH 230  
Addresses theories and underlying mechanisms of motor development and motor control applied to typically and atypically developing children. Developmental control of balance, locomotion, reach-to-grasp, and other functional skills will be discussed, as will the role of physical activity in a child’s life.

KIN 567: Exercise and Health: Behavior Change  
(Dual-listed with KIN 467). (3-0) Cr. 3. F.S.  
Prereq: Introductory course with emphasis on exercise psychology (i.e., KIN 366 or equivalent)  
Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations.

KIN 570: Physical Activity Assessment for Health Related Research  
(2-2) Cr. 3.  
This course will cover the broad scope of research in physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques since accurate measures are needed to more accurately assess the health benefits from physical activity and to evaluate the effectiveness of behavioral interventions designed to promote physical activity.

KIN 571: Measurement in Physical Education  
(Dual-listed with KIN 471). (3-0) Cr. 3. S.  
Prereq: Admission to Educator Preparation Program, KIN 280 and KIN 281  
Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. KIN 571 may not be taken by students who previously earned credit in KIN 471.

KIN 572: Neural Basis of Human Movement  
(Dual-listed with KIN 472). (3-0) Cr. 3. S.  
Prereq: KIN 372 or PSYCH 310  
Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.

KIN 575: Physical Education Curriculum Design and Program Organization  
(Dual-listed with KIN 475). (3-0) Cr. 3. F.  
Prereq: Admission to Educator Preparation Program, KIN 280 and 281  
Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.
KIN 592: Practicum in College Teaching  
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.S.S.  
Supervised experience with teaching an upper division, classroom-based course. Offered on a satisfactory-fail basis only.

KIN 595: Adapted Physical Education  
(Dual-listed with KIN 395). (2-2) Cr. 3. F.  
Prereq: Admission to Educator Preparation Program, KIN 280/281  
Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. KIN 595 may not be taken by students who previously earned credit in KIN 395.

KIN 599: Creative Component  
Cr. 1-3. Repeatable.

Courses for graduate students:

KIN 615: Seminar  
Cr. 1-3. Repeatable.

KIN 620: Advance Research Methods in Physical Activity  
(3-0) Cr. 3. S.  
Prereq: KIN 501, STAT 402 and STAT 587. Doctoral students only  
Culminating seminar designed to synthesize statistical and design courses with practical research issues using data from physical activity.

KIN 670: Molecular Biology of Muscle  
(Cross-listed with AN S). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Alt. S., offered odd-numbered years.  
Prereq: BBMB 405, BBMB 420  
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

KIN 699: Research  
Cr. 1-6. Repeatable.

Culinary Food Science (H SCI)  
The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you’ll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor.

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.  
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.  
U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

**Footnotes**

* Choose elective courses to total equal to or greater than 120 credits.

**Note:** This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

### Dance

Administered by the Department of Kinesiology.

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance.

A Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index: Performing Arts.

#### Courses primarily for undergraduates:

**DANCE 120: Modern Dance I**
(0-3) Cr. 1. F.S.
Introduction and practice of basic dance concepts, including preparatory techniques and guided creativity problems. No previous modern dance experience required. Offered on a satisfactory-fail basis only.

**DANCE 130: Ballet I**
(0-3) Cr. 1. F.S.
Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment. No previous ballet experience required. Offered on a satisfactory-fail basis only.

**DANCE 140: Jazz I**
(0-3) Cr. 1. F.S.
Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Offered on a satisfactory-fail basis only.

**DANCE 150: Tap Dance I**
(0-3) Cr. 1. F.
Instruction and practice in basic tap technique and terminology. No previous tap experience required. Offered on a satisfactory-fail basis only.

**DANCE 160: Ballroom Dance I**
(0-2) Cr. 1. F.S.
Instruction and practice in foxtrot, waltz, swing, cha cha, rhumba, tango, and selected contemporary dances. Offered on a satisfactory-fail basis only.

**DANCE 199: Dance Continuum**
Cr. 0.5-2. Repeatable, maximum of 6 credits. S.
Prereq: Permission of instructor
Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Offered on a satisfactory-fail basis only.

**DANCE 211: Fundamentals and Methods of Social and World Dance**
(1-3) Cr. 1. S.
Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for kinesiology and health majors, open to others.

**DANCE 220: Modern Dance Composition**
(1-3) Cr. 2. F.
Prereq: DANCE 120 or previous modern dance experience
Theory and practice of the creative skills involved in solo and small group composition.

**DANCE 222: Modern Dance II**
(0-3) Cr. 1. F.
Prereq: DANCE 120 or previous modern dance experience
Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations.

**DANCE 223: Modern Dance III**
(0-3) Cr. 1. S.
Prereq: DANCE 222
Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles.
DANCE 224: Concert and Theatre Dance
(Cross-listed with THTRE). (0-3) Cr. 0.5-2. Repeatable, maximum of 6 credits. F.S.
Prereq: By audition only
Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Offered on a satisfactory-fail basis only.

DANCE 232: Ballet II
(0-3) Cr. 1. S.
Prereq: Previous ballet experience
Technical skills in the classical movement vocabulary. Emphasis on alignment, techniques, sequence development, and performing quality.

DANCE 233: Ballet III
(0-3) Cr. 1. F.
Prereq: DANCE 232
Concentration on technical proficiency at the intermediate level. Pointe work and partnering opportunities available.

DANCE 242: Jazz II
(0-3) Cr. 1. S.
Prereq: Previous jazz dance experience
Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation.

DANCE 250: Yoga Movement
(0-2) Cr. 1. Repeatable. F.S.
Mixed-level Hatha Yoga class that emphasizes Iyengar style yoga. Yoga Movement is designed for developing awareness and personal practice with yoga poses and relaxation techniques. Attention will be paid to postural alignment to safely develop strength, endurance, flexibility, balance, and reduce stress. The practice develops awareness and consciousness in the physical body to help unite body and mind. Class will include introduction to other somatic practices, asanas (poses), breathing practices, meditation, yoga philosophy and deep relaxation.

DANCE 270: Dance Appreciation
(3-0) Cr. 3. F.S.
Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.
Meets International Perspectives Requirement.

DANCE 320: Sound and Movement
(2-2) Cr. 3. S.
Prereq: DANCE 220
Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods.

DANCE 360: History and Philosophy of Dance
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: DANCE 270
Study of the history of dance from early to modern times with emphasis on the theories and philosophies of contemporary modern dance, dancers, and dance educators.

DANCE 370: Advanced Studies in Dance
Cr. 1-3. Repeatable, maximum of 8 credits. F.S.
Prereq: 2 credits in dance
Advance registration required. Designed to meet special interests and talents of students to include both group and independent study in various aspects of dance as a performing art including production, choreography, and performance.

DANCE 384: Teaching Children's Dance
(1-3) Cr. 2. S.
Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children in expressive movement experiences.

DANCE 385: Methods of Teaching Dance
(1-3) Cr. 2. F.
Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance.

DANCE 386: Teaching Dance Technique and Composition
(1-3) Cr. 2.
Prereq: DANCE 320
Teaching yoga, body therapies, mindfulness and dance composition to enhance the physical and mental performance of the individual.

DANCE 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance.

DANCE 490A: Independent Study: Dance
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance.

DANCE 490H: Independent Study in Dance - Honors
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Prereq: 6 credits in dance and permission of coordinator
Independent study of problems or areas of interest in dance for those admitted to the honors program.

Diet and Exercise (H SCI)
Curriculum in Diet and Exercise B.S./M.S.
Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

**Total Degree Requirements: 125 cr. for bachelor’s degree and 37-41 cr. for master’s degree**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

**International Perspectives: 3 cr.**
**U.S. Diversity: 3 cr.**
**Communications and Library: 10 cr.**

### Dietetics (H SCI)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

**Total Degree Requirement: 120 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

### International Perspectives: 3 cr.

**U.S. Diversity: 3 cr.**

**Communications and Library: 10 cr.**

**Admission to the dietetics program:** Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN courses.
**Event Management**

Administered by the Department of Apparel, Events, and Hospitality Management.

The program offers study for the degree of Bachelor of Science with a major in event management. The program prepares undergraduate students for careers in leading event and meeting management businesses. Through the major, students gain background and experiences in planning, budgeting, and implementing conferences, meetings, and other special events in the public or private sectors. Course work provides students with a general education plus professional preparation focusing on the concepts and principles involved in meeting and event planning strategy; special event management; stakeholder development; budgets and finance; site selection; contracts, vendors, and negotiations; marketing and promotions; food and beverage management; meeting technology; event evaluation; and hospitality law. Event electives include courses in event sustainability, event digital promotion, incentive meetings, and international conference planning. Supporting courses include foodservice, catering, promotion, brand management, trend analysis, fashion, and resource management.

The program also houses "The Meeting Room: Where Experiences and Technology Innovate," a lab designed to allow Event Management students to have hands-on access to a number of cutting-edge technology tools designed to let students focus on new and event disruptive ideas in events and meeting management. The lab is equipped with virtual reality headsets, event sound and lighting equipment, wireless connectivity to displays for BYOD, and group/collaboration furniture.

Graduates from this program are prepared for careers in event planning (corporate events, celebrations, education, promotions, commemorations, trade shows, weddings, conferences, association events, exhibitions, festivals, philanthropies, entertainment, fundraising, conventions, and sport events) and small business development (entrepreneurship). Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, promotion, and event management principles. Students are required to complete an internship in event management prior to graduation. The student experience is enhanced through networking and development events with our Event Management Executive Advisory Council, meeting/event industry conferences and association meetings, and international experiences designed specifically for event management students.

The AESHM Department offers a minor in event management. The minor can be earned by successfully completing the following for a total of 15 credits.

9 credits are required:

- **EVENT 271** Introduction to Event Management
  
- **EVENT 371** Conference and Meeting Planning
  
- **EVENT 471** Special Events Coordination
  
And six credits of the following:

- **AESHM 287** Principles of Management in Human Sciences
  
- **AESHM 340** Hospitality and Apparel Marketing Strategies or **MKT 340** Principles of Marketing
  
- **AESHM 342** Aesthetics of Consumer Experience
  
- **AESHM 474** Entrepreneurship in Human Sciences
  
- **HSP M 437** Hospitality and Event Technology Applications
  
- **P R 220** Principles of Public Relations

Total Credits 15

**Leading to the degree Bachelor of Science**

Total credits required: 123, including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree.

The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Students majoring in Event Management are required to earn C- or better in all AESHM and EVENT courses, and all courses in the EVENT Core.

Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

**Curriculum in Event Management**

Administered by the Apparel, Events, and Hospitality Management Department.

 Leading to the degree Bachelor of Science.

Total credits required: 123 including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree. The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in
general education, and the professional area. Students majoring in Event
Management are required to earn C- or better in all AESHM and EVENT
courses, and all courses in the EVENT Core. Communication Proficiency
Requirement: Grade of C or better in ENGL 150 Critical Thinking and
Communication, and ENGL 250 Written, Oral, Visual, and Electronic
Composition.

A minor in event management is available; see requirements under
Apparel, Events, and Hospitality Courses and Programs.

Total Credits: 125-126

Courses primarily for undergraduates:

EVENT 212: Digital Production in Event Management
(2-2) Cr. 3. F.
Prereq: Event Management major
Applications of skills in Adobe Suite and other software technologies. Introduction to design elements used within the event management industry with a focus on digital publishing of marketing and promotional materials, wayfinding, and other stationery items. Face-to-face lecture and laboratory work.

EVENT 271: Introduction to Event Management
(3-0) Cr. 3. F.S.
Overview of the event management industries. Techniques and procedures required for producing successful and sustainable events.

EVENT 277: Introduction to Digital Promotion in Event Management
Cr. 3. F.S.
Prereq: EVENT 271
Event management digital channels and platforms, including display advertising, search advertising, social media, and mobile. Students will be introduced to the most popular event management platforms as well as digital event management topics of visual marketing, digital media planning, and content marketing.

EVENT 289: Contemporary Club Management
(Cross-listed with HSP M). (3-0) Cr. 3. F.S.
Prereq: HSP M 101
Organization and management of private clubs including city, country, and other recreational and social clubs. Field trip may be required.

EVENT 290: Independent Study
Cr. 1-2. Repeatable, maximum of 4 credits. F.S.S.
Prereq: Freshman or Sophomore Classification. Permission of instructor, adviser, and department chair.
Independent study on topics of special interest to the student, facilitated by approved faculty member. No more than 9 credits of EVENT 290 and EVENT 490 may be applied towards graduation requirements.

EVENT 320: Attractions and Amusement Park Administration
(Cross-listed with HSP M). (3-0) Cr. 3. S.
Prereq: HSP M 101 or permission of instructor
Examination of current issues in the attractions and amusement park industry. Emphasis will be placed on development and design along with the functional departments of modern amusement parks and themed attractions.

EVENT 328: Incentive Meeting Management
Cr. 3. F.
Prereq: EVENT 271, Event Management major
Overview of the incentive meeting industry. Focus on incentive meeting planning, destination selection, program development, risk management, cultural aspects of international/national site selection and incentive meeting execution, and incentive meeting evaluation.

EVENT 333: Entertainment Venue Management
(3-0) Cr. 3. F.S.
Prereq: EVENT 271 or equivalent
Organization and management of various types of entertainment venues including clubs, theaters, auditoriums, and arenas.
EVENT 367: Event Sales
(3-0) Cr. 3.
Prereq: EVENT 271; AESHM 340
Overview of sales marketing management in the event industry and the role of the professional event sales manager in the marketing process. As an event professional, learn best sales practices to develop your personal selling style, to build on your strengths, and to create a referral business that delivers results. Principles covered include the characteristics and skills necessary for success in sales; strategic planning; sales leadership; analyzing customers and markets; designing and developing the sales force; the importance of relationship building; process management; and measurement, analysis, and knowledge management.

EVENT 371: Conference and Meeting Planning
(3-0) Cr. 3. F.S.
Prereq: EVENT 271 and junior standing
Application of event management principles to conference and meeting planning. Providing a comprehensive introduction to the key elements of the global conference, convention and meetings focus on destination marketing and professional development.

EVENT 373: Wedding Planning and Management
(3-0) Cr. 3. F.S.
Prereq: EVENT 371 and Event Management major
Overview of wedding event industry. Focus on wedding planning processes and implementation, design, and business planning and development.

EVENT 378: Sustainable Event Management
Cr. 3. S.
Prereq: EVENT 271, EVENT majors.
Introduction to international sustainable event standards, and how to measure the environmental impact of an event. Topics include ethics, corporate social responsibility (CSR), and sustainability related practices.

EVENT 379: Nonprofit Fundraising Event Planning
Cr. 3. F.
Prereq: EVENT 271, Instructor's permission.
The role of Nonprofit Organizations (NPOs) in the United States, and how NPOs secure essential income and help educate donors, guests, and volunteers of the organizational mission. Fundamentals of an event-based fundraising (e.g., a gala dinner) or community-based fundraising (e.g., runs, walks, and rides). Budgeting, marketing outreach, logistics management. Use of strategic tools, such as website and social media, to help increase financial success of a fundraising event. Grant-writing content.

EVENT 393: Event Management Workshop
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: EVENT Junior or Senior Classification and Permission of Instructor
Intensive 2 to 8 week workshop exploration. Topics vary each time offered. Maximum of 6 Event 393 credits can be applied to graduation.

EVENT 423: International Meetings and Conferences Management
Cr. 3. S.
Prereq: EVENT 271, EVENT 371
Strategies and tactics for planning a meeting, exposition, or convention that is held outside of the United States; and a meeting, exposition, or convention that attracts numerous international attendees to the United States.

EVENT 431: Case Studies in Event Management
(Dual-listed with EVENT 531). (Cross-listed with HSP M). Cr. 3. S.
Prereq: Graduate-level standing and permission by instructor
Operational and strategic challenges in the event management industry through directed case studies, roundtable discussions, and industry-related readings. Students will critically evaluate case studies related to event management in areas of event strategy, financial management, event operations, stakeholder development, event design, marketing, and other event topics.

EVENT 471: Special Events Coordination
(3-0) Cr. 3. F.S.
Prereq: EVENT 371 and junior standing; permission of instructor
Advanced application event management. Provide leadership and communicate direction for production of an event including developing event strategy, financial management, wayfinding, volunteer management, and marketing.

EVENT 485: Event Management Production
Cr. 3.
Prereq: Event 471; limited to Event Management majors; application and instructor permission
Planning and execution of an event including strategic planning, site selection, stakeholder development, event sponsorship, financial management, event marketing, event operations, and event evaluation.

EVENT 490: Independent Study
Cr. arr. Repeatable.
Prereq: Sections B-D: Program approval; Section H: Full membership in Honors Program
Independent study.

EVENT 490B: Independent Study: Conferences
Cr. arr. Repeatable.
Prereq: Program approval
Independent study.
EVENT 490C: Independent Study: Special Events
Cr. arr. Repeatable.
Prereq: Program approval.
Independent study.

EVENT 490D: Independent Study: Event Management
Cr. arr. Repeatable.
Prereq: Sections B-D: Program approval; Section H: Full membership in Honors Program
Independent study.

Family and Consumer Sciences, MFCS

Master of Family and Consumer Sciences (M.F.C.S.)

The College of Human Sciences offers a nonthesis master's degree program that might appeal to individuals with a bachelor's degree in family and consumer sciences/home economics subject area or related disciplines. This program is considered to be a professional master's degree. For students interested in further graduate study beyond the MFCS, the nonthesis degree program may mean additional requirements before completion of a Ph.D. or other terminal degree graduate program.

Students select either a comprehensive option or a specialization option. The comprehensive option requires 36 credits covering a variety of family and consumer sciences subject matter. Off-campus courses are offered via the World Wide Web (WWW). Specializations are available in Nutrition; Dietetics; Human Development and Family Studies; Hospitality Management; and Apparel, Merchandising, and Design.

In addition, students may select a 36-credit specialization in Family Financial Planning (FFP), a 36-credit specialization in Gerontology, a 36-credit specialization in Dietetics, or a 36-credit specialization in Youth Development. The FFP, Gerontology, Dietetics, and Youth Development specializations, offered in collaboration with six to eight other universities in the Great Plains Interactive Distance Education Alliance, are offered exclusively through courses on the Web. The FFP program has been approved by the Board of Examiners of the Certified Financial Planner Board of Standards CFP® Certification Examination. CFP® is a certification mark owned by the Certified Financial Planner Board of Standards.

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component. A thesis or creative component could be included on mutual agreement of the student and major professor, with approval of the Graduate College.

Admission requirements for the MFCS include a bachelor's degree in a family and consumer sciences/home economics subject area or related disciplines, Graduate Record Examination (GRE) scores (not required for the FFP and Geron specializations), official transcripts, three letters of recommendation, a goal statement, and graduation in the upper one-half of class with a bachelor's degree from a regionally accredited U.S. institution or graduation in the upper one-half of class from a recognized foreign institution. Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates
http://www.online.hs.iastate.edu/graduate-programs/certificates/

An 18-credit graduate certificate in Family Financial Planning is offered for students who do not need a master's degree and want to obtain the educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.

A 21-credit graduate certificate in Gerontology is offered.

A 13-credit Youth Development Specialist graduate certificate is offered.

A 13-credit graduate certificate in Youth Program Management & Evaluation is offered.

For additional information, students should contact the Research and Graduate Education Office, E262 Lagomarcino, Ames, Iowa 50011-3191, mfcsinfo@iastate.edu

Family and Consumer Sciences Education and Studies

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree.

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities.

The study of Family and Consumer Sciences Education incorporates the following 16 areas (http://www.nasafacs.org/national-standards-and-competencies.html): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family, Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the curriculum choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Graduates of the Teacher Licensure option may teach family and consumer sciences in middle, junior high, and senior high schools. Students who enroll in Teacher Licensure must apply and be accepted into the teacher education program prior to enrolling in advanced courses and must meet general education requirements for teacher licensure. This program option is approved by the Iowa Department of Education for the preparation of comprehensive and occupational career and technical education family and consumer sciences teachers.

Graduates of the Communications option have a broad-based knowledge of family and consumer sciences and the ability to communicate in a global and technologically changing society. They are able to plan, develop, creatively present and evaluate information. Students apply the principles of educational presentations, journalism, marketing, and public relations to the family and consumer sciences field within businesses, agencies, and organizations that work to empower individuals, families, and communities.

Graduates of the Professional Studies option pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for global settings. Students are prepared to work in a variety of careers ranging from non-profit organizations to the private sector in a business or entrepreneurial venture working with family nutrition, financial planning, life planning, current issues or other topics from the 16 content areas that affect individuals, families and communities.

Students in FCEDS may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/ and/or http://www.ncfr.org/cfle-certification.

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (https://www.aafcs.org/home): CFCS: Certified in Family and Consumer Sciences; CFCS-HDFS: Certified in Human Development and Family Studies; CFCS-HNFS: Certified in Hospitality, Nutrition, and Food Science; and CPFFE: Certified Personal and Family Finance Educator.

There is also an opportunity to obtain a family and consumer sciences-general endorsement or teacher licensure as a post baccalaureate student.

Communication Proficiency Requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C- or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The HD FS department offers an Educational Services in Family and Consumer Sciences minor. The minor consists of at least 16 credits including 6 credits taken at Iowa State University in courses numbered 300 or above.

The Educational Services in Family and Consumer Sciences minor may be earned by completing 16 credits:

HD FS 102 Individual and Family Development, Health, and Well-being

**US Diversity and International Perspectives Requirement:** Students in Family and Consumer Sciences Education fulfill the US Diversity by taking HD FS 276 and the International Perspectives Requirement by taking FS HN 342.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.
Curriculum in Family and Consumer Sciences Education and Studies

Administered by the Department of Human Development and Family Studies. Leading to a degree bachelor of science.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

Students in the program choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Option 1, Teacher Licensure, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior high, and senior high schools. Further information about licensure programs appears under Teacher Education.

Option 2, Communications, is designed for students seeking careers emphasizing the use of principles in journalism, marketing, communications, and public relations with diverse populations in business or social agency settings as well as extension, community agencies, community colleges, and youth and adult education programs in the global community.

Option 3, Professional Studies, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Careers include working with diverse populations in Extension, business, community agencies, and community colleges, or non-profit groups and organizations involving youth and adult education programs.

A minor in Educational Services in Family and Consumer Sciences is available, see requirements under Human Development and Family Studies Courses and Programs or in the catalog section Family and Consumer Sciences Education and Studies.

Total Credits required: 122-123

**Graduate Study**

The Human Development and Family Studies department and the college of Human Sciences participates in several Master of Family and Consumer Sciences (MFCS) degree programs. See the following link for information on these options: [http://www.online.hs.iastate.edu/graduate-programs/masters/](http://www.online.hs.iastate.edu/graduate-programs/masters/).

**Courses primarily for undergraduates:**

**FCEDS 206: Professional Roles in Family and Consumer Sciences**

(1-1) Cr. 2. F.

*Prereq: HD FS 103 or concurrent enrollment in HD FS 103*

Introduction to various roles in professional settings (community agencies, secondary schools, business and industry, and Cooperative Extension). Focus on factors that have influenced the development and mission of Family and Consumer Sciences programs nationwide. Includes 12 hours of observational practicum experience outside of the regular class schedule.

**FCEDS 301: Short Course: Current Family and Consumer Sciences Offerings**

Cr. 3. F.S.SS.

*Prereq: 6 credits in family and consumer sciences or education*

Short course in current family and consumer sciences offerings.

**FCEDS 301P: Short Course: Housing**

(3-0) Cr. 3. SS.

*Prereq: 6 credits in family and consumer sciences or education*

Short course in housing.
FCEDS 301G: Short Course: General  
(3-0) Cr. 3. SS.  
Prereq: 6 credits in family and consumer sciences or education  
General short course in FCEDS.

FCEDS 301K: Short Course: Textile Selection and Apparel Construction Methods  
(3-0) Cr. 3. SS.  
Prereq: 6 credits in family and consumer sciences or education  
Short course in textile selection and apparel construction.

FCEDS 306: Educational Principles for Family and Consumer Sciences  
(3-2) Cr. 4. F.  
Prereq: FCEDS 206  
Principles of teaching and learning applied to family and consumer sciences content incorporating literacy and STEM strategies for diverse audiences. Focus on providing a broad overview of effective instructional methods and substantial technological tools to meet varied learning needs. Includes 12 hours of arranged practicum and team teaching.

FCEDS 413: Planning and Assessment for Family and Consumer Sciences  
(3-2) Cr. 4. S.  
Prereq: FCEDS 306 and admission to Teacher Education  
Development of curriculum and assessment tools for family and consumer sciences programs in school settings. Focus on accommodating exceptional learners and alignment of teaching standards for classroom assessment. Includes 12 hours of Career and Technical Student Organization Competitive Event Assessment at the state/national level.

FCEDS 417: Supervised Teaching in Family and Consumer Sciences  
Cr. 3-8. Repeatable. F.S.  
Prereq: FCEDS 413; 24 credits in family and consumer sciences subject matter; cumulative grade point of 2.50, admission to teacher education, reservation required.  
Supervised teaching experience in secondary schools.

FCEDS 417A: Supervised Teaching in Family and Consumer Sciences: Vocational family and consumer sciences.  
Cr. 3-8. Repeatable. F.S.  
Prereq: FCEDS 413, 24 credits in family and consumer sciences subject matter, cumulative grade point of 2.50, admission to teacher education, reservation required.  
Supervised teaching experience in secondary schools.

FCEDS 417B: Supervised Teaching in Family and Consumer Sciences:  
Family and consumer sciences.  
Cr. 3-8. Repeatable. F.S.  
Prereq: FCEDS 413, 24 credits in family and consumer sciences subject matter, cumulative grade point of 2.50, admission to teacher education, reservation required.  
Supervised teaching experience in secondary schools.

FCEDS 418: Foundations of Career and Technical Education in Family and Consumer Sciences  
(3-0) Cr. 3. S.  
Prereq: Admission to teacher education, FCEDS 413 or concurrent enrollment in FCEDS 413.  
Investigation into the philosophy of Career and Technical Education (CTE). Historical development of family and consumer sciences. Planning and implementing programs in family and consumer sciences including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. Includes educational opportunities off campus for professional development and career advancement. May be used toward Multioccupations Endorsement.

FCEDS 480: Pre-Student Teaching Experience in Family and Consumer Sciences Education  
(0-2) Cr. 1. Repeatable. F.S.  
Prereq: Admission to teacher education.  
Laboratory experience in foods, textiles and human development in family and consumer sciences secondary programs. At least 2 hour blocks of time needed for field experience. Observation of family and consumer sciences laboratories in diverse classrooms. Planning, implementing, managing and assessing laboratory lessons in family and consumer sciences. Offered on a satisfactory-fail basis only.

FCEDS 480A: Pre-Student Teaching Experience in FCS Education: Practicum in FCS Labs (High School)  
(0-2) Cr. 1. Repeatable. F.S.  
Prereq: FCEDS 306 and admission to teacher education  
Laboratory experience in foods, hospitality management, culinary, prostart, textiles, fashion design, housing, and human development related to family and consumer sciences courses taught at the secondary level. Planning, implementing, managing, and assessing laboratory lessons in family and consumer sciences. Includes 24 hours practicum and supervised individual teaching. Offered on a satisfactory-fail basis only.
FCEDS 480B: Pre-Student Teaching Experience in FCS Education: Practicum in Diverse Settings (Middle School)
(0-2) Cr. 1. Repeatable. F.S.
Prereq: FCEDS 306 and admission to teacher education.
Laboratory experience in foods, textiles, and human development related to family and consumer sciences exploratory programs. Planning, implementing, managing and assessing laboratory lessons in family and consumer sciences. Includes 24 hours practicum and supervised individual teaching. Offered on a satisfactory-fail basis only.

FCEDS 490: Independent Study
Cr. arr. F.S.S.S.

FCEDS 490G: Independent Study: General
Cr. arr. F.S.S.S.

FCEDS 490H: Independent Study: Honors
Cr. arr. F.S.S.S.

FCEDS 491: Supervised Experiences in a Professional Setting
Cr. 3-8. Repeatable. F.S.S.S.
Prereq: HD FS 418B; 24 credits in family and consumer sciences; reservation required
Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only.

FCEDS 491A: Supervised Experiences in a Professional Setting: Communications
Cr. 3-8. Repeatable, maximum of 8 credits. F.S.S.S.
Prereq: HD FS 418B; 24 credits in family and consumer sciences; reservation required
Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only.

FCEDS 491B: Supervised Experiences in a Professional Setting: Professional Studies
Cr. 3-8. Repeatable, maximum of 8 credits. F.S.S.S.
Prereq: HD FS 418B; 24 credits in family and consumer sciences; reservation required
Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only.

Family Financial Planning
Interinstitutional Graduate Program
Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in Family Financial Planning. This is an interinstitutional distance education program offered entirely online. The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from each of the participating institutions: Iowa State University; Kansas State University; Montana State University; University of Nebraska; North Dakota State University; Oklahoma State University; South Dakota State University.

At Iowa State University, Family Financial Planning is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-FFP) that consists of 36 semester credits. Neither a thesis nor a creative component is required. Students typically complete the program in three years while employed full time. A computer with minimum specifications, Web access, and an email address are required for completing the program.

FFP Graduate Certificate Program
The Graduate Certificate in Family Financial Planning consists of the six courses from the MFCS-FFP that contain the competencies required for the Certified Financial Planner (CFP®) Certification Examination. Students interested in attaining the CFP® credential and not a master's degree should enroll in the certificate program.

Courses included in the FFP graduate certificate program include:

<table>

</table>

Both the Master's degree and Graduate Certificate programs at Iowa State University are registered with Certified Financial Planner Board of Standards Inc. As a CFP Board-registered Program, ISU FFP courses satisfy CFP Board’s education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP®, CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and examination requirements. (CFP Board of Standards web site: www.cfp.net (http://www.cfp.net).)

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.
Admission Procedures: Admission to the FFP Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section in the catalog.

Registration
Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Courses primarily for graduate students, open to qualified undergraduates:

**FFP 520: Financial Theory and Research I**
(3-0) Cr. 3. F.S.SS.
Theories of family functioning, macroeconomic theory related to family resource allocation decisions, the family as an economic unit, and the interaction of the economy and families. (on-line course offering via Distance Education).

**FFP 525: Financial Theory and Research II**
(3-0) Cr. 3. F.S.SS.
Microeconomic theory as it relates to family resource allocation decisions, theories of household behavior, the lifecycle hypothesis, behavioral economics, behavioral finance, theories of behavioral change, and psychological theories of family well-being. Focus on empirical research investigating household financial decision-making. (on-line course offering via Distance Education).

**FFP 530: Fundamentals of Family Financial Planning**
(3-0) Cr. 3. F.S.SS.
The nature and functioning of financial systems, including currencies, markets, monetary and fiscal policy, and supply/demand for land, labor, and capital. Focus is on the impact of global financial interdependence on individuals and families in the U.S. Current and emerging issues, as well as current research and theory relative to financial systems. (on-line course offering via Distance Education).

**FFP 535: Financial Counseling**
(3-0) Cr. 3. F.S.SS.
Theory and research regarding the interactive process between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, compensation, uses of technology to identify resources, information management, and current or emerging issues. (on-line course offering via Distance Education).

**FFP 540: Estate Planning for Families**
(3-0) Cr. 3. F.S.SS.
Fundamentals of the estate planning process, including estate settlement, estate and gift taxes, property ownership and transfer, and powers of appointment. Tools and techniques used in implementing an effective estate plan, ethical considerations used in providing estate planning services, and new and emerging issues in the field. Case studies provide experience in developing estate plans suitable for varied family forms. (on-line course offering via Distance Education).

**FFP 541: Housing and Real Estate in Family Financial Planning**
(Cross-listed with HD FS). (3-0) Cr. 3. Alt. SS., offered even-numbered years.
The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate. (on-line course offering via Distance Education).

**FFP 545: Retirement Planning, Employee Benefits, and the Family**
(3-0) Cr. 3. F.S.SS.
Study of micro and macro considerations for retirement planning. Survey of various types of retirement plans, ethical considerations in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits. (on-line course offering via Distance Education).

**FFP 550: Military Personal Financial Readiness**
(3-0) Cr. 3. F.S.SS.
Overview of the topics relevant to the financial planning process that address the unique needs of military service members and their families. (on-line course offering via Distance Education).

**FFP 555: Insurance Planning for Families**
(3-0) Cr. 3. F.S.SS.
In-depth study of risk management concepts, tools, and strategies for individuals and families, including life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-subsidized programs. Current and emerging issues and ethical considerations relative to risk management. Case studies provide experience in selecting insurance products suitable for individuals and family, study of investment options for clients including common stocks, fixed income securities, convertible securities, and related choices. Relationships between investment options and employee/employer benefit plan choices. Current and emerging issues and ethics are included. (on-line course offering via Distance Education).
FFP 565: Personal Income Taxation  
(3-0) Cr. 3. F.S.S.  
In-depth information on income tax practices and procedures including tax regulations, tax return preparation, the tax audit processes, the appeals process, preparation for an administrative or judicial forum, and ethical considerations of taxation. New and emerging issues related to taxation. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies. (on-line course offering via Distance Education).

FFP 570: Professional Practices in Financial Planning  
(3-0) Cr. 3. F.S.S.  
Challenges of managing financial planning practices including, but not limited to: business valuation, personnel, marketing, client services, ethics and technological applications. Relying both on a theoretical as well as an applied approach, students analyze case studies that provide relevant, practical exposure to practice management issues, with a strong emphasis on current research findings. (on-line course offering via Distance Education).

FFP 583: Investing for the Family’s Future  
(Cross-listed with HD FS). (3-0) Cr. 3. F.  
Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family’s overall financial and economic goals to help inform investment choices. (on-line course offering via Distance Education).

FFP 591: Practicum  
Cr. 3-6. F.S.S.  
Supervised experience in family financial planning.

FFP 595: Financial Planning - Case Studies  
(3-0) Cr. 3. F.S.S.  
Prereq: FFP 530, FFP 540, FFP 545, FFP 555, FFP 565, FFP 583  
Professional issues in financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Students are expected to utilize skills obtained in other courses and work experiences in the completion of personal finance case studies, the development of a targeted investment policy, and other related financial planning assignments. (on-line course offering via Distance Education).

Food Science (H SCI)  
Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. There are two options in food science, and both options are approved by the Institute of Food Technologists: food science and technology option, and food science and industry option.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Students select one of the following options and complete all requirements for that option: food science and technology option or food science and industry option. Courses listed below are required for all of the options, except where specified by option below.

Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.  
U.S. Diversity: 3 cr.  
Communications and Library: 10 cr.

Select at least 3 credits from:
- STAT 101 Principles of Statistics
- STAT 104 Introduction to Statistics
- STAT 105 Introduction to Statistics for Engineers

Total Credits: 7-8

**Physical Sciences: 14-20 cr.**

### Food science and technology option:
- CHEM 177 General Chemistry I 4
- CHEM 177L Laboratory in General Chemistry I 1
- CHEM 178 General Chemistry II 3
- CHEM 331 Organic Chemistry I 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- CHEM 332 Organic Chemistry II 3
- PHYS 111 General Physics 5
  - or PHYS 115 Physics for the Life Sciences and Laboratory in Physics for the Life Sciences

Total Credits: 20

### Food science and industry option:
- CHEM 163 College Chemistry 3
- & 163L and Laboratory in College Chemistry 1
- CHEM 177 General Chemistry I 4
  - & 177L and Laboratory in General Chemistry I 1
  - & CHEM 178 and General Chemistry II 1
- CHEM 231 Elementary Organic Chemistry 3
- CHEM 231L Laboratory in Elementary Organic Chemistry 1
- PHYS 111 General Physics 5
  - or PHYS 115 Physics for the Life Sciences and Laboratory in Physics for the Life Sciences 1

Total Credits: 14-17

**Biological Sciences: 12-13 cr.**

### Food science and technology option:
- BBMB 301 Survey of Biochemistry 3
  - or BBMB 316 Principles of Biochemistry 3
- BIOL 211 Principles of Biology I 3
- BIOL 212 Principles of Biology II 3
- MICRO 302 Biology of Microorganisms 3
- MICRO 302L Microbiology Laboratory 1

Total Credits: 49

### Food science and industry option:
Select 6 credits from the following business courses:
- ACCT 215 Legal Environment of Business 3
- ACCT 284 Financial Accounting 3
- ACCT 285 Managerial Accounting 3
- ECON 301 Intermediate Microeconomics 3

Total Credits: 13

**Food Science and Human Nutrition: 49 cr.**

### Food science and technology option:
- FS HN 101 Food and the Consumer 3
- FS HN 110 Professional and Educational Preparation 1
- FS HN 167 Introduction to Human Nutrition 3
- FS HN 203 Contemporary Issues in Food Science and Human Nutrition 1
- FS HN 207 Processing of Foods: Basic Principles and Applications 2
- FS HN 311 Food Chemistry 3
- FS HN 311L Food Chemistry Laboratory 1
- FS HN 315 Professional Development for Food Science Majors 2
- FS HN 351 Introduction to Food Engineering Concepts 3
- FS HN 403 Food Laws and Regulations 2
- FS HN 405 Food Quality Assurance 2
- FS HN 406 Sensory Evaluation of Food 3
- FS HN 407 Microbiological Safety of Foods of Animal Origins 3
- FS HN 410 Food Analysis 3
- FS HN 411 Food Ingredient Interactions and Formulations 2
- FS HN 412 Food Product Development 3
- FS HN 420 Food Microbiology 3
- FS HN 421 Food Microbiology Laboratory 3
- FS HN 422 Food Microbiology Laboratory 2
- FS HN 471 Food Processing 3
- FS HN 472 Food Processing Laboratory 2
- FS HN 480 Professional Communication in Food Science and Human Nutrition 1

Total Credits: 49

### Food science and industry option:
Select 6 credits from the following business courses:
- ACCT 215 Legal Environment of Business 3
- ACCT 284 Financial Accounting 3
- ACCT 285 Managerial Accounting 3
- ECON 301 Intermediate Microeconomics 3
**Electives: 0-12 cr. Select from any university coursework to earn at least 120 total credits.**

Go to FS HN courses.

Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary food science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science

Visit the department website at: www.fshn.hs.iastate.edu (http://www.fshn.hs.iastate.edu).

Undergraduate Study

Culinary Food Science

Culinary food science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary food science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/culinary-science/

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor’s and Master’s degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a $30 fee for a statement of verification of completion of the DPD. For information about verification statements policies, see the dietetics program website: http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/.

Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

Diet and Exercise

A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and
College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

**Food Science**

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

Two options are available in food science: food science and technology and food science and industry. Both options are approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. Students who have an interest in graduate study or research are encouraged to select the food science and technology option. Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/

Students in food science have the opportunity to pursue a Master of Business Administration (http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.

**Nutritional Science**

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/nutritional-science/

**Departmental Learning Outcomes**

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field. For more information: http://www.fshn.hs.iastate.edu/undergraduate-programs/outcomes/

**Communication Proficiency** is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

**Minors - Undergraduate**

The department offers coursework for a variety of minors (http://www.fshn.hs.iastate.edu/undergraduate-programs/minors). Minors available include:
• culinary food science
• food safety (interdepartmental minor)
• food science
• nutrition
• food and society

All minors have the following requirements:

• At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
• The minor must include at least 9 credits that are not used to meet any other college or university requirement.
• The same courses may not be applied to two different minors.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science, nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The Food Science and Technology (FST) graduate program offers MS and PhD degrees in the general areas of Food Chemistry and Functionality, Food Safety and Microbiology, and Food Processing. The FST core curriculum and interdisciplinary faculty team provides holistic graduate student training. Individuals with an undergraduate or graduate degree from a variety of academic training backgrounds, such as food sciences and the various disciplines of biology, chemistry, and agricultural sciences, may enter the FST program.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The three main departments are FSHN, Animal Science, and Kinesiology, whereas other departments (such as; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved. (See Nutritional Sciences interdepartmental graduate major).

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master's degree program may be admitted.

The department also offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Course topics include food microbiology, food defense, food toxicology, HACCP, and additional topics related to food safety. Students may be admitted if qualified for admission to the food science master's degree program.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to:

• Apply scientific thinking to the analysis, synthesis and evaluation of knowledge within the discipline of food science, nutritional sciences, or dietetics
• Apply ethical reasoning within the discipline of food science, nutritional sciences or dietetics
• Effectively communicate discipline-specific information in written and oral forms to scientific audiences
• Effectively interact within scientific teams
• Facilitate learning within FSHN courses

Minors - Graduate
The department offers coursework for graduate minors in:

- food science/technology
- nutritional sciences

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 501

Certificate - Undergraduate

Health Coach

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificate - Graduate

Food Safety and Defense

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program.

Dietetics Internship

The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a "Graduate Certificate in Dietetics Internship" which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) credential. There is a nonrefundable application fee of $75.

Courses primarily for undergraduates:

**FS HN 101: Food and the Consumer**

(3-0) Cr. 3. F.S.SS.
Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

**FS HN 102: Nutrition for Sport Performance**

(1-0) Cr. 1. F.S.

A scientific evaluation of dietary needs, dietary supplementation, and pop-culture claims relative to physical/sport performance. Discussion of safe and effective practices to enhance physical/sport performance.

**FS HN 104: Introduction to Professional Skills in Culinary Science**

(0-6) Cr. 1. S.

Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

**FS HN 110: Professional and Educational Preparation**

(1-0) Cr. 1. F.S.

Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation as well as enhancement of communication skills. Offered on a satisfactory-fail basis only.
FS HN 111: Fundamentals of Food Preparation  
(2-0) Cr. 2. F.S.  
Prereq: FS HN 101 or FS HN 167; high school chemistry or CHEM 160; concurrent enrollment in FS HN 115.  

FS HN 115: Food Preparation Laboratory  
(0-3) Cr. 1. F.S.  
Prereq: Credit or enrollment in FS HN 111 or FS HN 214  
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety.

FS HN 120: The Biochemistry of Beer  
(Cross-listed with BBMB). (2-0) Cr. 2. F.  
An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. Natural science majors are limited to elective credit only.

FS HN 167: Introduction to Human Nutrition  
(3-0) Cr. 3. F.S.S.  
Prereq: High school biology or 3 credits of biology  
Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

FS HN 203: Contemporary Issues in Food Science and Human Nutrition  
(1-0) Cr. 1. F.S.  
Introduction to presentation of published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, and communication.

FS HN 207: Processing of Foods: Basic Principles and Applications  
(1-3) Cr. 2. S.  
Prereq: FS HN 101  
Lecture and lab-based instruction on principles of food processing for preservation, raw food materials and their impact on food processing, food product-based discussion and activities highlighting required unit operations and resulting food quality and safety; water, heat, acidity, and oxygen effect on processing, separation and mixing operations, packaging materials properties and methods, and cleaning and sanitation in processing plants.

FS HN 214: Scientific Study of Food  
(3-0) Cr. 3. F.S.  
Prereq: FS HN 167 or FS HN 265; CHEM 231 or CHEM 331; plus concurrent enrollment in FS HN 115 or 215  

FS HN 215: Advanced Food Preparation Laboratory  
(0-6) Cr. 2. F.S.  
Prereq: Credit or enrollment in FS HN 214  
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation.

FS HN 242: The US Food System  
(3-0) Cr. 3. S.  
Exploration of the components of our food system including food production, food processing, and food access and the social, political and ethical influences on these components. Controversial topics related to how food is produced, processed, marketed and consumed will be discussed.  
Meets U.S. Diversity Requirement

FS HN 264: Fundamentals of Nutritional Biochemistry and Metabolism  
(3-0) Cr. 3. F.  
Prereq: FS HN 167; CHEM 163, CHEM 163L; BIOL 211  
Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies.

FS HN 265: Nutrition for Active and Healthy Lifestyles  
(3-0) Cr. 3. S.S.S.  
Prereq: FS HN 167, plus credit or enrollment in BBMB 301 or credit in FS HN 264  

FS HN 276: Understanding Grape and Wine Science  
(Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: High school biology and chemistry.  
A scientific introduction to viticulture (grape-growing) and enology (wine-making). Topics include grape species and varieties, viticulture practices, fruit quality, geography, history, principles of fermentation and aging, wine classification, appreciation, evaluation, storage and service, regulations, wine as food. No wine tasting.
FS HN 308: Dairy Products: Current Issues and Controversies
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Course will address milk chemistry, microbiology, handling, processing, regulations, organic production, and nutrition; dispel myths about dairy foods; improve critical thinking and communication skills. Students will participate in structured controversies.

FS HN 311: Food Chemistry
(3-0) Cr. 3. F.
Prereq: ENGL 250; CHEM 231 or CHEM 331; credit or enrollment in BBMB 301
The structure, properties, and chemistry of food constituents and animal and plant commodities.

FS HN 311L: Food Chemistry Laboratory
(0-3) Cr. 1. F.
Prereq: Credit or concurrent enrollment in FSHN 311.
The laboratory practices of structure, properties, and chemistry of food constituents.

FS HN 314: Foundations of Culinary Food Science
(1-0) Cr. 1. S.
Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

FS HN 315: Professional Development for Food Science Majors
(2-0) Cr. 2. F.
Prereq: Food Science major with at least a junior level status
Preparation for internships and careers in Food Science. Importance of soft skills and application of those skills to potential job situations.

FS HN 340: Foundations of Dietetic Practice
(1-0) Cr. 1. F.
Prereq: DIET or PDEX classification
Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on exploring career options in dietetics and preparation for a dietetic internship. Leadership and professional career development for the dietitian is addressed through self reflection, creation of materials for post-baccalaureate programs and job shadowing experience. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only.

FS HN 342: World Food Issues: Past and Present
(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.SS.
Prereq: Junior classification
Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/undernutrition, poverty, hunger, access, and distribution. Meets International Perspectives Requirement.

FS HN 351: Introduction to Food Engineering Concepts
(3-0) Cr. 3. F.
Prereq: MATH 160 or equivalent, PHYS 111 or equivalent, FS HN 207 or permission of the instructor.
Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer.

FS HN 360: Advanced Nutrition and the Regulation of Metabolism
(3-0) Cr. 3. F.
Prereq: ENGL 250, FS HN 265, 3 credits in biochemistry; 3 credits in physiology recommended
Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and the regulation of metabolism; nutrient-gene interactions.

FS HN 361: Nutrition and Health Assessment
(1-3) Cr. 2. S.
Prereq: FS HN 265; 3 credits in statistics; 3 credits in physiology recommended
The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status.

FS HN 362: Nutrition in Growth and Development
(3-0) Cr. 3. S.
Prereq: FS HN 360; credit or enrollment in a course in physiology
Molecular, biochemical and physiological basis to understand the nutritional aspects of human development and aging. Nutrient needs and various disease states at each stage of human life cycle.

FS HN 364: Nutrition and Prevention of Chronic Disease
(3-0) Cr. 3. F.
Prereq: FS HN 264 or FS HN 265 or accepted into Nursing major
Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed.
FS HN 365: Obesity and Weight Management  
(3-0) Cr. 3. S.  
Prereq: BIOL 256 and BIOL 256L, or BIOL 306, or accepted into Nursing major  
Multifactorial aspects of obesity, maintenance of healthy weight, and the relationship of weight status and chronic disease prevention. Traditional and novel nutrition and exercise theories as well as current popular diet and exercise trends will be discussed.

FS HN 366: Communicating Nutrition Messages  
(3-0) Cr. 3. S.  
Prereq: FS HN 264 or FS HN 265  
Theory and application of adult learning and behavior change as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to various models. Factors to consider in developing the nutrition education/intervention practicum experience. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach (print, radio, TV, newspaper, consumer publications, websites, community venues). Development of nutrition messages using various forms of media for a target population.

FS HN 367: Medical Terminology for Health Professionals  
(1-0) Cr. 1. F.S.S.  
An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations. (offered online only).

FS HN 403: Food Laws and Regulations  
(2-0) Cr. 2. S.S.  
Prereq: 3 credits in food science coursework at 200 level or above  

FS HN 404: Food Quality Assurance  
(Dual-listed with FS HN 505). (2-0) Cr. 2. S.  
Prereq: FS HN 214 or FS HN 311; STAT 101 or STAT 104  
Fundamentals of food quality management programs and the establishment of decision-making processes. Emphasis on statistical process and quality control procedures and their applications to food systems. Development of procedures, specifications, grades, and standards (government and industry) to determine the quality of foods in the marketplace.

FS HN 406: Sensory Evaluation of Food  
(Dual-listed with FS HN 506). (2-3) Cr. 3. F.  
Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics  
Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data.

FS HN 407: Microbiological Safety of Foods of Animal Origins  
(Dual-listed with FS HN 507). (Cross-listed with MICRO). (3-0) Cr. 3. S.  
Prereq: MICRO 420  
Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

FS HN 408: Dairy Products Evaluation  
(0-3) Cr. 1. S.  
Prereq: Permission of instructor  
Gain experience in identifying quality defects in dairy products including milk, cottage cheese, cheddar cheese, strawberry yogurt, butter, and vanilla ice cream. Intensive training for the National Collegiate Dairy Products Evaluation competition and for dairy product evaluation in the food industry.

FS HN 410: Food Analysis  
(2-3) Cr. 3. F.  
Prereq: FS HN 214 or FS HN 311 or CHEM 211  
An introduction to the theory and application of chemical and instrumental methods for determining the constituents of food. Use of standard procedures for food analysis and food composition data bases.

FS HN 411: Food Ingredient Interactions and Formulations  
(1-3) Cr. 2. F.S.  
Prereq: FSHN 214 or FS HN 311 and FS HN 115, FS HN 215 or FS HN 311L  
Application of food science principles to ingredient substitutions in food products. Laboratory procedures for standard formulations and instrumental evaluation, with emphasis on problem-solving and critical thinking.
FS HN 412: Food Product Development
(Dual-listed with FS HN 512). (1-6) Cr. 3. S.
Prereq: FS HN 311 or FS HN 411; senior classification
Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Some pilot plant experiences. Emphasis on teamwork and effective communication.

FS HN 419: Foodborne Hazards
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: MICRO 201 or MICRO 302, a course in biochemistry
Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Assessed service learning component. Only one of FS HN 419 and FS HN 519 may count toward graduation.

FS HN 420: Food Microbiology
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. F.
Prereq: MICRO 201 or MICRO 302
Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.

FS HN 421: Food Microbiology Laboratory
(Cross-listed with MICRO). (0-6) Cr. 3. S.
Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420
Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

FS HN 442: Issues in Food and Society
(2-0) Cr. 2. F.
Prereq: FS HN 242, FS HN 342
In-depth discussion, synthesis, and analysis of domestic and international food issues including: food systems from farm to fork, poverty and world hunger, overnutrition, population, agriculture and the environment, ethics, biotechnology, and policy.

FS HN 460: Global Nutrition
(Dual-listed with NUTRS 560 FS HN 560). (3-0) Cr. 3.
An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 461: Medical Nutrition and Disease I
(4-0) Cr. 4. F.
Prereq: FS HN 360, FS HN 361, FS HN 367; plus BIOL 256 and 256L or BIOL 306 or BIOL 335
(Dual-listed with NutrS 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 463: Community Nutrition
(3-0) Cr. 3. F.
Prereq: FS HN 265 or FS HN 360; FS HN 366 recommended
Dual-listed with NutrS 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis on written and oral communication at the lay and professional level. Field trip.
Meets U.S. Diversity Requirement

FS HN 464: Medical Nutrition and Disease II
(3-0) Cr. 3. S.
Prereq: FS HN 461
(Dual-listed with NutrS 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 466: Nutrition Counseling and Education Methods
(Dual-listed with FS HN 566). (2-2) Cr. 3. F.
Prereq: FS HN 361 and FS HN 362
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.
FS HN 467: Molecular Basis of Nutrition in the Development, Prevention, and Treatment of Disease
(3-0) Cr. 3. S.
Prereq: FS HN 360 or equivalent
Understanding the molecular basis for the role of nutrients, nutrient-derivatives, and bioactive compounds in the development, prevention, and treatment of common diseases including diabetes, cancer, vascular disease, obesity, neurological disease, aberrant mineral metabolism, and autoimmune disease. Translating this understanding into practical approaches for improving the health of individuals and populations.

FS HN 471: Food Processing
(3-0) Cr. 3. F.
Prereq: FS HN 351 or A E 451 or CH E 357; MICRO 201 or 302.
Principles and application of food processing using both thermal (ex., blanching, pasteurization, canning, drying, freezing, evaporation, aseptic processing, extrusion) and non-thermal (ex., high pressure, irradiation, pulsed electric field, fermentation) unit operations. Emphasis on microbial inactivation, process heat and mass balance, and numerical problem solving.

FS HN 472: Food Processing Laboratory
(1-3) Cr. 2. F.
Prereq: Credit or enrollment in FS HN 471 or A E 451 or CH E 357
Hands-on and demonstration laboratory activities related to food processing principles and applications using lab and pilot-scale equipment. Laboratory experiences include important food processing operations, e.g., blanching/ pasteurization, canning, freezing, drying, corn wet milling, fermentation, baking etc. Emphasis on mass balance, interpreting data, writing reports, and presentations. Occasional field trips.

FS HN 480: Professional Communication in Food Science and Human Nutrition
(1-0) Cr. 1. F.S.
Prereq: FS HN 203, senior classification in the department
Presentation of current topics using written and oral communication to a lay audience. Emphasis on communication skills for the profession.

FS HN 489: Issues in Food Safety
(Cross-listed with AN S, HSP M, VDPAM). (1-0) Cr. 1. S.
Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HSP M 233; FS HN 419 or FS HN 420; FS HN 403
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

FS HN 490: Independent Study
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490A: Independent Study: Dietetics
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490B: Independent Study: Food Science
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490C: Independent Study: Nutrition
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490D: Independent Study: International Experience
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490E: Independent Study: Entrepreneurship
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490F: Independent Study: Honors
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 491: Supervised Work Experience
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.
FS HN 491A: Supervised Work Experience: Dietetics
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major.
Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491B: Supervised Work Experience: Food Science
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major.
Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491C: Supervised Work Experience: Nutrition
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major.
Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491D: Supervised Work Experience: Culinary Science
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major.
Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 492: Research Concepts in Human Nutrition
(1-3) Cr. 2. F.
Prereq: senior classification or permission of instructor; FS HN 360
Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.

FS HN 493: Food Preparation Workshop
(1-3) Cr. 1-3.
Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.

FS HN 495: Practicum
(1-3) Cr. 2. F.S.
Prereq: Senior classification in Nutritional Science-Nutrition and Wellness option or permission of instructor; FS HN 366; credit or enrollment in FS HN 463.
Students will develop, implement and assess a community-based project that engages groups in learning and practicing concepts related to nutrition and wellness. Assessed service learning component. Offered on a satisfactory-fail basis only.

FS HN 496: Food Science and Human Nutrition Travel Course
(Dual-listed with FS HN 596). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled and 1 credit for pre-departure class, if offered.) Limited enrollment. Tour and study of food industry, culinary science, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 496A: Food Science and Human Nutrition Travel Course: International travel
(Dual-listed with FS HN 596A). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.

FS HN 496B: Food Science and Human Nutrition Travel Course: Domestic travel
(Dual-listed with FS HN 596B). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 498: Cooperative Education
Cr. R. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Permission of department chair.
Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only.

FS HN 499: Undergraduate Research
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of staff member with whom student proposes to work
Research under staff guidance. A maximum of 6 credits of FS HN 499 may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:
FS HN 505: Food Quality Assurance  
(Dual-listed with FS HN 405). (2-0) Cr. 2. S.  
Prereq: FS HN 214 or FS HN 311; STAT 101 or STAT 104  
Fundamentals of food quality management programs and the  
establishment of decision-making processes. Emphasis on statistical  
process and quality control procedures and their applications to food  
systems. Development of procedures, specifications, grades, and  
standards (government and industry) to determine the quality of foods in  
the marketplace.

FS HN 506: Sensory Evaluation of Food  
(Dual-listed with FS HN 406). (2-3) Cr. 3. F.  
Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics  
Sensory evaluation techniques used to evaluate the appearance, aroma,  
flavor, texture and acceptability of foods. Relationships between sensory  
and instrumental measurements of color and texture. Work independently  
and cooperatively (in a team) to identify sensory evaluation objectives,  
write hypotheses, design and conduct experiments, and analyze and  
interpret data.

FS HN 507: Microbiological Safety of Foods of Animal Origins  
(Dual-listed with FS HN 407). (Cross-listed with MICRO). (3-0) Cr. 3. S.  
Prereq: MICRO 420  
Examination of the various factors in the production of foods, from  
production through processing, distribution and final consumption  
which contribute to the overall microbiological safety of the food. Upon  
successful completion of this class, the student will receive both the  
Preventive Controls for Human Foods certificate (FDA program) and the  
International HACCP Alliance certificate (USDA-FSIS program).

FS HN 509: Sensory Evaluation of Wines  
Cr. 2. S.  
Prereq: Must be at least 21 years of age; senior or graduate status.  
Principles of sensory evaluation and their application to wine evaluation.  
Sensory testing methods such as discrimination tests, ranking,  
descriptive analysis and scoring of wines will be covered. Students will  
have the opportunity to evaluate and learn about major types and styles  
of wines of the world. Lab fee.

FS HN 511: Integrated Food Science  
(3-0) Cr. 3. F.  
Prereq: 3 credits in each of organic chemistry, physics, mathematics, and  
microbiology.  
Critical review of the key principles of food science and applications in  
the chemistry, microbiology, and processing of food. Understanding of the  
impact of processing on the quality of foods with respect to composition,  
quality and safety.

FS HN 512: Food Product Development  
(Dual-listed with FS HN 412). (1-6) Cr. 3. S.  
Prereq: FS HN 311 or FS HN 411; senior classification  
Principles of developing consumer packaged food products. Application  
of skills gained in food chemistry, formulation, quality, sensory and  
processing. Some pilot plant experiences. Emphasis on teamwork and  
effective communication.

FS HN 516: Advanced Nutrition I  
(2-0) Cr. 2. F.S.SS.  
Prereq: Acceptance in the Master’s of Professional Practice in Dietetics  
program.  
Examination of current literature relative to molecular, cellular, and  
physiologic aspects of macronutrient and micronutrient metabolism.  
Integration of current evidence-based information, including peer-  
reviewed literature, to inform advanced professional nutrition practice.

FS HN 517: Gut Microbiome: Implications for Health and Diseases  
(Cross-listed with AN S, MICRO, V MPM). Cr. 3.  
Prereq: Basic Knowledge in microbiology  
Explore current research on gut microbiome including modern tools  
used to study the gut microbiome. Examine the linkages between  
gut microbiome and health status, diseases, and manipulation of gut  
microbiome to improve health.

FS HN 518: Advanced Nutrition II  
(2-0) Cr. 2. F.S.SS.  
Prereq: Acceptance in the Master’s of Professional Practice in Dietetics  
program.  
Principles of research design/methods and interpreting results/statistics  
in the current peer-reviewed scientific literature. Critical evaluation of the  
evidence-base to inform advanced professional nutrition practice.

FS HN 521: Microbiology of Food  
(2-0) Cr. 2. S.SS.  
Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food  
Safety and Defense Graduate Certificate or permission of instructor.  
This course deals with the identification, enumeration, and  
characterization of bacteria, yeasts, and mold associated with foods and  
food processing. Effects of physical and chemical agents on micro-  
organisms will be studied. Microbiological problems in food spoilage,  
food preservation, food fermentation, and food-borne disease will be  
discussed. Offered online only.
FS HN 522: Advanced Food Microbiology and Biotechnology
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: Food microbiology, a course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will cover basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Students will be introduced to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and down-stream processing techniques, and regulatory aspects of food biotechnology. Offered online only.

FS HN 523: A Multidisciplinary Overview of Food Safety and Security
(2-0) Cr. 2. F.SS.
Prereq: A course in biology or chemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. Offered online only.

FS HN 524: Food Microbiology
(3-0) Cr. 3. F.
Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products. Offered online only.

FS HN 525: Principles of HACCP
(2-0) Cr. 2. F.
Prereq: Undergraduate biology and chemistry courses; enrollment in GP-IDEA Food Safety and Defense Certificate or permission of instructor.
A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. Offered online only.

FS HN 526: Ethnic Foods: Food Safety, Food Protection and Defense
(2-0) Cr. 2. SS.
Prereq: Graduate standing; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. Offered online only.

FS HN 527: Microbiology of Fermented Foods
(2-0) Cr. 2. SS.
Prereq: Food microbiology; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. Offered online only.

FS HN 528: Food Protection and Defense-Essential Concepts
(2-0) Cr. 2. S.
Prereq: Enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. Offered online only.

FS HN 529: Foodborne Toxicants
(Cross-listed with TOX). (2-0) Cr. 2. F.
Prereq: A course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxicants of current interest, design of HAACP plans for use in food industries targeting foodborne toxicants, discussion of toxicants from a food defense perspective. Offered online only.

FS HN 538: Advanced Medical Nutrition Therapy
(3-0) Cr. 3. F.S.SS.
Prereq: Acceptance in the Master’s of Professional Practice in Dietetics program.
Nutritional biochemistry and physiology related to selected pathophysiology of disease with emphasis on treatment of complex medical problems. The nutrition care process will be utilized. Evidence-based practice will be integrated into each disease state covered. Offered WWW only.

FS HN 542: Introduction to Molecular Biology Techniques
(Cross-listed with B M S, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.
FS HN 542A: Introduction to Molecular Biology Techniques: DNA Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

FS HN 542B: Introduction to Molecular Biology Techniques: Protein Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.S.S.
Prereq: Graduate classification
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

FS HN 542C: Introduction to Molecular Biology Techniques: Cell Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

FS HN 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transormants. Offered on a satisfactory-fail basis only.

FS HN 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

FS HN 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

FS HN 542G: Introduction to Molecular Biology Techniques: Genomic Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

FS HN 554: Dietetic Internship I
(0-22) Cr. 5. S.S.S.
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 555: Dietetic Internship II
(0-18) Cr. 5. F.S.
Prereq: Concurrent enrollment or successful completion of FS HN 554
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 556: Dietetic Internship III
(0-22) Cr. 5. F.S.
Prereq: Concurrent enrollment or successful completion of FS HN 554 and FS HN 555
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 560: Global Nutrition
(Dual-listed with FS HN 460). (Cross-listed with NUTRS). (3-0) Cr. 3.
An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 566: Nutrition Counseling and Education Methods
(Dual-listed with FS HN 466). (Cross-listed with DIET). (2-2) Cr. 3. F.
Prereq: FS HN 361 and FS HN 362
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.
FS HN 575: Processed Foods
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: FS HN 214 or FS HN 311; a course in nutrition
This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease.

FS HN 580: Orientation to Food Science and Nutrition Research
(1-0) Cr. 1. F.
Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN. Offered on a satisfactory-fail basis only.

FS HN 581: Seminar
(1-0) Cr. 1. S.
Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Intended for graduate students in their first or second semester in FS HN.

FS HN 590: Special Topics
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590A: Special Topics: Nutrition
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590B: Special Topics: Food Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590C: Special Topics: Teaching
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 595: Grant Writing for the Professional
(Cross-listed with DIET). (3-0) Cr. 3. SS.
Prereq: enrollment in GP-IDEA MCFCS in Dietetics
Grant writing, identifying external funding, managing grants, preparing manuscripts for peer-reviewed publication, and preparing papers and poster for presentation at professional meetings.

FS HN 596A: Food Science and Human Nutrition Travel Course: International travel
(Dual-listed with FS HN 496A). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 596B: Food Science and Human Nutrition Travel Course: Domestic travel
(Dual-listed with FS HN 496B). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 597: Nutritional Aspects of Oncology
(Cross-listed with DIET, NUTRS). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: B.S. in nutrition, dietetics, biology, or related discipline.
Understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management.

FS HN 599: Creative Component
Cr. arr.
Nonthesis option only.

Courses for graduate students:

FS HN 606: Advanced Food Analysis and Instrumentation
(2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: FS HN 311, or FS HN 410, or FS HN 511 or equivalent.
Instrumental methods for measuring chemical and physical properties of foods, food quality and functionality. Techniques for methods development, sample preparation, optimization of operating conditions, and data analysis needed to obtain accurate, reproducible results by means of instrumentation.

FS HN 611: Advanced Food Processing
(Cross-listed with BRT). (3-0) Cr. 3. F.
Prereq: FS HN 311, or FS HN 471/7472 or equivalent, or FS HN 511.
Recent advances in the science and technology of food processing and preservation; examples include both thermal and non-thermal processes, including cold plasma, nanotechnology, food packaging, and extrusion. Advances in extraction and separation technologies, waste management, by-product utilization, biorenewables and sustainability in food processing industry will also be discussed. Students to research on select topics and present.

FS HN 612: Advanced Food Chemistry
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: FS HN 311, or FS HN 411, or FS HN 511, or BBMB 404, or equivalent.
Structure, chemical and physical properties of lipids, proteins and carbohydrates, and their food and industrial applications. Changes in functionalities during processing and storage.
FS HN 626: Advanced Food Microbiology
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

FS HN 627: Rapid Methods in Food Microbiology
(Cross-listed with MICRO, TOX). (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

FS HN 681: Seminar
(1-0) Cr. 1. Repeatable, maximum of 2 credits. F.S.S.S.
Presentation of thesis or dissertation research. Must be taken once for each graduate program; once for the M.S. program and once for the Ph.D. program.

FS HN 682: Seminar Reflection
Cr. R. Repeatable. F.S.
Active listening and critical thinking activities related to research seminars in food science and human nutrition. Required each semester for all FSHN graduate students. Electronic documentation.

FS HN 690: Special Problems
Cr. arr. Repeatable. F.S.S.S.
Prereq: FS HN 502 or FS HN 503 or FS HN 504 or FS HN 553 or FS HN 554
FS HN 695: Grant Proposal Writing
(Cross-listed with NUTRS). (1-0) Cr. 1. F.
Prereq: 3 credits of graduate course work in food science and/or nutritional sciences
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutritional sciences. Discussion of the role of successful grant writing in career development.

FS HN 699: Research in Food Science and Technology
Cr. arr. Repeatable. F.S.S.S.
Offered on a satisfactory-fail basis only.

The gerontology program is designed for students desiring careers in aging-related fields and for students interested in improving their understanding of aging persons in American society. Students are expected to take courses to develop the necessary interdisciplinary breadth which, in combination with other disciplinary training, can prepare them to work with older adults.

Graduates understand the ways in which individual and societal aging influence, and are impacted by, developments in their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of human aging.

Gerontology courses are offered in the interdepartmental gerontology program in the following participating departments and programs: Architecture; Biochemistry, Biophysics, and Molecular Biology; Economics; Apparel, Educational Studies, and Hospitality Management, Food Science and Human Nutrition; Kinesiology; Human Development and Family Studies; Political Science; Psychology; and Sociology.

Undergraduate Study
Undergraduate study in this program provides the student with an opportunity to develop a minor in gerontology. A balanced grouping of courses assists the student in developing both a sensitivity to the issues and the ability to synthesize ideas from the variety of disciplines important to the study of the aging process.

Minor
Undergraduate students may minor in gerontology by taking 16 semester hours of gerontology related courses. Nine of these credits must come from the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERON 373</td>
<td>Death as a Part of Living</td>
<td>3</td>
</tr>
<tr>
<td>GERON 377</td>
<td>Aging and the Family</td>
<td>3</td>
</tr>
<tr>
<td>GERON 378</td>
<td>Retirement Planning and Employee Benefits</td>
<td>3</td>
</tr>
<tr>
<td>GERON 463</td>
<td>Environments for the Aging</td>
<td>3</td>
</tr>
</tbody>
</table>

Students will participate in a prepracticum seminar, GERON 466 Gerontology Prepracticum Seminar, and will complete a supervised field practicum after all gerontology coursework is completed (GERON 467 Gerontology Practicum). A minimum of 3 semester credits must be selected from a list of supportive gerontology related courses. Supportive courses include units or topics related to aging and can be used to complement the student’s major interests. The student's minor program must be approved by the undergraduate gerontology coordinator.

Graduate Study
A declared graduate minor in gerontology consists of a minimum of 12 credits taken from a list of acceptable courses, and from at least two departments. Nine of the 12 credits must be in courses that are focused specifically on aging. One 590 course (3 credits maximum) can be taken
as part of the 12 credits. GERON 510 Survey of Gerontology is required for all minor students. At least one member of the gerontology faculty will be on a student's advisory committee; this person must be a member of the Graduate Faculty. Contact the coordinator to determine whether courses other than those listed below are available.

**Interinstitutional Program**

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in gerontology. This is an interinstitutional distance education program offered through the Web. The student selects the home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the seven institutions: Iowa State University, Kansas State University, North Dakota State University, Oklahoma State University, Texas Tech University, the University of Arkansas, and the University of Missouri.

The master's degree consists of 36 semester hours, 24 of these hours are from the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERON 530</td>
<td>Perspectives in Gerontology</td>
<td>3</td>
</tr>
<tr>
<td>GERON 534</td>
<td>Adult Development</td>
<td>3</td>
</tr>
<tr>
<td>GERON 540</td>
<td>Nutrition and Physical Activity in Aging</td>
<td>3</td>
</tr>
<tr>
<td>GERON 545</td>
<td>Economics, Public Policy, and Aging</td>
<td>3</td>
</tr>
<tr>
<td>GERON 563</td>
<td>Environments for the Aging</td>
<td>3</td>
</tr>
<tr>
<td>GERON 577</td>
<td>Aging in the Family Setting</td>
<td>3</td>
</tr>
<tr>
<td>GERON 584</td>
<td>Program Evaluation and Research Methods in Gerontology</td>
<td>3</td>
</tr>
<tr>
<td>GERON 594</td>
<td>Professional Seminar in Gerontology</td>
<td>3</td>
</tr>
</tbody>
</table>

The remaining 12 credits will include electives and specific courses needed to meet the requirements of the institution awarding the degree. Neither a thesis nor a creative component is required.

**Gerontology Graduate Certificate Program**

The 21-credit Graduate Certificate Program in Gerontology includes the following courses from the list of core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERON 530</td>
<td>Perspectives in Gerontology</td>
<td>3</td>
</tr>
<tr>
<td>GERON 534</td>
<td>Adult Development</td>
<td>3</td>
</tr>
<tr>
<td>GERON 540</td>
<td>Nutrition and Physical Activity in Aging</td>
<td>3</td>
</tr>
<tr>
<td>GERON 594</td>
<td>Professional Seminar in Gerontology</td>
<td>3</td>
</tr>
</tbody>
</table>

The additional six credits required for the certificate can be chosen from the remaining core courses or from other approved elective courses. A maximum of three credits of practicum also can be included in the elective credits.

**Courses for Undergraduates**

**GERON 234: Adult Development**  
(Cross-listed with HD FS). (3-0) Cr. 3. S.  
*Prereq: HD FS 102 or PSYCH 230*  
Introductory exploration of the health, individual and social factors associated with adult development including younger adulthood, middle age and older adulthood. Information is presented from a life-span developmental framework.

**GERON 373: Death as a Part of Living**  
(Cross-listed with HD FS). (3-0) Cr. 3. F.S.Alt. SS., offered even-numbered years.  
*Prereq: HD FS 102*  
Consideration of death in the life span of the individual and the family with opportunity for exploration of personal and societal attitudes.

**GERON 377: Aging and the Family**  
(Cross-listed with HD FS). (3-0) Cr. 3. F.Alt. SS., offered odd-numbered years.  
*Prereq: HD FS 102*  
Interchanges of the aged and their families. Emphasis on role changes, social interaction, and independence as influenced by health, finances, life styles, and community development.  
Meets U.S. Diversity Requirement

**GERON 378: Retirement Planning and Employee Benefits**  
(Cross-listed with ECON, HD FS). (3-0) Cr. 3. S.  
*Prereq: 3 credits in introductory economics*  
Economic well-being in the context of demographic change, the present and future of Social Security, family retirement needs analysis, investment strategies and characteristics of retirement plans, helping others to work towards financial security, family economic issues for retired persons. Overview of employee and retirement benefits.  
Meets U.S. Diversity Requirement

**Admission Procedures:** Admission to the Gerontology Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of the catalog.

**Registration:** Students choosing to receive their degree from Iowa State University complete all the admissions, registration, and fee payment processes through ISU.
GERON 414: Gerontechnology in Smart Home Environments  
(3-0) Cr. 3. F.  
Prereq: Com S 227 or (Com S 207 or Geron 377 or ArtGr 271) or equivalent.  
An interdisciplinary course designed for students who are interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students will work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. For graduate credit students are required to submit a research report and give an oral presentation.

GERON 415: Gerontechnology in Smart Home Environments  
(3-0) Cr. 3. F.  
Prereq: Com S 227 or (Com S 207 or Geron 377)  
An interdisciplinary course designed for students who are interested in assistive technology, pervasive computing, mobile computing and principles of universal software design for end users, in particular the elderly population. Students will have the chance to learn both about the theories and principles about aging and assistive technology, as well as to engage in the practical semester-long project while working with students from other disciplines.

GERON 463: Environments for the Aging  
(Dual-listed with GERON 563). (Cross-listed with ARTID, HD FS). (3-0) Cr. 3. S.  
Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies or permission of instructor  
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (on-line course offering via Distance Education).  
Meets U.S. Diversity Requirement

GERON 466: Gerontology Prepracticum Seminar  
(1-0) Cr. 1. F.S.S.  
Prereq: 9 credits in core courses for the gerontology minor and approval of the gerontology undergraduate coordinator  
Prepracticum training for students planning a gerontology practicum. Exploration of possible agencies for the practicum, in-depth study of a selected agency, and development of goals and objectives for the practicum.

GERON 467: Gerontology Practicum  
Cr. 3-6. Repeatable. F.S.S.  
Prereq: GERON 466, advance reservation  
Supervised field experience related to aging. Offered on a satisfactory-fail basis only.

GERON 490: Independent Study  
Cr. arr.  
Consult program coordinator for procedure.

Courses primarily for graduate students, open to qualified undergraduates:

GERON 501: Seminar  
Cr. arr. Repeatable. F.S.S.  
GERON 510: Survey of Gerontology  
Cr. 1-3. Repeatable. S.  
Provides an overview of important gerontological issues.

GERON 514: Gerontechnology in Smart Home Environments  
(3-0) Cr. 3. F.  
Prereq: COM S 227 or (COM S 207 or GERON 377 or ARTGR 271) or equivalent.  
An interdisciplinary course designed for students who are interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students will work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. For graduate credit students are required to submit a research report and give an oral presentation.

GERON 520: Women and Aging  
(3-0) Cr. 3. SS.  
Women and Aging is the study of theory, research and application of issues related to women and the aging experience. This course will examine gender differences in areas such as health, mental health, income security, crime, and public policy. Attention will be given to ways in which younger women can prepare to meet the challenges and opportunities awaiting them as they age.

GERON 521: Biological Principles of Aging  
(3-0) Cr. 3. SS.  
Basic biological principles of aging. Course modules include an introduction to the aging process, body systems and normal aging, and environment and the biology of aging. In addition, disorders and diseases of aging, prevention and treatment and exercise and aging topics will be covered.

GERON 522: Long-Term Care  
(3-0) Cr. 3. F.  
Administration principles involved in the planning, organizing and directing of long-term care agencies. Includes an in-depth exposure to federal and state standards and regulations governing long-term care.
GERON 523: Mental Health and Aging  
(3-0) Cr. 3. S. 
Introduction to the range of issues involved in aging and mental health. From a systems framework the major emotional and psychiatric problems encountered in old age will be examined including mood, anxiety, adjustment and personality disorders, dementia, cognitive problems, substance abuse, and suicide. Barriers to treatment and cohort and cultural issues will be explored.

GERON 524: Cognitive Health  
(3-0) Cr. 3. SS. 
Cognitive skills form the foundation for functioning in everyday life and these skills take on added importance in older adulthood. This course focuses on selected theoretical approaches and current research related to cognitive aging. We will review normative and non-normative cognitive changes, assessment techniques, and prevention/intervention efforts. Throughout the course we will keep the role of environment and life-span implications in the forefront of our discussion.

GERON 530: Perspectives in Gerontology  
(Cross-listed with HD FS). (3-0) Cr. 3. F. 
Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future. (on-line course offering via Distance Education).

GERON 534: Adult Development  
(Cross-listed with HD FS). (3-0) Cr. 3. S. 
Exploration of the biological, psychological and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed. (on-line course offering via Distance Education).

GERON 540: Nutrition and Physical Activity in Aging  
(Cross-listed with DIET). (3-0) Cr. 3. F. 
WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

GERON 545: Economics, Public Policy, and Aging  
(Cross-listed with HD FS). (3-0) Cr. 3. F. 
Policy development in the context of the economic status of the older adult population. Retirement planning and the retirement decisions; social security and public transfer programs; intra-family transfers to/from the aged; private pensions; financing medical care; prospects and issues for the future.

GERON 563: Environments for the Aging  
(Dual-listed with GERON 463). (Cross-listed with ARTID, HD FS). (3-0) Cr. 3. S. 
Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies or permission of instructor 
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (on-line course offering via Distance Education). 
Meets U.S. Diversity Requirement

GERON 571: Design for All People  
(Cross-listed with ARCH). (3-0) Cr. 3. S. 
Prereq: Graduate or Senior classification 
Principles and procedures of inclusive design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of History, Theory, Culture requirements. 
Meets U.S. Diversity Requirement

GERON 577: Aging in the Family Setting  
(Cross-listed with HD FS). (3-0) Cr. 3. S. 
Prereq: 9 credits in social sciences or permission of instructor 
Theories and research related to personal and family adjustments in later life affecting older persons and their intergenerational relationships. Related issues including demographics also are examined through the use of current literature. (on-line course offering via Distance Education).

GERON 584: Program Evaluation and Research Methods in Gerontology  
(Cross-listed with HD FS). (3-0) Cr. 3. S. 
Overview of program evaluation, research methods, and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings. (on-line course offering via Distance Education).

GERON 590: Special Topics  
Cr. arr. Repeatable. 
Consult program coordinator for procedure.

GERON 591: Internship  
Cr. 1-9. Repeatable, maximum of 9 credits. F.S.SS. 
Supervised experience in an area of gerontology.
GERON 594: Professional Seminar in Gerontology
(Cross-listed with HD FS), (3-0) Cr. 3, SS
An integrative experience for gerontology students designed to be taken near the end of the degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, professionalism, family and workplace issues. Students from a variety of professions will bring their unique perspectives to bear on topics of common interest. (on-line course offering via Distance Education).

GERON 599: Creative Component
Cr. arr. Repeatable. F.S.S.

Courses for graduate students:

GERON 635: Adult Development, Aging, and Health
(Cross-listed with HD FS), (3-0) Cr. 3, Alt. F., offered odd-numbered years.
Prereq: HD FS 510 or permission of instructor
Review of the impact of the growing older adult population as well as individual development and aging on individuals, families, and society. Exploration of theoretical perspectives applied to adult development and aging and distinction of normative and non-normative changes in adulthood. Discussion of methods to assess development across adulthood and consideration of the role of individual and environmental factors impacting efforts to optimize adult development. (on-line course offering via Distance Education).

GERON 699: Research
Cr. arr. Repeatable. F.S.S.

Hospitality Management
Administered by the Department of Apparel, Events, and Hospitality Management
The Hospitality Management program offers study for the degree of Bachelor of Science with a major in hospitality management. As the only 4-year hospitality program in the state of Iowa, the program prepares undergraduate students with essential principles of managing a variety of hospitality organizations, such as hotels, restaurants, clubs, and foodservice companies. Students also develop expertise in managing diverse areas, such as accounting and finance, human resources, marketing, foodservice, tourism, and lodging.

Students get hands-on experience at the Joan Bice Underwood Tearoom, a 105-seat learning laboratory where students take responsibility for meal preparation and service. The Joan Bice Underwood Tearoom is the earliest established student run restaurant that is still in operation on a college campus in the United States.

Our students participate in internships locally, nationally, and internationally with a range of hotels, restaurants, caterers, theme parks, sports facilities, cruise ships convention and visitor’s bureaus, independent businesses, and country clubs. Courses provide students with opportunities to develop and apply management techniques in hospitality organizations. The Hospitality Management curriculum provides students with the opportunity to obtain professional certifications in multiple areas.

The Hospitality Management program mission is to create, share, and apply knowledge to provide hospitality consumers with products, services, and experiences to enhance overall well-being. We accomplish our mission with a personalized, nationally ranked program. Our students learn in a nurturing, safe, and inclusive environment, with caring faculty with industry experience.

The Bachelor of Science Degree
Total credits required: 123, including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree.

Minor in Hospitality Management
The Hospitality Management minor (HSPM) requires the completion of at least 15 credits from the Hospitality Management curriculum. The minor must include at least 6 credits in courses numbered 300 or above taken at ISU. All course pre-requisites must be completed prior to taking the course. All minor courses must be taken for a grade.

Undergraduate Study
The program offers a Bachelor of Science degree in hospitality management. Coursework is planned to provide students with a general education plus professional preparation for supervisory and executive positions in hospitality organizations such as clubs, hotels, dining, theme parks, cruise lines, and casinos. Principles of business management are presented, as well as fundamentals of hospitality operations.

Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, marketing, and operational principles for managing hospitality operations. They demonstrate best practices in meeting customer expectations and use of technology (e.g., Point-of-Sales systems, property management systems, and revenue management systems) to achieve operational efficiency and effectiveness.

Learning experiences are provided in the quantity food production and service facility of the Hospitality Management program and other approved establishments. Students are required to have a total of at least 800 hours of relevant work experience prior to graduation. Of the 800 hours, 200 hours are required prior to completing one year in the program.
The program offers a concurrent B.S. and M.S. degree that allows students to obtain a B.S. and M.S. degree in hospitality management in 5 years. Application for admission to the Graduate College should be made in the junior year.

Minor
A minor in Hospitality Management may be earned by successfully completing at least 15 credits of AESHM/HSP M courses. The minor must include at least six (6) credits in courses numbered 300 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade.

The Hospitality Minor requires students to complete HSP M 101 and HSP M 233. The remaining 9 credits may be selected from any HSP M designated course, as well as AESHM 238, AESHM 287, AESHM 474, and A M D 477.

Curriculum in Hospitality Management
Administered by the Apparel, Events, and Hospitality Management Department. Leading to the Bachelor of Science degree.

The curriculum in Hospitality Management develops students as leaders for the hospitality professions.

A minor in Hospitality Management is available; see requirements under Hospitality Management, Courses and Programs.

Students majoring in Hospitality Management are required to earn C- or better in all AESHM and HSP M courses. Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Degree Requirements
10 Communications and Library
ENGL 150  Critical Thinking and Communication  Grade of C or better required in ENGL 150 and ENGL 250  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
LIB 160  Information Literacy  1
Select one from the following:
COMST 102  Introduction to Interpersonal Communication  3
COMST 214  Professional Communication
SP CM 212  Fundamentals of Public Speaking
Total Credits  10

5-10 Natural Sciences and Mathematical Disciplines
Select one MATH course from: AESHM 175D required if C+ or lower in MATH credits
MATH 104  Introduction to Probability
MATH 105  Introduction to Mathematical Ideas

MATH 140  College Algebra
MATH 150  Discrete Mathematics for Business and Social Sciences
MATH 160  Survey of Calculus
FS HN 167  Introduction to Human Nutrition  3
STAT 101  Principles of Statistics  3-4
or STAT 104  Introduction to Statistics
Total Credits  9-10

9 Social Sciences
ECON 101  Principles of Microeconomics  3
PSYCH 101  Introduction to Psychology  3
SOC 134  Introduction to Sociology  3
Total Credits  9

6 Humanities
AESHM 342  Aesthetics of Consumer Experience  3
Approved courses  3
Total Credits  6

59 Hospitality Management Professional Core Courses
AESHM 170  Supervised Work Experience I  1
AESHM 211  Leadership Experiences and Development (LEAD)  3
AESHM 238  Human Resource Management  3
AESHM 270D  Supervised Work Experience II: Hospitality  2
AESHM 340  Hospitality and Apparel Marketing Strategies  3
AESHM 411E  Seminar on Current Issues: Events and Hospitality  1
HSP M 101  Introduction to the Hospitality Industry  3
HSP M 133  Food Safety Certification  1
HSP M 230  Introduction to Hospitality Performance Analysis  3
HSP M 233  Hospitality Sanitation and Safety  3
HSP M 280  Non-alcoholic Beverages and Café Operations  3
HSP M 315  Hospitality Law  3

**13 Hospitality Management electives**

Select from:

- A M D 477 Omni-Channel Retailing
- AESHM 180E First Year Student Field Study: Hospitality and Event Management
- AESHM 222 Creativity on Demand
- AESHM 281 Orientation to International Field Study or AESHM 381D International Field Study: Hospitality Management
- AESHM 474 Entrepreneurship in Human Sciences
- EVENT courses totalling 6 cr
- HSP M 189 Introduction to University Dining Services Management
- HSP M 201 Casino Management I
- HSP M 260 Global Tourism Management
- HSP M 289 Contemporary Club Management
- HSP M 301X Hospitality Revenue Management
- HSP M 320 Attractions and Amusement Park Administration
- HSP M 383 Introduction to Wine, Beer, and Spirits
- HSP M 383L Introduction to Wine, Spirits, and Mixology Laboratory
- HSP M 431 Case Studies in Event Management
- HSP M 437 Hospitality and Event Technology Applications
- 13 Hospitality Management electives

**Total Credits** 59-62

**8-9 Other Professional Courses**

- ACCT 284 Financial Accounting
- AESHM 112 Orientation for AESHM
- AESHM 113E Professional Development for AESHM: Event and Hospitality Management - Directions Learning Community
- AESHM 213 Transitions: Pre-Professional Strategies and Career Explorations
- FS HN 111 Fundamentals of Food Preparation *
- FS HN 115 Food Preparation Laboratory

**Total Credits** 42

* A student who has not had high school chemistry is required to take CHEM 160 Chemistry in Modern Society

**7-8 Electives**

123.0 Total credits
Graduate Study

The Hospitality Management program offers work for the Master of Science and Doctor of Philosophy degrees in hospitality management. Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. The Master's degree program is designed to prepare individuals for managerial and leadership positions in industry, business, and non-profit organization; teaching careers; and continued graduate study.

The doctoral program is designed to prepare individuals to teach in programs at the university level; provide leadership in non-profit organizations; and/or conduct advanced research at the corporate level or with research firms.

A degree in hospitality management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or closely related fields are encouraged to apply. PhD applicants must have two (2) years of professional work experience in the field.

The Master of Science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take three core courses out of the four offered in the core areas (human resources, financial management, marketing, and strategic management).

The PhD program requires a minimum of 72 credits, up to 30 of which may be applied from the Master's degree. All PhD students take a minimum of 15 research/dissertation credits.

Courses primarily for undergraduates:

HSP M 101: Introduction to the Hospitality Industry
(3-0) Cr. 3. F.S.
Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry.

HSP M 133: Food Safety Certification
(1-0) Cr. 1. F.S.
Introduction to safety and sanitation principles in foodservice operations. Characteristics of food, supplies, and equipment as related to quality, sanitation, and safety are discussed. Application of sanitation principles in restaurants are covered as well. Students must pass a National Sanitation Certification Examination to receive credit. Offered on a satisfactory-fail basis only.

HSP M 189: Introduction to University Dining Services Management
(1-0) Cr. 1. Alt. S., offered even-numbered years.
Overview of management concepts and distinct features of university dining services.

HSP M 201: Casino Management I
(3-0) Cr. 3. F.
An overview of the gaming industry. Emphasis will be placed on examination of the history and development of gaming, casino operations, casino games, marketing of the core gaming products, and social and economic impacts of the gaming industry.

HSP M 230: Introduction to Hospitality Performance Analysis
(3-0) Cr. 3. F.S.
Introduction to Uniform Systems of Accounts for hospitality industry. Profitability, income statements, budgeting, managing cash, accounts receivable and payable, costs control, pricing, and evaluation related to restaurant, lodging, and club industry. Preparation for a hospitality accounting certification exam.

HSP M 233: Hospitality Sanitation and Safety
(3-0) Cr. 3. F.S.
Sanitation and safety principles in hospitality operations. Issues impacting consumers and operators. Characteristics of food, supplies, and equipment as related to quality, sanitation and safety. Application of HACCP.
HSP M 260: Global Tourism Management
(3-0) Cr. 3. F.S.
Overview of the global tourism industry: hospitality and related services, destination/attractions, tourist behaviors, and destination marketing. Introduction to destination mix, socio-economic and cultural impacts of tourism, destination organizations, tourist motivations, destination image, marketing, promotions, tourism distribution system, and the future of tourism.
Meets International Perspectives Requirement.

HSP M 280: Non-alcoholic Beverages and Café Operations
(3-1) Cr. 3. F.S.
Prereq: HSP M 101, HSP M 133
Advanced knowledge, preparation, and service of non-alcoholic beverages applied for café operations.

HSP M 289: Contemporary Club Management
(Cross-listed with EVENT). (3-0) Cr. 3. F.S.
Prereq: HSP M 101
Organization and management of private clubs including city, country, and other recreational and social clubs. Field trip may be required.

HSP M 290: Independent Study
Cr. 1-2. Repeatable, maximum of 4 credits. F.S.S.
Prereq: Freshman or Sophomore classification. Permission of instructor, adviser, and department chair.
Independent study on topics of special interest to the student, facilitated by approved faculty member. Maximum of 9 credits combined of HSP M 290 and HSP M 490 can be applied to graduation.

HSP M 315: Hospitality Law
(3-0) Cr. 3. S.
Prereq: HSP M 101
Laws relating to ownership and operation of hospitality organizations. The duties and rights of both hospitality business operators and customers. Legal implications of various managerial decisions.

HSP M 320: Attractions and Amusement Park Administration
(Cross-listed with EVENT). (3-0) Cr. 3. S.
Prereq: HSP M 101 or permission of instructor
Examination of current issues in the attractions and amusement park industry. Emphasis will be placed on development and design along with the functional departments of modern amusement parks and themed attractions.

HSP M 333: Hospitality Operations Cost Controls
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in HSP M 380, HSP M 380L; 3 credits MATH and HSP M 230
Introduction to revenue and cost systems in the hospitality industry. Application of principles related to procurement, production, and inventory controls.

HSP M 352: Lodging Operations Management I
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in HSP M 101
Introduction to functional department activities and current issues of lodging organizations with emphasis on front office and housekeeping. Reservation activities and night audit exercises. Case studies.

HSP M 380: Food Production Management
(3-0) Cr. 3. F.S.
Prereq: HSP M 233 or 2 cr MICRO; FS HN 111 or FS HN 214; FS HN 115 or FS HN 215; at least junior classification; enrollment in HSP M 380L
Principles of and procedures used in quantity food production management including menu planning, food costing, work methods, food production systems, quality control, and service.

HSP M 380L: Food Production Management Experience
(1-6) Cr. 3. F.S.
Prereq: HSP M 233 or 2 cr MICRO; FS HN 111 or FS HN 214; FS HN 115 or FS HN 215; at least junior classification; enrollment in HSP M 380
Application of quantity food production and service management principles and procedures in the program's foodservice operation.

HSP M 383: Introduction to Wine, Beer, and Spirits
(2-0) Cr. 2. F.S.
Prereq: Must be at least 21 years old
Introduction to history and methods of production for a variety of wines, beers, and spirits. Beverage tasting and sensory analysis; product knowledge; service techniques; sales; and alcohol service related to the hospitality industry. Field trip.

HSP M 383L: Introduction to Wine, Spirits, and Mixology Laboratory
(0-2) Cr. 1. F.S.
Prereq: HSP M 383 or concurrent enrollment. Must be at least 21 years old
The application of the management principles and procedures related to the sale and service of alcohol, specialty beverages, and cocktails served in the beverage and hospitality industry. Beverage tasting and sensory analysis of products commonly served in the beverage industry.
HSP M 391: Foodservice Systems Management I
(3-0) Cr. 3. F.
Prereq: Credit or enrollment in HSP M 380, HSP M 380L
Principles and techniques related to basic management, leadership, and human resource management of foodservices in health care and other on-site foodservice settings. Food safety and sanitation for on-site foodservice operations. Credit for either HSP M 391 or AESHM 287 and AESHM 438 may count toward graduation. Not accepted for credit toward a major in Hospitality Management.

HSP M 392: Foodservice Systems Management II
(3-0) Cr. 3. S.
Prereq: HSP M 391
Introduction to cost control in foodservice departments: procedures for controlling food, labor, and other variable costs. Application of principles related to food product selection, specification, purchase, and storage in health care and other site operations. Credit for either HSP M 392 or HSP M 233 and HSP M 333 may count toward graduation. Not accepted for credit toward a major in Hospitality Management.

HSP M 393: Hospitality Management Industry Workshop
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: HSP M Junior or Senior Classification and Permission of Instructor.
Intensive 2 to 8 week workshop exploration. Topics vary each time offered. Maximum of 6 credits of HSPM 393 can be applied toward graduation.

HSP M 431: Case Studies in Event Management
(Dual-listed with HSP M 531). (Cross-listed with EVENT). Cr. 3. S.
Prereq: Graduate-level standing and permission by instructor.
Operational and strategic challenges in the event management industry through directed case studies, roundtable discussions, and industry-related readings. Students will critically evaluate case studies related to event management in areas of event strategy, financial management, event operations, stakeholder development, event design, marketing, and other event topics.

HSP M 433: Hospitality Financial Management
(3-0) Cr. 3. S.
Prereq: HSP M 333; ACCT 284; ECON 101; credit or enrollment in STAT 101
Use of common financial statements, accounting ratios, and financial techniques to impact management decisions.

HSP M 437: Hospitality and Event Technology Applications
(3-0) Cr. 3. F.
Prereq: HSP M 101

HSP M 439: Advanced Hospitality Human Resource Management
(3-0) Cr. 3. F.
Prereq: AESHM 238
Emphasis on development of management personnel in hospitality organizations. Case studies.

HSP M 452: Lodging Operations Management II
(3-0) Cr. 3. S.
Prereq: HSP M 352; credit or enrollment in HSP M 333
Development of business plan and evaluation of business performance in a simulated environment. Operational decision making practices by applying concepts of management, operations, marketing, and finance for a computer-mediated environment.

HSP M 455: Strategic Management in Hospitality
(3-0) Cr. 3. S.
Prereq: AESHM 238 and AESHM 340; credit or enrollment in HSP M 433
Introduction to strategic management principles and practices with an application of human resources, operations, marketing, and financial management concepts. Case studies.

HSP M 470: Supervised Professional Internship: Hospitality
Cr. 3-6. Repeatable. F.S.S.
Prereq: AESHM 270, AESHM 211, 9 credits in HSP M, and minimum 2.0 GPA; permission by application; junior or senior classification; employer location should be different than employer/location used for AESHM 170 and AESHM 270
Supervised work experience with a cooperating firm or organization. No more than 12 credits from AESHM 170, AESHM 270, and AESHM 470 may be applied toward graduation.

HSP M 487: Fine Dining Event Management
(Dual-listed with HSP M 587). (2-3) Cr. 3. F.
Prereq: HSP M 380, HSP M 380L
Exploration of the historical and cultural development of the world food table. Creative experiences with U.S. regional and international foods. Application of management and financial principles in food preparation and service in fine dining settings.
Meet International Perspectives Requirement.
HSP M 489: Issues in Food Safety
(Cross-listed with AN S, FS HN, VDPAM). (1-0) Cr. 1. S.
Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HSP M 233; FS HN 419 or FS HN 420; FS HN 403
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

HSP M 490: Independent Study
Cr. arr. Repeatable.
Prereq: Sections B-E: Program approval; Section H: Full membership in Honors Program

HSP M 490B: Independent Study: Hospitality Management
Cr. arr. Repeatable.
Prereq: Sections B-E: Program approval
Independent Study in Hospitality Management.

HSP M 490D: Independent Study: Lodging Operations
Cr. arr. Repeatable.
Prereq: Sections B-E: Program approval; Section H: Full membership in Honors Program

HSP M 490E: Independent Study: Foodservice Operations
Cr. arr. Repeatable.
Prereq: Sections B-E: Program approval; Section H: Full membership in Honors Program

HSP M 490H: Independent Study: Honors
Cr. arr. Repeatable.
Prereq: Sections B-E: Program approval; Section H: Full membership in Honors Program

Courses primarily for graduate students, open to qualified undergraduates:

HSP M 505: Hospitality Management Scholarship and Applications
(0-1) Cr. 1. F.S.S.
Focus on teaching and research scholarship involving the hospitality industry.

HSP M 506: Current Issues in Hospitality Management
(0-1) Cr. 1. Repeatable. S.S.S.
Focus on current issues related to the hospitality industry.

HSP M 531: Case Studies in Event Management
(Dual-listed with HSP M 431). (Cross-listed with EVENT). Cr. 3. S.
Prereq: Graduate-level standing and permission by instructor.
Operational and strategic challenges in the event management industry through directed case studies, roundtable discussions, and industry-related readings. Students will critically evaluate case studies related to event management in areas of event strategy, financial management, event operations, stakeholder development, event design, marketing, and other event topics.

HSP M 533: Financial Decision Making in Hospitality Organizations
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: HSP M 433
Concepts of financial management applied to strategic decision making.

HSP M 538: Human Resources Development in Hospitality Organizations
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: AESHM 238
Theories of human resources management. Practices and principles related to development of management personnel.

HSP M 540: Strategic Marketing
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: AESHM 340
Application of marketing principles in developing effective marketing strategies for hospitality, apparel, and retail organizations. Evaluation of multi-dimensional marketing functions in hospitality organizations.

HSP M 555: Strategic Management in Hospitality Organizations
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Courses in MKT, FIN, MGMT, and HSP M. Permission of instructor
Strategic management process as a planning and decision-making framework; integration of human resources, operations, marketing, and financial management concepts.

HSP M 560: Tourism Management and Tourist Behavior
Cr. 3. Alt. F., offered odd-numbered years.
Prereq: HSP M 260 or equivalent
Tourism theories and research. Overview of tourism industry, tourism theories, methods, and current issues in destination marketing and management and travel behavior. Evaluation of tourism and destination research. NA
HSP M 587: Fine Dining Event Management  
(Dual-listed with HSP M 487). (2-3) Cr. 3. F.  
Prereq: HSP M 380, HSP M 380L  
Exploration of the historical and cultural development of the world food  
table. Creative experiences with U.S. regional and international foods.  
Application of management and financial principles in food preparation  
and service in fine dining settings.  
Meets International Perspectives Requirement.  

HSP M 590: Special Topics  
Cr. arr. Repeatable, maximum of 3 credits.  
Prereq: 9 credits in HRI at 400 level or above; application process  
Topics in hospitality management.  

HSP M 590B: Special Topics: Hospitality Management  
Cr. arr. Repeatable, maximum of 3 credits.  
Prereq: 9 credits in HSP M at 400 level or above; application process.  

HSP M 590C: Special Topics: Tourism  
Cr. arr. Repeatable, maximum of 3 credits. F.S.SS.  
Prereq: 9 credits in HSP M at 400 level or above; application process  
Special topics in tourism.  

HSP M 590D: Special Topics: Lodging Operations  
Cr. arr. Repeatable, maximum of 3 credits.  
Prereq: 9 credits in HSP M at 400 level or above; application process.  

HSP M 590E: Special Topics: Commercial/Retail Foodservice Operations  
Cr. arr. Repeatable, maximum of 3 credits.  
Prereq: 9 credits in HSP M at 400 level or above; application process.  

HSP M 590F: Special Topics: Onsite Foodservice Operations  
Cr. arr. Repeatable, maximum of 3 credits.  
Prereq: 9 credits in HSP M at 400 level or above; application process.  

HSP M 590G: Special Topics: Event Management  
Cr. arr. Repeatable, maximum of 6 credits. F.S.SS.  
Prereq: 9 credits in HSP M or EVENT at 500 level or above; application  
process  
Special Topics in Event Management. Only 6 credits of HSP M 590G can  
be applied toward graduation.  

HSP M 599: Creative Component  
Cr. arr.  
Creative component as arranged with instructor.  

Courses for graduate students:  

HSP M 604: Professional Writing  
(2-0) Cr. 2. S.SS.  
Prereq: Enrollment in PhD program  
Development of professional written communication with emphasis on  
abstracts, proposals, manuscripts, and technical reports.  

HSP M 608: Administrative Problems  
Cr. arr. Repeatable, maximum of 4 credits. F.S.SS.  
Prereq: Permission of instructor; enrollment in PhD program  
Advanced administrative problems; case studies in foodservice and  
lodging organizations.  

HSP M 633: Advanced Hospitality Financial Management  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: HSP M 433; Enrollment in PhD program  
Theories and research in financial management with emphasis on  
financial performance and financing decisions.  

HSP M 634: Theory and Research Seminar in Event Management  
Cr. 3. SS.  
Prereq: STAT 401 or a graduate level course in statistics or by permission of  
instructor  
Analysis and application of theories and research methodologies in  
event management and is designed to strengthen students’ analytical  
and critical perspectives to evaluate event management research.  
Multidisciplinary approach to the areas of sports events, festivals and  
fairs, conventions and tradeshows, mega events, lifecycle/religious/  
nonprofit events, and event tourism.  

HSP M 638: Advanced Human Resources Management in Hospitality  
Organizations  
(3-0) Cr. 3. Alt. F., offered odd-numbered years. Alt. SS., offered even-  
numbered years.  
Prereq: HSP M 538; Enrollment in PhD program  
Research in human resources management with an emphasis on  
organization or unit administration.  

HSP M 640: Seminar on Marketing Thoughts  
(3-0) Cr. 3. Alt. S., offered even-numbered years. Alt. SS., offered even-  
numbered years.  
Prereq: HSP M 540; STAT 401. Enrollment in PhD program  
Conceptual and theoretical development of marketing strategies.  
Analytical and critical review of marketing research and industry  
practices.
HSP M 652: Advanced Lodging Operations
(3-0) Cr. 3. Alt. F., offered odd-numbered years. Alt. SS., offered even-numbered years.
Prereq: Enrollment in PhD program
Analysis and applications of concepts and theories of operations research for lodging operations.

HSP M 660: Research Seminar in Tourism Management
(3-0) Cr. 3. Alt. F., offered even-numbered years. Alt. SS., offered odd-numbered years.
Prereq: Enrollment in PhD program
Advanced graduate course on tourism and destination theories and research. Analysis and application of theories, research findings, and research methods in tourism and destination management.

HSP M 680: Analysis of Research in Foodservice Operations
(3-0) Cr. 3. Alt. S., offered even-numbered years. Alt. SS., offered odd-numbered years.
Prereq: Enrollment in PhD program
Analysis and application of theories, research, and research methods in foodservice operations.

HSP M 690: Advanced Topics
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Enrollment in PhD program, application process
Advanced study of current topics in hospitality management.

HSP M 690B: Advanced Topics: Hospitality Management
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Enrollment in PhD program, application process
Advanced study of current topics in hospitality management.

HSP M 690C: Advanced Topics: Tourism
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Enrollment in PhD program, application process
Advanced study of current topics in hospitality management.

HSP M 690D: Advanced Topics: Lodging Operations
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Enrollment in PhD program, application process
Advanced study of current topics in hospitality management.

HSP M 690E: Advanced Topics: Commercial/Retail Foodservice Operations
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Enrollment in PhD program, application process
Advanced study of current topics in hospitality management.

HSP M 690F: Advanced Topics: Onsite Foodservice Operations
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Enrollment in PhD program, application process
Advanced study of current topics in hospitality management.

HSP M 690G: Advanced Topics: Event Management
Cr. arr. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Enrollment in PhD program, application process
Advanced study of current topics in event management and hospitality management.

HSP M 699: Research
Cr. arr. Repeatable. F.S.SS.
Prereq: Enrollment in PhD program
Research.

Human Development and Family Studies Department

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in five curricula: Child, Adult and Family Services; Early Childhood Education; Family and Consumer Sciences Education and Studies, Financial Counseling and Planning, and an affiliated program: Early Childcare Education and Programming (a distance education program offered in collaboration with six other universities).

Students graduating in Human Development and Family Studies will

1. Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats to foster collaboration, provide information and advance knowledge related to child, adult, family, and community services.

2. Consistently and realistically analyze and evaluate one’s own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy related to working with children, adults, families and communities.

3. Understand content related to working with children, adults, families, and communities within a chosen program. Use critical thinking skills to evaluate and utilize evidence-based practices. Use logical and ethical reasoning to make decisions and solve problems.

4. Understand the diverse needs of children, adults, and families. Ensure equitable access of children, adults, and families to appropriate environments that support healthy living. Engage children, adults, and families with socially responsible and respectful behavior.
Communication Proficiency requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C– or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The Child, Adult and Family Services curriculum leads to work in helping professions with employment opportunities in public and private agencies. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults in the areas of education/prevention, treatment, and administration. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in Child, Adult and Family Services may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See http://www.ncfr.org/cfle-certification.

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education – unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see http://www.hdfs.hs.iastate.edu/undergraduate-majors/ece/.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education – unified students must meet general education requirements for teacher licensure.

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree. (http://catalog.iastate.edu/collegeofhumansciences/familyandconsumerscienceseducationandstudies)

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 content areas (http://www.nasafacs.org/national-standards-and-competencies.html): Career; Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science; Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the program choose one of three options, Teacher Licensure, Communications, or Professional Studies.

Students in Family and Consumer Sciences Education and Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/ and/or http://www.ncfr.org/cfle-certification.

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are
The Financial Counseling and Planning (FCP) curriculum prepares students for careers in family financial services. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on career goals, students select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic and with program partners in the financial services industry. A field work experience helps students apply their studies and experience the profession in real-world settings.

Financial Counseling and Planning majors are also prepared to enter graduate programs in family financial planning, financial education, economics, finance, and law.

Juniors and seniors in Financial Counseling and Planning who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a B.S. in Financial Counseling and Planning and a M.S. in Human Development and Family Studies or a B.S. in Financial Counseling and Planning and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. See Graduate Study for more information (http://www.hdfs.hs.iastate.edu/graduate/).

The Financial Counseling and Planning major is registered with Certified Financial Planner Board of Standards Inc. as a CFP Board-registered Program. ISU courses satisfy CFP Board’s education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP® CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and examination requirements. (CFP Board of Standards web site www.cfp.net.)

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

FCP majors also satisfy the education requirements for the Accredited Financial Counselor (AFC®) designation offered through the Association for Financial Counseling and Planning Education (AFCPE).

Affiliated Programs

The Early Childcare Education and Programming (ECP) curriculum, offered by the Great Plains Interactive Distance Education Alliance (GPIDEA), is designed to prepare graduates to work in a variety of early care and education programs in local communities and on military installations. Some of these programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This is an online program offered through a collaboration of seven universities as part of GPIDEA. The program is known as Early Care and Education for a Mobile Society. For more information see https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society.

The ECP curriculum is designed to provide content for the final two years of a student’s program; the content is focused specifically on topics directly relevant to the major. Students will complete a total of 120 credits for the major, 51 of which are specific to the ECP curriculum. These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to ECP. If students prefer to be admitted to ISU before being admitted to the ECP major, they can complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to ISU before being admitted to the ECP major; they can enroll as Pre ECP (P ECP) students until they are eligible for the ECP major. For more information about the program at Iowa State, see http://www.online.hs.iastate.edu/ecp.

Curricula:

- Child, Adult and Family Services
- Early Childhood Education — Unified
- Family and Consumer Sciences Education and Studies
- Financial Counseling and Planning
- Affiliated Program: Early Childcare Education and Programming (GPIDEA program)

Minors

The department offers minors in Child, Adult and Family Services, Educational Services in Family and Consumer Sciences, and Financial
Counseling and Planning. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above.

The **Child, Adult and Family Services** minor may be earned by completing 15 credits:

**Graduate Study**

The department offers work for the Master of Science (thesis or non-thesis options) and Doctor of Philosophy degrees with the major in Human Development and Family Studies. Minors are also available for students taking major work in other departments. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and/or intervention or prevention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.

Graduate study in Human Development and Family Studies at Iowa State University is multidisciplinary and focuses on research and practice in several content areas such as adolescent/youth development, adult development and aging, family studies and policy, family economic well-being and financial planning, infant and child development, health and well-being, and lifespan development.

Prerequisite to work in the major is the completion of a related undergraduate program with basic courses and/or experiences in areas such as child/human development, community and regional planning, economics, education, family studies, psychology, or sociology. Additional coursework or prerequisites (e.g., basic statistics) may be required depending on the undergraduate program and program of study. Students may be admitted to our doctoral program with either a bachelor’s (M.S./Ph.D. Track, 5 years) or a master’s degree (Ph.D. Track only, 3 years). Students admitted to the Ph.D. Track without a prior master’s degree complete requirements for a thesis-based master’s degree as part of their doctoral program of study.

All students take a core set of courses; the program of study is then completed with a selection of courses that meet the individual needs.
of the student. The variety of and flexibility in the coursework allows a student to tailor a program to specific academic interests. The graduate programs are based on a theory, research, and application interactive paradigm with all three areas integrated into content and method courses.

The department offers a graduate minor in Human Development and Family Studies. For more detailed information about the minor, see the Graduate Minors tab.

The department also offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field.

The department also participates in several Master of Family and Consumer Sciences (MFCS) degree programs (http://catalog.iastate.edu/collegeofhumansciences/familyandconsumersciences/). Admission to the youth (YTH), family financial planning (FFP) and gerontology (GERON) specialization programs require submission of the Graduate College application form, transcripts, 2 letters of recommendation, resume and a goal statement. Students in a MFCS program select one of the options listed below.

1. Master of Family and Consumer Sciences - Human Development and Family Studies (MFCS-HDFS). The Master of Family and Consumer Sciences degree specialization track in Human Development and Family Studies (HDFS) provides students with the opportunity to enhance their background knowledge and skills for working with children and families (37 credits).

2. Master of Family and Consumer Sciences - Youth Development (MFCS-YD). This is an entirely online degree focusing on the skills to serve today’s young people (36 credits). The degree uses a strengths-based curriculum that supports you to grow socially, emotionally, and cognitively. There are also two youth development related certificates available for students (see Graduate Certificates tab for details).

3. Master of Family and Consumer Sciences - Family Financial Planning Program (MFCS-FFP). This is a 36 credit master’s degree program offered entirely online, designed to prepare individuals to work in the financial planning field. Completion of course work in the master’s degree or a graduate certificate meets the educational requirements to sit for the Certified Financial Planner (CFP) Board of Standards Certification Examination.

The department offers a Financial Counseling and Planning (FCP) concurrent degree program that allows students to obtain a B.S. in FCP and an M.S. in HD FS or a B.S. in FCP and a Graduate Certificate in Family Financial Planning in 5 years. Application for admission to the Graduate College should be made near the end of the junior year. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. Students interested in these programs should contact the department for details.

Finally, the department collaborates with the interdepartmental Gerontology program; students may declare a minor in Gerontology. The Master of Family and Consumer Sciences - Gerontology program (MFCS-GERON) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to older adults. Professionals offering direct services often are involved in health promotion programs, directing inter-generational activities, managing senior centers or retirement communities, counseling older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of older adults, and work with business and industry on issues related to an aging work force.

Graduate Minors
The department offers a graduate minor in Human Development and Family Studies. To earn this minor, students in a Master’s program must take 9 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed). To earn a minor in HD FS students in a Doctoral program must take 12 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed). A graduate faculty member from the minor program must serve on the student’s POS Committee.

HDFS Certificates
The department offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field. The certificates emphasize application and relevance to growing diversity and demands on the work force. The four certificate areas are:

1. Developmental and Family Sciences Advanced Research Design and Methods (15 credits)
2. Family Well-Being in Diverse Society (12 credits)
3. Infant and Early Childhood Mental Health (12 credits, online)
4. Life-Span Development (12 credits, online)

For more information about courses for the certificates, go to http://www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/
developmental-and-family-sciences-advanced-research-design-and-methods

Youth Development Certificates
The department also collaborates to offer two certificates related to youth development through the MFCS program. Both certificates
are designed to prepare individuals who work directly with youth or are involved in education and research related to youth. For more information, go to http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/.

1. Youth Development Specialist Certificate (13 credits)
2. Youth Program Management and Evaluation Certificate (13 credits)

Family Financial Planning Certificates

The MFCS – Family Financial Planning (FFP) program also offers two certificates listed below. More information can be found at http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/.

1. FFP certificate. Master of Family and Consumer Sciences with Family Financial Planning (FFP) specialization graduate certificate program (18 credits)
2. FHC certificate. Master of Family and Consumer Sciences Financial and Housing Counseling (FHC) specialization graduate certificate program (18 credits)

Courses primarily for undergraduates:

**HD FS 102: Individual and Family Development, Health, and Well-being**
(3-0) Cr. 3. F.S.SS.
Overview of life-span developmental tasks (physical, cognitive, language, social, emotional) examined from various theoretical perspectives. Discussion of topics related to family diversity, individual/family health and well-being and reciprocal relationships as affected by external factors.

**HD FS 103: Professional Principles for Working with Children**
(0.5-0) Cr. 0.5. F.S.
Introduction to professional principles and ethics, understanding of child abuse reporting, universal precautions. Completion of criminal background checks for ISU practica. Offered on a satisfactory-fail basis only. Only one of HD FS 103 or 105 may count toward graduation.

**HD FS 105: Professional Principles for Working with Youth and Adults**
(0.5-0) Cr. 0.5. F.S.
Introduction to professional principles and ethics, understanding of child, dependent adults and elder abuse reporting, working with aging adults, universal precautions. Offered on a satisfactory-fail basis only. Only one of HD FS 103 or 105 may count toward graduation.

**HD FS 110: Freshman Learning Community Orientation**
(1-0) Cr. 1. F.
**Prereq:** Membership in HD FS Learning Community
Introduction to the Department of Human Development and Family Studies including academic requirements and opportunities, strategies for transitioning to college, learning and study strategies, reading and reflection, and career awareness.

**HD FS 111: New Transfer Student Seminar**
(1-0) Cr. 1. F.S.
Introduction to HD FS curricula and faculty for students in CH FS, FCEDS or F CP. Department and University policies and procedures, degree audits, and registration. Exploration of campus resources and strategies for student success. Offered on a satisfactory-fail basis only.

**HD FS 183: Personal Finance in Early Adulthood**
(1-0) Cr. 1. F.S.SS.
Introduction to basic concepts and budgeting practices for management of resources and prevention of financial problems commonly associated with college, including credit and student loans. Offered on a satisfactory-fail basis only.

**HD FS 208: Early Childhood Education Teacher Orientation**
Cr. 1. F.S.
**Prereq:** classification as ECE major
Overview of early childhood education (birth-grade 3) teacher licensure requirements. Program planning and university procedures. Required of all students majoring in early childhood education. Offered on a satisfactory-fail basis only.

**HD FS 218: Professional Orientation and Service Learning**
(2-0) Cr. 2. F.S.
**Prereq:** Credit or concurrent enrollment in HD FS 102. For child, adult and family services majors.
Ethics, professional development, and career exploration in child, adult and family services. Visits to and service learning with programs that serve children, adults and families with diverse needs. Participation in service learning project required. Offered on a satisfactory-fail basis only.

**HD FS 223: Child Development and Health**
(3-0) Cr. 3. F.S.
Typical and atypical development of children prenatal through middle childhood. Examination of healthy development and potential impact of health issues in children. Discussion of influence of the family and society on development. Either HD FS 223 or HD FS 224, but not both, may be applied toward graduation.
HD FS 224: Development in Young Children: Birth through Age 8  
(3-1) Cr. 3. F.S.  
Prereq: HD FS 102 and HD FS 103  
Learning, growth, and development (typical and atypical) of children from birth through age eight. Explores importance of family, programs, and a diverse society. Strategies for observing, recording, and interpreting children's cognitive, communication, motor, social, and emotional development. Practicum. Either HD FS 223 or HD FS 224, but not both, may be applied toward graduation.

HD FS 226: Development and Guidance in Middle Childhood  
(3-0) Cr. 3. F.  
Prereq: HD FS 102 or PSYCH 230  
Physical, cognitive, socioemotional, and identity development from 5 to 12 years of age. Development within the contexts of family, school, peers, and society. Guidance of children in family and group settings.

HD FS 227: Adolescent and Emerging Adulthood  
(3-0) Cr. 3. F.S.  
Prereq: HD FS 102 or PSYCH 230  
Physical, cognitive, and socioemotional development of adolescents and emerging adults in the context of family, relationships, and culture.

HD FS 234: Adult Development  
(Cross-listed with GERON). (3-0) Cr. 3. S.  
Prereq: HD FS 102 or PSYCH 230  
Introductory exploration of the health, individual and social factors associated with adult development including younger adulthood, middle age and older adulthood. Information is presented from a life-span developmental framework.

HD FS 239: Consumer Issues  
(3-0) Cr. 3. F.S.  
Introduction to factors affecting consumer decisions of individuals and families, including housing, healthcare, and personal finances. Emphasis on accessibility and affordability, community contexts for families, and consumer protection, legislation and regulation, and consumer fraud.  
Meets U.S. Diversity Requirement

HD FS 240: Literature for Children  
(3-0) Cr. 3. F.S.  
Evaluation of literature for children, including an emphasis on diversity and inclusion; cultural competence. Roles of literature in the overall development of children. Literature selection and use in the home and educational settings.  
Meets U.S. Diversity Requirement

HD FS 249: Parenting and Family Diversity Issues  
(3-0) Cr. 3. F.S.  
Parenting practices and family relationships across the lifespan. Practical knowledge and techniques about how to be an effective parent. Diverse families, discipline, and parent education programs.  
Meets U.S. Diversity Requirement

HD FS 270: Family Communications and Relationships  
(3-0) Cr. 3. F.S. Alt. SS., offered odd-numbered years.  
Prereq: HD FS 102 or PSYCH 230  
Family communication and its functions to develop, maintain, enrich and limit family relationships. Family theories related to communication and ethical considerations when working with families.  
Meets U.S. Diversity Requirement

HD FS 276: Human Sexuality  
(3-0) Cr. 3. F.S.S.  
Behavioral, biological, and psychological aspects of human sexuality within the social context of family, culture, and society. Role of sexuality in human development. Critical analysis of media and research. Communication and decision-making skills relating to sexuality issues and relationships.  
Meets U.S. Diversity Requirement

HD FS 283: Personal and Family Finance  
(3-0) Cr. 3. F.S.  
Introduction to basic principles of personal and family finance. Budgeting, record keeping, checking and savings accounts, consumer credit, insurance, investments, and taxes.  
Meets U.S. Diversity Requirement

HD FS 317: Field Experiences  
Cr. 1-6. Repeatable. F.S.SS.  
Prereq: Permission of instructor.  
Consult department office for procedure. Supervised field experience in human development and family studies programs. Offered on a satisfactory-fail basis only.

HD FS 317B: Field Experiences: Human Development and Family Studies  
Cr. 1-6. Repeatable. F.S.SS.  
Prereq: 9 credits in HD FS.  
Consult department office for procedure. Supervised field experience in human development and family studies programs. Offered on a satisfactory-fail basis only.
HD FS 317H: Field Experiences: Honors
Cr. 1-6. Repeatable. F.S.SS.
Prereq: 9 credits in HD FS
Consult department office for procedure. Supervised field experience in human development and family studies programs. Offered on a satisfactory-fail basis only.

HD FS 340: Assessment and Curriculum: Ages Birth through 2 Years
(3-3) Cr. 4. F.S.
Prereq: HD FS 103; HD FS 224; admission to teacher education program
Assessment strategies for infants and toddlers, including those with special needs. Curricula, learning environments, teaching strategies, health and nutritional practices, and schedules that are developmentally, individually, and culturally appropriate. Using assessment to plan, implement, and evaluate activities to promote physical, motor, cognitive, communication, and social emotional development. Practicum.

HD FS 341: Household Finance and Policy
(3-0) Cr. 3. F.
The social, economic, and governmental contexts of financial decision-making at the household level.

HD FS 342: Guidance and Group Management in Early Childhood
(2-2) Cr. 3. F.S.
Prereq: HD FS 103; HD FS 224
Guiding prosocial development, self-regulation, and task engagement of children birth to age 8. Focus is on promoting prosocial behaviors through supportive relationships and environments within diverse home, center, or school settings. Functional behavior assessment and ongoing progress monitoring for targeted and intensive interventions. Practicum.

HD FS 343: Assessment and Curriculum: Ages 3 through 6 Years
(3-3) Cr. 4. F.S.
Prereq: HD FS 103; HD FS 224; HD FS 240; admission to teacher education program
Assessment strategies for preschool and kindergarten children, including those with special needs. Learning environments, schedules, activities, nutritional practices, and teaching strategies that are developmentally, individually, and culturally appropriate. Using assessment to plan, implement, and evaluate activities to promote physical motor, cognitive, communication, and social emotional development. Practicum.

HD FS 344: Programming for Children in Early Care and Education
(3-3) Cr. 4. F.S.
Prereq: HD FS 103; HD FS 224
Programming in inclusive child care centers and family child care homes, including those with special needs, aged birth through 8 years. Developing, implementing, and evaluating learning environments; activities and materials; behavioral guidance and classroom management practices; health and nutritional practices; and schedules to ensure developmental, individual, and cultural appropriateness. Monitoring children’s development and behavior to promote physical, motor, cognitive, communication, and social emotional development. Learning to collaborate effectively with parents and staff. Practicum.

HD FS 345: Adapting Programming in Inclusive Settings
(3-0) Cr. 3. F.S.
Prereq: HD FS 224; SP ED 250
Adapting instruction, materials, and equipment to meet developmental needs of young children birth through age 8 with diverse learning needs and multiple disabilities in inclusive settings. Addressing individualized education programs; special health care needs, challenging behavior, and positioning and handling techniques.

HD FS 360: Housing and Services for Families and Children
(3-0) Cr. 3. F.
Prereq: 6 credits in social sciences
Approaches to and assessment of housing and services that assist those with special needs including those with disabilities, low-income, children at risk, single-parents, and the homeless. Emphasis on community settings; e.g., residential facilities, group housing, shelters and transitional housing.
Meets U.S. Diversity Requirement

HD FS 367: Abuse and Illness in Families
(3-0) Cr. 3. F.S. Alt. SS., offered even-numbered years.
Prereq: HD FS 102 or PSYCH 230
Causes and consequences of family stressors including physical, sexual, and emotional abuse; substance abuse; and mental and physical illness across the life span. Interplay between victims, offenders, and the treatment system.

HD FS 369: Research Methods in Human Development and Family Studies
(3-1) Cr. 3. F.S.
Prereq: HD FS 102 or PSYCH 230; 9 hours in HD FS; junior or senior status.
Understanding and evaluating research. Use of primary and secondary data to identify and study problems related to human development and family issues. An introduction to statistical concepts and data analysis. Computer laboratory experience.
HD FS 373: Death as a Part of Living
(Cross-listed with GERON). (3-0) Cr. 3. F.S. Alt. SS., offered even-numbered years.
Prereq: HD FS 102
Consideration of death in the life span of the individual and the family with opportunity for exploration of personal and societal attitudes.

HD FS 377: Aging and the Family
(Cross-listed with GERON). (3-0) Cr. 3. F. Alt. SS., offered odd-numbered years.
Prereq: HD FS 102
Interchanges of the aged and their families. Emphasis on role changes, social interaction, and independence as influenced by health, finances, life styles, and community development.
Meets U.S. Diversity Requirement

HD FS 378: Retirement Planning and Employee Benefits
(Cross-listed with ECON, GERON). (3-0) Cr. 3. S.
Prereq: 3 credits in introductory economics
Economic well-being in the context of demographic change, the present and future of Social Security, family retirement needs analysis, investment strategies and characteristics of retirement plans, helping others to work towards financial security, family economic issues for retired persons. Overview of employee and retirement benefits.
Meets U.S. Diversity Requirement

(3-0) Cr. 3. F.
Prereq: HD FS 283
Fundamental principles of the financial planning process, client/planner interactions, time value of money applications as well as analyses of ethics review, financial statements, cash flow and debt management, education planning, retirement planning, tax planning, and estate planning needs of families.

HD FS 395: Children, Families, and Public Policy
(3-0) Cr. 3. F.S. Alt. SS., offered odd-numbered years.
Prereq: HD FS 369 or equivalent
Public policy and politics as they affect children and families. Examination of how individuals and groups influence policy. Investigation of current issues and programs influencing the well-being and welfare of children and families.

HD FS 417: Supervised Student Teaching
Cr. 8. Repeatable.
Prereq: Reservation required

HD FS 417C: Supervised Student Teaching: Early Childhood Special Education Programs.
Cr. 8. Repeatable. F.S.
Prereq: GPA 2.5, full admission to teacher education program, HD FS 455; HD FS 456.
Teaching experience with preschool children with disabilities.

HD FS 418: Professional Practice Reflection/Discussion
Cr. 0.5-2. Repeatable. F.S.
Discussion of professional practice experience. Offered on a satisfactory-fail basis only.

HD FS 418A: Professional Practice Reflection/Discussion: Teaching
(0.5-0) Cr. 0.5. F.S.
Prereq: Taken concurrently with HD FS 417
Discussion of HD FS 417 student teaching field experience. Offered on a satisfactory-fail basis only.

HD FS 418B: Professional Practice Reflection/Discussion: Internships
(2-0) Cr. 2. F.S.
Prereq: Junior classification
Process and development of skills necessary for professional preparation and practice including career planning, resume writing, and interviewing. Strategies for successful career management. Offered on a satisfactory-fail basis only.

HD FS 449: Program Evaluation and Proposal Writing
(3-0) Cr. 3. F.S.
Prereq: HD FS 369
Theory and practice of program evaluation and proposal writing in human services including needs assessment, outcome development and measurement, and proposal components. Assessment of programs’ success in meeting goals.

HD FS 455: Curriculum and Interventions: Ages 3 through 6 Years
(3-3) Cr. 4. F.S.
Prereq: HD FS 343, HD FS 345, SP ED 405 and SP ED 458
Program models and methods leading to development and organization of appropriate curricula in preschool and kindergarten programs for young children with diverse learning needs. Government regulations and professional standards for child programming. Teaming with parents, colleagues, and paraprofessionals to plan, implement, and evaluate developmentally and culturally appropriate individualized education plans in inclusive settings. Practicum.
HD FS 456: Working with Families in Early Intervention
(3-0) Cr. 3. F.S.
Prereq: Current background check; HD FS 340 or HD FS 344; or permission of instructor
Applying family systems theory and family centered principles in early intervention. Understanding the impact of disability on families and young children. Utilizing strategies for delivering family-centered interventions and service coordination in home-based and natural environments. Building trusting relationships, teaming with families and interdisciplinary colleagues to create, implement, and evaluate Individualized Family Service Plans (IFSPs) for children birth to age three. Understanding foundations of theory and policy and empowering families through effective supports and services. Experiences with families.

HD FS 463: Environments for the Aging
(Dual-listed with HD FS 563). (Cross-listed with ARTID, GERON). (3-0) Cr. 3. S.
Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies or permission of instructor
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (on-line course offering via Distance Education).
Meets U.S. Diversity Requirement

HD FS 479: Family Interaction Dynamics
(3-0) Cr. 3. F.S.
Prereq: HD FS 102 or equivalent; HD FS 369 or equivalent; 9 hours in social sciences, junior or senior status
Analysis of research related to family interaction processes across the family life span. Emphasis on relationship dynamics and cultural differences.

HD FS 482: Family Savings and Investments
(3-0) Cr. 3. F.
Prereq: HD FS 283
Management of family financial resources; emphasis on savings and the investment planning process; issues facing financial planners who manage family assets. Identification of investment options including common stocks, fixed income securities, convertible securities, and related choices.

HD FS 484: Estate Planning for Families
(3-0) Cr. 3. S.
Prereq: HD FS 283
Study of estate planning focusing on efficient conservation and transfer of wealth, consistent with client's goals. Legal, tax, financial and non-financial aspects of estate planning process; trusts, wills, probate, advanced directives, charitable giving, wealth transfers and related taxes.

HD FS 485: Capstone: Family Financial Planning
(3-0) Cr. 3. S.
Prereq: HD FS 341, HD FS 378, HD FS 383, HD FS 482, FIN 361
Development and refinement of competencies required by personal financial planners to work with individuals and families in meeting financial objectives. Utilization of skills obtained in financial planning emphasis to complete one or more financial planning narratives.

HD FS 486: Administration of Human Services Programs
(3-0) Cr. 3. F.S.
Prereq: Junior classification; 6 credits in HD FS at 300 level and above
Examination of purpose, policies, staffing, operations, and clientele of organizations serving children, adults and families with diverse needs. Management/leadership principles and techniques. Introduction to financial management. Administrators/supervisors roles in employee management as well as development of client-oriented programs, fundraising, goal setting, strategic planning, and advocacy.

HD FS 489: Financial Counseling
(Dual-listed with HD FS 589). (2-0) Cr. 2. F.
Prereq: HD FS 283 for 489, graduate classification for 589
Personal, social/psychological and legal climates affecting family financial decisions. A life cycle approach to financial decision making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in family financial management.

HD FS 489L: Financial Counseling Laboratory
(Dual-listed with HD FS 589L). (0-2) Cr. 1. Repeatable, maximum of 2 credits. F.S.
Prereq: HD FS 283 for 489L, graduate classification for 589L
Hands-on financial counseling experience using preventative, remedial, and productive strategies in one-on-one and/or group situations. Students work with clients to develop diverse and inclusive decision-making and problem-solving methods to achieve goals or to remove barriers.

HD FS 490: Independent Study
Cr. arr. Repeatable.
Prereq: 6 credits in human development and family studies
Consult department office for procedure.
**HD FS 490H: Independent Study: Honors**
Cr. arr. Repeatable.
Prereq: 6 credits in human development and family studies
Consult department office for procedure.

**HD FS 491: Internship**
Cr. 4-9. Repeatable, maximum of 9 credits. F.S.S.
Prereq: HD FS 418B; permission of instructor; senior classification; minimum 2.0 GPA.
Supervised work experience related to the student’s curriculum. Offered on a satisfactory-fail basis only.

**HD FS 493: Workshop**
(Dual-listed with HD FS 593). Cr. arr. Repeatable. F.S.S.
Prereq: Senior classification
Workshop in HD FS.

**HD FS 499: Research**
Cr. arr. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Consult department office for procedures.
Supervised research experience.

Courses primarily for graduate students, open to qualified undergraduates:

**HD FS 501: Graduate Studies, Research, and Ethics in HD FS**
(2-0) Cr. 2. F.
Prereq: Admission to HD FS Graduate program
Overview of graduate study, research, ethics, and professional development in the field of human development and family studies. Curriculum, programs of study, portfolios, faculty research interests, dissemination of research, career planning, and teaching discussed.

**HD FS 502: Professional Development in Human Development and Family Studies**
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: graduate classification; HD FS 501
Overview of professional skills, portfolio building, preparation for academic and nonacademic jobs, leadership fundamentals and project management training, time management, work balance issues, and professional ethics. Opportunities for graduate students to work on their professional development tailored to individual needs of students. Develop an individual professional portfolio.

**HD FS 503: Quantitative Research Methods**
(4-0) Cr. 4. F.
Prereq: Permission of instructor
Concepts, methods, and strategies for quantitative research in human development and family studies. Topics include the descriptive and inferential statistical techniques for quantitative research, using statistical packages to store and conduct statistical analyses, basic research methods in human development and family studies, and the relation between research designs and statistics.

**HD FS 504: Qualitative Research Methods**
(3-0) Cr. 3. F.
Prereq: 9 credits of social sciences or permission of instructor
Introduction to qualitative research methodology. Application of fieldwork methods, analysis, interpretation, and writing through individual qualitative research projects.

**HD FS 505: Application of Quantitative Research Methods**
(3-0) Cr. 3. S.
Prereq: HD FS 503 or permission of instructor
Practical applications of quantitative research methods, including an introduction to secondary data analysis, correlation and regression analysis, regression diagnostics; reporting results.

**HD FS 510: Theories of Human Development**
(3-0) Cr. 3. F.S.S.
Prereq: 9 credits of social sciences or permission of instructor
Theoretical approaches and current research in child, adolescent, and adult development. Individual life span perspectives. Implications for research, policy and practice. (Summer course offering is on-line).

**HD FS 511: Family Theory**
(3-0) Cr. 3. S.
Prereq: 9 credits in social sciences or permission of instructor
Theoretical approaches and current research in family development. Review the nature and value of theory to the study of the family and evaluate the use of theory in empirical research. Implications for research, policy and practice.

**HD FS 530: Perspectives in Gerontology**
(Cross-listed with GERON). (3-0) Cr. 3. F.
Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future. (on-line course offering via Distance Education).
HD FS 534: Adult Development
(Cross-listed with GERON). (3-0) Cr. 3. S.
Exploration of the biological, psychological and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed. (on-line course offering via Distance Education).

HD FS 538: Developmental Disabilities
(Cross-listed with PSYCH). (3-0) Cr. 3. Alt. F., offered odd-numbered years. 
Prereq: 9 credits in human development and family studies or psychology or permission of instructor
Theories, research, and current issues regarding the intersection of development and disabilities. Investigation of interventions with individuals and families. (on-line course offering via Distance Education).

HD FS 541: Housing and Real Estate in Family Financial Planning
(Cross-listed with FFP). (3-0) Cr. 3. Alt. SS., offered even-numbered years.
The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate Investments. Emphasis on emerging issues in the context of housing and real estate. (on-line course offering via Distance Education).

HD FS 545: Economics, Public Policy, and Aging
(Cross-listed with GERON). (3-0) Cr. 3. F.
Policy development in the context of the economic status of the older adult population. Retirement planning and the retirement decisions; social security and public transfer programs; intra-family transfers to/ from the aged; private pensions; financing medical care; prospects and issues for the future.

HD FS 555: Current Issues and Research in Early Childhood Services
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: 9 credits in social sciences or permission of instructor
Analysis of contemporary and historical early childhood/early intervention/early childhood special education model programs and services. Examination of relationships among service systems and implementation, program quality, teacher effectiveness, and outcomes for children with and without disabilities. (on-line course offering via Distance Education).

HD FS 563: Environments for the Aging
(Dual-listed with HD FS 463). (Cross-listed with ARTID, GERON). (3-0) Cr. 3. S.
Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies or permission of instructor
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. (on-line course offering via Distance Education).
Meets U.S. Diversity Requirement

HD FS 566: Family Policy
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: 6 credits in social sciences or permission of instructor
An introduction to policy for family researchers and practitioners. Examination of relevant policies through a family lens via discussion of theory and student interests in current and enduring family policies and programs. Descriptions of work roles in family policy and the interaction of family researchers and policymakers.

HD FS 567: Family Stress, Abuse, and Illness
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: 9 credits in social sciences or permission of instructor
Explores research related to family stress within romantic, parent-child, and sibling relationships. Examines contemporary theory and research on the nature, causes, and consequences of family stressors. These stressors include, but are not limited to economic distress; physical and emotional abuse; substance abuse; and mental and physical illness across the life span. (on-line course offering via Distance Education).

HD FS 568: Individual and Family Assessment
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: HD FS 510 or permission of instructor
Use of interviews, observational assessments, direct tests with individuals and families for research and intervention. Opportunities to practice assessments.

HD FS 575: Cross-cultural Perspectives about Families and Children
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: 6 credits in social sciences or permission of instructor
Review of current research regarding family diversity including an examination of cultural and structural influences on the development and well-being of families and children. Discussion of the impact on human rights and social justice. (on-line course offering via Distance Education).
HD FS 577: Aging in the Family Setting
(Cross-listed with GERON). (3-0) Cr. 3. S.
Prereq: 9 credits in social sciences or permission of instructor
Theories and research related to personal and family adjustments in later life affecting older persons and their intergenerational relationships. Related issues including demographics also are examined through the use of current literature. (on-line course offering via Distance Education).

HD FS 579: Family Well-being Across the Lifespan
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 9 credits in social sciences or permission of instructor
Review of current research to provide a theoretical and practical understanding of the economic, social, and psychological factors that influence interpersonal relationships and individual well-being within the institution of the family system. Economic and policy effects considered. (on-line course offering via Distance Education).

HD FS 581: International Study in Human Development and Family Studies
Cr. 1-12. Repeatable, maximum of 12 credits. F.S.S.S.
Prereq: Permission by application

HD FS 581A: International Study in HD FS: Practicum
Cr. 1-12. Repeatable, maximum of 12 credits. F.S.S.S.
Prereq: Permission by application

HD FS 581B: International Study in HD FS: Exchange
Cr. 1-12. Repeatable, maximum of 12 credits. F.S.S.S.
Prereq: Permission by application

HD FS 581C: International Study in HD FS: Group Study
Cr. 1-12. Repeatable, maximum of 12 credits. F.S.S.S.
Prereq: Permission by application

HD FS 583: Investing for the Family’s Future
(Cross-listed with FFP). (3-0) Cr. 3. F.
Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family’s overall financial and economic goals to help inform investment choices. (on-line course offering via Distance Education).

HD FS 584: Program Evaluation and Research Methods in Gerontology
(Cross-listed with GERON). (3-0) Cr. 3. S.
Overview of program evaluation, research methods, and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings. (on-line course offering via Distance Education).

HD FS 585: Program Evaluation
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: 6 credits in graduate level social sciences or permission of instructor
Theoretical and practical issues related to design and implementation of program evaluation in social sciences. Includes theory, design, implementation, analysis and proposal writing to assist programs to be successful in meeting program goals.

HD FS 588: Family, Income, and the Economy
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: 9 credits in social sciences or permission of instructor
Analysis of family income, wealth, and economic well-being. Emphasis on effects of family behavior and public policies on the adequacy and security of income across the family life cycle. Implications of resource allocation within the family for adult and child well-being.

HD FS 589: Financial Counseling
(Dual-listed with HD FS 489). (2-0) Cr. 2. F.
Prereq: HD FS 283 for 489, graduate classification for 589
Personal, social/psychological and legal climates affecting family financial decisions. A life cycle approach to financial decision making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in family financial management.

HD FS 589L: Financial Counseling Laboratory
(Dual-listed with HD FS 489L). (0-2) Cr. 1. Repeatable, maximum of 2 credits. F.S.
Prereq: HD FS 283 for 489L, graduate classification for 589L
Hands-on financial counseling experience using preventative, remedial, and productive strategies in one-on-one and/or group situations. Students work with clients to develop diverse and inclusive decision-making and problem-solving methods to achieve goals or to remove barriers.

HD FS 590: Special Topics
Cr. arr. Repeatable.
Prereq: Permission of instructor
Consult department office on procedure for filing a written plan of study.

HD FS 590L: Special Topics: Human Development and Family Studies
Cr. arr. Repeatable.
Prereq: Permission of instructor
Consult department office on procedure for filing a written plan of study.
HD FS 591: Internship
Cr. arr. Repeatable. F.S.SS.
Prereq: 10 graduate credits
Supervised experience in an area of human development and family studies.

HD FS 591I: Internship: Human Development and Family Studies
Cr. arr. Repeatable. F.S.SS.
Prereq: 10 graduate credits
Supervised experience in an area of human development and family studies.

HD FS 593: Workshop
(Dual-listed with HD FS 493). Cr. arr. Repeatable. F.S.SS.
Prereq: Senior classification
Workshop in HD FS.

HD FS 594: Professional Seminar in Gerontology
(Cross-listed with GERON). (3-0) Cr. 3. SS.
Prereq: HD FS 503, HD FS 505; STAT 402 or STAT 404 or permission of instructor
Methodological and analytical issues in research in human development and family studies. Advanced research design and measurement, selection of statistical techniques, and issues in the interpretation of findings.

HD FS 599: Creative Component
Cr. arr. F.S.SS.
Prereq: 9 graduate credits in HD FS
Nonthesis students creative component (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of five credits of independent work is required on the programs of study (POS). Creative component format determined cooperation with the POS committee.

Courses for graduate students:

HD FS 603: Advanced Quantitative Methods
(3-0) Cr. 3. F.
Prereq: HD FS 503, HD FS 505; STAT 402 or STAT 404 or permission of instructor
Methodological and analytical issues in research in human development and family studies. Advanced research design and measurement, selection of statistical techniques, and issues in the interpretation of findings.

HD FS 604: Advanced Qualitative Methods
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: HD FS 504 or permission of instructor
Research methodologies including phenomenology, grounded theory, ethnography, and case studies. Methods of data collection and analysis procedures. Issues of ethics and interpretation of findings. (on-line course offering via Distance Education).

HD FS 605: Multi-level Modeling
(Cross-listed with PSYCH). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: HD FS 503 and HD FS 505 or STAT 404 or permission of instructor
Rationale for and interpretation of random coefficient models. Strategies for the analysis of multi-level and panel data including models for random intercepts, random slopes, and growth curves.

HD FS 606: Advanced Structural Equation and Longitudinal Modeling
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: HD FS 503 or STAT 404 or permission of instructor
Rationale for and interpretation of advanced structural equation modeling for the analysis of longitudinal data. Emphasis will be placed on developing a working familiarity with some of the common statistical procedures, coupled with their application through the use of statistical software.

HD FS 607: Mixed Methods
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: HD FS 503, HD FS 504, HD FS 505, or permission of instructor
Foundations of mixed methods research, controversies, and philosophical concerns. Rationale for and interpretation of mixed methods designs. Research design, sampling, data collection, data analysis, results, and interpretation. (on-line course offering via Distance Education).

HD FS 608: Grant Writing for Research
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: HD FS 503, HD FS 505, and HD FS 504 or permission of instructor
Understand how to identify funding sources as well as the fundamental components of a federal research grant proposal such as the abstract or summary, background and significance, specific aims/goals and objectives, project design and methods, sustainability, assessment, broader impacts, dissemination, budget, budget justification, and cover letter.

HD FS 616: Seminar
Cr. arr.
May be repeated. F.S.SS.
HD FS 631: Child Health and Development  
(3-0) Cr. 3. Alt. F., offered even-numbered years.  
*Prereq: HD FS 510 or permission of instructor* 
Young children's cognitive, physical, communication, and social-emotional health and development will be examined. Both typical and atypical trajectories will be explored. Research on current trends in the field will be emphasized. (Online course offering via Distance Education).

HD FS 632: Behavioral Interventions in Early Childhood  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
*Prereq: HD FS 510 or permission of instructor* 
Issues related to behavioral development and needs of children ages 3-8. Design and implementation of group and individual behavioral interventions. Discussion of coaching strategies to improve intervention implementation. (Online course offering via Distance Education).

HD FS 633: Infant Mental Health  
(3-0) Cr. 3. Alt. S., offered even-numbered years.  
*Prereq: HD FS 510 or permission of instructor* 
Examination of the individual, interpersonal, and familial factors that influence infant (birth through age 3) mental health. Analysis of the risk and protective factors that influence these systems and their potential effects on social-emotional development. Current issues relating to effective programs for improving parent-infant interactions and additional supports available to families. (Online course offering via Distance Education).

HD FS 634: Adolescent and Emerging Adult Health and Development  
(3-0) Cr. 3. Alt. S., offered even-numbered years.  
*Prereq: HD FS 510 or permission of instructor* 
Theory and research on biopsychosocial, cognitive, physical and sexual health and development from early adolescence to emerging adulthood. Contexts of development including families, peers, schools, neighborhoods, romantic relationships, economics and public policies are considered. (Online course offering via Distance Education).

HD FS 635: Adult Development, Aging, and Health  
(Cross-listed with GERON). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
*Prereq: HD FS 510 or permission of instructor* 
Review of the impact of the growing older adult population as well as individual development and aging on individuals, families, and society. Exploration of theoretical perspectives applied to adult development and aging and distinction of normative and non-normative changes in adulthood. Discussion of methods to assess development across adulthood and consideration of the role of individual and environmental factors impacting efforts to optimize adult development. (Online course offering via Distance Education).

HD FS 640: Biomarkers and Family Research  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
*Prereq: HD FS 510 or permission of instructor* 
Research on the biological underpinnings of human development and the biobehavioral health of the family. Exposure to interdisciplinary research and practice on biomarkers in the family, with particular emphasis on health and well-being-related measures. Application of biomarker collection, measurement, analysis and dissemination.

HD FS 690: Advanced Topics  
Cr. arr. Repeatable.  
*Prereq: Permission of instructor and enrollment in Ph.D. program* 

HD FS 690I: Advanced Topics: Human Development and Family Studies  
Cr. arr. Repeatable.  
*Prereq: Permission of instructor and enrollment in Ph.D. program* 

HD FS 691: Internship  
Cr. arr. Repeatable. F.S.SS.  
*Prereq: Permission of instructor* 
Supervised practice and experience in the following specified areas. Offered on a satisfactory-fail basis only.

HD FS 691A: Internship: College Teaching  
Cr. arr. Repeatable. F.S.SS.  
*Prereq: Permission of instructor* 
Supervised practice and experience in college-level teaching. Offered on a satisfactory-fail basis only.

HD FS 691B: Internship: Research  
Cr. arr. Repeatable. F.S.SS.  
*Prereq: Permission of instructor* 
Supervised practice and experience in conducting research. Offered on a satisfactory-fail basis only.

HD FS 691D: Internship: Professional Experience  
Cr. arr. Repeatable. F.S.SS.  
*Prereq: Permission of instructor* 
Supervised practice and experience in relevant professional experiences. Offered on a satisfactory-fail basis only.

HD FS 699: Research  
Cr. arr. Repeatable.  
Offered on a satisfactory-fail basis only.

HD FS 699I: Research: Human Development and Family Studies  
Cr. arr. Repeatable.  
Offered on a satisfactory-fail basis only.
Human Sciences

Human Sciences courses provide integrative study and enriching experiences in areas that cut across the diverse curricula of the College of Human Sciences. These may include such areas as leadership, global understanding, social justice/responsibility, and ethics. Students in any college may take these courses.

Courses primarily for undergraduates:

H SCI 110: Orientation and Human Sciences Career Exploration
(2-0) Cr. 2. F.S.
Orientation and adjustment to the university and college; review of policies and procedures; academic resources; and course selection and planning. Comprehensive approach to career development; intensive self-analysis; and in-depth examination of majors in Human Sciences. Required for all students declared as an Undecided major in the College of Human Sciences.

H SCI 150: Dialogues on Diversity
(1-0) Cr. 1. F.S.
An exploration of diversity within the context of the Iowa State University community through understanding human relations issues. Meets U.S. Diversity Requirement

H SCI 490: Independent Study
Cr. 1-4.

H SCI 490E: Entrepreneurship
Cr. 1-4.

Kinesiology

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.
3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

Undergraduate Study

The Department of Kinesiology offers Bachelor of Science degree in Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the major/option courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Kinesiology & Health

The Kinesiology & Health major includes five specialization options. Options comprise a focused area of study within Kinesiology and Health. Coursework within each specialization option builds upon personal and scholarly learning by enabling students to master content and skills specific to career applications. Options available are:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Academic options within the Kinesiology & Health major

Students in the Community and Public Health option are prepared for professional employment at local, state or national health agencies, medical centers, and other public or private organizations that seek to promote health in the population.

Students in the Exercise Science option are prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health/fitness facilities, clinics, or hospitals. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health. Graduates also have a basic understanding of management issues related to business applications in the health and fitness field.

Students in the Physical Activity and Health Promotion option are prepared for careers focused on health and physical activity. This option provides more emphasis on behavioral and psychological aspects of physical activity. Students are prepared for careers in community based settings, including work sites, schools, hospitals, and other community agencies.

Students in the Physical Education/Teacher Education option are prepared to teach physical education in grades K-12 and to meet the State of Iowa learning outcomes for teachers. Graduates can plan
developmentally appropriate physical education, and individualize instruction and assessment for diverse audiences.

Students in the Pre-Health Professions option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in medicine, physical therapy, physician assistant or other healthcare professions.

**Learning outcomes for the undergraduate degree**

Despite the diversity of options, the learning outcomes comprise a common framework for each student as they progress through Iowa State University.

The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

**Communication**

Uses clear and effective written, oral, visual, and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.

**Lifelong learning, assessment, and self-reflection**

Analyzes and evaluates one’s own knowledge, abilities and actions relative to professional standards, seeks opportunities to grow professionally, and utilizes self-assessment and assessment of others to foster physical, cognitive, social, and emotional well-being.

**Content knowledge, discovery, and critical thinking**

Understands fundamental concepts of physical activity and health, conducts scientific inquiry, and applies critical thinking to solve problems from personal, scholarly, and professional perspectives.

**Ethics, diversity, and social justice**

Demonstrates leadership and social responsibility to improve quality of life for others and ensures equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.

**Other Program Offerings:**

**B.S./M.S. degree in Diet and Exercise**

A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in Diet and Exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), and the Department of Kinesiology. Students interested in this program must enroll as freshmen in the Pre-Diet and Exercise program. In the fall of the junior year, students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue toward completion of a B.S. degree in Dietetics or Kinesiology & Health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in Diet and Exercise.

More information can be found at: http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise/

**Endorsement to coach interscholastic athletics**

The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see School of Education, Teacher Education. More information can be found at: http://www.kin.hs.iastate.edu/

**Endorsement to teach health education**

Those interested in teaching health education in the public schools may get a primary licensure or an additional endorsement. The State Department of Education has approved the Health Teaching Licensure for grades 5-12.

**Basic Activity Instruction Program**

The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, fitness, martial arts, and sports. These courses are designed to serve general education purposes for all students.

**Dance**

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and physical education in the public schools may major in Kinesiology and Health (Physical Education Teacher Education) and minor in Dance.

An interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index: Performing Arts to find Performing Arts Major, Emphasis in Dance.

**Curriculum in Athletic Training**

The athletic training major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). See program details (http://www.istatesportsmed.com) for course requirements. Admission procedures and technical standards can be found at http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements.

**Curriculum in Kinesiology and Health**

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the medical, health, physical activity, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of five options:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Minors in dance, exercise science, health promotion, and kinesiology are available; see requirements under Kinesiology, Undergraduate Programs.

A major in Performing Arts with a dance emphasis is available; see requirements under Curriculum in Performing Arts Program, Dance.

Communication Proficiency
In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with the ENGL 150 grade being no lower than a C- and the ENGL 250 grade no lower than a C. Students not meeting this condition must earn a C or better in an advanced writing course:

ENGL 302 Business Communication 3
or ENGL 314 Technical Communication
LIB 160 Information Literacy 1
SP CM 212 Fundamentals of Public Speaking 3

U.S. Diversity and International Perspectives
In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See university approved list.

General Education:
Physical and Life Sciences:
BIOL 255 Fundamentals of Human Anatomy 3
BIOL 255L Fundamentals of Human Anatomy Laboratory 1
BIOL 256 Fundamentals of Human Physiology 3
BIOL 256L Fundamentals of Human Physiology Laboratory 1

Additional option-specific requirements are:
Community and Public Health
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
CHEM 163 College Chemistry 4
CHEM 163L Laboratory in College Chemistry 1
FS HN 167 Introduction to Human Nutrition 3
MICRO 201 Introduction to Microbiology 2
MICRO 201L Introductory Microbiology Laboratory 1

Exercise Science
FS HN 167 Introduction to Human Nutrition 3
PHYS 115 Physics for the Life Sciences 4

Physical Activity and Health Promotion

KIN 253 Orientation and Learning Community in Kinesiology and Health 1
KIN 258 Principles of Physical Fitness and Conditioning 2
KIN 358 Physiology of Exercise (*) 3
KIN 359 Exercise Physiology Lab 1

* A grade of C- or better is required.

Total cr. required to graduate: A minimum of 124 credits is required, with a minimum of 46 credits in courses numbered 300 or above.

**Courses for Kinesiology and Health Major**

**Option 1. Community and Public Health**

This option prepares students for a diverse array of careers in public and private health agencies as well as local, state and federal government programs. Students are qualified for careers in a variety of health and human service agencies, community organizations, and hospitals. This option also provides the ideal background training for credentials as a Certified Health Education Specialist (CHES).

**Option Requirements:**

</tr>
</tbody>
</table>

* A grade of C- or better is required.

**Option 2. Exercise Science**

This option prepares students for careers in exercise/fitness promotion. Students are prepared as health/fitness specialists, personal trainers, strength and conditioning specialists, and health coaches. Students
find work in fitness centers, worksite health programs, medical facilities, cardiac rehabilitation centers, and other agencies that provide fitness services. Students are eligible to sit for certification exams offered by the American College of Sports Medicine and the National Strength & Conditioning Association.

**Option Requirements:**

<td></td>
<td></td>
</tr>
</tbody>
</table>

* A grade of C- or better is required.

**Option 3. Physical Activity and Health Promotion**

This option prepares students for a variety of career outlets focused on health and physical activity promotion. The coursework provides the ideal background for students interested in worksite wellness programming. Students are also well suited to pursue career opportunities in health coaching and health promotion in schools, community agencies, as well as clinical settings. This option provides ideal background training for students interested in pursuing the Physical Activity in Public Health Specialist Certification offered by the American College of Sports Medicine.

**Option Requirements:**

<td>Methods of Teaching Dance</td>
<td>2</td>
</tr>
</tbody>
</table>

3 additional credits selected from dance courses numbered 200 or above.*

*Participation in Orchesis I or II is recommended.

#### Exercise Science

The minor requires a minimum of 18 credits and may be earned by completing the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>KIN 258</td>
<td>Principles of Physical Fitness and Conditioning</td>
<td>2</td>

<td>KIN 462</td>
<td>Medical Aspects of Exercise</td>
<td>3</td>
</tr>
<tr>
<td>KIN 467</td>
<td>Exercise and Health: Behavior Change</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Health Promotion

The minor requires a minimum of 18 credits and may be earned by completing the following:
H S 110  Personal and Consumer Health  3
H S 350  Human Diseases  3
H S 380  Worksite Health Promotion  3

3-6-cr. from the following
H S 215  Drug Education  3
H S 305  Instructor's First Aid and Cardio-pulmonary Resuscitation  3
H S 310  Community and Public Health  3

3-6 cr. from the following
H S 430  Community Health Program Development  3
KIN 467  Exercise and Health: Behavior Change  3

**Kinesiology**
The minor requires a minimum of 16 credits and may be earned by completing the following: (For non-majors only)

KIN 355  Biomechanics  3
KIN 358  Physiology of Exercise  3
KIN 359  Exercise Physiology Lab  1
KIN 360  Sociology of Physical Activity and Health  3
KIN 372  Motor Control and Learning Across the Lifespan  3
KIN 365  Sport Psychology  3
or KIN 366  Exercise Psychology  3

**Gerontology**
The department participates in the interdepartmental minor in gerontology (see Index).

**FOUR YEAR PLANS**

Students must complete a 3-credit course in US diversity and a 3-credit course in international perspectives. Check the ISU homepage for a list of approved courses. You must complete a minimum of 46 credits in 300/400 level courses and a total of 124 credits for graduation. Four year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. These are SAMPLE plans - use the degree audit as "official" documentation of progress toward your degree.

**Kinesiology and Health, B.S. - Community/Public Health**

KIN 400 Level Course Choices (9 cr): KIN 455, 458, 462, 467, 472, 473, 480, H S 464.

Graduate Study
The Department of Kinesiology graduate program seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a non-thesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department web site (http://www.kin.hs.iastate.edu/graduate).

Courses primarily for undergraduates:

KIN 101: Swimming I
(0-3) Cr. 1. F.S.S.S.  
Basic course for nonswimmers. Emphasis on two fundamental strokes and personal water safety skills. Offered on a satisfactory-fail basis only.

KIN 102: Swimming II
(0-3) Cr. 1. F.S.  
Prereq: KIN 101 or equivalent skill  
Intermediate course. Emphasis on learning and improving five basic strokes and personal water safety skills. Offered on a satisfactory-fail basis only.

KIN 108: Aquatic Fitness
(0-3) Cr. 1. F.S.  
Prereq: KIN 102 or equivalent skill  
Water related exercises, activities, and swimming workouts to improve physical fitness. Offered on a satisfactory-fail basis only.

KIN 122: Badminton
(0-2) Cr. 1. F.S.S.S.  
Introduction to fundamental badminton skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 129: Bowling
(0-2) Cr. 1. F.S.S.S.  
Introduction to bowling skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 135: Golf
(0-2) Cr. 1. F.S.S.S.  
Introduction to fundamental golf skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 144: Racquetball
(0-2) Cr. 1. F.S.S.S.  
Introduction to fundamental racquetball skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 153: Ice Skating
(0-2) Cr. 1. F.S.S.S.  
Introduction to fundamental ice skating skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 158: Tennis
(0-2) Cr. 1. F.S.S.S.  
Introduction to basic skills (forehand, backhand, service) and basic knowledge of game play. Offered on a satisfactory-fail basis only.

KIN 163: Physical Fitness
(0-3) Cr. 1. F.S.S.S.  
Evaluation of fitness status. Exercises, activities, and programs to improve physical fitness. Improve physical fitness and weight control. Offered on a satisfactory-fail basis only. Credit for only KIN 163 or 258 may be applied toward graduation.

KIN 164: Walking for Fitness
(0-3) Cr. 1. F.S.S.S.  
Fitness walking as an activity to improve health and fitness; values of this type of activity as a lifetime endeavor with knowledge and usage of pedometers. Offered on a satisfactory-fail basis only.

KIN 165: Running for Fitness
(0-2) Cr. 1. F.S.S.S.  
Running as a physical activity to improve physical fitness and health. Promotion of this activity as a lifetime endeavor. Offered on a satisfactory-fail basis only.

KIN 166: Weight Training
(0-3) Cr. 1. F.S.S.S.  
Introduction to fundamental skills of weight training and strategic game play. Offered on a satisfactory-fail basis only.
KIN 168: Judo
(0-2) Cr. 1. F.S.
Fundamentals of self defense, focusing on throwing with the hands, hips and feet as well as applying pins, chokes and arm-bars. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self control, & indomitable spirit. Emphasis on learning a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 170: Tae Kwon Do/Karate I
(0-2) Cr. 1. F.S.
Teaches fundamentals of self-defense, focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 171: Tae Kwon Do/Karate II
(0-2) Cr. 1. F.S.
Teaches advanced application of self-defense focusing on hand and foot striking and blocking techniques. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health and citizenship. Offered on a satisfactory-fail basis only.

KIN 173: Hap Ki Do/Martial Self-Defense
(0-2) Cr. 1. F.S.
Teaches fundamentals of self-defense focusing on joint locks, pressure points and throwing techniques to escape from an attacker. The physical skills will be taught focused on training through development of courtesy, integrity, perseverance, self-control and indomitable spirit. It will be emphasized that each student learns a way of life that promotes personal development, physical health & citizenship. Offered on a satisfactory-fail basis only.

KIN 182: Volleyball
(0-2) Cr. 1. F.S.SS.
Introduction to fundamental volleyball skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 185: Soccer
(0-2) Cr. 1. F.S.SS.
Introduction to fundamental soccer skills and strategic game play. Offered on a satisfactory-fail basis only.

KIN 210: Concepts of Fitness and Wellness
(2-0) Cr. 2. F.S.
Coverage of behavioral skills needed to adopt and maintain lifestyles conducive to fitness and wellness. Provides students with knowledge and skills needed to adopt and maintain healthy lifestyles. Includes self-assessments and content on physical activity, nutrition, weight control, stress management and other lifestyle behaviors related to health. For non-kinesiology majors.

KIN 214: Building Comprehensive School Physical Activity Programs
Cr. 1. Repeatable, maximum of 2 credits. S.
Prereq: Freshman Classification
Service learning with practical experience in school research focused on promoting physical activity and wellness in youth. Offered on a satisfactory-fail basis only.

KIN 231: Fundamentals of Tumbling and Gymnastics
(0-3) Cr. 1. F.
Prereq: Eligibility for admission to KIN teacher education program

KIN 232: Fundamentals of Team Sports
(0-3) Cr. 1. F.
Prereq: Eligibility for admission to KIN teacher education program
Fundamentals of indoor and outdoor team sports, for example basketball, volleyball, flag football, and soccer. Skill enhancement, analysis, understanding practice and the development of progressions.

KIN 236: Fundamentals of Individual Sports and Fitness
(0-3) Cr. 1. S.
Prereq: Eligibility for admission to KIN teacher education program
Fundamentals of individual sports and fitness, for example disc golf, bowling, badminton, and weight training. Skill enhancement, analysis, understanding practice and the development of progressions.

KIN 242: Planning for Success in a Health Career
Cr. 0.5. F.S.
Prereq: KIN H major in PHP option with sophomore status or above.
Exploration of various health fields to clarify career goals and prepare a parallel career plan outside of medicine. Facilitate preparation of relevant materials for professional and graduate school admission. Offered on a satisfactory-fail basis only.

KIN 252: Disciplines and Professions in Kinesiology and Health
(1-0) Cr. 1. F.S.
Overview of the various disciplines and professions that comprise the field of Kinesiology (the study of human movement) and help students determine the career option that best fits their interests.
KIN 253: Orientation and Learning Community in Kinesiology and Health (1-0) Cr. 1. F.S.
Prereq: Concurrent enrollment or credit in KIN 252
Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only.

KIN 258: Principles of Physical Fitness and Conditioning (1-3) Cr. 2. F.S.
Introduction to five components of fitness: cardiorespiratory, muscular strength, muscular endurance, flexibility, and body composition. Students will be introduced to basic exercise prescription and evaluation principles, develop skills to assess each component of fitness, and learn different exercise modalities to enhance each component. Credit for only one of the following courses may be applied toward graduation: KIN 163, 258.

KIN 259: Leadership Techniques for Fitness Programs (2-2) Cr. 3. F.S.
Prereq: KIN 258
Development of exercise leadership skills for a variety of activities. Includes planning, promotion, and teaching techniques for developing fitness in others using a variety of exercise modalities including group fitness and weight training. Kinesiology and health majors only.

KIN 266: Advanced Strength Training and Conditioning (1-2) Cr. 2. F.S.
Prereq: KIN 258
This course is designed to enhance the student's current level of knowledge and expertise to an advanced level in the area of strength training and conditioning. The course will prepare students interested in taking the National Strength and Conditioning Association Certified and Conditioning Specialist's exam. The course will focus on the assessment and implementation of training programs with strong emphasis on the areas of resistance training, metabolic training, flexibility, reaction time, speed, and agility. Kinesiology and health majors only and permission of instructor needed.

KIN 280: Directed Field Experience in Elementary Physical Education (0-3) Cr. 1. F.S.
Observing, planning, and facilitating movement experiences of children in an elementary school setting. Offered on a satisfactory-fail basis only.

KIN 281: Directed Field Experience in Secondary Physical Education (0-3) Cr. 1. F.S.
Prereq: Admission to Educator Preparation Program
Observing, planning, and facilitating movement experiences of students in a middle and/or high school setting. Offered on a satisfactory-fail basis only.

KIN 282: Field Experience with Educational Outreach (0-2) Cr. 1. F.S.
Prereq: Admission to Educator Preparation Program
Planning and facilitating physical education experiences for children in a community outreach setting. Experiences take place on campus. Offered on a satisfactory-fail basis only.

KIN 284: Elementary and Pre-school Movement Education (2-3) Cr. 3. F.S.
Prereq: 3 credits in human development and family studies
Approaches to teaching movement skills, health-related fitness and school-based physical activities (in the classroom, in PE, during recess) to pre-school and elementary school age children are covered. Emphasis is placed on planning and conducting developmentally appropriate movement experiences for preschool and elementary aged children throughout the school day based upon educational psychology, exercise psychology and motor development research. Practical experience is provided. Credit in only one of the following courses may be applied toward graduation: KIN 284, 312.

KIN 285: Pre-Internship in Kinesiology and Health (Cross-listed with H S). Cr. 1-2. F.S.
Prereq: Kinesiology and Health major and permission of internship coordinator.
Pre-internship experience with a health organization based on option. Offered on a satisfactory-fail basis only.

KIN 290: Independent Study
Cr. 1. Repeatable, maximum of 3 credits. F.S.
Prereq: 2nd semester freshmen, sophomores and permission from instructor.
Study under supervision of faculty.

KIN 312: Movement Education in Elementary School Physical Education (2-2) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280
Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Credit for only one of KIN 284 or KIN 312 may be applied toward graduation.
KIN 313: Teaching Secondary Physical Education
(2-3) Cr. 3. S.
Prereq: Admission to Educator Preparation Program, KIN 281
Current theory, practice and research on teaching focusing on management, instructional, and learning styles of students in secondary schools.

KIN 315: Coaching Theory and Administrative Issues
(3-0) Cr. 3. F.S.SS.
Study in the theory, ethics, strategy, and mechanics of coaching various interscholastic and/or intercollegiate sports. Emphasis on formulating a philosophy, identifying goals and psychological aspects, teaching skills, and developing strategies.

KIN 345: Management of Health-Fitness Programs and Facilities
(3-0) Cr. 3. F.S.
Application of management concepts to the fitness industry, e.g., understanding customers, marketing, program management, financial management, legal issues, and evaluation and planning.

KIN 355: Biomechanics
(3-0) Cr. 3. F.S.SS.
Prereq: PHYS 111 or PHYS 115
Mechanical basis of human performance; application of mechanical principles to exercise, sport and other physical activities.

KIN 358: Physiology of Exercise
(3-0) Cr. 3. F.S.SS.
Prereq: BIOL 255, BIOL 255L, BIOL 256 and BIOL 256L
Physiological basis of human performance; effects of physical activity on body functions.

KIN 359: Exercise Physiology Lab
(0-2) Cr. 1.
Prereq: Concurrent enrollment in KIN 358
Learning lab techniques in Exercise Physiology and engaging in the experimental process.

KIN 360: Sociology of Physical Activity and Health
(3-0) Cr. 3. F.S.
Prereq: SOC 134
Provide an overview of sociology to enhance students understanding of societal forces influencing behavior; Provide insights about people, environments, organization and policies that impact Kinesiology professionals.

KIN 363: Basic Electrocardiography
(2-0) Cr. 2. Alt. F., offered even-numbered years.
Understanding of human electrocardiography, including normal and abnormal 12-lead ECGs and arrhythmia identification.

KIN 365: Sport Psychology
(3-0) Cr. 3. F.S.
Prereq: PSYCH 101 or PSYCH 230
Psychological factors that influence performance in sport settings.
The influence of personality, anxiety, motivation and social factors.
Psychological skills training and strategic methods for improvement of athletic performance.

KIN 366: Exercise Psychology
(3-0) Cr. 3. F.S.SS.
Prereq: PSYCH 101 or PSYCH 230

KIN 372: Motor Control and Learning Across the Lifespan
(3-0) Cr. 3. F.S.SS.
Prereq: PSYCH 101 or PSYCH 230, BIOL 255, BIOL 256
Introduction to major concepts of neuromotor control, behavioral motor control and motor learning in the child, adult and older adult, with emphasis on the adult system.

KIN 385: Preparation and Search Strategies for Kinesiology and Health Internships
(Cross-listed with H S). Cr. 0.5. F.S.
Prereq: Junior classification; to be taken minimum of two semesters prior to required internship.
Preparation of relevant material for a successful internship/career search. Specific internship timeline, process, procedures will be reviewed.

KIN 391: Service Learning Leadership Experience
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Applied service learning experiences designed to provide students with opportunities to apply classroom knowledge to real world applications. Students will gain professional skills and programming experience while supporting health, education and wellness programming in school, work site or community settings. Offered on a satisfactory-fail basis only.

KIN 395: Adapted Physical Education
(Dual-listed with KIN 595). (2-2) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280/281
Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. KIN 595 may not be taken by students who previously earned credit in KIN 395.
KIN 459: Internship in Exercise Leadership
(0-3) Cr. 1. F.S.
Prereq: C- or better in KIN 259, CPR certification, concurrent enrollment in KIN 458
Observation and practice of exercise leadership techniques in an on-campus adult fitness program.

KIN 462: Medical Aspects of Exercise
(3-0) Cr. 3. F.S.
Prereq: KIN 358
The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions. Environmental and nutritional aspects of exercise.

KIN 467: Exercise and Health: Behavior Change
(Dual-listed with KIN 567). (3-0) Cr. 3. F.S.
Prereq: Introductory course with emphasis on exercise psychology (i.e., KIN 366 or equivalent)
Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations.

KIN 471: Measurement in Physical Education
(Dual-listed with KIN 571). (3-0) Cr. 3. S.
Prereq: Admission to Educator Preparation Program, KIN 280 and KIN 281
Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. KIN 571 may not be taken by students who previously earned credit in KIN 471.

KIN 472: Neural Basis of Human Movement
(Dual-listed with KIN 572). (3-0) Cr. 3. S.
Prereq: KIN 372 or PSYCH 310
Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.
KIN 473: Physical Dimensions of Aging  
Cr. 3. F.  
Prereq: KIN 355 or KIN 358 or KIN 372  
Understanding the physiological, behavioral, and cognitive changes associated with aging with focus on the effects of physical activity on the aging human system. Discussions of what it means to become older, what a person can expect during the aging process, and what kind of control a person has over the aging process.

KIN 475: Physical Education Curriculum Design and Program Organization  
(Dual-listed with KIN 575). (3-0) Cr. 3. F.  
Prereq: Admission to Educator Preparation Program, KIN 280 and 281  
Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.

KIN 480: Functional Anatomy  
(3-0) Cr. 3. F.S.  
Prereq: KIN 355; BIOL 155 or BIOL 255 and BIOL 256  
The structure and function of human muscular, skeletal and nervous systems. The relationship of these systems to efficient and safe human motion.

KIN 481: Biomechanics Lab  
(0-2) Cr. 1.  
Prereq: KIN 355  
Learning lab techniques in Biomechanics and engaging in the experimental process.

KIN 483: Exercise Psychology Lab  
(0-2) Cr. 1.  
Prereq: KIN 366  
Learning lab techniques in Exercise Psychology and engaging in the experimental process.

KIN 484: Assessment and Control of Locomotion  
(0-2) Cr. 1.  
Prereq: KIN 372  
Learning lab techniques in Motor Control and engaging in the experimental process.

KIN 485: Internship in Kinesiology  
Cr. 8-16.  
Prereq: Senior classification and advance registration.  
Observation and practice in exercise/fitness agencies. Offered on a satisfactory-fail basis only.

KIN 485A: Internship in Exercise Science  
Cr. 8-16.  
Prereq: Prereq: All required courses and C- or better in KIN 458, KIN 459 and KIN 462, Kinesiology and Health majors only. Cumulative GPA 2.0.  
Observation and practice in selected exercise science agencies. Offered on a satisfactory-fail basis only.

KIN 485G: Internship in Kinesiology: General  
Cr. 8-16.  
Prereq: Senior classification and advance registration.  
Observation and practice in exercise/fitness agencies. Offered on a satisfactory-fail basis only.

KIN 490: Independent Study  
Cr. 1-3. Repeatable, maximum of 6 credits.  
Prereq: 6 credits from KIN advanced core and permission of coordinator  
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 490A: Independent Study: Exercise and Sport Science  
Cr. 1-3. Repeatable, maximum of 6 credits.  
Prereq: 6 credits from KIN advanced core and permission of coordinator  
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 490H: Independent Study: Honors  
Cr. 1-2. Repeatable, maximum of 4 credits.  
Prereq: 6 credits from KIN advanced core and permission of coordinator  
Independent study of problems of areas of interest in exercise and sport science and related areas.

KIN 494: Practicum in Motivational Interviewing for Health  
Cr. 1-2. Repeatable, maximum of 6 credits. F.S.  
Prereq: Junior/Senior status and permission of instructor  
This supervised practicum course is designed for students interested in learning how to conduct ‘motivational interviewing’ for behavior change and health coaching applications. Students will learn strategies of motivational interviewing and have opportunities to practice applying these skills with adult clients. Offered on a satisfactory-fail basis only.

KIN 494A: Practicum in Motivational Interviewing for Health: Principles of Motivational Interviewing  
Cr. 1. F.S.SS.  
Prereq: Junior/Senior status and permission of instructor  
Introduction to the principles of ‘motivational interviewing’ for behavior change and health coaching applications. Students interested in gaining practical experience in health coaching should enroll in the associated practicum course (KIN 494B). Offered on a satisfactory-fail basis only.
KIN 494B: Practicum in Motivational Interviewing for Health: Supervised Experience
Cr. 1-2. Repeatable, maximum of 5 credits. F.S.
Prereq: KIN 494A Permission of Instructor
This supervised practicum course is designed for students interested in gaining experience in applying ‘motivational interviewing’ strategies in behavior change and health coaching applications. Students will have opportunities to practice motivational interviewing skills with adult clients and receive on-going support and assistance needed to refine their skills. Offered on a satisfactory-fail basis only.

KIN 495: Special Topics in Kinesiology
Cr. 1-3.
Prereq: Junior or Senior classification
Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

KIN 501: Research Methods in Physical Activity
(3-0) Cr. 3. Repeatable.
Prereq: Graduate classification in kinesiology and health
Methods and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

KIN 505: Research Laboratory Techniques in Exercise Physiology
(0-4) Cr. 2.
Prereq: KIN 358 or equivalent course with basic laboratory experience
Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

KIN 510: Advanced Medical Aspects of Exercise
(2-0) Cr. 2.
Prereq: KIN 358
The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

KIN 511: Physical Activity Strategies for Youth
Cr. 3.
Provide adequate opportunities to develop a more in-depth understanding of (a) the challenges in youth physical activity (PA), (b) the relevant theoretical models that are popular in youth PA, (c) the strategies that can be implemented to promote PA in youth.

KIN 512: Movement Education in Elementary School Physical Education
(2-2) Cr. 3.
Planning for management and instruction of developmentally appropriate physical education for children pre-school through grade six. Laboratory experience required. Emphasis on evaluating published research on physical education and school-wide physical activity.

KIN 515: Injury Biomechanics
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: Kin 355 or permission of instructor.
Utilization of biomechanical principles to model injury mechanisms. Introduction to tissue mechanics of bone, articular cartilage, ligament, tendon, muscle, and nerve. Biomechanics of lower extremity, upper extremity, and head/neck/trunk injuries.

KIN 516: Quantitative Analysis of Human Movement
(3-1) Cr. 3.
Prereq: KIN 355
Application of the principles of mechanics to the analysis of human motion. Investigation of the effects of kinematics and kinetics on the human body with special emphasis on exercise and sport applications. Includes consideration of two-dimensional and three-dimensional imaging techniques and force measurements.

KIN 517: Musculoskeletal Modeling
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: KIN 355 or permission from instructor
Systematic problem-solving approaches and design of computer programs for biomechanical analyses. Estimation of anthropometric parameters and mechanical properties of muscles, bones, and joints. Integration of anthropometrics, kinematics, EMG, and muscle mechanics into simulations of human movement.

KIN 518: Student Teaching in Elementary Physical Education
(0-8) Cr. 8. F.S.
Prereq: KIN 512, KIN 570, KIN 575
Student teaching for 8 weeks in an elementary school.

KIN 519: Student Teaching in Secondary Physical Education
(0-8) Cr. 8. F.S.
Prereq: KIN 512, KIN 570, KIN 575
Student teaching for 8 weeks in a middle or high school.

KIN 520: The Social Analysis of Sport
(3-0) Cr. 3.
Prereq: KIN 360; open to majors only or by permission of instructor
Sociological analysis of sport with emphasis on sociological theory, sports structure, and function in modern industrialized society; the systems of sport in regard to their role structure, formal organization, and professionalization and its differentiation along social class, age, and sex.
KIN 521: Advanced Topics in Exercise and Sport Psychology  
(3-0) Cr. 3.  
Prereq: KIN 365 or KIN 366, 3 courses in psychology; open to majors only or by permission of instructor  
Aspects of psychology which form a basis for understanding and explaining behavior in the context of exercise and sport. Emphasis on evaluating published research, particularly theory and research methodology. Student presentations.

KIN 549: Advanced Vertebrate Physiology I  
(Cross-listed with AN S, NUTRS). (4-0) Cr. 4. F.  
Prereq: recommended: an undergraduate physiology course and a biochemistry course  
Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

KIN 550: Advanced Physiology of Exercise I  
(2-3) Cr. 3.  
Prereq: KIN 505  
Concepts and methods of assessing neurological, muscular, cardiovascular, and respiratory adjustments to exercise.

KIN 551: Advanced Physiology of Exercise II  
(2-3) Cr. 3.  
Prereq: KIN 505  
Analysis of factors affecting work capacity and performance. Human energy metabolism concepts and measurement.

KIN 552: Advanced Vertebrate Physiology II  
(Cross-listed with AN S, NUTRS). (3-0) Cr. 3. S.  
Prereq: BIOL 335; credit or enrollment in BBMB 404 or BBMB 420  
Cardiovascular, renal, respiratory, and digestive physiology.

KIN 558: Physical Fitness - Principles, Programs and Evaluation  
(2-3) Cr. 3.  
Prereq: KIN 358  
Physiological principles of physical fitness, design and administration of fitness programs; testing, evaluation, and prescription; electrocardiogram interpretation.

KIN 560: Principles of Motor Control and Learning  
(2-3) Cr. 3.  
Prereq: KIN 372  
Theoretical perspectives of motor control and learning will be examined as well as factors that facilitate motor learning. Motor control and learning will also be addressed by studying functional tasks such as reach and grasp, posture and locomotor, handwriting, catching and/or speech.

KIN 561: Motor Development and Physical Activity  
(2-0) Cr. 2-3.  
Prereq: PSYCH 230  
Addresses theories and underlying mechanisms of motor development and motor control applied to typically and atypically developing children. Developmental control of balance, locomotion, reach-to-grasp, and other functional skills will be discussed, as will the role of physical activity in a child’s life.

KIN 567: Exercise and Health: Behavior Change  
(Dual-listed with KIN 467). (3-0) Cr. 3. F.S.  
Prereq: Introductory course with emphasis on exercise psychology (i.e., KIN 366 or equivalent)  
Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations.

KIN 570: Physical Activity Assessment for Health Related Research  
(2-2) Cr. 3.  
This course will cover the broad scope of research in physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques since accurate measures are needed to more accurately assess the health benefits from physical activity and to evaluate the effectiveness of behavioral interventions designed to promote physical activity.

KIN 571: Measurement in Physical Education  
(Dual-listed with KIN 471). (3-0) Cr. 3. S.  
Prereq: Admission to Educator Preparation Program, KIN 280 and KIN 281  
Current theory, practice and research on measurement and evaluation in physical education and youth physical activity settings. Statistics, grading, and specific assessments including fitness, motor skill, sport skill, physical activity, affective, and cognitive testing will be addressed. KIN 571 may not be taken by students who previously earned credit in KIN 471.

KIN 572: Neural Basis of Human Movement  
(Dual-listed with KIN 472). (3-0) Cr. 3. S.  
Prereq: KIN 372 or PSYCH 310  
Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.
KIN 575: Physical Education Curriculum Design and Program Organization
(Dual-listed with KIN 475). (3-0) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280 and 281
Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.

KIN 590: Special Topics
Cr. 1-3. Repeatable.

KIN 590A: Special Topics: Physical Education
Cr. 1-3. Repeatable.

KIN 590B: Special Topics: Health and Exercise Promotion
Cr. 1-3. Repeatable.

KIN 590D: Special Topics: Exercise Physiology
Cr. 1-3. Repeatable.

KIN 590E: Special Topics: Sport Sociology
Cr. 1-3. Repeatable.

KIN 590F: Special Topics: Sport/Exercise Psychology
Cr. 1-3. Repeatable.

KIN 590G: Special Topics: Motor Behavior
Cr. 1-3. Repeatable.

KIN 590H: Special Topics: Biomechanics
Cr. 1-3. Repeatable.

KIN 590I: Special Topics: Research Ethics
Cr. 1-3. Repeatable.

KIN 591: Supervised Field Experience
Cr. 1-6.
Prereq: 10 graduate credits in kinesiology and/or related areas
Supervised on-the-job field experience in special areas.

KIN 591A: Supervised Field Experience: Physical Education
Cr. 1-6.
Prereq: 10 graduate credits in kinesiology and/or related areas
Supervised on-the-job field experience in special areas.

KIN 591B: Supervised Field Experience: Health and Exercise Promotion
Cr. 1-6.
Prereq: 10 graduate credits in kinesiology and/or related areas
Supervised on-the-job field experience in special areas.

KIN 591D: Supervised Field Experience: Exercise Physiology
Cr. 1-6.
Prereq: 10 graduate credits in kinesiology and/or related areas
Supervised on-the-job field experience in special areas.

KIN 592: Practicum in College Teaching
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.S.S.
Supervised experience with teaching an upper division, classroom-based course. Offered on a satisfactory-fail basis only.

KIN 595: Adapted Physical Education
(Dual-listed with KIN 395). (2-2) Cr. 3. F.
Prereq: Admission to Educator Preparation Program, KIN 280/281
Etiology, characteristics, needs, and movement experiences for individuals with disabilities. Designed to provide appropriate methods of physical education instruction for students including those with disabilities as identified by the Individuals with Disabilities Education Act and students who are talented and gifted. Assessments and strategies to differentiate instruction and to adapt activities for all exceptional learners will be addressed. Laboratory experience required. KIN 595 may not be taken by students who previously earned credit in KIN 395.

KIN 599: Creative Component
Cr. 1-3. Repeatable.

Courses for graduate students:

KIN 615: Seminar
Cr. 1-3. Repeatable.

KIN 620: Advance Research Methods in Physical Activity
(3-0) Cr. 3. S.
Prereq: KIN 501, STAT 402 and STAT 587. Doctoral students only
Culminating seminar designed to synthesize statistical and design courses with practical research issues using data from physical activity.

KIN 670: Molecular Biology of Muscle
(Cross-listed with AN S). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Alt. S., offered odd-numbered years.
Prereq: BBMB 405, BBMB 420
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

KIN 699: Research
Cr. 1-6. Repeatable.

Nutritional Science (H SCI)
Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global
health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions.

The department also offers a nutrition minor.

**Administered by the Department of Food Science and Human Nutrition**

- Pre-Health Professional and Research Option
- Family Health Option
- Food Service Option
- Global Health and Policy Option
- Health Coach Option
- Nutrition and Wellness Option

**PRE-HEALTH PROFESSIONAL AND RESEARCH OPTION**

**Total Degree Requirement: 120 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications and Library: 13 cr.**

Food Science and Human Nutrition: 37 cr.

FS HN 110  Professional and Educational Preparation 1
FS HN 167  Introduction to Human Nutrition 3
FS HN 203  Contemporary Issues in Food Science and Human Nutrition 1
FS HN 265  Nutrition for Active and Healthy Lifestyles 3
FS HN 360  Advanced Nutrition and the Regulation of Metabolism 3
FS HN 361  Nutrition and Health Assessment 2
FS HN 362  Nutrition in Growth and Development 3
FS HN 467  Molecular Basis of Nutrition in the Development, Prevention, and Treatment of Disease 3
FS HN 480  Professional Communication in Food Science and Human Nutrition 1
FS HN 492  Research Concepts in Human Nutrition 2

Select at least 15 additional credits from:

BIOL 314  Principles of Molecular Cell Biology
FS HN 214  Scientific Study of Food & FS HN 215 and Advanced Food Preparation Laboratory
FS HN 242  The US Food System
FS HN 311  Food Chemistry
FS HN 365  Obesity and Weight Management
FS HN 367  Medical Terminology for Health Professionals
FS HN 403  Food Laws and Regulations
FS HN 419  Foodborne Hazards
FS HN 420  Food Microbiology
FS HN 461  Medical Nutrition and Disease I
FS HN 463  Community Nutrition
FS HN 464  Medical Nutrition and Disease II
FS HN 466  Nutrition Counseling and Education Methods
FS HN 490C  Independent Study: Nutrition
FS HN 499  Undergraduate Research
FS HN 575  Processed Foods
NUTRS 501  Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients
NUTRS 503  Biology of Adipose Tissue
NUTRS 504  Nutrition and Epigenetic Regulation of Gene Expression
NUTRS 562  Assessment of Nutritional Status
PHYS 111  General Physics

or PHYS 221 Introduction to Classical Physics I

Select at least 0-12 cr. Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu

COMMON CORE FOR FAMILY HEALTH, FOOD SERVICE, GLOBAL HEALTH AND POLICY, HEALTH COACH, AND NUTRITION AND WELLNESS OPTIONS

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

Select Humanities course from approved list

PSYCH 101  Introduction to Psychology 3
or PSYCH 230  Developmental Psychology
SOC 134  Introduction to Sociology 3
POL S 344  Public Policy 3
If H Sci student, select additional Humanities course 3

Ethics: 3 cr.

FS HN 342  World Food Issues: Past and Present 3

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from:

MATH 140  College Algebra 3

Select at least 3 credits from:

## School of Education

Marlene Strathe, Director of the School of Education

School of Education (http://www.education.iastate.edu)

### Mission and Goals

The School of Education at Iowa State University (http://iastate.edu) is committed to engaging in rigorous and socially meaningful research, preparing leaders and practitioners across the P-20 continuum that support rich and equitable learning opportunities for all students, and supporting public education as a cornerstone of a healthy, vibrant, and just society. We strive to be a national leader in educational theory, policy, and practice, and to honor the land-grant tradition and the broader mission of the university to serve the people of Iowa.
Undergraduate Study
The School of Education provides the professional education coursework to support the completion of the Educator Preparation Program. Program completers can then be recommended for licensure to the Iowa Board of Education Examiners. Majors offered in the School include Elementary Education (K-6), and Early Childhood Education-Unified (birth through age 8). The Early Childhood Education-Unified major is an interdepartmental program administered by the School of Education and the Department of Human Development and Family Studies.

Undergraduate students who are interested in teaching at the secondary level (5-12) or at the K-12 level major in a specific discipline and complete additional required educational coursework in the School of Education and the department to complete the Educator Preparation Program. K-12 and secondary education programs include: Agriculture Education, English Education, Family Consumer Sciences Education, Health Education, History-Social Sciences Education, Mathematics Education, Music Education, Physical Education, Science Education (Biology, Chemistry, Earth Science, and Physics), and World Languages and Cultures.

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements:

- Natural sciences: 6 credits
- Mathematics or statistics: 3 credits
- Social Sciences: 9 credits
- Humanities: 6 credits
- Communication skills: 9 credits
- Library skills (Lib 160): 1 credit
- Total: 34

The above requirements must include:

- ENGL 150 and 250 or equivalent
- One course that develops interpersonal or group presentation skills
- HD FS 102 or PSYCH 230
- One course in American history or government

Early Childhood Education – Unified
The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education - Unified Curriculum https://www.hdfs.hs.iastate.edu/find-majors/early-childcare-education-and-programming/

Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see https://www.hdfs.hs.iastate.edu/find-majors/early-childcare-education-and-programming/

Students who enroll in the early childhood education – unified program must apply to and be accepted into the Educator Preparation Program prior to enrolling in advanced courses. Admission requirements can be found at: https://www.education.iastate.edu/educator-prep-program/admission/. All early childhood education – unified candidates must meet general education requirements in order to complete the Educator Preparation Program.

Early Childhood Education- Unified majors must complete this professional course sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 201</td>
<td>Educational Technologies in the PK-6 Classroom</td>
<td>3</td>

</tbody>
</table>
Candidates must receive a minimum of a "C" in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion. Candidates must receive a minimum of a "C-" in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

Candidates can pursue an additional endorsement in K-8 reading.

**Elementary Education**

The undergraduate curriculum in elementary education leads to the Bachelor of Science degree.

The curriculum in elementary education is designed for candidates preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. The curriculum in elementary education is designed for candidates preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed will be qualified to teach in elementary classrooms in either public or private schools. For more information about the program, see Elementary Education Curriculum [https://www.education.iastate.edu/find-majors/elementary-education/](https://www.education.iastate.edu/find-majors/elementary-education/)

Elementary Education majors must complete this professional course sequence:

<table>
<thead>
<tr>
<th>Course Code</th>

</table>

Total Credits 21

Candidates must receive a minimum of a "C" in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion. Candidates must receive a minimum of a "C-" in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Additional information about endorsements can be found at: [https://www.education.iastate.edu/find-majors/elementary-education/](https://www.education.iastate.edu/find-majors/elementary-education/)

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these endorsements can be found at: [https://iastate.app.box.com/s/m4tr3og9ouwmibz5dhv9catyr2jql](https://iastate.app.box.com/s/m4tr3og9ouwmibz5dhv9catyr2jql)

Contact an Elementary Education academic adviser for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

Candidates who enroll in elementary education must apply and be accepted into the Educator Preparation Program prior to enrolling in advanced elementary education courses. Admission requirements can be found at: [https://www.education.iastate.edu/educator-prep-program/admission/](https://www.education.iastate.edu/educator-prep-program/admission/)
K-12 and Secondary Education

Students wanting to pursue K-12 or Secondary Teacher Education major in the content area in which they want to focus. In addition, coursework is taken to complete the Educator Preparation Program. Program completers can then be recommended to the Iowa Board of Educational Examiners.

Candidates must apply and be accepted into the Educator Preparation Program prior to enrolling in advanced education courses. Admission requirements can be found at: https://www.education.iastate.edu/educator-prep-program/admission/

K-12 and secondary education candidates must complete a professional course sequence. In general, the sequence includes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 202</td>

Total Credits: 18

Please check departmental information in regards to specific requirements for each program.

Candidates must receive a minimum of a "C" in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion. Candidates must receive a minimum of a "C-" in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

Candidates interested in pursuing K-12 education or secondary education can pursue an initial endorsement in any of the following program areas:

- K-12 Music Education
- K-12 Physical Education
- Secondary Agriculture Education
- Secondary English Education
- Secondary Family and Consumer Sciences Education
- Secondary Health Education
- Secondary History-Social Sciences Education (American Government, American History, or World History)
- Secondary Mathematics Education
- Secondary Science Education (Biology, Chemistry, Earth Science, or Physics)
- Secondary World Languages and Cultures Education (French, German, or Spanish)

Specific program requirements can be found within each department.

Candidates can choose to pursue additional endorsements. These can include any of the above listed endorsement and the following:

- K-12 Coaching
- K-12 English as a Second Language
- 5-12 Agriscience/Agribusiness
- 5-12 Multioccupations
- 5-12 Reading (contact the English Education academic adviser for a list of required courses)
- Science
  - 5-12 Physical Science
  - 5-12 Basic Science
- Social Sciences
  - 5-12 Anthropology

<td>Fundamentals of Computer Programming</td>
<td></td>
</tr>
</tbody>
</table>
Candidates must receive a "C" or above in all courses
Additional information can be found at: https://www.education.iastate.edu/find-majors/learning-technologies-minor/

Graduate Study
The School of Education is comprised of two divisions: Higher Education and Teaching, Learning, Leadership, and Policy (TLLP). Within these divisions, the School offers coursework and experiences for the degrees Doctor of Philosophy, Master of Science, and Master of Education with a major in education. Graduate programs leading to completion of a teacher preparation program and recommendation for teacher licensure are offered in secondary science and secondary mathematics. In addition, endorsements in reading and special education can also be pursued by graduate students. Graduate students interested in educational leadership may also participate in our educator preparation programs in educational leadership. Program completers may be recommended for administrative licensure for roles as principals and superintendents. The School of Education offers graduate coursework leading to a minor for masters and doctoral students in other fields of study. Several graduate certificate programs are offered through the School of Education.

Doctoral Degree Program
Students in the School of Education may complete the Ph.D. with a major in education. Students pursuing a Ph.D. in the division of Higher Education may earn an education degree with an emphasis in either higher education administration or community college leadership. Students pursuing a Ph.D. in the division of TLLP may earn an education degree with an emphasis in one of the following areas: educational leadership, organizations, and policy; instructional technology; mathematics education; science education; literacy; special education; or social and cultural studies of education. Specific information about the requirements of and options available within the Ph.D. degree in education are available from the School office or on the School of Education Graduate Programs website https://www.education.iastate.edu/graduate-programs/.

Graduates of the master's degree programs are prepared to pursue careers as educational leaders, higher education professionals, researchers, and advanced practitioners in colleges and universities, community colleges, public and private schools, education agencies, and informal (free-choice) education settings.

Minors are available in Education and in Curriculum and Instructional Technology at both the master's and doctoral level. Information about the minors can be found here: https://www.education.iastate.edu/graduate-programs/

Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. For more information, students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, and General Graduate Studies or to graduate level course offerings within other departments.

Graduate Teacher and Educational Leadership Preparation Programs
A Master of Arts in Teaching degree program (science education) is available to students who currently have a bachelor's degree in a science area (or a closely related field). A teacher preparation program in mathematics education is also available to graduate students (School of Education). In these teacher preparation programs, program completers can be recommended for teacher licensure to the Iowa Board of Educational Examiners.

Teacher preparation programs at the graduate level are also offered in Agricultural Education (College of Agriculture and Life Sciences), Family and Consumer Sciences Education (College of Human Sciences), and Physical Education (College of Human Sciences). The School of Education provides the professional core education coursework for these programs. Students in a graduate teacher preparation program must complete specific courses.

Graduate level programs leading to recommendation for teaching endorsements are offered through the School of Education. Graduate students who seek a teaching endorsement in reading or special education, but do not wish to pursue a master's degree can incorporate...
those courses in a professional certificate program. Endorsement programs include Instructional Strategist II: Behavior Disorders/Learning Disabilities, Reading K-8 and Reading 5-12.

The School of Education offers graduate programs for students seeking Iowa licensure as principals and superintendents. The Transformative School Leader Program (TSLP) is designed for working professionals and includes coursework and field experiences in a principal preparation program. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Students must complete the program as a Master of Education degree.

Graduate Certificate Programs
The School of Education offers Graduate Certificate programs to allow students to enhance their skills outside of full degree programs. The Certificate programs currently offered include Applied Research Methods in the Human Sciences, Community College Teaching, Instructional Design, Literacy Coaching, Education for Social Justice and Special Education. Certificate programs require a minimum of 12 graduate credits (several require more than this) and can be earned in conjunction with a degree program. More information about graduate certificate programs can be found on the School of Education web site.

Education (EDUC)
Educational Administration (EDADM)
Educational Leadership and Policy Studies (EL PS)
Higher Education (HG ED)
Human Sciences (H SCI)
Research and Evaluation (RESEV)
Special Education (SP ED)

Educator Preparation Program at Iowa State University
Heidi Doellinger, Director of Educator Preparation

Educator Preparation (http://www.education.iastate.edu/educator-prep-program)

The Educator Preparation Program at Iowa State University is a shared responsibility that spans three colleges. All candidates who are recommended by Iowa State University for teacher licensure must be considered a program completer by meeting the requirements of the Educator Preparation Program and be recommended by their department, college, and the ISU recommending official. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills, knowledge, and dispositions / professional practices required of beginning teachers.

Undergraduate Educator Preparation Programs
An undergraduate student seeking a bachelor’s degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements:

- Natural sciences: 6 credits
- Mathematics or statistics: 3 credits
- Social Sciences: 9 credits
- Humanities: 6 credits
- Communication skills: 9 credits
- Library skills (Lib 160): 1 credit
  - Total: 34

The above requirements must include:

- ENGL 150 and 250 or equivalent
- One course that develops interpersonal or group presentation skills
- HD FS 102 or Psych 230
- One course in American history or government

Currently, there are fifteen undergraduate Educator Preparation areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

Agricultural Education (grades 5-12)
Biology (grades 5-12)
Chemistry (grades 5-12)
Early Childhood Education-Unified (birth-grade 3, including special education)
Earth Science (grades 5-12)
Elementary Education (grades K-6)
English (grades 5-12)
Family and Consumer Sciences (grades 5-12)
Health Education (grades 5-12)
History-Social Sciences (grades 5-12)
Mathematics (grades 5-12)
Music (grades K-12)
Physical Education (grades K-12)
Physics (grades 5-12)
World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Endorsements Areas

Early Childhood Education
Candidates can also choose to pursue an endorsement in K-8 reading.

Elementary Education
Candidates pursuing a degree in Elementary Education are required to pursue an endorsement in at least one additional area. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts,
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8).

Additional information about endorsements can be found at: https://www.education.iastate.edu/find-majors/elementary-education/

Elementary Education Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Contact an Elementary Education academic adviser for the requirements for these endorsements.

K-12 Education and Secondary Education

Candidates can choose to pursue additional endorsements. These can include any of the above listed endorsement and the following:

- K-12 Coaching
- K-12 English as a Second Language
- 5-12 Agriscience/Agribusiness
- 5-12 Multioccupations
- 5-12 Reading (contact the English Education academic adviser for a list of required courses)
- Science
- 5-12 Physical Science
- 5-12 Basic Science
- Social Sciences
  - 5-12 Anthropology
  - 5-12 Psychology
  - 5-12 Sociology
- 5-12 Speech Communications and Theater
- World Languages and Cultures
  - 5-12 Chinese
  - 5-12 Latin
  - 5-12 Russian

Information about endorsements can be found at: https://www.education.iastate.edu/find-majors/endorsements/

Minors

Students in the Educator Preparation Program may also choose to pursue a minor in Learning Technologies additional information can be found at: https://www.education.iastate.edu/find-majors/learning-technologies-minor/

Post-Bachelor's Educator Preparation Programs

Students holding an appropriate bachelor's degree may complete the educator preparation program in order to be recommended for teacher licensure in the secondary undergraduate licensure programs.

Candidates would be required to complete the Professional Core requirements of the program. In general, the sequence includes:

<table>
<thead>
<tr>
<th>Course</th>

</tr>
</tbody>
</table>

Total Credits: 18

Please check department information regarding to specific requirements for each program.

Candidates must have at least one course in each of the following five general education groups identified for undergraduate students identified in the previous section: Natural Sciences, Mathematics and Statistics, Social Sciences, Humanities, and Communication Skills.
Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits.

Interested students should consult with the program coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Educator Preparation Programs for which post-bachelor candidates take undergraduate Educator Preparation courses include;

- English (grades 5-12)
- Health Education (grades 5-12)
- History-Social Sciences (grades 5-12)
- World Languages and Cultures (French, German, and Spanish) (grades 5-12)

**GRADUATE DEGREE PROGRAMS WITH EDUCATOR PREPARATION PROGRAM COMPLETION**

Currently, there are five graduate educator preparation programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

- Agricultural Education (M.S.)
- Family and Consumer Sciences Education (M.Ed. or M.S.)
- Mathematics Education (M.Ed.)
- Physical Education (M.S.)
- Secondary Sciences Education (M.A.T.)

Graduate level programs leading to recommendation for additional teaching endorsements are offered through the School of Education. Graduate students who seek a teaching endorsement in reading or special education, but do not wish to pursue a master's degree can incorporate those courses in a professional certificate program. Endorsement programs include Instructional Strategist II: Behavior Disorders/Learning Disabilities, Reading K-8 and Reading 5-12.

Graduate programs are also available for those who seek licensure in Educational Leadership and Policy Studies as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

**Master’s Programs with Teacher Preparation**

**AGRICULTURAL EDUCATION**

The Agricultural Education and Studies Department offers a Master’s of Science program that prepares Agricultural Education teachers for grades 5-12.

See coordinator for program requirements.

**MATHEMATICS**

The School of Education offers a Master’s of Education program that prepares Mathematics teachers for grades 5-12.

**Physical Education**

The Department of Kinesiology offers a Master’s of Science program that prepares Physical Education teachers for grades K-12.

See coordinator for program requirements.

**Secondary Sciences**

The School of Education offers a Master’s of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12.

See coordinator for program requirements.

**IOWA STATE UNIVERSITY TEACHER EDUCATION STANDARDS (INTASC STANDARDS)**

**The Learner and Learning**

Standard #1: Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

**Content**

Standard #4: Content Knowledge. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

**Instructional Practices**

Standard #6: Assessment. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.
Standard #7: Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #8A: Technology. The teacher integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology (this standard is unique to the Iowa State University Teacher Preparation Program).

Professional Responsibility
Standard #9: Professional Learning and Ethical Practice. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

EDUCATOR PREPARATION PROGRAM ADMISSION REQUIREMENTS

Educator Preparation Program Candidates must have:

- A minimum of 9 credits hours at Iowa State University with a 2.5 cumulative grade-point-average (GPA). (Student must maintain 2.5 cumulative GPA throughout the program in order to continue through the program)
- Praxis CORE scores with a minimum of 156 in Reading, 162 in Writing, and 150 in Mathematics.
- Documented completion of an Iowa State University-approved 10 hours of pre-student teaching field experience.
- A minimum of a “C” in ALL Education (EDUC) / Curriculum Instruction (C I) , Human Development and Family Studies (HD FS), Special Education (SP ED) courses required for licensure (pedagogy coursework).
- A minimum of a "C" in ALL Major department courses/content courses required for teacher licensure (content coursework). (This is for courses taken from Fall 2007 forward).
- A valid criminal background check report processed by ISU’s recommending official.

More information about admission requirements can be found at: https://www.education.iastate.edu/educator-prep-program/admission/

THE PROFESSIONAL CORE REQUIREMENT FOR EDUCATOR PREPARATION

Undergraduate Students

Educator Preparation Program candidates must complete certain studies related directly to the profession of teaching. All undergraduate candidates in the educator preparation program must take the following courses prior to student teaching, unless the student’s program area has an approved content-area course deemed to be equivalent. Candidates must receive a minimum of a “C” in all education (EDUC) / Curriculum Instruction (C I) , Human Development and Family Studies (HD FS), Special Education (SP ED) courses and all content-specific pedagogy/methods courses required for licensure. (See program coordinator for more information).

K-12 AND SECONDARY EDUCATION:

Student teaching (semester-long experience). See Program Area Coordinator for more information.
This includes:

- 79.14(5) Teacher candidates admitted to a teacher preparation program must complete a minimum of 80 hours of pre-student teaching field experiences, with at least 10 hours occurring prior to acceptance into the program.

Post-Bachelor’s Students

Students who hold an appropriate bachelor’s degree and seek a teaching license must complete an educator preparation program. This includes the professional education requirements listed above. The requirements can be met through course work or examination.

Master’s Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master’s programs that lead to completion of an educator preparation program must take the following courses prior to student teaching, unless the student’s program area has an approved content area course deemed to be equivalent. (See Master’s Programs section below for details.)

Master’s Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master’s programs that lead to completion of an educator preparation program must take the following courses prior to student teaching, unless the student’s program area has an approved content area course deemed to be equivalent. (See Master’s Programs section below for details.)

All students enrolled in Master’s programs that lead to completion of an educator preparation program must take the following courses prior to student teaching, unless the student’s program area has an approved content area course deemed to be equivalent. (See Master’s Programs section below for details.)

CLINICAL EXPERIENCES

The Standards for Practitioner and Administrator Preparation Programs 281—79.14(256) Teacher preparation clinical practice standard states “The unit and its school partners shall provide field experiences and student teaching opportunities that assist candidates in becoming successful teachers in accordance with the following provisions.

This includes:

- 79.14(7) The unit is responsible for ensuring that the student teaching experience for initial licensure:

  a. Includes a full-time experience for a minimum of 14 consecutive weeks in duration during the teacher candidate’s final year of the teacher preparation program. (Iowa State University policy requires a full semester experience.)

For most programs, there are four levels for clinical experiences used to meet these requirements. Level 1 involves observation in local schools and is typically completed prior to admission to the educator preparation program. Level 2 involves actively teaching in the classroom with one-tow lessons, at minimum. Level 3 involves actively teaching in the classroom with two lessons, at minimum and being observed by a supervisor during teaching. Level 4 is student teaching and involves actively teaching for a semester-long experience where the student teacher bears primary responsibility for planning and instruction within the classroom for a minimum of four weeks during the semester. Level 2, 3 and 4 field experiences involve a course fee, which ranges from $75.00 to $450.00 and are assessed to cover the costs of supervision and placement with a cooperating teacher. Course fees are increased when student teaching nationally or internationally. For current course fees, consult the Schedule of Classes. For level 2, 3 and 4 field experiences, the student needs access to transportation because the placement may be within 60 miles of the university. The time commitment for clinical experiences ranges from 1/2 day for level 2 and 3 to the full day for level 4. Students complete a background check before initial placement in schools and other appropriate locations.

Specific field experience course requirements can be found in program/degree requirements.

PROGRAM CURRICULUM

Undergraduate Students

Early Childhood Education – Unified

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the
Elementary Education
In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Additional information about endorsements can be found at: https://www.education.iastate.edu/find-majors/elementary-education/

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these endorsements can be found: https://iastate.app.box.com/s/m4tr3og9ouwmiubz5dhv9catryr2jgf

Contact an Elementary Education academic adviser for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

Candidates who enroll in elementary education must apply and be accepted into the Educator Preparation Program prior to enrolling in advanced elementary education courses. Admission requirements can be found at: https://www.education.iastate.edu/educator-prep-program/admission/

K-12 and Secondary Education
Students wanting to pursue K-12 or Secondary Teacher Education major in the content area in which they want to focus. In addition, coursework is taken to complete the Education Preparation Program. Program completers can then be recommended to the Iowa Board of Educational Examiners. Candidates must apply and be accepted into the teacher education program prior to enrolling in advanced education courses. Admission requirements can be found at: https://www.education.iastate.edu/educator-prep-program/

Post-Bachelor’s Students
Students holding an appropriate bachelor’s degree who wish to complete a teacher preparation program in order to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See program coordinator for more information).

Graduate Students
Each Master’s program will determine what, if any, general education requirements Master’s students must fulfill beyond a bachelor’s degree from a regionally accredited institution. (See program coordinator for more information.)

See coordinator for program requirements.

EDUCATOR PREPARATION PROGRAM COMPLETION REQUIREMENTS
In order to be recommended for licensure to the Iowa Board of Educational Examiners by Iowa State University, you must be a program completer. In order to be a program completer, you must have met the following requirements:

- A minimum of a 2.5 cumulative grade-point-average (GPA).
- A minimum of a "C" in ALL Education (EDUC) / Curriculum and Instruction (C I), Human Development and Family Studies (HD FS), and Special Education (SP ED) courses and all content specific
pedagogy/methods courses required for program completion and endorsement completion.

• A minimum of a "C-" in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).
• A passing score on the Praxis Content Assessment text
• A passing score on the Praxis Performance Assessment for Teachers (PPAT)
• A conferred degree
• Documentation of completion of VIRT Training
• A final transcript sent to the Iowa Board of Educational Examiners
• Departmental approval of program completion

REGENTS ALTERNATIVE PATHWAY TO IOWA LICENSURE

The Regents Alternative Pathway to Iowa Licensure is a collaborative program involving the three Iowa Regents' universities. The program is designed for adult learners holding a baccalaureate degree with work experience who are seeking 5-12 licensure in a high needs area. For more information: https://iowateacherintern.org

Youth Development

Interinstitutional Graduate Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in Youth Development. This is an interinstitutional distance education program offered entirely online. The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from each of the participating institutions: Iowa State University; Kansas State University; Michigan State University; University of Missouri; University of Nebraska-Lincoln; North Dakota State University; and Texas Tech University.

At Iowa State University, Youth Development is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-YTH) that consists of 36 semester credits. A computer with minimum specifications, Web access, and an email address are required for completing the program. A creative component is completed as the final project/exam for this degree. The final project is tailored to the needs of the individual student and determined in cooperation with the POS committee. The student presents the agreed-upon project to the committee in a 60- to 90-minute final oral examination meeting via a video conference call. http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/

The Master of Family and Consumer Sciences with Youth Development specialization is the only online degree available focusing solely on the skills to serve today's young people. Students become immersed in a strengths-based curriculum and learn a methodology that supports youth, enabling them to grow socially, emotionally, and cognitively. The program has its roots in positive youth development. Rather than focusing solely on corrective measures, a positive youth development approach equips individuals in the second decade of life with the skillset necessary for a successful transition into adulthood.

Two on-line graduate certificates are available as a part of this program:

• Youth Development Specialist Graduate Certificate http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/
• Youth Program Management and Evaluation Graduate Certificate (http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/)

Courses primarily for graduate students, open to qualified undergraduates:

YTH 501: Foundations of Youth Development (1-0) Cr. 1. F.S.SS.
Fundamentals of youth development and the youth development profession. Through this introduction to the field, students will explore the ethical, professional, and historical elements of youth development as it has evolved toward professionalization. (on-line course offering via Distance Education).

YTH 508: Grant Development and Management (3-0) Cr. 3. F.S.
Basic Grant Development and Management will introduce students to the grant-getting process and provide an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results. (on-line course offering via Distance Education).

YTH 510: Adolescents and Their Families (3-0) Cr. 3. F.S.
Adolescent development as it is related to and intertwined with family development; reciprocal influences between adolescents and their families are examined. Working with youth vis à vis the family system will be highlighted. (on-line course offering via Distance Education).
YTH 520: Community Youth Development  
(3-0) Cr. 3. F.S.
Focus on the national emphasis of a strength-based or asset approach to community youth development, encompassing individual development (i.e., positive youth development) and adolescent interrelationships with environments. Emphasis is placed upon research, theory, and practice applied in communities throughout the U.S. Students will explore existing models, read theoretical and applied literature, and examine current community efforts as a basis for understanding community youth development. (on-line course offering via Distance Education).

YTH 530: Youth in Cultural Contexts  
(3-0) Cr. 3. F.S.
Examination of the cultural context factors that affect youth from a holistic perspective within and outside the family unit. The course will provide an understanding of the cultural heritage of differing family structures and types. Students will explore the social and educational processes experienced by youth through in-depth reading, writing, discussion, critical listening, viewing of contemporary videos, and informal interviews with youth. Students will be encouraged to think critically about society and culture, gain further knowledge of how ethnic groups fit historically into society, and examine the results of how history has shaped the current cultural climate of the U.S. (on-line course offering via Distance Education).

YTH 540: Youth Professionals as Consumers of Research  
(3-0) Cr. 3. F.S.
This course will help youth development professionals understand and evaluate research reports to reduce anxiety about applying research results and theories to practice. Specific emphasis will be on research and theory reports related to youth development. (on-line course offering via Distance Education).

YTH 550: Youth Policy  
(3-0) Cr. 3. F.S.
Various federal and state policies designed specifically for youth. Students will examine how and why policies for youth are constructed. A guiding question that will be used to evaluate existing state and national policies is whether they contribute to, or act as, barriers to desired developmental outcomes. (on-line course offering via Distance Education).

YTH 570: Contemporary Youth Issues  
(3-0) Cr. 3. Repeatable. F.S.SS.
Issues faced by youth today and associated risk and resiliency factors. A different topic will be presented each year, with the course rotating among participating universities. Past topics have included Youth Violence, Youth and Appearance, Adolescent Health, Global Perspectives and Volunteerism. The course may be taken more than once, as long as the content is different each time. (on-line course offering via Distance Education).

YTH 580: Administration and Program Management  
(3-0) Cr. 3. F.S.
This course will introduce students to the development, administration and management of youth-serving organizations. (on-line course offering via Distance Education).

YTH 585: Program Design, Evaluation and Implementation  
(3-0) Cr. 3. F.S.
Theoretical, methodological, and pragmatic issues involved in conducting programs and scholarship. Overview of the program development process and outcome evaluation of children and family programs. Modes of outcome scholarship and their implications for community-based programs are discussed. Students will develop knowledge through participating in a community-based project involving the practical application of program design and evaluation methods. (on-line course offering via Distance Education).

YTH 599: Creative Component  
Cr. arr. Repeatable. F.S.SS.
Nonthesis students creative component (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of five credits of independent work is required on the programs of study (POS). Creative component format determined cooperation with the POS committee. (on-line course offering via Distance Education). Offered on a satisfactory-fail basis only.

Courses for graduate students:

YTH 634: Youth Development  
(3-0) Cr. 3. F.S.
Introduction to the developmental period of adolescence. The theory and research of positive youth development will be the lens through which this developmental period is examined. The course will emphasize how the developmental tasks of this life stage are influenced by (and influence) family and home, school, peers, and other contextual forces. The course will help students recognize and become familiar with the major issues and transitions adolescents face as they successfully navigate this developmental stage by critically examining the theoretical and research literature. (on-line course offering via Distance Education).
YTH 690: Advanced Topics
Cr. arr. Repeatable. F.S.SS.
Prereq: Permission of instructor.
Advanced topics. (on-line course offering via Distance Education).

YTH 691: Internship
Cr. arr. Repeatable. F.S.SS.
Prereq: Permission of instructor.
Supervised practice and experience in college teaching, research, professional experience. On-line course offering via Distance Education. Offered on a satisfactory-fail basis only.
The College of Liberal Arts and Sciences is a world-class learning and research community. Iowa State’s most academically diverse college, LAS educates students to become global citizens, providing rigorous academic programs in the sciences, humanities and social sciences within a supportive, student-centered learning environment. The college also is home to the Open Option Program that prepares students for any curriculum at the University.

Learning GOALS
The primary mission of the college is to promote learning in all its dimensions by providing students with ample opportunities to acquire the requisite knowledge, abilities, and skills to succeed in the world beyond the university. Through coursework within the major and in general education, students will develop skills in reasoning, analysis, and communication; achieve an understanding of the intellectual, historical, and artistic foundations of culture; and work to strengthen their abilities to interact with people, cultures, and the environment in an ethical and sensitive manner. To achieve these learning goals, the college asks students to acquire depth in learning within disciplines of their own choosing, and to acquire breadth through general education courses and electives.

Entering the College of Liberal Arts and Sciences
From High School
Students entering the college are required to have the minimum high school preparation:

• 4 years of English
• 3 years of Social Studies
• 2 years of a single world language (3 or more years of a single world language in high school meets the world language graduation requirement in the College of Liberal Arts and Sciences.)
• 3 years of Mathematics
• 3 years of Science

The College also recommends a course in computer applications.

By Transfer
Students are eligible to transfer to the College of Liberal Arts and Sciences with no deficiencies by completing 24 credit hours from an accredited two or four year institution with a 2.0 minimum GPA. To graduate from the LAS College, a transfer student must complete the general requirements of the college as well as those of the university.

Early planning can improve the transfer process and support a timely graduation. For information on articulation/transfer agreements that apply to students who have earned Associate of Arts degrees from an Iowa public community college or who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa, see Articulation/Transfer Agreements in the Admission Transfer Information section of the catalog. Transfer students should also note that in order to graduate "with distinction" students must have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits and have a 3.5 or higher GPA at the beginning of their final term.

Transfer students in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of their graduation or under one of the five immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met though adjustments will be made in instances where courses are no longer available or where programs have been changed. Transfer students are responsible for reviewing their transfer credit evaluation with the academic adviser during the first semester of enrollment. Prospective transfer students are urged to contact the College of Liberal Arts and Sciences well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU.

CURRICULA OF THE COLLEGE OF LIBERAL ARTS AND SCIENCES
The college has four curricula: a curriculum in Liberal Arts and Sciences, leading to the Bachelor of Arts or the Bachelor of Science degree; a curriculum in music, leading to the Bachelor of Music degree; a curriculum in liberal studies, leading to the Bachelor of Liberal Studies degree; and a curriculum in Software Engineering, leading to the Bachelor of Science degree.

Liberal Arts and Sciences Curriculum
To obtain a bachelor’s degree from the curriculum in liberal arts and sciences, an undergraduate student must meet all university graduation requirements:
• 120 credits or more
• minimum of 32 semester credits earned in residence at Iowa State University
• last 32 credits in residence
• GPA of 2.0 or better on courses taken at Iowa State University
• credit for LIB 160: Information Literacy
• credit for ENGL 150; credit for ENGL 250*
• U.S. diversity and international perspectives requirements

Students must also meet all college and program specific requirements for:

• General Education
• World Language
• Advanced Communication
• Advanced Credits
• Completion of the Major

*The College of Liberal Arts and Sciences aligns with the University Communication Proficiency Grade Requirement: At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250; some majors set higher requirements for communication proficiency.

General Education
Requirements and Learning Goals

The central importance of a general education is reflected in the learning goals of each of three disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation to support learning for all majors.

General Education Areas
The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

• Arts and Humanities—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.
• Mathematical Disciplines and Natural Sciences —(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking, and should experience science as a rational search for understanding the structure and behavior of the natural world.
• Social Sciences—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Lists of courses approved for the three general education areas are available on the LAS College website (http://www.las.iastate.edu/students/academics/general-education). Students may not apply the same course in more than one general education area.

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas.

Courses from the department of the first major may not be applied to general education requirements. Courses cross-listed with a course in the student’s first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once.

World Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture’s language. Students meet this expectation by satisfying a graduation requirement equivalent to the first year of university-level study in one world language.

Students may meet this requirement through several pathways:

• completing three or more years of high-school world language study in a single language
• passing the exam for credit at the 102 level
• receiving a passing grade in an ISU 102 world language or American Sign Language (ASL) course or equivalent transfer course
• receiving a passing grade in a world language course taught in a language other than English at the 200-level or higher
• being a native speaker of a language other than English
• completing a major in any world language
• earning a passing grade in SPAN 097 Accelerated Spanish Review.

Questions about the World Language Requirement and how to meet it should be directed to the College Academic Services office in 102 Catt Hall. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply approved
courses in world languages toward the appropriate general education areas.

**Advanced Communication Skills**

The continued development of communication skills following the sophomore year is the responsibility of the student's major department. The department promotes this development by adopting measures to certify the communication proficiency of its own majors. Certification occurs upon satisfactory completion of a designated course in which communication is evaluated and is a significant component. This designated course may be either a course required in the student's program or an advanced communication course offered by the Department of English, such as:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 302</td>
<td>Business Communication</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 305</td>
<td>Creative Writing: Nonfiction</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 309</td>
<td>Proposal and Report Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 314</td>
<td>Technical Communication</td>
<td>3</td>
</tr>
</tbody>
</table>

**Advanced Credit Requirements**

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher.

**The Major**

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major is comprised of 24 to 48 credits in a specific discipline as determined by the faculty. Tracks within a major must have a common core that supports learning outcomes of the major. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.) Courses in the first major listed on the degree program may not be counted in the general education groups.

The average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher.

Courses meeting the requirements of additional majors may be counted in the general education groups. When choosing an additional major, students must confirm that the additional major is allowable (see list under “Double Majors”).

The major in Interdisciplinary Studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives.

**Double Majors**

Students may elect a second major from the departments and program areas in the College of Liberal Arts and Sciences, or from a major field offered for the bachelor's degree in another college of the university.

Double majors between the following are not allowed:

- Chemistry with Biochemistry and Agricultural Biochemistry;
- Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Genetics, and Microbiology;
- Economics with Business Economics
- Any combination of Journalism and Mass Communication, Advertising, and Public Relations.

A student in the Bachelor of Liberal Studies or Bachelor of Music curricula may not add a major from the Liberal Arts and Sciences curriculum, though they may work toward a second degree in the Liberal Arts and Sciences curriculum.

To be awarded a double major both major departments must approve the degree program, and if those majors involve two colleges, both colleges must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major.

If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences must meet all requirements of the second major, but are exempt from the LAS College General Education, World Language and Advanced Credits requirements.

A student may earn two degrees in the Liberal Arts and Sciences curriculum with two appropriate majors and at least 30 additional credits. Any degree offered by this college may be earned together with a degree and a major in any other college of the university. For the requirements for two degrees, see Two Bachelor's Degrees in the Degree Planning section of the catalog.

**Minors**

In addition to earning a major a student may want to add a minor to the program of study. Minors are established by programs and must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. To earn a minor
students must file paperwork to declare the minor and must complete the requirements specified by the program. The minor must include at least 9 credits that are not used to meet any department, college, or university requirement other than the credit requirement for graduation and credit requirement for courses numbered 300 or above. Courses for the minor beyond those 9 standalone credits may be applied toward general education or to meet other graduation requirements. Completed minors will be recorded on the transcript.

More information and a list of minors offered by the college of Liberal Arts and Sciences can be found on the University Minors page.

**Bachelor of Music Curriculum**

The Department of Music offers a Bachelor of Music degree (B.Mus.) as well as a Bachelor of Arts degree in music. In order to receive teacher certification in music, students must earn the Bachelor of Music degree. Bachelor of Music students must select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition. For details about both degrees, see Music, Undergraduate Study.

**Bachelor of Liberal Studies Curriculum**

The LAS College administers the Bachelor of Liberal Studies (B.L.S.) degree, a bachelor’s degree program established by the three Iowa Regent universities. The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals. Students in the B.L.S. program are not eligible to add majors to their degree program, but they may earn a Certificate or minor by completing all of the requirements of those programs.

For specific degree requirements, see Liberal Studies.

**Software Engineering Curriculum**

A Bachelor of Science degree in software engineering is jointly administered by the College of Liberal Arts and Sciences and the College of Engineering. The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This cross-college program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering.

**Additional Curricular Policies**

In addition to the policies outlined in the above discussion of the curricula of the LAS College:

- Elective courses as well as general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.
- Courses taken on a pass/not pass basis may be counted toward the required total of 120 credits and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.
- No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.
- Students whose high school study of world languages meets the College World Language Requirement may not enroll in or receive credit for 101 or 102 in that language.
- Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education area requirements.

Be sure to talk to your academic adviser and review other University polices that affect graduation in the Academics section of the catalog.

**The Open Option**

Students who enter Iowa State University and want time to explore the best match between their academic interests and abilities, may do so as Open Option students.

The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State. Open Option students are assigned academic advisers in the Liberal Arts and Sciences Student Academic Services Office and take LAS 101, an orientation class that introduces students to campus resources as well as to all of the colleges and majors on campus.

Aided by their adviser, Open Option students select courses that allow them to sample their academic interests before committing to a specific university major. Open Option students typically declare a major during their second or third semester. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.
Academic Enhancements in LAS
Certificate Programs
The LAS College also administers certificate programs in Actuarial Science, Computing Applications, Data Science, Latin American Studies, and Leadership Studies. Students interested in pursuing these certificates are advised to consult with their academic adviser and with the relevant program that administers the certificate. Completion of a certificate will be recorded on the transcript.

Honors Program
Students enrolled in the College of Liberal Arts and Sciences are encouraged to participate in the University Honors Program.

Liberal Arts and Sciences Honors is designed to add depth and breadth to students' programs of study and intellectual development. Students in Liberal Arts and Sciences Honors benefit from the resources and capabilities of a large and dynamic research university along with the small class sizes and intellectual community that characterize smaller, selective liberal arts colleges. Membership in LAS Honors offers specific benefits to students such as collaborations with individual faculty members on Honors projects, extended library loan privileges, 24-hour use of the Jischke Honors Building and priority registration for classes.

LAS Honors encourages freshmen as well as more advanced students to join. Graduation in the Honors Program is recognized by a special notation on the student's diploma and permanent record. Honors students wear white Honors cords at graduation.

Teacher Licensure
Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for licensure. Teaching licenses are issued for a specific teaching level, e.g., grades 5-12. Subject area endorsements are listed on the candidate's license. The College of Liberal Arts and Sciences collaborates with the School of Education in approved licensure programs. Students who plan to teach in secondary schools (grades 5-12) may qualify for a license by completing an approved licensure program in one of the following majors:

- Biology
- Chemistry
- Earth Science
- English
- History
- Mathematics
- Music (through the Bachelor of Music curriculum)*
- Physics
- World Languages and Cultures (Endorsements are available in French, German, and Spanish.)

Students may also add these additional endorsements to their primary license:

- English as a Second Language
- General Science
- Physical Science
- Social Studies
- Speech Communication
- World Languages and Cultures (Chinese, Latin, and Russian)

*Students in the College of Liberal Arts and Sciences who complete the approved licensure program in music education (BM degree with Vocal K-12 option or Instrumental K-12 option) may apply for a teaching license that allows them to teach music in grades K-12.

For further information, see Teacher Education.

Preprofessional Programs
Students in the College of Liberal Arts and Sciences may participate in preprofessional programs by taking the courses required for admission to professional schools. Students may enter the college with the designation Premed, Prelaw, or Preprofessional Health Programs. Most will earn a bachelor's degree by choosing a major and meeting the requirements for the major while taking the preprofessional courses.

Others will spend one to three years as students in the college before transferring to a professional school to which they have applied and been accepted. For further information, see Opportunities for Preprofessional Study.

The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa. Visit the Liberal Arts and Sciences Student Academic Services office for details.

Reserve Officers' Training Corps Programs (ROTC)
The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in Military Science (Army), Naval Science (Navy, Marine Corps), and Air Force Aerospace Studies.

Learning Communities
Students in the LAS College can participate in a variety of learning community options that support student success by supporting the transition to college life. There are various kinds of learning communities both within and across majors. Most learning communities involve small groups of students who take one or more classes in common and have
a staff person or peer mentor who supports students as they make connections and get engaged at ISU.

See http://www.lc.iastate.edu/ for more information.

Study Abroad and National Student Exchange
The LAS College offers many study abroad and domestic exchange program options to enhance the undergraduate experience. Every year hundreds of students expand their horizons through these programs while they stay on track for graduation. Visit the LAS Study Abroad office in Catt Hall or the National Student Exchange office in 1080 Hixson-Lied for more information.

Undergraduate Research
The LAS College has hundreds of faculty actively engaged in research and most majors have designated independent study and/or research courses. Students are encouraged to talk to faculty about how they can be involved in the process of discovery.

Career Services, Internships and Co-ops
LAS Career Services assists students in gaining career-related experience while going to school. Internships/Co-ops provide students with the opportunity to gain specific skills, apply academic knowledge in practical situations, pretest their career choice, and establish a network of professional contacts. Internships may be paid or unpaid.

Most internships last for a semester or a summer. Students wishing to receive academic credit for their internship must work with their departments and programs in advance of their internship experience to establish a plan to connect their work experience to the curriculum. Official ISU sanctioned co-op arrangements allow students to work full-time on an extended basis (such as working two semesters) or on an alternating basis (work, school, work, etc.) during any semester (fall, spring, summer) while keeping their student status.

Gaining work experience while in college is highly recommended. Students can find internship opportunities through the University CYHIRE system and through participation in any of the career fairs held on campus each Fall and Spring semester. Students must visit with their adviser to make plans for an internship experience and to understand what impact, if any, it may have on their four-year graduation plan.

For additional information, contact Liberal Arts and Sciences Career Services on the first floor of Carver Hall.

Academic Advising
Planning the Program of Study
Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student’s chosen major is available to the student and the adviser through AccessPlus. The student should review the audit each semester and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean’s office. Students are responsible for reviewing and updating their degree audits in a timely fashion in order to avoid delays in graduation.

During the first two years, students should meet proficiency requirements in ISU Comm Foundations (English 150,250) and Information Literacy (LIB 160) and make progress toward meeting the general education requirements. The third and fourth years should emphasize completion of the major (and minor, if elected) and general education requirements, and should give the student an opportunity to take electives. Students seeking the enhanced academic opportunities provided by Study Abroad, National Student Exchange, Honors, Undergraduate Research and Internships will want to engage in careful planning of the Program of Study.

Academic Advising Learning Outcomes
Through their experience with academic advising, students will:

• Develop an understanding of the structure, application, and goals of a liberal arts education in relation to their academic development.
• Be able to formulate appropriate questions, seek information, and evaluate and apply academic advice.
• Know the requirements, policies and protocol of the university, college, and department as they relate to their educational experience.
• Understand how degree programs can be enhanced by study and experiences tailored to their intellectual and personal goals.

Students will also be able to identify and use university resources effectively to:

• Satisfy degree requirements
• Plan programs of study, including selection of appropriate courses and registration
• Discover how interests, skills and goals connect to fields of study and careers
• Link curricular and co-curricular activities
• Research and prepare for advanced study and/or careers
• Share responsibility for a mentor-mentee relationship between advisee and adviser.

Departments of the College
Majors and minors in the College of Liberal Arts and Sciences are administered by the following departments:
• Air Force Aerospace Studies
• Biochemistry, Biophysics, and Molecular Biology
• Chemistry
• Computer Science
• Ecology, Evolution, and Organismal Biology
• Economics
• English
• Genetics, Development, and Cellular Biology
• Geological and Atmospheric Sciences
• Greenlee School of Journalism and Communication
• History
• Mathematics
• Military Science (Army Reserve Officers’ Training Corps)
• Music and Theatre
• Naval Science
• Philosophy and Religious Studies
• Physics and Astronomy
• Political Science
• Psychology
• Sociology
• Statistics
• World Languages and Cultures

MAJORS
• Advertising, B.A.
• Anthropology, B.A., B.S.
• Biochemistry, B.S.
• Bioinformatics and Computational Biology B.S.
• Biological/Pre-Medical Illustration, B.A.
• Biology, B.S.
• Biophysics, B.S.
• Chemistry, B.A., B.S.
• Communication Studies, B.A.
• Computer Science, B.S.
• Criminal Justice Studies, B.A.
• Data Science, B.S.
• Earth Science, B.A., B.S.
• Economics, B.S.
• English, B.A., B.S.
• Environmental Science, B.S.
• Environmental Studies (secondary major only)
• French (see World Languages and Cultures, below)
• Genetics, B.S.
• Geology, B.S.
• German (see World Languages and Cultures, below)
• History, B.A., B.S.
• Interdisciplinary Studies, B.A., B.S.
• International Studies (secondary major only)
• Journalism and Mass Communication, B.S.
• Liberal Studies, B.L.S. (a general studies degree)
• Linguistics, B.A.
• Mathematics, B.S.
• Meteorology, B.S.
• Music, B.A., B.Mus.
• Performing Arts, B.A.
• Philosophy, B.A.
• Physics, B.S.
• Political Science, B.A.
• Psychology, B.A., B.S.
• Public Relations, B.S.
• Religious Studies, B.A.
• Sociology, B.A., B.S.
• Software Engineering, B.S.
• Spanish (See World Languages and Cultures, below)
• Speech Communication, B.A.
• Statistics, B.S.
• Technical Communication, B.S.
• Women’s and Gender Studies, B.A., B.S.
• World Languages and Cultures B.A.:
  • French
  • German
  • Spanish

A secondary major must be taken in conjunction with a primary major.

MINORS
To earn a minor students must file paperwork to declare the minor and must complete the requirements specified by the program. Minors consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. Minors must also include at least 9 credits that are not used to meet any department, college, or university requirement other than the credit requirement for graduation and credit requirement for courses numbered 300 or above. Completed minors will be recorded on the transcript.

• Advertising
• African American Studies
• American Indian Studies
• Anthropology
• Astronomy
• Biochemistry
• Bioinformatics and Computational Biology
• Biological Illustration
• Biology
• Chemistry
• Chinese Studies
• Classical Studies

Advertising

The Advertising Major
The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

To receive a bachelor of arts degree in advertising, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JL MC or P R. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level courses or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC or P R. These include:

<table>

<td>4</td>
</tr>
</tbody>
</table>

Additional recommended courses and requirements for the advertising major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or minor in the school. All Greenlee School majors are required to take a second major or minor outside the school as an area of expertise. All Greenlee School majors are required to take 499A. Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Minor in Advertising
Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in advertising, students complete 15 credits.

Minor/second major choice 300 level 3
For JL MC 300- and 400-level choices, please choose from the list of selected courses available from an academic adviser. You may schedule an appointment with an adviser by either calling 515-294-4342 or visiting with our front office staff at 101 Hamilton Hall.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses: (U.S. Diversity) http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses and (International Perspectives) http://www.registrar.iastate.edu/students/div-ip-guide/intlPerspectives-current. Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Courses primarily for undergraduates:

**ADVRT 230: Advertising Principles**
(3-0) Cr. 3.
Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy and appeals. Study of the creation of advertising.

**ADVRT 301: Research and Strategic Planning for Advertising and Public Relations**
(Cross-listed with P R). (3-0) Cr. 3.
Prereq: ADVRT 230 or P R 220
The use of primary and secondary research for situations, organizations and the public. Formation and development of strategic plans for public relations and advertising students.

**ADVRT 334: Advertising Creativity**
(2-1) Cr. 3.
Prereq: JL MC 110; Minimum of C+ in JL MC 201; ADVRT 301/P R 301
Development and execution of creative advertising materials. Copywriting, art direction and computer applications. Creative strategy development, execution and evaluation.

**ADVRT 335: Advertising Media Planning**
(3-0) Cr. 3.
Prereq: ADVRT/P R 301
Concepts of media planning and selection in the development, execution and evaluation of advertising campaigns. Characteristics and capabilities of the advertising media. Utilization of market segmentation, consumer buying and media audience databases.

**ADVRT 336: Advertising Account Management**
(3-0) Cr. 3.
Prereq: JL MC 110; Minimum of C+ in JL MC 201; ADVRT 301/P R 301
Fundamentals of account management with emphasis on leadership, sales techniques, relationship building, presentation skills, and strategic thinking. Includes aspects of agency communications, team building, client management, evaluating creative concepts and media plans, and developing strategic proposals and campaign recommendations.

**ADVRT 390: Professional Skills Development**
(Cross-listed with JL MC, P R). Cr. 1-3. Repeatable, maximum of 6 credits. F.S.
Prereq: Minimum of C+ in JL MC 201; other vary by topic. Instructor permission for non-majors.
Check with Greenlee School for course availability.
ADVRT 434: Advertising Campaigns
(3-0) Cr. 3. F.S.
Prereq: Minimum of C+ in ADVRT 334 or ADVRT 336, and major status
Development of advertising campaigns for business and social institutions. Projects involve budgeting, media selection, market analysis, campaign strategy and creative execution.

ADVRT 435: Advertising Competition
Prereq: Permission of instructor, Junior/senior standing strongly recommended
Preparation of materials for regional and national competitions.

ADVRT 436: Advertising Portfolio Practicum
(3-0) Cr. 3. S.
Prereq: Minimum of C+ in ADVRT 334, non-majors with instructor permission
Advanced advertising writing and design. Emphasis on creative strategy, problem solving and execution of creative materials in print, broadcast and online media for a variety of clients.

ADVRT 490: Independent Study in Communication
Cr. arr.
Prereq: Junior classification and contract with supervising professor to register
Projects during which students may study problems associated with a medium, a professional specialization, a philosophical or practical concern, a repertorial method or writing technique, or a special topic in their field. Credit is not given for working on student or professional media without an accompanying research component. No more than 3 credits of ADVRT/JLMC/PR 490 may be used toward a degree in the Greenlee School.

ADVRT 497: Special Topics in Communication
Prereq: Junior classification. See Schedule of Classes for possible prerequisites.
Seminars or one-time classes on topics of relevance to students in communication.

ADVRT 499: Professional Media Internship
Cr. 1-3. F.S.S.S.
Prereq: JL MC majors: JLMC 110 and minimum of C+ in JL MC 202 or JL MC 206 or P R 321; ADVRT majors: JLMC 110 and minimum of C+ in JL MC 201 and ADVRT 301; P R majors: JLMC 110, PR 301 and minimum of C+ in P R 321. All students, formal faculty adviser approval.
Initial, required internship. A 400-hour (for 3 credits) internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

ADVRT 499A: Professional Media Internship: Required
Cr. 3. F.S.S.S.
Prereq: JL MC majors: JLMC 110 and minimum of C+ in JL MC 302 or JL MC 306; ADVRT majors: JLMC 110 and minimum of C+ in JL MC 201 and ADVRT 301; P R majors: JLMC 110, PR 301 and minimum of C+ in P R 321. All students, formal faculty adviser approval.
Optional internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

ADVRT 499B: Professional Media Internship: Optional
Cr. 1-3. F.S.S.S.
Prereq: JL MC majors: JLMC 110 and minimum of C+ in JL MC 302 or JL MC 306; ADVRT majors: JLMC 110 and minimum of C+ in JL MC 201 and ADVRT 301; P R majors: JLMC 110, PR 301 and minimum of C+ in P R 321. All students, formal faculty adviser approval.
Optional internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

Anthropology

The ISU program in Anthropology is housed in the Department of World Languages and Cultures (http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/).

An undergraduate major in Anthropology can serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology students develop a well-rounded professional education in cultural anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and society, the biology and evolution of humans and other primates, and through the study of past human communities and material culture. Students learn the important historical and contemporary issues of our subdisciplines, and they learn what it means to be an Anthropologist and acquire an anthropological perspective on global issues. Students develop an appreciation of the value of cultural difference at the local, national and global levels. Students may obtain experience in archaeological, ethnographic and biological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area I (Arts and Humanities) or III (Social Sciences) or a combination of both. A bachelor
of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area IIA (Mathematics) or IIB (Natural Sciences) or a combination of both.

Undergraduate students with majors in anthropology are required to take the following anthropology core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHR 201</td>
<td>Introduction to Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTHR 202</td>
<td>Introduction to Biological Anthropology and Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ANTHR 306</td>
<td>Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTHR 307</td>
<td>Biological Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTHR 308</td>
<td>Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ANTHR 450</td>
<td>Approaches in Anthropology</td>
<td>3</td>
</tr>
</tbody>
</table>

One of the following methods courses is required:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHR 319</td>
<td>Skeletal Biology</td>
<td>3</td>
</tr>
<tr>
<td>or ANTHR 320</td>
<td>Archaelogical Discovery and Analysis</td>
<td></td>
</tr>
<tr>
<td>or ANTHR 45</td>
<td>Ethnographic Methods</td>
<td></td>
</tr>
</tbody>
</table>

In addition to the above, 15 ANTHR choice credits are required.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 250</td>
<td>Written, Oral, Visual, and Electronic Composition</td>

### Graduate Study

The department offers a master of arts degree with a major in anthropology. Graduate courses are offered in the areas of archaeology, biological anthropology, and cultural anthropology. Competence in statistics or a methodology relevant to the student’s program of study must be demonstrated. Students are required to do original field, archival, or laboratory research that will result in a scholarly thesis.

### Courses primarily for undergraduates:

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

Students in Anthropology have the option of pursuing a B.S. or a B.A. A B.S requires six additional group requirement credits in natural science or mathematics disciplines. A B.A requires six additional group requirement credits in social or humanities disciplines.
ANTHR 201: Introduction to Cultural Anthropology
(3-0) Cr. 3. F.S.SS.
Comparative study of culture as key to understanding human behaviors in different societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.
Meets International Perspectives Requirement.

ANTHR 202: Introduction to Biological Anthropology and Archaeology
(3-0) Cr. 3. F.S.
Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology.

ANTHR 220: Globalization and Sustainability
(Cross-listed with ENV S, GLOBE, M E, MAT E, SOC). (3-0) Cr. 3. F.S.
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.
Meets International Perspectives Requirement.

ANTHR 225: American Indians of Iowa
(Cross-listed with AM IN). Cr. 3. F.
Cultures and histories of Native people who have called the present state of Iowa home; primary focus on the period between 1700 CE and the present; Native interactions with Spanish, French, British, and American people.
Meets U.S. Diversity Requirement

ANTHR 230: Globalization and the Human Condition
(3-0) Cr. 3. F.S.
An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific.
Meets International Perspectives Requirement.

ANTHR 250: Primate Behavior
(3-0) Cr. 3. F.S.SS.
Prereq: ANTHR 202 and/or basic biology course recommended
An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and prosimians; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

ANTHR 306: Cultural Anthropology
(3-0) Cr. 3. S.
Prereq: ANTHR 201
Survey of the major theoretical, methodological and empirical foundations of cultural anthropology.
Meets International Perspectives Requirement.

ANTHR 307: Biological Anthropology
(2-2) Cr. 3. S.
Prereq: ANTHR 202
Human evolution as known from fossil evidence, comparative primate studies, and genetic variations in living populations. Laboratory-tutorial sessions include study and discussion of human osteology, fossil hominids, simple Mendelian traits, and bio-ethics in applied biological anthropology.

ANTHR 308: Archaeology
(2-2) Cr. 3. F.
Prereq: ANTHR 202
Methods and techniques for the recovery and interpretation of archaeological evidence, its role in reconstructing human behavior and past environments. Laboratory sessions include experience in the interpretation of archaeological evidence, the use of classification systems, and prehistoric technologies such as ceramics and stone tools.

ANTHR 309: Introduction to Culture and Language
(Cross-listed with LING). (3-0) Cr. 3.
Prereq: ANTHR 201 recommended
Introduction to study of language, culture and society from an anthropological perspective. Focus on language and thought, ethnography of speaking, discourse and narrative, writing and literacy, and media communication. Discussion of key theories and methods of linguistic anthropology.
Meets International Perspectives Requirement.

ANTHR 313: Kinship and Marriage in a Global Perspective
(Dual-listed with ANTHR 513). (3-0) Cr. 3. S.
Prereq: ANTHR 201 recommended
Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality.
Meets International Perspectives Requirement.
ANTHR 315: Archaeology of North America
(Dual-listed with ANTHR 515). (Cross-listed with AM IN). (3-0) Cr. 3. S.
Prereq: ANTHR 202
Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.
Meets U.S. Diversity Requirement

ANTHR 319: Skeletal Biology
(Dual-listed with ANTHR 519). (2-2) Cr. 3. F.
Prereq: ANTHR 307 or college level biology
Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.

ANTHR 320: Great Plains Archaeology
(Dual-listed with ANTHR 520). (Cross-listed with AM IN). (3-0) Cr. 3. F.
Prereq: ANTHR 202
Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information.
Meets U.S. Diversity Requirement

ANTHR 321: World Prehistory
(Dual-listed with ANTHR 521). (3-0) Cr. 3. S.
Prereq: ANTHR 202 recommended
An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies.

ANTHR 322: Peoples and Cultures of Native North America
(Dual-listed with ANTHR 522). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or AM IN 210
Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life.
Meets U.S. Diversity Requirement

ANTHR 323: Topics in Latin American Anthropology
(Dual-listed with ANTHR 523). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

ANTHR 323A: Latin American Anthropology: Violence and Memory
(Dual-listed with ANTHR 523A). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 323B: Latin American Anthropology: Social movements and Democracy
(Dual-listed with ANTHR 523B). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 323C: Latin American Anthropology: Race, Class and Gender
(Dual-listed with ANTHR 523C). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 323D: Latin American Anthropology: Regional Focus
(Dual-listed with ANTHR 523D). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.
ANTHR 323E: Latin American Anthropology: Culture and Sport.
(Dual-listed with ANTHR 523E). (Cross-listed with US LS). (3-0) Cr. 3.
Repeatable, maximum of 9 credits.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 325: Peoples and Cultures of Africa.
(Cross-listed with AF AM). (3-0) Cr. 3.
Prereq: 201 or 306 recommended
Survey of diverse African culture areas across the continent and globally; local level description and analysis of individuals as members of African communities; regional, national and global scales of identification.
Meets International Perspectives Requirement.

ANTHR 328: Archaeological Discovery and Analysis
(2-2) Cr. 3. Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 308
Identification, analysis, and interpretation of animal bones recovered from archaeological sites, emphasizing taphonomy, paleoecology, and faunal exploitation.

ANTHR 332: Current Issues in Native North America
(Dual-listed with ANTHR 532). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 332A: Current Issues in Native North America: Gender and Family
(Dual-listed with ANTHR 532A). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 332B: Current Issues in Native North America: Indigenous Ecologies and Geographies
(Dual-listed with ANTHR 532B). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 332C: Current Issues in Native North America: Cultural and Political Movements
(Dual-listed with ANTHR 532C). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 332D: Current Issues in Native North America: Regional Focus
(Dual-listed with ANTHR 532D). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 333: Asian American Material Cultures
(Cross-listed with HIST). (3-0) Cr. 3.
Examination of material objects made and used by Asian Americans with both historical and contemporary focuses; transnational and interdisciplinary lenses to interpret the material world; contemporary approaches to analysis of artifacts.
Meets U.S. Diversity Requirement

ANTHR 336: Global Development
(Dual-listed with ANTHR 536). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: ANTHR 201 or ANTHR 306
Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology.
Meets International Perspectives Requirement.
ANTHR 340: Magic, Witchcraft, and Religion
(Dual-listed with ANTHR 540). (Cross-listed with RELIG). (3-0) Cr. 3. S.
Prereq: ANTHR 201 or ANTHR 306
Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice.
Meets International Perspectives Requirement.

ANTHR 354: War and the Politics of Humanitarianism
(Cross-listed with POL S). (3-0) Cr. 3. S.
Prereq: Pol S 235, Pol S 251, Anthr 210, or Anthr 230
Humanitarianism as a system of thought and a system of intervention in conflict and post-conflict situations. Role of humanitarian organizations and actors in addressing human suffering caused by conflict or war. Military action as a form of humanitarian intervention.
Meets International Perspectives Requirement.

ANTHR 376: Classical Archaeology
(Cross-listed with CL ST). (3-0) Cr. 3.
Chronological survey of the material culture of the ancient Graeco-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

ANTHR 376A: Classical Archaeology: Bronze Age and Early Iron Age Greece
(Cross-listed with CL ST). (3-0) Cr. 3.
Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece. (ca 3000-700 BCE). Chronological survey of the material culture of the ancient Greece-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

ANTHR 376B: Classical Archaeology: Archaic through Hellenistic Greece (ca 700-30 BCE)
(Cross-listed with CL ST). (3-0) Cr. 3.
Chronological survey of the material culture of ancient Greece from ca. 700-30 BCE and the role of archaeological context in understanding the varied aspects of Greek culture during the Archaic, Classical, and Hellenistic periods. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

ANTHR 376C: Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)
(Cross-listed with CL ST). (3-0) Cr. 3.
Chronological survey of the material culture of the ancient Roman world and the role of archaeological context in understanding the varied aspects of ancient Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

ANTHR 411: Anthropology for Global Professionals
(Dual-listed with ANTHR 511). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306
Theory and methods for conducting ethnographic research in academic and non-academic settings; application of anthropological knowledge to contemporary cultural, political, economic, environmental and spatial issues; development of skills necessary for professional practice as an anthropologist.
Meets International Perspectives Requirement.

ANTHR 418: Global Culture, Consumption and Modernity
(Dual-listed with ANTHR 518). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306 recommended
Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.
Meets International Perspectives Requirement.

ANTHR 419: Topics in Cultural Anthropology
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. Each section may be taken once for credit up to 9 credits. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419A: Topics in Cultural Anthropology: Theory
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.
ANTHR 419B: Topics in Cultural Anthropology: Methods
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419C: Topics in Cultural Anthropology: Regional Focus
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419D: Topics in Cultural Anthropology: Others
(3-0) Cr. 3.
Prereq: ANTHR 306
In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 424: Forensic Anthropology
(Dual-listed with ANTHR 524). (2-2) Cr. 3. S.
Prereq: ANTHR 202 or ANTHR 307; ANTHR 319 recommended
Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

ANTHR 425: Professional Preparation in Anthropology
(1-0) Cr. 1. F.
Prereq: Junior classification in anthropology or permission from the instructor
Instruction and guidance in the development of professional skills needed for success in academic and non-academic anthropological careers. Topics will include strategies for internship and job searches, creating resumes and CVs, composing personal statements and cover letters, and developing contacts and sources. Offered on a satisfactory-fail basis only.

ANTHR 427I: Field Archaeology
(Cross-listed with IA LL). Cr. 4. SS.
Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and excavation techniques.

ANTHR 429: Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School
(Dual-listed with ANTHR 529). Cr. 4-6. SS.
Prereq: ANTHR 202 or ANTHR 308
Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

ANTHR 431: Ethnographic Methods
(Dual-listed with ANTHR 531). Cr. 3-6.
Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

ANTHR 434: Internship
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Junior or senior standing
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 434A: Internship: Archaeology
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Junior or senior standing
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 434B: Internship: Cultural Anthropology
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Junior or senior standing
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.
ANTHR 434C: Internship: Biological Anthropology  
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.S.  
**Prereq:** Junior or senior standing  
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 434D: Internship: Linguistic Anthropology  
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.S.  
**Prereq:** Junior or senior standing  
Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 438: Primate Evolutionary Ecology and Behavior  
(Dual-listed with ANTHR 538). Cr. 3. S.  
**Prereq:** ANTHR 202 or ANTHR 307  
Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

ANTHR 444: Sex and Gender in Cross-cultural Perspective  
(Dual-listed with ANTHR 544). (Cross-listed with WGS). (3-0) Cr. 3. S.  
**Prereq:** ANTHR 201; ANTHR 306 recommended  
Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.  
Meets International Perspectives Requirement.

ANTHR 445: Biological Field School  
(Dual-listed with ANTHR 545). Cr. 4-6. SS.  
**Prereq:** ANTHR 202 or BIOL 101  
Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

ANTHR 450: Approaches in Anthropology  
(3-0) Cr. 3. F.  
**Prereq:** ANTHR 306  
Examination of key approaches to anthropology and its interrelated subfields with a focus on major theoretical and analytical contributions.
ANTHR 482B: Topics in Biological Anthropology: Primate Cognition
(Dual-listed with ANTHR 582B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
**Prereq:** ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482C: Topics in Biological Anthropology: Primate Conservation
(Dual-listed with ANTHR 582C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
**Prereq:** ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482D: Topics in Biological Anthropology: Population Genetics and Human Evolution
(Dual-listed with ANTHR 582D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
**Prereq:** ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 490: Independent Study
Cr. 1-5. Repeatable, maximum of 9 credits.
**Prereq:** 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490A: Independent Study: Archaeology
Cr. 1-5. Repeatable, maximum of 9 credits.
**Prereq:** 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490B: Independent Study: Cultural Anthropology
Cr. 1-5. Repeatable, maximum of 9 credits.
**Prereq:** 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490C: Independent Study: Biological Anthropology
Cr. 1-5. Repeatable, maximum of 9 credits.
**Prereq:** 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490D: Independent Study: Linguistic Anthropology
(Cross-listed with LING). Cr. 1-5. Repeatable, maximum of 9 credits.
**Prereq:** 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490H: Independent Study: Honors
Cr. 1-5. Repeatable, maximum of 9 credits.
**Prereq:** 9 credits in anthropology
No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490I: Iowa Lakeside Laboratory
(Cross-listed with IA LL, NREM). Cr. 1-6. Repeatable, maximum of 9 credits.
**Prereq:** 8 credits in biology and permission of instructor
Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

Courses primarily for graduate students, open to qualified undergraduates:

ANTHR 503: Biological Anthropology and Archaeology
(3-0) Cr. 3.
**Prereq:** ANTHR 307 and ANTHR 308
History of biological anthropology and archaeology, current developments and theoretical issues related to major events in human biocultural evolution and world prehistory.

ANTHR 509: Agroecosystems Analysis
(Cross-listed with AGRON, SOC, SUSAG). (3-4) Cr. 3. F.
**Prereq:** Senior or above classification
Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecologic, social, etc.) and scales of operation.

ANTHR 510: Theoretical Dimensions of Cultural Anthropology
(3-0) Cr. 3. F.
**Prereq:** 6 credits in anthropology
Survey of historical and current developments in topical and theoretical approaches to sociocultural anthropology. Examination and assessment of controversies; new research directions and theoretical approaches.
ANTHR 511: Anthropology for Global Professionals
(Dual-listed with ANTHR 411). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306
Theory and methods for conducting ethnographic research in academic and non-academic settings; application of anthropological knowledge to contemporary cultural, political, economic, environmental and spatial issues; development of skills necessary for professional practice as an anthropologist.
Meets International Perspectives Requirement.

ANTHR 513: Kinship and Marriage in a Global Perspective
(Dual-listed with ANTHR 313). (3-0) Cr. 3. S.
Prereq: ANTHR 201 recommended
Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality.
Meets International Perspectives Requirement.

ANTHR 515: Archaeology of North America
(Dual-listed with ANTHR 315). (3-0) Cr. 3. S.
Prereq: ANTHR 202
Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.
Meets U.S. Diversity Requirement

ANTHR 518: Global Culture, Consumption and Modernity
(Dual-listed with ANTHR 418). (3-0) Cr. 3. F.
Prereq: ANTHR 201 or ANTHR 306 recommended
Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.
Meets International Perspectives Requirement.

ANTHR 519: Skeletal Biology
(Dual-listed with ANTHR 319). (2-2) Cr. 3. F.
Prereq: ANTHR 307 or college level biology
Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.

ANTHR 520: Great Plains Archaeology
(Dual-listed with ANTHR 320). (3-0) Cr. 3. F.
Prereq: ANTHR 202
Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information.
Meets U.S. Diversity Requirement

ANTHR 521: World Prehistory
(Dual-listed with ANTHR 321). (3-0) Cr. 3. S.
Prereq: ANTHR 202 recommended
An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies.

ANTHR 522: Peoples and Cultures of Native North America
(Dual-listed with ANTHR 322). (3-0) Cr. 3.
Prereq: ANTHR 201 or AM IN 210
Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life.
Meets U.S. Diversity Requirement

ANTHR 523: Topics in Latin American Anthropology
(Dual-listed with ANTHR 323). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

ANTHR 523A: Latin American Anthropology: Violence and Memory
(Dual-listed with ANTHR 323A). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.
ANTHR 523B: Latin American Anthropology: Social movements and Democracy
(Dual-listed with ANTHR 323B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 523C: Latin American Anthropology: Race, Class and Gender
(Dual-listed with ANTHR 323C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 523D: Latin American Anthropology: Regional Focus
(Dual-listed with ANTHR 323D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 523E: Latin American Anthropology: Culture and Sport.
(Dual-listed with ANTHR 323E). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: ANTHR 201 or ANTHR 306 recommended
Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.
Meets International Perspectives Requirement.

ANTHR 524: Forensic Anthropology
(Dual-listed with ANTHR 424). (2-2) Cr. 3. S.
Prereq: ANTHR 202 or ANTHR 307; ANTHR 319 recommended
Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

ANTHR 529: Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School
(Dual-listed with ANTHR 429). Cr. 4-6. SS.
Prereq: ANTHR 202 or ANTHR 308
Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

ANTHR 531: Ethnographic Methods
(Dual-listed with ANTHR 431). Cr. 3-6.
Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

ANTHR 532: Current Issues in Native North America
(Dual-listed with ANTHR 332). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement

ANTHR 532A: Current Issues in Native North America: Gender and Family
(Dual-listed with ANTHR 332A). (Cross-listed with AM IN). (3-0) Cr. 3.
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.
Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.
Meets U.S. Diversity Requirement
ANTHR 532B: Current Issues in Native North America: Indigenous Ecologies and Geographies  
(Dual-listed with ANTHR 332B). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 532C: Current Issues in Native North America: Cultural and Political Movements  
(Dual-listed with ANTHR 332C). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 532D: Current Issues in Native North America: Regional Focus  
(Dual-listed with ANTHR 332D). (Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended  
Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.  
Meets U.S. Diversity Requirement

ANTHR 536: Global Development  
(Dual-listed with ANTHR 336). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: ANTHR 201 or ANTHR 306  
Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology.  
Meets International Perspectives Requirement

ANTHR 538: Primate Evolutionary Ecology and Behavior  
(Dual-listed with ANTHR 438). Cr. 3. S.  
Prereq: ANTHR 202 or ANTHR 307  
Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

ANTHR 540: Magic, Witchcraft, and Religion  
(Dual-listed with ANTHR 340). (Cross-listed with RELIG). (3-0) Cr. 3. S.  
Prereq: ANTHR 201 or ANTHR 306  
Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice.  
Meets International Perspectives Requirement

ANTHR 541: Seminar in Forensic Sciences  
(1-0) Cr. 1. Repeatable. S.  
Prereq: One 200-level science course or graduate classification  
Seminars by professional criminalists, research scientists, Certificate students, and educators. Emphasis on opportunities for research and development, citizen involvement, and educational outreach related to forensic science. Weekly report required.

ANTHR 542: Independent Research and Presentation in Forensic Science  
(1-0) Cr. 1. S.  
Prereq: Enrollment in the Graduate Certificate in Forensic Sciences  
Research topic approved by course instructor. Written and oral reports required. Oral report given in forensics seminar, Chem 540.

ANTHR 544: Sex and Gender in Cross-cultural Perspective  
(Dual-listed with ANTHR 444). (Cross-listed with WGS). (3-0) Cr. 3. S.  
Prereq: ANTHR 201; ANTHR 306 recommended  
Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.  
Meets International Perspectives Requirement

ANTHR 545: Biological Field School  
(Dual-listed with ANTHR 445). Cr. 4-6. SS.  
Prereq: ANTHR 202 or BIOL 101  
Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

ANTHR 582: Topics in Biological Anthropology  
(Dual-listed with ANTHR 482). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.  
Prereq: ANTHR 307  
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.
ANTHR 582A: Topics in Biological Anthropology: Paleoanthropology
(Dual-listed with ANTHR 482A). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582B: Topics in Biological Anthropology: Primate Cognition
(Dual-listed with ANTHR 482B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582C: Topics in Biological Anthropology: Primate Conservation
(Dual-listed with ANTHR 482C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582D: Topics in Biological Anthropology: Population Genetics and Human Evolution
(Dual-listed with ANTHR 482D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.
Prereq: ANTHR 307
In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 590: Graduate Independent Study
(Cross-listed with A ECL, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor

ANTHR 590I: Special Topics: Graduate Independent Study
(Cross-listed with A ECL, EEOB, IA LL). Cr. 1-4. Repeatable. SS.
Prereq: Graduate classification and permission of instructor

ANTHR 591: Orientation to Anthropology
(1-0) Cr. 1. F.
Prereq: Admission to the Anthropology Graduate Program
Introduction to the Anthropology program, including the requirements for successful degree completion, department administrative procedures, ethics in anthropology and current trends in the four subfields of anthropology. Required of graduate students. Offered on a satisfactory-fail basis only.

Courses for graduate students:

ANTHR 610: Foundations of Sustainable Agriculture
(Cross-listed with A B E, AGRON, SOC, SUSAG). (3-0) Cr. 3. F.
Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

ANTHR 699: Research
Cr. arr. Repeatable.

ANTHR 699I: Iowa Lakeside Laboratory (Same as IA LL 699I.)
(Cross-listed with A ECL, EEOB, GDCB, IA LL). Cr. arr. Repeatable.

Biochemistry and Biophysics

The department of Biochemistry, Biophysics & Molecular Biology (http://www.bbmb.iastate.edu) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the
skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

A program that combines a bachelor of science and masters of science in biochemistry or biophysics is offered.

**Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences**

*For the undergraduate curriculum leading to the degree bachelor of science, major in Biochemistry in the College of Agriculture and Life Sciences, see Biochemistry (AGLS).*

Biochemistry and biophysics are recommended to students whose career interests involve advanced graduate or medical study or employment in biochemistry or biophysics, or in related areas of the biological or medical sciences.

* General Chemistry I and II (177, 177N or 177L and 178) are acceptable substitutes for CHEM 201 and 201L.

** ALEKS assessment determines math placement.

¹ Communication Proficiency: A grade of C or better is required in ENGL 250. For students fulfilling the upper-level requirement with BBMB 411, a grade of 80% or better must be earned on two journal-style written reports.

² Liberal Arts and Sciences (LAS) General Education requirements include:

12cr. Arts and Humanities, 9 cr. Social Sciences and 11 cr. Natural Sciences (8 cr.) and Math (3 cr.).

Students in all ISU majors must complete a 3 cr. course in U.S. Diversity and a 3 cr. course in International Perspectives. Discuss with your adviser how the two courses you select can be applied to address general education requirements. Check for a list of approved courses at: http://www.registrar.iastate.edu/students/div-ipay

³ One Biology laboratory course is required. Choose Biol 211L, 212L or 313L.

⁴ Students have the option of choosing the senior level biochemistry sequence for 6 credits (BBMB 404 and BBMB 405) or the graduate-level biochemistry sequence for 8 credits (BBMB 504, 505 and BBMB 506, 507).

⁵ Undergraduate study or research, BBMB 490 or 499, is recommended but not required. Credit value is variable.

⁶ Four credits of electives in Biological Sciences are required.
CHEM322L may be taken as a substitute for BBMB 561L.

6 Seven additional science elective credits 300+; biochemistry, biophysics, biological sciences, chemistry or physics.
7 CHEM 322L can substitute for BBMB 561L.
8 World Language Requirement

Graduate Study

Introduction

Biochemistry and Biophysics are the science and technology used to understand the mechanisms underlying biological processes at the molecular level, with an emphasis on the fundamental relationships among the chemical, physical, and biological sciences. The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (BBMB) administers Doctor of Philosophy (Ph.D.), Master’s (M.S.), and Graduate Certificate programs that lead to an advanced degree or certificate in these disciplines. The prerequisite to graduate study is a sound undergraduate background in biology, chemistry, mathematics, and physics.

BBMB offers Doctor of Philosophy and Master’s degrees in Biochemistry and in Biophysics that are designed to train students to independently
conceive and carry out original research. BBMB also offers two graduate certificate programs in Biochemistry that provide a mechanism for formal recognition of focused graduate study in a specialized area that is less comprehensive than that required for a master's degree. BBMB participates in the Interdepartmental majors of Bioinformatics and Computational Biology; Genetics and Genomics; Immunobiology; Molecular, Cellular, and Developmental Biology; Neuroscience; Plant Biology; and Toxicology. All graduate degree students in BBMB are required to teach as part of their training.

**Graduate Degree Programs**

** Concurrent Bachelor's (B.S.)/ Master's (M.S.) Degree**

The department offers a concurrent enrollment degree program in either Biochemistry or Biophysics that allows ISU undergraduate students to obtain both the B.S. and M.S. degrees in about five years. The program is open to undergraduate students in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. The concurrent degrees can be useful to students entering various career tracks. For those considering careers as research specialists, entry positions with higher-level responsibilities, and a higher-level salary, are made possible with the M.S. degree. For those considering careers as research directors, which require advanced study, the M.S. degree provides an advantage for admission into Ph.D. programs at the most competitive and prestigious graduate schools. Similarly, the M.S. degree can be a competitive advantage for admission in to medical, dental, law, veterinary medicine, or other professional schools.

Application to the program is made near the end of the junior undergraduate (third) year. Concurrent B.S/M.S. degree students begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships, which are renewable based on academic standing and satisfactory research performance. The M.S. thesis requires intensive experience in original, independent laboratory research under the close supervision of a faculty mentor. To apply, see the concurrent B.S./M.S. application instructions found on the department's Graduate Study web page.

**Master's (M.S.) Degree**

The M.S. degree programs in Biochemistry and in Biophysics are useful for students who prefer to undertake research training without the longer-term commitment required for the Ph.D. degree. It is also useful for students interested more in the technical aspects of research rather than in careers as research directors. The program requires about 3 years on average to complete and the successful defense of an independent research dissertation is required. About half the time required to earn the degree is spent on advanced coursework and professional seminars, and the other half is devoted to research undertaken in the laboratory under the close supervision of a faculty mentor. Financial support is available.

To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool. 

NOTE: Students interested in a research career are encouraged to consider the Ph.D. track. Students may enter the Biochemistry or Biophysics M.S. degree program as a direct admit to a faculty research group at any time during the year.

**Doctor of Philosophy (Ph.D.) Degree**

The Ph.D. programs in Biochemistry and in Biophysics are designed to train students in the ability to independently conceive and carry out original research in the general area of the chemistry or physics of the processes of life. The programs require about 5-6 years on average to complete and the successful defense of an independent research dissertation. The majority of the time required to earn the degree is spent doing research on the dissertation project in the laboratory under the close supervision of a faculty mentor. Considerable time also is devoted to advanced coursework and professional seminars. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool. Students may enter the Biochemistry or Biophysics Ph.D. degree programs either as a rotation student in the fall semester or as a direct admit to a faculty research group at any time during the year.

**Minor in Biochemistry**

Graduate students in other M.S. and/or Ph.D. programs at ISU can earn a graduate minor in Biochemistry by completing 12 credits of the following courses with a grade point average of 3.0 or above: at least 6 credits from BBMB 504, 505, 506 and 507 and at least 6 credits of other BBMB 500- and 600-level courses. A student wishing to declare a minor in Biochemistry should arrange for a member of the graduate faculty in Biochemistry to serve on the POS Committee and submit the required form found on the Graduate College Forms page.

**Graduate Certificate Programs**

The graduate certificate program is designed for students who wish to continue or expand their knowledge in Biochemistry at the graduate level without the time commitment or lab experience required for a formal Master's or Ph.D. program. A certificate program can be an attractive option for individuals who have a bachelor's degree and are interested in broadening their expertise, or who are working in the sciences or industry and want to continue their education at the graduate level. BBMB offers two graduate certificate programs in Biochemistry: a concurrent B.S. / Graduate Certificate and a Graduate Certificate. The standards of admission and the course standards to which a certificate student are held are equivalent to those expected of a master's student. Each graduate certificate requires at least 12 graduate credits, all of which
are available either on campus or on line. A graduate supervisor will be
appointed to oversee the certification for each student.

If a person who completes a graduate certificate program decides to
continue for a graduate degree in Biochemistry or Biophysics, program
approval is required. Credits earned for the graduate certificate may be
used to meet course requirements for the graduate degree program.

**Concurrent B.S./Graduate Certificate**

This B.S./Graduate Certificate program is intended for exceptional
undergraduate students majoring in Biochemistry. In this program, the
student completes all of the requirements for the B.S. degree and the
graduate certificate in a four-year period by combining the requirements
of the two programs. The student enters the Graduate College after
he/she achieves junior status and develops a plan of coursework
(graduate and undergraduate) subject to the approval of the Director
of Certificate (DOC). Required graduate courses are BBMB 504, 505,
506, 507, 561 and 561L. The student must satisfy the requirements of
the B.S. in Biochemistry (121 credits) and the Graduate Certificate in
Biochemistry (12 credits). Six credits of graduate coursework can satisfy
some requirements of the B.S. degree. To apply for the B.S./Graduate
Certificate, submit the application form found on the Graduate College
Forms web page.

**Graduate Certificate in Biochemistry**

The graduate certificate in Biochemistry is designed for students who
have a B.S. degree in Biochemistry or a related field and wish to advance
their knowledge by taking additional coursework at the graduate level.
The graduate certificate courses may be taken either on-line or on
campus. Candidates for a graduate certificate in Biochemistry are
admitted in the Graduate College. A total of 12 credits is required that
include BBMB 504, 505, 506, 507, 561 and 561L. The student must satisfy the requirements of
the B.S. in Biochemistry (121 credits) and the Graduate Certificate in
Biochemistry (12 credits). Six credits of graduate coursework can satisfy
some requirements of the B.S. degree. To apply for the B.S./Graduate
Certificate, submit the application form found on the Graduate College
Forms web page.

**Courses primarily for undergraduates:**

**BBMB 101: Introduction to Biochemistry**

(1-0) Cr. 1. F.
Research activities, career opportunities in biochemistry and biophysics,
and an introduction to the structure of biologically important compounds.
For students majoring in biochemistry, agricultural biochemistry or
biophysics or considering one of these majors.

**BBMB 102: Introduction to Biochemistry Laboratory**

(0-2) Cr. 1. S.
Prereq: Credit or enrollment in CHEM 177 and CHEM 177L or CHEM 201 and
CHEM 201L
Topics in the scientific background of biochemistry, such as
macromolecules, metabolism, and catalysis. Laboratory experimentation
covers biochemical concepts and the study of bio-molecules including
proteins, lipids and nucleic acids. A significant component is practice
in scientific communication. For students majoring in biochemistry,
agricultural biochemistry or biophysics or considering one of these
majors.

**BBMB 110: Biochemistry Learning Community Orientation**

Cr. 1. F.
Prereq: Co-enrollment with BBMB 101 highly recommended.
Overview of the program of study, academic planning, resources on
campus for the successful transition to Iowa State, team building,
leadership, and community focused activities. For members of the
Biochemistry & Biophysics Learning Community. Offered on a
satisfactory-fail basis only.

**BBMB 111: Biochemistry Learning Community**

Cr. 1. S.
Prereq: Enrollment in BBMB102 is highly recommended.
Overview of career-building and research resources within BBMB and
across ISU, including internships, lab skills, independent research, and
leadership opportunities. For members of the Biochemistry & Biophysics
Learning Community. Offered on a satisfactory-fail basis only.

**BBMB 120: The Biochemistry of Beer**

(Cross-listed with FS HN). (2-0) Cr. 2. F.
An introduction to the major classes of biomolecules, basic biochemical
concepts, enzymology, metabolism and genetic engineering as they apply
to the production and flavor of beer. All aspects of the biochemistry of
beer will be covered, including the malting of barley, starch conversion,
yeast fermentation and the chemical changes that occur during the aging
of beer. Intended for non-majors. Natural science majors are limited to
elective credit only.

**BBMB 121: Medicines, Drugs and You**

Cr. 2. S.
Prereq: One year of high school chemistry or CHEM 50 and biology.
An introduction to how medicines treat disease, what drug molecules
look like, how they function, how they can be toxic, modern therapeutics
ranging from over-the-counter pain relievers, antibiotics and anti-
depressants, to anti-cancer chemotherapies, a discussion of illegal drugs
from toxicity to mechanism of action and potential therapeutic benefits.
Intended for students of all majors.
BBMB 201: Chemical Principles in Biological Systems
(2-0) Cr. 2. S.
Prereq: Credit or enrollment in CHEM 332
Survey of chemical principles as they apply in biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics or agricultural biochemistry.

BBMB 221: Structure and Reactions in Biochemical Processes
(3-0) Cr. 3. F.S.
Prereq: CHEM 163, CHEM 167, or CHEM 177
Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301: Survey of Biochemistry
(3-0) Cr. 3. S.S.
Prereq: CHEM 231 or CHEM 331
A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 316: Principles of Biochemistry
(3-0) Cr. 3. F.S.
Prereq: CHEM 231 or CHEM 331; BIOL 212; BIOL 313 and BIOL 314 strongly recommended.
Understanding biological systems at the molecular level; chemistry of biological macromolecules, enzyme function and regulation, metabolic pathways; integration of metabolism in diverse living systems. For students in biology and related majors who do not require the more rigorous treatment of biochemistry found in BBMB 404/405. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 404: Biochemistry I
(3-0) Cr. 3. F.
Prereq: CHEM 332
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure; enzymology; carbohydrate metabolism. Course offered online. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

BBMB 405: Biochemistry II
(3-0) Cr. 3. S.
Prereq: BBMB 404
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Course available online. Credit for both BBMB 420 and the BBMB 404 - BBMB 405 sequence may not be applied toward graduation.

BBMB 411: Techniques in Biochemical Research
(2-8) Cr. 4. F.
Prereq: Credit or enrollment in BBMB 404 or BBMB 504 and BBMB 505; CHEM 211
Laboratory experimentation and techniques for studying biochemistry, including: chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids. Scientific communication and technical writing are emphasized.

BBMB 420: Mammalian Biochemistry
(3-0) Cr. 3. F.
Prereq: CHEM 332, BIOL 314
Structure and function of proteins; enzymology; biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry or biochemistry. Acceptable for credit toward a major in biophysics. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.
BBMB 430: Procaryotic Diversity and Ecology  
(Dual-listed with BBMB 530). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
**Prereq:** MICRO 302, MICRO 302L  
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 440: Laboratory in Microbial Physiology, Diversity, and Genetics  
(Cross-listed with MICRO). (2-6) Cr. 4. F.S.  
**Prereq:** MICRO 302, MICRO 302L, CHEM 332, BIOL 313L  
Fundamental techniques and theory for studying the cellular mechanisms, genetic processes and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments as well as an emphasis on genetic and molecular techniques to understand antibiotic resistance processes and mechanisms. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of bacteria. Essential components for the effective communication of scientific results are also emphasized.

BBMB 461: Molecular Biophysics  
(Dual-listed with BBMB 561). (2-0) Cr. 2. S.  
**Prereq:** Credit or enrollment in MATH 166 and CHEM 178 and PHYS 222 or PHYS 112.  
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 490: Independent Study  
Cr. 1-3. Repeatable. F.S.S.  
**Prereq:** College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor.  
Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 490H: Independent Study, Honors  
Cr. 1-3. Repeatable. F.S.S.  
**Prereq:** College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor  
Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 499: Undergraduate Research  
Cr. 1-5. Repeatable. F.S.S.  
**Prereq:** Permission of faculty member with whom student proposes to work.  
Independent research under faculty guidance.

Courses primarily for graduate students, open to qualified undergraduates:

BBMB 504: Amino Acids and Proteins  
(2-0) Cr. 2. F.  
**Prereq:** CHEM 332 or equivalent  
Review of amino acids and proteins, including atomic interactions, thermodynamics, structure and properties of amino acids, post-translational modifications, protein expression, purification and analysis, protein secondary, tertiary and quaternary structure, protein folding, oxygen transport and hemoglobin, models for equilibrium binding, elementary reactions and enzyme kinetics, biosynthesis of amino acids: pathways and mechanisms.

BBMB 505: Bioenergetics and Metabolism  
(2-0) Cr. 2. F.  
**Prereq:** CHEM 211, CHEM 332; a previous course in biochemistry is strongly recommended  
Examination of catabolic pathways involved in the oxidation of organic and inorganic molecules, and energy metabolism involving inputs from light or other non-light sources. Central metabolism and glycolysis, fermentation, aerobic and anaerobic respiration, photosynthesis.

BBMB 506: Membrane Biochemistry  
(2-0) Cr. 2.  
**Prereq:** CHEM 332 or equivalent  
Analysis of the structure, function, and synthesis of membranes. Bacterial and eukaryotic membrane characteristics. Membrane transport and signaling mechanisms. Analysis of the structure and function of lipids and membrane proteins.

BBMB 507: Biochemistry of Nucleic Acids  
(2-0) Cr. 2. S.  
**Prereq:** CHEM 332 or equivalent  
Analysis of the chemical structure, function, synthesis, and metabolism of nucleic acids. Chemical characterization of nucleotides, polynucleotides, DNA, and RNA. Analysis of transcription, translation, and the genetic code.

BBMB 510: Molecular Biology and Biochemistry of RNA  
(2-0) Cr. 2. F.  
**Prereq:** BIOL 313, BBMB 405, BBMB 502, BBMB 506 and 507 or Gen 409, or equivalent  
Biochemical processes that define structure and function of nucleic acids. Emphasis on the molecular processes that take place during synthesis, processing, and function of different RNA species; review of recent advances in RNA research.
BBMB 530: Procaryotic Diversity and Ecology
(Dual-listed with BBMB 430). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
PreReq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 532: Enzyme Kinetics and Mechanisms
Cr. 2. Alt. S., offered odd-numbered years.
PreReq: BBMB 504
Advanced concepts of enzyme kinetics and catalysis. Experimental methods for determining kinetic and chemical reaction mechanisms. Enzyme structure/function relationships and the role of dynamics in catalysis.

BBMB 542A: Introduction to Molecular Biology Techniques: DNA Techniques

BBMB 542B: Introduction to Molecular Biology Techniques: Protein Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.
PreReq: Graduate classification
Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

BBMB 542C: Introduction to Molecular Biology Techniques: Cell Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

BBMB 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

BBMB 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

BBMB 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

BBMB 542G: Introduction to Molecular Biology Techniques: Genomic Techniques
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

BBMB 561: Molecular Biophysics
(Dual-listed with BBMB 461). (2-0) Cr. 2. S.
PreReq: Credit or enrollment in MATH 166 and CHEM 178 and PHYS 222 or PHYS 112
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 561L: Laboratory in Molecular Biophysics
(1-3) Cr. 2. S.
PreReq: Credit or enrollment in BBMB 461/BBMB 561
Practice in methods of X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy as applied to macromolecules.

BBMB 569: Bioinformatics III (Structural Bioinformatics)
(Cross-listed with BCB, COM S, CPR E, GDCB). (3-0) Cr. 3. F.
PreReq: BCB 567, BBMB 316, GEN 409, STAT 430
BBMB 590: Special Topics
Cr. arr.
By arrangement.

BBMB 593: Workshop in Biochemistry and Biophysics
Cr. 1. Repeatable. F.S.
Prereq: Permission and signature of course administrator required.
Workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry. Spring only. BBMB Undergraduate Research Symposium participation. Scheduled class meetings are required in addition to attending the symposium.

Courses for graduate students:

BBMB 615: Molecular Immunology
(Cross-listed with MICRO, V MPM). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: BBMB 405 or BBMB 506 and BBMB 507
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

BBMB 645: Molecular Signaling
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: BBMB 405 or BBMB 420; or BBMB 506 and BBMB 507
Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone; growth factor and extracellular matrix activators; protein kinases; caspase and transcription factor downstream signals; lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

BBMB 661: Current Topics in Neuroscience
(Cross-listed with GDCB, NEURO). (2-0) Cr. 2-3. Repeatable. Alt. S., offered even-numbered years.
Prereq: NEURO 556 (or comparable course) or permission of instructor
Topics may include molecular and cellular neuroscience, neurodevelopment, neuroplasticity, neurodegenerative diseases, cognitive neuroscience, sensory biology, neural integration, membrane biophysics, neuroethology, techniques in neurobiology and behavior.

BBMB 675: Nucleic Acid Structure and Function
(2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: BBMB 405 or BBMB 506 and BBMB 507
In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 676: Biochemistry of Gene Expression in Eucaryotes
(Cross-listed with MCDB). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: BBMB 404 and BBMB 504; and BBMB 506 and BBMB 507; or BBMB 405 or BBMB 505 and or GDCB 511
Analysis of the biochemical processes involved in expression of eucaryotic genes and the regulation thereof, including RNA polymerase, transcriptional regulatory proteins, enhancers and silencers, chromosome structure, termination, RNA processing, RNA transport, RNA turnover, small RNAs, translational regulation, protein turnover.

BBMB 681: Advanced Seminar
Cr. 1. Repeatable. F.S.
Prereq: Permission of instructor
Student presentations.

BBMB 682: Departmental Seminar
Cr. R. F.S.
Prereq: Permission of instructor
Faculty, staff and invited guest research seminar.

BBMB 696: Research Seminar
(Cross-listed with AGRON, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

BBMB 698: Seminar in Molecular, Cellular, and Developmental Biology
(Cross-listed with GDCB, MCDB, MICRO, V MPM). (2-0) Cr. 1-2. Repeatable. F.S.
Student and faculty presentations.

BBMB 699: Research
Cr. arr. Repeatable. F.S.
Prereq: Permission of instructor

Bioinformatics and Computational Biology

Undergraduate study in BCBio is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell Biology, and the Department of Mathematics. The undergraduate B.S. degree is offered through the College of Liberal Arts and Sciences.

Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include
gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad range of possibilities to get involved in research.

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBio graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology that now exist.

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

In addition to basic degree requirements listed in the Curriculum in Liberal Arts and Sciences, BCBio majors must satisfy the following requirements:

A. Complementary Courses for the BCBio Major

A minimum of 4 credits from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 163 &amp; 163L</td>
<td>College Chemistry and Laboratory in College Chemistry</td>
</tr>
</tbody>
</table>

or

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 177 &amp; 177L &amp; 178</td>
<td>General Chemistry I and Laboratory in General Chemistry I &amp; General Chemistry II</td>
</tr>
</tbody>
</table>

or

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 201 &amp; 201L</td>
<td>Advanced General Chemistry and Laboratory in Advanced General Chemistry</td>
</tr>
</tbody>
</table>

A minimum of 4 credits from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 231 &amp; 231L</td>
<td>Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry</td>
</tr>
</tbody>
</table>

or

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 331 &amp; 331L</td>
<td>Organic Chemistry I and Laboratory in Organic Chemistry I</td>
</tr>
</tbody>
</table>

and

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 332 &amp; 332L</td>
<td>Organic Chemistry II and Laboratory in Organic Chemistry II</td>
</tr>
</tbody>
</table>

PHYS 111 General Physics

or

B. Core Courses Within the BCBio Major

A minimum of 6 credits from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM S 227 &amp; 228</td>
<td>Object-oriented Programming and Introduction to Data Structures (recommended when developing course plan)</td>
</tr>
</tbody>
</table>

or

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM S 207 &amp; 208</td>
<td>Fundamentals of Computer Programming and Intermediate Computer Programming (allowed for students entering major who took these courses)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM S 230</td>
<td>Discrete Computational Structures</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM S 311</td>
<td>Introduction to the Design and Analysis of Algorithms</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 165 &amp; 166</td>
<td>Calculus I and Calculus II (recommended when developing course plan)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 181</td>
<td>Calculus and Mathematical Modeling for the Life Sciences</td>
</tr>
</tbody>
</table>

Complementary courses note: The following other STAT courses may be substituted for STAT 330 and STAT 430, with permission of the BCBio Major.

STAT 330: STAT 101, 104, 105, 201, 231, 305, or 341
STAT 430: STAT 301, 401, or 432
& MATH 182  Calculus and Mathematical Modeling for the Life Sciences II (allowed for students entering major who took these courses)

BCBIO 110  BCBIO Orientation 0.5

BCBIO 322  Introduction to Bioinformatics and Computational Biology 3

BCBIO 401  Fundamentals of Bioinformatics and Computational Biology 3

BCBIO 402  Fundamentals of Systems Biology and Network Science 3

BCBIO 490  Independent Study 1-5

or BCBIO 491  Team Research Projects.

Total Credits 34.5-39.5

Core courses note: The Com S 227/228 and Math 165/166 core course series is required for BCBio majors. However, students transferring into the major who have already earned credit for Com S 207/208 and/or the Math 181/182 can substitute those courses for the respective Com S 227/228 and/or Math 165/166 series. Students will need permission of the instructors to enroll in any upper level course that requires a pre-req in Com S 227/228 and/or Math 165/166.

C. Support Electives

3-9 credits to be chosen from the following list:

BBMB 404  Biochemistry I 3
BBMB 405  Biochemistry II 3
BBMB 461  Molecular Biophysics 2
BIOL 328  Molecular and Cellular Biology of Human Diseases 3
BIOL 423  Developmental Biology 3
BIOL 451  Plant Evolution and Phylogeny 4
BIOL 462  Evolutionary Genetics 3
BIOL 487  Microbial Ecology 3
COM S 252  Linux Operating System Essentials 3
COM S 309  Software Development Practices 3
COM S 319  Construction of User Interfaces 3
COM S 327  Advanced Programming Techniques 3
COM S 363  Introduction to Database Management Systems 3
COM S 425  High Performance Computing for Scientific and Engineering Applications 3
COM S 426  Introduction to Parallel Algorithms and Programming 4
GEN 340  Human Genetics 3
GEN 410  Analytical Genetics 3
MATH 207  Matrices and Linear Algebra 3

or MATH 317  Theory of Linear Algebra

MATH 265  Calculus III 4
MATH 266  Elementary Differential Equations 3
or MATH 267  Elementary Differential Equations and Laplace Transforms
MATH 304  Combinatorics 3
MATH 314  Graph Theory 3
MATH 373  Introduction to Scientific Computing 3
MICRO 402  Microbial Genetics and Genomics 3
STAT 342  Introduction to the Theory of Probability and Statistics II 4
STAT 402  Statistical Design and the Analysis of Experiments 3
STAT 407  Methods of Multivariate Analysis 3
STAT 444  Bayesian Data Analysis 3
STAT 480  Statistical Computing Applications 3
STAT 581  Analysis of Gene Expression Data for the Biological Sciences 3

D. The communications and English proficiency requirements of the LAS college are met by:

ENGL 150  Critical Thinking and Communication 3

ENGL 250  Written, Oral, Visual, and Electronic Composition 3
or ENGL 250H  Written, Oral, Visual, and Electronic Composition: Honors

And one of the following:

ENGL 309  Proposal and Report Writing 3
or ENGL 312  Biological Communication

or

ENGL 314  Technical Communication

BCBio majors must earn a minimum grade of C in ENGL 250 Written, Oral, Visual, and Electronic Composition or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors.

Minor in Bioinformatics and Computational Biology

The administering departments offer a minor in Bioinformatics and Computational Biology, which requires the following courses.

BIOL 211  Principles of Biology I 3
BIOL 212  Principles of Biology II 3
GEN 313  Principles of Genetics 3
COM S 227  Object-oriented Programming & COM S 228 and Introduction to Data Structures 7

or
### Bioinformatics and Computational Biology B.S.

</tbody>
</table>

Note: The following other STAT courses may be substituted for STAT 330, with permission of the BCBio Major: STAT 101, 104, 105, 201, 231, 305, or 341

2. The Com S 227/228 course series is required for the BCBio minor. However, students transferring into the minor who have already earned credit for Com S 207/208 can substitute those courses for the Com S 227/228 series. Students will need permission of the instructors to enroll in any upper level course that requires a pre-req in Com S 227/228.

Most students pursuing a minor in Bioinformatics and Computational Biology will be biology, genetics, computer science, computer engineering, statistics, or mathematics students who have already taken some of these courses for their major. However, a total of 9 credits must be used only to fulfill the requirements of the minor.

### Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Entomology, Genetics, Development and Cell Biology; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu (http://www.bcb.iastate.edu).

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis.
research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 Graduate Research Rotation, working with three or more different research groups to gain experience in both “wet” (biological) and “dry” (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A course load similar to the following list would be considered acceptable:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 265</td>
<td>Calculus III</td>
<td>4</td>
</tr>
<tr>

<td>Biological Evolution</td>
<td>3</td>
</tr>
</tbody>
</table>

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BCB 567</td>
<td>Bioinformatics I (Bioinformatics Algorithms)</td>
<td>3</td>

<tr>
<td></td>
<td>Biology</td>
<td></td>
</tr>
</tbody>
</table>

M.S. students take the above background and core courses, take at least 6 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu (http://www.bcb.iastate.edu).)

Courses primarily for undergraduates:

BCBIO 110: BCBIO Orientation
(1-0) Cr. 0.5. F.
First 8 weeks. Orientation to the area of bioinformatics and computational biology. For students considering a major in BCBIO. Specializations and career opportunities. Offered on a satisfactory-fail basis only.

BCBIO 322: Introduction to Bioinformatics and Computational Biology
(Cross-listed with BIOL, GEN). (3-0) Cr. 3. F.  
Prereq: BIOL 212
Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

BCBIO 401: Fundamentals of Bioinformatics and Computational Biology
(3-0) Cr. 3. F.  
Prereq: BCBIO 322 and basic programming experience (e.g. COM S 207, COM S 227 or permission of instructor)
Application of computer science and engineering to molecular biology. String algorithms, sequence alignments, data structures, homology search methods, pattern recognition, fragment assembly, genome annotation, construction of bioinformatics databases, and gathering and distribution of biological information with the Internet.

BCBIO 402: Fundamentals of Systems Biology and Network Science
(3-0) Cr. 3. S.  
Prereq: BIOL 212
Technologies: transcriptome, proteome, metabolome; Networks: Gene regulatory network, Protein-protein interaction network, Literature network; Theories: Graph theory, random network, scale-free network, evolving network, network robustness; Tools: Jmol, MeV, Cytoscape, Citespace.
BCBIO 442: Bioinformatics and Computational Biology Techniques
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.S.
Prereq: BIOL 314 recommended
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442A: Bioinformatics and Computational Biology Techniques: Sequence Database Searching
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.S.
Prereq: BIOL 314 recommended
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442B: Bioinformatics and Computational Biology: Protein Structure Databases, Visualization, and Prediction
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.S.
Prereq: BIOL 314 recommended
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442C: Bioinformatics and Computational Biology Techniques: Phylogenetic Analysis
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.S.
Prereq: BIOL 314 recommended
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442D: Bioinformatics and Computational Biology Techniques: Microarray Analysis
(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.S.
Prereq: BIOL 314 recommended
Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 444: Bioinformatic Analysis
(Cross-listed with BCB, BIOL, COM S, CPR E, GEN). (4-0) Cr. 4. F.
Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

BCBIO 490: Independent Study
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.S.
Prereq: BCBIO 322, junior or senior classification, permission of instructor
Independent research projects for undergraduate students in bioinformatics and computational biology. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 490 and 491 toward graduation.

BCBIO 491: Team Research Projects.
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.S.
Prereq: BCBIO 322, junior or senior classification, permission of instructor
Research projects in bioinformatics and computational biology done by teams of students. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 490 and 491 toward graduation.

Courses primarily for undergraduates:

BCB 444: Bioinformatic Analysis
(Cross-listed with BCB, BIOL, COM S, CPR E, GEN). (4-0) Cr. 4. F.
Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

BCB 490: Independent Study
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.S.
Prereq: Permission of instructor
Courses primarily for graduate students, open to qualified undergraduates:
BCB 544: Fundamentals of Bioinformatics
(Cross-listed with COM S, CPR E, GDCB). (4-0) Cr. 4. F.
Prereq: MATH 165 or STAT 401 or equivalent
A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies.

BCB 567: Bioinformatics I (Bioinformatics Algorithms)
(Cross-listed with COM S, CPR E). (3-0) Cr. 3.
Prereq: COM S 228; COM S 330; credit or enrollment in BIOL 315, STAT 430
Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

BCB 568: Bioinformatics II (Statistical Bioinformatics)
(Cross-listed with COM S, GDCB, STAT). (3-0) Cr. 3. S.
Prereq: BCB 567 or (BIOL 315 and STAT 430), credit or enrollment in GEN 409
Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models.

BCB 569: Bioinformatics III (Structural Bioinformatics)
(Cross-listed with BBMB, COM S, CPR E, GDCB). (3-0) Cr. 3. F.
Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

BCB 570: Bioinformatics IV (Systems Biology)
(Cross-listed with COM S, CPR E, GDCB, STAT). (3-0) Cr. 3. S.
Prereq: BCB 567 or COM S 311, COM S 228, GEN 409, STAT 430

BCB 585: Fundamentals of Predictive Plant Phenomics
(Cross-listed with GDCB, M E). Cr. 4. F.
Prereq: Acceptance into the P3 program or instructor permission.
Principles of engineering, data analysis, and plant sciences and their interplay applied to predictive plant phenomics. Transport phenomena, sensor design, image analysis, graph models, network data analysis, fundamentals of genomics and phenomics. Multidisciplinary laboratory exercises. None

BCB 590: Special Topics
Cr. arr. Repeatable.
Prereq: Permission of instructor

BCB 593: Workshop in Bioinformatics and Computational Biology
(1-0) Cr. 1. Repeatable. F.S.
Current topics in bioinformatics and computational biology research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

BCB 598: Cooperative Education
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of the program chair
Off-campus work periods for graduate students in the field of bioinformatics and computational biology.

BCB 599: Creative Component
Cr. arr.

Courses for graduate students:

BCB 660: Selected Topics in Bioinformatics and Computational Biology
(3-0) Cr. 1-4. Repeatable, maximum of 4 times. F.S.SS.
Prereq: Permission of Instructor
Topics of interest in the major research areas of computational molecular biology, including genomics, structural genomics, functional genomics, and computational systems biology.

BCB 690: Student Seminar in Bioinformatics and Computational Biology
Cr. 1. Repeatable. S.
Student research presentations.

BCB 691: Faculty Seminar in Bioinformatics and Computational Biology
(1-0) Cr. 1. Repeatable.
Faculty research series.

BCB 697: Graduate Research Rotation
Cr. arr. Repeatable. F.S.SS.
Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major.

BCB 699: Research
Cr. arr. Repeatable.
Biological/Pre-Medical Illustration

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of “communicating science through art,” the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, freelance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences.

9 credits chosen from a list of approved biological science courses

Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

Communication Proficiency Requirement: Students must have credit for ENGL 150; earn a C or better in ENGL 250 or equivalent composition courses; and earn a C or better in one advanced writing course numbered ENGL 302 through ENGL 316.

Students in BPM I must complete a senior project or an internship experience (BPM I 497) in which they design and produce artwork that is suitable for publication or public display.

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses.

The biological sciences must include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>

**Courses primarily for undergraduates:**

- Advanced Biology or Art or plant science
- Work with BPMI advisory committee to plan senior project for portfolio
- If planning to attend graduate school, take GRE in Fall and prepare up to 20 portfolio pieces for submission in January
- Consider study abroad or attending summer GNSI Workshops or a Biological Station to take advanced Biology Courses
- Electives 2
- Humanities or Social Sci
- Advanced Biology or Art or plant science
- Work with BPMI advisory committee to plan senior project for portfolio
- If planning to attend graduate school, take GRE in Fall and prepare up to 20 portfolio pieces for submission in January
- Consider study abroad or attending summer GNSI Workshops or a Biological Station to take advanced Biology Courses
- Electives 2
BPM I 323: Scientific Illustration Principles and Techniques
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.
Prereq: DSN S 131, ARTIS 230, or equivalent, and 3 credits in biological sciences; or permission of the instructor
Studio basics and professional techniques in black & white, continuous tone, and color. Introduction to professional practice and principles of communicating science through art. Emphasis on tools, materials, and rendering.

BPM I 326: Illustration and Illustration Software
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.
Prereq: ARTIS 323/BPM I 323, or permission of the instructor
An introduction to digital illustration software. Application of painting, drawing and image making techniques using vector and raster based programs.

BPM I 327: Illustration as Communication
(Cross-listed with ARTIS). (0-6) Cr. 3.
Prereq: ARTIS 326/BPM I 326, or permission of the instructor
Investigation of illustration as a form of communication. Emphasis on problem solving, effective composition, and advancement of rendering skills.

BPM I 337: Application of Scientific Illustration Techniques
(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ARTIS 327
Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

BPM I 395: Field Illustration
Cr. 1-3. Repeatable, maximum of 6 credits. S.SS.
Prereq: Permission of instructor
A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BPM I 398: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of the program cooperative education coordinator, junior classification
Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BPM I 435I: Illustrating Nature I Sketching
(Cross-listed with IA LL). Cr. 2. SS.
Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

BPM I 436I: Illustrating Nature II Photography
(Cross-listed with IA LL). Cr. 2. SS.
Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

BPM I 490: Independent Study
Cr. 1-3. Repeatable, maximum of 3 credits.
Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment

BPM I 491: Portfolio Design and Professional Development
Cr. 2. S.
Prereq: BPMI 337, junior or senior classification in the BPMI curriculum.
Portfolio and professional preparation including identity package development, writing and speaking. Career-readiness, professional practice, leadership, networking, exploring research subfields within scientific visualization. Creating print and digital visual materials, learning approaches for entering the field, and developing business practice skills. Final portfolio materials presented at the end of the term.

BPM I 494: Special Topics in Illustration
Cr. 1-3. Repeatable.
Intensive exploration of illustration techniques in a studio or field setting.

BPM I 497: Illustration Internship
Cr. 1-6. Repeatable, maximum of 6 credits.
Prereq: Junior or senior classification in BPM I, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment
Offered on a satisfactory-fail basis only.

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation’s leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to
the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

**Customizing a degree**

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology. The major's curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student's career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

- Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

- Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

- Molecular and Cellular Biology—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

- Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

- Evolution and Biodiversity—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

**Other opportunities**

Teacher licensure—Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras,
and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations
In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (http://www.biology.iastate.edu) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Undergraduate Study
Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Principles of Biology I</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 211L</td>
<td>Principles of Biology Laboratory I</td>
<td>1</td>
</tr>
</tbody>
</table>

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of advanced biological science courses at the 300 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 211/L and BIOL212/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9 credits must be taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program’s web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements
Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements—Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry,
biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212. (Students in the College of Agriculture and Life Sciences are required to earn a C or better in ENGL 150, as well.)

**Curriculum in Biology**
Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

**Total Degree Requirement: 120 cr.**
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**Biology: 23.5 cr.**
All graded courses minimum C; 2.00 GPA average required.

Students are required to take 21 credits in advance biology of which 9 credits must be from the Biology Program, (BIOL), and 2 advanced BIOL courses must have a lab or field component.

* Students should meet with a Biology Program advisor to determine the proper plans for chemistry, math and physics before selecting those options above.

**Graduate Study**

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

**Courses primarily for undergraduates:**

**BIOL 101: Introductory Biology**

(3-0) Cr. 3. F.S.SS.

Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

**BIOL 110: Introduction to Biology**

Cr. 1. F.

Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

**BIOL 111: Opportunities in Biology**

(1-0) Cr. 0.5. S.

Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Offered on a satisfactory-fail basis only.

**BIOL 112: Transfer Student Orientation**

Cr. R. F.S.

Orientation to opportunities in Biology. Review of degree requirements and other information. Intended for students transferring from other academic institutions. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.
BIOL 155: Human Biology
(3-0) Cr. 3. F.S.
A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173: Environmental Biology
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 201: Introduction to Environmental Issues
(Cross-listed with ENSCI, ENV S). (2-0) Cr. 2. F.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

BIOL 204: Biodiversity
(Cross-listed with ENV S). (4-0) Cr. 2. S.
Prereq: One course in life sciences
Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course.

BIOL 211: Principles of Biology I
(3-0) Cr. 3. F.S.
Prereq: High school biology
Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L: Principles of Biology Laboratory I
(0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in BIOL 211
Laboratory to accompany 211.

BIOL 212: Principles of Biology II
(3-0) Cr. 3. F.S.
Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177
Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L: Principles of Biology Laboratory II
(0-3) Cr. 1. F.S.
Prereq: credit or enrollment in BIOL 212
Laboratory to accompany 212.

BIOL 251: Biological Processes in the Environment
(Cross-listed with ENSCI). (3-0) Cr. 3. S.
Principles of Biology from the level of macromolecules to the biosphere. Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles.

BIOL 255: Fundamentals of Human Anatomy
(3-0) Cr. 3. F.
Prereq: High School Biology and Chemistry, or BIOL 101
An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 255L: Fundamentals of Human Anatomy Laboratory
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in BIOL 255
Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 256: Fundamentals of Human Physiology
(3-0) Cr. 3. S.
Prereq: High School Biology and Chemistry, or BIOL 101, or BIOL 255 (recommended)
An introduction to human physiology, studying the function of all body systems. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider 335 for their physiology background. Does not satisfy biology major requirements.

BIOL 256L: Fundamentals of Human Physiology Laboratory
(0-3) Cr. 1. S.
Prereq: Credit or enrollment in BIOL 256
Student-conducted experiments investigating concepts of human physiology with computer data acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical students should consider 335 for their anatomy and physiology background. Does not satisfy biology major requirements.
BIOL 307: Women in Science and Engineering  
(Cross-listed with WGS). (3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: 200 level course in science, engineering or women's studies; ENGL 250  
The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives.  
Factors contributing to under-representation; feminist critiques of science; examination of successful strategies. Does not satisfy biology major advanced credit requirements.  
Meets U.S. Diversity Requirement  

BIOL 312: Ecology  
(Cross-listed with A ECL, ENSCI). (3-3) Cr. 4. F.S.S.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.  

BIOL 313: Principles of Genetics  
(Cross-listed with GEN). (3-0) Cr. 3. F.S.S.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.  

BIOL 313L: Genetics Laboratory  
(Cross-listed with GEN). (0-3) Cr. 1. F.S.  
Prereq: Credit or enrollment in BIOL 313  
Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.  

BIOL 314: Principles of Molecular Cell Biology  
(3-0) Cr. 3. F.S.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
Integration of elementary principles of metabolism, bioenergetics, cell structure, and cell function to develop a molecular view of how the cell works.  

BIOL 315: Biological Evolution  
(3-0) Cr. 3. F.S.  
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation.  
Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns.  

BIOL 322: Introduction to Bioinformatics and Computational Biology  
(Cross-listed with BCBIO, GEN). (3-0) Cr. 3. F.  
Prereq: BIOL 212  
Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.  

BIOL 328: Molecular and Cellular Biology of Human Diseases  
Cr. 3. F.  
Prereq: BIOL 212  
Survey of molecular, genetic, and cellular aspects of human diseases. Fundamental concepts of cell biology and how they are linked to the pathologies of different classes of human diseases. Recent scientific advances with an emphasis on new methods of diagnosis and treatment.  

BIOL 335: Principles of Human and Other Animal Physiology  
(3-0) Cr. 3. S.  
Prereq: BIOL 211, BIOL 212  
Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached from an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of organismal physiology, energy and water balances, physiology of rest exercise, and environmental stress.  

BIOL 335L: Principles of Human and Other Animal Physiology Laboratory  
(0-3) Cr. 1. S.  
Optional laboratory to accompany Biology 335. Student-conducted experiments investigating concepts of physiology.  

BIOL 336: Ecological and Evolutionary Animal Physiology  
Cr. 3.  
Prereq: BIOL 211, BIOL 212  
Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.  

BIOL 344: Human Reproduction  
(Cross-listed with WGS). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: BIOL 212  
Biology of human reproduction, including reproductive systems, hormones, and endocrinology of pregnancy, presented from a clinically-oriented perspective. Reviews health-related conditions such as infertility, sexually-transmitted diseases, and complicated pregnancy.
BIOL 349: The Genome Perspective in Biology
(Cross-listed with GEN). (2-2) Cr. 3. S.
Prereq: GEN 313 or GEN 320
Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems.

BIOL 350: Comprehensive Human Anatomy
(3-0) Cr. 3. F.
Prereq: Credit in BIOL 211 and BIOL 212
Comprehensive survey of human anatomy, emphasizing structural and functional relationships of major organ systems. Compartmental study of normal anatomy; practical clinical application of anatomical regions.

BIOL 351: Comparative Chordate Anatomy
(3-4) Cr. 5. S.
Prereq: BIOL 212, junior classification
The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates, comparisons of anatomic structures among major groups, and the adaptive significance of anatomic structures. Laboratory involves dissection of representative species.

BIOL 352: Vertebrate Histology
(3-3) Cr. 4. S.
Prereq: BIOL 212
Microscopic structure of vertebrate tissues and organs, with an introduction to histological techniques.

BIOL 353: Introductory Parasitology
(Cross-listed with MICRO, V PTH). (3-0) Cr. 3. S.
Prereq: BIOL 212
Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

BIOL 354: Animal Behavior
(3-0) Cr. 3. F.
Prereq: BIOL 212
Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (matting, aggression, parental care).

BIOL 354L: Laboratory in Animal Behavior
(0-3) Cr. 1. F.
Prereq: Credit or enrollment in BIOL 354
Laboratory techniques for observation, description and analysis of animal activities; independent projects.

BIOL 355: Plants and People
(3-0) Cr. 3. S.
Prereq: Credit in BIOL 211 and BIOL 211L
Uses of plants and fungi by humans and the importance of plants in the past, present, and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

BIOL 356: Dendrology
(Cross-listed with FOR). (2-2) Cr. 3. F.
Prereq: BIOL 211
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed.

BIOL 357: Biology of Plants
Cr. 3. F.
Prereq: BIOL 211 and BIOL 212 (BIOL 211L and 212L recommended)
Study of the general biology of plants, including plant cells and functions, basic anatomy of tissues, meristems, and organs; adaptive morphological features. Review of processes of photosynthesis, respiration, basic plant metabolic functions, and plant reproduction. Survey of evolutionary aspects of all major groups of land plants, and relationships of plants to their environment. Intended for Biology and other life science undergraduate majors.

BIOL 364: Invertebrate Biology
Cr. 3-4. F.
Prereq: BIOL 211, 212
Emphasis on diversity, development, physiology, and behavior of invertebrate organisms- the "spineless wonders" of the world. Laboratory involves hands-on study and investigation of living invertebrates.

BIOL 365: Vertebrate Biology
(Cross-listed with A ECL). (3-2) Cr. 4. F.
Prereq: BIOL 211, 211L, 212, 212L
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

BIOL 366: Plant Systematics
(2-4) Cr. 4. S.
Prereq: BIOL 211
Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, and identification and field study of local plants.
BIOL 370: GIS for Ecology and Environmental Science
(Cross-listed with ENSCI). Cr. 1-6. Repeatable. F.S.
Prereq: Six credits in biological and /or physical sciences, and permission of instructor.
Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only.

BIOL 371: Ecological Methods
(Cross-listed with A ECL). (2-3) Cr. 3. F.
Prereq: A ECL 312; STAT 101 or STAT 104
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

BIOL 381: Environmental Systems I: Introduction to Environmental Systems
(Dual-listed with EEOB 581). (Cross-listed with ENSCI, ENV S). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 382: Environmental Systems II: Analysis of Environmental Systems
(Dual-listed with EEOB 582). (Cross-listed with ENSCI). (2-2) Cr. 3. S.
Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 393: North American Field Trips in Biology
Cr. 1-4. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.

BIOL 393A: North American Field Trips in Biology: Pre-trip Seminar
(1-0) Cr. 1. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trips to North American locations of interest to biologists.

BIOL 393B: North American Field Trips in Biology: North American Field trip
Cr. 1-3. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trip under supervision of faculty member, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
Report required.

BIOL 394: International Field Trips in Biology
Cr. 1-4. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
Meets International Perspectives Requirement.

BIOL 394A: International Field Trips in Biology: Pre-trip Seminar
(1-0) Cr. 1. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trip to international locations of interest to biologists.
Meets International Perspectives Requirement.

BIOL 394B: International Field Trips in Biology: Field Trip to International Location
Cr. 1-3. Repeatable.
Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, under supervision of faculty member, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.
Meets International Perspectives Requirement.

BIOL 402: Introduction to Pathology
(Cross-listed with V PTH). (3-0) Cr. 3. F.
Prereq: BIOL 211 and BIOL 212 with labs
Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury.
BIOL 414: Life History and Reproductive Strategies
(Dual-listed with EEOB 514). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: BIOL 315 or equivalent recommended.
Evolution of ecological adaptations at the individual, population, and species level. Emphasis is on evolutionary mechanisms and adaptive strategies related to life histories and reproduction; age and size at maturity; lifespan and senescence; offspring size/number trade-offs; sex and mating systems; sex determination and sex ratios.

BIOL 423: Developmental Biology
(3-0) Cr. 3. S.
Prereq: BIOL 313
Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

BIOL 423L: Developmental Biology Laboratory
(0-3) Cr. 1. Repeatable, maximum of 4 times. S.
Prereq: Credit or enrollment in BIOL 423 or permission of the instructor.
Experiments and explorations illustrating fundamental principles of multicellular development.

BIOL 428: Topics in Cell Biology
(3-0) Cr. 3. S.
Prereq: BIOL 314
Selected topics on biological structure and function at the cellular level. Emphasis on dynamic nature and regulation of cellular organization and the integration of cellular processes (systems biology). Original research articles will demonstrate interdisciplinary research strategies and how scientific investigation leads to knowledge and understanding of cell biology.

BIOL 430: Principles of Plant Physiology
(3-0) Cr. 3.
Prereq: BIOL 313 or GEN 320; BIOL 314 or BBMB 301; CHEM 231 or CHEM 332; PHYS 106, PHYS 115, or PHYS 111
An overview of classical and current concepts, principles, and approaches regarding the basic mechanisms of plant function underlying growth, development, and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism, and photosynthesis.

BIOL 434: Endocrinology
(Dual-listed with EEOB 534). (3-0) Cr. 3. S.
Prereq: BIOL 211, BIOL 212
Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones.

BIOL 436: Neurobiology
(3-0) Cr. 3. F.
Prereq: BIOL 212
Basic principles of brain function and development. Signaling of nerve cells, synaptic transmission, structure/function of ion channels and receptors, memory and synaptic plasticity, movement and central control, sensation and sensory processing, construction of neural circuits, early brain development, complex brain functions in health and disease.

BIOL 444: Bioinformatic Analysis
(Cross-listed with BCB, BCBIO, COM S, CPR E, GEN). (4-0) Cr. 4. F.
Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

BIOL 451: Plant Evolution and Phylogeny
(Dual-listed with EEOB 551). (3-0) Cr. 4. F.
Prereq: BIOL 315 or equivalent.
Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies.

BIOL 454: Plant Anatomy
(3-3) Cr. 4. F.
Prereq: BIOL 212L; BIOL 366 recommended
Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds.
**BIOL 455: Bryophyte and Lichen Biodiversity**  
(Dual-listed with EEOB 555). (2-3) Cr. 3. S.  
*Prereq: BIOL 211, BIOL 211L*  
Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning.

**BIOL 456: Principles of Mycology**  
(Cross-listed with MICRO). (2-3) Cr. 3. F.  
*Prereq: 10 credits in biological sciences*  
Morphology, diversity and ecology of fungi; their relation to agriculture and industry and human health.

**BIOL 457: Herpetology**  
(Cross-listed with A ECL). (2-0) Cr. 2. F.  
*Prereq: BIOL 351 or BIOL 365*  
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

**BIOL 457L: Herpetology Laboratory**  
(Cross-listed with A ECL). (0-3) Cr. 1. F.  
*Prereq: BIOL 351 or BIOL/A ECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.*  
Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

**BIOL 458: Ornithology**  
(Cross-listed with A ECL). (2-0) Cr. 2. S.  
*Prereq: A ECL 365 or BIOL 351*  
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

**BIOL 458L: Ornithology Laboratory**  
(Cross-listed with A ECL). (0-3) Cr. 1. S.  
*Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.*  
Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

**BIOL 459: Mammalogy**  
(Dual-listed with EEOB 559). (Cross-listed with A ECL). (2-0) Cr. 2. S.  
*Prereq: BIOL 351 or A ECL 365*  
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

**BIOL 459L: Mammalogy Laboratory**  
(Cross-listed with A ECL). (0-3) Cr. 1. S.  
*Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.*  
Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

**BIOL 462: Evolutionary Genetics**  
(Cross-listed with GEN). (3-0) Cr. 3. F.  
*Prereq: BIOL 315*  
The genetic basis of evolutionary processes in eukaryotic organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

**BIOL 464: Wetland Ecology**  
(Dual-listed with EEOB 564). (Cross-listed with ENSCI). (3-0) Cr. 3. S.  
*Prereq: 15 credits in biological sciences.*  

**BIOL 465: Macroevolution**  
(Dual-listed with EEOB 565). Cr. 3. Alt. S., offered even-numbered years.  
*Prereq: BIOL 315*  
The history and diversity of life on earth; evolutionary patterns and processes above the species level. Diversity from a phylogenetic perspective. Empirical exercises include: phylogeny estimation, ancestral states, estimating diversification rates, evaluating the tempo and mode of evolution, biogeographic patterns, and trait associations across the tree of life.

**BIOL 471: Introductory Conservation Biology**  
(Cross-listed with A ECL). Cr. 3.  
*Prereq: BIOL 312*  
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.
BIOL 472: Community Ecology
(3-0) Cr. 3. S.
Prereq: BIOL 312
The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates.

BIOL 474: Plant Ecology
(3-0) Cr. 3. S.
Prereq: BIOL 312
Principles of plant population and community ecology.

BIOL 476: Functional Ecology
(Dual-listed with EEOB 576). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: BIOL 312
The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

BIOL 480: Studies in Marine Biology
Cr. 1-8. Repeatable.
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

BIOL 481: Summer Field Studies
Cr. 1-8. Repeatable.
Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

BIOL 482: Tropical Biology
Cr. 1-4. Repeatable, maximum of 8 credits.
Prereq: One year of college biology; knowledge of Spanish desirable but not required
Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

BIOL 484: Ecosystem Ecology
(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: Combined 12 credits in biology, chemistry, and physics.
Introduction of the study of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

BIOL 486: Aquatic Ecology
(Dual-listed with EOB 586). (Cross-listed with A ECL, ENSCI). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

BIOL 486L: Aquatic Ecology Laboratory
(Dual-listed with EEOB 586L). (Cross-listed with A ECL, ENSCI). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

BIOL 487: Microbial Ecology
(Dual-listed with EEOB 587). (Cross-listed with ENSCI, GEOL, MICRO). (3-0) Cr. 3. F.
Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

BIOL 488: Identification of Aquatic Organisms
(0-3) Cr. 1. F.S.
On-line taxonomic and identification exercises to accompany 486. Instruction and practice in the identification of algae, aquatic macrophytes, zooplankton, and benthos.

BIOL 489: Population Ecology
(Dual-listed with EEOB 589). (Cross-listed with A ECL). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.
BIOL 490: Independent Study
Cr. 1. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: Permission of instructor.
Independent study opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and, of those, only 2 credits may be applied toward the Biology advanced course requirement.

BIOL 491: Undergraduate Teaching Experience
Cr. 1-2. Repeatable.
Prereq: Permission of supervising staff
For students registering to be undergraduate teaching assistants. Offered on a satisfactory-fail basis only. A maximum of 2 credits of BIOL 491 may be applied toward the Biology advanced course requirement.

BIOL 492: Preparing for Graduate School in the Biological Sciences
(1-0) Cr. 1. F.
Prereq: For life science majors; Minimum requirement: sophomore standing.
For students considering pursuing a graduate degree in the biological sciences. Professional development topics including the defining of academic and career areas of interest, finding and evaluating appropriate programs of graduate study, the graduate school application process, and developing a curriculum vita. Exploration of learning opportunities at field stations, research internships, and independent research activities.

BIOL 494: Biology Internship
Cr. 1-3. Repeatable. F.S.SS.
Prereq: 8 credits in biology and permission of instructor
Professional experiences in biological sciences. Intended for Biology majors. No more than 9 credits in BIOL 494 may be counted toward graduation and, of those, only 6 credits may be applied toward the Biology advanced course requirement.

BIOL 495: Undergraduate Seminar
Cr. 1-3. Repeatable. F.S.
Prereq: Permission of instructor
Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

BIOL 498: Cooperative Education
Cr. R. Repeatable. F.S.SS.
Prereq: Permission of the Biology Program cooperative education coordinator
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

BIOL 499: Undergraduate Research Experience
Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: Permission of instructor.
Research opportunities for undergraduate students in the biological sciences. Intended for Biology majors. No more than 9 credits in Biol 499 may be counted toward graduation and, of those, only 6 credits may be applied toward the Biology advanced course requirement.

Chemistry
Undergraduate Study
For undergraduate curricula in liberal arts and sciences leading to the degrees Bachelor of Science and Bachelor of Arts, see Liberal Arts and Sciences, Curriculum.

Graduates holding the B.S. degree in Chemistry qualify in many fields as: teachers of Chemistry, supervisors in industry, technical sales personnel, and research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they may explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, or to obtain additional majors or strong minors. The B.A. degree does not prepare students as well for graduate study or professional employment in chemistry.

Graduates have firm foundations in the fundamentals and application of current chemical theories. They are able to design, carry-out, record, and analyze the results of chemical experiments. They are able to use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research. Graduates are able to communicate the results of their work to chemists, as well as non-chemists. They understand the ethical and environmental dimensions of problems and issues facing chemists. They follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals. Graduates are skilled in problem solving, critical thinking, and analytical reasoning. These skills may be applied to careers in education and industry; in professions such as law, medicine, environmental sciences, and forensic sciences. The curricula in Chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree provided they also take one Biochemistry course, typically BBMB 301 Survey of Biochemistry, BBMB 316 Principles of Biochemistry or BBMB 404 Biochemistry I and BBMB 405 Biochemistry II.

Liberal arts majors who wish to transfer into Chemistry at the end of their second year may still complete all degree requirements and graduate within five years.
Undergraduate students seeking the B.S. degree in Chemistry have the following courses in their degree programs as minimum requirements:

- CHEM 177 General Chemistry I
- & CHEM 178 and General Chemistry II
- or CHEM 201 Advanced General Chemistry

CHEM 177L Laboratory in General Chemistry I 1
or CHEM 177N Laboratory in General Chemistry I
or CHEM 201L Laboratory in Advanced General Chemistry

- CHEM 211 Quantitative and Environmental Analysis 2
- CHEM 211L Quantitative and Environmental Analysis Laboratory 2
- CHEM 301 Inorganic Chemistry 2
- CHEM 316 Instrumental Methods of Chemical Analysis 2
- CHEM 316L Instrumental Analysis Laboratory 2
- CHEM 322L Laboratory in Physical Chemistry 3
- CHEM 324 Introductory Quantum Mechanics 3
- CHEM 325 Chemical Thermodynamics 3
- CHEM 331 Organic Chemistry I 3
- CHEM 332 Organic Chemistry II 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- or CHEM 333L Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors) 1

CHEM 332L Laboratory in Organic Chemistry II 1
or CHEM 334L Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)

- CHEM 402 Advanced Inorganic Chemistry 3
- CHEM 401L Inorganic Chemistry Laboratory 1

Two advanced Chemistry courses (min 4 credits) 4-6

The following are required as supporting work:

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors

- ENGL 314 Technical Communication 3
- LIB 160 Information Literacy 1
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4
- MATH 265 Calculus III 4
- PHYS 221 Introduction to Classical Physics I 5
- PHYS 222 Introduction to Classical Physics II 5

Plus a foreign language requirement.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The Department requires a grade of C– or better in ENGL 314.

CHEM 399 Undergraduate Research or CHEM 499 Senior Research is strongly recommended. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements.

Chemistry majors seeking certification to teach Chemistry in secondary schools must meet the requirements of the College of Human Sciences as well as those of the Chemistry program. In addition, they must apply formally for admission to the teacher education program.

Undergraduate students seeking the B.A. degree in Chemistry have the following courses in their degree programs as minimum requirements:

One of the following sequences: 6-8

- CHEM 177 General Chemistry I
- & CHEM 178 and General Chemistry II
- & 177L and Laboratory in General Chemistry I
- or CHEM 177N Laboratory in General Chemistry I

- CHEM 167 General Chemistry for Engineering Students
- & CHEM 178 and General Chemistry II
- & 167L and Laboratory in General Chemistry for Engineering

- CHEM 201 Advanced General Chemistry
- & 201L and Laboratory in Advanced General Chemistry

CHEM 211 Quantitative and Environmental Analysis 2
CHEM 211L Quantitative and Environmental Analysis Laboratory 2

CHEM 301 Inorganic Chemistry 2
CHEM 316 Instrumental Methods of Chemical Analysis 2
CHEM 316L Instrumental Analysis Laboratory 2
CHEM 324 Introductory Quantum Mechanics 3
CHEM 321L Laboratory in Physical Chemistry 2-3
or CHEM 322L Laboratory in Physical Chemistry

CHEM 325 Chemical Thermodynamics 3
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
CHEM 332L Laboratory in Organic Chemistry II 1

The following are required as supporting work: 12

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3

or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors
ENGL 314 Technical Communication 3
LIB 160 Information Literacy 1
MATH 165 Calculus I
MATH 166 Calculus II
PHYS 221 Introduction to Classical Physics I
PHYS 222 Introduction to Classical Physics II

**Minor**
The Department offers a minor in chemistry which may be earned by credit in:

CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1

or

CHEM 167 General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering 5
CHEM 178 General Chemistry II 3
CHEM 211 Quantitative and Environmental Analysis 2
CHEM 211L Quantitative and Environmental Analysis Laboratory 2
CHEM 324 Introductory Quantum Mechanics 3
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1

And one of the following: 2-5

CHEM 301 Inorganic Chemistry
CHEM 316 Instrumental Methods of Chemical Analysis and Instrumental Analysis Laboratory
CHEM 325 Chemical Thermodynamics and Laboratory in Physical Chemistry or CHEM 321L Laboratory in Physical Chemistry
CHEM 332 Organic Chemistry II & 332L and Laboratory in Organic Chemistry II

The total minimum credits in Chemistry thus will be 20 to 23 depending on which advanced courses are selected.

1 Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.
Students may substitute the following courses, if necessary:

- CHEM 201 for 177 and 178;
- CHEM 177L for 177N or 201L.
- CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- CHEM 321L for 322L; however this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- PHYS 111 and 112 for PHYS 221 and 222, however PHYS 221 and 222 are highly recommended.

Required of Chemistry Learning Community Members.

Completion of three years of foreign language in high school fulfills this requirement.

Class offered Fall Semester only.

Class offered Spring Semester only.

Individuals earning a B.A. degree in Chemistry who have taken 331L, 334L and 322L can obtain American Chemical Society certification by taking an additional advanced chemistry lecture course of BBMB 301 or 404. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.

1. Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.

2. Students may substitute the following courses, if necessary:
   - CHEM 201 for 177 and 178;
   - CHEM 177L for 177N or 201L.
   - CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.

3. Completion of three years of foreign language in high school fulfills this requirement.

4. The completion of two courses (minimum of 2 credits each) are required to meet this requirement. (In addition to advanced Chemistry courses, certain courses in Biochemistry-Biophysics, Chemical Engineering, Computer Science, Mathematics and Materials Science and Engineering are acceptable.) Up to four credits in undergraduate research (CHEM 339 and/or 499) can be counted as one of the two advanced chemistry courses. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.
The program as listed above meets the standard for a certified degree of the American Chemical Society's Committee on Professional Training if BBMB 301 or 404 is one of the Advanced Chemistry Courses.

**F** Class offered Fall Semester only.

**S** Class offered Spring Semester only.

**Graduate Study**

The Department offers work for the degrees Master of Science and Doctor of Philosophy with majors in Chemistry, Analytical, Inorganic, Organic, and Physical chemistry. Co-majors may be taken between areas within Chemistry or between one of the areas in Chemistry and another department. Courses in other areas of Chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in Chemistry may choose an additional specialty in one of six areas: Materials Chemistry, Industrial Chemistry, Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and Forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside course requirement. A minor in Chemistry is available to students in other departments. The Department participates in the interdepartmental major in Toxicology.

The Department of Chemistry requires all graduate students majoring in Chemistry to teach as part of their training for an advanced degree. Prerequisite to major graduate work is the completion of undergraduate work in Chemistry, Mathematics, and Physics substantially equivalent to that required of undergraduate Chemistry majors at this institution.

The course numbers for general Chemistry courses include 163-178, and 201.

Index to field of work for 200 level courses and above is given by the second and third digits of course numbers:

1. Inorganic Chemistry 00-09
2. Analytical Chemistry 10-19
3. Physical Chemistry 20-29 and 60-69
4. Organic Chemistry 30-39
5. Chemical Education 50-59
6. Interdisciplinary Chemistry 70-89
7. Research 99

Courses primarily for undergraduates:

**CHEM 050: Preparation for College Chemistry**

(3-0) Cr. 0. F.S.

*Prereq: 1 year high school algebra*

An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. Credit for Chem 50 does not count toward graduation.

**CHEM 101: Chemistry Learning Community Orientation**

(1-0) Cr. 1. F.S.

*Prereq: Member of the Chemistry Learning Community.*

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

**CHEM 101A: Chemistry Learning Community Orientation: On-Campus Orientation**

(1-0) Cr. 1. F.

*Prereq: Member of the Chemistry Learning Community.*

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

**CHEM 101B: Chemistry Learning Community Orientation: Professional Development Opportunities**

(1-0) Cr. 1. S.

*Prereq: Member of the Chemistry Learning Community.*

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

**CHEM 102L: Physical Sciences for Elementary Education**

(Cross-listed with PHYS). (1-4) Cr. 3. F.S.

*Prereq: MATH 195 or MATH 140*

Physical science principles for future elementary teachers. Emphasis on experiments that address current elementary science education standards and that are appropriate for their future students to do, such as measurements of mass, length, time, light from atoms, charge and current, motion due to forces, energy and work, heat, waves, optics, building bridges and making musical instruments, studying states of matter and chemical reactions.
CHEM 110: Cutting-Edge Chemistry: Research and Career Opportunities  
(1-0) Cr. 1. F.  
Overview of careers in chemistry: industrial, governmental, and academic careers; literature and compound search instruction; professional ethics; and an introduction to joining a research lab. For students majoring or minoring in chemistry or chemistry-related fields. Offered on a satisfactory-fail basis only.

CHEM 160: Chemistry in Modern Society  
(3-0) Cr. 3. F.S.  
Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

CHEM 163: College Chemistry  
(4-0) Cr. 4. F.S.S.  
Prereq: 1 year of high school algebra and geometry and Chem 50 or 1 year of high school chemistry; and credit or enrollment in CHEM 163L  
A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 163L: Laboratory in College Chemistry  
(0-3) Cr. 1. F.S.S.  
Prereq: Credit or enrollment for credit in CHEM 163  
Laboratory to accompany CHEM 163. Must be taken with CHEM 163. Only one of Chem 163L, CHEM 167L, and CHEM 177L may count toward graduation.

CHEM 167: General Chemistry for Engineering Students  
(4-0) Cr. 4. F.S.  
Prereq: 1 year of high school chemistry or CHEM 50 and Math 143 pre-calculus or high school equivalent.  
Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 167L: Laboratory in General Chemistry for Engineering  
(0-3) Cr. 1. F.  
Prereq: Credit or enrollment for credit in CHEM 167  
Laboratory to accompany CHEM 167. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 177: General Chemistry I  
(4-0) Cr. 4. F.S.S.  
Prereq: MATH 140 or high school equivalent, and CHEM 50 or 1 year high school chemistry, and credit or enrollment in CHEM 177L. Chemistry and biochemistry majors may consider taking CHEM 201  
The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177L: Laboratory in General Chemistry I  
(0-3) Cr. 1. F.S.S.  
Prereq: Credit or enrollment for credit in CHEM 177  
Laboratory to accompany 177. 177L must be taken with 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177N: Laboratory in General Chemistry I  
(0-3) Cr. 1. F.  
Prereq: Credit or enrollment for credit in CHEM 177. For chemistry and biochemistry majors  
Laboratory to accompany CHEM 177. CHEM 177N must be taken with CHEM 177. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 178: General Chemistry II  
(3-0) Cr. 3. F.S.S.  
Prereq: CHEM 177, CHEM 177L  
Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses.

CHEM 178L: Laboratory in College Chemistry II  
(0-3) Cr. 1. F.S.S.  
Prereq: CHEM 177L and credit or enrollment for credit in CHEM 178  
Laboratory to accompany 178. 178L is not a necessary co-requisite with 178.
CHEM 201: Advanced General Chemistry  
(5-0) Cr. 5. F.  
Prereq: Co-enrollment in MATH 165 or credit, one year of high school chemistry, and one year high school physics or advanced chemistry. Co-enrollment in CHEM 201L. 
A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 201L: Laboratory in Advanced General Chemistry  
(0-3) Cr. 1. F.  
Prereq: Credit or enrollment for credit in CHEM 201  
Laboratory to accompany 201. Introductory lab experience in synthesis and analysis to prepare students for research activities. 201L must be taken with 201. Only one of 163L, 167L, 177L, 177N or 201L may count toward graduation.

CHEM 211: Quantitative and Environmental Analysis  
(2-0) Cr. 2. F.S.  
Prereq: CHEM 163 and CHEM 163L, CHEM 201 and CHEM 201L; or credit or enrollment in CHEM 178; and concurrent enrollment in CHEM 211L  
Theory and practice of elementary volumetric, chromatographic, electrochemical and spectrometric methods of analysis. Chemical equilibrium, sampling, and data evaluation. Emphasis on environmental analytical chemistry; the same methods are widely used in biological and materials sciences as well.

CHEM 211L: Quantitative and Environmental Analysis Laboratory  
(0-6) Cr. 2. F.S.  
Prereq: Credit or enrollment for credit in CHEM 211  
Introductory laboratory experience in volumetric, spectrometric, electrochemical and chromatographic methods of chemical analysis.

CHEM 231: Elementary Organic Chemistry  
(3-0) Cr. 3. F.S.S.  
Prereq: CHEM 163, CHEM 163L, or CHEM 177, CHEM 177L; credit or enrollment in CHEM 231L  
A survey of modern organic chemistry including nomenclature, structure and bonding, and reactions of hydrocarbons and important classes of natural and synthetic organic compounds. For students desiring only an elementary course in organic chemistry. Students in physical or biological sciences and premedical or preveterinary curricula should take the full year sequence 331 and 332 (with the accompanying laboratories 331L and 332L). Only one of Chem 231 and 331 or BBMB 221 may count toward graduation.

CHEM 231L: Laboratory in Elementary Organic Chemistry  
(0-3) Cr. 1. F.S.S.  
Prereq: Credit or enrollment for credit in CHEM 231; CHEM 163L or CHEM 177L  
Laboratory to accompany 231. 231L must be taken with 231. Only one of Chem 231L and 331L may count toward graduation.

CHEM 298: Cooperative Education  
Cr. R. Repeatable. F.S.S.  
Prereq: Permission of the Department cooperative education coordinator; sophomore classification  
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 299: Undergraduate Research (for Freshmen and Sophomores)  
Cr. arr. Repeatable, maximum of 6 credits.  
Prereq: Permission of staff member with whom student proposes to work

CHEM 301: Inorganic Chemistry  
(2-0) Cr. 2. S.  
Prereq: CHEM 324  
Atomic and molecular structure and bonding principles; molecular shapes and symmetry; acids and bases; solid-state structures and properties; inorganic chemistry of H, B, C.

CHEM 316: Instrumental Methods of Chemical Analysis  
(2-0) Cr. 2. F.  
Prereq: CHEM 211, CHEM 211L, Math 166, and concurrent enrollment in CHEM 316L; PHYS 222 recommended  
Quantitative and qualitative instrumental analysis. Operational theory of instruments, atomic and molecular absorption and emission spectroscopy, electroanalysis, mass spectrometry, liquid and gas chromatography, electrophoresis, literature of chemical analysis.
CHEM 316L: Instrumental Analysis Laboratory
(0-6) Cr. 2. F.
Prereq: Credit or enrollment in CHEM 316
Advanced laboratory experience in UV-visible spectrophotometry, atomic absorption and emission spectrometry, electrochemistry, gas and liquid chromatography, electrophoresis, mass spectrometry, and other instrumental methods.

CHEM 321L: Laboratory in Physical Chemistry
(1-3) Cr. 2. S.
Prereq: Credit or enrollment in CHEM 324 or CHEM 325.
Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, infrared and optical spectroscopy, lasers. Not applicable towards the B.S. degree in Chemistry. Only one of Chem 321L and 322L may count toward graduation.

CHEM 322L: Laboratory in Physical Chemistry
(1-6) Cr. 3. S.
Prereq: CHEM 324 or CHEM 325.
Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, surface science, infrared and optical spectroscopy, lasers. Only one of Chem 321L and 322L may count toward graduation.

CHEM 324: Introductory Quantum Mechanics
(3-0) Cr. 3. F.S.
Prereq: CHEM 178, MATH 166; PHYS 222 recommended.
Quantum mechanics, atomic and molecular structure, spectroscopy, kinetic theory of gases, chemical kinetics.

CHEM 325: Chemical Thermodynamics
(3-0) Cr. 3. F.S.
Prereq: CHEM 178, MATH 166; PHYS 222 recommended
Classical thermodynamics 1st, 2nd, and 3rd laws with applications to gases and interfacial systems, multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Students taking a two-semester physical chemistry sequence are advised to take 324 first; in the spring semester, a molecular-based section of this course, stressing statistical thermodynamics, is offered for which knowledge of 324 is useful.

CHEM 331: Organic Chemistry I
(3-0) Cr. 3. F.S.S.
Prereq: CHEM 178 or CHEM 201, enrollment in CHEM 331L highly recommended
The first half of a two semester sequence. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry. Students desiring only one semester of organic chemistry should take 231 and 231L, not 331. Only one of Chem 231 and 331 may count toward graduation.

CHEM 331L: Laboratory in Organic Chemistry I
(0-3) Cr. 1. F.S.S.
Prereq: CHEM 177L; credit or enrollment for credit in CHEM 331
Laboratory to accompany 331. Chemistry and biochemistry majors are encouraged to take 333L. Only one of Chem 231L and 331L may count toward graduation.

CHEM 332: Organic Chemistry II
(3-0) Cr. 3. F.S.S.
Prereq: CHEM 331; enrollment in CHEM 332L highly recommended
Continuation of 331. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms, natural products, carbohydrates and proteins. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry.

CHEM 332L: Laboratory in Organic Chemistry II
(0-3) Cr. 1. F.S.S.
Prereq: CHEM 331L; credit or enrollment for credit in CHEM 332
Laboratory to accompany 332. Chemistry and biochemistry majors are encouraged to take 334L.

CHEM 333L: Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)
(0-6) Cr. 2. F.
Prereq: Credit or enrollment for credit in CHEM 331
Laboratory to accompany 331 for chemistry and biochemistry majors.

CHEM 334L: Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)
(0-6) Cr. 2. S.
Prereq: CHEM 333L, credit or enrollment for credit in CHEM 332
Laboratory to accompany 332 for chemistry and biochemistry majors.
CHEM 398: Cooperative Education
Cr. R. Repeatable. F.S.S.
Prereq: Permission of the Department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 399: Undergraduate Research
Cr. arr.
Prereq: Permission of instructor with whom student proposes to work and junior or senior classification
Undergraduate research. No more than six total credits of Chem 399 and Chem 499 may count toward graduation. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements for the B.S. degree.

CHEM 401L: Inorganic Chemistry Laboratory
(0-3) Cr. 1. S.
Prereq: CHEM 402
Preparation and characterization of inorganic and organometallic compounds by modern techniques. For students majoring in chemistry or biochemistry.

CHEM 402: Advanced Inorganic Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 301; CHEM 331 recommended
Chemistry of the d and f metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic solid state and bioinorganic chemistry.

CHEM 490: Independent Study
Cr. arr.
Prereq: Completion of 6 credits in chemistry at the 300 level or higher and permission of instructor
No more than 9 credits of Chem 490 may count toward graduation.

CHEM 498: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of the Department cooperative education coordinator; senior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 499: Senior Research
Cr. 2-3. Repeatable, maximum of 6 credits.
Prereq: Permission of instructor with whom student proposes to work; B average in all chemistry, physics, and mathematics courses
Research in chosen area of chemistry, with final written report as senior thesis. This course should be elected for two consecutive semesters. For students majoring in chemistry. No more than six total credits for Chem 399 and 499 may count toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

CHEM 501L: Inorganic Preparations
(0-3) Cr. 1. F.
Prereq: CHEM 402
Preparation and characterization of inorganic and organometallic compounds by modern research techniques.

CHEM 502: Advanced Inorganic Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 402, CHEM 331 recommended
Chemistry of the main group (s, p) and transition (d, f) metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic, solid state, bioinorganic, and nano chemistry.

CHEM 505: Physical Inorganic Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 402 or CHEM 502 and CHEM 324
Elementary group theory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds.

CHEM 511: Advanced Analytical Chemistry
(3-0) Cr. 3. F.
Prereq: CHEM 316 and CHEM 316L
General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular microscopy; bioanalytical methods; data evaluation; chemometrics; and analytical literature.

CHEM 512: Electrochemical Methods of Analysis
(3-0) Cr. 3. F.
Prereq: CHEM 316 and CHEM 316L; Recommended but not Required CHEM 324, and CHEM 322L
CHEM 513: Analytical Molecular and Atomic Spectroscopy
(3-0) Cr. 3. S.
Prereq: CHEM 316 and CHEM 316L, CHEM 324, CHEM 322L
Introduction to physical optics and design of photometric instruments. Principles of absorption, emission, fluorescence, and Raman spectroscopy. Error and precision of optical methods. Ultraviolet, visible, and infrared methods of qualitative and quantitative organic and inorganic analysis.

CHEM 516: Analytical Separations
(3-0) Cr. 3. F.
Prereq: CHEM 316 and CHEM 316L, CHEM 324, CHEM 322L
Principles and examples of inorganic and organic separation methods applied to analytical chemistry. Solvent extraction, volatilization, ion exchange, liquid and gas chromatography, and electrophoresis.

CHEM 531: Organic Synthesis I
(2-0) Cr. 2. S.
Prereq: CHEM 332
Survey of organic functional group transformations.

CHEM 532: Organic Synthesis II
(2-0) Cr. 2. F.
Prereq: CHEM 531
Synthesis of complex organic compounds including natural products.

CHEM 537: Physical Organic Chemistry I
(3-0) Cr. 3. F.
Prereq: CHEM 332
Survey of reactive intermediates including cations, anions, carbenes, and radicals.

CHEM 538: Physical Organic Chemistry II
(3-0) Cr. 3. S.
Prereq: CHEM 537
Molecular structure, stereochemistry, introduction to reaction mechanisms, thermodynamic and kinetic data, linear free energy relationships, isotope effects, orbital symmetry.

CHEM 550: Safety in the Chemical Laboratory
(1-0) Cr. 1. S.
Prereq: CHEM 332L
Introduction to laboratory safety and chemical hygiene. Use of engineering controls and personal protective equipment. Chemical storage and waste disposal practices. Handling hazardous chemicals. Radiation safety and laser safety. Offered on a satisfactory-fail basis only.

CHEM 555: Teaching College Chemistry
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: Graduate or senior classification.
Methods of instruction, strategies and techniques for effective teaching and learning along with practice teaching in undergraduate chemistry recitation and laboratory courses. Cooperative learning, guided-inquiry, learning cycles, conceptual change, models and modeling, concept maps, visualization, computer simulations, web-based delivery systems, and learning theories.

CHEM 561: Fundamentals of Quantum Mechanics
(4-0) Cr. 4. F.
Prereq: CHEM 324
Schroedinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; operators including angular momenta; time-independent and time-dependent perturbation theory; Schroedinger and Heisenberg representations; unitary operators; interaction picture, density matrix.

CHEM 562: Fundamentals of Atomic and Molecular Quantum Mechanics
(3-0) Cr. 3. S.
Prereq: CHEM 561, credit or enrollment in CHEM 583
Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods.

CHEM 563: Statistical Mechanics
(3-0) Cr. 3. S.
Prereq: CHEM 325
Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium.

CHEM 564: Molecular Spectroscopy and Structure
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: CHEM 505 or CHEM 562
Maxwell’s field equations, interaction of light with matter including time-dependent perturbation theory, microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection rules, special lineshapes and introduction to nonlinear and coherent laser spectroscopies.
CHEM 571: Solid-State Chemistry
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: CHEM 301, CHEM 324
Structural principles, synthetic strategies, analytical methods, and chemical bonding issues applied to solids. Atomic packings and networks, short-range vs. long-range order, defects; phase diagrams, reactive fluxes, chemical transport; diffraction, spectroscopy; energy bands and their bonding interpretations.

CHEM 572: Spectrometric Identification of Organic Compounds
(2-3) Cr. 3. F.
Prereq: CHEM 332
Principles of infrared, ultraviolet, nuclear magnetic resonance, and mass spectroscopy as applied to organic chemistry.

CHEM 573: Nanochemistry
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: CHEM 301, CHEM 324
Synthesis, characterization, properties and applications of nanoscale materials (~ 0.5-500 nm), relationship with molecular, meso and bulk compounds. Chemistry of solid surfaces, zero-, one- and two-dimensional (0D, 1D, 2D) nanostructures, semiconductor quantum dots, plasmonic nanoparticles, carbon nanomaterials, porous nanomaterials, potential health and safety impacts.

CHEM 574: Organometallic Chemistry of the Transition Metals
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: CHEM 301, CHEM 324
Transition metal complexes with ligands such as cyclopentadienyl, olefins, acetylenes, benzenes, and carbon monoxide. Coverage of structure, bonding, reactivity, fundamental mechanisms, and homogeneous catalysis.

CHEM 576: Surface Chemistry
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: CHEM 324
Gas-surface interactions and techniques of characterization. Idealized surface lattices, surface tension, Wulff plots, work function, adsorbate-adsorbate interactions, 2D phase diagrams, diffusion, thin film growth, adsorption and desorption mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based spectroscopies for surface analysis (including AES, FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM).

CHEM 577: Mass Spectrometry
(3-0) Cr. 3. S.
Basic physics, instrumentation, chemical and biological applications of mass spectrometry.

CHEM 578: Chemical Kinetics and Mechanisms
(2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: CHEM 324
Rates and mechanisms; reversible, consecutive, and competing reactions; chain mechanisms; kinetic isotope effects; very rapid reactions; acid-base catalysis, theories of unimolecular reactions; transition state and Marcus theories.

CHEM 579: Introduction to Research in Chemistry
Cr. R. F.
Introduction to the various areas of research in chemistry at Iowa State University.

CHEM 580: Introduction to Computational Quantum Chemistry
(3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CHEM 324
Basic principles of quantum mechanics, Schrödinger equation. Hartree-Fock/molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry.

CHEM 583: Chemical Group Theory
(1-0) Cr. 1. F.
Prereq: CHEM 324
Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momenta; space groups and crystals; permutation group, antisymmetry, and spin states.

CHEM 599: Nonthesis Research
Cr. arr.
Prereq: Permission of instructor concerned

Courses for graduate students:

CHEM 600: Seminar in Inorganic Chemistry
(1-0) Cr. 1. Repeatable, maximum of 3 times. F.S.
Prereq: Permission of instructor

CHEM 601: Selected Topics in Inorganic Chemistry
(2-0) Cr. 1-2. F.S.
Prereq: Permission of instructor
Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; nonaqueous solutions; Zintl phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and bioinorganic chemistry of nucleic acids.
CHEM 611: Seminar in Analytical Chemistry  
(1-0) Cr. 1. Repeatable. F.S.  
Prereq: Permission of instructor

CHEM 619: Special Topics in Analytical Chemistry  
(2-0) Cr. 1-2. Repeatable. F.S.  
Prereq: Permission of instructor  
Raman spectroscopy, sensors, spectroelectrochemistry, capillary electrophoresis, analytical plasmas, chemometrics and bioanalytical chemistry.

CHEM 631: Seminar in Organic Chemistry  
(1-0) Cr. 1. Repeatable. F.S.  
Prereq: Permission of instructor

CHEM 632: Selected Topics in Organic Chemistry  
(2-0) Cr. 1-2. Repeatable. F.S.  
Prereq: CHEM 537  
Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidations and reductions, modern organic synthesis, reactive intermediates, bioorganic chemistry, and polymers.

CHEM 660: Seminar in Physical Chemistry  
(1-0) Cr. 1. Repeatable. S.  
Prereq: Permission of instructor

CHEM 667: Special Topics in Physical Chemistry  
(2-0) Cr. 1-2. F.S.  
Prereq: Permission of instructor  
Advanced and recent developments in physical chemistry are selected for each offering.

CHEM 699: Research  
Cr. arr. Repeatable.  
Prereq: Permission of instructor

Classical Studies

The cross-disciplinary program in Classical Studies engages students with the civilizations of ancient Greece and Rome and their influence, both past and present, on western and world cultures. The Classical Studies minor and interdisciplinary-studies major include an integrated curriculum of courses in the cultures, literatures, history, languages, archaeology, and art of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Current information about the Program may be found at: http://language.iastate.edu/academic-programs/classical-studies/

Courses in Classical Studies provide a classical context for students whose major fields of study or career interests include History, Anthropology, English, World Languages and Cultures, Philosophy, Women’s Studies, material culture, law, medicine, political science, the life sciences, and related fields.

Interdisciplinary Studies Major in Classical Studies

Students interested in pursuing an interdisciplinary studies major in Classical Studies should consult the Program Chair (see "Program Faculty" at http://language.iastate.edu/academic-programs/classical-studies/) or the Academic Adviser in the Department of World Languages and Cultures (http://language.iastate.edu/students/).

A student who wishes to declare a minor must successfully complete the following requirements:

a) One of the following sets of courses in ancient language:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>GREEK 101 &amp; GREEK 102</td>
<td>Elementary Ancient and New Testament Greek I and Elementary Ancient and New Testament Greek II</td>
</tr>
</tbody>
</table>

or

| CL ST 273H | Greek and Roman Mythology: Honors                                                             | 4-0 Cr. 4. | Have an interest in classical myths and legends.                                |
|            | Survey of the legends, myths of the classical world with emphasis on the principal gods,    |         | and heroes, and their relation to ancient social, psychological, and religious   |
|            | practices; some attention may be given to important modern theories.                         |         |                                                                                 |
|            | Meets International Perspectives Requirement.                                               |         |                                                                                 |

| CL ST 275  | The Ancient City                                                                             | 3-0 Cr. 3. | Have an interest in classical urban life.                                     |
|            | Examination of ancient urban life, including historical context, physical space, material   |         |                                                                                 |
|            | culture, religion, literature, and art; examination of civic identity.                       |         |                                                                                 |
|            | Examples drawn from specific ancient cities; some attention to modern methods of recovering  |         |                                                                                 |
|            | the conditions of ancient urban life and the fundamental concept of the city in European     |         |                                                                                 |
|            | history.                                                                                    |         |                                                                                 |
|            | Meets International Perspectives Requirement.                                               |         |                                                                                 |

| CL ST 304  | Cultural Heritage of the Ancient World                                                       | 3-0 Cr. 3. | Have an interest in classical heritage.                                      |
|            | (Cross-listed with HIST)                                                                     |         |                                                                                 |
|            | Historical examination of art, literature, thought, and religious beliefs of major          |         |                                                                                 |
|            | civilizations of the ancient Mediterranean countries until the end of the 8th century.       |         |                                                                                 |

| CL ST 310  | Ancient Philosophy                                                                          | 3-0 Cr. 3. | Have an interest in classical philosophy.                                   |
|            | (Cross-listed with PHIL)                                                                    |         |                                                                                 |
|            | Survey of ancient Greek philosophy, focusing on the pre-Socratics, Plato, and Aristotle.   |         |                                                                                 |
|            | Questions concerning being, knowledge, language, and the good life are treated in depth.   |         |                                                                                 |

| CL ST 350  | Rhetorical Traditions                                                                       | 3-0 Cr. 3. | Have an interest in classical rhetoric.                                    |
|            | (Cross-listed with ENGL, SP CM)                                                             |         |                                                                                 |
|            | Ideas about the relationship between rhetoric and society in contemporary and historical     |         |                                                                                 |
|            | contexts. An exploration of classical and contemporary rhetorical theories in relation to    |         |                                                                                 |
|            | selected topics that may include politics, gender, race, ethics, education, science, or     |         |                                                                                 |
|            | technology.                                                                                 |         |                                                                                 |

| CL ST 353  | World Literature: Western Foundations through Renaissance                                   | 3-0 Cr. 3. | Have an interest in classical literature.                                 |
|            | (Cross-listed with ENGL)                                                                    |         |                                                                                 |
|            | Representative works from the drama, epics, poetry, and prose of the Ancient World through   |         |                                                                                 |
|            | the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de  |         |                                                                                 |
|            | France, Boccaccio, Christine de Pizan, Cervantes, and others.                               |         |                                                                                 |
|            | Meets International Perspectives Requirement.                                               |         |                                                                                 |

| CL ST 367  | Christianity in the Roman Empire                                                            | 3-0 Cr. 3. | Have an interest in classical Christianity.                                |
|            | (Cross-listed with RELIG)                                                                   |         |                                                                                 |
|            | An historical introduction to the rise of Christianity in the Roman empire, with special   |         |                                                                                 |
|            | attention to the impact of Greco-Roman culture on the thought and practice of Christians    |         |                                                                                 |
|            | and the interaction of early Christians with their contemporaries.                          |         |                                                                                 |
CL ST 368: Religions of Ancient Greece and Rome
(Cross-listed with RELIG). Cr. 3.
Nature, origins and development of religious beliefs and practices in ancient Greece and Rome from earliest times up to the rise of Christianity. Roles of divinities and rituals in lives of individuals and families and the governing of city-states and empires. Emphasis on historical contexts of the Graeco-Roman world and influences of neighboring cultures in Africa and Asia. None.
Meets International Perspectives Requirement.

CL ST 372: Greek and Roman Tragedy and Comedy
(3-0) Cr. 3.
Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250
Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media.
Meets International Perspectives Requirement.

CL ST 372H: Greek and Roman Tragedy and Comedy: Honors
(4-0) Cr. 4.
Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250
Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media.
Meets International Perspectives Requirement.

CL ST 373: Heroes of Greece, Rome, and Today
(3-0) Cr. 3.
Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250
Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil.
Meets International Perspectives Requirement.

CL ST 373H: Heroes of Greece, Rome, and Today: Honors
(4-0) Cr. 4.
Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250
Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil.
Meets International Perspectives Requirement.

CL ST 374: Sex, Gender, and Culture in the Ancient Mediterranean World
(Cross-listed with HIST, WGS). (3-0) Cr. 3.
Prereq: Any one course in Cl St, W S, Latin, or Greek
Chronological and topical survey of the status of women and men, focusing on sex and gender issues in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on ancient Greece, Rome, and Egypt.
Meets International Perspectives Requirement.

CL ST 376: Classical Archaeology
(Cross-listed with ANTHR). (3-0) Cr. 3.
Chronological survey of the material culture of the ancient Graeco-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

CL ST 376A: Classical Archeology: Bronze Age and Early Iron Age Greece
(Cross-listed with ANTHR). (3-0) Cr. 3.
Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece. (ca 3000-700 BCE). Chronological survey of the material culture of the ancient Greece-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

CL ST 376B: Classical Archaeology: Archaic through Hellenistic Greece (ca 700-30 BCE)
(Cross-listed with ANTHR). (3-0) Cr. 3.
Chronological survey of the material culture of ancient Greece from ca. 700-30 BCE and the role of archaeological context in understanding the varied aspects of Greek culture during the Archaic, Classical, and Hellenistic periods. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.

CL ST 376C: Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)
(Cross-listed with ANTHR). (3-0) Cr. 3.
Chronological survey of the material culture of the ancient Roman world and the role of archaeological context in understanding the varied aspects of ancient Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.
Meets International Perspectives Requirement.
CL ST 383: Greek and Roman Art
(Cross-listed with ART H). (3-0) Cr. 3.
Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

CL ST 383H: Greek and Roman Art: Honors
(Cross-listed with ART H). (3-0) Cr. 3-4.
Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

CL ST 384: Roman Italy: An Introduction
(Cross-listed with HIST). Cr. 2. Repeatable, maximum of 4 credits. S.
Prereq: Enrollment limited to students participating in CL ST 385/HIST 385. Instructor permission required.
Introduction to the topography, history, archaeology, monuments, and art of Rome from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy, preparatory to study abroad in Rome. Meets International Perspectives Requirement.

CL ST 385: Study Abroad: Roman Italy: Building the Empire
(Cross-listed with HIST). Cr. 3. Repeatable, maximum of 6 credits. SS.
Prereq: CL ST 384/HIST 384 and instructor's permission.
Supervised on-site instruction in the history, archaeology, monuments, and art of Rome and environs from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy. Meets International Perspectives Requirement.

CL ST 394: The Archaeology of Greece: An Introduction
(2-0) Cr. 2. Repeatable, maximum of 4 credits. S.
Introduction to the topography, history, archaeology, monuments and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece, preparatory to study abroad in Greece (CL ST 395).
Meets International Perspectives Requirement.

CL ST 395: Study Abroad: The Archaeology of Greece
Cr. 2-6. Repeatable, maximum of 9 credits. SS.
Prereq: CL ST 394
Supervised on-site instruction in the archaeology, monuments, and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece.
Meets International Perspectives Requirement.

CL ST 402: Greek Civilization.
(Cross-listed with HIST). (3-0) Cr. 3.
Prereq: Sophomore classification
Ancient Greece from the Bronze Age to the Hellenistic period; evolution of the Greek polis and its cultural contributions with a particular emphasis on the writings of Herodotus and Thucydides.

CL ST 403: Roman Civilization.
(Cross-listed with HIST). (3-0) Cr. 3.
Prereq: Sophomore classification
Ancient Rome from the Regal Period to the Fall of the Western Empire; evolution of Roman institutions and Rome’s cultural contributions studied through original sources.

CL ST 430: Foundations of Western Political Thought
(Dual-listed with CL ST 530). (Cross-listed with POL S). (3-0) Cr. 3.
Prereq: 6 credits in political science, philosophy, or European history
Study of original texts in political thought ranging from the classical period to the renaissance. Topics such as justice, freedom, virtue, the allocation of political power, the meaning of democracy, human nature, and natural law.

CL ST 480: Seminar in Classical Studies
(3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: 30 credits in Classical Studies or related courses, permission of Program Chair
Advanced study of a selected topic in Classical Studies. Research paper or project selected by the student.

CL ST 490: Independent Study
Cr. 1-6. Repeatable, maximum of 9 credits.
Prereq: 7 credits in classical studies at the 200 level or higher; permission of the Program Chair
Designed to meet the needs of students who wish to study specific topics in classical civilization in areas where courses are not offered, or to pursue such study beyond the limits of existing courses.

Courses primarily for graduate students, open to qualified undergraduates:

CL ST 512: Proseminar in European History
(3-0) Cr. 3.
Prereq: Permission of instructor.
Readings in European history.

CL ST 512A: Readings Seminar in European History: Ancient
(Cross-listed with HIST). (3-0) Cr. 3. Repeatable.
Prereq: Permission of instructor
Readings in European history.

CL ST 530: Foundations of Western Political Thought
(Dual-listed with CL ST 430). (Cross-listed with POL S). (3-0) Cr. 3.
Prereq: 6 credits in political science, philosophy, or European history
Study of original texts in political thought ranging from the classical period to the renaissance. Topics such as justice, freedom, virtue, the allocation of political power, the meaning of democracy, human nature, and natural law.
CL ST 594: Seminar in European History
(3-0) Cr. 3. Repeatable.
Prereq: Permission of instructor
Topics vary each time offered.

CL ST 594A: Research Seminar in European History: Ancient
(Cross-listed with HIST). (3-0) Cr. 3. Repeatable.
Prereq: Permission of instructor
Topics vary each time offered.

Communication Studies
The Communication Studies Major
comst.las.iastate.edu (https://comst.las.iastate.edu)

The Communication Studies Program focuses on human communication, exploring the ways humans create and negotiate meaning. Communication Studies majors master a focused course of inquiry into interpersonal processes as they create and sustain relationships and impact individuals, groups, and organizations. The Communication Studies curriculum builds primarily on social science traditions in developing a liberal arts education emphasizing human communication. Students in the Communication Studies major study applied communication theory and research in interpersonal, small group, organizational, intercultural, and other contexts.

The Communication Studies (ComSt) major teaches students how to think critically, giving them the ability to examine complex communication issues, and develop and implement strategies grounded in evidence-based research. This prepares students for careers in business and industry and graduate education. Students majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, public relations, training and development, sales management, recruitment, event planning, sales, management, organizational development, business communication, law, and international and intercultural relations.

ComSt majors must earn at least 120 credits, with 45 credits at the 300-400 levels, and a minimum of 33 credits in ComSt.

Communication Studies majors will...

• Develop foundational knowledge of human communication
• Apply human communication strategies in a diverse world
• Evaluate and utilize evidence-based research
• Cultivate communication competence

Communication Proficiency Requirement
To meet the University’s Communication Proficiency requirement, students are required to take:

Credits in COMST 384 Applied Organizational Communication, may not be applied toward the upper division requirements.
In accordance with college requirements, an overall average in Communication Studies courses of C (2.0) or better is required.

**Enhancement Requirement (4 credits)**
- COM S 103  Computer Literacy and Applications  4

**Additional Recommended Courses**
- STAT 101  Principles of Statistics  4
- SP CM 212  Fundamentals of Public Speaking  3
- COMST 450  Special Topics in Communication Studies  3

**The Communication Studies Minor (18 credits)**
The requirements for a minor in ComSt may be fulfilled by credit in:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMST 101</td>

15  15

To meet Upper Division Comm Requirements students select from among the following:
- COMST 310
- COMST 311
- COMST 313
- COMST 314
- COMST 317
- COMST 319
- COMST 325
- COMST 330
- SP CM 323

Students in all majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. (COMST 310 fulfills the international perspective requirement/ COMST 210 and SP CM 323 fulfill the U.S. diversity requirement). Approved courses are listed at: http://www.registrar.iastate.edu/courses/div-ip-guide.html. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS foreign language requirement.
The LAS College requires all students to have a 2.0 in the major to graduate. This means students need a 2.0 GPA in the 33 hours taken to fulfill the major requirements in Communication Studies.

Courses primarily for undergraduates:

**COMST 101: Introduction to Communication Studies**  
(3-0) Cr. 3.  
An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

**COMST 101L: Introduction to Communication Studies: Laboratory**  
(0-2) Cr. 1.  
*Prereq: Concurrent enrollment in COMST 101.*  
Laboratory component of COMST 101. Skill building, experiential activities, and in-depth discussions relevant to the study of communication.

**COMST 102: Introduction to Interpersonal Communication**  
(3-0) Cr. 3.  
Application of communication principles, theory, and research to the process of interpersonal communication; includes verbal and nonverbal communication, listening, and conflict management. Particular emphasis given to using communication to manage interpersonal relationships.

**COMST 104: Orientation to Communication Studies**  
(1-0) Cr. 1.  
*Prereq: Available only for Communication Studies majors*  
Orientation to Communication Studies discipline, program requirements and career opportunities. Required of communication studies majors. Offered on a satisfactory-fail basis only.

**COMST 203: Introduction to Communication Research Methods**  
(3-0) Cr. 3.  
*Prereq: COMST 101*  
An introduction to analyzing and conducting communication research. Provides an overview of quantitative and qualitative approaches to communication research.

**COMST 210: Communication and U.S. Diversity**  
(3-0) Cr. 3. F.S.SS.  
Introduction to the role of diversity in communication. Developing competent communication with diverse social groups within interpersonal and organizational contexts in the United States. Topics may include structured reflection of one’s role in diverse communication experiences, cultural variations in communication mores, impacts of racial/ethnic/gender identities on communication, workplace policies regarding cultural diversity, the intersection of communication and cultural privilege, communication practices that can reduce prejudice/discrimination, and communication characteristics of advocates for diversity.  
Meets U.S. Diversity Requirement

**COMST 214: Professional Communication**  
(3-0) Cr. 3.  
Communication theory and skill development in organizational settings. Emphasis on interpersonal skill development, team and meeting facilitation, informational interviewing, individual and team presentations, and self-assessment.

**COMST 218: Conflict Management**  
(3-0) Cr. 3.  
Exploration of communication theories, principles and methods associated with effective conflict management.

**COMST 301: Human Communication Theory**  
(3-0) Cr. 3.  
*Prereq: COMST 101*  
Examination of the major theories related to human communication; with particular emphasis on theories underlying interpersonal, small group, organizational, and intercultural communication.

**COMST 310: Intercultural Communication**  
(3-0) Cr. 3.  
*Prereq: COMST 102, COMST 203, COMST 301*  
Examines the theories, principles and research on intercultural communication to enhance cultural sensitivity and to recognize, accept, and adapt to cultural diversity. Interactive assignments.  
Meets International Perspectives Requirement.

**COMST 311: Studies in Interpersonal Communication**  
(3-0) Cr. 3.  
*Prereq: COMST 102, COMST 203, COMST 301*  
This class focuses on studies of contemporary interpersonal communication concepts and theories. Emphasis on research that examines issues central to communication in interpersonal relationships.
COMST 313: Leadership Communication Theories
(3-0) Cr. 3. F.S.
Prereq: COMST 102, COMST 203, COMST 301
Investigation of theories, research and principles of leadership communication. Exploration of the contexts in which leadership and communication occurs, with emphasis on the connection between communication and leadership and the dyadic linkage of leader and follower.

COMST 314: Organizational Communication
(3-0) Cr. 3.
Prereq: COMST 102, COMST 203, COMST 301
Theory and research in organizational communication. Provides strategies for assessing and improving individual and organizational communication effectiveness. Addresses issues such as technology, diversity, work-life negotiation, emotional labor, conflict, socialization, and socially responsible organizations. Explores how organizational meaning is created and sustained through human communication.

COMST 317: Small Group Communication
(3-0) Cr. 3.
Prereq: COMST 102, COMST 203, COMST 301
Theory and research in small group communication; application to group decision-making and leadership. Includes communication analyses of groups and teams.

COMST 319: Communication Training and Development
(3-0) Cr. 3.
Prereq: COMST 102, COMST 203, COMST 301
Theories and approaches to communication training and development; includes adult learning theory. Emphasis on the design, presentation and assessment of communication skills in organizational contexts.

COMST 325: Nonverbal Communication
(3-0) Cr. 3.
Prereq: COMST 102, COMST 203, COMST 301
Approaches to studying nonverbal communication. Foci include topics such as emotion, gestures, gaze, use of space, and parsing intention in social interaction.

COMST 330: Computer Mediated Communication
(3-0) Cr. 3.
Prereq: COMST 102, COMST 203, COMST 301
Theories and approaches related to mediated communication in interpersonal and organizational settings. Focus on how new technology impacts human interaction and relationships.

COMST 384: Applied Organizational Communication
(3-0) Cr. 3.
Prereq: COMST 101, COMST 102 or equivalent course.
Theory and research of micro-level organizational communication, including interpersonal and small group interactions taking place in a professional setting. Topics include interpersonal dynamics in such areas as conflict, generational communication, negotiation, superior/subordinate communication, external communication, and virtual communication. Not available for major credit.

COMST 404: Research Seminar
(Dual-listed with COMST 504). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: COMST 301 plus 3 additional communication studies classes from the following list: COMST 310, COMST 311, COMST 313, COMST 314, COMST 317, COMST 319, COMST 325, or COMST 330.
Capstone communication studies course. Students develop an original research study linked to the study of communication. Data are collected and analyzed. Results are presented in a final research paper and a presentation.

COMST 450: Special Topics in Communication Studies
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.
Research and theory related to special topics and issues in communication studies.

COMST 490: Independent Study
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 9 credits in communication studies and junior classification
Application must be submitted for approval the semester prior to the independent study.

COMST 491: Research Practicum
Cr. arr. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: COMST 203, COMST 301 plus permission of instructor.
Providing research assistance on projects conducted by Communication Studies faculty.

COMST 497: Professional Internship
Cr. 1-3. Repeatable, maximum of 6 credits.
Prereq: 12 hours in Communication Studies including COMST 203, COMST 301, and one other 300-level COMST class. Junior Classification. Application required.
100 hours of on-site professional work per credit hour plus completion of the academic requirement set by the internship committee. Application should be submitted in the term prior to the term in which the internship will be served. Internship cannot be used to meet degree requirement in Communication Studies.
Courses primarily for graduate students, open to qualified undergraduates:

**COMST 504: Research Seminar**
(Dual-listed with COMST 404). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
*Prereq: COMST 301 plus 3 additional communication studies classes from the following list: COMST 310, COMST 311, COMST 313, COMST 314, COMST 317, COMST 319, COMST 325, or COMST 330.*
Capstone communication studies course. Students develop an original research study linked to the study of communication. Data are collected and analyzed. Results are presented in a final research paper and a presentation.

**COMST 590: Special Topics**
Cr. 1-4. Repeatable.
Application must be submitted for approval the semester prior to the independent study.

### Computer Science

http://www.cs.iastate.edu

The undergraduate curriculum in Computer Science leading to the Bachelor of Science degree is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org. This degree equips students with a sound knowledge of the foundations of Computer Science as well as problem solving and system design skills necessary to create robust, efficient, reliable, scalable, and flexible software systems. The B.S. degree in Computer Science prepares students for graduate study in Computer Science and for various business, industry, and government positions including computer scientists, information technologists, and software developers. The main educational objectives of the Computer Science program at Iowa State University are that its graduates demonstrate expertise, engagement, and learning within three to five years after graduation.

- **Expertise:** Graduated students should have the ability to establish peer-recognized expertise in the discipline. They should have the ability to articulate this expertise by formulating and solving problems of interest, by creating or deriving value through the application of technology, and by using mathematical foundations, algorithmic principles, and computer science theory in designing, implementing, and evaluating computer-based systems and processes which meet the desired needs of their employers.

- **Engagement:** Graduated students should have the ability to be engaged in the profession through the practice of computer science in industry, academia, or the public sector. They should demonstrate effective teaming and commitment to working with others by applying communications skills and professional knowledge.

- **Learning:** Graduated students should have the ability to engage in sustained learning through graduate work, professional improvement opportunities, and self study so that they can adapt to the role played by information processing in ever-changing areas of science, technology, and society.

### Curriculum in Computer Science

A student seeking a B.S. degree in Computer Science must satisfy the requirements of the University and College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum) and the departmental requirements.

The departmental requirements consist of a minimum of 46 credits in Computer Science and satisfaction of written and oral requirements. Students must earn at least a C- in Math 165, Math 166, and each Computer Science course taken to fulfill the Degree Program. The LAS College requires the major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student’s grade is C or higher.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The Department requires a C or higher in the upper-level ENGL course (302, 305, 309, 314).

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

Students must take at least 15 credits of Computer Science courses at the 300 level or higher at Iowa State University while resident here. Computer Science transfer courses need to be a minimum grade of C or higher to be considered for course substitution.

Students must earn a C- or better in each Computer Science course which is a prerequisite to a course listed in the student's degree program.

**Undergraduate Minor in Computer Science**

The Department of Computer Science offers an undergraduate minor in Computer Science. The minor requires at least 16 credits in computer science courses. Com S 414 cannot be used to fulfill minor requirements.

A minimum grade of C- is required in Com S 227 and Com S 228. A minimum grade of C is required in both Com S 311 and the three credits of 300-level Computer Science courses and above. At least 6 credits of the minor must be in courses numbered 300 and above and taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Undergraduate Curriculum in Software Engineering**

The Department of Computer Science, together with the Department of Electrical and Computer Engineering, also offer a curriculum leading to an undergraduate degree in Software Engineering. The Software Engineering curriculum offers emphasis areas in Software Engineering principles, process, and practice. Students may also take elective courses in Computer Engineering and Computer Science.

---

See Index, Software Engineering. For curriculum information, see also College of Engineering and College of Liberal Arts and Sciences.

**Graduate Study**

The department offers graduate programs leading to degrees of Master of Science (MS) and Doctor of Philosophy (PhD) with a major in Computer Science. The Doctor of Philosophy degree may also be earned with
computer science as a co-major with some other discipline. Additionally, the department offers a minor for the students majoring in other disciplines.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor's degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, a minimum of 31 semester credits is required. A thesis or a creative component demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The PhD requirements are governed by the student's program of study committee within established guidelines of the department and the graduate college. They include coursework (demonstrating breadth and depth of knowledge), a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Courses primarily for undergraduates:

COM S 101: Orientation
Cr. R. F.S.
Introduction to the computer science discipline and code of ethics, Com S courses, research and networking opportunities, procedures, policies, help and computing resources, extra-curricular activities offered by the Department of Computer Science and Iowa State University. Discussion of issues relevant to student adjustment to college life. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

COM S 103: Computer Literacy and Applications
Cr. 4. F.S.SS.
Introduction to computer literacy and applications. Literacy: Impact of computer technology in today's societies, hardware, software, software programming, database and information systems, communication and networks, digital media technology, computer security and safety, ethics and privacy. Applications: In-depth hands-on experience with the operating systems, Microsoft word processing, spreadsheets, database management and presentation software. No prior computer experience necessary. Offered online only. Attendance required at an orientation session the first week of class.

COM S 104: Brief Introduction to Computer Programming for Non-Majors
(1.5-1) Cr. 2. F.S.
Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.

COM S 105: Short Course in Computer Programming
Cr. 2.
Prereq: Com S 104
8-week course in programming, including instruction in syntax and semantics, of the following current programming languages.

COM S 105A: Short Course in Computer Programming: Perl
(1-2) Cr. 2.
Prereq: Com S 104
8-week course in programming using Perl.

COM S 105B: Short Course in Computer Programming: MATLAB
(2-0) Cr. 2.
Prereq: Com S 104
8-week course in programming using MATLAB.

COM S 106: Introduction to Web Programming
(3-0) Cr. 3. F.S.
Introduction to web programming basics. Fundamentals of developing web pages using a comprehensive web development life cycle. Learn to code programs and earn in-depth experience with current web design techniques such as HTML5 and cascading style sheets. Programming with JavaScript, jQuery, PHP, SQL, and MySQL. Strategies for accessibility, usability and search engine optimization. No prior computer programming experience necessary.
COM S 107: Windows Application Programming  
(3-0) Cr. 3. F.S.  
Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

COM S 108: Applied Computer Programming for Non-Majors  
(3-0) Cr. 3.  
Prereq: Com S 107 or equivalent  
Advanced programming applications in Visual Basic for non-majors. Emphasis on programming projects including sorting, file processing, database processing, web programming, and graphics and animation. Students will learn problem solving techniques and advanced programming skills to build real-world applications.

COM S 113: Introduction to Spreadsheets and Databases  
(2-2) Cr. 3. F.S.SS.  
Using Microsoft Excel spreadsheets and Microsoft Access databases to input, store, process, manipulate, query, and analyze data for business and industrial applications. Credit in Com S 113 may not be applied toward graduation in the COM S, S E, and CPR E majors.

COM S 127: Introduction to Computer Programming  
(3-2) Cr. 4. F.S.  
Prereq: Credit or Enrollment in MATH 140 or higher  
Introduction to computer programming with an emphasis on problem solving. Topics include: program structures, expressions, variables, decision and logic, iteration, collections, input and output. Program construction and testing. Programming assignments including games and applications. No prior programming experience necessary. This course is intended for Computer Science majors.

COM S 203: Careers in Computer Science  
Cr. R. F.S.  
Computer science as a profession. Introduction to career fields open to computer science majors. Relationship of coursework to careers. Presentations by computer science professionals. Offered on a satisfactory-fail basis only.

COM S 207: Fundamentals of Computer Programming  
(Cross-listed with MIS). (3-1) Cr. 3. F.S.SS.  
Prereq: MATH 150 or placement into MATH 140 or higher  
An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/MIS 207 and Com S 227.

COM S 208: Intermediate Computer Programming  
(3-1) Cr. 3.  
Prereq: MIS/COM S 207, credit or enrollment in MATH 151, MATH 160, or MATH 165  
Intermediate-level programming techniques. Emphasis on designing, writing, testing, debugging, and documenting medium-sized programs. Data structures and their uses. Dynamic memory usage. Inheritance and polymorphism. Algorithm design and efficiency: recursion, searching, and sorting. Event-driven and GUI programming. The software development process. This course is not designed for computer science, software engineering and computer engineering majors. Credit may not be applied toward the major in computer science, software engineering, or computer engineering.

COM S 227: Object-oriented Programming  
(3-2) Cr. 4. F.S.SS.  
Prereq: Credit or Enrollment in MATH 143 or higher; recommended: a previous high school or college course in programming or equivalent experience  
Computer programming using objects as the mechanism for modularity, abstraction, and code reuse. Instance variables, methods, and encapsulation. Review of control structures for conditionals and iteration. Developing algorithms on strings, arrays, and lists. Recursion, searching, and sorting. Text parsing and file I/O. Interfaces, inheritance, polymorphism, and abstract classes. Exception handling. Tools for unit testing and debugging. Emphasis on a disciplined approach to specification, code development, and testing. Course intended for Com S majors. Credit may not be applied toward graduation for both Com S 207 and 227.

COM S 228: Introduction to Data Structures  
(3-1) Cr. 3. F.S.SS.  
Prereq: Minimum of C- in COM S 227, credit or enrollment in MATH 165  
An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism, and generics. Abstract data type specification and correctness. Collections including lists, stacks, queues, trees, heaps, maps, hash tables, and graphs. Big-O notation and algorithm analysis. Searching and sorting. Graph search and shortest path algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

COM S 230: Discrete Computational Structures  
(Cross-listed with MATH). (3-1) Cr. 3. F.S.SS.  
Prereq: Minimum of C- in COM S 227 and MATH 165; ENGL 150  
Concepts in discrete mathematics as applied to computer science. Logic, set theory, functions, relations, combinatorics, discrete probability, graph theory and number theory. Proof techniques, induction and recursion.
COM S 252: Linux Operating System Essentials
(3-0) Cr. 3. F.
Prereq: CPR E 185 or S E 185 or COM S 127 or COM S 207 or COM S 227
Introduction to installation, utilization, and administration of Linux systems. Topics include open-source software, package installation and management, shell programming and command-line utilities, process and service management, account management, network configuration, file sharing, interoperation with other computers and operating systems, automation, and system security.

COM S 290: Independent Study
Cr. arr. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Permission of instructor
No more than 6 credits of Com S 290 or Com S 290H may be counted toward graduation.

COM S 290H: Independent Study: Honors
Cr. arr. Repeatable, maximum of 6 credits. F.S.
Prereq: Permission of instructor
No more than 6 credits of Com S 290 or Com S 290H may be counted toward graduation.

COM S 309: Software Development Practices
(Cross-listed with S E). (3-1) Cr. 3. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165
A practical introduction to methods for managing software development. Process models, requirements analysis, structured and object-oriented design, coding, testing, maintenance, cost and schedule estimation, metrics. Programming projects.

COM S 311: Introduction to the Design and Analysis of Algorithms
(3-1) Cr. 3. F.S.S.
Prereq: Minimum of C- in COM S 228; MATH 166, ENGL 150, and COM S 230 or CPR E 310
Basic techniques for design and analysis of algorithms. Sorting, searching, graph algorithms, string matching, and NP-completeness. Design techniques such as dynamic programming, divide and conquer, greedy method, and approximation. Asymptotic, worst-case, average-case and amortized analyses. Topics from advanced data structures such as balanced trees and hashing.

COM S 319: Construction of User Interfaces
(Cross-listed with S E). (3-0) Cr. 3. F.S.
Prereq: COM S 228

COM S 321: Introduction to Computer Architecture and Machine-Level Programming
(3-1) Cr. 3. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165; COM S 230 or CPR E 281; ENGL 250
Introduction to computer architecture and organization. Emphasis on evaluation of performance, instruction set architecture, datapath and control, memory-hierarchy design, and pipelining. Assembly language programming.

COM S 326: C for Programmers
Cr. 1. F.S.
Prereq: Minimum of C- in COM S 228; COM S 230
Half-semester course. Design and implementation of libraries and applications in C, for students with prior programming background. Emphasis on differences between C and other languages, including file I/O, string processing, memory management, and buffer overruns. Using build systems, debuggers, and other development tools. Programming projects.

COM S 327: Advanced Programming Techniques
(3-0) Cr. 3. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165
Object-oriented programming experience using a language suitable for exploring advanced topics in programming. Topics include memory management, parameter passing, inheritance, compiling, debugging, and maintaining programs. Significant programming projects.

COM S 331: Theory of Computing
(Cross-listed with LING). (3-1) Cr. 3. F.S.
Prereq: Minimum of C- in COM S 228, MATH 166, and in COM S 230 or CPR E 310; ENGL 250

COM S 336: Introduction to Computer Graphics
(3-0) Cr. 3. F.
Prereq: COM S 327, CoReq MATH 207 or MATH 317
Programming interactive computer graphics systems using standard low-level libraries (such as OpenGL or DirectX) with an emphasis on 3D rendering. The graphics pipeline and programmable shaders. Coordinate systems and transformations in two and three dimensions. Homogeneous coordinates, viewing transformations and perspective. Euler angles and quaternions. Visible surface algorithms. Lighting models and shading. Texture mapping, bump mapping, reflection, elementary ray tracing. Offscreen buffers, render-to-texture and related techniques.
COM S 342: Principles of Programming Languages
(Cross-listed with S E). (3-1) Cr. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165; COM S 230 or CPR E 310
Study of concepts in programming languages, especially functional
programming concepts. Overview of major programming paradigms,
their relationship, and tradeoffs among paradigms enabling sound
choices of programming language for application-specific development.
Programming projects.

COM S 350: Number Theory
(Cross-listed with MATH). (3-0) Cr. S.
Prereq: MATH 201 or COM S 230
Divisibility, integer representations, primes and divisors, linear
diophantine equations, congruences, and multiplicative functions.
Applications to cryptography. Additional topics, chosen at the discretion
of the instructor.

COM S 352: Introduction to Operating Systems
(3-1) Cr. F.S.
Prereq: COM S 321 or CPR E 381 and COM S 327 or CPR E 288; ENGL 250
Survey of operating system, networking and parallel programming issues.
Introduction of processes, threads, process synchronization, deadlocks,
memory, file systems, networking, security threats and encryption.
Programming projects.

COM S 362: Object-Oriented Analysis and Design
(Cross-listed with S E). (3-0) Cr. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165; ENGL 250
Object-oriented requirements analysis and systems design. Design
notations such as the Unified Modeling Language. Design Patterns.
Group design and programming with large programming projects.

COM S 363: Introduction to Database Management Systems
(3-0) Cr. F.S.
Prereq: Minimum of C- in COM S 228 and MATH 165; ENGL 250
Relational, object-oriented, semistructured and query languages. SQL,
XML, and NO-SQL. Database design using entity-relationship model, data
dependencies, and relational database design. Application development
in SQL-like languages and general purpose host languages with
application program interfaces and a commonly used Object Relational
Mapping framework. Web application development. Programming
Projects.

COM S 398: Cooperative Education
Cr. R. Repeatable. F.S.S.S.
Prereq: Permission of department chair
Required of all cooperative education students. Students must register
for this course prior to commencing each work period.

COM S 402: Computer Science Senior Project
Cr. 2-3. Repeatable, maximum of 6 credits. F.S.
Prereq: COM S 309, COM S 311, COM S 321, and COM S 331, Senior
Classification
Students work as individuals and teams to complete the planning, design,
and implementation of a significant project in the topic area. Oral and
written reports. No more than 6 credits of 402A, 402B, and 402C may be
used toward graduation.

COM S 402A: Computer Science Senior Project: Multimedia and
Computer Gaming I
Cr. 2-3. Repeatable, maximum of 6 credits. F.
Prereq: COM S 309, COM S 311, COM S 321, COM S 331, and COM S 437,
Senior Classification
Students conceive, plan, architect and design a computer game. Student
registered in this course will work with students in ARTIS 409. Oral and
written reports. No more than 6 credits of 402A, 402B, and 402C may be
used toward graduation.

COM S 402B: Computer Science Senior Project: Multimedia and
Computer Gaming II
Cr. 2-3. Repeatable, maximum of 6 credits. S.
Prereq: COM S 402A, Senior Classification
Students implement, test, and present a completed production computer
game. Students in this class will work with students in ARTIS 409. Oral
and written reports. No more than 6 credits of 402A, 402B, and 402C may
be used toward graduation.

COM S 402C: Computer Science Senior Project: Project in Computer
Science
(0-6) Cr. 2-3. Repeatable, maximum of 6 credits. F.S.
Prereq: COM S 309, COM S 311, COM S 321, and COM S 331, Senior
Classification
Students work as individuals and teams to complete the planning, design,
and implementation of a significant project in the topic area. Oral and
written reports. No more than 6 credits of 402A, 402B, and 402C may be
used toward graduation.

COM S 409: Software Requirements Engineering
(Dual-listed with COM S 509). (3-0) Cr. 3.
Prereq: COM S 309; for graduate credit: graduate standing or permission of
instructor
The requirements engineering process including elicitation, requirements
analysis fundamentals, requirements specification and communication,
and requirements evaluation. Modeling of functional and nonfunctional
requirements, traceability, and requirements change management. Case
studies and software projects.
COM S 410: Distributed Development of Software
(Dual-listed with COM S 510). (3-0) Cr. 3.
Prereq: COMS 228, COMS 309, COMS 327; for graduate credit: graduate standing or permission of instructor
Teams of students develop software applications in a modern software engineering environment. Importance, effective processes pertaining to team organization, management and communication, and cultural issues of distributed development. Graduate credit requires in-depth study of concepts and oral presentations.

COM S 412: Formal Methods in Software Engineering
(Dual-listed with COM S 512). (Cross-listed with CPR E, S E). (3-0) Cr. 3.
Prereq: COM S 311, STAT 330; for graduate credit: graduate standing or permission of instructor
A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

COM S 413: Foundations and Applications of Program Analysis
(Dual-listed with COM S 513). Cr. 3.
Prereq: COM S 331, COM S 342
Algorithms and tools for automatically reasoning about code and program executions to predict software behavior. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation and symbolic execution. Applications of program analysis to improve software security, performance and testing. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

COM S 414: Gerontechnology in Smart Home Environments
(Dual-listed with COM S 514). (3-0) Cr. 3.
Prereq: COM S 227 or COM S 207 or GERON 377 or ARTGR 271 or equivalent; for graduate credit: graduate standing or permission of instructor
Interdisciplinary course designed for students interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. Research report and oral presentation required for graduate credit.

COM S 415: Software System Safety
(Dual-listed with COM S 515). (3-0) Cr. 3.
Prereq: COM S 309 or COM S 311; for graduate credit: graduate standing or permission of instructor
An introduction to the hazard analysis, safety requirements, design, and testing of software for safety-critical and high-dependability systems. Safety analysis techniques, fault identification and recovery, and certification issues. Emphasizes a case-based and systematic approach to software's role in safe systems.

COM S 417: Software Testing
(Cross-listed with S E). (3-0) Cr. 3.
Prereq: COM S 309; COM S 230 or CPR E 310; ENGL 250, SP CM 212
An introduction to software testing principles and techniques. Test models, test design, test adequacy criteria, regression, integration, and system testing; and software testing tools.

COM S 418: Introduction to Computational Geometry
(Dual-listed with COM S 518). (3-0) Cr. 3.
Prereq: COM S 311 or permission of instructor; for graduate credit: graduate standing or permission of instructor
Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Convex hulls, line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality. Voronoi diagrams, Delaunay triangulations, geometric data structures, robot motion planning, visibility graphs. Other selected topics. Programming assignments. Scholarly report required for graduate credit.

COM S 421: Logic for Mathematics and Computer Science
(Cross-listed with MATH). (3-0) Cr. 3.
Prereq: MATH 301 or MATH 207 or MATH 317 or COM S 230
Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, program specification and verification, model checking and binary decision diagrams, temporal logic and modal logic.

COM S 424: Introduction to High Performance Computing
(Cross-listed with CPR E, MATH). (2-2) Cr. 3. F.
Prereq: MATH 265; MATH 207 or MATH 317; or permission of instructor.
Unix, serial programming of scientific applications, OpenMP for shared-memory parallelization. No Unix, Fortran or C experience required.
COM S 425: High Performance Computing for Scientific and Engineering Applications
(Cross-listed with CPR E). (2-2) Cr. 3.
**Prereq:** COM S 311, ENGL 250, SP CM 212
Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports.

COM S 426: Introduction to Parallel Algorithms and Programming
(Dual-listed with COM S 526). (Cross-listed with CPR E). (3-2) Cr. 4.
**Prereq:** CPR E 308 or COM S 321, CPR E 315 or COM S 311
Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

COM S 430: Concurrent Programming in Practice
(3-1) Cr. 3.
**Prereq:** COM S 311, COM S 362 or COM S 363, ENGL 250, SP CM 212
A practical course in concepts, techniques, languages, and frameworks for concurrent and asynchronous systems. Concurrency fundamentals: threads, synchronization locks, waiting and notification, memory visibility, immutability and thread confinement. Concurrent data structures and utilities, thread pools. Asynchronous programming with callbacks, futures, and message passing. Issues of aliasing, ownership and borrowing. Transactional memory, immutable and versioned data structures. Alternatives to threads and locks: event-driven systems, the actor model, CSP, coroutines. Students will investigate several non-mainstream languages supporting different concurrency models. Oral and written reports.

COM S 433: Molecular Programming of Nanoscale Devices and Processes
(Dual-listed with COM S 533). (3-0) Cr. 3.
**Prereq:** Minimum of C- in COM S 331 or permission of instructor; for graduate credit: graduate standing or permission of instructor
Programming, modeling, and analysis of natural and engineered systems at the nanoscale. Topics include chemical reaction networks, strand displacement systems, models of self-assembly, biomolecular origami, and molecular robotics. Emphasis on mathematical methods of describing, simulating, programming, and assessing the computational power of such systems. Graduate credit requires a written or oral report on current research.

COM S 435: Algorithms for Large Data Sets: Theory and Practice
(Dual-listed with COM S 535). (3-0) Cr. 3.
**Prereq:** COM S 311 or equivalent; for graduate credit: graduate standing or permission of instructor
Algorithmic challenges involved in solving computational problems on massive data sets. Probabilistic data structures, Curse of Dimensionality and dimensionality reduction, locality sensitive hashing, similarity measures, matrix decompositions. Optimization problems in massive data analysis. Computational problems that arise in the context of web search, social network analysis, online advertising etc. Practical aspects include implementation and performance evaluation of the algorithms on real world data sets. Graduate credit requires a written report on current research.

COM S 437: Computer Game and Media Programming
(3-0) Cr. 3.
**Prereq:** COM S 336 or permission of instructor
Students will learn video game programming using current game engine interfaces with real hardware. Particular attention is paid to the development environment, tool chains, 2D graphics, 3D graphics, controllers, memory management, and audio systems.

COM S 440: Principles and Practice of Compiling
(Dual-listed with COM S 540). (3-1) Cr. 3.
**Prereq:** COM S 331, COM S 342, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor
Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 440 and 540. Topics include: lexical, syntactic and semantic analyses, syntax-directed translation, code generation, runtime environment and library support.

COM S 441: Programming Languages
(Dual-listed with COM S 541). (3-1) Cr. 3.
**Prereq:** COM S 342 or COM S 440; for graduate credit: graduate standing or permission of instructor
Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.
COM S 444: Bioinformatic Analysis
(Cross-listed with BCB, BCBIO, BIOL, CPR E, GEN). (4-0) Cr. 4. F.
Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

COM S 453: Privacy Preserving Algorithms and Data Security
Cr. 3.
Prereq: COM S 311
Fundamentals of privacy preserving algorithms, data security, anonymization, and techniques and mechanisms to minimize disclosure of sensitive information while maintaining availability. Theory and fundamentals underpinning measures to evaluate the privacy and availability of data; implementation and deployment of privacy-preserving data operations including pre- and post-randomization techniques, homomorphisms, and secure function evaluation protocols. Theory and practice of the algorithmic limits on data privacy, including the cost in terms of time and space complexity.

COM S 454: Distributed Systems
(Dual-listed with COM S 554). (Cross-listed with CPR E). (3-1) Cr. 3.
Prereq: COM S 311, COM S 352; for graduate credit: graduate standing or permission of instructor
Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

COM S 455: Simulation: Algorithms and Implementation
(Dual-listed with COM S 555). (3-0) Cr. 3.
Prereq: COM S 311 and COM S 230, STAT 330, ENGL 150, SP CM 212; for graduate credit: graduate standing or permission of instructor
Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts.

COM S 461: Principles and Internals of Database Systems
(Dual-listed with COM S 561). (3-1) Cr. 3.
Prereq: COM S 311, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor
Database design including entity-relationship model, relational data model, and non-relational data models, data dependency, and normalization. Database management including physical storage, access methods, query processing, and transaction management. Database systems of special purposes such as spatial databases, mobile object databases, and multimedia databases. Introduction to current database research such as cloud data management and Internet information retrieval.

COM S 472: Principles of Artificial Intelligence
(Dual-listed with COM S 572). (3-1) Cr. 3.
Prereq: COM S 311, STAT 330 or STAT 305, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor
Specification, design, implementation, and selected applications of intelligent software agents and multi-agent systems. Computational models of intelligent behavior, including problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction. Reactive, deliberative, rational, adaptive, learning and communicative agents and multiagent systems. Artificial intelligence programming. Research project and written report required for graduate credit.

COM S 474: Introduction to Machine Learning
(Dual-listed with COM S 574). (3-1) Cr. 3.
Prereq: COM S 311, STAT 330 or STAT 305, MATH 165, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor
Introduction to tools and techniques of machine learning for applications. Selected machine learning techniques in practical data mining for classification, regression, and clustering, e.g., association rules, decision trees, linear models, Bayesian learning, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, and clustering algorithms. Selected applications in data mining and pattern recognition.
COM S 477: Problem Solving Techniques for Applied Computer Science
(Dual-listed with COM S 577). (3-0) Cr. 3.
Prereq: COM S 228; COM S 230 or CPR E 310, MATH 166, MATH 207 or MATH 317, or consent of the instructor; for graduate credit: graduate standing or permission of instructor
Selected topics in applied mathematics, algorithms, and geometry that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Homogeneous coordinates and transformations, perspective projection, rotations in space, quaternions, polynomial interpolation, roots of polynomials and polynomial systems, solution of linear and nonlinear equations, parametric and algebraic curves, curvature, torsion, Frenet formulas, surfaces, principal curvatures, Gaussian and mean curvatures, geodesics, approximation, Fourier series and fast Fourier transform, linear programming, data fitting, least squares, simplex method, nonlinear optimization, Lagrange multipliers, calculus of variations. Programming components. Scholarly report required for graduate credit.

COM S 481: Numerical Methods for Differential Equations
(Cross-listed with MATH). (3-0) Cr. 3. S.
Prereq: MATH 265 and either MATH 266 or MATH 267

COM S 486: Fundamental Concepts in Computer Networking
(3-0) Cr. 3.
Prereq: COM S 352
An introduction to fundamental concepts in the design and implementation of computer communication in both wired and wireless networks, their protocols, and applications. Layered network architecture in the Internet, applications, transport, network, and data link layers and their protocols, Socket API, software-defined networking, and network security.

COM S 487: Network Programming, Applications, and Research Issues
(Dual-listed with COM S 587). (3-0) Cr. 3.
Prereq: Com S 352 or CPR E 489 or equivalent; for graduate credit: graduate standing or permission of instructor
Programming paradigms for building distributed and networking applications, including multithreaded client-server programming, socket programming, distributed object frameworks and programming suites, and web computing and security. Introduction to some on-going research issues in distributed and networking applications, including peer-to-peer computing, multimedia communications, and mobile computing and networking. Written report and oral presentation required for graduate credit.

COM S 490: Independent Study
Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: 6 credits in computer science, permission of instructor
No more than 9 credits of Com S 490 or Com S 490H may be counted toward graduation.

COM S 490H: Independent Study: Honors
Cr. arr. Repeatable, maximum of 9 credits. F.S.
Prereq: 6 credits in computer science, permission of instructor
No more than 9 credits of Com S 490 or Com S 490H may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

COM S 509: Software Requirements Engineering
(Dual-listed with COM S 409). (3-0) Cr. 3.
Prereq: COM S 309; for graduate credit: graduate standing or permission of instructor
The requirements engineering process including elicitation, requirements analysis fundamentals, requirements specification and communication, and requirements evaluation. Modeling of functional and nonfunctional requirements, traceability, and requirements change management. Case studies and software projects.

COM S 510: Distributed Development of Software
(Dual-listed with COM S 410). (3-0) Cr. 3.
Prereq: COMS 228, COMS 309, COMS 327; for graduate credit: graduate standing or permission of instructor
Teams of students develop software applications in a modern software engineering environment. Importance, effective processes pertaining to team organization, management and communication, and cultural issues of distributed development. Graduate credit requires in-depth study of concepts and oral presentations.
COM S 511: Design and Analysis of Algorithms
(Cross-listed with CPR E). (3-0) Cr. 3.
Prereq: COM S 311

COM S 512: Formal Methods in Software Engineering
(Dual-listed with COM S 412). (3-0) Cr. 3.
Prereq: COM S 311, STAT 330; for graduate credit: graduate standing or permission of instructor
A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

COM S 513: Foundations and Applications of Program Analysis
(Dual-listed with COM S 413). (Cross-listed with CPR E). Cr. 3.
Prereq: COM S 331, COM S 342
Algorithms and tools for automatically reasoning about code and program executions to predict software behavior. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation and symbolic execution. Applications of program analysis to improve software security, performance and testing. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

COM S 514: Gerontechnology in Smart Home Environments
(Dual-listed with COM S 414). (3-0) Cr. 3.
Prereq: COM S 227 or COM S 207 or GERON 377 or ARTGR 271 or equivalent; for graduate credit: graduate standing or permission of instructor
Interdisciplinary course designed for students interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. Research report and oral presentation required for graduate credit.

COM S 515: Software System Safety
(Dual-listed with COM S 415). (3-0) Cr. 3.
Prereq: COM S 309 or COM S 311; for graduate credit: graduate standing or permission of instructor
An introduction to the hazard analysis, safety requirements, design, and testing of software for safety-critical and high-dependability systems. Safety analysis techniques, fault identification and recovery, and certification issues. Emphasizes a case-based and systematic approach to software’s role in safe systems.

COM S 518: Introduction to Computational Geometry
(Dual-listed with COM S 418). (3-0) Cr. 3.
Prereq: COM S 311 or permission of instructor; for graduate credit: graduate standing or permission of instructor
Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Convex hulls, line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams, Delaunay triangulations, geometric data structures, robot motion planning, visibility graphs. Other selected topics. Programming assignments. Scholarly report required for graduate credit.

COM S 525: Numerical Analysis of High Performance Computing
(Cross-listed with CPR E, MATH). (3-0) Cr. 3. S.
Prereq: CPR E 308 or MATH 481; experience in scientific programming; knowledge of FORTRAN or C
Introduction to parallelization techniques and numerical methods for distributed memory high performance computers. A semester project in an area related to each student’s research interests is required.

COM S 526: Introduction to Parallel Algorithms and Programming
(Dual-listed with COM S 426). (Cross-listed with CPR E). (3-2) Cr. 4. F.
Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311
Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

COM S 531: Theory of Computation
(3-0) Cr. 3.
Prereq: COM S 331
A systematic study of the fundamental models and analytical methods of theoretical computer science. Computability, the Church-Turing thesis, decidable and undecidable problems. Computational resources such as time, space, and nonuniformity. Complexity classes, computational intractability and completeness. Selected topics from randomness, algorithmic information theory, and logic.

COM S 533: Molecular Programming of Nanoscale Devices and Processes
(Dual-listed with COM S 433). (3-0) Cr. 3.
Prereq: Minimum of C- in COM S 331 or permission of instructor; for graduate credit: graduate standing or permission of instructor
Programming, modeling, and analysis of natural and engineered systems at the nanoscale. Topics include chemical reaction networks, strand displacement systems, models of self-assembly, biomolecular origami, and molecular robotics. Emphasis on mathematical methods of describing, simulating, programming, and assessing the computational power of such systems. Graduate credit requires a written or oral report on current research.
COM S 535: Algorithms for Large Data Sets: Theory and Practice
(Dual-listed with COM S 435). (3-0) Cr. 3.
Prereq: COM S 311 or equivalent; for graduate credit: graduate standing or permission of instructor
Algorithmic challenges involved in solving computational problems on massive data sets. Probabilistic data structures, Curse of Dimensionality and dimensionality reduction, locality sensitive hashing, similarity measures, matrix decompositions. Optimization problems in massive data analysis. Computational problems that arise in the context of web search, social network analysis, online advertising etc. Practical aspects include implementation and performance evaluation of the algorithms on real world data sets. Graduate credit requires a written report on current research.

COM S 540: Principles and Practice of Compiling
(Dual-listed with COM S 440). (3-1) Cr. 3.
Prereq: COM S 331, COM S 342, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor
Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 440 and 540. Topics include: lexical, syntactic and semantic analyses, syntax-directed translation, code generation, runtime environment and library support.

COM S 541: Programming Languages
(Dual-listed with COM S 441). (3-1) Cr. 3.
Prereq: COM S 342 or COM S 440; for graduate credit: graduate standing or permission of instructor
Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

COM S 544: Fundamentals of Bioinformatics
(Cross-listed with BCB, CPR E, GDCB). (4-0) Cr. 4.
Prereq: MATH 165 or STAT 401 or equivalent
A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies.

COM S 549: Advanced Algorithms in Computational Biology
(Cross-listed with CPR E). (3-0) Cr. 3.
Prereq: COM S 311 and either COM S 228 or COM S 208
Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

COM S 551: Computational Techniques for Genome Assembly and Analysis
(3-0) Cr. 3.
Prereq: COM S 311 and some knowledge of programming
Introduction to a big data research area in bioinformatics. Focus on applying computational techniques to huge genomic sequence data. These techniques include finding optimal sequence alignments, generating genome assemblies, finding genes in genomic sequences, mapping short sequences onto a genome assembly, finding single-nucleotide and structural variations, building phylogenetic trees from genome sequences, and performing genome-wide association studies.

COM S 552: Principles of Operating Systems
(3-0) Cr. 3.
Prereq: For graduate credit: graduate standing or permission of instructor
A comparative study of high-level language facilities for process synchronization and communication. Analysis of deadlock, concurrency control and recovery. Protection issues including capability-based systems, access and flow control, encryption, and authentication. Additional topics chosen from distributed operating systems, soft real-time operating systems, and advanced security issues. Programming and research projects.

COM S 554: Distributed Systems
(Dual-listed with COM S 454). (Cross-listed with CPR E). (3-1) Cr. 3.
Prereq: COM S 311, COM S 352; for graduate credit: graduate standing or permission of instructor
Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.
COM S 555: Simulation: Algorithms and Implementation
(Dual-listed with COM S 455). (3-0) Cr. 3.
Prereq: COM S 311 and COM S 230, STAT 330, ENGL 150, SP CM 212; for graduate credit: graduate standing or permission of instructor
Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts.

COM S 556: Analysis Algorithms for Stochastic Models
(3-0) Cr. 3.
Prereq: Graduate standing or permission of instructor
Introduction to the use of stochastic models to study complex systems, including network communication and distributed systems. Data structures and algorithms for analyzing discrete-state models expressed in high-level formalisms. State space and reachability graph construction, model checking, Markov chain construction and numerical solution, computation of performance measures, product-form models, approximations, and advanced techniques.

COM S 557: Computer Graphics and Geometric Modeling
(Cross-listed with CPR E, M E). (3-0) Cr. 3. F.
Prereq: M E 421, programming experience in C

COM S 558: Introduction to the 3D Visualization of Scientific Data
(Cross-listed with GEOL, HCI). (2-2) Cr. 3. Alt. F., offered even-numbered years.
Prereq: Graduate-student standing in the mathematical or natural sciences or engineering; basic programming knowledge
Introduction to visualizing scientific information with 3D computer graphics and their foundation in human perception. Overview of different visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, and engineering). Class project in interactive 3D visualization using the ParaView, Mayavi, TVTK, VTK or a similar system.

COM S 559: Security and Privacy in Cloud Computing
(Cross-listed with CPR E). Cr. 3.
Prereq: COM S 352 or CPR E 308, and COM S 486 or CPR E 489 or CPR E 530
Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects.

COM S 560: Data-Driven Security and Privacy
(Cross-listed with CPR E, INFAS). Cr. 3. Alt. S., offered irregularly.
Prereq: CPR E 531; COM S 474 or COM S 573
Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms.

COM S 561: Principles and Internals of Database Systems
(Dual-listed with COM S 461). (3-1) Cr. 3.
Prereq: COM S 311, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor
Database design including entity-relationship model, relational data model, and non-relational data models, data dependency, and normalization. Database management including physical storage, access methods, query processing, and transaction management. Database systems of special purposes such as spatial databases, mobile object databases, and multimedia databases. Introduction to current database research such as cloud data management and Internet information retrieval.

COM S 567: Bioinformatics I (Bioinformatics Algorithms)
(Cross-listed with BCB, CPR E). (3-0) Cr. 3.
Prereq: COM S 228; COM S 330; credit or enrollment in BIOL 315, STAT 430
Introduction to the biological and computational aspects of bioinformatics and computational biology.

COM S 568: Bioinformatics II (Statistical Bioinformatics)
(Cross-listed with BCB, GDCB, STAT). (3-0) Cr. 3. S.
Prereq: BCB 567 or (BIOL 315 and STAT 430), credit or enrollment in GEN 409
Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models.
COM S 569: Bioinformatics III (Structural Bioinformatics)  
(Cross-listed with BBMB, BCB, CPR E, GDCB). (3-0) Cr. 3. F.  
**Prereq:** BCB 567, BBMB 316, GEN 409, STAT 430  

COM S 570: Bioinformatics IV (Systems Biology)  
(Cross-listed with BCB, CPR E, GDCB, STAT). (3-0) Cr. 3. S.  
**Prereq:** BCB 567 or COM S 311, COM S 228, GEN 409, STAT 430  

COM S 572: Principles of Artificial Intelligence  
(Dual-listed with COM S 472). (3-1) Cr. 3.  
**Prereq:** COM S 311, STAT 330 or STAT 305, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor  
Specification, design, implementation, and selected applications of intelligent software agents and multi-agent systems. Computational models of intelligent behavior, including problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction. Reactive, deliberative, rational, adaptive, learning and communicative agents and multiagent systems. Artificial intelligence programming. Research project and written report required for graduate credit.

COM S 573: Machine Learning  
(3-1) Cr. 3.  
**Prereq:** Graduate standing or permission of instructor  
Basic principles, techniques, and applications of machine learning. Design, analysis, implementation, and applications of learning algorithms. Selected machine learning techniques in supervised learning, unsupervised learning, and reinforcement learning, including Bayesian decision theory, computational learning theory, decision trees, linear models, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, clustering algorithms, dimensionality reduction and feature selection. Selected applications in data mining and pattern recognition.

COM S 574: Introduction to Machine Learning  
(Dual-listed with COM S 474). (3-1) Cr. 3.  
**Prereq:** COM S 311, STAT 330 or STAT 305, MATH 165, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor  
Introduction to tools and techniques of machine learning for applications. Selected machine learning techniques in practical data mining for classification, regression, and clustering, e.g., association rules, decision trees, linear models, Bayesian learning, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, and clustering algorithms. Selected applications in data mining and pattern recognition.

COM S 575: Computational Perception  
(Cross-listed with CPR E, HCI). (3-0) Cr. 3. S.  
**Prereq:** Graduate standing or permission of instructor  
Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

COM S 577: Problem Solving Techniques for Applied Computer Science  
(Dual-listed with COM S 477). (3-0) Cr. 3.  
**Prereq:** COM S 228; COM S 230 or CPR E 310, MATH 166, MATH 207 or MATH 317, or consent of the instructor; for graduate credit: graduate standing or permission of instructor  
Selected topics in applied mathematics, algorithms, and geometry that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Homogeneous coordinates and transformations, perspective projection, rotations in space, quaternions, polynomial interpolation, roots of polynomials and polynomial systems, solution of linear and nonlinear equations, parametric and algebraic curves, curvature, torsion, Frenet formulas, surfaces, principal curvatures, Gaussian and mean curvatures, geodesics, approximation, Fourier series and fast Fourier transform, linear programming, data fitting, least squares, simplex method, nonlinear optimization, Lagrange multipliers, calculus of variations. Programming components. Scholarly report required for graduate credit.
COM S 581: Computer Systems Architecture
(Cross-listed with CPR E). (3-0) Cr. 3. F.
Prereq: CPR E 381
Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

COM S 583: Reconfigurable Computing Systems
(Cross-listed with CPR E). (3-0) Cr. 3.
Prereq: Background in computer architecture, design, and organization
Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

COM S 586: Computer Network Architectures
(3-0) Cr. 3.
Prereq: COM S 511, COM S 552 or CPR E 489
Design and implementation of computer communication networks: layered network architectures, local area networks, data link protocols, distributed routing, transport services, network programming interfaces, network applications, error control, flow/congestion control, interconnection of heterogeneous networks, TCP/IP, software-defined networking and network security.

COM S 587: Network Programming, Applications, and Research Issues
(Dual-listed with COM S 487). (3-0) Cr. 3.
Prereq: COM S 352 or CPR E 489 or equivalent; for graduate credit: graduate standing or permission of instructor
Programming paradigms for building distributed and networking applications, including multithreaded client-server programming, socket programming, distributed object frameworks and programming suites, and web computing and security. Introduction to some on-going research issues in distributed and networking applications, including peer-to-peer computing, multimedia communications, and mobile computing and networking. Written report and oral presentation required for graduate credit.

COM S 590: Special Topics
Cr. arr. Repeatable.
Prereq: Permission of instructor
Special Topics in Computer Science.

COM S 592: Research Colloquia
Cr. 1.
Prereq: Graduate classification
Attend Computer Science Research Colloquia. Written summary is required. Offered on a satisfactory-fail basis only.

COM S 598: Graduate Internship
Cr. R. Repeatable.
Prereq: Graduate Classification
Supervised internship working in professional settings appropriate to the student’s degree program. Academic work under faculty supervision.

COM S 599: Creative Component
Cr. 1-3.
Creative component for nonthesis option of Master of Science degree. Offered on a satisfactory-fail basis only.

Courses for graduate students:

COM S 610: Seminar
Cr. arr.
Seminar in Computer Science. Offered on a satisfactory-fail basis only.

COM S 611: Advanced Topics in Analysis of Algorithms
(3-0) Cr. 3. Repeatable.
Prereq: COM S 511, COM S 531
Advanced algorithm analysis and design techniques. Topics include, but are not limited to, graph algorithms, geometric algorithms, approximation algorithms, fixed-parameter algorithms, randomized algorithms and advanced data structures. Content varies by semester.

COM S 612: Distributed Algorithms
(3-0) Cr. 3.
Prereq: COM S 511 or COM S 531

COM S 626: Parallel Algorithms for Scientific Applications
(Cross-listed with CPR E). (3-0) Cr. 3.
Prereq: CPR E 526
Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.
COM S 631: Advanced Topics in Computational Complexity
(3-0) Cr. 3. Repeatable.
Prereq: COM S 531
Advanced study in the quantitative theory of computation. Time and space complexity of algorithmic problems. The structure of P, NP, PH, PSPACE, and other complexity classes, especially with respect to resource-bounded reducibilities and complete problems. Complexity relative to auxiliary information, including oracle computation and relativized classes, randomized algorithms, advice machines, Boolean circuits. Kolmogorov complexity and randomness. Novel models of computation emerging in a rapidly changing field.

COM S 633: Advanced Topics in Computational Randomness
(3-0) Cr. 3. Repeatable.
Prereq: COM S 531

COM S 634: Theory of Games, Knowledge and Uncertainty
(3-0) Cr. 3.
Prereq: COM S 230
Fundamentals of Game Theory: individual decision making, strategic and extensive games, mixed strategies, backward induction, Nash and other equilibrium concepts. Discussion of Auctions and Bargaining. Repeated, Bayesian and evolutionary games. Interactive Epistemology: reasoning about knowledge in multiagent environment, properties of knowledge, agreements, and common knowledge. Reasoning about and representing uncertainty, probabilities, and beliefs. Uncertainty in multiagent environments. Aspects and applications of game theory, knowledge, and uncertainty in other areas, especially Artificial Intelligence and Economics, will be discussed.

COM S 641: Advanced Topics in Programming Language Semantics
(3-0) Cr. 3. Repeatable.
Prereq: COM S 531, COM S 541
Operational and other mathematical models of programming language semantics. Type systems and their soundness. Applications of semantics on areas such as program correctness, language design or translation.

COM S 652: Advanced Topics in Distributed Operating Systems
(3-0) Cr. 3. Repeatable.
Prereq: COM S 552
Concepts and techniques for network and distributed operating systems: communications protocols, processes and threads, name and object management, synchronization, consistency and replications for consistent distributed data, fault tolerance, protection and security, and distributed file systems. Research project.

COM S 657: Advanced Topics in Computer Graphics
(3-0) Cr. 3. Repeatable, maximum of 2 times.
Prereq: COM S 228, I E 557/M E 557/CPR E 557/COM S 557

COM S 661: Advanced Topics in Database Systems
(3-0) Cr. 3. Repeatable.
Prereq: COM S 461 or COM S 561
Advanced topics chosen from the following: database design, data models, query systems, query optimization, incomplete information, logic and databases, multimedia databases; temporal, spatial and belief databases, semistructured data, concurrency control, parallel and distributed databases, information retrieval, data warehouses, wrappers, mediators, and data mining.

COM S 665: Advanced Topics in Software Engineering
Prereq: COM S 511
Advanced topics on software repository analysis, data mining and software engineering, software engineering for context-aware and situation-aware computing, distributed development, product lines, safety, security, and reliability, and traceability. Content varies by semester. Maximum 6 credits of COM S 665 may apply toward graduation.

Prereq: COM S 511
Advanced topics on theoretical and technical foundations in Software Engineering. Content varies by semester. Maximum 6 credits of COM S 665 may apply toward graduation.
COM S 665B: Advanced Topics in Software Engineering: Empirical
Cr. 3. Repeatable, maximum of 6 credits.
Prereq: COM S 511
Advanced topics on empirical studies on human factors and other software engineering topics. Content varies by semester. Maximum 6 credits of COM S 665 may apply toward graduation.

COM S 672: Advanced Topics in Computational Intelligence
(3-0) Cr. 3. Repeatable.
Prereq: COM S 572 or COM S 573 or COM S 472 or COM S 474
Selected topics in probabilistic graphical models, causal inference, semantic web, information retrieval, natural language processing, knowledge representation and reasoning, deep learning, embedding, distributed learning, incremental learning, multi-task learning, multi-strategy learning, multi-relational learning, modeling the internet and the web, automated scientific discovery, neural and cognitive modeling. Advanced applications of artificial intelligence in bioinformatics, distributed systems, natural language, multimedia data, decision making, robotics, and more.

COM S 673: Advanced Topics in Computational Models of Learning
(3-0) Cr. 3. Repeatable.
Prereq: COM S 572 or COM S 573 or COM S 472 or COM S 474
Advanced topics in machine learning. Selected topics in computational learning theory, Bayesian and information theoretic models (ML, MAP, MDL, MML), probabilistic graphical models, statistical relational learning, reinforcement learning, and deep learning.

COM S 681: Advanced Topics in Computer Architecture
(Cross-listed with CPR E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: CPR E 581. Repeatable with Instructor permission
Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

COM S 699: Research
Cr. arr. Repeatable.
Prereq: Approval of instructor
Research. Offered on a satisfactory-fail basis only.

Criminal Justice Studies

The Criminal Justice Studies program in the College of Liberal Arts and Sciences offers a Bachelor of Arts degree and a minor in Criminal Justice Studies.

Students in this major will learn about the components of the juvenile and criminal justice systems, become acquainted with the issues affecting these systems, apply theoretical concepts to real-world phenomena, interface with criminal justice and social service providers, and plan an academic and/or applied career in criminal justice.

Graduates of this program will:

- Understand theories of crime, victimization, and criminal justice (i.e., theories about social bonds, learning, social control, conflict, labeling, rehabilitation, alternatives to incarceration).
- Think critically about crime, victimization, and criminal justice (i.e., be able to apply, critique, compare, and integrate knowledge in the area).
- Understand how race/ethnicity, gender, wealth, and power are related to crime, victimization, and criminal justice.
- Understand and be able to use basic social science research methods, as well as those most relevant to the study of crime, victimization, and criminal justice.
- Be familiar with career paths in the criminal justice system, and make career choices that best fit their career interests.
- Make appropriate decisions, think creatively and be able to express themselves in written and oral communication to supervisors and clients.

Communication Proficiency: Majors must complete both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition. (According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.) In addition, majors must also take an advanced course in ENGL 302 Business Communication or ENGL 309 Proposal and Report Writing or ENGL 314 Technical Communication with a grade of C or better.

General Education Coursework:

Students must select from a variety of LAS approved general education courses in each area listed below. A full list of approved courses can be found at https://las.iastate.edu/students/academics/general-education/.

| Arts and Humanities | 12 |
| Math | 3 |
| Natural Sciences | 8 |
| Social Sciences | 9 |

Total Credits 32

A program of study that meets the needs and interests of the student and departmental requirements will be developed in consultation with the major adviser. Students must maintain a GPA of 2.0 or higher in their core courses. Program of study will include:

- **Fall**
  - SOC 115 Orientation to Sociology 1
  - CJ ST 240 Introduction to the U.S. Criminal Justice System 3
  - CJ ST 241 Youth and Crime 3
  - CJ ST 340 Deviant and Criminal Behavior 3
  - CJ ST 341 Criminology 3
  - CJ ST 402 White-Collar Crime 3
    or CJ ST 403 Criminal Offenders 3
  - CJ ST 460 Criminal and Juvenile Justice Practicum 3

- **Spring**
  - ENGL 250 3
  - CJ ST 241 3
  - Social Science choice 3
  - Natural Science choice 3
  - Humanities choice 3

Credits: 14

**Sophomore**

- **Fall**
  - CJ ST 340 3
  - World Languages and Cultures 3
  - Humanities choice 3
  - Natural Science 3
  - Elective 3

- **Spring**
  - CJ ST 341 3
  - World Languages and Cultures 3
  - Humanities choice 3
  - Natural Science 3
  - Elective 3

Credits: 16

**Junior**

- **Fall**
  - CJ ST 402 or 403 (or CJ ST 406X) 3
  - ENGL 302 or 309 or 314 3
  - Social Science choice 3
  - Natural Science 2
  - Elective 3

- **Spring**
  - CJ ST 320 or CJ ST 332 or CJ ST 406X 3
  - CJ ST 339 3
  - CJ ST 351 3
  - CJ ST 352 3
  - CJ ST 402 3
  - CJ ST 404X 3
  - CJ ST 405X 3
  - CJ ST 406X 3
  - CJ ST 410 3

Credits: 15

**Senior**

Total Credits: 120

The Criminal Justice Studies minor offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in the criminal justice field.

Students who declare a minor in Criminal Justice Studies are required to complete 18 total credits. Students may do up to nine credits of CJ ST 460 but only three of those credits may be applied to the minor. Nine credits must be at the 300 or 400 level. Students must have a minimum grade point average of 2.0 in courses for the minor.

Total Credits: 18

Courses primarily for undergraduates:

**CJ ST 220: Introduction to Forensic Science**
(Cross-listed with ENT). (3-0) Cr. 3. S.
Prereq: none
Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced.

**CJ ST 240: Introduction to the U.S. Criminal Justice System**
(3-0) Cr. 3. F.
Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

**CJ ST 241: Youth and Crime**
(Cross-listed with SOC). (3-0) Cr. 3. F.
An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents’ rights, and traditional and alternative ways of dealing with juvenile crime.

**CJ ST 320: American Judicial Process**
(Cross-listed with POL S). (3-0) Cr. 3. S.
Prereq: POL S 215
An overview of the American judicial process. Emphasis on specific topics such as application of constitutional rights to the states (particularly the Fourth, Fifth, Sixth, and Fourteenth Amendments), mechanics of judicial opinions, constitutional philosophies of Supreme Court Justices, decisions of first impression, and the value and scope of precedent.

**CJ ST 332: Philosophy of Law**
(Cross-listed with PHIL). (3-0) Cr. 3. F.S.
Prereq: PHIL 201 or PHIL 230
Extent of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility.

**CJ ST 339: Liberty and Law in America**
(Cross-listed with PHIL, POL S). (3-0) Cr. 3. Alt. S., offered irregularly.
Prereq: Sophomore status
Competing conceptions of liberty in American political thought. Debates about how liberty should be protected by the law, in fields such as health care, drugs, property, speech, religion, and sex.

**CJ ST 340: Deviant and Criminal Behavior**
(Cross-listed with SOC). (3-0) Cr. 3. S.SS.
Prereq: SOC 134 or CJ ST 240
Theory and research on the etiology of types of social deviance; issues relating to crime, antisocial behavior and social policies designed to control deviant behavior.

**CJ ST 341: Criminology**
(3-0) Cr. 3. F.
Prereq: CJ ST 240
The nature of crime and criminology; the concept of crime; statistics and theories of criminality; major forms of crime; official responses to crime and control of crime.

**CJ ST 351: Police and Society**
(3-0) Cr. 3. F.S.
Prereq: CJ ST 241, SOC 241 or CJ ST 240
Introduction and overview of law enforcement in the United States. Theory and research on police history, function, and organization; constitutional issues of policing; and critical topics, such as community policing, officer discretion and decision-making, corruption, use of force, and racial profiling. The course illustrates the interconnections between communities, police organizations, citizens, and criminal offenders.
CJ ST 352: Punishment, Corrections, and Society
(3-0) Cr. 3. F.S.
Prereq: CJ ST 241, SOC 241 or CJ ST 240
Introduction and overview of corrections in the United States. Theory and research on probation, parole, intermediate sanctions, prison, inmate society, inmate behavior and misconduct, capital punishment, recidivism, correctional treatment, rehabilitation, and offender reintegration into society.

CJ ST 402: White-Collar Crime
(3-0) Cr. 3. S.
Prereq: CJ ST 241, SOC 241 or CJ ST 240
Introduction and overview of white-collar crime as a form of deviance. Theory and research on occupational, corporate, and organizational offending; prevalence, costs, and consequences of white-collar crime; predictors and correlates of white-collar crime; and political, business, and public policy responses to white-collar crime.

CJ ST 403: Criminal Offenders
(3-0) Cr. 3. F.S.
Prereq: CJ ST 240 or CJ ST 241
Introduction and overview of criminal offenders. Theory and research on epidemiology, offender typologies, etiology of violence, recidivism, societal costs, correctional supervision, treatment, and prevention of serious antisocial behavior.

CJ ST 410: Capital Punishment
(3-0) Cr. 3.
Prereq: CJ ST 240
History, philosophy, demographics, administration, and punishment rationales of capital punishment in the United States from its founding to the present. Methods of execution and trends in public opinion about the death penalty. Examination of correlates of capital offending and criminological characteristics of persons who are sentenced to death.

CJ ST 460: Criminal and Juvenile Justice Practicum
(Cross-listed with SOC). Cr. 3-12. Repeatable, maximum of 12 credits. F.S.SS.
Prereq: Junior or senior classification; permission of criminal justice studies coordinator; major or minor in criminal justice or sociology
Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor's office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency. Assessed service learning component. Offered on a satisfactory-fail basis only. No more than a total of 9 credits of 460 can be counted toward graduation. No credits in Soc 460 may be used to satisfy minimum sociology requirements for sociology majors.

CJ ST 484: Topical Studies in Criminal and Juvenile Justice
(3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: 6 credits in CJ ST and permission from instructor
Thematic or topical issues and studies dealing with the sociology of police, judiciary, institutional and community-based corrections, gender/ethnicity and crime/delinquency, criminal and delinquent gangs, and crime and delinquency prevention.

Earth Science

The Earth Science major is a program leading to the bachelor of arts or bachelor of science.

The bachelor of arts emphasizes an interdisciplinary field and prepares the student primarily for a career in secondary education. Apart from the required and supporting coursework listed below, the B.A. program must satisfy the requirements of the Teacher Education Program. The B.S. program provides a broad overview of geology and supporting sciences. This degree pathway is also suitable for students who may want to pursue a career in secondary education or continue on to graduate school. If a student chooses this option and is interested in secondary education, they should contact Dr. Cinzia Cervato for additional guidance.

Required courses for the B.A. include:

### Earth Science, B.S.

Potential pathway for the B.S. in Earth Science degree:

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check [http://www.registrar.iastate.edu/courses/div-ip-guide.html](http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level in addition to the LAS world language and cultures requirement. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher.

Choice depends on whether American History (humanities) or American Government (Social Science) was chosen earlier.

Choose from list of approved courses available from an adviser.

Choose from list of approved courses available from an adviser or departmental office.

Economics

www.econ.iastate.edu (http://www.econ.iastate.edu)

The Department of Economics offers coursework for Bachelor of Science degrees in three majors: Agricultural Business, Business Economics, and Economics. The department also offers a minor in Agricultural Business and a minor in Economics. Qualified Agricultural Business majors may choose to enhance and customize their degree with focused coursework in the Ivy College of Business in one of three business options: finance, marketing, or supply chain management. In addition, the department participates in four interdepartmental programs: international agriculture and global resources systems offered by the College of Agriculture and
Life Sciences, and international studies and women's studies offered by the College of Liberal Arts and Sciences. For further discussion of programs in Agricultural Business, see the statement below under College of Agriculture and Life Sciences. For programs in Business Economics, see the statement below under Ivy College of Business. For programs in Economics, see the statement below under College of Liberal Arts and Sciences.

Graduates of the Department of Economics acquire skills that distinguish them from other graduates. Economics teaches the abilities to think and reason clearly, to address complex issues using tools and decision-making models of economics, mathematics, and statistics, as well as concepts from the biological, physical, and social sciences. The study of economics also helps students to develop an understanding of the interaction of technology, human activity, and the environment, to apply economic and business concepts associated with making “optimal” choices among economic alternatives, and to communicate concepts and findings to industry professionals, organizations, governments, and the general public.

Economics provides a foundation for graduate work in law, economics, and business. It also provides students the tools of critical analysis and human relations skills that are essential for being informed citizens and getting and keeping meaningful employment.

1. College of Agriculture and Life Sciences

1.1. Major - Agricultural Business

The major in Agricultural Business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the Ivy College of Business or in the College of Agriculture and Life Sciences or that emphasize specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service. A double major in Agricultural Business and Economics is permitted. A double major in Agricultural Business and Business Economics is not permitted. A major in Agricultural Business with a minor in Economics is not permitted, and minors in both Agricultural Business and Economics are not permitted.

Customization of the Agricultural Business major is possible. Students may request to pursue one of three business options in finance, marketing, or supply chain management. Electing a business option does not change the overall requirements of the Agricultural Business major. Eligibility and coursework requirements for business options are maintained and approved by the Department of Economics and details are available on the department website.

The major in Agricultural Business requires a minimum of 120 credits and a GPA of 2.00 or higher. Only 65 credits (which may include up to 16 technical credits) from a two-year institution may apply to the degree. At least 18 credits must be earned from courses taught by the Department of Economics at ISU, with at most 9 P-NP credits of free electives. The major in agricultural business requires:

**International Perspective:** 3 cr. from approved course list (http://tinyurl.com/bzbnwy9).

**U.S. Diversity:** 3 cr. from approved course list (http://tinyurl.com/atq6kpj).

**Communication/Library:** 13 cr.

- **ENGL 150** Critical Thinking and Communication 3
- **ENGL 250** Written, Oral, Visual, and Electronic Composition 3

One of the following 3

- **ENGL 302** Business Communication
- **ENGL 309** Proposal and Report Writing
- **ENGL 314** Technical Communication

One of the following 3

- **SP CM 212** Fundamentals of Public Speaking
- **AGEDS 311** Presentation and Sales Strategies for Agricultural Audiences

**LIB 160** Information Literacy 1

Communication Proficiency Requirement: A grade of C or better in ENGL 250, a C or better in either ENGL 150 or (ENGL 302 or ENGL 309 or ENGL 314), and a C or better in the speech fundamentals course (SP CM 212 or AGEDS 311).

Total Credits 13

**Humanities and Social Sciences:** 6 cr.

- **ECON 102** Principles of Macroeconomics 3

Three credits from approved course list (www.agstudent.iastate.edu/humanities.htm). 3

**Ethics:** 3 cr. from approved course list: https://www.cals.iastate.edu/student-services/ethics

**Life Sciences:** 6 cr.

One of the following 3

- **BIOL 101** Introductory Biology
- **BIOL 211** Principles of Biology I

Three credits from approved course list (www.agstudent.iastate.edu/life_science.htm). 3

Total Credits 6
Economics

Mathematics: 13-14 cr.
One of the following
- MATH 160 Survey of Calculus
- MATH 165 Calculus I

One of the following
- ECON 207 Applied Economic Optimization
- MATH 166 Calculus II
- STAT 226 Introduction to Business Statistics I
- STAT 326 Introduction to Business Statistics II

Physical Sciences: 5 cr.
- CHEM 163 College Chemistry
- & 163L and Laboratory in College Chemistry
- PHYS 111 General Physics

Or
- MATH 160 Survey of Calculus
- MATH 165 Calculus I
- ECON 207 Applied Economic Optimization

General Economics: 9-10 cr.
- ECON 101 Principles of Microeconomics
- ECON 301 Intermediate Microeconomics
- One of the following
  - ECON 302 Intermediate Macroeconomics
  - ECON 353 Money, Banking, and Financial Institutions
- ECON 492 Graduating Senior Survey

Business and Agricultural Business: 29 cr.
- ACCT 284 Financial Accounting
- FIN 301 Principles of Finance
- Six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.
- ECON 110 Orientation in Agricultural Business
- ECON 235 Introduction to Agricultural Markets
- ECON 292 Career Seminar
- Nine credits of ECON 230-289, 300-389, 400-489 courses.
- Three credits of 400-489 level ECON courses.

Electives: 22-24 cr.
Agricultural Business majors seeking a double major in Economics must take an additional 9 credits of economics courses beyond those required for the Economics major for a total of 47 economics credits, and must earn a minimum GPA of 2.0 across ECON 101
Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics and ECON 302 Intermediate Macroeconomics, with no grade in these lower than a C-

2. Ivy College of Business
2.1. Major - Business Economics
The Business Economics major combines training in economics with exposure to applied business skills, including analytics. Graduates from this major are well-suited for employment in upper level management and public service positions and have solid preparation for graduate studies in law, economics, and in Master of Business Administration (MBA) programs. A double major in Business Economics and Agricultural Business is not permitted. A double major in Business Economics and Economics is not permitted. A major in Business Economics with a minor in Economics is not permitted. For the undergraduate curriculum in business economics, see Ivy College of Business Business Economics Major or visit the Ivy College of Business web site at http://www.business.iastate.edu/.

3. College of Liberal Arts and Sciences
3.1. Major - Economics
The Economics major prepares students for advanced studies, for professional degrees such as law and business administration, and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service. Candidates for the Bachelor of Science degree with a major in Economics must fulfill requirements established by the College of Liberal Arts and Sciences. For details of undergraduate curricula in liberal arts and sciences, see College of Liberal Arts and Sciences, Curriculum. A double major in Economics and Agricultural Business is permitted. A double major in Economics and Business Economics is not permitted. A major in Business Economics with a minor in Economics is not permitted. A minor in Economics cannot be combined with a major in Agricultural Business, and minors in both Agricultural Business and Economics are not permitted.

Students majoring in economics are required to take the following courses within the General Education Area of Natural Sciences and Mathematical Disciplines:

Choose one of the following pairs:
- MATH 165 Calculus I
- MATH 166 and Calculus II
- MATH 165 Calculus I
- & ECON 207 and Applied Economic Optimization*
- MATH 160 Survey of Calculus
- & ECON 207 and Applied Economic Optimization (*)

*Students who plan to take postgraduate work in economics should take MATH 165 and MATH 166.

Choose one of the following pairs:
- STAT 226 Introduction to Business Statistics I
- & STAT 326 and Introduction to Business Statistics II
Students must complete the following courses in economics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 101</td>
<td>Principles of Microeconomics</td>
<td>3</td>
</tr>
<tr>

<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 301</td>
<td>Intermediate Microeconomics</td>
<td>3-4</td>
</tr>
<tr>
<td>ECON 302</td>
<td>Intermediate Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 371</td>
<td>Introductory Econometrics</td>
<td>4</td>
</tr>
<tr>
<td>ECON 492</td>
<td>Graduating Senior Survey</td>
<td>R</td>
</tr>
</tbody>
</table>

Three credits of ECON 230-289, 300-389, 400-489 courses.

Nine credits of 400-489 level ECON courses.

Communication Proficiency Requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. In addition, the Economics major requires a grade of C or better in ENGL 302 or ENGL 314.

A minimum of 18 credits of economics coursework must be earned at Iowa State University. Economics majors must earn a minimum GPA of 2.0 across ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics, with no grade in these lower than a C-.

Communications Proficiency Requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. In addition, the Economics major requires a grade of C or better in ENGL 302 or ENGL 314.

Optimal progress for an economics major would be to complete the principles sequence.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<tr>
<td>or ECON 207</td>
<td>Applied Economic Optimization</td>
<td></td>
</tr>
</tbody>
</table>

The freshman-year sequences should be followed in the sophomore year by the intermediate theory sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 301</td>
<td>Intermediate Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>&amp; ECON 302</td>
<td>and Intermediate Macroeconomics</td>
<td></td>
</tr>
</tbody>
</table>

STAT 226 Introduction to Business Statistics I and STAT 326 Introduction to Business Statistics II are recommended in the sophomore year.

4. Learner Outcome Goals

The Department of Economics at Iowa State University has general goals for its B.S. graduates. These goals are for students to be able to solve problems and think critically, engage in economic reasoning, demonstrate leadership skills, communicate effectively, make ethical decisions, understand the environmental impacts of human activities, meet the challenges of living and working in a culturally diverse and global community, develop a capacity for innovativeness and creativity, and value the importance of life-long learning. Regarding each of these general goals, there are more specific additional goals, namely:

1. Problem Solving/Critical Thinking:
   a. Distinguish factual statements from opinions or value judgments.
   b. Summarize, analyze, and interpret research data and policy issues.
   c. Distinguish causal relationships from correlations.
   d. Determine the accuracy of statements.
   e. Understand the usefulness of abstractions and models.
   f. Identify assumptions and detect bias.
   g. Critically evaluate their arguments and those of others.
   h. Distinguish relevant information from irrelevant information.
   i. Establish priorities.
   j. Apply a holistic approach to solving complex, issue-laden, problems.

2. Economic Reasoning:
   a. Distinguish positive (‘what is’) from normative (‘what should be’) economics.
   b. Determine the opportunity cost of alternatives.
   c. Apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues.
   d. Identify the conditions under which markets allocate resources efficiently or markets fail.
   e. Apply marginal economic analysis to solve problems.
   f. Conduct comparative static analyses.
   g. Pose and test hypotheses.
   h. Use scientific methods to identify optimal choices among economic alternatives.
   i. Identify decision-makers, objectives, choice variables, incentives, and constraints.
   j. Understand how conclusions depend on assumptions.

3. Leadership:
a. Organize, facilitate, and participate effectively in a group, team, or organization.
b. Define a problem or opportunity, implement an action planning process, work toward a goal and justify actions taken.

4. Professional, Interpersonal and Cross-cultural Communications:
   a. Communicate economic and business concepts to professionals, organizations, governments, and the general public.
   b. Obtain information by accessing electronic or traditional media, listening, or by observation.
   c. Read, listen, observe and reflect.
   d. Speak and write clearly and persuasively.
   e. Prepare and present effective visual, oral, written, and electronic presentations.

5. Ethics:
   a. Define and assess their ethical perspectives, sense of moral responsibility, and values.
   b. Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

6. Environmental Awareness:
   a. Explain the physical and biological interactions within ecosystems.
   b. Explain how human activities impact the environment and how societies are affected by environmental change.

7. International/Multi-Cultural Awareness:
   U.S. Diversity – Students should achieve two of the following outcomes:
   a. Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
   b. Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
   c. Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
   d. Analyze how cultural diversity and cooperation among social groups affect U.S. society.

   International Perspectives – Students should achieve two of the following outcomes:
   a. Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
   b. Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
   c. Analyze and evaluate the influence of global issues in their own lives.
   d. Describe the values and perspectives of cultures other than their own and discuss how the influence individuals’ perceptions of global issues or events.
   e. Communicate competently in a second language.

8. Entrepreneurship:
   a. Demonstrate innovativeness and creativity regardless of context.
   b. Identify and pursue opportunities that produce value.
   c. Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

9. Life-long Learning:
   a. Articulate how continued learning after graduation will enrich their lives.
   b. Identify and participate in new areas for learning beyond the classroom and after graduation.

1. College of Agriculture and Life Sciences

1.1. Minor - Agricultural Business
Courses to be included in the minimum of 15 credits include the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 101</td>
<td>Principles of Microeconomics</td>
<td>3</td>

Also see Agricultural Business.

### Graduate Study

The department offers work toward the degrees master of science and doctor of philosophy with majors in economics and agricultural economics. The department also offers minors to students with majors in other departments. Visit our web site at www.econ.iastate.edu (http://www.econ.iastate.edu).

Students do not need to have an undergraduate major in economics or agricultural economics in order to qualify for graduate work in the department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, calculus, and matrix algebra. Some background in Math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree master of science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree master of science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of coursework, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the individual’s committee. Subject to staffing constraints, the department offers coursework to support the following fields of concentration: applied econometrics, agricultural economics, financial economics, industrial organization, international economics, human resources, macroeconomics, and environmental and resource economics. Each student must complete advanced courses in microeconomic and macroeconomic theory, quantitative methods and econometrics, and two fields from the list above. Students must demonstrate competence in theory by passing qualifying examinations. Students must also participate in workshops.

### Courses primarily for undergraduates:

#### ECON 101: Principles of Microeconomics

(3-0) Cr. 3. F.S.S.

---

<sup>a</sup> MATH 165 (Calculus I) and MATH 166 (Calculus II) may be substituted for MATH 160 and ECON 207.

<sup>b</sup> STAT 341 (Introduction to Theory of Probability & Stats I) and STAT 342 (Introduction to Theory of Probability & Stats II) may be substituted for STAT 226 and 326.
ECON 101H: Principles of Microeconomics: Honors  
(3-0) Cr. 3.  
Prereq: Honors program students only  

ECON 101L: Laboratory in Principles of Microeconomics  
(0-2) Cr. 1. F.  
Prereq: Concurrent enrollment in the appropriate section of ECON 101  
Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

ECON 102: Principles of Macroeconomics  
(3-0) Cr. 3. F.S.SS.  
Prereq: ECON 101 recommended  

ECON 102H: Principles of Macroeconomics: Honors  
(3-0) Cr. 3.  
Prereq: ECON 101 recommended; admission to the Honors program.  

ECON 110: Orientation in Agricultural Business  
(1-0) Cr. 1. F.  
Orientation course for freshman and new transfer students in agricultural business.

ECON 207: Applied Economic Optimization  
(2-2) Cr. 3. F.S.  
Prereq: MATH 151, MATH 160, MATH 165 or equivalent  
Application of linear algebra, calculus and unconstrained and constrained optimization techniques to economic problems. Learning outcomes include the ability to (i) identify the objective, decision variables and constraints in economic decision problems, (ii) represent elements of an economic problem in simple mathematical models, (iii) identify and apply mathematical tools that can be used to solve the problems, (iv) identify the strengths and limitations of the solution method, and (v) interpret the economic meaning and implications of the solution.

ECON 230: Farm Business Management  
(2-2) Cr. 3. F.S.  
Prereq: ECON 101; ACCT 284  
Business and economic principles applied to decision making and problem solving in the management of a farm business. Cash flow, partial, enterprise, and whole farm budgeting. Information systems for farm accounting, analysis, and control. Obtaining and managing land, capital, and labor resources. Alternatives for farm business organization and risk management.

ECON 234: Small Business Management  
(3-0) Cr. 3.  
Prereq: ECON 101  
An introduction to small business management, entrepreneurship, and economics utilizing a series of case studies. Exploration of issues related to starting or acquiring a new business and development of knowledge and skills for successful management of a small business, with an emphasis on agricultural business.

ECON 235: Introduction to Agricultural Markets  
(3-0) Cr. 3. F.S.  
Prereq: ECON 101  
Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools.
ECON 292: Career Seminar  
(1-0) Cr. 1.  
Prereq: Classification in economics or agricultural business  
Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Only one of ECON 292, 292A, and 292B can be used toward graduation.

ECON 292A: Career Seminar: Agricultural Business  
(1-0) Cr. 1.  
Prereq: Classification in economics or agricultural business  
Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Only one of ECON 292, 292A, and 292B can be used toward graduation.

ECON 292B: Career Seminar: Economics and Business Economics  
(1-0) Cr. 1.  
Prereq: Classification in economics or agricultural business  
Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Only one of ECON 292, 292A, and 292B can be used toward graduation.

ECON 297: Internship  
Cr. 2. Repeatable, maximum of 4 credits.  
Prereq: Permission of instructor and classification in agricultural business or economics  
Students complete a research report, based on their internship or approved work experience, that examines chosen topics in management, marketing or finance. Offered on a satisfactory-fail basis only.

ECON 298: Cooperative Education  
Cr. R. Repeatable.  
Prereq: Permission of the department cooperative education coordinator; sophomore classification  
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

ECON 301: Intermediate Microeconomics  
(3-0) Cr. 3-4. F.S.S.S.  
Prereq: ECON 101; ECON 207 or MATH 166  
Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive markets; theory of demand for and supply of factors of production; general equilibrium analysis. Recitation required for 4 credits.

ECON 301H: Intermediate Microeconomics: Honors  
(3-0) Cr. 3-4.  
Prereq: ECON 101; ECON 207 or MATH 166  
Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive markets; theory of demand for and supply of factors of production; general equilibrium analysis. Recitation required for 4 credits.

ECON 302: Intermediate Macroeconomics  
(3-0) Cr. 3. F.S.  
Prereq: ECON 101, ECON 102; MATH 160 or MATH 165  
Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation.

ECON 302H: Intermediate Macroeconomics: Honors  
(3-0) Cr. 3.  
Prereq: ECON 101, ECON 102; MATH 160 or MATH 165  
Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation.

ECON 313: Economics of Sports  
(3-0) Cr. 3.  
Prereq: ECON 101  
Application of economics to issues in sports, including franchising; rival leagues and barriers to entry; cooperative, competitive, and collusive behavior; player productivity and compensation; contracts, unions, and discrimination; antitrust, taxation, and subsidies. Economic concepts include supply and demand, labor economics, pricing, public finance, production, game theory, and industrial organization.
ECON 320: Labor Economics  
(3-0) Cr. 3.  
Prereq: ECON 101  
Economic analysis of contemporary domestic and international labor market issues including labor supply and demand, unemployment, and employment in the U.S. and elsewhere; investments in and returns to education, training, health, immigration and migration; income inequality; labor productivity; outsourcing and global competitiveness; work incentives; compensation including benefits; and labor policies such as minimum wages, overtime pay, discrimination, unions, and immigration. Examples drawn from the U.S. and other developed countries with reference to developing countries where relevant. Meets International Perspectives Requirement.

ECON 321: Economics of Discrimination  
(Cross-listed with WGS). (3-0) Cr. 3. Prereq: ECON 101  

ECON 330: Advanced Farm Business Management  
(3-0) Cr. 3. Prereq: ECON 230  
Effective use of strategic planning, decision methods, and computer assistance for solving farm problems. Applications of economic and management theory to analyze farm business decisions using efficiency measures to assess current resource use and direct the farm business analysis, planning, and tax process.

ECON 332: Cooperatives  
(3-0) Cr. 3. Prereq: ECON 101  
Survey of cooperative business structure, including historical developments in the United States, principles of cooperation, state and federal authorization for cooperative activity, economic motivations and foundations, governance, marketing and pricing strategies, and financing, capitalization and taxation considerations. Students will learn how the cooperative model is applied in a variety of markets.

ECON 334: Entrepreneurship in Agriculture  
(3-0) Cr. 3. F.S. Prereq: ECON 101  
Introduction to the process of entrepreneurship within the agricultural and food sectors. Emphasis on opportunity recognition and assessment, resource acquisition and feasibility analysis for both private and social enterprises. Students will develop a comprehensive feasibility study for a new business or non-profit organization.

ECON 335: The Economics of Global Agricultural Food and Bio-energy  
(Cross-listed with GLOBE). (3-0) Cr. 3. Prereq: ECON 101  
Applied economic analysis of the determinants of world agricultural production, marketing, and use in feed, food, fiber, biofuel, and other applications, and global food processing and consumption. Analysis of market case studies and various data on global agricultural production and transformation, land and resource use, demography, economic activity, nutrition and health trends. Meets International Perspectives Requirement.

ECON 336: Agricultural Selling  
(3-0) Cr. 3. Prereq: ECON 101  
Principles of selling with application to agricultural and food related businesses. Attitudes, value systems, and behavioral patterns that relate to agricultural sales. Electronic marketing, selling strategies, preparing for sales calls, making sales presentations, handling objections, and closing sales. Analysis of the buying or purchasing process. Evaluation of agricultural selling as a possible career choice.

ECON 337: Agricultural Marketing  
(3-0) Cr. 3. Prereq: ECON 101 required, ECON 235 recommended  
Understanding of agricultural commodity markets for grain, livestock and dairy with emphasis on marketing decisions and risk management for farmers and processors. Hands-on applications of marketing and management tools via market simulations.

ECON 344: Public Finance  
(3-0) Cr. 3. Prereq: ECON 101  

ECON 353: Money, Banking, and Financial Institutions  
(3-0) Cr. 3. F.S. Prereq: ECON 101, ECON 102  
Theoretical and applied analysis of money, banking, and financial markets; interest rates and portfolio choice; the banking industry in transition; the money supply process; the Federal Reserve System and the conduct of monetary policy; macro implications of monetary policy; international finance.
ECON 355: International Trade and Finance  
(3-0) Cr. 3.  
Prereq: ECON 101, ECON 102  
Explanations of causes of international trade and the impact of trade on welfare and employment patterns. Analysis of government policies towards trade, such as tariffs, quotas, and free trade areas. Theory of balance of payments and exchange rate determination, and the role of government policies. Examination of alternative international monetary arrangements.  
Meets International Perspectives Requirement.

ECON 362: Applied Ethics in Agriculture  
(Cross-listed with SOC). (3-0) Cr. 3.  
Prereq: ECON 101 or SOC 134, junior or senior status in the College of Agriculture  
Identify major ethical issues and dilemmas in the conduct of agricultural and agribusiness management and decision making. Discuss and debate proper ethical behavior in these issues and situations and the relationship between business and personal ethical behavior.

ECON 364: Rural Property Appraisal  
(3-0) Cr. 3.  
Prereq: ECON 101  
Use of income capitalization, sales comparison and cost appraisal concepts in appraising agricultural resources. Application of underlying economic/business/management principles, especially present value, as they relate to farmland appraisal. Determination and estimation of economic impacts of special consideration and property use factors. Evaluate feasibility and profitability of investment in rural property.

ECON 371: Introductory Econometrics  
(4-0) Cr. 4. F.S.  
Prereq: ECON 301, ECON 302 OR ECON 353, STAT 326  
Introduction to the models and methods used to estimate relationships and test hypotheses pertaining to economic variables. Among the topics covered in the course are: Single and multiple regression analysis; functional forms; omitted variable analysis; multicollinearity; heteroskedasticity; autocorrelation; simultaneous equations; and dynamic models.

ECON 376: Rural, Urban and Regional Economics  
(Cross-listed with CRP). (3-0) Cr. 3.  
Prereq: ECON 101  
Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime.

ECON 378: Retirement Planning and Employee Benefits  
(Cross-listed with GERON, HD FS). (3-0) Cr. 3. S.  
Prereq: 3 credits in introductory economics  
Economic well-being in the context of demographic change, the present and future of Social Security, family retirement needs analysis, investment strategies and characteristics of retirement plans, helping others to work towards financial security, family economic issues for retired persons. Overview of employee and retirement benefits.  
Meets U.S. Diversity Requirement

ECON 380: Energy, Environmental and Resource Economics  
(Cross-listed with ENV S). (3-0) Cr. 3.  
Prereq: ECON 101  
Natural resource availability, use, conservation, and government policy, with emphasis on energy issues. Environmental quality and pollution control policies.

ECON 385: Economic Development  
(Cross-listed with GLOBE). (3-0) Cr. 3.  
Prereq: ECON 101, ECON 102  
Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid.  
Meets International Perspectives Requirement.

ECON 387: Economies of China and India  
(3-0) Cr. 3.  
Prereq: ECON 101  
The economic development of China and India within the larger historical, political, and socioeconomic contexts. The characteristics of the development paths of major industries. The drivers of and impediments for future economic development. The two economies’ connections with the world economy.  
Meets International Perspectives Requirement.
ECON 398: Cooperative Education
Cr. R.
Prereq: Permission of the department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

ECON 401: Topics in Microeconomics
(3-0) Cr. 3.
Prereq: ECON 301, STAT 226
Advanced treatment of selected topics from one or more of the following areas: household production models, factor markets, game theory and imperfect competition, general equilibrium, intertemporal choice, asset markets, income distribution, externalities and public goods, etc.

ECON 402: Topics in Macroeconomics
(3-0) Cr. 3.
Prereq: ECON 301, ECON 302, STAT 226
Advanced treatment of selected topics from one or more of the following areas: business cycle theory, growth theory, fiscal and monetary policy, coordination issues, open economy macroeconomics, and financial economics.

ECON 416: Industrial Organization
(3-0) Cr. 3.
Prereq: ECON 301
Study of the structure of firms and markets and of their interaction, with emphasis on imperfectly competitive markets. Behavior of firms in strategic settings and insights of basic game-theoretic models. Welfare implications of alternative market organizations, consequences of market power, and scope for government regulation and antitrust/competition policies. Topics include monopoly and price discrimination, oligopoly models, product quality, product differentiation, vertical integration, information and advertising, patents, R&D and innovation, and regulation.

ECON 418: Introduction to Game Theory
(3-0) Cr. 3.
Prereq: ECON 301
Systematic introduction to game theory and its uses in economics. Develops the basic framework, models and tools necessary to analyze games of strategy, including: Strategic and extensive-form representations of games; best response functions and Nash equilibrium, mixed strategies backward induction and subgame-perfect equilibrium, imperfect and incomplete information, Bayesian and sequential equilibria. Examples and applications taken from economics, business, political science, law and biology.

ECON 431: Managerial Economics
(3-0) Cr. 3.
Prereq: ECON 301
Theory of the firm; organizational incentives and efficiency; moral hazard; role of information and decision making under uncertainty; ownership and control; business investment.

ECON 435: Analysis of Food Markets
Cr. 3. S.
Prereq: STAT 226, ECON 235, ECON 301.
Food market analysis from an economics perspective; food markets and consumption; methods of economic analysis; food industry structure and organization; food and agriculture regulations; labeling; consumer concerns; agricultural commodity promotion. Final project required.

ECON 437: Commodity Marketing and Risk Management
(3-0) Cr. 3.
Prereq: ECON 235, ECON 301, STAT 326

ECON 455: International Trade
(3-0) Cr. 3.
Prereq: ECON 301
Rigorous treatment of theories of international trade and international factor movements. Examination of the impact of trade and labor migration on domestic and world welfare and on the distribution of income. Theoretical analysis of government policies towards trade and factor movements, including quotas, tariffs, free trade areas and immigration restrictions. Discussion of contemporary issues and controversies concerning globalization, including multinational firms and labor migration.
Meets International Perspectives Requirement.

ECON 457: International Finance
(3-0) Cr. 3.
Prereq: ECON 302
National income accounting and balance of payments; foreign exchange rates and exchange rate markets; money, interest rates, and exchange rate determination; prices, exchange rates, and output in the short run; international monetary arrangements; fixed versus flexible exchange rates; optimal currency areas; international capital flows; currency and financial crises in emerging markets.
Meets International Perspectives Requirement.
ECON 458: Economic Systems for Electric Power Planning
(Cross-listed with E E). (3-0) Cr. 3.
Prereq: E E 303 or ECON 301

ECON 460: Agricultural, Food, and Trade Policy
(Dual-listed with ECON 560). (3-0) Cr. 3.
Prereq: ECON 301 or ECON 501
Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macro policy, world economy, international trade, and bioenergy on U.S. agriculture.

ECON 466: Agricultural Finance
(3-0) Cr. 3.
Prereq: ECON 301, STAT 226, FIN 301 and ECON 353 (recommended)
Financial analysis of agricultural businesses; liquidity, capital structure, and growth and risk of agricultural firms; capital budgeting methods; analysis of land investments, leasing, and costs of credit; financial intermediation and major financial institutions for agriculture; borrower-lender relationships, and asset-liability management techniques by financial intermediaries; public policies affecting agricultural credit markets.

ECON 480: Intermediate Environmental and Resource Economics
(Dual-listed with ECON 580). (3-0) Cr. 3.
Prereq: ECON 301 or ECON 501

ECON 490: Independent Study
Cr. 1-5. Repeatable, maximum of 6 credits.
Prereq: Junior or senior classification, 14 credits in economics
Offered on a satisfactory-fail basis only. No more than 9 credits of Econ 490 may be used toward graduation

ECON 490E: Independent Study: Entrepreneurship
Cr. 1-5. Repeatable, maximum of 6 credits.
Prereq: Junior or senior classification, 14 credits in economics
Offered on a satisfactory-fail basis only. No more than 9 credits of Econ 490 may be used toward graduation

ECON 490H: Independent Study: Honors
Cr. 1-5. Repeatable, maximum of 6 credits.
Prereq: Junior or senior classification, 14 credits in economics
Offered on a satisfactory-fail basis only. No more than 9 credits of Econ 490 may be used toward graduation

ECON 492: Graduating Senior Survey
Cr. R.
Prereq: Graduating senior
Final preparations for graduation. The final stages of job searching, interviewing, letter writing, and resume preparation. Outcomes assessment information from graduating seniors including opinion surveys, instructor/advisor/course evaluations, exit interviews, student accomplishment surveys, job placement surveys, and comprehensive skills examinations. Departmental recognition of graduating seniors. Life as an alumnus - expectations and obligations. Convocation and commencement information. Offered on a satisfactory-fail basis only.

ECON 495: Economics Domestic Travel Course
Cr. 1-3.
Prereq: Sophomore status. Permission of instructor
Tour and study of domestic businesses, markets, and economic institutions located outside Iowa to expose students to the diversity of activities within the U.S. economy. Pre-trip sessions arranged. Locations and duration of tours will vary.

ECON 496: Economics International Travel Course
Cr. 1-3. Repeatable.
Prereq: Sophomore status; permission of instructor.
Tour and study of international agricultural and/or nonagricultural economies, markets, and institutions. Locations and duration of tours will vary. Limited enrollment. Meets International Perspectives Requirement.

ECON 498: Cooperative Education
Cr. R.
Prereq: Permission of the department cooperative education coordinator; senior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:
ECON 500: Quantitative Methods in Economic Analysis I  
(4-0) Cr. 4. F.  
Prereq: ECON 301, 1 year of calculus, STAT 401, and permission of Director of Graduate Education  
Economic applications of selected mathematical and statistical concepts: linear models and matrix algebra; differential calculus and optimization; integral calculus and economic dynamics; probability distributions, estimation, and hypothesis testing in the analysis of economic data.

ECON 501: Microeconomics  
(4-0) Cr. 4. F.  
Prereq: ECON 301, credit or enrollment in ECON 500 or equivalent background in calculus and statistics  
The theory of the consumer, theory of the firm, perfect and imperfect competition, welfare economics, and selected topics in general equilibrium and uncertainty.

ECON 502: Macroeconomics  
(4-0) Cr. 4. F.  
Prereq: ECON 302, credit or enrollment in ECON 500 or equivalent background in calculus and statistics  
Models of aggregate supply and demand, theories of consumption and investment, money supply and demand, inflation, rational expectations, stabilization policy, financial markets, and international finance.

ECON 509: Applied Numerical Methods in Economics  
(3-0) Cr. 3.  
Prereq: ECON 500, ECON 501; or ECON 600, ECON 601  
Use of numerical techniques to solve economic problems. Numerical differentiation and integration numeric solutions of systems of equations, static and dynamic optimization problems including unconstrained optimization, maximum likelihood methods, general nonlinear programming methods, dynamic programming and optimal control, numerical methods for solving functional equations.

ECON 510: Experimental Economics  
(3-0) Cr. 3.  
Prereq: ECON 501 or ECON 601  
Introduction to experimental economics and major subject areas addressed by laboratory and field experiments. Exploration of experimental methods by concentrating on series of experiments. Applications include individual decision-making, behavioral game theory, markets, behavioral labor, public and development economics, social network, and neuroeconomics. Research project.

ECON 520: Labor Supply and Human Capital Formation  
(3-0) Cr. 3.  
Prereq: ECON 501 or ECON 601  
Labor supply decisions and empirical analysis for agricultural operators and other self-employed and wage-earning households; multiple job holding; resource allocation in productive households; human capital formation by households, firms, and public institutions, which includes schooling, on-the-job training, migration, health, research, raising of children, and implications for household income and welfare; applications to problems in rural areas of developing and developed countries.

ECON 521: Labor Markets  
(3-0) Cr. 3.  
Prereq: ECON 501 or ECON 601  
Analysis of labor demand and market determination of wages and employment; analysis of distortions in labor markets due to non-competitive forces, legislation, and discrimination; wage inequality, compensation and work incentives; compensating differentials; microeconomic analysis of unemployment and job search.

ECON 532: Managerial Economics for the Global Organization  
(3-0) Cr. 3.  
Prereq: ECON 101 and enrollment in MBA or BAS program; not for economics majors  
Applications of microeconomic theory and decision analysis for firms operating in U.S. and internationally. Topics include demand & supply, consumer choice theory, production and cost theory, short run and long run business decisions, input cost and human capital differences across countries, empirical estimation of demand and supply, pricing, exchange rates, government and business, market structures and strategy.

ECON 537: Commodity Markets: Analysis and Strategy  
(3-0) Cr. 3.  
Prereq: ECON 501 or ECON 532 or ECON 601, ECON 571 or STAT 326  

ECON 545: Public Economics  
(3-0) Cr. 3.  
Prereq: ECON 501 or ECON 601  
Economic justifications for government activities; illustrative theoretical and empirical analyses of expenditure programs; foundations of excess burden, incidence analysis, and optimal taxation; effects of taxation on labor supply; public goods and externalities; social insurance; introduction to economics of the health sector with an emphasis on the role of market failures.
ECON 560: Agricultural, Food, and Trade Policy  
(Dual-listed with ECON 460). (3-0) Cr. 3.  
*Prereq: ECON 301 or ECON 501*  
Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macroeconomic policy, world economy, international trade, and bioenergy on U.S. agriculture.

ECON 571: Intermediate Econometrics  
(3-0) Cr. 3. S.  
*Prereq: ECON 500*  
Single and multiple equation regression models; dummy explanatory variables; serial correlation; heteroskedasticity; distributed lags; qualitative dependent variables; simultaneity. Use of econometric models for tests of economic theories and forecasting.

ECON 576: Spatial Economics  
(3-0) Cr. 3.  
*Prereq: ECON 501 or ECON 601*  
Analysis of location choice by firms, employees, and households emphasizing the role of spatial variations in agglomeration economies, economies of scale, distance, transport, endowments, amenities, and local government. Models of land use, urban form, spatial competition, central place theory, and migration. Techniques of discrete choice analysis, statistical analysis of categorical data, urban system modeling, and interregional computable general equilibrium.

ECON 580: Intermediate Environmental and Resource Economics  
(Dual-listed with ECON 480). (3-0) Cr. 3.  
*Prereq: ECON 301 or ECON 501*  

ECON 581: Advanced Environmental Economics  
(3-0) Cr. 3.  
*Prereq: ECON 501 or ECON 601*  

ECON 590: Special Topics  
Cr. 1-5. Repeatable.  
Offered on a satisfactory-fail basis only.

ECON 599: Creative Component  
Cr. 1-5.  
Offered on a satisfactory-fail basis only.

Courses for graduate students:

ECON 601: Microeconomic Analysis I  
(4-1) Cr. 4. F.  
*Prereq: ECON 301, previous or concurrent enrollment in 600 and permission of Director of Graduate Education*  
Economic theory and methodology; theory of consumer behavior; theory of the competitive firm; supply and factor demand; duality relations in consumer and producer theory; welfare change measures; partial equilibrium analysis, perfect competition, monopoly; choice under uncertainty, the expected utility model, risk aversion; insurance, portfolio and production decisions under risk.

ECON 602: Macroeconomic Analysis  
(4-1) Cr. 4. S.  
*Prereq: ECON 301, ECON 302, previous or concurrent enrollment in 600 and permission of Director of Graduate Education*  
Neoclassical aggregate growth models; the overlapping generations model; endogenous growth models; equilibrium business cycle theories; equilibrium job search and matching; models of money; fiscal and monetary policy; income and wealth distribution.

ECON 603: Microeconomic Analysis II  
(4-1) Cr. 4. S.  
*Prereq: ECON 601, ECON 602 and permission of Director of Graduate Education*  
General equilibrium analysis, efficiency, and welfare; market failures, externalities, and the theory of the second best; introduction to game theory; adverse selection, signaling, screening and moral hazard.

ECON 604: Advanced Macroeconomic Analysis  
(4-1) Cr. 4. F.  
*Prereq: ECON 601, ECON 602 and permission of Director of Graduate Education*  
Topics will be selected from: new Keynesian approaches to business cycle theory; endogenously generated business cycles; models of credit and financial intermediation; mechanism design and time inconsistency issues; political economy models; heterogeneous-agent models with strategic interaction; path dependence, network effects, and lock-in; economies as evolving self-organizing systems.

ECON 606: Advanced Topics in Macroeconomics  
(3-0) Cr. 3.  
*Prereq: ECON 603, and credit or current enrollment in ECON 604*  
Selected topics in macroeconomic theory of current significance to the profession.
ECON 615: Theoretical Industrial Organization
(3-0) Cr. 3.
Prereq: ECON 603
Theoretical analysis of traditional topics in industrial organization. Review of game theory. Monopoly and oligopoly theory, price discrimination, product differentiation, research and development, diffusion of innovation, network externalities, and asymmetric information.

ECON 618: Game Theory
(3-0) Cr. 3.
Prereq: ECON 603, or ECON 501 and permission of instructor
Theoretical analysis and applications of strategic games, extensive form games, and cooperative games. Nash equilibrium, correlated equilibrium, Bayesian games, subgame perfect equilibrium, the core, evolutionary equilibrium, repeated games with finite automata, and common knowledge.

ECON 641: Agricultural Economics I
(3-0) Cr. 3.
Prereq: ECON 603
Demand and supply for agricultural products, market equilibrium models, implications of government policies on the agricultural sector, evaluation of research and development policies in agriculture, and biofuel and energy policy analysis. Commodity promotion programs, food safety and consumers’ valuation of product attributes.

ECON 642: Agricultural Economics II
(3-0) Cr. 3.
Prereq: ECON 603
Advanced treatment of topics and models in agricultural economics with emphasis on stochastic models. Topics will include analysis of risk in decision making by consumers, firms and farms; analysis of risk management strategies for farmers; the economics of commodity storage; analysis of the impact of biofuels on commodity prices; and models of agricultural inputs and outputs.

ECON 655: International Trade
(3-0) Cr. 3.
Prereq: ECON 603
Theories of international trade; welfare and distributional aspects of trade and commercial policies. Optimal trade policies in the presence of domestic distortions; strategic trade policy; international trade and economic growth.

ECON 657: International Finance
(3-0) Cr. 3.
Prereq: ECON 602
The intertemporal approach to current account determination; non-traded goods and the real exchange rate; fiscal policy in the open economy; monetary approach to balance of payments and exchange rate determination; sticky price models of the open economy; exchange-rate based stabilizations; capital inflows; financial and balance of payments crises; international business cycles.

ECON 671: Econometrics I
(4-1) Cr. 4. F.
Prereq: ECON 501 and STAT 447 or STAT 542
Probability and distribution theory for univariate and multivariate normal random variables, introduction to the theory of estimators for linear models, hypothesis testing and inference, introduction to large sample properties of estimators; derivation of common estimators and their properties for the classical and general multiple regression models, hypothesis testing, forecasting, implications of specification errors - missing data, left-out regressors, measurement error, stochastic regressors.

ECON 672: Econometrics II
(4-1) Cr. 4. S.
Prereq: ECON 671
Identification, estimation, and evaluation of systems of simultaneous equations; qualitative choice and limited dependent variable models; introduction to time series methods and applications, including alternative variance specifications.

ECON 673: Microeconometrics
(3-0) Cr. 3.
Prereq: ECON 672, ECON 601
Econometric treatment of models arising in microeconometric applications. Methods are primarily concerned with the analysis of cross-section data. Topics may include: systems of demand equations in panel data settings, random utility models of discrete choices, production possibilities frontier estimation, and discrete/continuous models of participation and consumption.
ECON 674: Macroeconometrics  
(3-0) Cr. 3.  
Prereq: ECON 672, ECON 602  
Time-series econometric techniques and their application to macroeconomics and financial markets. Techniques may include GARCH and ARCH-M models, unit-root tests, nonlinear adjustment models, structural VARs, and cointegration tests.

ECON 680: Advanced Resource Economics  
(3-0) Cr. 3.  
Prereq: ECON 603  
Dynamic allocation of scarce, exhaustible, and renewable natural resources, including minerals and energy, soil, water, forests, and fish. Social versus private decisions. Market and nonmarket considerations. Technological change. Regulation. Dynamics and uncertainty.

ECON 690: Advanced Topics  
Cr. 1-5. Repeatable.  
Offered on a satisfactory-fail basis only.

ECON 691: Third-Year Paper  
Cr. 3.  
Under the direction of the major professor, Ph.D. students write a formal research paper as an introduction to the dissertation research process. Offered on a satisfactory-fail basis only.

ECON 693: Workshops  
Cr. 3.  
Workshop in economics. Offered on a satisfactory-fail basis only.

ECON 694A: Research Workshop  
Cr. 3. F.  
Prereq: Third year status in the Economics Ph.D. program or permission of instructor.  
Instruction in basic and applied research methods commonly used in economics. Survey methodologies, critique written work, summarize and evaluate data, prepare and present work orally, and develop an original research paper. Satisfactory-fail only. Offered on a satisfactory-fail basis only.

ECON 694B: Research Workshop  
Cr. 3. S.  
Prereq: Econ 694A  
Writing and communicating economic research. Continuation of Econ 694A, resulting in completion of an original research paper. Satisfactory-fail only. Offered on a satisfactory-fail basis only.

ECON 699: Research for Thesis or Dissertation  
Cr. arr. Repeatable.  
Offered on a satisfactory-fail basis only.

---

English Undergraduate Study

The English department curriculum teaches an understanding of the way the English language functions and how people use it to create and communicate. We teach all students the fundamental skills needed to succeed in college, at work, and as citizens. As one of the core disciplines in the liberal arts, English fosters critical thinking, leadership ability, and democratic engagement. Students interested in majoring in English can choose a

- BA in English (with possible emphases in Literature, Creative Writing, Literary Editing, or Rhetoric)
- BA in English with an emphasis in Teacher Education (required courses for students seeking licensure are indicated below)
- BS in English
- BS in Technical Communication.

Students interested in a BS degree in English need to complete 12 credits in addition to the general education requirements; these credits must be taken in linguistics, natural science, mathematics, social science, or selected courses in kinesiology.

Those interested in civic discourse and oral communication can also major or minor in Speech Communication. Students in secondary education can also earn an ESL endorsement through classes in the English Department.

An undergraduate major in English can be a solid basis for the professional study of law, medicine, theology, and business or careers in education, arts management, and publishing. An undergraduate major in Technical Communication can prepare students for careers in nonprofit and government communication, web design and communication consulting, software documentation, usability and user experience, and scientific and technical writing and editing.

The department also provides communication courses for students across the disciplines through the ISUComm (https://www.engl.iastate.edu/isucomm) initiative. The goal of ISUComm is to strengthen student communication and enhance students' critical thinking by creating opportunities for them to practice communication skills throughout their academic careers. These courses include ENGL 150 and 250 (ISUComm foundation courses) and ENGL 302, 309, and 314 (ISUComm advanced communication courses). These courses benefit all ISU undergraduates by addressing written, oral, visual, and electronic communication, or WOVE. WOVE prepares students for 21st-century communication activities.

As part of Iowa State's commitment to interdisciplinary study and cultural inclusiveness, English also has strong ties with African and
African American Studies, American Indian Studies, Classical Studies, Communication Studies, U.S. Latina/o Studies, Linguistics, Speech Communication, and Women’s and Gender Studies. In addition to course offerings in literature, creative writing, linguistics, speech communication, rhetoric, technical communication, and English education, the field of English Studies features strong connections with the technical, scientific, and environmental work that distinguishes Iowa State.

International students and other nonnative speakers of English can go to the Intensive English and Orientation Program (IEOP) in the department, which offers special courses in English for both undergraduate and graduate students who are native speakers of other languages. (See catalog entries under English Courses for Native Speakers of Other Languages and English Requirement for International Students.)

**English Major Requirements**

English majors are required to have, in addition to ISUComm foundation courses (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), at least 36 credits in English. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate with a major in the English Department and meet the university-wide Communication Proficiency Grade Requirement, a student must have credit for ENGL 150 Critical Thinking and Communication and earn at least a C (not C-) in ENGL 250 Written, Oral, Visual, and Electronic Composition as well as in each of the courses taken to fulfill the program of study, including one advanced communication course.

</tbody>
</table>

Fifteen credits of major requirements above must be at the 300 level.

**Nine credits of major requirements above must be at the 400 level.**

**Teacher Licensure Courses**

Students seeking teacher licensure in Teacher Education should consult their adviser for a complete list of courses that meet major requirements and specialized licensure requirements (see Teacher Education section in this catalog). Among those licensure requirements are the following additional courses in English:
ENGL 353  World Literature: Western Foundations through Renaissance  3
ENGL 397  Practice and Theory of Teaching Writing in the Secondary Schools  3
ENGL 494  Practice and Theory of Teaching Literature in the Secondary Schools  3
ENGL 417  Student Teaching  3

† Arranged with instructor.

Additional course requirements outside English for students seeking teacher licensure include the following:

EDUC 202  Educational Technologies in the 7-12 Classroom  3
EDUC 204  Social Foundations of Education in the United States: Secondary  3
EDUC 280A  Pre-Student Teaching Experience I: Core Experience  1-2
EDUC 395  Teaching Disciplinary Literacy  3
EDUC 406  Social Justice Education and Teaching: Secondary  3
EDUC 426  Principles of Secondary Education  3
SP ED 401  Teaching Secondary Students with Exceptionalities in General Education
PSYCH 230  Developmental Psychology
PSYCH 333  Educational Psychology
HIST or POL S American History or Government
SP CM 212  Fundamentals of Public Speaking or THTRE 358 Oral Interpretation

Some of these courses taken to meet licensure requirements may also meet General Education requirements for the college.

ESL Endorsement Requirements

At Iowa State University, ESL is an add-on endorsement, which means that students need to be certified in another area and to take all basic teacher preparation courses. The growing number of English learners in our public schools make the ESL endorsement a useful addition to a teaching license.

To add English as a Second Language, students must earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

ENGL 219  Introduction to Linguistics  3
ENGL 220  Descriptive English Grammar  3
ENGL 425  Second Language Learning and Teaching  3
ENGL 322  Language and Society  3
or EDUC 420  Bilingualism, Bilingual Education, and U.S. Mexican Youth
or EDUC 520  Bilingualism, Bilingual Education, and U.S. Mexican Youth
ENGL 318  Introduction to ESL methods and materials and Introduction to Teaching ESL Literacy (ENGL/LING 318, ENGL/LING 324)

OR

ENGL 324  Introduction to Teaching ESL Literacy and Teaching Methods for ESL Learners: Oral Communication Skills (ENGL/LING 324, ENGL/LING 325)

Practicum courses taken through the School of Education at ISU

EDUC 280S  Pre-Student Teaching Experience I: English as a Second Language (ESL)  1
EDUC 480S  Pre-Student Teaching Experience III: English as a Second Language (ESL)  2

Departmental Awards and Scholarships

Each spring the English Department offers many scholarships and awards for both undergraduate and graduate students. Some undergraduate awards are for returning English and Technical Communication majors only; others are for returning students of any major who demonstrate excellence in some aspect of English or technical communication. Application forms and a list of current awards are available on the English Department website and in 206 Ross Hall early in the Spring Semester. Award winners are announced each year in April.

English Minor Requirements

The minor in English prepares students in any discipline for which communication activities are needed to succeed in their professions. Minors in English will complete 15 credits beyond ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition; ENGL 250 and additional courses require a grade of C or higher (not C-). 9 of which will be at the 300 or 400 levels. Twelve of these hours must be taken at Iowa State. Up to 6 of the 15 credits taken for the minor may be used to meet other degree program requirements.

* See English Adviser for a list of courses suited to major groups A, B, C, & D and other distributed requirements that must be met.

* See English Adviser for a list of courses suited to major groups A, B, C, & D and other distributed requirements that must be met.

* Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.
The department offers graduate work leading to three Master of Arts degrees, one Master of Fine Arts degree, two Doctor of Philosophy degrees, and one TESL/TEFL Certificate. Information on application requirements and procedures for all majors is available on the Graduate Studies "How To Apply" (http://www.engl.iastate.edu/graduate-students/prospective-students/how-to-apply-2) website.

The Master of Arts (MA) degree programs offer advanced study of literature, language, and writing. The degree requires a minimum of 30 hours of graduate credit, including a final thesis or creative component (3 credits). Both the MA in English (https://www.engl.iastate.edu/english) and the MA in TESL/Applied Linguistics (https://apling.engl.iastate.edu/ma-program-in-teslapplied-linguistics) have language requirements that may be fulfilled in a number of ways (students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement).

Students admitted to the MA in English (https://www.engl.iastate.edu/english) choose between two areas of specialization. The Literature specialization is designed to prepare students for a variety of career paths. These include going on for a PhD; teaching at the secondary, two- and four-year college, and university levels; and working in fields such as publishing, research, and administration, or non-profit organizations. The Literature and the Teaching of Reading specialization is designed for students with a teaching license who wish to take graduate literature courses and work toward a reading endorsement by taking three reading courses in Curriculum and Instruction.

The MA in Rhetoric, Composition, and Professional Communication (RPC) (https://engl.iastate.edu/ma-coursework-program-of-study) prepares students for careers in business, technical, and professional communication in the private and public sectors and for teaching writing and communication at the postsecondary level.

The MA in TESL/Applied Linguistics (TESL/AL) (https://apling.engl.iastate.edu/ma-program-in-teslapplied-linguistics) prepares students for careers in teaching English to non-native speakers of English, either in the U.S. or abroad. Students with MA degrees in TESL teach adults and younger learners in a wide variety of contexts, supervise language programs, work for testing organizations, and create language teaching materials. Students admitted to the degree program can choose among optional specializations: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESP); Literacy; Literature in ESL; Teaching English to L1 Spanish Learners; and Corpus and Computational Linguistics.

The Master of Fine Arts (MFA) program in Creative Writing and Environment (CWE) (https://www.engl.iastate.edu/creative-writing/mfa-program-in-creative-writing-and-environment) cultivates in its students an interdisciplinary approach to research and writing. The program’s unique design allows writers to develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, poetry, and drama. The program is designed to prepare students for careers as writers, teachers, editors, and environmental educators. The MFA degree requires 54 hours of graduate credit: a core of creative writing and other English courses, a book-length thesis (6 credits), experiential environmental fieldwork (3 credits), and 12 credits in disciplines other than English (such as Landscape Architecture, Anthropology, or Environmental Science, among many others) relevant to an individual student’s research interests and thesis project.

The Doctor of Philosophy (PhD) in Applied Linguistics and Technology (ALT) (https://apling.engl.iastate.edu/ph-d-in-applied-linguistics-and-technology) focuses on English language description, teaching, learning, and assessment, with particular emphasis on issues and practices related to technology: analysis of language using computational and corpus linguistic methods as well as the study of computer technology in English language teaching, learning, and assessment. The degree prepares students for a variety of academic appointments in departments of applied linguistics and English and for professional opportunities in research and development, international publishing, and government agencies in the U.S. and around the world where English is taught and used for specific educational, vocational, and professional purposes. Candidates are required to complete 72 hours of graduate credit including a dissertation; to meet a language requirement that may be fulfilled in a number of ways (students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement); and to pass a portfolio assessment, a preliminary examination (consisting of a dissertation proposal and pilot study and written response to questions about them), and an oral defense of the dissertation.

The PhD in Rhetoric and Professional Communication (RPC) (https://www.engl.iastate.edu/rpc/graduate-programs/phd-rpc) focuses on the rhetorical theory, history, pedagogy, and practice of written, oral, visual, and electronic communication (WOVE) in professional communities such as business, industry, science, and government and in public spaces that frame deliberation, controversy and communal identity. The degree prepares graduates for academic positions in rhetoric, in multimodal composition, and in business, professional, and technical communication, as well as for work in the private and public sectors as professional communication specialists, editors, designers, and communication managers. Candidates are required to complete 72 hours of graduate credit including a dissertation; to pass a written comprehensive examination (two parts: one on semiotic theory and the other on one subfield of Rhetoric and Professional Communication); to pass a preliminary examination (consisting of a dissertation proposal and pilot study and written response to questions about them), and an oral defense of the dissertation.

The Department of English offers graduate study leading to three Master of Arts degrees, one Master of Fine Arts degree, two Doctor of Philosophy degrees, and one TESL/TEFL Certificate.

### Graduate Study

The department offers graduate work leading to three Master of Arts degrees, one Master of Fine Arts degree, two Doctor of Philosophy degrees, and one TESL/TEFL Certificate. Information on application requirements and procedures for all majors is available on the Graduate Studies "How To Apply" website.

The Master of Arts (MA) degree programs offer advanced study of literature, language, and writing. The degree requires a minimum of 30 hours of graduate credit, including a final thesis or creative component (3 credits). Both the MA in English and the MA in TESL/Applied Linguistics have language requirements that may be fulfilled in a number of ways (students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement).

Students admitted to the MA in English choose between two areas of specialization. The Literature specialization is designed to prepare students for a variety of career paths. These include going on for a PhD; teaching at the secondary, two- and four-year college, and university levels; and working in fields such as publishing, research, and administration, or non-profit organizations. The Literature and the Teaching of Reading specialization is designed for students with a teaching license who wish to take graduate literature courses and work toward a reading endorsement by taking three reading courses in Curriculum and Instruction.

The MA in Rhetoric, Composition, and Professional Communication prepares students for careers in business, technical, and professional communication in the private and public sectors and for teaching writing and communication at the postsecondary level.

The MA in TESL/Applied Linguistics prepares students for careers in teaching English to non-native speakers of English, either in the U.S. or abroad. Students with MA degrees in TESL teach adults and younger learners in a wide variety of contexts, supervise language programs, work for testing organizations, and create language teaching materials. Students admitted to the degree program can choose among optional specializations: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESP); Literacy; Literature in ESL; Teaching English to L1 Spanish Learners; and Corpus and Computational Linguistics.

The Master of Fine Arts (MFA) program in Creative Writing and Environment cultivates in its students an interdisciplinary approach to research and writing. The program's unique design allows writers to develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, poetry, and drama. The program is designed to prepare students for careers as writers, teachers, editors, and environmental educators. The MFA degree requires 54 hours of graduate credit: a core of creative writing and other English courses, a book-length thesis, experiential environmental fieldwork, and 12 credits in disciplines other than English relevant to an individual student's research interests and thesis project.

The Doctor of Philosophy (PhD) in Applied Linguistics and Technology focuses on English language description, teaching, learning, and assessment, with particular emphasis on issues and practices related to technology: analysis of language using computational and corpus linguistic methods as well as the study of computer technology in English language teaching, learning, and assessment. The degree prepares students for a variety of academic appointments in departments of applied linguistics and English and for professional opportunities in research and development, international publishing, and government agencies in the U.S. and around the world where English is taught and used for specific educational, vocational, and professional purposes. Candidates are required to complete 72 hours of graduate credit including a dissertation; to pass a written comprehensive examination (two parts: one on semiotic theory and the other on one subfield of Rhetoric and Professional Communication); to pass a preliminary examination, and an oral defense of the dissertation.

The PhD in Rhetoric and Professional Communication focuses on the rhetorical theory, history, pedagogy, and practice of written, oral, visual, and electronic communication in professional communities such as business, industry, science, and government and in public spaces that frame deliberation, controversy and communal identity. The degree prepares graduates for academic positions in rhetoric, in multimodal composition, and in business, professional, and technical communication, as well as for work in the private and public sectors as professional communication specialists, editors, designers, and communication managers. Candidates are required to complete 72 hours of graduate credit including a dissertation; to pass a written comprehensive examination, a preliminary examination (consisting of a dissertation proposal and pilot study and written response to questions about them), and an oral defense of the dissertation.
hours of graduate credit including a dissertation and to pass a portfolio assessment, a preliminary examination, and an oral defense of the dissertation.

A Graduate Certificate in Teaching English as a Second Language/Teaching English as a Foreign Language (TESL/TEFL) ([https://apling.engl.iastate.edu/testefl-graduate-certificate](https://apling.engl.iastate.edu/testefl-graduate-certificate)) prepares students to teach English to non-native speakers of English either in the U.S. or abroad. It offers students grounding in the linguistic understanding of English and a flexible program of study with courses in teaching methodology, language assessment, and the use of technology to address students' language needs. This 12-credit program has two prerequisites, one core requirement, and three graduate course electives.

The department offers graduate students an opportunity to gain professional experience through fieldwork and internships, departmental research activities, ISUComm ([https://www.engl.iastate.edu/isucomm](https://www.engl.iastate.edu/isucomm)), the Intensive English and Orientation Program (IEOP) ([https://ieop.iastate.edu](https://ieop.iastate.edu)), and the Speech Communication Program. Teaching and research assistantships are available for qualified students. Teaching assistants are responsible for teaching, with faculty supervision, ISUComm Foundation Courses, courses in public speaking, English as a Second Language (ESL), and business and technical communication. Research assistants may be assigned to faculty members engaged in research projects. One or more Pearl Hogrefe Fellowships in Creative Writing ([https://www.engl.iastate.edu/creative-writing/how-to-apply/pearl-hogrefe-fellowship-in-creative-writing](https://www.engl.iastate.edu/creative-writing/how-to-apply/pearl-hogrefe-fellowship-in-creative-writing)), covering stipend and tuition, are awarded each year to outstanding graduate students. Freda Huncke Endowment Graduate Teaching Fellowships are awarded to select first-year students.

With prior written approval from the School of Education, students may use selected courses to meet requirements for the ESL endorsement (K-12) for teachers.

The English Department offers minors in each of its graduate programs. A graduate minor at the MA level requires 9 credits of English at the 500 or 600 level in the respective major (English, RCPC, TESL/AL). A graduate minor within the MFA program in Creative Writing and the Environment requires an approved application and completion of 12 graduate credits of creative writing. A graduate minor at the PhD level requires 12 credits at the 500 or 600 level in the respective major (ALT or RPC).

Courses primarily for undergraduates:

**ENGL 011: Intensive English and Orientation Program Reading**
(5-0) Cr. 0. F.S.SS.
Study of English for speakers of other languages. Brochure available from the IEOP Office, 102 Landscape Architecture, or at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 011A: Intensive English and Orientation Program Reading: Beginner**
(5-0) Cr. 0. F.S.SS.
Academic reading classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 011B: Intensive English and Orientation Program Reading: Low Intermediate**
(5-0) Cr. 0. F.S.SS.
Academic reading classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 011C: Intensive English and Orientation Program Reading: Intermediate**
(5-0) Cr. 0. F.S.SS.
Academic reading classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 011D: Intensive English and Orientation Program Reading: High Intermediate**
(5-0) Cr. 0. F.S.SS.
Academic reading classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 011E: Intensive English and Orientation Program Reading: High**
(5-0) Cr. 0. F.S.SS.
Academic reading classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 011F: Intensive English and Orientation Program Reading: Advanced**
(5-0) Cr. 0. F.S.SS.
Academic reading classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 012: Intensive English and Orientation Program Writing**
(5-0) Cr. 0. F.S.SS.
Academic writing classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 012A: Intensive English and Orientation Program Writing: Beginner**
(5-0) Cr. 0. F.S.SS.
Academic writing classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).

**ENGL 012B: Intensive English and Orientation Program Writing: Low Intermediate**
(5-0) Cr. 0. F.S.SS.
Academic writing classes for speakers of other languages. More information available at [www.ieop.iastate.edu](http://www.ieop.iastate.edu).
ENGL 012C: Intensive English and Orientation Program Writing: Intermediate
(5-0) Cr. 0. F.S.SS.
Academic writing classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 012D: Intensive English and Orientation Program Writing: High Intermediate
(5-0) Cr. 0. F.S.SS.
Academic writing classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 012E: Intensive English and Orientation Program Writing: High Intermediate
(5-0) Cr. 0. F.S.SS.
Academic writing classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 012F: Intensive English and Orientation Program Writing: Advanced
(5-0) Cr. 0. F.S.SS.
Academic writing classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013: Intensive English and Orientation Program Listening and Speaking
(5-0) Cr. 0.
Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013A: Intensive English and Orientation Program Listening and Speaking: Beginner
(5-0) Cr. 0.
Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013B: Intensive English and Orientation Program Listening and Speaking: Low Intermediate
(5-0) Cr. 0.
Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013C: Intensive English and Orientation Program Listening and Speaking: Intermediate
(5-0) Cr. 0.
Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013D: Intensive English and Orientation Program Listening and Speaking: High Intermediate
(5-0) Cr. 0.
Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013E: Intensive English and Orientation Program Listening and Speaking: High
(5-0) Cr. 0.
Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013F: Intensive English and Orientation Program Listening and Speaking: Advanced
(5-0) Cr. 0.
Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014: Intensive English and Orientation Program Grammar
(5-0) Cr. 0.

ENGL 014A: Intensive English and Orientation Program Grammar: Beginner
(5-0) Cr. 0.

ENGL 014B: Intensive English and Orientation Program Grammar: Low Intermediate
(5-0) Cr. 0.

ENGL 014C: Intensive English and Orientation Program Grammar: Intermediate
(5-0) Cr. 0.

ENGL 014D: Intensive English and Orientation Program Grammar: High Intermediate
(5-0) Cr. 0.

ENGL 014E: Intensive English and Orientation Program Grammar: High
(5-0) Cr. 0.

ENGL 014F: Intensive English and Orientation Program Grammar: Advanced
(5-0) Cr. 0.
ENGL 015: Intensive English and Orientation Program Exit Academic Skills
(10-0) Cr. 0.

ENGL 016: Intensive English and Orientation Program Exit Orientation
(5-0) Cr. 0.

ENGL 017: Intensive English and Orientation Program Exit Technology
(5-0) Cr. 0.
Academic Technology classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 018: Intensive English Orientation Program Business Oral English Communication: Listening and Speaking
(5-0) Cr. 0.

ENGL 019: Intensive English Orientation Program Business Written English Communication: Reading and Writing
(10-0) Cr. 0.

ENGL 020: Intensive English and Orientation Program Optional Seminar
(5-0) Cr. 0.
Customized academic English and cultural orientation for speakers of other languages.

ENGL 099: Strategies for Nonnative Speakers of English
Cr. 0. F.S.
Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option.

ENGL 099R: Strategies for Nonnative Speakers of English: Strategies for Reading
Cr. 0. F.S.
Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option.

ENGL 099S: Strategies for Nonnative Speakers of English: Academic Speaking and Pronunciation
Cr. 0. F.S.
Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option.

ENGL 101: English for Native Speakers of Other Languages
(3-0) Cr. 3. F.S.
Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)
For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101B: English for Native Speakers of Other Languages: Academic English
(3-0) Cr. 3. F.S.
Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)
For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101C: English for Native Speakers of Other Languages: Academic English II--Undergraduates
(3-0) Cr. 3. F.S.
Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)
For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.
ENGL 101D: English for Native Speakers of Other Languages: Academic English II--Graduates  
(3-0) Cr. 3. F.S.  
Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)  
Available P/NP to graduate students at their department’s option. For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 120: Computers and Language  
(Cross-listed with LING). (3-0) Cr. 3.  
Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

ENGL 150: Critical Thinking and Communication  
(3-0) Cr. 3. F.S.S.  
Prereq: Concurrent enrollment in LIB 160 is recommended.  
Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio.

ENGL 180: Communication Skills for International Teaching Assistants  
Cr. 1-3. Repeatable, maximum of 2 times. F.S.  
Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180A: Communication Skills for International Teaching Assistants: Speaking Skills  
Cr. 3. Repeatable, maximum of 2 times. F.S.  
Emphasis on pronunciation improvement and greater fluency in spoken English. Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180B: Communication Skills for International Teaching Assistants: Intermediate Spoken English  
Cr. 3. Repeatable, maximum of 2 times. F.S.  
Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180C: Communication Skills for International Teaching Assistants: Advanced Spoken English  
Cr. 3. Repeatable, maximum of 2 times. F.S.  
For students who have completed ENGL 180A or ENGL 180B but have not reached the passing level on the OECT test. Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180D: Communication Skills for International Teaching Assistants: Presentation Skills  
Cr. 3. Repeatable, maximum of 2 times. F.S.  
Developing explanations, leading discussions and handling questions in a teaching environment. Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180E: Communication Skills for International Teaching Assistants: Supervised Independent Study  
Cr. 1. Repeatable, maximum of 2 times. F.S.  
Seminar with individual observation and consultation. Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 201: Introduction to Literature  
(3-0) Cr. 3.  
Prereq: Credit in or exemption from 150  
Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.
ENGL 207: Introduction to Creative Writing
(3-0) Cr. 3. F.S.
Prereq: Credit in or exemption from 150
Course introduces students to the fundamentals of writing fiction, poetry, and creative nonfiction. Extensive readings in all three genres. Students learn creative processes through writing exercises, workshops, and conferences.

ENGL 214: Introduction to Technical Communication
Cr. 3. F.
Prereq: ENGL 150
A broad introduction to the culture of professional work as a technical communicator, with particular emphasis on principles and best practices for developing and managing technical information and digital media. Examination of user-centered design, the history of the discipline, cross-cultural communication, and the ethics of communicating complex information to lay audiences. Study and practice of team-based collaboration, project management, and technical editing.

ENGL 219: Introduction to Linguistics
(Cross-listed with LING). (3-0) Cr. 3. F.S.
Prereq: Sophomore classification
Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

ENGL 220: Descriptive English Grammar
(Cross-listed with LING). (3-0) Cr. 3. F.S.
Prereq: ENGL 250
Overview of grammatical structures and functions. Parts of speech; phrase, clause, and sentence structure; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course.

ENGL 225: Survey of British Literature to 1800
(3-0) Cr. 3.
Prereq: ENGL 250
Representative works of British literature from its origins (including indigenous and conquest literatures) through the end of the Civil War in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 226: Survey of British Literature since 1800
(3-0) Cr. 3.
Prereq: ENGL 250
Representative works written in the United States since the Civil War in historical, cultural, and literary contexts, with attention to the cultural and ethnic diversity of Americans. Will include multiple genres.

ENGL 227: Survey of American Literature to 1865
(3-0) Cr. 3.
Prereq: ENGL 250
Representative works of American literature from its origins (including indigenous and conquest literatures) through the end of the Civil War in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 228: Survey of American Literature since 1865
(3-0) Cr. 3.
Prereq: ENGL 250
Representative works written in the United States since the Civil War in historical, cultural, and literary contexts, with attention to the cultural and ethnic diversity of Americans. Will include multiple genres.

ENGL 237: Survey of Film History
(3-0) Cr. 3. F.
Prereq: Credit in or exemption from 150
A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present.

ENGL 240: Introduction to American Indian Literature
(Cross-listed with AM IN). (3-0) Cr. 3. F.
Prereq: Credit in or exemption from ENGL 150
Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.
Meets U.S. Diversity Requirement

ENGL 250: Written, Oral, Visual, and Electronic Composition
(3-0) Cr. 3. F.S.SS.
Prereq: ENGL 150 or exemption from ENGL 150; sophomore classification or exemption from ENGL 150; credit for or concurrent enrollment in LIB 160
Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of communication portfolio. The University requires a minimum grade of C in ENGL 250 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards.
ENGL 250H: Written, Oral, Visual, and Electronic Composition: Honors
(3-0) Cr. 3. F.
Prereq: Exemption from ENGL 150 and admission to Freshman Honors Program; credit for or concurrent enrollment in LIB 160
In-depth analysis, composition, and reflection on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on argumentation: developing claims, generating reasons, providing evidence. Individual sections organized by special topics. Development of communication portfolio. The University requires a minimum grade of C in ENGL 250 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards.

ENGL 260: Introduction to Literary Study
(3-0) Cr. 3.
Prereq: Credit in or exemption from 150
Basic principles of literary study. Emphasis on writing of interpretive and critical essays. Particular attention to poetry. Designed for English majors.

ENGL 275: Analysis of Popular Culture Texts
(Cross-listed with SP CM). (3-0) Cr. 3. F.S.
Prereq: Credit in or equivalent of 250
Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

ENGL 302: Business Communication
(3-0) Cr. 3. F.S.S.
Prereq: ENGL 250, junior classification
Rhetorical concepts and processes to successfully communicate individually and collaboratively via written, oral, visual, and electronic modes across a range of business disciplines. Covers strategies for analyzing audiences internal and external to an organization in order to communicate positive, neutral, and negative messages clearly, completely, correctly, and ethically; save an audience's time; and create goodwill.

ENGL 302H: Business Communication: Honors
(3-0) Cr. 3. F.S.S.
Prereq: ENGL 250, junior classification
Theory, principles and processes of effective written, oral, visual, and electronic communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, and email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations.

ENGL 303: Free-Lance Writing for Popular Magazines
(3-0) Cr. 3. S.
Prereq: ENGL 250, not open to freshmen
Practical workshop in writing nonfiction articles for popular magazines. Emphasis on writing, market research, preparation of manuscripts, methods of submission. Major goal of the course is production of marketable material.

ENGL 304: Creative Writing: Fiction
(3-0) Cr. 3. F.S.
Prereq: ENGL 250, not open to freshmen
Progresses from practice in basic techniques of fiction writing to fully developed short stories. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

ENGL 305: Creative Writing: Nonfiction
(3-0) Cr. 3. F.S.
Prereq: ENGL 250, not open to freshmen
Workshop in writing imaginative essays, both critical and personal. Analytical reading, development of literary techniques. Individual and small group conferences.

ENGL 306: Creative Writing: Poetry
(3-0) Cr. 3. F.S.
Prereq: ENGL 250, not open to freshmen
Progresses from traditional to contemporary forms. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

ENGL 308: Write Like a Woman
(Cross-listed with WGS). (3-0) Cr. 3. F.
Prereq: ENGL 250
Writing and reading interpretive fiction written by women. Emphasis on stories that embody a female literary life, gender-specific ways of creating characters and conflicts, analytical reading and writing, workshop criticism and shared commentaries. Includes multi-modal projects.

ENGL 309: Proposal and Report Writing
(3-0) Cr. 3. F.S.
Prereq: ENGL 250, junior classification
Rhetorical concepts and processes to individually and collaboratively develop proposals for business, governmental, nonprofit, or other organizations and to report on the work completed both orally and in writing. Emphasizes the structure and classification of proposal and report types, qualitative and quantitative research methods, audience analysis, document design, and data visualization.
ENGL 310: Rhetorical Analysis
(3-0) Cr. 3. F.S.
Prereq: ENGL 250
Fundamental principles of rhetorical criticism. Focus on selected theories for analyzing cultural texts, including essays, speeches, film, technical and scientific documents, and websites. Emphasis on identifying artifacts, formulating research questions, applying methodologies, and understanding and practicing critical analysis through discussion and in writing.

ENGL 312: Biological Communication
(3-0) Cr. 3. F.S.
Prereq: ENGL 250
Rhetorical concepts and processes to successfully communicate individually and collaboratively via written, oral, visual, and electronic modes in disciplines in and related to biological sciences. Emphasizes the strategies for analyzing and adapting to audiences in the biological sciences. Covers developing and designing documentation, presenting scientific data visually, and communicating results orally.

ENGL 313: Rhetorical Website Design
(3-0) Cr. 3.
Prereq: ENGL 250
Rhetorical principles of multimodal composing in hypertextual environments. Focus on writing according to web style guidelines, employing cascading style sheets for layout and design, and using principles of information architecture to determine optimal site structure. Final project involves constructing interactive client site using latest web standards.

ENGL 314: Technical Communication
(3-0) Cr. 3. F.S.S.
Prereq: ENGL 250, junior classification
Rhetorical concepts and processes to successfully communicate technical information individually and collaboratively via written, oral, visual, and electronic modes. Emphasizes the major strategies for analyzing expert and lay audiences and adapting information to those audiences. Covers developing and designing usable technical documentation, visualizing data, and presenting technical information orally.

ENGL 314H: Technical Communication: Honors
(3-0) Cr. 3. F.S.S.
Prereq: ENGL 250, junior classification
Theories, principles, and processes of effective written, oral, visual, and electronic communication of technical information. Attention to major strategies for analyzing and adapting to audiences in various communication situations and composing technical discourse including organizing visual and verbal information. Extensive practice in many areas of technical communication, including instructions and procedures, proposals and reports, website analysis and design, and individual and team presentations.

ENGL 315: Creative Writing: Screenplays
(3-0) Cr. 3. F.
Prereq: ENGL 250, not open to freshmen
Stresses master scene technique of writing fully developed screenplays. Emphasis on movie techniques, writing, workshop criticism, analytical reading and viewing, and individual conferences.

ENGL 316: Creative Writing: Playwriting
(Cross-listed with THTRE). (3-0) Cr. 3. S.
Prereq: ENGL 250, not open to freshmen
Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences.

ENGL 318: Introduction to ESL methods and materials
(Cross-listed with LING). Cr. 3. F.
Prereq: ENGL/LING 219
Introduction to methods and materials for teaching English as a Second Language (ESL) for elementary and secondary students. Strategies and resources for teaching reading, writing, speaking and listening skills. Elementary Education students must take this course in the same semester as either CI 280S or CI 480S.

ENGL 319: Studies in Language and Diversity
(Cross-listed with LING). Cr. 3. Repeatable, maximum of 6 credits. F.
Prereq: ENGL 250
Special topics related to the role of language and linguistics in US diversity, such as Dialects and American literature, American English Accents, Legal and Social Aspects of English-only Laws in the US. Connections between language use and social diversity. Meets U.S. Diversity Requirement
ENGL 320: Topics in Linguistic Structure  
(Cross-listed with LING). Cr. 3. Repeatable, maximum of 6 credits. S.  
Prereq: ENGL 219/LING 219, ENGL 220/LING 220  
Special topics related to the study of linguistic structure. Focus on language structure in areas not covered in detail by existing courses. Topics include field linguistics, morphology, forensic linguistics, neurolinguistics, semantics, non-English phonology, acoustic phonetics, linguistic universals, and historical linguistics.

ENGL 322: Language and Society  
(Cross-listed with LING). Cr. 3. S.  
Prereq: ENGL/LING 219  
Introduction to variation in language use in society. Survey of factors affecting language use, including background characteristics of language users, location, and purpose of interaction in addition to institutional, state, and national language policies.

ENGL 324: Introduction to Teaching ESL Literacy  
(Cross-listed with LING). Cr. 3. F.  
Prereq: ENGL/LING 219  
Introduction to the issues and methods involved in teaching literacy skills to English as a second language (ESL) learners. The nature of literacy and materials and methods for developing ESL literacy at the middle school, high school, and adult ages across multiple levels of competency.

ENGL 325: Teaching Methods for ESL Learners: Oral Communication Skills  
(Cross-listed with LING). Cr. 3. S.  
Prereq: ENGL/LING 219  
Issues and methods in teaching oral communication skills (listening, speaking, pronunciation) to English as a second language (ESL) learners. The nature of oral language ability. Materials and Methods for developing oral communication skills at middle school, high school, and adult contexts.

ENGL 330: Science Fiction  
(3-0) Cr. 3.  
Prereq: ENGL 250  
Study of science fiction from its origins in nineteenth-century to the present. May include study of specific types of science fiction, such as classic, cyberpunk, feminist, or apocalyptic narratives; and may include consideration of science fiction film and/or theory.

ENGL 332: Visual Communication of Quantitative Information  
(Cross-listed with STAT). (3-0) Cr. 3.  
Prereq: STAT 101, STAT 104, STAT 201 or STAT 226; ENGL 250  
Communicating quantitative information using visual displays; visualizing data; interactive and dynamic data displays; evaluating current examples in the media; color, perception, and representation in graphs; interpreting data displays.

ENGL 335: Studies in Film  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: ENGL 250  
Principles of film art and the traditional vocabulary of literature as applied to film. Influence of film on modes of thought and behavior.

ENGL 339: Literary Theory and Criticism  
(3-0) Cr. 3.  
Prereq: ENGL 250 and 3 additional credits in literature  
Study of selected texts of literary criticism, with attention to the purposes and practices of criticism.

ENGL 340: Women's Literature  
(Cross-listed with WGS). (3-0) Cr. 3.  
Prereq: ENGL 250  
Historical and thematic survey of literature by and about women. May include autobiographies, journals, letters, poetry, fiction, and drama. Meets U.S. Diversity Requirement

ENGL 344: U.S. Latino/a Literature  
(3-0) Cr. 3. S.  
Prereq: ENGL 250  
An introduction to the literature of Mexican Americans, Puerto Ricans, Cuban Americans and other Latino/a sub-groups. Special emphasis on themes such as ethnic relations and comparisons with EuroAmerican literary traditions. Meets U.S. Diversity Requirement

ENGL 345: Women and Literature: Selected Topics  
(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: ENGL 250  
Literature by women and/or dealing with the images of women, e.g., study of individual authors or related schools of authors; exploration of specific themes or genres in women's literature; analysis of recurrent images of women in literature. Meets U.S. Diversity Requirement

ENGL 346: American Indian Literature  
(Cross-listed with AM IN). (3-0) Cr. 3.  
Prereq: ENGL 250  
Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Meets U.S. Diversity Requirement

ENGL 347: Studies in African American Literature  
(Cross-listed with AF AM). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: ENGL 250  
Literature by African Americans, which may include study of individual authors, movements, themes, genres. Meets U.S. Diversity Requirement
ENGL 349: Topics in Multicultural Literatures of the United States
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 250
Literature by writers from U.S. multicultural groups. May include literature of several groups or focus upon one of the following: Asian Americans, African Americans, Latino/a Americans, American Indians. Meets U.S. Diversity Requirement

ENGL 350: Rhetorical Traditions
(Cross-listed with CL ST, SP CM). (3-0) Cr. 3. S.
Prereq: ENGL 250
Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

ENGL 352: Gay and Lesbian Literature
(Cross-listed with WGS). (3-0) Cr. 3.
Prereq: ENGL 250
 Literary portrayals of gay and lesbian lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and gender identity over time. Meets U.S. Diversity Requirement

ENGL 353: World Literature: Western Foundations through Renaissance
(Cross-listed with CL ST). (3-0) Cr. 3. F.S.
Prereq: ENGL 250
Representative works from the drama, epics, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others. Meets International Perspectives Requirement.

ENGL 354: World Literature: Seventeenth Century to the Present
(3-0) Cr. 3. F.
Prereq: ENGL 250
Global literatures in their various cultural and aesthetic contexts. Representative works, oral and written literature, including poetry, fiction, nonfiction, and drama. Meets International Perspectives Requirement.

ENGL 355: Literature and the Environment
(Cross-listed with ENV S). (3-0) Cr. 3.
Prereq: ENGL 250
Study of literary texts that address the following topics, among others: the relationship between people and natural/urban environments, ecocriticism, and the importance of place in the literary imagination.

ENGL 358: Myth and Fairytale
(3-0) Cr. 3.
Prereq: ENGL 250
Study of traditional fairytales, myths, and legends from diverse cultures.

ENGL 360: Studies in American Literature to 1800
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 250; sophomore classification
Selected readings in American literature from its beginnings through the colonial period; may reflect themes, genres, or social and cultural contexts.

ENGL 362: Studies in 19th Century American Literature
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 250; sophomore classification
Selected readings in American literature of the 19th century; may reflect themes, genres, or social and cultural contexts.

ENGL 364: Studies in American Literature: 1900 to the Present
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 250; sophomore classification
Selected readings in American literature since 1900; may reflect themes, genres, or social and cultural contexts.

ENGL 370: Shakespeare
(3-0) Cr. 3. F.S.
Prereq: ENGL 250
Reading and analysis of selected plays. Development of Shakespeare's dramatic art in its social and intellectual context. Meets International Perspectives Requirement.

ENGL 373: Studies in British Literature: The Middle Ages
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 250; sophomore classification
Selected readings in medieval literature from its beginnings through the fifteenth century; may reflect themes, genres, or social and cultural contexts.

ENGL 375: Studies in British Literature: The Restoration and 18th Century
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 250; sophomore classification
Selected readings in British literature from 1660 to 1800; may reflect themes, genres, or social and cultural contexts. Meets International Perspectives Requirement.
ENGL 376: Studies in British Literature  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: ENGL 250; sophomore classification  
Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.  
Meets International Perspectives Requirement.

ENGL 376A: Studies in British Literature: Romantic  
(3-0) Cr. 3.  
Prereq: ENGL 250; sophomore classification  
Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.  
Meets International Perspectives Requirement.

ENGL 376B: Studies in British Literature: Victorian  
(3-0) Cr. 3.  
Prereq: ENGL 250; sophomore classification  
Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.  
Meets International Perspectives Requirement.

ENGL 389: Postcolonial Literature  
(3-0) Cr. 3.  
Prereq: ENGL 250; sophomore classification  
Historical, thematic and theoretical study of postcolonial literatures from one or more of the following areas: Africa, South Asia, the Caribbean, and the Middle East. Irish and immigrant British writers may also be included.  
Meets International Perspectives Requirement.

ENGL 393: The History of Children's Literature  
(3-0) Cr. 3. F.  
Prereq: ENGL 250  
Origin and development of English and American children's literature through the early twentieth century. Special emphasis on nature, structure, and enduring themes of fantasy literature.

ENGL 395: Study and Travel  
Cr. arr. SS.  
Prereq: Permission of instructor  
Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.  
Meets International Perspectives Requirement.

ENGL 395A: Study and Travel: Literature  
Cr. arr. SS.  
Prereq: Permission of instructor  
Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.  
Meets International Perspectives Requirement.

ENGL 395B: Study and Travel: Creative Writing  
Cr. arr. SS.  
Prereq: Permission of instructor  
Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.  
Meets International Perspectives Requirement.

ENGL 395C: Study and Travel: Linguistics  
Cr. arr. SS.  
Prereq: Permission of instructor  
Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.  
Meets International Perspectives Requirement.

ENGL 395D: Study and Travel: Rhetoric and Professional Communication  
Cr. arr. SS.  
Prereq: Permission of instructor  
Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.  
Meets International Perspectives Requirement.

ENGL 395E: Study and Travel: Teacher Education  
Cr. arr. SS.  
Prereq: Permission of instructor  
Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.  
Meets International Perspectives Requirement.

ENGL 396: Teaching the Reading of Young Adult Literature  
(3-0) Cr. 3. F.S.  
Prereq: ENGL 250  
Critical study and evaluation of themes, genres, and cultures found in young adult literature. Strategies of effective reading; instructional strategies including discussion techniques and use of technology; matching texts to reader needs and proficiencies. Evaluation of fiction, nonfiction, and media-based materials for use in school programs. Lesson planning.
ENGL 397: Practice and Theory of Teaching Writing in the Secondary Schools  
(3-0) Cr. 3. F.S.  
Prereq: ENGL 219 or ENGL 220; application process initiated for admission to university teacher education program; concurrent enrollment in C 1280 (cr. 2); and background check initiated with state of Iowa Department of Criminal Investigation  

ENGL 404: Creative Writing Workshop: Fiction  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.  
Prereq: ENGL 304  
Individual projects in short fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

ENGL 405: Creative Writing Workshop: Nonfiction  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.  
Prereq: ENGL 305  
Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

ENGL 406: Creative Writing Workshop--Poetry  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.  
Prereq: ENGL 306  
Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

ENGL 410: Language as Data  
(Cross-listed with LING). Cr. 3. S.  
Prereq: Junior standing  
Methods of discovering language patterns in text documents solve practical text analysis problems in the disciplines. Fundamentals of linguistics and its role in text analysis. Practice writing R scripts to perform text analysis and visualize textual data.

ENGL 411: Technology, Rhetoric, and Professional Communication  
(3-0) Cr. 3.  
Prereq: ENGL 310; ENGL 302, ENGL 309, ENGL 313, or ENGL 314; junior classification  
Seminar course on the implication of technologies, especially computer technology, for the writing and reading of business, technical, and academic texts. Extensive reading, discussion, and writing on selected technology-related topics.

ENGL 415: Business and Technical Editing  
(3-0) Cr. 3. S.  
Prereq: ENGL 302, ENGL 309, or ENGL 314; junior classification  
Editing concepts and processes for choosing the appropriate level of editing for the particular rhetorical situation. Covers using editorial tools such as copy-marking symbols, developing style sheets and guides, and managing document production. Emphasizes developing an editorial eye for verbal and visual details in order to achieve accuracy, consistency, correctness, and completeness.

ENGL 416: Visual Aspects of Business and Technical Communication  
(3-0) Cr. 3. F.  
Prereq: ENGL 302, ENGL 309, or ENGL 314; junior classification  
Rhetorical strategies and perceptual principles for designing print and digital visual elements such as diagrams and graphs and integrating those visual elements into business and technical communications. Covers strategies for employing visual elements such as typeface, page and screen layout, and illustrations in order to make communications more usable.

ENGL 417: Student Teaching  
Cr. arr. F.S.  
Prereq: admission to teacher education, approval of coordinator the semester prior to student teaching  
Full-time teaching in content licensure area: long term and unit planning, lesson planning, classroom teaching practice.

ENGL 417E: Student Teaching: English and Literature  
(Cross-listed with EDUC). Cr. arr. Repeatable. F.S.  
Prereq: ENGL 494, admission to teacher education, approval of coordinator the semester prior to student teaching  
Full-time teaching in secondary English: long term and unit planning, lesson planning, classroom teaching practice in English language arts.

ENGL 418: Seminar in Argumentation  
(3-0) Cr. 3. S.  
Prereq: ENGL 310, junior classification  
Advanced seminar in theory and analysis with extensive practice in various modes of argument.

ENGL 420: History of the English Language  
(Cross-listed with LING). (3-0) Cr. 3. F.S.  
Prereq: ENGL 219 or LING 219, ENGL 220 or LING 220  
Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents.
ENGL 422: Women, Men, and the English Language
(Cross-listed with LING, WGS). (3-0) Cr. 3. S.
Prereq: ENGL 219 or LING 219
The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions.
Meets U.S. Diversity Requirement

ENGL 425: Second Language Learning and Teaching
(Cross-listed with LING). (3-0) Cr. 3. S.
Prereq: ENGL 219 or LING 219; junior classification
The process of second language learning and principles and techniques of teaching second languages. Learning and teaching in specific situations and for particular purposes. Current applications of technology in teaching and assessment.

ENGL 437: Grammatical Analysis
(Cross-listed with LING). (3-0) Cr. 3. F.
Prereq: ENGL 220 or LING 220; ENGL 219 or LING 219 or introductory course in linguistics; junior classification
Theories and methods for analysis of syntax and morphology.

ENGL 440: Seminar in British Literature
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Completion of 9 credits of surveys; junior classification
Selected authors, movements, eras, or genres in British literature.
Readings in criticism; required research paper.

ENGL 441: Seminar in American Literature
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Completion of 9 credits of surveys; junior classification
Selected authors, movements, eras, or genres in American literature.
Readings in criticism; required research paper.

ENGL 445: Seminar: Literature Crossing Boundaries
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Completion of 9 credits of surveys; junior classification
Intensive study of selected literature that bridges traditional genre, period, national, or disciplinary boundaries. Readings in criticism; required research paper.

ENGL 450: Seminar in Literary Genres
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Completion of 9 credits of surveys; junior classification
Intensive study of drama, film, fiction, poetry, or prose. Selected movements, eras, or national traditions. Readings in criticism; required research paper.

ENGL 460: Seminar in Gender and Ethnicity
(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: Completion of 9 credits of surveys; junior classification
Selected readings of various authors, movements, eras, or genres.
Readings in criticism; required research paper.

ENGL 477: Seminar in Technical Communication
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 302, ENGL 309, or ENGL 314
Intensive study of a selected topic that bridges theory and practice in technical communication. Required project that contributes to the understanding of an emerging issue in the profession.

ENGL 487: Internship in Business, Technical, and Professional Communication
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: 9 credits in ENGL 302, ENGL 309, ENGL 313, ENGL 314, ENGL 415 (preferred), ENGL 416, or ENGL 477; junior classification; and permission of coordinator
An opportunity to write, edit, and design business and technical documents in a professional setting. Projects might include reports, proposals, manuals, brochures, newsletters.

ENGL 490: Independent Study
Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490A: Independent Study: Literature
Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490B: Independent Study: Linguistics
(Cross-listed with LING). Cr. arr. Repeatable, maximum of 9 credits. F.S.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee or Linguistics Adviser
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.
ENGL 490C: Independent Study: Rhetoric, Teaching of Composition
Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490D: Independent Study: Criticism and Theory of Literature
Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490E: Independent Study: Instructional Methods and Research
Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490F: Independent Study: Creative Writing
Cr. arr. Repeatable, maximum of 9 credits. F.S.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490G: Independent Study: Business/Technical Communication
Cr. arr. Repeatable, maximum of 9 credits. F.S.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490H: Independent Study: Honors
Cr. arr. Repeatable, maximum of 9 credits. F.S.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Designed to meet the needs of students who wish to study in areas other than those in which courses are offered or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 492: Undergraduate Teaching Experience
Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.
Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee
Teaching assistant experience.

ENGL 493: Advanced Creative Writing Workshop—Multi-Genre
Cr. 3. Repeatable, maximum of 6 credits. F.S.
Prereq: ENGL 304, ENGL 305, or ENGL 306 and junior standing
Advanced workshop of individual creative writing projects in short fiction, nonfiction, and poetry. Readings and discussion of published examples of short fiction, nonfiction, and poetry by authors of national and international note. Extensive discussion and written analysis of elements of craft across genres.

ENGL 494: Practice and Theory of Teaching Literature in the Secondary Schools
(Cross-listed with EDUC). (3-0) Cr. 3. F.S.
Prereq: ENGL 310, ENGL 397, 9 other credits in English beyond ENGL 250, PSYCH 333, admission to teacher education program

ENGL 497: Capstone Assessment
Cr. 1. F.S.
Prereq: Junior status
Must be taken in conjunction with a 400-level English course.

Courses primarily for graduate students, open to qualified undergraduates:

ENGL 500: Teaching Multimodal Composition
(3-0) Cr. 3. F.
Prereq: Graduate classification; must be teaching Engl 150 or Engl 250 concurrently
Introduction to the teaching of ISUComm Foundation Courses. Foundational and relevant newer composition theory and pedagogical methods related to ISUComm Foundation Courses objectives and their classroom enactment, including development of assignments and supporting activities, and evaluation of student projects. Required of all new teaching assistants teaching ISUComm Foundation Courses.
ENGL 501: Introduction to Research in Rhetoric, Composition, and Professional Communication  
(3-0) Cr. 3.  
Prereq: 6 graduate credits in English  
Survey of the major rhetorical, qualitative, and quantitative methods used in research on communication and language in academic and nonacademic settings.

ENGL 503: Composition Theory  
(3-0) Cr. 3.  
Prereq: 6 graduate credits in English  
In-depth consideration of the theory and practice of composition pedagogy. Opportunities for actual classroom application.

ENGL 504: Teaching Advanced Communication  
(3-0) Cr. 3. F.  
Prereq: Graduate classification  
Teaching business and technical communication in university, community college, and industry settings. Emphasizes curriculum planning, materials development, assignment design, responding to student work, assessment of student work, and distance (online) teaching.

ENGL 505: User Experience Architecture and Testing for Advanced Communication  
(3-0) Cr. 3.  
Prereq: Graduate classification  
Seminar course examining user experience (UX) interface design and development in technical communication. Focus is on the UX project cycle: creating userfaces, conducting user research, system testing, and implementing data-driven results.

ENGL 506: Professional Communication Theory  
(3-0) Cr. 3.  
Prereq: Admission to English Department graduate degree program  
Introduction to professional communication as a discipline, with emphasis on theories of communication and discourse that inform professional communication research and on trends and developments in that research and the field.

ENGL 508: Writing for Academic Publication  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: 6 graduate credits  
Hands-on practice in writing academic discourse for publication; rhetorical analyses of student-selected academic journals; discussion of current trends in academic writing; professional perspectives on the referee process and on journal editorial decision making. Focus on the writing of selected short pieces (opinion essays, standard reviews, conference-length papers) and of article-length manuscripts.

ENGL 510: Introduction to Computers in Applied Linguistics  
(Cross-listed with LING). (3-0) Cr. 3. F.  
Prereq: Graduate classification  
Use of software and web applications for language teaching, linguistic analysis, and statistical analysis. Issues and problems in applied linguistics related to computer methods.

ENGL 511: Introduction to Linguistic Analysis  
(Cross-listed with LING). (3-0) Cr. 3. F.  
Prereq: Graduate classification  
Principles and methods of linguistic analysis with emphasis on phonology, morphology, and syntax. Description of linguistic variation and current theoretical approaches to linguistics.

ENGL 512: Second Language Acquisition  
(Cross-listed with LING). (3-0) Cr. 3.  
Prereq: ENGL 511 or LING 511 or an introductory course in linguistics  
Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

ENGL 513: Language Assessment Practicum  
(Cross-listed with LING). (3-0) Cr. 3. F.S.SS.  
Prereq: ENGL 519 or LING 519  
Advanced practicum in language assessment.

ENGL 514: Sociolinguistics  
(Cross-listed with LING). (3-0) Cr. 3.  
Prereq: ENGL 511 or LING 511 or an introductory course in linguistics  
Theories and methods of examining language in its social setting. Analysis of individual characteristics (e.g., age, gender, ethnicity, social class, region), interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

ENGL 515: Statistical Natural Language Processing  
(Cross-listed with HCI, LING). (3-0) Cr. 3.  
Prereq: STAT 330 or equivalent, recommended ENGL 219 or LING 219, or ENGL 511 or LING 511  
Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.
ENGL 516: Methods of Formal Linguistic Analysis
(Cross-listed with LING). Cr. 3. Alt. S., offered even-numbered years.
Prereq: ENGL 219/LING 219 or equivalent.
Data and knowledge structures for formal representation of natural language and speech data. Designing and implementing algorithms for automating linguistic analysis tasks. Conceptual issues for natural language and speech processing programming.

ENGL 519: Second Language Assessment
(Cross-listed with LING). (3-0) Cr. 3. S.
Prereq: ENGL 511 or LING 511
Principles of second language assessment including reliability, validity, authenticity and practicality. Constructing, scoring, interpreting, and evaluating second language tests for a variety of situations.

ENGL 520: Computational Analysis of English
(Cross-listed with HCI, LING). (3-0) Cr. 3.
Prereq: ENGL 510 or LING 510, and ENGL 511 or LING 511
Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

ENGL 521: Teaching of Literature and the Literature Curriculum
(3-0) Cr. 3.
Prereq: Graduate classification or 6 credits in literature at 300 level or above
Examination of the roles of the literary work, reader, and teacher in literary study. Responses to literature. Place of literature in language arts. Study and development of curriculum materials for middle school, high school, and college levels of instruction.

ENGL 522: Literary Theory and Criticism
(3-0) Cr. 3.
Prereq: Graduate classification or 6 credits in literature at 300 level or above
Examination of the history, logic, and rhetoric of contemporary literary criticism and analysis.

ENGL 523: Introduction to Old English Language and Literature
(3-0) Cr. 3.
Prereq: Course in medieval literature or history or history of the English language recommended
Introductory study of Old English language and literature in prose and poetry, including extracts from Beowulf. Some attention to Anglo-Saxon culture.

ENGL 524: Literacy: Issues and Methods for Nonnative Speakers of English
(Cross-listed with LING). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: ENGL 511 or LING 511 or an introductory course in linguistics
Theoretical and practical issues and techniques in the teaching of literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs.

ENGL 525: Research and Teaching of Second Language Pronunciation
(Cross-listed with LING). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: ENGL 511 or LING 511 or an introductory course in linguistics
Theoretical and practical issues and techniques in the teaching of second language pronunciation as it relates to other areas of language, especially listening and speaking skills. Topics will include segmental and suprasegmental features; intelligibility; pronunciation in language assessment; classroom, technology and individual instruction; and research issues. Topics will be relevant to those intending to teach or research in various contexts.

ENGL 526: Computer-Assisted Language Learning
(Cross-listed with LING). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: ENGL 511 or LING 511 or equivalent
Theory, research, and practice in computer use for teaching nonnative speakers of English. Methods for planning and evaluating computer-based learning activities.

ENGL 527: Discourse Analysis
(Cross-listed with LING). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: ENGL 511 or LING 511 or an introductory course in linguistics
Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

ENGL 528: English for Specific Purposes
(Cross-listed with LING). (3-0) Cr. 3.
Prereq: ENGL 511 or LING 511 or an introductory course in linguistics
Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and corpus-informed syllabus and materials development for teaching and assessment.

ENGL 529: Content Management
(3-0) Cr. 3.
Prereq: ENGL 313
Strategies for developing and delivering multimodal content via digital media. Focus on the principles of database design, interface development, usability testing, and collaborative content management within professional communication settings.
ENGL 530: Technology and Oral Language  
(Cross-listed with LING). Cr. 3. Alt. F., offered even-numbered years.  
Prereq: ENGL 219 or ENGL 511 or equivalent.  
Structure and description of oral language and discourse. How spoken language is linguistically described, analyzed, and taught for research and for education. Using technology to record, transcribe, and analyze spoken language at all levels of linguistic structure.

ENGL 531: Topics in the Study of Literature  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Intensive study of literary genres, periods, movements, or themes; e.g., Literature and Historicism, Narrating the Feminine, Allegory.

ENGL 532: American Literature to 1865  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Selected texts in American literature from Beginnings to the Civil War. Study may include Native American literature, the literature of European conquest, Colonial and Revolutionary periods, Early Republic, and Jacksonian Era, in critical and cultural contexts.

ENGL 533: British Literature to 1830  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Selected texts from the Medieval, Renaissance, Restoration, Eighteenth-Century, and/or Romantic periods, in critical and cultural contexts.

ENGL 534: American Literature 1865 to the Present  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Selected texts in American literature from the Civil War to the present. Study may include Realism, Naturalism, Modernism, and Postmodernism, with significant attention to race/ethnicity, gender, and identity, and to contemporary critical views. Range of authors and genres.

ENGL 535: British Literature 1830 to the Present  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Selected texts from the Victorian, Edwardian, Modernist, and/or Contemporary periods, in critical and cultural contexts.

ENGL 537: Corpus Approaches to Grammatical Analysis  
(Cross-listed with LING). (3-0) Cr. 3.  
Prereq: ENGL 220 or LING 220; ENGL 219, LING 219, ENGL 511, LING 511, or introductory course in linguistics; graduate classification  
Corpus-informed analysis of syntax in authentic writing and speech, with emphasis on approaches used in applied linguistics.

ENGL 538: Fiction  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Selected fiction writers in English; range of authors and genres. Emphasis on both male and female writers; attention to the relationships between fiction and cultural change.

ENGL 539: Poetry  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Selected poets writing in English, considered in representative groups.

ENGL 540: Drama  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Primary texts in dramatic genres from various literary periods, in critical and cultural contexts. Frequently concentrates on the English Renaissance and the Shakespearean stage.

ENGL 542: Document Design and Editing  
(3-0) Cr. 3.  
Prereq: Senior classification  
Overview of the principles of desktop publishing as practiced in the field of technical communication. Focus on theories of print document design and project management, as well as digital prepress techniques employed to produce documents using external print services. Requires extensive use of current desktop publishing software.

ENGL 543: The Study of Environmental Literature  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification  
Intensive study of environmental literary genres, periods, figures, movements, or themes: e.g., Ecofeminism, Imagining Natural Disaster, Material Ecocriticism, Environmental Justice, Posthumanism.

ENGL 545: Women's Literature  
(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Primary texts by women writers; historical, thematic, formal, or theoretical approaches; secondary readings; e.g., Nineteenth-Century Women Writers; American Women's Personal Narratives; Southern Women Writers of the U.S.

ENGL 546: Issues in the Study of Literature  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Prereq: Graduate classification or 6 credits in literature at 300 level or above  
Intensive study of current and emerging topics and problems concerning literature and its relationship to theory and to language study; e.g., Theory of Metaphor; Renegotiating the Canon; Feminist Theory.
ENGL 547: The History of Rhetorical Theory I: From Plato to Bacon (Cross-listed with SP CM). (3-0) Cr. 3.
Prereq: 6 credits in English
Rhetorical theory from the classical period of ancient Greece and Rome through the Middle Ages to the early Renaissance; attention to its relation to the nature of knowledge, communication, practice, and pedagogy.

ENGL 548: The History of Rhetorical Theory II: From Bacon to the Present (Cross-listed with SP CM). (3-0) Cr. 3.
Prereq: 6 credits in English
Rhetorical theory from the early modern period (Bacon, Descartes, and Locke) to the present; attention to its relation to the nature of knowledge, communication practice, and pedagogy.

ENGL 549: Multimedia and Interaction Design (3-0) Cr. 3.
Prereq: Senior classification
Rhetorical principles of interactive multimedia design, such as those in DVDs, Blu-Ray videos, and streaming web multimedia. Practical understanding of computer applications used in interactive multimedia development. Focus on theoretical and practical elements of producing multimedia training in both education and industry. Work with interactive hypertext, digital audio, and nonlinear video editing.

ENGL 550: Creative Writing: Craft and Professional Practice (3-0) Cr. 3. F.
Prereq: Admission into MFA Program in Creative Writing and Environment
A multigenre craft course required of all incoming students in the MFA Program in Creative Writing and Environment. Students develop an understanding of craft and environmental writing across genres (poetry, fiction, nonfiction) as well as learn about editing and publication practice through the lens of a working literary journal, "Flyway: A Journal of Writing and Environment." Other course activities include presentations on the production practices of leading literary journals, individual editing projects, pragmatic tips for finding publication outlets for polished creative work, and a field trip to publishing houses.

ENGL 551: Master Workshop (3-0) Cr. 3. F.
Prereq: Fifth-semester or equivalent standing in the Creative Writing and Environment MFA program
An advanced multigenre creative writing workshop. Students work intensively on book-length manuscripts of fiction, creative nonfiction, scriptwriting, or poetry.

ENGL 554: Workshop: Fiction (3-0) Cr. 3. Repeatable, maximum of 12 credits.
Prereq: ENGL 550 and graduate classification.
Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor
Individual projects in fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

ENGL 555: Workshop: Nonfiction Cr. arr. Repeatable, maximum of 12 credits.
Prereq: ENGL 550 and graduate classification.
Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor
Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

ENGL 556: Workshop: Poetry (3-0) Cr. 3. Repeatable, maximum of 12 credits.
Prereq: ENGL 550 and graduate classification.
Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor
Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

ENGL 557: Studies in Creative Writing (3-0) Cr. 3. Repeatable, maximum of 12 credits.
Prereq: Graduate classification.
Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor
Special topics course on ideas, issues, and techniques in creative writing. Subject matter may include specific genres, aspects of the creative writing process, or themes of particular interest. Significant readings and written work required; previous workshop experience helpful.

ENGL 558: Teaching Creative Writing (3-0) Cr. 3.
Prereq: Graduate classification
Pedagogical approaches that are effective for grade-school through adult-education creative writing teaching. Writing exercises, workshops, text evaluation, and visits from creative writers.

ENGL 559: Creative Writing Teaching Internship Cr. 1-3. Repeatable.
Prereq: Permission of participating instructors
Students assist in an introductory creative writing class. Some supervised teaching but mainly evaluation of submissions and individual conferences. Requirements and grades determined by participating instructors.
ENGL 560: Environmental Field Experience
(3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: ENGL 550 and graduate classification. Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor.
Students spend a term on a project that requires fieldwork. Projects might include working for a federal, state, or private non-profit environmental organization or farm, or living and working in a specified natural area.

ENGL 561: Methods for Scholarship in Literature and the Humanities
Cr. 3.
Prereq: Graduate classification or permission from the instructor.
Intensive study of research methods and perspectives concerning the study of literature and the humanities at the master's level. Introduction to resources and techniques of research, the structure of academic articles, and strategies for argument in academic communication.

ENGL 562: Topics in the Study of Film
Cr. 3. Repeatable, maximum of 6 credits. S.
Prereq: Graduate classification or 6 credits in film at 300 level or above.
Intensive study of cinematic genres, periods, movements, or themes; e.g., The Musical, Classical Hollywood Cinema, Structural Film, Art and Cinema. General emphasis will be on American, British, and other Anglophone cinemas.

ENGL 569: Grant Writing
(Cross-listed with GR ST). (1-0) Cr. 1. S.
Prereq: at least two prior years of graduate classification.
Writing a winning proposal.

ENGL 586: Visual Rhetoric in Professional Communication
(3-0) Cr. 3.
Prereq: A course in professional communication.
Rhetorical theory and research in graphics, document design, and related principles of visual communication. Methods of designing texts, data displays, illustrations, and other visual elements in business and technical communication.

ENGL 587: Internship in Business, Technical, and Professional Communication
(3-0) Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Three graduate credits in business and technical writing or composition and rhetoric, permission of instructor. Limited to master's and doctoral degree candidates in the field of rhetoric and professional communication.
An opportunity to write, edit, and design business and technical documents in a professional setting.

ENGL 588: Supervised Practice Teaching in Teaching English as a Second Language
(Cross-listed with LING). (1-5) Cr. 3. F.S.SS.
Prereq: 9 credits toward the TESL/TEFL Certificate, 15 credits toward the TESL/AL master's degree, or 18 credits completed toward the ESL Endorsement option.
Intensive observation of ESL instruction and supervised practice in teaching learners of English in a context appropriate to the student teacher's goals. ENGL 588 cannot be used for teacher licensure and cannot be taken during student teaching.

ENGL 589: Supervised Practicum in Literary Editing
(3-0) Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: ENGL 550 and permission of instructor.
An opportunity to edit literary texts and gain experience in a literary publishing setting.

ENGL 590: Special Topics
(Cross-listed with LING). Cr. arr. Repeatable.
Prereq: Permission of the Director of Graduate Education according to guidelines available online.

ENGL 590A: Special Topics: Literature
Cr. arr. Repeatable.
Prereq: Permission of the Director of Graduate Education according to guidelines available online.

ENGL 590B: Special Topics: Teaching English as a Second Language (TESL)/Applied Linguistics
(Cross-listed with LING). Cr. arr. Repeatable.
Prereq: Permission of the Director of Graduate Education according to guidelines available online.

ENGL 590C: Special Topics: Composition and Rhetoric
Cr. arr. Repeatable.
Prereq: Permission of the Director of Graduate Education according to guidelines available online.

ENGL 590E: Special Topics: Rhetoric and Professional Communication
Cr. arr. Repeatable.
Prereq: Permission of the Director of Graduate Education according to guidelines available online.

ENGL 590F: Special Topics: Creative Writing
Cr. arr. Repeatable.
Prereq: Permission of the Director of Graduate Education according to guidelines available online.
ENGL 590G: Special Topics: Applied Linguistics and Technology
(Cross-listed with LING). Cr. arr. Repeatable.
Prereq: Permission of the Director of Graduate Education according to
guidelines available online

ENGL 591: Directed Readings
Cr. arr. Repeatable.

ENGL 591A: Directed Readings: Literature
Cr. arr. Repeatable.

ENGL 591B: Directed Readings: Teaching English as a Second Language
(TESL)/Applied Linguistics
(Cross-listed with LING). Cr. arr. Repeatable.

ENGL 591C: Directed Readings: Composition and Rhetoric
Cr. arr. Repeatable.

ENGL 591E: Directed Readings: Rhetoric and Professional
Communication
Cr. arr. Repeatable.

ENGL 591F: Directed Readings: Creative Writing
Cr. arr. Repeatable.

ENGL 591G: Directed Readings: Applied Linguistics and Technology
(Cross-listed with LING). Cr. arr. Repeatable.

ENGL 592: Core Studies in Rhetoric, Composition, and Professional
Communication
(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and
ENGL 250
Seminar on topics central to the fields of rhetoric and professional
communication or composition.

ENGL 592A: Core Studies: Rhetoric
(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and
ENGL 250
Seminar on topics central to the fields of rhetoric and professional
communication or composition.

ENGL 592B: Core Studies: Composition
(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and
ENGL 250
Seminar on topics central to the fields of rhetoric and professional
communication or composition.

ENGL 592C: Core Studies: Professional Communication
(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and
ENGL 250
Seminar on topics central to the fields of rhetoric and professional
communication or composition.

ENGL 595: Graduate Study and Travel
Cr. arr.
Prereq: Permission of instructor
Supervised study of an appropriate area of the discipline while traveling
in a foreign country or in the U.S. Special fees apply.

ENGL 595A: Graduate Study and Travel: Literature
Cr. arr.
Prereq: Permission of instructor
Supervised study of an appropriate area of the discipline while traveling
in a foreign country or in the U.S. Special fees apply.

ENGL 595B: Graduate Study and Travel: Creative Writing
Cr. arr.
Prereq: Permission of instructor
Supervised study of an appropriate area of the discipline while traveling
in a foreign country or in the U.S. Special fees apply.

ENGL 595C: Graduate Study and Travel: Linguistics
Cr. arr.
Prereq: Permission of instructor
Supervised study of an appropriate area of the discipline while traveling
in a foreign country or in the U.S. Special fees apply.

ENGL 595D: Graduate Study and Travel: Rhetoric and Professional
Communication
Cr. arr.
Prereq: Permission of instructor
Supervised study of an appropriate area of the discipline while traveling
in a foreign country or in the U.S. Special fees apply.

ENGL 595E: Graduate Study and Travel: Teacher Education
Cr. arr.
Prereq: Permission of instructor
Supervised study of an appropriate area of the discipline while traveling
in a foreign country or in the U.S. Special fees apply.

ENGL 599: Creative Component
Cr. 3. F.S.SS.
Prereq: Graduate classification, permission of major professor

Courses for graduate students:
ENGL 602: Research Methods in Rhetoric, Composition, and Professional Communication
(3-0) Cr. 3. S.
Prereq: ENGL 501
A workshop for advanced graduate students in rhetoric and professional communication. Focus on rhetorical analysis, qualitative methods, or quantitative methods.

ENGL 602A: Research Methods in Rhetoric, Composition, and Professional Communication: Qualitative Research
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: ENGL 501
A workshop for advanced graduate students in rhetoric and professional communication.

ENGL 602B: Research Methods in Rhetoric, Composition, and Professional Communication: Quantitative Research
(3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: ENGL 501
A workshop for advanced graduate students in rhetoric and professional communication.

ENGL 602C: Research Methods in Rhetoric, Composition, and Professional Communication: Rhetorical Analysis
(3-0) Cr. 3.
Prereq: ENGL 501
Extended practice in close textual analysis of various kinds of rhetorical artifacts. Attention to important theoretical concepts used in rhetorical analysis and to historical controversies over the scope and function of rhetorical analysis.

ENGL 603: Seminar in Composition Theory
(3-0) Cr. 3.
Prereq: ENGL 503
Exploration of relationships between theory and practice in current pedagogy. Intensive examination of contemporary theories of poststructuralism, new media, feminism, postcolonialism, or cultural studies and their impact on current pedagogical practice. Participation in pedagogical research and theory building.

ENGL 611: Seminar in Rhetorical Theory
(3-0) Cr. 3. Repeatable.
Prereq: ENGL 547 or ENGL 548
Rhetorical theory, criticism, and/or practice in relation to an historical period or a particular theoretical issue.

ENGL 623: Research Methods in Applied Linguistics
(Cross-listed with LING). (3-0) Cr. 3.
Prereq: ENGL 511 or LING 511
Survey of research traditions in applied linguistics. Focus on theoretical and practical aspects of quantitative and qualitative approaches to applied linguistic study, including experimental and quasiexperimental methods, classroom observation and research, introspective methods, elicitation techniques, case studies, interactional analysis, ethnography, and program evaluation. Computational tools and resources for linguistic research will be highlighted.

ENGL 626: Computer-Assisted Language Testing
(Cross-listed with LING). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: ENGL 510 or LING 510, ENGL 511 or LING 511, ENGL 519 or LING 519
Principles and practice for the use and study of computers and the Internet in second language assessment.

ENGL 630: Seminar in Applied Linguistics
(Cross-listed with LING). (3-0) Cr. 3. Repeatable.
Prereq: ENGL 510 or LING 510, ENGL 511 or LING 511
Topic changes each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feedback in CALL programs, technology and pronunciation, and advances in language assessment.

ENGL 631: Administration and Organization of Multimodal Writing Programs
(3-0) Cr. 3.
Prereq: ENGL 500, ENGL 503, ENGL 504, or ENGL 603
Survey of the major components of writing instruction in academic and nonacademic settings. History, theory, organization, and evaluation of writing programs. Guided observation of writing program functions at various institutions and businesses.

ENGL 699: Research
Cr. arr. Repeatable. F.S.SS.
Prereq: Graduate classification, permission of major professor
Research.

Environmental Science
From the College of Liberal Arts and Sciences
http://www.ensci.iastate.edu

Interdepartmental Undergraduate Programs
Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing
Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

**Undergraduate Study**

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.

2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

### 1. Environmental Science: 32 credits

Total Credits 15

Students in all ISU majors must complete a 3 credits in U.S. diversity and a 3 credits in international perspectives. Check the Environmental Science website (http://www.ensci.iastate.edu) for a list of approved courses.

Minimum of 120 credits required, including a minimum of 45 credits at the 300/400 level.

¹ Students complete at least 2-7 credits in Environmental Science including ENSCI 110, 201, 250, 381, 382 and 15 additional credits of approved ENSCI coursework.

² Students complete at least 12 credits in arts and humanities and 9 credits in social science from approved lists. These credits can also be used to meet the U.S. Diversity and International Perspectives requirements.
Students choose one course from the following Earth Science related courses: AGRON 182, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, BBMB 2221, or AGRON 259.

**Graduate Study**

Contact information for the graduate program:

https://enscigrad.iastate.edu/

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (https://enscigrad.iastate.edu/).

**Courses primarily for undergraduates:**

**ENSC 110: Orientation to Environmental Science**  
(1-0) Cr. 1. F.  
*Prereq: Freshman classification in EnSci*  
Overview of Environmental Science curriculum and discussion of professional opportunities. Offered on a satisfactory-fail basis only.

**ENSC 201: Introduction to Environmental Issues**  
(Cross-listed with BIOL, ENV S). (2-0) Cr. 2. F.  
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

**ENSC 202: Exploration of Environmental and Sustainability Issues**  
(1-0) Cr. 1. F.  
*Prereq: Credit or enrollment in ENSCI 201*  
Exploration of specific environmental and sustainability issues; designed to complement ENSCI 201. Offered on a satisfactory-fail basis only.

**ENSC 203: Exploration of Environmental Science**  
(1-0) Cr. 1. S.  
*Prereq: ENSCI 202.*  
Continued exploration of specific environmental science issues developed in ENSCI 202. Topics may vary in different years. Offered on a satisfactory-fail basis only.

**ENSC 250: Environmental Geography**  
(Cross-listed with ENV S). (3-0) Cr. 3. F.  
The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world.

**ENSC 251: Biological Processes in the Environment**  
(Cross-listed with BIOL). (3-0) Cr. 3. S.  
Principles of Biology from the level of macromolecules to the biosphere. Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles.

**ENSC 301: Natural Resource Ecology and Soils**  
(Cross-listed with NREM). (3-3) Cr. 4. F.  
*Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology*  
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes.

**ENSC 312: Ecology**  
(Cross-listed with A ECL, BIOL). (3-3) Cr. 4. F.SS.  
*Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L*  
Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.
ENSCI 312I: Ecology
(Cross-listed with A ECL, IA LL). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

ENSCI 324: Energy and the Environment
(Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.
Prereq: CHEM 163 or CHEM 177, MATH 140
Exploration of the origin of Earth's energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities.

ENSCI 345: Natural Resource Photogrammetry and Geographic Information Systems
(Cross-listed with NREM). (2-3) Cr. 3. S.
Prereq: Junior classification
Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses.

ENSCI 360: Environmental Soil Science
(Cross-listed with AGRON). (2-2) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or ENSCI 250 or GEOL 201
Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

ENSCI 370: GIS for Ecology and Environmental Science
(Cross-listed with BIOL). Cr. 1-6. Repeatable. F.S.
Prereq: Six credits in biological and/or physical sciences, and permission of instructor.
Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only.

ENSCI 381: Environmental Systems I: Introduction to Environmental Systems
(Dual-listed with ENSCI 581). (Cross-listed with BIOL, ENV S). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 382: Environmental Systems II: Analysis of Environmental Systems
(Dual-listed with ENSCI 582). (Cross-listed with BIOL). (2-2) Cr. 3. S.
Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 384: Introduction to Ecosystems
(3-0) Cr. 3. S.
Prereq: 12 credits of natural science including biology and chemistry
Biological and physical processes affecting material and energy flows in natural and managed ecosystems. Understanding and predicting climate and management impacts on ecosystem services and sustainability.

ENSCI 390: Internship in Environmental Science
Cr. arr. Repeatable. F.S.SS.
Prereq: Approval of the Environmental Science coordinator
Supervised off-campus work experience in the field of environmental science. Offered on a satisfactory-fail basis only.

ENSCI 391: Apprenticeship
Cr. arr. Repeatable. F.S.SS.
Prereq: Approval of the Environmental Science Coordinator
Practical experience in an approved setting such as a research laboratory, government office, or private office. Offered on a satisfactory-fail basis only.

ENSCI 402: Watershed Hydrology
(Dual-listed with ENSCI 502). (Cross-listed with GEOL, MTEOR, NREM).
(2-3) Cr. 3. F.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.
ENSCI 402I: Watershed Hydrology and Surficial Processes  
(Cross-listed with AGRON, IA LL). Cr. 4. SS.  
Prereq: Four courses in physical or biological sciences or engineering  
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminates) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed.

ENSCI 404: Global Change  
(Dual-listed with ENSCI 504). (Cross-listed with AGRON, ENV S, MTEOR).  
(3-0) Cr. 3. S.  
Prereq: Four courses in physical or biological sciences or engineering; junior standing  
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENSCI 405: Environmental Biophysics  
(Dual-listed with ENSCI 505). (Cross-listed with AGRON, MTEOR).  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: MATH 165 and some exposure to computer programming (any language)  
The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

ENSCI 406: World Climates  
(Cross-listed with AGRON, MTEOR).  
(3-0) Cr. 3. S.  
Prereq: AGRON 206/MTEOR 206  
Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement.

ENSCI 407: Watershed Management  
(Dual-listed with ENSCI 507). (Cross-listed with ENV S, NREM).  
(3-3) Cr. 4. S.  
Prereq: A course in general biology  
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 408I: Aquatic Ecology  
(Dual-listed with ENSCI 508I). (Cross-listed with IA LL). Cr. 4. SS.  
Prereq: Courses in ecology, chemistry, and physics  
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 409: Field Methods in Hydrogeology  
(Dual-listed with ENSCI 509). (Cross-listed with GEOL).  
(0-4) Cr. 3. Alt. SS., offered even-numbered years.  
Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473  
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 411: Hydrogeology  
(Dual-listed with ENSCI 511). (Cross-listed with GEOL).  
(3-2) Cr. 4. F.  
Prereq: Four courses in biological or physical sciences  
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

ENSCI 412: Micropaleontology  
(Cross-listed with GEOL).  
Cr. 3. Alt. F., offered even-numbered years.  
Prereq: GEOL 102 and GEOL 102L  
Evolution, identification and utility of major microfossil groups from the Mesozoic to present. Focus on Cenozoic applications including biostratigraphy, paleoclimate, and paleothermometry using assemblages, stable isotopes, Mg/Ca, and molecular fossils. Laboratory includes processing and analysis of specific microfossils. Major groups covered include foraminifera, calcareous nannofossils, sponge spicules, diatoms, radiolarians, and silicoflagellates.

ENSCI 413: Applied and Environmental Geophysics  
(Dual-listed with ENSCI 513). (Cross-listed with C E, GEOL).  
(2-2) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry  
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.
ENSCI 414: Applied Groundwater Flow Modeling  
(Dual-listed with ENSCI 514). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.  
**Prereq:** GEOL 411 or CE 473; MATH 165 or MATH 181  
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 415: Paleoclimatology  
(Dual-listed with ENSCI 515). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
**Prereq:** Four courses in biological or physical science  
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods, utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years).

ENSCI 416: Hydrologic Modeling and Analysis  
(Dual-listed with ENSCI 516). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years.  
**Prereq:** Four courses in Earth science, meteorology, or engineering; junior standing.  
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

ENSCI 418: Stream Ecology  
(Dual-listed with ENSCI 518). (Cross-listed with AECL). (2-3) Cr. 3. Alt. F., offered odd-numbered years.  
**Prereq:** A ECL 486  
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 419: Aqueous and Environmental Geochemistry  
(Dual-listed with ENSCI 519). (Cross-listed with GEOL). (2-2) Cr. 3. S.  
**Prereq:** CHEM 178, CHEM 178L; junior classification  
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 420: Environmental Engineering Chemistry  
(Dual-listed with ENSCI 520). (Cross-listed with CE). (2-3) Cr. 3. F.  
**Prereq:** C E 326, CHEM 178  
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

ENSCI 421I: Prairie Ecology  
(Cross-listed with IA LL). Cr. 4. SS.  
**Prereq:** Familiarity with basic principles in biological sciences and ecology  
Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects.

ENSCI 424: Air Pollution  
(Dual-listed with ENSCI 524). (Cross-listed with ABE, CE). (1-0) Cr. 1.  
**Prereq:** Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424A: Air Pollution: Air quality and effects of pollutants  
(Dual-listed with ENSCI 524A). (Cross-listed with ABE, CE). (1-0) Cr. 1.  
**Prereq:** Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424B: Air Pollution: Climate change and causes  
(Dual-listed with ENSCI 524B). (Cross-listed with ABE, CE). (1-0) Cr. 1.  
**Prereq:** Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424C: Air Pollution: Transportation Air Quality  
(Dual-listed with ENSCI 524C). (Cross-listed with ABE, CE). (1-0) Cr. 1.  
**Prereq:** CE 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.
ENSCI 424D: Air Pollution: Off-gas treatment technology
(Dual-listed with ENSCI 524D). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

ENSCI 424E: Air Pollution: Agricultural sources of pollution
(Dual-listed with ENSCI 524E). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 426: Stable Isotopes in the Environment
(Dual-listed with ENSCI 526). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Four courses in biological or physical science
Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 437: Watershed Modeling and Policy
(Dual-listed with ENSCI 537). (Cross-listed with AGRON). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CE 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

ENSCI 446: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with ENSCI 546). (Cross-listed with NREM). (2-3) Cr. 3. F.
Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

ENSCI 452: GIS for Geoscientists
(Dual-listed with ENSCI 552). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F.
Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 459: Environmental Soil and Water Chemistry
(Dual-listed with ENSCI 559). (Cross-listed with AGRON). (3-3) Cr. 4. F.
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended
An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

ENSCI 461I: Introduction to GIS
(Cross-listed with ENV S, IA LL, L A). Cr. 4. SS.
Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management.

ENSCI 463: Soil Formation and Landscape Relationships
(Dual-listed with ENSCI 563). (Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or AGRON 260
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

ENSCI 463I: Soil Formation and Landscape Relationships
(Dual-listed with ENSCI 563I). (Cross-listed with AGRON, IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Prereq: AGRON 182 (or equivalent)
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 464: Wetland Ecology
(Dual-listed with ENSCI 564). (Cross-listed with BIOL). (3-0) Cr. 3. S.
Prereq: 15 credits in biological sciences.
ENSCI 466: Ecosystem Service Management
(Dual-listed with ENSCI 566). (Cross-listed with ENT, NREM). (3-0) Cr. 3.
Alt. S., offered odd-numbered years.
Prereq: permission of instructor
Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENSCI 468: Applied Geostatistics for Geoscientists
(Dual-listed with ENSCI 568). (Cross-listed with GEOL, MTEOR). Cr. 3. F.
Prereq: GEOL 452, C R P 351, C R P 452, NREM 345, or NREM 446
Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression).

ENSCI 477: Soil Physics
(Dual-listed with ENSCI 577). (Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 182 or equivalent and MATH 166 recommended
The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 479: Surficial Processes
(Dual-listed with ENSCI 579). (Cross-listed with GEOL). (2-3) Cr. 3. F.
Prereq: GEOL 100 and GEOL 100L; or GEOL 201; or equivalent experience.
The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.

ENSCI 480: Engineering Analysis of Biological Systems
(Cross-listed with A B E). (2-2) Cr. 3. F.
Prereq: A B E 380 or permission of the instructor
Systems-level quantitative analysis of biological systems, including applications in foods, feeds, biofuels, bioenergy, and other biological systems. Introduction to economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance of these biological systems. Students enrolled in ABE 580 will be required to answer additional exam questions and report on two journal articles.

ENSCI 484: Ecosystem Ecology
(Cross-listed with BIOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: Combined 12 credits in biology, chemistry, and physics.
Introduction of the study of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

ENSCI 485: Soil and Environmental Microbiology
(Dual-listed with ENSCI 585). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

ENSCI 486: Aquatic Ecology
(Dual-listed with ENSCI 586). (Cross-listed with A ECL, BIOL). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

ENSCI 486L: Aquatic Ecology Laboratory
(Dual-listed with ENSCI 586L). (Cross-listed with A ECL, BIOL). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 487: Microbial Ecology
(Dual-listed with ENSCI 587). (Cross-listed with BIOL, GEOL, MICRO). (3-0) Cr. 3. F.
Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.
ENSCI 488: GIS for Geoscientists II
(Dual-listed with ENSCI 588). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3.
Alt. S., offered odd-numbered years.
Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

ENSCI 490: Independent Study
Cr. arr. Repeatable. F.S.S.S.
Prereq: Permission of the instructor and approval of the Environmental Science coordinator

ENSCI 490H: Independent Study: Honors
Cr. arr. Repeatable. F.S.S.S.
Permission of instructor and approval of Environmental Science coordinator.

ENSCI 495: Current Topics and Case Studies in Environmental Science
Cr. 1-3.
Prereq: Junior classification in Environmental Science, permission of instructor
Current topics and case studies related to the analysis and management of environmental systems. Individual and/or group projects.

ENSCI 496: Travel Course
Cr. arr. Repeatable.
Prereq: Permission of instructor
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings. A. International Tour B. Domestic Tour.

ENSCI 496A: Travel Course: International Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 496B: Travel Course: Domestic Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 498: Cooperative Education
Cr. R. Repeatable. F.S.S.S.
Prereq: Permission of Environmental Science Coordinator
Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

ENSCI 502: Watershed Hydrology
(Dual-listed with ENSCI 402). (Cross-listed with GEOL, MTEOR, NREM). (2-3) Cr. 3. F.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

ENSCI 504: Global Change
(Dual-listed with ENSCI 404). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. S.
Prereq: Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENSCI 505: Environmental Biophysics
(Dual-listed with ENSCI 405). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: MATH 165 and some exposure to computer programming (any language)
The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

ENSCI 507: Watershed Management
(Dual-listed with ENSCI 407). (Cross-listed with NREM). (3-3) Cr. 4. S.
Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.
ENSCI 508I: Aquatic Ecology
(Cross-listed with IA LL, NREM). Cr. 4. SS.
Prereq: Courses in ecology, chemistry, and physics
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 509: Field Methods in Hydrogeology
(Dual-listed with ENSCI 409). (Cross-listed with GEOL). (0-4) Cr. 3. Alt. SS., offered even-numbered years.
Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 511: Hydrogeology
(Dual-listed with ENSCI 411). (Cross-listed with GEOL). (3-2) Cr. 4. F.
Prereq: Four courses in biological or physical science
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

ENSCI 513: Applied and Environmental Geophysics
(Dual-listed with ENSCI 413). (Cross-listed with C E, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GEOL 100 or GEOL 201, algebra and trigonometry
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

ENSCI 514: Applied Groundwater Flow Modeling
(Dual-listed with ENSCI 414). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.
Prereq: GEOL 411 or C E 473; MATH 165 or MATH 181
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 515: Paleoclimatology
(Dual-listed with ENSCI 415). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: Four courses in biological or physical science
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~ 1 million years).

ENSCI 516: Hydrologic Modeling and Analysis
(Dual-listed with ENSCI 416). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: Four courses in earth science, meteorology, or engineering; junior standing
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

ENSCI 518: Stream Ecology
(Dual-listed with ENSCI 418). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 519: Aqueous and Environmental Geochemistry
(Dual-listed with ENSCI 419). (Cross-listed with GEOL). (2-2) Cr. 3. S.
Prereq: CHEM 178, CHEM 178L; junior classification
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.
ENSCI 520: Environmental Engineering Chemistry
(Dual-listed with ENSCI 420). (Cross-listed with C E). (2-3) Cr. 3. F.
Prereq: C E 326, CHEM 178
Principles of chemical and physical phenomena applicable to the
treatment of water and wastewater and natural waters; including
chemical equilibria, reaction kinetics, acid-base equilibria, chemical
precipitation, redox reactions, and mass transfer principles. Individual
laboratory practicals and group projects required.

ENSCI 521: Environmental Biotechnology
(Cross-listed with C E). (2-2) Cr. 3. F.
Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to
environmental engineering processes, role of microorganisms in
wastewater treatment and bioremediation, bioenergetics and kinetics,
metabolism of xenobiotic compounds, waterborne pathogens and
parasites, and disinfection. Term paper and oral presentation.

ENSCI 522: Water Pollution Control Processes
(Cross-listed with C E). (2-2) Cr. 3.
Prereq: C E 421 or C E 521
Fundamentals of biochemical processes, aerobic growth in a single
CSTR, multiple events in complex systems, and techniques for evaluating
kinetic parameters; unit processes of activated sludge system, attached
growth systems, stabilization and aerated lagoon systems, biosolids
digestion and disposal, nutrient removal, and anaerobic treatment
systems.

ENSCI 523: Physical-Chemical Treatment Process
(Cross-listed with C E). (2-2) Cr. 3.
Prereq: C E 520
Material and energy balances. Principles and design of physical-
chemical unit processes; including screening, coagulation, flocculation,
chemical precipitation, sedimentation, filtration, lime softening and
stabilization, oxidation, adsorption, membrane processes, ion exchange
and disinfection; recovery of resources from residuals and sludges;
laboratory exercises and demonstrations; case studies in mineral
processing and secondary industries.

ENSCI 524: Air Pollution
(Dual-listed with ENSCI 424). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in
statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D
and E.

ENSCI 524A: Air Pollution: Air quality and effects of pollutants
(Dual-listed with ENSCI 424A). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in
statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D
and E.

ENSCI 524B: Air Pollution: Climate change and causes
(Dual-listed with ENSCI 424B). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in
statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D
and E.

ENSCI 524C: Air Pollution: Transportation Air Quality
(Dual-listed with ENSCI 424C). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics.
Senior classification or above.

ENSCI 524D: Air Pollution: Off-gas treatment technology
(Dual-listed with ENSCI 424D). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH
166 or 3 credits in statistics. Senior classification or above

ENSCI 524E: Air Pollution: Agricultural sources of pollution
(Dual-listed with ENSCI 424E). (Cross-listed with A B E, C E). (1-0) Cr. 1.
Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in
statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D
and E.

ENSCI 526: Stable Isotopes in the Environment
(Dual-listed with ENSCI 426). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S.,
offered even-numbered years.
Prereq: Four courses in biological or physical science
Introduction to the theory, methods and applications of stable isotopes.
Primary focus on the origin, natural abundance, and fractionation of
carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic
occurrence for elucidation of physical, chemical, biological, and
environmental processes. Effects of plant physiology, photosynthesis,
trophic structure, diffusion, evaporation, chemical precipitation, soil
and atmospheric processes, and environmental factors on isotope
abundance.
ENSCI 528: Solid and Hazardous Waste Management
(Cross-listed with C E). (3-0) Cr. 3.
Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing
Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

ENSCI 531: Design and Evaluation of Soil and Water Conservation Systems
(Cross-listed with A B E). (2-3) Cr. 3. F.
Prereq: E M 378 or CH E 356
Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

ENSCI 532: Nonpoint Source Pollution and Control
(Cross-listed with A B E). (3-0) Cr. 3.
Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

ENSCI 533: Erosion and Sediment Transport
(Cross-listed with A B E, NREM). (2-3) Cr. 3. F.
Prereq: C E 372 or GEOL/ENSCI/MTEOR 402, MATH 166 or equivalent
Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

ENSCI 534: Contaminant Hydrogeology
(Cross-listed with GEOL). (3-0) Cr. 3. S.
Prereq: GEOL 511 or equivalent

ENSCI 535: Restoration Ecology
(Cross-listed with EEOB, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: BIOL 366 or BIOL 474 or graduate standing
Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

ENSCI 535I: Restoration Ecology
(Cross-listed with A ECL, EEOB, IA LL). Cr. 4. Alt. SS., offered even-numbered years.
Prereq: A course in ecology
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

ENSCI 536: Design and Evaluation of Soil and Water Monitoring Systems
(Cross-listed with A B E). (2-3) Cr. 3. Alt. S., offered even-numbered years.
Prereq: A B E 431
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.
ENSCI 537: Watershed Modeling and Policy
(Dual-listed with ENSCI 437). (Cross-listed with A B E). (2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CE 372 or equivalent
A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

ENSCI 546: Integrating GPS and GIS for Natural Resource Management
(Dual-listed with ENSCI 446). (Cross-listed with NREM). (2-3) Cr. 3. F.
Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

ENSCI 552: GIS for Geoscientists
(Dual-listed with ENSCI 452). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F.S.
Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 553: Soil-Plant Relationships
(Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 354
Composition and properties of soils in relation to the nutrition and growth of plants.

ENSCI 558: Laboratory Methods in Soil Chemistry
(Cross-listed with AGRON). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: AGRON 354 and CHEM 211
Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

ENSCI 559: Environmental Soil and Water Chemistry
(Dual-listed with ENSCI 459). (Cross-listed with AGRON). (3-3) Cr. 4. F.
Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended
An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

ENSCI 563: Soil Formation and Landscape Relationships
(Dual-listed with ENSCI 463). (Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 182 (or equivalent) or AGRON 260
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

ENSCI 563I: Soil Formation and Landscape Relationships
(Dual-listed with ENSCI 463I). (Cross-listed with AGRON, IA LL). Cr. 2. Alt. SS., offered even-numbered years.
Prereq: AGRON 182 (or equivalent)
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 564: Wetland Ecology
(Dual-listed with ENSCI 464). (Cross-listed with EEOB). (3-0) Cr. 3. S.
Prereq: 15 credits in biological sciences.

ENSCI 564I: Wetland Ecology
(Cross-listed with EEOB, IA LL). Cr. 4. SS.
Prereq: IA LL 312I
Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

ENSCI 566: Ecosystem Service Management
(Dual-listed with ENSCI 466). (Cross-listed with ENT, NREM). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: permission of instructor
Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.
ENSCI 568: Applied Geostatistics for Geoscientists
(Dual-listed with ENSCI 468). (Cross-listed with GEOL, MTEOR). Cr. 3. F.
Prereq: GEOL 452, C R P 351, C R P 452, NREM 345, or NREM 446
Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression).

ENSCI 571: Surface Water Hydrology
(Cross-listed with C E). (3-0) Cr. 3. S.
Prereq: C E 372
Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination.

ENSCI 572: Analysis and Modeling Aquatic Environments
(Cross-listed with C E). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: C E 372
Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

ENSCI 573: Groundwater Hydrology
(3-0) Cr. 3. F.
Prereq: C E 372

ENSCI 575: Soil Formation and Transformation
(Cross-listed with AGRON). (3-0) Cr. 3. F.
Prereq: AGRON 463 or equivalent
Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

ENSCI 577: Soil Physics
(Dual-listed with ENSCI 477). (Cross-listed with AGRON). (3-0) Cr. 3. S.
Prereq: AGRON 182 or equivalent and MATH 166 recommended
The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 578: Laboratory Methods in Soil Physics
(Cross-listed with AGRON). (0-3) Cr. 1. S.
Prereq: concurrent enrollment in AGRON 477 or AGRON 577
Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

ENSCI 579: Surficial Processes
(Dual-listed with ENSCI 479). (Cross-listed with GEOL). (2-3) Cr. 3. F.
Prereq: GEOL 100 and GEOL 100L, or GEOL 201; or equivalent experience.
The study of physical processes that shape Earth’s surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.

ENSCI 581: Environmental Systems I: Introduction to Environmental Systems
(Dual-listed with ENSCI 381). (Cross-listed with EEOB). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 582: Environmental Systems II: Analysis of Environmental Systems
(Dual-listed with ENSCI 382). (Cross-listed with EEOB). (2-2) Cr. 3. S.
Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 584: Ecosystem Science
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Combined 12 credits in biology, chemistry, and physics.
Advanced studies of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations and modern approaches to ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

ENSCI 585: Soil and Environmental Microbiology
(Dual-listed with ENSCI 485). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F.
Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended
The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.
ENSCI 586: Aquatic Ecology
(Dual-listed with ENSCI 486). (Cross-listed with A ECL, EEOB). (3-0) Cr. 3. F.
Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

ENSCI 586L: Aquatic Ecology Laboratory
(Dual-listed with ENSCI 486L). (Cross-listed with A ECL, EEOB). (0-3) Cr. 1. F.
Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 587: Microbial Ecology
(Dual-listed with ENSCI 487). (Cross-listed with EEOB, GEOL, MICRO). (3-0) Cr. 3. F.
Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

ENSCI 588: GIS for Geoscientists II
(Dual-listed with ENSCI 488). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

ENSCI 590: Special Topics
Cr. arr. Repeatable. F.S.S.
Prereq: Permission of major professor in Environmental Science faculty
Literature reviews and conference in accordance with needs and interest of the student.

ENSCI 599: Creative Component
Cr. arr. Repeatable. F.S.S.
Prereq: Permission of major professor in Environmental Science faculty
Creative component for nonthesis master of science degree.

Courses for graduate students:

ENSCI 685: Advanced Soil Biochemistry
(Cross-listed with AGRON, MICRO). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: AGRON 585
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

ENSCI 698: Seminar in Environmental Science
Cr. 1-3. Repeatable. S.
Reports and discussion of recent research and literature.

ENSCI 699: Research
Cr. arr. Repeatable. F.S.S.

Environmental Studies

Interdepartmental Undergraduate Program

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Secondary Major

The Environmental Studies secondary major is taken in addition to a first major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of ENV S coursework including:

At least one general survey course chosen from:

<table>

</tbody>
</table>

At least two human/societal perspectives courses chosen from:
ENV S 293  Environmental Planning
ENV S 320  Ecofeminism
ENV S 334  Environmental Ethics
ENV S 345  Population and Society
ENV S 355  Literature and the Environment
ENV S 363  U. S. Environmental History
ENV S 380  Energy, Environmental and Resource Economics
ENV S 382  Environmental Sociology
ENV S 384  Religion and Ecology
ENV S 385  Environmental Politics and Policies
ENV S 386  Environmental Planning
ENV S 388  Sustainable Communities
ENV S 389  Environmental Law and Planning

Beyond these three requirements, any Environmental Studies course and up to six credits of approved environmental coursework outside of Environmental Studies may be applied toward the 24 credit total for the major. Regardless of their home college, Environmental Studies majors must complete at least 9 credits of approved coursework in natural science. Unless prohibited by program or college rules, courses used to fulfill requirements of the Environmental Studies major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

**Minor**

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including:

At least one general survey course chosen from:
- ENV S 101: Environmental Geology: Earth in Crisis (Cross-listed with GEOL). (3-0) Cr. 3. F.S.S.
  - An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism. Summer - online only.
- ENV S 108: Introduction to Oceanography (Cross-listed with GEOL). (3-0) Cr. 3. F.
- ENV S 111: Geological Disasters (Cross-listed with GEOL). (1-0) Cr. 1. F.S.S.
  - An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism. Summer and fall - online only.

At least one integrative/Issues course chosen from:
- ENV S 160  Water Resources of the World
- ENV S 204  Biodiversity
- ENV S 324  Energy and the Environment
- ENV S 342  World Food Issues: Past and Present
- ENV S 404  Global Change
- ENV S 424  Sustainable and Environmental Horticulture Systems
- ENV S 450  Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:
- ENV S 293  Environmental Planning
- ENV S 320  Ecofeminism
- ENV S 334  Environmental Ethics
- ENV S 345  Population and Society
- ENV S 355  Literature and the Environment
- ENV S 363  U. S. Environmental History
- ENV S 380  Energy, Environmental and Resource Economics
- ENV S 382  Environmental Sociology
- ENV S 383  Environmental Politics and Policies
- ENV S 384  Religion and Ecology
- ENV S 442  The Policy and Politics of Coastal Areas
- ENV S 484  Sustainable Communities
- ENV S 491  Environmental Law and Planning

A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Courses primarily for undergraduates:**

ENV S 101: Environmental Geology: Earth in Crisis (Cross-listed with GEOL). (3-0) Cr. 3. F.S.S.
An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism. Summer - online only.

ENV S 108: Introduction to Oceanography (Cross-listed with GEOL). (3-0) Cr. 3. F.

ENV S 111: Geological Disasters (Cross-listed with GEOL). (1-0) Cr. 1. F.S.S.
Introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism. Summer and fall - online only.

ENV S 120: Introduction to Renewable Resources (Cross-listed with AGRON, NREM). (3-0) Cr. 3. F.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.
ENV S 130: Natural Resources and Agriculture
(Cross-listed with NREM). (3-0) Cr. 3. S.
Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

ENV S 160: Water Resources of the World
(Cross-listed with AGRON, GEOL, MTEOR). (3-0) Cr. 3. S.
Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment. Meets International Perspectives Requirement.

ENV S 173: Environmental Biology
(Cross-listed with BIOL). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

ENV S 201: Introduction to Environmental Issues
(Cross-listed with BIOL, ENSCI). (2-0) Cr. 2. F.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

ENV S 204: Biodiversity
(Cross-listed with BIOL). (4-0) Cr. 2. S.
Prereq: One course in life sciences
Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course.

ENV S 220: Globalization and Sustainability
(Cross-listed with ANTHR, GLOBE, M E, MAT E, SOC). (3-0) Cr. 3. F.S.
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement.

ENV S 250: Environmental Geography
(Cross-listed with ENSCI). (3-0) Cr. 3. F.
The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world.

ENV S 270: Foundations in Natural Resource Policy and History
(Cross-listed with L A, NREM). (3-0) Cr. 3. F.
The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.

ENV S 293: Environmental Planning
(Cross-listed with CPR). (3-0) Cr. 3. F.S.
Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

ENV S 320: Ecofeminism
(Cross-listed with WGS). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: WGS 201 or 3 credits in WGS at the 300 level or above
Women's relationships with the earth, non-human nature, and other humans. The course explores the connections between society's treatment of women and nature; origins of ecofeminism and how it relates to the science of ecology, conventional and sustainable agriculture as well as how ecofeminism relates to other branches of feminist philosophy. Evaluation and critique of modern science, technology, political systems and SOLUTIONS will be included. Meets U.S. Diversity Requirement

ENV S 324: Energy and the Environment
(Cross-listed with ENSCI, GEOL, MTEOR). (3-0) Cr. 3. S.
Prereq: CHEM 163 or CHEM 177, MATH 140
Exploration of the origin of Earth's energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities.
ENV S 334: Environmental Ethics
(Cross-listed with PHIL). (3-0) Cr. 3. F.
Prereq: Three credits in philosophy or junior classification
Thorough study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored.

ENV S 342: World Food Issues: Past and Present
(Cross-listed with AGRON, FS HN). (3-0) Cr. 3. F.S.SS.
Prereq: Junior classification
Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/undernutrition, poverty, hunger, access, and distribution. Meets International Perspectives Requirement.

ENV S 342H: World Food Issues: Past and Present, Honors
(Cross-listed with AGRON). (3-0) Cr. 3. F.S.
Prereq: Junior classification
Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Meets International Perspectives Requirement.

ENV S 345: Population and Society
(Cross-listed with SOC). (3-0) Cr. 3. F.
Prereq: SOC 134
Human population growth and structure; impact on food, environment, and resources; gender issues; trends of births, deaths, and migration; projecting future population; population policies and laws; comparison of the United States with other societies throughout the world. Meets International Perspectives Requirement.

ENV S 355: Literature and the Environment
(Cross-listed with ENGL). (3-0) Cr. 3.
Prereq: ENGL 250
Study of literary texts that address the following topics, among others: the relationship between people and natural/urban environments, ecocriticism, and the importance of place in the literary imagination.

ENV S 362: Global Environmental History
(Cross-listed with HIST). (3-0) Cr. 3. F.
Prereq: Either one of HIST 201, 202, or 207; or 3 credits of Environmental Studies; and sophomore classification.
Survey of the interactions of human communities with their environments from the beginnings of human history to the present. Topics include the domestication of animals, the agricultural revolution, industrialization, urbanization, deforestation, hydraulic management, fossil fuel consumption, and climate change.

ENV S 363: U. S. Environmental History
(Cross-listed with HIST). (3-0) Cr. 3.
Prereq: Sophomore classification
Survey of the interactions of human communities with the North American environment. Focus on the period from presettlement to the present, with a particular concentration on natural resources, disease, settlement patterns, land use, and conservation policies.

ENV S 380: Energy, Environmental and Resource Economics
(Cross-listed with ECON). (3-0) Cr. 3.
Prereq: ECON 101
Natural resource availability, use, conservation, and government policy, with emphasis on energy issues. Environmental quality and pollution control policies.

ENV S 381: Environmental Systems I: Introduction to Environmental Systems
(Cross-listed with BIOL, ENSCI). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENV S 382: Environmental Sociology
(Cross-listed with SOC). (3-0) Cr. 3. F.S.
Prereq: Soc 134 or 3 credits of ENV S
Environment-society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

ENV S 383: Environmental Politics and Policies
(Cross-listed with POL S). (3-0) Cr. 3. SS.
Prereq: sophomore classification
Major ideologies' relations to conservation and ecology. Processes, participants, and institutions involved in state, national, and global environmental policymaking. Case studies of environmental controversies and proposals for policy reform.
ENV S 384: Religion and Ecology
(Cross-listed with RELIG). (3-0) Cr. 3.
Introduction to concepts of religion and ecology as they appear in
different religious traditions, from both a historical and contemporary
perspective. Special attention to religious response to contemporary
environmental issues.
Meets International Perspectives Requirement.

ENV S 390: Internship in Environmental Studies
Cr. arr. Repeatable. F.S.S.
Prereq: Approval of the Environmental Studies Coordinator
Practical experience with nature centers, government agencies, schools,
private conservation groups, and other organizations. Offered on a
satisfactory-fail basis only.

ENV S 404: Global Change
(Cross-listed with AGRON, ENSCI, MTEOR). (3-0) Cr. 3. S.
Prereq: Four courses in physical or biological sciences or engineering; junior
standing
Recent changes in global biogeochemical cycles and climate; models
of future changes in the climate system; impacts of global change on
agriculture, water resources and human health; ethical issues of global
environmental change. Also offered online Alt. F, even-numbered years.

ENV S 407: Watershed Management
(Cross-listed with ENSCI, NREM). (3-3) Cr. 4. S.
Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed
level best management practices for modifying the impacts on water
quality, quantity and timing are discussed. Field project includes
developing a management plan using landscape buffers.

ENV S 417: Urban and Peri-urban Watershed Assessment
(Cross-listed with L A). (2-3) Cr. 3. F.
Prereq: Junior classification and 6 credits of natural science
Assessment and reduction of impacts in urban and peri-urban watershed
areas. Course prepares students to work with various analysis methods
for vegetation, topography, stormwater and stream condition as well as
work with data from other disciplines. Emphasis on communicating with
the public. Introductory GIS and GPS technologies are utilized. Learning
is largely field-based.

ENV S 424: Sustainable and Environmental Horticulture Systems
(Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Inquiry into ethical issues and environmental consequences of
horticultural cropping systems, production practices and managed
landscapes. Emphasis on systems that are resource efficient,
environmentally sound, socially acceptable, and profitable.

ENV S 442: The Policy and Politics of Coastal Areas
(Cross-listed with POL S). (3-0) Cr. 3. SS.
Exploration of political implications of coastal policy. Issues include:
"Carrying capacity," zoning, regulation of human development activities,
trade-offs between conservation and jobs, the quality of coastal lifestyle,
ways in which citizens participate in policy for coastal areas.

ENV S 450: Issues in Sustainable Agriculture
(Cross-listed with AGRON). (3-0) Cr. 3. F.
Agricultural science as a human activity; contemporary agricultural
issues from agroecological perspective. Comparative analysis of
intended and actual consequences of development of industrial
agricultural practices.

ENV S 460: Controversies in Natural Resource Management
(Cross-listed with NREM). (3-0) Cr. 3. F.S.
Prereq: NREM 120, and A ECL 312 or NREM 301, and Junior classification
Analysis of controversial natural resource issues using a case approach
that considers uncertainty and adequacy of information and scientific
understanding. Ecological, social, political, economic, and ethical
implications of issues will be analyzed.

ENV S 461I: Introduction to GIS
(Cross-listed with ENSCI, IA LL, L A). Cr. 4. SS.
Descriptive and predictive GIS modeling techniques, spatial statistics,
and map algebra. Application of GIS modeling techniques to
environmental planning and resource management.

ENV S 484: Sustainable Communities
(Cross-listed with C R P). (3-0) Cr. 3. S.
Prereq: Junior classification
The history and theory of sustainable community planning. Procedural
and substantive dimensions. Case studies of communities engaged in
sustainability planning. Use and development of indicators.

ENV S 490: Independent Study
Cr. arr. Repeatable. F.S.S.
Prereq: Permission of instructor and approval of Environmental Studies
coordinator

ENV S 490H: Independent Study: Honors
Cr. arr. Repeatable. F.S.S.
Prereq: Permission of instructor and approval of Environmental Studies
coordinator.
ENV S 491: Environmental Law and Planning
(Cross-listed with C R P L A). (3-0) Cr. 3. S.
Prereq: 6 credits in natural sciences
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

ENV S 496: Travel Course
Cr. arr. Repeatable.
Prereq: Permission of instructor
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENV S 496A: International Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENV S 496B: Domestic Tour
Cr. arr. Repeatable.
Prereq: Permission of instructor
Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

Genetics
Dr. Scott Nelson, Chair, Genetics Major Committee
Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study
Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Curriculum in Genetics - Requirements
Total Degree Requirement: 120 cr.
A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences
A grade of C– or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors

Total Credits  35-36

B. Course required of majors in the College of Agriculture and Life Sciences only
A minimum of 3 cr. of coursework in the area of environmental science from program approved list
Total Credits  3

2. Advanced Sciences Electives: 6 cr. from program approved list
A grade of C- or better is required in each course. No more than 3 cr. of GEN 490, 490R, 490H, 492, 496, 499, or 499H may be used to meet this requirement.

3. Mathematical Sciences
Complete at least one calculus course from MATH, minimum of 4 credits.
MATH 160  Survey of Calculus
MATH 165  Calculus I
MATH 181  Calculus and Mathematical Modeling for the Life Sciences
Complete at least one course from STAT, minimum of 3 credits.
STAT 101  Principles of Statistics
STAT 104  Introduction to Statistics
Complete at least one additional course from MATH or STAT, minimum of 4 credits.
MATH 166  Calculus II
STAT 301  Intermediate Statistical Concepts and Methods
Total Credits  11-12

4. Supporting Sciences
CHEM 177  General Chemistry I  4
CHEM 177L  Laboratory in General Chemistry I  1
CHEM 178  General Chemistry II  3
CHEM 178L  Laboratory in College Chemistry II  1
CHEM 331  Organic Chemistry I  3
CHEM 331L  Laboratory in Organic Chemistry I  1

CHEM 332L  Laboratory in Organic Chemistry II  1
PHYS 111  General Physics  5
or PHYS 221  Introduction to Classical Physics I  5
PHYS 112  General Physics  5
or PHYS 222  Introduction to Classical Physics II
Choose one of the following options  6-7
Option 1
BBMB 404  Biochemistry I
And one of the following:
BBMB 405  Biochemistry II
BBMB 411  Techniques in Biochemical Research
CHEM 211 & 211L  Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory
CHEM 325  Chemical Thermodynamics
Option 2
BBMB 420  Mammalian Biochemistry
And one of the following:
BBMB 411  Techniques in Biochemical Research
CHEM 211 & 211L  Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory
CHEM 325  Chemical Thermodynamics

Total Credits  33-34

5. International Perspectives: 3 cr. from university approved list
This course can satisfy both the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list
This course can satisfy both the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.
7. Communications/Information Literacy

A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 250 and advanced writing. (The College of Agriculture and Life Sciences requires a C or better in ENGL 150, as well.)

8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

| Humanities course from college approved list | 3 |
| Dean of College requirement choice | |
| Ethics course from college approved list   | 3 |
| Total Credits                           | 9 |

B. College of Liberal Arts and Sciences

| Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list | 12 |
| Social Science courses from college approved list | 9 |

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.

| Total Credits | 21 |

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used only to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

Advanced 3 College 3
Writing Requirement
(ENGL 302-316)

10-16   12-16

* Summer: Students taking the MCAT need to have completed biochemistry and physics by this time. Others can complete during the senior year.

Courses primarily for undergraduates:

GEN 110: Genetics Orientation
(1-0) Cr. 1. F.
This course is intended for first year students and others new to the genetics major. Discussion of university policies and resources, requirements of the major, career opportunities, and other topics related to the first year experience.

GEN 112: Genetics Orientation for Transfer Students
(0.5-0) Cr. 0.5. S.
Eight-week course for external transfer students and internal change of major students. Discussion of university policies and resources, requirements of the major, and career opportunities. Only one of GEN 110 or 112 may count toward graduation.

GEN 298: Cooperative Education
Cr. R. F.S.S.S.
Prereq: Permission of department cooperative education coordinator; sophomore classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 313: Principles of Genetics
(Cross-listed with BIOL). (3-0) Cr. 3. F.S.S.S.
Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

GEN 313L: Genetics Laboratory
(Cross-listed with BIOL). (0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in BIOL 313
Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.
GEN 320: Genetics, Agriculture and Biotechnology  
(Cross-listed with AGRON). (3-0) Cr. 3. F.S.  
Prereq: BIOL 212  
Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

GEN 322: Introduction to Bioinformatics and Computational Biology  
(Cross-listed with BCBIO, BIOL). (3-0) Cr. 3. F.  
Prereq: BIOL 212  
Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

GEN 340: Human Genetics  
(3-0) Cr. 3. F.S.S.  
Prereq: BIOL 313 or GEN 313  
Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

GEN 349: The Genome Perspective in Biology  
(Cross-listed with BIOL). (2-2) Cr. 3. S.  
Prereq: GEN 313 or GEN 320  
Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems.

GEN 398: Cooperative Education  
Cr. R. F.S.S.  
Prereq: Permission of department cooperative education coordinator; junior classification  
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 402: Microbial Genetics and Genomics  
(Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: MICRO 302, Biol 313  
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics.

GEN 409: Molecular Genetics  
(3-0) Cr. 3. F.S.  
Prereq: BIOL 313 or GEN 313  
Principles of molecular genetics and analysis of gene expression, including elements of the Central Dogma (DNA replication, transcription, and translation) and gene regulation. Utilizing examples from the primary literature to illustrate experimental design, data analysis, and interpretation.

GEN 410: Analytical Genetics  
(3-0) Cr. 3. F.S.  
Prereq: BIOL 313 or GEN 313  

GEN 444: Bioinformatic Analysis  
(Cross-listed with BCB, BCBIO, BIOL, COM S, CPR E). (4-0) Cr. 4. F.  
Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).  
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

GEN 462: Evolutionary Genetics  
(Cross-listed with BIOL). (3-0) Cr. 3. F.  
Prereq: BIOL 315  
The genetic basis of evolutionary processes in eukaryotic organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.
GEN 490: Independent Study
Cr. 1-5. Repeatable, maximum of 9 credits.
Prereq: GEN 313, junior or senior classification, permission of instructor
Independent study in any area of genetics. Students may use no more than 9 credits of university-wide 490 credits (including Gen 490) toward the total of 120 credits required for graduation.

GEN 491: Undergraduate Seminar, Professional Practice in Genetics Disciplines
(1-0) Cr. 1. F.S.
Prereq: BIOL/GEN 313; credit or enrollment in GEN 409 or GEN 410; Junior Classification
Intended to develop career objectives and obtain positions appropriate to the goals of students, in particular juniors, in preparation for position searches in the senior year. Discussion of various career paths in genetics disciplines; identification of experiences to enhance entry to specific careers; exposure to professional practices not covered elsewhere including literature database management, scientific figure preparation for publication, the peer-review journal system, the federal competitive grants system, laboratory budgets and management, authorship and collaborations, etc.; preparation of effective curricula vitae and application letters; and verbal scientific discourse appropriate to interview interactions and other professional settings.

GEN 492: Undergraduate Teaching Experience
Cr. 1-2. Repeatable, maximum of 9 credits. F.S.
Prereq: BIOL 212, junior or senior classification, permission of instructor
For students registering to be undergraduate laboratory or classroom assistants. Offered on a satisfactory-fail basis only. No more than 2 credits of GEN 492 may be applied toward the Genetics advanced course requirement.

GEN 495: Special Topics in Genetics
(1-0) Cr. 1-3. Repeatable, maximum of 3 credits. F.S.
Prereq: GEN 313; permission of instructor
Content varies from year to year. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 496: Attendance and Critique of Genetics Seminars
Cr. 1. Repeatable, maximum of 3 credits. F.S.
Prereq: GEN 313, junior or senior classification, permission of instructor
Attendance and critique of departmental seminars in BBMB, GDCB, or EEOB. Offered on a satisfactory-fail basis only. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 498: Cooperative Education
Cr. R. F.S.S.
Prereq: Permission of department cooperative education coordinator; senior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 499: Genetics Research
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.S.
Prereq: GEN 313, junior or senior classification, permission of instructor
Independent research in any area of genetics. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 499H: Genetics Research for Honors
Cr. 1-5. Repeatable, maximum of 9 credits. F.S.S.
Prereq: GEN 313, junior or senior classification, permission of instructor
Independent research in any area of genetics; for Honors students only. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

**Geology**

The bachelor of science major in Geology prepares the student for a professional career and/or graduate study in the geological sciences. Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct past environments and anticipate future problems. Graduates provide essential information for solving problems for resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, staff members in state and U.S. geological surveys, government regulators, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

### Geology Double Major/Double Degree Options
The Geology program has identified the core of 31 credits of geology courses that can complement a BS degree in materials engineering, civil engineering, environmental science, or biology for students wishing to earn a major or second BS in geology. The Geology Double Major/Degree programs allow students in academic programs with affinity to geology to complete both programs in four years. These programs open up the opportunity to pursue careers or a graduate degree in the geosciences. Please contact Dr. Cinzia Cervato for more information regarding the Geology Double Major/Degree programs. See suggested pathways on the Four Year Plan link.
Combined Degrees: A concurrent program is offered which combines a bachelor of science degree in geology and a master of science degree in geology. This program gives well-qualified Iowa State juniors and seniors the opportunity to begin working on the M.S. degree before completing the B.S. degree, reducing by at least one year the normal time period necessary to complete both degrees separately. Review the department website or contact the current program head for more information regarding this option.

Required courses for BS in Geology include:

<table>

</tr>
<tr>
<td>CHEM 178L</td>
<td>Laboratory in College Chemistry II</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 111</td>
<td>General Physics</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 112</td>
<td>General Physics</td>
<td>5</td>
</tr>
</tbody>
</table>

And 6 additional credits of either geology electives or courses from an approved departmental list of science, engineering, and mathematical disciplines outside of geology.

Total Credits: 33

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The department requires a grade of C or better in ENGL 309 or ENGL 314.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 150</td>
<td>Critical Thinking and Communication</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 250</td>

<td>3</td>
</tr>
</tbody>
</table>

Minor - Geology

A minor in Geology may be earned by taking 15 credits of geology coursework, including:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 100</td>
<td>How the Earth Works</td>
<td>3</td>
</tr>
<tr>
<td>or GEOL 201</td>
<td>Geology for Engineers and Environmental Scientists</td>
<td>3</td>
</tr>
<tr>
<td>or GEOL 101</td>
<td>Environmental Geology: Earth in Crisis</td>
<td>1</td>
</tr>
<tr>
<td>GEOL 100L</td>
<td>How the Earth Works: Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>GEOL 102</td>
<td>History of the Earth</td>
<td>3</td>
</tr>
<tr>
<td>GEOL 102L</td>
<td>History of the Earth: Laboratory</td>
<td>1</td>
</tr>
</tbody>
</table>

Although many students will take GEOL 100 as the first course in this sequence, GEOL 101 or GEOL 201 may be taken in place of GEOL 100. Note: all students must take GEOL 100L (How the Earth Works: Laboratory). The remainder of the coursework should be at the 300 level or above.

FOUR YEAR PLAN

Below is a suggested pathway for new majors.

**Geology, B.S.**

**Freshman**

<table>
<thead>
<tr>
<th>Term</th>
<th>Fall Credits</th>
<th>Spring Credits</th>
<th>Total Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 150</td>
<td>3</td>
<td>GEOL 102</td>
<td>3</td>
</tr>
<tr>
<td>GEOL 100</td>
<td>3</td>
<td>GEOL 102L</td>
<td>1</td>
</tr>
<tr>
<td>or 101</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>GEOL 100L</td>
<td>1</td>
<td>CHEM 178</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 177</td>
<td>4</td>
<td>CHEM 178L</td>
<td>1</td>
</tr>
<tr>
<td>CHEM 177L</td>
<td>1</td>
<td>MATH 166</td>
<td>4</td>
</tr>
</tbody>
</table>

No more than 9 credits in 490 may be counted toward a degree in Geology.
Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check [http://www.registrar.iastate.edu/courses/div-ip-guide.html](http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS foreign-language requirement.

Choose from list of approved courses available from an adviser or the departmental office.

### FOUR YEAR PLANs - suggested Pathways for geology Double MajorS/Double degreeS

The Geology Double Major/Degree pathways include a core of 31 credits of geology courses designed to complement a BS degree in materials engineering, civil engineering, environmental science, or biology with a major or, in some cases, a second BS degree in geology. The Geology Double Major/Degree programs allow students in academic programs with affinity to geology to complete their programs of study in four years (which may include credits earned in summer). Students should work closely with their advisors in each degree area to ensure that all requirements are met.

*Geology + Materials Engineering*
Graduate Study

The department offers programs leading to the master of science and doctor of philosophy with majors in Earth Science, Geology, and Meteorology. Program options are available for the M.S. and Ph.D. degrees in earth science leading to careers in teaching. The department also cooperates in the interdepartmental major in Water Resources (see Index). Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate background and performance and their expressed goals.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology. A non-thesis option is also offered for the M.S. degree in Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

Course requirements for the MS degree include MTEOR 542, 543, 507 or 518, 552 or 516x, and 502 or 504 or 505 or 605. In addition to the 5 required courses from this list, students must take at least 3 more credits of graduate course work in Meteorology, Agricultural Meteorology, or a field related to their research interests (students will work closely with their POS committee to determine the exact amount of structured course work required – typically this is 18-21 credits). Students without prior

synoptic meteorology course work must complete MTEOR 511 and may substitute these credits in place of the required MTEOR 507 or 518 courses.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

Courses primarily for undergraduates:

GEOL 100: How the Earth Works
(3-0) Cr. 3. F.S.SS.
How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, landforms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in Geol 100L.

GEOL 100L: How the Earth Works: Laboratory
(0-2) Cr. 1. F.S.
Prereq: Credit or enrollment in GEOL 100
Students will gain understanding of how Earth processes affect their lives and how they affect the Earth, and of the complex nature of the Earth and its processes. They will gain a deep knowledge of the methods used to understand the time scales and rates of Earth processes also through an applied research experience on groundwater and surface water.

GEOL 101: Environmental Geology: Earth in Crisis
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.SS.
An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism. Summer - online only.

GEOL 102: History of the Earth
(3-0) Cr. 3. S.
Prereq: GEOL 100 or GEOL 201
The Earth’s physical and biological evolution; concepts of global tectonics. Methods used to decipher earth history. Students majoring in geology must also enroll in Geol 102L.

GEOL 102L: History of the Earth: Laboratory
(0-2) Cr. 1. S.
Prereq: Credit or enrollment in GEOL 102
Introduction to the use of sedimentary rocks and fossils in reconstructing the Earth’s history.
GEOL 103: Age of Dinosaurs
Cr. 1. F.
