

ENGINEERING MANAGEMENT

Engineering Management Master's Degree

The Engineering Management Program focuses on developing an individual's engineering, science and management skills so they can succeed in a technology driven environment. There is a growing need for engineers that can build multi-disciplinary design teams, then lead those teams to solve technical and business challenges. The Iowa State University Master of Engineering in Engineering Management Program is designed to train leaders who can meet both the technical and managerial challenges in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

To be considered for admission, the applicant should have a bachelor's degree in engineering or related field from a college, university, or technical school of recognized standing. Non-engineering backgrounds will be considered on a case-by-case basis. High academic achievement or other persuasive evidence of professional accomplishments is expected for admission to the program. The GRE is not required.

Applicants for admission to this program apply through the ISU Graduate College. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to nine credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (<https://www.elo.iastate.edu/admission-and-enrollment>)

The Master of Engineering in Engineering Management Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Degree Requirements

Engineering Management Core:

Intro/Core (required first year)

I E 563	Engineering and Systems Management	3
I E 565	Systems Engineering and Analysis	3
Core (required)		
SCM 524	Strategic Process Analysis and Improvement	3

I E 570	Systems Engineering and Project Management	3
MGMT 583	Formulating and Implementing Innovation Strategies	3
ACCT 581	Accounting for Decision Making	3
Electives		
I E 560	Engineering Risk Analysis	3
I E 561	Total Quality Management	3
I E 564	Decision Analysis	3
I E 572	Design and Evaluation of Human-Computer Interaction	3
I E 577	Human Factors	3
CON E 380	Engineering Law	3
FIN 501	Financial Valuation and Corporate Financial Decisions	3
MKT 501	Marketing	3
MGMT 503	Professional Responsibility in Business and Society (One course from any graduate program)	3
One course from any graduate program		3
