Communications and arts (for example, journalism, speech, writing, drama, art, world language, communication studies, advertising, public relations)

Natural sciences and mathematical disciplines (for example, chemistry, physics, biology, geological and atmospheric sciences, mathematics, statistics, computer science, data science, environmental science)

Social sciences (for example, sociology, psychology, economics, political science, anthropology, geography)

Professional fields (for example, business, education, family and consumer sciences, agriculture, engineering – generally courses taught outside the College of Liberal Arts and Sciences)

At least 24 upper-level credits are required in the three distribution areas with a minimum of 6 upper-level credits in each of the areas.

Other Requirements

Included in the total of 120 credits must be the following:

45 upper-level credits from a four-year college

30 credits from ISU earned during the junior/and or senior year.

Three credits of course work in U.S. Diversity and 3 credits in International Perspectives.

A grade average of at least 2.00 (a C average) in all coursework applied to the B.L.S. degree and in all upper-level coursework.

A grade of C or better in ENGL 250.

Proficiency in upper-level communication demonstrated by completion of an approved composition/communication course from a four-year college.

Linguistics

Linguistics is a cross-disciplinary program in the College of Liberal Arts and Sciences designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, communication disorders, computer science, English, psychology, and speech communication and world languages and cultures, thus providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as teaching English both as a first and as a second language, second language studies, psycholinguistics, cross-cultural communication, linguistic anthropology, computational linguistics, speech-language pathology, and audiology.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major.

Majors in linguistics complete a minimum of 36 hours in linguistics with a grade of C or better in each linguistics course. Courses specifically required are:

LING 119	Introduction to World Languages	3
LING 120	Computers and Language	3
LING 207	Introduction to Symbolic Logic	3
LING 219	Introduction to Linguistics	3
LING 220	Descriptive English Grammar	3
LING 371	Phonetics and Phonology	3
LING 413	Psychology of Language	3
LING 420	History of the English Language	3
LING 437	Grammatical Analysis	3

In addition, linguistics majors must choose 9 credits of elective courses. Discuss choices with the adviser. Suggested areas of further study are:

Communication Disorders

LING 275	Introduction to Communication Disorders	3
LING 286	Communicating with the Deaf	3
LING 471	Language and Reading Development in Children	3
CMDIS 480B	Topics in Communication Disorders: Articulation and Phonological Disorders	3

Computers and Linguistics

LING 320	Topics in Linguistic Structure	3
LING 331	Theory of Computing	3
LING 410	Language as Data	3

Second Language Studies

ENGL 322	Language and Society	3
ENGL 324	Introduction to Teaching ESL Literacy	3
ENGL 325	Teaching Methods for ESL Learners: Oral Communication Skills	3
LING 425	Second Language Learning and Teaching	3

Sociolinguistics and Language

LING 305	Language, Thought and Action	3
ENGL 319	Studies in Language and Diversity	3
ENGL 322	Language and Society	3
COMST 325	Nonverbal Communication	3
LING 422	Women, Men, and the English Language	3

Spanish Linguistics

LING 351	Introduction to Spanish-English Translation	3
LING 352	Introduction to Spanish Phonology	3
LING 354	Introduction to Spanish-English Interpretation	3
LING 462	Contrastive Analysis of Spanish/ English for Translators	3
LING 463	Contemporary Spanish Linguistics	3

Additional courses in linguistics may include ANTHR 309 and special topics offered through LING 319 and 320, which are repeatable. They also include courses for study abroad, especially LING 395, and independent studies through LING 490. Majors in linguistics must show proficiency in a foreign language equivalent to that achieved after two years of university-level study. Alternatively, majors in linguistics can demonstrate university-level study in two foreign languages of at least one year each.

Minors in linguistics are individually tailored to the interests of the student, who consults with the linguistics adviser to develop the minor program of study. All minors must have a minimum of 15 credits in linguistics, of which 6 must be in courses numbered over 300. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. All programs must include LING 219 Introduction to Linguistics.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
LIB 160	Information Literacy	1

Continuing Communication Proficiency is based on one course from ENGL 314, a WLC 370-379 course, or a CL ST 370-379 course.

For information about using linguistics courses in an interdisciplinary studies major, see Liberal Arts and Sciences, Cross-Disciplinary Studies.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

Graduate Study

A graduate minor in linguistics permits students to investigate various aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines. Graduate courses for the minor may be cross-listed with courses in Anthropology, Communication Disorders, Computer Science, English, Psychology, and World Languages and Cultures.

For the master's degree, a declared minor consists of 9 credits in linguistics including two foundation courses:

LING 511	Introduction to Linguistic Analysis	3
One of the following:		3
LING 514	Sociolinguistics	
LING 527	Discourse Analysis	
LING 537	Corpus Approaches to Grammatical Analysis	
And one elective from the list of courses approved for graduate credit		3
Total Credits		9

For the Ph.D. degree, the minor consists of 12 credits in linguistics including:

LING 511	Introduction to Linguistic Analysis	3
LING 537	Corpus Approaches to Grammatical Analysis	3
And two electives from the list of courses approved for graduate credit		6
Total Credits		12

Additional courses beyond those listed below may be used as electives. The chair of the supervisory committee can provide information about these.

At least one member of the linguistics faculty will serve on a student's program of study committee. A list of faculty members may be obtained from the Linguistics program website. Ph.D. candidates will write one section of the preliminary examination on an area of linguistics. Students in Teaching English as a Second Language/Applied Linguistics are not eligible for a graduate minor in linguistics.

Mathematics

Undergraduate Study

The program in mathematics offers training for students planning to enter secondary education teaching, to work in mathematics and computation for industry, or to continue their studies in graduate school. Students may satisfy the major requirements in several ways, which are designed to meet these various career objectives. Graduates will understand a broad range of mathematical topics, acquire skills for solving problems in diverse situations, and they will be able to construct and effectively communicate rigorous arguments to demonstrate mathematical facts.

Curriculum

All students are required to earn credit for the following core courses:

MATH 101	Orientation in Mathematics	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 201	Introduction to Proofs	3
MATH 265	Calculus III	4
One of the following:		3-4
MATH 317	Theory of Linear Algebra	
MATH 407	Applied Linear Algebra	
Total Credits		19-20

To complete the major, leading to a Bachelor of Science degree, students must choose from one of the following four pathways:

Mathematics Major

This degree program is designed for students planning to work in industry or those who plan to continue their studies mathematics at the graduate level. Students are required to earn credit for the following courses:

One of the following:		3-4
MATH 266	Elementary Differential Equations	
MATH 267	Elementary Differential Equations and Laplace Transforms	
MATH 301	Abstract Algebra I	3
MATH 414	Analysis I	3
MATH 492	Undergraduate Seminar	2
Additional MATH courses at the 300, 400, or 500 level		15
Total Credits		26-27

Additionally, the courses must include one of the following sequences:

MATH 301	Abstract Algebra I	6
& MATH 403X	Intermediate Abstract Algebra	
MATH 304	Combinatorics	6
& MATH 314	and Graph Theory	
MATH 373	Introduction to Scientific Computing	6
& MATH 481	and Numerical Methods for Differential Equations	
MATH 414	Analysis I	6
& MATH 415	and Analysis II	
MATH 435	Geometry I	6
& MATH 436	and Geometry II	

Mathematics Major with Actuarial Science Certificate

This degree program is designed for students pursuing a career as an actuary or in the financial sector. Students are required to earn credit for the following courses:

MATH 240	Mathematics of Investment and Credit	3
MATH 341	Introduction to the Theory of Probability and Statistics I	4
MATH 414	Analysis I	3
MATH 441	Life Contingencies I	3
MATH 442	Life Contingencies II	3
MATH 492	Undergraduate Seminar	2
Total Credits		18

Additionally, students must meet the requirements for the Actuarial Science Certificate (see /collegeofbusiness/actuarialscience/#certificatetext).

Mathematics Major with Applications

This degree program is for students who want to specialize in the application of mathematics to an area of study. It is recommended for those who plan to work in industry or those who plan to continue studying their specialization area at the graduate level. Students are required to earn credit for the following courses:

One of the following:		3-4
MATH 266	Elementary Differential Equations	
MATH 267	Elementary Differential Equations and Laplace Transforms	
One of the following:		3
MATH 304	Combinatorics	
MATH 314	Graph Theory	
Three of the following:		9-10
MATH 301	Abstract Algebra I	
MATH 341	Introduction to the Theory of Probability and Statistics I	

MATH 350	Number Theory	
MATH 365	Complex Variables with Applications	
MATH 373	Introduction to Scientific Computing	
MATH 385	Introduction to Partial Differential Equations	
MATH 414	Analysis I	
MATH 424	Introduction to High Performance Computing	
MATH 481	Numerical Methods for Differential Equations	
MATH 492	Undergraduate Seminar	2
Courses at the 300, 400, or 500 level from the following designations:		12
AER E, A B E, ASTRO, BBMB, BCB, BCBIO, BIOL, B M E, B M S, CH E, CHEM, C E, CPR E, COM S, CON E, DS, ECON, E E, E M, ENSCI, GEN, GEOL, I E, MAT E, M E, MTEOR, MICRO, NUC E, PHIL, PYSCH, PHYS, S E, SOC, STAT		

Total Credits 29-31

Mathematics Major for Teacher Preparation

This degree program prepares students for a career in secondary education. Students are required to earn credit for the following courses:

One of the following: 3-4

COM S 107	Windows Application Programming	
COM S 207	Fundamentals of Computer Programming	
COM S 227	Object-oriented Programming	
EDUC 203 - Educational Technology Sequence		1
EDUC 204	Social Foundations of Education in the United States: Secondary	3
EDUC 219	Orientation to Teacher Education: FCS Education, History, Math and Science Majors	1
EDUC 280A	Pre-Student Teaching Experience I: Core Experience	1-2
EDUC 280J	Pre-Student Teaching Experience I: Mathematics Clinic	1
EDUC 303 - Educational Technology Sequence		1
EDUC 395	Teaching Disciplinary Literacy	3
EDUC 403 - Educational Technology Sequence		1
EDUC 406	Social Justice Education and Teaching: Secondary	3
EDUC 417C	Student Teaching: Mathematics	arr †
EDUC 480C	Pre-Student Teaching Experience III: Mathematics	0.5-2
EDUC 513	Mathematical Problem Solving in K-12 Classrooms	3
One of the following:		3-4
MATH 266	Elementary Differential Equations	
MATH 267	Elementary Differential Equations and Laplace Transforms	
MATH 301	Abstract Algebra I	3

MATH 341	Introduction to the Theory of Probability and Statistics I	4
MATH 397	Teaching Secondary Mathematics Using University Mathematics	3
MATH 414	Analysis I	3
MATH 435	Geometry I	3
MATH 436	Geometry II	3
MATH 497	Teaching Secondary School Mathematics	3
STAT 201	Introduction to Statistical Concepts and Methods	4
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	3

Total Credits 53.5-58

† Arranged with instructor.

Additionally, students must meet the professional teaching education requirements established by the University Teacher Education Program (see <http://education.iastate.edu/undergraduate-studies/secondary-education/>)

University and College Requirements

In addition to the core and pathway courses, students are also required to earn credit for the following courses:

Courses from General Education Area I - Arts and Humanities	¹	12
Courses from General Education Area IIB - Natural Sciences	¹	8
Courses from General Education Area III - Social Sciences	^{1,2}	9
Courses meeting the international perspectives requirement	³	3
Courses meeting the U.S. diversity requirement	³	3
LIB 160	Information Literacy	1
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	⁴ 3
One of the following:		⁵ 3
ENGL 302	Business Communication	
ENGL 303	Free-Lance Writing for Popular Magazines	
ENGL 305	Creative Writing: Nonfiction	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
MATH 491	Undergraduate Thesis	⁶

¹ Possible choices can be found here: <https://las.iastate.edu/students/academics/general-education/>

² Students pursuing the Mathematics Major for Teacher Preparation are required to take PSYCH 230 or HD FS 102, PYSCH 333, and earn a grade of C or better in each course.

³ Courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements.

⁴ Students must earn a grade of C or better.

⁵ Students must earn a grade of C- or better.

⁶ With departmental approval.

Furthermore, students must earn a minimum of 120 credits, including a minimum of 45 credits at the 300 or 400 level, and including at least 8 credits in the major at the 300/400 level with a grade of C or better. At least 55 of these credits must be earned at a four-year institution, and the last 32 credits must be earned at Iowa State University. A maximum of 16 technical credits are allowed, and a maximum of 9 P-NP credits of free electives may apply. Students must also meet the LAS World Language requirement and have a minimum 2.00 ISU cumulative Grade Point Average.

Undergraduate Minor

The department offers a minor in mathematics. All minors require at least 15 credits, including at least 6 credits in the courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement. Students are required to earn credit for the following courses:

MATH 201	Introduction to Proofs	3
----------	------------------------	---

MATH 265	Calculus III	4
----------	--------------	---

One of the following:		3-4
-----------------------	--	-----

MATH 266	Elementary Differential Equations	
MATH 267	Elementary Differential Equations and Laplace Transforms	

One of the following:		3-4
-----------------------	--	-----

MATH 317	Theory of Linear Algebra	
----------	--------------------------	--

MATH 407	Applied Linear Algebra	
----------	------------------------	--

One of the following:		3-4
-----------------------	--	-----

MATH 301	Abstract Algebra I	
----------	--------------------	--

MATH 304	Combinatorics	
----------	---------------	--

MATH 314	Graph Theory	
----------	--------------	--

MATH 331	Topology	
----------	----------	--

MATH 341	Introduction to the Theory of Probability and Statistics I	
----------	--	--

MATH 350	Number Theory	
----------	---------------	--

MATH 365	Complex Variables with Applications	
----------	-------------------------------------	--

MATH 373	Introduction to Scientific Computing	
----------	--------------------------------------	--

MATH 414	Analysis I	
----------	------------	--

MATH 421	Logic for Mathematics and Computer Science	
----------	--	--

MATH 435	Geometry I
----------	------------

MATH 436	Geometry II
----------	-------------

Total Credits	16-19
----------------------	--------------

Graduate Study

The department offers programs leading to a Master of Science or Doctor of Philosophy degree in mathematics or applied mathematics, as well as minor work for students whose major is in another department. The department also offers a program leading to the degree of Master of School Mathematics (M.S.M.).

Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should prepare themselves by taking several upper division mathematics courses.

The M.S. degree requires a student to take at least 30 credit hours and to write a creative component or thesis. Additionally, students must pass a comprehensive oral examination over their coursework and their creative component or thesis. See the online Mathematics Graduate Handbook for specific requirements.

The Ph.D. degree requires a student to take 42 credit hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation which is defended by an oral exam.

Ph.D. candidates must have at least one year of supervised teaching experience. See the on-line Mathematics Graduate Handbook for specific requirements.

The M.S.M. degree is primarily for in-service secondary mathematics teachers. Students desiring to pursue the M.S.M degree should present some undergraduate work in mathematics beyond calculus. Candidates for the M.S.M. degree must write an approved creative component and pass a comprehensive oral examination over their course work and their creative component.

Meteorology

Offered by the Department of Geological and Atmospheric Sciences. (<https://ge-at.iastate.edu/>)

The bachelor of science major in Meteorology: The study of meteorology involves the description of the earth's atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn the bachelor of science. The major satisfies guidelines specified by the American Meteorological Society and meets education requirements for employment with the National Weather Service and the World Meteorological Organization. Successful preparation for professional or graduate work in Meteorology requires that the student develop and integrate a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling, and effective oral and written communication. The faculty view the senior thesis (MTEOR 499 Senior Research), in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education requirements of the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a globally-oriented profession.

Meteorology as a Secondary Major: The Meteorology program allows students in academic programs with affinity to meteorology to complete a secondary major in meteorology through an accelerated pathway. Students earning a BS degree in electrical or aerospace engineering who complete the designated Meteorology coursework of at least 25 credit hours can earn a secondary major in Meteorology. Students should work closely with their advisers in each department to ensure that all requirements are met. Please review information on the department website or contact the current program head for more information and sample four year plans to earn a secondary major in Meteorology.

Combined Degrees: A concurrent program is offered which combines a bachelor of science degree in meteorology and a master of science degree in meteorology. This program gives well-qualified Iowa State juniors and seniors the opportunity to begin working on the M.S. degree before completing the B.S. degree, reducing by at least one year the normal time period necessary to complete both degrees separately. Additionally, a concurrent program exists that gives students the opportunity to receive a B.S. in meteorology and an M.B.A. (master of business administration) within five years. Review the department website or contact the current program head for more information regarding these options.

Minor - Meteorology

The department offers a minor in Meteorology which may be earned by completing 15 credits including MTEOR 111 Synoptic Applications (only 1 credit may count toward the minor), MTEOR 206 Introduction to Weather and Climate and MTEOR 301 General Meteorology. The minor must include at least 6 credits in the courses numbered 300 or above taken at Iowa State University and must include at least 9 credits that are not used to meet any other department, college or university requirement. Further information concerning programs of study, including sample degree programs, is available from the department.

The program requires the following courses:

MTEOR 111	Synoptic Applications	1
MTEOR 201	Introductory Seminar	R
MTEOR 206	Introduction to Weather and Climate	3
MTEOR 227	Computational Meteorology I	3
MTEOR 301	General Meteorology	4
MTEOR 311	Introduction to Synoptic Meteorology	2
MTEOR 341	Atmospheric Physics I	3
MTEOR 342	Atmospheric Physics II	3
MTEOR 411	Synoptic Meteorology	3
MTEOR 417	Mesoscale Forecasting Laboratory	3
MTEOR 432	Instrumentation and Measurements	3
MTEOR 443	Dynamic Meteorology I	3
MTEOR 454	Dynamic Meteorology II	3
MTEOR 499	Senior Research	2
Total Credits		36

An additional 9 credits must be chosen from:

MTEOR 402	Watershed Hydrology	3
MTEOR 404	Global Change	3
MTEOR 405	Environmental Biophysics	3
MTEOR 406	World Climates	3
MTEOR 407	Mesoscale Meteorology	3
MTEOR 416	Hydrologic Modeling and Analysis	3
MTEOR 435	Radar Applications in Meteorology	3
MTEOR 452	Climate Modeling	3
MTEOR 489	Survey of Remote Sensing Technologies	3
MTEOR 489L	Satellite Remote Sensing Laboratory	1
MTEOR 490	Independent Study	1-3
GEOL 415	Paleoclimatology	3
or C E 372	Engineering Hydrology and Hydraulics	
GEOL 452	GIS for Geoscientists	3

Supporting work is required in areas at least equivalent to:

One of the following sequences		4
CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
Or		
CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
PHYS 221	Introduction to Classical Physics I	5

MATH 266	Elementary Differential Equations	3
STAT 305	Engineering Statistics	3
SP CM 212	Fundamentals of Public Speaking	3
Total Credits		35

A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology:

MTEOR 206	Introduction to Weather and Climate	3
MTEOR 301	General Meteorology	4

Several co-op programs are available for upper division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a bachelor of science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, additional coursework is recommended in a mathematical or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The department requires a grade of C or better in ENGL 309.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
ENGL 309	Proposal and Report Writing	3

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the Communication Proficiency and LAS World Language Requirements. Six semesters of one foreign language in high school satisfies the World Language requirement.

Students in all ISU majors must complete a 3 credit course in U.S. diversity and a 3 -credit course in international perspectives. Discuss with your adviser how the two courses that you select can be applied to address general education requirements. Check for a list of approved courses at: <http://www.registrar.iastate.edu/courses/div-ip-guide.html>

- ¹ Students taking CHEM 177 should plan to take CHEM 178 as well.
- ² Student must select at least 9 credits from a list of optional courses.
- ³ Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their adviser.

Middle Eastern Studies Minor

The cross-disciplinary Middle Eastern Studies Minor is designed for students who seek to explore the cultures, languages, history, society, politics, international relations, economics, technology, and environment of the Middle East, including the Arab world, North Africa, Turkey,

and Iran. The Middle Eastern Studies Minor's courses provide the background and training for students whose major fields of study might include Anthropology, History, Philosophy and Religious Studies, Political Science, and World Languages and Cultures. The minor should be of special interest to students with interests in graduate studies or career interests in international business, education, translation, law, diplomacy, intelligence, the military, national security, non-governmental organizations, and/or international organizations.

Language co-requisite: All students pursuing the minor in Middle Eastern Studies must complete and receive a passing grade in:

Arabic 101: Elementary Arabic I (4) and Arabic 102: Elementary Arabic II (4) **[completion of the beginning level of other languages spoken in the Middle East (e.g. Hebrew, Farsi, Kurdish, Turkish, Pashto, etc.) will be accepted in lieu of beginner Arabic upon petition to the program Directors]**

The minor in Middle Eastern Studies requires 15 credit hours

Required course work in core courses (9 credits total)

HIST 435	History of the Modern Middle East	3
POL S 350	Politics of the Middle East	3
RELIG 358	Introduction to Islam	3

At least 6 additional credits of elective courses from the following list (this list may change/be updated as new elective courses become available)

ARABC 201	Intermediate Arabic I	4
ARABC 202	Intermediate Arabic II	4
ARABC 375	Arab Culture	3
ART H 384	Art of Islam	3
HIST 331	History of the Islamic World to 1800	3
RELIG 242	History of Christianity: Beginnings to the Reformation	3
WLC 370B	Topics in World Languages and Cultures in English Translation: Middle East	3

Military Studies

Interdepartmental Minor

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers' Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire for development in mind and character is instilled in students so they may assume the highest responsibilities of command, citizenship, and government. Finally, students are imbued with

the highest ideals of duty, honor, and loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Military Science, Naval Science and Air Force Aerospace departments accomplish this mission through detailed courses of instruction occurring throughout a typical student's college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the military. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while students in Naval Science develop an appreciation for naval surface and maritime engineering. The Air Force Aerospace Studies curriculum familiarizes students with Air Force structure and doctrine. On a broader scale, all three departments offer courses promoting leadership and sound management practices that investigate the military's role in American domestic and foreign policy, and can be employed in any career path.

Military Science, Naval Science and Air Force Aerospace courses are offered in the interdepartmental Military Studies program in the following participating departments: Military Science, Naval Science and Air Force Aerospace.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in Military Studies. The three Iowa State University ROTC programs offer over 64 credits of specialized coursework. The minor in Military Studies is open to any Iowa State University student.

Undergraduate students may minor in Military Studies by taking 15 credits of coursework from a combination of any of the three ROTC programs - regardless of whether or not a commission in the Armed Forces is tendered. At least 6 of the 15 credits must be in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Music

Administered by the Department of Music and Theatre Undergraduate Study

The Department of Music and Theatre offers a strong undergraduate music program, where students study with full-time faculty professionals in a supportive environment that encourages students to become their best.

The music curriculum provides:

1. A comprehensive program of professional studies for students who wish to prepare for careers in music, including teaching, performance,

and composition, and for students who plan to pursue graduate studies in music.

2. Courses in music literature, theory and areas of performance for all students, regardless of major.

The department embodies the land-grant philosophy of service to the people of the state with a faculty of active scholars, teachers, and artists committed to excellence in teaching, creative/scholarly work, and arts outreach. The department is an accredited institutional member of the National Association of Schools of Music (NASM).

The Theatre Program is administered by the Department of Music and Theatre (see Index, Theatre and Performing Arts.)

Curricula Available to Music Majors

Students interested in pursuing an emphasis in music theater should see Index, Theater and Performing Arts.

Bachelor of Music

This curriculum leads to the degree bachelor of music. This degree is more specialized and contains fewer general education requirements than the bachelor of arts degree with a major in music. Students in this curriculum choose between options in education, performance, and composition. To obtain a bachelor of music degree, a student must earn a minimum of 122 credits, including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 300 or above and must meet all of the requirements specified below.

Courses taken on a pass/not pass basis may be counted toward the required total credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.

Bachelor of Arts—Music Major

A more general degree than the bachelor of music, the bachelor of arts degree requires no formal specialization. It includes more general education requirements and provides a broader course of academic study.

For the undergraduate curriculum in Liberal Arts and Sciences, major in music, leading to the degree bachelor of arts, see Liberal Arts and Sciences, Curriculum.

Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses:

4 credits:		4
MUSIC 119	Applied Music for Majors	
MUSIC 120	Introduction to Music Literature and Styles	3
4 credits:		4
MUSIC 219	Applied Music: Majors	
MUSIC 224	Music Theory I	4
MUSIC 225	Aural Theory I	1
MUSIC 234	Music Theory II	3
MUSIC 235	Aural Theory II	1
MUSIC 319	Applied Music: Majors	2
MUSIC 334	Music Theory III	3
MUSIC 335	Aural Theory III	1
MUSIC 344	Music Theory IV	3
MUSIC 345	Aural Theory IV	1
MUSIC 383	History of Music I	3
MUSIC 384	History of Music II	3
4 credits from:		4
MUSIC 111	Wind Ensemble	
MUSIC 113	Jazz Ensemble	
MUSIC 115	Symphonic Band	
MUSIC 141	Lyrica Women's Choir	
MUSIC 151	Oratorio Chorus	
MUSIC 161	Iowa State Singers	
MUSIC 181	Symphony Orchestra	
MUSIC 321	Advanced Ensemble	
MUSIC 301	Opera Studio	
Music Electives		8
Total Credits		48

Bachelor of arts students whose chief professional interest lies in research are encouraged to minor in world languages and cultures, history, literature, or philosophy.

General Requirements

Entrance Audition.

In order to be accepted as a music major, a prospective student must pass an entrance audition for the applied faculty in his/her performance area (piano, organ, woodwinds, strings, percussion, brass, or voice).

Passing the audition is dependent on the demonstration of performance skills appropriate for college level instruction and the potential to perform at a professional level. In addition, the number of students accepted must balance with the space available in the corresponding applied studios.

Once accepted, a student must complete a placement examination in keyboard skills. This examination is normally given by members of the departmental faculty the week preceding the opening of classes for fall semester.

Seminars and Recitals.

All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas, departmental recitals, and 12 recitals of their choosing each semester.

Ensemble Requirement.

See the options above for additional ensemble requirements.

All Bachelor of Music students:

Enrollment in an ensemble course, chosen from the lists below, each semester of full-time enrollment (except during student teaching) is required.

Students in a music education options:

At least six semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required. One semester of 114A may count as a large ensemble.

Bachelor of Music students in options other than education:

At least 2 semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required.

Large Ensembles:

MUSIC 111	Wind Ensemble	1
MUSIC 115	Symphonic Band	1
MUSIC 141	Lyrica Women's Choir	1
MUSIC 151	Oratorio Chorus	1
MUSIC 161	Iowa State Singers	1
MUSIC 181	Symphony Orchestra	1

Chamber music ensembles:

MUSIC 113	Jazz Ensemble	1
MUSIC 161	Iowa State Singers	1

MUSIC 301	Opera Studio	1-3
MUSIC 321	Advanced Ensemble	1

Continuation Examination

To be approved for continuation as a music major on the junior level, and enroll in Music 319, a student must pass a continuation examination taken normally at the end of the fourth semester as a music major. Before taking this examination, the student must complete the requisite forms as well as write an essay including:

1. his/her personal goals
2. a self-assessment of his/her progress thus far
3. an assessment of what he/she expects to accomplish before graduation

The student taking the Continuation Examination performs for a Continuation Examination Committee. Requirements include the performance of three works representing different periods or styles selected by, and studied with, the applied teacher, a self-prepared piece, and sight reading. The student must display acceptable solo ability and performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candid assessment of the student's potential to achieve his/her goals. In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination. See Piano Proficiency below. For details and forms go to: <http://www.music.iastate.edu>

Piano Proficiency Requirement

All music majors must demonstrate proficiency in functional skills at the piano. Keyboard music majors (students whose primary instrument is piano or organ) accomplish this through courses in their curricula. All other students accomplish this by satisfactorily completing Music 228. All entering non-keyboard music majors with previous piano experience meet with the class piano instructor, usually the week before classes start in the fall semester, to determine the appropriate piano class (127, 128, 227, 228) for their initial piano enrollment. Some students are deemed to have met the piano proficiency at this time. Non-keyboard music majors with no previous piano experience should enroll in Music 127, Class Piano I. Continuous enrollment in piano classes is REQUIRED until successful completion of the piano proficiency requirement. **Important:** The piano proficiency must be met, either through completion of Music 228 or demonstration of proficiency, to pass the continuation examination. Failure to do so could delay a student's graduation. All students must fulfill the piano proficiency requirement in order to pass the continuation examination and enroll in Music 319.

Graduation Proficiency

To be recommended for graduation, a music student should demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the bachelor of music degree will present a graduation recital.

*** According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 (or ENGL 250H). In addition the Communication Proficiency must be certified through one of the following options:**

1. Certification of writing skills, by the instructor, after completion of one of the following:

MUSIC 120	Introduction to Music Literature and Styles	3
MUSIC 383	History of Music I	3
MUSIC 384	History of Music II	3
MUSIC 472	History of American Music	3
MUSIC 473	Topics in Advanced Music History	3
MUSIC 475	Music of the Romantic Era	3
MUSIC 476	Music of the Twentieth Century	3

(Passing one of these courses does not automatically satisfy the requirements for Communication Proficiency.)

2. Satisfactory completion of an advanced writing course:

ENGL 302	Business Communication	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 314	Technical Communication	3

Learning Outcomes and Assessment

Music graduates will understand and demonstrate:

1. Knowledge of music cultural heritage and history
2. Appreciation for musical creativity, reasoning, and the aesthetic value of music
3. Knowledge of organization and structures of music
4. Analytical skills necessary for listening, performing, and teaching
5. Skills necessary to perform music from a variety of periods, styles, and genres
6. Necessary abilities to communicate ideas musically, verbally, and in writing
7. Awareness of the diversity of musical ideas throughout the world's cultures
8. For Music Education students: success in meeting the ISU Teaching Standards as outlined by the University Teacher Education Program

Assessment measures include the continuation examination, graduating senior surveys and exit interviews, public performances, senior projects,

course grades, teacher certification (for music education students), and the National Association of Schools of Music accreditation review.

Minor in Music

Candidates for the minor in music will complete 17 credits in music including:

MUSIC 224	Music Theory I	4
Three of the following		9
MUSIC 102	Introduction to Music Listening	
MUSIC 120	Introduction to Music Literature and Styles or MUSIC 30 Masterpieces of Music and Art in Western Culture.	
MUSIC 304	History of American Rock 'n' Roll	
MUSIC 383	History of Music I	
4 credits chosen from the following		4
MUSIC 111	Wind Ensemble	
MUSIC 113	Jazz Ensemble	
MUSIC 115	Symphonic Band	
MUSIC 141	Lyrica Women's Choir	
MUSIC 151	Oratorio Chorus	
MUSIC 161	Iowa State Singers	
MUSIC 181	Symphony Orchestra	
MUSIC 301	Opera Studio	
MUSIC 321	Advanced Ensemble	
MUSIC 118	Applied Music: Non-majors	
MUSIC 318	Applied Music: Non-majors	
MUSIC 290F	Special Problems: Applied Music	

At least 6 of the 17 credits must be in courses numbered 300 and above taken at ISU with a grade of C or better. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Students pursuing a music minor must meet the audition requirements and/or prerequisites for all courses they wish to take.

Minor in Music Technology

Candidates for the minor in music technology will complete 15 credits including:

MUSIC 246	Introduction to Creative Digital Music	2
MUSIC 346	Computer Music Programming Design	3
MUSIC 446	Sound Synthesis Design for Electronic Music	3
7 credits from the following		7
COM S 107	Windows Application Programming	
COM S 207	Fundamentals of Computer Programming	

or COM S 22 Object-oriented Programming	
COM S 208	Intermediate Computer Programming
COM S 228	Introduction to Data Structures
COM S 309	Software Development Practices
COM S 327	Advanced Programming Techniques
CPR E 329	Software Project Management
E E 201	Electric Circuits
E E 224	Signals and Systems I
E E 324	Signals and Systems II
M E 451	Engineering Acoustics
PHYS 198	Physics of Music
S E 319	Construction of User Interfaces
MUSIC 101	Fundamentals of Music
or MUSIC 10 Basic Musicianship	
MUSIC 102	Introduction to Music Listening
MUSIC 118	Applied Music: Non-majors
MUSIC 120	Introduction to Music Literature and Styles
or MUSIC 302 Masterpieces of Music and Art in Western Culture.	
MUSIC 224	Music Theory I
MUSIC 225	Aural Theory I
MUSIC 234	Music Theory II
MUSIC 235	Aural Theory II
MUSIC 290F	Special Problems: Applied Music
MUSIC 304	History of American Rock 'n' Roll
MUSIC 318	Applied Music: Non-majors
MUSIC 383	History of Music I
MUSIC 384	History of Music II
MUSIC 472	History of American Music
MUSIC 490I	Independent Study: Electronic Music
Total Credits	15

Music courses that may be taken by music majors to meet the requirements for the Music Technology minor are limited to the following:

MUSIC 246	Introduction to Creative Digital Music	2
MUSIC 346	Computer Music Programming Design	3
MUSIC 446	Sound Synthesis Design for Electronic Music	3
MUSIC 490I	Independent Study: Electronic Music	arr †
MUSIC 590I	Special Topics: Electronic Music	arr †

† Arranged with instructor.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. The minor must include at least nine credits not used to meet any other department, college, or university requirement. Students pursuing a minor in music technology must meet the audition requirements and/or prerequisites for all music courses they wish to take.

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students not required to take four semesters of class piano will take additional music elective credits.

² Four credits chosen from the following ensembles are required: 111, 113, 115, 141, 151, 161, 191, 321.

³ ENGL 150 requires concurrent enrollment in LIB 160.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level.** The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<http://www.las.iastate.edu/academics/generaleducation/index.shtml>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) The courses taken to meet these requirements may also be used to meet other requirements.

Scheduling of the general education requirements where specific courses are not indicated can be flexible. Music courses are best kept in the order/semesters indicated. (Most music courses are offered one semester each year.)

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano.

** Students should take the major area (WW or brass) with which they are least familiar first to gain more experience in lab band. However, WW players planning to gain additional skills on a 2nd WW, might choose to take that area first. Non-WW players should take 351 before 352. 358B must be taken concurrently with each tech course (350-355).

++ Alternate year courses. String players take 490B and 464. WW and brass players take 368 and 464.

c These courses which appear in the same semester must be taken concurrently.
The LAS world language requirement must be met. The U.S. diversity and international perspectives requirements are automatically met with courses required for this degree option (EDUC 406 and MUSIC 383).

Many general education and education (EDUC) courses can easily be taken in different semesters than indicated as well as summer. Music courses are best kept in the order/semesters indicated (Most music courses are offered one semester each year).

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses.

² MUSIC 324 alternate Fall (even numbered years) / MUSIC 325 alternate Spring (odd number years – same academic year; MUSIC 360 alternate Spring (even numbered years) when 325 is not taught.

^c ENGL 150 requires concurrent enrollment in LIB 160.

The BM degree requires a minimum of 124.5 credits, **including a minimum of 45 credits at the 300/400 level.** The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<http://www.las.iastate.edu/academics/generaleducation/index.shtml>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) The courses taken to meet these requirements may also be used to meet other requirements.

Flexibility in scheduling. Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated. (Most music courses are offered one semester each year.)

* Some advanced theory and history courses (voice major requires 1 history, 2 theory) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: <http://www.music.iastate.edu/info/advising>.

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students placing out of class piano may need to take additional elective credits to earn the required 124.5 cr. for the BM degree.

² ENGL 150 requires concurrent enrollment in LIB 160.

³ Alternate year course, taught in odd number years, spring semester.

The BM degree requires a minimum of 124.5 credits, **including a minimum of 45 credits at the 300/400 level**. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<http://www.las.iastate.edu/academics/generaleducation/index.shtml>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) The courses taken to meet these requirements may also be used to meet other requirements.

Some advanced theory and history courses are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog. The BM in composition requires one advanced history course (3 cr.) and 9 credits of advanced theory from the following courses: 346, 440, 446, 490B, 590I. Advanced theory courses must include 346 or 446.

* The BM degree requires a minimum of 124.5 credits, **including a minimum of 45 credits at the 300/400 level**. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<http://www.las.iastate.edu/academics/generaleducation/index.shtml>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) The courses taken to meet these requirements may also be used to meet other requirements.

Officer Education Programs

Iowa State University offers Reserve Officers Training Corps (ROTC) programs for the professional training of officers for the Army, Air Force, Navy and Marines.

The purpose of these programs is to provide an avenue for interested students to become reserve or regular officers in one of the United States military services, and the university regards this training as the foundation for possible careers in the military. The Air Force and the Navy require a period of active duty service upon completion of the ROTC program. Graduates from Army ROTC serve in either active Army, the Army Reserve, or the National Guard.

All students enrolled in advanced ROTC programs receive financial allowances, which are described under Student Financial Aid. Scholarships are also available for all services as outlined in the section on financial aid.

For specific courses and programs see also Air Force Aerospace Studies, Military Science, and Naval Science.

Air Force Aerospace Studies

The objectives of the Department of Air Force Aerospace Studies (AFAS) are to provide qualified students the opportunity to earn a commission as an active duty officer in the United States Air Force (USAF) and to build better citizens for those not interested in serving in the USAF. Entry into the Air Force Reserve Officer Training Corps (AFROTC) program is not dependent on departmental major or year in the university, and is open to all qualified students.

The curriculum is divided into two basic phases: the General Military Course (GMC) and the Professional Officer Course (POC). The GMC is introductory and open to all ISU students. The GMC consists of four consecutive one-hour courses normally taken during the freshman and sophomore years.

Selection for the POC is on a competitive basis. Cadets enrolling in this course must meet certain academic, mental, and physical requirements as well as having high moral standards. Students who have completed the GMC will compete to participate in Field Training, a four-week summer training program which provides a concentrated experience in the Air Force environment. Field Training includes officer training, career orientation, expeditionary training, an introduction to typical base functions, and physical training. Prior to entry into the POC, students must successfully complete Field Training.

Upon enrollment and acceptance into the POC, all cadets complete a contractual agreement with the Air Force, which signs them up for at least four years of active duty as an USAF officer after graduation. Qualified cadets may compete for selection for flying jobs such as pilot, combat systems operator (CSO), remotely-piloted aircraft (RPA) operator, and air battle manager (ABM).

AFROTC scholarships are available and provide payment of full tuition and fees. In addition, scholarship cadets receive a \$300-\$500 monthly subsistence allowance and \$900 per year book allowance. Scholarships can be awarded for periods from two to five years, depending on academic major. Upon acceptance of a scholarship, complete a contractual agreement with the Air Force, which signs them up for at least four years of active duty as an USAF officer after graduation. To determine eligibility and initiate application procedures for the scholarship program, interested students should contact the AFAS department.

The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or more of the ROTC programs. At least six credits must be in courses numbered 300 or above.

Military Science Interdisciplinary Program

The Military Science Department does not offer an academic degree and is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program. The mission of the department is derived directly from regulations governing Army Reserve Officers' Training Corps (AROTC), which are issued by the U.S. Army Cadet Command and U.S. Army Training and Doctrine Command and cannot be modifiable by this department.

Freshmen Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of the Army, Roles and Origins of the Army, Army Customs and Traditions, Branches (Jobs) in the Army and Military Operations and Tactics, U.S. Army leadership and character development.

Sophomore Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of an Officer, Role of the Officer and Noncommissioned Officer, communications, code of conduct, first aid, principles of war and military operations and tactics, and begin to apply U.S. Army leadership through observed activities and demonstrate character development traits.

Junior Year Learning Outcomes

The student will have a working knowledge of the following areas: Small Unit Training, Command and Staff Functions, Nuclear, Biological and Chemical Warfare, Law of War, Weapons, Human Behavior, Math Reasoning, Computer Science and Military Operations and Tactics; Cadets will actively analyze character development and assess leadership skills.

Senior Year Learning Outcomes

The student will have a working knowledge of the following areas: Transition to Becoming an Officer, Military Justice, Intelligence and Electronic Warfare, Army Personnel Management, Army Logistics, Post and Installation Support and Military Operations and Tactics; Cadets will internalize and adhere to the U.S. Army's profession through active leadership and congruence of character development.

The mission of the Army Reserve Officers' Training Corps (AROTC) is to commission the future leaders of the United States Army. Since ROTC produces over 65 percent of the Army's Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of profession/professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the U.S. Army. A commission as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of the method of service, officers in today's Army can be proud to know that they are doing their share in the defense of the United States of America.

The ISU Military Science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 101-290) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is a prerequisite for the advanced program. Financial assistance is available on a competitive basis.

Persons interested in Military Science should visit the department located on the second floor of the Armory (east side).

Basic Program

The basic program courses are primarily for freshmen and sophomore students and, except for persons with prior military service and basic training graduates, are required for entry into the advanced program. Each scholarship cadet in the Basic Program receives a monthly allowance (freshmen \$420; sophomore \$420) for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

Advanced Program

The advanced program courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly allowance (junior \$420; senior \$420) for up to 10 months. These courses are primarily taught to academic juniors and seniors.

Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class and laboratory hours in a separate course, M S 150 Army Physical Readiness. Students are encouraged to attend and participate in this class.

Professional Military Science Education (PME) coursework outside of the military science curriculum is also a precondition to commissioning. The PME component consists of Basic Academic proficiency standards. These standards are explained to prospective students as they consider enrollment in the advanced program. Army Uniforms will be worn at least once a week. The 300-level courses are designed to prepare cadets for the Advanced Course, which is a 37 day summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the United States Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

Military Studies Minor

The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Naval Science

The Department of Naval Science is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program but does not offer an academic degree. The courses offered by the Department are developed by the Department of the Navy. The Naval Science Department and Naval ROTC (NROTC) Program develop individuals mentally, morally, and physically, and imbue in them the highest ideals of duty and loyalty, in order to commission them upon graduation as Navy and Marine Corps officers. Program graduates possess a basic professional background, are motivated towards careers in the Naval Service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship, and government. Emphasis is placed on the core values of courage, honor and commitment.

Naval Science courses are open to any ISU student who has met the course prerequisites. To participate in the Naval ROTC Program, students must apply through one of two programs: the NROTC Scholarship Program (full scholarship; which includes a book stipend, tuition, laboratory fees, uniforms, and a monthly stipend), or the College Program (non-scholarship, with limited financial assistance). Applicants for the Scholarship Program are selected through a comprehensive nationwide competition. Applicants for the College Program are selected by the Professor of Naval Science from among students already in attendance at, or selected for admission by, the university. The College Program involves limited financial assistance by application for a 2 or 3-year scholarship. Upon application, students choose between the Navy Option and Marine Corps Option, for the purposes of training focus. NROTC students pursue their studies like other university students except that they must meet certain additional requirements that will prepare them to serve as naval officers upon graduation.

A Marine Corps Option student incurs a minimum 4-year active duty military obligation as a commissioned officer after graduation; a Navy Option student incurs a minimum 5-year active duty obligation.

Further information is available from the Professor of Naval Science, Iowa State University, isunrotc@iastate.edu, 515-294-6050.

While in the NROTC Program, Scholarship Program students will participate (with pay) in at-sea training cruises during the summer. College Program students, accepted to receive a 2 or 3-year scholarship, will participate in at-sea training during the summer between their Junior and Senior year based on the specifics of their scholarship. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities also include weekly leadership laboratory periods and opportunities for involvement in several student societies.

Undergraduate Study

Naval Science courses are primarily for those students in the NROTC program, however, other university students may also enroll. Students enrolled in the NROTC program must fulfill the following requirements:

N S 111	Introduction to Naval Science	3
N S 212	Seapower and Maritime Affairs	3
N S 220	Leadership and Management	3
N S 230	Navigation	3
N S 320	Naval Ship Systems I (Engineering)	3
N S 330	Naval Ship Systems II (Weapons)	3
N S 410	Naval Operations and Seamanship	3
N S 412	Leadership and Ethics	3
N S 440	Senior Naval Science Seminar	1

Marine option students will complete:

N S 111	Introduction to Naval Science	3
N S 212	Seapower and Maritime Affairs	3
N S 220	Leadership and Management	3
N S 240	Fundamentals of Maneuver Warfare	3
N S 321	Evolution of Warfare	3
N S 412	Leadership and Ethics	3
N S 440	Senior Naval Science Seminar	1

1. In addition to the normal Naval Science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses. The Leadership Lab emphasizes human relations principles, teaches basic military formations, movements, commands, courtesies, and honors, and provides practice in unit leadership. Non NROTC program students enrolled in Naval Science courses are not required to participate in laboratory periods.
2. The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from any of the three ROTC programs offered on campus. At least 6 credits must be in courses numbered 300 or above.

For basic undergraduate curriculum requirements, see Liberal Arts and Sciences, Curriculum; or Engineering, Curricula.

Philosophy

Philosophy tries to make sense of human experience and reality through critical reflection and argument. The questions it treats engage and provoke all of us, and they occupy an important place in our intellectual tradition: Are there objective standards for deciding what is right and wrong, or is morality merely a subjective matter? Is capitalism morally

acceptable? Do I have a will, and is it free? How do my words and thoughts come to be about the world? Does God exist? Can machines think? How are mind and body related? Students in philosophy classes will be exposed to arguments on both sides of such questions, and they will be encouraged to develop and rationally defend their own positions.

Philosophy is not an isolated discipline. It enjoys mutually beneficial exchanges with many fields of study within the humanities and sciences. Philosophers develop tools that allow them to examine critically the assumptions and implications of the social and natural sciences, religion, and law.

The study of philosophy provides several benefits. It emphasizes rigorous understanding of problems, together with careful analysis of the strengths and weaknesses of the available solutions. It encourages clarity in the presentation of one's own ideas, as well as sensitivity in the consideration of the ideas of others. The study of philosophy therefore encourages one to develop skills and habits that are useful not only in philosophy, but in other areas as well. Philosophy students historically do well, for example, in law and medical schools.

However, one should not think that philosophy is only valuable in academic settings. Philosophical questions arise in many areas of family, business, and civic life. Philosophers strive to face these questions with the kind of intellectual honesty that leads to respect for the views of others, and continual reassessment of their own. In this way, the study of philosophy fosters values and attitudes that are helpful for responding to a lifetime of intellectual challenges.

The degree program in philosophy requires a minimum of 33 credits, plus the zero credit PHIL 492 course. The following courses compose the core program of the major from which 15 credits shall be chosen. Additionally, two courses at the 400 level or above (other than PHIL 490 and PHIL 492) are required.

Ethical theory: One course required.

PHIL 330	Ethical Theory	3
PHIL 335	Social and Political Philosophy	3
PHIL 535	Contemporary Political Philosophy	3

History: Two courses required.

PHIL 310	Ancient Philosophy	3
PHIL 314	17th Century Philosophy	3
or PHIL 315	18th Century Philosophy	

Metaphysics and Epistemology: One course required.

PHIL 364	Metaphysics: God, Minds, and Matter	3
PHIL 366	Truth, Belief, and Reason	3
PHIL 380	Philosophy of Science	3

Logic:

PHIL 207 Introduction to Symbolic Logic is required.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check <http://www.registrar.iastate.edu/courses/div-ip-guide.html> for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. Three of the required 45 300+ level credits must be earned in a general education group outside the group of the major. You must also complete the LAS foreign-language requirement.

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

Minor in Philosophy

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy. At least 9 credits must be in courses numbered 300 or above (only 3 credits of which may be in PHIL 490). The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Philosophy - Graduate Study

The department offers work for a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 300 (but not PHIL 490), each taken in conjunction with PHIL 590. For those taking the Ph.D., the requirement is four courses above 300, at least one of which is above 400 (but not PHIL 490), each taken in conjunction with PHIL 590. Interested students should ask the chair to assign a minor adviser.

The department participates in the interdepartmental program in general graduate studies.

Physics and Astronomy

Physics and astronomy are basic natural sciences which attempt to describe and provide an understanding of both our world and our universe. Physics serves as the underpinning of many different disciplines including the other natural sciences and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration. Many opportunities exist for students who terminate their studies with a bachelor's degree, especially when combined with technology studies in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

The department normally expects each student majoring in physics to complete at least the following courses:

PHYS 241	Principles and Symmetries in Classical Physics I	5
PHYS 242	Principles and Symmetries in Classical Physics II	5
PHYS 321	Introduction to Modern Physics I	3
PHYS 321L	Introductory Laboratory in Modern Physics I	1
PHYS 322	Introduction to Modern Physics II	3
PHYS 322L	Introductory Laboratory in Modern Physics II	1
PHYS 304	Thermal Physics	3
PHYS 310	Electronic Instrumentation for Experimental Physics	4
PHYS 361	Classical Mechanics	3
PHYS 362	Intermediate Mechanics	3
PHYS 364	Electricity and Magnetism I	3
PHYS 365	Electricity and Magnetism II	3
PHYS 480	Quantum Mechanics I	3
MATH 207	Matrices and Linear Algebra (or)	3
	or	
MATH 317	Theory of Linear Algebra	4
	and 2 credits of laboratory work chosen from	2
PHYS 311	Intermediate Laboratory	
PHYS 311T	Intermediate Laboratory for Secondary Physics Teachers	
PHYS 470L	Applied Physics Laboratory	
	or	
ASTRO 344L	Astronomy Laboratory	
	and at least 3 credits chosen from	
ASTRO 342	Introduction to Solar System Astronomy	3
ASTRO 346	Introduction to Astrophysics	3
ASTRO 405	Astrophysical Cosmology	3
PHYS 421	Ultrafast Laser Science and Spectroscopy	3
PHYS 432	Molecular and Cell Biophysics	3
PHYS 461	Physics of Biomolecules	3
PHYS 481	Quantum Mechanics II	3
PHYS 496	Modern Optics	3
PHYS 511	Condensed Matter Physics I	3
PHYS 526	Particle and Nuclear Physics	4
PHYS 528	Mathematical Methods for the Physical Sciences	3
PHYS 531	Statistical Mechanics	3
PHYS 534	Symmetry and Group Theory in Physics	3
PHYS 541	General Relativity	3

*PHYS 221 and PHYS 222 may be substituted for PHYS 241 and PHYS 242.

All students are required to earn at least 6 credits in laboratory work in physics in addition to the laboratory components of PHYS 241 and PHYS 242. These 6 credits must be in courses numbered 304 or higher or in approved substitutions. All students must earn at least 35 credits in physics and astronomy courses numbered 304 or higher. The basic list of expected courses is not a rigid requirement and changes in this basic list will be approved by the department curriculum committee on recommendation of the student's adviser when such changes will better serve the student's needs. In particular, students planning a physics major and also seeking certification for high school teaching may, with the approval of their adviser, follow a significantly different program designed to meet their particular needs; these students should consult the department for further information. Further information concerning programs of study, including sample degree programs, is available from the department.

Students majoring in physics who wish an emphasis in astronomy/astrophysics should consider a minor in astronomy. Those planning graduate work in physics or astronomy/astrophysics should choose the option PHYS 481 from the list above. Another useful course is:

STAT 341	Introduction to the Theory of Probability and Statistics I	4
----------	--	---

The expected outcomes for students in these programs are:

1. a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, wave motion and modern physics
2. proficiency in laboratory methods
3. proficiency in modern scientific computational methods
4. a sound foundation in the liberal arts including proficiency in communication skills.

In addition to the performance on exams and course grades, information on evaluating of the success in meeting these goals is obtained by:

1. an annual written survey of all students majoring in the program
2. an annual written survey of all graduating seniors
3. a periodic written survey of program alumni
4. student evaluations of all courses
5. adviser evaluations
6. a bimonthly meeting of program majors with the department chair

Communication Proficiency Requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 (or ENGL 250H). The department requires a grade of

C– or better in ENGL 302, ENGL 305, ENGL 309 or ENGL 314. Students are also encouraged to study at least one foreign language.

Physics Plus: The Physics Plus option is for students who wish to establish a clear strength in a field of application of physics. This program makes double majors more feasible and is appropriate for students who plan on employment in applied physics. It is not intended for students who plan on graduate study in physics. For more information, see the physics department web site or consult an adviser in physics.

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows:

PHYS 241	Principles and Symmetries in Classical Physics I	5
PHYS 242	Principles and Symmetries in Classical Physics II	5
PHYS 321	Introduction to Modern Physics I	3

One of the following

PHYS 321L	Introductory Laboratory in Modern Physics I	
PHYS 322L	Introductory Laboratory in Modern Physics II	
PHYS 310	Electronic Instrumentation for Experimental Physics	
PHYS 311	Intermediate Laboratory	
PHYS 311T	Intermediate Laboratory for Secondary Physics Teachers	

Other acceptable courses

PHYS 304	Thermal Physics	
PHYS 306	Physics of Wave Motion	
PHYS 322	Introduction to Modern Physics II	
PHYS 361	Classical Mechanics	
PHYS 362	Intermediate Mechanics	
PHYS 364	Electricity and Magnetism I	
PHYS 365	Electricity and Magnetism II	
PHYS 421	Ultrafast Laser Science and Spectroscopy	
PHYS 432	Molecular and Cell Biophysics	
PHYS 461	Physics of Biomolecules	
PHYS 480	Quantum Mechanics I	
PHYS 481	Quantum Mechanics II	
PHYS 496	Modern Optics	

*PHYS 221 and PHYS 222 may be substituted for PHYS 241 and PHYS 242

The department offers a minor in astronomy which may be earned by completing 15 credits chosen as follows:

ASTRO courses *	12-15
3 credits from the following (if only 12 Astro credits)	3

PHYS 304	Thermal Physics
PHYS 321	Introduction to Modern Physics I
PHYS 361	Classical Mechanics
PHYS 362	Intermediate Mechanics
PHYS 364	Electricity and Magnetism I
PHYS 365	Electricity and Magnetism II
PHYS 480	Quantum Mechanics I
PHYS 481	Quantum Mechanics II
PHYS 496	Modern Optics
AER E 351	Astrodynamics I

* must include ASTRO 344L Astronomy Laboratory and may include one of the courses ASTRO 120 The Sky and the Solar System, ASTRO 150 Stars, Galaxies, and Cosmology or ASTRO 250 Astronomy Bizarre

12 or more credits must be at the 300 level or higher. Note that only ASTRO 344L may be used to satisfy both the requirements of a physics major and an astronomy minor.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

¹ Students must earn a minimum of two laboratory credits from PHYS 311, 311T, 450I, ASTRO 344L, or 450L.

² Recommended by not required. Highly recommended for those students planning graduate study.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with majors at both levels in applied physics, astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department, the Ames Laboratory, and the Applied Science Center, including the Microelectronics Research Center, are available for research.

Students with bachelor's degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate

school. In some cases additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their area of specialization. They are able to communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and soliciting research support. They have considerable teaching experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete:

PHYS 531	Statistical Mechanics	3
PHYS 564	Advanced Classical Mechanics	3
PHYS 571	Electricity and Magnetism I	3
PHYS 572	Electricity and Magnetism II	3
PHYS 591	Quantum Physics I	4
PHYS 592	Quantum Physics II	4

Candidates for an advanced degree in applied physics are expected to complete:

PHYS 571	Electricity and Magnetism I	3
PHYS 591	Quantum Physics I	4
PHYS 470L	Applied Physics Laboratory	2-5
PHYS 699	Research	arr †
PHYS 572	Electricity and Magnetism II	3
or PHYS 531	Statistical Mechanics	

† Arranged with instructor.

Candidates for an advanced degree in astrophysics should complete:

PHYS 531	Statistical Mechanics	3
PHYS 564	Advanced Classical Mechanics	3
PHYS 571	Electricity and Magnetism I	3
PHYS 591	Quantum Physics I	4
ASTRO 505	Astrophysical Cosmology	3
ASTRO 510	Observational Astrophysics	3

Astrophysics Ph.D. candidates must take at least three of the 580 level Astro courses, while candidates for the Research Masters must take at least two 580 level Astro courses.

Except for the applied physics major where a thesis is always required, the degree master of science is offered both with and without thesis. For all areas of study except applied physics the basic requirements for the M.S. are the same: at least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students must complete not less than 6 credits from outside their major area, with 3 credits being required from outside the department, and 3 credits from a 500 or 600 level course in another area of specialization. Students choosing a M.S. degree with thesis may apply up to 8 credits of 699 but no credits of 599 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 599, but may not apply any credits of 699 toward the minimum 30 credits.

Students whose major area is applied physics must complete at least 30 credits of acceptable graduate work for the M.S. degree and not less than 19 credits of these must be in the required courses listed above; the remaining 11 credits of the 30 credit minimum may be chosen freely either from within the student's major area or from without and either from the department or outside, but it should be noted that not more than 3 credits of PHYS 699 Research may be applied toward the 30 credit minimum.

In addition to course work in the major area of study, all candidates for the Ph.D. degree must complete 12 credits from outside this area. Of these 6 must be taken from other departments and 6 must be taken from the department with the additional constraint that this latter 6 must include at least one 500 or 600 level introductory course in another area of specialization. Each candidate for the Ph.D. degree is required to teach one year of elementary physics or astronomy.

Graduate students interested in a physics minor should contact the department for requirements.

Political Science

The study of political science is designed to enable students to understand the nature of politics, public values, and the institutions and processes of politics in their various forms.

Students completing a major in political science will understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory, international relations, comparative politics, and public policy. Graduates can analyze and formulate effective argumentation in written and oral forms, with the ability to appreciate and accommodate diverse political ideas and to collect and critique information and ideas of others in support of original arguments. Graduates appreciate the knowledge and civic responsibilities required for effective participation in political life.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses. See also Preprofessional Study.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Juniors and seniors can apply to a concurrent degree program and earn a B.A. in political science and an M.A. in political science in fewer semesters. Contact the Director of Graduate Education for more information.

Requirements for the Major:

For the purpose of defining undergraduate requirements in the Department of Political Science, the Department employs five subfields within the discipline, with the following courses in each:

I. Law, justice, and Political philosophy

POL S 235	Introduction to Ethics and Politics	3
POL S 319	Law and Politics	3
POL S 320	American Judicial Process	3
POL S 333	Democracy and Diversity in America	3
POL S 339	Liberty and Law in America	3
POL S 402	Legal Analysis	3
POL S 419	The Judiciary	3
POL S 420	Constitutional Law	3
POL S 421	Constitutional Freedoms	3
POL S 430	Foundations of Western Political Thought	3
POL S 431	Modern Political Thought	3
POL S 480	Ethics and Public Policy	3

II. UNITED STATES ELECTIONS AND INSTITUTIONS

POL S 215	Introduction to American Government	3
POL S 306	Public Opinion and Voting Behavior	3
POL S 310	State and Local Government	3
POL S 318	Campaigns and Elections	3
POL S 360	American Institutions: Congress	3
POL S 361	American Institutions: The Presidency	3
POL S 363	American Institutions: Media	3
POL S 364	Political Parties and Interest Groups	3
POL S 385	Women in Politics	3
POL S 409	Political Game Theory	3
POL S 413	Intergovernmental Relations	3
POL S 460	American Political Institutions	3

III. Comparative Politics

POL S 241	Democracy and Dictatorship: Introduction to Comparative Politics	3
POL S 305	Comparative Political Behavior	3
POL S 340	Politics of Developing Areas	3
POL S 342	Chinese Politics	3
POL S 343	Latin American Government and Politics	3
POL S 346	European Politics	3
POL S 348	British Government and Politics	3
POL S 349	Politics of Russia and Eastern Europe	3
POL S 350	Politics of the Middle East	3
POL S 370	Religion and Politics	3

IV. International CONFLICT AND COOPERATION

POL S 251	Introduction to International Politics	3
POL S 354	War and the Politics of Humanitarianism	3
POL S 355	War and Politics	3
POL S 356	Theories of International Politics	3
POL S 357	International Security Policy	3
POL S 358	United States Foreign Policy	3
POL S 359	Current Issues in American Foreign Policy	3
POL S 381	International Political Economy	3
POL S 422	International Law	3
POL S 452	Comparative Foreign Policy	3
POL S 453	International Organization	3

V. Public Policy and Administration

POL S 335	Science, Technology, and Public Policy	3
POL S 344	Public Policy	3
POL S 353	Immigration Policy	3
POL S 371	Public Organizations and Leadership	3
POL S 383	Environmental Politics and Policies	3
POL S 407	Proseminar in Public Policy	3
POL S 442	The Policy and Politics of Coastal Areas	3
POL S 475	Management in the Public Sector	3
POL S 477	Government, Business, and Society	3
POL S 487	Electronic Democracy	3

To complete the major in Political Science a student must earn 33 semester credits of courses in Political Science subject to the following conditions:

1. Students must satisfactorily complete POL S 101 and POL S 301.
2. Students must complete at least 15 credits in one of the five subfields listed above (or, with departmental approval, an alternative,

substantively related set of 15 POL S credits), with at least 3 credits in each of three additional subfields.

3. Political Science courses in which a student has a grade of D+ or lower will not count for the major but can be counted as electives.
4. At least 18 credits of Political Science courses must be numbered 300 or above.
5. At least 9 credits of Political Science courses must be numbered 400 or above.
6. No more than three credits of POL S 490, POL S 496, POL S 497, or POL S 499 (alone or in combination) can be used to fulfill any of these requirements.
7. At least 15 credits of Political Science coursework must be earned at Iowa State University.
8. Students must pass at least one Statistics course from among STAT 101, STAT 104, or STAT 226.
9. According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.
10. Advanced Communication Skills: Majors must earn at least a C in one course from among ENGL 302, ENGL 309, or ENGL 314.

The department offers a minor in political science that may be earned by completing 15 credits beyond the 100-level of coursework in political science, nine of which must be at the 300 level or above. A student minoring in Political Science normally will be expected to take at least 9 credits in Political Science coursework at Iowa State University. Only 3 credits of POL S 490, POL S 496, POL S 497, or POL S 499, alone or in combination, and only 2 credits of POL S 312, POL S 313, POL S 314, or POL S 315 may be included in the total of 15 credits required for the minor. All minors in the College of Liberal Arts and Science require a minimum of 6 credits in courses numbered 300 and above taken at ISU with a minimum grade of C. Credits earned in POL S 496, POL S 497, or POL S 499, or offered on a satisfactory/fail basis only, will not fulfill this requirement. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level.**

¹ Meets international perspectives requirement.

² STAT 101, 104, and 226 also meet LAS College math requirement.

³ May be cross-listed to fulfill other requirements.

Graduate Study

The department offers work for a Master of Arts degree (MA) with a major in political science and minor for students in other departments. The department also offers work for a Graduate Certificate of Public Management and Policy (GCPMP) for those interested in an educational certificate program that requires less work than a full masters program. In addition, the Department of Political Science offers work for a Master of Science in Information Assurance (MSIA) and a joint Master of Arts/

Juris Doctor (MA/JD) program with the Law School of Drake University. Information with detailed requirements for all graduate degrees may be obtained at the department's web page at <https://www.pols.iastate.edu/academics/graduate/>

Master of Arts (MA)

This is a 30-credit masters degree that gives students the opportunity to explore the field of political science in order to pursue a PhD, go to law school, improve research skills, or understand politics better. The three concentration areas are American Politics, Global Politics, and Public Policy. Although it is not a formal concentration, some students have worked heavily in the area of political theory. Top students are eligible for graduate assistantships that make graduate study much more affordable and provide opportunities for assisting faculty with teaching and research. These are awarded on a merit basis. A thesis is required for this degree. The department also has a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University. Students wishing to pursue this joint degree must submit separate applications to Drake University and Iowa State University and be accepted by both institutions.

MA graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political questions, taking into account related ethical, legal, economic, and social issues.

The prerequisites for major graduate work in the MA program normally are completion of at least 15 credits in political science, the GRE (Graduate Record Examination), one year of a foreign language (equivalent to 8 semester hours), and a course in basic statistics (equivalent to STAT 101). If the basic statistics requirement has not been met, the student may remedy the deficiency by passing equivalent courses, for which no graduate credit will be received. During their program of study, all students are expected to complete STAT 587, POL S 502, and a thesis. Additional information including detailed graduation requirements can be found at <https://www.pols.iastate.edu/academics/graduate/#ma>

Master of Science in Information Assurance (MSIA)

The Master of Science in Information Assurance (MSIA) is a multi-disciplinary program designed to provide students with diverse backgrounds and interests the opportunity to obtain professional training in the emerging field of information assurance. The core of the MSIA program is built around a series of courses taught in Electrical and Computer Engineering, Mathematics, and Computer Science that

introduce students to software and hardware aspects of cryptography and computer security. The program also recognizes, however, that information assurance defined in terms of security, privacy, access, and reliability is not simply a technical problem but also involves important societal dimensions, including policy, education, ethics, and management. Recognizing that political science offers many potential intersections with information assurance (e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare; etc.), students with interests in these areas are encouraged to select the Department of Political Science as their home department.

Students opting to pursue a MSIA degree through the Department of Political Science can expect to acquire skills and background knowledge relevant to a career in public policy or public sector management of information assurance technologies. The MSIA degree can also help prepare students who wish to go on to pursue a PhD in information politics and policy.

Students interested in the MSIA degree program should consider Political Science as a home department if their future career and/or educational interests lie in such areas as: institutional issues related to the Internet and information technologies; electronic government and electronic democracy; information technology, international security, and information warfare; information technology policy and law; and public administration and public sector management of information technology.

Admission requirements generally follow the same guidelines as the MA in Political Science. Degree requirements are specified by the MSIA program in cooperation with Political Science. More in-depth information on the program including detailed graduation requirements can be found at: <https://www.pols.iastate.edu/academics/graduate/#msia>

Master of Arts/Juris Doctorate Program (MA/JD)

The Drake Law School and the Department of Political Science at Iowa State University are co-sponsors of the Master of Arts/Juris Doctorate degree. This degree combines courses at both Iowa State University and the Drake Law School and follows most of the same requirements as a double degree. However, the student must have full admission to both schools. Detailed information for the MA/JD can be found at the ISU Political Science webpage as well as the Drake Law School website (under Joint Degree): <http://www.law.drake.edu/> (<http://www.law.drake.edu/>).

The increasing attention being focused on the solution of social problems by state and federal governments has created a need for persons with advanced training in both law and political science. The Drake Law School and the ISU Department of Political Science jointly administer a

MA/JD program to provide an opportunity for students at the Drake Law School to achieve, concurrently, a JD degree in law and a MA degree in political science, and for graduate students in political science at Iowa State University to achieve a degree in law.

Successful completion of this program will enable students at Drake Law School to receive both a JD and an MA degree within a three-year period, while graduate students in political science at Iowa State University will be able to transfer a substantial number of hours to the Drake Law School toward the fulfillment of the JD requirements in a similar amount of time.

Additional information including detailed graduation requirements can be found at: <https://www.pols.iastate.edu/academics/graduate/#majd>

Minor

Students in other graduate programs may obtain a minor in political science by completing at least 9 credits of political science courses. Interested students should consult the Graduate College Handbook for additional information on graduate minors.

The Graduate Certificate of Public Management and Policy (GCPMP)

The Political Science Department offers a Graduate Certificate of Public Management and Policy (GCPMP). The GCPMP is a 15-credit certificate. Students who are interested in public management and policy, but unsure about committing to a full master's degree, can aim for the certificate knowing that those courses will also count toward a master's degree if they choose to continue on. Iowa State graduate students in other fields may want to pursue the certificate to improve their credentials on the job market if their interest overlaps with public management and policy. For example, doctoral students in higher education and education administration can earn all 9 of their "outside" credits in the GCPMP coursework, add the 6 more elective credits, and earn a GCPMP along with their PhD.

Requirements for admission are a graduate school application, an essay stating purposes for study, college transcripts, the GRE (waived for those with five or more years of public or nonprofit sector experience), three letters of recommendation, and the TOEFL for international students. More information on the program including curricular requirements can be found at: <https://www.pols.iastate.edu/academics/graduate/#gcpmp/> (<https://www.pols.iastate.edu/academics/graduate/#gcpmp/>).

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor's degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to

which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor's degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the preveterinary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor's degree in specific ISU majors, by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in pro-fessional CLS/MT school can be used to partially fulfill the requirements for the bachelor's degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree..

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor's degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor's degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master's degree or a bachelor's degree, depending upon the size of the institution and whether an upper or middle entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor's degree in health administration, or they may spend four years earning a bachelor's degree in any department before entering a master's degree program at the University of Iowa or other university. Courses required for admission to master's degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.

Human Medicine

Physicians study, diagnoses, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning

a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student's interests and provide appropriate preparation for an alternative career.

Law

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D.) degree. A bachelor's degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor's degree should reflect a student's passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student's development of critical thinking skills, including analytical written and oral skills. An understanding of business, social sciences, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should include accounting, management, political science, psychology, criminal justice, economics, philosophy, English literature, and history. The completion of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well. The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa. Visit the Liberal Arts and Sciences Student Academic Services office for details.

Library and Information Science

Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master's degree programs in library and information science provide the professional preparation. Iowa State students may earn a bachelor's degree in any department before entering

a professional master's degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field.

Occupational Therapy

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor's degree in any major at Iowa State University, and then enter a master's or doctoral degree program at another university.

Optometry

Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor's degree. Students wishing to earn the bachelor's degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

Pharmacy

Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceutical. Students may complete prepharmacy courses at Iowa State University. Many schools do not require a bachelor's degree for admission, however most students complete at least 3 years of college before admission to pharmacy schools. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail four years of study.

Physical Therapy

Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Usually, students earn a bachelor's degree at ISU before entering professional school to earn a doctoral degree. The bachelor's degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Courses required for admission to

a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

Physician Assistant

A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master's degree level. Applicants must have had health-care experience with direct patient contact experience. Students must have earned a bachelor's degree before entering a PA program. The degree can be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, psychology, and statistics.

Podiatry

Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor's degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor's degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor's degree.

Theology or Religious Studies

The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor's degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with

a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

Veterinary Medicine

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu (<http://www.vetmed.iastate.edu>).

Students may pursue their preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student's vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor's degree; the most effective progress toward a bachelor's degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preveterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preveterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor's degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

Psychology

For college-level requirements in undergraduate curricula leading to the degrees of bachelor of arts and bachelor of science, see Liberal Arts and Sciences, Curriculum.

An undergraduate major in psychology provides a liberal arts and science education, which also can serve as preparation for graduate study in psychology, law, or the health professions. The undergraduate major in psychology enables graduates to understand and apply the scientific principles, facts, and basic methods of psychology to their personal and professional activities. Students with a bachelor's degree (B.A./B.S.) in psychology may qualify for a variety of positions including those in social sciences, mental health, corrections, rehabilitation, developmental disability centers, and business (management, insurance, opinion polls). Professional work as a psychologist in academic, business, clinical, government, and school settings requires graduate degrees. Depending on professional goals, a minor in another discipline may be desirable.

Following the recommendations of the American Psychological Association, the undergraduate curriculum in psychology is designed to allow each student to:

1. Develop a detailed knowledge of psychology
2. Develop an understanding of scientific inquiry and demonstrate critical thinking
3. Understand the role of ethics and diversity in human behavior
4. Be able to communicate effectively in the discourse of psychology
5. Develop skills supporting employment or graduate/professional education

COMMUNICATION PROFICIENCY REQUIREMENT

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	

The Department requires a C- or better in one of the following:

PSYCH 302	Research Methods in Psychology	3
ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

The major must include the following psychology courses each with a minimum grade of C- and an overall average of C or better:

PSYCH 111	Orientation to Psychology (or Psych 112 Learning Community)	1
PSYCH 101	Introduction to Psychology *	3
PSYCH 211	Career Opportunities in Psychology	1
PSYCH 301	Research Design and Methodology *	3
PSYCH 440	Psychological Measurement I *	3

The major also must include at least one course from four of the following six areas:

Area A

PSYCH 230	Developmental Psychology
PSYCH 335	Abnormal Psychology of Children and Adolescents

Area B

PSYCH 280	Social Psychology
PSYCH 380	Social Cognition

Area C

PSYCH 310	Brain and Behavior
PSYCH 315	Drugs and Behavior

Area D

PSYCH 312	Sensation and Perception
PSYCH 313	Learning and Memory
PSYCH 316	Cognitive Psychology

Area E

PSYCH 360	Personality Psychology
PSYCH 460	Abnormal Psychology

Area F

PSYCH 250	Psychology of the Workplace
PSYCH 350	Human Factors in Technology

Three additional 3-credit courses in psychology	9
---	---

Three additional 3-credit courses in psychology must be taken. Area courses may be used to meet this requirement, but variable credit courses (PSYCH 291, PSYCH 470, PSYCH 490, PSYCH 491, and PSYCH 492) may not.

In accordance with college requirements, a C or better average is required in the courses used to satisfy the major.

Departmental requirements for the B.A. and B.S. include the following supporting courses:

6 credits in Philosophy including	6	
PHIL 201	Introduction to Philosophy (not 207)	3

Two of the following

BIOL 101	Introductory Biology (or higher)
BIOL 155	Human Biology (or 255 or 256)

BIOL 313	Principles of Genetics	
CHEM 160	Chemistry in Modern Society (or higher)	
PHYS 101	Physics for the Nonscientist (or higher)	
STAT 101	Principles of Statistics *	3-4
or STAT 104	Introduction to Statistics	
3 credits in Mathematics from selected course list**		

* minimum grade of C-

** Popular choices include Math 104, Math 140, Math 150, Math 165, and Stat 301. See general education mathematics list for alternative options. Neither Math 105 nor Math 106 may be used to satisfy this requirement.

Students pursuing a B.S. degree also must complete PSYCH 302 Research Methods in Psychology with a minimum grade of C- and a minimum of 10 additional credits from courses listed in the LAS Gen Ed Natural Sciences and Mathematical Disciplines Area as follows: six additional credits in natural sciences, one additional credit in a laboratory course, and three additional credits in mathematics. It should be noted that either Math 104 or Math 150 may be counted toward the B.S. degree requirement, but not both.

Students electing a B.A. degree also must complete an ISU approved minor.

The department offers a minor in psychology. The minor requires completing 18 credits in psychology, including PSYCH 101 Introduction to Psychology and PSYCH 301 Research Design and Methodology, each with a minimum grade of C-. At least 9 of the 18 credits must be in 300 level courses (or above), but no more than three credits total may be from PSYCH 291 Introductory Research Experience, PSYCH 490 Independent Study, PSYCH 491 Research Practicum, and PSYCH 492 Fieldwork Practicum. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. In addition to an overall C average or better in courses used to satisfy the minor, a C- or better is required in each course. Contact the psychology advising office for more information.

Graduate Study

The department offers work for the degree of doctor of philosophy in psychology. A master of science may be earned as part of that degree.

The department offers a doctoral specialization in counseling psychology (APA accredited) and doctoral areas of concentration in cognitive psychology and social psychology.

A basic goal of graduate study in the Department of Psychology is to provide all students with a broad base of knowledge in psychological science, as well as exposure to the content and methodological skills necessary for effective performance in teaching, research and professional practice. Accordingly, graduates have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research and to communicate the results to the scientific community, students in the classroom, and the general public. Graduates in counseling psychology are skilled in delivering services to diverse clientele in a variety of settings.

The department also participates in the interdepartmental programs in human computer interaction (<http://www.vrac.iastate.edu/hci/>), neuroscience (<http://www.neuroscience.iastate.edu/>) (<http://www.neuroscience.iastate.edu/>) and in the interdepartmental minor in gerontology (<http://www.gerontology.iastate.edu/programs/>).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.

Public Relations

The Public Relations Major

The public relations major provides students with the concepts, skills and expertise needed to help organizations build mutually beneficial relationships with diverse publics. The knowledge and tools students develop through the P R curriculum ensure they can enter fields such as corporate communication, government affairs and public relations firms. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

To receive a bachelor of science degree in public relations, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JL MC or P R. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC and P R. These include:

JL MC 101	Mass Media and Society	3
JL MC 110	Orientation to Journalism and Communication	1
P R 220	Principles of Public Relations	3
JL MC 201	Reporting and Writing for the Mass Media (C+ or better)	3
P R 301	Research and Strategic Planning for Advertising and Public Relations	3
P R 321	Public Relations Writing (C+ or better)	3
P R 424	Public Relations Campaigns	3
P R 499A	Professional Media Internship: Required	3
JL MC 460	Law of Mass Communication	3
JL MC 462	Media Ethics, Freedom, Responsibility	3

Public relations majors are also required to take:

STAT 101	Principles of Statistics (or another approved statistics course)	4
----------	--	---

Additional recommended courses and requirements for the public relations major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or a minor in the school. All Greenlee School majors are required to take a second major or minor outside the school as an area of expertise. All Greenlee School majors are required to take 499A. Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Minor in Public Relations

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in public relations, students complete 15 credits including at least 6 credits in the courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

JL MC 101	Mass Media and Society	3
P R 220	Principles of Public Relations	3
P R 305	Publicity Methods	3
6 credits from the following:		6
P R 301	Research and Strategic Planning for Advertising and Public Relations	
P R 323X	Strategic Communication in Agriculture and the Environment	

P R 420	Crisis Communication
JL MC 307	Digital Video Production
JL MC 390	Professional Skills Development
JL MC 401	Mass Communication Theory
JL MC 406	Media Management
JL MC 474	Communication Technology and Social Change
JL MC 476	World Communication Systems
JL MC 477	Diversity in the Media
P R 497	Special Topics in Communication

Total Credits **15**

For 300- and 400-level choices, please choose from the list of selected courses available from an academic adviser. You may schedule an appointment with an adviser by either calling 515-294-4342 or visiting with Greenlee School office staff at 101 Hamilton Hall.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses:(U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>) and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>). Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Religious Studies

Religious Studies - Undergraduate Study

Religious studies gives students the opportunity to investigate and reflect on the world's religions in an objective, critical, and appreciative manner. Though there is emphasis in religious studies on the wide variety of religious phenomena as well as on the various methods in the study of religion, the aim is to help students develop their own integrated understanding of the nature of religion and its role in individual and social life.

Graduates of the religious studies program have knowledge of the religious diversity in the United States and the world. They have the ability to interpret religion empathetically and critically and to compare and contrast historical and contemporary differences and similarities of religious systems. They understand ways in which religion influences and is influenced by the historical, social, and cultural contexts in which religious systems function. Graduates often pursue careers in non-profit, community organizations; apply to professional schools or graduate programs; or enter seminaries to prepare for ministry.

The major in religious studies seeks to provide both breadth and depth. Breadth is provided through the exploration of the world's various religious traditions and through exposure to a variety of theoretical approaches and methodologies in the academic study of religion. Depth is achieved through specialized courses in particular religious traditions and particular issues in the study of religions, culminating in research seminars. The objective is to expose the student to various components of the discipline of Religious Studies and by doing so develop skills

that are valuable in a number of careers and that provide the necessary foundation for pursuing graduate studies.

Students pursuing a major in religious studies must complete a minimum of 33 credits, including the following requirements:

Two required introductory survey courses	6
RELIG 205 Introduction to World Religions	
RELIG 210 Religion in America	
Two courses from Bible or Western Religions	6
RELIG 220 Introduction to the Bible	
RELIG 242 History of Christianity: Beginnings to the Reformation	
RELIG 243 History of Christianity: The Reformation to the Present	
RELIG 280 Introduction to Catholicism	
RELIG 321 Old Testament	
RELIG 322 New Testament	
RELIG 333 Introduction to Judaism	
RELIG 358 Introduction to Islam	
One course from Asian Religions	3
RELIG 352 Religious Traditions of India	
RELIG 353 Buddhism

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign-language requirement.

¹ Laboratory science recommended.

² According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

The program offers a minor that may be earned by completing a total of 15 credits in religious studies including either RELIG 205 Introduction to

World Religions or RELIG 210 Religion in America. Nine hours must be in courses at the 300 level or above (no more than 3 hours of seminar and no more than 3 hours of independent study). The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Students may choose to do a senior thesis under the supervision of a religious studies faculty adviser. This option may earn 3-6 credits toward the completion of the major.

Religious Studies - Graduate Study

Religious studies may be one of the three areas used for the interdisciplinary graduate studies master's degree.

Sociology

Undergraduate Study in Sociology

The Department of Sociology offers course work leading to either a bachelor of arts, bachelor of science, or a minor in sociology. Additionally, a bachelor of science in Agriculture & Society is offered.

Graduates of all these programs will understand and demonstrate:

1. general knowledge of sociology
2. research methods in sociology
3. critical thinking skills
4. application of sociology to pressing social issues
5. sociological and professional values
6. information technology skills
7. communication skills
8. personal and career development

Graduates understand how social institutions, communities, and organizations work and change; they can examine the causes and consequences of conformity, deviance, and inequality. They can apply sociological understanding of human behavior to practical work situations and everyday life. Graduates can read critically, think independently, and communicate effectively about social issues and social policy.

University Requirements:

International Perspective	3
US Diversity	3
Total Credits	6

Communications:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

LIB 160	Information Literacy	1
Total Credits		7

World Languages and Culture:

3 years H.S.

SPAN 097	Accelerated Spanish Review	0
	2 semesters college	8
Total Credits		8

Departmental requirements for sociology majors include the following supporting courses:

STAT 101	Principles of Statistics	3-4
	or STAT 104	Introduction to Statistics
One of the following		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
Total Credits		6-7

Majors must complete both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition. According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. In addition, majors must also take an advanced course in ENGL 302 Business Communication or ENGL 309 Proposal and Report Writing or ENGL 314 Technical Communication with a grade of C or better. Programs leading to a bachelor of arts degree will emphasize additional coursework in groups I and III of the general education requirements. Programs leading to a bachelor of science degree will emphasize additional coursework in groups IIA and IIB of the general education requirements. Some of the possible areas of coursework include criminal justice, community (urban and rural) sociology, family sociology, sociology of work, research methods and statistics, social change and development, social inequality, social psychology and sociological theory.

A program of study that meets the needs and interests of the student and department requirements will be developed in consultation with the major adviser. Students must maintain a GPA of 2.0 or higher in their core courses. Programs of study will include:

SOC 115	Orientation to Sociology	1
SOC 134	Introduction to Sociology	3
SOC 302	Research Methods for the Social Sciences	3
SOC 401	Contemporary Sociological Theories	3
	6 credits of 200+ Sociology courses	6
	18 credits of 300+ Sociology courses	18
Total Credits		34

In addition to the program of study above, students must select complementary courses that will lead to a bachelor of arts or bachelor of science degree.

Bachelor of Arts supporting coursework

At least 9 additional arts and humanities and/or social science courses	9
Total Credits	9

Bachelor of Science supporting coursework

At least 9 additional credits in natural science, math, or statistics	9
Total Credits	9

Sociology, Bachelor of Arts (BA) and Bachelor of Science (BS)

STAT 104	Introduction to Statistics	3
or STAT 101	Principles of Statistics	
Arts & Humanities or Social Science		3
Arts & Humanities or Social Science		3
Arts & Humanities or Social Science		3

LAS approved arts and humanities and/or social sciences courses. May not be cross-listed with sociology courses or dual-listed with general education courses.

Sociology Bachelor of Science Complementary Courses (12-13 credits)

STAT 104	Introduction to Statistics	3
or STAT 101	Principles of Statistics	
Math and/or Natural Science option		3
Math and/or Natural Science option		3
Math and/or Natural Science option		3

LAS approved mathematics and/or natural science courses. May not be cross-listed with sociology courses or dual-listed with general education courses. In addition, these courses may be used: STAT 301, 401D, 404, 407, 415, 421, 479; PSYCH 440; HD FS 449; ECON 308, 376; C R P 451 and WGS 402.

LAS majors require a minimum of 120 credits to graduate, **including a minimum of 45 credits at the 300/400 level.**

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

LAS Approved Course List: <https://las.iastate.edu/students/academics/general-education/general-education-approved-course-list/>

Sociology Minor

The department offers a minor in sociology which may be earned by completing 15 credits in sociology with a minimum 2.0 GPA. At least 9 of the 15 credits must be at the 300 level or higher with a minimum of 6 of those credits taken at ISU. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Students are required to earn credit for the following courses:

SOC 134	Introduction to Sociology	3
Additional 12 credits in Sociology courses		12
9 credits must be 300+		
Total Credits		15

Graduate Study

The Department offers study toward the **Master of Science** and **Doctor of Philosophy** degrees, with majors available in **Sociology** and **Rural Sociology**, as well as a graduate minor in **Sociology** for students majoring in other departments. The Department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; criminal justice/criminology; methodology; social change and development; and social psychology. The Department of Sociology does not offer a non-thesis option Master's degree program.

The Department accepts applicants for the PhD program from students who hold a Master's degree, as well as from students who wish to enter the program directly with a Bachelor's degree.

Contact information: Jeff Bouffard, Professor & Director of Graduate Education, 204 East Hall, 515-294-6508 or jab088@iastate.edu.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the Department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying

competence in one or more languages may be desirable in some instances.

The Department also participates in the interdepartmental graduate major in **Sustainable Agriculture**, and the interdepartmental graduate minor in **Gerontology**.

Course requirements are listed below. Information about examinations, theses and dissertations, POS committees and other requirements are available on the Department of Sociology website.

Ph.D. Core Degree Requirements

Although responsibility for determining the student's course work resides with the Plan of Study (POS) committee, the Department of Sociology outlines core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the Ph.D. core requirements with approval by the Director of Graduate Education (DOGE) in consultation with the student's POS committee.

A minimum of 72 semester credits (including master's degree credits) is required for graduation.

Required Courses for the Ph.D. Degree

STAT 582	Regression for Social and Behavioral Research	3
SOC 506	Classical Sociological Theory	3
SOC 511	Research Methodology for the Social Sciences	3
SOC 512	Applied Multivariate Statistics for Social and Behavioral Research	3
SOC 513	Qualitative Research Methods	3
SOC 534	Race, Class and Gender Inequality	3
SOC 591	Orientation to Sociology	1
SOC 607	Contemporary Sociological Theory	3
SOC 699	Dissertation Research (minimum 8 credits)	8
14 three-credit elective courses as specified on the POS		42

No more than 12 credits of 590 (special topics) may be applied toward the Ph.D. degree requirements.

Total Credits 72

Ph.D. Minor / Co-Major Requirements

Required Courses for the Ph.D. Minor

SOC 506	Classical Sociological Theory	3
or SOC 607	Contemporary Sociological Theory	
SOC 511	Research Methodology for the Social Sciences	3
One of the following two courses:		
SOC 512	Applied Multivariate Statistics for Social and Behavioral Research	3
or SOC 513	Qualitative Research Methods	

Two 3-credit graduate-level courses in Sociology.	6
Total Credits	15

Required Courses for the Ph.D. Co-Major

STAT 582	Regression for Social and Behavioral Research	3
SOC 506	Classical Sociological Theory	3
SOC 511	Research Methodology for the Social Sciences	3
One Course in Advanced Methodology:		
SOC 512	Applied Multivariate Statistics for Social and Behavioral Research	
SOC 513	Qualitative Research Methods	
SOC 534	Race, Class and Gender Inequality	3
SOC 591	Orientation to Sociology	1
SOC 607	Contemporary Sociological Theory	3
3 additional three-credit graduate-level courses in Sociology		9

A minimum of 28 total credits is required for the PhD co-major

Co-Major Requirements for the Graduate Program in Sustainable Agriculture

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program's curriculum satisfies the formal requirements for the MS and Ph.D. degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

The Department does not offer double majors in sociology.

For admission to the co-major program contact the graduate program coordinator.

M.S. Core Degree Requirements

Although responsibility for determining the student's course work resides with the POS committee, the Department of Sociology outlines core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the core requirements with approval by the Director of Graduate Education (DOGE) in consultation with the student's POS Committee.

Required Courses for the M.S. Degree

STAT 587	Statistical Methods for Research Workers	4
SOC 506	Classical Sociological Theory	3
or SOC 607	Contemporary Sociological Theory	
SOC 511	Research Methodology for the Social Sciences	3
SOC 513	Qualitative Research Methods	3
or STAT 582	Regression for Social and Behavioral Research	
SOC 591	Orientation to Sociology	1

SOC 599	Research for Master's Thesis	6
4 three-credit elective courses as specified on the POS		12

No more than 6 credits of 590 (special topics) may be applied toward the M.S. degree requirements.

Total Credits	32
----------------------	-----------

M.S. Minor / Co-Major Requirements**Required Courses for the M.S. Minor**

SOC 506	Classical Sociological Theory	3
or SOC 607	Contemporary Sociological Theory	
SOC 511	Research Methodology for the Social Sciences	3
Two 3-credit graduate-level courses in Sociology.		6
Total Credits	12	

Required Courses for the M.S. Co-Major

STAT 587	Statistical Methods for Research Workers	4
SOC 506	Classical Sociological Theory	3
or SOC 607	Contemporary Sociological Theory	
SOC 511	Research Methodology for the Social Sciences	3
One Course in Advanced Methodology:		
STAT 582	Regression for Social and Behavioral Research	3
or SOC 513	Qualitative Research Methods	
SOC 591	Orientation to Sociology	1
2 additional three-credit graduate-level courses in sociology		6
A minimum of 20 total credits is required for the M.S. co-major		

The department does not offer double majors in sociology at the graduate level. Admission requirements to the co-major program are the same as for the major.

Co-Major Requirements for the Graduate Program in Sustainable Agriculture

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program's curriculum satisfies the formal requirements for the MS and PhD degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

Software Engineering

For the undergraduate curriculum in Software Engineering (<http://www.se.iastate.edu>) leading to the degree Bachelor of Science. The Software Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Bachelor of Science degree in software engineering is jointly administered by the College of Engineering and the College of Liberal Arts and Sciences. The Software Engineering program provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of state-of-the-art software technologies and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers many elective choices in software engineering. Students may also take elective courses in computer engineering and computer science.

Program Educational Objectives

Within five years of graduation, the graduates should:

1. attain a **productive career** in Software Engineering or related fields;
2. attain **leadership** roles and become **effective collaborators** to advance professional and organizational goals;
3. engage in **lifelong learning** and professional development;
4. encourage and support **diversity** and **inclusiveness** in their workplace.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) *peer-recognized expertise*, (b) *engagement in professional practice*, (c) *sustained learning*, (d) *leadership* and (e) *teamwork*.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the College of Engineering and the College of Liberal Arts and Sciences provide opportunities for each student to have experience with broadening activities. Students

have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

The Software Engineering program is an interdisciplinary program delivered jointly by the College of Engineering and the College of Liberal Arts & Sciences.

Leading to the degree bachelor of science.

Total credits required: 125 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
Choose one of the following:		3
ENGL 309	Proposal and Report Writing (C or better in this course)	
ENGL 314	Technical Communication (C or better in this course)	

Total Credits 10

General Education Requirements: 24 cr.²

Arts and Humanities	6	
Social Sciences	3	
Additional Arts and Humanities or Social Sciences course	3	
Choose 1 course from the following:		
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
I E 305	Engineering Economic Analysis	
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
Choose one of the following ENGL courses (C or better in this course)		3
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
SP CM 212	Fundamentals of Public Speaking	3

Total Credits 24

Basic Program: 24 cr.

A minimum GPA of 2.00 is required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4
or CHEM 177	General Chemistry I	
ENGL 150	Critical Thinking and Communication (C or better in this course)	3
S E 101	Software Engineering Orientation ³	R
S E 185	Problem Solving in Software Engineering ³	3
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 221	Introduction to Classical Physics I	5
Total Credits		24

Math and Physical Science: 17 cr.

COM S 227	Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
MATH 267	Elementary Differential Equations and Laplace Transforms	4
Math Elective: Choose one of the following:		3
MATH 207	Matrices and Linear Algebra	
MATH 265	Calculus III	
MATH 304	Combinatorics	
MATH 314	Graph Theory	
MATH 317	Theory of Linear Algebra	
STAT 330	Probability and Statistics for Computer Science	3
Total Credits		17

Software Engineering Core: 37 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Core GPA):

CPR E 281	Digital Logic	4
Choose one of the following:		3
COM S 327	Advanced Programming Techniques	
CPR E 288	Embedded Systems I: Introduction	
Choose one of the following:		3
COM S 321	Introduction to Computer Architecture and Machine-Level Programming	
CPR E 381	Computer Organization and Assembly Level Programming	
Choose one of the following:		3

COM S 352	Introduction to Operating Systems	
CPR E 308	Operating Systems: Principles and Practice	
Choose one of the following:		3
COM S 230	Discrete Computational Structures	
CPR E 310	Theoretical Foundations of Computer Engineering	
COM S 311	Introduction to the Design and Analysis of Algorithms	3
COM S 363	Introduction to Database Management Systems	3
COM S 309	Software Development Practices	3
S E 319	Construction of User Interfaces	3
S E 329	Software Project Management	3
S E 339	Software Architecture and Design	3
S E 421	Software Analysis and Verification for Safety and Security	3

Note: CPR E 288, CPR E 381 and CPR E 308 are 4-credit courses.

The core credit requirement (37 credits) is given in terms of 3-credit courses. If the 4-credit courses are taken instead, then the extra credits will be used as credits for Supplementary Electives.

Total Credits **37**

Other Remaining Courses: 23 cr.

S E 166	Careers in Software Engineering	R
S E 491	Senior Design Project I and Professionalism	3
S E 492	Senior Design Project II	2
Software Engineering Elective ²		6
Supplementary Elective ²		9
Open Elective ²		3
Total Credits		23

Optional Co-op/Internships

Co-op or internship (S E 396, S E 397, S E 398) is optional

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism and S E 492 Senior Design Project II and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.

- Choose from department approved lists. (<http://www.se.iastate.edu/academics/>)
- See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives (<http://www.se.iastate.edu/academics/>).

* Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Basic Program - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA) Must receive a C or better grade in required English classes. General Educational Elective courses to be selected in consultation with SE advisers from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as international perspectives and U.S. diversity, language, arts and humanities, and social sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives and Supplementary Electives must be selected from the program-approved list (<http://www.se.iastate.edu/academics/>).

¹ Core Professional Curriculum (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Core GPA)

² Students who take the 4-credit lab courses CPR E 288, CPR E 308, and CPR E 381 instead of the corresponding 3-credit alternatives can apply the additional credits toward Supplementary Electives. The total number of credits required in the Software Engineering Program remains the same for all students.

Speech Communication

Speech Communication, a major in the Department of English, helps students develop their understanding and appreciation of the human communication process and enhances their oral and written communication practice. Speech Communication students develop an awareness of the importance of oral communication and listening for success in their personal, civic, and professional lives; become familiar with behavioral research in persuasion; understand how language is used to create social change; develop competent delivery skills; assess the quality of arguments; evaluate information found in research and public discourse; and cultivate rhetorical sensitivity in order to better connect with individuals and audiences. In this way, the program contributes to the humanistic, aesthetic, and critical development of liberally educated

students in order to prepare them for full and effective participation in society.

Undergraduate Study

The cross-disciplinary program in speech communication offers courses designed for all students as part of their general education and as a complement to their professional training. It also offers a major or minor in speech communication as well as an additional endorsement for secondary teachers who already have an endorsement in another content area.

Students who major or minor in speech communication will prepare themselves for a wide variety of employment opportunities in business, industry and government, as well as in non-profit and educational organizations. With their effective oral communication, listening, teamwork, problem-solving and leadership skills, speech communication students find positions in general business management: human resources, benefits, financial services, retail, sales and marketing and serve various organizations as recruiters, trainers, promotions managers, communication specialists, community outreach personnel and event planners. The program also prepares students for the study of law, theology, and for graduate level work in speech communication and related disciplines.

The program participates in the interdisciplinary program in Linguistics. Speech Communication also offers a core course and several optional courses in the undergraduate certificate program in Leadership Studies.

Speech Communication Major

A student electing to major in speech communication must earn at least 120 credits with 45 credits at the 300/400 level. A minimum of 33 of those credits must be earned in Speech Communication courses where the student earns a grade of C or better. Our flexible curriculum with few prerequisites can help you meet the 33 hour requirement in a timely way.

Core Requirements (18 credits)

SP CM 110	Listening	3
SP CM 212	Fundamentals of Public Speaking	3
SP CM 216	America Speaks: Great Speakers and Speeches in US History	3
SP CM 310	Rhetorical Analysis	3
SP CM 327	Persuasion and Social Influence	3
or SP CM 350	Rhetorical Traditions	
SP CM 497	Capstone Seminar	3

Additional Coursework (Choose at least 5 of the following for 15 credits)

ENGL 418	Seminar in Argumentation	3
SP CM 275	Analysis of Popular Culture Texts	3

SP CM 305	Language, Thought and Action	3
SP CM 312	Business and Professional Speaking	3
SP CM 313	Communication in Classrooms and Workshops	3
SP CM 322	Argumentation, Debate, and Critical Thinking	3
SP CM 323	Gender and Communication	3
SP CM 324	Legal Communication	3
SP CM 327	Persuasion and Social Influence	3
SP CM 350	Rhetorical Traditions	3
SP CM 404	Seminar	3
SP CM 416	History of American Public Address	3
SP CM 417	Campaign Rhetoric	3

Credits in SP CM 290 Special Projects or SP CM 499 Communication Internship cannot be applied toward the minimum required credits for the major.

The Communication Proficiency requirement may be met by (1) completion of ENGL 150 Critical Thinking and Communication; (2) completion of or credit for ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), or its equivalent, with a grade of C or better; (3) one additional writing course beyond ENGL 250 Written, Oral, Visual, and Electronic Composition with a grade of C or better from the following approved list:

ENGL 302	Business Communication	3
ENGL 303	Free-Lance Writing for Popular Magazines	3
ENGL 304	Creative Writing: Fiction	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
ENGL 415	Business and Technical Editing	3
JL MC 201	Reporting and Writing for the Mass Media	3

Speech Communication Education

Students working toward a primary teaching endorsement in another discipline may add a speech communication endorsement as an additional area. Coursework prepares students to teach speech, dramatic arts, and media at the secondary school level. In addition, they prepare to direct co-curricular and extracurricular activities such as drama, speech and debate.

Each student seeking an additional endorsement in speech communication must meet a 28-29 hour requirement by taking the following courses:

SP CM 110	Listening	3
or COMST 211	Interpersonal Communication	

SP CM 212	Fundamentals of Public Speaking	3
SP CM 310	Rhetorical Analysis	3
or THTR 455	Directing for the Stage	
SP CM 313	Communication in Classrooms and Workshops	3
or THTR 251	Acting Foundations	
SP CM 322	Argumentation, Debate, and Critical Thinking	3
SP CM 495A	Independent Study: Directing Speech Activities	1
SP CM 495B	Independent Study: Teaching Speech	3
THTR 358	Oral Interpretation	3
JL MC 101	Mass Media and Society	3
One of the following		3
THTR 255	Introduction to Theatrical Production	4
THTR 360	Stagecraft	4
THTR 455	Directing for the Stage (if not previously used)	3

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

Speech Communication Choices include SP CM 205 (also ENGL 205), 305, 312, 313, 322, 323, 325 (also COMST 325 - has COMST prerequisites), 305 (also ENGL 350), and 417. Note: Students must earn a C or better in all Speech communication courses used to meet the 33 credits required for the major.

Speech Communication Minor

Students from any major can complement their studies with a Speech Communication Minor (http://www.speechcomm.iastate.edu/?option=com_content&view=article&id=34&Itemid=29). The requirements for a minor in speech communication may be fulfilled by credit in SP CM 212 Fundamentals of Public Speaking plus at least 15 additional hours from the lists above, of which 9 credits are in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Graduate Study

The program offers courses for a graduate minor in speech communication as well as supporting work for other disciplines. The requirements for a graduate minor (<http://www.speechcomm.iastate.edu/>) in Speech Communication include:

SP CM 310	Rhetorical Analysis	3
Plus 9 additional hours selected from the following		9
SP CM 323	Gender and Communication	
SP CM 416	History of American Public Address	
SP CM 417	Campaign Rhetoric	
SP CM 504	Seminar	
SP CM 513	Teaching Fundamentals of Public Speaking	

SP CM 547	The History of Rhetorical Theory I: From Plato to Bacon
SP CM 548	The History of Rhetorical Theory II: From Bacon to the Present
SP CM 590	Special Topics
SP CM 592	Core Studies in Rhetoric, Composition, and Professional Communication

The Program of Speech Communication also participates in the interdepartmental program leading to a master's degree in Interdisciplinary Graduate Studies.

Statistics

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in statistics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) entry level statistics positions in business, industry or commerce, nonprofit institutions, and in state or federal government; (2) graduate study in statistics. Entry-level positions include the following types of work: statistical design, data visualization, analysis and interpretation of experiments and surveys; data processing and analysis using modern computation facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, marketing, manufacturing, sports analytics, and quality control and in nonprofit organizations such as large health study institutions.

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. They should have a clear comprehension of the theoretical basis of statistical reasoning and should be proficient in the use of modern statistical methods, data visualization, and computing. Such graduates should have an ability to apply and convey statistical concepts and knowledge in oral and written form. They should be aware of ethical issues associated with polling and surveys and in summarizing and displaying the outcomes of statistical studies.

Undergraduate majors in this department usually include in their programs:

STAT 110	Orientation in Statistics	1
STAT 201	Introduction to Statistical Concepts and Methods	4

One of the following options

Option I		
MATH 165	Calculus I	

MATH 166	Calculus II	
MATH 265	Calculus III	

Option II

MATH 165	Calculus I	
MATH 166H	Calculus II, Honors	
MATH 265H	Calculus III, Honors	

One of the following

MATH 207	Matrices and Linear Algebra	
MATH 317	Theory of Linear Algebra	

One of the following

COM S 107	Windows Application Programming	
COM S 127	Introduction to Computer Programming	
COM S 207	Fundamentals of Computer Programming	
COM S 227	Object-oriented Programming	

STAT 301	Intermediate Statistical Concepts and Methods	4
STAT 341	Introduction to the Theory of Probability and Statistics I	4
STAT 342	Introduction to the Theory of Probability and Statistics II	4
STAT 471	Introduction to Experimental Design	3
STAT 475	Introduction to Multivariate Data Analysis	3
STAT 484	Computer Processing of Scientific Data	3
STAT 486	Introduction to Statistical Computing	3

A minimum of 6 credits from the following

STAT 361	Statistical Quality Assurance	
STAT 472	Introduction to Time Series	
STAT 473	Introduction to Survey Sampling	
STAT 474	Introduction to Bayesian Data Analysis	
STAT 476	Introduction to Spatial Data Analysis	
STAT 477	Introduction to Categorical Data Analysis	
STAT 478	Introduction to Stochastic Process Models	
STAT 482	Regression for Social and Behavioral Research	
STAT 483	Empirical Methods for the Computational Sciences	

English and Speech proficiency requirement: The department requires a passing grade in ENGL 150 Critical Thinking and Communication, completion of ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors) with a grade of C or better, and completion of one of ENGL 302 Business Communication or ENGL 314 Technical Communication with a grade of C- or better. The department requires a passing grade in COMST 211 Interpersonal Communication or SP CM 212 Fundamentals of Public Speaking .

It is advisable to have at least a minor in a field of application. Some common minors earned by statistics majors are: Economics, General Business, and Mathematics. Students preparing for positions in data analysis should consider a minor or certificate in Data Science. Students preparing for a career in the field of actuarial science should consider a Certificate in Actuarial Science. Students intending to do graduate work in statistics are strongly advised to complete at least a minor in Mathematics including credit in MATH 414 Analysis I.

Many Statistics majors earn a second major or degree in a field of application or Mathematics. Your academic adviser can assist you in developing your course of study that includes other majors.

In order to graduate, all students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Discuss with your adviser how the two courses you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level.**

You must also complete the LAS foreign language requirement.

Minor

The department offers a minor in statistics which may be earned by completing one introductory course in statistics (STAT 101, 104, 105, 201, 226, 231, 305, 322 or 330); STAT 301 or 326; plus at least 9 additional credits from STAT 341, 342, 347, 361, 471, 472, 473, 474, 475, 476, 477, 478, 482, 483, 484, and 486 to yield a total of at least 15 credits in statistics courses. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Graduate Study

The department offers graduate programs leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees with a major in statistics. Graduate work leading to a minor in statistics is available for students majoring in other programs, at both the M.S. and Ph.D. levels.

The Ph.D. degree is also offered as a co-major with other graduate programs. The department participates in inter-disciplinary graduate programs in Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Human Computer Interaction, Nutritional Sciences, and Wind Energy Science, Engineering, and Policy.

Graduates of the M.S. program have an understanding of basic statistical theory and methods. Elective courses in the M.S. program provide an opportunity for students to emphasize particular areas of statistical methods or application in their program. Students complete a minimum of 34 semester credits, including work on a capstone project resulting in a written creative component under the direction of an individual major professor and presented in a final oral examination.

Graduates of the Ph.D. program in statistics have studied advanced theory and methods, and have demonstrated the ability to conduct independent research resulting in an original contribution to the discipline. Candidates for the Ph.D. degree in statistics complete a minimum of 72 semester credits, including at least 18 credits given for research activity, pass an oral preliminary examination, and submit a written dissertation containing original research that is defended in a final oral examination. Dissertation research is typically conducted in close collaboration with a major professor and usually results in publishable material. The department does not offer specific program tracks or areas

of emphasis, but the diversity of elective courses and research areas of faculty allow students to tailor their individual programs to reflect areas of particular interest.

Graduates of co-major Ph.D. programs in statistics and an applied scientific discipline have mastered basic statistical theory and have studied advanced methodology. Students complete a minimum of 72 semester credits for courses in statistics and the chosen scientific discipline. Students conduct research that is a combination of statistical methodology and the scientific discipline. Co-major professors work with the student to prepare for an oral preliminary examination and conduct research leading to a single dissertation project that produces an original contribution to at least one of the two disciplines that is defended in a final oral examination.

Graduates of co-major Ph.D. programs in statistics and an area of theoretical mathematics have mastered basic statistical methods and have studied advanced statistical theory. Students complete a minimum of 72 semester credits. Co-major professors assist the student in preparing a dissertation that represents original research that makes a contribution at the interface of statistical theory and a sub-discipline of mathematics. The dissertation is defended in a final oral examination.

Teaching English as a Second Language (TESL)

The Minor in TESL prepares students to teach English to nonnative speakers of English, either in community programs in the United States or in overseas locations. The Minor provides understanding of how English works (ENGL/LING 219) and practical and theoretical applications in how English is taught to those who do not speak English natively (ENGL/LING 322, ENGL/LING 324, ENGL/LING 325, and ENGL/LING 425). The TESL Minor prepares students to cross cultural boundaries to learn about, interact with, and assist speakers of other languages in learning English, the leading global language today. A TESL Minor will help students become global citizens through interacting with and teaching those from around the world who come to the United States and by giving students skills that will allow them to live and work in other countries. All classes listed are requirements for the Minor in TESL (15 credits). A C or better is required in each course used to satisfy the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Contact Taylor Anne Barriuso barriuso@iastate.edu for more information.

ENGL 219	Introduction to Linguistics	3
LING 322	Language and Society	3
LING 324	Introduction to Teaching ESL Literacy	3

LING 325	Teaching Methods for ESL Learners: Oral Communication Skills	3
ENGL 425	Second Language Learning and Teaching	3

Technical Communication

The Technical Communication major (and minor) prepares students for workplace writing in careers that involve information—particularly scientific, workplace, and technical information. Emphasis is placed on researching, thinking critically, collaborating (often with subject matter experts), organizing, writing, editing, designing, and presenting information clearly. TComm is sometimes a second major for students in technical, scientific, or engineering fields, and often a second major or minor for students who major in English (<http://catalog.iastate.edu/collegeofliberalartsandsciences/english/>).

Technical Communication Major Requirements

Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline. Technical Communication majors must take 33 credits within the major, and 6 hours in a designated area of concentration related to science, technology, or design (an acceptable minor will also fulfill this requirement).

ENGL 214	Introduction to Technical Communication	3
ENGL 310	Rhetorical Analysis	3
ENGL 313	Rhetorical Website Design	3
ENGL 314	Technical Communication	3
ENGL 415	Business and Technical Editing	3
ENGL 416	Visual Aspects of Business and Technical Communication	3
Electives: 9 credits (with at least 6 credits from 400 or above courses)		9

ENGL 220	Descriptive English Grammar	
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
SP CM 312	Business and Professional Speaking	
ENGL 312	Biological Communication	
ENGL 350	Rhetorical Traditions	
ENGL 418	Seminar in Argumentation	
ENGL 477	Seminar in Technical Communication	
ENGL 487	Internship in Business, Technical, and Professional Communication	
ENGL 542	Document Design and Editing	
ENGL 549	Multimedia and Interaction Design	

Designated Area of Concentration (DAC) in technical, scientific, or design field	6
Total Credits	33

Designated Area of Concentration Courses

The Designated Area of Concentration (DAC) is a student-designed grouping of related courses in a technical, scientific, or design field that will meet the student’s professional or academic interests. Courses for the 6-credit DAC must be taken outside the English Department and approved by the Technical Communication Program Adviser. A second major or a minor in areas such as computer science, social science, natural science, entrepreneurial studies, design studies, engineering studies, or another technical, scientific, or design field may substitute for the DAC.

Technical Communication Major Requirements

Technical Communication majors are required to have, in addition to ISUComm foundation courses (ENGL 150 (<http://catalog.iastate.edu/search/?P=ENGL%20150>) Critical Thinking and Communication and ENGL 250 (<http://catalog.iastate.edu/search/?P=ENGL%20250>) Written, Oral, Visual, and Electronic Composition), at least 33 credits in TComm (including 6 credits in a designated area of concentration). Majors transferring from other institutions must take at least 18 of their credits in TComm while in residence at Iowa State.

To graduate with a major in Technical Communication and meet the university-wide Communication Proficiency Grade Requirement, a student must have credit for ENGL 150 Critical Thinking and Communication and earn at least a C (not C-) in ENGL 250 Written, Oral, Visual, and Electronic Composition as well as in each of the courses taken to fulfill the program of study, including one advanced communication course.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) Discuss with your adviser how the two courses that you select can be applied to your graduation plan. LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

Technical Communication Minor Requirements

The department offers a minor in Technical Communication, which students may earn by completing the following:

ENGL 314	Technical Communication	3
Choose 4:		12

ENGL 214	Introduction to Technical Communication
ENGL 302	Business Communication
ENGL 309	Proposal and Report Writing
ENGL 310	Rhetorical Analysis
ENGL 312	Biological Communication
ENGL 313	Rhetorical Website Design
ENGL 332	Visual Communication of Quantitative Information
ENGL 350	Rhetorical Traditions
or with the appropriate prerequisites	
ENGL 411	Technology, Rhetoric, and Professional Communication
ENGL 415	Business and Technical Editing
ENGL 416	Visual Aspects of Business and Technical Communication
ENGL 418	Seminar in Argumentation
ENGL 477	Seminar in Technical Communication
ENGL 529	Content Management
ENGL 542	Document Design and Editing
ENGL 549	Multimedia and Interaction Design

Total Credits **15**

Nine of the 15 credits must be 300 level or above and students must earn a grade of C (not C-) or higher in each course taken in the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students may design their minor programs around their own interests but are encouraged to work with the Technical Communication Program Adviser.

Note: Students should check the ISU catalog to be sure that they meet prerequisites if they intend to register for 400+ courses.

Theatre and Performing Arts

THEATRE AND PERFORMING ARTS

www.theatre.iastate.edu

The Theatre and Performing Arts program:

- Utilizes a flexible, interdisciplinary curriculum dedicated to empowering the citizen artist.
- Focuses on undergraduate experiences, high impact learning, interdisciplinary and cross-community collaboration, and exceptional professional preparation and training.
- Engages in collaborative, innovative practices in both classroom and production settings.
- Empowers students to take an active role in an interconnected system of artistic community engagement and creative momentum.

- Is dedicated to individualized student-centered programming that is ambitious, relevant, and rigorous.

ISU Theatre impacts hundreds of students from majors throughout the university in our classes, productions and studios. Our students are compassionate, enthusiastic, aware, ambitious, dependable, dedicated, disciplined and generous. The Theatre and Performing Arts program offers a wide variety of courses that support the student's individual interests and specialization. Our curriculum is flexible, interdisciplinary and dedicated to fostering the citizen artist.

The major in performing arts offers the undergraduate student a cross-disciplinary core including 26 credits in three categories: Theatre, Music and Dance. Students also select a 21-24 credit emphasis in one or more of the following areas of focus:

- Acting/Directing
- Dance
- Musical Theatre
- Theatre Studies
- Theatrical Design and Technology

Additional professional development occurs within two required professional internships in which students can practice the skills and passions developed throughout their individualized plans of study. Preparation for these internships include various impactful experiences in theatre and the performing arts here at Iowa State. This work is vital for students to gain a practical understanding of the rigors of the field.

ISU Theatre and Performing Arts focuses solely on the undergraduate student artist, offering students many opportunities to participate in production experiences throughout the academic year. Students implement the theories and principles explored in the classroom with experiential learning through public performances. These productions vary in scope, taking place in the 435-seat proscenium space at Fisher Theatre as well as in other intimate and "found" venues both on and off campus. Performing arts majors must maintain a 2.0 GPA to participate in production activities. Scholarships and employment opportunities are available to both incoming and current students on a yearly basis. All areas of ISU Theatre and Performing Arts, including classes and productions, are open to all students regardless of major. Visit here (<https://www.music.iastate.edu/how-get-involved-theatre-and-performing-arts/>) to learn about scholarships and all of the ways to get involved with Theatre and the Performing Arts at ISU.

In addition to building a solid foundation in theatre, Performing Arts graduates enter the world as empathetic citizen artists prepared to engage in civic life and meet the challenges of the work force or graduate school with strong skills in leadership, collaboration, and critical thinking.

Bachelor of Arts - Performing Arts Major (Perf)

All performing arts majors must complete both the performing arts core and at least one of the emphases listed below. A Minimum GPA of 2.00 in both the major core and the chosen emphasis is required to graduate.

The Core for the Performing Arts Major (25-26 credits)

MUSIC 102	Introduction to Music Listening	3
or THTRE 106	Introduction to the Performing Arts	
or THTRE 110	Theatre and Society

Please see the Department advisers for more information about suggested Four Year Plans for the Emphases in Dance and Theatre Studies. Students in all ISU majors must complete a three-credit course in U.S. Diversity and a three-credit course in International Perspectives. Consult the catalogue for a list of approved courses. Discuss with your adviser how these two courses can be applied to your graduation plan.

Performing Arts Minor

To complete the minor in Performing Arts, students must take at least 15 credits of either Theatre or Performing Arts courses. Six credits must be 300 level or higher. *THTRE 224, 250, 290, 301X, 469, 490, and 499 do not count toward the Performing Arts minor.* The minor must include at least 9 credits that are not used to meet any other department, college or university requirement. The following classes are required:

PERF 105	Performing Arts Seminar (3 semesters)	R
THTRE 255	Introduction to Theatrical Production	4
THTRE 263	Script Analysis	3

Women's and Gender Studies

Women's and Gender Studies (B.A., B.S.)

The Women's and Gender Studies Program is a cross-disciplinary program in the College of Liberal Arts and Sciences. The program offers students opportunities to analyze issues concerning women, gender, and sexuality in diverse cultural contexts and to investigate a variety of

disciplines from feminist perspectives. The field of women's and gender studies creates an understanding that interrelated factors—e.g., race, ethnicity, class, age, disability, gender identity, religion, national origin, and sexual orientation—inform knowledge of women's history, culture, and social roles.

Women's and Gender Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. It encourages students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. By promoting social justice and inclusion, this area of study focuses on the connections between personal experience and political activity, and validates student contributions and voices.

Graduates from this program are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, graduates work effectively with employers, colleagues, and clients to analyze and solve complex social problems. Women's and Gender Studies students also acquire strong backgrounds for careers in areas such as counseling, education, human resources, international development, public policy, politics, business, and law. The program includes core and cross-listed courses in anthropology, history, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures. An undergraduate major requires a minimum 2.00 GPA in the 34 credits of core and cross-listed courses. Women's and Gender Studies' majors must satisfy the following requirements:

1. 16 credits selected from Women's and Gender Studies core courses (WGS).

A. Required core courses:

WGS 160	Gender Justice	1
WGS 201	Introduction to Women's and Gender Studies	3
WGS 301	International Perspectives on Women and Gender	3
WGS 401	Feminist Theories	3
WGS 402	Feminist Research in Action	3
WGS 491	Internship	3
or WGS 499	Senior Thesis	
Total Credits		16

B. The remaining 18 credits can be chosen from one of the following Areas of Emphasis: 1) Communication and Cultural Representation, 2) Identities and Sexualities, 3) Leadership and Social Justice, or 4) General Women's and Gender Studies.

1) Communication and Cultural Representation

WGS 210	Gender and Sexuality in American Pop Culture	3
WGS 308	Write Like a Woman	3
WGS 323	Gender and Communication	3
WGS 325	Portrayals of Gender and Sexualities in the Media	3
WGS 338	Feminist Philosophy	3
WGS 340	Women's Literature	3
WGS 345	Women and Literature: Selected Topics	3
ENGL 349	Topics in Multicultural Literatures of the United States	3
WGS 352	Gay and Lesbian Literature	3
WGS 370	Studies in English Translation	3
WGS 374	Sex, Gender, and Culture in the Ancient Mediterranean World	3
WGS 422	Women, Men, and the English Language	3
WGS 430	Gender and Consumer Culture	3
WGS 450	Topics in Women's and Gender Studies	3
WGS 460	Seminar in Gender and Ethnicity	3
WGS 490	Independent Study	1-3
WGS 494	Women/Gender in Art	3
WGS 545	Women's Literature	3

2) Identities and Sexualities

WGS 203	Introduction to Lesbian Studies	3
WGS 205	Introduction to Queer Studies	3
WGS 210	Gender and Sexuality in American Pop Culture	3
WGS 308	Write Like a Woman	3
WGS 325	Portrayals of Gender and Sexualities in the Media	3
WGS 327	Sex and Gender in Society	3
WGS 328	Sociology of Masculinities and Manhood	3
WGS 336	Women and Religion	3
WGS 344	Human Reproduction	3
WGS 346	Psychology of Women	3
ENGL 349	Topics in Multicultural Literatures of the United States	3
WGS 350	Women of Color in the U.S.	3
WGS 374	Sex, Gender, and Culture in the Ancient Mediterranean World	3
WGS 386	History of Women in America	3
WGS 425	Intersections of Race, Class and Gender	3
WGS 430	Gender and Consumer Culture	3
WGS 440	Gender Issues in Sports	3
WGS 444	Sex and Gender in Cross-cultural Perspective	3
WGS 450	Topics in Women's and Gender Studies	3

WGS 490	Independent Study	1-3
WGS 494	Women/Gender in Art	3
WGS 525	Intersections of Race, Class and Gender	3
WGS 586	Readings Seminar in Women's and Gender History	3

3) Leadership and Social Justice

WGS 210	Gender and Sexuality in American Pop Culture	3
WGS 307	Women in Science and Engineering	3
WGS 320	Ecofeminism	3
WGS 321	Economics of Discrimination	3
WGS 333	Women and Leadership	3
WGS 344	Human Reproduction	3
WGS 350	Women of Color in the U.S	3
WGS 385	Women in Politics	3
WGS 386	History of Women in America	3
WGS 425	Intersections of Race, Class and Gender	3
WGS 435	Gender, Globalization and Development	3
WGS 440	Gender Issues in Sports	3
WGS 450	Topics in Women's and Gender Studies	3
WGS 488	Research on Women and Leadership	3
WGS 490	Independent Study	1-3
WGS 586	Readings Seminar in Women's and Gender History	3

A minor or second major is recommended. The typical degree awarded is a Bachelor of Arts; students interested in a Bachelor of Science degree in Women's and Gender Studies need to complete 12 credits in addition to the general education requirements across the areas of natural science, mathematics, and social science.

Communication Proficiency requirement:

The Women's and Gender Studies major requires credit for ENGL 150; ENGL 250 (or ENGL 250H) (with a grade of C or better, per the university-wide Communication Proficiency Grade Requirement); and WGS 301 or WGS 401 or WGS 402 (with a grade of C or better).

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

Minor

Undergraduate students may minor in Women's and Gender Studies by taking 15 semester hours of Women's and Gender Studies classes, including the following:

WGS 201	Introduction to Women's and Gender Studies	3
WGS 301	International Perspectives on Women and Gender	3
One 400-level WGS course and 6 additional credits in WGS; at least 3 of the additional credits must be at the 300-400 level.		9

University policy requires that at least 9 credits used for the minor stand alone and are not used to meet any other requirement. All WGS courses for the minor require a grade of C (not C-) or higher.

Any student can declare a major or minor in Women's and Gender Studies or choose to co-major in another program. Students interested in a minor or major in Women's and Gender Studies should contact the director or the undergraduate advisor in the program.

Graduate Study

The graduate minor in Women's and Gender Studies is designed to provide students with knowledge of theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students opportunities for systematic study of gender and women's experiences and perspectives in all knowledge fields. Students will be prepared to take a leadership role in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

The graduate minor requires 12 credits for students enrolled in a master's or a doctoral degree program. Students are required to take either WGS 501 Contemporary Feminist Theories or WGS 502 Advanced Seminar in Feminist Research Methods; taking both is strongly recommended. Students will also take two or three electives selected from the list of core and cross-listed Women's and Gender Studies courses approved for graduate study. At least one member of the Women's and Gender Studies faculty will serve on the program of study for doctoral students. A list of eligible faculty members may be obtained from the Director of the Women's and Gender Studies Program.

World Languages and Cultures**Degree: World Languages and Cultures, B.A.**

Curriculum: World language study should be an integral part of an academic program for most students. The theoretical understanding of and practical experience in language underlie many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of World Languages and

Cultures are designed to develop students' understanding of a second culture through the language spoken by that culture.

Upon the completion of their program of studies in the Department of World Languages and Cultures, majors with a concentration in French, German, or Spanish will demonstrate proficiency in five goal areas: Communication, Cultures, Connections, Comparisons, and Communities. Students will be able to:

1. use their concentration language to present and interpret information and to communicate both orally and in writing;
2. demonstrate an understanding of the relationships among the products, practices, and perspectives of the culture(s) in which their concentration language is spoken;
3. demonstrate their ability to acquire information and further their knowledge through their concentration language;
4. demonstrate an understanding of the nature of language and the concept of culture by making comparisons with their own language and culture(s); and
5. demonstrate a desire to become a life-long learner of their concentration language.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program. Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. Students of Latin and Ancient Greek demonstrate proficiency by becoming able to read the languages and to translate from these languages into clear and idiomatic English. Cultural literacy includes a general knowledge of the culture's history, familiarity with its literature, and basic knowledge of its social and political institutions.

The Department offers a major in World Languages and Cultures with two options, leading to the Bachelor of Arts degree:

1. Languages and Cultures with a Concentration in French, German, or Spanish;
2. Languages and Cultures for Professions (as a second major only) with a Concentration in French, German, or Spanish.

The Department also houses ISU's program in Anthropology, leading to a Bachelor of Arts or Bachelor of Science degree (<http://catalog.iastate.edu/collegeofliberalartsandsciences/anthropology/>).

The Department offers minors in Anthropology, Chinese Studies, French, German, Russian Studies, Spanish, and World Film Studies; and instruction in American Sign Language, Arabic, Italian (see Experimental Course List), and Classical Greek and Latin. The Department also houses the College of Liberal Arts and Sciences' Cross Disciplinary Studies

Programs in American Indian Studies, Classical Studies, International Studies, and U.S. Latino/a Studies.

A full statement of requirements for majors and minors may be obtained from the Department. For a complete statement of all the college degree requirements, see Liberal Arts and Sciences, Curriculum. Current and detailed information about the Department, including placement information, is available on-line at www.language.iastate.edu (<http://www.language.iastate.edu>).

Policies

Students who have had formal training in world languages offered at Iowa State may obtain credit by passing appropriate examinations. Students with native fluency in languages taught at Iowa State may not enroll in or take the Exam for Credit in elementary or intermediate courses (100 and 200 level) in their native language. Students are considered to have native fluency if their ethnic first language as indicated on the matriculation form is the language in which they wish to enroll. Students are also considered to have native fluency if they have had substantial attendance at a secondary school or university where the language of instruction is the language in which they wish to enroll at ISU. Students with native fluency may be eligible to enroll in literature and civilization courses in their native language at the 300 level or above; such students must also consult the department office to determine eligibility for advanced composition and conversation courses (300 level and above). Students who have completed three or more years of high-school world language study may not enroll in or receive credit for 101-102 in those languages; credit may be obtained by passing the appropriate Exam for Credit or by completing an advanced sequence (200-level or higher) in that language. Students who complete an approved sequence of courses in a single language at the 200- or 300-level (e.g., 201 and 202 or 301 and 302) with a grade of C- or higher are eligible to receive credit for 101 and 102 in that same language if they have not received credit for a 101 or 102 course in the language. Students who complete a 102 course with a grade of C- or higher are eligible to receive credit for 101 in that same language if they have not received credit for 101 in the same language. Students should contact the department after completion of the course sequence to receive credit. Courses in the 101-102 level may not be taken on a remedial basis.

Students who have completed two years but less than three years of a single high-school world language may not enroll in a 101 course in that language. These students may enroll in either a 102 course in that language, or in the case of Spanish, SPAN 097 Accelerated Spanish Review. Before enrolling in either SPAN 097 Accelerated Spanish Review or a 102 language course, students are recommended to take the on-line placement test available at www.language.iastate.edu (<http://www.language.iastate.edu>). After completing the online placement test, students who believe that they have extenuating circumstances may

appeal to the Department of World Languages and Cultures in order to request enrollment in a 101 language course.

SPAN 097 Accelerated Spanish Review is designed for students who need additional work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete with a passing grade will have fulfilled the LAS world language requirement. Students who have completed SPAN 097 Accelerated Spanish Review and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic adviser, the Department of World Languages and Cultures, or the Disability Resources Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

The Department also offers faculty-led summer study abroad programs in Costa Rica, France, Germany, Greece, Italy, and Spain; and semester study abroad programs in Spain. Programs and exchanges in other areas of the world are offered through study abroad providers. Information concerning these programs can be obtained directly from the Department.

Language and literature courses numbered 300 and above are principally taught in the target language; courses numbered in the 270s, 370s, and 470s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any advanced (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Students at all levels of world language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

Materials fees: Each student enrolled in a 100- through 200- level world language course is assessed a materials and professional support fee of \$25.00 per course. If a student drops a course subject to the fee by the 15th day of the semester the fee for that course will not be assessed.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must

demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 370 and 379 taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies.

Languages and Cultures for Professions (LCP)

Students with primary majors in the College of Business, the College of Engineering, or the College of Agriculture and Life Sciences are encouraged to complete an LCP second major option in World Languages and Cultures with a concentration in French, German, Spanish, or an LCP minor option in those languages plus Chinese Studies or Russian. The primary objective of the LCP option is to provide learning environments within which students can achieve global literacy, linguistic proficiency, and inter-cultural competence. In the LCP curriculum, students will learn how professions are shaped by social and cultural forces and, alternatively, how professions shape society. In courses on contemporary culture and society, students will identify and analyze issues dealing with the complex interrelationships of languages and cultures and consider how they may affect their chosen profession. Students will experience living and working in diverse cultural settings through study abroad and internship opportunities offered through the LCP program and/or in collaboration with the Colleges of Business, Engineering, and Agriculture and Life Sciences. Students enrolled in the LCP second major option may receive non-graded academic credit for the successful completion of internships (WLC courses numbered 499 in each language area).

For the LCP second major option, students will complete 30 credits within their language concentration beyond the fourth-semester level, selected from the list of approved LCP core courses and electives designated for their respective college curricula in either Business, Engineering, or Agriculture and Life Sciences. Students may only enroll in the LCP option as a second major and may not graduate with the LCP option in the WLC major alone.

Students in the College of Business may combine course work in the International Business (IB) Secondary Major with course work in LCP by selecting from a list of approved options. Students should consult their academic adviser in the College of Business and the WLC adviser for coursework and international experience that fulfill requirements in both the IB and LCP major options.

American Sign Language (ASL) **Courses primarily for undergraduate students**

ASL 101: American Sign Language I

(4-0) Cr. 4. F.S.

Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from "Signed English". ASL is a natural language with its own rules of grammar and usage.

Meets U.S. Diversity Requirement

ASL 102: American Sign Language II

(4-0) Cr. 4. S.

Prereq: ASL 101

Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from "Signed English". ASL is a natural language with its own rules of grammar and usage.

Meets U.S. Diversity Requirement

ASL 201: Intermediate American Sign Language I

(4-0) Cr. 4. F.

Prereq: ASL 102 or equivalent.

Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics.

ASL 202: Intermediate American Sign Language II

(4-0) Cr. 4. S.

Prereq: ASL 201 or equivalent.

A continuation and further application of language principles learned in ASL 201, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of sematic equivalence and dialogic/monologic register.

ASL 275: Topics in Deaf Culture

(3-0) Cr. 3.

Focus on contemporary topics in Deaf Culture, Communities, and History. Readings and discussion from a wide range of sources. Topics vary according to faculty interest.

Meets U.S. Diversity Requirement

ASL 490: Independent Study

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: 6 credits in ASL and permission of department chair

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits of ASL 490 may be counted towards graduation.

Arabic (Arabc)

Courses primarily for undergraduate students

ARABC 101: Elementary Arabic I

(4-0) Cr. 4. F.

Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet.

ARABC 102: Elementary Arabic II

(4-0) Cr. 4. S.

Prereq: ARABC 101 or placement by department exam.

Continuation of ARABC 101. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 195: Study Abroad

Cr. arr. Alt. SS., offered irregularly.

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

ARABC 201: Intermediate Arabic I

(4-0) Cr. 4. F.

Prereq: ARABC 102 or placement by department exam

Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 202: Intermediate Arabic II

(4-0) Cr. 4.

Prereq: ARABC 201 or placement by department exam

Continuation of Arabic 201. Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 295: Study Abroad

Cr. arr. Alt. SS., offered irregularly.

Prereq: ARABC 102 or equivalent

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

Chinese Studies (Chin)

Chinese Studies Minor Option 1: Chinese Studies (17 Credits)

CHIN 201	Intermediate Mandarin Chinese I	4
CHIN 202	Intermediate Mandarin Chinese II	4

Courses primarily for undergraduate students

CHIN 101: Elementary Mandarin Chinese I

(4-0) Cr. 4. F.

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

CHIN 102: Elementary Mandarin Chinese II

(4-0) Cr. 4. S.

Prereq: CHIN 101

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

Meets International Perspectives Requirement.

CHIN 201: Intermediate Mandarin Chinese I

(4-0) Cr. 4. F.

Prereq: CHIN 102

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.

Meets International Perspectives Requirement.

CHIN 202: Intermediate Mandarin Chinese II

(4-0) Cr. 4. S.

Prereq: CHIN 201

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.

Meets International Perspectives Requirement.

CHIN 272: Introduction to Chinese Culture

(3-0) Cr. 3. S.

Interdisciplinary introduction to Chinese society and culture from earliest times to the present. Topics include ancient literature, philosophy, religion, art, architecture, customs, transition to a modern society, social changes, urban life, popular culture, and contemporary values and ideas.

Meets International Perspectives Requirement.

CHIN 301: Advanced Mandarin Chinese I

(3-0) Cr. 3. F.

Prereq: CHIN 202 or equivalent

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only.

Meets International Perspectives Requirement.

CHIN 302: Advanced Mandarin Chinese II

(3-0) Cr. 3. S.

Prereq: CHIN 301 or equivalent

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only.

Meets International Perspectives Requirement.

CHIN 304: Chinese for Global Professionals

(4-0) Cr. 4. S.

Prereq: CHIN 202 or equivalent

Introduction to professional language and culture in China and Chinese-speaking regions in Asia. Development of all four language skills, focusing on practical applications in the professional contexts.

Development of global awareness and cross-cultural understanding.

Preparation for internships.

Meets International Perspectives Requirement.

CHIN 370: Chinese Literature in English Translation

(3-0) Cr. 3. Repeatable. F.

Prereq: ENGL 150 or equivalent

Topics may include traditional prose, poetry, novel and drama; twentieth-century fiction and film. All readings and class discussions in English.

Meets International Perspectives Requirement.

CHIN 375: China Today

(3-2) Cr. 3-4. Repeatable. S.

Prereq: ENGL 250 or equivalent

Focusing on contemporary society, culture, literature and the arts. All readings, discussions, and papers in English. Topics vary from year to year.

Meets International Perspectives Requirement.

CHIN 403: Seminar in Chinese Language and Culture

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.

Meets International Perspectives Requirement.

CHIN 403A: Seminar in Chinese Language and Culture: Translating Contemporary Chinese Texts

(3-0) Cr. 3.

Prereq: CHIN 302

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.

Meets International Perspectives Requirement.

CHIN 403B: Seminar in Chinese Language and Culture: Topics on Business and Professions

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.

Meets International Perspectives Requirement.

CHIN 403C: Seminar in Chinese Language and Culture: Reading Chinese Texts

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese.

Meets International Perspectives Requirement.

CHIN 490: Independent Study

Cr. 1-6. Repeatable.

Prereq: 6 credits in Chinese and permission of department chair

Designed to meet student needs in areas beyond current course offerings or to accommodate the desire to integrate a study of literature or language with special issues in major fields.

CHIN 499: Internship in Chinese

Cr. 1-3. Repeatable, maximum of 6 credits.

Prereq: 9 credits of Chinese at the 300 level; permission of adviser and WLC Internship Coordinator

Work experience using Chinese in the public or private sector, combined with academic work under faculty supervision. Offered on a satisfactory-fail basis only. No more than 3 credits may apply toward the Chinese minor or LCP minor.

French (Frnch)

World Languages and Cultures majors with a concentration in French have two options:

WLC Option I: French Studies

Under WLC Option I, students with a concentration in French Studies must complete at least 30 credits beyond the intermediate level (FRNCH 201 Intermediate French I-FRNCH 202 Intermediate French II).

Major option in French Studies (30 credits total)

A. Required Core Courses (13 credits)

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 476	French Culture and Society in English	3-4

B. Additional Courses (at least 17 credits)

FRNCH 304	French for Global Professionals	3
FRNCH 305	French Conversation	3
FRNCH 320	France Today	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 370	French Studies in English	3-4
FRNCH 378	French Film Studies in English	3-4

c. Communication Proficiency Requirements: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 370 and 379 taught by the Department of World

Languages and Cultures or the interdepartmental program in Classical Studies.

Curricular Notes: Majors must enroll in FRNCH 370, FRNCH 378, and FRNCH 476 for 4 credits. No more than 8 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the French major. FRNCH 476 French Culture and Society in English must be completed on campus and may not be fulfilled through transfer or study abroad.

Minor in French

The French Minor requires 15 credits of courses taught in French beyond the elementary level (FRNCH 101 Elementary French I - FRNCH 102 Elementary French II). Six credits must be in the required core: French 301 and 302. At least three credits must be chosen from the list of approved additional courses. French 370, 378, and 476 cannot count toward the French minor.

Required core courses (6 credits):

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3

Additional courses (at least 3 credits):

FRNCH 304	French for Global Professionals	3
FRNCH 305	French Conversation	3
FRNCH 320	France Today	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 340	Studies in French or Francophone Literature	3

WLC Option II: Languages and Cultures for Professions

Under WLC Option II students with a concentration in French must complete at least 30 credits beyond the intermediate (FRNCH 201 - FRNCH 202) level.

I. Languages and Cultures for Professions (Colleges of Agriculture and Life Sciences, Business, and Engineering)

Students with a primary major in the Colleges of Agriculture and Life Sciences, Business, or Engineering pursuing the second major option in French are required to take at least 30 credits beyond the intermediate (FRNCH 201 - FRNCH 202) level.

A. Required Core Courses (22 credits) Additional study abroad credit from an approved study abroad program may be applied to the major.

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3
FRNCH 304	French for Global Professionals	3
FRNCH 320	France Today	3
FRNCH 340	Studies in French or Francophone Literature	3

FRNCH 476	French Culture and Society in English	3-4
FRNCH 499	Internship in French	1-3

Additional Courses (8 credits)

FRNCH 305	French Conversation	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 370	French Studies in English	3-4
FRNCH 378	French Film Studies in English	3-4

Curricular Notes: Majors must enroll in FRNCH 370, FRNCH 378 and FRNCH 476 for 4 credits. No more than 8 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted for the French major. FRNCH 476 French Culture and Society in English must be completed on campus and may not be fulfilled through transfer or study abroad. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

Courses primarily for undergraduate students

FRNCH 101: Elementary French I

(4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture.

FRNCH 102: Elementary French II

(4-0) Cr. 4. S.SS.

Prereq: FRNCH 101

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture.

Meets International Perspectives Requirement.

FRNCH 201: Intermediate French I

(4-0) Cr. 4. F.

Prereq: FRNCH 102

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture.

Meets International Perspectives Requirement.

FRNCH 202: Intermediate French II

(4-0) Cr. 4. S.

Prereq: FRNCH 201

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture.

Meets International Perspectives Requirement.

FRNCH 301: French Writing and Grammar

(3-0) Cr. 3. F.

Prereq: FRNCH 202

Emphasis on developing functional language skills in reading and writing. Selective review of grammar within the context of cultural and literary prose.

Meets International Perspectives Requirement.

FRNCH 302: Reading and Writing French

(3-0) Cr. 3. S.

Prereq: FRNCH 301

Readings in French prose, theater and poetry. Introduction to close reading and analysis. Development of reading and writing skills for upper-level courses.

Meets International Perspectives Requirement.

FRNCH 304: French for Global Professionals

(3-0) Cr. 3.

Prereq: FRNCH 301

Communication in business and professional contexts in French-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Emphasis on working across French-American cultures. Preparation for internships.

Meets International Perspectives Requirement.

FRNCH 305: French Conversation

(3-0) Cr. 3.

Prereq: FRNCH 202

Intensive conversational and listening practice emphasizing contemporary France and the Francophone world. Native or near-native speakers are not eligible to enroll.

Meets International Perspectives Requirement.

FRNCH 320: France Today

(3-0) Cr. 3.

Prereq: FRNCH 202

Selected topics dealing with contemporary French society and culture.

Meets International Perspectives Requirement.

FRNCH 326: Studies in French or Francophone Film

(3-0) Cr. 3. Repeatable.

Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302

In-depth study of a selected filmmaker, genre, or movement. Emphasis on analytical interpretation and relationship between film and French or Francophone culture, history, and society. Counts toward World Film Studies Minor.

Meets International Perspectives Requirement.

FRNCH 340: Studies in French or Francophone Literature

(3-0) Cr. 3. Repeatable.

Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302

In-depth study of a selected topic, genre, movement or writer in French or Francophone literature, civilization or culture. Emphasis on close readings and discussion.

Meets International Perspectives Requirement.

FRNCH 370: French Studies in English

(3-0) Cr. 3-4. Repeatable.

Prereq: For fourth credit, 6 credits in French at 300 level.

Author, genre, or period study in French or Francophone history, literature, or culture. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French.

Meets International Perspectives Requirement.

FRNCH 370F: Studies in English Translation: French Topics on Women and Gender Studies

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

FRNCH 378: French Film Studies in English

(2-2) Cr. 3-4. Repeatable.

Prereq: For fourth credit, 6 credits in French at 300 level.

Analysis and interpretation of film in French society. Topics vary according to faculty interest. Film directors, genres, movements (e.g. The New Wave), historical survey, aesthetics, and cinematography. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French. Counts toward World Film Studies Minor.

Meets International Perspectives Requirement.

FRNCH 476: French Culture and Society in English

(3-0) Cr. 3-4. S.

Key moments and themes in French society and culture up to the modern era. Subjects vary according to faculty interest. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

FRNCH 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: Permission of French staff and department chair

Designed to meet the needs of students who wish to focus on areas other than those in which courses are offered. No more than 9 credits in Frnch 490 may be counted toward graduation.

FRNCH 499: Internship in French

Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS.

Prereq: 9 credits of French at the 300 level; permission of advisor and WLC Internship Coordinator. Work experience using French language skills in the public or private sector, combined with academic work under faculty supervision

Credits may be applied only to LCP major. Offered on a satisfactory-fail basis only. No more than 3 credits of Frnch 499 may be applied to the major.

FRNCH 590: Special Topics in French

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590A: Special Topics in French: Literature or Literary Criticism

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590B: Special Topics in French: Linguistics

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590C: Special Topics in French: Language Pedagogy

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590D: Special Topics in French: Civilization

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

Courses primarily for graduate students, open to qualified undergraduate students

FRNCH 590: Special Topics in French

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

German (Ger)

WLC Option I: German Studies

Under WLC Option I, students with a concentration in German must complete at least 30 credits beyond the intermediate (GER 201 (<https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>))

- GER 202 (<https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>)) level.

Students electing the German Studies option may count a maximum of two of the following courses towards the major:

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

A. German Studies Required Core Courses: (22 credits)

GER 301	Reading: Problems of the Early Twentieth Century	3
GER 302	Composition	3
GER 304	German for Global Professionals	3
GER 305	Conversation: The City in Contemporary Europe	3
GER 320	Germany Today	3
GER 330	German Literature and Culture	3
GER 476	Topics in German Cultural Studies	3-4

B. Additional Courses:

The remaining 8 credits may be chosen from the following courses:

Repeatable course:

GER 330	German Literature and Culture	3
---------	-------------------------------	---

Study Abroad and Internship option:

GER 499	Internship in German	1-3
---------	----------------------	-----

Courses taught in English (up to 8 credits applicable towards major; majors must enroll for 4 credits):

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

C. Study Abroad: The department strongly recommends that all students of German participate in an approved study abroad program based in a German-speaking country. Credit from an approved study abroad program may be applied to the major.

D. Communication Proficiency Requirements: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 370 and 379 taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies.

Curricular Notes: GER 330 German Literature and Culture may be repeated once for major credit when offered with a different topic (6cr. total). GER 476 Topics in German Cultural Studies is required for the WLC major option in German Studies. Majors must enroll in GER 476 Topics in German Cultural Studies for 4 credits. Majors choosing the German Studies option may select two additional courses for 4 cr. from the following:

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

Minor in German

The German minor requires at least 15 credits of courses taught in German. At least six credits must be chosen from among German 301, 302, 304, 305, 320, and 330. At least three credits must be chosen from German 320 and 330. Courses taught primarily in English (German 370, 371, 375, 378, and 476) cannot count toward the German minor.

GER 201	Intermediate German I	4
GER 202	Intermediate German II	4
Three credits must be in literature or culture taught in German		3
GER 320	Germany Today	
GER 330	German Literature and Culture	
Eligible minor courses		6
GER 301	Reading: Problems of the Early Twentieth Century	
GER 302	Composition	
GER 304	German for Global Professionals	
GER 305	Conversation: The City in Contemporary Europe	
GER 320	Germany Today	
GER 330	German Literature and Culture	

WLC Option II: Languages and Cultures for Professions (LCP)

Under WLC Option II students with a concentration in German must complete a minimum of 30 credits beyond the intermediate (GER 201 Intermediate German I - GER 202 Intermediate German II) level.

I. Languages and Cultures for Professions (Colleges of Agriculture and Life Sciences, Business, and Engineering)

Students with a primary major in the Colleges of Agriculture and Life Sciences, Business, or Engineering pursuing the second major option in German are required to take at least 30 credits beyond the intermediate (GER 201 Intermediate German I - GER 202 Intermediate German II) level.

A. Required Core Courses (19 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 301	Reading: Problems of the Early Twentieth Century	3
GER 304	German for Global Professionals	3
GER 305	Conversation: The City in Contemporary Europe	3
GER 320	Germany Today	3
GER 476	Topics in German Cultural Studies	3-4
GER 499	Internship in German *	1-3

*or approved credit-bearing study abroad experience

B. Additional Courses (11 credits)

GER 302	Composition	3
GER 330	German Literature and Culture	3
GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a Second Major. They may not graduate with the Second Major in LCP alone. LCP Majors may select two of the following courses, which must be taken for 4 credits:

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

GER 101: Elementary German I

(4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning-level learners who have little or no prior exposure to German.

GER 102: Elementary German II

(4-0) Cr. 4. S.SS.

Prereq: GER 101

Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning level learners with only one semester of German (or exposure equivalent to two years or less in high school.).

Meets International Perspectives Requirement.

GER 201: Intermediate German I

(4-0) Cr. 4. F.

Prereq: GER 102

Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Intensive review of basic grammar covered in the first-year German class (or equivalent high school courses) while exploring cultural topics and themes.

Meets International Perspectives Requirement.

GER 202: Intermediate German II

(4-0) Cr. 4. S.

Prereq: GER 201

Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Emphasis on intermediate level grammar and communication about topics and themes beyond the personal realm.

Meets International Perspectives Requirement.

GER 301: Reading: Problems of the Early Twentieth Century

(3-0) Cr. 3. F.

Prereq: GER 202

Emphasis on the development of reading skills through a variety of text types with a focus on German Culture from circa 1900 to 1933.

Meets International Perspectives Requirement.

GER 302: Composition

(3-0) Cr. 3. S.

Prereq: GER 202

Emphasis on writing skills, with further development of grammar and reading skills using a variety of current and historical materials.

Meets International Perspectives Requirement.

GER 304: German for Global Professionals

(3-0) Cr. 3. F.

Prereq: GER 202

Communication in business and professional contexts in German-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Preparation for internships.

Meets International Perspectives Requirement.

GER 305: Conversation: The City in Contemporary Europe

(3-0) Cr. 3. S.

Prereq: GER 202 minimum, GER 301 recommended

Intensive conversational and listening practice in German with an emphasis on a major German-speaking city.

Meets International Perspectives Requirement.

GER 320: Germany Today

(3-0) Cr. 3. S.

Prereq: GER 301 or GER 304

Selected topics dealing with contemporary German society and culture. Introduction to materials, resources, and forms of communication available on the Internet, and in other electronic and print media.

Meets International Perspectives Requirement.

GER 330: German Literature and Culture

(3-0) Cr. 3. Repeatable. F.

Prereq: GER 301 or permission of instructor

Selected readings in German literature from Classicism to present. Emphasis on techniques of reading and analysis of literary texts. No more than six credits of Ger 330 may be counted toward the major.

Meets International Perspectives Requirement.

GER 370: German Studies in English

(3-0) Cr. 3-4. Repeatable, maximum of 6 credits.

Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German.

Meets International Perspectives Requirement.

GER 370G: Studies in English Translation: German Topics on Women or Feminism

(Cross-listed with WGS). (3-0) Cr. 3-4. Repeatable, maximum of 6 credits.

Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German.

Meets International Perspectives Requirement.

GER 371: The Holocaust in Text, Image, and Memory

(3-0) Cr. 3-4.

Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Examination of such topics as the origins and expressions of Anti-Semitism in central Europe, the political events and structures of the Holocaust, the reality of ghettos and concentration camps, the impact of technological modernization on the Final Solution, and resistance to the Nazis. Materials will include non-fictional texts, literature, art, and music. Three credits: English, open to all students. Four credits: required for German major credit, supplementary readings and compositions in German. Four credits: required for German concentration credit, supplementary readings and compositions in German.

Meets International Perspectives Requirement.

GER 375: Grimms' Tales

(3-0) Cr. 3-4.

Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Introduction to Germanic antiquities, mythology, and heroic legends; Herder's concept of Naturpoesie. Emphasis on the Grimm tales: theoretical approaches to the tales from the late 19th and early 20th centuries; perversions of these traditional tales by the National Socialists (Nazis). Readings in contemporary Grimm scholarship. Taught in English. Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German.

Meets International Perspectives Requirement.

GER 378: German Film and Media Studies

(3-0) Cr. 3-4. S.

Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Analysis and interpretation of film or media in German society. Study of media production and reception within multicultural and global contexts. Thematic emphases based on faculty and student interest including: 1) film directors, genres, movements (e.g. New German Cinema), aesthetics, and cinematography or 2) media studies (e.g. television, mass press, popular culture). Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German. Counts towards the World Film Studies Minor. Meets International Perspectives Requirement.

GER 395: Study Abroad

Cr. 1-10.

Prereq: 2 years university-level German

Supervised instruction in language and culture of Germany; formal class instruction at level appropriate to student's training, augmented by practical living experience.

Meets International Perspectives Requirement.

GER 476: Topics in German Cultural Studies

(3-0) Cr. 3-4. S.

Prereq: Sophomore classification. For fourth credit, six credits in German at the 300-level courses instructed in German

Key topics and themes in German history and culture up to the modern era. Three credits: Taught in English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German.

Meets International Perspectives Requirement.

GER 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: 6 credits in German and permission of department chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Ger 490 may be counted toward graduation.

GER 499: Internship in German

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: 9 credits of German at the 300 level; permission of advisor and the World Languages and Cultures Internship coordinator

Work experience using German language skills in the public or private sector, combined with academic work under faculty supervision.

Available only to majors and minors. Offered on a satisfactory-fail basis only. Ger 499 may be repeated to a maximum of 6 credits. No more than 3 credits of Ger 499 may be applied to the major.

GER 590: Special Topics in German

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level German

GER 590A: Special Topics in German: Literature or Literary Criticism

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level German

GER 590B: Special Topics in German: Linguistics

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level German

GER 590C: Special Topics in German: Language Pedagogy

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level German

GER 590D: Special Topics in German: Civilization

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level German

Italian (ITAL)

Courses primarily for undergraduate students

ITAL 107: Intensive Beginning Italian

Cr. 4. F.S.

A communicative approach to grammar and vocabulary within the context of Italian culture for students whose native language is not Italian. Taught in Italian.

Latin (Latin)

For courses in Latin literature taught in English, see Classical Studies.

Courses primarily for undergraduate students

LATIN 101: Elementary Latin I

(3-0) Cr. 3. F.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

LATIN 102: Elementary Latin II

(3-0) Cr. 3. S.

Prereq: LATIN 101

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

Meets International Perspectives Requirement.

LATIN 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: 6 credits in Latin and permission of department chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits in Latin 490 may be counted toward graduation.

Portuguese (Port)

Courses primarily for undergraduate students

PORT 101: Elementary Portuguese I

Cr. 4.

An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture.

PORT 102: Elementary Portuguese II

Cr. 4.

Prereq: PORT 101

An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture.

Meets International Perspectives Requirement.

PORT 111: Elementary Portuguese, Accelerated I

Cr. 3.

Prereq: Four semesters of college Spanish or the equivalent. Students with four semesters at the college level or the equivalent of another Romance language may be admitted by permission of the instructor

An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture.

PORT 112: Elementary Portuguese, Accelerated II

Cr. 3.

Prereq: PORT 111

An introduction to the Portuguese language through the communicative approach within the context of Luso-Brazilian culture.

Meets International Perspectives Requirement.

PORT 375: Brazil Today

Cr. 3. F.

Prereq: None

A survey of social, political, economic, and cultural topics relevant to contemporary Brazil. Includes an introduction to Portuguese language.

None

Meets International Perspectives Requirement.

Russian Studies (Rus)

Minors in Russian Studies are required to complete RUS 201 and RUS 202. The remaining 9 credits must be at the 300 level and above, including at least 3 credits in the Russian curriculum (courses taught in English or Russian).

Russian Studies Minor Option 1: Russian Studies.

9 credits at the 300 level may be selected from the following courses:

RUS 201	Intermediate Russian I	4
RUS 202	Intermediate Russian II	4
9 credits must be at the 300 level and above *		9
RUS 301	Composition and Conversation	
RUS 304	Russian for Global Professionals	
RUS 314	Reading Russian Literary and Cultural Texts	
RUS 370	Russian Studies in English Translation	
RUS 375	Russia Today	
RUS 378	Russian Film Studies in English	
RUS 395	Study Abroad	

RUS 490	Independent Study
RUS 499	Internship in Russian
RUS 590	Special Topics in Russian
HIST 421	History of Russia I
HIST 422	History of Russia II
HIST 530	Readings Seminar in Modern Russian/Soviet History
POL S 349	Politics of Russia and Eastern Europe

* including at least 3 credits in the Russian curriculum (courses taught in English or Russian).

Russian Studies Minor Option 2: Languages and Cultures for Professions

A. Agriculture and Life Sciences, Business, or Engineering Major and Languages and Cultures for Professions Minor Emphasis in Russian Studies (17 credits)

Required Core Courses 11

RUS 201	Intermediate Russian I
RUS 202	Intermediate Russian II
RUS 304	Russian for Global Professionals

Electives 6

RUS 301	Composition and Conversation
RUS 314	Reading Russian Literary and Cultural Texts
RUS 370	Russian Studies in English Translation
RUS 375	Russia Today
RUS 378	Russian Film Studies in English
RUS 395	Study Abroad
RUS 490	Independent Study
RUS 499	Internship in Russian
RUS 590	Special Topics in Russian
HIST 421	History of Russia I
HIST 422	History of Russia II
HIST 530	Readings Seminar in Modern Russian/Soviet History
POL S 349	Politics of Russia and Eastern Europe

Courses primarily for undergraduate students

RUS 101: Elementary Russian I

(4-0) Cr. 4. F.

Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

RUS 102: Elementary Russian II

(4-0) Cr. 4. S.

Prereq: RUS 101

Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

Meets International Perspectives Requirement.

RUS 201: Intermediate Russian I

(4-0) Cr. 4. F.

Prereq: RUS 102

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

RUS 202: Intermediate Russian II

(4-0) Cr. 4. S.

Prereq: RUS 201

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

RUS 301: Composition and Conversation

(3-0) Cr. 3. F.

Prereq: RUS 202

Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening.

Increased focus on syntax and word formation.

Meets International Perspectives Requirement.

RUS 304: Russian for Global Professionals

(3-0) Cr. 3. F.

Prereq: RUS 102

Communication in business and professional contexts in Russian-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice.

Meets International Perspectives Requirement.

RUS 314: Reading Russian Literary and Cultural Texts

(3-0) Cr. 3. Repeatable.

Prereq: RUS 102

Selected readings in Russian literature and culture. Emphasis on techniques of reading and analysis of literary and cultural texts.

Meets International Perspectives Requirement.

RUS 370: Russian Studies in English Translation

(3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

RUS 370R: Studies in English Translation: Russian Topics on Women or Feminism

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

RUS 375: Russia Today

(3-0) Cr. 3. Repeatable.

A survey of social, political, economic, and cultural topics relevant to contemporary Russia. Readings, discussions and papers in English.

Meets International Perspectives Requirement.

RUS 378: Russian Film Studies in English

(3-0) Cr. 3.

Analysis and interpretation of cinema in Russia and the Soviet Union.

Topics vary according to faculty interest. Film directors, genres, movements, historical survey, aesthetics, and cinematography. Readings, discussions and papers in English.

Meets International Perspectives Requirement.

RUS 395: Study Abroad

Cr. 1-6. Repeatable.

Supervised instruction in language and culture of Russia; formal class instruction at level appropriate to student's training, augmented by practical living experience.

Meets International Perspectives Requirement.

RUS 490: Independent Study

Cr. 1-6. Repeatable.

Prereq: 6 credits in Russian and permission of department chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Rus 490 may be counted toward graduation.

RUS 499: Internship in Russian

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits of Russian at the 300 level; permission of advisor and WLC Internship Coordinator

Work experience using Russian language skills in the public or private sector combined with academic work under faculty supervision. Available only to minors. No more than 3 credits may be applied to the minor.

RUS 590: Special Topics in Russian

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590A: Special Topics in Russian: Literature or Literary Criticism

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590B: Special Topics in Russian: Linguistics

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590C: Special Topics in Russian: Language Pedagogy

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590D: Special Topics in Russian: Civilization

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

Courses primarily for graduate students, open to qualified undergraduate students

RUS 590: Special Topics in Russian

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

Spanish (Span)

Go to Spanish Minor

World Languages and Cultures majors with a concentration in Spanish have two options:

WLC Option I: Hispanic Studies

Under WLC Option I, students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I- SPAN 202 Intermediate Spanish II) level.

A. Hispanic Studies Required Core Courses: (12 cr.)

SPAN 303A	Spanish Conversation and Composition: through Culture	3
or SPAN 303B	Spanish Conversation and Composition: for Professionals	

SPAN 314	Textual and Media Analyses	3
SPAN 352	Introduction to Spanish Phonology	3

B. Additional Courses: Students must take at least 15 credits chosen from a, b, and c below (minimum of 3 credits from each section).

a) At least 3 credits of literary studies chosen from the following:

SPAN 330	Studies in Spanish Literature	3
SPAN 332	Studies in Latin American Literature	3

b) At least 3 credits of cultural studies chosen from the following:

SPAN 304	Spanish for Global Professionals	3
SPAN 321	Spanish Civilization	3
SPAN 322	Latin American Civilization	3
SPAN 323	Spain Today	3
SPAN 324	Latin America Today	3
SPAN 326	Studies in Hispanic Art or Film	3

c) At least 3 credits of applied language and linguistics chosen from the following:

SPAN 351	Introduction to Spanish-English Translation	3
SPAN 354	Introduction to Spanish-English Interpretation	3
SPAN 401	Advanced Composition and Grammar	3
SPAN 462	Contrastive Analysis of Spanish/ English for Translators	3
SPAN 463	Contemporary Spanish Linguistics	3
SPAN 499	Internship in Spanish	1-3

Students may apply up to 6 credits of SPAN 395 Study Abroad to section a, b, or c above (appropriate section based upon course content and assigned by the WLC adviser).

C. Students must take at least 6 credits of language, literature and/or culture at the 400 level, chosen from the following (each repeatable to 6 credits):

SPAN 440	Seminar on the Literatures and Cultures of Spain	3
SPAN 441	Seminar on Cervantes and the Golden Age	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3
SPAN 463	Contemporary Spanish Linguistics	3

D. Study Abroad: The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Under Option I, any student who chooses not to participate in a department-approved program will be required to take 3

additional elective credits of Spanish at or above the SPAN 321 level (for a total of 33 credits beyond the intermediate 201-202 level).

E. Communication Proficiency Requirements: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 370 and 379 taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies. Such a course will also fill an LAS Area I (Arts and Humanities) requirement.

WLC Option II: Language and Cultures for Professions

Under WLC Option II students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

I. Languages and Cultures for Professions (Colleges of Agriculture and Life Sciences, Business, and Engineering)

Students with a primary major in the Colleges of Agriculture and Life Sciences, Business, or Engineering pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

A. Required LCP Core Courses: (12 Credits)

SPAN 303B	Spanish Conversation and Composition: for Professionals	3
SPAN 304	Spanish for Global Professionals	3
SPAN 351	Introduction to Spanish-English Translation	3
SPAN 499	Internship in Spanish * or SPAN 395 Study Abroad	1-6

B. Literature and Culture Courses: (9 Credits)

SPAN 314	Textual and Media Analyses	3
SPAN 323	Spain Today ** or SPAN 321 Spanish Civilization	3
SPAN 324	Latin America Today ** or SPAN 322 Latin American Civilization	3

C. Additional Courses: (6 credits)

Select one course from each of the following two categories:

Category 1:

SPAN 330	Studies in Spanish Literature	3
SPAN 332	Studies in Latin American Literature	3

Category 2:

SPAN 440	Seminar on the Literatures and Cultures of Spain	3
SPAN 441	Seminar on Cervantes and the Golden Age	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3
SPAN 463	Contemporary Spanish Linguistics	3

D. Additional three credits taken at the 300-level or higher.

*Additional credit from an approved study abroad program may be applied to the major.

**SPAN 321 Spanish Civilization and SPAN 322 Latin American Civilization may be substituted.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

Minor in Spanish

The Spanish minor: Option 1: Hispanic Studies, Option 2: Languages and Cultures for Professions

Option 1: The Spanish minor in Hispanic Studies requires at least 15 credits, 12 of which must be at the 300 level or higher. The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional elective credits of Spanish at the 300 level or higher.

Option 2: Language and Cultures for Professions. The Spanish minor in Languages and Cultures for Professions requires the following courses (12 credits):

SPAN 303B	Spanish Conversation and Composition: for Professionals	3
SPAN 304	Spanish for Global Professionals	3
SPAN 351	Introduction to Spanish-English Translation	3
One of the following		3
SPAN 321	Spanish Civilization	
SPAN 322	Latin American Civilization	
SPAN 323	Spain Today	
SPAN 324	Latin America Today	

The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-

speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional credits in culture chosen from the following:

SPAN 321	Spanish Civilization	3
SPAN 322	Latin American Civilization	3
SPAN 323	Spain Today	3
or SPAN 324	Latin America Today	

Note: students taking either SPAN 321 Spanish Civilization or SPAN 323 Spain Today must take either SPAN 322 Latin American Civilization or SPAN 324 Latin America Today; students taking either SPAN 322 Latin American Civilization or SPAN 324 Latin America Today must take either SPAN 321 Spanish Civilization or SPAN 323 Spain Today.

Courses primarily for undergraduate students

SPAN 097: Accelerated Spanish Review

(3-2) Cr. 0. F.S.

Prereq: Two years but less than three years of high-school Spanish

For students who require additional review at the first year (101-102) level. Course components include a compact review of 101 and the essential elements of 102. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (201-202) level without completing 102.

SPAN 101: Elementary Spanish I

(4-0) Cr. 4. F.SS.

A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

SPAN 102: Elementary Spanish II

(4-0) Cr. 4. S.SS.

Prereq: SPAN 101, SPAN 97 or placement by departmental exam

Continuation of Spanish 101. A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 195: Study Abroad

Cr. 3. SS.

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with SPAN 101 or 102.

Meets International Perspectives Requirement.

SPAN 201: Intermediate Spanish I

(4-0) Cr. 4. F.

Prereq: SPAN 102 or placement by departmental exam

Intensive review of basic grammar and conversation. For students whose native language is not Spanish. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Meets International Perspectives Requirement.

SPAN 202: Intermediate Spanish II

(4-0) Cr. 4. S.

Prereq: SPAN 201 or placement by departmental exam

Continuation of Spanish 201. Intensive review of basic grammar. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. For students whose native language is not Spanish. Meets International Perspectives Requirement.

SPAN 295: Study Abroad

Cr. 3. SS.

Prereq: SPAN 102 or equivalent

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with Span 201 or 202. Meets International Perspectives Requirement.

SPAN 297: Intensive Intermediate Spanish

(4-0) Cr. 4. F.S.

Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement

Bridge course between 200- and 300-level Spanish courses that focuses on application of advanced grammatical concepts within the context of Hispanic culture. Accelerated review of SPAN 201 and SPAN 202 designed for students who want to continue at the 300 level. Taught in Spanish for students whose native language is not Spanish. Meets International Perspectives Requirement.

SPAN 303: Spanish Conversation and Composition

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 303A: Spanish Conversation and Composition: through Culture

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. For students whose native language is not Spanish. Meets International Perspectives Requirement.

SPAN 303B: Spanish Conversation and Composition: for Professionals

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 304: Spanish for Global Professionals

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam (SPAN 303B recommended)

Introduction to professional communication within a cultural context. Grammar review as needed. Individual projects will focus on special interests. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 314: Textual and Media Analyses

(3-0) Cr. 3. F.S.

Prereq: SPAN 303A or 303B

Critical reading of Hispanic cultural texts. Presentation of techniques and terminology of textual criticism. Study of basic genres and media-generated artifacts and literary texts. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 321: Spanish Civilization

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of the social, political, religious, and cultural history of Spain. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 322: Latin American Civilization

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of the social, political, religious, and cultural history of Spanish America. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 323: Spain Today

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of social, political, economic, and cultural topics relevant to contemporary Spain. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 324: Latin America Today

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of social, political, economic, and cultural topics relevant to contemporary Latin America. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 326: Studies in Hispanic Art or Film

(Dual-listed with SPAN 526). (3-0) Cr. 3.

Prereq: One course at the 300 level

Survey of major currents and figures in Spanish and Latin American art and/or film. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 330: Studies in Spanish Literature

(3-0) Cr. 3.

Prereq: SPAN 314

Introduction to Spanish literature from the earliest times through the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 332: Studies in Latin American Literature

(3-0) Cr. 3.

Prereq: SPAN 314

Introduction to Latin American literature from the earliest times to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 351: Introduction to Spanish-English Translation

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 303A or SPAN 303B or SPAN 304

Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 352: Introduction to Spanish Phonology

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 303A or SPAN 303B or SPAN 304

An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 354: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 554). (Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 351

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 370: Hispanic Topics in English Translation

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.

Meets International Perspectives Requirement.

SPAN 370A: Hispanic Topics in English Translation: Agriculture

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Topics vary according to faculty interest. Knowledge and understanding of major cultural, ethical, sociopolitical and economic issues directly related to agriculture and agribusiness in Latin America, Spain, and/or Equatorial Guinea. Readings, discussions, and papers in English. May not be counted as a prerequisite.

SPAN 370S: Studies in English Translation: Hispanic Topics on Women or Feminism

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.

Meets International Perspectives Requirement.

SPAN 395: Study Abroad

Cr. 1-10. Repeatable.

Prereq: 2 years university-level Spanish or equivalent

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to students' training, enhanced by practical living experience.

Meets International Perspectives Requirement.

SPAN 401: Advanced Composition and Grammar

(Dual-listed with SPAN 501). (3-0) Cr. 3. F.

Prereq: SPAN 314 and one course at the 320-level or above

Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 440: Seminar on the Literatures and Cultures of Spain

(Dual-listed with SPAN 540). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)

Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 441: Seminar on Cervantes and the Golden Age

(Dual-listed with SPAN 541). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)

Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 445: Seminar on the Literatures and Cultures of Latin America

(Dual-listed with SPAN 545). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, SPAN or SPAN 333. (SPAN 332 and SPAN 333 recommended)

Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 462: Contrastive Analysis of Spanish/ English for Translators

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: SPAN 351

Linguistic study of the major differences between the Spanish and English grammatical systems and their applications in the translation of Spanish to English. Taught in Spanish.

SPAN 463: Contemporary Spanish Linguistics

(Dual-listed with SPAN 563). (Cross-listed with LING). (3-0) Cr. 3.

Repeatable, maximum of 6 credits.

Prereq: SPAN 352

Study of various topics related to the Spanish language. Topics may include bilingualism, historical linguistics and dialectology, Spanish in the U.S., language assessment, computer-assisted language learning and instruction, and second language acquisition. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 490: Independent Study

Cr. 1-6. Repeatable, maximum of 6 credits.

Prereq: 6 credits in Spanish and permission of department chair

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits in Span 490 may be counted toward graduation.

SPAN 499: Internship in Spanish

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: 9 credits of Spanish at the 300 level; permission of advisor and WLC Internship Coordinator

Work experience using Spanish language skills in the public or private sector, combined with academic work under faculty supervision. Up to 3 credits may apply toward the major. Available only to majors and minors.

SPAN 501: Advanced Composition and Grammar

(Dual-listed with SPAN 401). (3-0) Cr. 3. F.

Prereq: SPAN 314 and one course at the 320-level or above

Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 526: Studies in Hispanic Art or Film

(Dual-listed with SPAN 326). (3-0) Cr. 3.

Prereq: 6 credits in Spanish literature or culture at 400 level

Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540: Seminar on the Literatures and Cultures of Spain

(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)

Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 541: Seminar on Cervantes and the Golden Age

(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)

Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 545: Seminar on the Literatures and Cultures of Latin America

(Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, SPAN or SPAN 333. (SPAN 332 and SPAN 333 recommended)

Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 554: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 354). (Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 351

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 590: Special Topics in Spanish

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590A: Special Topics in Spanish: Literature or Literary Criticism

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590B: Special Topics in Spanish: Linguistics

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590C: Special Topics in Spanish: Language Pedagogy

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590D: Special Topics in Spanish: Civilization

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

Courses primarily for graduate students, open to qualified undergraduate students

SPAN 501: Advanced Composition and Grammar

(Dual-listed with SPAN 401). (3-0) Cr. 3. F.

Prereq: SPAN 314 and one course at the 320-level or above

Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 526: Studies in Hispanic Art or Film

(Dual-listed with SPAN 326). (3-0) Cr. 3.

Prereq: 6 credits in Spanish literature or culture at 400 level

Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540: Seminar on the Literatures and Cultures of Spain

(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)

Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 541: Seminar on Cervantes and the Golden Age

(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)

Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 545: Seminar on the Literatures and Cultures of Latin America

(Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, SPAN or SPAN 333. (SPAN 332 and SPAN 333 recommended)

Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 554: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 354). (Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 351

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 590: Special Topics in Spanish

Cr. 1-4. Repeatable.

*Prereq: Permission of instructor; 6 credits of 400 level Spanish***World Film Studies**

The World Film Studies undergraduate minor is an interdisciplinary, cross-cultural program in the department of World Languages and Cultures that provides coursework in the history, theory, and aesthetics of world cinemas. Upon completion of the World Film Studies minor students will

- 1) demonstrate solid skills of formal film analysis and knowledge of the essential theoretical concepts of cinema studies;
- 2) become familiar with prominent film directors, influential cinematic works, and cinematic traditions across the world;
- 3) gain an understanding of the evolution of cinema as an art form; understand the relations between cinema and other arts;
- 4) acquire knowledge and understanding of cinema as a mode of cultural expression and communication; develop new perspectives on U.S. culture and cinema through comparison with other world cultures and cinemas.

A student seeking an undergraduate minor in World Film Studies must successfully complete a minimum of 15 credits, which must include WLC 278 Introduction to Global Film or ENGL 237 Survey of Film History and 12 credits selected from the following list of electives. Of these, at least 6 credits must be from courses taught in the department of World Languages and Cultures. The minor must include at least 9 credits that are not used to meet any other department, college or university requirement.

Courses taught in WLC (at least 6 credits)

CHIN 370	Chinese Literature in English Translation	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 378	French Film Studies in English	3
GER 378	German Film and Media Studies	3-4
RUS 378	Russian Film Studies in English	3
SPAN 326	Studies in Hispanic Art or Film	3

Courses outside of WLC (up to 6 credits)

ENGL 315	Creative Writing: Screenplays	3
----------	-------------------------------	---

ENGL 335	Studies in Film	3
ENGL 450	Seminar in Literary Genres	3
JL MC 307	Digital Video Production	3

Curricular note: no more than 6 credits of each repeatable course (FRNCH 326 and FRNCH 378) may be applied to the minor. Both WLC 278 and ENG 237 (6 credits max) may count toward the minor.

Graduate Study

The Department of World Languages and Cultures offers course work leading to a graduate minor in French, German, Latin, Russian Studies or Spanish. The graduate minor in each of these languages is designed to provide an opportunity for graduate students to further their knowledge of that language to complement work in their major disciplines. The graduate minor provides formal recognition of student achievement and expertise in one of the languages above. Graduate minor credits are also offered in Greek.

Graduate Minor

Program Requirements:

Prerequisites

Graduate students who wish to minor in one of the languages above must have 400-level proficiency in that language. When this is not the case, the student may be required to take a language course below the 400-level, which would not count towards the graduate minor requirements.

Course Requirements

For the M.A. or M.S.: Three courses in the language of the minor. No more than three credits may be in courses numbered 401, 402, and 403. For the Ph.D.: Four courses in the language of the minor which must include at least one three credit course at the 500 level. No more than three credits may be in courses numbered 401, 402, or 403. At least two courses for the M.A. and the Ph.D. minors must be taken in residence at Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.

INTERDISCIPLINARY PROGRAMS

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

See individual programs for information regarding admission and academic requirements.

Computing Applications Certificate

The Certificate in Computing Applications is a cross-disciplinary course of study in the Colleges of Liberal Arts and Sciences, Engineering, and Business. It is designed for undergraduates not already enrolled in majors in Computer Science, Software Engineering, or Computer Engineering who wish to enhance their degree and employment possibilities by adding expertise in computing applications. The certificate program focuses on teaching students the essential skills required to develop and use computing applications in their subject domains. This certificate program will help students to be successful in today's workplace, ensuring they have the basic knowledge of programming languages and computer systems needed to enhance their employment opportunities.

The certificate program is offered jointly among the three colleges and their respective departments housing the majors of computer science, computer engineering, software engineering, and management information systems.

The program consists of 9 credit hours selected from the core and 12 credits hours in electives.

Enrollment in the certificate

Students should fill the form at <http://www.registrar.iastate.edu/sites/default/files/uploads/forms/Urequest.pdf> and bring it to Computer Science Advising Center, 1200 Communications Building.

Requirements

- 21 required credits.
- Courses applied to the certificate may not be taken on a pass not-pass basis.
- At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above.
- A minimum of 9 credits used for the certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement

for graduation and to meet credit requirements in courses numbered 300 or above.

- A student may not receive both an undergraduate major and a certificate of the same name.
- For students earning an Iowa State University baccalaureate degree, a certificate is awarded concurrent with or after the Iowa State University baccalaureate degree.
- A certificate is not awarded until baccalaureate requirements are finished.
- After receiving a baccalaureate degree from any accredited institution, a student may enroll at Iowa State University to earn a certificate.
- A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.
- A notation of completed certificate will be made on the transcript.

Part I - Core 9-10 Credits

Students will complete either Sequence 1 or Sequence 2		
SEQUENCE 1		9-10 Credits
COM S 107	Windows Application Programming	3-4
or COM S 127	Introduction to Computer Programming	
or COM S 207	Fundamentals of Computer Programming	
COM S 106	Introduction to Web Programming	3
or COM S 113	Introduction to Spreadsheets and Databases	
COM S 252	Linux Operating System Essentials	3
or DS 201	Introduction to Data Science	
SEQUENCE 2		10 Credits
COM S 227	Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
COM S 252	Linux Operating System Essentials	3
or DS 201	Introduction to Data Science	

Part II - Electives 12 Credits

Designated Electives for the Certificate

Students will choose one elective course from the following list of courses and are responsible for satisfying the course pre-requisites of the elective selected.

- CPR E 230 Cyber Security Fundamentals
- BC BIO 322 Introduction to Bioinformatics and Computational Biology
- L A 211 Digital Design Methods for Landscape Architecture

- C R P 251 Fundamentals of Geographic Information Systems
- STAT 301 Intermediate Statistical Concepts and Methods
- PSYCH 301 Research Design and Methodology
- SOC 302 Research Methods for the Social Sciences
- ECON 207 Applied Economic Optimization
- Any course at 300 level or above in Computer Science (ComS), Computer Engineering (CprE), Management Information Systems (MIS), or Software Engineering (SE)

The remaining 9 credits of electives are intended to allow students to develop further computing applications expertise especially within their major. These 9 elective credits can be advanced courses in their major, courses on the above electives list, or any other coursework approved by the Computer Science Adviser on the “request for undergraduate certificate.” At least 9 of the 12 elective credits must be in courses numbered 300 or above and taken at Iowa State University.

Entrepreneurship Minor

Entrepreneurship is an interdisciplinary minor that provides opportunities for students to learn about entrepreneurship—the process of creating value through recognizing and developing opportunities. It serves to complement the student’s major area of study, in any college, by offering a means of putting theory and science into practice. The goal of the Entrepreneurship minor is to provide the knowledge and skills needed to create value through recognizing and developing opportunities. In addition to feasibility analysis and business planning, the minor deals with the topics of innovation, opportunity recognition, technology transfer, industry analysis, and competitive strategy. Although the minor introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

Interdepartmental Undergraduate Minor

A minor in entrepreneurship is available to all undergraduate students at ISU. The minor requires at least 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students must follow college-specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of the college rules. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students with an Entrepreneurship minor are not permitted to major in Entrepreneurship.

A student seeking a minor in entrepreneurship must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurship program, including the following:

Required Courses (6 credits):

ENTSP 310	Entrepreneurship and Innovation	3
ENTSP 313	Feasibility Analysis and Business Planning	3
	or ENTSP 320 Corporate Entrepreneurship, Innovation and Technology Management	
	or ENTSP 410 Social Entrepreneurship	

ENTSP 310 Entrepreneurship and Innovation is the introductory course and provides an overview of the entire field.

ENTSP 313 Feasibility Analysis and Business Planning emphasizes developing an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan.

ENTSP 320 Corporate Entrepreneurship, Innovation and Technology Management introduces and examines state-of-the-art approaches to product innovation and technology development in today’s large and established organizations.

ENTSP 410 Social Entrepreneurship discusses issues related to the role of social entrepreneurship in helping to solve social problems, including innovation, opportunity recognition, planning and the launch of new non-profit organizations.

Elective Courses (6 credits):

Select TWO entrepreneurship-oriented electives from an approved course list (see below). Students are encouraged to take electives within their major college.

Experiential Learning (3 credits):

Students will engage in the process(es) of entrepreneurship to earn experiential learning credits. Students will either take a course that has been designated as an experiential learning course, or use some other experiential learning activity as the basis to receive credits through an independent study.

Detailed information about the Entrepreneurship minor, the list of approved electives, as well as information about the experiential learning options are available online at: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/entrepreneurial-studies-minor/>

FOR IVY COLLEGE OF BUSINESS STUDENTS ONLY: Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is

on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Graduate Certificate

An interdisciplinary graduate certificate in entrepreneurship and innovation is available to post-graduate students from any discipline. The program provides students an opportunity to learn about entrepreneurship, innovation, and the new venture creation process and to develop business skills that can be used to start a business. The program is flexible so that students can design a program that provides core entrepreneurship education through one required business management course as well as discipline-specific training from entrepreneurship courses in other colleges. Some of these courses for this certificate may be available online.

Students seeking this Graduate Certificate must meet minimum university criteria for admission to graduate programs. Students interested in the Entrepreneurship and Innovation Certificate must successfully complete a minimum of 12 credits in courses approved for use in the certificate program, including one required course, MGMT 566 Entrepreneurship and New Business Creation and three entrepreneurship-oriented electives (9 cr.) chosen from an approved course list. MGMT 566 Entrepreneurship and New Business Creation focuses on the essentials of starting and operating a new business. Additional information as well as the list of approved electives can be found on the certificate website at: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/>

Contacts

Entrepreneurship Faculty and Advisers

Faculty and advisers in each college are available to answer questions about the Entrepreneurship minor and course requirements. Please visit the link below for the contact in your college.

<https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/entrepreneurial-studies-minor/contacts/>

Feed Technology Minor

The agricultural economy is heavily dependent on feed technology. The Midwest is one of the largest feed production and grain processing regions in the world. Feed manufacturing is also a global business with a growing demand for qualified technical professionals.

Feed technology includes the areas of grain handling and storage, animal nutrition, feed formulation, feed manufacturing, biosecurity, and feed safety and quality. The Feed Technology minor (15 credits) covers the breadth of all these topics so that you can:

- Understand animal nutrition, feed mill operations management and their application to feed quality, safety, and profitability;
- Identify chemical, biological and physical hazards in grain and feed;

- Know practical ways to monitor, manage and mitigate hazards in grain handling and feed manufacturing facilities; and
- Be familiar with the importance, scope and trends of the global animal feed industry.

The minor requires 15 credits and must include at least 9 credits that are not used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

TSM 322	Preservation of Grain Quality	3
or A B E 469	Engineering for Grain Storage, Preservation, Handling, and Processing Systems	
TSM 455	Feed Processing and Technology	3
TSM 457	Feed Safety, Ingredient Quality and Analytics	3
AN S 320	Animal Feeds and Feeding	3
AN S 324	Food Processing for Companion Animals	3
Total Credits		15

Honors Program

Honors Program

The University Honors Program brings together some of Iowa State University's brightest and most motivated students to take advantage of both intellectual and social opportunities. Honors scholars gain early exposure to research and leadership as well as benefit from creating an individualized educational path adding breadth and depth to their academic experience.

Students in the First-Year Honors Program (<https://www.honors.iastate.edu/program/fhp/>) typically enroll in five Honors credits in their first term (Engl 250H, Lib 160, Honors 121) and may opt to participate in the First-Year Mentor Program (<https://www.honors.iastate.edu/program/fhp/first-year-mentor-program/>), a two-credit research experience during their second term. In the University Honors Program, students receive a variety of academic opportunities to help them optimize their undergraduate experience. They create individualized programs of study with opportunities to incorporate independent study and research. Grants (<https://www.honors.iastate.edu/scholarships/research-grants/>) are available to support Honors student research. Students who complete their work in the University Honors Program receive a notation on their transcript.

All Honors students take at least two Honors courses and two Honors seminars (listed as HON 321-324), complete an independent research or creative project (<https://www.honors.iastate.edu/program/uhp/project/>), and maintain an overall GPA of 3.5 or higher. Most Honors requirements also fulfill requirements for graduation. Depending on the college of

their primary major, students may need to fulfill additional requirements (<https://www.honors.iastate.edu/program/uhp/college-reqs/>).

Honors credit for a course (<https://www.honors.iastate.edu/program/uhp/courses/>) is denoted by an "H" on the transcript and can be earned in the following ways: enrollment in an Honors section of a class, contracting an Honors Component within a class, enrollment in a 500-level graduate course.

Honors seminars (<https://www.honors.iastate.edu/program/uhp/seminars/>) are one- or two-credit special topic classes offered only to Honors students. With enrollment generally limited to 17 students, these seminars promote a crucial atmosphere of intellectual exchange and a high level of student involvement in learning.

Oversight of Honors students' progress is carried out by the Honors Program staff in coordination with the undergraduate colleges. Each college's Honors committee approves its students' programs of study and project proposals. The University Honors Program Committee is responsible for the program's curricular oversight. The Honors Program Office is located at 2130 Jischke Honors Building. For additional information, visit www.honors.iastate.edu (<https://www.honors.iastate.edu/>) or contact honors@iastate.edu.

Iowa Lakeside Laboratory Interinstitutional Program

Iowa Lakeside Laboratory is run cooperatively by the Iowa Lakeside Laboratory Consortium whose members include Drake University, Iowa State University, the University of Northern Iowa, and the University of Iowa. Lakeside courses can be taken for credit through all Consortium members. Students should check with their advisers to determine whether Lakeside courses can be used to satisfy major or minor requirements or college or university general education requirements.

The Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially those of the Iowa Great Lakes region with its numerous lakes, wetlands, and prairies. Its campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside's mission is to provide undergraduate and graduate students an opportunity to get hands-on experience working with a variety of natural and human environments through its field-oriented summer courses and to provide research facilities and support for graduate students and faculty working on research projects in northwestern Iowa. Each summer, Iowa Lakeside Laboratory offers students a unique educational experience: small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, hydrology, evolution, geology, soils, taxonomy). All courses meet all day

from Monday through Friday. The majority of courses run for 4 weeks. Enrollments in most courses are limited to 8 to 10 students.

Courses are taught at the undergraduate (sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class. One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects. Because some courses are offered intermittently, the current Iowa Lakeside Laboratory summer brochure or the Lakeside Lab Website (www.lakesidelab.org) should be consulted for the list of courses being offered in a given summer session. The Lakeside Lab Website (www.lakesidelab.org) also contains additional information about the Laboratory and about each course being offered.

Research projects by undergraduates, graduate students and faculty can be done either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Lakeside and graduate students are welcome to use it as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to take full advantage of its educational, professional, and social life.

Financial Aid

Iowa Lakeside Laboratory Scholarships are available to both undergraduates and graduate students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory Scholarships is included on the Website (www.lakesidelab.org). Students should also consult the Student Financial Aid Office for other scholarship, work study, and loan programs for which they are eligible.

Registration

Students can only enroll in Iowa Lakeside Lab courses by submitting an Iowa Lakeside Lab Registration and Scholarship form and Housing form to the Iowa Lakeside Laboratory Administrative Office. These forms are found on the Iowa Lakeside Laboratory Website (www.lakesidelab.org).

Early registration is advisable. Because enrollment in Lakeside courses is limited, students should register before May 1 for the following summer

session. Housing is also limited and students must apply for housing or indicate that they plan to live off campus at the time of registration.

Sustainability Minor

Sustainability is often defined as "meeting the needs of today without compromising the ability of future generations to meet their own needs." The minor in sustainability at Iowa State University is available to any ISU student who wants to further learn about sustainability issues affecting humans today and in the future.

The interdisciplinary minor in sustainability exposes students to ideas and issues related to a sustainable, balanced and ethical future for the planet and its inhabitants. The minor is at the interplay between environmental, social and economic factors in improving the quality of human life within the capacity of supporting ecosystems.

The minor will help students understand the dynamics of biological population growth and decline in the natural world, predator-prey models, over-exploitation of natural resources, energy balances, and much more. Students also will learn how human behavior affects the natural world and the ability of earth to sustain life.

In addition, students in the minor will understand how the decisions they make as consumers, workers, resource owners, citizens and policymakers affect human welfare in this and future generations. Students also will be able to articulate why some environmental, social and economic profiles are sustainable and others are not.

The minor will provide students knowledge sufficient to apply sustainable practices in their personal and professional lives.

The colleges of Agriculture and Life Sciences, Design, Engineering, and Liberal Arts and Sciences sponsor the minor in sustainability.

Requirements for the minor in sustainability

The minor in sustainability may be earned by completing a total of 15 credits including two required courses and nine elective credits from an approved list. Of the nine elective credits, at least six credits must be at the 300 level or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Required courses:

SOC 220	Globalization and Sustainability	3
ANTHR 230	Globalization and the Human Condition	3

Emphasis Electives:

A B E 325	Biorenewable Systems	3
A B E 380	Principles of Biological Systems Engineering	3

A B E 388	Sustainable Engineering and International Development	3

University Studies

Associate Provost for Academic Programs

Certain interdisciplinary courses are offered through university studies, at the discretion of the associate provost for academic programs and upon the advice of the Faculty Senate Curriculum Committee. No major is available in university studies, but credit obtained through university studies offerings may be applied toward a degree in any of the colleges, consistent with the stipulations of the student's curriculum.

Requests to make use of U ST 290 and U ST 490 should be directed to the associate provost for academic programs and should be accompanied by a positive recommendation from the department chairs of the instructor(s) making the request.

Wind Energy

The wind energy minor is primarily intended for students majoring in engineering or atmospheric sciences, but is available to all that meet the prerequisites, Math 166 and Physics 222. The minor is comprised of 15 credits, of which 6 are required of all students obtaining the minor. As per the University Catalog, at least 9 credits cannot be used to satisfy any other degree, program or University requirement.

Importance of Wind Energy Minor

Wind energy is a pivotal component of our nation's future energy portfolio, particularly given the desire to reduce the carbon footprint through the use of renewables. The Midwest region is among the richest wind regions in the nation, with Iowa being the second leading state in the nation as measured by installed wind capacity of 3670 MW, after Texas. This minor will help provide this industry (planners, manufacturers,

developers, utilities, and maintenance providers) with technical students with the knowledge and understanding of the science, engineering and policy of wind energy.

Student Learning Outcomes

The objectives of the proposed minor are to provide a broad understanding of the wind energy industry from component design and manufacturing, electric generation, transmission, and grid operations, to policy.

- Communicate objectives of a long-term national energy portfolio and how wind energy will contribute to meeting those objectives
- Understand the wind energy systems and design trade offs for the large components (e.g., blade, turbine, tower, and foundation)
- Manufacturing and supply chain considerations for economic production.
- Identify problems and potential solutions associated with integrating high wind penetrations into the electric grid.
- Communicate most significant reliability problems for wind turbines and be conversant with related monitoring technologies and maintenance methods to address them.
- Identify effects of existing and potential policies on wind energy growth

Learning outcomes will be assessed using tests, quizzes, homework and term papers.

The minor requires 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

Required Courses

Course descriptions can be found here

ENGR 340	Introduction to Wind Energy: System Design & Delivery	3
AER E 381	Introduction to Wind Energy	3

Elective Courses

Course descriptions can be found here. Choose 9 credits.

AER E 422	Vibrations and Aeroelasticity	3
AER E 423	Composite Flight Structures	3
AER E 481	Advanced Wind Energy: Technology and Design	3
C E 460	Foundation Engineering	3
C E 541	Dynamic Analysis of Structures	3
I E 543	Wind Energy Manufacturing	3
MAT E 362	Principles of Nondestructive Testing	3

E E 451	Engineering Acoustics	3
E M 451	Engineering Acoustics	3
M E 451	Engineering Acoustics	3
E E 452	Electrical Machines and Power Electronic Drives	3
E E 457	Power System Analysis II	3
E E 459	Electromechanical Wind Energy Conversion and Grid Integration	3
M E 325	Mechanical Component Design	3
M E 411	Automatic Controls	3
M E 417	Advanced Machine Design	3
M E 421	System Dynamics and Control	4
MTEOR 405	Environmental Biophysics	3
MTEOR 407	Mesoscale Meteorology	3
MTEOR 411	Synoptic Meteorology	3
MTEOR 417	Mesoscale Forecasting Laboratory	3
MTEOR 432	Instrumentation and Measurements	3
MTEOR 454	Dynamic Meteorology II	3

How to Apply

1. Complete the Request for Minor form (<http://www.registrar.iastate.edu/sites/default/files/uploads/forms/minorform.pdf>) available from the Iowa State Registrar's Office.
2. Obtain a signature from your academic adviser.
3. Submit the form to Dr. Frank Peters.

COLLEGE OF VETERINARY MEDICINE

Dan Grooms, Dean of Veterinary Medicine

Jared A. Danielson, Associate Dean for Academic and Student Affairs

vetmed.iastate.edu/ (<http://vetmed.iastate.edu/>)

Departments of the College

- Biomedical Sciences
- Veterinary Clinical Sciences
- Veterinary Diagnostic and Production Animal Medicine
- Veterinary Microbiology and Preventive Medicine
- Veterinary Pathology

Other units of the college include the Lloyd Veterinary Medical Center, Veterinary Diagnostic Laboratory, Veterinary Medical Research Institute, Veterinary Education and Technology Services and Office of Curricular and Student Assessment. The college participates in interdisciplinary graduate programs in genetics; molecular, cellular and developmental biology; toxicology; immunobiology; and neuroscience.

Objectives of the Curriculum

The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care providers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in small animal medicine and surgery, equine medicine and surgery, food animal medicine and surgery, and production animal medicine. Companion animal medicine and surgery are provided within the regionally recognized referral hospital through the community practice unit and equine field services. The college is located in one of the most intensive livestock producing areas in the United States. Because of this, students engage in extensive food supply veterinary medicine experiences and numerous diagnostic cases.

The professional curriculum is a four-year course of study leading to the doctor of veterinary medicine degree. Each of the first three years of the curriculum consists of two semesters while the fourth year has three semesters. Students are admitted into the professional curriculum after completing a minimum of 60 semester credits of required undergraduate coursework.

A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational program. Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent DVM/MS, DVM/PhD, DVM/MPH and DVM/MBA programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor's degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

Pre-veterinary Medicine Preparation Admission Requirements

The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice.

Undergraduate students are strongly encouraged to complete a bachelor's degree before applying to the College of Veterinary Medicine. Because veterinarians have varied career options, when deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may find benefit in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College web site at www.vetmed.iastate.edu/ (<http://www.vetmed.iastate.edu/>).

Applicants for admission to the College of Veterinary Medicine must have attended an accredited college or university, have completed 40 semester credits prior to the deadline for filing an application for admission, and have completed 60 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the end of the fall term in which the applicant applies. However, if necessary, the applicant may complete up to two required science courses after the fall term providing a transcript with the courses and grades listed is postmarked by July 1 of the year the applicant would enter. There is no maximum number of non-science required courses that may be completed but the deadline of having a transcript with these course grades posted by July 1 also applies. The July 1 deadline for transcripts and grades is firm.

Required courses must be completed with a grade of C (2.00) or better. A grade of C- (1.67) does not fulfill the requirement.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

English Composition 6 cr.

One year of composition or writing emphasis courses. May include business or technical writing. Two of the following courses would fulfill the requirement.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

Oral Communications 3 cr.

May include public speaking, interpersonal communication, group or organizational communication or speaking emphasis courses. One of the courses below will fulfill the requirement.

SP CM 212	Fundamentals of Public Speaking	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
SP CM 312	Business and Professional Speaking	3
COMST 214	Professional Communication	3

General Chemistry with Laboratory* 7 cr.

One year series for science majors with one semester lab.

CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	5
CHEM 178	General Chemistry II	3
Total Credits		8

Organic Chemistry with Laboratory* 7 cr.

One year series with one semester lab.

CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
Total Credits		7

Biochemistry* 3 cr.

One semester (no lab required). One of the courses below will fulfill the requirement.

BBMB 301	Survey of Biochemistry	3
BBMB 316	Principles of Biochemistry	3
BBMB 420	Mammalian Biochemistry	3

General Physics with Laboratory* 4 cr.

First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound.

PHYS 111 General Physics

General Biology with Laboratory* 8 cr.

Two semester series with lab each semester. A Bachelor's degree in Biology fulfills this requirement.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
Total Credits		8

Genetics * 3 cr.

Must include Mendelian and molecular genetics. One of the courses below will fulfill the requirement.

BIOL 313	Principles of Genetics	3
GEN 320	Genetics, Agriculture and Biotechnology	3
Total Credits		6

Mammalian Anatomy or Physiology* 3 cr.

Human anatomy or physiology will also fulfill this requirement (no lab required). One of the courses below will fulfill the requirement

B M S 329	Anatomy and Physiology of Domestic Animals	3
AN S 214	Domestic Animal Physiology	3

BIOL 155	Human Biology	3
BIOL 255	Fundamentals of Human Anatomy	3
BIOL 335	Principles of Human and Other Animal Physiology	3

Humanities or Social Sciences 8 cr.

Electives 8 cr.

Total Credits Required 60 cr.

Courses above marked with an asterisk (*) are the required science courses. The required science course GPA is calculated from these courses.

Credits in the previously specified courses will normally be earned on the traditional four-letter grading system with A as the highest grade and D as the lowest passing grade. All required courses must be completed with a grade of C (2.0) or better. It is generally expected that required courses have been completed within the past eight (8) years. AP or CLEP credits must be documented by original scores submitted to the College of Veterinary Medicine. CLEP credits may be accepted only for arts, humanities and social sciences. Credits in the preceding specified courses will not be accepted if earned under the pass-not pass grading system or similar options.

Application and Admission

Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the VMCAS website (www.aavmc.org) under VMCAS). Those applying through VMCAS also need to complete the ISU Supplemental Application found at the College of Veterinary Medicine website. The Iowa resident deadline for filing the VMCAS application, supplemental application, processing fee, GRE scores, evaluations and transcripts is September 1. The deadline for all other applicants is October 1.

Any student wishing to use international coursework (including study abroad) to fulfill a preveterinary requirement must provide a transcript from the foreign institution.

A list of courses in progress at the time of submission and/or scheduled for completion by the end of spring term should accompany the supplemental application. Undergraduate college credits must average at least 2.50 on a 4.00 marking system for the application to be eligible for review. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. GPA, Graduate Record Exam (GRE) general test score (the GRE for Iowa residents must be received by September 1, for all other applicants, it must be received by October 1), animal and veterinary experience, essays, recommendations and personal development (leadership, citizenship, etc.) are given consideration in the selection of

candidates. Final selection of candidates is made after an on-campus interview.

Approximately one-half of the positions available are reserved for residents of Iowa. The College of Veterinary Medicine has implemented a Professional Program in Veterinary Medicine with the University of Nebraska-Lincoln for Nebraska residents and contracts with the states of North Dakota, South Dakota and Connecticut. A number of positions are also available to residents of other states. A few highly qualified international students may be accepted and are considered in the non-resident/non-contract applicant pool. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at www.vetmed.iastate.edu (<http://www.vetmed.iastate.edu>) and click on APPLY VET MED.

Curriculum in Veterinary Medicine Graduation Requirements

To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D while enrolled in the College of Veterinary Medicine, and have at least a 2.0 grade-point average in the veterinary medicine curriculum.

Required Courses in the Professional Program

B M S 330	Principles of Morphology I	6
B M S 331	Principles of Morphology II	4
B M S 333	Biomedical Sciences I	6
B M S 334	Biomedical Sciences II	6

Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students choose one of four options for additional study, including the Small Animal, Equine, Mixed Animal, or Food Animal Options. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

The following rotations are required of all fourth year students in addition to the requirements of the track they choose. A complete listing of track-specific requirements can be found at: <http://vetmed.iastate.edu/>:

Reinstatement

Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dismissed from the College of Veterinary Medicine, after having successfully completed one or more semesters forfeits his/her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.

Biomedical Sciences

Professional Program of Study

For professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

A good foundation in anatomy, physiology, and pharmacology of animals is necessary to understand the mechanisms of animal disease processes and their treatment. Study of mammalian anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems relevant to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacology to include pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

Graduate Programs

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit. Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised

by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer's disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nematode ion-channels, Parkinson's disease, pharmacology of schistosomiasis, pharmacology of salmonellosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells. The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

Pharmacology and Toxicology

Pharmacology and Toxicology - Undergraduate Minor

The interdisciplinary pharmacology and toxicology minor is intended to significantly increase the number of ISU graduates who can:

- Understand, use and define key terms and concepts related to pharmacology and toxicology;
- Apply concepts and standard practices in pharmacology and toxicology to solving practical problems relevant to these fields;
- Analyze scientific data in pharmacology and toxicology;
- Synthesize detailed and accurate descriptions of current knowledge on key topics in pharmacology and toxicology;
- Make informed decisions about current controversies in pharmacology and toxicology, using appropriate scientific methods and ethical reasoning.

The minor in Pharmacology and Toxicology may be earned by completing the following courses. All minors require at least 15 credits; 9 credits of the courses listed in the minor must not be used to meet any other department, college, or university requirement except the credit requirement for graduation. There are three required courses for all Pharmacology and Toxicology undergraduate minors: TOX 401, B M S 439, and one physiology course selected from B M S 329, BIOL 334 or BIOL 335. The remaining credits are fulfilled by any of the electives listed below.

TOX 401	Principles of Toxicology	3
B M S 439	Principles of Pharmacology	4
Select one of the following:		3-4
B M S 329	Anatomy and Physiology of Domestic Animals	
BIOL 335	Principles of Human and Other Animal Physiology	

Total Credits

10-11

Veterinary Clinical Sciences Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The curriculum of veterinary clinical sciences explores the preventive health care, and diagnosis and treatment of diseases of companion and competitive athletic animals. Veterinary specialists lead didactic and laboratory based learning in the clinical sciences. Experiential based courses conducted through the Veterinary Medical Center during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge.

Graduate Study

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

World languages and cultures requirements may be established by the student's program of study committee.

Veterinary Diagnostic and Production Animal Medicine

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

Courses in veterinary diagnostic and production animal medicine provide students with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, welfare, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or small ruminant production medicine. Elective courses may include preceptorships in private practices, at other veterinary schools, in research and disease control laboratories, or in related agribusinesses.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to acquire and use a broad knowledge

base to support the health and improve the production and efficiency of the food supply chain.

Graduate Study in Veterinary Preventive Medicine

Veterinary Preventive Medicine is a multidisciplinary program focused on the study of health and disease in populations. The various disciplines represented in the program are unified by a common approach based on the application of epidemiological methods to problem solving in populations. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases.

Graduate study in Veterinary Preventive Medicine will provide valuable skills and experience to persons interested in public health, food safety, emerging infectious diseases, zoo or wildlife health, and livestock health. A degree in Veterinary Preventive Medicine may be valuable for individuals considering a future in the biological or pharmaceutical industries, government regulatory agencies, public veterinary practice, international service agencies responsible for population health or progressive private practice.

Veterinary Preventive Medicine is an interdepartmental major administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA:ARS) and the National Veterinary Services Laboratories (USDA:APHIS) located in Ames, Iowa.

Both thesis and non-thesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for non-thesis and a final examination.

Program of Study: Master of Science in Veterinary Preventive Medicine (Thesis Option) 30 credits

STAT 587	Statistical Methods for Research Workers	4
VDPAM 527	Applied Statistical Methods in Population Studies	3
VDPAM 528	Principles of Epidemiology and Population Health	3
VDPAM 529	Epidemiological Methods in Population Research	3
VDPAM 699	Research	arr †
Research or Electives to total at least 17 additional credits		

† Arranged with instructor.

Program of Study: Master of Science in Veterinary Preventive Medicine (Non-Thesis Option) 36 Credits

STAT 587	Statistical Methods for Research Workers	4
VDPAM 527	Applied Statistical Methods in Population Studies	3

VDPAM 528	Principles of Epidemiology and Population Health	3
VDPAM 529	Epidemiological Methods in Population Research	3
VDPAM 590	Special Topics	3
One Additional STAT course from the following		3
STAT 571	Introduction to Experimental Design	
STAT 573	Introduction to Survey Sampling	
STAT 575	Introduction to Multivariate Data Analysis	
VDPAM 599	Creative Component	arr †

Creative Component and Electives to total 18 additional credits

† Arranged with instructor.

Graduate Certificate in Veterinary Preventive Medicine

Veterinary Diagnostic and Production Animal Medicine offers a graduate certificate for DVMs, concurrent DVM students and non-DVMs in allied animal industries in Veterinary Preventive Medicine.

Students in this program are able to select courses that focus in areas of animal welfare, diagnostics, food safety, evidence-based medicine, surgery, pathology, microbiology, epidemiology, public health, statistics and production medicine.

The purpose of the graduate certificate in Veterinary Preventive Medicine for industry professionals is to address the continued and advanced needs of animal health professionals. The certificate enables professionals to gain recognition for a skill set that includes epidemiology, risk assessment, production medicine and animal welfare. A graduate certificate may be used to increase knowledge in a new or emerging area of interest to the candidate. As such, it may be used to formally gain recognition for retraining to meet the needs of today's food production systems.

The graduate certificate for concurrent DVM students is designed to give additional skills to students planning on working with populations of animals. Using a combination of on-line and dual listed graduate level courses, the program is designed to enable DVM students to complete the certificate while studying for their DVM degree. Students enrolled in any US-based DVM program are able to complete a graduate certificate at ISU using a combination of on-line and transfer graduate level courses.

The graduate certificate is an additional qualification awarded by Iowa State University after successful completion of 15 graduate level credits. A graduate certificate is different from continuing education as the certificate includes an academic transcript from Iowa State University. Students complete the same courses graduate students do with the the same expectations for all assignments and exams.

The program is available as a strictly on-line (off campus) delivery method or as a combination of classroom-based and on-line course offerings providing maximum flexibility in scheduling.

Program of Study: Graduate Certificate in Veterinary Preventive Medicine (15 credits)

Certificate required core courses	7
STAT 587 Statistical Methods for Research Workers	
VDPAM 528 Principles of Epidemiology and Population Health	
Remaining 3 core credits can be selected from	3
VDPAM 527 Applied Statistical Methods in Population Studies	
VDPAM 529 Epidemiological Methods in Population Research	
VDPAM 570 Risk Assessment for Food, Agriculture and Veterinary Medicine	
5 elective credits from any approved ISU graduate course	5
Total Credits	15

Veterinary Microbiology and Preventive Medicine Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccinology are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine and food safety are also emphasized.

Graduate Study

The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethical and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology or veterinary preventive medicine. A

non-thesis master's option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs.

Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCDB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Veterinary Pathology Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

Graduate Study

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. The majority of students choose an area of specialization in veterinary anatomic pathology, veterinary clinical pathology, or veterinary parasitology (<http://vetmed.iastate.edu/vpath/academics/graduate-program> (<http://vetmed.iastate.edu/vpath/academics/graduate-program/>)). The master of science degree is available on a thesis or nonthesis basis in the veterinary pathology major with or without an area of specialization.

For the ACVP training track (residency) of the anatomic or clinical pathology graduate program designed to train veterinary pathologists, the student must have a funded position within the Department of Veterinary Pathology. If the student does not have a funded position or is not enrolled in the departmental degree program, enrollment in courses pertaining to the residency program and activities that support the residency program must have the approval of the Department Chair of

Veterinary Pathology and the head of the departmental residency training program.

Graduates have a broad understanding of the mechanistic basis of disease pathogenesis. They are able to communicate with clinicians, other scientists, and other colleagues on scientific matters, and with the general public on related science policy matters. Graduates are able to address complex problems facing the agricultural and biomedical sciences, and comparative medicine, and are able to make appropriate diagnoses and investigations of animal diseases. They consider ethical, social, legal and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals.

Collaborative work is recommended in other departments in the College of Veterinary Medicine or departments or programs in other colleges. The department participates in the interdepartmental programs in Immunobiology (www.immunobiology.iastate.edu/ (<http://www.immunobiology.iastate.edu/>)), Toxicology (www.toxicology.iastate.edu/ (<http://www.toxicology.iastate.edu/>)), Genetics (www.genetics.iastate.edu/ (<http://www.genetics.iastate.edu/>)), and Molecular, Cellular, and Developmental Biology (www.mcdb.iastate.edu/ (<http://www.mcdb.iastate.edu/>)).

A veterinary degree (doctor of veterinary medicine or equivalent) is required for training in Veterinary Anatomic Pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 paper-based (213 computer-based; 79 internet based) is required on the TOEFL examination for students whose native language is not English. Scores on the standardized Graduate Record Examination (GRE) General Test are required of students not having a veterinary degree from the United States or Canada. The GRE General Test is strongly recommended for all other applicants. A foreign language requirement will be determined by the student's program of study committee with the approval of the departmental chair. The Graduate English Examination is a graduate college requirement for native English speakers.

The M.S. thesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 30 graduate credits. Following completion of all other requirements, a comprehensive final examination is administered covering all graduate work including the thesis. The examination is typically oral, but a written component may be specified by the program of study committee. The degree candidate must submit a thesis, including at least one manuscript suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The departmental requirement for graduate courses includes:

3 credits of basic biological sciences (biochemistry, genetics, cell biology)		3
V PTH 551	Postmortem Pathology Laboratory	1
V PTH 570	Systemic Pathology I	4
or V PTH 571	Systemic Pathology II	
STAT 587	Statistical Methods for Research Workers	4
V PTH 605	Current Topics Seminar	1
V PTH 699	Research	arr †

† Arranged with instructor.

The M.S. nonthesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 40 graduate credits including at least 10 graduate credits earned outside the department. Every nonthesis master's degree program requires evidence of individual accomplishment demonstrated by completion of a creative component, special report, or scientific study. A minimum of 3 credits of such independent work (V PTH 599 Creative Component Research) and a practical diagnostic examination (V PTH 606 Diagnostic Interpretation) corresponding to the area of specialization are required on every program of study. The final examination is comprehensive and consists of written and oral questions. The departmental requirement for graduate courses includes those for the M.S. thesis degree plus additional courses corresponding to the area of degree emphasis of specialization. Contact the department for a more complete list of requirements and information on areas of specialization.

The Ph.D. degree in veterinary pathology, with or without an area of specialization, requires a minimum of 72 graduate credits including at least 12 graduate credits earned outside the department. The preliminary examination, consisting of written and oral components, is comprehensive and not restricted to the content of graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. The department also offers a combined DVM/Ph.D. program designed for completion of courses for the Ph.D. degree in Veterinary Pathology simultaneously with study in the professional curriculum in the College of Veterinary Medicine. Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.

GRADUATE COLLEGE

www.grad-college.iastate.edu/ (<http://www.grad-college.iastate.edu/>)

William R. Graves, Dean

Carolyn Cutrona, Associate Dean

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for administering students' graduate programs, and for promoting research support from various governmental, industrial, and private agencies.

The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master's and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socio-economic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees master of arts, master of science, and doctor of philosophy are research oriented. In many fields master's degrees are also awarded without a thesis, but a written report of independent study, called a creative component, is generally required. Coursework only degrees are available for those individuals interested in advanced study directed toward meeting vocational or professional objectives. Information on other types of Master's degrees can be found in the Graduate College Handbook, Appendix E, (www.grad-college.iastate.edu/publications/gchandbook/homepage.html) (<http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html>)

The Graduate College Handbook lists policies and procedures of the Graduate College. It is available at the Graduate College's Web site: www.grad-college.iastate.edu/ (<http://www.grad-college.iastate.edu/>).

Graduate Appointments

Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate work and to promote research. Such appointments and research opportunities are available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship (20 hours per week) permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. These students may also be eligible for tuition scholarship awards (50% of in-state tuition for most master's students and 100% of in-state tuition for most Ph.D. students and certain terminal master's students). Students who are graduates of a regionally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor's degree are substantially equivalent to those of Iowa State University, who are admitted in the full or provisional admissions status, and who present the requisite undergraduate or graduate preparation, may apply for these appointments.

Students placed on academic probation are eligible for assistantship appointment only on a term by term basis, and need special permission to be approved for tuition scholarships. Students admitted as nondegree students are not eligible for assistantship appointments. Further information may be obtained by contacting the appropriate graduate program.

The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full time study for the master's degree or five years for the doctorate, the student will not normally be continued on assistantship support (shorter periods may be stipulated by the student's program or department).

Postdoctoral Study

Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the Dean of the Graduate College.

Graduate Study by Staff Members

Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may

carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section, and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

Distance Education

Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at <http://www.distance.iastate.edu> (<http://www.distance.iastate.edu/>).

Other information about graduate requirements is available in the Graduate College Handbook at <http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html>. (<http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html>)

Doctoral Post Prelim (Required Registration)

Even when Ph.D. graduate students have completed course work, they are required to register and pay tuition and fees, whether or not university facilities and equipment are used or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major department or program and pay the appropriate graduate tuition and fees.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are not used, the Ph.D. candidate may register for GR ST 681 Required Registration and pay the Doctoral Required Registration tuition and fees.

The Ph.D. candidate must be aware that registration for Gr St 681 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and does not defer student loans.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

Auditing

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve ALL audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audited courses do not appear on the student's permanent record unless the "Request for Audit(s) to Appear on Transcript" form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College's web site at <https://www.grad-college.iastate.edu/student/forms/> must be filed with the Graduate College, 1137 Pearson Hall.

After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student's permanent record as a drop.

Audits are not acceptable as registration for loan deferments or meeting visa requirements.

Graduate Courses Taken by Undergraduates

Certain graduate level courses listed in the ISU Catalog may be used in the program of study even though they were taken for graduate credit by the student as an undergraduate at Iowa State University.

The following conditions must be met:

1. The POS committee can request approval from the Dean of the Graduate College that up to six hours of such credit be applied toward meeting advanced degree requirements (these courses must be clearly marked on the POS).
2. Credits earned in these courses must have grades of B or better.
3. The student must be classified as an undergraduate and not a nondegree undergraduate (credits taken as a nondegree undergraduate student are not allowed).
4. The Graduation Office (10A Enrollment Services Center) should be contacted to determine that the courses were not taken as a nondegree undergraduate student, were not used toward fulfillment of the undergraduate degree program and were graded B or better.

Courses Taken as a Nondegree Undergraduate Student

A person classified as a "nondegree undergraduate" student may not use courses taken under that status in a graduate degree program. A student

who has received the baccalaureate degree must register as a graduate student if he/she is to receive graduate credit for courses.

Graduate Majors

A complete list of all graduate majors can be found on the Graduate College website, <http://www.grad-college.iastate.edu/academics/gradprograms/phd.php> (<http://www.grad-college.iastate.edu/academics/gradprograms/>), with links to admission requirements and program websites.

Admission

All degree-seeking graduate students must have graduated with a bachelor's or master's degree from a regionally accredited U.S. institution or from a recognized foreign institution where the requirements for the bachelor's degree or its equivalent are similar to those at ISU. Additionally, each applicant must be accepted at ISU by the major program, the Office of Admissions, and the Graduate College. For information concerning graduate study in a particular academic discipline, prospective students should correspond with the chair of the major program in which they wish to study.

Iowa State University has a shared application process, which means certain items are sent (electronically or in print form) to the Office of Admissions and other items are sent to the graduate program to which the prospective student is applying. Detailed instructions are available at <http://www.admissions.iastate.edu/graduate/index.php>. (<http://www.admissions.iastate.edu/graduate/>) Students are also encouraged to check the Program Requirements Web page on the Graduate College Web site at <http://www.grad-college.iastate.edu/programs/APprograms.php> for mailing instructions and deadlines for each program.

The nonrefundable application fee is \$60 (\$100 for international applicants). An electronic application is required to apply to ISU's graduate programs; the form and necessary instructions are available at <https://www.admissions.iastate.edu/apply/index.php>. (<http://www.admissions.iastate.edu/apply/graduate.php>) The application fee is required of all applicants except those who have attended Iowa State as undergraduates. Iowa State requires official academic records and statements of all degrees earned from all institutions attended since secondary school. Faxed, scanned, and notarized copies are not considered official.

Many programs have very early application deadlines. For more details, check program deadlines at www.grad-college.iastate.edu/programs/APprograms.php (<http://www.grad-college.iastate.edu/programs/APprograms.php>).

Categories of Graduate Admission

An applicant pursuing an advanced degree must be recommended by the program in which he/she will be pursuing an advanced degree and must be approved by the Dean of the Graduate College. There are three admission categories for students who wish to pursue an advanced degree:

Full Admission status may be granted to an applicant who either has achieved a grade point average (GPA) of 3.0 or greater (on a 4.0 scale).

Nondegree Graduate Admission

Well-qualified applicants who do not intend to seek an advanced degree from Iowa State University may be considered for nondegree graduate admission. Such students usually include:

1. Those who intend to transfer graduate credit earned at Iowa State University to other institutions.
2. Those who intend to use graduate credits earned for professional certification.
3. Those who enroll for personal satisfaction.
4. Those who enroll occasionally in off-campus graduate courses. The nondegree application form is available from www.admissions.iastate.edu/nondegree/ (<http://www.admissions.iastate.edu/nondegree/>).

Applications and schedules for nondegree students are processed directly by the Office of Admissions and the Graduate College office; no program approvals are generally required, unless the non degree applicant has a very low GPA, then departments are contacted about what courses would be appropriate for the student to take.

A nondegree student who subsequently seeks full admission must apply to and be accepted by a graduate program and by the Graduate College for degree study. A new application, the regular application fee, and transcripts from all colleges attended are required.

For those students originally admitted to the Graduate College on a nondegree basis, no more than 9 semester hours of graduate credit earned under the nondegree option may be applied if the student later chooses to undertake a graduate degree program. The student's program of study committee will recommend to the Graduate College which courses (if any) taken on a nondegree basis may be included in the degree program.

Graduate Admission of International Students

An applicant who is a graduate of a recognized foreign institution is subject to the same criteria for admission as a graduate from an institution in the United States and may be recommended for the same admission categories described above except that of the nondegree

option. International applicants for nondegree status may be considered for admission at the discretion of the Graduate College dean. Application and admission deadlines for international students can be obtained from the Admissions web site at www.admissions.iastate.edu/apply/ (<http://www.admissions.iastate.edu/apply/>).

International students are required to show evidence of financial support and to carry adequate health and accident insurance while in residence.

Admission Examinations

Graduate Record Examination. The Graduate Record Examination (GRE) is not a university-wide requirement for all applicants. However, many programs require or recommend submission of GRE scores; individual program statements at www.grad-college.iastate.edu/programs/APprograms.php (<http://www.grad-college.iastate.edu/programs/APprograms.php>) should be consulted for this information.

Registration

Graduate students are encouraged to register for courses on the ISU web site (www.iastate.edu (<http://www.iastate.edu>)) via AccessPlus. Students who are unable or who choose not to register through this system may use a walk-through registration procedure. Students who do not register by the published deadline for initiation of a schedule through the AccessPlus systems must use the walk-through procedure. For complete information on registration, see the ISU Schedule of Classes or the Registration Web site at <http://www.registrar.iastate.edu/students> (<http://www.registrar.iastate.edu/students/>).

Credit Limits

Registration is limited to a maximum of 15 credits per semester. Schedules for graduate assistants on one-half time appointments are limited to a maximum of 12 credits. For full-time staff members, the limit is 6 credits. (Different credit limits apply during the summer session; see the Graduate College Handbook at www.grad-college.iastate.edu/common/handbook (<https://www.grad-college.iastate.edu/handbook/>) for more details.)

Interim Registration

Registration for special work between semesters and during certain vacation periods cannot exceed one credit for each week that the student is in residence. For more information, consult the Graduate College Handbook.

Grading

Grades are the permanent official record of a student's academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)

All courses (even if they are undergraduate courses) taken as a graduate student will be calculated into the graduate GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester's average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. Creative Component/Research (599 and 699) credits are not used in the calculation of the GPA. In the case of repeated courses, only the grade achieved the last time the course is taken is used in computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student's GPA.

Pass (P)/Not Pass (NP) Course Credit

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS, nor do P/NP marks contribute to the student's GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.

Satisfactory/Fail (S/F) Grading

S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a D- grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis.

S/F grading may be used only for approved courses offered as seminars, symposia, workshops, special topics, and research. Programs must submit requests for S/F grading to the Dean of the Graduate College. The Graduate College Curriculum and Catalog Committee reviews and approves or rejects all S/F courses.

Grievances about Grades

A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in the Graduate College Handbook.

Probation

If a graduate student does not maintain a cumulative 3.0 grade point average on all course work taken, exclusive of research credit, he or she may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in course work only. New, first-term, degree seeking graduate students who fall below a 3.0 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.0 GPA. These students will receive a warning letter from the Graduate College.

While on academic probation a student will not be admitted to candidacy for a degree and if appointed to a graduate assistantship, the student will not receive a Graduate tuition scholarship unless approval is given by the student's academic college. If a student is to qualify for a tuition scholarship, he/she must be removed from probation by the tenth class day of the term.

To insure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review his or her record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.0 GPA or greater.

English Requirements for Non-native Speakers

Applicants whose native language is not English and who have not earned a bachelor's or master's in a country where the only official language is English are required to submit Test of English as a Foreign Language (TOEFL) scores as part of the admission process. A minimum score of at least 79 on the TOEFL internet-based test or 550 on the paper-based test is required by the Graduate College. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. Because many programs require higher TOEFL and/or IELTS scores, applicants should check directly with the program to which they desire admission or browse the Graduate College Web site at www.grad-college.iastate.edu/programs/APprograms.php (<http://www.grad-college.iastate.edu/programs/APprograms.php>).

Graduate students whose native language is not English and who did not graduate from a U.S. institution must take an English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English. A student who does not pass this examination is assigned to one or more courses in the English 99 and 101 series. This course work must be completed during the first year of study. (There is a developmental course fee for the English 99 course.). Non-native English speaking ISU graduate students who meet or exceed the TOEFL scores (640 or above on the paper-based test or 105 on the internet-based test) are exempted from taking the English Placement Test. (Self-enrollment in English 099 or 101 courses remains possible.

A graduate student whose native language is not English but did graduate from a U.S. institution, may bring to the Graduate College the "Request for the Graduate College to Approve the Graduate English Requirement for a Student Whose Native Language is NOT English" form, available from the Graduate College or on the Graduate College's Web site at <https://www.grad-college.iastate.edu/student/forms/>. Two conditions must be met: the student must have received a bachelor's, master's, or Ph.D degree from a U.S. college or university and the language of instruction at that college or university must have been in English.

New teaching assistants whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. The Oral English Certification Tests (OECT) are given before the beginning of each semester. The testing dates are announced on the International Teaching Assistants (ITA) program website. Registration for the test is held on line through links posted on the ITA program homepage, <https://cce.grad-college.iastate.edu/speaking/english-180-courses> (<https://cce.grad-college.iastate.edu/speaking/english-180-courses/>), two to three weeks before the test is administered. TAs and faculty with questions about OECT testing should call 515-294-1958 or 515-294-7996. A prospective teaching assistant who does not pass these tests is required to successfully complete course work and be retested. English 180 is a series of communication courses designed to help new teaching assistants. Students focus upon pronunciation, listening, question-handling, teaching and lecturing skills, and analyze the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go to the ITA Office, 1137 Pearson immediately after they receive the test scores to obtain permission to enter the course by completing a course add slip.

Department/Program Change

Transferring from One Major/Program/Department to Another

Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another department or program. Because graduate students are admitted to

particular programs, transfers require the approval of both the receiving program and the Graduate College.

Students seeking transfer to another program or department should first discuss their wishes with the new program DOGE (Director of Graduate Education) to determine requirements and interest by the new program. When a student receives a favorable preliminary response from the new program, he or she should fill out the student portion of the form entitled "Request to Transfer from One/Major/Program/Department to Another" and submit this form to his or her current DOGE. The current DOGE will fill out the Current Program Information adding any comments he or she believes the new program should consider and forward the form to the proposed new program. This form is available from the department, the Graduate College, or the Graduate College web page.

The receiving program will generally give the student the same consideration and employ the same admissions standards that are used for original applications for admission and will expect the same application materials (transcripts, letters of recommendation, test scores, etc). During the process, the new and old programs and the Graduate College are authorized and encouraged to seek and disclose information related to the student's overall fitness for studies in the receiving program. Programs are authorized to inquire into the student's prior conduct at the university, both with the prior department and with the Dean of Students.

Upon departmental action (acceptance or denial), the request to transfer form must be sent to the Graduate College for approval. All parties will receive a copy of the completed form from the Graduate College.

Students desiring to transfer from a degree-seeking status to a nondegree-seeking status need to fill out the "Request to Transfer from One Major/Program/Department to Nondegree" form and bring it to the Graduate College.

Students desiring to transfer from nondegree-seeking status to a degree-seeking status must be admitted by a program through the regular graduate admission process.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact the graduate classification officer (1137 Pearson Hall). The classification officer will consult with the student and determine the proper course of action.

Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year previous and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate, must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed "Undergraduate Reentry" form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student's overall fitness for continued studies including information about the student's conduct, employment and education since the student's last enrollment.

Individuals who do not have active graduate status and who first enrolled less than one year previous should first see the classification officer in the Graduate College.

Time Limits. It is expected that work for the master's degree shall be completed within five years. In special circumstances the student's POS committee may recommend that the Dean of the Graduate College extend these degree time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student's POS committee and the Graduate College. The inclusion in the student's program of study of course work that is beyond the time limits ("expired" courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Application for Graduation. Students planning to graduate must complete an "Application for Graduation" form through their online AccessPlus system by the end of the third week of the semester (fall or spring) in which he/she expects to receive the degree, or by the last day of spring semester when wishing to graduate during summer.

Before completing this form, a student must have submitted and had approved by the Graduate College a "Program of Study and Committee" form. Also the student must have been fully admitted to a program and have met the Graduate English requirement if he/she is a non-native English speaker. Graduation may be delayed if the "Application for Graduation" form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she can go online through AccessPlus and cancel the previously submitted "Application for Graduation" form by the designated deadline. The student must then complete a new form for the next planned term of graduation.

Thesis. A master's thesis is a scholarly composition that demonstrates the ability of the author to do independent and creative work. A thesis is required in all fields in which a master's degree is awarded, except where specific provision is made for a nonthesis degree program. A minimum of

three research credits is required on every program of study for a thesis master's degree.

Responsibility for writing and editing of the thesis rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of theses. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the thesis to assure the highest level of quality when the student presents the thesis to the committee for final approval.

Copies of the thesis must be submitted to the members of the POS committee at least three weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College's web site (<http://www.grad-college.iastate.edu/current/thesis>) for requirements, revised fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation" form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College's cancellation deadline.

Creative Component. Most nonthesis students must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of two credits of such independent work is required on those programs of study for a nonthesis master's degree. Some programs require more credits. (For more information, contact the individual program or consult the Specific Master's Degrees section in this catalog.) The element of creative independent study must be explicitly identified on the program of study. The format of the creative component is determined in cooperation with the POS committee. As with a thesis, a creative component should be submitted to members of the POS committee two weeks before the final oral examination. However, no final submission of a creative component is turned in to the Graduate College for review and approval.

Final Oral Examination. Most master's candidates must pass final oral examinations. The final oral examination must be held by the final examination deadline date for the semester in which the degree is granted. All coursework in the program of study must either be completed or in progress before the final examination can be scheduled. This examination is oral; it may also include a written component if specified by the student's (POS) committee.

Graduate students must register at Iowa State for the equivalent of one credit, or for the R-credit course if no course work is needed, during the

semester in which the final examination is taken. (Graduate students who are not required to take a final oral examination should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.) Taking only an R-credit course where the fee is not equivalent to the 1-credit minimum charge is not acceptable for the term of the final oral examination. If the examination is taken during the interim between terms (including the first day of classes), registration can be for either the term before or the term after the examination is held.

The candidate is responsible for initiating the "Request for Final Oral Examination" form, which must be submitted to the Graduate College at least three weeks before the examination. This form is available online under Current Student. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a "Graduate Student Approval Slip for Graduation" form. It is sent to the major professor or program to give to the student after the "Request for Final Examination" form is received and approved by the Graduate College. Signatures are required by the major program, the department chair, and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term's graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Undergraduate Admission to Concurrent Graduate Degree/Certificate Programs

Several programs provide opportunities for qualified ISU juniors and seniors majoring in those curricula to apply for admission to both a bachelor's and master's degree.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For a complete listing of the concurrent degree programs, consult the Graduate College Handbook, "Concurrent Degree Programs" on page 27 of the Handbook, <http://>

www.grad-college.iastate.edu/common/handbook/. (<http://www.grad-college.iastate.edu/common/handbook/>)

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the graduate programs about applying early in their undergraduate careers. Undergraduate students seeking admission to concurrent graduate degree programs in field other than these, plus any student with an interdepartmental major, must submit the appropriate concurrent form completed and a written proposal for an individualized program, co-signed by their advisers, to the Graduate College for review and approval. For more information about the application process and transferring credits, consult the Graduate College Handbook.

Veterinary Medicine Students in Concurrent Graduate Degree/Certificate Programs

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must adhere to the following process:

- Complete a "Concurrent Enrollment for Graduate/Veterinary Medicine Degrees" form available on the web site at www.grad-college.iastate.edu/common/forms/index.php (<http://www.grad-college.iastate.edu/common/forms/>). This is a combination application/concurrent form.
- Submit the "Concurrent Enrollment Request" form to the Graduate College after appropriate signatures are obtained.

Signed approvals on the concurrent form are required from the graduate program, the College of Veterinary Medicine, and the Graduate College. On admittance, the student receives an admission notification from the Office of Admissions. For more information see the Graduate College Handbook.

Graduate Students in Concurrent Undergraduate Programs

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions (100 Enrollment Services Center) to obtain admission information (even if the student has been previously admitted as an undergraduate). An "Application for Graduate Student Wishing to Pursue a Concurrent Undergraduate Degree" form should be obtained from the Graduate College Web site at www.grad-college.iastate.edu/common/forms/index.php ([http://](http://www.grad-college.iastate.edu/common/forms/index.php)

www.grad-college.iastate.edu/common/forms/) and circulated for the appropriate approvals.

- Official enrollment and fee payment will be as a graduate student.
- The graduate degree or graduate certificate will be awarded only at the same time as, or after, the undergraduate degree is conferred.
- Students interested in a research career may be able to apply for a graduate research assistantship while in a concurrent degree or graduate certificate program.
- Students in concurrent degree programs may, subject to Program of Study Committee approval, count up to 6 ISU credits taken during their concurrent enrollment toward both a bachelor's degree and a graduate certificate or master's degree that requires up to 41 credits. For master's degree programs that require at least 42 credits, students may instead count up to 12 ISU credits taken during their concurrent enrollment toward both their undergraduate degree and their master's degree, upon program and Program of Study Committee approval.
- For students pursuing a concurrent undergraduate bachelor's degree and a graduate certificate, at least 12 graduate credits cannot be double counted and a maximum of 6 graduate credits can be double counted for both the bachelor's degree and the graduate certificate (when the graduate certificate requires more than 12 credits).
- A student in a bachelor's and master's concurrent degree program cannot be on a Ph.D. track during the concurrent program.

A complete list of Concurrent Bachelor and Master Programs or Graduate Certificate Programs can be found in the Graduate College Handbook, pages 30-31. <http://www.grad-college.iastate.edu/common/handbook> (<http://www.grad-college.iastate.edu/common/handbook/>)

Master's Degrees

General requirements for all master's degrees are as follows:

General Requirements

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master's programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged

to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee

New graduate students at ISU may be assigned a temporary academic adviser by the major program in the first semester of the student's residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A thesis master's POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's master's research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. A non-thesis master's degree needs a minimum of one committee member.

Programs may establish requirements for more than one member. For more information on duties and makeup of the committee as well as changes to the committee makeup, see the Graduate College Handbook.

Program of Study. The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee and program of study be formed later than the term before the preliminary oral exam for Ph.D students, and the final oral examination for master's students.

Residency. There is no on-campus residency requirement for the master's degree.

Credits. Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master's programs. At least 22 graduate credits must be earned from Iowa State University.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses

taken at or through another university as an undergraduate student, it is the student's responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed the term before the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better. Audits may be listed on the program of study, but do not carry credit.

Major. A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. A student may not minor and major in the same field. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student's POS committee.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation" form (diploma slip). A minor cannot be added to a degree that has already been received.

Specific Master's Degrees

The number of credits in a major for a master's degree will vary according to various degrees. General credit requirements for all master's degrees include: a minimum of 30 graduate credits is required for all master's programs at ISU; at least 22 graduate credits must be earned at ISU; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the POS form. A complete listing of specific master's degrees can be found in the Graduate Handbook, section E, page 107, <http://www.grad-college.iastate.edu/common/handbook/>. A complete listing of all master's degrees can also be found online, <http://www.grad-college.iastate.edu/academics/gradprograms/index.php>. (<http://www.grad-college.iastate.edu/academics/gradprograms/>)

Master's Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master's degrees and two diplomas are granted at the same time. For double degrees the final project (thesis or creative component) must integrate subject areas from both departments. One final oral examination must be held covering the combined thesis or creative component. Students planning to pursue double degrees must complete a double degree request form and submit it to the Dean of Graduate College for approval. Just one "Recommendation for Committee Appointment" form and one "Program of Study (POS)" form need to be submitted for the two degrees. However, two "Application for Graduation" forms, one for each degree, will need to be submitted. All forms should show clearly that the student is enrolled in a double-degree program.

Like other master's programs, three graduate faculty members can constitute a POS committee; however, POS committees for double degrees must include co-major professors from each of the majors. Although specific degree programs may require more, the program of study must include at least 48 hours of non-overlapping graduate credit (24 for each major) in the two degrees, and no less than 75% of the sum of the credits from each separate degree.

A complete listing of the Double Degree Programs can be found in the Graduate College Handbook, page 35, <http://www.xgrad-college.iastate.edu/common/handbook/>. (<http://www.grad-college.iastate.edu/common/handbook/>)

If a student outside one of the named areas is interested in an individually-developed double degree program, a written proposal for a double degree to serve those interests and needs must be submitted to the Dean of the Graduate College for review. See the Graduate College Handbook for more information.

Drake University Law School/Iowa State University Combined Degree

To provide training in the complementary fields of law, political science, and economics with a minimum amount of academic duplication, special arrangements for combined degree programs have been approved with the Drake University Law School. ISU and Drake offer a combined J.D.-M.A. in political science and J.D.-Ph.D. in economics. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for nonmajor graduate credit. Because of the difference in grading systems, the Law School grades are transferred as passes, provided the student has achieved a grade of C or better in those courses at Drake for the political science program or a grade of B or better for the economics program.

Applicants for either of the combined programs must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

Doctor of Philosophy General Requirements

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are:

- high attainment and proficiency of the candidate in his or her chosen field
- development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work
- successful passing of detailed examinations over the field of the candidate's major work, with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master's or Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee

The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student's major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

Changes to POS committee

Recommendations for changes in the POS committee must have the approval of the student, major professor, DOGE, and all committee

members involved in the change (committee members who are on Faculty Professional Development Assignments, retired, or resigned do not have to sign) before seeking approval of the Graduate College. These changes must be approved by the Dean of the Graduate College before the preliminary or final oral examination is held. For more information on changes to the committee and to the Program of Study, see the Graduate College Handbook.

Program of Study

The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

Credits

A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.

Transfer Credits

At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student's responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the

other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Major

A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed at the end of this section of the bulletin. Opportunities also exist for majoring in more than one area of study (co-major or joint major programs).

Minor

Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student's POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation" form (diploma slip). A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.

Time Limits

The Graduate College's time-to-degree limit for all graduate students, both master's and Ph.D., is seven years. **Graduate programs may establish more restrictive time-to-degree limits.** For example, at the program's discretion, a student beginning a Ph.D. degree program at ISU with a master's degree could be expected to complete the program within three or four or five years, while a student beginning a Ph.D. degree program without the master's degree could be expected to complete the program within five or six or seven years. This is an option that would be enforced at the department level. Requests to extend the seven-year time limit will be considered in situations involving medical or other extenuating circumstances. Cases in which the student leaves ISU during their graduate career and later returns are dealt with individually by the POS committee and the Graduate College.

The inclusion in the program of study/committee (POSC) of coursework that is beyond the time limits ("expired" courses) must be justified in the Expired Course Petition found on the Graduate College student forms page. This petition must be submitted in conjunction with the POSC form.

Preliminary Examination

The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student's knowledge of major, minor, and supporting subject areas as well as the student's ability to analyze,

organize, and present subject matter relevant to the field. A "Request for Preliminary Examination" form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the "Request for Preliminary Examination" form is submitted to the Graduate College: admitted to full admission status in a Ph.D. granting program, approved "Recommendation for Committee Appointment" form, approved POS form, English requirement met, not on probation, time limit not exceeded, qualifying examination (if required by program) passed, and registration for at least the equivalent of 2 credits, or for the R-credit course if no course work is needed, during the term in which the preliminary oral examination is taken. (Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the preliminary oral examination.)

A preliminary oral examination will not be scheduled for a student on provisional or restricted admission or on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program's DOGE is approved by the Dean of the Graduate College.

Application for Graduation

Application for graduation should be made by the end of the third week of the semester (fall or spring) in which the student expects to receive the degree, or by the last day of the spring semester if graduation is planned during summer session. To apply for graduation, the student is required to complete an "Application for Graduation" form, available online through the student's AccessPlus system. Before submitting this form, a student must have submitted and had approved by the Graduate College a "Recommendation for Committee Appointment" form and a "Program of Study" form in the previous semester. Also the student must have been fully admitted to a program and have met the Graduate English requirement. Graduation may be delayed if the "Application for Graduation" filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she can go into AccessPlus and cancel the previously submitted "Application for Graduation" form before the designated deadline. The student must then file a new form for the next planned term of graduation. **Late application.** A student may file a late Application for Graduation during the fourth and

fifth weeks of the semester. Students will be charged a non-refundable \$20 late fee for a late application.

Dissertation

A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval. Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College's web site (<http://www.grad-college.iastate.edu/current/thesis/>) (<http://www.grad-college.iastate.edu/current/thesis/>) for new requirements, revised fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation" form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College's cancellation deadline.

Final Oral Examination

The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To receive the degree at the end of a given semester, the student must hold the final oral examination before the final oral examination deadline for the semester.

The candidate is responsible for initiating the "Request for Final Oral Examination" form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student's program/department. The entire POS committee must

be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation

Every candidate for an advanced degree is required to complete a "Graduate Student Approval Slip for Graduation" form. It is sent to the major professor or program to give to the student after the "Request for Final Examination" form is received and approved by the Graduate College. Signatures are required by the major program. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete, non-report, or grades lower than a C that a student receives for the term of graduation will result in removal from that term's graduation list.

The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation.

If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Graduate Studies

Graduate students may enroll in Graduate Studies (GR ST) courses for professional development or to fulfill certain enrollment requirements.

No major is granted in Graduate Studies.

GRADUATE PROGRAMS

Ph.D. Programs

A complete list of Ph.D. Programs can also be found on <https://www.grad-college.iastate.edu/academics/programs/apprograms.php>. (<https://www.grad-college.iastate.edu/academics/programs/apprograms.php>)

Aerospace Engineering (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=2>)

Agricultural and Biosystems Engineering (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=5>)

Agricultural Economics (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=3>)

Agricultural Education (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=4>)

Agricultural Meteorology (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=7>)

Analytical Chemistry (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=9>)

Animal Breeding and Genetics (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=10>)

Animal Physiology (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=11>)

Animal Science (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=12>)

Apparel, Merchandising, and Design (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=14>)

Applied Linguistics and Technology (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=15>)

Applied Mathematics (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=16>)

Applied Physics (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=17>)

Youth Program Management and Evaluation (<http://www.grad-college.iastate.edu/academics/programs/acresults.php?id=49>)

Graduate Minors

Students may request a minor in any program (<http://www.grad-college.iastate.edu/academics/programs/apprograms.php>) approved to grant a graduate degree and in programs approved to offer only a minor.

Graduate Minor Only Programs

The following programs are available as minor only. These minors do not have an associated graduate major.

Applied Scientific Computing (<http://asc.aere.iastate.edu/>)

French (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>)

German (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>)

Latin (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>)

Linguistics (<https://apling.engl.iastate.edu/>)

Philosophy

Russian (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>)

Spanish (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>)

Speech Communication (<http://www.engl.iastate.edu/graduate-students/>)

Women's and Gender Studies (<https://womensstudies.las.iastate.edu/graduate/>)

INTERDISCIPLINARY GRADUATE PROGRAMS

See individual programs for information regarding admission and academic requirements; or see the Graduate College or specific program page for more information.

Biorenewable Resources and Technology

Interdisciplinary Graduate Program

The graduate program in Biorenewable Resources and Technology (BRT) offers students advanced study in utilizing plant and crop-based resources in the production of biobased products (fuels, chemicals, materials, and energy). The BRT program was the first graduate program in biorenewable resources established in the United States.

This multi-disciplinary program offers the degrees of master of science and doctor of philosophy in Biorenewable Resources and Technology, and a minor to students taking major work in other departments. Students admitted to the Biorenewable Resources and Technology interdepartmental graduate program may pursue MS, Ph.D., or a Ph.D. minor degree. Additionally a 12 credit hour BRT Graduate Certificate is offered online. The home department of any BRT student is the department of the student's major professor, who serves as the Chair of the student's Program of Study (POS) Committee.

The curriculum is designed to encourage students to obtain co-major degrees in Biorenewable Resources and Technology and a more traditional science or engineering discipline. A thesis is required for the master of science degree. Over 160 ISU faculty affiliated members, 29 departments in all seven colleges and 20 research centers and institutes are involved in this highly interdisciplinary graduate program. A complete and up-to-date listing is maintained at: <http://www.biorenew.iastate.edu>.

Master of Science

The Master of Science degree in Biorenewable Resources and Technology requires 32 credits: a minimum of 8 credits of core required courses; 9 credits of core elective courses representing at least 3 of the 4 barrier areas identified by the United States Department of Energy (DOE); at least 9 credits of research; and an additional 6 credits selected from elective courses (including additional research credit). Prerequisite to major graduate work is a bachelor's degree or prior graduate training in engineering or a physical or biological discipline, including agricultural sciences.

The core required courses (8 credits min. required) for the Biorenewable Resources and Technology graduate program include:

BRT 501	Fundamentals of Biorenewable Resources	3
BRT 506C	Biobased Products Seminar: Research Presentations	1
BRT 515	Biorenewables Law and Policy	3
BRT 592L or BRT 507	Biorenewable Resources Laboratory Technology-Led Entrepreneurship in Biorenewables	1
Core electives in 3/4 barrier areas approved list*		9
Research		9
Electives or Research		6
Total Credits		32

*Students must complete approved core elective courses from at least three of the four bioeconomic development barrier areas: plant science, production, processing, and utilization. These are selected in consultation with the student's Program of Study (POS) committee. Additionally, students are to complete the determined amount of elective credits required for their degree, and in consultation with their POS committee, as well as research credits.

Graduates of the program will be equipped with skills to design, develop and/or manage cost effective and environmentally attractive technologies and systems for producing fuels, chemicals, materials, foods and energy from biorenewable resources.

Doctor of Philosophy (PhD) Degree

The Ph.D. degree in Biorenewable Resources and Technology requires 72 credits. A minimum of 8 credits of core required courses; 18 credits of core elective courses representing at least 3 of the 4 barrier areas identified by the United States Department of Energy (DOE); at least 22 credits of research; and an additional 24 credits selected from elective courses (including additional research credit).

BRT 501	Fundamentals of Biorenewable Resources	3
BRT 506C	Biobased Products Seminar: Research Presentations	1
BRT 515	Biorenewables Law and Policy	3
One credit from the following:		1
BRT 507	Technology-Led Entrepreneurship in Biorenewables	
BRT 592L	Biorenewable Resources Laboratory	
Core electives in 3/4 barrier areas approved list*		18
Research		22
Electives or Research		24
Total Credits		72

*Students must complete approved core elective courses from at least three of the four bioeconomic development barrier areas: plant science,

production, processing, and utilization. These are selected in consultation with the student's Program of Study (POS) committee. Additionally, students are to complete the determined amount of elective credits required for their degree, and in consultation with their POS committee, as well as research credits.

Graduates of the program will be equipped with skills to design, develop and/or manage cost effective and environmentally attractive technologies and systems for producing fuels, chemicals, materials, foods and energy from biorenewable resources.

Ph.D. Minor

The Ph.D. minor in Biorenewable Resources and Technology requires 15 credits: a minimum of 6 credits of core required courses: 3 credits of BRT 501* and 1 credit of BRT 506C are REQUIRED. The other two core credits can be obtained by selecting from BRT 515(3 credits) or BRT 592L (1 credit) and BRT 507(1 credit). An additional 9 credits of core elective courses representing at least 3 of the 4 barrier areas identified by the United States Department of Energy (DOE).

BRT 501	Fundamentals of Biorenewable Resources	3
BRT 506C	Biobased Products Seminar: Research Presentations	1
2 credits from:		2
BRT 515	Biorenewables Law and Policy	
BRT 592L	Biorenewable Resources Laboratory	
	or BRT 507 Technology-Led Entrepreneurship in Biorenewables	
Core electives in 3/4 barrier areas*		9
Total Credits		15

*Students must complete approved core elective courses from at least three of the four bioeconomic development barrier areas: plant science, production, processing, and utilization. These are selected in consultation with the student's Program of Study (POS) committee. Additionally, students are to complete the determined amount of elective credits required for their degree, and in consultation with their POS committee, as well as research credits.

Graduate Certificate

Through a series of 12 credit hours of graduate coursework, the Biorenewable Resources and Technology certificate will offer students from a wide variety of science and engineering backgrounds an exposure to advanced study in the use of plant- and crop-based resources for the production of biobased products, including fuels, chemicals, materials, and energy. The program aims to train professionals to serve the emerging bioeconomy, and in so doing to serve state, national, and global needs in moving toward a more sustainable industrial economy.

See certificate details : <http://www.elo.iastate.edu/graduate-certificates/biorenewable-resources-and-technology-graduate-certificate-online/>.

Dietetics - Graduate Program Interinstitution Graduate program

Dietetics is an interinstitutional distance education program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects a home institution, which grants the degree. After admission at the home institution, the student has the option to complete courses at the participating universities: Iowa State University, Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska-Lincoln.

At Iowa State University, Dietetics is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-Diet) that consists of 36 credits. This is a non-thesis option and a special project or creative component is required. Students typically complete the program in 6-8 semesters while employed full-time. Admission is limited to those who are Registered Dietitians or Registration-eligible Dietitians. A computer with minimum specifications, web access, and an email address are required for completing the program.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36 credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/business management. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retool for new career opportunities in dietetics practice.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Ecology and Evolutionary Biology

Interdepartmental Graduate Major

The Ecology and Evolutionary Biology (EEB) interdepartmental major is offered through ten departments -- Agronomy; Ecology, Evolution and Organismal Biology; Entomology; Genetics, Development and Cell Biology; Geological and Atmospheric Sciences; Horticulture; Mathematics; Natural Resource Ecology and Management; Plant Pathology; Statistics and World Languages and Cultures. Faculty in these departments cooperate to offer courses and direct research leading to MS and PhD degrees with a major in Ecology and Evolutionary Biology.

The EEB major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species. Applicants should have completed an undergraduate or master's of science or art degree in one of the biological, physical, or mathematical sciences. Applicants also should have taken undergraduate courses in both basic ecology and evolution.

The EEB curriculum includes a core course, seminar courses, and an extended field trip. Cooperating departments provide courses and research opportunities in the following areas:

- Conservation and Restoration Ecology;
- Environmental Statistics, Stochastic Modeling, and Quantitative Ecology and Evolution;
- Evolutionary Ecology;
- Landscape Ecology, Modeling, and Spatial Dynamics;
- Natural Resources Ecology and Management;
- Physiological and Behavioral Ecology;
- Population, Community, and Ecosystems Ecology;
- Population, Quantitative, and Evolutionary Genetics; and
- Systematics, biodiversity, and biogeography.

In addition, offerings are available in the ethics and practice of research in the biological sciences as well as in science communication (both written and oral).

Students majoring in EEB are trained for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. Graduates have a broad understanding of ecology and evolutionary biology, experience designing and conducting research, writing grant

proposals, and communicating effectively with scientific colleagues at meetings and through publications.

Information on admission procedures (<https://eeb.iastate.edu/admissions/>), academic requirements (<https://eeb.iastate.edu/academics/>), and faculty research areas (<https://eeb.iastate.edu/dir/faculty/>) is available on the EEB website (<http://www.eeb.iastate.edu/>).

Engineering Management

Engineering Management Master's Degree Online

The Engineering Management Program focuses on developing an individual's engineering, science and management skills so they can succeed in a technology driven environment. There is a growing need for engineers that can build multi-disciplinary design teams, then lead those teams to solve technical and business challenges. The Iowa State University Master of Engineering in Engineering Management Program is designed to train leaders who can meet both the technical and managerial challenges in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

Unrestricted admission requires (1) a 3.0 grade point average from an ABET accredited undergraduate engineering program, (2) two years of engineering experience or current full-time employment as an engineer, (3) calculus, engineering statistics, and engineering economy. A GRE is not required for this program.

Applicants for admission to the Engineering Management Program apply through the Graduate College at Iowa State University. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to 9 credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (<http://www.elo.iastate.edu/how-elo-works/admission-and-enrollment/>)

The Master of Engineering in Engineering Management Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Degree Requirements

Engineering Management Core:

I E 563	Engineering and Systems Management	3
I E 570	Systems Engineering and Project Management	3
MGMT 583	Strategic Management of Innovation	3
SCM 524	Strategic Process Analysis and Improvement	3

Engineering courses:

I E 564	Decision Analysis
I E 561	Total Quality Management
I E 541	Inventory Control and Production Planning
CON E 380	Engineering Law

Business courses

FIN 501	Financial Valuation and Corporate Financial Decisions
MKT 501	Marketing
MGMT 503	Professional Responsibility in Business and Society
I E 450	Technical Sales for Engineers I

Forensic Sciences

Forensic Sciences Graduate Certificate

The forensic sciences graduate certificate program complements a program of study at Iowa State University that leads to any graduate degree in an established academic major. The forensic sciences certificate is also recommended for students who wish to strengthen their interdisciplinary skills. Coursework for the certificate is at the graduate level, however qualified undergraduates may also enroll by admission to the Graduate College as a certificate student for a minimum of one semester. Completion of the certificate is noted on the student's transcript and via a certificate provided by the Registrar.

Learning Outcomes

Upon completion of the graduate certificate in forensic sciences, students will be:

- Educated in a diverse array of topics that contribute to the interdisciplinary field of forensic science.
- Well informed about the needs for research and development in forensic science.
- Able to propose a research project related to forensic science.
- Informed about forensic science as a career choice.
- Aware of the possibility of offering expertise to law enforcement agencies within the community.
- Aware that forensic sciences can be used as an educational tool in post-graduate capacity as a professor/teacher, parent, or community volunteer.

Requirements

- 12 credits of coursework and seminars at Iowa State University with a total GPA of 3.0 or higher.
- Attendance at all events hosted by the NIST Center for Excellence in Statistics and Applications in Forensic Evidence (CSAFE) at Iowa State.
- Attendance at a national or regional scientific meeting devoted to forensic science.
- Completion of the certificate within three contiguous calendar years.

Coursework

- 1 graduate credit seminar course in forensic science: **ANTHR 541**. This seminar will be offered each fall semester. In this seminar, you will report on the off-campus conference you attend, and also on your research.
- 1 graduate credit of independent study: **ANTHR 542**. You will choose a topic in forensics, ask the Director of Certificate Studies (DOCS) for approval, research it in the literature and write a paper on it. You will present this research project to the seminar group.
- At least 10 graduate credits from among the courses listed in the Certificate Electives course list. From this list, you may not choose any courses offered toward your academic major, and you must choose courses from at least two different departments entirely outside of your department or program. No credits may be transferred to ISU from other institutions.

All Certificate candidates are required to take ANTHR 541 (1 credit) and ANTHR 542 (1 credit). In addition, choose 10 credits from the following list of Certificate Electives:

AGRON 502	Chemistry, Physics, and Biology of Soils	3
AGRON 555	Environmental Soil Mineralogy	3
AN S 561	Population and Quantitative Genetics for Breeding	4
AGRON 563	Soil Formation and Landscape Relationships	3
ANTHR 503	Biological Anthropology and Archaeology	3
ANTHR 519	Skeletal Biology	3
ANTHR 524	Forensic Anthropology	3
B M S 554	General Pharmacology	3
CHEM 511	Advanced Analytical Chemistry	3
CHEM 513	Analytical Molecular and Atomic Spectroscopy	3
CHEM 516	Analytical Separations	3
CHEM 572	Spectrometric Identification of Organic Compounds	3
CHEM 577	Mass Spectrometry	3
CPR E 536	Computer and Network Forensics	3
ENT 675	Insecticide Toxicology	3

GEN 409	Molecular Genetics	3
GEN 462	Evolutionary Genetics	3
GDCB 511	Advanced Molecular Genetics	3
MATH 535	Steganography and Digital Image Forensics	3
M S E 550	Nondestructive Evaluation	4
M S E 551	Characterization Methods in Materials Science	3
M S E 552	Scanning and Auger Electron Microscopy	3
SOC 584	Current Issues in Crime and Justice	3
STAT 587	Statistical Methods for Research Workers	4
TOX 546	Clinical and Diagnostic Toxicology	1-3
V MPM 528	Principles of Epidemiology and Population Health	3
V MPM 586	Medical Bacteriology	4
V MPM 542	Introduction to Molecular Biology Techniques	1

Genetics and Genomics

Graduate Major

Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics and Genomics in fourteen cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Ecology, Evolution and Organismal Biology; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Materials Science and Engineering; Plant Pathology and Microbiology; Natural Resource Ecology and Management; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

Students are admitted by the approval of the Chair after review by the Genetics and Genomics Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. First year students participating in rotations with Genetics and Genomics faculty will take GENET 697 Graduate Research Rotation.

The diversity of faculty in the Genetics and Genomics major ensures a broad, well-balanced education from the best instructors, while offering flexibility in choice of research area. Genetics and Genomics faculty have strengths in many areas, from fundamental studies at the molecular, cellular, organismal, and population levels, to research with immediate practical application. Ongoing research projects span all the major areas of theoretical and experimental genetics, including genomics, molecular studies of gene regulation, gene mapping, genetics of disease, transposable element studies, developmental genetics, quantitative and statistical genetics, computational molecular biology, evolutionary genetics, and population genetics.

Undergraduate Preparation

Undergraduates wishing to prepare for graduate study in Genetics and Genomics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, at least one thorough course in basic transmission and molecular genetics, one semester of upper level statistics and one semester of upper level biochemistry. Incoming students who have not completed an upper level statistics course and an upper level biochemistry course prior to beginning in the program will take STAT 587 Statistical Methods for Research Workers and BBMB 404 Biochemistry I during their first year of graduate training. A waiver may be requested for these courses by providing appropriate documentation (catalog description and syllabus) to the curriculum committee showing completion of an upper level statistics and upper level biochemistry course equivalent to STAT 587 Statistical Methods for Research Workers and BBMB 404 Biochemistry I.

See information from the College of Agriculture and Life Sciences or the College of Liberal Arts and Sciences for information on a bachelor of science degree in Genetics.

All Ph.D. candidates take a core curriculum comprising one course each from the following four categories and attend seminars and workshops as described:

Transmission Genetics

GDCB 510	Transmission Genetics
----------	-----------------------

Molecular Genetics

GDCB 511	Advanced Molecular Genetics
----------	-----------------------------

Quantitative, Population, and Evolutionary Genetics

AN S 561 & AGRON 561	Population and Quantitative Genetics for Breeding and Population and Quantitative Genetics for Breeding
-------------------------	---

EEOB 562	Evolutionary Genetics
----------	-----------------------

EEOB 563	Molecular Phylogenetics
----------	-------------------------

EEOB 566	Molecular Evolution
----------	---------------------

EEOB 567	Empirical Population Genetics
----------	-------------------------------

GDCB 536	Statistical Genetics
----------	----------------------

Genomics, Bioinformatics and Statistical Genetics

AN S 556	Current Topics in Genome Analysis
----------	-----------------------------------

BCB 544	Fundamentals of Bioinformatics
---------	--------------------------------

STAT 516	Statistical Design and Analysis of Gene Expression Experiments
----------	--

STAT 581	Analysis of Gene Expression Data for the Biological Sciences
----------	--

BCB 567	Bioinformatics Algorithms
---------	---------------------------

BCB 568	Statistical Bioinformatics
---------	----------------------------

BCB 569	Structural Bioinformatics
BCB 570	Systems Biology
EEOB 561	Evolutionary and Ecological Genomics
COM S 549	Advanced Algorithms in Computational Biology
COM S 551	Computational Techniques for Genome Assembly and Analysis

Students will give three research presentations (GENET 690 Graduate Student Seminar in Genetics), attend two genetics and genomics faculty seminar series (GENET 691 Faculty Seminar in Genetics), and participate in two Workshops in Genetics and Genomics (GENET 591 Workshop in Genetics) during their graduate training. First-year graduate students will take GENET 692 Conceptual Foundations of Genetics.

Students may elect a computational molecular biology specialty within the genetics major. This requires that the research project be in the field of computational molecular biology. IG2 majors will be expected to complete all of the courses required for the genetics and genomics major, except that one semester of BCB 690 Student Seminar in Bioinformatics and Computational Biology can be substituted for GENET 690 Graduate Student Seminar in Genetics. Students will be expected to take additional courses in the area of specialization.

M.S. students will take the above core courses and seminars with the following changes: participate in one Workshop in Genetics (GENET 591 Workshop in Genetics) and present their research once (GENET 690 Graduate Student Seminar in Genetics). Additional coursework may be selected to satisfy individual interests or departmental requirements.

The course designator Genet applies to graduate courses taught by the interdepartmental major in Genetics and Genomics.

Students wishing to minor in genetics and genomics must submit a complete application to the graduate program. Requirements for the successful completion of a minor at the Ph.D. or M.S. levels are: completion of three of the four categories of the common-core required lecture courses listed above. One semester of Seminar in Genetics is recommended.

GENET 690	Graduate Student Seminar in Genetics	1
GENET 691	Faculty Seminar in Genetics	1
GENET 692	Conceptual Foundations of Genetics	1

One member of the POS committee must be a Genetics faculty member.

Student Outcomes: Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, or government. A few go directly to permanent research positions in industry. Many students awarded master's degrees continue their training as doctoral students; however, some choose

research support positions in academia, industry, or government. A more thorough list of outcomes is available at our web site.

Human Computer Interaction Interdepartmental Graduate Program

Human Computer Interaction is an interdepartmental graduate program that seeks to improve the way individuals and groups use computers through an understanding of the social and cognitive aspects of the design and use of computational devices. Students in the program learn about cognitive psychology, graphic design principles, the impacts of technology on society, evaluating system usability, and cutting edge computer programming for computational perception and language parsing.

Student research projects have explored the latest in virtual reality studies, improving natural interaction through touch screens and 3D camera gesture controls, virtual engineering using force feedback devices, and many other projects at the bleeding edge of technological innovation. Graduates of the program have gone to work at many of the largest technology firms in the US and abroad while others have gone on to positions in academia.

Degrees are offered for the Master of Science (MS) and Doctor of Philosophy (PhD) degrees with a major in Human Computer Interaction (HCI). A Graduate Certificate and an Online Master of Human Computer Interaction (M.HCI) degree are also offered; these degrees are especially targeted for the benefit of students working in business and industry wanting education in this field. The graduate program in Human Computer Interaction (HCI) welcomes applicants from a diverse collection of technical and creative fields whose unifying characteristic is the desire to develop new ways to bridge the gap between human and machine. The students must demonstrate skill in software development and proficiency in high-level, object-oriented programming. These skills can be acquired after admission to the program. Other entrance requirements will include an undergraduate degree and transcripts, test scores and other indicators that the applicant can be successful at the graduate level. All students admitted to the MS or PhD program on campus must secure a graduate assistantship.

All programs of study for the PhD must include:

1. one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena, if not completed as part of the student's Masters program
2. two more courses of their choice from a list of recommended electives
3. a minimum of nine research credits.

The MS degree calls for 30 credits of course work including appropriate credit for the Master's thesis. MS students must take one core course

of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena. In addition to these courses, MS students will be required to take a minimum of 3 research credits.

The Online M.HCI program is most appropriate for individuals with a bachelor's degree in a scientific, engineering, business, or artistic discipline, who are pursuing a professional career, and who already have a strong base of information technology skills. Requirements for the Online M.HCI Program include taking four courses, one each from the Design, Implementation, Phenomena and Evaluation categories. However, M.HCI students must take two additional courses of their choice from the list of core courses or the list of recommended electives. M.HCI students will therefore be required to take a total of six courses (18 credits) and the remaining four courses (12 credits) would be electives of your choosing.

Requirements for the HCI Graduate Certificate program include three core HCI courses plus one elective.

Information on applications procedures and specific requirements of the major can be obtained from the following Internet address: <http://www.hci.iastate.edu/Academics/index.php> (<http://www.hci.iastate.edu/Academics/>).

Immunobiology

Immunobiology Interdepartmental Graduate Program

Work is offered for the master of science and doctor of philosophy degrees with a major in Immunobiology. Faculty are drawn from twelve university departments along with researchers from the National Animal Disease Center. Participating departments include: Animal Science; Biochemistry, Biophysics, and Molecular Biology; Biomedical Sciences; Chemical & Biological Engineering; Entomology; Food Science and Human Nutrition; Kinesiology; Natural Resource Ecology & Management; Veterinary Clinical Sciences; Veterinary Diagnostic & Production Animal Medicine; Veterinary Microbiology & Preventative Medicine; and Veterinary Pathology. The diversity of faculty expertise ensures a broad education, while offering flexibility in choice of specialization. Ongoing research projects include areas such as: antibody and cell-mediated immunity, gene expression, immunochemistry, immunogenetics, immunomodulation, immunophysiology, mucosal immunity and nutritional immunology. Additional information about program faculty members is available at: www.immunobiology.iastate.edu (<http://www.immunobiology.iastate.edu/>).

Students may enter the Immunobiology program in one of two ways; prospective students may apply directly to the major, or current ISU graduate students may be admitted as a co-major or minor in Immunobiology. Ph.D. students admitted into the Interdepartmental Immunobiology major will take IMBIO 697 Graduate Research Rotation during their first two semesters. From these rotations the student will

select a major professor and join a home department. Affiliating with a major professor is done by the end of the second semester.

Before entering the Immunobiology program, prospective students should have a strong background in the biological sciences; typically including work in immunology, genetics and biochemistry. Prior research experience is highly encouraged. The submission of GRE General Test scores is required for admission.

Immunobiology students should include in their program of study a core of courses which will provide a broad coverage of the basic program in immunobiology. Formal courses should include immunology, biochemistry, and statistics. Additional coursework may be selected to satisfy individual interests or departmental requirements. The foreign language and teaching requirements are determined by the student's home department. All students will take a minimum of one seminar course per fall and spring semester.

Graduates of the Immunobiology program will have a broad understanding of the interdisciplinary field of immunobiology and will be able to effectively integrate the principles of immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, legal and environmental issues. They are skilled at carrying out research, communicating research results, and writing persuasive grant proposals.

Graduate Study in Immunobiology Curriculum Requirements for Immunobiology Doctoral Students

Ph.D. candidates majoring in Immunobiology must take at least 72 graduate credits. This 72 credits includes the below core course requirements and applicable research credits earned. Credits taken during a student's M.S. program in Immunobiology at Iowa State University will count towards their Ph.D. in Immunobiology.

Ph.D. students should take each of the following:

BBMB 405	Biochemistry II	3
IMBIO 602	Current Topics Workshop in Immunology ^{Repeated} each Fall	1
IMBIO 604	Seminar in Immunobiology ^{Repeated each Spring}	1
IMBIO 699	Research	arr t
STAT 587	Statistical Methods for Research Workers	4
V MPM 615	Molecular Immunology	3

V PTH 554	Ethics in Scientific Research and Writing	1
-----------	---	---

† Arranged with instructor.

Take one of the following two:

V MPM 520	Principles of Immunology	3
-----------	--------------------------	---

V MPM 575	Immunology	3
-----------	------------	---

Take at least two courses from the following approved electives:

BBMB 645	Molecular Signaling	2
----------	---------------------	---

GDCB 528	Advances in Molecular Cell Biology	3
----------	------------------------------------	---

V MPM 540	Livestock Immunogenetics	2
-----------	--------------------------	---

V MPM 608	Molecular Virology	3
-----------	--------------------	---

V MPM 625	Mechanisms of Bacterial Pathogenesis	3
-----------	--------------------------------------	---

V MPM 629	Advanced Topics in Cellular Immunology	2
-----------	--	---

V PTH 655	Cellular and Molecular Pathology I	3
-----------	------------------------------------	---

V PTH 656	Cellular and Molecular Pathology II	3
-----------	-------------------------------------	---

Curriculum Requirements for Immunobiology Master's Students

All M.S. students majoring in Immunobiology are required to complete a minimum of 30 graduate credits. These 30 credits includes core course requirements and applicable research credits earned. The requirements for M.S. students are the same as that for Ph.D. students with the exception of the elective credits. M.S. students are required to take at least one course from the list of electives as opposed to the two course minimum for Ph.D. students.

Curriculum Requirements for a Minor in Immunobiology at the PhD Level

Graduate students studying at Iowa State University with an interest in completing an Immunobiology minor for their Ph.D. studies are required to take a total of 12 credit hours of coursework including core courses and approved electives.

Students must be approved for the minor by the Immunobiology program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in Immunobiology are encouraged to contact the Immunobiology Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to: idgp@iastate.edu.

Immunobiology Minor Curriculum at the Ph.D. Level Includes:

One course from each of the following two categories:

Category A:

V MPM 520	Principles of Immunology	4
-----------	--------------------------	---

V MPM 575	Immunology	3
-----------	------------	---

Category B:

V MPM 615	Molecular Immunology	3
-----------	----------------------	---

V MPM 629	Advanced Topics in Cellular Immunology	2
-----------	--	---

One enrollment in the following:

IMBIO 602	Current Topics Workshop in Immunology	1
-----------	---------------------------------------	---

Information Assurance Interdepartmental Graduate Major

Iowa State University has been offering courses in information assurance since 1995 and has one of the largest programs in the country. Graduate degrees can be obtained in a traditional on campus setting or as an on-line program. For information on the Engineering-LAS Online Learning program visit www.eol.iastate.edu. (<http://www.eol.iastate.edu>)

Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia. The program objectives identified as being critical to the accomplishment of this mission are:

1. Impart and enhance knowledge about information infrastructure security
2. Expand and develop the ability to engineer complex systems
3. Instill and nurture social awareness, and the ability to function in a team
4. Instill and nurture a sense of ethics
5. Develop an understanding of strategic and policy issues

We offer 4 different graduate degree options:

1. Masters of Science with thesis
2. Masters of Science without thesis

3. Masters of Engineering (coursework only)
4. Graduate certificate

Graduate Certificate:

A graduate certificate in Information Assurance is offered, which consists of four courses (12 credits): The graduate certificate is targeted for off-campus students as a way to either supplement their education or as a way to try out online education courses. All of the certificate courses will transfer into the MS or MENGGR degree in IA.

for Certificate in Information Assurance

INFAS 530	Network Protocols and Security	3
INFAS 531	Information System Security	3
INFAS 532	Information Warfare	3
INFAS 533	Cryptography	3
or INFAS 535	Steganography and Digital Image Forensics	
or INFAS 534	Legal and Ethical Issues in Information Assurance	
or INFAS 536	Computer and Network Forensics	
or CPR E 537	Wireless Network Security	

Total Credits **12**

For additional information students should visit <http://www.iac.iastate.edu>. (<http://www.iac.iastate.edu>)

Master of Science with & without thesis:

The degree Master of Science with a major in information assurance is under a cooperative arrangement with various home departments including Electrical and Computer Engineering, Political Science, Supply Chain and Information Systems, and Mathematics.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component and is intended for students interested in a career in information assurance.

Students interested in the interdepartmental major apply and are admitted to both a home department (the department that is most closely aligned with the student's research interest and background) and to the program. The home department sets the admission standards, course requirements, and thesis standards. (**Note:** Electrical and Computer Engineering is the only home department for off-campus students pursuing the Master of Science in Information Assurance)

The program is broadly based and uses courses in the various departments. The program will consist of 24 course credits with 6 credits of research work for a Master of Science with thesis. A non-thesis Master of Science will consist of 27 credits of courses and 3 credits of creative component. The courses are divided into three categories: core,

electives, and thesis research. A student's Program of Study Committee, in consultation with the student, determines the elective courses to be taken and the acceptability of transfer credits. The major professor will be selected from the discipline where the student is admitted (home department).

The basic prerequisite for admission to this program is a baccalaureate degree in engineering, mathematics, computer science, management information systems, political science, or closely related field. The GRE or GMAT examination may be required based on the standards of the home department. If the GRE or GMAT is not required it will be considered in admissions decisions if offered. Potential students with baccalaureate degrees in the physical sciences, statistics, or other related fields will be considered on an individual basis, possibly with provisional admission.

Master of Engineering:

The Master of Engineering (MENGGR) in Information Assurance degree is only offered to off-campus students. This program is designed to assist all individuals who already have a bachelor's degree in computing or related areas to pursue an in-depth study in information assurance. The Master of Engineering program is based on coursework credits only (a thesis or creative component is not required). Courses are offered via our Engineering-LAS Online Learning streaming media online education program. (**Note:** Electrical and Computer Engineering is the only home department for the Master of Engineering in Information Assurance)

A coursework only Master of Engineering degree in Information Assurance consists of 30 credits. The courses are divided into three categories: core, electives, and capstone course. (**Note:** Students pursuing the MENGGR do not have a program of study committee and the major professor is the Information Assurance, Director of Graduate Education (DoGE)

Students interested in the MENGGR in IA degree apply and are admitted to Information Assurance (InfAs) with ECpE as the home department. The admission requirements for students entering the program without work experience are the same as the admission requirements for the ECpE department. For students with 3 or more years of work experience in a computer related position the GRE and GPA minimum may be waived.

Students with an undergraduate degree in a non computing field that have at least 3 years of work experience in an information technology field may be admitted to the program.

Interdisciplinary Graduate Studies

www.grad-college.iastate.edu/igs/ (<http://www.grad-college.iastate.edu/igs/>)

Interdepartmental Graduate Program

The degree of master of science or master of arts with major in interdisciplinary graduate studies is available to graduate students who wish to have a more diversified program of advanced study than that generally permitted students who specialize in a single subject. Areas of specialization in arts and humanities, biological sciences, international development studies, physical sciences, social sciences, community development (see below) and a general area are designed to broaden and supplement a student's program. Students must take courses in three different graduate subject matter areas, each subject contributing a minimum of nine credits toward the 35 graduate credits required for the degree. Courses which may be used for credit toward this degree program are selected from those listed in the Graduate College Catalog for graduate credit.

Both thesis and nonthesis options are available except in arts and humanities in which a thesis is required. If the thesis option is chosen, a minimum of three credits of IGS 699 Thesis Research is required and a maximum of five credits of IGS 699 Thesis Research may be counted in the total of 35 required credits. If the nonthesis option is elected, evidence of original creative effort must be presented. This may be in the form of a demonstration of independent creativity such as a written report of laboratory, field, or library research; a project in fine arts; or some other original contribution acceptable to the student's committee. In the nonthesis option a minimum of three credits of IGS 599 Creative Component is required and a maximum of five credits of IGS 599 Creative Component may be counted toward the total of 35 graduate credits. The student, in consultation with the program of study committee, will decide on the option. The committee also aids the student in planning a program of study and in selecting appropriate courses. Graduates will have experience in designing their own program centered around issues they have identified. Because of the interdisciplinary nature of IGS, students are expected to synthesize knowledge from three different areas of study.

Students who wish to apply for admission to interdisciplinary graduate studies should communicate with the chair of the program, the chair of the supervisory committee or one of its members.

Students in IGS may select a 37-credit area of specialization in Community Development. The Community Development area of specialization, offered in collaboration with five other universities in the Great Plains Interactive Distance Education Alliance, is offered exclusively through courses on the Web.

Molecular, Cellular, and Developmental Biology

MCDB Interdepartmental Graduate Program

Work is offered for the master of science and doctor of philosophy degrees with a major in Molecular, Cellular, and Developmental Biology. Faculty are drawn from sixteen university departments along with researchers from the National Animal Disease Center. Participating departments include: Agronomy; Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Chemistry; Chemical & Biological Engineering; Ecology, Evolution, & Organismal Biology; Entomology; Food Science & Human Nutrition; Genetics, Development & Cell Biology; Horticulture; Kinesiology; Physics & Astronomy; Plant Pathology; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. Facilities and qualified faculty are available in these departments for conducting fundamental research in the various aspects of molecular, cellular, and developmental biology. Ongoing research projects include molecular and cellular studies of viral, prokaryotic, fungal, plant, and animal systems. Additional information about the program and faculty is available at: www.mcdb.iastate.edu (<http://www.mcdb.iastate.edu/>).

Prospective students are admitted by the MCDB program following receipt of a complete application and after review by the MCDB Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and M.S students typically enter via a direct admit. Those students admitted through a rotation admit are required to complete a minimum of three research lab rotations with faculty of interest and take MCDB 697 Graduate Research Rotation during their first two semesters. At the end of their second semester, students on rotation must select a major professor from the faculty participating in the program. Current ISU graduate students may be admitted as a co-major or minor with MCDB.

Before entering the MCDB program, prospective students should have a strong background in the biological sciences; typically including work in biological sciences (two years), organic chemistry (one year), physics (one year), and mathematics (through one year of calculus). Prior research experience is highly encouraged.

Undergraduate Study

A special program in Molecular, Cellular, and Developmental Biology is not offered for the baccalaureate. Undergraduates wishing to prepare for graduate study in molecular, cellular, and developmental biology should elect courses in biochemistry, biology, genetics, microbiology; and mathematics through calculus; chemistry through organic; and one year of physics.

The following are recommended to undergraduates desiring an introduction to this area:

BIOL 313	Principles of Genetics	3
BIOL 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 423	Developmental Biology	3
BIOL 423L	Developmental Biology Laboratory	1

Curriculum Requirements for MCDB

Ph.D. candidates majoring in MCDB must take at least 72 graduate credits. These 72 credits include the core course requirements (below) and applicable research credits earned. Credits taken during a student's M.S. program in MCDB at Iowa State University may count towards their Ph.D. in MCDB.

Students seeking an M.S. degree must take a total of 30 credits, with not less than 22 credits earned at ISU. M.S. students must take the core curriculum but need to complete only two of the three components in molecular biology, cell biology, or developmental biology.

Additional coursework for both Ph.D. and M.S. degrees may be selected by the student in consultation with his/her Program of Study (POS) Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned at another institution may be transferred at the discretion of the POS Committee and with the approval of the MCDB Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (<http://www.grad-college.iastate.edu/common/handbook/>).

MCDB Core Curriculum requirements include:

BBMB 404	Biochemistry I	3
BBMB 405	Biochemistry II	3

Students with a Biochemistry background can elect to take the 500-level sequence:

BBMB 504	Amino Acids and Proteins	2
BBMB 505	Bioenergetics and Metabolism	2
BBMB 506	Membrane Biochemistry	2
BBMB 507	Biochemistry of Nucleic Acids	2

All Ph.D. students must take one course from each of the following areas:

A) Cellular Biology, B) Developmental Biology, & C) Molecular Biology.

A. Cellular Biology

GDCB 528	Advances in Molecular Cell Biology	3
GDCB 545	Plant Molecular, Cell and Developmental Biology *See footnote	3
B M S 575	Cell Biology	3
BBMB 645	Molecular Signaling	2

B. Developmental Biology

GDCB 533	Advances in Developmental Biology	3
GDCB 545	Plant Molecular, Cell and Developmental Biology *See footnote	3

C. Molecular Biology

MICRO 502	Microbial Genetics and Genomics	3
GDCB 511	Advanced Molecular Genetics	3
GDCB 545	Plant Molecular, Cell and Developmental Biology *See footnote	3
V MPM 608	Molecular Virology	3
BBMB 676	Biochemistry of Gene Expression in Eucaryotes	2

***Footnote: GDCB 545 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.**

In addition to the above course requirements, MCDB graduate students are required to take:

1. Two semesters of research seminar every year.

One of these seminars must be MCDB 698, Seminar in Molecular, Cellular, and Developmental Biology. In seminar, students will make journal and research presentations and attend MCDB seminars. Subject to approval by the POS committee, acceptable alternatives to fulfill the second seminar requirement include 1) a "for credit" research seminar series offered by the student's home department, 2) a workshop comprised of a research seminar series, or 3) another ISU research seminar series.

2. One credit hour of ethics training. Possible ethics courses include:

GR ST 565	Responsible Conduct of Research in Science and Engineering	1
V PTH 554	Ethics in Scientific Research and Writing	1

Not required, but highly recommended for MCDB graduate students:

BCB 544	Fundamentals of Bioinformatics	4
---------	--------------------------------	---

Non-native English speakers must pass the English Requirement as established by the university. Depending on the results of this

exam additional courses may be required to meet English proficiency standards.

MCDB graduate students need to teach one semester as part of their training for an advanced degree. Students whose first language is not English must take and pass the Oral English Certification Test (OECT) to be eligible to teach.

Curriculum Requirements for Graduate Students Seeking a MCDB Minor

Graduate students studying at Iowa State University with an interest in completing a MCDB minor for their Ph.D. are required to complete the following curriculum requirements.

Students must be approved for the minor by the MCDB program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in MCDB are encouraged to contact the MCDB Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to idgp@iastate.edu.

MCDB Minor Curriculum at the Ph.D. Level Includes:

BBMB 404	Biochemistry I	3
BBMB 405	Biochemistry II	3
Students with a Biochemistry background can elect to take the 500-level sequence:		
BBMB 504	Amino Acids and Proteins	2
BBMB 505	Bioenergetics and Metabolism	2
BBMB 506	Membrane Biochemistry	2
BBMB 507	Biochemistry of Nucleic Acids	2

One course in each of two of the following three areas: A) Cellular Biology, B) Developmental Biology, & C) Molecular Biology.

A. Cellular Biology

GDCB 528	Advances in Molecular Cell Biology	3
GDCB 545	Plant Molecular, Cell and Developmental Biology *See footnote	3
B M S 575	Cell Biology	3
BBMB 645	Molecular Signaling	2

B. Developmental Biology

GDCB 533	Advances in Developmental Biology	3
GDCB 545	Plant Molecular, Cell and Developmental Biology *See footnote	3

C. Molecular Biology

MICRO 502	Microbial Genetics and Genomics	3
GDCB 511	Advanced Molecular Genetics	3
GDCB 545	Plant Molecular, Cell and Developmental Biology *See footnote	3
V MPM 608	Molecular Virology	3
BBMB 676	Biochemistry of Gene Expression in Eucaryotes	2

***Footnote: GDCB 545 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.**

In addition to the above course requirements, MCDB graduate minors are required to register once for:

MCDB 698	Seminar in Molecular, Cellular, and Developmental Biology	1-2
----------	---	-----

Neuroscience

Neuroscience Interdepartmental Graduate Program

Work is offered for the master of science and doctor of philosophy degrees with a major in neuroscience. Cooperating departments include Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Ecology, Evolution and Organismal Biology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Kinesiology; Psychology; Veterinary Clinical Sciences; and Veterinary Diagnostic and Production Animal Medicine.

The diversity of faculty in the Interdepartmental Neuroscience major provides students with a variety of research opportunities and reflects the structure of contemporary neuroscience which has become a diverse and inter-disciplinary field. Facilities and faculty are committed to research in the following areas: neuronal membrane functions, signal transduction, neuroanatomy, neurodegenerative diseases, neuroendocrinology, neurotoxicology, neuropathology, developmental neurobiology, neurogenetics, computational neuroscience, neural networks, behavioral neuroscience, tissue engineering, neuroregeneration and brain repair. Additional information about program faculty members is available at: www.neuroscience.iastate.edu (<http://www.neuroscience.iastate.edu/>).

An undergraduate or advanced degree in one of the basic or applied sciences is ordinarily a prerequisite for admission to the program. Typical program disciplines include majors in biochemistry, biology, biomedical sciences, human medicine, immunology, neurobiology, physiology, pharmacology, psychology, veterinary medicine, or zoology. Appropriate undergraduate coursework includes mathematics, chemistry, physics, and biological sciences. Prior research experience is highly encouraged. The submission of GRE General Test scores is required for admission.

Prospective students are admitted by the Neuroscience program following an internal application process and after review by the

Neuroscience Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and M.S. students typically enter via a direct admit. Those students entering through a rotation admit are required to complete a minimum of three research lab rotations with faculty of interest. At the end of their second semester students on rotation must select a major professor from the faculty participating in the program.

Curriculum Requirements for Neuroscience Graduate Students

Ph.D. candidates majoring in Neuroscience must take at least 72 graduate credits. These 72 credits includes the below core course requirements and applicable research credits earned. Credits taken during a student's M.S. program in Neuroscience at Iowa State University will count towards their Ph.D. in Neuroscience.

Students seeking an M.S. degree must take a total of 30 credits, with not less than 22 credits earned at ISU. M.S. students have the same core requirements as Ph.D. students.

Additional coursework for both Ph.D. and M.S. degrees is selected by the student in consultation with his/her POS Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned at another institution may be transferred at the discretion of the POS Committee and with the approval of the Neuroscience Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (<http://www.grad-college.iastate.edu/common/handbook/>).

All students majoring in Neuroscience are required to complete a core curriculum consisting of:

NEURO 556	Cellular, Molecular and Developmental Neuroscience	3
NEURO 557	Advanced Neuroscience Techniques	3
NEURO 661	Current Topics in Neuroscience <small>Repeatable</small>	2-3
NEURO 690	Journal Club in Neuroscience <small>Taken every fall & spring</small>	1
NEURO 696	Neuroscience Seminar <small>Taken every fall & spring</small>	1
NEURO 699	Research	arr †
BBMB 404	Biochemistry I	3
B M S 537	Neuroanatomy	3
STAT 587	Statistical Methods for Research Workers	4

MANDATORY ETHICS TRAINING: All Neuroscience students are also required to complete 1 credit hour of ethics training.

† Arranged with instructor.

In addition to the above coursework, all Neuroscience majors are expected to take a **minimum of six credits of approved elective neuroscience courses**. Pre-approved courses include:

A ECL 551	Behavioral Ecology	3
AN S 670	Molecular Biology of Muscle	3
BIOL 354	Animal Behavior	3
BIOL 436	Neurobiology	3
B M S 354	General Pharmacology	3
KIN 572	Neural Basis of Human Movement	3
PSYCH 410	Behavioral Neurology	3
PSYCH 519	Cognitive Neuropsychology	3
PSYCH 598C	Seminar in Cognitive Psychology: Cognitive Neuroscience	arr †

† Arranged with instructor.

Curriculum Requirements for Graduate Students Seeking a Neuroscience Minor

Graduate students interested in completing a Neuroscience minor are required to select 12 credits, with a minimum of 9 credits being from the list of approved courses (see below) and up to 3 credits of thesis/dissertation research (NEURO 699).

Students must be approved for the minor by the Neuroscience Program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in Neuroscience are encouraged to contact the Neuroscience Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to idgp@iastate.edu.

Approved Neuroscience Minor Courses

NEURO 556	Cellular, Molecular and Developmental Neuroscience	3
NEURO 557	Advanced Neuroscience Techniques	3
NEURO 661	Current Topics in Neuroscience	2-3
B M S 537	Neuroanatomy	3
COM S 474	Introduction to Machine Learning	3
KIN 572	Neural Basis of Human Movement	3
PSYCH 410	Behavioral Neurology	3
PSYCH 519	Cognitive Neuropsychology	3

NEURO 699 Research (Up to 3 credits)

Nutritional Sciences Graduate Study

The Interdepartmental Graduate Program in Nutritional Sciences (IGPNS), administered through the Graduate College, under the auspices of the Chairs of Food Science and Human Nutrition (FS HN) and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. M.S. and Ph.D. degrees in Nutritional Sciences will be offered with three specializations: Animal Nutrition, Human Nutrition, or Biochemical & Molecular Nutrition.

The following undergraduate course work is recommended of all applicants who are applying to the IGPNS, but may be modified depending upon the student's area of emphasis. Recommended course work includes organic chemistry with laboratory, physics, analytical chemistry, a nutrition course that requires biochemistry or organic chemistry as a prerequisite, and a course in biology/physiology or anatomy. Under certain circumstances students can be admitted or provisionally admitted with course work deficiencies. Students with an undergraduate degree will be generally admitted into the M.S. program and upon completion, they can then apply for admission into the Ph.D. program. However, exceptional students with experience can apply directly to the Ph.D. program.

The general requirements of the Nutritional Sciences degree at the MS level, in addition to those of Graduate College, are:

NUTRS 501	Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients	4
BBMB 404	Biochemistry I	3
BBMB 405	Biochemistry II	3
or BBMB 420	Mammalian Biochemistry	
STAT 587	Statistical Methods for Research Workers	4
FS HN 580	Orientation to Food Science and Nutrition Research	1
or AN S 501	Survey of Animal Disciplines	
AN S 603	Seminar in Animal Nutrition	1
or FS HN 682	Seminar Reflection	
FS HN 581	Seminar (or AN S equivalent)	1
FS HN 681	Seminar (or AN S equivalent)	1
FS HN 590C	Special Topics: Teaching	1-3

Students are expected to complete the course work established by the Program of Study (POS) committee based on specialization with a minimum of 30 graduate-level semester credits, not less than 22 of which must be earned at Iowa State University.

The general requirements of the Nutritional Sciences degree at the PhD level, in addition to those of the Graduate College, are:

- Completion of all requirements of the MS degree in Nutritional Sciences
- 3 additional credits of graduate-level biochemistry (6 credits total including those for the M.S.), graduate-level statistics (STAT 471 Introduction to Experimental Design), and physiology (if not taken for the M.S.)
- Additional graduate-level courses in the field of study as deemed appropriate by the POS Committee and specialization, and additional teaching assistant requirements (FS HN 590C Special Topics: Teaching).

Satisfactory completion of a preliminary examination, a written dissertation, seminar presentation of dissertation research, and defense of the dissertation is also required. Overall a minimum of 72 graduate-level semester credits, no less than 36 of which must be earned at Iowa State University

Plant Biology

(Interdepartmental Graduate Major)

The Interdepartmental Plant Biology major (IPB) coordinates graduate education and research in the areas of plant biology including but not limited to plant biochemistry, plant cellular and molecular biology and plant physiology. Graduate study in IPB, leading to the M.S. and Ph.D. Degrees, is offered through eight participating departments: Agronomy, Biochemistry, Biophysics & Molecular Biology, Chemical and Biological Engineering, Chemistry, Ecology, Evolution and Organismal Biology, Genetics Development & Cell Biology, Horticulture, and Plant Pathology.

Research conducted by the faculty and students of the major represents both basic and applied aspects of plant physiology, biochemistry and molecular biology. The experimental approaches represented in the major span the range of complexity from molecular studies, to cellular, organismal and the ecological level (crop monocultures and natural populations). Graduates have a broad understanding of basic, functional plant biology with emphases on fundamental biology, biochemistry, and molecular biology. They are able to address complex research and policy problems in agriculture, biotechnology, and basic plant biology.

All M.S. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PLBIO 699 Research), annual Loomis Distinguished Lecture in Plant Biology and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

A total of 36 credits including a minimum of 16 course credits are required for a M.S.

(1) Complete the following core courses:

STAT 587	Statistical Methods for Research Workers	4
BBMB 316	Principles of Biochemistry	3
or BBMB 404	Biochemistry I	
or		
BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	
GDCB 513	Plant Metabolism	2
Two seminar presentations *		
GDCB 545	Plant Molecular, Cell and Developmental Biology	3
Take additional courses from the following		
AGRON 516	Crop Physiology	
GR ST 529	Preparing Publishable Thesis Chapters	
AGRON 625	Genetic Strategies in Plant Breeding	
BBMB 405	Biochemistry II	
BBMB 645	Molecular Signaling	
BBMB 675	Nucleic Acid Structure and Function	
BBMB 676	Biochemistry of Gene Expression in Eucaryotes	
BIOL 454	Plant Anatomy	
BIOL 474	Plant Ecology	
EEOB 563	Molecular Phylogenetics	
EEOB 566	Molecular Evolution	
GDCB 510	Transmission Genetics	
EEOB 553	Agrostology	
GDCB 511	Advanced Molecular Genetics	
GDCB 528	Advances in Molecular Cell Biology	
GDCB 545	Plant Molecular, Cell and Developmental Biology	

* enroll each term in the Interdepartmental Plant Biology seminar PLBIO 696 Research Seminar or its listed equivalent. The first seminar must be during the student's first year and is a 20-minute seminar. The last presentation must be an exit seminar.

All Ph.D. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PLBIO 699 Research), annual Loomis

Distinguished Lecture in Plant Biology and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

A total of 72 credits including a minimum of 24 course credits are required for a Ph.D.

STAT 587	Statistical Methods for Research Workers	4
BBMB 404	Biochemistry I	3
or		4
BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	
GDCB 513	Plant Metabolism	2
Four seminar presentations *		
One of the following		
BBMB 405	Biochemistry II	
GDCB 511	Advanced Molecular Genetics	
GDCB 545	Plant Molecular, Cell and Developmental Biology	
Take additional courses from the following		
AGRON 516	Crop Physiology	
GR ST 529	Preparing Publishable Thesis Chapters	
PLBIO 513	Plant Metabolism	2
PLBIO 545	Plant Molecular, Cell and Developmental Biology	3
PLBIO 696	Research Seminar	1
PLBIO 699	Research	arr
		†

- * enroll each term in the Interdepartmental Plant Biology seminar PLBIO 696 Research Seminar or its listed equivalent. The first seminar must be during the student's first year and is a 20-minute seminar. The last presentation must be an exit seminar.

Requirements for students seeking Plant Biology as Minor:

STAT 587	Statistical Methods for Research Workers	4
BBMB 404	Biochemistry I	3
or		4
BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	
9 credits from the following		
AGRON 516	Crop Physiology	
GDCB 513	Plant Metabolism	
GDCB 545	Plant Molecular, Cell and Developmental Biology	

In addition to the required core courses, a wide selection of courses is available to IPB graduate students for broadening their scientific education. Decisions about which courses are taken and when they are taken are made by the student, initially in consultation with his or her temporary advisor, and then with his or her major advisor and eventually with the POS Committee, which also serves as the Thesis or Dissertation Committee.

Seed Technology and Business

(Interdepartmental Graduate Major)

The Graduate Program in Seed Technology and Business (STB) offers students advanced study in the seed science and technology and business management appropriate for application in the seed sector. The STB program is focused on preparing students for seed-related management roles by training the next generation of seed leaders. The program is offered by departments in the Ivy Colleges of Business and Agriculture and Life Sciences: Accounting, Agronomy, Finance, Horticulture, Agricultural Biosystems Engineering, Management Information Systems, Management, Marketing and Plant Pathology. This multidisciplinary program offers a focused online curriculum for a Master of Science in Seed Technology and Business, along with Graduate Certificates in Seed Science and Technology and in Seed Business Management.

Online Graduate Program in Seed Technology & Business

The curriculum offers a set of scientific and technical courses that are focused on seed, with a set of basic management courses, similar to those in the core courses of an MBA program. The business courses will

use examples drawn from the seed industry. A creative component is required for the Master of Science degree.

Prerequisite for the program is a bachelor's degree in business, agriculture, other biological discipline, or related degrees. Graduate training in these disciplines will also be considered.

Graduates of the Graduate Program in Seed Technology and Business will be prepared for roles in management and leadership within private and public seed and seed-related organizations.

All of the courses listed below are required for the Master of Science degree. The pace of the course sequence is designed to allow the students with work and other commitments to participate. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student's work.

Graduates of the Master of Science curriculum will be prepared for roles in management and leadership within seed related organizations, private and public.

Master of Science in Seed Technology and Business

STB 501	Strategic Management	2
STB 503	Information Systems	2
STB 504	Marketing and Logistics	3
STB 507	Organizational Behavior	2
STB 508	Accounting and Finance	3
STB 509	International Seed Business Practices, Policies, & Regulation	3
STB 510	Crop Improvement	3
STB 534	Seed and Variety, Testing and Technology	2
STB 535	Introduction to the Seed Industry	1
STB 539	Seed Conditioning and Storage	2
STB 536	Quantitative Methods for Seed	2
STB 543	Seed Physiology	2
STB 547	Seed Production	2
STB 592	Seed Health Management	2
STB 595	Seed Quality, Production, and Research Management	3
STB 599	Creative Component	2-3

The program also offers two graduate certificates:

Graduate certificate in Seed Science and Technology

STB 535	Introduction to the Seed Industry	1
STB/AGRON 536	Quantitative Methods for Seed	2
STB/AGRON 510	Crop Improvement	3

STB/HORT 543	Seed Physiology	2
STB/PL P 592	Seed Health Management	2
STB/AGRON 547	Seed Production	2
STB/AGRON 534	Seed and Variety, Testing and Technology	2
STB/AGRON 539	Seed Conditioning and Storage	2
STB/AGRON 595	Seed Quality, Production, and Research Management	3

Graduate certificate in Seed Business Management

STB 535	Introduction to the Seed Industry	1
STB/BUSAD 501	Strategic Management	2
STB/BUSAD 503	Information Systems	2
STB/BUSAD 504	Marketing and Logistics	3
STB/BUSAD 507	Organizational Behavior	2
STB/BUSAD 508	Accounting and Finance	3
STB/BUSAD 509	International Seed Business Practices, Policies, & Regulation	3

Graduate certificate courses may be applied to the Master of Science in Seed Technology and Business. Those interested in these graduate certificates should contact the Program for details.

Information on application procedures and specific requirements of the major can be obtained at our website: <http://www.seedgrad.iastate.edu> or by writing to seedgrad@iastate.edu (//seedgrad@iastate.edu).

Toxicology

toxmajor@iastate.edu (//toxmajor@iastate.edu)

Interdepartmental Graduate Major

Toxicology is the science of studying the adverse effects of substances on living organisms. Students observe, gather data and predict risks and outcomes in populations. Whole organism research and cellular and molecular approaches are used to determine toxicant exposure and mechanisms. Work is offered for the degrees doctor of philosophy and master of science. Students majoring in toxicology will be affiliated with one of the following cooperating departments: Agricultural and Biosystems Engineering; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemistry; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Geological and Atmospheric Sciences; Natural Resource Ecology and Management; Physics; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The prerequisites for entrance into the graduate toxicology major include an undergraduate degree in a relevant area of study; for example, chemical engineering, biology, biochemistry, chemistry, ecology,

entomology, food science and technology, microbiology, nutritional science, zoology, or veterinary medicine. Minimum undergraduate coursework should include the following or their equivalent:

- 1 year of college mathematics, including calculus
- 1 year of inorganic chemistry with quantitative analysis
- 1 course in physics
- 1 year of organic chemistry
- 2 years of biological sciences including 1 course in physiology

Other courses that are considered desirable in undergraduate preparation include: biochemistry, physical chemistry, qualitative analysis, and some specialized courses such as histology or advanced physiology.

Facilities and faculty are available for fundamental research in such areas as agricultural toxicology, drug discovery and prevention, ecotoxicology, environmental fate and effects of chemicals, insect toxicology, aquatic toxicology, food safety, nutritional toxicology, mycotoxins, neurotoxicology, cellular and molecular toxicology, reproductive toxicology, and veterinary toxicology.

Ph.D. and M.S. Students should register for TOX 689 (R) every fall and spring semester during their training.

Students majoring in toxicology will be affiliated with a cooperating department. All Ph.D. students take a core curriculum consisting of:

TOX 501	Principles of Toxicology	3
TOX 502	Toxicology Methods	3
TOX 504	Toxicology Seminar (taken twice)	1
7 additional credits in approved toxicology courses		7
BBMB 405	Biochemistry II (2 additional credits of biochemistry courses)	
BBMB 404	Biochemistry I	
2 additional credits of upper level BBMB coursework. 3 credits in physiology, histology, pathology, neuroscience, immunobiology or cellular and molecular biology.		2 and 3
STAT 571	Introduction to Experimental Design	3
STAT 587	Statistical Methods for Research Workers	4
GR ST 565	Responsible Conduct of Research in Science and Engineering (or)	1
V PTH 554	Ethics in Scientific Research and Writing	1

M.S. students take a core of:

TOX 501	Principles of Toxicology	3
TOX 502	Toxicology Methods	3
TOX 504	Toxicology Seminar	1
3 additional credits in approved toxicology courses		3

BBMB 404	Biochemistry I	3
BBMB 405	Biochemistry II	3
STAT 587	Statistical Methods for Research Workers	4
Additional coursework is selected to meet departmental requirements and to satisfy individual student research interests		
GR ST 565	Responsible Conduct of Research in Science and Engineering (or)	1
V PTH 554	Ethics in Scientific Research and Writing	1

A graduate minor in toxicology is available for students enrolled in other majors.

A minor for an M.S. degree includes one semester of TOX 689X and:

TOX 504	Toxicology Seminar	1
TOX 501	Principles of Toxicology	3
3 credits in other approved toxicology courses		3

A minor at the Ph.D. level includes one semester of TOX 689X and:

TOX 504	Toxicology Seminar	1
TOX 501	Principles of Toxicology	3
6 credits in other approved toxicology course work		6

One member of the student's program of study committee will be a member of the toxicology faculty.

Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, the military, veterinary research, or government environmental and public health institutions. A few go directly to permanent research positions in industry. Many students awarded master's degrees continue their training as doctoral students; however, some choose research support positions (i.e., technician, chemist, research associate) in academia, industry, or government. A more thorough list of outcomes is available at our Web site.

Graduates of the Toxicology major will be able to carefully design, execute and analyze experiments that extend the knowledge of toxicology and closely related sciences. They will be able to clearly communicate research findings, and thoroughly evaluate the literature of toxicology, contributing significantly to the advancement of the field.

Transportation

(Interdepartmental Graduate Major)

Work is offered for the degree master of science with a major in transportation under a cooperative arrangement with various departments including Civil, Construction and Environmental

Engineering (CCEE), Community and Regional Planning (CRP), and Logistics, Operations and Management Information Systems (LOMIS). Opportunities are afforded for research in such areas as modeling and performance of transportation systems, highway safety and information systems, remote sensing, environmental analysis, techniques for urban and regional transportation system planning, environmental and social policy analysis of transportation systems, transportation policy analysis, analysis of transportation technologies, commodity distribution, public administration of the transportation planning process, regional development and transportation system interrelationships, transportation economics and finance, and planning for logistics management.

Students majoring in transportation will develop a program of study under the guidance of a program of study committee selected by the student in consultation with and approved by the chair of the faculty supervisory committee. For administrative purposes, the student's home department will be the department originally admitting the student. A major professor may be selected from any of the three participating departments. A student must designate at least one member of the POS committee from his or her home department, and at least one member from outside the home department.

A student must complete at least 34 credits of acceptable work including preparation of a 6 credit thesis or a 2-3 credit creative component. A structured minor requires 12 credits of approved transportation courses and a thesis or creative component on a transportation related topic.

A required core includes:

C E 551	Urban Transportation Planning Models	3
TRANS 691	Seminar in Transportation Planning	1
STAT 587	Statistical Methods for Research Workers	4
One course from all three cooperating departments (CRP, CCEE, and LOMIS)		

Detailed requirements are available from the chair of the supervisory committee.

Graduate students pursuing a major in any of the cooperating departments who have an interest in transportation are encouraged to consider a formal declared minor in transportation. Students considering a declared minor should consult with the chair of the supervisory committee about the requirements for it.

Students typically focus their program of study to support a career in one of five areas: transportation consulting, regional and statewide transportation planning, transportation service operations and management, transportation policy and economic analysis, and transportation planning and operation for local and state governments. Graduates will have specific knowledge in one or more of these focus areas and the skills to conduct research and analysis of transportation

issues. These skills allow graduates to be productive immediately in positions related to a focus area or to continue in more advanced transportation graduate work.

Wind Energy Science, Engineering and Policy

Graduate Study

Wind Energy Science, Engineering and Policy (WESEP) is an interdisciplinary Ph.D. program that prepares graduates for wind energy related careers in industry, academia, and government institutions.

WESEP is a unique integration of engineering, science, and policy-related disciplines that provides students with an opportunity for breadth and depth in their program of study.

Students take a set of 11 courses and participate each semester in a one-credit seminar course. Of the 11 courses, two courses are introductory wind energy courses, eight are core courses, and one is an advanced specialization course in wind energy. The seminar course will address research methods and communications in science and engineering.

Students are also required to pass a qualifying examination in the first 18 months of their program, a preliminary examination generally taken by the end of year three, and a final oral defense with written dissertation to complete the program.

Of the eight core courses, students select five courses from a primary thrust area, providing disciplinary depth, and three courses from a secondary thrust area, providing interdisciplinary breadth. Students can take additional courses within the other thrust areas as needed for their research, but this requirement ensures students are research-capable in two thrust areas.

WESEP Thrust areas

- Wind resource characterization and aerodynamics of wind farms
- Wind energy conversion system and grid operations
- Manufacturing, construction, and supply chain
- Turbine reliability & health monitoring
- Economics, policy and public perception

Admission Requirements

Applicants should have an undergraduate GPA of at least 3.0 (B average) and a B.S. degree from a calculus-based undergraduate curriculum. A calculus-based undergraduate curriculum is one in which students take the equivalent of two years of calculus, covering differential and integral calculus, multivariable and vector calculus, and differential equations, and one year of physics, covering mechanics, thermodynamics, electric circuits, electromagnetics, and optics. The GRE is not required. Applicants who do not meet these general standards will be evaluated on an individual basis.

A-Z COURSES

Accounting (ACCT)

Any experimental courses offered by ACCT can be found at:

registrar.iastate.edu/faculty-staff/courses/explistsings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Courses primarily for undergraduates:

ACCT 215: Legal Environment of Business

(3-0) Cr. 3. F.S.SS.

Prereq: Sophomore classification

General history, structure, and principles of the US legal system. The legal system, as an agency of social control and tool for resolving disputes.

The court systems, Constitution, torts, crimes, intellectual property, contracts, property rights, employment law, basic business entity law, bankruptcy, administrative agencies, environmental law and agency law.

ACCT 284: Financial Accounting

(3-0) Cr. 3. F.S.SS.

Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

ACCT 285: Managerial Accounting

(3-0) Cr. 3. F.S.SS.

Prereq: ACCT 284

Understanding of fixed and variable costs and their role in planning, control and performance evaluation. Examination of alternative costing methods. Making decisions by identifying and developing relevant information. Development of spreadsheet skills.

ACCT 301: The Accounting Cycle

(1-0) Cr. 1. F.S.SS.

Prereq: ACCT 284

Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process.

ACCT 315: Business Data Streams and Issues

(Cross-listed with MIS). Cr. 3. Alt. F., offered even-numbered years. Alt. S., offered odd-numbered years.SS.

Prereq: COM S 113, MIS 301, ACCT 284

Identification of open data sources and other private data sources. Develop methods of data access, collection, and sharing; develop methods to validate and standardize data sources; develop methods to assess data worthiness (risk).

ACCT 316: Business Law

(3-0) Cr. 3. F.S.

Prereq: ACCT 215

Continuation of 215. The Uniform Commercial Code as applied to sales contracts and negotiable instruments. Property law, wills and estates, insurance, secured transactions, corporation law, partnership law and antitrust law.

ACCT 383: Intermediate Managerial Accounting

(3-0) Cr. 3. F.S.

Prereq: ACCT 285 or ACCT 501; and ACCT 301

Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities.

ACCT 384: Accounting Information Systems and Analytics

(3-0) Cr. 3.

Prereq: ACCT 285 or ACCT 501; ACCT 301 and MIS 301

Concepts and procedures underlying creating, sharing, reporting, storing, and analyzing accounting data. Information technology internal controls and audit techniques. Trends in accounting information systems.

ACCT 386: Intermediate Accounting I

(3-0) Cr. 3. F.S.

Prereq: ACCT 284 and ACCT 301

The conceptual framework of financial accounting. Communication of financial information on the income and retained earnings statements, statement of cash flows, and the balance sheet. Accounting concepts relating to current and operational assets of the firm.

ACCT 387: Intermediate Accounting II

(3-0) Cr. 3. F.S.

Prereq: Minimum of C- in ACCT 386

Financial accounting and reporting practices for business entities. Generally accepted accounting principles (GAAP) relative to firm liabilities, equity, income, taxes, employee benefits, leases, accounting changes and cash flows. Discussion of current issues in financial accounting.

ACCT 483: Application and Communication in Managerial Accounting

(Dual-listed with ACCT 583). Cr. 3.

Prereq: ACCT 383 or ACCT 581

Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, data visualization, and oral presentation skills.

ACCT 484: Advanced Accounting Information Systems

(Dual-listed with ACCT 584). (3-0) Cr. 3.

Prereq: ACCT 384

Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 485: Principles of Federal Income Tax

(3-0) Cr. 3. F.S.

Prereq: Minimum of C- in ACCT 386 or ACCT 501

Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis / cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning.

ACCT 487: Volunteer Income Tax Assistance

(Dual-listed with ACCT 587). (0-2) Cr. 1. Repeatable, maximum of 3 credits. S.

Prereq: ACCT 285 or ACCT 501

Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 488: Governmental and Non-profit Institution Accounting

(Dual-listed with ACCT 588). (3-0) Cr. 3.

Prereq: ACCT 386

Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 489: Corporate Social Responsibility Reporting

(Dual-listed with ACCT 589). (3-0) Cr. 3. S.

Prereq: ACCT 386 or ACCT 501

Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions.

ACCT 490: Independent Study

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: ACCT 285, senior classification, permission of instructor***ACCT 495: Advanced Accounting Problems**

(Dual-listed with ACCT 595). (3-0) Cr. 3.

Prereq: ACCT 387

Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 496: Accounting in the Global Economy

(Dual-listed with ACCT 596). (3-0) Cr. 3.

Prereq: ACCT 386 or ACCT 501

Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 497: Introduction to Auditing

(3-0) Cr. 3. F.S.

Prereq: ACCT 384, ACCT 387 and STAT 326

The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing.

ACCT 498: Capstone in Accounting

(2-0) Cr. 2. F.

Prereq: ACCT 383, ACCT 384, ACCT 387, credit or enrollment in ACCT 485.

Integrative studies in accounting. Development of critical thinking, ethical reasoning, professional research and teamwork skills. Written, visual, and oral communication with corporate stakeholders.

Courses primarily for graduate students, open to qualified undergraduates:

ACCT 501: Financial Accounting

(3-0) Cr. 3.

Prereq: Enrollment in MBA program or departmental permission

A general introduction to financial accounting information. Topics covered include the use and analysis of financial information, the regulatory environment, the role of International Financial Reporting Standards (IFRS), and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

ACCT 515: Accounting Analytics

Cr. 3. F.

Prereq: ACCT 384 or instructor permission

Applications and skills for performing data analytics in accounting contexts. Explores conceptual framework for providing data-driven insights and recommendations. Includes hands-on experiences working with different types of data and the latest analysis tools.

ACCT 571: Real Estate Law

(3-0) Cr. 3.

Prereq: Enrollment in the MRED or instructor permission.

Fundamentals of real estate finance and development from a legal perspective and in a transactional setting. Topics include land acquisition and finance, choice of entity, tax aspects, management, disposition of real property, and recent legal developments. Legal responsibilities of owners, designers, and contractors are also examined by highlighting typical contractual relationships in place throughout the design and construction process.

ACCT 581: Accounting for Decision Making

(3-0) Cr. 3.

Prereq: ACCT 501 or equivalent

Decision analysis applied to managerial accounting issues. Generation of information for management decision making and control. Responsibility accounting and non-recurring decisions.

ACCT 582: Corporate Governance and Top Management

(Cross-listed with MGMT). (3-0) Cr. 3.

Prereq: MGMT 503 or permission

Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

ACCT 583: Application and Communication in Managerial Accounting

(Dual-listed with ACCT 483). Cr. 3.

Prereq: ACCT 383 or ACCT 581

Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, data visualization, and oral presentation skills.

ACCT 584: Advanced Accounting Information Systems

(Dual-listed with ACCT 484). (3-0) Cr. 3.

Prereq: ACCT 384

Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 585: Taxes and Business Strategy

(3-0) Cr. 3.

Prereq: ACCT 485

Integration of concepts from accounting, finance, and economics to determine how taxes affect business decisions. Provides students with a conceptual framework for thinking about business tax planning and applies it to various common business decisions.

ACCT 586: Advanced Federal Taxation

(3-0) Cr. 3.

Prereq: ACCT 485

Advanced coverage of federal taxation including issues related to the taxation of corporations, partnerships, estates and trusts, and their owners. Includes coverage of rules, concepts, background, and planning opportunities related to a number of common transactions involving these entities.

ACCT 587: Volunteer Income Tax Assistance

(Dual-listed with ACCT 487). (0-2) Cr. 1. Repeatable, maximum of 3 credits. S.

Prereq: ACCT 285 or ACCT 501

Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 588: Governmental and Non-profit Institution Accounting

(Dual-listed with ACCT 488). (3-0) Cr. 3.

Prereq: ACCT 386

Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 589: Corporate Social Responsibility Reporting

(Dual-listed with ACCT 489). (3-0) Cr. 3. S.

Prereq: ACCT 386 or ACCT 501

Theory and practice of social and environmental reporting, the role of the corporation in society, and the mechanisms by which society might hold corporations accountable for their actions.

ACCT 590: Special Topics

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

For students wishing to do individual research in a particular area of accounting.

ACCT 591: Fraud Examination and Prevention

(3-0) Cr. 3.

Prereq: ACCT 497 or ACCT 501

Principles and methodology of fraud detection and deterrence. Addresses the causes and elements of fraud, asset theft, corruption, financial statement mis-representation, internal controls for fraud prevention, investigative evidence gathering, and legal aspects of fraud.

ACCT 592: Financial Statement Analysis

(3-0) Cr. 3.

Prereq: ACCT 386 or ACCT 501

Presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics include the financial reporting system, the primary financial statements, effects of accounting method choice on reported financial data, and firm valuation.

ACCT 594: Business Valuation

(3-0) Cr. 3.

Prereq: ACCT 387 or ACCT 592

Using financial statement analysis to value the firm. Topics covered include assessing how well a firm's financial statements reflect the economic effects of its resource management strategies and constructing proforma financial information that will serve as inputs to valuation models.

ACCT 595: Advanced Accounting Problems

(Dual-listed with ACCT 495). (3-0) Cr. 3.

Prereq: ACCT 387

Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 596: Accounting in the Global Economy

(Dual-listed with ACCT 496). (3-0) Cr. 3.

Prereq: ACCT 386 or ACCT 501

Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 597: Advanced Auditing and Assurance Services

(3-0) Cr. 3.

Prereq: ACCT 497

A study of advanced auditing and assurance issues. Topics include auditor independence, audit risk analysis, internal control evaluation and reporting, fraud detection, data analytic applications in auditing, audit reporting, auditors' legal liability, and non-financial information assurance.

ACCT 598: Financial Accounting: Theory and Contemporary Issues

(3-0) Cr. 3. F.

Prereq: ACCT 386 or ACCT 501

Theoretical discussion of the financial accounting and reporting environment. The usefulness of financial accounting information for decision making. Current financial accounting issues, the financial accounting standard setting process, FASB Standards Codification, and the role of the SEC in financial reporting.

ACCT 599: Creative Component

Cr. 2.

Prereq: Admission to the Master of Accounting Program

This course prepares students to complete their creative component project option in the Master of Accounting degree.

Actuarial Science (ACSCI)

Any experimental courses offered by ACSCI can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Advertising (ADVRT)

Any experimental courses offered by ADVRT can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ADVRT 230: Advertising Principles**

(3-0) Cr. 3.

Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy and appeals. Study of the creation of advertising.

ADVRT 301: Research and Strategic Planning for Advertising and Public Relations

(Cross-listed with P R). (3-0) Cr. 3.

Prereq: ADVRT 230 or P R 220

The use of primary and secondary research for situations, organizations and the public. Formation and development of strategic plans for public relations and advertising students.

ADVRT 334: Advertising Creativity

(2-1) Cr. 3.

Prereq: JL MC 110; Minimum of C+ in JL MC 201; ADVRT 301/P R 301

Development and execution of creative advertising materials.

Copywriting, art direction and computer applications. Creative strategy development, execution and evaluation.

ADVRT 335: Advertising Media Planning

(3-0) Cr. 3.

Prereq: ADVRT/P R 301

Concepts of media planning and selection in the development, execution and evaluation of advertising campaigns. Characteristics and capabilities of the advertising media. Utilization of market segmentation, consumer buying and media audience databases.

ADVRT 336: Advertising Account Management

(3-0) Cr. 3.

Prereq: JL MC 110; Minimum of C+ in JL MC 201; ADVRT/P R 301

Fundamentals of account management with emphasis on leadership, sales techniques, relationship building, presentation skills, and strategic thinking. Includes aspects of agency communications, team building, client management, evaluating creative concepts and media plans, and developing strategic proposals and campaign recommendations.

ADVRT 390: Professional Skills Development

(Cross-listed with JL MC, P R). Cr. 1-3. Repeatable, maximum of 6 credits.

F.S.

Prereq: Minimum of C+ in JL MC 201; other vary by topic. Instructor permission for non-majors.

Check with Greenlee School for course availability.

ADVRT 391: Short Course Intensive

(Cross-listed with JL MC, P R). Cr. 1-3. Repeatable, maximum of 6 credits.

Focused short courses on timely concepts. Check with Greenlee School for course availability. Offered on a satisfactory-fail basis only.

ADVRT 434: Advertising Campaigns

(3-0) Cr. 3. F.S.

Prereq: Minimum of C+ in ADVRT 334 or ADVRT 336, and major status

Development of advertising campaigns including primary and secondary research, target audience analysis, campaign strategy, media planning, budgeting and creative execution.

ADVRT 435: Advertising Competition

Cr. 1-3. Repeatable, maximum of 3 credits. Alt. S., offered irregularly.

Prereq: Permission of instructor, Junior/senior standing strongly recommended

Preparation of materials for regional and national competitions.

ADVRT 436: Advertising Portfolio Practicum

(3-0) Cr. 3. S.

Prereq: Minimum of C+ in ADVRT 334, non-majors with instructor permission

Advanced advertising writing and design. May include campaign development for competitions. Other projects include creative development in a variety of media for an online portfolio.

ADVRT 490: Independent Study in Communication

Cr. arr.

Prereq: Junior classification and contract with supervising professor to register

Projects during which students may study problems associated with a medium, a professional specialization, a philosophical or practical concern, a reportorial method or writing technique, or a special topic in their field. Credit is not given for working on student or professional media without an accompanying research component. No more than 3 credits of ADVRT/JLMC/PR 490 may be used toward a degree in the Greenlee School.

ADVRT 497: Special Topics in Communication

(Cross-listed with JL MC, P R). Cr. 1-3. Repeatable, maximum of 6 credits.

Prereq: Junior classification. See Schedule of Classes for possible pre-requisites.

Seminars or one-time classes on topics of relevance to students in communication.

ADVRT 499: Professional Media Internship

Cr. 1-3. F.S.SS.

*Prereq: JL MC majors: JL MC 110 and minimum of C+ in JL MC 302 or JL MC 303; ADVRT majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in JL MC 201; P R majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in P R 321.**All students, formal faculty adviser approval.*

See ADVRT/JL MC/P R 499A or 499B. Offered on a satisfactory-fail basis only.

ADVRT 499A: Professional Media Internship: Required

Cr. 3. F.S.SS.

*Prereq: JL MC majors: JL MC 110 and minimum of C+ in JL MC 302 or JL MC 303; ADVRT majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in JL MC 201; P R majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in P R 321.**All students, formal faculty adviser approval.*

Initial, required internship. A 400-hour (for 3 credits) internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

ADVRT 499B: Professional Media Internship: Optional

Cr. 1-3. F.S.SS.

Prereq: JL MC majors: JL MC 110 and minimum of C+ in JL MC 302 or JL MC 303; ADVRT majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in JL MC 201; P R majors: JL MC 110, ADVRT/P R 301 and minimum of C+ in P R 321.

All students, formal faculty adviser approval.

Optional internship in the student's specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to Greenlee School majors. Offered on a satisfactory-fail basis only.

Aerospace Engineering (AER E)

Any experimental courses offered by AER E can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

AER E 160: Aerospace Engineering Problems With Computer Applications Laboratory

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Solving aerospace engineering problems and presenting solutions through technical reports. Significant figures and estimation. SI units. Graphing and curve fitting. Introduction to aerospace engineering and engineering design. Spreadsheet programs. History of aerospace. Systems thinking. Team projects.

AER E 160H: Aerospace Engineering Problems With Computer Applications Laboratory: Honors

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Solving aerospace engineering problems and presenting solutions through technical reports. Significant figures. SI units and estimation. Graphing and curve fitting. Introduction to aerospace engineering and engineering design. Spreadsheet programs. History of aerospace. Systems thinking. Team projects.

AER E 161: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering

(2-2) Cr. 3. F.S.

Prereq: Credit or enrollment in AER E 160 or equivalent course

Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks.

AER E 161H: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering: Honors

(2-2) Cr. 3. F.S.

Prereq: AER E 160 or equivalent course

Computer-based problem solving using Matlab(R), with emphasis on numerical methods. Introduction to solid modeling and aerospace design using SolidWorks.

AER E 192: Aerospace Seminar

Cr. R. S.

Vectors, differentiation, integration, matrices, and systems of linear equations.

AER E 192H: Aerospace Seminar: Honors.

Cr. R. S.

Vectors, differentiation, integration, matrices, and systems of linear equations.

AER E 261: Introduction to Performance and Design

(3-0) Cr. 3. F.S.

Prereq: MATH 166, PHYS 221, credit or enrollment in AER E 161

Aerodynamics of the airplane, lift and drag, drag polar, propulsion characteristics of turbojets and piston props, level flight, range, endurance, climbing flight, turning flight, take-off and landing, design examples.

AER E 265: Scientific Balloon Engineering and Operations

(Cross-listed with MTEOR). (0-2) Cr. 1. Repeatable. F.

Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.

AER E 290: Aerospace Engineering Independent Study: Independent Study

Cr. 1-2. Repeatable.

Prereq: Sophomore classification, approval of the department

AER E 290A: Aerospace Engineering Independent Study: Flight ground instruction

Cr. 1-2. Repeatable.

Prereq: Sophomore classification, approval of the department

AER E 290B: Aerospace Engineering Independent Study: In-flight training

Cr. 1-2. Repeatable.

Prereq: AER E 301

AER E 290C: Aerospace Engineering Independent Study: Other

Cr. 1-2. Repeatable.

Prereq: AER E 301

AER E 294: Make to Innovate I

Cr. 1. Repeatable, maximum of 3 credits. F.S.

Prereq: Restricted to Freshman and Sophomore classifications, Instructor permission required.

Multidisciplinary projects to engage students in the fundamentals of engineering, project management, systems engineering, teamwork, and oral and visual communication. Students will define and attain their team objectives and milestones that are approved by the instructor. Can only be used toward graduation in these cases. To make credit deficiencies in 100 or 200 level courses. No more than 2 credits of Aer E 294X can be used to make-up credit deficiencies in 100 or 200 level courses. Cannot be used in any category or technical electives in the Aer E curriculum

AER E 301: Flight Experience

Cr. R. F.S.

Prereq: Credit or enrollment in AER E 355

Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Ten hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Offered on a satisfactory-fail basis only.

AER E 310: Aerodynamics I: Incompressible Flow

(3-0) Cr. 3. F.S.

Prereq: Grade of C- or better in AER E 261 and MATH 265

Introduction to fluid mechanics and aerodynamics. Fluid properties and kinematics. Conservation equations in differential and integral form. Bernoulli's equation. Basic potential flow concepts and solutions. Boundary layer concept. Incompressible flow over airfoils and wings. Examples of numerical methods. Applications of multi-variable calculus to fluid mechanics and aerodynamics.

AER E 311: Aerodynamics II: Compressible Flow

(3-0) Cr. 3. F.S.

Prereq: AER E 310, M E 231

Review of thermodynamics, energy equation, compressible flow, and isentropic flow. Normal and oblique shocks. Mach waves and expansion fans. Applications to ducts and nozzles. Compressible airfoil and wing theory. Introduction to advanced compressible flow topics.

AER E 321: Flight Structures Analysis

(3-0) Cr. 3. F.S.

Prereq: E M 324, Credit or enrollment in MATH 266 or 267

Introduction to elasticity, airworthiness, and flight loads. Introduction to fatigue. Materials selection for flight applications. Thin walled cross-sections under bending, torsion, and shear loads using classical methods. Shear center. Column buckling. Matrix methods of structural analysis.

AER E 322: Aerospace Structures Laboratory

(1-2) Cr. 2. F.S.

Prereq: Credit or enrollment in AER E 321

Design of experiments. Data analysis. Strain gage installation. Measurement of stiffness/strength of aluminum. Analysis/fabrication/testing of riveted joints. Shear/bending measurements in beam sections. Analysis/measurement of strains in frames. Buckling of columns. Stress concentration. Vibration testing of beams and plates. Fabrication/testing of composites.

AER E 331: Flight Control Systems I

(3-0) Cr. 3. F.S.

Prereq: AER E 355

Linear system analysis. Control system designs using root-locus and frequency response methods. Applications in flight control systems.

AER E 344: Aerodynamics and Propulsion Laboratory

(2-2) Cr. 3. F.S.

Prereq: AER E 310; Coreq: AER E 311

Similitude and dimensional analysis. Measurement uncertainty analysis. Pressure and velocity measurement methods and instruments. Pressure distribution around a circular cylinder. Aerodynamic performance of low-speed airfoils. Airfoil wake flow; Boundary layer flow. Flow visualization techniques for supersonic flows and de Laval nozzles.

AER E 351: Astrodynamics I

(3-0) Cr. 3. F.S.

Prereq: E M 345

Introduction to astrodynamics. Two-body Keplerian satellite and planetary motion. Geocentric and extraterrestrial trajectories and applications. Ballistic missiles.

AER E 355: Aircraft Flight Dynamics and Control

(3-0) Cr. 3. F.S.

Prereq: AER E 261, MATH 267, E M 345

Aircraft rigid body equations of motion, linearization, and modal analysis. Longitudinal and lateral-directional static and dynamic stability analysis. Flight handling characteristics analysis. Longitudinal and lateral-directional open loop response to aircraft control inputs. Aircraft flight handling qualities.

AER E 361: Computational Techniques for Aerospace Design

(2-2) Cr. 3. F.S.

Prereq: AER E 310, MATH 267, E M 324, E M 345

Advanced programming, workstation environment, and development of computational tools for aerospace analysis and design. Technical report writing.

AER E 362: Aerospace Systems Integration

(3-0) Cr. 3. F.S.

Prereq: Junior standing in Aerospace Engineering or permission of instructor

Emphasis on impact of component interfaces in aerospace systems.

Understand how changes in variables associated with individual components impact the performance of the aerospace system. Specific integration challenges include: capturing implicit disciplinary interactions (e.g. structures/aerodynamics, propulsion/aerodynamics, etc.), propagating tolerances through the system (i.e. uncertainty modeling), balancing component attributes in the system objective.

AER E 381: Introduction to Wind Energy

(3-0) Cr. 3. S.

Prereq: MATH 166, PHYS 221

Basic introduction to the fundamentals of Wind Energy and Wind Energy conversion systems. Topics include but not limited to various types of wind energy conversion systems and the aerodynamics, blade and tower structural loads, kinematics of the blades and meteorology.

AER E 396: Summer Internship

Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services

Professional work period of at least 10 weeks during the summer.

Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 398: Cooperative Education

Cr. R. Repeatable. F.S.

Prereq: Permission of department and Engineering Career Services.

Professional work period. One semester per academic or calendar year.

Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 411: Aerospace Vehicle Propulsion I

(3-0) Cr. 3. F.S.

Prereq: AER E 311, AER E 344

Atmospheric propulsion system performance and cycle analysis.

Momentum theorem, thrust and propulsive efficiency. Thermodynamics of compressible flow with heat and work addition. Components and principles of turbojets and turbofans. Rocket engines and ramjet principles.

AER E 412: Aerospace Vehicle Propulsion II

(3-0) Cr. 3. S.

Prereq: AER E 311

Electricity and magnetism. Plasma physics. Ion engine performance.

Introduction to advanced electromagnetic propulsion systems. Energy sources and nuclear propulsion. Space mission requirements.

AER E 417: Experimental Mechanics

(Dual-listed with AER E 517). (Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: E M 324; MAT E 273

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

AER E 421: Advanced Flight Structures

(2-2) Cr. 3. F.S.

Prereq: AER E 321, MATH 266 or MATH 267

Analysis of indeterminate flight structures including finite element laboratory. Static analysis of complex structural components subject to thermal and aerodynamic loads. Analytical and finite element solutions for stresses and displacements of membrane, plane stress, plate structures. Buckling of beams, frames, and plate structures. Introduction to vibration of flight structures. Steady state and transient structural response using normal modal analysis.

AER E 422: Vibrations and Aeroelasticity

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: E M 324 or AER E 321

Vibration theory. Steady and unsteady flows. Mathematical foundations of aeroelasticity, static and dynamic aeroelasticity. Linear unsteady aerodynamics, non-steady aerodynamics of lifting surfaces. Stall flutter. Aeroelastic problems in civil engineering structures. Aeroelastic problems of rotorcraft. Experimental aeroelasticity. Selected wind tunnel laboratory experiments.

AER E 423: Composite Flight Structures

(2-2) Cr. 3. S.

Prereq: E M 324; MAT E 273

Fabrication, testing and analysis of composite materials used in flight structures. Basic laminate theory of beams, plates and shells. Manufacturing and machining considerations of various types of composites. Testing of composites for material properties, strength and defects. Student projects required.

AER E 426: Design of Aerospace Structures

(Dual-listed with AER E 526). (2-2) Cr. 3. F.

Prereq: E M 324

Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability.

AER E 432: Flight Control Systems II

(3-0) Cr. 3. F.

Prereq: AER E 331

Aircraft lateral directional stability augmentation. Launch vehicle pitch control system design. Control of flexible vehicles. Satellite attitude control. Flight control designs based on state-space methods. Introduction to sample-data systems.

AER E 433: Spacecraft Dynamics and Control

(3-0) Cr. 3. F.

Prereq: EM 345

Three-dimensional rotational kinematics and attitude dynamics of a rigid body in space. Stability analysis of a spinning spacecraft with or without energy dissipation. Attitude dynamics and stability of a satellite in circular orbit. Introduction to spacecraft attitude determination and control systems (ADCS). Simulation of spacecraft attitude-dynamics and control problems of practical interest using MATLAB.

AER E 442: V/STOL Aerodynamics and Performance

(3-0) Cr. 3. F.

Prereq: AER E 261

Introduction to the aerodynamics, performance, stability, control and critical maneuvering characteristics of V/STOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vectored engines.

AER E 446: Computational Fluid Dynamics

(3-0) Cr. 3. F.

Prereq: AER E 311, AER E 361 and proficiency in at least one programming language

Introduction to computational fluid dynamics. Discretization, consistency, and stability. Explicit and implicit methods for ordinary and partial differential equations. Linearization techniques. Iterative and direct solution algorithms. Numerical methods for parabolic, elliptic and hyperbolic equations. Curvilinear coordinates and numerical grid generation. Applications to Euler, boundary-layer and Navier-Stokes equations.

AER E 448: Fluid Dynamics of Turbomachinery

(Cross-listed with M E). (3-0) Cr. 3. S.

Prereq: AER E 311 or M E 335

Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines. Conceptual and preliminary design of axial and radial flow compressors and turbines using velocity triangles and through-flow approaches.

AER E 451: Astrodynamics II

(3-0) Cr. 3. F.S.

Prereq: AER E 351

Orbit determination and prediction using Gibb's and Gauss' methods. Advanced orbit maneuvers, triple-, and fixed-impulse; universal variables; Kepler's problem. Earth gravity field models and gravity harmonics, orbit perturbations, advanced dynamics, variational methods, relative orbital mechanics, and Clohessy-Wiltshire equations.

AER E 452: Introduction To Systems Engineering And Analysis

(Cross-listed with I E). Cr. 3. SS.

Prereq: Junior Classification in an Engineering Major

Principles of systems engineering to include problem statement formulation, stakeholder analysis, requirements definition, system architecture and concept generation, system integration and interface management, verification and validation, and system commissioning and decommissioning operations. Introduction to discrete event simulation processes. Students will work in groups to propose, research, and present findings for a systems engineering topic of current relevance.

AER E 461: Modern Design Methodology with Aerospace Applications

(2-2) Cr. 3. F.S.

Prereq: AER E 361, AER E 311, AER E 321, AER E 322, AER E 344, AER E 351, AER E 355

Introduction to modern engineering design methodology. Computational constrained optimal design approach including selection of objective function, characterization of constraint system, materials and strength considerations, and sensitivity analyses.

AER E 462: Design of Aerospace Systems

(1-4) Cr. 3. F.S.

Prereq: AER E 461

Fundamental principles used in engineering design of aircraft, missile, and space systems. Preliminary design of aerospace vehicles. Engineering Ethics.

AER E 463: Introduction to Multidisciplinary Design Optimization

(Dual-listed with AER E 563). (3-0) Cr. 3. F.

Prereq: senior standing in College of Engineering or permission of instructor

Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multi-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods.

AER E 464: Spacecraft Systems

(3-0) Cr. 3. S.

Prereq: AER E 351

An examination of spacecraft systems including attitude determination and control, power, thermal control, communications, propulsion, guidance, navigation, command and data handling, and mechanisms. Explanation of space and operational environments as they impact spacecraft design. Includes discussion of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues.

AER E 466: Multidisciplinary Engineering Design

(Cross-listed with A B E, B M E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.

Prereq: Student must be within two semesters of graduation; permission of instructor.

Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

AER E 467: Multidisciplinary Engineering Design II

(Cross-listed with ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable, maximum of 2 times. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: Student must be within two semesters of graduation or receive permission of instructor.

Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

AER E 468: Large-Scale Complex Engineered Systems (LSCES)

(Dual-listed with AER E 568). (Cross-listed with I E). (3-0) Cr. 3. S.

Prereq: senior standing in College of Engineering or permission of AerE 468 instructor

Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.

AER E 480: Ultrasonic Nondestructive Evaluation

(Cross-listed with E M). (3-0) Cr. 3. S.

Prereq: E M 324, MATH 266 or MATH 267, PHYS 222

Introduction to stress/strain, Hooke's law, and elastic wave propagation in two dimensions in isotropic media. Ultrasonic plane-wave reflection and transmission; and simple straight-crested guided waves. Transducer construction, behavior, and performance. Simple signal analysis and discrete signal processing. The last few weeks of the course are devoted to case studies.

AER E 481: Advanced Wind Energy: Technology and Design

(3-0) Cr. 3. S.

Prereq: AER E 381 or senior classification in engineering or junior in engineering with a course in fluid mechanics

Advanced topics in wind energy, emphasis on current practices. Theoretical foundations for horizontal and vertical axis wind turbine. Design codes for energy conversion systems design, aerodynamic and structural load estimation, wind resource characterization wind farm design, optimization.

AER E 483: Aeroacoustics

(Dual-listed with AER E 583). Cr. 3.

Prereq: AER E 311 or M E 335; and MATH 266 or MATH 267

Noise metrics, Linear wave equation and its solution in 1-, 2-, and 3-D using Green's functions. Propagation of sound in free and confined spaces. Aerodynamic noise sources in engineering machines: aircraft engine noise, airfram noise, wind turbine noise, etc.

AER E 490: Aerospace Engineering Independent Study

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490B: Aerospace Engineering Independent Study: Propulsion**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490C: Aerospace Engineering Independent Study: Aerospace Structures**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490D: Aerospace Engineering Independent Study: Flight Dynamics**

Cr. 1-6. Repeatable.

Prereq: Junior or senior classification, approval of the department

AER E 490E: Aerospace Engineering Independent Study: Spacecraft Systems

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490F: Aerospace Engineering Independent Study: Flight Control Systems**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490G: Aerospace Engineering Independent Study: Aeroelasticity**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490H: Aerospace Engineering Independent Study: Independent Study, Honors**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490I: Aerospace Engineering Independent Study: Design**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490J: Aerospace Engineering Independent Study: Non-destructive Evaluation**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490K: Aerospace Engineering Independent Study: Wind Engineering**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490L: Aerospace Engineering Independent Study: Multi-functional Ultra-light Structures**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 490O: Aerospace Engineering Independent Study: Other**

Cr. 1-6. Repeatable.

*Prereq: Junior or senior classification, approval of the department***AER E 494: Make to Innovate II**

Cr. 2-3. Repeatable, maximum of 3 times. F.S.

Prereq: Restricted to Junior or Senior classifications, Instructor permission required.

Multidisciplinary projects to engage students in the fundamentals of engineering, project management, systems engineering, teamwork, and oral and visual communication. Students will define and attain their team objectives and milestones that are approved by their instructors. Maximum of 6 credits may count toward graduation as Technical Elective.

AER E 499: Senior Project

Cr. 1-2. Repeatable. F.S.

Prereq: Senior classification, credit or enrollment in AER E 491

Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduates:**AER E 501: Advanced Engineering Analysis**

(3-0) Cr. 3. F.

Prereq: Math 267 or equivalent

Linear ordinary differential equations with variable coefficients; hyperbolic, parabolic, and elliptic equations; tensors. None

AER E 511: Wind Energy System Design

(Cross-listed with WESEP). (3-0) Cr. 3.

Prereq: WESEP 501 and WESEP 502

Advanced design, control, and operation of wind plants. Topics include electromechanical energy conversion systems, aerodynamic and aeroelastic loads, optimal control of wind farms, life cycle management strategies, tall tower design, and prediction of component residual life.

AER E 514: Advanced Mechanics of Materials

(Cross-listed with E M). (3-0) Cr. 3. F.

Prereq: E M 324

Theory of stress and strain, stress-strain relationships. Unsymmetrical bending, curved beams, shear center. Torsion of thin-walled noncircular sections. Equilibrium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders.

AER E 517: Experimental Mechanics

(Dual-listed with AER E 417). (Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: E M 324; MAT E 273

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

AER E 521: Airframe Analysis

(3-0) Cr. 3. F.

Prereq: AER E 421 or E M 424

Analysis of static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

AER E 522: Design and Analysis of Composite Materials

(3-0) Cr. 3. F.

Prereq: E M 324

Composite constituent materials, micro-mechanics, laminate analysis, hygro-thermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of composites, short fiber composites, and demonstration laboratory.

AER E 524: Numerical Mesh Generation

(3-0) Cr. 3. F.

Prereq: MATH 385, proficiency in programming

Introduction to modern mesh generation techniques. Structured and unstructured mesh methods, algebraic and PDE methods, elliptic and hyperbolic methods, variational methods, error analysis, Delaunay triangulation, data structures, geometric modeling with B-spline and NURBS surfaces, surface meshing.

AER E 525: Finite Element Analysis

(Cross-listed with E M). (3-0) Cr. 3. S.

Prereq: E M 425, MATH 385

Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

AER E 526: Design of Aerospace Structures

(Dual-listed with AER E 426). (2-2) Cr. 3. F.

Prereq: E M 324

Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability.

AER E 531: Automatic Control of Flight Vehicles

(3-0) Cr. 3. S.

Prereq: AER E 331

Applications of classical and modern linear control theory to automatic control of flight vehicles. Spacecraft attitude control. Control of flexible vehicles. Linear-quadratic regulator design applications.

AER E 532: Compressible Fluid Flow

(Cross-listed with M E). (3-0) Cr. 3. S.

Prereq: AER E 310, 311 or equivalent

Thermodynamics of compressible flow. Viscous and inviscid compressible flow equations. One dimensional steady flow; isentropic flow, shocks, expansions. Multidimensional compressible flow aspects. Linear and nonlinear wave analysis and method of characteristics. Subsonic, transonic, supersonic and hypersonic flows.

AER E 541: Incompressible Flow Aerodynamics

(3-0) Cr. 3. F.

Prereq: AER E 310 or M E 335 or equivalent

Kinematics and dynamics of fluid flow. Derivation of the Navier-Stokes, Euler and potential flow equations. Introduction to generalized curvilinear coordinates. Ideal fluids. Two-dimensional and three-dimensional potential flow. Complex variable methods.

AER E 545: Experimental Flow Mechanics and Heat Transfer

(3-0) Cr. 3. F.

Prereq: AER E 310 or M E 335 or E M 378

Similitude and dimensional analysis. Measurement uncertainty analysis; Fluid mechanical apparatus: wind tunnel and water tunnels. Various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies: Pressure gauge and transducers; Pitot tube; hot wire anemometry; Shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Tomographic PIV, Holograph PIV and microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive applications and laboratory experiments will be included.

AER E 546: Computational Fluid Mechanics and Heat Transfer I

(Cross-listed with M E). (3-0) Cr. 3. F.

Prereq: AER E 310 or M E 335, and programming experience

Basic concepts of discretization, consistency, and stability. Explicit and implicit methods for ordinary differential equations. Methods for each type of partial differential equation. Iterative solution methods; curvilinear grids. Students will program basic algorithms.

AER E 547: Computational Fluid Mechanics and Heat Transfer II

(Cross-listed with M E). (3-0) Cr. 3. S.

Prereq: AER E 546 or equivalent

Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

AER E 551: Orbital Mechanics

(3-0) Cr. 3. F.

Prereq: AER E 351

Review of 2-body problem. Orbital maneuvers. Relative motion in orbit. Orbit perturbation analysis. Gravity field expansions and effects on orbiters. 3-body problem with applications.

AER E 556: Guidance and Navigation of Aerospace Vehicles

(3-0) Cr. 3. F.

Prereq: AER E 331

Principles of guidance systems for spacecraft, launch vehicles, homing and ballistic missiles. Optimal guidance. Interplanetary transfer guidance with low thrust. Principles of inertial navigation. Theory and applications of the Global Positioning System. Celestial navigation procedures. Application of Kalman filtering to recursive navigation theory.

AER E 563: Introduction to Multidisciplinary Design Optimization

(Dual-listed with AER E 463). (3-0) Cr. 3. F.

Prereq: senior standing in College of Engineering or permission of instructor

Introduction to the theory and methods of Multidisciplinary Design Optimization (MDO), including system coupling, system sensitivity methods, decomposition methods, MDO formulations (such as multi-discipline feasible (MDF), individual discipline feasible (IDF) and all-at-once (AAO) approaches, and MDO search methods.

AER E 564: Fracture and Fatigue

(Cross-listed with E M, M E, M S E). (3-0) Cr. 3. Alt. F., offered even-numbered years.

*Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392.**Undergraduates: Permission of instructor*

Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

AER E 565: Systems Engineering and Analysis

(Cross-listed with E E, I E). (3-0) Cr. 3.

Prereq: Coursework in basic statistics

Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering

AER E 566: Avionics Systems Engineering

(Cross-listed with E E). (3-0) Cr. 3. S.

Prereq: E E 565

Avionics functions. Applications of systems engineering principles to avionics. Top-down design of avionics systems. Automated design tools.

AER E 568: Large-Scale Complex Engineered Systems (LSCES)

(Dual-listed with AER E 468). (Cross-listed with I E). (3-0) Cr. 3. S.

Prereq: senior standing in College of Engineering or permission of AerE 468 instructor

Introduction to the theoretical foundation and methods associated with the design for large-scale complex engineered systems, including objective function formation, design reliability, value-driven design, product robustness, utility theory, economic factors for the formation of a value function and complexity science as a means of detecting unintended consequences in the product behavior.

AER E 569: Mechanics of Composite and Combined Materials

(Cross-listed with E M, M S E). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: E M 324

Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites.

AER E 570: Wind Engineering

(Cross-listed with E M). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: E M 378, E M 345

Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

AER E 572: Turbulence

(Cross-listed with CH E). (3-0) Cr. 3.

Prereq: AER E 541 or M E 538

Qualitative features of turbulence. Statistical representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds averaged models. Homogeneous shear flows, free shear flows, boundary layers. Numerical simulation of turbulence: DNS, LES, DES.

AER E 573: Random Signal Analysis and Kalman Filtering

(Cross-listed with E E, M E). (3-0) Cr. 3. F.

Prereq: E E 324 or AER E 331 or M E 370 or M E 411 or MATH 341

Elementary notions of probability. Random processes. Autocorrelation and spectral functions. Estimation of spectrum from finite data. Response of linear systems to random inputs. Discrete and continuous Kalman filter theory and applications. Smoothing and prediction. Linearization of nonlinear dynamics.

AER E 574: Optimal Control

(Cross-listed with E E, M E). (3-0) Cr. 3. S.

Prereq: E E 577

The optimal control problem. Variational approach. Pontryagin's principle, Hamilton-Jacobi equation. Dynamic programming. Time-optimal, minimum fuel, minimum energy control systems. The regulator problem. Structures and properties of optimal controls.

AER E 575: Introduction to Robust Control

(Cross-listed with E E, M E). (3-0) Cr. 3.

Prereq: E E 577

Introduction to modern robust control. Model and signal uncertainty in control systems. Uncertainty description. Stability and performance robustness to uncertainty. Solutions to the H₂, H_∞, and L₁ control problems. Tools for robustness analysis and synthesis.

AER E 576: Digital Feedback Control Systems

(Cross-listed with E E, M E). (3-0) Cr. 3. F.

Prereq: E E 475 or AER E 432 or M E 411 or MATH 415; and MATH 267

Sampled data, discrete data, and the z-transform. Design of digital control systems using transform methods: root locus, frequency response and direct design methods. Design using state-space methods. Controllability, observability, pole placement, state estimators. Digital filters in control systems. Microcomputer implementation of digital filters. Finite wordlength effects. Linear quadratic optimal control in digital control systems. Simulation of digital control systems.

AER E 577: Linear Systems

(Cross-listed with E E, M E, MATH). (3-0) Cr. 3. F.

Prereq: E E 324 or AER E 331 or MATH 415; and MATH 207

Linear algebra review. Least square method and singular value decomposition. State space modeling of linear continuous-time systems. Solution of linear systems. Controllability and observability. Canonical description of linear equations. Stability of linear systems. State feedback and pole placements. Observer design for linear systems.

AER E 578: Nonlinear Systems

(Cross-listed with E E, M E, MATH). (3-0) Cr. 3. S.

Prereq: E E 577

Linear vs nonlinear systems. Phase plane analysis. Bifurcation and center manifold theory. Lyapunov stability. Absolute stability of feedback systems. Input-output stability. Passivity theory and feedback linearization. Nonlinear control design techniques.

AER E 581: Perturbation Methods

(3-0) Cr. 3. F.

Prereq: MATH 267

Mathematical perturbation methods with applications to ordinary and partial differential equations. Perturbation expansions. Order of magnitude and gauge functions. Matched asymptotic expansions. Boundary layer problems. Multiple scales. Resonance and mode coupling. Solvability conditions for differential equations. Physical and engineering applications.

AER E 583: Aeroacoustics

(Dual-listed with AER E 483). Cr. 3.

Prereq: AER E 311 or M E 335; and MATH 266 or MATH 267

Noise metrics, Linear wave equation and its solution in 1-, 2-, and 3-D using Green's functions. Propagation of sound in free and confined spaces. Aerodynamic noise sources in engineering machines: aircraft engine noise, airfram noise, wind turbine noise, etc.

AER E 590: Aerospace Engineering Independent Study: Special Topics

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590B: Aerospace Engineering Independent Study: Propulsion

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590C: Aerospace Engineering Independent Study: Aerospace Structures

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590D: Aerospace Engineering Independent Study: Flight Dynamics

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590E: Aerospace Engineering Independent Study: Spacecraft Systems

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590F: Aerospace Engineering Independent Study: Flight Control Systems

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590G: Aerospace Engineering Independent Study: Aeroelasticity

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590H: Aerospace Engineering Independent Study: Viscous Aerodynamics

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590I: Aerospace Engineering Independent Study: Design

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590J: Aerospace Engineering Independent Study: Hypersonics

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590K: Aerospace Engineering Independent Study: Computational Aerodynamics

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590L: Aerospace Engineering Independent Study: Optimization

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590M: Aerospace Engineering Independent Study: Non Destructive Evaluation

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590N: Aerospace Engineering Independent Study: Wind Engineering

Cr. 1-5. Repeatable, maximum of 3 times.

AER E 591: Graduate Student Seminar Series

Cr. R. Repeatable.

Presentation of professional topics by department graduate students.

Development of presentation skills used in a professional conference

setting involving question and answer format.

AER E 599: Creative Component

Cr. 1-5. Repeatable.

Courses for graduate students:**AER E 640: Stability of Fluid Flow**

(3-0) Cr. 3.

Prereq: AerE 541

Theoretical methods of stability analysis; linear analysis of exchange of stability and over stability; bifurcation of equilibria; most dangerous modes and pattern formation; shear flow stability theorems. Physical mechanisms. Tollmein-Schlichting waves, disintegration of capillary jets, Benard convection, Taylor-Couette flow, centrifugal instability, double diffusion.

AER E 647: Advanced Computational Fluid Dynamics

(Cross-listed with M E). (3-0) Cr. 3. S.

Prereq: AER E 547

An examination of current methods in computational fluid dynamics. Differencing strategies. Advanced solution algorithms for unstructured meshes. Grid generation. Construction of higher-order CFD algorithms. Parallel computing. Current applications. Use of state of the art CFD codes.

AER E 690: Aerospace Engineering Independent Study: Advanced Topics

Cr. 1-5. Repeatable.

AER E 690A: Aerospace Engineering Independent Study: Aero and/or Gas Dynamics

Cr. 1-5. Repeatable.

AER E 690B: Aerospace Engineering Independent Study: Propulsion

Cr. 1-5. Repeatable.

AER E 690C: Aerospace Engineering Independent Study: Aerospace Structures

Cr. 1-5. Repeatable.

AER E 690D: Aerospace Engineering Independent Study: Flight Dynamics

Cr. 1-5. Repeatable.

AER E 690E: Aerospace Engineering Independent Study: Spacecraft Systems

Cr. 1-5. Repeatable.

AER E 690F: Aerospace Engineering Independent Study: Flight Control Systems

Cr. 1-5. Repeatable.

AER E 690G: Aerospace Engineering Independent Study: Aeroelasticity

Cr. 1-5. Repeatable.

AER E 690H: Aerospace Engineering Independent Study: Viscous Aerodynamics

Cr. 1-5. Repeatable.

AER E 690I: Aerospace Engineering Independent Study: Design

Cr. 1-5. Repeatable.

AER E 690J: Aerospace Engineering Independent Study: Hypersonics

Cr. 1-5. Repeatable.

AER E 690K: Aerospace Engineering Independent Study: Computational Aerodynamics

Cr. 1-5. Repeatable.

AER E 690L: Aerospace Engineering Independent Study: Non Destructive Evaluation

Cr. 1-5. Repeatable.

AER E 690M: Aerospace Engineering Independent Study: Wind Engineering

Cr. 1-5. Repeatable.

AER E 697: Engineering Internship

Cr. R. Repeatable.

Prereq: Permission of DOGE (Director of Graduate Education), graduate classification

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

AER E 699: Research

Cr. arr. Repeatable.

African and African American Studies (AF AM)

Any experimental courses offered by AF AM can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**AF AM 201: Introduction to African American Studies**

(3-0) Cr. 3. F.S.

An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

Meets U.S. Diversity Requirement

AF AM 311: Africa under Colonial Rule

(Cross-listed with HIST). (3-0) Cr. 3.

Prereq: 3 credits of 200-level HIST at Iowa State, and sophomore classification.

Development of Africa from imposition of colonial rule to independence, including processes of European domination, African reaction and resistance, emergence of nationalism, and dismantling of colonialism.

Meets International Perspectives Requirement.

AF AM 325: Peoples and Cultures of Africa.

(Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: 201 or 306 recommended.

Survey of diverse African culture areas across the continent and globally; local level description and analysis of individuals as members of African communities; regional, national and global scales of identification.

Meets International Perspectives Requirement.

AF AM 330: Ethnic and Race Relations

(Cross-listed with SOC). (3-0) Cr. 3. F.S.SS.

Prereq: SOC 134

Analysis of ethnic and race relations, particularly in America; emphasis on the sociology and psychology of race and ethnic relations.

Meets U.S. Diversity Requirement

AF AM 334: African American Religious Experience

(Cross-listed with RELIG). (3-0) Cr. 3. F.

Prereq: Prior course work in Religious Studies or African American Studies recommended

Examination of African-American experience from the perspective of black religion with attention to political, economic, social, theological and artistic expressions, including music, that serve the life of African-American communities."

Meets U.S. Diversity Requirement

AF AM 347: Studies in African American Literature

(Cross-listed with ENGL). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250

Literature by African Americans, which may include study of individual authors, movements, themes, genres.

Meets U.S. Diversity Requirement

AF AM 350: Women of Color in the U.S

(Cross-listed with WGS). (3-0) Cr. 3. S.

Prereq: 3 credits in WGS or AF AM

Economic, social, political and cultural roles of Women of Color in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored.

Meets U.S. Diversity Requirement

AF AM 353: History of African Americans I

(Cross-listed with HIST). (3-0) Cr. 3. S.

Prereq: Sophomore classification

Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War.

Meets U.S. Diversity Requirement

AF AM 354: History of African Americans II

(Cross-listed with HIST). (3-0) Cr. 3. S.

Prereq: Sophomore classification

Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism.

Meets U.S. Diversity Requirement

AF AM 460: Seminar in African American Culture

(3-0) Cr. 3. S.

Intensive study of a selected topic in African-American Studies in one or more disciplines. Selected readings of various authors, movements, eras, or genres. Primary and secondary source materials.

Meets U.S. Diversity Requirement

AF AM 473: Civil Rights and Ethnic Power

(Cross-listed with HIST, US LS). (3-0) Cr. 3.

Prereq: Sophomore classification

Comparative history of the civil rights and ethnic power movements (African American, Chicano, American Indian, Puerto Rican, among others) in the U.S. from World War II to the present. Topics include institutional foundations, leadership, gender and racial dynamics, and the convergences and divergences of these differing ethnic struggles for rights.

Meets U.S. Diversity Requirement

AF AM 490: Independent Study

Cr. 1-3. Repeatable, maximum of 3 times.

Agricultural Education and Studies (AGEDS)

Any experimental courses offered by AGEDS can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

AGEDS 110: Orientation

(1-0) Cr. 1. F.S.

Orientation to the department. Careers in agriculture.

AGEDS 110A: Agriculture and Life Sciences Education (Fall only)

(1-0) Cr. 1. F.S.

Orientation to the department. Careers in agriculture.

AGEDS 110B: Agricultural Studies (Fall only)

(1-0) Cr. 1. F.S.

Orientation to the department. Careers in agriculture.

AGEDS 110C: Agricultural and Life Sciences exploration

(1-0) Cr. 1. F.S.

Orientation to the department. Careers in agriculture.

AGEDS 111: Dean's Leadership Seminar

(1-0) Cr. 1. F.

Prereq: Permission of the Associate Dean for Academic Programs, College of Agriculture and Life Sciences

Introduction to leadership in agriculture and the life sciences, problem solving applied to current case studies, global perspective required by leaders, and designing programs to respond to societal needs in the agricultural and life sciences.

AGEDS 112: Agriculture Biotechnology Colloquium

(1-0) Cr. 1. S.

Prereq: Enrollment as an agricultural excellence scholar

The scientific basis of biological and social sciences in agriculture.

AGEDS 113: Access to Success Seminar I

(1-0) Cr. 1. Repeatable. F.S.

Course provides career skills, learning strategies and social and academic integration techniques to student members of Step Forward Learning Community. Utilization of campus resources, encouragement of self-exploration, and development of academic skills. Offered on a satisfactory-fail basis only.

AGEDS 116: Initial Field Experience in Agricultural Education

(1-2) Cr. 1. F.

Prereq: AGEDS majors only.

Field experience in a formal education setting designed to explore teaching as a career through guided observation and interviews, reflection, and on-campus dialogue.

AGEDS 211: Early Field Based Experience

(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.SS.

Prereq: AGEDS 110

Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211A: High School Agriculture Programs

(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.SS.

Prereq: AGEDS 110

Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211C: Agricultural Industries and Agencies

(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.SS.

Prereq: AGEDS 110

Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 215: Career Seminar

(1-0) Cr. 1. F.S.

Prereq: Sophomore classification

Overview of career opportunities. Evaluation of interests and accomplishments and setting career goals. Development of job search and interviewing skills. Establishing networks of job contacts.

AGEDS 310: Foundations of Agricultural Education Programs

(3-0) Cr. 3. F.S.

Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

AGEDS 311: Presentation and Sales Strategies for Agricultural Audiences

(3-0) Cr. 3. F.S.

Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

AGEDS 312: Science With Practice

(1-6) Cr. 3. Repeatable. F.S.

Prereq: College of Agriculture and Life Sciences majors only

A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include journals, micro-reflections, formal presentations, and a comprehensive portfolio.

AGEDS 315: Personal, Professional, and Entrepreneurial Leadership in Agriculture

(3-0) Cr. 3. F.S.

Leadership principles and strategies to influence and motivate team members to achieve personal, professional, and entrepreneurial goals in production agriculture, agricultural education, and agricultural organizations.

AGEDS 327: Survey of Agriculture and Life Sciences Communication

(2-2) Cr. 3. F.S.

Prereq: ENGL 250 or equivalent.

Development of written, oral, visual and electronic communications relevant to agriculture and life sciences. Students develop a set of communication skills applicable to agriculture and life science contexts and for various audiences.

AGEDS 388: Agricultural Mechanics Applications

(2-3) Cr. 3. Repeatable, maximum of 2 times. F.S.SS.

Introduction to SMAW (Arc), GMAW (Mig), GTAW (Tig), Oxy-Fuel welding, Oxy-Fuel cutting, and Plasma cutting theories and applications. Emphasis will be on theoretical foundation of welding, safety, welding skill development, and management of equipment, and materials. Introduction to small engines and applications. Emphasis will be on theory of operating systems, maintenance, troubleshooting, failure analysis, and safety.

AGEDS 398: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of the department cooperative education coordinator; junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AGEDS 401: Planning Agriculture and Life Sciences Education Programs

(Dual-listed with AGEDS 501). (3-0) Cr. 3. F.

Prereq: AGEDS 310

Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 402: Methods of Teaching in Agriculture and Life Sciences

(Dual-listed with AGEDS 502). (3-0) Cr. 3. F.

Prereq: Concurrent enrollment in AGEDS 401

Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 412: Internship in Agricultural Education and Studies

Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior classification in AGEDS and permission of instructor

A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural, communications and/or environmental practices and principles.

AGEDS 414: Developing Agricultural Education Programs in Non-Formal Settings

(2-0) Cr. 2. S.

Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies.

AGEDS 416: Pre-Student Teaching Experience in Agricultural Education

Cr. 1. F.S.

Prereq: AGEDS 211, AGEDS 402 and admission to teacher education program

A forty hour field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AGEDS 417: Supervised Teaching in Agriculture and Life Sciences

Cr. 1-16. Repeatable. F.S.

Prereq: AGEDS 211, AGEDS 402 and admission to teacher education program

Supervised teaching in public schools.

AGEDS 450: Farm Management and Operation

(2-4) Cr. 3. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: Econ 235, Econ 230, junior classification

Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm's livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor.

AGEDS 451: Agricultural Law

(3-0) Cr. 3. S.

Prereq: Senior classification

The legal framework impinging upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers.

AGEDS 461: Technology Transfer and the Role of Agricultural and Extension Education

(Dual-listed with AGEDS 561). (3-0) Cr. 3. S.

Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs. Meets International Perspectives Requirement.

AGEDS 475: Agri-Marketing and Communications Competition

(2-0) Cr. 1-2. Repeatable, maximum of 6 credits. F.S.

Prereq: Admission by invitation.

Specialized training in communication and agricultural marketing knowledge and skills in preparation for intercollegiate competition. Maximum of 6 credits can be applied toward graduation.

AGEDS 488: Methods of Teaching Agricultural Mechanics

(2-3) Cr. 3. F.S.

Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials.

AGEDS 490: Independent Study in Agricultural Education and Studies

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490A: Philosophy, Curriculum, and Methods

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490B: Leadership, Evaluation, and Administration

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490C: Business, Industry, and Production Agriculture

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490D: Extension and International Agriculture

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490E: Instructional Technology

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490F: Environmental Issues

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490G: Entrepreneurship

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490H: Independent Study in Agricultural Education and Studies, Honors

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 490I: Communications

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior classification, permission of instructor

AGEDS 496: Agricultural Travel Course

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

AGEDS 496A: International

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

Meets International Perspectives Requirement.

AGEDS 496B: Domestic

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

AGEDS 499: Undergraduate Research

Cr. arr. F.S.SS.

Prereq: Permission of instructor, adviser, and departmental chair

Research experience in agricultural education and studies with application to selected problems.

Courses primarily for graduate students, open to qualified undergraduates:**AGEDS 501: Planning Agriculture and Life Sciences Education Programs**

(Dual-listed with AGEDS 401). (3-0) Cr. 3. F.

Prereq: AGEDS 310

Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 502: Methods of Teaching in Agriculture and Life Sciences

(Dual-listed with AGEDS 402). (3-0) Cr. 3. F.

Prereq: Concurrent enrollment in AGEDS 401

Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 510: Introduction to Research in Agricultural Education

(3-0) Cr. 3. S.

Prereq: Graduate classification

Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AGEDS 511: Professional Agricultural Presentation Practices

(3-0) Cr. 3. F.SS.

Prereq: Graduate Classification

The identification and use of key planning, delivery and evaluation of presentations using audience engagement techniques focused on research-based principles and field-based practices of professional presenters in agriculture and the life sciences.

AGEDS 517: Student Teacher Education Practicum

Cr. 2-6. F.S.

Prereq: AGEDS 590B, AGEDS 501, AGEDS 502 Admission to the University Teacher Education program

Supervised 5th-12th grade public and private schools teaching practicum for graduate students in Masters degree teacher certification program.
NA

AGEDS 520: Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources

(3-0) Cr. 3. S.

Prereq: Graduate classification

Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AGEDS 524: Program Development and Evaluation in Agricultural and Extension Education

(3-0) Cr. 3. F.

Prereq: Graduate classification

Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.

AGEDS 533: Introduction to Learning Theory in Agricultural Education

(3-0) Cr. 3. S.

Prereq: Graduate classification

Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

AGEDS 550: Foundations of Agricultural Education

(3-0) Cr. 3. F.

Prereq: Graduate classification

Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.

AGEDS 561: Technology Transfer and the Role of Agricultural and Extension Education

(Dual-listed with AGEDS 461). (3-0) Cr. 3. S.

Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs.
Meets International Perspectives Requirement.

AGEDS 590: Special Topics in Agricultural Education

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 12 credits in agricultural education

AGEDS 590A: Curriculum

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 12 credits in agricultural education

AGEDS 590B: Methods

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 12 credits in agricultural education

AGEDS 590C: Philosophy

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 12 credits in agricultural education

AGEDS 590D: Evaluation

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 12 credits in agricultural education

AGEDS 590E: Administration

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 12 credits in agricultural education

AGEDS 590F: Leadership

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 12 credits in agricultural education

AGEDS 590G: Guidance

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 590I: Instructional Technology**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 590J: Extension**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 590K: International Agriculture**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 590L: Program Planning**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593: Workshop in Agricultural Education**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593A: Curriculum**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593B: Methods**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593C: Evaluation**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593D: Administration**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593E: Leadership**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593F: Extension**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593G: Program Planning**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593H: Instructional Technology**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 593M: Biotechnology Workshop**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: 12 credits in agricultural education***AGEDS 599: Creative Component**

Cr. arr. Repeatable. F.S.SS.

For nonthesis masters degree programs.

Courses for graduate students:**AGEDS 615: Seminar in Agricultural Education**

(1-0) Cr. 1. Repeatable. F.S.SS.

Offered on a satisfactory-fail basis only.

AGEDS 615A: Writing for publication

(1-0) Cr. 1. Repeatable. F.S.SS.

Offered on a satisfactory-fail basis only.

AGEDS 615B: Ethics

(1-0) Cr. 1. Repeatable. F.S.SS.

Offered on a satisfactory-fail basis only.

AGEDS 615C: Grant writing

(1-0) Cr. 1. Repeatable. F.S.SS.

Offered on a satisfactory-fail basis only.

AGEDS 615D: Career planning

(1-0) Cr. 1. Repeatable. F.S.SS.

Offered on a satisfactory-fail basis only.

AGEDS 615E: Contemporary issues

(1-0) Cr. 1. Repeatable. F.S.SS.

Offered on a satisfactory-fail basis only.

AGEDS 617: Professional Internship for Agricultural Educators

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Offered on a satisfactory-fail basis only.

AGEDS 625: Leadership, Administration, Supervision and Management of Agricultural Education Programs

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: Graduate classification

Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.

AGEDS 699: Research

Cr. arr. Repeatable.

Agricultural and Biosystems Engineering (A B E)

Any experimental courses offered by A B E can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (http://www.registrar.iastate.edu/faculty-staff/courses/explisting/)

Courses primarily for undergraduates:

A B E 102: Learning Communities

Cr. 0.5. F.

8 week learning communities course focusing on student success, engineering, and department curriculum. Building community within the ABE Department. Offered on a satisfactory-fail basis only.

A B E 110: Experiencing Agricultural and Biosystems Engineering

(0-2) Cr. 1. S.

Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

A B E 160: Systematic Problem Solving and Computer Programming

(2-2) Cr. 3. S.

Prereq: Credit or enrollment in MATH 143 or MATH 165

Engineering approach to problem solution and presentation. Introduction to basic principles from dynamics, statics, conservation laws, and basic electricity. Use of spreadsheet programs and computer programming language(s) to solve and present engineering problems. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, EE 185, IE 148, M E 160 and S E 185 may count towards graduation.

A B E 170: Engineering Graphics and Introductory Design

(2-2) Cr. 3.

Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A B E 201: Preparing for Workplace Seminar

(Cross-listed with TSM). (1-0) Cr. 1. F.S.

Prereq: Prereq: Sophomore classification in AE, AST, BSE, or I TEC

8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, and engineering/technical knowledge. Resumes; Cover Letters; Behavioral Based Interviewing; Industry Speakers; Preparation for internships experiences.

A B E 216: Fundamentals of Agricultural and Biosystems Engineering

(2-2) Cr. 3. F.

Prereq: A B E 160 or permission of the instructor

Application of mathematics and engineering sciences in agricultural and biosystems engineering. Emphasis is on solving engineering problems.

A B E 218: Project Management & Design in Agricultural and Biosystems Engineering

(1-2) Cr. 2. S.

Prereq: A B E 216

Project management - critical path, Gantt charts, resource allocations, basic project budgeting, and project management software. Engineering design approaches. Open-ended design projects to demonstrate the preceding principles through application of technical concepts taught in prerequisite coursework.

A B E 271: Engineering Applications of Parametric Solid Modeling

(1-2) Cr. 1. F.S.

Prereq: A B E 170 or TSM 116 or equivalent

8 week-course. Creating, editing, and documenting part and assembly models using Solidworks.

A B E 272: Parametric Solid Models, Drawings, and Assemblies Using Creo Parametric

(1-2) Cr. 1. F.S.

Prereq: A B E 170 or TSM 116 or equivalent

8 week-course. Applications of Creo Parametric software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation (standard drawing views, dimensions, and notes) and for the geometric analysis of parts and assemblies.

A B E 273: CAD for Process Facilities and Land Use Planning

(1-2) Cr. 1. F.S.

Prereq: ENGR 170 or TSM 116 or equivalent.

8-week course. Application of 2-D AutoCAD software to create and interpret 2-D drawings and 3-D models of facilities. Topics include geometric construction, design documentation: (using views, dimension, notes), and AutoCAD specific features (i.e. Layers, Blocks, Standards, Styles).

A B E 316: Applied Numerical Methods for Agricultural and Biosystems Engineering

(2-2) Cr. 3. F.S.

Prereq: A B E 160; MATH 266 or MATH 267

Computer aided solution of agricultural engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

A B E 325: Biorenewable Systems

(Cross-listed with TSM). (3-0) Cr. 3. F.

Prereq: CHEM 163 or higher; MATH 140 or higher

Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

A B E 340: Functional Analysis of Soil, Crop, and Machine Systems

(2-2) Cr. 3. F.

Prereq: A B E 216

Principles of machine systems operation (tillage, crop establishment, harvesting and crop protection). Principles of soil and crop interactions with machine systems. Experimental and simulation techniques for testing and evaluation of agricultural field machinery for equipment performance, functional analysis and crop production management.

A B E 342: Agricultural Tractor Power

(2-3) Cr. 3. S.

Prereq: Ch E 381 or M E 231

Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms.

A B E 363: Agri-Industrial Applications of Electric Power and Electronics

(3-2) Cr. 4. F.S.

Prereq: A B E 216

Single phase and three phase circuit design. Electrical safety. Electric motors and controls. Programmable logic controllers. Digital logic, instrumentation and sensors.

A B E 380: Principles of Biological Systems Engineering

(2-2) Cr. 3. S.

Prereq: A B E 316

Engineering analysis of biological systems, through the study of mass, energy, and information transport. Quantification and modeling of biological interactions, biological activities and bioreactor operations. Includes hands-on laboratory experiences on biological materials characterization, unit operation for bioprocesses and fermentation for producing bioproducts.

A B E 388: Sustainable Engineering and International Development

(Cross-listed with C E, E E). (2-2) Cr. 3. F.

Prereq: Junior classification in engineering

Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

A B E 396: Summer Internship

Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services

Professional work period of at least 10 weeks during the summer.

Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

A B E 398: Cooperative Education

Cr. R. Repeatable. F.S.

Prereq: A B E 218 and permission of department and Engineering Career Services

Professional work period. One semester per academic or calendar year.

Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

A B E 403: Modeling, Simulation, and Controls for Agricultural and Biological Systems

(Dual-listed with A B E 503). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267

Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 404: Instrumentation for Agricultural and Biosystems Engineering

(Dual-listed with A B E 504). (2-2) Cr. 3. F.

Prereq: A B E 316 and A B E 363

Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 410: Electronic Systems Integration for Agricultural Machinery

(Dual-listed with A B E 510). Cr. 3. S.

System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A B E 413: Fluid Power Engineering

(Cross-listed with M E). (2-2) Cr. 3. F.

Prereq: Credit or enrollment in E M 378 or M E 335, A B E 216 or M E 270

Fundamental fluid power principles, symbols and schematics. Hydraulic fluid properties. Function and performance of components such as connections and fittings, filtration, pumps, valves, actuators, hydrostatic transmissions. Hydraulic system dynamics. Modeling and simulation of circuits. Analysis and design of hydraulic systems. Hydrostatic transmission design. Hands-on construction of circuits, measurement of system variables, and electrohydraulic control.

A B E 415: Agricultural & Biosystems Engineering Design I

(1-2) Cr. 2. F.S.

Prereq: A B E 316 (majors only)

Identification of current design problems in ag & biosystems engineering. Development of alternate solutions using creativity and engineering analysis and synthesis techniques.

A B E 416: Agricultural & Biosystems Engineering Design II

(1-2) Cr. 2. F.S.

Prereq: A B E 415 (majors only)

Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes.

A B E 418: Fundamentals of Engineering Review

(1-0) Cr. 1.

Prereq: senior classification.

8 week course. Review of core concepts covered in the Fundamentals of Engineering examination with emphasis on statics, dynamics, fluid mechanics, heat transfer, electric circuits, and engineering economics. Open to all College of Engineering seniors, however focus is on the general exam, not discipline specific exams.

A B E 424: Air Pollution

(Dual-listed with A B E 524). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424A: Air Pollution: Air quality and effects of pollutants

(Dual-listed with A B E 524A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424B: Air Pollution: Climate change and causes

(Dual-listed with A B E 524B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424C: Air Pollution: Transportation Air Quality

(Dual-listed with A B E 524C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

*Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.***A B E 424D: Air Pollution: Off-gas treatment technology**

(Dual-listed with A B E 524D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

*Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above***A B E 424E: Air Pollution: Agricultural sources of pollution**

(Dual-listed with A B E 524E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 431: Design and Evaluation of Soil and Water Conservation Systems

(Dual-listed with A B E 531). (2-3) Cr. 3. F.

Prereq: E M 378 or CH E 356

Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A B E 432: Nonpoint Source Pollution and Control

(Dual-listed with A B E 532). (3-0) Cr. 3.

Prereq: A B E 431 or C E 372

Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

A B E 436: Design and Evaluation of Soil and Water Monitoring Systems

(Dual-listed with A B E 536). (2-3) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A B E 431

Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 437: Watershed Modeling and Policy

(Dual-listed with A B E 537). (Cross-listed with ENSCI). (2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: CE 372 or equivalent

A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 451: Food and Bioprocess Engineering

(Dual-listed with A B E 551). (3-0) Cr. 3. S.

Prereq: A B E 216 and credit or enrollment in M E 436 or C H E 357; or F S H N 351 and MATH 266 or MATH 267

Application of engineering principles and mathematical modeling to the quantitative analysis of transport phenomena in food and bioprocesses. Physical/chemical characteristics of foods and biological materials and systems, flow processes, thermal processes and separation processes.

A B E 466: Multidisciplinary Engineering Design

(Cross-listed with AER E, B M E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.

Prereq: Student must be within two semesters of graduation; permission of instructor.

Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

A B E 469: Engineering for Grain Storage, Preservation, Handling, and Processing Systems

(Dual-listed with A B E 569). (2-3) Cr. 3. S.

Prereq: A B E 216

Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities.

A B E 472: Design of Environmental Modification Systems for Animal Housing

(Dual-listed with A B E 572). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A B E 216, M E 231

Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A B E 475: Design in Animal Production Systems Engineering

(2-0) Cr. 2. F.S.

Prereq: A B E 271, A B E 272, or A B E 273; E M 324 and enrollment in APSE option of AE program.

Application of engineering fundamentals to the independent solution of an animal production systems engineering problem with well defined criteria and constraints in either environmental control, structural design, manure management, or air quality/mitigation.

A B E 478: Wood Frame Structural Design

(Dual-listed with A B E 578). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: E M 324

Design of light-framed wood structures using LRFD and ASD design procedures. Includes analysis of wind, snow, dead, and live loads. Applications include animal housing and machine storage. Fasteners, laminated posts, truss design and use of National Design Specifications.

A B E 480: Engineering Analysis of Biological Systems

(Dual-listed with A B E 580). (Cross-listed with ENSCI). (2-2) Cr. 3. F.

Prereq: A B E 380 or permission of the instructor

Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 580 will be required to conduct additional learning activities.

A B E 490: A B E Independent Study

Cr. 1-5. Repeatable.

Independent Study.

A B E 490A: A B E Independent Study: Animal Production Systems Engineering

Cr. 1-5. Repeatable.

Independent Study.

A B E 490B: A B E Independent Study: Biorenewable Resources

Cr. 1-5. Repeatable. F.S.SS.

Independent study.

A B E 490E: A B E Independent Study: Environmental Bioprocessing Engineering

Cr. 1-5. Repeatable. F.S.SS.

Independent study in environmental bioprocessing engineering.

A B E 490F: A B E Independent Study: Food Engineering

Cr. 1-5. Repeatable. F.S.SS.

Independent study in food engineering.

A B E 490G: A B E Independent Study: General Topics in A B E

Cr. 1-5. Repeatable. F.S.SS.

Independent study in general A B E topics.

A B E 490H: A B E Independent Study: Honors

Cr. 1-5. Repeatable.

Guided instructing in agricultural and biosystems engineering for honors students.

A B E 490L: A B E Independent Study: Land & Water Resources Engineering

Cr. 1-5. Repeatable.

Guided instruction in land and water resources engineering.

A B E 490M: A B E Independent Study: Advanced Machinery Systems Engineering

Cr. 1-5. Repeatable.

Guided instruction in advance machinery systems engineering.

A B E 495: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up

(Cross-listed with TSM). Cr. 1-2. Repeatable. F.S.SS.

Prereq: Permission of instructor

Preparation for, or follow-up of, study abroad experience (496). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 496 the following term or have had taken 496 the previous term. Meets International Perspectives Requirement.

A B E 496: Agricultural and Biosystems Engineering Department Study Abroad

(Cross-listed with TSM). Cr. 1-4. Repeatable. F.S.SS.

Prereq: Permission of instructor

Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 495. Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:**A B E 503: Modeling, Simulation, and Controls for Agricultural and Biological Systems**

(Dual-listed with A B E 403). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: A B E 316, and A B E 363, and MATH 266 or MATH 267

Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 504: Instrumentation for Agricultural and Biosystems Engineering

(Dual-listed with A B E 404). (2-2) Cr. 3. F.

Prereq: A B E 316 and A B E 363

Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 506: Applied Computational Intelligence

(2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: A B E 316 or equivalent, MATH 166, STAT 305

Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A B E 510: Electronic Systems Integration for Agricultural Machinery

(Dual-listed with A B E 410). Cr. 3. S.

System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A B E 511: Bioprocessing and Bioproducts

(3-0) Cr. 3. F.

Prereq: A B E 216 or equivalent, MATH 160 or MATH 165, one of CHEM 167 or higher, BIOL 173 or BIOL 211 or higher or BRT 501, senior or graduate classification

Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis. Term paper for graduate level only.

A B E 515: Integrated Crop and Livestock Production Systems

(Cross-listed with AGRON, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: SUSAG 509

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A B E 524: Air Pollution

(Dual-listed with A B E 424). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524A: Air Pollution: Air quality and effects of pollutants

(Dual-listed with A B E 424A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524B: Air Pollution: Climate change and causes

(Dual-listed with A B E 424B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524C: Air Pollution: Transportation Air Quality

(Dual-listed with A B E 424C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

A B E 524D: Air Pollution: Off-gas treatment technology

(Dual-listed with A B E 424D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

A B E 524E: Air Pollution: Agricultural sources of pollution

(Dual-listed with A B E 424E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 531: Design and Evaluation of Soil and Water Conservation Systems

(Dual-listed with A B E 431). (Cross-listed with ENSCI). (2-3) Cr. 3. F.

Prereq: E M 378 or C H E 356

Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A B E 532: Nonpoint Source Pollution and Control

(Dual-listed with A B E 432). (Cross-listed with ENSCI). (3-0) Cr. 3.

Prereq: A B E 431 or C E 372

Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

A B E 533: Erosion and Sediment Transport

(Cross-listed with ENSCI, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: C E 372 or GEOL/ENSCI/MTEOR 402, MATH 166 or equivalent

Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

A B E 536: Design and Evaluation of Soil and Water Monitoring Systems

(Dual-listed with A B E 436). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A B E 431

Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 537: Watershed Modeling and Policy

(Dual-listed with A B E 437). (Cross-listed with ENSCI). (2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: C E 372 or equivalent

A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

A B E 551: Food and Bioprocess Engineering

(Dual-listed with A B E 451). (3-0) Cr. 3. S.

Prereq: A B E 216 and credit or enrollment in M E 436 or C H E 357; or FS HN 351 and MATH 266 or MATH 267

Application of engineering principles and mathematical modeling to the quantitative analysis of transport phenomena in food and bioprocesses. Physical/chemical characteristics of foods and biological materials and systems, flow processes, thermal processes and separation processes.

A B E 556: GIS Programming and Automation

(Dual-listed with A B E 556). (Cross-listed with C R P). (3-0) Cr. 3. F.

Prereq: C R P 351 or C R P 551 or NREM 345 or NREM 546 or GEOL 552

Introduction to automated geoprocessing in Geographic Information Systems. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests.

A B E 569: Engineering for Grain Storage, Preservation, Handling, and Processing Systems

(Dual-listed with A B E 469). (2-3) Cr. 3. S.

Prereq: A B E 216

Cereal grain and oilseed production, properties, and quality assessment. Design of storage systems, drying systems, material handling, and size reduction systems. Design of cereal grain processing systems, including dry milling, wet milling, flour milling, feed milling, and fermentation facilities.

A B E 572: Design of Environmental Modification Systems for Animal Housing

(Dual-listed with A B E 472). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A B E 216, M E 231

Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A B E 578: Wood Frame Structural Design

(Dual-listed with A B E 478). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: E M 324

Design of light-framed wood structures using LRFD and ASD design procedures. Includes analysis of wind, snow, dead, and live loads. Applications include animal housing and machine storage. Fasteners, laminated posts, truss design and use of National Design Specifications.

A B E 580: Engineering Analysis of Biological Systems

(Dual-listed with A B E 480). (2-2) Cr. 3. F.

Prereq: A B E 380 or permission of the instructor

Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 580 will be required to conduct additional learning activities.

A B E 590: Special Topics in Agricultural & Biosystems Engineering

Cr. 1-3. Repeatable.

Guided instruction and self-study on special topics relevant to agricultural and biosystems engineering.

Courses for graduate students:**A B E 601: Graduate Seminar**

(Cross-listed with TSM). (1-0) Cr. 1. F.

Keys to starting a successful graduate research project. Effective literature review, formulating research questions, and setting goals. Practicing effectively communicating research and science. Effective strategies for scholarly writing, professional development, responding to feedback, peer-reviewing, successful publishing in journals, and curating scholarly output.

A B E 610: Foundations of Sustainable Agriculture

(Cross-listed with AGRON, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F.

Prereq: Graduate classification, permission of instructor

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

A B E 690: Advanced Topics

Cr. arr. Repeatable.

Advanced topics.

A B E 694: Teaching Practicum

(Cross-listed with TSM). Cr. 1-3. F.S.

Prereq: Graduate classification and permission of instructor

Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

A B E 697: Engineering Internship

Cr. R. Repeatable.

Prereq: Permission of department chair, graduate classification

One semester and one summer maximum per academic year professional work period.

A B E 699: Research

Cr. arr. Repeatable.

Research.

A B E 699B: Research: Biosystems Engineering

Cr. arr. Repeatable.

Guided graduate research in biosystems engineering.

A B E 699C: Research: Computer Aided Design

Cr. arr. Repeatable.

Guided graduate research in computer-aided design.

A B E 699E: Research: Environmental Systems

Cr. arr. Repeatable.

Guided graduate research in environmental systems.

A B E 699F: Research: Food Engineering

Cr. arr. Repeatable.

Guided graduate research in food engineering.

A B E 699O: Research: Occupational Safety

Cr. arr. Repeatable.

Guided graduate research in occupational safety.

A B E 699P: Research: Power and Machinery Engineering

Cr. arr. Repeatable.

Guided graduate research in power and machinery engineering.

A B E 699Q: Research: Structures

Cr. arr. Repeatable.

Guided graduate research in structures.

A B E 699R: Research: Process Engineering

Cr. arr. Repeatable.

Guided graduate research in process engineering.

A B E 699S: Research: Environment and Natural Resources

Cr. arr. Repeatable.

Guided graduate research in environment and natural resources.

A B E 699U: Research: Waste Management

Cr. arr. Repeatable.

Guided graduate research in waste management.

Agronomy (AGRON)

Any experimental courses offered by AGRON can be found at:

registrar.iastate.edu/faculty-staff/courses/explistsings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Courses primarily for undergraduates:**AGRON 105: Leadership Experience**

Cr. R.

A participatory experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

AGRON 110: Professional Development in Agronomy: Orientation

Cr. 1. F.

Orientation to college life, the profession of agronomy, and the agronomy curriculum.

AGRON 120: Introduction to Renewable Resources

(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

AGRON 160: Water Resources of the World

(Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.

Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment. Meets International Perspectives Requirement.

AGRON 180: Global Agriculture in a Changing World

(3-0) Cr. 3. F.

A scientific investigation of the global distribution of climate, soils and agricultural production and consumption. Physical processes that connect natural resources to agriculture and the environment. How global change drives increasing demand for agricultural production. Meets International Perspectives Requirement.

AGRON 181: Introduction to Crop Science

(3-0) Cr. 3. F.S.

Basic structure and function of plants, origin and classification, growth and development. Fundamentals of photosynthesis, plant water use, plant nutrition and genetics that regulate plant growth, development and responses to the environment.

AGRON 182: Introduction to Soil Science

(3-0) Cr. 3. F.S.

Prereq: Chem 163

Introduction to physical, chemical, and biological properties of soils; soil formation, classification and global distribution; soil health, soils and humanity and sustainable land management.

AGRON 183: Basic Skills for Agronomists

(0-3) Cr. 1. F.

Developing the skills that agronomists employ in their work with crops, soil, and the environment through activities involving tools and methodologies used by agronomists. Enrollment is restricted to first-year students majoring in agronomy.

AGRON 206: Introduction to Weather and Climate

(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

AGRON 210: Professional Development in Agronomy: Career Planning

Cr. R.

Career planning, résumé and cover letter preparation. See adviser for departmental requirements.

AGRON 217: Weed Identification

(1-2) Cr. 1. F.S.

Prereq: BIOL 101 or equivalent

Half-semester course. Identification of important weeds of agricultural, horticultural and native habitats. Principles of plant taxonomy and classification. Field trips.

AGRON 259: Organic Compounds in Plants and Soils

(3-0) Cr. 3. S.

Prereq: CHEM 163, BIOL 212, MATH 140, AGRON 182

Structure, function, and transformations of organic compounds significant in plant and soil environments.

AGRON 270: Geospatial Technologies

(Cross-listed with ENSCI). Cr. 3.

Concepts and tools for acquiring, managing, analyzing, and displaying geographic information, including GIS, remote sensing, spatial analysis, and cartography. Focus on applications in biological, ecological, environmental, and agricultural sciences.

AGRON 279: Field Exploration of Agronomy

(2-3) Cr. 3. F.

Prereq: AGRON 181 or equivalent and AGRON 182 or equivalent

Field-based investigation of Iowa's agronomic systems. Application of principles learned in introductory soils, crops and agronomy courses. For students majoring in agronomy.

AGRON 280: Crop Development, Production and Management

(3-0) Cr. 3. F.S.

Prereq: AGRON 181 or equivalent and AGRON 182 or equivalent

Overview of crops and cropping systems in the context of global and US agriculture. Focus on agronomic principles, constraints and opportunities as they apply to various locations in Iowa, the USA and the world.

AGRON 281: Crop Physiology

(3-0) Cr. 3. S.

Prereq: Agron 181 or equivalent

Science governing plant growth and development in the context of cropping and genetic improvements.

AGRON 282: Soil Conservation and Land Use

(3-0) Cr. 3. F.S.

Prereq: Agron 182 or equivalent

Principles of soil conservation and land use with emphasis on best management practices and use of soil maps and databases such as Web Soil Survey.

AGRON 283: Pesticide Application Certification

(Cross-listed with ENT, FOR, HORT). (2-0) Cr. 2. S.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

AGRON 298: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of faculty member or student's adviser, sophomore classification

Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

AGRON 310: Professional Development in Agronomy: Work Experience

Cr. R.

Professional work experience in agronomy. See adviser for departmental requirements.

AGRON 311: Professional Internship in Agronomy

(1-0) Cr. 1. F.

Prereq: Permission of adviser

A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science. For students majoring in Agronomy.

AGRON 316: Crop Structure-Function Relationships

(3-0) Cr. 3. F.S.

Prereq: BIOL 212 recommended

Basic principles concerning the growth, development, and production of crop communities in relation to their environment.

AGRON 317: Principles of Weed Science

(3-0) Cr. 3. F.

Biology and ecology of weeds. Interactions between weeds and crops.

Principles and practices of integrated weed management systems.

Herbicide mechanisms, classification, and fate in plants and soils.

AGRON 320: Genetics, Agriculture and Biotechnology

(Cross-listed with GEN). (3-0) Cr. 3. F.S.

Prereq: BIOL 212

Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

AGRON 330: Crop and Seed Identification Laboratory

(0-4) Cr. 2. F.

Prereq: AGRON 181 or equivalent.

Identification, agronomic and binomial classification of crops, weeds, and diseases. Analysis of crop seed samples for contaminants of weed and other crop seeds.

AGRON 331: Intercollegiate Crops Team

(0-6) Cr. 2. Repeatable. F.S.

Prereq: Permission of instructor. AGRON 330 recommended

Intensive training in preparation for intercollegiate competition in national crops contests.

AGRON 334: Forage Crop Management

(3-0) Cr. 3. S.

Prereq: AGRON 181 or equivalent

Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. Students enrolling for graduate credit will be expected to complete an additional class project.

AGRON 338: Seed Science and Technology

(Cross-listed with HORT). (2-3) Cr. 3. F.

Prereq: AGRON 181 (or equivalent) or HORT 221; BIOL 212

Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

AGRON 342: World Food Issues: Past and Present

(Cross-listed with ENV S, FS HN). (3-0) Cr. 3. F.S.SS.

Prereq: Junior classification

Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/undernutrition, poverty, hunger, access, and distribution. Meets International Perspectives Requirement.

AGRON 342H: World Food Issues: Past and Present, Honors

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.

Prereq: Junior classification

Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Meets International Perspectives Requirement.

AGRON 351: Turfgrass Establishment and Management

(Cross-listed with HORT). (3-0) Cr. 3. F.

Prereq: HORT 221 or AGRON 181 (or equivalent) or BIOL 211

Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests.

AGRON 351L: Turfgrass Establishment and Management Laboratory

(Cross-listed with HORT). (0-3) Cr. 1. F.

Prereq: Credit or enrollment in HORT 351

Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor.

AGRON 354: Soils and Plant Growth

(Cross-listed with HORT). (3-0) Cr. 3. F.S.

Prereq: AGRON 182 or equivalent and BIOL 101

Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development.

AGRON 354L: Soils and Plant Growth Laboratory

(Cross-listed with HORT). (0-3) Cr. 1. F.S.

Prereq: Agron or Hort major with credit or enrollment in AGRON 354

Laboratory exercises in soil testing that assess a soil's ability to support nutritive requirements for plant growth.

AGRON 360: Environmental Soil Science

(Cross-listed with ENSCI). (2-2) Cr. 3. S.

Prereq: AGRON 182 (or equivalent) or ENSCI 250 or GEOL 201

Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

AGRON 370: Field Experience in Soil Description and Interpretation

(0-3) Cr. 1. Repeatable, maximum of 4 times. F.S.

Prereq: AGRON 182 or equivalent and permission of instructor

Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.

AGRON 392: Systems Analysis in Crop and Soil Management

(2-3) Cr. 3. F.S.

Prereq: AGRON 316 and AGRON 354

Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

AGRON 398: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of faculty member or student's adviser; junior classification

Student register for this course in order to retain full-time status while on a professional work experience. The student must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

AGRON 402I: Watershed Hydrology and Surficial Processes

(Cross-listed with ENSCI, IA LL). Cr. 4. SS.

Prereq: Four courses in physical or biological sciences or engineering

Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed.

AGRON 404: Global Change

(Dual-listed with AGRON 504). (Cross-listed with ENSCI, ENV S, MTEOR). (3-0) Cr. 3. S.

Prereq: Four courses in physical or biological sciences or engineering; junior standing

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

AGRON 405: Environmental Biophysics

(Dual-listed with AGRON 505). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: MATH 165 and some exposure to computer programming (any language)

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

AGRON 406: World Climates

(Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. S.

Prereq: AGRON 206/MTEOR 206

Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement.

AGRON 407: Mesoscale Meteorology

(Dual-listed with AGRON 507). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Math 166 and Mteor 443

Arritt, Gallus. Physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure.

AGRON 410: Professional Development in Agronomy: Senior Forum

(1-0) Cr. 1. F.S.

Prereq: Senior classification, AGRON 210

Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.

AGRON 421: Introduction to Plant Breeding

(Cross-listed with HORT). (3-0) Cr. 3. F.

Prereq: GEN 320 or BIOL 313

Fundamental principles of plant breeding and cultivar development, breeding methods for self-pollinated, cross-pollinated and clonal crops.

AGRON 446: International Issues and Challenges in Sustainable Development

(Cross-listed with GLOBE, INTST). Cr. 3. F.S.

Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor

Interdisciplinary study and analysis of agricultural systems, sustainable management, and impact on plants and animal biodiversity. International field experience in evaluating different agricultural systems and impact on biodiversity may be required. A program fee is charged to students for international study abroad.

Meets International Perspectives Requirement.

AGRON 450: Issues in Sustainable Agriculture

(Cross-listed with ENV S). (3-0) Cr. 3. F.

Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices.

AGRON 452: GIS for Geoscientists

(Dual-listed with AGRON 552). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. F.S.

Prereq: GEOL 100, GEOL 201 or equivalent

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

AGRON 459: Environmental Soil and Water Chemistry

(Dual-listed with AGRON 559). (Cross-listed with ENSCI). (3-3) Cr. 4. F.

Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 463: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 563). (Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: AGRON 182 (or equivalent) or AGRON 260

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

AGRON 463I: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 563I). (Cross-listed with ENSCI, IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: AGRON 182 (or equivalent)

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

AGRON 463L: Soil Formation and Landscape Relationships Laboratory

(0-3) Cr. 1. S.

Prereq: Credit or enrollment in Agron 463

Laboratory exercise in soil formation with landscape relationships including pedon description with soil mapping.

AGRON 477: Soil Physics

(Dual-listed with AGRON 577). (Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: AGRON 182 or equivalent and MATH 166 recommended

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 484: Organic Agricultural Theory and Practice

(Dual-listed with AGRON 584). (Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: 9 cr. in biological or physical sciences

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 485: Soil and Environmental Microbiology

(Dual-listed with AGRON 585). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F.

Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 488: GIS for Geoscientists II

(Dual-listed with AGRON 588). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3.

Alt. S., offered odd-numbered years.

Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent

GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

AGRON 490: Independent Study

Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490E: Independent Study: Entrepreneurship

Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490G: Independent Study: General

Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490H: Independent Study: Honors

Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490Z: Independent Study: Service Learning

Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation

Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 491: Seed Science Internship Experience

(Cross-listed with HORT). Cr. 1-2. Repeatable, maximum of 1 times.
F.S.SS.

Prereq: Agron 338, advanced approval and participation of employer and instructor

A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

AGRON 493: Workshop in Agronomy

Cr. arr. Repeatable, maximum of 4 times.

Prereq: Permission of instructor

Workshop experience in crops, soils, or agricultural meteorology.

AGRON 496: Agricultural Travel Course

Cr. arr. Repeatable.

Prereq: Permission of instructor

Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 496A: International Tour

Cr. arr. Repeatable.

Prereq: Permission of instructor

Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings. Meets International Perspectives Requirement.

AGRON 496B: Domestic Tour

Cr. arr. Repeatable.

Prereq: Permission of instructor

Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 497: Agroecology Field Course

(3-0) Cr. 3. F.

Prereq: Jr. or Sr. classification with at least 8 credits in Agronomy

A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

AGRON 498: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of faculty member or student's adviser; senior classification

Students register for this course in order to retain full-time status while on a professional work experience. Students must register for this course prior to commencing each work period. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:**AGRON 500: Orientation Seminar**

(2-0) Cr. 1. F.

Prereq: Agronomy graduate students only

An introduction to Iowa and U.S. agriculture for scholars in agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.

AGRON 501: Crop Growth and Development

(3-0) Cr. 3. F.S.

Prereq: AGRON 181 or equivalent, MATH 140, CHEM 163, BIOL 101

Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield.

AGRON 502: Chemistry, Physics, and Biology of Soils

(3-0) Cr. 3. F.Alt. S., offered odd-numbered years.

Prereq: AGRON 181 or equivalent, AGRON 182 or equivalent, BIOL 101, CHEM 163, MATH 140

Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications.

AGRON 503: Climate and Crop Growth

(3-0) Cr. 3. F.S.

Prereq: AGRON 181 or equivalent and MATH 140

Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction and crop risk management. Basic meteorological principles are also presented to support these applied concepts.

AGRON 504: Global Change

(Dual-listed with AGRON 404). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. S.

Prereq: Four courses in physical or biological sciences or engineering; junior standing

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

AGRON 505: Environmental Biophysics

(Dual-listed with AGRON 405). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: MATH 165 and some exposure to computer programming (any language)

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

AGRON 506: Crop Genetics

(Cross-listed with HORT). Cr. 3. F.

Introduction to genetics of reproductive systems, recombination, segregation and linkage analysis, inbreeding, quantitative inheritance, fertility regulation, and polyploidy to prepare students for subsequent courses in crop improvement. Enrollment is restricted to off-campus MS in Plant Breeding students.

AGRON 507: Mesoscale Meteorology

(Dual-listed with AGRON 407). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Math 166 and Mteor 454

The physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Semester project and in-class presentation required.

AGRON 508: Biophysical Crop Ecology

(3-0) Cr. 3. Alt. S., offered even-numbered years.

The physics behind how humans use plant photosynthesis to convert energy from the sun into useful products. Techniques for quantifying and predicting ecological interactions in the soil-plant-atmosphere continuum.

AGRON 509: Agroecosystems Analysis

(Cross-listed with SOC, SUSAG). (3-4) Cr. 4. F.

Prereq: Senior or above classification; permission of instructor

Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing both field visits and classroom activities.

Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation.

AGRON 510: Crop Improvement

(Cross-listed with STB). (3-0) Cr. 3.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

A study of agriculture from its origins with the domestication of crop plants through basic genetics, demonstrating the challenges and elements of breeding strategies intended to manage gene x environmental interactions. Elements of biotechnology including use of molecular markers, development of genetically modified cultivars, gene mapping, cloning, and gene editing will be covered. Methods to measure the effectiveness of plant breeding (genetic gain) and the impact of improved agronomic practices contributing to increased agricultural productivity will be covered. Use of intellectual property protection, and the conservation and utilization of exotic genetic resources.

AGRON 511: Crop Improvement

(3-0) Cr. 3. F.S.

Prereq: AGRON 181 or equivalent, MATH 140, CHEM 163, BIOL 101

Basic principles in the genetic improvement of crop plants. Methods of cultivar development in self-pollinated and cross-pollinated crop species.

AGRON 512: Soil-Plant Environment

(3-0) Cr. 3. S.

Prereq: AGRON 502. Recommended AGRON 501

Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management.

AGRON 513: Quantitative Methods for Agronomy

(3-0) Cr. 3. F.S.

Prereq: AGRON 181 or equivalent, MATH 140, STAT 104

Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of SAS and Excel for organization, analyzing, and presenting data.

AGRON 514: Integrated Pest Management

(3-0) Cr. 3. F.S.

Prereq: AGRON 181 or equivalent, AGRON 501, MATH 140, CHEM 163, BIOL 101; AGRON 502 and AGRON 503 recommended

Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management.

AGRON 515: Integrated Crop and Livestock Production Systems

(Cross-listed with A B E, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: SUSAG 509

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AGRON 516: Crop Physiology

(3-0) Cr. 3. S.

Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.

AGRON 518: Microwave Remote Sensing

(Cross-listed with E E, MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Math 265

Microwave remote sensing of Earth's surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.

AGRON 519: Herbicide Physiology and Biochemistry

(2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: AGRON 316 (or equivalent) and AGRON 317

Herbicide mechanisms of action, selectivity, uptake, and translocation. Specific sites of herbicide action as they affect plant physiology. Herbicide resistance in weeds and crops. Implications of herbicides on weed management.

AGRON 520: Plant Breeding Methods

Cr. 3. F.

Prereq: AGRON 506

Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and clonal crops.

AGRON 521: Principles of Cultivar Development

(3-0) Cr. 3. S.

Prereq: AGRON 421 and STAT 401

Theoretical and practical exploration of breeding methods to develop clonal, pureline, inbred and hybrid cultivars. Principles and strategies to set breeding objectives, parental selection and germplasm management, population development, generation advancements, multiple trait selection, experimental designs in breeding programs; seed production and certification. Introduce tools available to a breeder.

AGRON 522: Field Methods in Plant Breeding

(0-6) Cr. 1-2. Alt. SS., offered odd-numbered years.

Prereq: AGRON 521

Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Offered on a satisfactory-fail basis only.

AGRON 523: Molecular Plant Breeding

(2-2) Cr. 3. S.

Prereq: AGRON 421 or AGRON 521, GDCB 542A

Plant breeding in the era of sequenced genomes and transformation. High throughput genomic technologies will be presented in relation to various applications in plant breeding.

AGRON 524: Applied Plant Molecular Genetics & Biotechnology

Cr. 3. F.

Prereq: AGRON 506

Basic principles and applied techniques used in the genetic improvement of crop plants. Discussion of structure and function of genes that control traits of value. Types of molecular markers, analysis of quantitatively inherited traits, genome mapping, analyses of databases.

AGRON 525: Crop and Soil Modeling

(3-0) Cr. 3. F.

Prereq: MATH 165 or Math 181 or equivalent; AGRON 316 or Agron 354 or equivalent.

Understanding basic crop physiology and soil processes through the use of mathematical and statistical approaches. Structure of crop models, dynamics and relationship among components such as leaf-level photosynthesis, canopy architecture, root dynamics and soil carbon and nitrogen pools.

AGRON 526: Field Plot Technique

(3-2) Cr. 4. S.

Prereq: STAT 401

Planning experiments for agricultural research, analysis of data, and concepts in data interpretation.

AGRON 528: Quantitative Genetics for Plant Breeding

(3-0) Cr. 3. S.

Prereq: AGRON 506 or AGRON 513

An introduction to the application of quantitative genetics to plant breeding programs.

AGRON 530: Ecologically Based Pest Management Strategies

(Cross-listed with ENT, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

AGRON 531: Crop Ecology and Management

(3-0) Cr. 3. F.

Prereq: AGRON 501, AGRON 502, AGRON 503; AGRON 512 and AGRON 514 recommended

Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints, and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 532: Soil Management

(3-0) Cr. 3. F.

Prereq: AGRON 501, AGRON 503, AGRON 512. Recommended AGRON 513

Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

AGRON 533: Crop Protection

(3-0) Cr. 3. F.SS.

Prereq: AGRON 514

Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 534: Seed and Variety, Testing and Technology

(Cross-listed with STB). (2-0) Cr. 2.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

AGRON 536: Quantitative Methods for Seed

(Cross-listed with STB). (2-0) Cr. 2. F.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation, analysis of variance, and graphical representation of data. Use of spreadsheets and statistical software for manipulating, analyzing and presenting data.

AGRON 538: Seed Physiology and the Environment

(Cross-listed with HORT). (2-0) Cr. 2. Alt. F., offered even-numbered years.

Prereq: AGRON 316; CHEM 231 or CHEM 331

Physiological aspects of seed development, maturation, longevity, dormancy, and germination of agronomic and horticultural crops and their interactions with field and storage environments. Emphasis on current literature and advanced methodology.

AGRON 539: Seed Conditioning and Storage

(Cross-listed with STB). (2-0) Cr. 2.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal points within the overall operations of a seed company.

AGRON 544: Host-Pest Interactions

Cr. 3. S.

Incorporation of the principles of integrated pest management and crop protection. Management systems (biological, cultural, chemical) and strategies which practice principles of weed science, plant pathology, and entomology.

AGRON 546: Strategies for Diversified Farming Systems

(Cross-listed with HORT, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: SUSAG 509

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

AGRON 547: Seed Production

(Cross-listed with STB). (2-0) Cr. 2.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Survey of the differences in seed production strategies between crops and the impact of these differences on seed production.

AGRON 551: Growth and Development of Perennial Grasses

(Cross-listed with HORT). (2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: Junior or senior or graduate classification or permission of instructor

Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

AGRON 552: GIS for Geoscientists

(Dual-listed with AGRON 452). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. F.S.

Prereq: GEOL 100, GEOL 201 or equivalent

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

AGRON 553: Soil-Plant Relationships

(Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: AGRON 354

Composition and properties of soils in relation to the nutrition and growth of plants.

AGRON 554: Advanced Soil Management

(2-0) Cr. 2. Alt. F., offered odd-numbered years.

Prereq: AGRON 354; MATH 165

Implications of soil management on the soil environment and root activity. Effect of soil physical properties on soil erosion.

AGRON 555: Environmental Soil Mineralogy

(Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: AGRON 473, CHEM 178. *Recommend:* GEOL 311

Structure and behavior of clay minerals, humic substances and biochar in soil environments, with emphasis on reactions and environmental implications.

AGRON 556: Agroecosystem Nutrient Cycles

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: 3 credits in chemistry and 6 credits in biology; *Recommended:* ENSCI 382, ENSCI 553, or upper-level coursework in nutrient cycles

Major, biologically important agroecosystem nutrient cycles as linked to energy (carbon) and water. Effects of agricultural production and management on cycling within systems and transfer among system at local, regional and global scales will be emphasized.

AGRON 558: Laboratory Methods in Soil Chemistry

(Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: AGRON 354 and CHEM 211

Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

AGRON 559: Environmental Soil and Water Chemistry

(Dual-listed with AGRON 459). (Cross-listed with ENSCI). (3-3) Cr. 4. F.

Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 561: Population and Quantitative Genetics for Breeding

(Cross-listed with AN S). (4-0) Cr. 4. F.

Prereq: STAT 401

Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.

AGRON 563: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 463). (Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: AGRON 182 (or equivalent) or AGRON 260

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

AGRON 563I: Soil Formation and Landscape Relationships

(Dual-listed with AGRON 463I). (Cross-listed with ENSCI, IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: AGRON 182 (or equivalent)

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

AGRON 570: Risk Assessment for Food, Agriculture and Veterinary Medicine

(Cross-listed with TOX, VDPAM). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: Statistics 300-level or higher.

Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analysis. Uncertainty analysis.

AGRON 575: Soil Formation and Transformation

(Cross-listed with ENSCI). (3-0) Cr. 3. F.

Prereq: AGRON 463 or equivalent

Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

AGRON 577: Soil Physics

(Dual-listed with AGRON 477). (Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: AGRON 182 or equivalent and MATH 166 recommended

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 578: Laboratory Methods in Soil Physics

(Cross-listed with ENSCI). (0-3) Cr. 1. S.

Prereq: concurrent enrollment in AGRON 477 or AGRON 577

Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

AGRON 584: Organic Agricultural Theory and Practice

(Dual-listed with AGRON 484). (Cross-listed with HORT, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: 9 cr. in biological or physical sciences

Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 585: Soil and Environmental Microbiology

(Dual-listed with AGRON 485). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F.

Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 588: GIS for Geoscientists II

(Dual-listed with AGRON 488). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent

GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

AGRON 590: Special Topics

Cr. arr. Repeatable.

Prereq: 15 credits in agronomy

Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

AGRON 591: Agronomic Systems Analysis

(3-0) Cr. 3. S.

Prereq: AGRON 511, AGRON 513, AGRON 531, AGRON 532, AGRON 533

Analysis of cropping systems from a problem-solving perspective. Case studies will be used to develop the students' ability to solve agronomic problems.

AGRON 592: Current Issues in Agronomy

(3-0) Cr. 3. F.S.

Prereq: AGRON 501, AGRON 503, AGRON 511, AGRON 512, AGRON 513, AGRON 514

Critical analysis and discussion of agricultural practices, programs, and policies of current interest to the field of agronomy. Leadership skill development through consideration of technical, social, and ethical components underlying controversial topics. Enhancement of communication proficiency through debate and writing in order to define problems, articulate possible solutions, and propose appropriate courses of action. Required course for the Master of Science in agronomy degree program.

AGRON 593: Workshop in Agronomy

Cr. arr. Repeatable.

Prereq: Graduate classification

AGRON 594: Agronomy MS Practicum

(1-0) Cr. 1. SS.

Prereq: AGRON 501, AGRON 502, AGRON 503, AGRON 514 or current enrollment. Recommended: AGRON 511, AGRON 512, AGRON 513

Practical field and laboratory experiences integrating coursework in climatology, crops, and soils. Includes lectures, labs and field tours.

AGRON 595: Seed Quality, Production, and Research Management

(Cross-listed with STB). (3-0) Cr. 3.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager's tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

AGRON 599: Creative Component

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599A: Agricultural Meteorology

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599B: Crop Production and Physiology

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599C: Plant Breeding

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599D: Soil Chemistry

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599E: Soil Fertility

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599F: Soil Management

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599G: Soil Microbiology and Biochemistry

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599H: Soil Morphology and Genesis

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599I: Soil Physics

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599K: Seed Science

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599L: Weed Science

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AGRON 599M: Agronomy

Cr. arr.

Prereq: Nonthesis M.S. option only

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

Courses for graduate students:

AGRON 600: Seminar

(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.

Reports and discussion of recent literature and research.

AGRON 600A: Seminar: Plant Breeding

(1-0) Cr. 1. Repeatable, maximum of 6 times. S.

Instruction and practice in giving scientific presentations related to the fields of plant breeding, genetics, or genomics, with an emphasis on effective communication and presentation techniques.

AGRON 600B: Seminar: Soils

(1-0) Cr. 1. Repeatable, maximum of 6 times. S.

Reports and discussion of recent literature and research.

AGRON 600C: Seminar: Crop Production and Physiology

(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.

Reports and discussion of recent literature and research.

AGRON 601: Agronomic Science Presentations

(3-0) Cr. 2. S.

Prereq: graduate status in agronomic science, permission of instructor.

Experience in critical communications in exchange of ideas through oral and poster presentations and scientific questioning/evaluation.

AGRON 605: Boundary-Layer Meteorology

(Cross-listed with MTEOR). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: MTEOR 443 or equivalent-level course in engineering fluids

Atmospheric boundary-layer structure and dynamics. Diurnal and seasonal variations, turbulent fluxes and turbulence kinetic energy. Measurements and empirical relations for wind and temperature near the ground. Numerical simulation and applications to wind energy.

AGRON 610: Foundations of Sustainable Agriculture

(Cross-listed with A B E, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F.

Prereq: Graduate classification, permission of instructor

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

AGRON 621: Advanced Plant Breeding

(3-0) Cr. 3. S.

Prereq: AGRON 521, AGRON 526, AGRON 561, GEN 410

Genetics of breeding populations, means of genotypes and breeding populations, mapping quantitative trait loci, variation in breeding populations, genetic design, genotype by environment interaction, selection in breeding populations, recurrent selection, marker-assisted selection, best linear unbiased prediction, genome-wide association studies, genomic selection, heterosis and hybrid prediction, and multiple traits.

AGRON 625: Genetic Strategies in Plant Breeding

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: AGRON 521 and GDCB 510

Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

AGRON 655: Advanced Soil Fertility

(2-0) Cr. 2. Alt. S., offered odd-numbered years.

Prereq: AGRON 553

Evaluation of soil fertility and fertilizers; theory and applications.

AGRON 677: Advanced Soil Physics

(2-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: AGRON 577 and MATH 266; COM S 207 recommended

The flow and distribution of water, chemicals, and heat in soils. Physical principles and applications.

AGRON 685: Advanced Soil Biochemistry

(Cross-listed with ENSCI, MICRO). (2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: AGRON 585

Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

AGRON 696: Research Seminar

(Cross-listed with BBMB, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

AGRON 698: Agronomy Teaching Practicum

Cr. 1-2. Repeatable. F.S.SS.

Prereq: Graduate classification in agronomy and permission of instructor

Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only.

AGRON 699: Research

Cr. arr. Repeatable.

AGRON 699A: Agricultural Meteorology

Cr. arr. Repeatable.

AGRON 699B: Crop Production and Physiology

Cr. arr. Repeatable.

AGRON 699C: Plant Breeding

Cr. arr. Repeatable.

AGRON 699D: Soil Chemistry

Cr. arr. Repeatable.

AGRON 699E: Soil Fertility

Cr. arr. Repeatable.

AGRON 699F: Soil Management

Cr. arr. Repeatable.

AGRON 699G: Soil Microbiology and Biochemistry

Cr. arr. Repeatable.

AGRON 699H: Soil Morphology and Genesis

Cr. arr. Repeatable.

AGRON 699I: Soil Physics

Cr. arr. Repeatable.

AGRON 699J: Plant Physiology

Cr. arr. Repeatable.

AGRON 699K: Seed Science

Cr. arr. Repeatable.

AGRON 699L: Weed Science

Cr. arr. Repeatable.

Air Force Aerospace Studies (AFAS)

Any experimental courses offered by AFAS can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

AFAS 103: Introductory Leadership Laboratory with Physical Training

(0-4) Cr. 2. Repeatable, maximum of 4 credits. F.S.

Prereq: Membership as a cadet in AFROTC

Instruction for new cadets on Air Force customs and courtesies; drill and ceremonies, issuing military commands, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers while also using basic military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.

AFAS 141: Foundations of the United States Air Force

(1-0) Cr. 1. F.

No-commitment exploratory course introducing the United States Air Force and the Air Force Reserve Officer Training Corps program. Topics include Air Force heritage and culture, professional military officership values and expectations, and future career opportunities with an emphasis on cultivating leadership and communication skills.

AFAS 142: Foundations of the United States Air Force

(1-0) Cr. 1. S.

A continuation of 141. Topics include Air Force installations, Air Force core values, leadership and team building, further study of interpersonal communication, the Oath of Office and Commissioning.

AFAS 203: Basic Leadership Laboratory with Physical Training

(0-4) Cr. 2. Repeatable, maximum of 4 credits. F.S.

Prereq: Membership as a cadet in AFROTC

Instruction and critique of cadets on Air Force customs and courtesies, drill and ceremonies, and issuing military commands in preparation for AFROTC summer Field Training while also using basic military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.

AFAS 251: Team and Leadership Fundamentals

Cr. 1. F.

Measuring character through self-assessment and its importance for leadership and team building. The importance of listening and communication for mission accomplishment. Leadership, team building, and problem solving skills in the context of Air Force core values.

AFAS 252: Team and Leadership Fundamentals II

Cr. 1. S.

Defining leadership through the lens of human relations, conflict and stress management, and ethical decision making. The importance of leveraging diversity and collaborative relationships with negotiating and resiliency techniques in the context of Air Force core values.

AFAS 303: Intermediate Leadership Laboratory with Physical Training

(0-4) Cr. 2. Repeatable, maximum of 4 credits. F.S.

Prereq: Membership as a cadet in AFROTC

Mid-level management of leadership experience involving planning and controlling of most AFROTC military activities. Students will help senior leadership to prepare and present briefings and other oral and written communications; provide interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets; and use advanced military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.

AFAS 341: Air Force Leadership Studies I

(3-0) Cr. 3. F.

A look at the fundamental issues of leadership and management in the U.S. Air Force; a large and diverse organization. It examines the theoretical aspects of leadership, management, communications, motivation and problem-solving while studying them against the backdrop of the U.S. Air Force. The course also conducts hands-on exercises to apply principles learned. While the curriculum is focused on the Air Force as an organization, the principles studied are applicable to most organizations.

AFAS 342: Air Force Leadership Studies II

(3-0) Cr. 3. S.

Prereq: AFAS 341

A continuation of AFAS 341, that looks at the advanced issues of leadership and management in the U.S. Air Force; a large and diverse organization. It examines the theoretical aspects of leadership, management, communications, motivation and problem-solving while studying them against the backdrop of the U.S. Air Force. The course also conducts hands-on exercises to apply principles learned. While the curriculum is focused on the Air Force as an organization, the principles studied are applicable to most organizations.

AFAS 403: Advanced Leadership Laboratory with Physical Training

(0-4) Cr. 2. Repeatable, maximum of 6 credits. F.S.

Prereq: Membership as a cadet in AFROTC

Advanced leadership experience involving the planning and controlling of all upper-level AFROTC military activities. Students will prepare and present briefings and other oral and written communications; provide interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets; and use advanced military training skills and instruction to develop confidence, leadership, and communication skills through physical fitness. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.

AFAS 441: Preparation for Active Duty

(3-0) Cr. 3. F.

Traces the source of military authority and responsibilities from the U.S. Constitution through the DoD to an Air Force officer. Examines the structure and capabilities of the other services and joint structures. Addresses the supervisory duties of an Air Force officer associated with administrative actions and military law as force management tools. Builds upon leadership and management skill learned in AFAS 341/342 and includes demonstrations of written and verbal communications processes.

AFAS 442: National Security Affairs

(3-0) Cr. 3. S.

Examines the national security process through review of the Department of Defense's statutory administrative and operational relationships as context for this course's regional studies component. Reviews functions of air and space power as outlined in Air Force doctrine and introduces the concept of joint operations. Integrates these concepts with regional studies to survey issues of interest to professional military officers and governmental leaders. Selectively reviews and discusses Africa, Latin America, South Asia, East Asia, Europe, Russia and the Middle East. Meets International Perspectives Requirement.

American Indian Studies (AM IN)

Any experimental courses offered by AM IN can be found at:

registrar.iastate.edu/faculty-staff/courses/explistsings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Courses primarily for undergraduates:

AM IN 201: Native People in American Culture

(3-0) Cr. 3. F.S.SS.

Perceptions and realities of Native people living in and responding to American society and culture. Topics include representations, contemporary Native identity, literature, the arts, history, film, and issues of diversity.

Meets U.S. Diversity Requirement

AM IN 205: American Indians in the Movies

(3-0) Cr. 3. Alt. SS., offered irregularly.

Examines the role of American Indians in the movie industry. Explores the development of American Indian characters and filmmaking, and the relevance for Native communities, through feature films and academic analysis. One focus is a comparison of non-Native and Native films in form, content, and message, and the changing character of Native representation in both.

Meets U.S. Diversity Requirement

AM IN 210: Introduction to American Indian Studies

(3-0) Cr. 3. F.S.SS.

Introduction to the multidisciplinary aspects of American Indian Studies. Topics include the relevant events and ideas defining the contemporary American Indian experience, on and off reservation, in the United States. Sovereignty, identity, jurisdiction, taxes, economic development, education, and other issues are addressed.

Meets U.S. Diversity Requirement

AM IN 225: American Indians of Iowa

(Cross-listed with ANTHR). Cr. 3. F.

Cultures and histories of Native people who have called the present state of Iowa home; primary focus on the period between 1700 CE and the present; Native interactions with Spanish, French, British, and American people.

Meets U.S. Diversity Requirement

AM IN 240: Introduction to American Indian Literature

(Cross-listed with ENGL). (3-0) Cr. 3. F.

Prereq: Credit in or exemption from ENGL 150

Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.

Meets U.S. Diversity Requirement

AM IN 310: Contemporary Topics in American Indian Studies

(3-0) Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: AM IN 210 recommended

Examines contemporary issues and important topics affecting Native communities overall.

Meets U.S. Diversity Requirement

AM IN 311: Federal Indian Law and Policy

(3-0) Cr. 3.

Prereq: AM IN 210 recommended

Examines the impact of federal American Indian policies on Native communities, especially contemporary Indian Country and communities. Topics include sovereignty, recognition, the role of the Supreme Court, specific policies like allotment, and other relevant issues.

Meets U.S. Diversity Requirement

AM IN 312: American Indian Education

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: AM IN 210 recommended

Examines current and historical issues in American Indian education. Topics include traditional education, changes to formal education, tribal colleges and universities, current school systems, and other relevant topics.

Meets U.S. Diversity Requirement

AM IN 313: Native Land, Water, and Resources

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: AM IN 210 recommended

Examines Native land rights, water rights, and natural resources. Topics may include Native relations to landscapes, cultural resources and infrastructure projects, land rights, water usage agreements, and resource policies as they apply to on- and off-reservation Native communities.

Meets U.S. Diversity Requirement

AM IN 315: Archaeology of North America

(Cross-listed with ANTHR). (3-0) Cr. 3. S.

Prereq: ANTHR 202

Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Meets U.S. Diversity Requirement

AM IN 320: Great Plains Archaeology

(Cross-listed with ANTHR). (3-0) Cr. 3. F.

Prereq: ANTHR 202

Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information.

Meets U.S. Diversity Requirement

AM IN 322: Peoples and Cultures of Native North America

(Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: ANTHR 201 or AM IN 210

Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life.

Meets U.S. Diversity Requirement

AM IN 324: Health and Native American Communities

(Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: ENGL 250

Overview of historic and contemporary health and health care in Native Communities. Indian Health Service and specific regulations. Consideration of both cultural and scientific approaches to medicine. Specific health issues (e.g., diabetes, alcoholism, depression, etc.) in American Indian communities.

Meets U.S. Diversity Requirement

AM IN 328: American Indian Religions

(Cross-listed with RELIG). Cr. 3.

An introduction to the beliefs and rituals of Native American religious traditions, with attention to cultural and historical contexts and implications.

Meets U.S. Diversity Requirement

AM IN 332: Current Issues in Native North America

(Dual-listed with AM IN 532). (Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

AM IN 332A: Current Issues in Native North America: Gender and Family

(Dual-listed with AM IN 532A). (Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

AM IN 332B: Current Issues in Native North America: Indigenous Ecologies and Geographies

(Dual-listed with AM IN 532B). (Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

AM IN 332C: Current Issues in Native North America: Cultural and Political Movements

(Dual-listed with AM IN 532C). (Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

AM IN 332D: Current Issues in Native North America: Regional Focus

(Dual-listed with AM IN 532D). (Cross-listed with ANTHR). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

AM IN 346: American Indian Literature

(Cross-listed with ENGL). (3-0) Cr. 3.

Prereq: ENGL 250

Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry.

Meets U.S. Diversity Requirement

AM IN 426: Topics in Native American Architecture

(Cross-listed with ARCH). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture. A maximum of 6 credits of ARCH 426 may be applied to degree program.

Meets U.S. Diversity Requirement

AM IN 490: Independent Study

Cr. arr. Repeatable, maximum of 9 credits.

Prereq: 6 credits in American Indian studies; permission of instructor and program director

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 6 credits in AM IN 490 may be counted toward graduation. If more than 3 credits in AM IN 490 are taken, they must be from different instructors.

American Sign Language (ASL)

Any experimental courses offered by ASL can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

ASL 101: American Sign Language I

(4-0) Cr. 4. F.S.

Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from "Signed English". ASL is a natural language with its own rules of grammar and usage.

Meets U.S. Diversity Requirement

ASL 102: American Sign Language II

(4-0) Cr. 4. S.

Prereq: ASL 101

Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from "Signed English". ASL is a natural language with its own rules of grammar and usage.

Meets U.S. Diversity Requirement

ASL 107: Introduction to the Deaf-World

(1-0) Cr. 1.

Nature and significance of the Deaf-World as a cultural and linguistic minority.

Meets U.S. Diversity Requirement

ASL 201: Intermediate American Sign Language I

(4-0) Cr. 4. F.

Prereq: ASL 102 or equivalent.

Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics.

ASL 202: Intermediate American Sign Language II

(4-0) Cr. 4. S.

Prereq: ASL 201 or equivalent.

A continuation and further application of language principles learned in ASL 201, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of semantic equivalence and dialogic/monologic register.

ASL 275: Topics in Deaf Culture

(3-0) Cr. 3.

Focus on contemporary topics in Deaf Culture, Communities, and History. Readings and discussion from a wide range of sources. Topics vary according to faculty interest.

Meets U.S. Diversity Requirement

ASL 305: ASL Classifiers and Depiction

(3-0) Cr. 3.

Prereq: ASL 201

Focused analysis, documentation, discussion, and increased development of classifiers and depiction in ASL. Investigation in how these grammatical features are deliberately incorporated into conversational, presentational, scientific, and artistic language production.

ASL 325: Deaf Peoples: Pre-World War II

(3-0) Cr. 3. F.

Prereq: ASL 202 or instructor's permission.

Perspectives on and treatment of deaf people as individuals and groups prior to World War II. Taught in American Sign Language.

Meets U.S. Diversity Requirement

ASL 490: Independent Study

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: 6 credits in ASL and permission of department chair

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits of ASL 490 may be counted towards graduation.

Animal Ecology (A ECL)

Any experimental courses offered by A ECL can be found at:

registrar.iastate.edu/faculty-staff/courses/explistsings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Courses primarily for undergraduates:

A ECL 231: Principles of Wildlife & Fisheries Conservation

Cr. 3. S.

Prereq: BIOL 211, BIOL 212, NREM 120

Introduction to the principles of wildlife and fisheries management. Case studies will be explored along with assessment methods used to understand management including conservation of populations, species and communities, as well as habitat preservation and restoration.

A ECL 312: Ecology

(Cross-listed with BIOL, ENSCI). (3-3) Cr. 4. F,SS.

Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

A ECL 312I: Ecology

(Cross-listed with ENSCI, IA LL). Cr. 4. SS.

An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

A ECL 321: Fish Biology

(2-3) Cr. 3. S.

Prereq: A ECL 365

Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes.

A ECL 326I: Ornithology

(Cross-listed with IA LL). Cr. 2. SS.

The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

A ECL 333: Fisheries Techniques

(Cross-listed with NREM). (1-3) Cr. 2. F.

Prereq: BIOL 212

Introduction to techniques used in the collection and interpretation of fish population data in the field and in the lab. Course objectives include an understanding of population survey methodology and improving student critical thinking and teamwork skills. Laboratory focuses on field trips and hands-on sampling experience.

A ECL 365: Vertebrate Biology

(Cross-listed with BIOL). (3-2) Cr. 4. F.

Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L

Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

A ECL 366: Natural History of Iowa Vertebrates

(2-3) Cr. 3. S.

Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L

Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region's ecological and economic health.

A ECL 371: Ecological Methods

(Cross-listed with BIOL). (2-3) Cr. 3. F.

Prereq: A ECL 312; STAT 101 or STAT 104

Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

A ECL 401: Intro to Aquatic Animal Medicine

(Cross-listed with B M S). (1-2) Cr. 1. S.

8-week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on water-evaluation, anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, biosecurity and current research. Field trip to aquaculture facility.

A ECL 404I: Behavioral Ecology

(Cross-listed with IA LL). Cr. 4. Alt. SS., offered even-numbered years.

Prereq: Two semesters of biology

Animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

A ECL 415: Ecology of Freshwater Invertebrates, Plants, and Algae

(Dual-listed with A ECL 515). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: A ECL 312

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 418: Stream Ecology

(Dual-listed with A ECL 518). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: A ECL 486

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 419I: Vertebrate Ecology and Evolution

(Cross-listed with IA LL). Cr. 4. SS.

Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology.

A ECL 420I: Amphibians and Reptiles

(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: Two semesters of biology

Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.

A ECL 425: Aquatic Insects

(Dual-listed with A ECL 525). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: BIOL 312 or equivalent

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 440: Fishery Management

(Dual-listed with A ECL 540). (2-3) Cr. 3. F.

Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486

Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 442: Aquaculture

(Dual-listed with A ECL 542). (3-0) Cr. 3. S.

Prereq: BIOL 211 and BIOL 212.

Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A ECL 451: Wildlife Ecology and Management

(2-3) Cr. 3. S.

Prereq: A ECL 371

Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods.

A ECL 454: Principles of Wildlife Disease

(Dual-listed with A ECL 554). (3-0) Cr. 3. S.

Prereq: Junior standing and at least 10 credits in biological sciences at the 300+ level

Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health.

A ECL 455: International Wildlife Issues

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: A ECL 365, A ECL 312 or graduate standing; NREM 120

Biological, political, social, and economic factors affecting the management of international wildlife resources. Meets International Perspectives Requirement.

A ECL 457: Herpetology

(Cross-listed with BIOL). (2-0) Cr. 2. F.

Prereq: BIOL 351 or BIOL 365

Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 457L: Herpetology Laboratory

(Cross-listed with BIOL). (0-3) Cr. 1. F.

Prereq: BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457

Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 458: Ornithology

(Cross-listed with BIOL). (2-0) Cr. 2. S.

Prereq: A ECL 365 or BIOL 351

Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

A ECL 458L: Ornithology Laboratory

(Cross-listed with BIOL). (0-3) Cr. 1. S.

Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.

Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

A ECL 459: Mammalogy

(Cross-listed with BIOL). (2-0) Cr. 2. S.

Prereq: BIOL 351 or A ECL 365

Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

A ECL 459L: Mammalogy Laboratory

(Cross-listed with BIOL). (0-3) Cr. 1. S.

Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.

Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

A ECL 471: Introductory Conservation Biology

(Cross-listed with BIOL). Cr. 3. S.

Prereq: BIOL 312

Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 480: Studies in Marine Biology

Cr. 1-8. Repeatable. SS.

Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A ECL 486: Aquatic Ecology

(Dual-listed with A ECL 586). (Cross-listed with BIOL, ENSCI). (3-0) Cr. 3. F.

Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

A ECL 486L: Aquatic Ecology Laboratory

(Dual-listed with A ECL 586L). (Cross-listed with BIOL, ENSCI). (0-3) Cr. 1. F.

Prereq: Concurrent enrollment in BIOL 486

Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

A ECL 489: Population Ecology

(Dual-listed with A ECL 589). (Cross-listed with BIOL). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

Courses primarily for graduate students, open to qualified undergraduates:**A ECL 515: Ecology of Freshwater Invertebrates, Plants, and Algae**

(Dual-listed with A ECL 415). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: A ECL 312

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 516: Avian Ecology

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A ECL 365, A ECL 312, or graduate standing

Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation.

A ECL 518: Stream Ecology

(Dual-listed with A ECL 418). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: A ECL 486

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 520: Fisheries Science

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: A ECL 312, A ECL 321

Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine.

A ECL 523I: Fish Ecology

(Cross-listed with IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

A ECL 525: Aquatic Insects

(Dual-listed with A ECL 425). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: BIOL 312 or equivalent

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 526I: Advanced Field Ornithology

(Cross-listed with IA LL). Cr. 2. SS.

Prereq: Concurrent registration in IA LL 326I

Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

A ECL 531: Conservation Biology

(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: BIOL 312; BIOL 313 or graduate standing

Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 531I: Conservation Biology

(Cross-listed with EEOB, IA LL). Cr. 4. Alt. SS., offered even-numbered years.

Prereq: IA LL 312I

Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

A ECL 535I: Restoration Ecology

(Cross-listed with EEOB, ENSCI, IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: A course in ecology

Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

A ECL 540: Fishery Management

(Dual-listed with A ECL 440). (2-3) Cr. 3. F.

Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486

Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 542: Aquaculture

(Dual-listed with A ECL 442). (3-0) Cr. 3. S.

Prereq: BIOL 211 and BIOL 212.

Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A ECL 551: Behavioral Ecology

(2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: a course in ecology or animal behavior

The study of how an animal's behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior.

A ECL 554: Principles of Wildlife Disease

(Dual-listed with A ECL 454). (3-0) Cr. 3. S.

Prereq: Graduate classification

Ecological and epidemiological aspects of disease as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationship among wildlife, domestic animal, and human health.

A ECL 573: Techniques for Biology Teaching

(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573A: Techniques for Biology Teaching : Animal Biology

(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573G: Techniques for Biology Teaching: Limnology

(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573I: Techniques for Biology Teaching: Insect Ecology

(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573W: Techniques for Biology Teaching: Project WET

(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 586: Aquatic Ecology

(Dual-listed with A ECL 486). (Cross-listed with EEOB, ENSCI). (3-0) Cr. 3. F.

Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

A ECL 586L: Aquatic Ecology Laboratory

(Dual-listed with A ECL 486L). (Cross-listed with EEOB, ENSCI). (0-3) Cr. 1. F.

Prereq: Concurrent enrollment in BIOL 486

Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

A ECL 589: Population Ecology

(Dual-listed with A ECL 489). (Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

A ECL 590: Graduate Independent Study

(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.

Prereq: Graduate classification and permission of instructor

A ECL 590I: Special Topics: Graduate Independent Study

(Cross-listed with ANTHR, EEOB, IA LL). Cr. 1-4. Repeatable. SS.

Prereq: Graduate classification and permission of instructor

A ECL 599: Creative Component

Cr. arr.

Prereq: Nonthesis M.S. option only

Courses for graduate students:**A ECL 611: Analysis of Populations**

(2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 312; STAT 401; a course in calculus

Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

A ECL 698: Animal Ecology Teaching Practicum

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Graduate classification in animal ecology and permission of instructor

Graduate student experience in the animal ecology teaching program.

Offered on a satisfactory-fail basis only.

A ECL 699: Research

Cr. arr. Repeatable.

A ECL 699I: Research

(Cross-listed with ANTHR, EEOB, GDCB, IA LL). Cr. 1-4. Repeatable.

Animal Science (AN S)

Any experimental courses offered by AN S can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**AN S 101: Working with Animals**

(1-2) Cr. 2. F.S.

A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

AN S 110: Orientation in Animal Science and ISU

(2-0) Cr. 1. F.S.

Orientation to the university and Department of Animal Science.

Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

AN S 114: Survey of the Animal Industry

(2-0) Cr. 2. F.S.

Principles of management and care of domestic animals, including genetics, nutrition, and reproduction. Service of domestic animals to society in terms of food, shelter, protection, fuel and emotional well-being. Basic biology, industry structure, management practices and production systems.

AN S 116: Practicum in Safe Equine Handling and Welfare

(0-3) Cr. 1. F.SS.

Development of best practices for safe horse handling and practical equine health care tasks. Course will focus on equine welfare and human safety as well as provide training in necessary every day skills needed to own a horse or to work at a horse farm. Certificate of Safe Equine Handling and Welfare available upon course completion. Offered on satisfactory - fail grading basis only. Offered on a satisfactory-fail basis only.

AN S 190: Livestock Handling, Safety and Welfare

Cr. 2.

Prereq: AN S 101

Understanding of animal perception to develop best care practices involved in handling of livestock species (beef, sheep, swine, dairy, equine, poultry). Intensive development of skills associated with handling and moving healthy and compromised livestock in respect to human and animal welfare. Integration of scientific and theoretical knowledge of biosecurity and animal-human interactions as it related to livestock handling and movement.

AN S 199: Marketing and Management of Livestock Events

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Credit or enrollment in AN S 101 or AN S 114

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 199A: Marketing and Management of Livestock Events: Beef

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Credit or enrollment in AN S 101 or AN S 114

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 199E: Marketing and Management of Livestock Events: Horses

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Credit or enrollment in AN S 101 or AN S 114

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 207: The Art and Heritage of Livestock

(3-0) Cr. 3.

Using art as a venue to understand the legacy and heritage of livestock production and livestock's contribution to civilization and society; livestock's contributions to warfare, social class, industry, economies, etc.; history of the impact of livestock on painting, poetry, music, sculpture, advertising, pop culture, movies, religion and sports in society.

AN S 210: Career Preparation in Animal Science

(0-2) Cr. 1. F.S.

Prereq: Sophomore classification in An S

Life skill development emphasized in the context of career preparation.

Assist students with career goal clarification, interview skills, resume and cover letter preparation. Internship development, job shadowing, and exploration of career option.

AN S 211: Issues Facing Animal Science

(0-2) Cr. 1. F.S.

Prereq: AN S 114, sophomore classification

Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail basis only.

AN S 214: Domestic Animal Physiology

(3-0) Cr. 3. F.S.

Prereq: BIOL 212, CHEM 163 or CHEM 177

Introduction to anatomy and physiology of the muscular, renal, skeletal, neural, mammary, cardiovascular, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

AN S 214L: Domestic Animal Anatomy and Physiology Lab

(0-2) Cr. 1. F.S.

Basic anatomy of domestic animals.

AN S 216: Equine Science

(2-2) Cr. 3. F.S.SS.

Prereq: AN S 101 or AN S 114; one course in biology

Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

AN S 217: Equine Farm Practicum

(1-2) Cr. 2. F.

Prereq: Credit or experience equivalent to AnS 116 and credit or concurrent enrollment in AN S 216.

Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, horse health care, weekly farm management, and related topics.

AN S 223: Poultry Science

(2-2) Cr. 3. F.

Prereq: AN S 101, AN S 114

Introduction to modern production trends with a focus on broiler, layer, and turkey industries. Topics covered include breeds, handling, management, physiology, nutrition, genetics, health & disease, and products. Weekly labs meet off campus.

AN S 224: Companion Animal Science

(2-2) Cr. 3. S.

Prereq: Course in biology

Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

AN S 225: Swine Science

(2-2) Cr. 3. F.S.

Prereq: AN S 101, AN S 114

Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle. Only AN S 280 and AN S 280L or AN S 225 may count toward graduation.

AN S 226: Beef Cattle Science

(2-2) Cr. 3. F.S.

Prereq: AN S 101, AN S 114

Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

AN S 228: Laboratory Animal Science

Cr. 3. F.

Prereq: AN S 101, AN S 114; recommended: AN S 214.

Introduction to the species, uses, biology, facilities, care, and diseases of animals used in research.

AN S 229: Sheep Science

(2-2) Cr. 3. S.

Prereq: AN S 101, AN S 114

Introduction to principles, practices and decisions necessary when raising sheep through their production cycle.

AN S 235: Dairy Cattle Science

(2-2) Cr. 3. F.

Prereq: AN S 101, AN S 114

Introduction to principles, practices and decisions necessary when raising dairy cattle through the vertically integrated production cycle.

AN S 270: Foods of Animal Origin

(2-0) Cr. 2. F.S.SS.

Prereq: BIOL 212, CHEM 163 or CHEM 177

Principles, practices and issues impacting the production, processing and preservation of safe, wholesome, nutritious, and palatable meat, dairy, and egg products. Product evaluation, classification, value, and utilization.

AN S 270L: Foods of Animal Origin Laboratory

(0-2) Cr. 1. F.S.

Prereq: Credit or current enrollment in AN S 270

Determination of composition and quality of meat, eggs and milk based on industry and USDA standards. Fundamentals of processing foods of animal origin to add value, maintain quality and ensure safety.

AN S 280: Basic Swine Science

(2-0) Cr. 2.

Prereq: AN S 101 AN S 114

Basic disciplines and concepts involved in swine production including; industry structure, trends and statistics; production phases and buildings; genetic improvement; reproduction; nutrition; health and biosecurity; nutrient management; marketing and meat quality and career opportunities in the swine industry. Only AN S 280 and AN S 280L or AN S 225 may count toward graduation.

AN S 305: Livestock Evaluation

(0-6) Cr. 3. F.

Prereq: Junior classification; AN S 270L recommended

Fall semester leads to 475A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions.

AN S 306: Equine Evaluation

(0-6) Cr. 3. F.

Prereq: sophomore classification or permission of instructor

Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills are practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed.

AN S 313: Exercise Physiology of Animals

(2-0) Cr. 2. F.S.

Prereq: AN S 214, BIOL 211, one course in chemistry

Physiological adaptations to athletic training in canine and equine athletes. Topics of emphasis include exercise-related adaptations in metabolism, locomotion, the cardiovascular system, musculoskeletal system, and endocrine system. The roles of nutrition and conditioning programs are assessed.

AN S 317: Fundamentals of Equine Behavior and Training

(0-6) Cr. 1-3.

Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317A: Fundamentals of Equine Behavior and Training: Young Horses at Halter

(0-6) Cr. 1. F.

Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317B: Fundamentals of Equine Behavior and Training: Yearlings

(0-6) Cr. 3.

Prereq: Permission of instructor

Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317C: Fundamentals of Equine Behavior and Training: Two-year olds and older

(0-6) Cr. 3.

Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 319: Animal Nutrition

(3-0) Cr. 3. F.S.

Prereq: AN S 214, course in organic chemistry or biochemistry

Structure and function of organic and inorganic nutrients. Digestion, absorption, metabolism and utilization of nutrients for maintenance and productive functions. Essential nutritive requirements of domestic livestock, poultry, and companion animals. Sources of nutrients, application of energy systems and concepts, and regulation of feed intake in animals.

AN S 320: Animal Feeds and Feeding

(2-2) Cr. 3. F.S.

Prereq: AN S 319

Composition, physical properties, and storage and processing of feedstuffs. Nutrient requirements of and diet formulation, and preparation systems for food and companion animal species at varying stages of age, activity or production. Manual and computer methodologies for diet formulation.

AN S 324: Food Processing for Companion Animals

(3-0) Cr. 3. F.

Prereq: AN S 319, Junior Classification

Food processing and nutrition for carnivorous companion animals. Topics covered include meat processing and meat preservation for companion animal diets, regulatory standards, cutting edge technologies for processing meat for companion animals, dietary needs of carnivorous companion animals, effect of different processing methods on safety and nutrient bioavailability.

AN S 331: Domestic Animal Reproduction

(3-0) Cr. 3. F.S.

Prereq: AN S 214 or BIOL 255 256 or BIOL 335 or B M S 329

Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes.

AN S 332: Laboratory Methods in Animal Reproduction

(0-2) Cr. 1. F.S.

Prereq: Credit or enrollment in AN S 331

Reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of semen collection and artificial insemination; pregnancy testing.

AN S 332A: Laboratory Methods in Animal Reproduction: Livestock, Companion, and Laboratory Animals

(0-2) Cr. 1. F.S.

Prereq: Credit or enrollment in AN S 331.

Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of semen collection and artificial insemination; pregnancy testing.

AN S 332E: Laboratory Methods in Animal Reproduction: Equine

(0-2) Cr. 1. S.

Prereq: Credit or enrollment in AN S 331.

Reproductive anatomy with emphasis on the physiology of normal reproductive function; breeding season management; ways to control and improve reproduction; semen collection, evaluation, and processing; artificial insemination; pregnancy testing; parturition in the mare, foal care.

AN S 333: Embryo Transfer and Related Technologies

(3-0) Cr. 3. F.

Prereq: AN S 331 or AN S 332

Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer.

AN S 334: Embryo Transfer Laboratory

(0-3) Cr. 1. F.

Prereq: Credit or concurrent enrollment in AN S 333; or AN S 332; permission of instructor

Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, embryo sexing, rectal palpation, and ultrasonography will be demonstrated and/or performed.

AN S 335: Dairy Cattle Evaluation

(0-6) Cr. 3. S.

Prereq: Sophomore classification

Evaluation of breeding dairy replacement animals and lactating for dairy cows. Emphasis placed on familiarity with anatomical terms/structures, the use of comparative terminology, decision-making skills, and presentation of oral reasons. Trips to dairy cattle farms. Livestock handling. (Introduction and skills development course for AN S 475B.)

AN S 336: Domestic Animal Behavior and Well-Being

(2-2) Cr. 3. F.

Prereq: One course in physiology

Understand how managed animals cope and perceive the environment. Principles of behavior and well-being relative to animal care, management and housing. Methods to objectively assess animal well-being. Awareness of animal protection through education/assessments, audits and law.

AN S 337: Lactation

(3-0) Cr. 3. S.

Prereq: AN S 214

The structure, development and evolution of the mammary gland. Mammary metabolism, milk synthesis; neural and endocrine regulation of mammary function. Immune function and health of the mammary gland. Current events related to lactation.

AN S 345: Growth and Development of Domestic Animals

(3-0) Cr. 3. S.

Prereq: AN S 214; BIOL 313 or GEN 320

Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

AN S 352: Genetic Improvement of Domestic Animals

(2-2) Cr. 3. F.S.

Prereq: One course in statistics, BIOL 211, course in genetics

Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation.

AN S 360: Fresh Meats

(3-0) Cr. 3. F.

Prereq: AN S 270; a course in organic or biochemistry

Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat.

AN S 382: Swine Environment Management

(1-0) Cr. 1.

Prereq: AN S 225 or 280 and 280L. Recommended TSM 210.

Response of swine to thermal environment, ventilation system design and analysis, heating and cooling systems, and examples of various designs for all phases of production. Troubleshooting ventilation systems and energy analysis of production units.

AN S 383: Swine Manure and Nutrient Management

(1-0) Cr. 1.

Prereq: An S 225 or An S 280 and An S 280L.

Function, application, and advantages and disadvantages of nutrient management systems. Manure production rates, manure handling systems, storage and manure management planning for land application and odor mitigation strategies.

AN S 384: Swine Health and Biosecurity

(1-0) Cr. 1.

Prereq: AN S 225 or An S 280 and An S 280L. Recommended a course in microbiology.

Overview of standard biosecurity protocols and identification of behavior and clinical signs of illness in pigs. Treatment administration and prevention methods. Introduction to immune system function and basic swine disease transmission.

AN S 399: Animal Science Internship

Cr. arr. Repeatable. F.S.SS.

AN S 399A: Animal Science Internship: Graded Internship Experience

Cr. 2-6. Repeatable. F.S.SS.

Prereq: Permission of the instructor

Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component.

AN S 399B: Animal Science Internship: Supervised Internship Experience

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of the instructor

Learning experience focused on professional development for a career related to animal science. Journal, presentation, and scientific component. This course is designed for those students who are completing a semester long internship located off campus.

AN S 411: Addressing Issues in Animal Science

(0-2) Cr. 1. F.S.

Prereq: Senior classification in An S

Life skill development emphasized in the context of exploring one's perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected.

AN S 415: Equine Systems Management

(2-2) Cr. 3. F.S.

Prereq: AN S 216, AN S 319, AN S 320, AN S 331

Identification and development of financial and production goals in a horse business. Scientific approach to make decisions in management of enterprises in the horse industry.

AN S 419: Advanced Animal Nutrition

(2-0) Cr. 2. F.

Prereq: AN S 319

Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition.

AN S 424: Companion Animal Systems Management

(2-2) Cr. 3. S.

Prereq: AN S 224, AN S 319, AN S 320, AN S 331, AN S 352

Decisions facing the administrator of a companion animal enterprise. Financial and business goal identification, problem clarification, and resource allocation to manage the companion animal system.

AN S 425: Swine Systems Management

(2-2) Cr. 3. F.

Prereq: AN S 225, AN S 270, AN S 270L, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended

Decisions facing the administrator of a swine enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the swine enterprise.

AN S 426: Beef Feedlot Systems Management

(2-2) Cr. 3. S.

Prereq: AN S 226, AN S 270, AN S 270L, AN S 320; recommended: ECON 230 or equivalent

Decisions facing the administrator of a feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise.

AN S 429: Sheep Systems Management

(2-2) Cr. 3. S.

Prereq: AN S 229, AN S 319, AN S 320, AN S 331, AN S 352; AGRON 334 recommended; ECON 230 or equivalent recommended

Decisions facing the administrator of a sheep enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the sheep enterprise.

AN S 434: Dairy Systems Management

(3-0) Cr. 3. F.

Prereq: AN S 235, AN S 319, AN S 331, AN S 320, AN S 337, AN S 352; ECON 230 or equivalent recommended

The scientific foundation of dairy cattle management. The impact of dairy farm management practices on the biological processes of the cow. Integrates concepts from the disciplines of lactation, reproduction, nutrition, genetics, and animal health.

AN S 435: Applied Dairy Farm Evaluation

(2-2) Cr. 3. S.

Prereq: AN S 434; ECON 230

Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications.

AN S 441: International Animal Agriculture

(Cross-listed with GLOBE). (3-0) Cr. 3. S.

Prereq: Two courses from AN S 223, AN S 225, AN S 226, AN S 229, AN S 235

An overview of animal agriculture with emphasis in developing countries. Historical, economic, environmental, and political considerations will be assessed and evaluated. Issues related to gender, resilience and sustainability for different production systems including alternative livestock species, will be investigated. The role of animal source foods in attainment of global food security will be discussed.

Meets International Perspectives Requirement.

AN S 460: Processed Meats

(Dual-listed with AN S 560). (2-2) Cr. 3. S.

Prereq: AN S 270

Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 475: Intercollegiate Judging Training and Competition

(0-4) Cr. 1-2. Repeatable. F.S.

Prereq: permission of instructor

Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475A: Intercollegiate Judging Training and Competition: Meat Animals

(0-4) Cr. 1-2. Repeatable. F.S.

Prereq: permission of instructor

Specialized training in evaluation and grading of livestock. Maximum of 6 credits may be applied toward graduation.

AN S 475B: Intercollegiate Judging Training and Competition: Dairy Cattle

(0-4) Cr. 1-2. Repeatable. F.S.

Prereq: permission of instructor

Specialized training in evaluation and grading of dairy cattle, in particular heifers and lactating dairy cows. Development and advancement of decision-making skills, comparative techniques, and presentation of oral reasons. Maximum of 6 credits may be applied toward graduation.

AN S 475C: Intercollegiate Judging Training and Competition: Meats

(0-4) Cr. 1-2. Repeatable. F.S.

Prereq: permission of instructor

Specialized training in evaluation and grading of livestock/meat products. Maximum of 6 credits may be applied toward graduation.

AN S 475D: Intercollegiate Judging Training and Competition: Meat Animal Evaluation

(0-4) Cr. 1-2. Repeatable. F.S.

Prereq: permission of instructor

Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475E: Intercollegiate Judging Training and Competition: Horses

(0-4) Cr. 1-2. Repeatable. F.S.

Prereq: permission of instructor

Specialized training in evaluation of horses. Emphasis placed on familiarity with anatomical terms/structures, the use of comparative terminology, and decision making skills. Maximum of 6 credits may be applied toward graduation.

AN S 475F: Intercollegiate Judging Training and Competition: Management Systems

(0-4) Cr. 1-2. Repeatable. F.S.

Prereq: permission of instructor

Specialized training in evaluation of livestock/domesticated animal production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 480: Animal Industry Leadership Fellows

Cr. 1. Repeatable. F.S.

Prereq: A. AN S 226; permission of instructor C. AN S 225; permission of instructor

Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480A: Animal Industry Leadership Fellows: Beef

Cr. 1. Repeatable. F.S.

Prereq: AN S 226; permission of instructor

Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480C: Animal Industry Leadership Fellows: Pork

Cr. 1. Repeatable. F.S.

Prereq: AN S 225; permission of instructor

Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480G: Animal Industry Leadership Fellows: Poultry

Cr. 1. Repeatable. F.S.

Prereq: AN S 223; permission of instructor

Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. Central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 489: Issues in Food Safety

(Cross-listed with FS HN, HSP M, VDPAM). (1-0) Cr. 1. S.

Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HSP M 233; FS HN 419 or FS HN 420; FS HN 403

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

AN S 490: Independent Study

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490A: Independent Study: Animal Science

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490B: Independent Study: Dairy Science

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490C: Independent Study: Meat Science

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490D: Independent Study: Companion Animal Science

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490E: Independent Study: Equine Science

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490G: Independent Study: Poultry Science

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490H: Independent Study: Honors

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490I: Independent Study: Entrepreneurship

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of the instructor

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 493: Workshop in Animal Science

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry.

AN S 495: Agricultural Travel Course Preparation

Cr. R. Repeatable. F.S.

Prereq: Permission of instructor

Limited enrollment. Students enrolled in this course will also register for Agron 495 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

AN S 496: Agricultural Travel Course

Cr. arr. Repeatable.

Prereq: Permission of instructor, 30 college credits

Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

AN S 496A: Agricultural Travel Course: International Tour

Cr. arr. Repeatable.

Prereq: Permission of instructor, 30 college credits

Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

Meets International Perspectives Requirement.

AN S 496B: Agricultural Travel Course: Domestic tour

Cr. arr. Repeatable.

Prereq: Permission of instructor, 30 college credits

Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

AN S 497: Undergraduate Teaching Experiences in Animal Science

Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Permission of instructor

Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

AN S 500: Computer Techniques for Biological Research

(2-0) Cr. 1. F.

Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 500A: Computer Techniques for Biological Research: UNIX and SAS

(2-0) Cr. 1. F.

First half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 500B: Computer Techniques for Biological Research: Problem solving using matrix algebra

(2-0) Cr. 1. F.

Second half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 501: Survey of Animal Disciplines

(1-0) Cr. 1. F.

Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Offered on a satisfactory-fail basis only.

AN S 503: Seminar in Animal Production

(1-0) Cr. 1. Repeatable. F.

Prereq: Permission of instructor

Discussion and evaluation of current topics in animal production and management.

AN S 515: Integrated Crop and Livestock Production Systems

(Cross-listed with A B E, AGRON, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: SUSAG 509

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AN S 517: Gut Microbiome: Implications for Health and Diseases

(Cross-listed with FS HN, MICRO, V MPM). Cr. 3.

Prereq: 2-3 credits in microbiology and/or immunology.

Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health.

AN S 518: Digestive Physiology and Metabolism of Non Ruminants

(Cross-listed with NUTRS). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: AN S 419 or NUTRS 501

Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

AN S 520: Digestive Physiology and Metabolism of Ruminants

(Cross-listed with NUTRS). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: AN S 419 or NUTRS 501

Digestive physiology and nutrient metabolism in ruminant and preruminant animals.

AN S 533: Physiology and Endocrinology of Animal Reproduction

(2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: General physiology course

Development of structure and function of the reproductive system. Physiologic and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, maternal recognition, fertilization and early embryonic development.

AN S 536: Perinatology

(2-0) Cr. 2. S.

Prereq: One course in physiology; one course in biochemistry

Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.

AN S 537: Topics in Animal Behavior, Welfare

(3-0) Cr. 3.

Prereq: permission of instructor; M.S. or Ph.D. student

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537A: Topics in Animal Behavior, Welfare: Animal Behavior

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: permission of instructor; M.S. or Ph.D. student

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537B: Topics in Animal Behavior, Welfare: Contemporary Issues.

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: permission of instructor; M.S. or Ph.D. student

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537C: Topics in Animal Behavior, Welfare: Animal Welfare

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: permission of instructor; M.S. or Ph.D. student

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 537D: Topics in Animal Behavior, Welfare: Immune and Stress

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: permission of instructor; M.S. or Ph.D. student

Each semester, the students' focus is on different topics related to animal behavior, animal welfare and contemporary issues related to animal behavior and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line course only. Each topic may be taken only one time for credit.

AN S 540: Livestock Immunogenetics

(Cross-listed with MICRO, V MPM). (2-0) Cr. 2. Alt. S., offered odd-numbered years.

Prereq: AN S 561 or MICRO 575 or V MPM 520

Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

AN S 549: Advanced Vertebrate Physiology I

(Cross-listed with KIN, NUTRS). (4-0) Cr. 4. F.

Prereq: recommended: an undergraduate physiology course and a biochemistry course

Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

AN S 552: Advanced Vertebrate Physiology II

(Cross-listed with KIN, NUTRS). (3-0) Cr. 3. S.

Prereq: BIOL 335; credit or enrollment in BBMB 404 or BBMB 420

Cardiovascular, renal, respiratory, and digestive physiology.

AN S 556: Current Topics in Genome Analysis

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: BBMB 405 or GDCB 510

Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes.

AN S 560: Processed Meats

(Dual-listed with AN S 460). (2-2) Cr. 3. S.

Prereq: AN S 270

Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 561: Population and Quantitative Genetics for Breeding

(Cross-listed with AGRON). (4-0) Cr. 4. F.

Prereq: STAT 401

Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.

AN S 562: Methodologies for Population/Quantitative Genetics

(2-0) Cr. 2. S.

Prereq: AN S 561, STAT 402

Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562A: Methodologies for Population/Quantitative Genetics: Linear Models and Genetic Prediction

(2-0) Cr. 2. S.

Prereq: AN S 561, STAT 402

Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562B: Methodologies for Population/Quantitative Genetics: Advanced Genetic Prediction&Parameter Estimation

(2-0) Cr. 2. S.

Prereq: AN S 561, STAT 402

Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 570: Advanced Meat Science and Applied Muscle Biology

(2-2) Cr. 3. S.

Prereq: AN S 460

Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. Oral research reports and a research proposal.

AN S 571: Advanced Meat Processing Principles and Technology

(2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: AN S 460 or AN S 570

Physical/chemical relationships during processing. Effects of modern technology, non-meat additives and preservation techniques on quality and safety of processed meat. Laboratory demonstration of principles and technology.

AN S 590: Special Topics

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590A: Special Topics: Animal Breeding

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590B: Special Topics: Animal Nutrition

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590C: Special Topics: Meat Animal Production

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590D: Special Topics: Dairy Production

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590E: Special Topics: Meat Science

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590F: Special Topics: Physiology of Reproduction

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590G: Special Topics: Muscle Biology

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590H: Special Topics: Poultry Nutrition

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590I: Special Topics: Poultry Products

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590J: Special Topics: Experimental Surgery

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590K: Special Topics: Professional Topics

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590L: Special Topics: Teaching

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590M: Special Topics: Molecular Biology

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590N: Special Topics: Ethology

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 599: Creative Component

Cr. 1-8. F.S.SS.

Prereq: Nonthesis M.S

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599A: Creative Component: Animal Breeding and Genetics

Cr. 1-8. F.S.SS.

Prereq: Nonthesis M.S

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599B: Creative Component: Animal Nutrition

Cr. 1-8. F.S.SS.

Prereq: Nonthesis M.S

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599C: Creative Component: Animal Physiology

Cr. 1-8. F.S.SS.

Prereq: Nonthesis M.S

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599D: Creative Component: Animal Science

Cr. 1-8. F.S.SS.

Prereq: Nonthesis M.S

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

AN S 599E: Creative Component: Meat Science

Cr. 1-8. F.S.SS.

Prereq: Nonthesis M.S

A written report based on research, library readings, or topics related to the student's area of specialization and approved by the student's advisory committee.

Courses for graduate students:**AN S 603: Seminar in Animal Nutrition**

(1-0) Cr. 1. Repeatable. F.S.

Prereq: Permission of instructor

Discussion of current literature; preparation and submission of abstracts.

AN S 618: Vitamins and Minerals

(Cross-listed with NUTRS). Cr. 2. Alt. S., offered even-numbered years.

Prereq: Biochemistry, physiology, basic nutrition

Understanding molecular aspects of vitamin and mineral metabolism and homeostasis in humans and animals. An in-depth examination of the chemistry of vitamins and minerals, including genetic mutations, proteins involved in absorption and excretion, and their necessity in biological processes.

AN S 619: Advanced Nutrition and Metabolism - Protein

(Cross-listed with NUTRS). (2-0) Cr. 2. F.

Prereq: BBMB 405

Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.

AN S 620: Advanced Nutrition and Metabolism - Energy

(Cross-listed with NUTRS). (2-0) Cr. 2. Alt. S., offered odd-numbered years.

Prereq: BBMB 405

Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research.

AN S 633: Seminar in Animal Reproduction

(1-0) Cr. 1. Repeatable. F.

Prereq: Permission of instructor

Discussion of current literature and preparation of reports and seminars on selected topics concerning animal physiology.

AN S 652: Animal Breeding Strategies

(2-0) Cr. 2.

Prereq: AN S 561

Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652A: Animal Breeding Strategies: Breeding Goals and Response to Selection

(2-0) Cr. 2.

Prereq: AN S 561

Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652B: Animal Breeding Strategies: Design and Evaluation of Animal Breeding Programs

(2-0) Cr. 2.

Prereq: AN S 561

Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 653: Applied Animal Breeding Strategies

(2-0) Cr. 2. F.

Prereq: AN S 561 recommended

Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

AN S 653A: Applied Animal Breeding Strategies: Swine and Poultry

(2-0) Cr. 2. F.

Prereq: AN S 561 recommended

Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

AN S 653B: Applied Animal Breeding Strategies: Beef and Dairy

(2-0) Cr. 2. F.

Prereq: AN S 561 recommended

Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

AN S 655: Advanced Computational Methods in Animal Breeding and Genetics

(3-1) Cr. 2. Alt. F., offered odd-numbered years.

Prereq: AN S 500, AN S 562, Com S 207

Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 655A: Computational Strategies for Predicting Breeding Values

(3-1) Cr. 2. Alt. F., offered odd-numbered years.

Prereq: AN S 500, AN S 562, COM S 207

Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs.

AN S 655B: Computational Strategies for Genetic Parameter Estimation

(3-1) Cr. 2. Alt. F., offered odd-numbered years.

Prereq: AN S 500, AN S 562, COM S 207

Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 656: Statistical Methods for Mapping Quantitative Trait Loci

(2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: AN S 562, STAT 447

Statistical methods for mapping quantitative trait loci in out-bred populations. Methods based on modeling covariances between relatives. Likelihood based methods using half-sib and full-sib families and extended pedigrees. Bayesian methods applied.

AN S 658: Seminar in Animal Breeding and Genetics

(1-0) Cr. 1. Repeatable. F.S.

Presentation of current research related to animal breeding and genetics.

AN S 670: Molecular Biology of Muscle

(Cross-listed with KIN). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: BBMB 405, BBMB 420

Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

AN S 684: Seminar in Meat Science

(1-0) Cr. 1. Repeatable. S.

Prereq: Permission of instructor

Discussion and evaluation of current topics in research publications in meat science.

AN S 685: Seminar in Muscle Biology

(1-0) Cr. 1. Repeatable. S.

Prereq: Permission of instructor

Reports and discussion of recent literature and current investigations.

AN S 695: Seminar in Animal Science

(1-0) Cr. 1. Repeatable. S.

Reports and discussion of current issues and research in animal science. One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Offered on a satisfactory-fail basis only.

AN S 699: Research

Cr. arr. Repeatable.

AN S 699A: Research: Animal Breeding

Cr. arr. Repeatable.

AN S 699B: Research: Animal Nutrition

Cr. arr. Repeatable.

AN S 699C: Research: Meat Animal Production

Cr. arr. Repeatable.

AN S 699D: Research: Dairy Production

Cr. arr. Repeatable.

AN S 699E: Research: Meat Science

Cr. arr. Repeatable.

AN S 699F: Research: Physiology of Reproduction

Cr. arr. Repeatable.

AN S 699G: Research: Muscle Biology

Cr. arr. Repeatable.

AN S 699H: Research: Poultry Nutrition

Cr. arr. Repeatable.

AN S 699I: Research: Poultry Products

Cr. arr. Repeatable.

AN S 699J: Research: Animal Ethology

Cr. arr. Repeatable.

Anthropology (ANTHR)

Any experimental courses offered by ANTHR can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

ANTHR 201: Introduction to Cultural Anthropology

(3-0) Cr. 3. F.S.SS.

Comparative study of culture as key to understanding human behaviors in different societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined. Meets International Perspectives Requirement.

ANTHR 202: Introduction to Biological Anthropology and Archaeology

(3-0) Cr. 3. F.S.

Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology.

ANTHR 220: Globalization and Sustainability

(Cross-listed with ENV S, GLOBE, M E, MAT E, SOC). (3-0) Cr. 3. F.S.

An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement.

ANTHR 225: American Indians of Iowa

(Cross-listed with AM IN). Cr. 3. F.

Cultures and histories of Native people who have called the present state of Iowa home; primary focus on the period between 1700 CE and the present; Native interactions with Spanish, French, British, and American people. Meets U.S. Diversity Requirement

ANTHR 230: Globalization and the Human Condition

(3-0) Cr. 3. F.S.

An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific. Meets International Perspectives Requirement.

ANTHR 250: Primate Behavior

(3-0) Cr. 3. F.S.SS.

Prereq: ANTHR 202 and/or basic biology course recommended

An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and prosimians; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

ANTHR 306: Cultural Anthropology

(3-0) Cr. 3. S.

Prereq: ANTHR 201

Survey of the major theoretical, methodological and empirical foundations of cultural anthropology. Meets International Perspectives Requirement.

ANTHR 307: Biological Anthropology

(2-2) Cr. 3. S.

Prereq: ANTHR 202

Human evolution as known from fossil evidence, comparative primate studies, and genetic variations in living populations. Laboratory-tutorial sessions include study and discussion of human osteology, fossil hominids, simple Mendelian traits, and bio-ethics in applied biological anthropology.

ANTHR 308: Archaeology

(2-2) Cr. 3. F.

Prereq: ANTHR 202

Methods and techniques for the recovery and interpretation of archaeological evidence, its role in reconstructing human behavior and past environments. Laboratory sessions include experience in the interpretation of archaeological evidence, the use of classification systems, and prehistoric technologies such as ceramics and stone tools.

ANTHR 309: Introduction to Culture and Language

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: ANTHR 201 recommended

Introduction to study of language, culture and society from an anthropological perspective. Focus on language and thought, ethnography of speaking, discourse and narrative, writing and literacy, and media communication. Discussion of key theories and methods of linguistic anthropology.

Meets International Perspectives Requirement.

ANTHR 313: Kinship and Marriage in a Global Perspective

(Dual-listed with ANTHR 513). (3-0) Cr. 3. S.

Prereq: ANTHR 201 recommended

Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality. Meets International Perspectives Requirement.

ANTHR 315: Archaeology of North America

(Dual-listed with ANTHR 515). (Cross-listed with AM IN). (3-0) Cr. 3. S.

Prereq: ANTHR 202

Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture- historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Meets U.S. Diversity Requirement

ANTHR 319: Skeletal Biology

(Dual-listed with ANTHR 519). (2-2) Cr. 3. F.

Prereq: ANTHR 307 or college level biology

Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.

ANTHR 320: Great Plains Archaeology

(Dual-listed with ANTHR 520). (Cross-listed with AM IN). (3-0) Cr. 3. F.

Prereq: ANTHR 202

Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information.

Meets U.S. Diversity Requirement

ANTHR 321: World Prehistory

(Dual-listed with ANTHR 521). (3-0) Cr. 3. S.

Prereq: ANTHR 202 recommended

An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies.

ANTHR 322: Peoples and Cultures of Native North America

(Dual-listed with ANTHR 522). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or AM IN 210

Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life.

Meets U.S. Diversity Requirement

ANTHR 323: Topics in Latin American Anthropology

(Dual-listed with ANTHR 523). (Cross-listed with US LS). (3-0) Cr. 3.

Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

ANTHR 323A: Latin American Anthropology: Violence and Memory

(Dual-listed with ANTHR 523A). (Cross-listed with US LS). (3-0) Cr. 3.

Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 323B: Latin American Anthropology: Social movements and Democracy

(Dual-listed with ANTHR 523B). (Cross-listed with US LS). (3-0) Cr. 3.

Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 323C: Latin American Anthropology: Race, Class and Gender

(Dual-listed with ANTHR 523C). (Cross-listed with US LS). (3-0) Cr. 3.

Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 323D: Latin American Anthropology: Regional Focus

(Dual-listed with ANTHR 523D). (Cross-listed with US LS). (3-0) Cr. 3.

Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 323E: Latin American Anthropology: Culture and Sport.

(Dual-listed with ANTHR 523E). (Cross-listed with US LS). (3-0) Cr. 3.

Repeatable, maximum of 9 credits.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 324: Health and Native American Communities

(Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ENGL 250

Overview of historic and contemporary health and health care in Native Communities. Indian Health Service and specific regulations. Consideration of both cultural and scientific approaches to medicine. Specific health issues (e.g., diabetes, alcoholism, depression, etc.) in American Indian communities.

Meets U.S. Diversity Requirement

ANTHR 325: Peoples and Cultures of Africa.

(Cross-listed with AF AM). (3-0) Cr. 3.

Prereq: 201 or 306 recommended.

Survey of diverse African culture areas across the continent and globally; local level description and analysis of individuals as members of African communities; regional, national and global scales of identification.

Meets International Perspectives Requirement.

ANTHR 328: Archaeological Discovery and Analysis

(2-2) Cr. 3. Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 308

Identification, analysis, and interpretation of animal bones recovered from archaeological sites, emphasizing taphonomy, paleoecology, and faunal exploitation.

ANTHR 332: Current Issues in Native North America

(Dual-listed with ANTHR 532). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.

Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 332A: Current Issues in Native North America: Gender and Family

(Dual-listed with ANTHR 532A). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered.

Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 332B: Current Issues in Native North America: Indigenous Ecologies and Geographies

(Dual-listed with ANTHR 532B). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 332C: Current Issues in Native North America: Cultural and Political Movements

(Dual-listed with ANTHR 532C). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 332D: Current Issues in Native North America: Regional Focus

(Dual-listed with ANTHR 532D). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 336: Global Development

(Dual-listed with ANTHR 536). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: ANTHR 201 or ANTHR 306

Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology.

Meets International Perspectives Requirement.

ANTHR 340: Magic, Witchcraft, and Religion

(Dual-listed with ANTHR 540). (Cross-listed with RELIG). (3-0) Cr. 3. S.

Prereq: ANTHR 201 or ANTHR 306

Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice.

Meets International Perspectives Requirement.

ANTHR 354: War and the Politics of Humanitarianism

(Cross-listed with POL S). (3-0) Cr. 3. S.

Prereq: Pol S 235, Pol S 251, Anthr 210, or Anthr 230

Humanitarianism as a system of thought and a system of intervention in conflict and post-conflict situations. Role of humanitarian organizations and actors in addressing human suffering caused by conflict or war.

Military action as a form of humanitarian intervention.

Meets International Perspectives Requirement.

ANTHR 376: Classical Archaeology

(Cross-listed with CL ST). (3-0) Cr. 3.

Chronological survey of the material culture of the ancient Graeco-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

ANTHR 376A: Classical Archeology: Bronze Age and Early Iron Age Greece

(Cross-listed with CL ST). (3-0) Cr. 3.

Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece. (ca 3000-700 BCE). Chronological survey of the material culture of the ancient Greece-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

ANTHR 376B: Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)

(Cross-listed with CL ST). (3-0) Cr. 3.

Chronological survey of the material culture of ancient Greece from ca. 700-30 BCE and the role of archaeological context in understanding the varied aspects of Greek culture during the Archaic, Classical, and Hellenistic periods. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

ANTHR 376C: Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)

(Cross-listed with CL ST). (3-0) Cr. 3.

Chronological survey of the material culture of the ancient Roman world and the role of archaeological context in understanding the varied aspects of ancient Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

ANTHR 411: Anthropology for Global Professionals

(Dual-listed with ANTHR 511). (3-0) Cr. 3. F.

Prereq: ANTHR 201 or ANTHR 306

Theory and methods for conducting ethnographic research in academic and non-academic settings; application of anthropological knowledge to contemporary cultural, political, economic, environmental and spatial issues; development of skills necessary for professional practice as an anthropologist.

Meets International Perspectives Requirement.

ANTHR 418: Global Culture, Consumption and Modernity

(Dual-listed with ANTHR 518). (3-0) Cr. 3. F.

Prereq: ANTHR 201 or ANTHR 306 recommended

Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.

Meets International Perspectives Requirement.

ANTHR 419: Topics in Cultural Anthropology

(3-0) Cr. 3.

Prereq: ANTHR 306

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. Each section may be taken once for credit up to 9 credits. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419A: Topics in Cultural Anthropology: Theory

(3-0) Cr. 3.

Prereq: ANTHR 306

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419B: Topics in Cultural Anthropology: Methods

(3-0) Cr. 3.

Prereq: ANTHR 306

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419C: Topics in Cultural Anthropology: Regional Focus

(3-0) Cr. 3.

Prereq: ANTHR 306

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 419D: Topics in Cultural Anthropology: Others

(3-0) Cr. 3.

Prereq: ANTHR 306

In-depth study of current topics in cultural anthropology, such as recent theoretical trends, new methodologies, or new research on a specific region. Topics vary each time offered. No more than 9 credits of ANTHR 419 courses may be applied towards graduation.

ANTHR 424: Forensic Anthropology

(Dual-listed with ANTHR 524). (2-2) Cr. 3. S.

Prereq: ANTHR 202 or ANTHR 307; ANTHR 319 recommended

Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

ANTHR 425: Professional Preparation in Anthropology

(1-0) Cr. 1. F.

Prereq: Junior classification in anthropology or permission from the instructor

Instruction and guidance in the development of professional skills needed for success in academic and non-academic anthropological careers. Topics will include strategies for internship and job searches, creating resumes and CVs, composing personal statements and cover letters, and developing contacts and sources. Offered on a satisfactory-fail basis only.

ANTHR 427I: Field Archaeology

(Cross-listed with IA LL). Cr. 4. SS.

Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and excavation techniques.

ANTHR 429: Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School

(Dual-listed with ANTHR 529). Cr. 4-6. SS.

Prereq: ANTHR 202 or ANTHR 308

Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

ANTHR 431: Ethnographic Methods

(Dual-listed with ANTHR 531). Cr. 3-6.

Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

ANTHR 434: Internship

Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior standing

Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 434A: Internship: Archaeology

Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior standing

Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 434B: Internship: Cultural Anthropology

Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior standing

Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 434C: Internship: Biological Anthropology

Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior standing

Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 434D: Internship: Linguistic Anthropology

Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Junior or senior standing

Supervised practice in government agencies, museums, and business organizations. Offered on a satisfactory-fail basis only. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy Anthropology core courses for majors or for the Anthropology minor.

ANTHR 438: Primate Evolutionary Ecology and Behavior

(Dual-listed with ANTHR 538). Cr. 3. S.

Prereq: ANTHR 202 or ANTHR 307

Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

ANTHR 444: Sex and Gender in Cross-cultural Perspective

(Dual-listed with ANTHR 544). (Cross-listed with WGS). (3-0) Cr. 3. S.

Prereq: ANTHR 201; ANTHR 306 recommended

Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Meets International Perspectives Requirement.

ANTHR 445: Biological Field School

(Dual-listed with ANTHR 545). Cr. 4-6. SS.

Prereq: ANTHR 202 or BIOL 101

Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

ANTHR 450: Approaches in Anthropology

(3-0) Cr. 3. F.

Prereq: ANTHR 306

Examination of key approaches to anthropology and its interrelated sub-fields with a focus on major theoretical and analytical contributions.

ANTHR 451: Practicum in Anthropology

Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451A: Practicum in Anthropology: Archaeology

Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451B: Practicum in Anthropology: Cultural Anthropology

Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451C: Practicum in Anthropology: Biological Anthropology

Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 451D: Practicum in Anthropology: Linguistic Anthropology

Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: ANTHR 201 or ANTHR 202 or ANTHR 308

Application of methods under actual laboratory and field conditions, including basic data management, synthesis, and analysis.

ANTHR 482: Topics in Biological Anthropology

(Dual-listed with ANTHR 582). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482A: Topics in Biological Anthropology: Paleoanthropology

(Dual-listed with ANTHR 582A). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482B: Topics in Biological Anthropology: Primate Cognition

(Dual-listed with ANTHR 582B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482C: Topics in Biological Anthropology: Primate Conservation

(Dual-listed with ANTHR 582C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 482D: Topics in Biological Anthropology: Population Genetics and Human Evolution

(Dual-listed with ANTHR 582D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 490: Independent Study

Cr. 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in anthropology

No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490A: Independent Study: Archaeology

Cr. 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in anthropology

No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490B: Independent Study: Cultural Anthropology

Cr. 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in anthropology

No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490C: Independent Study: Biological Anthropology

Cr. 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in anthropology

No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490D: Independent Study: Linguistic Anthropology

(Cross-listed with LING). Cr. 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in anthropology.

No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490H: Independent Study: Honors

Cr. 1-5. Repeatable, maximum of 9 credits.

Prereq: 9 credits in anthropology

No more than 9 credits of Anthr 490 may be counted toward graduation.

ANTHR 490I: Iowa Lakeside Laboratory

(Cross-listed with IA LL, NREM). Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: 8 credits in biology and permission of instructor

Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

Courses primarily for graduate students, open to qualified undergraduates:**ANTHR 503: Biological Anthropology and Archaeology**

(3-0) Cr. 3.

Prereq: ANTHR 307 and ANTHR 308

History of biological anthropology and archaeology, current developments and theoretical issues related to major events in human biocultural evolution and world prehistory.

ANTHR 509: Agroecosystems Analysis

(Cross-listed with AGRON, SOC, SUSAG). (3-4) Cr. 3. F.

Prereq: Senior or above classification

Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecologic, social, etc.) and scales of operation.

ANTHR 510: Theoretical Dimensions of Cultural Anthropology

(3-0) Cr. 3. F.

Prereq: 6 credits in anthropology

Survey of historical and current developments in topical and theoretical approaches to sociocultural anthropology. Examination and assessment of controversies; new research directions and theoretical approaches.

ANTHR 511: Anthropology for Global Professionals

(Dual-listed with ANTHR 411). (3-0) Cr. 3. F.

Prereq: ANTHR 201 or ANTHR 306

Theory and methods for conducting ethnographic research in academic and non-academic settings; application of anthropological knowledge to contemporary cultural, political, economic, environmental and spatial issues; development of skills necessary for professional practice as an anthropologist.

Meets International Perspectives Requirement.

ANTHR 513: Kinship and Marriage in a Global Perspective

(Dual-listed with ANTHR 313). (3-0) Cr. 3. S.

Prereq: ANTHR 201 recommended

Comparative and historical overview of the family, marriage and kinship. Examination of cross-cultural differences in the construction and functioning of family and kin relations; role of kinship in structuring individual and collective activities; current critical and theoretical issues in kinship studies, especially integrating work on gender and sexuality.

Meets International Perspectives Requirement.

ANTHR 515: Archaeology of North America

(Dual-listed with ANTHR 315). (3-0) Cr. 3. S.

Prereq: ANTHR 202

Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture- historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Meets U.S. Diversity Requirement

ANTHR 518: Global Culture, Consumption and Modernity

(Dual-listed with ANTHR 418). (3-0) Cr. 3. F.

Prereq: ANTHR 201 or ANTHR 306 recommended

Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.

Meets International Perspectives Requirement.

ANTHR 519: Skeletal Biology

(Dual-listed with ANTHR 319). (2-2) Cr. 3. F.

Prereq: ANTHR 307 or college level biology

Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.

ANTHR 520: Great Plains Archaeology

(Dual-listed with ANTHR 320). (3-0) Cr. 3. F.

Prereq: ANTHR 202

Prehistoric societies of the Great Plains region of North America, from initial occupation to European contact; emphasis on sociocultural changes, continuities, and adaptations to changing environments using archaeological, ecological, ethnographic information.

Meets U.S. Diversity Requirement

ANTHR 521: World Prehistory

(Dual-listed with ANTHR 321). (3-0) Cr. 3. S.

Prereq: ANTHR 202 recommended

An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past societies.

ANTHR 522: Peoples and Cultures of Native North America

(Dual-listed with ANTHR 322). (3-0) Cr. 3.

Prereq: ANTHR 201 or AM IN 210

Origin, distribution, and pre-contact life of the indigenous peoples of North America. Survey of culture areas; language families, social and political systems, ecological and economic adaptations, religion and spirituality; impact of European contact; cultural resilience and revitalization in contemporary American Indian life.

Meets U.S. Diversity Requirement

ANTHR 523: Topics in Latin American Anthropology

(Dual-listed with ANTHR 323). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

ANTHR 523A: Latin American Anthropology: Violence and Memory

(Dual-listed with ANTHR 323A). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 523B: Latin American Anthropology: Social movements and Democracy

(Dual-listed with ANTHR 323B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 523C: Latin American Anthropology: Race, Class and Gender

(Dual-listed with ANTHR 323C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 523D: Latin American Anthropology: Regional Focus

(Dual-listed with ANTHR 323D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. S.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 523E: Latin American Anthropology: Culture and Sport.

(Dual-listed with ANTHR 323E). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: ANTHR 201 or ANTHR 306 recommended

Exploration of key contemporary and historical issues in Latin American Anthropology; discussion of current anthropological approaches to studying Latin American social issues in a global context. Topics vary each time offered.

Meets International Perspectives Requirement.

ANTHR 524: Forensic Anthropology

(Dual-listed with ANTHR 424). (2-2) Cr. 3. S.

Prereq: ANTHR 202 or ANTHR 307; ANTHR 319 recommended

Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, comingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

ANTHR 529: Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School

(Dual-listed with ANTHR 429). Cr. 4-6. SS.

Prereq: ANTHR 202 or ANTHR 308

Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

ANTHR 531: Ethnographic Methods

(Dual-listed with ANTHR 431). Cr. 3-6.

Hands-on training in ethnographic field methods; students will carry out research projects in socio-cultural anthropology, learning a variety of investigative research techniques commonly used in social sciences.

ANTHR 532: Current Issues in Native North America

(Dual-listed with ANTHR 332). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 532A: Current Issues in Native North America: Gender and Family

(Dual-listed with ANTHR 332A). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 532B: Current Issues in Native North America: Indigenous Ecologies and Geographies

(Dual-listed with ANTHR 332B). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 532C: Current Issues in Native North America: Cultural and Political Movements

(Dual-listed with ANTHR 332C). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 532D: Current Issues in Native North America: Regional Focus

(Dual-listed with ANTHR 332D). (Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ANTHR 201 or ANTHR 306; ANTHR 322 or AM IN 210 recommended

Exploration of key contemporary and historical issues in Native North America; discussion of current anthropological approaches to studying Native North America in a global context. Topics vary each time offered. Only 9 credits of ANTHR/AM IN 332A, 332B, 332C, 332D may count toward graduation.

Meets U.S. Diversity Requirement

ANTHR 536: Global Development

(Dual-listed with ANTHR 336). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: ANTHR 201 or ANTHR 306

Cross-cultural analysis of current development practices from an anthropological perspective; focus on international aid, development institutions, agrarian reform, indigenous knowledge, humanitarianism and human rights; introduction to main theories of political and economic anthropology.

Meets International Perspectives Requirement.

ANTHR 538: Primate Evolutionary Ecology and Behavior

(Dual-listed with ANTHR 438). Cr. 3. S.

Prereq: ANTHR 202 or ANTHR 307

Primate behavior and ecology in evolutionary perspective: biological and social adaptations of prosimians, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

ANTHR 540: Magic, Witchcraft, and Religion

(Dual-listed with ANTHR 340). (Cross-listed with RELIG). (3-0) Cr. 3. S.

Prereq: ANTHR 201 or ANTHR 306

Survey of global religious belief and practice from an anthropological perspective. Emphasis on myth and ritual, shamanism, magic, witchcraft, beliefs in spirits, conceptions of the soul, mind and body relationships, and healing and therapeutic practices. Discussion of religious response to dramatic political and social change; effects of globalization on religious practice.

Meets International Perspectives Requirement.

ANTHR 541: Seminar in Forensic Sciences

(1-0) Cr. 1. Repeatable. S.

Prereq: One 200-level science course or graduate classification

Seminars by professional criminalists, research scientists, Certificate students, and educators. Emphasis on opportunities for research and development, citizen involvement, and educational outreach related to forensic science. Weekly report required.

ANTHR 542: Independent Research and Presentation in Forensic Science

(1-0) Cr. 1. S.

Prereq: Enrollment in the Graduate Certificate in Forensic Sciences

Research topic approved by course instructor. Written and oral reports required. Oral report given in forensics seminar, Chem 540.

ANTHR 544: Sex and Gender in Cross-cultural Perspective

(Dual-listed with ANTHR 444). (Cross-listed with WGS). (3-0) Cr. 3. S.

Prereq: ANTHR 201; ANTHR 306 recommended

Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Meets International Perspectives Requirement.

ANTHR 545: Biological Field School

(Dual-listed with ANTHR 445). Cr. 4-6. SS.

Prereq: ANTHR 202 or BIOL 101

Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

ANTHR 582: Topics in Biological Anthropology

(Dual-listed with ANTHR 482). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582A: Topics in Biological Anthropology: Paleoanthropology

(Dual-listed with ANTHR 482A). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582B: Topics in Biological Anthropology: Primate Cognition

(Dual-listed with ANTHR 482B). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582C: Topics in Biological Anthropology: Primate Conservation

(Dual-listed with ANTHR 482C). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 582D: Topics in Biological Anthropology: Population Genetics and Human Evolution

(Dual-listed with ANTHR 482D). (3-0) Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ANTHR 307

In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates.

ANTHR 590: Graduate Independent Study

(Cross-listed with A ECL, EEOB, IA LL). Cr. 1-4. Repeatable. SS.

Prereq: Graduate classification and permission of instructor

ANTHR 590I: Special Topics: Graduate Independent Study

(Cross-listed with A ECL, EEOB, IA LL). Cr. 1-4. Repeatable. SS.

Prereq: Graduate classification and permission of instructor

ANTHR 591: Orientation to Anthropology

(1-0) Cr. 1. F.

Prereq: Admission to the Anthropology Graduate Program

Introduction to the Anthropology program, including the requirements for successful degree completion, department administrative procedures, ethics in anthropology and current trends in the four subfields of anthropology. Required of graduate students. Offered on a satisfactory-fail basis only.

Courses for graduate students:**ANTHR 610: Foundations of Sustainable Agriculture**

(Cross-listed with A B E, AGRON, SOC, SUSAG). (3-0) Cr. 3. F.

Prereq: Graduate classification, permission of instructor

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

ANTHR 699: Research

Cr. arr. Repeatable.

ANTHR 699I: Iowa Lakeside Laboratory (Same as Ia LL 699I.)

(Cross-listed with A ECL, EEOB, GDCB, IA LL). Cr. arr. Repeatable.

Apparel, Events, and Hospitality Management (AESHM)

Any experimental courses offered by AESHM can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**AESHM 112: Orientation for AESHM**

(1-0) Cr. 1. F.S.

Prereq: Concurrent enrollment with AESHM 113

Orientation policies and procedures of university and college. Guest speakers representing the university. Some online lectures.

AESHM 113: Professional Development for AESHM

(1-0) Cr. 1-2. F.

Career exploration, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components. Orientation to policies and procedures of college, department, and program.

AESHM 113E: Professional Development for AESHM: Event and Hospitality Management - Directions Learning Community

(2-0) Cr. 2. F.

Career exploration in Event Management and Hospitality Management, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components for first year students. Orientation to policies and procedures of College of Human Sciences; AESHM department; and Event Management and Hospitality Management programs. Field Trip.

AESHM 113N: Professional Development for AESHM: Common Threads Learning Community

(1-0) Cr. 1. F.

Career exploration in Apparel Merchandising and Design, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components for first year students. Orientation to policies and procedures of College of Human Sciences; and AESHM department and AMD programs.

AESHM 170: Supervised Work Experience I

Cr. 1. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Adviser permission required; freshman classification or permission

Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170D: Supervised Work Experience I: Hospitality

Cr. 1. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Adviser permission required

Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170F: Supervised Work Experience I: Event Management

Cr. 1. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Adviser permission required

Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 170N: Supervised Work Experience I: Apparel

Cr. 1. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Adviser permission required; freshman classification

Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 175: Financial Applications for Retail and Hospitality Industries
(2-0) Cr. 2. S.

Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel and hospitality industries.

AESHM 175D: Financial Applications for Retail and Hospitality Industries: Hospitality Management
(2-0) Cr. 2. S.

Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the hospitality industries.

AESHM 175N: Financial Applications for Retail and Hospitality Industries: Retail Merchandising
(2-0) Cr. 2. S.

Using an online delivery method, students will learn basic mathematical concepts, calculations and formulas commonly used in the apparel and hospitality industries. Emphasis on problem solving, critical/creative thinking, and mathematical interpretation of calculations and formulas used within the apparel industries.

AESHM 180: First Year Student Field Study
Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor

Study of and tours of regional areas of interest to A M D, HSP M, or EVENT majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 180E: First Year Student Field Study: Hospitality and Event Management
Cr. 1-2. Repeatable, maximum of 2 times. F.S.
Prereq: Permission of instructor

Study of and tours of regional areas of interest to majors in the HSP M and EVENT majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 180N: First Year Student Field Study: Apparel, Merchandising, and Design

Cr. 1-2. Repeatable, maximum of 2 times. F.S.

Prereq: Permission of instructor

Study of and tours of regional areas of interest to A M D majors. Trip to regional location under supervision of faculty member. Locations vary. Journal entries and final report/analysis are required. Cost associated with trip.

AESHM 211: Leadership Experiences and Development (LEAD)
(3-0) Cr. 3. S.

Introduction to leadership behaviors. Development and utilization of leadership behaviors to positively impact school life, community life, and work life.

AESHM 213: Transitions: Pre-Professional Strategies and Career Explorations
(1-0) Cr. 1. F.S.

Prereq: Transfer student or change-of-major in A M D, EVENT, or HSP M majors

Fast track pre-professional development strategies, career exploration, and multi-dimensional academic and extracurricular planning for students in transition including transfer and change of majors.

AESHM 213E: Transitions: Pre-Professional Strategies and Career Explorations
(1-0) Cr. 1. F.S.

Prereq: Transfer student or change-of-major in EVENT or HSP M majors

Fast track pre-professional development strategies, career exploration, and multi-dimensional academic and extracurricular planning for students in transition including transfer and change of majors.

AESHM 213N: Transitions: Pre-Professional Strategies and Career Explorations
(1-0) Cr. 1. F.S.

Prereq: Transfer student or change of major in A M D major

Fast track pre-professional development strategies, career exploration, and multi-dimensional academic and extracurricular planning for students in transition including transfer and change of majors.

AESHM 222: Creativity on Demand
(3-0) Cr. 3. S.

Learn to use creativity strategies to solve everyday problems related to personal and professional lives. Application of creative thinking techniques to view things from different perspectives; identify unique opportunities; and generate and evaluate original ideas.

AESHM 238: Human Resource Management

(3-0) Cr. 3. F.S.

Prereq: A MD 275 or AESHM 270, or AESHM 287 or concurrent enrollment; sophomore classification

Principles and practices of human resource management relevant to human science-related organizations. Emphasis on the entry-level manager's role.

AESHM 270: Supervised Work Experience II

Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Minimum 2.0 GPA; Adviser permission required; sophomore classification

Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 270D: Supervised Work Experience II: Hospitality

Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Minimum 2.0 GPA; Adviser permission required; sophomore classification; 6 cr in AESHM or HSP M, credits in AESHM 170

Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, AESHM 270, and 470 may be applied toward graduation.

AESHM 270F: Supervised Work Experience II: Event Management

Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Minimum 2.0 GPA; Adviser permission required; 6 cr in AESHM, HSP M, or EVENT; employer location should be different than employer location used for AESHM 170 and 470.

Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 270N: Supervised Work Experience II: Apparel

Cr. 1-2. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Minimum 2.0 GPA; Adviser permission required. Sophomore AMD classification

Supervised work experience with a cooperating firm or organization. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 272: Fashion Show Production and Promotion

(2-2) Cr. 1-3. Repeatable, maximum of 4 credits. F.S.

Prereq: Application and instructor permission, application form available from the AESHM Department office

Planning and production of fashion show including developing budgets, public relations, advertising, fund-raising, choreography, staging, lighting, and food. Promotion of fashion show and similar events. Maximum of 4 credits can be applied to graduation

AESHM 280: Orientation to U.S. Field Study

Cr. R. Repeatable, maximum of 2 times. F.S.

Orientation to the field study location during the semester preceding the trip.

AESHM 281: Orientation to International Field Study

Cr. 1. Repeatable, maximum of 2 times. F.S.

Orientation to the field study location during the semester preceding the trip.

AESHM 287: Principles of Management in Human Sciences

(3-0) Cr. 3. F.S.

Introduction to management concepts and principles with application to human sciences-related businesses and organizations. Includes service quality management, professionalism, and social responsibility.

AESHM 311: Seminar on Careers and Internships

(1-0) Cr. 1. F.S.

Prereq: AESHM 113; Sophomore classification. Good academic standing
Internship and career planning, professional expectations and responsibilities. Résumé development, cover letters, interviewing techniques, and business etiquette.

AESHM 311E: Seminar on Careers and Internships: Event Management and Hospitality Management

(1-0) Cr. 1. F.S.

Prereq: AESHM 113E; Sophomore classification.

Internship and career planning, professional expectations and responsibilities. Résumé development, business letters/professional correspondence, interviewing techniques, and business etiquette.

AESHM 311N: Seminar on Careers and Internships: Apparel, Merchandising, and Design

(1-0) Cr. 1. F.S.

Prereq: AESHM 113N; Sophomore classification.

Internship and career planning, professional expectations and responsibilities. Résumé development, cover letters, interviewing techniques, and business etiquette.

AESHM 340: Hospitality and Apparel Marketing Strategies

(3-0) Cr. 3. F.S.

Prereq: ECON 101

Application of marketing principles to the hospitality-, events-, and apparel-related industries. Emphasis on the role of marketing in an organization's overall strategic planning. Development and evaluation techniques available to hospitality, events, apparel, and related businesses, including advertising, sales promotion, packaging, and public relations.

AESHM 342: Aesthetics of Consumer Experience

(3-0) Cr. 3. F.S.

Prereq: Sophomore classification

Design principles, aesthetic concepts, and research applied to consumer experiences, with an emphasis on hospitality and retail environments and events. Influence of individual differences and cultural patterns on aesthetic preferences.

Meets U.S. Diversity Requirement

AESHM 380: U.S. Field Study

(Dual-listed with AESHM 580). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application

Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 380D: U.S. Field Study: Hospitality Management

(Dual-listed with AESHM 580D). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in AESHM or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 380F: U.S. Field Study: Event Management

(Dual-listed with AESHM 580F). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in EVENT, AESHM, or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 380N: U.S. Field Study: Apparel, Merchandising, and Design

(Dual-listed with AESHM 580N). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in A M D or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 381: International Field Study

(Dual-listed with AESHM 581). Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application

Study and tours of areas of interest to majors in the AESHM Department.

Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.

Meets International Perspectives Requirement.

AESHM 381D: International Field Study: Hospitality Management

(Dual-listed with AESHM 581D). Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits in AESHM and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.

Meets International Perspectives Requirement.

AESHM 381F: International Field Study: Event Management

(Dual-listed with AESHM 581F). Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits in AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.

Meets International Perspectives Requirement.

AESHM 381N: International Field Study: Apparel, Merchandising, and Design

(Dual-listed with AESHM 581N). Cr. 1-3. Repeatable, maximum of 3 times.

F.S.SS.

Prereq: 9 credits in A M D and/or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.

Meets International Perspectives Requirement.

AESHM 398: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of adviser; junior classification

Required of all cooperative education students seeking full-time status. Students register for this course prior to commencing each work period.

AESHM 411: Seminar on Current Issues

Cr. 1. F.S.

Prereq: Permission of instructor.

Trends, issues, research, and scholarship in apparel, events, and hospitality management.

AESHM 411E: Seminar on Current Issues: Events and Hospitality

Cr. 1. F.S.

Prereq: senior classification in AESHM.

Seminar of current issues in Event Management and Hospitality Management. Research latest trends in hiring, résumés and career advancement. This is a 1-credit, eight (8) week, first half-semester class. This class is offered for a grade.

AESHM 411N: Seminar on Current Issues: Apparel

(1-0) Cr. 1. Repeatable, maximum of 2 times. F.S.

Prereq: AESHM 470N

Trends, issues, research, and scholarship in apparel.

AESHM 421: Developing Global Leadership: Maximizing Human Potential

(3-0) Cr. 3. S.

Development of leadership in a global environment. Focus on global concerns that impact on the well-being of individuals, families, and communities. Strategies for working with individuals, families and communities in other countries and cultures. Taking local action on global issues. Participation in a service activity. Meets International Perspectives Requirement.

AESHM 470: Supervised Professional Internship

Cr. 3-6. Repeatable. F.S.SS.

Supervised work experience with a cooperating firm or organization.

AESHM 470F: Supervised Professional Internship: Event Management

Cr. 3-6. Repeatable. F.S.SS.

Prereq: Permission by application; junior classification.

Supervised and structured practical industry work experience with a cooperating firm or organization. This course is offered for a grade. Maximum number of credits given in a semester is 6. No more than 12 credits from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 470N: Supervised Professional Internship: Apparel

Cr. 3-6. Repeatable. F.S.SS.

Prereq: AESHM 311, 9 credits in A M D, and minimum 2.0 GPA; permission by application; junior or senior classification; employer/location should be different than employer/location for AESHM 170 and 270

Supervised work experience with a cooperating firm or organization. No more than 12 credits from AESHM 170, 270, and 470 may be applied toward graduation.

AESHM 472: Fashion Show Management

(2-2) Cr. 2-3. Repeatable, maximum of 5 credits. F.S.

Prereq: Permission of instructor

Provide leadership and communicate direction for planning and production of fashion show, including developing budgets, publicity, advertising, fundraising, choreography, staging, lighting, and food. Maximum of 5 credits can be applied to graduation

AESHM 474: Entrepreneurship in Human Sciences

(3-0) Cr. 3. F.S.

Prereq: A M D 275 or AESHM 287 or ACCT 284 or 3 cr in MKT or permission of instructor

Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 497: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of adviser; senior or graduate classification

Required of cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:**AESHM 510: Quantitative Research Methods in Apparel and Hospitality**

Cr. 3. Alt. S., offered odd-numbered years. Alt. SS., offered odd-numbered years.

*Prereq: STAT 401 or equivalent; Graduate standing in the Department;**Permission of instructor*

Overview of quantitative research methods in apparel and hospitality fields. Topics include types of quantitative research design, sampling design, measurement, validity issues, power and precision analysis, methods of data gathering and analysis techniques, and interpretation of statistical results. Use of statistical packages. Development of research plan.

AESHM 511: Seminar

Cr. 1-3. Repeatable, maximum of 6 times.

Prereq: 6 graduate credits in A M D, AESHM, or HSP M. Permission of instructor

Discussion of scholarship and current issues. Topics vary.

AESHM 512: Qualitative Research Methods in Apparel, Events, and Hospitality

Cr. 3. Alt. SS., offered even-numbered years.

Prereq: Graduate status

Introduction to and hands-on experiences with a variety of qualitative research methods specific to apparel, events and hospitality research. Students will develop skills at research design, data, collection, analysis, and write-up for qualitative inquiry.

AESHM 570: Practicum

Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.

Prereq: 6 graduate credits in program area; permission of instructor

Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 570A: Apparel Merchandising and Design

Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.

Prereq: 6 graduate credits in program area; permission of instructor

Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 570B: Hospitality Management

Cr. 1-3. Repeatable, maximum of 2 times. F.S.SS.

Prereq: 6 graduate credits in program area; permission of instructor

Supervised experience related to career objective. Proposal must be approved semester before placement.

AESHM 574: Entrepreneurship in Human Sciences

(3-0) Cr. 3. F.S.

Prereq: A M D 275 or AESHM 287 or ACCT 284 or 3 cr in MKT or permission of instructor

Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, event, food-related, family-owned, rural, and community businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 580: U.S. Field Study

(Dual-listed with AESHM 380). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application

Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580D: U.S. Field Study: Hospitality Management

(Dual-listed with AESHM 380D). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in AESHM or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580F: U.S. Field Study: Event Management

(Dual-listed with AESHM 380F). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in EVENT, AESHM, or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the majors in the Event Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 580N: U.S. Field Study: Apparel, Merchandising, and Design

(Dual-listed with AESHM 380N). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in A M D or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 280 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 581: International Field Study

(Dual-listed with AESHM 381). Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits in A M D, AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA. Permission by application

Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.

Meets International Perspectives Requirement.

AESHM 581D: International Field Study: Hospitality Management

(Dual-listed with AESHM 381D). Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits in AESHM and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Hospitality Management program. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281. Meets International Perspectives Requirement.

AESHM 581F: International Field Study: Event Management

(Dual-listed with AESHM 381F). Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits in AESHM, EVENT, and/or HSP M; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Event Management major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281. Meets International Perspectives Requirement.

AESHM 581N: International Field Study: Apparel, Merchandising, and Design

(Dual-listed with AESHM 381N). Cr. 1-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: 9 credits in A M D and/or AESHM; sophomore classification; minimum 2.0 GPA; AESHM 281 or concurrent enrollment; permission by application

Study and tours of areas of interest to majors in the Apparel, Merchandising, and Design major. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.

Meets International Perspectives Requirement.

Courses for graduate students:**AESHM 611: Seminar**

Cr. 1-3. Repeatable.

Prereq: 6 graduate credits in AESHM, A M D, or HSP M. Permission of instructor

Scholarship and current issues. Topics vary.

AESHM 670: Teaching Practicum

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

AESHM 670A: Teaching Practicum: Apparel Merchandising and Design

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

AESHM 670B: Teaching Practicum: Hospitality Management

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 6 graduate credits in program area; permission of instructor
Supervised experience in the university classroom. Proposal must be approved semester before placement.

Apparel, Merchandising and Design (A M D)

Any experimental courses offered by A M D can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**A M D 120: Apparel Construction Techniques**

(3-0) Cr. 3. SS.

Assemble components and completed garments with the use of basic sewing equipment. Learn basic construction techniques, applications and vocabulary. Students will need access to a home sewing machine, iron, computer and the internet. Not available for credit for A M D majors.

A M D 121: Apparel Assembly Processes

(2-4) Cr. 4. F.S.

Prereq: A M D 204 concurrent recommended

Principles of garment and textile-related product assembly taught using industrial machines and production equipment. Construction techniques build in complexity in the development, assembly, and analysis of component parts and complete garments.

A M D 131: Fashion Products and Markets

(3-0) Cr. 3. F.

Fashion industry from concept to consumer. Focus on fashion-driven consumer goods. Development and prototyping of fashion products for a target market.

A M D 165: Dress, Appearance, and Diversity in Society

(3-0) Cr. 3. F.S.

Examination of dress and appearance practices and experiences of marginalized identities and communities in the United States. Introduction to fashion- and dress-related theories, culture and identity concepts, and social justice concepts and issues in regards to dress, appearance, and fashion in the fashion industry.
Meets U.S. Diversity Requirement

A M D 178: Introduction to Apparel Design Studio

(1-4) Cr. 3. F.S.

Introduction to the elements and principles of design in fashion and apparel including skill development in fashion illustration, technical drawing, and fabric rendering using traditional media. Application of written and verbal presentations to communicate fashion and apparel design concepts and terminology. Fashion presentation and introduction to portfolio development.

A M D 204: Textile Science

(3-2) Cr. 4. F.S.

Prereq: A M D 131

Textile fibers, yarns, fabrication, coloration, and finishes. Quality and performance application to textile products. Lab work included.

A M D 206: Design Selective Advancement

Cr. R. Repeatable, maximum of 2 times. F.S.

Prereq: Completion or enrollment in A M D 121, A M D 131, A M D 178, and A M D 204 and enrollment in major

Project review and skill assessment related to 2-dimensional and 3-dimensional visualization, apparel assembly, basic product knowledge, design problem solving, illustration, textiles. Offered on a satisfactory-fail basis only.

A M D 210: Computer Applications in Digital Design

(2-2) Cr. 3. F.S.

Prereq: A M D 245 or concurrent; AESHM 113N

Applications of skills in Photoshop, Illustrator, InDesign, Google Sketch-up, Excel, and website development. Introduction to digital product design and line development. Focus on elements and principles of design. Introduction to digital portfolio development for design and merchandising. In-class demonstrations and online lectures.

A M D 225: Patternmaking I: Drafting and Flat Pattern

(1-4) Cr. 3. F.S.

Prereq: A M D 121, A M D 204, A M D 206.

Application of patternmaking tools and their functions, measurement techniques, pattern labeling, and patternmaking communication documents. Sloper drafting and flat pattern manipulation methods for women's apparel. Design and construction of original garments using drafted slopers and flat pattern manipulation methods to enable the analysis of fit.

A M D 231: Product Development and Manufacturing

(3-2) Cr. 4. F.S.

Prereq: A M D 204

Analysis of apparel product development, sourcing, and manufacturing processes. Focus on materials and specifications relative to quality, performance, cost, and price. Applications of software for PLM.

A M D 245: Aesthetics and Brand Image

(3-0) Cr. 3. F.S.

Prereq: A M D 131, A M D 165, A M D 204 or concurrent

Elements and principles of design. Analysis of sensory, expressive, and symbolic aspects that build brand image, with a focus on fashion products and promotional settings.

A M D 257: Museum Studies

(3-0) Cr. 3. F.

Prereq: Sophomore standing

Overview of museums including history, functions, and philosophy. Collection and curatorial practices. Funding and governance issues. Hands-on object research and exhibit development. Required field trip.

A M D 275: Retail Merchandising

(3-0) Cr. 3. F.S.

Prereq: 3 credits in Math

Principles of merchandising as applied to retail-, service-, events-, and hospitality-related businesses. Study of the planning, development, and presentation of apparel- and hospitality-related products, services, and experiences. Industry and market research, planning of new offerings, and development of promotional and competitive strategies for various retail formats.

A M D 278: Fashion Illustration

(0-6) Cr. 3. F.S.

Prereq: A M D 178, A M D 210 or concurrent enrollment, A M D 245 or concurrent enrollment. Permission of instructor.

Development of fashion plates and focused apparel lines/collections. Proficiency in drawing the fashion figure, technical drawings/flats, and apparel using a variety of media. Continuation of fashion presentation and portfolio development.

A M D 290: Independent Study

Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Freshmen or Sophomore Classification; Permission of instructor, adviser, and department chair.

Independent study on topics of special interest to the student, facilitated by approved faculty member. Total number of A M D 290 and A M D 490 credits applied to graduation cannot exceed 9 credits.

A M D 290R: Independent Study: Professional Practice

Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Freshmen or Sophomore Classification; Permission of instructor, adviser, and department chair.

Experiences in teaching assistantship for first-year and second-year students. Total number of A M D 290 and A M D 490 credits applied to graduation cannot exceed 9 credits.

A M D 305: Quality Assurance of Textiles and Apparel

(Dual-listed with A M D 505). (2-2) Cr. 3. F.

Prereq: A M D 231, one course in natural science (chemistry with lab preferred); STAT 101, STAT 226, or STAT 401

Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality.

A M D 310: Computer Aided Apparel Patternmaking

(0-6) Cr. 3. F.S.

Prereq: A M D 210, A M D 225; Permission of instructor.

Computer-aided patternmaking technology used in pattern drafting, grading, marker making, and 3-D virtual prototyping.

A M D 321: Computer Integrated Textile and Fashion Design

(0-6) Cr. 3. F.S.

Prereq: A M D 210, A M D 278 or concurrent enrollment. Permission of instructor

Analysis and advanced use of computer-aided design software for textile and fashion design for various target markets. Digital presentation and portfolio development.

A M D 325: Patternmaking II: Draping

(0-6) Cr. 3. F.S.

Prereq: A M D 206, A M D 225; permission of instructor.

Principles of patternmaking through basic draping techniques on industry standard body forms. Apparel design through analysis of fit and design; problem solving and interaction of fabric characteristics with style features.

A M D 328: Apparel, Merchandising, and Design Seminar

Cr. 1-3. Repeatable. F.S.SS.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Maximum of 6 credits can be applied toward graduation.

A M D 328T: Apparel, Merchandising, and Design Seminar: Fashion Trend Forecasting

Cr. 1-3. F.S.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Maximum of 6 credits can be applied toward graduation.

A M D 328Y: Apparel, Merchandising, and Design Seminar: Styling

Cr. 1-3.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term. Maximum of 6 credits can be applied toward graduation.

A M D 329: Digital Textile Printing for Apparel Design

(2-2) Cr. 3. F.S.

Prereq: A M D 321; A M D 325 or concurrent

Overview of the use of digital printing in the textile and apparel industry, color matching, repeat print patterns, engineered prints, and creation of apparel prototypes.

A M D 354: History of European and North American Dress

(3-0) Cr. 3. F.

Prereq: 3 credits from Hist or Art H

Survey of history of dress from ancient times up to the American Civil War; focus on European and North American dress. Emphasis on connection of dress to the social, cultural, environmental, and technological contexts of the Western world. Meets International Perspectives Requirement.

A M D 356: History of Twentieth Century Fashion

(3-0) Cr. 3. S.

Prereq: 3 credits HIST or ART H; A M D 204 recommended.

Survey of major design and technological developments from the American Civil War through the 20th Century. Emphasis on fashion as a system of design and production, culture of consumption, fashion change, and trends in art, society, and culture.

A M D 362: Cultural Perspectives of Dress

(3-0) Cr. 3. S.

Prereq: A M D 165 or 3 credits in anthropology, psychology, or sociology.

Analysis of multiple factors related to dress in selected societies, including technology, cultural identity, aesthetics, social organization, ritual, stability and change. Applications to fair trade and social responsibility.

Meets International Perspectives Requirement.

A M D 372: Sourcing and Global Issues

(3-0) Cr. 3. F.S.

Prereq: A M D 231, A M D 275; ECON 101 or ECON 102 recommended

Evaluation of key issues facing textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability.

Meets International Perspectives Requirement.

A M D 375: Omni-Channel Retailing

(3-0) Cr. 3. S.

Prereq: 3 credits in marketing or A M D 275 or AESHM 287

A customer-centric view of marketing with a focus on the retailer-customer relationship and omni-channel strategies. Analysis and evaluation of integrated retail applications and strategies using digital media, including store formats, e-commerce, catalog, mobile, crowdsourcing, and social media.

A M D 376: Merchandise Planning and Buying

(3-2) Cr. 4. F.S.

Prereq: A M D 275; COM S 113; 3 credits from ACCT 284, MATH 104, MATH 105, MATH 140, MATH 150, or equivalent.

Calculations and computer application in the planning and control of merchandise. Emphasis on retail math as it pertains to assortment planning, the six-month buying plan process, and other buying concepts and strategies. Online modules.

A M D 377: Visual Presentation and Promotions

(3-0) Cr. 3. F.S.

Prereq: A M D 245 or AESHM 342; AESHM 340 or MKT 340

Principles of visual aspects of brand development and management; emphasis on branding, visual merchandising, design/layout of retail spaces. Includes applications such as visual communication and documentation using Adobe Creative Suite(R), hands-on display projects, and brand case studies.

A M D 393: Apparel, Merchandising, and Design Workshop

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: A M D Junior or Senior Classification and Permission of Instructor.

Intensive 2- to 8-week workshop exploration. Topics vary each time offered. Maximum of 6 credits applied to graduation.

A M D 404: Innovative Textiles

(Dual-listed with A M D 504). (2-2) Cr. 3. S.

Prereq: A M D 204, CHEM 163 and CHEM 163L or equivalent

Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles.

A M D 415: Technical Design Processes

(2-2) Cr. 3. F.

Prereq: A M D 225; A M D 231

Garment development and analysis of fit, performance, quality, cost. Exploration of alternative materials, construction methods, grading; specifications and portfolio development.

A M D 426: Creative Design Processes

(1-4) Cr. 3. S.

Prereq: A M D 206, A M D 321, A M D 325 or concurrent

Exploration of the creative process and sources of inspiration with emphasis on wearable art; experimentation of advanced design problem solving, alternative materials, fabric manipulation, and pattern-making techniques.

A M D 431: Apparel Production Management

(2-2) Cr. 3. S.

Prereq: A M D 231; A M D 121 recommended; A M D 372 or concurrent.

Procedures and experiences related to application and use of process controls: method analysis, work measurement, costing, pricing, and production planning. Resource management, technology applications, and quality assurance.

A M D 457: Textile Conservation and Collection Management

(Dual-listed with A M D 557). (3-0) Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: A M D 204

Condition assessment, repair, and stabilization of textiles and apparel in museum collections. Dry and aqueous cleaning. Examination of storage and exhibition techniques, materials, and conditions. Experience with cataloging and management practices.

A M D 458: Queer Fashions, Styles, and Bodies

(Dual-listed with A M D 558). (3-0) Cr. 3. S.

Prereq: A M D 165; or 3 credits in Women's and Gender Studies or Sociology; or permission of instructor

This course focuses on analyzing the dressed and undressed body of individuals in the queer community in various cultural contexts with a focus on material culture. We will disentangle concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer community focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention will be paid to how sexuality and gender intersect with and/or shape other identities including race, ability, body size, and class. We will examine the complex structures, systems, and ideologies that uphold discrimination and unequal distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal stories about the owners and consumers.

A M D 467: Consumer Studies in Apparel and Fashion Products

(3-0) Cr. 3. F.

Prereq: A M D 165; AESHM 340 or MKT 340; STAT 101 or STAT 104 or STAT 226;

Application of concepts and theories from the social sciences to the study of consumer behavior related to dress, textile and apparel products, and retail experiences. Experience in conducting consumer research.

A M D 475: Retail Information Analysis

(2-2) Cr. 3. F.S.

Prereq: A M D 376

Evaluation of information needed to make effective retail decisions.
Use of technology in analyzing and interpreting retail systems data.
Application of concepts related to forecasting, consumer demand, assortment planning, market research, data mining, database interface, pattern recognition, supply-chain/logistics management, retail technology applications.

A M D 490: Independent Study

Cr. arr. Repeatable. F.S.SS.

Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair

Independent Study. Maximum of 9 credits of both A M D 290 and A M D 490 can be applied toward graduation.

A M D 490A: Independent Study: Textile Science

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490B: Independent Study: Historical, Cultural, and Museum Studies of Dress and Textiles**

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490C: Independent Study: Textile and Apparel Design**

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490E: Independent Study: Merchandising, Aesthetics, and Entrepreneurship**

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490F: Independent Study: Sociological, Psychological, and Consumer Behavioral Aspects of Dress**

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490H: Independent Study: Honors**

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490J: Independent Study: Product Development, Innovation, and Sourcing**

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490R: Independent Study: Professional Practice**

Cr. arr. Repeatable, maximum of 2 times. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair.***A M D 490S: Independent Study: Production and Quality Assurance**

Cr. arr. Repeatable. F.S.SS.

*Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 490W: Independent Study: Fashion Show, Fashion Public Relations and Marketing**

Cr. arr. Repeatable. F.S.SS.

*Prereq: Prereq: 6 credits in A M D. Permission of the instructor, adviser, and department chair***A M D 495: Senior Design Studio**

(Dual-listed with A M D 595). (0-6) Cr. 3. F.

Prereq: A M D 310, A M D 325 and A M D 329. Permission of instructor.

Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition.

A M D 496: Fashion Product Development and Prototyping

(3-0) Cr. 3. S.

Prereq: A M D 231, A M D 245, A M D 275

Applying consumer, aesthetic, and quantitative trend information to develop value-added fashion products and product lines with merchandising/promotion campaigns for diverse target markets. Multi-function team projects. Development of a prototype and presentation to industry representatives.

A M D 499: Undergraduate Research

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Senior classification, 15 credits in A M D. Permission of instructor, adviser, and department chair

Research experience in textiles and clothing with application to a selected problem.

Courses primarily for graduate students, open to qualified undergraduates:

A M D 504: Innovative Textiles

(Dual-listed with A M D 404). (2-2) Cr. 3. S.

Prereq: A M D 204, CHEM 163 and CHEM 163L or equivalent

Theories and principles of textile science. Textile product serviceability. Effect of fiber structure on properties and performance. New developments in textiles.

A M D 505: Quality Assurance of Textiles and Apparel

(Dual-listed with A M D 305). (2-2) Cr. 3. F.

Prereq: A M D 231, one course in natural science (chemistry with lab preferred); STAT 101, STAT 226, or STAT 401

Principles of product and materials evaluation and quality assurance. Developing specifications and using standard practices for evaluating materials, product characteristics, performance, and quality.

A M D 510: Foundation of Scholarship in Apparel, Merchandising, and Design

(3-0) Cr. 3. F.

Prereq: Graduate classification or permission of instructor

Overview of scholarship in apparel, merchandising, and design with emphasis on current and future directions. Fundamentals of writing literature reviews. Examination of ethical issues in scholarship and academic life. Introduction to creativity, sustainability, and entrepreneurship. Development of teaching units.

A M D 521: Digital Technologies in Textile and Apparel Design

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Research Methods course. Permission of instructor.

Digital technologies in textile and apparel design. Theories and practices of mass customization and personalization, digital textile printing, 3D body scanning, creating avatars from body scans, and fitting digital apparel designs.

A M D 525: Experimental Patternmaking

Cr. 3. Alt. F., offered even-numbered years.

Prereq: AMD 121 or equivalent, AMD 225 or equivalent, AMD 510 or taking concurrently, permission of instructor

Research, analyze, and apply experimental patternmaking techniques to original garments suitable for entry into a juried competition/exhibitions. Compare, contrast, and organize a framework of research patternmaking principles through content analysis or other appropriate research techniques. Documentation of learning and design process.

A M D 539: Digital Textile Design and Theory

Cr. 3. Repeatable. F.S.SS.

Focus on artisanal textile, apparel, or surface and structural design techniques. Design processes for specialty fabrics and markets. Topics vary by term.

A M D 545: Consumer Aesthetics and Retail Branding

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: One course in design elements and principles, psychology, consumer behavior, or marketing

Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, environmental psychology, and marketing literature.

A M D 554: Dress History Research Methods

Cr. 3. Alt. S., offered odd-numbered years.

Using a variety of sources and methods of analysis, students will develop their ability to read and interpret primary and secondary sources and to understand the methodology underpinnings and process of constructing dress history.

A M D 557: Textile Conservation and Collection Management

(Dual-listed with A M D 457). (3-0) Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: A M D 204

Condition assessment, repair, and stabilization of textiles and apparel in museum collections. Dry and aqueous cleaning. Examination of storage and exhibition techniques, materials, and conditions. Experience with cataloging and management practices.

A M D 558: Queer Fashions, Styles, and Bodies

(Dual-listed with A M D 458). (3-0) Cr. 3. S.

Prereq: A M D 165; or 3 credits in Women's and Gender Studies or Sociology; or permission of instructor

This course focuses on analyzing the dressed and undressed body of individuals in the queer community in various cultural contexts with a focus on material culture. We will disentangle concepts related to gender and sexuality and the changing definitions and representations of individuals who identify in the queer community focusing on appearance, fashion, and the body. Historic and current representations of fashion, styles, and appearances will be analyzed and discussed. Attention will be paid to how sexuality and gender intersect with and/or shape other identities including race, ability, body size, and class. We will examine the complex structures, systems, and ideologies that uphold discrimination and unequal distribution of power and resources as related to the course material. Attention will mostly be given to North American perspectives. We will use material culture to explore how objects related to fashioning the body reveal stories about the owners and consumers.

A M D 565: Sustainability: Theory and Practical Application

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: 3 credits in research methods; basic knowledge of apparel industry and product development; permission of instructor.

Overview of current sustainability theory, research, and methodology. Emphasis on the evaluation and discussion of current sustainability literature and sustainable practice of apparel, textiles, and related products and services through people, processes, and the environment. Development and presentation of original scholarly and creative design work under various sustainability frameworks.

A M D 567: Consumer Behavior and Apparel

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: A M D 467 or MKT 447; STAT 401

Application of concepts and theories from the social sciences to the study of consumer behavior. Experience in conducting research; manuscript writing.

A M D 572: Sourcing and Global Issues

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A course in merchandising, marketing, or economics

Evaluation of textile and apparel industries in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility and sustainability. Experience in conducting research using secondary data.

Meets International Perspectives Requirement.

A M D 576: Industry Applications in Merchandising and Management

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A M D 376 or equivalent; A M D 275 or equivalent; or permission of instructor

Using the case study method, students apply merchandising theory, principles, and practices to industry scenarios. Emphasis on problem solving, creative thinking, data analysis, and data interpretation involved in business operations. Focus on the development of leadership skills while functioning in small and large groups.

A M D 577: E-Commerce for Apparel and Hospitality Companies

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: Course in marketing or permission of instructor

Analysis of technology and consumer trends, industry practices, and marketing strategies for e-commerce including big data, data mining, and social media. Evaluation and development of apparel or hospitality company websites. Theory application to the development of multi-channel business strategies.

A M D 590: Special Topics

Cr. arr. Repeatable.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590A: Special Topics: Textile Science

Cr. arr. Repeatable.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590B: Special Topics: Historical, Cultural, and Museum Studies of Dress and Textiles

Cr. arr. Repeatable.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590C: Special Topics: Textile and Apparel Design

Cr. arr. Repeatable.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590E: Special Topics: Merchandising, Aesthetics, and Entrepreneurship

Cr. arr. Repeatable.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590F: Special Topics: Sociological, Psychological, and Consumer Behavioral Aspects of Dress

Cr. arr. Repeatable.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590J: Special Topics: Product Development, Innovation, and Sourcing

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590S: Special Topics: Production and Quality Assurance

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 590W: Special Topics: Fashion Show, Fashion Public Relations and Marketing

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of director of graduate education, adviser, and instructor(s)

Individually designed A M D-related projects that reflect the special interests of the student.

A M D 595: Senior Design Studio

(Dual-listed with A M D 495). (0-6) Cr. 3. F.

Prereq: A M D 310, A M D 325 and A M D 329. Permission of instructor.

Creation of an apparel line from target market research to prototypes through the use of manual techniques and CAD technologies. The line is to be included in a professional portfolio and pieces submitted to a juried exhibition.

A M D 599: Creative Component

Cr. arr. Repeatable.

Prereq: 9 graduate credits in A M D

Courses for graduate students:**A M D 611: Seminar**

Cr. 1-3. Repeatable.

Prereq: 6 graduate credits in A M D. Permission of instructor

Discussion of scholarship and current issues. Topics vary.

A M D 625: Design Theory and Process

(2-4) Cr. 4. Alt. S., offered odd-numbered years.

Prereq: Permission of instructor.

Analysis and application of design theory and creative processes, including strategies for solving aesthetic, functional, and/or technology-focused design problems. Creation and dissemination of design scholarship.

A M D 665: Social Science Theories of Appearance

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: 6 credits in sociology or psychology

Analysis of social science theories and concepts applicable to appearance research. Emphasis on qualitative research and philosophy of knowledge, including postmodern, symbolic interaction, semiotic, and feminist theories. Collection and analysis of qualitative data.

A M D 676: Merchandising Theory and Research Applications

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: A M D 275 or equivalent; statistics course recommended.

Review of current merchandising theory, research, and methodology. Emphasis on the evaluation and discussion of current and seminal merchandising literature, understanding research processes, interpretation of findings, assessing implications of research for future directions in merchandising, and the development and presentation of original scholarly work.

A M D 690: Advanced Topics

Cr. arr. Repeatable.

Prereq: Enrollment in doctoral program, permission of instructor; and approval of D.O.G.E

A M D 699: Research

Cr. arr. Repeatable.

Arabic (ARABC)

Any experimental courses offered by ARABC can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ARABC 101: Elementary Arabic I**

(4-0) Cr. 4. F.

Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet.

ARABC 102: Elementary Arabic II

(4-0) Cr. 4. S.

Prereq: ARABC 101 or placement by department exam.

Continuation of ARABC 101. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 195: Study Abroad

Cr. arr. Alt. SS., offered irregularly.

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

ARABC 201: Intermediate Arabic I

(4-0) Cr. 4. F.

Prereq: ARABC 102 or placement by department exam

Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 202: Intermediate Arabic II

(4-0) Cr. 4.

Prereq: ARABC 201 or placement by department exam

Continuation of Arabic 201. Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 295: Study Abroad

Cr. arr. Alt. SS., offered irregularly.

Prereq: ARABC 102 or equivalent

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

ARABC 375: Arab Culture

Cr. 3. S.

Survey of contemporary Arab culture in the Middle East and North Africa as reflected in history, language, the arts, and social institutions with attention to the Arab Diaspora. Taught in English.

Meets International Perspectives Requirement.

ARABC 490: Independent Study

Cr. 1-6. Repeatable.

Prereq: Permission of Arabic staff and department Chair.

Independent study with focus on areas other than those in which courses are offered. No more than 6 credits in ARABC 490 may be counted toward graduation.

Architecture (ARCH)

Any experimental courses offered by ARCH can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

ARCH 201: Architectural Design I

(1-15) Cr. 6. F.

Prereq: Completion of the pre-professional program and admission into the professional program in Architecture

Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

ARCH 201H: Architectural Design I, Honors

(1-15) Cr. 6-7. F.

Prereq: Completion of the pre-professional program and admission into the professional program in Architecture

Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

ARCH 202: Architectural Design II

(1-15) Cr. 6. S.

Prereq: ARCH 201; MATH 142; PHYS 111

Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.

ARCH 202H: Architectural Design II, Honors

(1-15) Cr. 6-7. S.

Prereq: ARCH 201, MATH 142 and PHYS 111

Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.

ARCH 220: Contemporary Architecture

(3-0) Cr. 3. F.

Survey of global architectural ideas and practices from 1960 to the present. Emphasis will be given to recent movements and architectural manifestations, as well as close examinations of socio-cultural conditions for contemporary practice.

ARCH 221: History of Pre-Modern Architecture

(3-0) Cr. 3. F.

Survey of pre-modern western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750.

Meets International Perspectives Requirement.

ARCH 230: Design Communications I

(2-2) Cr. 3. F.

Prereq: Admission to the professional program in architecture

Investigations of various design media and their applications to design. Exercises to develop representational skills and perceptual sensitivity.

ARCH 231: Advanced Design Representation

Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: ARCH 230; Junior, Senior or graduate standing

Advanced investigations of various design media and their applications to design. Emphasis on careful consideration of media, mixed-media strategies and development of craft.

ARCH 301: Architectural Design III

(1-15) Cr. 6. F.

Prereq: ARCH 202

Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

ARCH 301H: Architectural Design III, Honors

(1-15) Cr. 6-7. F.

Prereq: ARCH 202

Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

ARCH 302: Architectural Design IV

(1-15) Cr. 6. S.

Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses

Continuation of ARCH 301, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

ARCH 302H: Architectural Design IV, Honors

(1-15) Cr. 6-7. S.

Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses

Continuation of ARCH 301, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

ARCH 321: History of the American City

(3-0) Cr. 3.

Prereq: Sophomore classification

Study of the development of the built environment and urban condition in the United States from the colonial period to today. Primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender. Credit counts toward fulfillment of History, Theory, Culture requirements.

Meets U.S. Diversity Requirement

ARCH 322: Histories and Theories of Modern Architecture

(3-0) Cr. 3. S.

Prereq: Sophomore Classification

Survey of global architectural ideas, theories and practices in their social, cultural and representational contexts from 1750 to 1960. Emphasis on European examples with additional material on the global spread of modernism.

Meets International Perspectives Requirement.

ARCH 334: Computer-aided Architectural Design

(2-2) Cr. 3.

Exploration of current and potential applications of computing in architectural design. Projects engage digital design methods, data and media workflows.

ARCH 335: Three-Dimensional Studio

(1-4) Cr. 3. Repeatable, maximum of 6 credits.

This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three-dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

ARCH 345: Building Science and Technology I

(Dual-listed with ARCH 545). (2-0) Cr. 2. F.

Prereq: Undergraduate: Admission to the professional program in architecture; concurrent enrollment in ARCH 345L; graduate: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545L

First course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental forces and systems (solar orientation, climate, daylighting, natural ventilation, human comfort and occupancy patterns), materials and assemblies (drawing conventions, building codes, and physical properties of materials) and fundamental structural principles (forces/loads, equilibrium, and stability). Readings and project presentations.

ARCH 345L: Building Science and Technology I Lab

(0-2) Cr. 1. F.

Prereq: Admission to the professional program in architecture; concurrent enrollment in ARCH 345.

Laboratory to accompany Arch 345 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 346: Building Science and Technology II

(Dual-listed with ARCH 546). (3-0) Cr. 3. S.

Prereq: Undergraduate: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346L. Graduate: ARCH 505, ARCH 545, ARCH 545L, and ARCH 595; concurrent enrollment in ARCH 506, ARCH 546L and ARCH 596.

Second course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental systems (heat transfer in the building envelope, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and building energy calculation methods), materials & assemblies (building envelope systems, accessibility, egress, and material properties), and structural systems (structural system selection/comparison, and design and analysis of "form-active" compression and tension structures). Readings and project presentations.

ARCH 346L: Building Science and Technology II Lab

(0-4) Cr. 2. S.

Prereq: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346.

Laboratory to accompany Arch 346 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 347: Building Science and Technology III

(Dual-listed with ARCH 547). (3-0) Cr. 3. F.

Prereq: Undergraduate: ARCH 346, Arch 346L; concurrent enrollment in ARCH 347L. Graduate: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 601 and ARCH 547L.

Third course in a sequence focused on architectural building technologies. Lectures and labs cover: multistory building framing, assembly, and enclosure systems, sizing and selecting structural framing components (foundations, columns, beams, etc.), and an environmental design process that demonstrates the ability to integrate climate into the control of thermal, luminous, ventilative and acoustic environments. Introduction to plumbing and rain water collection systems.

ARCH 347L: Building Science and Technology III Lab

(0-4) Cr. 2.

Prereq: ARCH 346, Arch 346L; concurrent enrollment in ARCH 347.

Laboratory to accompany Arch 347 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 348: Building Science and Technology IV

(Dual-listed with ARCH 548). (3-0) Cr. 3. S.

Prereq: Undergraduate: ARCH 347, Arch 347L; concurrent enrollment in ARCH 348L. Graduate: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548L.

Fourth course in a sequence focused on architectural building technologies. Lectures and labs cover: ability to demonstrate active environmental HVAC control systems design, use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems, constructed building assemblies and details (building envelope details for waterproofing and enclosure, advanced material properties, costs, and serviceability), and structural design for multi-story structures (design and documenting various framing patterns, integration with other building systems, and lateral stability strategies for wind and seismic).

ARCH 348L: Building Science and Technology IV Lab

(0-4) Cr. 2. S.

Prereq: ARCH 347, Arch 347L; concurrent enrollment in ARCH 348.

Laboratory to accompany Arch 348 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 351: Whole Building Energy Performance Modeling

(2-2) Cr. 3.

Prereq: ARCH 202, 245, 341. Open to non-majors by permission of instructor.

Architectural design, design evaluation and technical analysis using energy, daylighting, and natural ventilation performance modeling tools. Emphasis will be given to whole building energy efficiency including passive and active systems integration.

ARCH 371: Human Behavior and Environmental Theory

(3-0) Cr. 3.

Prereq: Completion of the pre-professional program and admission into the professional program in architecture

Exploration of theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

ARCH 401: Architectural Design V

(1-15) Cr. 6. F.

Prereq: ARCH 302

A rigorous examination of how buildings participate sustainably in socio-political and environmental systems. Student projects consider in a comprehensive proposal how issues of physical site, socio-economic context, programming, structure, form, materiality, and building systems are interconnected through the design process and within the built environment. Projects typically focus on a smaller scale urban public building that is closely connected to its physical, environmental, and social context.

ARCH 401H: Architectural Design V, Honors

(1-15) Cr. 6-7. F.

Prereq: ARCH 302

A rigorous examination of how buildings participate sustainably in socio-political and environmental systems. Student projects consider in a comprehensive proposal how issues of physical site, socio-economic context, programming, structure, form, materiality, and building systems are interconnected through the design process and within the built environment. Projects typically focus on a smaller scale urban public building that is closely connected to its physical, environmental, and social context.

ARCH 402: Architectural Design VI

(1-15) Cr. 6. S.

Prereq: ARCH 401 and minimum 2.0 GPA in previous studio courses

An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option. Meets International Perspectives Requirement.

ARCH 402H: Architectural Design VI, Honors

(1-15) Cr. 6-7. S.

Prereq: 401 and minimum 2.0 GPA in previous studio courses

An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option. Meets International Perspectives Requirement.

ARCH 403: Architectural Design VII

(1-15) Cr. 6. F.

Prereq: ARCH 402

A rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation and integration of contextual and historical considerations, as well as structural, environmental, and communication systems, in a comprehensive design proposal.

ARCH 403H: Architectural Design VII, Honors

(1-15) Cr. 6-7. F.

Prereq: ARCH 402

A rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation and integration of contextual and historical considerations, as well as structural, environmental, and communication systems, in a comprehensive design proposal.

ARCH 404: Architectural Design VIII

(1-15) Cr. 6. S.

Prereq: ARCH 403

Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

ARCH 404H: Architectural Design VIII, Honors

(1-15) Cr. 6-7. S.

Prereq: ARCH 403

Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

ARCH 417: Big and Tall: A History of Construction

(Dual-listed with ARCH 517). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: For Arch 417, Junior or Senior Classification, for Arch 517, Graduate classification

History, theory, and principles of construction from ancient times through today. Analytic project or term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 420: Topics in American Architecture

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 420 may be applied to degree program.

Meets U.S. Diversity Requirement

ARCH 422: Topics in Medieval Architecture

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of medieval architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 422 may be applied to degree program.

Meets International Perspectives Requirement.

ARCH 423: Topics in Renaissance to Mid-Eighteenth Century Architecture

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of renaissance to mid-eighteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements. A maximum of 6 credits of ARCH 423 may be applied to degree program.

Meets International Perspectives Requirement.

ARCH 424: Topics in Nineteenth Century Architecture

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture requirements. A maximum of 6 credits of ARCH 424 may be applied to degree program.

ARCH 425: Topics in Twentieth Century Architecture

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture requirements. A maximum of 6 credits of ARCH 425 may be applied to degree program.

ARCH 426: Topics in Native American Architecture

(Cross-listed with AM IN). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Junior classification

History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment History, Theory, Culture. A maximum of 6 credits of ARCH 426 may be applied to degree program.

Meets U.S. Diversity Requirement

ARCH 427: History, Theory, and Criticism of Chinese Architecture

(Dual-listed with ARCH 527). (3-0) Cr. 3. F.

Prereq: For Arch 427, Senior classification, for Arch 527, Graduate classification

The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment History, Theory, Culture.

Meets International Perspectives Requirement.

ARCH 429: Topics in Italian Architecture and Urbanism

(3-0) Cr. 3. S.

Prereq: Junior classification

History, theory and principles of Italian architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 431: Analytical Drawing

(1-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.

Prereq: ARCH 230 and ARCH 302

Exploration of 2- and 3-dimensional representations. Emphasis on on-site freehand sketching, perspective and orthographic drawing, rendering of shadows and textures, and use of diverse media.

ARCH 432: Advanced Computer Lighting and Rendering

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ARCH 230 and ARCH 301

Exploration of the computer as a design and communication tool. Emphasis on lighting and rendering techniques.

ARCH 433: Digital Fabrication

(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.

Prereq: ARCH 230 and ARCH 301

Exploration of the computer as a design and manufacturing tool. Emphasis on developing digital fabrication technologies and workflows.

ARCH 434: Advanced Computer-aided Architectural Design

(1-4) Cr. 3.

Prereq: ARCH 334 or by Instructor Permission.

Specialized investigations of the computer as a design tool. Development of computer software and workflows for architectural and environmental problem solving.

ARCH 436: Advanced Design Media

(2-2) Cr. 3. Repeatable. F.S.S.

Prereq: ARCH 230

Special topics in design media applications.

ARCH 437: Architectural Photography

(3-0) Cr. 3.

Prereq: ARCH 202

Emphasis on use of the camera and lighting in photographing drawings and interior and exterior building environments.

ARCH 439: Computational Design Theory

(Dual-listed with ARCH 539). (3-0) Cr. 3.

Prereq: Arch 221, Arch 222 or senior classification or graduate standing

Seminar discussion of critical readings and theories surrounding computational design; This course surveys the history and development of digital computing and its use in design from early thought experiments, to computer-aided design systems, to present day artificial intelligences and robotics. The potentials and consequences of emerging computational design systems are discussed.

ARCH 445: Building Science and Technology V

(2-0) Cr. 2. F.

Prereq: ARCH 348, Arch 348L; concurrent enrollment in ARCH 445L.

Final course in a sequence of architectural building technology courses comprising environmental systems, materials/assembly, and building structures topics. Using both lectures and labs, the three interrelated modules each emphasize a particular building technology subject with an overall focus on synthesizing and integrating building technologies together in sustainable design strategies. Topics include: integration of active environmental control and service systems into the design of larger scale buildings, the development of construction details for building shell and interiors, and the design and analysis of various long-span structural systems.

ARCH 445L: Building Science and Technology V Lab

(0-2) Cr. 1. F.

Prereq: ARCH 348, Arch 348L; concurrent enrollment in ARCH 445.

Laboratory to accompany Arch 445 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 482: Professional Practice

(Dual-listed with ARCH 582). (3-0) Cr. 3. F.

Prereq: Junior classification and ARCH 371

Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 486: Design: Made in Italy

(3-0) Cr. 3. S.

An investigation of the history of Italian design in its contemporary form as part of International study abroad program in Rome. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 490: Independent Study

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490A: Independent Study: Design Communications.

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490B: Independent Study: Design

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490C: Independent Study: Building Science and Technology

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490D: Independent Study: Architectural History

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490E: Independent Study: Behavioral Studies

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490F: Independent Study: Practice

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490H: Independent Study: Honors

Cr. 1-9. Repeatable.

Prereq: Written approval of instructor and department chair on required form
Independent investigation.

Courses primarily for graduate students, open to qualified undergraduates:**ARCH 505: Architectural Design and Media I: Mapping, Programming, Building**

(0-10) Cr. 5. F.

Prereq: Admission to the M Arch program. Concurrent enrollment in ARCH 545, ARCH 545L and ARCH 595.

An introduction to comprehensive architectural design projects that focuses on three interrelated design skills: mapping, programming and building. Projects establish a framework for designing buildings that considers multiple factors such as environmental forces, construction methods, building codes, urban regulations, social relationships, and cultural values.

ARCH 506: Architectural Design and Media II: Materiality and Representation

(0-10) Cr. 5. S.

Prereq: ARCH 505, ARCH 545, ARCH 545L, ARCH 595 and concurrent enrollment in ARCH 546, ARCH 546L, and ARCH 596

Small-scale architectural design projects that investigate design representation through analogue and digital means. The projects explore different representation strategies to help students develop an understanding of the particular modes of architectural representation that advance the designer's knowledge of space as a complex interaction between materials with inherent physical characteristics, mobile socializing bodies, and changing environmental cycles.

ARCH 507: Architectural Design and Media III: Design in Detail

(0-10) Cr. 5. SS.

Prereq: ARCH 506, ARCH 546, ARCH 546L, ARCH 596 and concurrent enrollment in ARCH 581

Design projects that emphasize the multi-faceted role of the architectural detail in the design process through first, understanding the historical specificity of building construction and detailing; second, utilizing working drawing as a mode of communication; and third, designing with details.

ARCH 517: Big and Tall: A History of Construction

(Dual-listed with ARCH 417). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: For Arch 417, Junior or Senior Classification, for Arch 517, Graduate classification

History, theory, and principles of construction from ancient times through today. Analytic project or term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 521: Celluloid Cities, Urbanism in Film

(3-0) Cr. 3.

Prereq: Junior classification

Urban theory and history as manifested in popular films and videos, both fiction and documentary. Term projects require students to make short videos. (Experience with video-making not necessary.) Credits counts towards fulfillment of History, Theory, Culture requirement.

ARCH 522: Complex Adaptive Systems Theory for the Design of Built Environments

(3-0) Cr. 3.

Prereq: Graduate or Senior Classification

The principles of complex adaptive systems theory are studied and then applied towards the design of resilient and responsive built environments. Topics cover a broad spectrum, including urban informalities, tactical approaches, the capacity of digital infrastructures to coordinate distributed human practices, and emergent phenomena. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 525: Meaning and Form in Architecture

(3-0) Cr. 3.

Prereq: Graduate or Senior classification

Seminar on critical analysis of meaning and form in architecture and human-made environment in various cultural contexts examined from historical and theoretical perspectives. Analytic term paper and weekly readings with discussion questions. Credit counts toward fulfillment of History, Theory, Culture requirements.

Meets International Perspectives Requirement.

ARCH 527: History, Theory, and Criticism of Chinese Architecture

(Dual-listed with ARCH 427). (3-0) Cr. 3. F.

Prereq: For Arch 427, Senior classification, for Arch 527, Graduate classification

The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment History, Theory, Culture.

Meets International Perspectives Requirement.

ARCH 528: Topical Studies in Architecture

(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 528A: Studies in Architecture: Culture

(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 528B: Studies in Architecture: Technology

(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

n/a.

ARCH 528C: Studies in Architecture: Communications

(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

n/a.

ARCH 528E: Studies in Architecture: Practice

(3-0) Cr. 2-3. Repeatable, maximum of 6 times.

*Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing***ARCH 530: Formworks**

(3-0) Cr. 3. F.S.

Prereq: Arch 230 or instructor permission

Studies and activities showing fabrication as a means of speculation and discourse about materiality. Focus is given to the concepts and values embedded in materials and how we build at various scales.

ARCH 531: Drawing Culture

(3-0) Cr. 3.

Prereq: Arch 221, Arch 222 or senior classification or graduate standing

Exploration of theories and practices that center on drawing as a fundamental means of knowing.

ARCH 534: Topics in Computer-aided Architectural Design

(1-4) Cr. 3. Repeatable, maximum of 6 credits. F.

Prereq: ARCH 434 or permission of instructor

Emphasis on advanced, exploratory approaches to design computing. Projects highlight experimentation and integration of multiple media types.

ARCH 535: Advanced Three-Dimensional Studio

(1-4) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ARCH 335 or Graduate classification

Advanced investigation of sculptural expression with emphasis on individual projects.

ARCH 538: Regimes of Perception

(3-0) Cr. 3. F.S.

Prereq: ARCH 230 or instructor permission

Exploration of theories, methodologies, and apparatuses of projection as a spatial and material practice. Readings and discussions accompany assignments for projection through drawing, fabrication, and performance.

ARCH 539: Computational Design Theory

(Dual-listed with ARCH 439). (3-0) Cr. 3.

Prereq: Arch 221, Arch 222 or senior classification or graduate standing

Seminar discussion of critical readings and theories surrounding computational design; This course surveys the history and development of digital computing and its use in design from early thought experiments, to computer-aided design systems, to present day artificial intelligences and robotics. The potentials and consequences of emerging computational design systems are discussed.

ARCH 545: Building Science and Technology I

(Dual-listed with ARCH 345). (2-0) Cr. 2. F.

Prereq: Undergraduate: Admission to the professional program in architecture; concurrent enrollment in ARCH 345L; graduate: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545L

First course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental forces and systems (solar orientation, climate, daylighting, natural ventilation, human comfort and occupancy patterns), materials and assemblies (drawing conventions, building codes, and physical properties of materials) and fundamental structural principles (forces/loads, equilibrium, and stability). Readings and project presentations.

ARCH 545L: Building Science and Technology I Lab

(0-6) Cr. 3. F.

Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 595; concurrent enrollment in ARCH 545.

Laboratory to accompany Arch 545 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format. Readings and project presentations.

ARCH 546: Building Science and Technology II

(Dual-listed with ARCH 346). (3-0) Cr. 3. S.

Prereq: Undergraduate: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346L. Graduate: ARCH 505, ARCH 545, ARCH 545L, and ARCH 595; concurrent enrollment in ARCH 506, ARCH 546L and ARCH 596.

Second course in a sequence focused on architectural building technologies. Lectures and labs cover: environmental systems (heat transfer in the building envelope, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and building energy calculation methods), materials & assemblies (building envelope systems, accessibility, egress, and material properties), and structural systems (structural system selection/comparison, and design and analysis of "form-active" compression and tension structures). Readings and project presentations.

ARCH 546L: Building Science and Technology II Lab

(0-4) Cr. 2. S.

Prereq: ARCH 345, ARCH 345L, MATH 145 and PHYS 111; concurrent enrollment in ARCH 346.

Laboratory to accompany Arch 546 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 547: Building Science and Technology III

(Dual-listed with ARCH 347). (3-0) Cr. 3. F.

Prereq: Undergraduate: ARCH 346, Arch 346L; concurrent enrollment in ARCH 347L. Graduate: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 601 and ARCH 547L.

Third course in a sequence focused on architectural building technologies. Lectures and labs cover: multistory building framing, assembly, and enclosure systems, sizing and selecting structural framing components (foundations, columns, beams, etc.), and an environmental design process that demonstrates the ability to integrate climate into the control of thermal, luminous, ventilative and acoustic environments. Introduction to plumbing and rain water collection systems.

ARCH 547L: Building Science and Technology III Lab

(0-2) Cr. 1. F.

Prereq: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596 or advanced standing in the M.Arch program; concurrent enrollment in ARCH 547 and ARCH 601.

Laboratory to accompany Arch 547 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 548: Building Science and Technology IV

(Dual-listed with ARCH 348). (3-0) Cr. 3. S.

Prereq: Undergraduate: ARCH 347, Arch 347L; concurrent enrollment in ARCH 348L. Graduate: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548L.

Fourth course in a sequence focused on architectural building technologies. Lectures and labs cover: ability to demonstrate active environmental HVAC control systems design, use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems, constructed building assemblies and details (building envelope details for waterproofing and enclosure, advanced material properties, costs, and serviceability), and structural design for multi-story structures (design and documenting various framing patterns, integration with other building systems, and lateral stability strategies for wind and seismic).

ARCH 548L: Building Science and Technology IV Lab

(0-2) Cr. 1. S.

Prereq: ARCH 547, ARCH 547L and ARCH 601; concurrent enrollment in ARCH 548.

Laboratory to accompany Arch 548 and must be taken concurrently. Integrating building technologies into architectural designs through experiments and exercises in laboratory format.

ARCH 558: Sustainability and Green Architecture

(3-0) Cr. 3.

Prereq: Graduate or Senior classification

Issues of sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment. Issues of green and sustainable architecture as related to critical thinking about methods of building material selection and systems, the environment of the United States and the world, and examples of green or sustainable building designs.

ARCH 567: Preservation, Restoration, and Rehabilitation

(3-0) Cr. 3. S.

Prereq: Senior classification

Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 568: Historic Preservation

(3-0) Cr. 3. F.

Prereq: Senior classification

The history and theory of the Historic Preservation movement including an overview of the National Trust for Historic Preservation; the National Register of the Historic Places; the National Park Service; federal programs, funding sources, preservation law, national landmarks, and historic districts. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 571: Design for All People

(Cross-listed with GERON). (3-0) Cr. 3. S.

Prereq: Graduate or Senior classification

Principles and procedures of inclusive design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of History, Theory, Culture requirements.

Meets U.S. Diversity Requirement

ARCH 575: Contemporary Urban Design Theory

(3-0) Cr. 3.

Prereq: Graduate or Senior classification

Current urban design theory and its application to urban problems. Credit counts toward fulfillment of History, Theory, Culture requirements.

ARCH 576: Study Abroad Options

Cr. 1-12. Repeatable, maximum of 12 credits. SS.

Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus.

Meets International Perspectives Requirement.

ARCH 581: Making and Material Practice

(1-12) Cr. 5. SS.

Prereq: ARCH 506, ARCH 546, ARCH 546L, and ARCH 596

Planning and execution of a project serving a community need. Learning occurs through both theory and active involvement in on-site work. Projects connect previous coursework to practical applications and community involvement.

ARCH 582: Professional Practice

(Dual-listed with ARCH 482). (3-0) Cr. 3. F.

Prereq: Junior classification and ARCH 371

Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 590: Special Topics

Cr. 1-5. Repeatable.

Prereq: Written approval of instructor and department chair on approved form

Investigation of architectural issues having a specialized nature.

ARCH 595: Seminar on the Built Environment I: History

(5-0) Cr. 5. F.

Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505, ARCH 545, and ARCH 545L

Introduction to historical canons and traditions of architecture and urbanism. Discussion of the relationship between historical inquiry and contemporary practice. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects.

ARCH 596: Seminar on the Built Environment II: Landscape and Society
(5-0) Cr. 5. S.

Prereq: ARCH 505, ARCH 545, ARCH 545L, ARCH 595 and concurrent enrollment in ARCH 506, ARCH 546, and ARCH 546L

Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment.

ARCH 597: Seminar on the Built Environment III: Theory

(3-0) Cr. 3. F.

Prereq: Graduate or Senior classification

Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space. Credit counts toward fulfillment of History, Theory, Culture requirements.

Meets International Perspectives Requirement.

ARCH 598: Seminar on the Built Environment IV: Topical Study

(3-0) Cr. 3. S.

Prereq: Graduate or Senior classification

A research seminar which considers a topic within contemporary discourses on the built environment outside of Europe and North America. The topic will be studied from multiple perspectives highlighting the historical and theoretical relationships between architecture, global cultures, geography, landscape, and urban planning. Credit counts toward fulfillment History, Theory, Culture requirements.

Courses for graduate students:

ARCH 601: Sustainable Building Design

(0-12) Cr. 6. F.

Prereq: ARCH 507, ARCH 546, ARCH 546L, and ARCH 596 and concurrent enrollment in ARCH 547 and ARCH 547L

Design projects that are developed through integrative design strategies that explore the relationship between buildings and environmental forces to maximize non-wasteful, efficient use of resources such as energy, water and building materials. Projects will include investigations of the impact of solar energy, airflow, building materials, passive and active systems and wall sections on spatial quality and form making. Design decisions will be quantitatively validated through energy modeling and performance simulation.

ARCH 602: Community, Building and the Environment

(0-12) Cr. 6. S.

Prereq: ARCH 601, ARCH 643, ARCH 597 and concurrent enrollment in ARCH 644

Design projects that explore the relationships between architectural, cultural, and environmental landscapes. Emphasis on regional sites, socio-economic conditions, and sustainable design and planning practices at multiple scales. Projects stress engagement with local circumstances and stakeholders; systemic interconnections and strategies; and the application of interdisciplinary research.

ARCH 603: Integrative Design

(0-12) Cr. 6. F.

Prereq: ARCH 601

Rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations while demonstrating broad integration and consideration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies. This course fulfills the Graduate College Creative Component Requirement.

ARCH 604: Design Studio Options

(0-12) Cr. 6. Repeatable, maximum of 12 credits. S.

Prereq: ARCH 602

Design studio selected by the students, which may include but is not limited to: independent design study, interdisciplinary design studio, study abroad, and design build. DSN S 546 for 6 cr. may be substituted for this course.

ARCH 690: Independent Design Study

(1-15) Cr. 6. Repeatable.

Prereq: Admission to the M. S. in Arch. program

Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Committee.

ARCH 698: Graduate Seminar

Cr. R. Repeatable. F.S.

Prereq: Admission to the M. Arch. or M. S. in Arch. programs

Special topics and guest speakers.

ARCH 699: Research

(1-18) Cr. 3-9. Repeatable.

Research.

Art Education (ARTED)

Any experimental courses offered by ARTED can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ARTED 209: Methods of Teaching in and Through Art**

(0-4) Cr. 2. F.S.

Prereq: Sophomore level

Methods of teaching in and through visual art are experienced and applied in this course. Art-centered and interdisciplinary art education methods for K-8 teaching are designed to develop creativity, authentic expression, collaboration, aesthetic sensitivity and pluralistic, global perspectives.

ARTED 211: Introduction to Art Education

(0-6) Cr. 3. F.S.

Prereq: Sophomore level

Teaching methods for K-12 art education. Hands-on discipline-specific and integrated art activities are experienced and designed; emphasis is on creativity, artistic and human diversity, community building, and development of thinking skills in holistic, pluralistic art education.

ARTED 490: Independent Study

Cr. arr. F.

Art History (ART H)

Any experimental courses offered by ART H can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ART H 280: History of Art I**

(3-0) Cr. 3. F.

Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic periods.

Meets International Perspectives Requirement.

ART H 281: History of Art II

(3-0) Cr. 3. S.

Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.

Meets International Perspectives Requirement.

ART H 281H: History of Art II: Honors

(3-0) Cr. 3. S.

Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.

Meets International Perspectives Requirement.

ART H 292: Introduction to Visual Culture Studies

(3-0) Cr. 3.

An introduction to various topics in visual culture studies, including significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture.

Meets U.S. Diversity Requirement

ART H 293: Origins and Evolution of Modern Design

(3-0) Cr. 3.

History of designed artifacts, their creators, and their cultural environments in Europe and America from the beginning of the Industrial Revolution to the present.

ART H 382: Art and Architecture of Asia

(3-0) Cr. 3.

Introduction to the history of art and architecture in Asia before the modern era. Cultures may include China, Korea, Japan, and India. Art traditions of Asia are explored in relation to their cultural, historical, and religious contexts.

Meets International Perspectives Requirement.

ART H 383: Greek and Roman Art

(Cross-listed with CL ST). (3-0) Cr. 3.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 383H: Greek and Roman Art: Honors

(Cross-listed with CL ST). (3-0) Cr. 3-4.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 384: Art of Islam

(3-0) Cr. 3.

Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.

Meets International Perspectives Requirement.

ART H 384H: Art of Islam, Honors

(3-0) Cr. 3-4.

Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.

Meets International Perspectives Requirement.

ART H 385: Renaissance Art

(3-0) Cr. 3.

European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

ART H 385H: Renaissance Art, Honors

(3-0) Cr. 3-4.

European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

ART H 386: American Art to 1945

(3-0) Cr. 3.

Survey of American art from the early colonial period to 1945, with emphasis on historical and cultural issues that underlie art production in the United States.

Meets U.S. Diversity Requirement

ART H 388: Modern Art and Theory

(3-0) Cr. 3.

Visual arts and critical theory of the early 20th century, including Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism.

ART H 395: Art and Theory Since 1945

(3-0) Cr. 3.

Visual arts and critical theory after 1945, including Abstract Expressionism, Pop Art, and Performance Art.

Meets U.S. Diversity Requirement

ART H 396: History of Photography

(3-0) Cr. 3.

Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ART H 486: Art History Field Study

Cr. R. Repeatable.

Prereq: Concurrent enrollment in an art history course and permission of instructor

Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art history. Offered on a satisfactory-fail basis only.

ART H 487: Nineteenth-Century Art

(3-0) Cr. 3.

European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ART H 489: History of Comics

(Dual-listed with ART H 589). (3-0) Cr. 3.

An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 489H: History of Comics: Honors

(3-0) Cr. 3-4.

An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 490: Independent Study

Cr. 1-6. Repeatable.

Prereq: Written approval of instructor and department chair on required form before the semester of enrollment

Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 490H: Independent Study, Honors

Cr. 1-6. Repeatable.

Prereq: Written approval of instructor and department chair on required form before the semester of enrollment

Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 491: Art History in Europe Seminar

(1-0) Cr. 1.

Prereq: Permission of instructor and planned enrollment in ART H 492

Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only.

Meets International Perspectives Requirement.

ART H 492: Art History in Europe

(Dual-listed with ART H 592). (3-0) Cr. 3.

Prereq: For ART H 492: ART H 491 or equivalent, permission of instructor; For ART H 592: Graduate classification, permission of instructor

International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered.

Meets International Perspectives Requirement.

ART H 494: Women/Gender in Art

(Cross-listed with WGS). (3-0) Cr. 3.

Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Meets U.S. Diversity Requirement

ART H 497: Museum/Gallery Internship

Cr. 1-6. Repeatable, maximum of 6 credits.

Prereq: Written approval of supervising instructor on required form in advance of semester of enrollment.

Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

ART H 498: Selected Topics in Art History

(Dual-listed with ART H 598). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Specialized study in the history or criticism of art and/or design.

ART H 499: Visual Culture Studies Writing and Methods Seminar

(4-0) Cr. 4.

Sustained exploration of topics related to Visual Culture Studies. Course incorporates introduction to methods central to the field of visual culture studies, writing exercises, and guided instruction in the process of conducting research and reporting results of the research process. Course will result in an original paper.

Courses primarily for graduate students, open to qualified undergraduates:

ART H 501: Issues in Visual and Material Culture Seminar

(3-0) Cr. 3.

Prereq: Permission of instructor

Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both relate to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies.

ART H 586: Museum/Gallery Internship

Cr. 1-6. Repeatable, maximum of 6 credits.

Prereq: Graduate classification and permission of instructor. Written approval in advance of semester of enrollment.

Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

ART H 587: Nineteenth Century Art

(3-0) Cr. 3.

European and American art and architecture from 1780 to 1900, focusing on the major movements of western Europe, including Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ART H 588: Modern Art and Theory

(3-0) Cr. 3.

Prereq: Graduate classification or permission of instructor

Visual arts and critical theory of the early 20th century, including Expressionism, Cubism, Futurism, Suprematism, Dada and Surrealism.

ART H 589: History of Comics

(Dual-listed with ART H 489). (3-0) Cr. 3.

An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 590: Special Topics

Cr. arr.

Prereq: Graduate classification; written approval of instructor and department chair on required form in advance of semester of enrollment.

Independent Study in Art History.

ART H 592: Art History in Europe

(Dual-listed with ART H 492). (3-0) Cr. 3.

Prereq: For ART H 492: ART H 491 or equivalent, permission of instructor; For ART H 592: Graduate classification, permission of instructor

International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ART H 594: Women/Gender in Art

(Cross-listed with WGS). (3-0) Cr. 3.

Prereq: Graduate classification or permission of instructor

Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

ART H 595: Art and Theory Since 1945

(3-0) Cr. 3.

Prereq: Graduate classification or permission of instructor

Visual arts and critical theory after 1945, including Abstract Expressionism, Pop Art, and Performance Art.

ART H 596: History of Photography

(3-0) Cr. 3.

Prereq: Graduate classification or permission of instructor

Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ART H 597: Green Art: Earthworks and Beyond

(3-0) Cr. 3.

Prereq: Graduate classification or permission of instructor

Seminar covering aspects of art and design based on ecological principles, including earthworks, land-based art, recycled/reused objects, ecofeminism, ephemerality, and green design.

ART H 598: Selected Topics in Art History

(Dual-listed with ART H 498). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Specialized study in the history or criticism of art and/or design.

Astronomy and Astrophysics (ASTRO)

Any experimental courses offered by ASTRO can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

ASTRO 102: North Star Astronomy

Cr. 1. F.S.

An entirely web-based course covering topics in observing the sky and navigation by the stars for students with little or no previous experience. The course combines material on common naked-eye phenomena, such as daily and seasonal variations in the sky, with information on how these helped navigators determine where they are on Earth. The course "lectures" are on-line, interactive units with build in exercises, hands-on (offline) activities and layers of help. Graded homework and quizzes are administered via Blackboard Learn. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 103: Evening Star

Cr. 1. F.S.

An entirely web-based course covering topics in celestial mechanics ("Rocket science!") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Blackboard Learn. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 106: Earth and Space Science for Elementary Education Majors

(Cross-listed with GEOL). (2-0) Cr. 2. F.S.

Prereq: Major in elementary or early childhood education.

Fundamental concepts of Earth and Space Science, including the solar system, weather and climate, water and soils, plate tectonics, and geologic hazards. Online course format.

ASTRO 106L: Earth and Space Science for Elementary Education Majors: Laboratory

(Cross-listed with GEOL). (0-2) Cr. 1. F.S.

Prereq: Restricted to elementary and early childhood education majors; to be taken concurrently with GEOL 106/ASTRO 106

Inquiry-based lab exploring fundamental concepts of Earth and Space Science, including the solar system, weather and climate, water and soils, plate tectonics, and geologic hazards. Must be taken concurrently with GEOL/ASTRO 106.

ASTRO 120: The Sky and the Solar System

(3-0) Cr. 3. F.S.SS.

For the nonscientist. A survey of our view of the universe, and the exploration of the solar system and beyond. The sky: constellations; motions of the Sun, Moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the Sun, planets, satellites, comets, meteorites, and asteroids. The detection and characterization of other solar systems, and the search for life in the universe. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 125L: The Sky and the Solar System Laboratory

(0-2) Cr. 1. F.S.

Prereq: Concurrent or previous enrollment in ASTRO 120

Laboratory course to accompany Astro 120. Students carry out practical exercises involving naked eye and telescopic observing to explore and reinforce ideas covered in Astro 120. Activities based on a sky-simulation computer program and other weather-independent exercises are also included.

ASTRO 150: Stars, Galaxies, and Cosmology

(3-0) Cr. 3. F.S.

For the nonscientist. A survey of astronomy with a focus on the universe beyond our solar system. Basic observational astronomy and the history of astronomy. Stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The structure and evolution of the Milky Way Galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe.

ASTRO 250: Astronomy Bizarre

(3-0) Cr. 3. S.

Prereq: ASTRO 120 or ASTRO 150

For the nonscientist. A small enrollment course examining new and exciting topics in modern astronomy. Galaxy and star formation. Black holes and pulsars. Colliding galaxies. Quasars. Dark Matter. Dark energy. Quasars. Cosmology, the Big Bang and the future of the universe. Prospects and searches for extraterrestrial life.

ASTRO 290: Independent Study

Cr. 1-4. Repeatable.

*Prereq: Permission of instructor***ASTRO 342: Introduction to Solar System Astronomy**

(3-0) Cr. 3. F.

Prereq: PHYS 222

An introduction to the physics of the Solar System and the planetary systems discovered around other stars. General characteristics of planetary systems: dynamics, thermodynamics, internal and surface structure of planets and minor bodies, physics of their atmosphere. Discovery techniques and characterization of extrasolar planets, and planetary systems formation models. "Grand tour" of the Solar System, using data and imagery from probes and telescopes that have visited these worlds. The origin and evolution of life on Earth, and the ongoing search for life in the Solar System and elsewhere in the universe.

ASTRO 344L: Astronomy Laboratory

(1-6) Cr. 3. F.

Prereq: PHYS 222

Experiments in optical astronomy. Observational techniques, ranging from stellar photometry to CCD imaging. Data processing and analysis techniques. Astronomical software packages and online databases and resources. Available instruments include a variety of small telescopes and astronomical CCD cameras.

ASTRO 346: Introduction to Astrophysics

(3-0) Cr. 3. S.

Prereq: PHYS 222

An exploration of the universe beyond our Solar System, with emphasis on the astrophysics of stars and galaxies. Observable properties of stars, physics of stellar atmospheres and interiors. Birth, evolution and death of stars, to understand the past and future of our Sun, the Milky Way galaxy and the other galaxies in the universe. Basic concepts of cosmology, dark matter and dark energy. Use of computer models to calculate the structure and evolution of stars and protostars, and to analyze actual astronomical data obtained by professional astronomers.

ASTRO 405: Astrophysical Cosmology

(Dual-listed with ASTRO 505). (3-0) Cr. 3. S.

Prereq: ASTRO 346 or permission of instructor

Introduction to modern cosmology and large-scale structure; mathematical and observational fundamentals associated with the origin, structure, and evolution of the Universe. Scale of the Universe, Hubble's Law, the cosmic microwave background, Big Bang nucleosynthesis, the origin of elements, dark energy and the accelerating universe, and dark matter. For senior undergraduates and graduate students in all areas of physics.

ASTRO 450: Undergraduate Research

Cr. 1-6. Repeatable. F.S.SS.

Prereq: Permission of instructor

Research under supervision of astronomy faculty.

ASTRO 450L: Undergraduate Research

Cr. 1-6. Repeatable. F.S.SS.

Prereq: ASTRO 344L and permission of instructor

Laboratory or observational project under supervision of astronomy faculty.

ASTRO 490: Independent Study

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: 6 credits in astronomy, permission of instructor

No more than 9 credits of Astro 490 may be counted toward graduation.

ASTRO 490H: Independent Study: Honors

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: 6 credits in astronomy, permission of instructor

No more than 9 credits of Astro 490 may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:**ASTRO 505: Astrophysical Cosmology**

(Dual-listed with ASTRO 405). (3-0) Cr. 3. S.

Prereq: ASTRO 346 or permission of instructor

Introduction to modern cosmology and large-scale structure; mathematical and observational fundamentals associated with the origin, structure, and evolution of the Universe. Scale of the Universe, Hubble's Law, the cosmic microwave background, Big Bang nucleosynthesis, the origin of elements, dark energy and the accelerating universe, and dark matter. For senior undergraduates and graduate students in all areas of physics.

ASTRO 510: Observational Astrophysics

(2-3) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: ASTRO 405 or ASTRO 505 or permission of instructor

Techniques in optical and near-IR astronomy, including spectroscopy and CCD photometry. Emphasis on projects involving proficiency in the use of research telescopes and modern instrumentation. Project topics range from photometric studies of pulsating and binary star systems to deep CCD imaging of faint nebulae and galaxies.

ASTRO 580: Stellar Astrophysics

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: ASTRO 405 or ASTRO 505 or permission of the instructor

The interior structure and atmospheric properties of stars: Stellar structure equations and constitutive relations: energy generation, energy transport by radiation and convection; equation of state, nuclear energy generation and nucleosynthesis. Numerical and analytic solutions to the equations of structure and evolution. Observational connections through the theory of radiative transfer. Line and continuum processes and sources of opacity. Non-LTE and statistical equilibrium. Line profiles. Interpretation of stellar spectra: temperature, pressure, and abundance determinations. Stellar evolution from formation to final phases.

ASTRO 582: High Energy Astrophysics

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: ASTRO 405 or ASTRO 505 or permission of the instructor

Interactions of high-energy particles, non-thermal radiation processes, spectral evolution of non-thermal systems, cosmic rays, active galactic nuclei, pulsars, neutrinos, measurement techniques for relativistic charged particles, high energy photons, and neutrinos.

ASTRO 584: Galactic Astronomy

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: ASTRO 405 or ASTRO 505 or permission of instructor

Overall structure of our Galaxy and the interstellar medium. Physical processes in the interstellar medium (e.g., heating and cooling mechanisms, turbulence). Observational techniques for studying the interstellar medium. Kinematics and chemical evolution of the Galaxy.

ASTRO 586: Extragalactic Astronomy

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: ASTRO 405 or ASTRO 505 or permission of the instructor

Galaxy evolution, dynamics of external galaxies, evolution and classification of galaxies, groups and clusters of galaxies, extragalactic radio sources, quasars, structure formation, cosmological models and their observational consequences.

ASTRO 590: Special topics

Cr. arr. Repeatable.

ASTRO 599: Creative Component

Cr. arr.

Prereq: Permission of instructor

Individually directed study of research-level problems for students electing the nonthesis M.S. option in astronomy.

Courses for graduate students:**ASTRO 650: Advanced Seminar**

(1-0) Cr. 1. Repeatable. F.S.

Topics of current interest in astronomy and astrophysics. Offered on a satisfactory-fail basis only.

ASTRO 675: Advanced Stellar Astrophysics

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: ASTRO 580 or permission of instructor

Advanced topics in stellar astrophysics. Dynamic and extended atmospheres, chromospheres, coronae, and stellar winds. MHD, stellar activity, and dynamo theory. Radiative transfer and the transition from extended atmospheres to the interstellar medium. Diffusive processes in stellar atmospheres and interiors. Techniques for quantitative analysis of planetary and stellar spectra including detailed modeling and spectrum synthesis. Evolution in interacting binaries. Nucleosynthesis II. Variable stars. Supernovae. Neutron stars and black holes.

ASTRO 699: Research

Cr. arr. Repeatable.

Athletic Training (A TR)

Any experimental courses offered by A TR can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**A TR 217: Clinical Practicum in Athletic Training I**

Cr. 1. S.

Prereq: A TR 221, A TR 222, Permission of Athletic Training Program Director

Athletic training clinical experiences for pre-athletic training students.

Offered on a satisfactory-fail basis only.

A TR 218: Orientation to Athletic Training Clinical Experience

(0-2) Cr. 0.5. Repeatable, maximum of 1 credits. F.S.

Pre-athletic training clinical experience designed to orientate students to the athletic training profession prior to enrolling in athletic training course sequence. Students will observe athletic trainers in various athletic training clinical sites. Open to pre-athletic training students only. Offered on a satisfactory-fail basis only.

A TR 219: Anatomy Clinical Practicum

(0-2) Cr. 1. F.

Athletic training clinical experiences designed to review human anatomical structures including origin, insertion, action, innervations of muscles. Students will gain experience with palpation of these structures to help identify location of anatomical landmarks. Students will also gain experience identifying bones, ligaments, and tendons. Open to athletic training students only.

A TR 220: Basic Athletic Training

(1-2) Cr. 2.

Prereq: BIOL 155 or BIOL 255 and BIOL 256

Introduction to methods of prevention and immediate care of athletic injuries. Basic information concerning health supervision of athletes, and some basic wrapping and strapping techniques for common injuries. Non A TR majors only.

A TR 221: Pre-Athletic Training Clinical Practicum

(0-3) Cr. 1. F.

Prereq: Credit or enrollment in A TR 222

Athletic training clinical observation experiences to accompany A TR 222. Utilize knowledge to evaluate, analyze and demonstrate appropriate taping, wrapping and basic skill techniques. Open to students interested in the athletic training option. Offered on a satisfactory-fail basis only.

A TR 222: Basic Athletic Training for Athletic Trainers

(2-2) Cr. 3. F.

Prereq: BIOL 255, BIOL 255L

Provides pre-athletic training students with the knowledge of the profession of a certified athletic trainer, factors associated with injury prevention, treatment, emergency care of athletic injuries, protective equipment, basic organization, administrative, and legal concepts in the athletic training setting. To be taken concurrently with A TR 221.

A TR 223: Preseason Clinical Experience Practicum

(0-3) Cr. 1. F.

Prereq: Permission of Athletic Training Program Director

Athletic training clinical experiences for athletic training students during pre-season intercollegiate football. Clinical experiences include: Professional Rescuer CPR, AED certification, emergency splinting and spineboarding, medical record keeping and HIPPA regulations, environmental conditions, prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, mouthpiece formation, and anatomy review. Offered on a satisfactory-fail basis only.

A TR 224: Evaluation of Athletic Injuries I

(2-3) Cr. 3. F.

Prereq: Permission of athletic training program director

Sport injury assessment procedures and evaluation techniques for lower body injuries. Includes an overview of mechanisms of injury, general musculoskeletal disorders, and spine or neurological dysfunction. Designed for students in the athletic training major.

A TR 225: Athletic Injuries I Clinical Practicum

(0-3) Cr. 1. F.

Prereq: Permission of athletic training program director

Athletic training clinical experience to accompany A TR 224. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 226: Evaluation of Athletic Injuries II

(2-3) Cr. 3. S.

Prereq: Permission of athletic training program director

Sport injury assessment procedures and evaluation techniques for lower body injuries. Includes an overview of common illnesses of athletes and sport specific injuries. Designed for students in the athletic training major.

A TR 227: Athletic Injuries II Clinical Practicum

(0-3) Cr. 1. S.

Prereq: Permission of athletic training program director

Athletic training clinical experience to accompany A TR 226. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 228: Basic Orthopedic Assessment and Evaluation Principles

Cr. 3. F.

Prereq: BIOL 255, BIOL 255L, BIOL 256, BIOL 256L, Permission of Athletic Training Program Director

Assessment procedures and evaluation techniques for upper and lower body orthopedic conditions and injuries. Includes an overview of mechanisms of injury, general musculoskeletal disorders, spine or neurological dysfunction.

A TR 229: Clinical Practicum in Athletic Training II

Cr. 1. F.

Prereq: Concurrent enrollment in A TR 228. Permission of Athletic Training Program Director.

Pre-Athletic training clinical experiences designed to orientate students to the assessment and evaluation principles of upper and lower body orthopedic conditions and injuries. Pre-athletic training students will observe athletic trainers in various athletic training clinical sites. Concurrent enrollment in A TR 228. Offered on a satisfactory-fail basis only.

A TR 240: Introduction to Taping, Equipment, and Bracing Techniques

(0-3) Cr. 1. F.

Prereq: Permission of athletic training program director

Basic information and laboratory instruction regarding basic taping techniques, athletic equipment fitting procedures, and the use and proper fitting of prophylactic braces. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 323: Therapeutic Modalities for Athletic Trainers

(2-2) Cr. 3. F.

Prereq: Permission of athletic training program director

Theory and technique of therapeutic modalities used in the management of injuries.

A TR 324: Therapeutic Modalities Clinical Practicum

(0-3) Cr. 1. F.

Prereq: Permission of athletic training program director

Athletic training clinical experience to accompany A TR 323. Open to students in athletic training major. Offered on a satisfactory-fail basis only.

A TR 326: Rehabilitation of Athletic Injuries

(2-2) Cr. 3. S.

Prereq: Permission of athletic training program director

Theory and practical application of rehabilitation principles used in the management of athletic injuries.

A TR 327: Rehabilitation of Athletic Injuries Clinical Practicum

(0-3) Cr. 1. S.

Prereq: Permission of athletic training program director

Athletic training clinical experience to accompany A TR 326. Open to students in the athletic training major. Offered on a satisfactory-fail basis only.

A TR 328: Athletic Injuries Clinical Practicum

Cr. 1.

Prereq: Permission of athletic training program director

Athletic training clinical experiences for pre-athletic training students. Clinical experiences include: prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, and anatomy review. Offered on a satisfactory-fail basis only.

A TR 425: Organization and Administration of Athletic Training

(3-0) Cr. 3. F.

Prereq: Permission of athletic training program director, senior classification

Current administrative, professional, and legal issues pertaining to athletic training. Job search techniques and strategies including preparation of materials for athletic training students.

A TR 450: Medical Concerns for the Athletic Trainer

(3-0) Cr. 3. F.

Prereq: Permission of athletic training program director

Current medical issues and concerns, including pathology of illness and injury, dermatological conditions, exposure to allied health care professionals, and pharmacological indications in relation to the profession of athletic training and in patient/athlete care.

A TR 488: Evidence Based Practice in Athletic Training

Cr. 2. F.S.

Prereq: Permission of athletic training program director

Clinical experiences in application of athletic training techniques under the supervision of certified athletic trainers. Introduction and utilization of evidence-based practice methodology via online instruction and integration of evidence-based practice into the clinical experience.

A TR 489: Review of Athletic Training Competencies and Clinical Proficiencies

Cr. 1. F.S.

Prereq: Senior classification, permission of athletic training program director

Preparation for professional endorsement and certification by review of required competencies and clinical proficiencies. Required for endorsement or approval to sit for Board of Certification Exam. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:**A TR 501: Bracing, Wrapping, and Taping Techniques**

(0-3) Cr. 1.

Prereq: Acceptance into Athletic Training program

Methods to select, fabricate, and/or customize prophylactic, assistive, and restrictive devices, material, and techniques into plan of care (durable medical equipment, orthotic devices, taping, bracing, splinting, protective padding, and casting). Methods of taping and wrapping for injury care, prevention of injury, and return to play. Exposure to different brands of bracing, how to fit a brace, and their use as well as casting techniques. Discussions of when to refer for prosthetics and overview of gait training.

A TR 502: Emergency Care Procedures in Athletic Training

(2-2) Cr. 3. SS.

Prereq: Acceptance into Athletic Training program

Development, implementation, and revision of policies pertaining to the prevention, preparedness and response to medical emergencies and other critical incidents. Evaluate and manage patients with acute conditions including triaging conditions and internal/external hemorrhage. Cardiac, respiratory, and cervical spine compromise.

A TR 505: Therapeutic Modalities and Clinical Interventions

(2-2) Cr. 3. F.

Prereq: A TR 502, A TR 520, acceptance into Athletic Training program

Knowledge and skills to utilize a variety of therapeutic modalities.

Detailed understanding of the psychological and physiological process of pain, healing and a problem-based approach to apply theories, principles, and techniques of thermal, electrical, mechanical, light, and alternative therapies (laser, cryotherapy). Incorporation interventions (for pre-, post-, and non-surgical conditions) designed to address a patients' identified impairments, activity limitations, injuries, and participation restrictions. Home care to include self-treatment, soft tissue techniques.

A TR 509: Athletic Training Clinical Education I

Cr. 2. SS.

Prereq: Acceptance into Athletic Training program

Clinical experiences under the direct supervision of a certified athletic trainer. Techniques and clinical skills provided in both the clinical and classroom settings including: Special Olympics, emergency room rotation, environmental conditions, off season practice and conditioning sessions, biometrics/physiological monitoring systems and translation of data into effective preventative measures, clinical interventions, and performance enhancement. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

A TR 510: Evaluation Methods and Treatment Techniques - Lower Body

(2-2) Cr. 3. F.

Prereq: A TR 502, A TR 520, acceptance into Athletic Training program

Proper methods of musculoskeletal evaluation of the lower extremity.

Evaluate and manage patient (s) with acute conditions including triaging conditions that are life threatening or otherwise emergent. Obtain a medical history, proper methods of documentation, patient overview, identification of comorbidities, assessment of function, selection and use of special tests and measures assessing patient's clinical presentation, evaluation of all results to determine a plan of care, including referral when warranted. Selection and incorporations of interventions designed to address a patient's identified impairments, activity limitations, and participation restriction.

A TR 513: Evaluation methods and Treatment Techniques - Upper Body

(2-2) Cr. 3. S.

Prereq: A TR 510, A TR 521, acceptance into Athletic Training program

Instruction on the proper methods of musculoskeletal evaluation of the upper extremity, thorax, spine, and head. Evaluate and manage patient (s) with acute conditions including triaging conditions that are life threatening or otherwise emergent. Obtain a medical history, proper methods of documentation, patient overview, and determination of participation status (PPE), identification of comorbidities, assessment of function, selection and use of special tests and measures assessing patient's clinical presentation, evaluation of all results to determine a plan of care, including referral when warranted. Selection and incorporations of interventions designed to address a patient's identified impairments, activity limitations, and participation restriction.

A TR 515: Evidence-based Practice in Athletic Training

(2-0) Cr. 2. SS.

Prereq: A TR 522, A TR 545, acceptance into Athletic Training program

Principles of evidence-based practice, search for evidence, grading and evaluating literature. Use of systems of quality assurance and improvement to enhance patient care, search, retrieve, and incorporating the use of contemporary principles and practices information from health informatics for clinical decisions and communication with patients/clients, family members, coaches, administrators, other healthcare providers, consumers, payors, and/or policy makers. Use of the International Classification of Functioning, Disability, and Health (ICF) as a framework for delivery and communication about patient care.

A TR 519: Athletic Training Clinical Education II

Cr. 2. F.

Prereq: A TR 510, A TR 521, acceptance into Athletic Training program

Clinical experiences under the supervision of a certified athletic trainer with client/patient populations in competitive, recreational, individual and team activities, high and low intensity activities, non-sport client/patient populations, different sexes and throughout the lifespan (pediatric, adult, elderly). Real client/patient interactions as well as assessment of clinical component procedures and policies. Clinical hours occur in a variety of settings with patients and the student will complete the clinical hours that may extend prior to and/or beyond the academic semester end date. Clinical opportunities provide a basis for evaluating the athletic training student's clinical progression through the program. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

A TR 520: Athletic Training Seminar: Foundations and Policies

(1-0) Cr. 1. SS.

Prereq: Acceptance into Athletic Training program

Introduction to athletic training program and to explore the following topics: environmental issues and concerns, wound care/closure, fractures/dislocations, hemostatic agents/tourniquet applications. Blood borne pathogen training, communicable and infectious disease prevention, FERPA/HIPAA, concussion/brain injury with consideration of established protocols including: comprehensive examination, recognition, and treatment, implementation of a plan of care, referral, and return to participation. Use of C3Logic, Impact testing, and other methods will be introduced. Ankle and knee injury focus.

A TR 521: Athletic Training Seminar: Diagnostic Imaging and Lab Studies

(1-0) Cr. 1. F.

Prereq: A TR 502, A TR 520, acceptance into Athletic Training program

Procedures on how to obtain via the appropriate team physicians and medical staff the necessary and appropriate diagnostic tests (including imaging, bloodwork, urinalysis, electrocardiogram) to facilitate diagnosis, referral, and treatment planning. Surgical observation experience including pre-, post- care designed to address a patient/s identified impairments, activity limitations, and participation restrictions. Shoulder and lower back injury focus.

A TR 522: Athletic Training Seminar: Professional Behaviors, Ethics, and Life Balance

(1-0) Cr. 1. S.

Prereq: A TR 510, 521, acceptance into Athletic Training program

Explore other allied health professions and interprofessional collaboration for optimal patient care and referral. Total patient care and how different professions can impact the care will be explored and discussed. Participation in roundtable discussions with other interprofessional health professions and students are exposed to foundational behaviors of professional practice including but not limited to: work/family balance, ethics, mentorship, leadership, professional involvement, and promotion of the profession.

A TR 523: Athletic Training Seminar: Advanced Therapeutic Interventions

(1-0) Cr. 1. SS.

Prereq: A TR 522, A TR 545, acceptance into Athletic Training program

Training and exposure in cupping, graston or ASTM technique for soft tissue mobilization, and dry needling. Case study analysis utilizing previous coursework including individual self-assessment of clinical skills.

A TR 524: Athletic Training Seminar: Advanced Topics

(1-0) Cr. 1. S.

Prereq: A TR 515X, A TR 550X, A TR 565X and permission of the Athletic Training Program Director

Assess the athletic training students' mastery of knowledge and clinical skills in athletic training, prepare students for employment, and self-assessment. Case study covering all of the domains of athletic training and demonstrates interprofessional and interdisciplinary connections. Review of all of the athletic training domains via specific exams (written, simulation and computer based) will be utilized to prepare the student to challenge the BOC examination.

A TR 529: Athletic Training Clinical Education III

Cr. 2. S.

Prereq: A TR 510, A TR 521, A TR 519, acceptance into Athletic Training program

Clinical experiences under the direct supervision of a certified athletic trainer where foundational behaviors of professional practice with emphasis being placed on evaluation of clinical skills. Reinforcement and instruction about therapeutic modalities, upper and lower extremity assessments. Clinical hours occur in a variety of settings with patients and the student will complete the clinical hours that may extend prior to and/or beyond the academic semester end date. Clinical opportunities provide a basis for evaluating the athletic training student's clinical progression through the program. Offered on a satisfactory-fail basis only.

A TR 539: Athletic Training Clinical Education IV

Cr. 2. SS.

Prereq: A TR 522, A TR 545, A TR 529, acceptance into Athletic Training program

Clinical experiences under the direct supervision of a certified athletic trainer. Advanced issues in the athletic training profession with emphasis on practical application and professional development. Utilization of evidenced based research and approaches to clinical practice with emphasis placed on lab reports, imaging results, life-span issues, and diverse patient populations. Foundational behaviors of professional practice and emphasis will focus on evaluation, treatment, rehabilitation, and clinical skills. Offered on a satisfactory-fail basis only.

A TR 545: Therapeutic Exercise and Rehabilitation Interventions

(2-2) Cr. 3. S.

Prereq: A TR 510, A TR 521, acceptance into Athletic Training program

Therapeutic and corrective exercise, joint mobilization, soft tissue techniques, movement training (including gait training), motor control/ proprioceptive activities, task-specific functional training, home care including self-treatment and exercise, cardiovascular training. Pre, post, and non-surgical conditions and addressing activity limitations, participation restrictions and return to play guidelines.

A TR 549A: Athletic Training Clinical Education Study Abroad: Preparing for the Experience

Cr. 1. S.

Prereq: In addition to the study abroad application requirements, students must be accepted into their intended program, junior classification or graduate student majoring in Athletic Training, minimum GPA of 3.0, and completion of A TR 220, or A TR 228 and A TR 229.

Preparation for a study abroad experience that is focused on the discipline of athletic training in another country. Pre-travel for A TR 549B study abroad experience.

Meets International Perspectives Requirement.

A TR 549B: Athletic Training Clinical Education Study Abroad

Cr. 2. SS.

Prereq: Accepted to study abroad by the A TR Program Director and passing A TR 549A.

First-person perspective into the athletic training profession in another country as well as provide enrichment experiences related to the history and culture of that country. Follow-up course and experience of one credit A TR 549A which was intended to prepare the student for the study abroad experience.

Meets International Perspectives Requirement.

A TR 550: Pharmacological Issues in Athletic Training

(2-0) Cr. 2. SS.

Prereq: A TR 522, A TR 545, acceptance into Athletic Training program

General medical and pharmacological issues generally found in the field of athletic training. Medications used to treat medical conditions and the ability to educate patients regarding appropriate pharmacological agents for the management of their condition, including indications, contraindications, dosing, interactions, and adverse reactions.

Administration of medications by the appropriate route upon the order of a physician or other provider with legal prescribing authority.

A TR 559: Athletic Training Clinical Education V

Cr. 5. F.

Course monitors student progression of athletic training proficiencies, acquiring clinical skills under the direct supervision of a certified A TR. Reinforce and instruct new info about general medical conditions and administrative topics and begin the immersive clinical experience required prior to graduation. Field experience provides immersive and additional athletic training experiences and clinical responsibilities for a minimum two 5 week rotations under the direct supervision of a certified A TR or allied health care professional. Required to complete a minimum of 25 hrs per week of field clinical experience. Site approved by the preceptor and A TR program director prior to beginning the immersion clinical experience. Clinical experience may extend beyond the academic semester end date and the clinical hours are a component of this course. Offered on a satisfactory-fail basis only.

A TR 560: General Medical and Behavioral Health Issues

(3-0) Cr. 3. SS.

Prereq: A TR 522, A TR 545, acceptance into Athletic Training program

Medical issues generally observed in the athletic training profession. Development and implementation of wellness strategies to mitigate the risk for long-term health conditions across the lifespan and in an active population. Topics including dermatology, mental illness, neurological disorders, pulmonary disease, respiratory infections, viral infections, autoimmune disorders, oncology, gastrointestinal conditions and sexually transmitted infections. Identify, refer, give support to patients with behavioral health conditions; educate clients/patients about effects, participation consequences, risks of misuse and abuse of alcohol, performance-enhancing drugs/substances; and over the counter, prescription and recreational drugs including drug testing policies and procedures.

A TR 569: Athletic Training Immersion Clinical Education VI

Cr. 5. S.

Prereq: A TR 565X, permission of Athletic Training Program Director

Cumulative clinical experience to gain a more in-depth experience in the field of athletic training. Student selects a field or site experience that meets their professional goals. Field experience is designed to provide immersive and additional athletic training experiences for a minimum of 10 weeks under the direct supervision of a certified athletic trainer. Site approved by the preceptor and A TR program director prior to beginning the immersion clinical experience. Required to complete a minimum of 25 hours per week of field experience. Clinical experience may extend beyond the academic semester end date and the clinical hours are a component of this course. Offered on a satisfactory-fail basis only.

A TR 570: Injury Intervention, Rehabilitation and Patient Care

(2-2) Cr. 3. F.

Prereq: A TR 515X, A TR 550X, A TR 560X and acceptance into Athletic Training program

Basic understanding of injury and sport psychology and its application to the overall health and well-being of athletic and general population clients. Psychological, social, socio-economical, and environmental factors that influence a client/patient and in their injury susceptibility, reaction, immediate care, and adherence to rehabilitation will be explored. Assessment and intervention techniques to promote and facilitate rehabilitation in a variety of professional settings and with patients from different backgrounds and social issues that may impact a patient. Overview of special populations (adolescent, female, special populations of athletes/physically active patients). Foundational behaviors of professional practice and working with other allied health care professionals in the overall health and well-being of a patient will be explored.

A TR 575: Athletic Training Organization and Administration

(3-0) Cr. 3. S.

Prereq: A TR 565X, concurrently enrolled in A TR 569X

Knowledge and skills necessary for the administration aspect of an athletic training program. Course content includes but is not limited to: PPEs, how to manage physical, human, and financial resources in the delivery of healthcare services. Discussion of patient and insurance management, working relationships with interprofessional members of the health care team, policies and procedures for guidance in the daily operation of athletic training services including EAP or other critical incidents (concussion or other brain injuries), patients in behavioral health crisis, record keeping, athletic training facility design, resume development, and administrative/leadership skills and mentoring.

Athletics (ATH)

Courses primarily for undergraduates:

ATH 101: Intercollegiate Athletics

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101B: Intercollegiate Athletics: Basketball (men)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101C: Intercollegiate Athletics: Basketball (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101D: Intercollegiate Athletics: Cross Country (men)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101E: Intercollegiate Athletics: Cross Country (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101F: Intercollegiate Athletics: Football (men)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101G: Intercollegiate Athletics: Golf (men)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101J: Intercollegiate Athletics: Gymnastics (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101K: Intercollegiate Athletics: Softball (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101M: Intercollegiate Athletics: Swimming/Diving (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101O: Intercollegiate Athletics: Tennis (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101P: Intercollegiate Athletics: Track and Field (men)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101Q: Intercollegiate Athletics: Track and Field (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101R: Intercollegiate Athletics: Volleyball (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101S: Intercollegiate Athletics: Wrestling (men)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101T: Intercollegiate Athletics: Golf (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

ATH 101U: Intercollegiate Athletics: Soccer (women)

Cr. 1. Repeatable, maximum of 4 credits. F.S.

Prereq: Permission of head coach

Limited to a maximum of 4. Offered on a satisfactory-fail basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for KIN 166 or any skill technique course in the same sport.

Biochemistry, Biophysics, and Molecular Biology (BBMB)

Any experimental courses offered by BBMB can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

BBMB 101: Introduction to Biochemistry

(1-0) Cr. 1. F.

Basic structure and function of biological molecules: protein, lipids, nucleic acids, and carbohydrates. Introduction to frontier technologies in the biosciences, and a survey of careers and research in biotechnology. For students majoring in Biochemistry or Biophysics or considering one of these majors.

BBMB 102: Introduction to Biochemistry Laboratory

(0-2) Cr. 1. S.

Prereq: Credit or enrollment in CHEM 177 and CHEM 177L or CHEM 201 and CHEM 201L

Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. Laboratory experimentation covers biochemical concepts and the study of bio-molecules including proteins, lipids and nucleic acids. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 110: Biochemistry Learning Community Orientation

Cr. 1. F.

Prereq: Co-enrollment with BBMB 101 highly recommended.

Overview of the program of study, academic planning, resources on campus for the successful transition to Iowa State, team#building, leadership, and community#focused activities. For members of the Biochemistry & Biophysics Learning Community. Offered on a satisfactory-fail basis only.

BBMB 111: Biochemistry Learning Community

Cr. 1. S.

Prereq: Enrollment in BBMB102 is highly recommended.

Overview of career-building and research resources within BBMB and across ISU, including internships, lab skills, independent research, and leadership opportunities. For members of the Biochemistry & Biophysics Learning Community. Offered on a satisfactory-fail basis only.

BBMB 120: The Biochemistry of Beer

(Cross-listed with FS HN). (2-0) Cr. 2. F.

An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. Natural science majors are limited to elective credit only.

BBMB 120L: Biochemistry of Beer Laboratory

(Cross-listed with FS HN). Cr. 1.

Prereq: Credit or enrollment for credit in BBMB 120

An introduction to biochemical methods related to the production of beer. Laboratory exercises related to water chemistry, mash enzymology, hop compound extraction and analysis, and yeast biology will be performed. Closely follows the material being taught in BBMB 120. Natural science majors are limited to elective credit only.

BBMB 121: Medicines, Drugs and You

Cr. 2. S.

Prereq: One year of high school chemistry or CHEM 50 and biology.

An introduction to how medicines treat disease, what drug molecules look like, how they function, how they can be toxic, modern therapeutics ranging from over-the-counter pain relievers, antibiotics and anti-depressants, to anti-cancer chemotherapies, a discussion of illegal drugs from toxicity to mechanism of action and potential therapeutic benefits. Intended for students of all majors.

BBMB 201: Chemical Principles in Biological Systems

(2-0) Cr. 2. S.

Prereq: Credit or enrollment in CHEM 332

Survey of chemical principles as they apply in biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics or agricultural biochemistry.

BBMB 221: Structure and Reactions in Biochemical Processes

(3-0) Cr. 3. F.S.

Prereq: CHEM 163, CHEM 167, or CHEM 177

Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301: Survey of Biochemistry

(3-0) Cr. 3. S.SS.

Prereq: CHEM 231 or CHEM 331

A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 303: General Biochemistry

Cr. 3. F.

Prereq: CHEM 331 or equivalent

Survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids and nucleic acids; enzyme activity; metabolism; DNA replication; RNA transcription; protein translation; with case studies examining industrial uses. Not acceptable for a credit towards a major in biochemistry, biophysics or agricultural biochemistry. Only one of 301, 303(X), or 316 may count toward graduation.

BBMB 312: Experimental Research Skills in Biochemistry

Cr. 2. F.S.

Prereq: BBMB 102; credit or concurrent enrollment in CHEM 178 or CHEM 201

Inquiry-based introduction to biochemical techniques such as protein purification, enzymatic assays, solution preparation, hypothesis formation and testing, data analysis, high-throughput methodology, research record keeping, technical writing and scientific communication.

BBMB 316: Principles of Biochemistry

(3-0) Cr. 3. F.S.

Prereq: CHEM 231 or CHEM 331; BIOL 212; BIOL 313 and BIOL 314 strongly recommended.

Understanding biological systems at the molecular level; chemistry of biological macromolecules, enzyme function and regulation, metabolic pathways; integration of metabolism in diverse living systems. For students in biology and related majors who do not require the more rigorous treatment of biochemistry found in BBMB 404/405. Course offered online. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 404: Biochemistry I

(3-0) Cr. 3. F.

Prereq: CHEM 331

A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure; enzymology; carbohydrate metabolism. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

BBMB 405: Biochemistry II

(3-0) Cr. 3. S.

Prereq: BBMB 404

A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Course available online. Credit for both BBMB 420 and the BBMB 404 - BBMB 405 sequence may not be applied toward graduation.

BBMB 411: Techniques in Biochemical Research

(2-8) Cr. 4. F.

Prereq: Credit or enrollment in BBMB 404 or BBMB 504 and BBMB 505; CHEM 211

Laboratory experimentation and techniques for studying biochemistry, including: chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids. Scientific communication and technical writing are emphasized.

BBMB 420: Mammalian Biochemistry

(3-0) Cr. 3. F.

Prereq: CHEM 332, BIOL 314

Structure and function of proteins; enzymology; biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry or biochemistry. Acceptable for credit toward a major in biophysics. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

BBMB 430: Prokaryotic Diversity and Ecology

(Dual-listed with BBMB 530). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: MICRO 302, MICRO 302L

Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 440: Laboratory in Microbial Physiology, Diversity, and Genetics

(Cross-listed with MICRO). (2-6) Cr. 4. F.S.

Prereq: MICRO 302, MICRO 302L, CHEM 332, BIOL 313L

Fundamental techniques and theory for studying the cellular mechanisms, genetic processes and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments as well as an emphasis on genetic and molecular techniques to understand antibiotic resistance processes and mechanisms. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of bacteria. Essential components for the effective communication of scientific results are also emphasized.

BBMB 461: Molecular Biophysics

(Dual-listed with BBMB 561). (2-0) Cr. 2. S.

Prereq: Credit or enrollment in MATH 166 and CHEM 178 and PHYS 222 or PHYS 112.

Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 490: Independent Study

Cr. 1-3. Repeatable. F.S.SS.

Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor.

Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 490H: Independent Study, Honors

Cr. 1-3. Repeatable. F.S.SS.

Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor

Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 499: Undergraduate Research

Cr. 1-5. Repeatable. F.S.SS.

Prereq: Permission of faculty member with whom student proposes to work.

Independent research under faculty guidance.

Courses primarily for graduate students, open to qualified undergraduates:

BBMB 504: Amino Acids and Proteins

(2-0) Cr. 2. F.

Prereq: CHEM 332 or equivalent

Review of amino acids and proteins, including atomic interactions, thermodynamics, structure and properties of amino acids, post-translational modifications, protein expression, purification and analysis, protein secondary, tertiary and quaternary structure, protein folding, oxygen transport and hemoglobin, models for equilibrium binding, elementary reactions and enzyme kinetics, biosynthesis of amino acids: pathways and mechanisms.

BBMB 505: Bioenergetics and Metabolism

(2-0) Cr. 2. F.

Prereq: CHEM 211, CHEM 332; a previous course in biochemistry is strongly recommended

Examination of catabolic pathways involved in the oxidation of organic and inorganic molecules, and energy metabolism involving inputs from light or other non-light sources. Central metabolism and glycolysis, fermentation, aerobic and anaerobic respiration, photosynthesis.

BBMB 506: Membrane Biochemistry

(2-0) Cr. 2.

Prereq: CHEM 332 or equivalent

Analysis of the structure, function, and synthesis of membranes. Bacterial and eukaryotic membrane characteristics. Membrane transport and signaling mechanisms. Analysis of the structure and function of lipids and membrane proteins.

BBMB 507: Biochemistry of Nucleic Acids

(2-0) Cr. 2. S.

Prereq: CHEM 332 or equivalent

Analysis of the chemical structure, function, synthesis, and metabolism of nucleic acids. Chemical characterization of nucleotides, polynucleotides, DNA, and RNA. Analysis of transcription, translation, and the genetic code.

BBMB 510: Molecular Biology and Biochemistry of RNA

(2-0) Cr. 2. F.

Prereq: BIOL 313, BBMB 405, BBMB 502, BBMB 506 and 507 or Gen 409, or equivalent

Biochemical processes that define structure and function of nucleic acids. Emphasis on the molecular processes that take place during synthesis, processing, and function of different RNA species; review of recent advances in RNA research.

BBMB 530: Prokaryotic Diversity and Ecology

(Dual-listed with BBMB 430). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: MICRO 302, MICRO 302L

Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 532: Enzyme Kinetics and Mechanisms

Cr. 2. Alt. S., offered odd-numbered years.

Prereq: BBMB 504

Advanced concepts of enzyme kinetics and catalysis. Experimental methods for determining kinetic and chemical reaction mechanisms. Enzyme structure/function relationships and the role of dynamics in catalysis.

BBMB 542A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

BBMB 542B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.

Prereq: Graduate classification

Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

BBMB 542C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

BBMB 542D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

BBMB 542E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

BBMB 542F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

BBMB 542G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Offered on a satisfactory-fail basis only.

BBMB 561: Molecular Biophysics

(Dual-listed with BBMB 461). (2-0) Cr. 2. S.

Prereq: Credit or enrollment in MATH 166 and CHEM 178 and PHYS 222 or PHYS 112.

Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 561L: Laboratory in Molecular Biophysics

(1-3) Cr. 2. S.

Prereq: Credit or enrollment in BBMB 461/BBMB 561

Practice in methods of X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy as applied to macromolecules.

BBMB 569: Structural Bioinformatics

(Cross-listed with BCB, COM S, CPR E, GDCB). (3-0) Cr. 3. F.

Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution.

BBMB 590: Special Topics

Cr. arr.

By arrangement.

BBMB 593: Workshop in Biochemistry and Biophysics

Cr. 1. Repeatable. F.S.

Prereq: Permission and signature of course administrator required.

Workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry. Spring only: BBMB Undergraduate Research Symposium participation. Scheduled class meetings are required in addition to attending the symposium.

Courses for graduate students:**BBMB 615: Molecular Immunology**

(Cross-listed with MICRO, V MPM). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: BBMB 405 or BBMB 506 and BBMB 507

Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

BBMB 645: Molecular Signaling

(2-0) Cr. 2. Alt. S., offered odd-numbered years.

Prereq: BBMB 405 or BBMB 420; or BBMB 506 and BBMB 507

Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone; growth factor and extracellular matrix activators; protein kinases; caspase and transcription factor downstream signals; lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

BBMB 661: Current Topics in Neuroscience

(Cross-listed with GDCB, NEURO). (2-0) Cr. 2-3. Repeatable. Alt. S., offered even-numbered years.

Prereq: NEURO 556 (or comparable course) or permission of instructor

Topics may include molecular and cellular neuroscience, neurodevelopment, neuroplasticity, neurodegenerative diseases, cognitive neuroscience, sensory biology, neural integration, membrane biophysics, neuroethology, techniques in neurobiology and behavior.

BBMB 675: Nucleic Acid Structure and Function

(2-0) Cr. 2. Alt. F., offered even-numbered years.

Prereq: BBMB 405 or BBMB 506 and BBMB 507

In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 676: Biochemistry of Gene Expression in Eucaryotes

(Cross-listed with MCDB). (2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: BBMB 404 and BBMB 504; and BBMB 506 and BBMB 507; or BBMB 405 or BBMB 505 and or GDCB 511

Analysis of the biochemical processes involved in expression of eucaryotic genes and the regulation thereof, including RNA polymerase, transcriptional regulatory proteins, enhancers and silencers, chromosome structure, termination, RNA processing, RNA transport, RNA turnover, small RNAs, translational regulation, protein turnover.

BBMB 681: Advanced Seminar

Cr. 1. Repeatable. F.S.

Prereq: Permission of instructor

Student presentations.

BBMB 682: Departmental Seminar

Cr. R. F.S.

Prereq: Permission of instructor

Faculty, staff and invited guest research seminar.

BBMB 696: Research Seminar

(Cross-listed with AGRON, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable.

Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

BBMB 698: Seminar in Molecular, Cellular, and Developmental Biology

(Cross-listed with GDCB, MCDB, MICRO, V MPM). (2-0) Cr. 1-2. Repeatable. F.S.

Student and faculty presentations.

BBMB 699: Research

Cr. arr. Repeatable. F.S.

Prereq: Permission of instructor

Bioinformatics and Computational Biology (BCB)

Any experimental courses offered by BCB can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

BCB 444: Bioinformatic Analysis

(Cross-listed with BC BIO, BIOL, COM S, CPR E, GEN). (4-0) Cr. 4. F.

Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).

Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

BCB 490: Independent Study

Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: Permission of instructor

Courses primarily for graduate students, open to qualified undergraduates:

BCB 544: Fundamentals of Bioinformatics

(Cross-listed with COM S, CPR E, GDCB). (4-0) Cr. 4. F.

Prereq: MATH 165 or STAT 401 or equivalent

A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies.

BCB 546: Computational Skills for Biological Data

(Cross-listed with EEOB). Cr. 3. F.

Prereq: Graduate student status or permission of the instructor

Computational skills necessary for biologists working with big data sets. UNIX commands, scripting in R and Python, version control using Git and GitHub, and use of high performance computing clusters. Combination of lectures and computational exercises.

BCB 567: Bioinformatics Algorithms

(Cross-listed with COM S, CPR E). (3-0) Cr. 3.

Prereq: COM S 228; COM S 330; credit or enrollment in BIOL 315, STAT 430

Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

BCB 568: Statistical Bioinformatics

(Cross-listed with COM S, GDCB, STAT). (3-0) Cr. 3. S.

Prereq: BCB 567 or (BIOL 315 and one of STAT 430 or STAT 483 or STAT 583), credit or enrollment in GEN 409

Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models.

BCB 569: Structural Bioinformatics

(Cross-listed with BBMB, COM S, CPR E, GDCB). (3-0) Cr. 3. F.

Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution.

BCB 570: Systems Biology

(Cross-listed with COM S, CPR E, GDCB, STAT). (3-0) Cr. 3. S.

Prereq: BCB 567 or COM S 311, COM S 228, GEN 409, STAT 430 or STAT 483 or STAT 583

Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput biological data obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, and inference of transcriptional regulatory networks, protein-protein interaction networks, and metabolic networks. Dynamic systems and whole-cell models. Ontology-driven, network based, and probabilistic approaches to information integration.

BCB 585: Fundamentals of Predictive Plant Phenomics

(Cross-listed with GDCB, M E). Cr. 4. F.

Principles of engineering, data analysis, and plant sciences and their interplay applied to predictive plant phenomics. Transport phenomena, sensor design, image analysis, graph models, network data analysis, fundamentals of genomics and phenomics. Multidisciplinary laboratory exercises.

BCB 590: Special Topics

Cr. arr. Repeatable.

Prereq: Permission of instructor

BCB 593: Workshop in Bioinformatics and Computational Biology

(1-0) Cr. 1. Repeatable. F.S.

Current topics in bioinformatics and computational biology research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

BCB 598: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of the program chair

Off-campus work periods for graduate students in the field of bioinformatics and computational biology.

BCB 599: Creative Component

Cr. arr.

Courses for graduate students:**BCB 660: Selected Topics in Bioinformatics and Computational Biology**

(3-0) Cr. 1-4. Repeatable, maximum of 4 times. F.S.SS.

Prereq: Permission of Instructor

Topics of interest in the major research areas of computational molecular biology, including genomics, structural genomics, functional genomics, and computational systems biology.

BCB 690: Student Seminar in Bioinformatics and Computational Biology

Cr. 1. Repeatable. S.

Student research presentations.

BCB 691: Faculty Seminar in Bioinformatics and Computational Biology

(1-0) Cr. 1. Repeatable.

Faculty research series.

BCB 697: Graduate Research Rotation

Cr. arr. Repeatable. F.S.SS.

Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major.

BCB 699: Research

Cr. arr. Repeatable.

Bioinformatics and Computational Biology (BCBIO)

Any experimental courses offered by BCBIO can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

BCBIO 110: BCBIO Orientation

(1-0) Cr. 0.5. F.

First 8 weeks. Orientation to the area of bioinformatics and computational biology. For students considering a major in BCBIO. Specializations and career opportunities. Offered on a satisfactory-fail basis only.

BCBIO 322: Introduction to Bioinformatics and Computational Biology

(Cross-listed with BIOL, GEN). (3-0) Cr. 3. F.

Prereq: BIOL 212

Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

BCBIO 401: Fundamentals of Bioinformatics and Computational Biology

(3-0) Cr. 3. F.

Prereq: BCBIO 322 and basic programming experience (e.g. COM S 207, COM S 227 or permission of instructor)

Application of computer science and engineering to molecular biology. String algorithms, sequence alignments, data structures, homology search methods, pattern recognition, fragment assembly, genome annotation, construction of bioinformatics databases, and gathering and distribution of biological information with the Internet.

BCBIO 402: Fundamentals of Systems Biology and Network Science

(3-0) Cr. 3. S.

Prereq: BIOL 212

Technologies: transcriptome, proteome, metabolome; Networks: Gene regulatory network, Protein-protein interaction network, Literature network; Theories: Graph theory, random network, scale-free network, evolving network, network robustness; Tools: Jmol, MeV, Cytoscape, Citespace.

BCBIO 442: Bioinformatics and Computational Biology Techniques

(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.

Prereq: BIOL 314 recommended

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442A: Bioinformatics and Computational Biology Techniques: Sequence Database Searching

(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.

Prereq: BIOL 314 recommended

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442B: Bioinformatics and Computational Biology: Protein Structure Databases, Visualization, and Prediction

(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.

Prereq: BIOL 314 recommended

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442C: Bioinformatics and Computational Biology Techniques: Phylogenetic Analysis

(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.

Prereq: BIOL 314 recommended

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 442D: Bioinformatics and Computational Biology Techniques: Microarray Analysis

(0.2-0.5) Cr. 0.5. Repeatable, maximum of 2 credits. S.SS.

Prereq: BIOL 314 recommended

Modular minicourses consisting of guided tutorials and hands-on computer software exercises focused on fundamental problems, approaches, and software applications in bioinformatics and computational biology. Offered on a satisfactory-fail basis only.

BCBIO 444: Bioinformatic Analysis

(Cross-listed with BCB, BIOL, COM S, CPR E, GEN). (4-0) Cr. 4. F.

Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).

Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

BCBIO 490: Independent Study

Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: BCBIO 322, junior or senior classification, permission of instructor

Independent research projects for undergraduate students in bioinformatics and computational biology. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 490 and 491 toward graduation.

BCBIO 491: Team Research Projects.

Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: BCBIO 322, junior or senior classification, permission of instructor

Research projects in bioinformatics and computational biology done by teams of students. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBIO 490 and 491 toward graduation.

Biological/Pre-Medical Illustration (BPM I)

Any experimental courses offered by BPM I can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**BPM I 323: Scientific Illustration Principles and Techniques**

(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.

Prereq: DSN S 131, ARTIS 230, or equivalent, and 3 credits in biological sciences; or permission of the instructor

Studio basics and professional techniques in black & white, continuous tone, and color. Introduction to professional practice and principles of communicating science through art. Emphasis on tools, materials, and rendering.

BPM I 326: Illustration and Illustration Software

(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable.

Prereq: ARTIS 323/BPM I 323, or permission of the instructor

An introduction to digital illustration software. Application of painting, drawing and image making techniques using vector and raster based programs.

BPM I 327: Illustration as Communication

(Cross-listed with ARTIS). (0-6) Cr. 3.

Prereq: ARTIS 326/BPM I 326, or permission of the instructor

Investigation of illustration as a form of communication. Emphasis on problem solving, effective composition, and advancement of rendering skills.

BPM I 337: Application of Scientific Illustration Techniques

(Cross-listed with ARTIS). (0-6) Cr. 3. Repeatable, maximum of 6 credits. S.

Prereq: ARTIS 327

Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

BPM I 395: Field Illustration

Cr. 1-3. Repeatable, maximum of 6 credits. S.SS.

Prereq: Permission of instructor

A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BPM I 398: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of the program cooperative education coordinator, junior classification

Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BPM I 435I: Illustrating Nature I Sketching

(Cross-listed with IA LL). Cr. 2. SS.

Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

BPM I 436I: Illustrating Nature II Photography

(Cross-listed with IA LL). Cr. 2. SS.

Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

BPM I 490: Independent Study

Cr. 1-3. Repeatable, maximum of 3 credits.

Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment

BPM I 491: Portfolio Design and Professional Development

Cr. 2. S.

Prereq: BPMI 337, junior or senior classification in the BPMI curriculum.

Portfolio and professional preparation including identity package development, writing and speaking. Career-readiness, professional practice, leadership, networking, exploring research subfields within scientific visualization. Creating print and digital visual materials, learning approaches for entering the field, and developing business practice skills. Final portfolio materials presented at the end of the term.

BPM I 494: Special Topics in Illustration

Cr. 1-3. Repeatable.

Intensive exploration of illustration techniques in a studio or field setting.

BPM I 497: Illustration Internship

Cr. 1-6. Repeatable, maximum of 6 credits.

Prereq: Junior or senior classification in BPM I, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment

Offered on a satisfactory-fail basis only.

Biology (BIOL)

Any experimental courses offered by BIOL can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

BIOL 101: Introductory Biology

(3-0) Cr. 3. F.S.SS.

Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

BIOL 110: Introduction to Biology

Cr. 1. F.

Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

BIOL 111: Opportunities in Biology

(1-0) Cr. 0.5. S.

Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Offered on a satisfactory-fail basis only.

BIOL 112: Transfer Student Orientation

Cr. 1. F.S.

Orientation to opportunities in Biology. Review of degree requirements and other information. Intended for students transferring from other academic institutions. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

BIOL 155: Human Biology

(3-0) Cr. 3. F.S.

A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173: Environmental Biology

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 201: Introduction to Environmental Issues

(Cross-listed with ENSCI, ENV S). (2-0) Cr. 2. F.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

BIOL 204: Biodiversity

(Cross-listed with ENV S). (4-0) Cr. 2. S.

Prereq: One course in life sciences

Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course.

BIOL 211: Principles of Biology I

(3-0) Cr. 3. F.S.

Prereq: High school biology

Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L: Principles of Biology Laboratory I

(0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in BIOL 211

Laboratory to accompany 211.

BIOL 212: Principles of Biology II

(3-0) Cr. 3. F.S.

Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177

Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L: Principles of Biology Laboratory II

(0-3) Cr. 1. F.S.

Prereq: credit or enrollment in BIOL 212

Laboratory to accompany 212.

BIOL 251: Biological Processes in the Environment

(Cross-listed with ENSCI). (3-0) Cr. 3. S.

Principles of Biology from the level of macromolecules to the biosphere. Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles.

BIOL 255: Fundamentals of Human Anatomy

(3-0) Cr. 3. F.

Prereq: High School Biology and Chemistry, or BIOL 101

An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 255L: Fundamentals of Human Anatomy Laboratory

(0-3) Cr. 1. F.

Prereq: Credit or enrollment in BIOL 255

Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 256: Fundamentals of Human Physiology

(3-0) Cr. 3. S.

Prereq: High School Biology and Chemistry, or BIOL 101, or BIOL 255 (recommended)

An introduction to human physiology, studying the function of all body systems. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider 335 for their physiology background. Does not satisfy biology major requirements.

BIOL 256L: Fundamentals of Human Physiology Laboratory

(0-3) Cr. 1. S.

Prereq: Credit or enrollment in BIOL 256

Student-conducted experiments investigating concepts of human physiology with computer data acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical students should consider 335 for their anatomy and physiology background. Does not satisfy biology major requirements.

BIOL 307: Women in Science and Engineering

(Cross-listed with WGS). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: 200 level course in science, engineering or women's studies; ENGL 250

The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives. Factors contributing to under-representation; feminist critiques of science; examination of successful strategies. Does not satisfy biology major advanced credit requirements.

Meets U.S. Diversity Requirement

BIOL 312: Ecology

(Cross-listed with A ECL, ENSCI). (3-3) Cr. 4. F.SS.

Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

BIOL 313: Principles of Genetics

(Cross-listed with GEN). (3-0) Cr. 3. F.S.SS.

Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L

Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

BIOL 313L: Genetics Laboratory

(Cross-listed with GEN). (0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in BIOL 313

Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

BIOL 314: Principles of Molecular Cell Biology

(3-0) Cr. 3. F.S.

Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L

Integration of elementary principles of metabolism, bioenergetics, cell structure, and cell function to develop a molecular view of how the cell works.

BIOL 315: Biological Evolution

(3-0) Cr. 3. F.S.

Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L.

The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation. Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns.

BIOL 322: Introduction to Bioinformatics and Computational Biology

(Cross-listed with BCBIO, GEN). (3-0) Cr. 3. F.

Prereq: BIOL 212

Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

BIOL 328: Molecular and Cellular Biology of Human Diseases

Cr. 3. F.

Prereq: BIOL 212

Survey of molecular, genetic, and cellular aspects of human diseases. Fundamental concepts of cell biology and how they are linked to the pathologies of different classes of human diseases. Recent scientific advances with an emphasis on new methods of diagnosis and treatment.

BIOL 335: Principles of Human and Other Animal Physiology

(3-0) Cr. 3. S.

Prereq: BIOL 211, BIOL 212

Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached from an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of organismal physiology, energy and water balances, physiology of rest exercise, and environmental stress.

BIOL 335L: Principles of Human and Other Animal Physiology Laboratory

(0-3) Cr. 1. S.

Optional laboratory to accompany Biology 335. Student-conducted experiments investigating concepts of physiology.

BIOL 336: Ecological and Evolutionary Animal Physiology

Cr. 3.

Prereq: BIOL 211, BIOL 212

Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.

BIOL 344: Human Reproduction

(Cross-listed with WGS). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: BIOL 212

Biology of human reproduction, including reproductive systems, hormones, and endocrinology of pregnancy, presented from a clinically-oriented perspective. Reviews health-related conditions such as infertility, sexually-transmitted diseases, and complicated pregnancy.

BIOL 349: The Genome Perspective in Biology

(Cross-listed with GEN). (2-2) Cr. 3. S.

Prereq: GEN 313 or GEN 320

Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems.

BIOL 350: Comprehensive Human Anatomy

(3-3) Cr. 4. F.

Prereq: Credit in BIOL 211 and BIOL 212

Comprehensive survey of human anatomy, emphasizing structural and functional relationships of major organ systems. Compartmental study of normal anatomy; practical clinical application of anatomical regions. Laboratory using 3-dimensional software to study anatomy in augmented reality. Recommended for pre-medical and pre-health professional students.

BIOL 351: Comparative Chordate Anatomy

(3-4) Cr. 5. S.

Prereq: BIOL 212, junior classification

The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates, comparisons of anatomic structures among major groups, and the adaptive significance of anatomic structures. Laboratory involves dissection of representative species.

BIOL 352: Vertebrate Histology

(3-3) Cr. 4. Alt. S., offered odd-numbered years.

Prereq: BIOL 212

Microanatomy of animal cells, tissues, and organs; histology from a functional perspective; ultra-structure of cells, the four primary tissues, and different anatomical organs, focusing- on function and clinical significance.

BIOL 353: Introductory Parasitology

(Cross-listed with MICRO, V PTH). (3-0) Cr. 3. S.

Prereq: BIOL 212

Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

BIOL 354: Animal Behavior

(3-0) Cr. 3. F.

Prereq: BIOL 212

Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care).

BIOL 354L: Laboratory in Animal Behavior

(0-3) Cr. 1. F.

Prereq: Credit or enrollment in BIOL 354

Laboratory techniques for observation, description and analysis of animal activities; independent projects.

BIOL 355: Plants and People

(3-0) Cr. 3. S.

Prereq: Credit in BIOL 211 and BIOL 211L

Uses of plants and fungi by humans and the importance of plants in the past, present, and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

BIOL 356: Dendrology

(Cross-listed with FOR). (2-2) Cr. 3. F.

Prereq: BIOL 211

Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed.

BIOL 357: Biology of Plants

Cr. 3. F.

Prereq: BIOL 211 and BIOL 212 (BIOL 211L and 212L recommended)

Study of the general biology of plants, including plant cells and functions, basic anatomy of tissues, meristems, and organs; adaptive morphological features. Review of processes of photosynthesis, respiration, basic plant metabolic functions, and plant reproduction. Survey of evolutionary aspects of all major groups of land plants, and relationships of plants to their environment. Intended for Biology and other life science undergraduate majors.

BIOL 364: Invertebrate Biology

Cr. 3-4. F.

Prereq: BIOL 211, 212

Emphasis on diversity, development, physiology, and behavior of invertebrate organisms- the "spineless wonders" of the world. Laboratory involves hands-on study and investigation of living invertebrates.

BIOL 365: Vertebrate Biology

(Cross-listed with A ECL). (3-2) Cr. 4. F.

Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L

Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

BIOL 366: Plant Systematics

(2-4) Cr. 4. S.

Prereq: BIOL 211

Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, and identification and field study of local plants.

BIOL 370: GIS for Ecology and Environmental Science

(Cross-listed with ENSCI). Cr. 1-6. Repeatable. F.S.

Prereq: Six credits in biological and /or physical sciences, and permission of instructor.

Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only.

BIOL 371: Ecological Methods

(Cross-listed with A ECL). (2-3) Cr. 3. F.

Prereq: A ECL 312; STAT 101 or STAT 104

Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

BIOL 381: Environmental Systems I: Introduction to Environmental Systems

(Dual-listed with EEOB 581). (Cross-listed with ENSCI, ENV S). Cr. 3-4. F.

Prereq: 12 credits of natural science including biology and chemistry

Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 382: Environmental Systems II: Analysis of Environmental Systems

(Dual-listed with EEOB 582). (Cross-listed with ENSCI). (2-2) Cr. 3. S.

Prereq: ENSCI 381

Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 393: North American Field Trips in Biology

Cr. 1-4. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application

Extended field trips, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.

BIOL 393A: North American Field Trips in Biology: Pre-trip Seminar

(1-0) Cr. 1. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application

Discussion of relevant biological and cultural topics during semester preceding extended field trips to North American locations of interest to biologists.

BIOL 393B: North American Field Trips in Biology: North American Field trip

Cr. 1-3. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application

Extended field trip under supervision of faculty member, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Report required.

BIOL 394: International Field Trips in Biology

Cr. 1-4. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application

Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.

Meets International Perspectives Requirement.

BIOL 394A: International Field Trips in Biology: Pre-trip Seminar

(1-0) Cr. 1. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application

Discussion of relevant biological and cultural topics during semester preceding extended field trip to international locations of interest to biologists.

Meets International Perspectives Requirement.

BIOL 394B: International Field Trips in Biology: Field Trip to International Location

Cr. 1-3. Repeatable.

Prereq: Two courses in the biological sciences and by approval of application

Extended field trips, under supervision of faculty member, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.

Meets International Perspectives Requirement.

BIOL 402: Introduction to Pathology

(Cross-listed with V PTH). (3-0) Cr. 3. F.

Prereq: BIOL 211 and BIOL 212 with labs

Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury.

BIOL 414: Life History and Reproductive Strategies

(Dual-listed with EEOB 514). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: BIOL 315 or equivalent recommended.

Evolution of ecological adaptations at the individual, population, and species level. Emphasis is on evolutionary mechanisms and adaptive strategies related to life histories and reproduction; age and size at maturity; lifespan and senescence; offspring size/number trade-offs; sex and mating systems; sex determination and sex ratios.

BIOL 423: Developmental Biology

(3-0) Cr. 3. S.

Prereq: BIOL 313

Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

BIOL 423L: Developmental Biology Laboratory

(0-3) Cr. 1. Repeatable, maximum of 4 times. S.

Prereq: Credit or enrollment in BIOL 423 or permission of the instructor.

Experiments and explorations illustrating fundamental principles of multicellular development.

BIOL 428: Cell Biology

(3-0) Cr. 3. S.

Prereq: BIOL 314

Cell structure and function in health and disease. Emphasis on cellular dynamics, transport, organelle biogenesis and signaling, and how defects in these processes disrupt cell function.

BIOL 430: Principles of Plant Physiology

(3-0) Cr. 3. S.

Prereq: BIOL 212; CHEM 231 or CHEM 332

An overview of classical and current concepts, principles, and approaches regarding the basic mechanisms of plant function underlying growth, development, and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism, and photosynthesis.

BIOL 434: Endocrinology

(Dual-listed with EEOB 534). (3-0) Cr. 3. S.

Prereq: BIOL 211, BIOL 212

Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones.

BIOL 436: Neurobiology

(3-0) Cr. 3. F.

Prereq: BIOL 212

Basic principles of brain function and development. Signaling of nerve cells, synaptic transmission, structure/function of ion channels and receptors, memory and synaptic plasticity, movement and central control, sensation and sensory processing, construction of neural circuits, early brain development, complex brain functions in health and disease.

BIOL 444: Bioinformatic Analysis

(Cross-listed with BCB, BC BIO, COM S, CPR E, GEN). (4-0) Cr. 4. F.

Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).

Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

BIOL 451: Plant Evolution and Phylogeny

(Dual-listed with EEOB 551). (3-3) Cr. 4. F.

Prereq: BIOL 315 or equivalent.

Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies.

BIOL 454: Plant Anatomy

(3-3) Cr. 4. F.

Prereq: BIOL 212L; BIOL 366 recommended

Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds.

BIOL 455: Bryophyte and Lichen Biodiversity

(Dual-listed with EEOB 555). (2-3) Cr. 3. S.

Prereq: BIOL 211, BIOL 211L

Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning.

BIOL 456: Principles of Mycology

(Cross-listed with MICRO). (2-3) Cr. 3. F.

Prereq: 10 credits in biological sciences

Morphology, diversity and ecology of fungi; their relation to agriculture and industry and human health.

BIOL 457: Herpetology

(Cross-listed with A ECL). (2-0) Cr. 2. F.

Prereq: BIOL 351 or BIOL 365

Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 457L: Herpetology Laboratory

(Cross-listed with A ECL). (0-3) Cr. 1. F.

Prereq: BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457

Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 458: Ornithology

(Cross-listed with A ECL). (2-0) Cr. 2. S.

Prereq: A ECL 365 or BIOL 351

Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

BIOL 458L: Ornithology Laboratory

(Cross-listed with A ECL). (0-3) Cr. 1. S.

Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/BIOL 458 is required.

Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

BIOL 459: Mammalogy

(Dual-listed with EEOB 559). (Cross-listed with A ECL). (2-0) Cr. 2. S.

Prereq: BIOL 351 or A ECL 365

Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

BIOL 459L: Mammalogy Laboratory

(Cross-listed with A ECL). (0-3) Cr. 1. S.

Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.

Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

BIOL 462: Evolutionary Genetics

(Cross-listed with GEN). (3-0) Cr. 3. F.

Prereq: BIOL 315

The genetic basis of evolutionary processes in eukaryotic organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

BIOL 464: Wetland Ecology

(Dual-listed with EEOB 564). (Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: 15 credits in biological sciences.

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands.

BIOL 465: Macroevolution

(Dual-listed with EEOB 565). Cr. 3. Alt. S., offered even-numbered years.

Prereq: BIOL 315

The history and diversity of life on earth; evolutionary patterns and processes above the species level. Diversity from a phylogenetic perspective. Empirical exercises include: phylogeny estimation, ancestral states, estimating diversification rates, evaluating the tempo and mode of evolution, biogeographic patterns, and trait associations across the tree of life.

BIOL 471: Introductory Conservation Biology

(Cross-listed with A ECL). Cr. 3. S.

Prereq: BIOL 312

Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

BIOL 472: Community Ecology

(3-0) Cr. 3. S.

Prereq: BIOL 312

The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates.

BIOL 474: Plant Ecology

(3-0) Cr. 3. S.

Prereq: BIOL 312

Principles of plant population and community ecology.

BIOL 476: Functional Ecology

(Dual-listed with EEOB 576). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: BIOL 312

The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

BIOL 480: Studies in Marine Biology

Cr. 1-8. Repeatable.

Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

BIOL 481: Summer Field Studies

Cr. 1-8. Repeatable.

Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

BIOL 482: Tropical Biology

Cr. 1-4. Repeatable, maximum of 8 credits.

Prereq: One year of college biology; knowledge of Spanish desirable but not required

Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

BIOL 483: Environmental Biogeochemistry

(Cross-listed with ENSCI, GEOL). Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Combined 12 credits in biology, chemistry, and physics.

An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life.

BIOL 484: Ecosystem Ecology

(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Combined 12 credits in biology, chemistry, and physics.

Introduction of the study of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

BIOL 486: Aquatic Ecology

(Dual-listed with EEOB 586). (Cross-listed with A ECL, ENSCI). (3-0) Cr. 3. F.

Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

BIOL 486L: Aquatic Ecology Laboratory

(Dual-listed with EEOB 586L). (Cross-listed with A ECL, ENSCI). (0-3) Cr. 1. F.

Prereq: Concurrent enrollment in BIOL 486

Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

BIOL 487: Microbial Ecology

(Dual-listed with EEOB 587). (Cross-listed with ENSCI, GEOL, MICRO). (3-0) Cr. 3. F.

Prereq: Six credits in biology and 6 credits in chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

BIOL 488: Identification of Aquatic Organisms

(0-3) Cr. 1. F.S.

On-line taxonomic and identification exercises to accompany 486. Instruction and practice in the identification of algae, aquatic macrophytes, zooplankton, and benthos.

BIOL 489: Population Ecology

(Dual-listed with EEOB 589). (Cross-listed with A ECL). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

BIOL 490: Independent Study

Cr. 1. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: Permission of instructor.

Independent study opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and, of those, only 2 credits may be applied toward the Biology advanced course requirement.

BIOL 491: Undergraduate Teaching Experience

Cr. 1-2. Repeatable.

Prereq: Permission of supervising staff

For students registering to be undergraduate teaching assistants. Offered on a satisfactory-fail basis only. A maximum of 2 credits of BIOL 491 may be applied toward the Biology advanced course requirement.

BIOL 492: Preparing for Graduate School in the Biological Sciences

(1-0) Cr. 1. F.

Prereq: For life science majors; Minimum requirement: sophomore standing.

For students considering pursuing a graduate degree in the biological sciences. Professional development topics including the defining of academic and career areas of interest, finding and evaluating appropriate programs of graduate study, the graduate school application process, and developing a curriculum vita. Exploration of learning opportunities at field stations, research internships, and independent research activities.

BIOL 494: Biology Internship

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 8 credits in biology and permission of instructor

Professional experiences in biological sciences. Intended for Biology majors. No more than 9 credits in BIOL 494 may be counted toward graduation and, of those, only 6 credits may be applied toward the Biology advanced course requirement.

BIOL 495: Undergraduate Seminar

Cr. 1-3. Repeatable. F.S.

Prereq: Permission of instructor

Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

BIOL 498: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of the Biology Program cooperative education coordinator

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

BIOL 499: Undergraduate Research Experience

Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: Permission of instructor.

Research opportunities for undergraduate students in the biological sciences. Intended for Biology majors. No more than 9 credits in Biol 499 may be counted toward graduation and, of those, only 6 credits may be applied toward the Biology advanced course requirement.

Biomedical Engineering (B M E)

Any experimental courses offered by B M E can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

B M E 220: Introduction to Biomedical Engineering

(Cross-listed with CH E). (3-0) Cr. 3. S.

Prereq: BIOL 212, ENGR 160 or equiv, MATH 166, CHEM 167 or CHEM 178, PHYS 222

Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics.

B M E 341: BioMEMs and Nanotechnology

(Cross-listed with E E). (3-0) Cr. 3.

Prereq: B M E 220

Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nano-wires, and stimuli-responsive biomaterials.

B M E 352: Molecular, Cellular and Tissue Biomechanics

(3-0) Cr. 3.

Prereq: B M E 220, E M 324, MAT E 273

Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and non-living systems. Laws of motion, free-body diagrams and simple force analysis of musculoskeletal system. Biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

B M E 440: Biomedical Applications of Chemical Engineering

(Cross-listed with CH E). (3-0) Cr. 3.

Prereq: CH E 210, MATH 266 or MATH 267, PHYS 222

Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

B M E 450: Biosensors

(Cross-listed with E E). (3-0) Cr. 3.

Prereq: B M E 220

Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

B M E 450L: Biosensors Laboratory

(Cross-listed with E E). (0-3) Cr. 1.

Prereq: B M E 220, concurrent enrollment in B M E 450

Laboratory course accompanying B M E 450. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors.

B M E 456: Biomaterials

(Cross-listed with MAT E). (3-0) Cr. 3. F.

Prereq: CHEM 178 and MAT E 216 or MAT E 273 or MAT E 392

Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

B M E 466: Multidisciplinary Engineering Design

(Cross-listed with A B E, AER E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.

Prereq: Student must be within two semesters of graduation; permission of instructor.

Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

B M E 490: Independent Study

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: permission of chair for the bioengineering minor

Investigation of biomedical engineering topics of special interest to student and supervising faculty member with a final written report.

Biomedical Sciences (B M S)

Any experimental courses offered by B M S can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for professional curriculum students:

B M S 329: Anatomy and Physiology of Domestic Animals

(3-0) Cr. 3. S.

Prereq: BIOL 212, BIOL 212L

Survey of body systems of domestic animals. Provides a medical science orientation particularly useful to students in a preveterinary medicine curriculum.

B M S 330: Principles of Morphology I

(Dual-listed with B M S 530). (4-6) Cr. 6. F.

Prereq: 10 credits in biological science and permission of the instructor

Anatomy of the dog and cat: from basics to clinical application.

B M S 331: Principles of Morphology II

(Dual-listed with B M S 531). (2-6) Cr. 4. S.

Prereq: First-year classification in veterinary medicine. B M S 330

Comparative and topographic anatomy of horse, ruminants, pig, and chicken.

B M S 333: Biomedical Sciences I

(Dual-listed with B M S 533). (5-3) Cr. 6. F.

Prereq: First-year classification in veterinary medicine

Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system.

B M S 334: Biomedical Sciences II

(Dual-listed with B M S 534). (5-3) Cr. 6. S.

Prereq: First-year classification in veterinary medicine

Microscopic anatomy of the immune system and integument.

Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system.

B M S 335: Molecular and Cellular Basis of Disease

(1-0) Cr. 1. F.

Descriptions of molecular and cellular biology especially as it pertains to veterinary medicine. Discussions of cellular components, cellular functions and anomalies thereof. Emphasis placed on divergences relevant to companion animals and livestock.

B M S 336: Veterinary Nutrition

(2-0) Cr. 2. F.

Introduce basic biochemical aspects of metabolism and function of energy, protein, fat, minerals and vitamins in the diet. Determine nutrient requirements of food animals, pets, and horses under various physiological states. Understand fate of various nutrients in simple stomached animals, ruminants, and cecal fermenters. Discuss clinical nutrition problems specific to each species.

B M S 337: Neuroanatomy

(Dual-listed with B M S 537). (2-2) Cr. 3. S.

Prereq: First-year classification in veterinary medicine

Neuroanatomy of domestic animals.

B M S 339: Clinical Foundations I

(Cross-listed with V C S). (0-2) Cr. 1. F.

Prereq: First-year classification in veterinary medicine

Canine physical examination; basic behavior, animal handling and restraint; medical record keeping.

B M S 345: Case Study I

(0-2) Cr. 1. F.

Prereq: First-year classification in veterinary medicine

Clinical applications of basic sciences taught concurrently in the fall semester of the first year curriculum in veterinary medicine.

B M S 346: Case Study II

(0-1) Cr. 1. S.

Prereq: First-year classification in veterinary medicine

Clinical applications of basic sciences taught concurrently in the spring semester of the first year curriculum in veterinary medicine.

B M S 354: General Pharmacology

(Dual-listed with B M S 554). (Cross-listed with TOX). (3-0) Cr. 3. S.

Prereq: B M S 549 and B M S 552; BBMB 404, BBMB 405

General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

B M S 401: Intro to Aquatic Animal Medicine

(Cross-listed with A ECL). (1-2) Cr. 1. S.

8-week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on water-evaluation, anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, biosecurity and current research. Field trip to aquaculture facility.

B M S 403: Behavior of Domestic Animals

(1-0) Cr. 1. Alt. F., offered even-numbered years.

Prereq: Classification in veterinary medicine

Normal and abnormal behavior of domestic animals.

B M S 439: Principles of Pharmacology

(Dual-listed with B M S 539). (4-0) Cr. 4. S.

Prereq: A physiology course: B M S 329, BIOL 335 or equivalent; All non-graduate students must seek permission of the instructor in charge to register for B M S 539.

General principles of drug actions; drug disposition; drug acting on, cardiovascular, respiratory, renal, gastrointestinal, and endocrine systems; anti-inflammatory and antibiotic drug; anti-cancer drugs; anesthetics CNS stimulants; lifestyle drugs; drug addiction, abuse and dependence; drugs in sport; drugs for obesity; biopharmaceuticals and gene therapy; drug development.

B M S 443: Pharmacology and Therapeutics

(Dual-listed with B M S 543). (3-0) Cr. 3. F.

Prereq: B M S 354

Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 447: Introduction to Human Gross Anatomy

(Dual-listed with B M S 547). (2.5-6) Cr. 4. F.

Prereq: Graduate standing and previous biology coursework or instructor permission.

Examination of gross anatomy and neuroanatomy of the human. Laboratories will center on regional anatomy study through human cadaver dissection in addition to models, virtual learning solutions, radiologic imaging and case studies.

B M S 448: Principles of Human Gross Anatomy

Cr. 4. Repeatable, maximum of 2 times. S.SS.

Prereq: BIOL 255 or equivalent AND an introductory biology course.

BMS 448 will be a laboratory-centered course that focuses on prosected human cadavers to develop an in-depth understanding of human anatomical function. The course will follow a regional approach and stress relationships between neighboring anatomical structures. During laboratory sessions, students teams will study anatomy from multiple individuals to gain an appreciation for anatomical variation and effects on the body from aging, disease, etc. Additional laboratory activities include study in osteology, radiograph interpretation and case studies. Only one offering of BMS 448 may count towards graduation.

B M S 490: Independent Study

Cr. 1-5. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 490H: Independent Study, Honors

Cr. 1-5. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 496: International Preceptorship

Cr. 1-12. Repeatable. S.

Prereq: Classification in veterinary medicine or permission of the instructor

International Preceptorships and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduates:**B M S 501: Selected Research Methods in Biomedical Sciences**

(0-8) Cr. 3. F.S.SS.

Prereq: Graduate classification, permission of a BMS faculty member

Experience in biomedical techniques in selected BMS laboratories that include but is not limited to cytochemical methods, molecular biological techniques, extracellular and intracellular unit recording, microiontophoresis, microinjection, spectrophoto-fluorometric analysis of chemicals, use of radioisotopes, radioimmunoassay, Ca²⁺ imaging, confocal microscopy, fluorescence microscopy, and immunocytochemistry.

B M S 502: Methods in Biomedical Sciences

(0-6) Cr. 3. S.

Prereq: Graduate Student Status or Permission of the Instructor

Provides laboratory experience in the application of methods in biomedical sciences, including animal physiology and pharmacology laboratory techniques; human physiology recordings and urinalysis; pharmacokinetics; basic techniques in analytical laboratory; basic pathology, immunology, bacteriology, and virology laboratory techniques.

B M S 530: Principles of Morphology I

(Dual-listed with B M S 330). (4-6) Cr. 6. F.

Prereq: 10 credits in biological science and permission of the instructor

Anatomy of the dog and cat: from basics to clinical application.

B M S 531: Principles of Morphology II

(Dual-listed with B M S 331). (2-6) Cr. 4. S.

Prereq: First-year classification in veterinary medicine. B M S 330

Comparative and topographic anatomy of horse, ruminants, pig, and chicken.

B M S 533: Biomedical Sciences I

(Dual-listed with B M S 333). (5-3) Cr. 6. F.

Prereq: First-year classification in veterinary medicine or graduate student status

Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system.

B M S 534: Biomedical Sciences II

(Dual-listed with B M S 334). (5-3) Cr. 6. S.

Prereq: First-year classification in veterinary medicine or graduate student status

Microscopic anatomy of the immune system and integument.
Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system.

B M S 537: Neuroanatomy

(Dual-listed with B M S 337). (2-2) Cr. 3. S.

Prereq: 10 credits in biological science and permission of the instructor

Neuroanatomy of domestic animals.

B M S 538: Principles of Physiology

(4-0) Cr. 4. F.

Prereq: Graduate Student Standing or Permission of Instructor

Principles of neurophysiology, endocrine and reproductive physiology, muscle physiology, cardiovascular, respiratory, renal, and digestive physiology, and regulation of body fluid.

B M S 539: Principles of Pharmacology

(Dual-listed with B M S 439). (4-0) Cr. 4. S.

Prereq: A physiology course: B M S 329, BIOL 335 or equivalent; All non-graduate students must seek permission of the instructor in charge to register for B M S 539.

General principles of drug actions; drug disposition; drug acting on, cardiovascular, respiratory, renal, gastrointestinal, and endocrine systems; anti-inflammatory and antibiotic drug; anti-cancer drugs; anesthetics CNS stimulants; lifestyle drugs; drug addiction, abuse and dependence; drugs in sport; drugs for obesity; biopharmaceuticals and gene therapy; drug development.

B M S 542: Introduction to Molecular Biology Techniques

(Cross-listed with EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

B M S 542A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

B M S 542B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.

Prereq: Graduate classification

Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

B M S 542C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

B M S 542D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

B M S 542E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

B M S 542F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

B M S 542G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with BBMB, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Offered on a satisfactory-fail basis only.

B M S 543: Pharmacology and Therapeutics

(Dual-listed with B M S 443). (3-0) Cr. 3. F.

Prereq: B M S 354

Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 547: Introduction to Human Gross Anatomy

(Dual-listed with B M S 447). (2.5-6) Cr. 4. F.

Prereq: Graduate standing and previous biology coursework or instructor permission.

Examination of gross anatomy and neuroanatomy of the human. Laboratories will center on regional anatomy study through human cadaver dissection in addition to models, virtual learning solutions, radiologic imaging and case studies.

B M S 554: General Pharmacology

(Dual-listed with B M S 354). (Cross-listed with TOX). (3-0) Cr. 3. S.

Prereq: B M S 549 and B M S 552; BBMB 404, BBMB 405

General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

B M S 556: Cellular, Molecular and Developmental Neuroscience

(Cross-listed with GDCB, NEURO). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: BIOL 335 or BIOL 436; physics recommended

Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

B M S 575: Cell Biology

(Cross-listed with TOX). (3-0) Cr. 3. F.

Prereq: 10 credits in biological sciences and graduate student standing or permission of instructor

A multi-instructor course covering major topics in cell structure and function, including: universal features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper.

B M S 590: Special Topics

Cr. 1-7. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 590A: Anatomy

Cr. 1-7. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 590B: Physiology

Cr. 1-7. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 590C: Pharmacology

Cr. 1-7. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 590D: Cell biology

Cr. 1-7. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 599: Creative Component

Cr. 1-3. F.S.SS.

Prereq: Enrollment in BMS graduate program, and permission of instructor.

Creative component for non-thesis Master of Science degree.

Courses for graduate students:**B M S 688: Research Review**

Cr. 1. Repeatable. F.S.

Prereq: Enrollment in BMS graduate program.

A forum for B M S students to gain experience in the critical exchange of ideas through oral presentation and discussion of scientific information.

B M S 690: Advanced Topics

Cr. 1-5. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 690A: Anatomy

Cr. 1-5. Repeatable. F.S.SS.

Prereq: Permission of instructor

B M S 690B: Physiology

Cr. 1-5. Repeatable. F.S.SS.

*Prereq: Permission of instructor***B M S 690C: Pharmacology**

Cr. 1-5. Repeatable. F.S.SS.

*Prereq: Permission of instructor***B M S 690D: Cell biology**

Cr. 1-5. Repeatable. F.S.SS.

*Prereq: Permission of instructor***B M S 698: Seminar**

Cr. arr. Repeatable. F.S.SS.

*Prereq: Enrollment in BMS graduate program.***B M S 698A: Seminar: Attendance**

Cr. R. Repeatable. F.S.

*Prereq: Enrollment in BMS graduate program.***B M S 698B: Seminar: Attendance and Presentation**

(1-0) Cr. 1. Repeatable. F.S.SS.

Prereq: Enrollment in B M S graduate program.

Attendance and presentation required. Offered on a satisfactory-fail basis only.

B M S 698C: Seminar: Attendance and Report

Cr. 1. Repeatable. F.S.

Prereq: Enrollment in BMS graduate program.

Attendance to all B M S seminars and written reports are required.

B M S 699: Research

Cr. arr. Repeatable. F.S.SS.

*Prereq: Enrollment in BMS graduate program.***B M S 699A: Research: Anatomy**

Cr. arr. Repeatable. F.S.SS.

*Prereq: Enrollment in BMS graduate program.***B M S 699B: Research: Physiology**

Cr. arr. Repeatable. F.S.SS.

*Prereq: Enrollment in BMS graduate program.***B M S 699C: Research: Pharmacology**

Cr. arr. Repeatable. F.S.SS.

*Prereq: Enrollment in BMS graduate program.***B M S 699D: Research: Cell biology**

Cr. arr. Repeatable. F.S.SS.

Prereq: Enrollment in BMS graduate program.

Biorenewable Chemicals (BR C)

Any experimental courses offered by BR C can be found at:registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)**Courses primarily for graduate students, open to qualified undergraduates:****BR C 506: The Evolving Chemical Industry**

(1-0) Cr. 1.

An overview of the chemical industry including structure and its evolution. Discussion of the dynamics of recent introduction of biorenewable chemicals to the chemical industry.

BR C 507: Technology-Led Entrepreneurship in Biorenewables

(Cross-listed with BRT). (1-0) Cr. 1. S.

Prereq: Graduate Standing or Permission of Instructor.

Develop an understanding of the relationship between discovery research entrepreneurship and innovation in biorenewables. Understand critical techno-commercial analyses and intellectual property. Learn critical skills needed to found a company, including how to define key assets, write a business plan, leverage local resources, and secure funding.

BR C 590: Special Topics

(2-0) Cr. 2.

Special topics in biorenewable chemicals.

Courses for graduate students:**BR C 688: Catalysis and Catalytic Processes**

(Cross-listed with CH E). (3-0) Cr. 3.

Prereq: CH E 382

Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

Biorenewable Resources and Technology (BRT)

Any experimental courses offered by BRT can be found at:registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)**Courses primarily for graduate students, open to qualified undergraduates:**

BRT 501: Fundamentals of Biorenewable Resources

(3-0) Cr. 3. S.

Prereq: Previous coursework in introductory physics and chemistry is recommended.

Introduction to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Survey of biorenewable resource base and properties; description of biofuels and biobased products; production of biorenewable resources; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; technoeconomic analysis of production and processing; and biofuels policy.

BRT 506C: Biobased Products Seminar: Research Presentations

(1-0) Cr. 1. F.S.

Research presentations throughout the semester as part of the course seminar series and during the course. Research Poster Symposium at the end of the semester. Typically taken in the last semester(s) when completing degree program. Offered on a satisfactory-fail basis only.

BRT 507: Technology-Led Entrepreneurship in Biorenewables

(Cross-listed with BR C). (1-0) Cr. 1. S.

Prereq: Graduate Standing or Permission of Instructor.

Develop an understanding of the relationship between discovery research entrepreneurship and innovation in biorenewables. Understand critical techno-commercial analyses and intellectual property. Learn critical skills needed to found a company, including how to define key assets, write a business plan, leverage local resources, and secure funding.

BRT 511: Bioprocessing and Bioproducts

(3-0) Cr. 3. F.

Prereq: A E 216 or equivalent, MATH 160 or MATH 165, one of CHEM 167 or higher, BIOL 173 or BIOL 211 or higher or BRT 501, senior or graduate classification

Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis. Term paper for graduate level only.

BRT 513: Biorenewables Supply Chain Management

(Cross-listed with SCM). Cr. 3. Repeatable, maximum of 1 times. S.

Prereq: Graduate Standing or Qualified Undergraduate with Instructor Permission

Evaluation of supply chain logistics related to the field of biorenewables. Unique challenges associated with the biorenewables supply chain are emphasized and examined: cost analysis, market demand & prices, life cycle analysis, environmental impacts, as well as the technological, social, and political factors related to society.

BRT 515: Biorenewables Law and Policy

(Cross-listed with POL S). (3-0) Cr. 3. F.

Evaluation of the biorenewables field as it relates to the areas of law and policy. Primary emphasis on the following topics: concerns that motivated the development and expansion of the biorenewables field, a history of the interactions between biorenewable pathways. U.S. law and policy and controversies that have arisen from these interactions and their effects.

BRT 516: International Biorenewables Law & Policy

(Cross-listed with POL S). (3-0) Cr. 3. S.

Evaluation of the international biorenewables field as it relates to the areas of law and policy. Primary emphasis on the following topics: concerns that motivated the development and expansion of the field by adopting countries, a history of the interactions between biorenewable pathways. Law and policy in adopting countries and international controversies that have arisen from these interactions and their effects.

BRT 535: Thermochemical Processing of Biomass

(Cross-listed with M E). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: Undergraduate course work in thermodynamics and transport phenomena

Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels.

BRT 590: Special Topics

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Investigation/study of an approved barrier area(s) topic on an individual basis. Course content and requirements designed and developed in consultation with the student's major professor/instructor to determine barrier areas covered, but in all cases a formal report should be written.

BRT 592L: Biorenewable Resources Laboratory

(0-3) Cr. 1. F.S.SS.

Prereq: Graduate student status. Undergraduates with instructor approval

An introduction to hands-on experimental laboratory techniques including laboratory safety, calibration, proper usage of chemistry apparatus, chemicals, analytical equipment, and fundamental techniques to ensure successful research.

Courses for graduate students:

BRT 611: Advanced Food Processing

(Cross-listed with FS HN). (3-0) Cr. 3. F.

Prereq: FS HN 311, or FS HN 471/472 or equivalent, or FS HN 511.

Recent advances in the science and technology of food processing and preservation; examples include both thermal and non-thermal processes, including cold plasma, nanotechnology, and extrusion. Advances in extraction and separation technologies, by-product utilization, and sustainability in food processing industry will also be discussed. Students to research on select topics and present.

BRT 699: Research

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of student's major professor

Business Administration (BUSAD)

Any experimental courses offered by BUSAD can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

BUSAD 102: Business Learning Team Orientation

(1-0) Cr. 1. F.S.

A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Only one of BusAd 102 or BusAd 103 may be counted towards graduation.

BUSAD 103: Orientation

(1-0) Cr. 1. F.S.

A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Only one of BUSAD 102 or BUSAD 103 may be counted toward graduation.

BUSAD 203: Business Careers and Employment Preparation

(1-0) Cr. 1.

Prereq: BUSAD 102 or 103

Explore careers in business and issues relevant to career readiness and professional development. Identifying individual and team strengths, values, developing and implementing a professional job search, resume and professional correspondence, interviewing, evaluating offers, business etiquette, networking and transitioning from student to employee.

BUSAD 250: Introduction to Business

(3-0) Cr. 3.

Prereq: COM S 113

Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

BUSAD 292: Entrepreneurship & Innovation Learning Community (EILC) Seminar

(1-0) Cr. 1.

Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

BUSAD 391: Professional Experiential Learning

Cr. 1. Repeatable, maximum of 6 credits.

Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience.

Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391A: Professional Experiential Learning: Domestic Internship

Cr. 1. Repeatable, maximum of 6 credits.

Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience

Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391B: Professional Experiential Learning: International Internship

Cr. 1. Repeatable, maximum of 6 credits.

Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience

Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391C: Professional Experiential Learning: Domestic Travel and Study

Cr. 1. Repeatable, maximum of 6 credits.

Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience

Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391D: Professional Experiential Learning: International Travel and Study

Cr. 1. Repeatable, maximum of 6 credits.

Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience

Supervised travel and study in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 391E: Professional Experiential Learning: Other Experiential Learning Experience

Cr. 1. Repeatable, maximum of 6 credits.

Prereq: 12 credits from College of Business; written approval of Career Services Internship Coordinator on required form prior to the learning experience

Supervised work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 398: Cooperative Education

Cr. R. Repeatable, maximum of 3 times.

Prereq: Permission of department

Required of all cooperative education students engaged in full-time internship/co-op. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Offered on a satisfactory-fail basis only.

BUSAD 490: Independent Study

Cr. 1-3. Repeatable.

Prereq: Professional program in Business; permission of instructor; for 490H: Admission to the Business Honors Program

BUSAD 490A: Independent Study: International Business

Cr. 1-3. Repeatable.

Prereq: Professional program in Business; permission of instructor

BUSAD 490E: Independent Study: Entrepreneurship

Cr. 1-3. Repeatable.

Prereq: senior classification, permission of instructor

BUSAD 490G: Independent Study: General

Cr. 1-3. Repeatable.

Prereq: Professional program in Business; permission of instructor
Independent Study.

BUSAD 490H: Independent Study: Honors

Cr. 1-3. Repeatable.

Prereq: Admission to the Business Honors Program

Courses primarily for graduate students, open to qualified undergraduates:

BUSAD 501: Strategic Management

(Cross-listed with STB). (2-0) Cr. 2.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

BUSAD 502: Quantitative Business Analysis and Decision Making

(3-0) Cr. 3.

Prereq: Enrollment in MBA program or departmental permission

Introduction to the sources and statistical analysis of data as well as optimization models for use in making business decisions. Data collection, descriptive and inferential statistics including hypothesis testing, analysis of variance, multiple regression, linear programming and simulation.

BUSAD 503: Information Systems

(Cross-listed with STB). (2-0) Cr. 2.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases, reading, and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical and data-driven competitive environment.

BUSAD 504: Marketing and Logistics

(Cross-listed with STB). (3-0) Cr. 3.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BUSAD 507: Organizational Behavior

(Cross-listed with STB). (2-0) Cr. 2.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BUSAD 508: Accounting and Finance

(Cross-listed with STB). (3-0) Cr. 3.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BUSAD 509: International Seed Business Practices, Policies, & Regulation

(Cross-listed with STB). (3-0) Cr. 3.

Prereq: Admission to the Graduate Program in Seed Technology and Business or approval of instructor must be obtained.

Cultural, financial, economic, political, legal/regulatory environments shaping an organization's international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BUSAD 590: Special Topics in Business

(3-0) Cr. 3. Repeatable.

Prereq: Enrollment in MBA program or departmental permission.

A special topics course covering contemporary issues in business. Topics vary by semester.

BUSAD 591: Professional Experiential Learning

Cr. 1-3. Repeatable.

Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience

Academically supervised travel and/or work experiences in a business related discipline.

BUSAD 592: MBA Professional Skills Development

Cr. R.

Prereq: Admission to Full-time MBA Program

Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical for success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Offered on a satisfactory-fail basis only.

BUSAD 594: MBA Professional Skills Development II

Cr. R.

Prereq: BUSAD 592

A second course designed to improve the professional skills of first-year MBA students. Emphasis on building effective communications and networking skills. Students will participate in professional workshops, company visits, executive speaker seminars, service learning projects, business case competitions, and related activities. Offered on a satisfactory-fail basis only.

BUSAD 598: Cooperative Education

Cr. R.

Prereq: Permission of instructor

Professional work experience. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

BUSAD 599: Creative Component

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair

Preparation and writing of creative component.

BUSAD 599A: Creative Component: Accounting

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair

Preparation and writing of creative component.

BUSAD 599C: Creative Component: Finance

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair

Preparation and writing of creative component.

BUSAD 599E: Creative Component: Management

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair

Preparation and writing of creative component.

BUSAD 599F: Creative Component: Marketing

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair

Preparation and writing of creative component.

BUSAD 599I: Creative Component: Agribusiness

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair

Preparation and writing of creative component.

BUSAD 599J: Creative Component: General Business

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair

Preparation and writing of creative component.

BUSAD 599K: Creative Component: Management Information Systems

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

BUSAD 599L: Creative Component: Supply Chain Management

Cr. 3.

Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

Courses for graduate students:**BUSAD 644: Business Research Methods**

(3-0) Cr. 3. F.

Prereq: In PhD program in the College of Business or consent of instructor
A survey of the wide variety of research methods used in business. Methods will be presented and discussed with emphasis on applicability in different research situations.

BUSAD 699: Research

Cr. 3-6. Repeatable. F.S.SS.

Prereq: Graduate classification, permission of major professor
Research.

Chemical Engineering (CH E)

Any experimental courses offered by CH E can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**CH E 104: Chemical Engineering Learning Community**

Cr. R. F.

Prereq: Enrollment in Chemical Engineering Learning Team
(1-0) Curriculum in career planning and academic course support for Freshmen learning team.

CH E 160: Chemical Engineering Problems with Computer Applications Laboratory

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165
Formulation and solution of engineering problems. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to material balances, engineering economics, and design. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. Chemical Engineering examples. Only one of ENGR 160, A B E 160, AER E 160, CH E 160, C E 160, CPR E 160, E E 185, I E 148, M E 160 and S E 185 may count towards graduation.

CH E 202: Chemical Engineering Seminar

(1-0) Cr. 1. F.

Professionalism in the context of the engineering/technical workplace. Introduction to chemical engineering career opportunities. Process and workplace safety. Development and demonstration of key workplace competencies: teamwork, professionalism and ethical responsibility, ability to engage in life-long learning, and knowledge of contemporary issues. Resumes; professional portfolios; preparation for internship experiences. Restricted to CHE majors.

CH E 204: Chemical Engineering Continuing Learning Community

Cr. R.

Prereq: Enrollment in Chemical Engineering Learning Team
Curriculum and career planning, academic course support for learning community.

CH E 205: Chemical Engineering Progress Assessment

Cr. R. F.S.

Prereq: CHEM 178, MATH 166; credit or enrollment in CH E 160
Assessment of proficiency in general chemistry, calculus (including infinite series and applications of derivatives and integrals), and material balances, and an ability to use the principles of science and mathematics to identify, formulate, and solve engineering problems. Offered on a satisfactory-fail basis only.

CH E 210: Material and Energy Balances

(3-0) Cr. 3. F.S.

Prereq: Chem 178, Math 166, CH E 160
Introduction to chemical processes. Physical behavior of gases, liquids, and solids. Application of material and energy balances to chemical engineering equipment and processes.

CH E 220: Introduction to Biomedical Engineering

(Cross-listed with B M E). (3-0) Cr. 3. S.

Prereq: BIOL 212, ENGR 160 or equiv, MATH 166, CHEM 167 or CHEM 178, PHYS 222

Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics.

CH E 310: Computational Methods in Chemical Engineering

(3-0) Cr. 3. F.S.

Prereq: CH E 160, CH E 205, CH E 210, MATH 265
Numerical methods for solving systems of linear and nonlinear equations, ordinary differential equations, numerical differentiation and integration, and nonlinear regression using chemical engineering examples.

CH E 325: Chemical Engineering Laboratory I

(0-4) Cr. 2. F.S.

Prereq: CH E 357, CH E 381; credit or enrollment in ENGL 314 or ENGL 309 or ENGL 312 or JL MC 347

Experiments covering fundamental material and energy balances, momentum and energy transport operations, and thermodynamics. Computer applications.

CH E 356: Transport Phenomena I

(3-0) Cr. 3. F.S.

Prereq: CH E 205, CH E 210, PHYS 221; credit or enrollment in MATH 267

Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling.

CH E 357: Transport Phenomena II

(3-0) Cr. 3. F.S.

Prereq: CH E 356

Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion.

CH E 358: Separations

(3-0) Cr. 3. F.S.

Prereq: CH E 310, CH E 357, CH E 381

Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer.

CH E 381: Chemical Engineering Thermodynamics

(3-0) Cr. 3. F.S.

Prereq: CH E 202, MATH 267, PHYS 222, CHEM 325; credit or enrollment in CH E 310

Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria.

CH E 382: Chemical Reaction Engineering

(3-0) Cr. 3. F.S.

Prereq: CH E 310, CH E 381; credit or enrollment in CH E 357

Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors.

CH E 391: Foreign Study Orientation

(3-0) Cr. 3. S.

Prereq: CH E 357, CH E 381; credit or enrollment in ENGL 314 or ENGL 309 or ENGL 312 or JL MC 347

Offered on a satisfactory-fail basis only. Credit for graduation allowable only upon completion of Ch E 392.

Meets International Perspectives Requirement.

CH E 392: Foreign Study Program

Cr. 4. SS.

Prereq: CH E 358, CH E 382, CH E 391

Study of chemical engineering including laboratories and lectures at collaborating international universities. Comparative study of U.S. and international manufacturing facilities. Expenses required.

Meets International Perspectives Requirement.

CH E 396: Summer Internship

Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services

Professional work period of at least 10 weeks during the summer.

Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

CH E 398: Cooperative Education

Cr. R. Repeatable. F.S.

Prereq: Permission of department and Engineering Career Services

Professional work period. One semester per academic or calendar year.

Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

CH E 406: Environmental Chemodynamics

(Dual-listed with CH E 506). (3-0) Cr. 3.

Prereq: CHE 357, CH E 381

Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment.

CH E 408: Surface and Colloid Chemistry

(Dual-listed with CH E 508). (3-0) Cr. 3.

Prereq: CH E 381

Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis.

CH E 415: Biochemical Engineering

(Dual-listed with CH E 515). (3-0) Cr. 3.

Prereq: CH E 357, CHEM 331; BBMB 301 or BBMB 303 or BBMB 404

Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

CH E 420: Chemical Process Safety

(3-0) Cr. 3. F.S.

Prereq: CH E 357, CH E 381

Application of transport phenomena, thermodynamics, and chemical kinetics to the study of safety, health, and loss prevention. Government regulations, industrial hygiene, relief sizing, runaway reactions, toxic release, and dispersion models will be used. Fires, explosions, risk assessment, hazard identification, case studies, accident investigations, and design considerations will be studied.

CH E 421: Process Control

(3-0) Cr. 3. F.S.

Prereq: CH E 358, CH E 382, Math 267

Control of industrial chemical processes. Device applications and limitations. Dynamics of chemical process components and process control systems.

CH E 426: Chemical Engineering Laboratory II

(0-4) Cr. 2. F.S.

Prereq: CH E 325, CH E 358, CH E 382

Experiments in heat and mass transfer, staged operations, chemical reactor performance, unit processes. Computer applications. Only one of CH E 426 or 427 may count toward graduation.

CH E 427: Biological Engineering Laboratory

(0-4) Cr. 2. S.

Prereq: CH E 325, CH E 358, CH E 382; BBMB 301 or BBMB 303 or BBMB 404

Experiments on biological applications in chemical engineering. Only one of CH E 426 or CH E 427 may count toward graduation.

CH E 430: Process and Plant Design

(2-4) Cr. 4. F.S.

Prereq: CH E 358, CH E 382

Synthesis of chemical engineering processes, equipment and plants. Cost estimation and feasibility analysis.

CH E 440: Biomedical Applications of Chemical Engineering

(Dual-listed with CH E 540). (Cross-listed with B M E). (3-0) Cr. 3.

Prereq: CH E 210, MATH 266 or MATH 267, PHYS 222

Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

CH E 447: Polymers and Polymer Engineering

(Dual-listed with CH E 547). (3-0) Cr. 3.

Prereq: CHEM 331; CH E 382 or MAT E 351

Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry.

CH E 490: Undergraduate Research/Independent Study

(0-18) Cr. 1-6. Repeatable, maximum of 6 credits.

Prereq: Permission of department

Investigation of topics of special interest to student and faculty with a final written report or presentation. Election of course and topic must be approved in advance by Department with completion of Study Proposal. No more than 6 credits of ChE 490 may be counted towards technical electives.

CH E 490H: Undergraduate Research/Independent Study, Honors

(0-18) Cr. 1-6. Repeatable, maximum of 6 credits.

Prereq: Permission of Department

Investigation of topics of special interest to student and faculty with a final written report or presentation. Election of course and topic must be approved in advance by Department with completion of Study Proposal. No more than 6 credits of ChE 490 may be counted towards technical electives.

Courses primarily for graduate students, open to qualified undergraduates:**CH E 506: Environmental Chemodynamics**

(Dual-listed with CH E 406). (3-0) Cr. 3.

Prereq: CHE 357, CH E 381

Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment.

CH E 508: Surface and Colloid Chemistry

(Dual-listed with CH E 408). (3-0) Cr. 3.

Prereq: CH E 381

Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis.

CH E 515: Biochemical Engineering

(Dual-listed with CH E 415). (3-0) Cr. 3.

Prereq: CH E 357, CHEM 331; BBMB 301 or BBMB 303 or BBMB 404

Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

CH E 540: Biomedical Applications of Chemical Engineering

(Dual-listed with CH E 440). (3-0) Cr. 3.

Prereq: CH E 210, MATH 266 or MATH 267, PHYS 222

Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging.

CH E 542: Polymeric Biomaterials

(3-0) Cr. 3.

Prereq: CHEM 331 or a polymers class

Polymeric biomaterials, overview of biomaterial requirements, different classes of polymers used as biomaterials, specific bioapplications of polymers.

CH E 545: Analytical and Numerical Methods

(3-0) Cr. 3. F.

Prereq: CH E 358, MATH 267

Analysis of equipment and processes by analytic and/or numerical solution of descriptive differential equations. Operational and series techniques, boundary value problems, numerical interpolation and approximation, integration techniques.

CH E 547: Polymers and Polymer Engineering

(Dual-listed with CH E 447). (3-0) Cr. 3.

Prereq: CHEM 331; CH E 382 or MAT E 351

Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry.

CH E 554: Integrated Transport Phenomena

(4-0) Cr. 4. F.

Prereq: CH E 357, CH E 381, Math 267, credit or enrollment in CH E 545

Conservation equations governing diffusive and convective transport of momentum, thermal energy and chemical species. Transport during laminar flow in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled with chemical reactions and phase change. Scaling and approximation methods for mathematical solution of transport models. Diffusive fluxes; conservation equations for heat and mass transfer; scaling and approximation techniques; fundamentals of fluid mechanics; unidirectional flow; creeping flow; laminar flow at high Reynolds number; forced-convection heat and mass transfer in confined and unconfined laminar flows.

CH E 562: Bioseparations

(3-0) Cr. 3.

Prereq: CH E 357 or advanced standing in a science major

Principles and techniques for separation and recovery of biologically-produced molecules, especially proteins. Relationship between the chemistry of biological molecules and efficient separation and preservation of biological activity. Includes centrifugation and filtration, membrane processing, extraction, precipitation and crystallization, chromatography, and electrophoresis.

CH E 572: Turbulence

(Cross-listed with AER E). (3-0) Cr. 3.

Prereq: AER E 541 or M E 538

Qualitative features of turbulence. Statistical representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds averaged models. Homogeneous shear flows, free shear flows, boundary layers. Numerical simulation of turbulence: DNS, LES, DES.

CH E 583: Advanced Thermodynamics

(3-0) Cr. 3. F.

Prereq: CH E 381

Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-reaction equilibria/stability.

CH E 587: Advanced Chemical Reactor Design

(3-0) Cr. 3. S.

Prereq: CH E 382

Analysis of complex reactions and kinetics. Fixed bed, fluidized bed, and other industrial reactors. Analysis and design of non-ideal flow mixing, and residence times. Heterogeneous reactors.

CH E 590: Independent Study

Cr. 2-6. Repeatable.

Investigation of an approved topic on an individual basis.

CH E 595: Special Topics

Cr. 2-3. Repeatable.

CH E 595A: Special Topics: Separations

Cr. 2-3. Repeatable.

CH E 595B: Special Topics: Advanced Control Theory

Cr. 2-3. Repeatable.

CH E 595C: Special Topics: Crystallization

Cr. 2-3. Repeatable.

CH E 595D: Special Topics: Thermodynamics

Cr. 2-3. Repeatable.

CH E 595E: Special Topics: Protein Engineering/Bioseparations

Cr. 2-3. Repeatable.

CH E 595F: Special Topics: Biological Engineering

Cr. 2-3. Repeatable.

CH E 595G: Special Topics: Materials and Biomaterials

Cr. 2-3. Repeatable.

CH E 595H: Special Topics: Surfaces

Cr. 2-3. Repeatable.

CH E 595I: Special Topics: Combinatorial Design

Cr. 2-3. Repeatable.

CH E 599: Creative Component

Cr. arr. Repeatable.

Courses for graduate students:**CH E 601: Seminar**

Cr. R. Repeatable. F.S.

Offered on a satisfactory-fail basis only.

CH E 625: Metabolic Engineering

(3-0) Cr. 3.

Prereq: CH E 382, CHEM 331

Principles of metabolic engineering. Emphasis on emerging examples in biorenewables and plant metabolic engineering. Overview of biochemical pathways, determination of flux distributions by stoichiometric and labeling techniques; kinetics and thermodynamics of metabolic networks; metabolic control analysis; genetic engineering for overexpression, deregulation, or inhibition of enzymes; directed evolution; application of bioinformatics, genomics, and proteomics.

CH E 632: Multiphase Flow

(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: M E 538

Single particle, multiparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions.

CH E 642: Principles and Applications of Molecular Simulation

(3-0) Cr. 3.

Prereq: CH E 545

Principles of statistical physics. General features of molecular simulations including Monte Carlo (MC) methods, molecular mechanics (MM), and molecular dynamics (MD). Overview of intermolecular and interatomic potentials. Evaluation of phase equilibria, free energies, and surface/interfacial properties. Coarse-grained methods.

CH E 688: Catalysis and Catalytic Processes

(Cross-listed with BR C). (3-0) Cr. 3.

Prereq: CH E 382

Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

CH E 692: Independent Study

Cr. 2-6. Repeatable.

Investigation of an approved topic on an individual basis. Election of course and topic must be approved in advance by Program of Study Committee.

CH E 695: Advanced Topics

Cr. arr. Repeatable.

CH E 695A: Advanced Topics: Separations

Cr. arr. Repeatable.

CH E 695B: Advanced Topics: Advanced Statistical Modeling and Control

Cr. arr. Repeatable.

CH E 695C: Advanced Topics: Crystallization

Cr. arr. Repeatable.

CH E 695D: Advanced Topics: Thermodynamics

Cr. arr. Repeatable.

CH E 695E: Advanced Topics: Protein Engineering/Bioseparations

Cr. arr. Repeatable.

CH E 695F: Advanced Topics: Biological Engineering

Cr. arr. Repeatable.

CH E 695G: Advanced Topics: Materials and Biomaterials

Cr. arr. Repeatable.

CH E 695H: Advanced Topics: Surfaces

Cr. arr. Repeatable.

CH E 695I: Advanced Topics: Combinatorial Design

Cr. arr. Repeatable.

CH E 695J: Advanced Topics: Polymeric and Nanostructured Materials

Cr. arr. Repeatable.

CH E 695K: Advanced Topics: Biomaterials and Tissue Engineering

Cr. arr. Repeatable.

CH E 695L: Advanced Topics: Catalysis, Reaction Engineering, and Renewable Energy

Cr. arr. Repeatable.

CH E 697: Engineering Internship

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of major professor, graduate classification

One semester and one summer maximum per academic year professional work period.

CH E 698: Chemical Engineering Teaching Practicum

(1-0) Cr. 1. F.

Prereq: Graduate student classification and permission of instructor

Discussions intended to foster the development of graduate students as teaching assistants and future chemical engineering instructors. Topics include classroom and laboratory instruction, grading, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

CH E 698A: Chemical Engineering Teaching Practicum: Teaching Practicum

(1-0) Cr. 1. F.

Prereq: Graduate student classification and permission of instructor

Discussions intended to foster the development of graduate students as teaching assistants and future chemical engineering instructors. Topics include classroom and laboratory instruction, grading, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

CH E 698B: Chemical Engineering Teaching Practicum: Teaching Experience

(1-0) Cr. 1. Repeatable. F.S.SS.

Prereq: CH E 698A

Participation in the instruction of a CH E course under the mentorship of a CBE faculty member. Typical activities may include lecture preparation and delivery, laboratory instruction, design of assessments, problem-solving sessions, office hours, and grading. Offered on a satisfactory-fail basis only.

CH E 699: Research

Cr. arr. Repeatable.

Advanced topic for thesis/dissertation.

Chemistry (CHEM)

Any experimental courses offered by CHEM can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**CHEM 050: Preparation for College Chemistry**

(3-0) Cr. 0. F.S.

Prereq: 1 year high school algebra

An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. Credit for Chem 50 does not count toward graduation.

CHEM 101: Chemistry Learning Community Orientation

(1-0) Cr. 1. F.S.

Prereq: Member of the Chemistry Learning Community.

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

CHEM 101A: Chemistry Learning Community Orientation: On-Campus Orientation

(1-0) Cr. 1. F.

Prereq: Member of the Chemistry Learning Community.

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

CHEM 101B: Chemistry Learning Community Orientation: Professional Development Opportunities

(1-0) Cr. 1. S.

Prereq: Member of the Chemistry Learning Community.

Integration of first year and transfer students into the chemistry program. Introduction and overview of degree requirements and support services on campus, assistance with transition to college and community life, and team-building and leadership activities. Offered on a satisfactory-fail basis only.

CHEM 102L: Physical Sciences for Elementary Education

(Cross-listed with PHYS). (1-4) Cr. 3. F.S.

Prereq: MATH 195 or MATH 140

Physical science principles for future elementary teachers. Emphasis on experiments that address current elementary science education standards and that are appropriate for their future students to do, such as measurements of mass, length, time, light from atoms, charge and current, motion due to forces, energy and work, heat, waves, optics, building bridges and making musical instruments, studying states of matter and chemical reactions.

CHEM 110: Cutting-Edge Chemistry: Research and Career Opportunities

(1-0) Cr. 1. F.

Overview of careers in chemistry: industrial, governmental, and academic careers; literature and compound search instruction; professional ethics; and an introduction to joining a research lab. For students majoring or minoring in chemistry or chemistry-related fields. Offered on a satisfactory-fail basis only.

CHEM 160: Chemistry in Modern Society

(3-0) Cr. 3. F.S.

Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

CHEM 163: College Chemistry

(4-0) Cr. 4. F.S.SS.

Prereq: 1 year of high school algebra and geometry and Chem 50 or 1 year of high school chemistry; and credit or enrollment in CHEM 163L

A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 163L: Laboratory in College Chemistry

(0-3) Cr. 1. F.S.SS.

Prereq: Credit or enrollment for credit in CHEM 163

Laboratory to accompany CHEM 163. Must be taken with CHEM 163.

Only one of Chem 163L, CHEM 167L, and CHEM 177L may count toward graduation.

CHEM 167: General Chemistry for Engineering Students

(4-0) Cr. 4. F.S.

Prereq: 1 year of high school chemistry or CHEM 50 and Math 140 or high school equivalent.

Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 167L: Laboratory in General Chemistry for Engineering

(0-3) Cr. 1. F.S.

Prereq: Credit or enrollment for credit in CHEM 167

Laboratory to accompany 167. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177: General Chemistry I

(4-0) Cr. 4. F.S.SS.

Prereq: MATH 140 or high school equivalent, and CHEM 50 or 1 year high school chemistry, and credit or enrollment in CHEM 177L. Chemistry and biochemistry majors may consider taking CHEM 201

The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177L: Laboratory in General Chemistry I

(0-3) Cr. 1. F.S.SS.

Prereq: Credit or enrollment for credit in CHEM 177

Laboratory to accompany 177. 177L must be taken with 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177N: Laboratory in General Chemistry I

(0-3) Cr. 1. F.

Prereq: Credit or enrollment for credit in CHEM 177. For chemistry and biochemistry majors

Laboratory to accompany CHEM 177. CHEM 177N must be taken with CHEM 177. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 178: General Chemistry II

(3-0) Cr. 3. F.S.SS.

Prereq: CHEM 177, CHEM 177L, or CHEM 167

Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses.

CHEM 178L: Laboratory in College Chemistry II

(0-3) Cr. 1. F.S.SS.

Prereq: CHEM 177L and credit or enrollment for credit in CHEM 178

Laboratory to accompany 178. 178L is not a necessary co-requisite with 178.

CHEM 201: Advanced General Chemistry

(5-0) Cr. 5. F.

Prereq: Co-enrollment in MATH 165 or credit, one year of high school chemistry, and one year high school physics or advanced chemistry. Co-enrollment in CHEM 201L.

A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 201L: Laboratory in Advanced General Chemistry

(0-3) Cr. 1. F.

Prereq: Credit or enrollment for credit in CHEM 201

Laboratory to accompany 201. Introductory lab experience in synthesis and analysis to prepare students for research activities. 201L must be taken with 201. Only one of 163L, 167L, 177L, 177N or 201L may count toward graduation.

CHEM 211: Quantitative and Environmental Analysis

(2-0) Cr. 2. F.S.

Prereq: CHEM 163 and CHEM 163L, CHEM 201 and CHEM 201L; or credit or enrollment in CHEM 178; and concurrent enrollment in CHEM 211L

Theory and practice of elementary volumetric, chromatographic, electrochemical and spectrometric methods of analysis. Chemical equilibrium, sampling, and data evaluation. Emphasis on environmental analytical chemistry; the same methods are widely used in biological and materials sciences as well.

CHEM 211L: Quantitative and Environmental Analysis Laboratory

(0-6) Cr. 2. F.S.

Prereq: Credit or enrollment for credit in CHEM 211

Introductory laboratory experience in volumetric, spectrometric, electrochemical and chromatographic methods of chemical analysis.

CHEM 231: Elementary Organic Chemistry

(3-0) Cr. 3. F.S.SS.

Prereq: CHEM 163, CHEM 163L, or CHEM 177, CHEM 177L or CHEM 167; credit or enrollment in CHEM 231L

A survey of modern organic chemistry including nomenclature, structure and bonding, and reactions of hydrocarbons and important classes of natural and synthetic organic compounds. For students desiring only an elementary course in organic chemistry. Students in physical or biological sciences and premedical or preveterinary curricula should take the full year sequence 331 and 332 (with the accompanying laboratories 331L and 332L). Only one of Chem 231 and 331 or BBMB 221 may count toward graduation.

CHEM 231L: Laboratory in Elementary Organic Chemistry

(0-3) Cr. 1. F.S.SS.

Prereq: Credit or enrollment for credit in CHEM 231; CHEM 163L or CHEM 177L

Laboratory to accompany 231. 231L must be taken with 231. Only one of Chem 231L and 331L may count toward graduation.

CHEM 298: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of the Department cooperative education coordinator; sophomore classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 299: Undergraduate Research (for Freshmen and Sophomores)

Cr. arr. Repeatable, maximum of 6 credits.

Prereq: Permission of staff member with whom student proposes to work

CHEM 301: Inorganic Chemistry

(2-0) Cr. 2. S.

Prereq: CHEM 324

Atomic and molecular structure and bonding principles; molecular shapes and symmetry; acids and bases; solid-state structures and properties; inorganic chemistry of H, B, C.

CHEM 316: Instrumental Methods of Chemical Analysis

(2-0) Cr. 2. F.

Prereq: CHEM 211, CHEM 211L, Math 166, and concurrent enrollment in CHEM 316L; PHYS 222 recommended

Quantitative and qualitative instrumental analysis. Operational theory of instruments, atomic and molecular absorption and emission spectroscopy, electroanalysis, mass spectrometry, liquid and gas chromatography, electrophoresis, literature of chemical analysis.

CHEM 316L: Instrumental Analysis Laboratory

(0-6) Cr. 2. F.

Prereq: Credit or enrollment in CHEM 316

Advanced laboratory experience in UV-visible spectrophotometry, atomic absorption and emission spectrometry, electrochemistry, gas and liquid chromatography, electrophoresis, mass spectrometry, and other instrumental methods.

CHEM 321L: Laboratory in Physical Chemistry

(1-3) Cr. 2. S.

Prereq: Credit or enrollment in CHEM 324 or CHEM 325.

Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, infrared and optical spectroscopy, lasers. Not applicable towards the B.S. degree in Chemistry. Only one of Chem 321L and 322L may count toward graduation.

CHEM 322L: Laboratory in Physical Chemistry

(1-6) Cr. 3. S.

Prereq: CHEM 324 or CHEM 325.

Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, surface science, infrared and optical spectroscopy, lasers. Only one of Chem 321L and 322L may count toward graduation.

CHEM 324: Introductory Quantum Mechanics

(3-0) Cr. 3. F.S.

Prereq: CHEM 178, MATH 166; PHYS 222 recommended.

Quantum mechanics, atomic and molecular structure, spectroscopy, kinetic theory of gases, chemical kinetics.

CHEM 325: Chemical Thermodynamics

(3-0) Cr. 3. F.S.

Prereq: CHEM 178, MATH 166; PHYS 222 recommended

Classical thermodynamics 1st, 2nd, and 3rd laws with applications to gases and interfacial systems, multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Students taking a two-semester physical chemistry sequence are advised to take 324 first; in the spring semester, a molecular-based section of this course, stressing statistical thermodynamics, is offered for which knowledge of 324 is useful.

CHEM 326: Chemical Kinetics

Cr. 1. S.

Prereq: CHEM 167, 177, 178, or 201; MATH 166; CHEM 324 and 325 are recommended.

Kinetic theory, rate laws, temperature dependence of rate constants, transition-state theory, reaction mechanisms, kinetic isotope effects, catalysts, Michaelis-Menten kinetics, and Marcus theory.

CHEM 331: Organic Chemistry I

(3-0) Cr. 3. F.S.SS.

Prereq: CHEM 178 or CHEM 201, enrollment in CHEM 331L highly recommended

The first half of a two semester sequence. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry. Students desiring only one semester of organic chemistry should take 231 and 231L, not 331. Only one of Chem 231 and 331 may count toward graduation.

CHEM 331L: Laboratory in Organic Chemistry I

(0-3) Cr. 1. F.S.SS.

Prereq: CHEM 177L; credit or enrollment for credit in CHEM 331

Laboratory to accompany 331. Chemistry and biochemistry majors are encouraged to take 333L. Only one of Chem 231L and 331L may count toward graduation.

CHEM 332: Organic Chemistry II

(3-0) Cr. 3. F.S.SS.

Prereq: CHEM 331; enrollment in CHEM 332L highly recommended

Continuation of 331. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms, natural products, carbohydrates and proteins. For students majoring in physical and biological sciences, premedical and pre-veterinary curricula, chemistry and biochemistry.

CHEM 332L: Laboratory in Organic Chemistry II

(0-3) Cr. 1. F.S.SS.

Prereq: CHEM 331L; credit or enrollment for credit in CHEM 332

Laboratory to accompany 332. Chemistry and biochemistry majors are encouraged to take 334L.

CHEM 333L: Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)

(0-6) Cr. 2. F.

Prereq: Credit or enrollment for credit in CHEM 331

Laboratory to accompany 331 for chemistry and biochemistry majors.

CHEM 334L: Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)

(0-6) Cr. 2. S.

Prereq: CHEM 333L, credit or enrollment for credit in CHEM 332

Laboratory to accompany 332 for chemistry and biochemistry majors.

CHEM 398: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of the Department cooperative education coordinator; junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 399: Undergraduate Research

Cr. arr.

Prereq: Permission of instructor with whom student proposes to work and junior or senior classification

Undergraduate research. No more than six total credits of Chem 399 and Chem 499 may count toward graduation. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements for the B.S. degree.

CHEM 401L: Inorganic Chemistry Laboratory

(0-3) Cr. 1. S.

Prereq: CHEM 402

Preparation and characterization of inorganic and organometallic compounds by modern techniques. For students majoring in chemistry or biochemistry.

CHEM 402: Advanced Inorganic Chemistry

(3-0) Cr. 3. F.

Prereq: CHEM 301; CHEM 331 recommended

Chemistry of the d and f metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic solid state and bioinorganic chemistry.

CHEM 490: Independent Study

Cr. arr.

Prereq: Completion of 6 credits in chemistry at the 300 level or higher and permission of instructor

No more than 9 credits of Chem 490 may count toward graduation.

CHEM 498: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of the Department cooperative education coordinator; senior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

CHEM 499: Senior Research

Cr. 2-3. Repeatable, maximum of 6 credits.

Prereq: Permission of instructor with whom student proposes to work; B average in all chemistry, physics, and mathematics courses

Research in chosen area of chemistry, with final written report as senior thesis. This course should be elected for two consecutive semesters. For students majoring in chemistry. No more than six total credits for Chem 399 and 499 may count toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:**CHEM 501L: Inorganic Preparations**

(0-3) Cr. 1. F.

Prereq: CHEM 402

Preparation and characterization of inorganic and organometallic compounds by modern research techniques.

CHEM 502: Advanced Inorganic Chemistry

(3-0) Cr. 3. F.

Prereq: CHEM 402; CHEM 331 recommended

Chemistry of the main group (s, p) and transition (d, f) metals. Structure, bonding, electronic spectra, and reaction mechanisms. Aspects of organometallic, solid state, bioinorganic, and nano chemistry.

CHEM 505: Physical Inorganic Chemistry

(3-0) Cr. 3. F.

Prereq: CHEM 402 or CHEM 502 and CHEM 324

Elementary group theory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds.

CHEM 511: Advanced Analytical Chemistry

(3-0) Cr. 3. F.

Prereq: CHEM 316 and CHEM 316L

General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular microscopy; bioanalytical methods; data evaluation; chemometrics; and analytical literature.

CHEM 512: Electrochemical Methods of Analysis

(3-0) Cr. 3. F.

Prereq: CHEM 316 and CHEM 316L; Recommended but not Required CHEM 324, and CHEM 322L

Principles of convective-diffusional mass transport in electroanalysis. Applications of potentiometry, voltammetry, and coulometry. Introduction to heterogeneous and homogeneous kinetics in electroanalysis. Analog and digital circuitry. Interfacing.

CHEM 513: Analytical Molecular and Atomic Spectroscopy

(3-0) Cr. 3. S.

Prereq: CHEM 316 and CHEM 316L, CHEM 324, CHEM 322L

Introduction to physical optics and design of photometric instruments. Principles of absorption, emission, fluorescence, and Raman spectroscopy. Error and precision of optical methods. Ultraviolet, visible, and infrared methods of qualitative and quantitative organic and inorganic analysis.

CHEM 516: Analytical Separations

(3-0) Cr. 3. F.

Prereq: CHEM 316 and CHEM 316L, CHEM 324, CHEM 322L

Principles and examples of inorganic and organic separation methods applied to analytical chemistry. Solvent extraction, volatilization, ion exchange, liquid and gas chromatography, and electrophoresis.

CHEM 531: Organic Synthesis I

(2-0) Cr. 2. S.

Prereq: CHEM 332

Survey of organic functional group transformations.

CHEM 532: Organic Synthesis II

(2-0) Cr. 2. F.

Prereq: CHEM 531

Synthesis of complex organic compounds including natural products.

CHEM 537: Physical Organic Chemistry I

(3-0) Cr. 3. F.

Prereq: CHEM 332

Survey of reactive intermediates including cations, anions, carbenes, and radicals.

CHEM 538: Physical Organic Chemistry II

(3-0) Cr. 3. S.

Prereq: CHEM 537

Molecular structure, stereochemistry, introduction to reaction mechanisms, thermodynamic and kinetic data, linear free energy relationships, isotope effects, orbital symmetry.

CHEM 550: Safety in the Chemical Laboratory

(1-0) Cr. 1. S.

Prereq: CHEM 332L

Introduction to laboratory safety and chemical hygiene. Use of engineering controls and personal protective equipment. Chemical storage and waste disposal practices. Handling hazardous chemicals. Radiation safety and laser safety. Offered on a satisfactory-fail basis only.

CHEM 555: Teaching College Chemistry

(2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: Graduate or senior classification.

Methods of instruction, strategies and techniques for effective teaching and learning along with practice teaching in undergraduate chemistry recitation and laboratory courses. Cooperative learning, guided-inquiry, learning cycles, conceptual change, models and modeling, concept maps, visualization, computer simulations, web-based delivery systems, and learning theories.

CHEM 561: Fundamentals of Quantum Mechanics

(4-0) Cr. 4. F.

Prereq: CHEM 324

Schrodinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; operators including angular momenta; time-independent and time-dependent perturbation theory; Schrodinger and Heisenberg representations; unitary operators; interaction picture, density matrix.

CHEM 562: Fundamentals of Atomic and Molecular Quantum Mechanics

(3-0) Cr. 3. S.

Prereq: CHEM 561, credit or enrollment in CHEM 583

Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods.

CHEM 563: Statistical Mechanics

(3-0) Cr. 3. S.

Prereq: CHEM 325

Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium.

CHEM 564: Molecular Spectroscopy and Structure

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: CHEM 505 or CHEM 562

Maxwell's field equations, interaction of light with matter including time-dependent perturbation theory, microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection rules, special lineshapes and introduction to nonlinear and coherent laser spectroscopies.

CHEM 571: Solid-State Chemistry

(2-0) Cr. 2. Alt. S., offered odd-numbered years.

Prereq: CHEM 301, CHEM 324

Structural principles, synthetic strategies, analytical methods, and chemical bonding issues applied to solids. Atomic packings and networks, short-range vs. long-range order, defects; phase diagrams, reactive fluxes, chemical transport; diffraction, spectroscopy; energy bands and their bonding interpretations.

CHEM 572: Spectrometric Identification of Organic Compounds

(2-3) Cr. 3. F.

Prereq: CHEM 332

Principles of infrared, ultraviolet, nuclear magnetic resonance, and mass spectroscopy as applied to organic chemistry.

CHEM 573: Nanochemistry

(2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: CHEM 301, CHEM 324

Synthesis, characterization, properties and applications of nanoscale materials (\approx 0.5-500 nm), relationship with molecular, meso and bulk compounds. Chemistry of solid surfaces, zero-, one- and two-dimensional (0D, 1D, 2D) nanostructures, semiconductor quantum dots, plasmonic nanoparticles, carbon nanomaterials, porous nanomaterials, potential health and safety impacts.

CHEM 574: Organometallic Chemistry of the Transition Metals

(2-0) Cr. 2. Alt. S., offered odd-numbered years.

Prereq: CHEM 301, CHEM 332

Transition metal complexes with ligands such as cyclopentadienyl, olefins, acetylenes, benzenes, and carbon monoxide. Coverage of structure, bonding, reactivity, fundamental mechanisms, and homogeneous catalysis.

CHEM 576: Surface Chemistry

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: CHEM 324

Gas-surface interactions and techniques of characterization. Idealized surface lattices, surface tension, Wulff plots, work function, adsorbate-adsorbate interactions, 2D phase diagrams, diffusion, thin film growth, adsorption and desorption mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based spectroscopies for surface analysis (including AES, FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM).

CHEM 577: Mass Spectrometry

(3-0) Cr. 3. S.

Basic physics, instrumentation, chemical and biological applications of mass spectrometry.

CHEM 578: Chemical Kinetics and Mechanisms

(2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: CHEM 324

Rates and mechanisms; reversible, consecutive, and competing reactions; chain mechanisms; kinetic isotope effects; very rapid reactions; acid-base catalysis, theories of unimolecular reactions; transition state and Marcus theories.

CHEM 579: Introduction to Research in Chemistry

Cr. R. F.

Introduction to the various areas of research in chemistry at Iowa State University.

CHEM 580: Introduction to Computational Quantum Chemistry

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: CHEM 324

Basic principles of quantum mechanics, schrodinger equation. Hartree-Fock/molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry.

CHEM 583: Chemical Group Theory

(1-0) Cr. 1. F.

Prereq: CHEM 324

Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momenta; space groups and crystals; permutation group, antisymmetry, and spin states.

CHEM 599: Nonthesis Research

Cr. arr.

*Prereq: Permission of instructor concerned***Courses for graduate students:****CHEM 600: Seminar in Inorganic Chemistry**

(1-0) Cr. 1. Repeatable, maximum of 3 times. F.S.

*Prereq: Permission of instructor***CHEM 601: Selected Topics in Inorganic Chemistry**

(2-0) Cr. 1-2. F.S.

Prereq: Permission of instructor

Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; nonaqueous solutions; Zintl phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and bioinorganic chemistry of nucleic acids.

CHEM 611: Seminar in Analytical Chemistry

(1-0) Cr. 1. Repeatable. F.S.

*Prereq: Permission of instructor***CHEM 619: Special Topics in Analytical Chemistry**

(2-0) Cr. 1-2. Repeatable. F.S.

Prereq: Permission of instructor

Raman spectroscopy, sensors, spectroelectrochemistry, capillary electrophoresis, analytical plasmas, chemometrics and bioanalytical chemistry.

CHEM 631: Seminar in Organic Chemistry

(1-0) Cr. 1. Repeatable. F.S.

*Prereq: Permission of instructor***CHEM 632: Selected Topics in Organic Chemistry**

(2-0) Cr. 1-2. Repeatable. F.S.

Prereq: CHEM 537

Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidations and reductions, modern organic synthesis, reactive intermediates, bioorganic chemistry, and polymers.

CHEM 660: Seminar in Physical Chemistry

(1-0) Cr. 1. Repeatable. S.

*Prereq: Permission of instructor***CHEM 667: Special Topics in Physical Chemistry**

(2-0) Cr. 1-2. F.S.

Prereq: Permission of instructor

Advanced and recent developments in physical chemistry are selected for each offering.

CHEM 699: Research

Cr. arr. Repeatable.

Prereq: Permission of instructor

Chinese (CHIN)

Any experimental courses offered by CHIN can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**CHIN 101: Elementary Mandarin Chinese I**

(4-0) Cr. 4. F.

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

CHIN 102: Elementary Mandarin Chinese II

(4-0) Cr. 4. S.

Prereq: CHIN 101

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

Meets International Perspectives Requirement.

CHIN 201: Intermediate Mandarin Chinese I

(4-0) Cr. 4. F.

Prereq: CHIN 102

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.

Meets International Perspectives Requirement.

CHIN 202: Intermediate Mandarin Chinese II

(4-0) Cr. 4. S.

Prereq: CHIN 201

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese.

Meets International Perspectives Requirement.

CHIN 272: Introduction to Chinese Culture

(3-0) Cr. 3. S.

Interdisciplinary introduction to Chinese society and culture from earliest times to the present. Topics include ancient literature, philosophy, religion, art, architecture, customs, transition to a modern society, social changes, urban life, popular culture, and contemporary values and ideas. Meets International Perspectives Requirement.

CHIN 301: Advanced Mandarin Chinese I

(3-0) Cr. 3. F.

Prereq: CHIN 202 or equivalent

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only.

Meets International Perspectives Requirement.

CHIN 302: Advanced Mandarin Chinese II

(3-0) Cr. 3. S.

Prereq: CHIN 301 or equivalent

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Native speakers of Chinese by instructor's permission only.

Meets International Perspectives Requirement.

CHIN 304: Chinese for Global Professionals

(4-0) Cr. 4. S.

Prereq: CHIN 202 or equivalent

Introduction to professional language and culture in China and Chinese-speaking regions in Asia. Development of all four language skills, focusing on practical applications in the professional contexts. Development of global awareness and cross-cultural understanding. Preparation for internships. Meets International Perspectives Requirement.

CHIN 370: Chinese Literature in English Translation

(3-0) Cr. 3. Repeatable. F.

Prereq: ENGL 150 or equivalent

Topics may include traditional prose, poetry, novel and drama; twentieth-century fiction and film. All readings and class discussions in English. Meets International Perspectives Requirement.

CHIN 375: China Today

(3-2) Cr. 3-4. Repeatable. S.

Prereq: ENGL 250 or equivalent

Focusing on contemporary society, culture, literature and the arts. All readings, discussions, and papers in English. Topics vary from year to year. Meets International Perspectives Requirement.

CHIN 378: Chinese Film and Society

Cr. 3. S.

Prereq: ENGL 150 or equivalent

Survey of Chinese cinematic history from 1896 to the present against the background of China's constant sociocultural transformation; emphasis on narrative themes, film history, and film criticism. Topics vary according to faculty interest. Taught in English. Meets International Perspectives Requirement.

CHIN 403: Seminar in Chinese Language and Culture

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 403A: Seminar in Chinese Language and Culture: Translating Contemporary Chinese Texts

(3-0) Cr. 3.

Prereq: CHIN 302

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 403B: Seminar in Chinese Language and Culture: Topics on Business and Professions

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 403C: Seminar in Chinese Language and Culture: Reading Chinese Texts

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 490: Independent Study

Cr. 1-6. Repeatable.

Prereq: 6 credits in Chinese and permission of department chair

Designed to meet student needs in areas beyond current course offerings or to accommodate the desire to integrate a study of literature or language with special issues in major fields.

CHIN 499: Internship in Chinese

Cr. 1-3. Repeatable, maximum of 6 credits.

Prereq: 9 credits of Chinese at the 300 level; permission of adviser and WLC Internship Coordinator

Work experience using Chinese in the public or private sector, combined with academic work under faculty supervision. Offered on a satisfactory-fail basis only. No more than 3 credits may apply toward the Chinese minor or LCP minor.

Civil Engineering (C E)

Any experimental courses offered by C E can be found at:

registrar.iastate.edu/faculty-staff/courses/explistsings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Courses primarily for undergraduates:

C E 105: Introduction to the Civil Engineering Profession

(1-0) Cr. 1. F.S.

Overview of the civil engineering profession in regards to its nature and scope. Exploration of the various specialty areas within civil engineering through team activities. Review and guidance in relation to academic degree options, career avenues and professional practices involving communication, teamwork, leadership, ethics, networking, life-long-learning goals, and mentoring.

C E 111: Fundamentals of Surveying I

(2-3) Cr. 3. F.S.

Prereq: MATH 165, C E 160, credit or enrollment in C E 170

Introduction to error theory. Fundamentals of observing distances, elevations, and angles. Traversing. Irregular areas. Circular and parabolic curves. Earthwork including mass diagrams. Construction staking. Computer applications and introduction to photogrammetry, geographic information systems and global positioning systems technology.

C E 120: Civil Engineering Learning Community

Cr. R. Repeatable.

Integration of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. Offered on a satisfactory-fail basis only.

C E 160: Engineering Problems with Computational Laboratory

(2-2) Cr. 3. F.S.

Prereq: Credit or enrollment in MATH 165

Engineering approach to solving problems and presenting results with applications to examples in civil, construction, and environmental engineering, such as problems in statics. Dimensions and units. Data processing, graphing, and curve fitting. Formulating and solving fundamental and practical engineering problems with spreadsheets and a structured programming language. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 185, I E 148, M E 160 and S E 185 may count towards graduation.

C E 170: Graphics for Civil Engineering

(0-4) Cr. 2. F.S.

Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

C E 206: Engineering Economic Analysis and Professional Issues in Civil Engineering

(3-0) Cr. 3. F.S.

Prereq: MATH 166, ENGL 250; C E 105; ECON 101 recommended

Engineering/managerial analysis of the economic aspects of project proposals. Alternative sources of funds; time value of money; expenditure of capital funds and methods of evaluating alternative projects. Professionalism, licensure, liability, ethics, leadership, social responsibility, creative and critical thinking, and applications/impacts of regulations in civil engineering.

C E 274: Engineering Statics

(3-0) Cr. 3. F.S.SS.

Prereq: PHYS 221, credit or enrollment in MATH 166

Vector analysis; analysis of force systems; resultant in two and three dimensions; free-body diagrams; equilibrium; analysis of trusses, frames, and machines; friction, belts and pulleys; shear and bending moment in beams, centroid and center of mass; second moments of areas.

C E 306: Project Management for Civil Engineers

(2-3) Cr. 3. F.S.

Prereq: ENGL 250, C E 105, Technical Communication Elective recommended

Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents, plan reading, and in estimating quantities.

C E 326: Principles of Environmental Engineering

(2-2) Cr. 3. F.S.

Prereq: CHEM 167 or CHEM 177 and CHEM 178, MATH 166, credit or enrollment in E M 378

Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control.

C E 332: Structural Analysis I

(2-2) Cr. 3. F.S.

Prereq: E M 324

Loads, shear, moment, and deflected shape diagrams for beams and framed structures. Deformation calculations. Approximate methods. Application of consistent deformation methods to continuous beams and frames. Application of displacement or slope deflection methods to continuous beams and frames without sway. Influence lines for determinate and indeterminate structures. Computer applications to analyze beams and frames. Validation of computer results.

C E 333: Structural Steel Design I

(3-1) Cr. 3. F.S.

Prereq: C E 332, E M 327

AISC design methods for structural steel buildings. Design of steel tension members. Design of steel members for flexure. Design of members for compression. Beam-Column member design. Introduction to steel building systems. Steel moment frames and concentrically braced frames. Design of commonly used connections in steel buildings.

C E 334: Reinforced Concrete Design I

(2-2) Cr. 3. F.S.

Prereq: C E 332, E M 327

ACI design methods for structural concrete members. Emphasis on the analysis and design for flexure of singly reinforced and doubly reinforced sections, T-section, one-way slabs, short columns, and isolated footings. Analysis and design for shear, and serviceability. Bond, anchorage, and development of reinforcement.

C E 355: Principles of Transportation Engineering

(3-0) Cr. 3. F.S.

Prereq: C E 111

Introduction to planning, design, and operations of transportation facilities. Road user, vehicle and roadway characteristics. Technological, economic and environmental factors. Asset management, transportation planning, capacity analysis, traffic control, geometric design, traffic safety.

C E 360: Geotechnical Engineering

(3-3) Cr. 4. F.S.

Prereq: E M 324, credit or enrollment in GEOL 201 or CON E 241

Introduction to geotechnical engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity.

C E 372: Engineering Hydrology and Hydraulics

(3-0) Cr. 3. F.S.

Prereq: E M 378, a course in statistics from the approved department list

The hydrologic cycle: precipitation, infiltration, runoff, evapotranspiration, groundwater, and streamflow. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required.

C E 382: Design of Concretes

(2-3) Cr. 3. F.S.

Prereq: E M 274

Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing; principles of pavement thickness design.

C E 383: Design of Portland Cement Concrete

(0-2) Cr. 1. F.S.

Prereq: E M 274

For Con E students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete. Credit for both C E 382 and C E 383 may not be applied for graduation.

C E 388: Sustainable Engineering and International Development

(Cross-listed with A B E, E E). (2-2) Cr. 3. F.

Prereq: Junior classification in engineering

Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

C E 395: Global Perspectives in Transportation

Cr. 3. Repeatable, maximum of 2 times. S.

Prereq: CE 355 or equivalent

Background on historical civil engineering design and construction. Impacts of historical, cultural, social, economic, ethical, environmental, and political conditions on the design and construction of various infrastructure projects outside the United States. Global road safety and intermodal operations. Addressing transportation problems in a large metropolitan area.

Meets International Perspectives Requirement.

C E 396: Summer Internship

Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services

Summer professional work period. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

C E 398: Cooperative Education (Co-op)

Cr. R. Repeatable. F.S.

Prereq: Permission of department and Engineering Career Services

Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

C E 403: Program and Outcome Assessment

Cr. R. F.S.

Prereq: Verification of undergraduate application for graduation by the end of the first week of class. Permission of instructor for students who are scheduled for summer graduation

Assessment of C E Curriculum and educational objectives. Assessments to be reviewed by the CE Department to incorporate potential improvements. Offered on a satisfactory-fail basis only.

C E 413: Applied and Environmental Geophysics

(Dual-listed with C E 513). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: GEOL 100 or GEOL 201, algebra and trigonometry

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

C E 417: Land Surveying

(2-3) Cr. 3. S.

Prereq: C E 111

Legal principles affecting the determination of land boundaries, public domain survey systems. Locating sequential and simultaneous conveyances. Record research, plat preparation, and land description. Study of selected court cases.

C E 420: Environmental Engineering Chemistry

(Dual-listed with C E 520). (Cross-listed with ENSCI). (2-3) Cr. 3. F.

Prereq: C E 326, CHEM 178

Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 421: Environmental Biotechnology

(Dual-listed with C E 521). (2-2) Cr. 3. F.

Prereq: C E 326

Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

C E 424: Air Pollution

(Dual-listed with C E 524). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424A: Air Pollution: Air quality and effects of pollutants

(Dual-listed with C E 524A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424B: Air Pollution: Climate change and causes

(Dual-listed with C E 524B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424C: Air Pollution: Transportation Air Quality

(Dual-listed with C E 524C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

C E 424D: Air Pollution: Off-gas treatment technology

(Dual-listed with C E 524D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

C E 424E: Air Pollution: Agricultural sources of pollution

(Dual-listed with C E 524E). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 428: Water and Wastewater Treatment Plant Design

(2-2) Cr. 3. S.

Prereq: C E 326

Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management.

C E 439: Seismic Methods in Geology, Engineering, and Petroleum Exploration

(Dual-listed with C E 539). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: GEOL 100 or GEOL 201, algebra and trigonometry

Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment.

C E 446: Bridge Design

(Dual-listed with C E 546). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: C E 333, C E 334

Bridge design in structural steel and reinforced concrete. Application of AASHTO Bridge Design Specifications. Analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches.

C E 448: Building Design

(Dual-listed with C E 548). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: C E 333, C E 334

Building design in structural steel and reinforced concrete. Investigation of structural behavior. Gravity and lateral load resisting systems. Application of current building codes and design specifications. In-depth analysis of gravity and wind loads on buildings. Review of building designs. Preliminary designs include investigating alternative structural systems. Approximate methods of structural analysis for gravity and lateral loads. Final designs include preparation of design calculations and sketches.

C E 449: Structural Health Monitoring

(Dual-listed with C E 549). (3-0) Cr. 3.

Prereq: Senior classification in Engineering or permission of instructor

Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 449 and an additional design project or more in-depth analysis and design.

C E 451: Urban Transportation Planning Models

(Dual-listed with C E 551). (3-0) Cr. 3. F.

Prereq: C E 355, STAT 101 or STAT 105

Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems.

C E 453: Highway Design

(2-2) Cr. 3. F.

Prereq: C E 306, C E 355

Introduction to highway planning and design. Design, construction, and maintenance of highway facilities. Level-of-service, stopping sight distance, highway alignment, earthwork and pavement design. Design project, oral reports and written reports. Computer applications.

C E 460: Foundation Engineering

(3-0) Cr. 3. F.S.

Prereq: C E 360

Fundamentals of foundation engineering. Exploration, sampling, and in-situ tests. Shallow and deep foundations. Settlement and bearing capacity analyses. Stability of excavations and earth retaining structures.

C E 467: Geomaterials Stabilization

(Dual-listed with C E 567). (2-2) Cr. 3. S.

Prereq: C E 360, C E 382 or C E 383

Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.

C E 473: Groundwater Hydrology

(Dual-listed with C E 573). (3-0) Cr. 3. F.

Prereq: C E 372

Principles of groundwater flow, hydraulics of wells, superposition, slug and pumping tests, streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Design project. Extra assignments required for graduate students.

C E 483: Pavement Analysis and Design

(Dual-listed with C E 583). (3-0) Cr. 3. S.

Prereq: C E 360 and C E 382

Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 484: Advanced Design of Concretes

(Dual-listed with C E 584). (2-3) Cr. 3.

Prereq: C E 382

Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, lightweight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. A term project is required for graduate level only.

C E 485: Civil Engineering Design

(2-2) Cr. 3. F.S.

Prereq: C E 206, C E 306, C E 326, C E 333 or C E 334, C E 355, C E 360, C E 372, C E 382, SP CM 212. Course enrollment limited to final graduating semester.

The civil engineering design process, interacting with the client, identification of the engineering problems, development of a technical proposal, identification of design criteria, cost estimating, planning and scheduling, codes and standards, development of feasible alternatives, selection of best alternative, and oral presentation.

C E 488: Sustainable Civil Infrastructure Systems

(Dual-listed with C E 588). (3-0) Cr. 3. F.

Prereq: Junior or higher classification in engineering or science

Sustainable planning, life cycle analysis, appropriate engineering design, investment levels and overall rating of civil engineering infrastructure systems, including highway, bridge, airport, rail, dam, power and port facilities. Complementary assessment of future civil infrastructure sustainability impacts and challenges in relation to autonomous and electric vehicle development. Overview regarding US and global availability and supply of critical infrastructure commodities (e.g., cement, stone, metals, phosphorus, uranium, etc.). Directed course readings and multiple project/design reports.

C E 489: Pavement Preservation and Rehabilitation

(Dual-listed with C E 589). Cr. 3. F.S.

Prereq: C E 382

Overview of pavement preservation and pavement rehabilitation techniques. Overview and selection of materials used in pavement preservation and rehabilitation strategies. Evaluating suitability of pavement preservation and pavement rehabilitation strategies based on existing structure, pavement distresses and non-condition factors. Use of recycled pavement materials in pavement reconstruction techniques.

C E 490: Independent Study

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Independent study in any phase of civil engineering. Pre-enrollment contract required. No more than 6 credits of C E 490 may be counted towards engineering topics electives.

C E 490H: Independent Study: Honors

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Independent study in any phase of civil engineering. Pre-enrollment contract required. No more than 6 credits of C E 490H may be counted towards engineering topics electives.

Courses primarily for graduate students, open to qualified undergraduates:**C E 501: Preconstruction Project Engineering and Management**

(3-0) Cr. 3. F.

Prereq: Credit or enrollment in CON E 422 or C E 306 or graduate standing

Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Emphasis is on managing complex projects using 5-dimensional project management theory.

C E 502: Construction Project Engineering and Management

(3-0) Cr. 3. S.

Prereq: Credit or enrollment in CON E 422 or C E 594A or permission of instructor

Application of engineering and management control techniques to complex construction projects. Construction project control techniques, project administration, construction process simulation, quality management, and productivity improvement programs.

C E 503: Construction Finance and Business Management

(3-0) Cr. 3. S.

Prereq: Credit or enrollment in CON E 422 or C E 594A or permission of instructor

Fundamental theories and applied methods for financial management of construction projects and companies. Construction accounting, cash flow analysis, financial planning and management, and risk analysis. Case studies.

C E 505: Design of Construction Systems

(3-0) Cr. 3. F.

Prereq: C E 333, C E 360, CON E 322, CON E 340 or graduate standing

Advanced design of concrete formwork and falsework systems. Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

C E 506: Case Histories in Construction Documents

(3-0) Cr. 3.

Prereq: Graduate standing or permission of instructor

Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510: Information Technologies for Construction

(3-0) Cr. 3.

Prereq: Graduate standing or permission of instructor

Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 513: Applied and Environmental Geophysics

(Dual-listed with C E 413). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: GEOL 100 or GEOL 201, algebra and trigonometry

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

C E 520: Environmental Engineering Chemistry

(Dual-listed with C E 420). (Cross-listed with ENSCI). (2-3) Cr. 3. F.

Prereq: C E 326, CHEM 178

Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 521: Environmental Biotechnology

(Dual-listed with C E 421). (Cross-listed with ENSCI). (2-2) Cr. 3. F.

Prereq: C E 326

Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

C E 522: Water Pollution Control Processes

(Cross-listed with ENSCI). (2-2) Cr. 3.

Prereq: C E 421 or C E 521

Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

C E 523: Physical-Chemical Treatment Process

(Cross-listed with ENSCI). (2-2) Cr. 3.

Prereq: C E 520

Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

C E 524: Air Pollution

(Dual-listed with C E 424). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524A: Air Pollution: Air quality and effects of pollutants

(Dual-listed with C E 424A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524B: Air Pollution: Climate change and causes

(Dual-listed with C E 424B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524C: Air Pollution: Transportation Air Quality

(Dual-listed with C E 424C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

C E 524D: Air Pollution: Off-gas treatment technology

(Dual-listed with C E 424D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

C E 524E: Air Pollution: Agricultural sources of pollution

(Dual-listed with C E 424E). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 528: Solid and Hazardous Waste Management

(Cross-listed with ENSCI). (3-0) Cr. 3.

Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing

Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

C E 532: Structural Analysis II

(3-0) Cr. 3. F.

Prereq: C E 332

Analysis of indeterminate structural problems by the consistent deformation and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Special topics for the stiffness method.

C E 533: Structural Steel Design II

(3-0) Cr. 3.

Prereq: C E 333

Theoretical background and development of AISC Specification equations. In-depth analysis and design of tension members, columns, beams, beam-columns, and plate girders. Emphasis on Load and Resistance Factor Design. Elastic and inelastic buckling of members and member elements. Investigation of amplification factors for members subject to combined bending and axial load and to combined bending and torsion. Effective Length Method and Direct Analysis Method of design. Approximate Second-Order Analysis. Biaxial bending. Torsion and combined bending and torsion of W-shapes.

C E 534: Reinforced Concrete Design II

(2-2) Cr. 3.

Prereq: C E 334

Advanced topics in reinforced concrete analysis and design. Moment-curvature and load-deflection behavior. Design of reinforced concrete long columns, two-way floor slabs, and isolated and combined footings. Design and behavior considerations for torsion, biaxial bending, and structural joints. Strut-and-tie modeling.

C E 535: Prestressed Concrete Structures

(3-0) Cr. 3.

Prereq: C E 334

Design of prestressed concrete structures, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, and statically indeterminate structures.

C E 539: Seismic Methods in Geology, Engineering, and Petroleum Exploration

(Dual-listed with C E 439). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: GEOL 100 or GEOL 201, algebra and trigonometry

Physics of elastic-wave propagation. Seismic surveys in environmental imaging, engineering, and petroleum exploration. Reflection and refraction techniques. Data collection, processing, and geological interpretation. Field work with state-of-the-art equipment.

C E 541: Dynamic Analysis of Structures

(3-0) Cr. 3.

Prereq: E M 345 and credit or enrollment in C E 532

Single and multi-degree-of-freedom systems. Free and forced vibrations. Linear and nonlinear response. Modal analysis. Response spectra. Seismic analysis.

C E 542: Structural Analysis by Finite Elements

(3-0) Cr. 3.

Prereq: C E 532

Use of the finite element method for the analysis of complex structural configurations. Plane stress, solid, Axisymmetric and plate elements. Numerical integration. Use of general purpose finite element programs.

C E 545: Seismic Design

(3-0) Cr. 3.

Prereq: C E 333, C E 334

Seismic hazard in the United States. Engineering characteristics of ground motions. Structural damage in past earthquakes. Capacity design philosophy for seismic resistant design. Conceptual design of structures. Capacity design process including design of structural members.

C E 546: Bridge Design

(Dual-listed with C E 446). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: C E 333, C E 334

Bridge design in structural steel and reinforced concrete. Application of AASHTO Bridge Design Specifications. Analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches.

C E 548: Building Design

(Dual-listed with C E 448). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: C E 333, C E 334

Building design in structural steel and reinforced concrete. Investigation of structural behavior. Gravity and lateral load resisting systems. Application of current building codes and design specifications. In-depth analysis of gravity and wind loads on buildings. Review of building designs. Preliminary designs include investigating alternative structural systems. Approximate methods of structural analysis for gravity and lateral loads. Final designs include preparation of design calculations and sketches.

C E 549: Structural Health Monitoring

(Dual-listed with C E 449). (3-0) Cr. 3.

Prereq: Senior classification in Engineering or permission of instructor
Introductory and advanced topics in structural health monitoring (SHM) of aeronautical, civil, and mechanical systems. Topics include sensors, signal processing in time and frequency domains, data acquisition and transmission systems, design of integrated SHM solutions, nondestructive evaluation techniques, feature extraction methods, and cutting-edge research in the field of SHM. Graduate students will have a supervisory role to assist students in 449 and an additional design project or more in-depth analysis and design.

C E 551: Urban Transportation Planning Models

(Dual-listed with C E 451). (3-0) Cr. 3. F.

Prereq: C E 355, STAT 101 or STAT 105

Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems.

C E 552: Traffic Safety, Operations, and Maintenance

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: C E 355

Engineering aspects of highway traffic safety. Reduction of crash incidence and severity through highway design and traffic control. Accident analysis. Safety in highway design, maintenance, and operation.

C E 553: Traffic Engineering

(3-0) Cr. 3. F.

Prereq: C E 355

Driver, pedestrian, and vehicular characteristics. Traffic characteristics; highway capacity; traffic studies and analyses. Principles of traffic control for improved highway traffic service. Application of appropriate computing software and tools.

C E 556: Transportation Data Analysis

(3-0) Cr. 3.

Prereq: C E 355, a Statistics course at the 300 level or higher

Analysis of transportation data, identification of data sources and limitations. Static and dynamic data elements such as infrastructure characteristics, flow and operations-related data elements. Spatial and temporal extents data for planning, design, operations, and management of transportation systems. Summarizing, analyzing, modeling, and interpreting data. Use of information technologies for highways, transit, and aviation systems.

C E 557: Transportation Systems Analysis

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: C E 355, 3 credits in statistics or probability

Travel studies and analysis of data. Transportation systems forecasts and analyses. Statewide, regional, and local transportation system planning. Network level systems planning and operations. Optimization of systems.

C E 558: Transportation Systems Development and Management

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: C E 355

Study of designated problems in traffic engineering, transportation planning, and development. Forecasting and evaluation of social, economic, and environmental impacts of proposed solutions; considerations of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

C E 559: Transportation Infrastructure/Asset Management

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: C E 355

Engineering management techniques for maintaining and managing infrastructure assets. Systematic approach to management through value engineering, engineering economics, and life cycle cost analysis. Selection and scheduling of maintenance activities. Analysis of network-wide resource needs. Project level analysis.

C E 560: Fundamentals of Soil Mechanics

(3-0) Cr. 3.

Prereq: C E 360

Nature of soil deposits, seepage, settlement and secondary compression, consolidation theories and analysis, failure theories, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, liquefaction of soil, pore pressure parameters, selection of soil parameters.

C E 561: Applied Foundation Engineering

(3-0) Cr. 3.

Prereq: C E 460

Analysis and design of shallow and deep foundations, lateral earth pressure theories and retaining structures, field investigations, in-situ testing, and foundations on problematic soils. Foundation engineering reports.

C E 562: Site Evaluations for Civil Engineering Projects

(2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: C E 360

Identification and mapping of engineering soils from aerial photos, maps, and soil surveys. Planning subsurface investigations, geomaterials prospecting, geotechnical hazards, geomorphology, in situ testing and sampling, geophysical site characterization, instrumentation and monitoring, interpretation of engineering parameter values for design.

C E 563: Experimental Methods in Geo-Engineering

(2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: C E 360

Principles of geo-engineering laboratory testing including the conduct, analysis, and interpretation of permeability, consolidation, triaxial, direct and ring shear, and direct simple shear tests. Issues regarding laboratory testing versus field testing and acquisition, transport, storage, and preparation of samples for geotechnical testing. Field and laboratory geotechnical monitoring techniques, including the measurements of deformation, strain, total stress and pore water pressure.

C E 564: Application of Numerical Methods to Geotechnical Design

(3-0) Cr. 3.

Prereq: C E 560

Application of numerical methods to analysis and design of foundations, underground structures, and soil-structure interaction. Application of slope stability software. Layered soils, bearing capacity and settlement for complex geometries, wave equation for piles, and foundation vibrations.

C E 565: Fundamentals of Geomaterials Behavior

(2-3) Cr. 3. S.

Prereq: C E 382

Atoms and molecules, crystal chemistry, clay minerals, structure of solids, phase transformations and phase equilibria. Surfaces and interfacial phenomena, colloid chemistry, mechanical properties. Applications to soils and civil engineering materials. Overview of state-of-the-art instrumental techniques for analysis of the physicochemical properties of soils and civil engineering materials.

C E 567: Geomaterials Stabilization

(Dual-listed with C E 467). (2-2) Cr. 3. S.

Prereq: C E 360, C E 382 or C E 383

Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.

C E 568: Dynamics of Soils and Foundations

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: C E 360, E M 345

Dynamic soil properties and their measurement. Foundation dynamics and soil-structure interaction. Sources and characteristics of dynamic loads. Vibration of single- and multi-degree-of-freedom systems. Vibration of continuous systems; 1D, 2D, and 3D analyses, wave propagation. Liquefaction concepts and analysis methods. Introduction to geotechnical earthquake engineering.

C E 569: Ground Improvement

(3-0) Cr. 3.

Prereq: C E 360

Classification of ground improvement methods. Dynamic compaction, vibrocompaction, preloading using fill surcharge, vacuum or a combination of both and prefabricated vertical drains, vibro replacement or stone columns, dynamic replacement, sand compaction piles, geotextile confined columns, rigid inclusion, column supported embankment, microbial methods, particulate and chemical grouting, lime and cement columns, jet grouting, and deep cement mixing.

C E 570: Applied Hydraulic Design

(2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: C E 372

Flow characteristics in natural and constructed channels; principles of hydraulic design of culverts, bridge waterway openings, spillways, hydraulic gates and gated structures, pumping stations, and miscellaneous water control structures; pipe networks, mathematical modeling. Design project.

C E 571: Surface Water Hydrology

(Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: C E 372

Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination.

C E 572: Analysis and Modeling Aquatic Environments

(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: C E 372

Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

C E 573: Groundwater Hydrology

(Dual-listed with C E 473). (3-0) Cr. 3. F.

Prereq: C E 372

Principles of groundwater flow, hydraulics of wells, superposition, slug and pumping tests, streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Design project. Extra assignments required for graduate students.

C E 576: Environmental Flows

(3-0) Cr. 3.

Prereq: E M 378 or equivalent

Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

C E 581: Geotechnical and Materials Engineering Seminar

Cr. R. Repeatable.

Prereq: Graduate classification

(1-0) Students and outside/invited speakers give weekly presentations about the ongoing research work and Geotechnical and Materials Engineering issues. Offered on a satisfactory-fail basis only.

C E 583: Pavement Analysis and Design

(Dual-listed with C E 483). (3-0) Cr. 3. S.

Prereq: C E 360 and C E 382

Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 584: Advanced Design of Concretes

(Dual-listed with C E 484). (2-3) Cr. 3.

Prereq: C E 382

Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, lightweight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. A term project is required for graduate level only.

C E 586: Advanced Asphalt Materials

(2-3) Cr. 3.

Prereq: C E 382

Advanced asphalt concrete (SUPERPAVE) mix designs. Aggregates. Admixtures. Production and construction, quality control and inspection. Nondestructive testing. Pavement thickness design. Materials engineering reports.

C E 587: Advanced Portland Cement Concretes

(2-3) Cr. 3.

Prereq: C E 382 or C E 383

Hydraulic cements, aggregates, admixtures, and concrete mix design; cement hydration and microstructure development; fresh, early-age, and mechanical properties of concrete; concrete distress examination, damage mechanism, and prevention.

C E 588: Sustainable Civil Infrastructure Systems

(Dual-listed with C E 488). (3-0) Cr. 3. F.

Prereq: Junior or higher classification in engineering or science

Sustainable planning, life cycle analysis, appropriate engineering design, investment levels and overall rating of civil engineering infrastructure systems, including highway, bridge, airport, rail, dam, power and port facilities. Complementary assessment of future civil infrastructure sustainability impacts and challenges in relation to autonomous and electric vehicle development. Overview regarding US and global availability and supply of critical infrastructure commodities (e.g., cement, stone, metals, phosphorus, uranium, etc.). Directed course readings and multiple project/design reports.

C E 589: Pavement Preservation and Rehabilitation

(Dual-listed with C E 489). Cr. 3. F.S.

Prereq: C E 382

Overview of pavement preservation and pavement rehabilitation techniques. Overview and selection of materials used in pavement preservation and rehabilitation strategies. Evaluating suitability of pavement preservation and pavement rehabilitation strategies based on existing structure, pavement distresses and non-condition factors. Use of recycled pavement materials in pavement reconstruction techniques.

C E 590: Special Topics

Cr. 1-5. Repeatable. F.S.SS.

Pre-enrollment contract required.

C E 591: Seminar in Environmental Engineering

Cr. R. Repeatable. F.S.

Prereq: Graduate classification

(1-0) Contemporary environmental engineering issues. Outside speakers. Review of ongoing research in environmental engineering. Offered on a satisfactory-fail basis only.

C E 594: Special Topics in Construction Engineering and Management

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics:

C E 594A: Special Topics Construction Engineering and Mgt.: Planning and Scheduling

Cr. 3. F.

Prereq: C E 306 or graduate standing

Studies in planning and scheduling including scheduling and estimating. Credit may not be applied for graduation for Construction Engineering undergraduate students.

C E 594B: Special Topics Construction Engineering and Mgt.: Computer Applications for Planning and Scheduling

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in computer applications for planning and scheduling.

C E 594C: Special Topics Construction Engineering and Mgt.: Cost Estimating

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in cost estimating.

C E 594D: Special Topics Construction Engineering and Mgt.: Computer Applications for Cost Estimating

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in computer applications for cost estimating.

C E 594E: Special Topics Construction Engineering and Mgt.: Project Controls

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in project controls.

C E 594F: Special Topics Construction Engineering and Mgt.: Computer Applications for Project Controls

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in computer applications for project controls.

C E 594G: Special Topics Construction Engr and Mgt: Integration of Planning, Scheduling and Project Controls

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in integration of planning, scheduling and project controls.

C E 594J: Special Topics Construction Engineering and Mgt.: Trenchless Technologies

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in trenchless technologies.

C E 594K: Special Topics Construction Engineering and Mgt.: Electrical and Mechanical Construction

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in electrical and mechanical construction.

C E 594L: Spl Topics Construction Engr and Mgt.: Adv Building Construction Topics - LEED for New Construction

Cr. 3. SS.

Prereq: CON E 352 or C E 306 or graduate standing or permission of instructor

Studies in advanced building construction topics including LEED.

C E 594M: Special Topics Construction Engineering and Mgt.: Design Build Construction

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in design build construction.

C E 594N: Special Topics Construction Engineering and Mgt.: Industrial Construction

Cr. 3.

Prereq: Graduate standing or permission of instructor

Studies in industrial construction.

C E 594O: Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction

Cr. 3.

Prereq: CON E 322 or C E 306 or graduate standing

Studies in highway and heavy construction.

C E 594P: Special Topics Construction Engineering and Mgt.: Advanced Building Energy Systems and Technologies

Cr. 3. F.

Prereq: CON E 352 or graduate standing or permission of instructor

Studies in advanced building technologies including building energy modeling, building energy performance and efficiency assessments, and demand side management for smart grid applications.

C E 594Q: Special Topics Construction Engineering and Mgt.: Construction Quality Control

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in construction quality control.

C E 594R: Special Topics Construction Engineering and Mgt.: Risk Management

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in risk management.

C E 594S: Special Topics Construction Engineering and Mgt.: Building Information Modeling

Cr. 1-3. Repeatable.

Prereq: Permission of instructor

Studies in building information modeling.

C E 595: Research Methods in Construction Engineering and Management

(1-0) Cr. 1.

Prereq: Graduate standing or permission of instructor

Assigned readings and reports on research methods to solve construction engineering and management problems such as alternative project delivery methods, asset management, data mining, construction procurement, robotics, project controls, automation, construction visualization, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

C E 595A: Research Methods Seminar in Construction Engineering and Management: Qualitative Methods

(1-0) Cr. 1.

Prereq: Graduate standing or permission of instructor

Assigned readings and reports on qualitative research methods to assess and solve construction engineering and management problems.

C E 595B: Research Methods Seminar in Construction Engineering and Management: Quantitative Methods

(1-0) Cr. 1.

Prereq: Graduate standing or permission of instructor

Assigned readings and reports on quantitative research methods to assess and solve construction engineering and management problems.

C E 595C: Research Methods Seminar in Construction Engineering and Management: Technical Reporting

(1-0) Cr. 1.

Prereq: Graduate standing or permission of instructor

Assigned readings and reports on research methods for planning and preparation of technical reports with construction engineering and management projects.

C E 596: Special Topics in Transportation Engineering

Cr. arr. Repeatable.

Prereq: C E 355

C E 596B: Special Topics in Transportation Engineering: Geographic Information Systems in Transportation

Cr. arr. Repeatable.

*Prereq: C E 355***C E 596C: Special Topics in Transportation Engineering: Hazardous Materials Transportation**

Cr. arr. Repeatable.

*Prereq: C E 355***C E 596D: Special Topics in Transportation Engineering: Transportation and Public Works**

Cr. arr. Repeatable.

*Prereq: C E 355***C E 596E: Special Topics in Transportation Engineering: Sustainable Transportation**

Cr. arr. Repeatable.

*Prereq: C E 355***C E 596F: Special Topics in Transportation Engineering: Freight Transportation**

Cr. arr. Repeatable.

*Prereq: C E 355***C E 599: Creative Component**

Cr. 1-3. Repeatable.

Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis.

Courses for graduate students:**C E 622: Advanced Topics in Environmental Engineering**

(2-0) Cr. 2. Repeatable.

Prereq: Permission of environmental engineering graduate faculty

Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:.

C E 622A: Advanced Topics in Environmental Engineering: Water Pollution Control

(2-0) Cr. 2. Repeatable.

Prereq: Permission of environmental engineering graduate faculty

Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:.

C E 622B: Advanced Topics in Environmental Engineering: Water Treatment

(2-0) Cr. 2. Repeatable.

Prereq: Permission of environmental engineering graduate faculty

Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:.

C E 622C: Advanced Topics in Environmental Engineering: Solid and Hazardous Waste

(2-0) Cr. 2. Repeatable.

Prereq: Permission of environmental engineering graduate faculty

Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:.

C E 622D: Advanced Topics in Environmental Engineering: Water Resources

(2-0) Cr. 2. Repeatable.

Prereq: Permission of environmental engineering graduate faculty

Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:.

C E 622E: Advanced Topics in Environmental Engineering: Instrumental Methods for Environmental Analyses

(2-0) Cr. 2. Repeatable.

Prereq: Permission of environmental engineering graduate faculty

Advanced concepts in environmental engineering.

C E 650: Advanced Topics in Transportation Engineering

(3-0) Cr. 3. Repeatable.

*Prereq: Permission of Transportation Engineering graduate faculty***C E 650A: Advanced Topics in Transportation Engineering: Highway Design**

(3-0) Cr. 3. Repeatable.

*Prereq: Permission of Transportation Engineering graduate faculty***C E 650B: Advanced Topics in Transportation Engineering: Traffic Operations**

(3-0) Cr. 3. Repeatable.

*Prereq: Permission of Transportation Engineering graduate faculty***C E 650C: Advanced Topics in Transportation Engineering: Data Analysis**

(3-0) Cr. 3. Repeatable.

Prereq: Permission of Transportation Engineering graduate faculty

Topics in transportation engineering related to data analysis.

C E 690: Advanced Topics

Cr. 1-3. Repeatable. F.S.SS.

Pre-enrollment contract required.

C E 697: Engineering Internship

Cr. R. Repeatable.

Prereq: Permission of coop advisor, graduate classification

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

C E 699: Research

Cr. 1-30. Repeatable.

Prereq: Pre-enrollment contract required

Advanced topic for thesis/dissertation.

Classical Studies (CL ST)

Any experimental courses offered by CL ST can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

CL ST 273: Greek and Roman Mythology

(3-0) Cr. 3.

Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories.

Meets International Perspectives Requirement.

CL ST 273H: Greek and Roman Mythology: Honors

(4-0) Cr. 4.

Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories.

Meets International Perspectives Requirement.

CL ST 275: The Ancient City

(3-0) Cr. 3.

Examination of ancient urban life, including historical context, physical space, material culture, religion, literature, and art; examination of civic identity (the "polis"). Contrast between the concepts of urban and rural. Examples drawn from specific ancient cities; some attention to modern methods of recovering the conditions of ancient urban life and the fundamental concept of the city in European history.

Meets International Perspectives Requirement.

CL ST 310: Ancient Philosophy

(Cross-listed with PHIL). (3-0) Cr. 3. F.

Prereq: PHIL 201

Survey of ancient Greek philosophy, focusing on the pre-Socratics, Plato, and Aristotle. Questions concerning being, knowledge, language, and the good life are treated in depth.

CL ST 350: Rhetorical Traditions

(Cross-listed with ENGL, SP CM). (3-0) Cr. 3. S.

Prereq: ENGL 250

Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

CL ST 353: World Literature: Western Foundations through Renaissance

(Cross-listed with ENGL). (3-0) Cr. 3. F.S.

Prereq: ENGL 250

Representative works from the drama, epics, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Meets International Perspectives Requirement.

CL ST 367: Christianity in the Roman Empire

(Cross-listed with RELIG). (3-0) Cr. 3.

An historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman culture on the thought and practice of Christians and the interaction of early Christians with their contemporaries.

CL ST 368: Religions of Ancient Greece and Rome

(Cross-listed with RELIG). Cr. 3.

Nature, origins and development of religious beliefs and practices in ancient Greece and Rome from earliest times up to the rise of Christianity. Roles of divinities and rituals in lives of individuals and families and the governing of city-states and empires. Emphasis on historical contexts of the Graeco-Roman world and influences of neighboring cultures in Africa and Asia. None.

Meets International Perspectives Requirement.

CL ST 369: Ancient Egypt

Cr. 3. Alt. S., offered irregularly.

Archaeology and culture of Ancient Egypt from prehistory to Late Antiquity. Exploration of literature, religion, social history, government, and architecture. Discussion of major archaeological sites and methods; examination of interaction with other ancient near eastern and Mediterranean civilizations. Meets International Perspectives Requirements.

CL ST 372: Greek and Roman Tragedy and Comedy

(3-0) Cr. 3.

Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250

Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media.

Meets International Perspectives Requirement.

CL ST 372H: Greek and Roman Tragedy and Comedy: Honors

(4-0) Cr. 4.

Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250

Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media.

Meets International Perspectives Requirement.

CL ST 373: Heroes of Greece, Rome, and Today

(3-0) Cr. 3.

Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250.

Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil.

Meets International Perspectives Requirement.

CL ST 373H: Heroes of Greece, Rome, and Today: Honors

(4-0) Cr. 4.

Prereq: CL ST 273 or CL ST 275 or one course in Latin or Greek or ENGL 250.

Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil.

Meets International Perspectives Requirement.

CL ST 374: Sex, Gender, and Culture in the Ancient Mediterranean World

(Cross-listed with HIST, WGS). (3-0) Cr. 3.

Prereq: Any one course in Cl St, W S, Latin, or Greek

Chronological and topical survey of the status of women and men, focusing on sex and gender issues in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on ancient Greece, Rome, and Egypt.

Meets International Perspectives Requirement.

CL ST 376: Classical Archaeology

(Cross-listed with ANTHR). (3-0) Cr. 3.

Chronological survey of the material culture of the ancient Graeco-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

CL ST 376A: Classical Archeology: Bronze Age and Early Iron Age Greece

(Cross-listed with ANTHR). (3-0) Cr. 3.

Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece. (ca 3000-700 BCE). Chronological survey of the material culture of the ancient Greece-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture.

Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

CL ST 376B: Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)

(Cross-listed with ANTHR). (3-0) Cr. 3.

Chronological survey of the material culture of ancient Greece from ca. 700-30 BCE and the role of archaeological context in understanding the varied aspects of Greek culture during the Archaic, Classical, and Hellenistic periods. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

CL ST 376C: Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)

(Cross-listed with ANTHR). (3-0) Cr. 3.

Chronological survey of the material culture of the ancient Roman world and the role of archaeological context in understanding the varied aspects of ancient Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

Meets International Perspectives Requirement.

CL ST 383: Greek and Roman Art

(Cross-listed with ART H). (3-0) Cr. 3.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

CL ST 383H: Greek and Roman Art: Honors

(Cross-listed with ART H). (3-0) Cr. 3-4.

Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

CL ST 384: Roman Italy: An Introduction

(Cross-listed with HIST). Cr. 2. Repeatable, maximum of 4 credits. S.

Prereq: Enrollment limited to students participating in CL ST 385/HIST 385.

Instructor permission required.

Introduction to the topography, history, archaeology, monuments, and art of Rome from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy, preparatory to study abroad in Rome.

Meets International Perspectives Requirement.

CL ST 385: Study Abroad: Roman Italy: Building the Empire

(Cross-listed with HIST). Cr. 3. Repeatable, maximum of 6 credits. SS.

Prereq: CL ST 384/HIST 384 and instructor's permission.

Supervised on-site instruction in the history, archaeology, monuments, and art of Rome and environs from the 8th century BCE to the 5th century CE; attention given to the culture of modern Italy.

Meets International Perspectives Requirement.

CL ST 394: The Archaeology of Greece: An Introduction

(2-0) Cr. 2. Repeatable, maximum of 4 credits. S.

Introduction to the topography, history, archaeology, monuments and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece, preparatory to study abroad in Greece (Cl St 395).

Meets International Perspectives Requirement.

CL ST 395: Study Abroad: The Archaeology of Greece

Cr. 2-6. Repeatable, maximum of 9 credits. SS.

Prereq: CL ST 394

Supervised on-site instruction in the archaeology, monuments, and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece.

Meets International Perspectives Requirement.

CL ST 402: Greek Civilization.

(Cross-listed with HIST). (3-0) Cr. 3.

Prereq: Sophomore classification

Ancient Greece from the Bronze Age to the Hellenistic period; evolution of the Greek polis and its cultural contributions with a particular emphasis on the writings of Herodotus and Thucydides.

CL ST 403: Roman Civilization.

(Cross-listed with HIST). (3-0) Cr. 3.

Prereq: Sophomore classification

Ancient Rome from the Regal Period to the Fall of the Western Empire; evolution of Roman institutions and Rome's cultural contributions studied through original sources.

CL ST 430: Foundations of Western Political Thought

(Dual-listed with CL ST 530). (Cross-listed with POL S). (3-0) Cr. 3.

Prereq: 6 credits in political science, philosophy, or European history

Study of original texts in political thought ranging from the classical period to the renaissance. Topics such as justice, freedom, virtue, the allocation of political power, the meaning of democracy, human nature, and natural law.

CL ST 480: Seminar in Classical Studies

(3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: 30 credits in Classical Studies or related courses, permission of Program Chair

Advanced study of a selected topic in Classical Studies. Research paper or project selected by the student.

CL ST 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: 7 credits in classical studies at the 200 level or higher; permission of the Program Chair

Designed to meet the needs of students who wish to study specific topics in classical civilization in areas where courses are not offered, or to pursue such study beyond the limits of existing courses.

Courses primarily for graduate students, open to qualified undergraduates:**CL ST 512: Proseminar in European History**

(3-0) Cr. 3.

Prereq: Permission of instructor.

Readings in European history.

CL ST 512A: Readings Seminar in European History: Ancient

(Cross-listed with HIST). (3-0) Cr. 3. Repeatable.

Prereq: Permission of instructor

Readings in European history.

CL ST 530: Foundations of Western Political Thought

(Dual-listed with CL ST 430). (Cross-listed with POL S). (3-0) Cr. 3.

Prereq: 6 credits in political science, philosophy, or European history

Study of original texts in political thought ranging from the classical period to the renaissance. Topics such as justice, freedom, virtue, the allocation of political power, the meaning of democracy, human nature, and natural law.

CL ST 594: Seminar in European History

(3-0) Cr. 3. Repeatable.

Prereq: Permission of instructor

Topics vary each time offered.

CL ST 594A: Research Seminar in European History: Ancient

(Cross-listed with HIST). (3-0) Cr. 3. Repeatable.

Prereq: Permission of instructor

Topics vary each time offered.

Communication Disorders (CMDIS)

Any experimental courses offered by CMDIS can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

CMDIS 275: Introduction to Communication Disorders

(Cross-listed with LING). (3-0) Cr. 3.

Survey of nature, causes, and types of major communication disorders including phonological, adult and child language, voice, cleft palate, fluency, and hearing disorders.

CMDIS 286: Communicating with the Deaf

(Cross-listed with LING). (3-0) Cr. 3.

Learn to communicate with the deaf using Signed English and Signed Pidgin English. Other topics covered include types, causes, and consequences of hearing loss, hearing technology (hearing aids, assistive listening devices, and cochlear implants), education of hearing-impaired children, Deaf culture, and the history of manual communication.

Meets U.S. Diversity Requirement

CMDIS 371: Phonetics and Phonology

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: ENGL 219

Terminology, theory, research, and applications of the science of the sounds of spoken language. Emphasis on American English and International Phonetic Alphabet.

CMDIS 471: Language and Reading Development in Children

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: CMDIS 275 or PSYCH 230 or ENGL 219 or LING 219

Development of spoken language, reading and writing covering semantics, syntax, morphology, phonology, and pragmatics.

CMDIS 480: Topics in Communication Disorders

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: CMDIS/LING 275, CMDIS/LING 371, and BIOL 255; permission of instructor.

Guided examination of topics in preparation for graduate work in Speech-Language Pathology or Audiology. Primary course delivery by WWW.

CMDIS 480A: Topics in Communication Disorders: Anatomy and Physiology of Speech and Hearing

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: CMDIS/LING 275, CMDIS/LING 371, and BIOL 255; permission of instructor.

Structures and functions of respiratory, phonatory, articulatory, auditory, and nervous systems as they relate to speaking and listening.

CMDIS 480B: Topics in Communication Disorders: Articulation and Phonological Disorders

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: CMDIS/LING 275, CMDIS/LING 371, and BIOL 255; permission of instructor.

Children's acquisition of English speech sounds. Assessment and management of speech sound disorders in children and adults.

CMDIS 480C: Topics in Communication Disorders: Evaluation and diagnosis of communication disorders

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: CMDIS/LING 275, CMDIS/LING 371, and BIOL 255; permission of instructor.

Assessment and diagnosis of speech, language, and swallowing disorders. Preparation of clinical reports based on assessment data.

CMDIS 492: Fieldwork in Communication Disorders

(Cross-listed with LING). Cr. 1-2. Repeatable, maximum of 6 credits.

F.S.SS.

Prereq: CMDIS/LING 371;471; completion or concurrent enrollment in CMDIS/LING 480A or 480B or 480C

Guided observation of clinical evaluation and treatment in Communication Disorders on campus and in the community. Assessed service learning component.

Communication Studies (COMST)

Any experimental courses offered by COMST can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

COMST 101: Introduction to Communication Studies

(3-0) Cr. 3.

An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

COMST 101L: Introduction to Communication Studies: Laboratory
(0-2) Cr. 1.

Prereq: Concurrent enrollment in COMST 101.

Laboratory component of COMST 101. Skill building, experiential activities, and in-depth discussions relevant to the study of communication.

COMST 104: Orientation to Communication Studies

(1-0) Cr. 1.

Prereq: Available only for Communication Studies majors

Orientation to Communication Studies discipline, program requirements and career opportunities. Required of communication studies majors. Offered on a satisfactory-fail basis only.

COMST 203: Introduction to Communication Research Methods

(3-0) Cr. 3.

Prereq: COMST 101

An introduction to analyzing and conducting communication research. Provides an overview of quantitative and qualitative approaches to communication research.

COMST 210: Communication and U.S. Diversity

(3-0) Cr. 3. F.S.SS.

Introduction to the role of diversity in communication. Developing competent communication with diverse social groups within interpersonal and organizational contexts in the United States. Topics may include structured reflection of one's role in diverse communication experiences, cultural variations in communication mores, impacts of racial/ethnic/gender identities on communication, workplace policies regarding cultural diversity, the intersection of communication and cultural privilege, communication practices that can reduce prejudice/discrimination, and communication characteristics of advocates for diversity.

Meets U.S. Diversity Requirement

COMST 211: Interpersonal Communication

(3-0) Cr. 3.

Application of major principles related to interpersonal communication theories, concepts, and research. Emphasis on using interpersonal communication skills effectively.

COMST 214: Professional Communication

(3-0) Cr. 3.

Communication theory and skill development in organizational settings. Emphasis on interpersonal skill development, team and meeting facilitation, informational interviewing, individual and team presentations, and self-assessment.

COMST 218: Conflict Management

(3-0) Cr. 3.

Exploration of communication theories, principles and methods associated with effective conflict management.

COMST 301: Human Communication Theory

(3-0) Cr. 3.

Prereq: COMST 101

Examination of the major theories related to human communication; with particular emphasis on theories underlying interpersonal, small group, organizational, and intercultural communication.

COMST 310: Intercultural Communication

(3-0) Cr. 3.

Prereq: COMST 102, COMST 203, COMST 301

Examines the theories, principles and research on intercultural communication to enhance cultural sensitivity and to recognize, accept, and adapt to cultural diversity. Interactive assignments. Meets International Perspectives Requirement.

COMST 311: Relational Communication

(3-0) Cr. 3.

Prereq: COMST 101, 102

Contemporary relational communication theories, concepts, and research. Examines issues central to communication and its application in interpersonal relationships.

COMST 313: Leadership Communication Theories

(3-0) Cr. 3. F.S.

Prereq: COMST 102, COMST 203, COMST 301

Investigation of theories, research and principles of leadership communication. Exploration of the contexts in which leadership and communication occurs, with emphasis on the connection between communication and leadership and the dyadic linkage of leader and follower.

COMST 314: Organizational Communication

(3-0) Cr. 3.

Prereq: COMST 102, COMST 203, COMST 301

Theory and research in organizational communication. Provides strategies for assessing and improving individual and organizational communication effectiveness. Addresses issues such as technology, diversity, work-life negotiation, emotional labor, conflict, socialization, and socially responsible organizations. Explores how organizational meaning is created and sustained through human communication.

COMST 317: Small Group Communication

(3-0) Cr. 3.

Prereq: COMST 102, COMST 203, COMST 301

Theory and research in small group communication; application to group decision-making and leadership. Includes communication analyses of groups and teams.

COMST 319: Communication Training and Development

(3-0) Cr. 3.

Prereq: COMST 102, COMST 203, COMST 301

Theories and approaches to communication training and development; includes adult learning theory. Emphasis on the design, presentation and assessment of communication skills in organizational contexts.

COMST 325: Nonverbal Communication

(3-0) Cr. 3.

Prereq: COMST 102, COMST 203, COMST 301

Approaches to studying nonverbal communication. Foci include topics such as emotion, gestures, gaze, use of space, and parsing intention in social interaction.

COMST 330: Computer Mediated Communication

(3-0) Cr. 3.

Prereq: COMST 102, COMST 203, COMST 301

Theories and approaches related to mediated communication in interpersonal and organizational settings. Focus on how new technology impacts human interaction and relationships.

COMST 384: Applied Organizational Communication

(3-0) Cr. 3.

Prereq: COMST 101, COMST 102 or equivalent course.

Theory and research of micro-level organizational communication, including interpersonal and small group interactions taking place in a professional setting. Topics include interpersonal dynamics in such areas as conflict, generational communication, negotiation, superior/subordinate communication, external communication, and virtual communication. Not available for major credit.

COMST 404: Research Seminar

(Dual-listed with COMST 504). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: COMST 301 plus 3 additional communication studies classes from the following list: COMST 310, COMST 311, COMST 313, COMST 314, COMST 317, COMST 319, COMST 325, or COMST 330.

Capstone communication studies course. Students develop an original research study linked to the study of communication. Data are collected and analyzed. Results are presented in a final research paper and a presentation.

COMST 450: Special Topics in Communication Studies

(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.

Research and theory related to special topics and issues in communication studies.

COMST 490: Independent Study

Cr. 1-3. Repeatable, maximum of 6 credits.

Prereq: 9 credits in communication studies and junior classification

Application must be submitted for approval the semester prior to the independent study.

COMST 491: Research Practicum

Cr. arr. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: COMST 203, COMST 301 plus permission of instructor.

Providing research assistance on projects conducted by Communication Studies faculty.

COMST 497: Professional Internship

Cr. 1-3. Repeatable, maximum of 6 credits.

Prereq: 12 hours in Communication Studies including COMST 203, COMST 301, and one other 300-level COMST class. Junior Classification. Application required.

100 hours of on-site professional work per credit hour plus completion of the academic requirement set by the internship committee. Application should be submitted in the term prior to the term in which the internship will be served. Internship cannot be used to meet degree requirement in Communication Studies.

Courses primarily for graduate students, open to qualified undergraduates:**COMST 504: Research Seminar**

(Dual-listed with COMST 404). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: COMST 301 plus 3 additional communication studies classes from the following list: COMST 310, COMST 311, COMST 313, COMST 314, COMST 317, COMST 319, COMST 325, or COMST 330.

Capstone communication studies course. Students develop an original research study linked to the study of communication. Data are collected and analyzed. Results are presented in a final research paper and a presentation.

COMST 590: Special Topics

Cr. 1-4. Repeatable.

Application must be submitted for approval the semester prior to the independent study.

Community Development (C DEV)

Any experimental courses offered by C DEV can be found at:

registrar.iastate.edu/faculty-staff/courses/explistsings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Courses primarily for graduate students, open to qualified undergraduates:

C DEV 502: Community and Natural Resource Management

(3-0) Cr. 3.

Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices.

Enhancement of ability of community development professionals to work with communities to plan, develop and monitor conversation and development of natural resources with multiple functions.

C DEV 503: Community Development I: Principles and Strategies of Community Change

(3-0) Cr. 3.

Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to conceptual models from diverse disciplines. Exploration of professional practice principles, and student construction of their personal framework for practicing community development.

C DEV 504: Community Analysis: Introduction to Methods

(3-0) Cr. 3.

Introduction to research methods relevant to community development. Formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

C DEV 505: Community Development II: Organizing for Community Change

(3-0) Cr. 3.

Examines role of civil society in community planning efforts. Comparative approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

C DEV 506: Community and Regional Economic Analysis I

(3-0) Cr. 3.

Introduction to concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, and analytical tools. Strategies for local economic development will also be explored.

C DEV 507: Introduction to Native Communities

(3-0) Cr. 3.

A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities. Basic understanding within the context of community development of the diversity of the tribal structures and cultures and the unique history and jurisdictional considerations of these nations. Working with tribes, Federal and Indian relations, and governance and cultural issues.

C DEV 508: Ecological Economics

(3-0) Cr. 3.

Approaches economy and community by looking at the inherent interdependence, jointness, and potential complementarity between ecology and economy (utility) of a place.

C DEV 509: Building Native Community and Economic Capacity

(3-0) Cr. 3.

Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

C DEV 510: Indian Country Agriculture and Natural Resources

(3-0) Cr. 3.

Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

C DEV 512: Sustainable Communities

(3-0) Cr. 3.

Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.

C DEV 513: Economic Development Strategies and Programs

(3-0) Cr. 3.

Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.

C DEV 520: Community Development Orientation

(2-0) Cr. 2.

Introduction to the Community Development program. Focus on on-line delivery methods, graduate level research and writing, technology skills.

C DEV 521: Housing and Development

Cr. 3. S.

Prereq: None.

Review and evaluation of historical and current housing issues, production, and financial systems, including consideration of racial, ethnic, income, and gender issues as they relate to the role of housing developments and programs in community development.

C DEV 522: Community Leadership and Capacity Building

(3-0) Cr. 3.

Defining leadership and applying it to the workplace. Understanding of potential link between leadership and community capacity. Identifying strategies for leadership development in communities.

C DEV 523: Grantwriting for Community Development Professionals

(3-0) Cr. 3.

Basic Grant Development and Management will introduce students to the grant-getting process and provide an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results.

C DEV 524: Non-Profit Management in Community Development

(3-0) Cr. 3.

Understanding of how non-profit organizations are run in order that they may participate more fully in community development efforts. Learning skills necessary to assist organizations to manage community development projects and programs, such as, budgeting, planning, personnel, facilities, volunteer management, and fundraising.

C DEV 525: Role of Tribal Colleges in Economic Development

(3-0) Cr. 3.

Focus on role of tribally-chartered colleges and universities in economic development within Native communities. Social capital analytic framework to examine and evaluate tribal college model of economic development.

C DEV 526: Immigration and Community Inclusion

(3-0) Cr. 3.

Mechanisms for community inclusion and exclusion in relation to immigration will be examined. Aspects of ethnicity, religion, occupation and transnationalism are addressed in terms of community mechanism for incorporating immigrants as community assets.

C DEV 527: Public and Non-Profit Budgeting

Cr. 3. SS.

Introduction to the fundamental theories and practices of budgeting in the public and non-profit sectors. Topics covered include overview of budgeting and budget reform, taxation, expenditures, budget preparation and adoption, budget implementation, and performance budgeting.

C DEV 528: Evaluation of Organizations and Programs

(3-0) Cr. 3.

Prereq: C DEV 504 with grade of C or better

Introduction to the philosophy, techniques, and methodologies of organizational and program evaluation. Overview of program evaluation and theory, techniques to evaluate program processes and performance, evaluation designs, assessing program efficiency, models to diagnose organizations, and methods to assess organizational performance.

C DEV 530: Toward Ethical Engagement

(3-0) Cr. 3.

Understanding what ethics are and identify ethical dimensions of a problem. Ability to employ ethical analysis and engagement strategies in public problem-solving.

C DEV 532: Community and Regional Economic Analysis II

(3-0) Cr. 3.

Prereq: C DEV 506

Substantive grounding in the theories and practice of measuring community economic dynamics; build solid foundation skills for applied community economic analysis.

C DEV 542: The Policy and Politics of Coastal Areas

(Cross-listed with POL S). (3-0) Cr. 3.

Exploration of political implications of coastal policy. Issues include: "Carrying capacity," zoning, regulation of human development activities, tradeoffs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

C DEV 590: Special Topics in Community Development

Cr. 1-3. Repeatable, maximum of 4 times. F.S.SS.

Special topics in Community Development. Independent Study, must get instructor approval.

C DEV 599: Creative Component

Cr. arr.

Students work with major professor to conduct research and carry out work on their creative component. Instructor permission required.

Courses for graduate students:**C DEV 699: Thesis Research**

Cr. 1-6. F.S.SS.

Thesis Research.

Community and Regional Planning (C R P)

Any experimental courses offered by C R P can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**C R P 201: The North American Metropolis**

(3-0) Cr. 3. F.S.

Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today.

Meets U.S. Diversity Requirement

C R P 211: Digital Design Methods for Landscape Architecture

(Cross-listed with L A). (3-0) Cr. 3. S.

Foundational knowledge and basic skills in 2D, 3D, and 4D computer applications used for design development and communication, with emphasis on 3D modeling and workflow interoperability.

C R P 251: Fundamentals of Geographic Information Systems

Cr. 3. F.

Fundamentals of the concepts, models, functions and operations of Geographic Information Systems (GIS). Principals of spatial problems, spatial questions and hypotheses and their solutions based on spatial data, GIS tools and techniques. Integration of concepts and applications through lectures and facilitated labs. Applications from a variety of areas including design; physical, social, and human science; engineering; agriculture; business and medicine, landscape architecture, architecture, urban planning, geology, forestry, biology, and ecology.

C R P 291: World Cities and Globalization

(3-0) Cr. 3. F.S.

World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.

Meets International Perspectives Requirement.

C R P 293: Environmental Planning

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.

Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

C R P 301: Urban Analytical Methods

(3-2) Cr. 4. S.

Prereq: STAT 101

An introduction to the methods and analytical techniques used by planners to study community change. Course includes identification of key sources of planning information and data. Students learn to use quantitative methods for analysis of population, land use, economic and transportation data. Students learn to apply basic analytic methods to community problems and learn the art of effective written, graphic, and oral presentation of data.

C R P 320: Urban Geography

(3-0) Cr. 3. F.S.

An introduction to urban geography. Study of urban centers, including people and infrastructure. Investigation of the origin and evolution of urban areas and the processes that shape urban change. Topics include urban form, and the social, economic, political, cultural, and institutional factors that shape cities.

C R P 330: Practicum

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Major in community and regional planning

Structured work experience under close supervision of a professional planner. Practical planning experience; relationships between theory and practice, professional responsibilities, and the scope of various planning roles.

C R P 331: Professional Practice Seminar

(2-0) Cr. 2. F.

Prereq: CRP 301 and junior classification

Preparation for working as a planning professional; development of resume and portfolio; discussion of professional ethics and expectations of employers and clients; presentations from planning professionals, and discussion of the range of career choices within the planning profession.

C R P 351: Intermediate Geographic Information Systems

Cr. 3. F.S.

Prereq: CRP 251X

Intermediate GIS for design and non-design students to learn concepts of digital management and representation of spatial data, including spatial problems, data sources and structures, simple spatial operations and cartographic issues. Gain skill set to effectively display feature and tabular data, query features using logical expressions, edit spatial and attribute data, associate tables with joins and relates, produce maps, reports, and graphs.

C R P 376: Rural, Urban and Regional Economics

(Cross-listed with ECON). (3-0) Cr. 3.

Prereq: ECON 101

Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime.

C R P 383: Theory of the Planning Process

(3-0) Cr. 3. F.

Prereq: Junior classification

The nature of planning and its relation to social and economic planning; levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.

C R P 391: Field Travel

Cr. 1-2. Repeatable. F.S.

Prereq: CRP major and permission of instructor

Observation of professional practice and community or regional problems and issues. Offered on a satisfactory-fail basis only.

C R P 410: Professional Work Experience

Cr. R. F.S.SS.

Prereq: Permission of department chair

Approved professional work experience.

C R P 416: Urban Design and Practice

(Dual-listed with C R P 516). (3-6) Cr. 6. S.

Prereq: C R P 301

Principles of urban design and their application to residential and commercial development in studio projects.

C R P 417: Urban Revitalization

(Dual-listed with C R P 517). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Junior classification

Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 421: Financing Historic Preservation Projects

(3-0) Cr. 3. F.

Investigation of the financial tools and incentives used to promote the rehabilitation and redevelopment of historic buildings and neighborhoods in cities and towns. Study of broader economic and social impacts on communities. Examinations of completed preservation projects around the United States.

C R P 429: Planning in Developing Countries

(Dual-listed with C R P 529). (3-0) Cr. 3. F.S.

Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 432: Community Planning Studio

(1-6) Cr. 4-6. F.S.

Prereq: C R P 201, C R P 301, C R P 383, or permission of instructor.

Integration of planning methods and theory in dealing with a community planning problem. Analysis of problem and formulation of strategies for implementation. Preparation of a community planning report.

C R P 435: Planning in Small Towns

(Dual-listed with C R P 535). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: Junior classification

Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society.

C R P 436: Community Economic Development

(Dual-listed with C R P 536). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 437: Public Participation in Planning

(3-0) Cr. 3. S.

Rationale and need for public participation in community planning and development. Techniques used to garner participation, and the ability to integrate techniques into a broader participatory process. Techniques covered will include public hearings, public meetings, social action construct, advisory committees, scenario building, social media and asset mapping. Students will also work with a community to demonstrate skills learned. None

C R P 442: Site Development

(Dual-listed with C R P 542). (3-0) Cr. 3. S.

Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

C R P 445: Transportation Policy and Planning

(Dual-listed with C R P 545). (3-0) Cr. 3. F.

Prereq: Junior classification; CRP 545 prerequisite: Graduate classification

Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 449: Geodesign

(Dual-listed with C R P 549). (3-0) Cr. 3. S.

Prereq: CRP 251 or equivalent or permission of the instructor

Geodesign combines design creativity with scientific thinking based on spatial data. Special focus on sustainable development of future neighborhoods, communities, cities and/or countries. Students learn the geodesign process and implement a set of techniques and technologies that enable project conceptualization, data collection and visualization, spatial analysis, design creation, impact evaluation and stakeholder participation. Final project involves developing cases for analysis using ESRI ArcGIS Online and GeoPlanner software.

C R P 451: Introduction to Geographic Information Systems

(2-2) Cr. 3. F.S.SS.

Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 452: Geographic Data Management and Planning Analysis

(Dual-listed with C R P 552). (2-2) Cr. 3. F.S.

Prereq: C R P 351 or equivalent

Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 454: Fundamentals of Remote Sensing

(Dual-listed with C R P 554). (Cross-listed with L A). (2-2) Cr. 3. F.

Prereq: C R P 351 or equivalent or permission of the instructor

Introduction to remote sensing techniques needed for basic analysis of satellite images, including filtering and conflation techniques, stacking, pan sharpening, image rectification, image enhancement, unsupervised and supervised classification. Practical applications in a variety of topics to understand how to interpret images.

C R P 455: Smart Cities

(Dual-listed with C R P 555). Cr. 3. S.

Introduction to concepts of smart cities. Study of novel technologies for smart cities, including sustainable energy, innovative tools for citizens' engagement, improved safety, smart mobility, and happy living. Examples of national and international smart cities. Students may gain experience with ArcGIS Online and/or Pro or other emerging software.

C R P 456: GIS Programming and Automation

(Dual-listed with C R P 556). (Cross-listed with A B E). (3-0) Cr. 3. F.

Prereq: C R P 351 or C R P 551 or NREM 345 or NREM 546 or GEOL 552

Introduction to automated geoprocessing in Geographic Information Systems. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests.

C R P 457: GeoGames for Civic Engagement

(Dual-listed with C R P 557). (3-0) Cr. 3. S.

Explore, design, and implement participatory geospatial games; define GeoGames; learn about different types of GeoGames and their formal and dramatic elements; design GeoGames for civic engagement, community visioning, and community planning.

C R P 460: Social Justice and Planning

(Dual-listed with C R P 560). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Investigation of the topic of social justice as it relates to the challenge of planning more socially just urban societies, emphasizing the importance of social justice issues to planning in a globalized world. Includes a range of issues and case studies of local social justice initiatives, both US and global. Students will complete individual service learning projects as part of the course requirement.

C R P 471: Real Estate Development

(3-0) Cr. 3. S.

Introduction to real estate issues related to planning, design, and development. Cases exploring the property development process, including residential, office, retail, hotel, and mixed-use. Examines how location decisions are made and property values are created. Focuses on urban, suburban, and rural redevelopment opportunities.

C R P 475: Grant Writing

(Dual-listed with C R P 575). (1-0) Cr. 1. F.

A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 479: Public Finance and Planning

(Dual-listed with C R P 579). (3-0) Cr. 3. S.

Overview of public finance theory, particularly in how it relates to local governments and the work of planning and community development. Concepts include theories of taxation, challenges unique to local public finance, collective action, and a survey of the different revenue sources used to fund local government.

C R P 484: Sustainable Communities

(Dual-listed with C R P 584). (Cross-listed with ENV S). (3-0) Cr. 3. S.

Prereq: Junior classification

The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

C R P 490: Independent Study

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Written approval of instructor and department chair on required form
Investigation of an approved topic commensurate with student's interest and ability. Offered on a satisfactory-fail basis only.

C R P 490H: Independent Study: Honors

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Written approval of instructor and department chair on required form
Investigation of an approved topic commensurate with student's interest and ability. Offered on a satisfactory-fail basis only.

C R P 491: Environmental Law and Planning

(Dual-listed with C R P 591). (Cross-listed with ENV S, L A). (3-0) Cr. 3. S.

Prereq: 6 credits in natural sciences

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 492: Planning Law, Administration and Implementation

(3-0) Cr. 3. F.

Prereq: Junior classification

The basis in constitutional, common, and statutory law for the powers of plan implementation. Problems of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

C R P 494: Senior Seminar in Planning

Cr. 1-3. Repeatable, maximum of 2 times. F.S.

Prereq: Senior classification

An advanced forum for seniors that focuses upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding of current issues and their effects upon planning applications is expected.

Courses primarily for graduate students, open to qualified undergraduates:**C R P 510: Professional Work Experience**

Cr. R. F.S.SS.

Prereq: Permission of department chair

Approved professional work experience.

C R P 511: Documenting the Historic Built Environment

Cr. 3-4. F.

Prereq: Knowledge of GIS helpful but not required.

Principals and methods for researching, identifying, recording, and analyzing buildings, districts, and sites that are historically or architecturally significant. Classroom and fieldwork components will use real-world historic places as case studies.

C R P 516: Urban Design and Practice

(Dual-listed with C R P 416). (3-6) Cr. 6. S.

Prereq: C R P 301

Principles of urban design and their application to residential and commercial development in studio projects.

C R P 517: Urban Revitalization

(Dual-listed with C R P 417). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Junior classification

Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 521: Historic Preservation Planning: Theory and Practice

(3-0) Cr. 3. S.

Prereq: None

Introduction to the history, theory, and practice of historic preservation and cultural resource management. Cases exploring preservation in US and global contexts; politics of preservation; preservation technologies; and relationship of preservation to other community issues.

C R P 526: Real Estate Development

(3-0) Cr. 3.

Prereq: Enrollment in the MRED or instructor permission.

Overview of the real estate development process. Topics include the history of real estate development, roles of planning and market forces in real estate development, and financial management of real estate development. Projects involve analysis of market niches, market penetration rates, lease rates, synergism and tenant mix, and the go/no go decision applied to residential, commercial, and mixed-use development.

C R P 527: Sustainable Community Development

(3-0) Cr. 3.

Prereq: Enrollment in the MRED or instructor permission.

Introduces the central principles of sustainable community design and its implementation in the residential and commercial real estate development sectors. Topics include current practices and regulatory mandates, with a focus on the importance of private participation in the development of sustainable communities.

C R P 528: Financing Historic Preservation Projects and Revitalizing Communities

(3-0) Cr. 3.

Prereq: Enrollment in the MRED or instructor permission.

Investigation of the financial tools and incentives used to promote the rehabilitation and redevelopment of historic buildings and neighborhoods in cities and towns. Study of broader economic and social impacts on communities. Examinations of completed preservation projects around the United States.

C R P 529: Planning in Developing Countries

(Dual-listed with C R P 429). (3-0) Cr. 3. F.S.

Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 530: Practicum

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Graduate classification in Community and Regional Planning

Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in functioning specialties. Offered on a satisfactory-fail basis only.

C R P 532: Community Planning Studio

(3-6) Cr. 4-6. F.

Prereq: C R P 564 or equivalent

Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

C R P 535: Planning in Small Towns

(Dual-listed with C R P 435). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: Junior classification

Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society.

C R P 536: Community Economic Development

(Dual-listed with C R P 436). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 542: Site Development

(Dual-listed with C R P 442). (3-0) Cr. 3. S.

Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

C R P 545: Transportation Policy and Planning

(Dual-listed with C R P 445). (3-0) Cr. 3. F.

Prereq: Junior classification; CRP 545 prerequisite: Graduate classification

Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 549: Geodesign

(Dual-listed with C R P 449). (3-0) Cr. 3. S.

Prereq: CRP 251 or equivalent or permission of the instructor

Geodesign combines design creativity with scientific thinking based on spatial data. Special focus on sustainable development of future neighborhoods, communities, cities and/or countries. Students learn the geodesign process and implement a set of techniques and technologies that enable project conceptualization, data collection and visualization, spatial analysis, design creation, impact evaluation and stakeholder participation. Final project involves developing cases for analysis using ESRI ArcGIS Online and GeoPlanner software.

C R P 550: Making Resilient Environments

(Cross-listed with SUS E). (3-0) Cr. 3. S.

Prereq: senior or graduate standing.

Major theories and ideas revolving around the concept of resilience. Assessing the social and political processes associated with policy making for resilience. Application of the concept of resilience in order to understand and evaluate environments. Evaluate the different approaches toward resilience and develop an understanding of the relationship between sustainability and resilience. Case studies of communities that proactively prepare for, absorb, recover from, and adapt to actual or potential future adverse events.

C R P 551: Introduction to Geographic Information Systems

(2-2) Cr. 3. F.S.SS.

Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 552: Geographic Data Management and Planning Analysis

(Dual-listed with C R P 452). (2-2) Cr. 3. F.S.

Prereq: C R P 351 or equivalent

Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 553: Analytical Planning/GIS

(2-2) Cr. 3. F.

Prereq: C R P 451/C R P 551

Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques.

C R P 554: Fundamentals of Remote Sensing

(Dual-listed with C R P 454). (Cross-listed with L A). (2-2) Cr. 3. F.

Prereq: C R P 351 or equivalent or permission of the instructor

Introduction to remote sensing techniques needed for basic analysis of satellite images, including filtering and conflation techniques, stacking, pan sharpening, image rectification, image enhancement, unsupervised and supervised classification. Practical applications in a variety of topics to understand how to interpret images.

C R P 555: Smart Cities

(Dual-listed with C R P 455). Cr. 3. S.

Introduction to concepts of smart cities. Study of novel technologies for smart cities, including sustainable energy, innovative tools for citizens' engagement, improved safety, smart mobility, and happy living. Examples of national and international smart cities. Students may gain experience with ArcGIS Online and/or Pro or other emerging software.

C R P 556: GIS Programming and Automation

(Dual-listed with C R P 456). (3-0) Cr. 3. F.

Prereq: C R P 351 or C R P 551 or NREM 345 or NREM 546 or GEOL 552

Introduction to automated geoprocessing in Geographic Information Systems. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests.

C R P 557: GeoGames for Civic Engagement

(Dual-listed with C R P 457). (3-0) Cr. 3. S.

Explore, design, and implement participatory geospatial games; define GeoGames; learn about different types of GeoGames and their formal and dramatic elements; design GeoGames for civic engagement, community visioning, and community planning.

C R P 558: Web Mapping and Spatial Data Visualization

(Cross-listed with L A). (2-2) Cr. 3.

Prereq: CRP 451/551. GEOL 452/552 or instructor permission.

Use and development of online mapping tools and coding to support participatory GIS, Volunteered Geographic Information, information sharing, geodesign, and decision-making actions. Geoprocessing, spatial data science, and user interface design. Laboratory emphasis on practical applications and uses of Web GIS.

C R P 560: Social Justice and Planning

(Dual-listed with C R P 460). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Investigation of the topic of social justice as it relates to the challenge of planning more socially just urban societies, emphasizing the importance of social justice issues to planning in a globalized world. Includes a range of issues and case studies of local social justice initiatives, both US and global. Students will complete individual service learning projects as part of the course requirement.

C R P 561: Planning Theory

(3-0) Cr. 3. S.

Use and development of theory/action relationship in planning practice. Competing normative theories of planning and their evolution, key components and fundamental critiques. Exploration of planning frameworks and approaches, including comprehensive planning; incrementalism; advocacy; communicative rationality; and others.

C R P 563: Planning the American Metropolis

(3-0) Cr. 3. F.

Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

C R P 564: Introduction to Analytical Methods for Planning

(3-0) Cr. 3. F.

Applications of analytical methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Introduction to descriptive statistics. Sources of planning information and data including primary and secondary data types and sources. Demographic analysis, population projection techniques for planning at local and regional levels.

C R P 566: Policy Analysis and Planning

(3-0) Cr. 3. F.

Principles and methods for analyzing community problems and policies including forecasting, efficiency and equity measures, cost/benefit, political feasibility, and sensitivity analysis. Examination of social, political, economic, and environmental values and their manifestation in decision making methods used in planning. Application of tools used to analyze planning problems, project evaluation and public policies.

C R P 568: Planning and Development

(3-0) Cr. 3. S.

Prereq: C R P 564 or equivalent

Exploration and evaluation of the techniques, processes, and professional skills required to effectively manage land use change at various scales. Land classification systems; land supply and needs inventory for residential uses and commercial and employment centers; capacity and needs analysis for public infrastructure. Includes land use planning project(s) designed to apply the methods explored in this and other courses.

C R P 575: Grant Writing

(Dual-listed with C R P 475). (1-0) Cr. 1. F.

A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 578: MRED Capstone Project

(Cross-listed with FIN). (3-0) Cr. 3.

Prereq: Enrollment in MRED.

Refinement of students' problem-solving, communication and negotiation skills. Students work on an actual case. Teams will apply knowledge acquired in the classroom to some aspect of a current development on-the-ground and in-process project.

C R P 579: Public Finance and Planning

(Dual-listed with C R P 479). (3-0) Cr. 3. S.

Overview of public finance theory, particularly in how it relates to local governments and the work of planning and community development. Concepts include theories of taxation, challenges unique to local public finance, collective action, and a survey of the different revenue sources used to fund local government.

C R P 584: Sustainable Communities

(Dual-listed with C R P 484). (3-0) Cr. 3. S.

Prereq: Junior classification

The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

C R P 590: Special Topics

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590A: Special Topics: Planning Law, Administration and Implementation**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590B: Special Topics: Economic Development**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590C: Special Topics: Urban Design**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590D: Special Topics: Housing and Urban Revitalization**

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590H: Special Topics: Environmental Planning

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590I: Special Topics: Land Use and Transportation Planning**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590N: Special Topics: International Planning**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590O: Special Topics: Spatial Analytical Methods**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590P: Special Topics: Planning in Small Towns**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590Q: Special Topics: Diversity and Equity in Planning**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 590R: Special Topics: Geographic Information Systems**

Cr. 1-3. Repeatable. F.S.SS.

*Prereq: Graduate classification and written approval of instructor and department chair on required form***C R P 591: Environmental Law and Planning**

(Dual-listed with C R P 491). (Cross-listed with L A). (3-0) Cr. 3. S.

Prereq: 6 credits in natural sciences

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 592: Land Use and Development Regulation Law

(3-0) Cr. 3. F.

An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed.

C R P 595: Seminar in GIS Applications/Research

(1-0) Cr. 1. F.S.

Prereq: 9 credits in GIS Certificate program

Discussion and demonstration of current GIS applications and research in multiple disciplines. Offered on a satisfactory-fail basis only.

C R P 599: Professional Planning Report

Cr. arr. Repeatable.

Independent planning project with practical application, including research element.

Courses for graduate students:**C R P 699: Research**

Cr. arr. Repeatable.

Computer Engineering (CPR E)

Any experimental courses offered by CPR E can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**CPR E 131: Introduction to Computer Security Literacy**

(Cross-listed with INFAS). (1-0) Cr. 1.

Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 166: Professional Programs Orientation

(Cross-listed with E E). Cr. R. F.S.

(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.

CPR E 184: Computer Engineering Learning Community

Cr. 1. F.

Prereq: Member of Cpr E Learning Community

Integration of first-year students into the Computer Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Computer Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors.

CPR E 185: Introduction to Computer Engineering and Problem Solving I
(2-2) Cr. 3.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using a programming language.

CPR E 186: Introduction to Computer Engineering and Problem Solving II
(0-2) Cr. 1. S.

Prereq: CPR E 185

Project based examples from computer engineering. Group skills needed to work effectively in teams. Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers.

CPR E 230: Cyber Security Fundamentals

(2-2) Cr. 3. F.

Prereq: COM S 227, E E 285, or MIS 207.

Introduction to computer and network infrastructures used to support cyber security. Basic concepts of computer and network configuration used to secure environments. Computer virtualization, network routing and address translation, computer installation and configuration, network monitoring, in a virtual environment. Laboratory experiments and exercises including secure computer and network configuration and management.

CPR E 231: Cyber Security Concepts and Tools

(2-2) Cr. 3. S.

Prereq: CPR E 230

Basic concepts of practical computer and Internet security and the tools used to protect and attack systems and networks. Computer and network security methods including: user authentication, access control, firewalls, intrusion detection, use of vulnerability assessment tools and methods, and penetration testing. Ethics and legal issues in cyber security will also be covered. Laboratory experiments and exercises including evaluating systems for vulnerabilities, understanding potential exploits of the systems, and defenses for the systems.

CPR E 234: Legal, Professional, and Ethical Issues in Cyber Systems

(3-0) Cr. 3. S.

Prereq: COM S 227, or E E 285, or MIS 207

Emphasizes legal, ethical, and professional issues in cyber systems. Other topics include privacy, government regulation, and compliance as applied to professional practice. Guest lecturer from government and industry, as well as discussions including current legal and ethical issues found in the main stream.

CPR E 261: Transfer Orientation

(Cross-listed with E E). Cr. R.

Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

CPR E 281: Digital Logic

(3-3) Cr. 4. F.S.

Prereq: sophomore classification

Number systems and representation. Boolean algebra and logic minimization. Combinational and sequential logic design. Arithmetic circuits and finite state machines. Use of programmable logic devices. Introduction to computer-aided schematic capture systems, simulation tools, and hardware description languages. Design of simple digital systems.

CPR E 288: Embedded Systems I: Introduction

(3-2) Cr. 4. F.S.

Prereq: CPR E 281, COM S 207 or COM S 227 or E E 285

Embedded C programming. Interrupt handling. Memory mapped I/O in the context of an application. Elementary embedded design flow/methodology. Timers, scheduling, resource allocation, optimization, state machine based controllers, real time constraints within the context of an application. Applications laboratory exercises with embedded devices.

CPR E 294: Program Discovery

(Cross-listed with E E). Cr. R.

Prereq: CPR E 166 or E E 166

The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today's world. Offered on a satisfactory-fail basis only.

CPR E 308: Operating Systems: Principles and Practice

(3-3) Cr. 4. F.S.

Prereq: CPR E 381 or COM S 321

Operating system concepts, processes, threads, synchronization between threads, process and thread scheduling, deadlocks, memory management, file systems, I/O systems, security, Linux-based lab experiments.

CPR E 310: Theoretical Foundations of Computer Engineering

(3-1) Cr. 3. F.S.

Prereq: COM S 228

Propositional logic and methods of proof; set theory and its applications; mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering.

CPR E 315: Applications of Algorithms in Computer Engineering

(3-0) Cr. 3. F.S.SS.

Prereq: CPR E 310

Solving computer engineering problems using algorithms. Emphasis on problems related to the core focus areas in computer engineering. Real world examples of algorithms used in the computer engineering domain. Algorithm engineering. Prototyping of algorithms.

CPR E 329: Software Project Management

(Cross-listed with S E). (3-0) Cr. 3.

Prereq: COM S 309

Process-based software development. Capability Maturity Model (CMM). Project planning, cost estimation, and scheduling. Project management tools. Factors influencing productivity and success. Productivity metrics. Analysis of options and risks. Version control and configuration management. Inspections and reviews. Managing the testing process. Software quality metrics. Modern software engineering techniques and practices.

CPR E 330: Integrated Electronics

(Cross-listed with E E). (3-3) Cr. 4.

Prereq: E E 201, credit or enrollment in E E 230, CPR E 281

Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells.

CPR E 331: Application of Cryptographic Concepts to Cyber Security

Cr. 3. F.S.

Prereq: CprE 231

Basic cryptographic underpinnings used in modern cyber security encryption suites. Encryption benefits to cyber security and its use in protocols. Topics include cryptographically secure hash functions and pseudorandom numbers, key distribution techniques, secure authentication including single sign on. Detection and prevention of security threats such as covert communication, malicious code, and other security threats in protocols are included. In addition to laboratory experiments and exercises, students complete a project focused on cyber security problem and solution.

CPR E 332: Cyber Defense Competition

(Cross-listed with INFAS). (0-2) Cr. 1. Repeatable. S.

Participation in cyber defense competition driven by scenario-based network design. Includes computer system setup, risk assessment and implementation of security systems, as well as defense of computer and network systems against trained attackers. Team based. Offered on a satisfactory-fail basis only.

CPR E 339: Software Architecture and Design

(Cross-listed with S E). (3-0) Cr. 3.

Prereq: S E 319

Modeling and design of software at the architectural level. Architectural styles. Basics of model-driven architecture. Object-oriented design and analysis. Iterative development and unified process. Design patterns. Design by contract. Component based design. Product families. Measurement theory and appropriate use of metrics in design. Designing for qualities such as performance, safety, security, reliability, reusability, etc. Analysis and evaluation of software architectures. Introduction to architecture definition languages. Basics of software evolution, reengineering, and reverse engineering. Case studies. Introduction to distributed system software.

CPR E 381: Computer Organization and Assembly Level Programming

(3-2) Cr. 4. F.S.

Prereq: CPR E 288

Introduction to computer organization, evaluating performance of computer systems, instruction set design. Assembly level programming: arithmetic operations, control flow instructions, procedure calls, stack management. Processor design. Datapath and control, scalar pipelines, introduction to memory and I/O systems.

CPR E 388: Embedded Systems II: Mobile Platforms

(3-2) Cr. 4.

Prereq: CPR E 288

Contemporary programming techniques for event driven systems. Mobile platforms and operating systems. Location and motion sensors based user interfaces. Threading and scheduling. Resource management - measurement and control techniques - for memory and energy. Client-server application design. Distributed applications. Laboratory includes exercises based on a mobile platform.

CPR E 394: Program Exploration

(Cross-listed with E E). Cr. R.

Prereq: CPR E 294 or E E 294

Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.

CPR E 396: Summer Internship

Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services

Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

CPR E 398: Cooperative Education (Co-op)

Cr. R. Repeatable. F.S.

Prereq: Permission of department and Engineering Career Services

Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

CPR E 412: Formal Methods in Software Engineering

(Cross-listed with COM S, S E). (3-0) Cr. 3.

Prereq: COM S 311; STAT 305 or STAT 330 or STAT 341; for graduate credit: graduate standing or permission of instructor

A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

CPR E 414: Introduction to Software Systems for Big Data Analytics

Cr. 4. F.

Prereq: COM S 363; or CPR E 315 or CPR E 308; or COM S 311 or COM S 352

Introduction to different perspectives of the “data universe” and trade-offs when choosing an appropriate perspective. Impact of the concept(s) of analytics – from raw data, through its storage/representation, to interacting and querying (linguistic/interface issues). Focused studies on 3-4 different domains, followed by generalization of the concepts/abstractions and preparing the students for the next course in this realm, targeting different domains/problems. Understanding the dependencies between problem-domain needs and the data properties, and their impact on choosing appropriate analytics tools (and how/why those tools were developed and exist in the manners that they do). In addition, the students will be exposed to (limited selection of) internals of such tools.

CPR E 416: Software Evolution and Maintenance

(Cross-listed with S E). (3-0) Cr. 3.

Prereq: COM S 309

Practical importance of software evolution and maintenance, systematic defect analysis and debugging techniques, tracing and understanding large software, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance, experimental studies and quantitative measurements of software evolution. Written reports and oral presentation.

CPR E 418: High Speed System Engineering Measurement and Testing

(Cross-listed with E E). (3-2) Cr. 4. F.

Prereq: E E 230 and E E 311

Measurement of high speed systems and mixed signal systems. Measurement accuracy and error. Network analysis and spectrum analysis used in high speed measurement and testing. Test specification process and parametric measurement. Sampling and digital signal processing concepts. Design for testability. Testing equipment. Applications.

CPR E 419: Software Tools for Large Scale Data Analysis

(Cross-listed with S E). (3-3) Cr. 4.

Prereq: COM S 228

Software tools for managing and manipulating large volumes of data, external memory processing, large scale parallelism, and stream processing, data interchange formats. Weekly programming labs that involve the use of a parallel computing cluster.

CPR E 421: Software Analysis and Verification for Safety and Security

(Cross-listed with S E). Cr. 3. F.S.

Prereq: COM S 309; CPR E 310 or Com S 230

Significance of software safety and security; various facets of security in cyber-physical and computer systems; threat modeling for software safety and security; and categorization of software vulnerabilities. Software analysis and verification: mathematical foundations, data structures and algorithms, program comprehension, analysis, and verification tools; automated vs. human-on-the-loop approach to analysis and verification; and practical considerations of efficiency, accuracy, robustness, and scalability of analysis and verification. Cases studies with application and systems software; evolving landscape of software security threats and mitigation techniques. Understanding large software, implementing software analysis and verification algorithms.

CPR E 424: Introduction to High Performance Computing

(Cross-listed with COM S, MATH). (2-2) Cr. 3. F.

Prereq: MATH 265; MATH 207 or MATH 317; or permission of instructor.

Unix, serial programming of scientific applications, OpenMP for shared-memory parallelization. No Unix, Fortran or C experience required.

CPR E 425: High Performance Computing for Scientific and Engineering Applications

(Cross-listed with COM S). (2-2) Cr. 3.

Prereq: COM S 311, ENGL 250, SP CM 212

Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports.

CPR E 426: Introduction to Parallel Algorithms and Programming

(Dual-listed with CPR E 526). (Cross-listed with COM S). (3-2) Cr. 4. F.

Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

CPR E 430: Network Protocols and Security

(Dual-listed with CPR E 530). (Cross-listed with INFAS). (3-0) Cr. 3.

Prereq: CPR E 288 or CPR E 331

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CPR E 431: Basics of Information System Security

(3-0) Cr. 3. S.

Prereq: credit or enrollment in CPR E 308 or COM S 352

Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Network security mechanisms such as intrusion detection, firewalls, IPSEC, and related protocols. Ethics and legal issues in information security. Wireless security. Programming and system configuration assignments.

CPR E 435: Analog VLSI Circuit Design

(Cross-listed with E E). (3-3) Cr. 4. S.

Prereq: E E 330

Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters.

CPR E 444: Bioinformatic Analysis

(Cross-listed with BCB, BCBIO, BIOL, COM S, GEN). (4-0) Cr. 4. F.

Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).

Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

CPR E 450: Distributed Systems and Middleware

(Dual-listed with CPR E 550). (3-0) Cr. 3.

Prereq: CPR E 308 or COM S 352

Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications.

CPR E 454: Distributed Systems

(Dual-listed with CPR E 554). (Cross-listed with COM S). (3-1) Cr. 3.

Prereq: COM S 311; COM S 352 or CPR E 308; for graduate credit: graduate standing or permission of instructor

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

CPR E 458: Real Time Systems

(Dual-listed with CPR E 558). (3-0) Cr. 3.

Prereq: CPR E 308 or COM S 352

Fundamental concepts in real-time systems. Real time task scheduling paradigms. Resource management in uniprocessor, multiprocessor, and distributed real-time systems. Fault-tolerance, resource reclaiming, and overload handling. Real-time channel, packet scheduling, and real-time LAN protocols. Case study of real-time operating systems. Laboratory experiments.

CPR E 465: Digital VLSI Design

(Cross-listed with E E). (3-3) Cr. 4. F.

Prereq: E E 330

Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project.

CPR E 466: Multidisciplinary Engineering Design

(Cross-listed with A B E, AER E, B M E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.

Prereq: Student must be within two semesters of graduation; permission of instructor.

Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

CPR E 480: Graphics Processing and Architecture

(3-3) Cr. 4. S.

Prereq: CPR E 381 or COM S 321

Introduction to hardware architectures for computer graphics and their programming models. System-level view, including framebuffers, video output devices, displays, 2D and 3D graphics acceleration, and device interfacing. Architectural design of GPUs, from 2D and 3D sprite engines to 3D rendering pipelines to unified shader architectures. Computing models for graphics processors. GPGPU and GPU computing.

CPR E 483: Hardware Software Integration

(3-3) Cr. 4. S.

Prereq: CPR E 381

Embedded system design using hardware description language (HDL) and field programmable gate array (FPGA). HDL modeling concepts and styles are introduced; focus on synthesizability, optimality, reusability and portability in hardware design description. Introduction to complex hardware cores for data buffering, data input/output interfacing, data processing. System design with HDL cores and implementation in FPGA. Laboratory-oriented design projects.

CPR E 488: Embedded Systems Design

(3-3) Cr. 4.

Prereq: CPR E 381 or COM S 321

Embedded microprocessors, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform-based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations.

CPR E 489: Computer Networking and Data Communications

(3-2) Cr. 4. F.S.

Prereq: CPR E 381 or E E 324

Modern computer networking and data communications concepts. TCP/IP, OSI protocols, client server programming, data link protocols, local area networks, and routing protocols.

CPR E 490: Independent Study

Cr. arr. Repeatable.

Prereq: Senior classification in computer engineering

Investigation of an approved topic.

CPR E 490H: Independent Study: Honors

Cr. arr. Repeatable.

Prereq: Senior classification in computer engineering

Investigation of an approved topic.

CPR E 491: Senior Design Project I and Professionalism

(Cross-listed with E E, S E). (2-3) Cr. 3. F.S.

Prereq: CPR E majors: CPR E 308, completion of 29 credits in the CPR E professional program, ENGL 314. E E majors: E E 322, completion of 24 credits in the E E professional program, ENGL 314. SE majors: S E 329 and S E 339, CPR E 308 or COM S 352, ENGL 309 or ENGL 314.

Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

CPR E 492: Senior Design Project II

(Cross-listed with E E, S E). (1-3) Cr. 2. F.S.

Prereq: CPR E 491 or E E 491

Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

CPR E 494: Portfolio Assessment

(Cross-listed with E E). Cr. R.

Prereq: CPR E 394 or E E 394, credit or enrollment in CPR E 491 or E E 491

Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

Courses primarily for graduate students, open to qualified undergraduates:**CPR E 511: Design and Analysis of Algorithms**

(Cross-listed with COM S). (3-0) Cr. 3.

Prereq: COM S 311

A study of algorithm design and analysis techniques. Network flows and linear programming. Randomized algorithms. NP-completeness. Approximation algorithms. Fixed-parameter algorithms.

CPR E 513: Foundations and Applications of Program Analysis

(Cross-listed with COM S). Cr. 3.

Prereq: COM S 342

Algorithms and tools for automatically reasoning about code and program executions to predict software behavior. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation and symbolic execution. Applications of program analysis to improve software security, performance and testing. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

CPR E 522: Cognitive Radio Networks

(Cross-listed with E E). (3-0) Cr. 3. Alt. F., offered irregularly.

Prereq: Permission of instructor

Topics on cognitive radio networks: Cognitive Radio Networks Architecture; Software Defined Radio Architecture; Spectrum Sensing; Spectrum Management; Spectrum Sharing; Spectrum Mobility; Applications of Cognitive Radio Networks.

CPR E 525: Numerical Analysis of High Performance Computing

(Cross-listed with COM S, MATH). (3-0) Cr. 3. S.

Prereq: CPR E 308 or MATH 481; experience in scientific programming; knowledge of FORTRAN or C

Introduction to parallelization techniques and numerical methods for distributed memory high performance computers. A semester project in an area related to each student's research interests is required.

CPR E 526: Introduction to Parallel Algorithms and Programming

(Dual-listed with CPR E 426). (Cross-listed with COM S). (3-2) Cr. 4. F.

Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

CPR E 528: Probabilistic Methods in Computer Engineering

(3-0) Cr. 3.

Prereq: CPR E 315 or COM S 311

The application of randomization and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data set algorithms.

CPR E 529: Data Analytics in Electrical and Computer Engineering

(Cross-listed with E E). (3-0) Cr. 3. S.

Prereq: E E 322 or equivalent

Introduces a variety of data analytics techniques # particularly those relevant for electrical and computer engineers # from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques.

CPR E 530: Network Protocols and Security

(Dual-listed with CPR E 430). (Cross-listed with INFAS). (3-0) Cr. 3.

Prereq: CPR E 288 or CPR E 331

Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols. Network security issues, attack and mitigation techniques. Emphasis on laboratory experiments.

CPR E 531: Information System Security

(Cross-listed with INFAS). (3-0) Cr. 3.

Prereq: CPR E 489 or CPR E 530 or COM S 586 or MIS 535

Computer, software, and data security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

CPR E 532: Information Warfare

(Cross-listed with INFAS). (3-0) Cr. 3. S.

Prereq: CPR E 531

Computer system and network security: implementation, configuration, testing of security software and hardware, network monitoring. Authentication, firewalls, vulnerabilities, exploits, countermeasures. Study and use of attack tools. Ethics in information assurance. Emphasis on laboratory experiments.

CPR E 533: Cryptography

(Cross-listed with INFAS, MATH). (3-0) Cr. 3. S.

Prereq: MATH 301 or CPR E 310 or COM S 230

Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

CPR E 534: Legal and Ethical Issues in Information Assurance

(Cross-listed with INFAS, POL S). (3-0) Cr. 3. S.

Prereq: Graduate classification; CPR E 531 or INFAS 531

Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.

CPR E 535: Steganography and Digital Image Forensics

(Cross-listed with INFAS, MATH). (3-0) Cr. 3. S.

Prereq: E E 524 or MATH 317 or MATH 407 or COM S 230

Basic principles of covert communication, steganalysis, and forensic analysis for digital images. Steganographic security and capacity, matrix embedding, blind attacks, image forensic detection and device identification techniques. Related material on coding theory, statistics, image processing, pattern recognition.

CPR E 536: Computer and Network Forensics

(Cross-listed with INFAS). (3-0) Cr. 3.

Prereq: CPR E 489 or CPR E 530

Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

CPR E 537: Wireless Network Security

(3-0) Cr. 3. S.

Prereq: Credit or enrollment in CPR E 489 or CPR E 530

Introduction to the physical layer and special issues associated with the security of wireless networks. The basics of wireless communication systems (antennas and propagation, modulation, multiple access, channel modeling, specific security issues of the wireless link), jamming and countermeasures (spread spectrum technologies, channel coding, interleaving), authentication and confidentiality (basics of classic cryptography, common authentication and encryption algorithms).

Detailed case studies on authentication, encryption and privacy flaws, and good practices based on the most common wireless technologies, including WiFi, GSM/3G, Bluetooth, and RFID. Individual or team-based class projects.

CPR E 538: Reverse Engineering and Security Testing

(Cross-listed with INFAS). (2-3) Cr. 3. S.

Prereq: COM S 321 or CPR E 381, COM S 352 or CPR E 308

Techniques and tools for understanding the behavior of software/hardware systems based on reverse engineering. Flaw hypothesis, black, grey, and white box testing as well as other methods for testing the security of software systems. Discussion of counter-reverse engineering techniques.

CPR E 539: Cyber Physical System Security for the Smart Grid

(3-0) Cr. 3. S.

Introduction to cyber security, cyber physical system (CPS), and smart grid automation technologies; supervisor control and data acquisition (SCADA) systems; cyber risk modeling, vulnerability analysis, impact analysis, defense and mitigation techniques; cyber security of wide-area monitoring, protection, and control; security and privacy in advanced metering infrastructure (AMI), cyber security compliance and best practices, CPS security test-beds and attack-defense hands-on laboratory experiments.

CPR E 541: High-Performance Communication Networks

(3-0) Cr. 3.

Prereq: CPR E 489 or CPR E 530

Computer architectures and protocols designed for high-performance networking environments; software defined networking (SDN) and supporting protocols; cloud and data center networks; network traffic management and congestion control strategies; quality of service; high-speed access network protocols.

CPR E 542: Optical Communication Networks

(3-0) Cr. 3. S.

Prereq: CPR E 489

Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing; network architectures and protocol for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control; survivability; access networks; metro networks.

CPR E 543: Wireless Network Architecture

(3-0) Cr. 3.

Prereq: Credit or enrollment in CPR E 489 or CPR E 530

Introduction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking. Operation and management of Medium Access Control in Wireless Local Area Networks (WLAN) and Wireless Metropolitan Area Networks (WMAN); recent developments in IEEE 802.11 & 802.16 and Bluetooth; Mobile IP; Mobile TCP.

CPR E 544: Fundamentals of Bioinformatics

(Cross-listed with BCB, COM S, GDCEB). (4-0) Cr. 4. F.

Prereq: MATH 165 or STAT 401 or equivalent

A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies.

CPR E 545: Fault-Tolerant Systems

(3-0) Cr. 3.

Prereq: CPR E 381

Faults and their manifestations, errors, and failures; fault detection, location and reconfiguration techniques; time, space, and information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; clock synchronization; fault-tolerant networks; fault tolerance in real-time systems; reliable software design; checkpointing and rollback recovery; atomic actions; replica management protocols; and reliability evaluation techniques and tools.

CPR E 546: Wireless and Sensor Networks

(3-0) Cr. 3.

Prereq: CPR E 489 or CPR E 530

Fundamental and well-known protocols for wireless ad hoc and sensor networks at various layers, including physical layer issues, MAC (medium access control) layer protocols, routing protocols for wireless ad hoc and sensor networks, data management in sensor networks, coverage and connectivity, localization and tracking, security and privacy issues. Introduction to TinyOS and the nesC language. Hands-on experiments with Crossbow Mote sensor devices.

CPR E 547: Resource Allocation in Communication Networks

(3-0) Cr. 3.

Analytical approach to resource allocation on communication networks (e.g. the Internet, multihop wireless networks, etc.). Network utility maximization and the internet congestion control algorithm. Layering as optimization decomposition: a cross-layer design approach in multihop wireless networks. Capacity of ad hoc wireless networks.

CPR E 548: Cyber-Physical Systems Networking

Cr. 3.

Prereq: CPR E 489; CPR E 530/430; COM S 486, or equivalent.

Cyber-physical systems applications in smart agriculture, transportation, power grid, manufacturing, public safety, health systems, etc.; field area and control networks; industrial Ethernet; time-triggered communication; real-time wireless networks; wireless industrial networks; safety and security of industrial networks; systems platforms for cyber-physical systems networks; team-based learning/projects.

CPR E 549: Advanced Algorithms in Computational Biology

(Cross-listed with COM S). (3-0) Cr. 3.

Prereq: COM S 311 and either COM S 228 or COM S 208

Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

CPR E 550: Distributed Systems and Middleware

(Dual-listed with CPR E 450). (3-0) Cr. 3.

Prereq: CPR E 308 or COM S 352

Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications.

CPR E 554: Distributed Systems

(Dual-listed with CPR E 454). (Cross-listed with COM S). (3-1) Cr. 3.

Prereq: COM S 311; COM S 352 or CPR E 308; for graduate credit: graduate standing or permission of instructor

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

CPR E 556: Scalable Software Engineering

(3-0) Cr. 3.

Prereq: COM S 309

Design and analysis techniques scalable to large software, project-based learning of problem solving techniques, automation tools for high productivity and reliability of software, analysis-based measurement and estimation techniques for predictable software engineering.

CPR E 557: Computer Graphics and Geometric Modeling

(Cross-listed with COM S, M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: M E 421, programming experience in C

Fundamentals of computer graphics technology. Data structures. Parametric curve and surface modeling. Solid model representations. Applications in engineering design, analysis, and manufacturing.

CPR E 558: Real Time Systems

(Dual-listed with CPR E 458). (3-0) Cr. 3.

Prereq: CPR E 308 or COM S 352

Fundamental concepts in real-time systems. Real time task scheduling paradigms. Resource management in uniprocessor, multiprocessor, and distributed real-time systems. Fault-tolerance, resource reclaiming, and overload handling. Real-time channel, packet scheduling, and real-time LAN protocols. Case study of real-time operating systems. Laboratory experiments.

CPR E 559: Security and Privacy in Cloud Computing

(Cross-listed with COM S). Cr. 3.

Prereq: COM S 352 or CPR E 308, and COM S 486 or CPR E 489 or CPR E 530

Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects.

CPR E 560: Data-Driven Security and Privacy

(Cross-listed with COM S, INFAS). Cr. 3. Alt. S., offered irregularly.

Prereq: CPR E 531; COM S 474 or COM S 573

Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms.

CPR E 566: Physical Design of VLSI Systems

(3-0) Cr. 3.

Prereq: CPR E 465

Physical design of VLSI systems. Partitioning algorithms. Placement and floorplanning algorithms. Routing-global and detailed. Layout compaction. Physical design of FPGA's and MCM's. Performance-driven layout synthesis.

CPR E 567: Bioinformatics Algorithms

(Cross-listed with BCB, COM S). (3-0) Cr. 3.

Prereq: COM S 228; COM S 330; credit or enrollment in BIOL 315, STAT 430

Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

CPR E 569: Structural Bioinformatics

(Cross-listed with BBMB, BCB, COM S, GDCB). (3-0) Cr. 3. F.

Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution.

CPR E 570: Systems Biology

(Cross-listed with BCB, COM S, GDCB, STAT). (3-0) Cr. 3. S.

Prereq: BCB 567 or COM S 311, COM S 228, GEN 409, STAT 430 or STAT 483 or STAT 583

Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput biological data obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, and inference of transcriptional regulatory networks, protein-protein interaction networks, and metabolic networks. Dynamic systems and whole-cell models. Ontology-driven, network based, and probabilistic approaches to information integration.

CPR E 575: Computational Perception

(Cross-listed with COM S, HCI). (3-0) Cr. 3. S.

Prereq: Graduate standing or permission of instructor

Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

CPR E 581: Computer Systems Architecture

(Cross-listed with COM S). (3-0) Cr. 3. F.

Prereq: CPR E 381

Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

CPR E 582: Computer Systems Performance

(3-0) Cr. 3.

Prereq: CPR E 381, CPR E 310 and STAT 330

Review of probability and stochastic processes concepts; Markovian processes; Markovian queues; renewal theory; semi-Markovian queues; queueing networks, applications to multiprocessor architectures, computer networks, and switching systems.

CPR E 583: Reconfigurable Computing Systems

(Cross-listed with COM S). (3-0) Cr. 3.

Prereq: Background in computer architecture, design, and organization

Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

CPR E 584: Models and Techniques in Embedded Systems

(3-0) Cr. 3.

Industry-standard tools and optimization strategies; practical embedded platforms and technology (reconfigurable platforms, multi-core platforms, low-power platforms); instruction augmentation, memory-mapped accelerator design, embedded software optimization. Students will be encouraged to compete as teams in an embedded system design competition.

CPR E 585: Developmental Robotics

(Cross-listed with HCI). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: knowledge of C/C++ programming language.

An introduction to the emerging interdisciplinary field of Developmental Robotics, which crosses the boundaries between robotics, artificial intelligence, developmental psychology, and philosophy. The main goal of this field is to create autonomous robots that are more intelligent, more adaptable, and more useful than the robots of today, which can only function in very limited domains and situations.

CPR E 586: Pervasive Computing

(3-0) Cr. 3.

Prereq: CPR E 489 or CPR E 530

Fundamentals of pervasive computing, including location and context awareness, mobile and location services, ubiquitous data access, low power computing and energy management, middleware, security and privacy issues.

CPR E 588: Embedded Computer Systems

(3-0) Cr. 3.

Prereq: CPR E 308

Hardware/software systems and codesign. Models of computation for embedded systems. System-level design. Modeling, specification, synthesis, and verification. Hardware/software implementation. Design space exploration. Performance analysis and optimization. Multiprocessor system on chip. Platform-based design. Design methodologies and tools. Case studies and design projects.

CPR E 590: Special Topics

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in computer engineering.

CPR E 592: Seminar in Computer Engineering

Cr. 1-4. Repeatable.

Prereq: Permission of instructor

Projects or seminar in Computer Engineering.

CPR E 598: Electrical and Computer Engineering Learning Community Seminar

(Cross-listed with E E). Cr. R. F.S.

Prereq: Electrical and Computer Engineering Graduate Student

Introduction to graduate study in Electrical and Computer Engineering at Iowa State University. Building networks, introduction to core requirements, and tools and techniques for success. Offered on a satisfactory-fail basis only. ECpE

CPR E 599: Creative Component

Cr. arr. Repeatable.

Courses for graduate students:

CPR E 626: Parallel Algorithms for Scientific Applications

(Cross-listed with COM S). (3-0) Cr. 3.

Prereq: CPR E 526

Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.

CPR E 631: Cyber Security Operations Practicum

(Cross-listed with INFAS). Cr. 3. Repeatable.

Prereq: CPR E 532; CPR E 534; and permission of instructor

Practical experience in cyber operations. Cyber security threat analysis, malware analysis, and intrusion detection management. Cyber security data analysis methods. Pen testing tools and techniques. Weekly threat analysis briefings. Offered on a satisfactory-fail basis only.

CPR E 632: Information Assurance Capstone Design

(Cross-listed with INFAS). (3-0) Cr. 3.

Prereq: INFAS 531, INFAS 532, INFAS 534

Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attack each other's secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report.

CPR E 681: Advanced Topics in Computer Architecture

(Cross-listed with COM S). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: CPR E 581. Repeatable with Instructor permission

Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

CPR E 697: Engineering Internship

(Cross-listed with E E). Cr. R. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

CPR E 699: Research

Cr. arr. Repeatable.

Computer Science (COM S)

Any experimental courses offered by COM S can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

COM S 101: Orientation

Cr. R. F.S.

Introduction to the computer science discipline and code of ethics, Com S courses, research and networking opportunities, procedures, policies, help and computing resources, extra-curricular activities offered by the Department of Computer Science and Iowa State University. Discussion of issues relevant to student adjustment to college life. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

COM S 103: Computer Literacy and Applications

Cr. 4. F.S.SS.

Introduction to computer literacy and applications. Literacy: Impact of computer technology in today's societies, hardware, software, software programming, database and information systems, communication and networks, digital media technology, computer security and safety, ethics and privacy. Applications: In-depth hands-on experience with the operating systems, Microsoft word processing, spreadsheets, database management and presentation software. No prior computer experience necessary. Offered online only. Attendance required at an orientation session the first week of class.

COM S 104: Brief Introduction to Computer Programming for Non-Majors

(1.5-1) Cr. 2. F.S.

Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.

COM S 105: Short Course in Computer Programming

Cr. 2.

Prereq: Com S 104

8-week course in programming, including instruction in syntax and semantics, of the following current programming languages.

COM S 105A: Short Course in Computer Programming: Perl

(1-2) Cr. 2.

Prereq: Com S 104

8-week course in programming using Perl.

COM S 105B: Short Course in Computer Programming: MATLAB

(2-0) Cr. 2.

Prereq: Com S 104

8-week course in programming using MATLAB.

COM S 106: Introduction to Web Programming

(3-0) Cr. 3. F.S.

Introduction to web programming basics. Fundamentals of developing web pages using a comprehensive web development life cycle. Learn to code programs and earn in-depth experience with current web design techniques such as HTML5 and cascading style sheets. Programming with JavaScript, jQuery, PHP, SQL, and MySQL. Strategies for accessibility, usability and search engine optimization. No prior computer programming experience necessary.

COM S 107: Windows Application Programming

(3-0) Cr. 3. F.S.

Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

COM S 108: Applied Computer Programming for Non-Majors

(3-0) Cr. 3.

Prereq: Com S 107 or equivalent

Advanced programming applications in Visual Basic for non-majors. Emphasis on programming projects including sorting, file processing, database processing, web programming, and graphics and animation. Students will learn problem solving techniques and advanced programming skills to build real-world applications.

COM S 113: Introduction to Spreadsheets and Databases

(2-2) Cr. 3. F.S.SS.

Using Microsoft Excel spreadsheets and Microsoft Access databases to input, store, process, manipulate, query, and analyze data for business and industrial applications. Credit in Com S 113 may not be applied toward graduation in the COM S, S E, and CPR E majors.

COM S 127: Introduction to Computer Programming

(3-2) Cr. 4. F.S.

Prereq: Credit or Enrollment in MATH 140 or higher

Introduction to computer programming with an emphasis on problem solving. Topics include: program structures, expressions, variables, decision and logic, iteration, collections, input and output. Program construction and testing. Programming assignments including games and applications. No prior programming experience necessary. This course is intended for Computer Science majors.

COM S 203: Careers in Computer Science

Cr. R. F.S.

Computer science as a profession. Introduction to career fields open to computer science majors. Relationship of coursework to careers. Presentations by computer science professionals. Offered on a satisfactory-fail basis only.

COM S 207: Fundamentals of Computer Programming

(Cross-listed with MIS). (3-1) Cr. 3. F.S.SS.

Prereq: MATH 150 or placement into MATH 140 or higher

An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/MIS 207 and Com S 227.

COM S 208: Intermediate Computer Programming

(3-1) Cr. 3.

Prereq: MIS/COM S 207, credit or enrollment in MATH 151, MATH 160, or MATH 165

Intermediate-level programming techniques. Emphasis on designing, writing, testing, debugging, and documenting medium-sized programs. Data structures and their uses. Dynamic memory usage. Inheritance and polymorphism. Algorithm design and efficiency: recursion, searching, and sorting. Event-driven and GUI programming. The software development process. This course is not designed for computer science, software engineering and computer engineering majors. Credit may not be applied toward the major in computer science, software engineering, or computer engineering.

COM S 227: Object-oriented Programming

(3-2) Cr. 4. F.S.SS.

Prereq: Credit or Enrollment in MATH 143 or higher; recommended: a previous high school or college course in programming or equivalent experience.

Computer programming using objects as the mechanism for modularity, abstraction, and code reuse. Instance variables, methods, and encapsulation. Review of control structures for conditionals and iteration. Developing algorithms on strings, arrays, and lists. Recursion, searching, and sorting. Text parsing and file I/O. Interfaces, inheritance, polymorphism, and abstract classes. Exception handling. Tools for unit testing and debugging. Emphasis on a disciplined approach to specification, code development, and testing. Course intended for Com S majors. Credit may not be applied toward graduation for both Com S 207 and 227.

COM S 228: Introduction to Data Structures

(3-1) Cr. 3. F.S.SS.

Prereq: Minimum of C- in COM S 227, credit or enrollment in MATH 165

An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism, and generics. Abstract data type specification and correctness. Collections including lists, stacks, queues, trees, heaps, maps, hash tables, and graphs. Big-O notation and algorithm analysis. Searching and sorting. Graph search and shortest path algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

COM S 230: Discrete Computational Structures

(Cross-listed with MATH). (3-1) Cr. 3. F.S.SS.

Prereq: Minimum of C- in COM S 227 and MATH 165; ENGL 150

Concepts in discrete mathematics as applied to computer science. Logic, set theory, functions, relations, combinatorics, discrete probability, graph theory and number theory. Proof techniques, induction and recursion.

COM S 252: Linux Operating System Essentials

(3-0) Cr. 3. F.

Prereq: CPR E 185 or S E 185 or COM S 127 or COM S 207 or COM S 227

Introduction to installation, utilization, and administration of Linux systems. Topics include open-source software, package installation and management, shell programming and command-line utilities, process and service management, account management, network configuration, file sharing, interoperation with other computers and operating systems, automation, and system security.

COM S 290: Independent Study

Cr. arr. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

No more than 6 credits of Com S 290 or Com S 290H may be counted toward graduation.

COM S 290H: Independent Study: Honors

Cr. arr. Repeatable, maximum of 6 credits. F.S.

Prereq: Permission of instructor

No more than 6 credits of Com S 290 or Com S 290H may be counted toward graduation.

COM S 295: Programming-based problem solving practices

Cr. 1. Repeatable, maximum of 3 times. F.S.

Prereq: COM S 207 or COM S 227

Basics of problem solving using programming techniques. Development and implementation of simple to advanced data structures and algorithms, evaluation of problem difficulty, design and implementation of solutions, debugging, and working under time pressure. Offered on a satisfactory-fail basis only.

COM S 309: Software Development Practices

(Cross-listed with S E). (3-1) Cr. 3. F.S.

Prereq: Minimum of C- in COM S 228 and MATH 165

A practical introduction to methods for managing software development. Process models, requirements analysis, structured and object-oriented design, coding, testing, maintenance, cost and schedule estimation, metrics. Programming projects.

COM S 311: Introduction to the Design and Analysis of Algorithms

(3-1) Cr. 3. F.S.SS.

Prereq: Minimum of C- in COM S 228; MATH 166, ENGL 150; COM S 230 or CPR E 310

Basic techniques for design and analysis of algorithms. Sorting, searching, graph algorithms, string matching, and NP-completeness. Design techniques such as dynamic programming, divide and conquer, greedy method, and approximation. Asymptotic, worst-case, average-case and amortized analyses. Topics from advanced data structures such as balanced trees and hashing.

COM S 319: Construction of User Interfaces

(Cross-listed with S E). (3-0) Cr. 3. F.S.

Prereq: COM S 228

Overview of user interface design. Evaluation and testing of user interfaces. Review of principles of object orientation, object oriented design and analysis using UML in the context of user interface design. Design of windows, menus and commands. Developing Web and Windows-based user-interfaces. Event-driven programming. Introduction to Frameworks and APIs for the construction of user interfaces.

COM S 321: Introduction to Computer Architecture and Machine-Level Programming

(3-1) Cr. 3. F.S.

Prereq: Minimum of C- in COM S 228 and MATH 165; COM S 230 or CPR E 281; ENGL 250

Introduction to computer architecture and organization. Emphasis on evaluation of performance, instruction set architecture, datapath and control, memory-hierarchy design, and pipelining. Assembly language programming.

COM S 326: C for Programmers

Cr. 1. F.S.

Prereq: Minimum of C- in COM S 228; COM S 230

Half-semester course. Design and implementation of libraries and applications in C, for students with prior programming background. Emphasis on differences between C and other languages, including file I/O, string processing, memory management, and buffer overruns. Using build systems, debuggers, and other development tools. Programming projects.

COM S 327: Advanced Programming Techniques

(3-0) Cr. 3. F.S.

Prereq: Minimum of C- in COM S 228 and MATH 165

Object-oriented programming experience using a language suitable for exploring advanced topics in programming. Topics include memory management, parameter passing, inheritance, compiling, debugging, and maintaining programs. Significant programming projects.

COM S 331: Theory of Computing

(Cross-listed with LING). (3-1) Cr. 3. F.S.

Prereq: Minimum of C- in COM S 228, MATH 166, and in COM S 230 or CPR E 310; ENGL 250

Models of computation: finite state automata, pushdown automata and Turing machines. Study of grammars and their relation to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Relations between classes of languages.

COM S 336: Introduction to Computer Graphics

(3-0) Cr. 3. F.

Prereq: COM S 327, CoReq MATH 207 or MATH 317

Programming interactive computer graphics systems using standard low-level libraries (such as OpenGL or DirectX) with an emphasis on 3D rendering. The graphics pipeline and programmable shaders. Coordinate systems and transformations in two and three dimensions. Homogeneous coordinates, viewing transformations and perspective. Euler angles and quaternions. Visible surface algorithms. Lighting models and shading. Texture mapping, bump mapping, reflection, elementary ray tracing. Offscreen buffers, render-to-texture and related techniques.

COM S 342: Principles of Programming Languages

(Cross-listed with S E). (3-1) Cr. 3. F.S.

Prereq: Minimum of C- in COM S 228 and MATH 165; COM S 230 or CPR E 310

Study of concepts in programming languages, especially functional programming concepts. Overview of major programming paradigms, their relationship, and tradeoffs among paradigms enabling sound choices of programming language for application-specific development. Programming projects.

COM S 350: Number Theory

(Cross-listed with MATH). (3-0) Cr. 3. S.

Prereq: MATH 201 or COM S 230

Divisibility, integer representations, primes and divisors, linear diophantine equations, congruences, and multiplicative functions. Applications to cryptography. Additional topics, chosen at the discretion of the instructor.

COM S 352: Introduction to Operating Systems

(3-1) Cr. 3. F.S.

Prereq: COM S 321 or CPR E 381 and COM S 327 or CPR E 288; ENGL 250

Survey of operating system, networking and parallel programming issues. Introduction of processes, threads, process synchronization, deadlocks, memory, file systems, networking, security threats and encryption. Programming projects.

COM S 362: Object-Oriented Analysis and Design

(Cross-listed with S E). (3-0) Cr. 3. F.S.

Prereq: Minimum of C- in COM S 228 and MATH 165; ENGL 250

Object-oriented requirements analysis and systems design. Design notations such as the Unified Modeling Language. Design Patterns. Group design and programming with large programming projects.

COM S 363: Introduction to Database Management Systems

(3-0) Cr. 3. F.S.

Prereq: Minimum of C- in COM S 228 and MATH 165; ENGL 250

Relational, object-oriented, semistructured and query languages. SQL, XML, and NO-SQL. Database design using entity-relationship model, data dependencies, and relational database design. Application development in SQL-like languages and general purpose host languages with application program interfaces and a commonly used Object Relational Mapping framework. Web application development. Programming Projects.

COM S 398: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of department chair

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

COM S 402: Computer Science Senior Project

Cr. 2-3. Repeatable, maximum of 6 credits. F.S.

Prereq: COM S 309, COM S 311, COM S 321, COM S 331, ENGL 250, SP CM 212, and Senior Classification

Students work as individuals and teams to complete the planning, design, and implementation of a significant project in the topic area. Oral and written reports. No more than 6 credits of 402A, 402B, and 402C may be used toward graduation.

COM S 402A: Computer Science Senior Project: Multimedia and Computer Gaming I

Cr. 2-3. Repeatable, maximum of 6 credits. F.

Prereq: COM S 309, COM S 311, COM S 321, COM S 331, and COM S 437, Senior Classification

Students conceive, plan, architect and design a computer game. Student registered in this course will work with students in ARTIS 409. Oral and written reports. No more than 6 credits of 402A, 402B, and 402C may be used toward graduation.

COM S 402B: Computer Science Senior Project: Multimedia and Computer Gaming II

Cr. 2-3. Repeatable, maximum of 6 credits. S.

Prereq: COM S 402A, Senior Classification

Students implement, test, and present a completed production computer game. Students in this class will work with students in ARTIS 409. Oral and written reports. No more than 6 credits of 402A, 402B, and 402C may be used toward graduation.

COM S 402C: Computer Science Senior Project: Project in Computer Science

(0-6) Cr. 2-3. Repeatable, maximum of 6 credits. F.S.

Prereq: COM S 309, COM S 311, COM S 321, and COM S 331, Senior Classification

Students work as individuals and teams to complete the planning, design, and implementation of a significant project in the topic area. Oral and written reports. No more than 6 credits of 402A, 402B, and 402C may be used toward graduation.

COM S 409: Software Requirements Engineering

(Dual-listed with COM S 509). (3-0) Cr. 3.

Prereq: COM S 309; for graduate credit: graduate standing or permission of instructor

The requirements engineering process including elicitation, requirements analysis fundamentals, requirements specification and communication, and requirements evaluation. Modeling of functional and nonfunctional requirements, traceability, and requirements change management. Case studies and software projects.

COM S 410: Distributed Development of Software

(Dual-listed with COM S 510). (3-0) Cr. 3.

Prereq: COMS 228, COMS 309, COMS 327; for graduate credit: graduate standing or permission of instructor

Teams of students develop software applications in a modern software engineering environment. Importance, effective processes pertaining to team organization, management and communication, and cultural issues of distributed development. Graduate credit requires in-depth study of concepts and oral presentations.

COM S 412: Formal Methods in Software Engineering

(Dual-listed with COM S 512). (Cross-listed with CPR E, S E). (3-0) Cr. 3.

Prereq: COM S 311; STAT 305 or STAT 330 or STAT 341; for graduate credit: graduate standing or permission of instructor

A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

COM S 413: Foundations and Applications of Program Analysis

(Dual-listed with COM S 513). Cr. 3.

Prereq: COM S 342

Algorithms and tools for automatically reasoning about code and program executions to predict software behavior. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation and symbolic execution. Applications of program analysis to improve software security, performance and testing. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

COM S 414: Gerontechnology in Smart Home Environments

(Dual-listed with COM S 514). (3-0) Cr. 3.

Prereq: COM S 227 or COM S 207 or GERON 377 or ARTGR 271 or equivalent; for graduate credit: graduate standing or permission of instructor

Interdisciplinary course designed for students interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. Research report and oral presentation required for graduate credit.

COM S 415: Software System Safety

(Dual-listed with COM S 515). (3-0) Cr. 3.

Prereq: COM S 309 or COM S 311; for graduate credit: graduate standing or permission of instructor

An introduction to the hazard analysis, safety requirements, design, and testing of software for safety-critical and high-dependability systems. Safety analysis techniques, fault identification and recovery, and certification issues. Emphasizes a case-based and systematic approach to software's role in safe systems.

COM S 417: Software Testing

(Cross-listed with S E). (3-0) Cr. 3.

Prereq: COM S 309; COM S 230 or CPR E 310; ENGL 250, SP CM 212

An introduction to software testing principles and techniques. Test models, test design, test adequacy criteria; regression, integration, and system testing; and software testing tools.

COM S 418: Introduction to Computational Geometry

(Dual-listed with COM S 518). (3-0) Cr. 3.

Prereq: COM S 311; for graduate credit: graduate standing or permission of instructor

Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Convex hulls, line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams, Delaunay triangulations, geometric data structures, robot motion planning, visibility graphs. Other selected topics. Programming assignments. Scholarly report required for graduate credit.

COM S 421: Logic for Mathematics and Computer Science

(Cross-listed with MATH). (3-0) Cr. 3.

Prereq: MATH 301 or MATH 207 or MATH 317 or COM S 230 or CPR E 310

Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, program specification and verification, model checking and binary decision diagrams, temporal logic and modal logic.

COM S 424: Introduction to High Performance Computing

(Cross-listed with CPR E, MATH). (2-2) Cr. 3. F.

Prereq: MATH 265; MATH 207 or MATH 317; or permission of instructor.

Unix, serial programming of scientific applications, OpenMP for shared-memory parallelization. No Unix, Fortran or C experience required.

COM S 425: High Performance Computing for Scientific and Engineering Applications

(Cross-listed with CPR E). (2-2) Cr. 3.

Prereq: COM S 311, ENGL 250, SP CM 212

Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports.

COM S 426: Introduction to Parallel Algorithms and Programming

(Dual-listed with COM S 526). (Cross-listed with CPR E). (3-2) Cr. 4. F.

Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

COM S 430: Concurrent Programming in Practice

(3-1) Cr. 3.

Prereq: COM S 311, COM S 362 or COM S 363, ENGL 250, SP CM 212

A practical course in concepts, techniques, languages, and frameworks for concurrent and asynchronous systems. Concurrency fundamentals: threads, synchronization locks, waiting and notification, memory visibility. Immutability and thread confinement. Concurrent data structures and utilities, thread pools. Asynchronous programming with callbacks, futures, and message passing. Issues of aliasing, ownership and borrowing. Transactional memory, immutable and versioned data structures. Alternatives to threads and locks: event-driven systems, the actor model, CSP, coroutines. Students will investigate several non-mainstream languages supporting different concurrency models. Oral and written reports.

COM S 433: Molecular Programming of Nanoscale Devices and Processes

(Dual-listed with COM S 533). (3-0) Cr. 3.

Prereq: Minimum of C- in COM S 331 or permission of instructor; for graduate credit: graduate standing or permission of instructor

Programming, modeling, and analysis of natural and engineered systems at the nanoscale. Topics include chemical reaction networks, strand displacement systems, models of self-assembly, biomolecular origami, and molecular robotics. Emphasis on mathematical methods of describing, simulating, programming, and assessing the computational power of such systems. Graduate credit requires a written or oral report on current research.

COM S 435: Algorithms for Large Data Sets: Theory and Practice

(Dual-listed with COM S 535). (3-0) Cr. 3.

Prereq: COM S 311 or equivalent; for graduate credit: graduate standing or permission of instructor

Algorithmic challenges involved in solving computational problems on massive data sets. Probabilistic data structures, Curse of Dimensionality and dimensionality reduction, locality sensitive hashing, similarity measures, matrix decompositions. Optimization problems in massive data analysis. Computational problems that arise in the context of web search, social network analysis, online advertising etc. Practical aspects include implementation and performance evaluation of the algorithms on real world data sets. Graduate credit requires a written report on current research.

COM S 437: Computer Game and Media Programming

(3-0) Cr. 3.

Prereq: COM S 336

Video game programming using current game engine interfaces with real hardware. Particular attention is paid to the development environment, tool chains, 2D graphics, 3D graphics, controllers, memory management, and audio systems.

COM S 440: Principles and Practice of Compiling

(Dual-listed with COM S 540). (3-1) Cr. 3.

Prereq: COM S 331 or COM S 342; ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 440 and 540. Topics include: lexical, syntactic and semantic analyses, syntax-directed translation, code generation, runtime environment and library support.

COM S 441: Programming Languages

(Dual-listed with COM S 541). (3-1) Cr. 3.

Prereq: COM S 342 or COM S 440; for graduate credit: graduate standing or permission of instructor

Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

COM S 444: Bioinformatic Analysis

(Cross-listed with BCB, BCBO, BIOL, CPR E, GEN). (4-0) Cr. 4. F.

Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).

Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

COM S 453: Privacy Preserving Algorithms and Data Security

Cr. 3.

Prereq: COM S 311

Fundamentals of privacy preserving algorithms, data security, anonymization, and techniques and mechanisms to minimize disclosure of sensitive information while maintaining availability. Theory and fundamentals underpinning measures to evaluate the privacy and availability of data; implementation and deployment of privacy-preserving data operations including pre- and post-randomization techniques, homomorphisms, and secure function evaluation protocols. Theory and practice of the algorithmic limits on data privacy, including the cost in terms of time and space complexity.

COM S 454: Distributed Systems

(Dual-listed with COM S 554). (Cross-listed with CPR E). (3-1) Cr. 3.

Prereq: COM S 311; COM S 352 or CPR E 308; for graduate credit: graduate standing or permission of instructor

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

COM S 455: Simulation: Algorithms and Implementation

(Dual-listed with COM S 555). (3-0) Cr. 3.

Prereq: COM S 311; STAT 305 or 330 or 341; ENGL 150, SP CM 212; for graduate credit: graduate standing or permission of instructor

Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts.

COM S 461: Principles and Internals of Database Systems

(Dual-listed with COM S 561). (3-1) Cr. 3.

Prereq: COM S 311, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Database design including entity-relationship model, relational data model, and non-relational data models, data dependency, and normalization. Database management including physical storage, access methods, query processing, and transaction management. Database systems of special purposes such as spatial databases, mobile object databases, and multimedia databases. Introduction to current database research such as cloud data management and Internet information retrieval.

COM S 472: Principles of Artificial Intelligence

(Dual-listed with COM S 572). (3-1) Cr. 3.

Prereq: COM S 311, STAT 330 or STAT 305, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Specification, design, implementation, and selected applications of intelligent software agents and multi-agent systems. Computational models of intelligent behavior, including problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction. Reactive, deliberative, rational, adaptive, learning and communicative agents and multiagent systems. Artificial intelligence programming. Research project and written report required for graduate credit.

COM S 474: Introduction to Machine Learning

(Dual-listed with COM S 574). (3-1) Cr. 3.

Prereq: COM S 311, STAT 330 or STAT 305, MATH 165, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Introduction to tools and techniques of machine learning for applications. Selected machine learning techniques in practical data mining for classification, regression, and clustering, e.g., association rules, decision trees, linear models, Bayesian learning, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, and clustering algorithms. Selected applications in data mining and pattern recognition.

COM S 476: Motion Strategy Algorithms and Applications

(Dual-listed with COM S 576). Cr. 3.

Prereq: ENGL 250, SP CM 212, COM S 311

Recent techniques for developing algorithms that automatically generate continuous motions while satisfying geometric constraints. Applications in areas such as robotics and graphical animation. Basic path planning. Kinematics, configuration space, and topological issues. Collision detection. Randomized planning. Nonholonomic systems. Optimal decisions and motion strategies. Coordination of Multiple Bodies. Representing and overcoming uncertainties. Visibility-based motion strategies. Implementation of software that computes motion strategies. Written reports.

COM S 477: Problem Solving Techniques for Applied Computer Science

(Dual-listed with COM S 577). (3-0) Cr. 3.

Prereq: COM S 228; COM S 230 or CPR E 310, MATH 166, MATH 207 or MATH 317, or consent of the instructor; for graduate credit: graduate standing or permission of instructor

Selected topics in applied mathematics, algorithms, and geometry that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Homogeneous coordinates and transformations, perspective projection, rotations in space, quaternions, polynomial interpolation, roots of polynomials and polynomial systems, solution of linear and nonlinear equations, parametric and algebraic curves, curvature, torsion, Frenet formulas, surfaces, principal curvatures, Gaussian and mean curvatures, geodesics, approximation, Fourier series and fast Fourier transform, linear programming, data fitting, least squares, simplex method, nonlinear optimization, Lagrange multipliers, calculus of variations. Programming components. Scholarly report required for graduate credit.

COM S 481: Numerical Methods for Differential Equations

(Cross-listed with MATH). (3-0) Cr. 3. S.

Prereq: MATH 265 and either MATH 266 or MATH 267

First order Euler method, high order Runge-Kutta methods, and multistep methods for solving ordinary differential equations. Finite difference and finite element methods for solving partial differential equations. Local truncation error, stability, and convergence for finite difference method. Numerical solution space, polynomial approximation, and error estimate for finite element method. Computer programming required.

COM S 486: Fundamental Concepts in Computer Networking

(3-0) Cr. 3.

Prereq: COM S 352 or CPR E 308

An introduction to fundamental concepts in the design and implementation of computer communication in both wired and wireless networks, their protocols, and applications. Layered network architecture in the Internet, applications, transport, network, and data link layers and their protocols, Socket API, software-defined networking, and network security.

COM S 487: Network Programming, Applications, and Research Issues

(Dual-listed with COM S 587). (3-0) Cr. 3.

Prereq: Com S 352 or CPR E 489 or equivalent; for graduate credit: graduate standing or permission of instructor

Programming paradigms for building distributed and networking applications, including multithreaded client-server programming, socket programming, distributed object frameworks and programming suites, and web computing and security. Introduction to some on-going research issues in distributed and networking applications, including peer-to-peer computing, multimedia communications, and mobile computing and networking. Written report and oral presentation required for graduate credit.

COM S 490: Independent Study

Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: 6 credits in computer science, permission of instructor

No more than 9 credits of Com S 490 or Com S 490H may be counted toward graduation.

COM S 490H: Independent Study: Honors

Cr. arr. Repeatable, maximum of 9 credits. F.S.

Prereq: 6 credits in computer science, permission of instructor

No more than 9 credits of Com S 490 or Com S 490H may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

COM S 509: Software Requirements Engineering

(Dual-listed with COM S 409). (3-0) Cr. 3.

Prereq: COM S 309; for graduate credit: graduate standing or permission of instructor

The requirements engineering process including elicitation, requirements analysis fundamentals, requirements specification and communication, and requirements evaluation. Modeling of functional and nonfunctional requirements, traceability, and requirements change management. Case studies and software projects.

COM S 510: Distributed Development of Software

(Dual-listed with COM S 410). (3-0) Cr. 3.

Prereq: COMS 228, COMS 309, COMS 327; for graduate credit: graduate standing or permission of instructor

Teams of students develop software applications in a modern software engineering environment. Importance, effective processes pertaining to team organization, management and communication, and cultural issues of distributed development. Graduate credit requires in-depth study of concepts and oral presentations.

COM S 511: Design and Analysis of Algorithms

(Cross-listed with CPR E). (3-0) Cr. 3.

Prereq: COM S 311

A study of algorithm design and analysis techniques. Network flows and linear programming. Randomized algorithms. NP-completeness. Approximation algorithms. Fixed-parameter algorithms.

COM S 512: Formal Methods in Software Engineering

(Dual-listed with COM S 412). (3-0) Cr. 3.

Prereq: COM S 311; STAT 305 or STAT 330 or STAT 341; for graduate credit: graduate standing or permission of instructor

A study of formal techniques for model-based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms and tools for automatic analysis of systems. Graduate credit requires in-depth study of concepts.

COM S 513: Foundations and Applications of Program Analysis

(Dual-listed with COM S 413). (Cross-listed with CPR E). Cr. 3.

Prereq: COM S 342

Algorithms and tools for automatically reasoning about code and program executions to predict software behavior. Theory and foundations related to control flow analysis, dataflow analysis, abstract interpretation and symbolic execution. Applications of program analysis to improve software security, performance and testing. Concepts, algorithms, tools, benchmarks, methodologies for solving problems using program analysis and for preparing research in program analysis.

COM S 514: Gerontechnology in Smart Home Environments

(Dual-listed with COM S 414). (3-0) Cr. 3.

Prereq: COM S 227 or COM S 207 or GERON 377 or ARTGR 271 or equivalent; for graduate credit: graduate standing or permission of instructor

Interdisciplinary course designed for students interested in assistive technology, pervasive computing, mobile computing and principles of universal and inclusive design for end users, in particular, the elderly population. Students work in semester-long projects as interdisciplinary teams to apply knowledge obtained from lectures and mutual presentations. Research report and oral presentation required for graduate credit.

COM S 515: Software System Safety

(Dual-listed with COM S 415). (3-0) Cr. 3.

Prereq: COM S 309 or COM S 311; for graduate credit: graduate standing or permission of instructor

An introduction to the hazard analysis, safety requirements, design, and testing of software for safety-critical and high-dependability systems. Safety analysis techniques, fault identification and recovery, and certification issues. Emphasizes a case-based and systematic approach to software's role in safe systems.

COM S 518: Introduction to Computational Geometry

(Dual-listed with COM S 418). (3-0) Cr. 3.

Prereq: COM S 311; for graduate credit: graduate standing or permission of instructor

Introduction to data structures, algorithms, and analysis techniques for computational problems that involve geometry. Convex hulls, line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams, Delaunay triangulations, geometric data structures, robot motion planning, visibility graphs. Other selected topics. Programming assignments. Scholarly report required for graduate credit.

COM S 525: Numerical Analysis of High Performance Computing

(Cross-listed with CPR E, MATH). (3-0) Cr. 3. S.

Prereq: CPR E 308 or MATH 481; experience in scientific programming; knowledge of FORTRAN or C

Introduction to parallelization techniques and numerical methods for distributed memory high performance computers. A semester project in an area related to each student's research interests is required.

COM S 526: Introduction to Parallel Algorithms and Programming

(Dual-listed with COM S 426). (Cross-listed with CPR E). (3-2) Cr. 4. F.

Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311

Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

COM S 531: Theory of Computation

(3-0) Cr. 3.

Prereq: COM S 331

A systematic study of the fundamental models and analytical methods of theoretical computer science. Computability, the Church-Turing thesis, decidable and undecidable problems. Computational resources such as time, space, and nonuniformity. Complexity classes, computational intractability and completeness. Selected topics from randomness, algorithmic information theory, and logic.

COM S 533: Molecular Programming of Nanoscale Devices and Processes

(Dual-listed with COM S 433). (3-0) Cr. 3.

Prereq: Minimum of C- in COM S 331 or permission of instructor; for graduate credit: graduate standing or permission of instructor

Programming, modeling, and analysis of natural and engineered systems at the nanoscale. Topics include chemical reaction networks, strand displacement systems, models of self-assembly, biomolecular origami, and molecular robotics. Emphasis on mathematical methods of describing, simulating, programming, and assessing the computational power of such systems. Graduate credit requires a written or oral report on current research.

COM S 535: Algorithms for Large Data Sets: Theory and Practice

(Dual-listed with COM S 435). (3-0) Cr. 3.

Prereq: COM S 311 or equivalent; for graduate credit: graduate standing or permission of instructor

Algorithmic challenges involved in solving computational problems on massive data sets. Probabilistic data structures, Curse of Dimensionality and dimensionality reduction, locality sensitive hashing, similarity measures, matrix decompositions. Optimization problems in massive data analysis. Computational problems that arise in the context of web search, social network analysis, online advertising etc. Practical aspects include implementation and performance evaluation of the algorithms on real world data sets. Graduate credit requires a written report on current research.

COM S 540: Principles and Practice of Compiling

(Dual-listed with COM S 440). (3-1) Cr. 3.

Prereq: COM S 331 or COM S 342; ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Theory of compiling and implementation issues of programming languages. Programming projects leading to the construction of a compiler. Projects with different difficulty levels will be given for 440 and 540. Topics include: lexical, syntactic and semantic analyses, syntax-directed translation, code generation, runtime environment and library support.

COM S 541: Programming Languages

(Dual-listed with COM S 441). (3-1) Cr. 3.

Prereq: COM S 342 or COM S 440; for graduate credit: graduate standing or permission of instructor

Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

COM S 544: Fundamentals of Bioinformatics

(Cross-listed with BCB, CPR E, GDCB). (4-0) Cr. 4. F.

Prereq: MATH 165 or STAT 401 or equivalent

A practical, hands-on overview of how to apply bioinformatics to biological research. Recommended for biologists desiring to gain computational molecular biology skills. Topics include: sequence analysis, genomics, proteomics, phylogenetic analyses, ontology enrichment, systems biology, data visualization and emergent technologies.

COM S 549: Advanced Algorithms in Computational Biology

(Cross-listed with CPR E). (3-0) Cr. 3.

Prereq: COM S 311 and either COM S 228 or COM S 208

Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

COM S 551: Computational Techniques for Genome Assembly and Analysis

(3-0) Cr. 3.

Prereq: COM S 311 and some knowledge of programming

Introduction to a big data research area in bioinformatics. Focus on applying computational techniques to huge genomic sequence data. These techniques include finding optimal sequence alignments, generating genome assemblies, finding genes in genomic sequences, mapping short sequences onto a genome assembly, finding single-nucleotide and structural variations, building phylogenetic trees from genome sequences, and performing genome-wide association studies.

COM S 552: Principles of Operating Systems

(3-0) Cr. 3.

Prereq: For graduate credit: graduate standing or permission of instructor

A comparative study of high-level language facilities for process synchronization and communication. Analysis of deadlock, concurrency control and recovery. Protection issues including capability-based systems, access and flow control, encryption, and authentication. Additional topics chosen from distributed operating systems, soft real-time operating systems, and advanced security issues. Programming and research projects.

COM S 554: Distributed Systems

(Dual-listed with COM S 454). (Cross-listed with CPR E). (3-1) Cr. 3.

Prereq: COM S 311; COM S 352 or CPR E 308; for graduate credit: graduate standing or permission of instructor

Theoretical and practical issues of design and implementation of distributed systems. The client server paradigm, inter-process communications, synchronization and concurrency control, naming, consistency and replication, fault tolerance, and distributed file systems. Graduate credit requires additional in-depth study of concepts. Programming projects and written reports.

COM S 555: Simulation: Algorithms and Implementation

(Dual-listed with COM S 455). (3-0) Cr. 3.

Prereq: COM S 311; STAT 305 or 330 or 341; ENGL 150, SP CM 212; for graduate credit: graduate standing or permission of instructor

Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts.

COM S 556: Analysis Algorithms for Stochastic Models

(3-0) Cr. 3.

Prereq: Graduate standing or permission of instructor

Introduction to the use of stochastic models to study complex systems, including network communication and distributed systems. Data structures and algorithms for analyzing discrete-state models expressed in high-level formalisms. State space and reachability graph construction, model checking, Markov chain construction and numerical solution, computation of performance measures, product-form models, approximations, and advanced techniques.

COM S 557: Computer Graphics and Geometric Modeling

(Cross-listed with CPR E, M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: M E 421, programming experience in C

Fundamentals of computer graphics technology. Data structures. Parametric curve and surface modeling. Solid model representations. Applications in engineering design, analysis, and manufacturing.

COM S 558: Introduction to the 3D Visualization of Scientific Data

(Cross-listed with GEOL, HCI). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: Graduate-student standing in the mathematical or natural sciences or engineering; basic programming knowledge

Introduction to visualizing scientific information with 3D computer graphics and their foundation in human perception. Overview of different visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, and engineering). Class project in interactive 3D visualization using the ParaView, Mayavi, TVTK, VTK or a similar system.

COM S 559: Security and Privacy in Cloud Computing

(Cross-listed with CPR E). Cr. 3.

Prereq: COM S 352 or CPR E 308, and COM S 486 or CPR E 489 or CPR E 530

Introduction to cloud computing concepts and systems. Security and privacy threats in cloud computing. Practical techniques for cloud computing security. Theoretical and practical solutions for secure outsourcing of data and computation. Oral presentations and research projects.

COM S 560: Data-Driven Security and Privacy

(Cross-listed with CPR E, INFAS). Cr. 3. Alt. S., offered irregularly.

Prereq: CPR E 531; COM S 474 or COM S 573

Examination of applications of machine learning and big data techniques to various security and privacy problems, as well as secure and privacy-preserving machine learning algorithms.

COM S 561: Principles and Internals of Database Systems

(Dual-listed with COM S 461). (3-1) Cr. 3.

Prereq: COM S 311, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Database design including entity-relationship model, relational data model, and non-relational data models, data dependency, and normalization. Database management including physical storage, access methods, query processing, and transaction management. Database systems of special purposes such as spatial databases, mobile object databases, and multimedia databases. Introduction to current database research such as cloud data management and Internet information retrieval.

COM S 567: Bioinformatics Algorithms

(Cross-listed with BCB, CPR E). (3-0) Cr. 3.

Prereq: COM S 228; COM S 330; credit or enrollment in BIOL 315, STAT 430
Biology as an information science. A review of the algorithmic principles that are driving the advances in bioinformatics and computational biology.

COM S 568: Statistical Bioinformatics

(Cross-listed with BCB, GDCB, STAT). (3-0) Cr. 3. S.

Prereq: BCB 567 or (BIOL 315 and one of STAT 430 or STAT 483 or STAT 583), credit or enrollment in GEN 409

Statistical models for sequence data, including applications in genome annotation, motif discovery, variant discovery, molecular phylogeny, gene expression analysis, and metagenomics. Statistical topics include model building, inference, hypothesis testing, and simple experimental design, including for big data/complex models.

COM S 569: Structural Bioinformatics

(Cross-listed with BBMB, BCB, CPR E, GDCB). (3-0) Cr. 3. F.

Prereq: BCB 567, BBMB 316, GEN 409, STAT 430

Molecular structures including genes and gene products: protein, DNA and RNA structure. Structure determination methods, structural refinement, structure representation, comparison of structures, visualization, and modeling. Molecular and cellular structure from imaging. Analysis and prediction of protein secondary, tertiary, and higher order structure, disorder, protein-protein and protein-nucleic acid interactions, protein localization and function, bridging between molecular and cellular structures. Molecular evolution.

COM S 570: Systems Biology

(Cross-listed with BCB, CPR E, GDCB, STAT). (3-0) Cr. 3. S.

Prereq: BCB 567 or COM S 311, COM S 228, GEN 409, STAT 430 or STAT 483 or STAT 583

Algorithmic and statistical approaches in computational functional genomics and systems biology. Analysis of high throughput biological data obtained using system-wide measurements. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, and inference of transcriptional regulatory networks, protein-protein interaction networks, and metabolic networks. Dynamic systems and whole-cell models. Ontology-driven, network based, and probabilistic approaches to information integration.

COM S 572: Principles of Artificial Intelligence

(Dual-listed with COM S 472). (3-1) Cr. 3.

Prereq: COM S 311, STAT 330 or STAT 305, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Specification, design, implementation, and selected applications of intelligent software agents and multi-agent systems. Computational models of intelligent behavior, including problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction. Reactive, deliberative, rational, adaptive, learning and communicative agents and multiagent systems. Artificial intelligence programming. Research project and written report required for graduate credit.

COM S 573: Machine Learning

(3-1) Cr. 3.

Prereq: Graduate standing or permission of instructor

Basic principles, techniques, and applications of machine learning. Design, analysis, implementation, and applications of learning algorithms. Selected machine learning techniques in supervised learning, unsupervised learning, and reinforcement learning, including Bayesian decision theory, computational learning theory, decision trees, linear models, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, clustering algorithms, dimensionality reduction and feature selection. Selected applications in data mining and pattern recognition.

COM S 574: Introduction to Machine Learning

(Dual-listed with COM S 474). (3-1) Cr. 3.

Prereq: COM S 311, STAT 330 or STAT 305, MATH 165, ENGL 250, SP CM 212; for graduate credit: graduate standing or permission of instructor

Introduction to tools and techniques of machine learning for applications. Selected machine learning techniques in practical data mining for classification, regression, and clustering, e.g., association rules, decision trees, linear models, Bayesian learning, support vector machines, artificial neural networks, instance-based learning, probabilistic graphical models, ensemble learning, and clustering algorithms. Selected applications in data mining and pattern recognition.

COM S 575: Computational Perception

(Cross-listed with CPR E, HCI). (3-0) Cr. 3. S.

Prereq: Graduate standing or permission of instructor

Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

COM S 576: Motion Strategy Algorithms and Applications

(Dual-listed with COM S 476). Cr. 3.

Prereq: ENGL 250, SP CM 212, COM S 311

Recent techniques for developing algorithms that automatically generate continuous motions while satisfying geometric constraints. Applications in areas such as robotics and graphical animation. Basic path planning. Kinematics, configuration space, and topological issues. Collision detection. Randomized planning. Nonholonomic systems. Optimal decisions and motion strategies. Coordination of Multiple Bodies. Representing and overcoming uncertainties. Visibility-based motion strategies. Implementation of software that computes motion strategies. Written reports.

COM S 577: Problem Solving Techniques for Applied Computer Science

(Dual-listed with COM S 477). (3-0) Cr. 3.

Prereq: COM S 228; COM S 230 or CPR E 310, MATH 166, MATH 207 or MATH 317, or consent of the instructor; for graduate credit: graduate standing or permission of instructor

Selected topics in applied mathematics, algorithms, and geometry that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Homogeneous coordinates and transformations, perspective projection, rotations in space, quaternions, polynomial interpolation, roots of polynomials and polynomial systems, solution of linear and nonlinear equations, parametric and algebraic curves, curvature, torsion, Frenet formulas, surfaces, principal curvatures, Gaussian and mean curvatures, geodesics, approximation, Fourier series and fast Fourier transform, linear programming, data fitting, least squares, simplex method, nonlinear optimization, Lagrange multipliers, calculus of variations. Programming components. Scholarly report required for graduate credit.

COM S 578: Optimization for Machine Learning

Cr. 3.

Prereq: Com S 472, Com S 474, or instructor permission.

Advances in optimization theory and algorithms with evolving applications for machine learning. Theoretical foundations at the intersection of optimization and machine learning to conduct advanced research in machine learning and related fields. Emphasis on proof techniques for optimization algorithms in machine learning.

COM S 581: Computer Systems Architecture

(Cross-listed with CPR E). (3-0) Cr. 3. F.

Prereq: CPR E 381

Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

COM S 583: Reconfigurable Computing Systems

(Cross-listed with CPR E). (3-0) Cr. 3.

Prereq: Background in computer architecture, design, and organization

Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

COM S 586: Computer Network Architectures

(3-0) Cr. 3.

Prereq: COM S 511, COM S 552 or CPR E 489

Design and implementation of computer communication networks: layered network architectures, local area networks, data link protocols, distributed routing, transport services, network programming interfaces, network applications, error control, flow/congestion control, interconnection of heterogeneous networks, TCP/IP, software-defined networking and network security.

COM S 587: Network Programming, Applications, and Research Issues

(Dual-listed with COM S 487). (3-0) Cr. 3.

Prereq: Com S 352 or CPR E 489 or equivalent; for graduate credit: graduate standing or permission of instructor

Programming paradigms for building distributed and networking applications, including multithreaded client-server programming, socket programming, distributed object frameworks and programming suites, and web computing and security. Introduction to some on-going research issues in distributed and networking applications, including peer-to-peer computing, multimedia communications, and mobile computing and networking. Written report and oral presentation required for graduate credit.

COM S 590: Special Topics

Cr. arr. Repeatable.

Prereq: Permission of instructor

Special Topics in Computer Science.

COM S 592: Research Colloquia

Cr. 1.

Prereq: Graduate classification

Attend Computer Science Research Colloquia. Written summary is required. Offered on a satisfactory-fail basis only.

COM S 598: Graduate Internship

Cr. R. Repeatable.

Prereq: Graduate Classification

Supervised internship working in professional settings appropriate to the student's degree program. Academic work under faculty supervision.

COM S 599: Creative Component

Cr. 1-3.

Creative component for nonthesis option of Master of Science degree. Offered on a satisfactory-fail basis only.

Courses for graduate students:**COM S 610: Seminar**

Cr. arr.

Seminar in Computer Science. Offered on a satisfactory-fail basis only.

COM S 611: Advanced Topics in Analysis of Algorithms

(3-0) Cr. 3. Repeatable.

Prereq: COM S 511, COM S 531

Advanced algorithm analysis and design techniques. Topics include, but are not limited to, graph algorithms, geometric algorithms, approximation algorithms, fixed-parameter algorithms, randomized algorithms and advanced data structures. Content varies by semester.

COM S 612: Distributed Algorithms

(3-0) Cr. 3.

Prereq: COM S 511 or COM S 531

The theory of distributed computation. Algorithms, lower bounds and impossibility results. Fundamental problems including consensus, leader election, mutual exclusion and clock synchronization. Synchronous, asynchronous and partially synchronous distributed systems models. Shared memory and message passing systems. Fault-tolerance and randomization. Wait-free object simulations. Distributed shared memory. Special topics vary from year to year.

COM S 626: Parallel Algorithms for Scientific Applications

(Cross-listed with CPR E). (3-0) Cr. 3.

Prereq: CPR E 526

Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.

COM S 631: Advanced Topics in Computational Complexity

(3-0) Cr. 3. Repeatable.

Prereq: COM S 531

Advanced study in the quantitative theory of computation. Time and space complexity of algorithmic problems. The structure of P, NP, PH, PSPACE, and other complexity classes, especially with respect to resource-bounded reducibilities and complete problems. Complexity relative to auxiliary information, including oracle computation and relativized classes, randomized algorithms, advice machines, Boolean circuits. Kolmogorov complexity and randomness. Novel models of computation emerging in a rapidly changing field.

COM S 633: Advanced Topics in Computational Randomness

(3-0) Cr. 3. Repeatable.

Prereq: COM S 531

Advanced study of the role of randomness in computation. Randomized algorithms, derandomization, and probabilistic complexity classes. Kolmogorov complexity, algorithmic information theory, and algorithmic randomness. Applications chosen from cryptography, interactive proof systems, computational learning, lower bound arguments, mathematical logic, and the organization of complex systems. Novel models of computation emerging in a rapidly changing field.

COM S 634: Theory of Games, Knowledge and Uncertainty

(3-0) Cr. 3.

Prereq: COM S 230

Fundamentals of Game Theory: individual decision making, strategic and extensive games, mixed strategies, backward induction, Nash and other equilibrium concepts. Discussion of Auctions and Bargaining. Repeated, Bayesian and evolutionary games. Interactive Epistemology: reasoning about knowledge in multiagent environment, properties of knowledge, agreements, and common knowledge. Reasoning about and representing uncertainty, probabilities, and beliefs. Uncertainty in multiagent environments. Aspects and applications of game theory, knowledge, and uncertainty in other areas, especially Artificial Intelligence and Economics, will be discussed.

COM S 641: Advanced Topics in Programming Language Semantics

(3-0) Cr. 3. Repeatable.

Prereq: COM S 531, COM S 541

Operational and other mathematical models of programming language semantics. Type systems and their soundness. Applications of semantics on areas such as program correctness, language design or translation.

COM S 652: Advanced Topics in Distributed Operating Systems

(3-0) Cr. 3. Repeatable.

Prereq: COM S 552

Concepts and techniques for network and distributed operating systems: communications protocols, processes and threads, name and object management, synchronization, consistency and replications for consistent distributed data, fault tolerance, protection and security, and distributed file systems. Research project.

COM S 657: Advanced Topics in Computer Graphics

(3-0) Cr. 3. Repeatable, maximum of 2 times.

Prereq: COM S 228, I E 557/M E 557/CPR E 557/COM S 557

Modern lighting models: Rendering Equation, Spherical Harmonics, Lafortune, Cook-Torrance. Non-polygonal primitives: volumes, points, particles. Textures: filtering, reflections creation. Graphics hardware: pipeline, performance issues, programmability in vertex and fragment path. Per-pixel lighting. Nonphotorealistic rendering. Radiosity; Ray tracing.

COM S 661: Advanced Topics in Database Systems

(3-0) Cr. 3. Repeatable.

Prereq: COM S 461 or COM S 561

Advanced topics chosen from the following: database design, data models, query systems, query optimization, incomplete information, logic and databases, multimedia databases; temporal, spatial and belief databases, semistructured data, concurrency control, parallel and distributed databases, information retrieval, data warehouses, wrappers, mediators, and data mining.

COM S 665: Advanced Topics in Software Engineering

Cr. 3. Repeatable, maximum of 6 credits. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: COM S 511

Advanced topics on software repository analysis, data mining and software engineering, software engineering for context-aware and situation-aware computing, distributed development, product lines, safety, security, and reliability, and traceability. Content varies by semester. Maximum 6 credits of COM S 665 may apply toward graduation.

COM S 665A: Advanced Topics in Software Engineering: Foundations

Cr. 3. Repeatable, maximum of 6 credits. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: COM S 511

Advanced topics on theoretical and technical foundations in Software Engineering. Content varies by semester. Maximum 6 credits of COM S 665 may apply toward graduation.

COM S 665B: Advanced Topics in Software Engineering: Empirical

Cr. 3. Repeatable, maximum of 6 credits.

Prereq: COM S 511

Advanced topics on empirical studies on human factors and other software engineering topics. Content varies by semester. Maximum 6 credits of COM S 665 may apply toward graduation.

COM S 672: Advanced Topics in Computational Intelligence

(3-0) Cr. 3. Repeatable.

Prereq: COM S 572 or COM S 573 or COM S 472 or COM S 474

Selected topics in probabilistic graphical models, causal inference, semantic web, information retrieval, natural language processing, knowledge representation and reasoning, deep learning, embedding, distributed learning, incremental learning, multi-task learning, multi-strategy learning, multi-relational learning, modeling the internet and the web, automated scientific discovery, neural and cognitive modeling. Advanced applications of artificial intelligence in bioinformatics, distributed systems, natural language, multimedia data, decision making, robotics, and more.

COM S 673: Advanced Topics in Computational Models of Learning

(3-0) Cr. 3. Repeatable.

Prereq: COM S 572 or COM S 573 or COM S 472 or COM S 474

Advanced topics in machine learning. Selected topics in computational learning theory, Bayesian and information theoretic models (ML, MAP, MDL, MML), probabilistic graphical models, statistical relational learning, reinforcement learning, and deep learning.

COM S 681: Advanced Topics in Computer Architecture

(Cross-listed with CPR E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: CPR E 581. Repeatable with Instructor permission

Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

COM S 699: Research

Cr. arr. Repeatable.

Prereq: Approval of instructor

Research. Offered on a satisfactory-fail basis only.

Construction Engineering (CON E)

Any experimental courses offered by CON E can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

CON E 121: Cornerstone Learning Community: Orientation to Academic Life

(0-2) Cr. 1. F.

Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Introduction to construction industry professionals. Teamwork topics include interdisciplinary teamwork, skills for academic success, diversity issues and leadership. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources.

CON E 122: Cornerstone Learning Community: Orientation to Professional Life

(0-2) Cr. 1. S.

Continuation of Con E 121. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research, leadership. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

CON E 222: Contractor Organization and Management of Construction

(2-2) Cr. 3. F.S.

Prereq: Completion of basic program within current semester.

Entry level course for construction engineering: integration of significant engineering and management issues related to construction company operations. Company organization and operations; construction and project administration; construction contracts; project delivery systems; quality management; construction safety; contract and project documents.

CON E 241: Construction Materials and Methods

(2-3) Cr. 3. F.S.

Prereq: Completion of basic program

Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems. Blueprint reading and quantity takeoff techniques.

CON E 251: Mechanical/Electrical Materials and Methods

(0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in CON E 241

Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff.

CON E 322: Construction Equipment and Heavy Construction Methods

(2-2) Cr. 3. F.S.

Prereq: CON E 222 and CON E 241, or C E 306 in lieu of CON E 222 and 241

Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications.

CON E 340: Concrete and Steel Construction

(2-2) Cr. 3. F.S.

Prereq: E M 324 and CON E 222, or CE 306 in lieu of CON E 222

Planning and field engineering for concrete and steel construction. Design and applications of concrete formwork to construction. Erection of structural steel. Emerging industry themes.

CON E 352: Mechanical Systems in Buildings

(2-2) Cr. 3. F.S.

Prereq: CON E 222, CON E 251, PHYS 222; or permission of instructor

Comprehensive coverage of mechanical systems, plumbing, fire protection. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

CON E 353: Electrical Systems in Buildings

(2-2) Cr. 3. F.S.

Prereq: PHYS 222 and credit or enrollment in CON E 352; or permission of instructor

Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

CON E 354: Building Energy Performance

Cr. 3. F.

Prereq: CON E 352 or permission of instructor

Energy performance of buildings, building shells, HVAC, electrical and other building systems. Analysis and evaluation of building performance, energy efficiency, environmental quality, first costs, and operating costs. Strategies to exceed energy code requirements through the ASHRAE Standard 90.1.

CON E 380: Engineering Law

(3-0) Cr. 3. F.S.

Prereq: Junior classification

Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation.

CON E 381: Bidding Construction Projects I

(0-3) Cr. 1.

Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 381A: Bidding Construction Projects I: Heavy and Highway

(1-0) Cr. 1. F.

Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

CON E 396: Summer Internship

Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services

Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

CON E 398: Cooperative Education (Co-op)

Cr. R. Repeatable. F.S.

Prereq: Permission of department and Engineering Career Services

Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

CON E 422: Construction Cost Estimating and Cost Engineering

(2-2) Cr. 3. F.S.

Prereq: CON E 241, CON E 251, I E 305

Conceptual and detailed cost estimating. Theory and practice of estimating construction costs of materials, labor, equipment, contingency, overhead and markup. Estimating competencies and bid ethics. Electronic quantity take off and pricing methods. Assemblies costs, unit costs, production rates. Analysis of project profitability, cost analysis and cost control methods. Value engineering. Life cycle cost analysis.

CON E 441: Construction Planning, Scheduling, and Control

(2-2) Cr. 3. F.S.

Prereq: Credit or enrollment in CON E 422

Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications.

CON E 481: Bidding Construction Projects II

(0-3) Cr. 1.

Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481A: Bidding Construction Projects II: Heavy and Highway

(1-0) Cr. 1. F.

Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 487: Construction Engineering Design I

(2-2) Cr. 3. F.S.

Prereq: CON E 340 (B, H), CON E 352 (B, E, M), CON E 353 (B, E, M), CON E 422, CON E 441. Student must be within two semesters of graduation

The integrated delivery of project services as a team, including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

CON E 488: Construction Engineering Design II

(1-5) Cr. 3. F.S.

Prereq: CON E 340 (B,H), CON E 352 (B,E,M), CON E 353 (B,E,M), CON E 422, CON E 441. Student must be within two semesters of graduation.

Application of team design concepts to a construction engineering project. Project planning. Advanced construction and project management.

CON E 490: Independent Study

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

Individual study in any phase of construction engineering. Pre-enrollment contract required.

Criminal Justice Studies (CJ ST)

Any experimental courses offered by CJ ST can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**CJ ST 220: Introduction to Forensic Science**

(Cross-listed with ENT). (3-0) Cr. 3. S.

Prereq: none

Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced.

CJ ST 240: Introduction to the U.S. Criminal Justice System

(3-0) Cr. 3. F.

Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

CJ ST 241: Youth and Crime

(Cross-listed with SOC). (3-0) Cr. 3. F.

An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

CJ ST 320: American Judicial Process

(Cross-listed with POL S). (3-0) Cr. 3. S.

Prereq: POL S 215

An overview of the American judicial process. Emphasis on specific topics such as application of constitutional rights to the states (particularly the Fourth, Fifth, Sixth, and Fourteenth Amendments), mechanics of judicial opinions, constitutional philosophies of Supreme Court Justices, decisions of first impression, and the value and scope of precedent.

CJ ST 332: Philosophy of Law

(Cross-listed with PHIL). (3-0) Cr. 3. F.S.

Prereq: 3 credits in philosophy

Extent of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility.

CJ ST 339: Liberty and Law in America

(Cross-listed with PHIL, POL S). (3-0) Cr. 3. Alt. S., offered irregularly.

Prereq: Sophomore status

Competing conceptions of liberty in American political thought. Debates about how liberty should be protected by the law, in fields such as health care, drugs, property, speech, religion, and sex.

Meets U.S. Diversity Requirement

CJ ST 340: Deviant and Criminal Behavior

(Cross-listed with SOC). (3-0) Cr. 3. S.SS.

Prereq: SOC 134 or CJ ST 240

Theory and research on the etiology of types of social deviance; issues relating to crime, antisocial behavior and social policies designed to control deviant behavior.

CJ ST 341: Criminology

(3-0) Cr. 3. F.

Prereq: CJ ST 240

The nature of crime and criminology; the concept of crime; statistics and theories of criminality; major forms of crime; official responses to crime and control of crime.

CJ ST 351: Police and Society

(3-0) Cr. 3. F.S.

Prereq: CJ ST 241, SOC 241 or CJ ST 240

Introduction and overview of law enforcement in the United States. Theory and research on police history, function, and organization; constitutional issues of policing; and critical topics, such as community policing, officer discretion and decision-making, corruption, use of force, and racial profiling. The course illustrates the interconnections between communities, police organizations, citizens, and criminal offenders.

CJ ST 352: Punishment, Corrections, and Society

(3-0) Cr. 3. F.S.

Prereq: CJ ST 241, SOC 241 or CJ ST 240

Introduction and overview of corrections in the United States. Theory and research on probation, parole, intermediate sanctions, prison, inmate society, inmate behavior and misconduct, capital punishment, recidivism, correctional treatment, rehabilitation, and offender reintegration into society.

CJ ST 402: White-Collar Crime

(3-0) Cr. 3. S.

Prereq: CJ ST 241, SOC 241 or CJ ST 240

Introduction and overview of white-collar crime as a form of deviance. Theory and research on occupational, corporate, and organizational offending; prevalence, costs, and consequences of white-collar crime; predictors and correlates of white-collar crime; and political, business, and public policy responses to white-collar crime.

CJ ST 403: Criminal Offenders

(3-0) Cr. 3. F.S.

Prereq: CJ ST 240 or CJ ST 241

Introduction and overview of criminal offenders. Theory and research on epidemiology, offender typologies, etiology of violence, recidivism, societal costs, correctional supervision, treatment, and prevention of serious antisocial behavior.

CJ ST 404: Criminal Justice Policies

Cr. 3. S.

Prereq: CJ ST 240

Development, implementation and evaluation of criminal justice policies affecting major areas of the criminal justice system. History, development and operation of the criminal justice system, including policing, courts/sentencing, corrections, crime prevention, and offender rehabilitation.

CJ ST 405: Drugs and Crime

Cr. 3. Alt. F., offered irregularly.S.

Prereq: CJ ST 240

Analysis of the drug problem, including issues arising from the use and abuse of legal and illegal drugs and their relation to crime and the criminal justice system. Examination of issues related to effective prevention and treatment, crime, and the debates over the most effective policies for the control or prevention of drug abuse.

CJ ST 406: Gender and Crime

Cr. 3.

Prereq: CJ ST 240

Overview of the relationship between gender and crime. Examination of gender and gender roles definitions; how gender impacts criminal behavior in terms of offending, victimization, criminal justice processing, and working in the criminal justice system; and theories used to understand the gender gap in offending.

CJ ST 410: Capital Punishment

(3-0) Cr. 3.

Prereq: CJ ST 240

History, philosophy, demographics, administration, and punishment rationales of capital punishment in the United States from its founding to the present. Methods of execution and trends in public opinion about the death penalty. Examination of correlates of capital offending and criminological characteristics of persons who are sentenced to death.

CJ ST 460: Criminal and Juvenile Justice Practicum

(Cross-listed with SOC). Cr. 3-12. Repeatable, maximum of 12 credits. F.S.SS.

Prereq: Junior or senior classification; permission of criminal justice studies coordinator; major or minor in criminal justice or sociology

Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor's office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency. Assessed service learning component. Offered on a satisfactory-fail basis only. No more than a total of 9 credits of 460 can be counted toward graduation. No credits in Soc 460 may be used to satisfy minimum sociology requirements for sociology majors.

CJ ST 484: Topical Studies in Criminal and Juvenile Justice

(3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: 6 credits in CJ ST and permission from instructor

Thematic or topical issues and studies dealing with the sociology of police, judiciary, institutional and community-based corrections, gender/ethnicity and crime/delinquency, criminal and delinquent gangs, and crime and delinquency prevention.

Dance (DANCE)

Any experimental courses offered by DANCE can be found at:

registrar.iastate.edu/faculty-staff/courses/explistings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistings/>)

Courses primarily for undergraduates:

DANCE 120: Modern Dance I

(0-3) Cr. 1. F.S.

Introduction and practice of basic dance concepts, including preparatory techniques and guided creativity problems. No previous modern dance experience required. Offered on a satisfactory-fail basis only.

DANCE 130: Ballet I

(0-3) Cr. 1. F.S.

Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment. No previous ballet experience required. Offered on a satisfactory-fail basis only.

DANCE 140: Jazz I

(0-3) Cr. 1. F.S.

Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Offered on a satisfactory-fail basis only.

DANCE 150: Tap Dance I

(0-3) Cr. 1. F.

Instruction and practice in basic tap technique and terminology. No previous tap experience required. Offered on a satisfactory-fail basis only.

DANCE 160: Ballroom Dance I

(0-2) Cr. 1. F.S.

Instruction and practice in foxtrot, waltz, swing, cha cha, rumba, tango, and selected contemporary dances. Offered on a satisfactory-fail basis only.

DANCE 199: Dance Continuum

Cr. 0.5-2. Repeatable, maximum of 6 credits. S.

Prereq: Permission of instructor

Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Offered on a satisfactory-fail basis only.

DANCE 211: Fundamentals and Methods of Social and World Dance

(1-3) Cr. 1. S.

Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for kinesiology and health majors, open to others.

DANCE 220: Modern Dance Composition

(1-3) Cr. 2. F.

Prereq: DANCE 120 or previous modern dance experience

Theory and practice of the creative skills involved in solo and small group composition.

DANCE 222: Modern Dance II

(0-3) Cr. 1. F.

Prereq: DANCE 120 or previous modern dance experience

Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations.

DANCE 223: Modern Dance III

(0-3) Cr. 1. S.

Prereq: DANCE 222

Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles.

DANCE 224: Concert and Theatre Dance

(Cross-listed with THRE). (0-3) Cr. 0.5-2. Repeatable, maximum of 6 credits. F.S.

Prereq: By audition only

Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Offered on a satisfactory-fail basis only.

DANCE 232: Ballet II

(0-3) Cr. 1. S.

Prereq: Previous ballet experience

Technical skills in the classical movement vocabulary. Emphasis on alignment, techniques, sequence development, and performing quality.

DANCE 233: Ballet III

(0-3) Cr. 1. F.

Prereq: DANCE 232

Concentration on technical proficiency at the intermediate level. Pointe work and partnering opportunities available.

DANCE 242: Jazz II

(0-3) Cr. 1. S.

Prereq: Previous jazz dance experience

Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation.

DANCE 250: Yoga Movement

(0-2) Cr. 1. Repeatable. F.S.

Mixed-level Hatha Yoga class that emphasizes Iyengar style yoga. Yoga Movement is designed for developing awareness and personal practice with yoga poses and relaxation techniques. Attention will be paid to postural alignment to safely develop strength, endurance, flexibility, balance, and reduce stress. The practice develops awareness and consciousness in the physical body to help unite body and mind. Class will include introduction to other somatic practices, asanas (poses), breathing practices, meditation, yoga philosophy and deep relaxation.

DANCE 270: Dance Appreciation

(3-0) Cr. 3. F.S.

Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required. Meets International Perspectives Requirement.

DANCE 320: Sound and Movement

(2-2) Cr. 3. S.

Prereq: DANCE 220

Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods.

DANCE 360: History and Philosophy of Dance

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: DANCE 270

Study of the history of dance from early to modern times with emphasis on the theories and philosophies of contemporary modern dance, dancers, and dance educators.

DANCE 370: Advanced Studies in Dance

Cr. 1-3. Repeatable, maximum of 8 credits. F.S.

Prereq: 2 credits in dance

Advance registration required. Designed to meet special interests and talents of students to include both group and independent study in various aspects of dance as a performing art including production, choreography, and performance.

DANCE 384: Teaching Children's Dance

(1-3) Cr. 2. S.

Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children in expressive movement experiences.

DANCE 385: Methods of Teaching Dance

(1-3) Cr. 2. F.

Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance.

DANCE 386: Teaching Dance Technique and Composition

(1-3) Cr. 2.

Prereq: DANCE 320

Teaching yoga, body therapies, mindfulness and dance composition to enhance the physical and mental performance of the individual.

DANCE 490: Independent Study

Cr. 1-3. Repeatable, maximum of 6 credits.

Prereq: 6 credits in dance and permission of coordinator

Independent study of problems or areas of interest in dance.

DANCE 490A: Independent Study: Dance

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.

Prereq: 6 credits in dance and permission of coordinator

Independent study of problems or areas of interest in dance.

DANCE 490H: Independent Study in Dance - Honors

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.

Prereq: 6 credits in dance and permission of coordinator

Independent study of problems or areas of interest in dance for those admitted to the honors program.

Data Science (DS)

Any experimental courses offered by DS can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Design (DES)

Any experimental courses offered by DES can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**DES 230: Design Thinking**

(3-0) Cr. 3.

Introduction to design thinking processes, toolkits, and mindsets, and its interaction with art, design, and technology. Emphasis on interdisciplinary practices.

DES 241: Interdisciplinary Foundation Studio I

(0-6) Cr. 3.

Integration of art, design, and technology through contemporary strategies, methods, and approaches. Strategy and framework for design methodology and its implications on the disciplinary intersections.

DES 242: Interdisciplinary Foundation Studio II

(0-6) Cr. 3.

Hands-on exposure to a wide range of technologies as they relate to art and design. Move conceptual works quickly into visible and tangible forms that can be shared, tested, and evaluated based on quality. Multiple studio projects that will move at a fast pace and be iterative.

DES 250: Design Intersections

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Themes and issues that are relevant to the creative technologies used in art and design fields through guest artists, scientists, developers and corporate leaders.

DES 259: Design Field Study

Cr. R. Repeatable.

Prereq: Enrollment in or 2 credits of DES 240.

Off-campus tours of areas of interest within the design professions such as design offices, museums, buildings, and neighborhoods. Offered on a satisfactory-fail basis only.

DES 330: Visual Literacy for Design Critique

(3-0) Cr. 3. S.

Interpret, analyze, and evaluate visual materials, use images and text effectively to communicate ideas, and understand issues surrounding the creation and use of images and visual media for design critique. Precedent study and critique of sample student design work to understand principles of visual literacy and how to apply them to the presentation of design work. Emphasis on peer-to-peer discussion and in-class participation. Lecture and discussion format.

DES 333: Time-Based Digital Media

(Cross-listed with DSN S). (3-0) Cr. 3. S.

Prereq: DSN S 232 or equivalent.

Introduction to various time-based digital media tools to develop basic skills including sequencing, storytelling, animation, sound editing, and video production.

DES 340: Interdisciplinary Foundation Studio III

(0-12) Cr. 4. Repeatable.

Projects of increasing complexity requiring interdisciplinary approaches to contemporary challenges and opportunities. Field trip.

DES 491: Portfolio and Professional Preparation

(1-4) Cr. 3.

Discussion of interdisciplinary design practices and career planning. Guidance for interviewing, professional networking, business etiquette, and resume writing. Workshops and lectures.

DES 495: Launchpad

(0-12) Cr. 6.

Launchpad to design careers. Comprehensive interdisciplinary design work in four areas: design research, design management, design leadership, and design entrepreneurship. Advanced practice of design skills and project planning and development.

Design Studies (DSN S)

Any experimental courses offered by DSN S can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**DSN S 102: Design Studio I**

(1-6) Cr. 4.

A foundation design studio exploring two and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Creative processes, visual order, materials, and critical thinking are investigated through studio projects. Lectures and discussions cover the topics introduced in studios.

DSN S 110: Design Exchange Seminar I

(0-2) Cr. 1. F.

Prereq: Member of Design Exchange Learning Community

Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 111: Design Exchange Seminar II

(0-2) Cr. 1. S.

Prereq: Member of the Design Exchange Learning Community

Development and clarification of career and academic plans. Offered on a satisfactory-fail basis only.

DSN S 115: Design Collaborative Seminar

(1-0) Cr. 0.5.

Prereq: Member of Design Collaborative Learning Community

Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 131: Drawing I

(1-6) Cr. 4.

An introduction to methods of visual thinking and drawing through studio experiences and lectures. All design fields utilize visual communication and drawing. Focus on the use of drawing as a method for creative problem solving, design development and visual communication. Explore, from observation and imagination, the use of fast sketching and in-depth drawing, using various scales, mediums and processes.

DSN S 145: Diversity in Art

Cr. 1. Repeatable, maximum of 3 credits. S.

Prereq: None

Discussion on issues of diversity and inclusion utilizing the Art on Campus and University's Permanent Collection. Topics include ethnic heritage, family background, religious traditions, and interpersonal relationships, with a significant focus on instilling visual analysis skills.
None

DSN S 183: Design in Context

(3-0) Cr. 3.

Explores designed media, objects, places, spaces, structures, and systems as products of varied and often intersecting contexts. Using historical and contemporary case studies, investigates how cultural, economic, environmental, spatial, social, and temporal contexts, among others, affect design. Explores in particular how design addresses complex and multifaceted problems.

DSN S 232: Digital Design Communications

(3-0) Cr. 3.

Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

DSN S 301: Study Abroad Preparation Seminar

(1-0) Cr. 1. Repeatable.

Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 9 or more credits. Offered on a satisfactory-fail basis only.

DSN S 302: Design Leadership Seminar

(1-2) Cr. 2. Repeatable, maximum of 4 credits.

Prereq: Selection as a peer mentor for the Core Design program.

For students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Offered on a satisfactory-fail basis only.

DSN S 303: Design Ambassadors

(1-2) Cr. 1-2. Repeatable, maximum of 4 credits.

Prereq: Admittance into one of the professional programs in the College of Design

Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Offered on a satisfactory-fail basis only.

DSN S 310: Practical Experience

Cr. R.

Prereq: Permission of adviser or Coordinator of Design Studies

Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less. Offered on a satisfactory-fail basis only.

DSN S 332: Multi-Dimensional Digital Design Communication

Cr. 3.

Prereq: Arch 230, ARTGR 275, DSN S 232, or permission of the instructor

Investigations of interoperable digital-design tools, techniques and methods directed at human scale interactive hybrid design from ideation to visualization, synthesis to analysis, and realization to fabrication.

DSN S 333: Time-Based Digital Media

(Cross-listed with DES). (3-0) Cr. 3. S.

Prereq: DSN S 232 or equivalent.

Introduction to various time-based digital media tools to develop basic skills including sequencing, storytelling, animation, sound editing, and video production.

DSN S 445: Public Art/Public Space

(3-0) Cr. 3.

Prereq: Junior Standing, DSN S 102, DSN S 131, DSN S 183

Exploration of the history, precedents, and practice of public art and public space with a focus on developments since 1970 in the United States and abroad. Course includes development of a proposal for a site specific work of art.

Meets U.S. Diversity Requirement

DSN S 446: Interdisciplinary Design Studio

(0-12) Cr. 4-6. Repeatable, maximum of 18 credits.

Prereq: Junior classification in a curriculum in the College of Design and permission of instructor

Advanced interdisciplinary design projects.

DSN S 446H: Interdisciplinary Design Studio: Honors

(0-12) Cr. 5-7. Repeatable, maximum of 18 credits.

Prereq: Junior classification in a curriculum in the College of Design and permission of instructor

Advanced interdisciplinary design projects.

DSN S 478D: Landscape Architecture: History/Theory/Criticism

(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: L A 202 or senior or graduate classification

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478E: Landscape Architecture: Landscape Planning

(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: L A 202 or senior or graduate classification

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478G: Landscape Architecture: Graphics

(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: L A 202 or senior or graduate classification

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478I: Landscape Architecture: Interdisciplinary Studies

(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: L A 202 or senior or graduate classification

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478J: Landscape Architecture: International Studies

(Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: L A 202 or senior or graduate classification

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478K: Computer Applications

(Dual-listed with DSN S 578). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.

Prereq: L A 371 or senior classification or graduate standing

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 490: Independent Study

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490A: Independent Study: History

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490B: Independent Study: Technology

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490C: Independent Study: Communications

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490D: Independent Study: Design

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490E: Independent Study: Entrepreneurship

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490F: Independent Study: Social/Behavioral

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490G: Independent Study: Outreach

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment.

Independent investigation of a topic of special interest to the student.

DSN S 490H: Independent Study: Honors

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

DSN S 490I: Independent Study: Sustainability

Cr. 1-4. Repeatable, maximum of 9 credits.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment.

Independent investigation of a topic of special interest to the student.

Offered on a satisfactory-fail basis only.

DSN S 492: Introduction to Italian Culture

(1-0) Cr. 1. Repeatable, maximum of 3 credits.

Prereq: Enrollment in the College of Design Rome Study Abroad Program

Introduction to Italian contemporary culture for design students, including food, religion, fashion, politics, media, and social mores.

Courses primarily for graduate students, open to qualified undergraduates:

DSN S 546: Interdisciplinary Design Studio

(0-12) Cr. 4-6. Repeatable, maximum of 18 credits.

Prereq: Graduate or senior standing in the College of Design and permission of instructor

Advanced interdisciplinary design projects.

DSN S 578: Topical Studies in Landscape Architecture

(Dual-listed with DSN S 478). (3-0) Cr. 2-3. Repeatable. F.S.SS.

Prereq: Senior Classification or graduate standing

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578C: Construction

(Dual-listed with DSN S 478). (3-0) Cr. 2-3. Repeatable. F.S.SS.

Prereq: Senior Classification or graduate standing

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578H: Landscape Architecture: Honors

Cr. 2-3. Repeatable. F.S.SS.

Prereq: Senior classification or graduate standing

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 585: Renaissance Art

(3-0) Cr. 3.

Prereq: Graduate classification and permission of instructor

European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

DSN S 590: Special Topics

Cr. 1-4. Repeatable, maximum of 12 credits. F.S.SS.

Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment

Independent investigation of a topic of special interest to the student.

Dietetics (DIET)

Any experimental courses offered by DIET can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for graduate students, open to qualified undergraduates:

DIET 511: Research Methods

(3-0) Cr. 3. F.S.

Prereq: Enrollment in GP-IDEA MFCS in Dietetics

An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of DIET 511 or FCEDS 511 may count toward graduation.

DIET 524: Financial Management and Cost Controls

(3-0) Cr. 3. SS.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Overview of the fundamental knowledge of financial management, managerial accounting, and operational cost controls for dietetics professionals. Topics include a review of managerial accounting concepts for not-for-profit organizations and for-profit organizations based on the Uniform System of Accounts, value and risk analysis, budgeting, asset management, franchising and management contracts, cost-volume-profit analyses, and operational applications for financial performance.

DIET 526: Obesity Across the Lifespan

(3-0) Cr. 3. F.

Exploration of the affects that obesity has on public health, the healthcare system, and society in general. Overview of strategies to prevent obesity across the lifespan.

DIET 530: Nutrition in Wellness

(3-0) Cr. 3. S.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only.

DIET 532: Maternal and Child Nutrition

(3-0) Cr. 3. Alt. SS., offered even-numbered years.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

DIET 538: Nutrition: A Focus on Life Stages

(3-0) Cr. 3. F.Alt. SS., offered odd-numbered years.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.

DIET 540: Nutrition and Physical Activity in Aging

(Cross-listed with GERON). (3-0) Cr. 3. F.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

DIET 544: Pediatric Clinical Nutrition

(3-0) Cr. 3. F.

Prereq: enrollment in GP-IDEA MFCS in dietetics

Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems. www only.

DIET 546: Phytochemicals

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. www only.

DIET 547: Functional Foods in Chronic Disease Prevention

(3-0) Cr. 3. Alt. F., offered odd-numbered years.

Examination of nutritional science, food science, regulatory principles, and nutrient metabolism to understand and explain functional foods, nutraceuticals, and dietary supplements. Additionally students will evaluate the biochemical basis, technologies, legal requirements, and clinical assessment in the marketplace.

DIET 554: Statistics

(3-0) Cr. 3. Alt. F., offered irregularly.Alt. S., offered irregularly.Alt. SS., offered irregularly.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. www only. Only one of DIET 554 or Stat 401, 495, 542 may count toward graduation by students in the GPIEDA Dietetics program.

DIET 556: Advanced Nutrition: Micronutrients

(3-0) Cr. 3. S.SS.

Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics

The course features interrelationships of micronutrients in terms of biochemistry, physiology, genetics, and nutrition. Emphasis of the course is on developing understanding of how the coordination of structure and function is related to metabolic needs of the cell and its response to the environment. This integrated approach forms the basis for evaluating the micronutrient needs of humans in both normal and altered metabolic states. Only one of DIET 556 or NUTRS 502 may count toward graduation.

DIET 558: Advanced Nutrition: Macronutrients

(3-0) Cr. 3. SS.

Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics

Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. www only. Only one of DIET 558 or NUTRS 501 may count toward graduation.

DIET 560: Advanced Medical Nutrition Therapy

(3-0) Cr. 3. SS.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. www only. Only two of DIET 560 or NUTRS 561, 564 may count toward graduation.

DIET 565: International Nutrition and World Hunger

(3-0) Cr. 3. F.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. www only.

DIET 566: Nutrition Counseling and Education Methods

(Cross-listed with FS HN). (2-2) Cr. 3. F.S.

Prereq: FS HN 361 and FS HN 362

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

DIET 568: Entrepreneurship Theory and Practice

(3-0) Cr. 3. Alt. SS., offered odd-numbered years.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Definition and discussion of entrepreneurship and its importance to economic and business environment. www only.

DIET 569: Dietary and Herbal Supplements

(3-0) Cr. 3. SS.

Prereq: Enrollment in GP-IDEA MFCS in Dietetics

Develop skills to partner with patients in making dietary supplement decisions. Explore the safe, efficacious use of botanicals and supplements in nutritional support of aging, maternal health and wellness. Discussions on supplementation in the prevention and treatment of chronic disease include: arthritis, cancer, cardiovascular, diabetes, digestive, liver and renal disorders.

DIET 570: Nutrition and Human Performance

(3-0) Cr. 3. S.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. www only.

DIET 571: Leadership in Dietetics

(3-0) Cr. 3. SS.

Using leadership theories to develop the fundamental concepts and skills to bridge the gap between theory and practice. Students will be able to successfully evaluate classic and contemporary leadership theories, investigate current leadership trends and identify positive applications in the dietetics community.

DIET 572: Current Issues and Trends

(3-0) Cr. 3. F.S.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

Overview of current topics, issues, and trends in dietetics practice. www only.

DIET 573: Healthcare Administration

(3-0) Cr. 3. Alt. SS., offered even-numbered years.

Prereq: enrollment in GP-IDEA MFCS in Dietetics

A comprehensive review of today's health care institutions and their response to the economics, social, ethical, political, legal, technological, and ecological environments. www only.

DIET 574: Nutrition and Immunology

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Principles and issues related to nutrition and immunology. Impact of nutrients and nutritional status on immune responses. Impact of disease states on nutritional status.

DIET 595: Grant Writing for the Professional

(Cross-listed with FS HN). (3-0) Cr. 3. SS.

Prereq: Enrollment in GP-IDEA MFCS in Dietetics OR acceptance in the Master of Professional Practice in Dietetics program.

Identifying external funding sources, developing a research question and hypothesis, and writing a grant proposal.

DIET 597: Nutritional Aspects of Oncology

(Cross-listed with FS HN, NUTRS). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: B.S. in nutrition, dietetics, biology, or related discipline.

Understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management.

DIET 598: Clinical Aspects of Nutrition Support

(3-0) Cr. 3. S.

Prereq: Enrollment in GPIDEA - Dietetics program

Specialized nutrition assessment and support. Review of energy expenditure and substrate utilization in specific disease states. Current Methods for the initiation and management of enteral and parenteral nutrition therapy including access, metabolic and mechanical complications. Evaluation of nutrition support methodology in selected disease states.

DIET 599: Creative Component

Cr. arr. Repeatable. F.S.SS.

Prereq: Enrollment in GPIDEA MS Dietetics

For non-thesis option only.

Early Childcare Education and Programming (E C P)

Any experimental courses offered by E C P can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

E C P 201: Child Development – Ages Birth to 3

(3-0) Cr. 3.

Prereq: HD FS 102

Development from birth to age three. Major theories and research on development will be covered including growth patterns, the influences of disabilities and risk factors, environmental factors and their effects on attachment styles, language acquisition, brain development, cognitive development, social-emotional development, and perceptual and sensory motor skills. (on-line course offering via Distance Education).

E C P 202: Child Development – Ages 4 to 8

(3-0) Cr. 3.

Prereq: HD FS 102

Development from ages four through eight. Major theories and research on development will be covered including growth patterns, the influences of disabilities and risk factors, environmental factors and their effects on attachment styles, language acquisition, brain development, cognitive development, social-emotional development, and perceptual and sensory motor skills. (on-line course offering via Distance Education).

E C P 305: Professional Development

(3-0) Cr. 3.

Prereq: HD FS 102

Exploring the role of a professional as a teacher, administrator or advocate in early childhood programming. Students will learn about professionalism and ethics, identifying child abuse, and applying universal precautions. Discussion of qualities of the early childhood educator role, program models, and working with children and professional colleagues. (on-line course offering via Distance Education).

E C P 306: Health, Safety, and Nutrition

(3-0) Cr. 3.

Prereq: HD FS 102

Important elements for planning, promoting and maintaining healthy and safe learning/care environments, understanding childhood illnesses and establishing healthy lifestyles, first aid, and care providers maintaining their own health. Maintaining safe relationships with others, including identifying and reporting abuse, neglect, and exploitation of children. Exploration of nutrients for life and feeding, food preparation and safety policies and guidelines, food allergies and intolerances, appropriate feeding practices. (on-line course offering via Distance Education).

E C P 307: Child Guidance and Classroom Environments

(3-0) Cr. 3.

Prereq: HD FS 102

Working knowledge of developmentally appropriate practice in child guidance. This goal will be accomplished through review of current guidance methods and programs in order to familiarize students with successful guidance techniques. By the end of this course, students will develop their own approach to guidance based upon practices best suited to their own unique skills and strengths. (on-line course offering via Distance Education).

E C P 320: Practicum I – Child Observations in Classroom Environments

(0-6) Cr. 3.

Prereq: E C P 201, E C P 202, E C P 305, E C P 306, E C P 307, HD FS 103

Practicum in Early Childhood Education is an opportunity for ECP teacher candidates to have a guided learning experience in a professional agency that provides services to children and families. It is expected that learning experiences and projects at the practicum site will provide teacher candidates with the opportunity to utilize and implement theories and practices learned in other ECP classes. (on-line course offering via Distance Education).

E C P 322: Diversity in the Lives of Young Children and Families

(3-0) Cr. 3.

Prereq: HD FS 102

Exploration of cultural diversity in daily life and beliefs in families with young children. The focus is on U.S. families, with attention to the multiple cultures from which they come. (on-line course offering via Distance Education).

Meets U.S. Diversity Requirement

E C P 323: Working with Families

(3-0) Cr. 3.

Prereq: HD FS 102

Application of an ecological model to the understanding of variation in parental roles, perspectives, relationships, approaches, and challenges. (on-line course offering via Distance Education).

E C P 324: Technology and Young Children

(3-0) Cr. 3.

Prereq: HD FS 102

Impact of electronic technology on the development of young children in educational, home, and community environments, and how technology can be used to enhance teaching and learning. Students will be critical thinkers and informed consumers of technology related to young children. (on-line course offering via Distance Education).

E C P 412: Development of Curriculum for Children Ages Birth to 3
(3-0) Cr. 3.

Prereq: E C P 201, E C P 202, E C P 305, E C P 306, E C P 307, E C P 320
Curriculum development related to children from birth to age 3: (1) learn and utilize assessment and documentation to inform curriculum, (2) plan and evaluate developmentally appropriate activities, and (3) learn about effective ways to share curriculum information with families. All areas of developmental domains and content areas; issues related to diversity in family composition, culture, and individual abilities will also be addressed. (on-line course offering via Distance Education).

E C P 413: Development of Curriculum for Children Ages 4 to 8
(3-0) Cr. 3.

Prereq: E C P 201, E C P 202, E C P 305, E C P 306, E C P 307, E C P 320
Development of curriculum for children ages 4 to 8 years: (1) learn and utilize assessment and documentation to inform curriculum, (2) plan and evaluate developmentally appropriate activities, and (3) learn about effective ways to share curriculum information with families. This course addresses all areas of developmental domains and content areas, and issues related to diversity in family composition, culture, and individual abilities will also be addressed. (on-line course offering via Distance Education).

E C P 424: Assessing Young Children and Their Environments to Enhance Development
(3-0) Cr. 3.

Prereq: E C P 201, E C P 202, E C P 305, E C P 306, E C P 307, E C P 320
Students will learn to select, evaluate, and use appropriate assessment tools for children birth to age 8. Students will use assessment data to inform decisions about teaching (environments and practice) and intervention. There will be an emphasis on the ethical use of assessments, validity of assessments, multicultural sensitivity, and assessments for children with special needs. (on-line course offering via Distance Education).

E C P 425: Understanding and Adapting for Developmental Differences
(3-0) Cr. 3.

Prereq: E C P 201, E C P 202, E C P 305, E C P 306, E C P 307, E C P 320
Knowledge of disability conditions, assessment and identification, interventions in inclusive environments, and collaborations among family members and service providers. (on-line course offering via Distance Education).

E C P 440: Practicum II – Curriculum Development and Implementation
(0-6) Cr. 3.

Prereq: E C P 412, E C P 413, E C P 424, E C P 425
Practicum in Early Childhood Education is an opportunity for ECE teacher candidates to have a guided learning experience in a professional agency that provides services to children and families. It is expected that learning experiences and projects at the practicum site will provide teacher candidates with the opportunity to utilize and implement theories and practices learned in other required classes. (on-line course offering via Distance Education).

E C P 442: Administration and Supervision in Early Childhood Settings
(3-0) Cr. 3.

Prereq: HD FS 102
Exploration of issues surrounding the administration of early childhood programs including identification of community needs, analysis of business opportunities, the evaluation and appropriate use of space and quality programming, consideration of policy and legal responsibilities, and professionalism in the field. In addition, the course explores best practices in staff selection, training, coaching, and supervision. (on-line course offering via Distance Education).

E C P 460: Practicum III – Capstone Experience

Cr. 3-6. Repeatable, maximum of 6 credits.

Prereq: E C P 322, E C P 323, E C P 324, E C P 440, E C P 442

Professional practicum as a 15 week experience designed to allow the student to demonstrate practical application of developmentally appropriate early childhood teaching techniques and skills, actual teaching experience and developmental feedback. Practicum students will be involved in observation and evaluation of classroom experiences, environmental design, classroom management, and parent communication. (on-line course offering via Distance Education).

Ecology and Evolutionary Biology (EEB)

Any experimental courses offered by EEB can be found at:

registrar.iastate.edu/faculty-staff/courses/explistings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistings/>)

Courses primarily for graduate students, open to qualified undergraduates:

EEB 511: Conceptual Foundations in Ecology and Evolutionary Biology
(3-2) Cr. 4. F.

Prereq: Graduate classification

Introduction to key figures and ideas that have shaped the development of ecology and evolutionary biology. Covers major developments in ecology and evolutionary biology at five levels of biological organization: Genome, Organism, Population, Community, and Ecosystem. Impacts of these developments on current approaches to investigation and argument formulation. Effects of technological advances on the direction of scientific investigations. Introduction to analytical skills important for critical thinking in ecology and evolutionary biology and the impact of accepted lines of scientific reasoning on the objectives and conduct of research, such as explanation and prediction, design of studies as experimentation, and structured or unstructured observation.

EEB 585: Extended Field Trip

(1-6) Cr. 2. Repeatable. Alt. F., offered irregularly. Alt. S., offered irregularly. Alt. SS., offered irregularly.

Prereq: Graduate classification, permission of instructor

Extended field trip to study major terrestrial and aquatic ecosystems. Location and duration vary. Report required.

EEB 585A: Extended Field Trip: Pre-Trip Lecture

(1-0) Cr. 1. Repeatable. Alt. F., offered irregularly. Alt. S., offered irregularly. Alt. SS., offered irregularly.

Prereq: Graduate classification, permission of instructor

Extended field trip to study major terrestrial and aquatic ecosystems. Location and duration vary. Report required.

EEB 585B: Extended Field Trip: Travel

(0-6) Cr. 1. Repeatable. Alt. F., offered irregularly. Alt. S., offered irregularly. Alt. SS., offered irregularly.

Prereq: Graduate classification, EEB 585A and permission of instructor.

Extended field trip to study major terrestrial and aquatic ecosystems. Location and duration vary. Report required.

EEB 590: Special Topics

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Graduate classification and permission of instructor

For students wishing to conduct in-depth study of a particular topic in ecology and evolutionary biology.

Courses for graduate students:**EEB 698: Seminar**

(1-0) Cr. 1. Repeatable. F.S.

Reports and discussion of recent research and literature.

EEB 699: Research

Cr. arr. Repeatable. F.S.SS.

Thesis and dissertation research.

Ecology, Evolution, and Organismal Biology (EEOB)

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. Each EEOB faculty member is affiliated with one or more interdepartmental majors, and EEOB students major in one of these programs. These interdepartmental programs include:

- Bioinformatics and Computational Biology (<http://www.bcb.iastate.edu/>)
- Ecology and Evolutionary Biology (<http://www.eeb.iastate.edu/>)
- Environmental Science (<https://enscigrad.iastate.edu/>)
- Genetics and Genomics (<http://www.genetics.iastate.edu>)
- Interdisciplinary Graduate Studies (<http://www.grad-college.iastate.edu/igs/admission.html>)
- Microbiology (<http://www.micrograd.iastate.edu/>)
- Plant Biology (<http://www.ipb.iastate.edu/>)
- Sustainable Agriculture (<https://susag.iastate.edu/>)

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees.

Any experimental courses offered by EEOB can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for graduate students, open to qualified undergraduates:**EEOB 507: Advanced Animal Behavior**

(3-0) Cr. 3. S.

Prereq: Graduate standing, BIOL 354, or permission of instructor

Analysis of current research in animal behavior. Topics covered may include behavioral ecology, mechanisms of behavior, evolution of behavior, applications of animal behavior to conservation biology, and applications of animal behavior to wild animals in captivity.

EEOB 514: Life History and Reproductive Strategies

(Dual-listed with BIOL 414). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: BIOL 315 or equivalent recommended.

Evolution of ecological adaptations at the individual, population, and species level. Emphasis is on evolutionary mechanisms and adaptive strategies related to life histories and reproduction; age and size at maturity; lifespan and senescence; offspring size/number trade-offs; sex and mating systems; sex determination and sex ratios.

EEOB 531: Conservation Biology

(Cross-listed with A ECL). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: BIOL 312; BIOL 313 or graduate standing

Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

EEOB 531I: Conservation Biology

(Cross-listed with A ECL, IA LL). Cr. 4. Alt. SS., offered even-numbered years.

Prereq: IA LL 312I

Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

EEOB 534: Endocrinology

(Dual-listed with BIOL 434). (3-0) Cr. 3. S.

Prereq: BIOL 211, BIOL 212

Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones.

EEOB 535: Restoration Ecology

(Cross-listed with ENSCI, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 366 or BIOL 474 or graduate standing

Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

EEOB 535I: Restoration Ecology

(Cross-listed with A ECL, ENSCI, IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: A course in ecology

Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

EEOB 542: Introduction to Molecular Biology Techniques

(Cross-listed with B M S, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

EEOB 542A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with B M S, BBMB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

EEOB 542B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with B M S, BBMB, FS HN, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.

Prereq: Graduate classification

Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

EEOB 542C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with B M S, BBMB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

EEOB 542D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with B M S, BBMB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

EEOB 542E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with B M S, BBMB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

EEOB 542F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with B M S, BBMB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

EEOB 542G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with B M S, BBMB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Offered on a satisfactory-fail basis only.

EEOB 546: Computational Skills for Biological Data

(Cross-listed with BCB). Cr. 3. F.

Prereq: Graduate student status or permission of the instructor

Computational skills necessary for biologists working with big data sets. UNIX commands, scripting in R and Python, version control using Git and GitHub, and use of high performance computing clusters. Combination of lectures and computational exercises.

EEOB 551: Plant Evolution and Phylogeny

(Dual-listed with BIOL 451). (3-3) Cr. 4. F.

Prereq: BIOL 315 or equivalent.

Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies.

EEOB 553: Agrostology

(2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 366 or equivalent.

Structure, identification, classification, phylogeny, and economic aspects of grasses and related families.

EEOB 555: Bryophyte and Lichen Biodiversity

(Dual-listed with BIOL 455). (2-3) Cr. 3. S.

Prereq: BIOL 211, BIOL 211L

Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning.

EEOB 559: Mammalogy

(Dual-listed with BIOL 459). (2-0) Cr. 2. S.

Prereq: BIOL 351 or A ECL 365

Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

EEOB 561: Evolutionary and Ecological Genomics

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Permission of instructor; BCBIO 444 recommended.

Use of genomic and other "omic" data in evolution and ecology. Review of data-generation platforms, computational methods, and examples of how phylogenomics, metagenomics, epigenomics, and population genomics are transforming the disciplines of evolution and ecology.

EEOB 562: Evolutionary Genetics

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Permission of instructor

Seminar/discussion course covering the genetic basis of evolutionary processes in multicellular organisms.

EEOB 563: Molecular Phylogenetics

(2-3) Cr. 3. S.

Prereq: BIOL 313 and BIOL 315

An overview of the theory underlying phylogenetic analysis and the application of phylogenetic methods to molecular datasets. The course emphasizes a hands-on approach to molecular phylogenetics and combines lecture presentations with computer exercises and discussion of original scientific literature.

EEOB 564: Wetland Ecology

(Dual-listed with BIOL 464). (Cross-listed with ENSCI). (3-0) Cr. 3. S.

Prereq: 15 credits in biological sciences.

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands.

EEOB 564I: Wetland Ecology

(Cross-listed with ENSCI, IA LL). Cr. 4. SS.

Prereq: IA LL 312I

Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

EEOB 565: Macroevolution

(Dual-listed with BIOL 465). Cr. 3. Alt. S., offered even-numbered years.

Prereq: BIOL 315

The history and diversity of life on earth; evolutionary patterns and processes above the species level. Diversity from a phylogenetic perspective. Empirical exercises include: phylogeny estimation, ancestral states, estimating diversification rates, evaluating the tempo and mode of evolution, biogeographic patterns, and trait associations across the tree of life.

EEOB 566: Molecular Evolution

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: Permission of instructor

Seminar/discussion course covering the fundamentals of molecular evolution. Emphasis is placed on original scientific literature and current topics, including rates and patterns of genetic divergence; nucleotide and allelic diversity; molecular clocks; gene duplications; genome structure; organellar genomes; polyploidy; transposable elements; and modes and mechanisms of gene and genome evolution.

EEOB 567: Empirical Population Genetics

(3-0) Cr. 3. Alt. F., offered irregularly.

Prereq: Permission of instructor

An overview of fundamental population genetic theory and the ecological and evolutionary factors underlying the distribution of genetic variation within and among natural populations. Emphasis on the analysis of inbreeding, breeding systems, parentage, relatedness, spatial autocorrelation, effective population size, hierarchical population models, and phylogeography.

EEOB 568: Advanced Systematics

(Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered irregularly.

Prereq: Permission of instructor

Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics.

EEOB 569: Biogeography

(3-0) Cr. 3. Alt. S., offered irregularly.

Prereq: BIOL 315 or equivalent; permission of instructor

Principles underlying the geographic distribution of organisms throughout the world; biological influences of geological history and tectonic movements; role of climate, migration, dispersal, habitat, and phylogeny on past and present organismal distribution patterns; biogeographic methods.

EEOB 573: Techniques for Biology Teaching

(Cross-listed with A ECL, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573A: Techniques for Biology Teaching : Animal Biology

(Cross-listed with A ECL, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573B: Techniques for Biology Teaching: Plant Biology

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573C: Techniques for Biology Teaching: Fungi and Lichens

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573D: Techniques for Biology Teaching: Aquatic Ecology

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573E: Techniques for Biology Teaching: Prairie Ecology

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573F: Techniques for Biology Teaching: Wetland Ecology

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573G: Techniques for Biology Teaching: Limnology

(Cross-listed with A ECL, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573H: Techniques for Biology Teaching: Animal Behavior

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573I: Techniques for Biology Teaching: Insect Ecology

(Cross-listed with A ECL, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573J: Techniques for Biology Teaching: Biology of Invertebrates

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573K: Techniques for Biology Teaching: Non-invasive Use of Living Organisms

(Cross-listed with IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 573W: Techniques for Biology Teaching: Project WET

(Cross-listed with A ECL, IA LL). Cr. 1-2. Repeatable. SS.

The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

EEOB 575I: Field Mycology

(Cross-listed with IA LL). Cr. 4. Alt. SS., offered even-numbered years.

Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungi groups.

EEOB 576: Functional Ecology

(Dual-listed with BIOL 476). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: BIOL 312

The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

EEOB 577: Concepts in Theoretical Ecology and Evolution

(2-0) Cr. 1. Alt. F., offered even-numbered years.

Readings and discussion of influential ideas in ecological and evolutionary theory, with an emphasis on how models are used as conceptual tools for building synthetic paradigms. Topics are chosen according to student interests; may include spatial ecology, behavioral theory, chaos, community assembly and biodiversity, and others.

EEOB 580I: Ecology and Systematics of Diatoms

(Cross-listed with IA LL). Cr. 4. SS.

Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution including construction of reference and voucher collections and data organization and analysis.

EEOB 581: Environmental Systems I: Introduction to Environmental Systems

(Dual-listed with BIOL 381). (Cross-listed with ENSCI). Cr. 3-4. F.

Prereq: 12 credits of natural science including biology and chemistry

Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

EEOB 582: Environmental Systems II: Analysis of Environmental Systems

(Dual-listed with BIOL 382). (Cross-listed with ENSCI). (2-2) Cr. 3. S.

Prereq: ENSCI 381

Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

EEOB 584: Ecosystem Science

(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Combined 12 credits in biology, chemistry, and physics.

Advanced studies of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations and modern approaches to ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

EEOB 585: Advanced Community Ecology

(2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: BIOL 312

Factors controlling species diversity, species abundance, and the structure and function of communities in space and time. Relationships between species diversity and ecosystem process rates and community stability.

EEOB 586: Aquatic Ecology

(Dual-listed with BIOL 486). (Cross-listed with A ECL, ENSCI). (3-0) Cr. 3. F.

Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

EEOB 586L: Aquatic Ecology Laboratory

(Dual-listed with BIOL 486L). (Cross-listed with A ECL, ENSCI). (0-3) Cr. 1. F.

Prereq: Concurrent enrollment in BIOL 486

Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

EEOB 587: Microbial Ecology

(Dual-listed with BIOL 487). (Cross-listed with ENSCI, GEOL, MICRO). (3-0) Cr. 3. F.

Prereq: Six credits in biology and 6 credits in chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

EEOB 589: Population Ecology

(Dual-listed with BIOL 489). (Cross-listed with A ECL). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing

Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

EEOB 590: Special Topics

Cr. 1-3. Repeatable.

Prereq: 10 credits in biology, permission of instructor

EEOB 590A: Special Topics: Current Topics in Ecology

Cr. 1-3. Repeatable.

Prereq: 10 credits in biology, permission of instructor

EEOB 590B: Special Topics: Current Topics in Evolutionary Biology

Cr. 1-3. Repeatable.

Prereq: 10 credits in biology, permission of instructor

EEOB 590C: Special Topics: Current Topics in Organismal Biology

Cr. 1-3. Repeatable.

Prereq: 10 credits in biology, permission of instructor

EEOB 590I: Special Topics: Graduate Independent Study

(Cross-listed with A ECL, ANTHR, IA LL). Cr. 1-4. Repeatable. SS.

Prereq: Graduate classification and permission of instructor

EEOB 596: Ecology and Society

(Cross-listed with PHIL). (3-0) Cr. 3.

Prereq: Graduate classification in biological or environmental sciences/ studies with at least one course in ecology

Analysis of conceptual and methodological debates in ecology. Historical development of competing research traditions and philosophies. Topics include i) methodological issues in ecological science, ii) conceptual issues in theoretical ecology, iii) conceptual issues in applied ecology, iv) relation of ecology to environmental and social issues.

EEOB 599: Creative Component

Cr. arr.

Research toward nonthesis master's degree.

Courses for graduate students:**EEOB 698: Seminar**

Cr. 1. Repeatable.

Meetings of graduate students and faculty to discuss recent literature and problems under investigation.

EEOB 699: Research

Cr. arr. Repeatable.

Research for thesis or dissertation. Offered on a satisfactory-fail basis only.

EEOB 699I: Iowa Lakeside Laboratory. (Cross-listed with IA LL 699I)

(Cross-listed with A ECL, ANTHR, GDCB, IA LL). Cr. arr. Repeatable.

Research for thesis or dissertation. Offered on a satisfactory-fail basis only.

Economics (ECON)

Any experimental courses offered by ECON can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ECON 101: Principles of Microeconomics**

(3-0) Cr. 3. F.S.SS.

Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value.

ECON 101H: Principles of Microeconomics: Honors

(3-0) Cr. 3.

Prereq: Honors program students only

Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value.

ECON 101L: Laboratory in Principles of Microeconomics

(0-2) Cr. 1. F.

Prereq: Concurrent enrollment in the appropriate section of ECON 101

Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

ECON 102: Principles of Macroeconomics

(3-0) Cr. 3. F.S.SS.

Prereq: ECON 101 recommended

Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance.

ECON 102H: Principles of Macroeconomics: Honors

(3-0) Cr. 3.

Prereq: ECON 101 recommended; admission to the Honors program.

Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance.

ECON 110: Orientation in Agricultural Business

(1-0) Cr. 1. F.

Orientation course for freshman and new transfer students in agricultural business.

ECON 207: Applied Economic Optimization

(2-2) Cr. 3. F.S.

Prereq: MATH 151, MATH 160, MATH 165 or equivalent

Application of linear algebra, calculus and unconstrained and constrained optimization techniques to economic problems. Learning outcomes include the ability to (i) identify the objective, decision variables and constraints in economic decision problems, (ii) represent elements of an economic problem in simple mathematical models, (iii) identify and apply mathematical tools that can be used to solve the problems, (iv) identify the strengths and limitations of the solution method, and (v) interpret the economic meaning and implications of the solution.

ECON 230: Farm Business Management

(2-2) Cr. 3. F.S.

Prereq: ECON 101; ACCT 284

Business and economic principles applied to decision making and problem solving in the management of a farm business. Cash flow, partial, enterprise, and whole farm budgeting. Information systems for farm accounting, analysis, and control. Obtaining and managing land, capital, and labor resources. Alternatives for farm business organization and risk management.

ECON 234: Small Business Management

(3-0) Cr. 3.

Prereq: ECON 101

An introduction to small business management, entrepreneurship, and economics utilizing a series of case studies. Exploration of issues related to starting or acquiring a new business and development of knowledge and skills for successful management of a small business, with an emphasis on agricultural business.

ECON 235: Introduction to Agricultural Markets

(3-0) Cr. 3. F.S.

Prereq: ECON 101

Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools.

ECON 236: Agricultural Selling

(3-0) Cr. 3.

Prereq: ECON 101

Principles of selling with application to agricultural and food related businesses. Attitudes, value systems, and behavioral patterns that relate to agricultural sales. Marketing, selling strategies, preparing for sales calls, making sales presentations, handling objections, and closing sales. Analysis of the buying or purchasing process. Evaluation of agri-selling profession.

ECON 292: Career Seminar

(1-0) Cr. 1.

Prereq: Classification in economics or agricultural business

Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Only one of ECON 292, 292A, and 292B can be used toward graduation.

ECON 292A: Career Seminar: Agricultural Business

(1-0) Cr. 1.

Prereq: Classification in economics or agricultural business

Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Only one of ECON 292, 292A, and 292B can be used toward graduation.

ECON 292B: Career Seminar: Economics and Business Economics

(1-0) Cr. 1.

Prereq: Classification in economics or agricultural business

Career opportunities in the various industries and government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing. Only one of ECON 292, 292A, and 292B can be used toward graduation.

ECON 297: Internship

Cr. 2. Repeatable, maximum of 4 credits.

Prereq: Permission of instructor and classification in agricultural business or economics

Students complete a research report, based on their internship or approved work experience, that examines chosen topics in management, marketing or finance. Offered on a satisfactory-fail basis only.

ECON 298: Cooperative Education

Cr. R. Repeatable.

Prereq: Permission of the department cooperative education coordinator; sophomore classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

ECON 301: Intermediate Microeconomics

(3-0) Cr. 3-4. F.S.SS.

Prereq: ECON 101; ECON 207 or MATH 166

Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive markets; theory of demand for and supply of factors of production; general equilibrium analysis. Recitation required for 4 credits.

ECON 301H: Intermediate Microeconomics: Honors

(3-0) Cr. 3-4.

Prereq: ECON 101; ECON 207 or MATH 166

Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive markets; theory of demand for and supply of factors of production; general equilibrium analysis. Recitation required for 4 credits.

ECON 302: Intermediate Macroeconomics

(3-0) Cr. 3. F.S.

Prereq: ECON 101, ECON 102; MATH 160 or MATH 165

Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation.

ECON 302H: Intermediate Macroeconomics: Honors

(3-0) Cr. 3.

Prereq: ECON 101, ECON 102; MATH 160 or MATH 165

Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation.

ECON 313: Economics of Sports

(3-0) Cr. 3.

Prereq: ECON 101

Application of economics to issues in sports, including franchising; rival leagues and barriers to entry; cooperative, competitive, and collusive behavior; player productivity and compensation; contracts, unions, and discrimination; antitrust, taxation, and subsidies. Economic concepts include supply and demand, costs, competition, time value of money, labor economics, pricing, public finance, production, game theory, risk analysis, and industrial organization.

ECON 320: Labor Economics

(3-0) Cr. 3.

Prereq: ECON 101

Economic analysis of contemporary domestic and international labor market issues including labor supply and demand, unemployment, and employment in the U.S. and elsewhere; investments in and returns to education, training, health, immigration and migration; income inequality; labor productivity; out-sourcing and global competitiveness; work incentives; compensation including benefits; and labor policies such as minimum wages, over-time pay, discrimination, unions, and immigration. Examples drawn from the U.S. and other developed countries with reference to developing countries where relevant.

Meets International Perspectives Requirement.

ECON 321: Economics of Discrimination

(Cross-listed with WGS). (3-0) Cr. 3.

Prereq: ECON 101

Economic theories of discrimination. Analysis of the economic problems of women and minorities in such areas as earnings, occupations, and unemployment. Public policy concerning discrimination. Poverty measurement and antipoverty programs in the U.S.

Meets U.S. Diversity Requirement

ECON 330: Advanced Farm Business Management

(3-0) Cr. 3.

Prereq: ECON 230

Effective use of strategic planning, decision methods, and computer assistance for solving farm problems. Applications of economic and management theory to analyze farm business decisions using efficiency measures to assess current resource use and direct the farm business analysis, planning, and tax process.

ECON 332: Cooperatives

(3-0) Cr. 3.

Prereq: ECON 101

Survey of cooperative business structure, including historical developments in the United States, principles of cooperation, state and federal authorization for cooperative activity, economic motivations and foundations, governance, marketing and pricing strategies, and financing, capitalization and taxation considerations. Students will learn how the cooperative model is applied in a variety of markets.

ECON 334: Entrepreneurship in Agriculture

(3-0) Cr. 3. F.S.

Prereq: ECON 101

Introduction to the process of entrepreneurship within the agricultural and food sectors. Emphasis on opportunity recognition and assessment, resource acquisition and feasibility analysis for both private and social enterprises. Students will develop a comprehensive feasibility study for a new business or non-profit organization.

ECON 335: The Economics of Global Agricultural Food and Bio-energy

(Cross-listed with GLOBE). (3-0) Cr. 3.

Prereq: ECON 101

Applied economic analysis of the determinants of world agricultural production, marketing, and use in feed, food, fiber, biofuel, and other applications, and global food processing and consumption. Analysis of market case studies and various data on global agricultural production and transformation, land and resource use, demography, economic activity, nutrition and health trends.

Meets International Perspectives Requirement.

ECON 337: Agricultural Marketing

(3-0) Cr. 3.

Prereq: ECON 101 required, ECON 235 recommended

Understanding of agricultural commodity markets for grain, livestock and dairy with emphasis on marketing decisions and risk management for farmers and processors. Hands-on applications of marketing and management tools via market simulations.

ECON 344: Public Finance

(3-0) Cr. 3.

Prereq: ECON 101

The economic role of governments in market economies. Public goods, externalities, income distribution, and income maintenance programs. The effect of taxes on economic behavior, descriptions of the structure of the principal U.S. taxes, and current reform proposals.

ECON 353: Money, Banking, and Financial Institutions

(3-0) Cr. 3. F.S.

Prereq: ECON 101, ECON 102

Theoretical and applied analysis of money, banking, and financial markets; interest rates and portfolio choice; the banking industry in transition; the money supply process; the Federal Reserve System and the conduct of monetary policy; macro implications of monetary policy; international finance.

ECON 355: International Trade and Finance

(3-0) Cr. 3.

Prereq: ECON 101, ECON 102

Explanations of causes of international trade and the impact of trade on welfare and employment patterns. Analysis of government policies towards trade, such as tariffs, quotas, and free trade areas. Theory of balance of payments and exchange rate determination, and the role of government policies. Examination of alternative international monetary arrangements.

Meets International Perspectives Requirement.

ECON 362: Applied Ethics in Agriculture

(Cross-listed with SOC). (3-0) Cr. 3.

Prereq: ECON 101 or SOC 134, junior or senior status in the College of Agriculture

Identify major ethical issues and dilemmas in the conduct of agricultural and agribusiness management and decision making. Discuss and debate proper ethical behavior in these issues and situations and the relationship between business and personal ethical behavior.

ECON 364: Rural Property Appraisal

(3-0) Cr. 3.

Prereq: ECON 101

Use of income capitalization, sales comparison and cost appraisal concepts in appraising agricultural resources. Application of underlying economic/business/management principles, especially present value, as they relate to farmland appraisal. Determination and estimation of economic impacts of special consideration and property use factors. Evaluate feasibility and profitability of investment in rural property.

ECON 371: Introductory Econometrics

(4-0) Cr. 4. F.S.

Prereq: ECON 301, ECON 302 OR ECON 353, STAT 326

Introduction to the models and methods used to estimate relationships and test hypotheses pertaining to economic variables. Among the topics covered in the course are: Single and multiple regression analysis; functional forms; omitted variable analysis; multicollinearity; heteroskedasticity; autocorrelation; simultaneous equations; and dynamic models.

ECON 376: Rural, Urban and Regional Economics

(Cross-listed with C R P). (3-0) Cr. 3.

Prereq: ECON 101

Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime.

ECON 380: Energy, Environmental and Resource Economics

(Cross-listed with ENV S). (3-0) Cr. 3.

Prereq: ECON 101

Natural resource availability, use, conservation, and government policy, with emphasis on energy issues. Environmental quality and pollution control policies.

ECON 385: Economic Development

(Cross-listed with GLOBE). (3-0) Cr. 3.

Prereq: ECON 101, ECON 102

Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid.

Meets International Perspectives Requirement.

ECON 387: Economies of China and India

(3-0) Cr. 3.

Prereq: ECON 101

The economic development of China and India within the larger historical, political, and socioeconomic contexts. The characteristics of the development paths of major industries. The drivers of and impediments for future economic development. The two economies' connections with the world economy.

Meets International Perspectives Requirement.

ECON 398: Cooperative Education

Cr. R.

Prereq: Permission of the department cooperative education coordinator; junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

ECON 401: Topics in Microeconomics

(3-0) Cr. 3.

Prereq: ECON 301, STAT 226

Advanced treatment of selected topics from one or more of the following areas: household production models, factor markets, game theory and imperfect competition, general equilibrium, intertemporal choice, asset markets, income distribution, externalities and public goods, etc.

ECON 402: Topics in Macroeconomics

(3-0) Cr. 3.

Prereq: ECON 301, ECON 302, STAT 226

Advanced treatment of selected topics from one or more of the following areas: business cycle theory, growth theory, fiscal and monetary policy, coordination issues, open economy macroeconomics, and financial economics.

ECON 416: Industrial Organization

(3-0) Cr. 3.

Prereq: ECON 301

Study of the structure of firms and markets and of their interaction, with emphasis on imperfectly competitive markets. Behavior of firms in strategic settings and insights of basic game-theoretic models. Welfare implications of alternative market organizations, consequences of market power, and scope for government regulation and antitrust/competition policies. Topics include monopoly and price discrimination, oligopoly models, product quality, product differentiation, vertical integration, information and advertising, patents, R&D and innovation, and regulation.

ECON 418: Introduction to Game Theory

(3-0) Cr. 3.

Prereq: ECON 301

Systematic introduction to game theory and its uses in economics. Develops the basic framework, models and tools necessary to analyze games of strategy, including: Strategic and extensive-form representations of games; best response functions and Nash equilibrium, mixed strategies backward induction and subgame-perfect equilibrium, imperfect and incomplete information, Bayesian and sequential equilibria. Examples and applications taken from economics, business, political science, law and biology.

ECON 431: Managerial Economics

(3-0) Cr. 3.

Prereq: ECON 301

Theory of the firm; organizational incentives and efficiency; moral hazard; role of information and decision making under uncertainty; ownership and control; business investment.

ECON 435: Analysis of Food Markets

(Cross-listed with FS HN). Cr. 3. S.

Prereq: STAT 226, ECON 235, ECON 301.

Food market analysis from an economics perspective; food markets and consumption; methods of economic analysis; food industry structure and organization; food and agriculture regulations; labeling; consumer concerns; agricultural commodity promotion. Final project required.

ECON 437: Commodity Marketing and Risk Management

(3-0) Cr. 3.

Prereq: ECON 235, ECON 301, STAT 326

The purpose and performance of commodity markets. How commodity marketing institutions function. Merchandising arrangements. Distinguishing features of agricultural commodities. Hedging, arbitrage, and speculation in commodity spot, forward, futures, and options markets. Valuation theory.

ECON 455: International Trade

(3-0) Cr. 3.

Prereq: ECON 301

Rigorous treatment of theories of international trade and international factor movements. Examination of the impact of trade and labor migration on domestic and world welfare and on the distribution of income. Theoretical analysis of government policies towards trade and factor movements, including quotas, tariffs, free trade areas and immigration restrictions. Discussion of contemporary issues and controversies concerning globalization, including multinational firms and labor migration.

Meets International Perspectives Requirement.

ECON 457: International Finance

(3-0) Cr. 3.

Prereq: ECON 302

National income accounting and balance of payments; foreign exchange rates and exchange rate markets; money, interest rates, and exchange rate determination; prices, exchange rates, and output in the short run; international monetary arrangements; fixed versus flexible exchange rates; optimal currency areas; international capital flows; currency and financial crises in emerging markets.

Meets International Perspectives Requirement.

ECON 458: Economic Systems for Electric Power Planning

(Cross-listed with E E). (3-0) Cr. 3.

Prereq: E E 303 or ECON 301

Evolution of electric power industry. Power system operation and planning and related information systems. Linear and integer optimization methods. Short-term electricity markets and locational marginal prices. Risk management and financial derivatives. Basics of public good economics. Cost recovery models including tax treatment for transmission investments.

ECON 460: Agricultural, Food, and Trade Policy

(Dual-listed with ECON 560). (3-0) Cr. 3.

Prereq: ECON 301 or ECON 501

Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macropolicy, world economy, international trade, and bioenergy on U.S. agriculture.

ECON 466: Agricultural Finance

(3-0) Cr. 3.

Prereq: ECON 301, STAT 226, FIN 301 and ECON 353 (recommended)

Financial analysis of agricultural businesses; liquidity, capital structure, and growth and risk of agricultural firms; capital budgeting methods; analysis of land investments, leasing, and costs of credit; financial intermediation and major financial institutions for agriculture; borrower-lender relationships, and asset-liability management techniques by financial intermediaries; public policies affecting agricultural credit markets.

ECON 480: Intermediate Environmental and Resource Economics

(Dual-listed with ECON 580). (3-0) Cr. 3.

Prereq: ECON 301 or ECON 501

Theories of natural resource utilization and allocation. Externalities, public goods, and environmental quality. Renewable energy, biofuels, land use change and life cycle analysis of carbon, and sustainability and resource conservation. Methodologies for analyzing natural resource and environmental problems and evaluating resource policies.

ECON 490: Independent Study

Cr. 1-5. Repeatable, maximum of 6 credits.

Prereq: Junior or senior classification, 14 credits in economics

Offered on a satisfactory-fail basis only. No more than 9 credits of Econ 490 may be used toward graduation

ECON 490E: Independent Study: Entrepreneurship

Cr. 1-5. Repeatable, maximum of 6 credits.

Prereq: Junior or senior classification, 14 credits in economics

Offered on a satisfactory-fail basis only. No more than 9 credits of Econ 490 may be used toward graduation

ECON 490H: Independent Study: Honors

Cr. 1-5. Repeatable, maximum of 6 credits.

Prereq: Junior or senior classification, 14 credits in economics

Offered on a satisfactory-fail basis only. No more than 9 credits of Econ 490 may be used toward graduation

ECON 492: Graduating Senior Survey

Cr. R.

Prereq: Graduating senior

Final preparations for graduation. The final stages of job searching, interviewing, letter writing, and resume preparation. Outcomes assessment information from graduating seniors including opinion surveys, instructor/advisor/course evaluations, exit interviews, student accomplishment surveys, job placement surveys, and comprehensive skills examinations. Departmental recognition of graduating seniors. Life as an alumnus - expectations and obligations. Convocation and commencement information. Offered on a satisfactory-fail basis only.

ECON 495: Economics Domestic Travel Course

Cr. 1-3.

Prereq: Sophomore status. Permission of instructor

Tour and study of domestic businesses, markets, and economic institutions located outside Iowa to expose students to the diversity of activities within the U.S. economy. Pre-trip sessions arranged. Locations and duration of tours will vary.

ECON 496: Economics International Travel Course

Cr. 1-3. Repeatable.

Prereq: Sophomore status; permission of instructor.

Tour and study of international agricultural and/or nonagricultural economies, markets, and institutions. Locations and duration of tours will vary. Limited enrollment.

Meets International Perspectives Requirement.

ECON 498: Cooperative Education

Cr. R.

Prereq: Permission of the department cooperative education coordinator; senior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:**ECON 500: Quantitative Methods in Economic Analysis I**

(4-0) Cr. 4. F.

Prereq: ECON 301, 1 year of calculus, STAT 401, and permission of Director of Graduate Education

Economic applications of selected mathematical and statistical concepts: linear models and matrix algebra; differential calculus and optimization; integral calculus and economic dynamics; probability distributions, estimation, and hypothesis testing in the analysis of economic data.

ECON 501: Microeconomics

(4-0) Cr. 4. F.

Prereq: ECON 301, credit or enrollment in ECON 500 or equivalent background in calculus and statistics

The theory of the consumer, theory of the firm, perfect and imperfect competition, welfare economics, and selected topics in general equilibrium and uncertainty.

ECON 502: Macroeconomics

(4-0) Cr. 4. F.

Prereq: ECON 302, credit or enrollment in ECON 500 or equivalent background in calculus and statistics

Models of aggregate supply and demand, theories of consumption and investment, money supply and demand, inflation, rational expectations, stabilization policy, financial markets, and international finance.

ECON 509: Applied Numerical Methods in Economics

(3-0) Cr. 3.

Prereq: ECON 500, ECON 501; or ECON 600, ECON 601

Use of numerical techniques to solve economic problems. Numerical differentiation and integration numeric solutions of systems of equations, static and dynamic optimization problems including unconstrained optimization, maximum likelihood methods, general nonlinear programming methods, dynamic programming and optimal control, numerical methods for solving functional equations.

ECON 510: Experimental Economics

(3-0) Cr. 3.

Prereq: ECON 501 or ECON 601

Introduction to experimental economics and major subject areas addressed by laboratory and field experiments. Exploration of experimental methods by concentrating on series of experiments. Applications include individual decision-making, behavioral game theory, markets, behavioral labor, public and development economics, social network, and neuroeconomics. Research project.

ECON 520: Labor Supply and Human Capital Formation

(3-0) Cr. 3.

Prereq: ECON 501 or ECON 601

Labor supply decisions and empirical analysis for agricultural operators and other self-employed and wage-earning households; multiple job holding; resource allocation in productive households; human capital formation by households, firms, and public institutions, which includes schooling, on-the-job training, migration, health, research, raising of children, and implications for household income and welfare; applications to problems in rural areas of developing and developed countries.

ECON 532: Managerial Economics for the Global Organization

(3-0) Cr. 3.

Prereq: ECON 101 and enrollment in MBA or BAS program; not for economics majors

Applications of microeconomic theory and decision analysis for firms operating in U.S. and internationally. Topics include demand & supply, consumer choice theory, production and cost theory, short run and long run business decisions, input cost and human capital differences across countries, empirical estimation of demand and supply, pricing, exchange rates, government and business, market structures and strategy.

ECON 537: Commodity Markets: Analysis and Strategy

(3-0) Cr. 3.

Prereq: ECON 501 or ECON 532 or ECON 601, ECON 571 or STAT 326

Analysis of exchange-traded and over-the-counter commodity markets, their functions and performance. Evaluation of hedging, speculation, and arbitrage strategies. Commodity transformation over space and time. Valuation of derivatives and comparison with derivatives on financial assets. Efficiency and the role of information in commodity markets. Market regulation.

ECON 545: Public Economics

(3-0) Cr. 3.

Prereq: ECON 501 or ECON 601

Economic justifications for government activities; illustrative theoretical and empirical analyses of expenditure programs; foundations of excess burden, incidence analysis, and optimal taxation; effects of taxation on labor supply; public goods and externalities; social insurance; introduction to economics of the health sector with an emphasis on the role of market failures.

ECON 560: Agricultural, Food, and Trade Policy

(Dual-listed with ECON 460). (3-0) Cr. 3.

Prereq: ECON 301 or ECON 501

Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macropolicy, world economy, international trade, and bioenergy on U.S. agriculture.

ECON 571: Intermediate Econometrics

(3-0) Cr. 3. S.

Prereq: ECON 500

Single and multiple equation regression models; dummy explanatory variables; serial correlation; heteroskedasticity; distributed lags; qualitative dependent variables; simultaneity. Use of econometric models for tests of economic theories and forecasting.

ECON 576: Spatial Economics

(3-0) Cr. 3.

Prereq: ECON 501 or ECON 601

Analysis of location choice by firms, employees, and households emphasizing the role of spatial variations in agglomeration economies, economies of scale, distance, transport, endowments, amenities, and local government. Models of land use, urban form, spatial competition, central place theory, and migration. Techniques of discrete choice analysis, statistical analysis of categorical data, urban system modeling, and interregional computable general equilibrium.

ECON 580: Intermediate Environmental and Resource Economics

(Dual-listed with ECON 480). (3-0) Cr. 3.

Prereq: ECON 301 or ECON 501

Theories of natural resource utilization and allocation. Externalities, public goods, and environmental quality. Renewable energy, biofuels, land use change and life cycle analysis of carbon, and sustainability and resource conservation. Methodologies for analyzing natural resource and environmental problems and evaluating resource policies.

ECON 581: Advanced Environmental Economics

(3-0) Cr. 3.

Prereq: ECON 501 or ECON 601

Interrelationships of natural resource use and the environment. Applied welfare and benefit-cost analyses. Externalities and pollution abatement. Nonmarket valuation of resources. Property rights. Legal and social constraints. Policy approaches.

ECON 590: Special Topics

Cr. 1-5. Repeatable.

Offered on a satisfactory-fail basis only.

ECON 599: Creative Component

Cr. 1-5.

Offered on a satisfactory-fail basis only.

Courses for graduate students:**ECON 601: Microeconomic Analysis I**

(4-1) Cr. 4. F.

Prereq: ECON 301, previous or concurrent enrollment in 600 and permission of Director of Graduate Education

Economic theory and methodology; theory of consumer behavior, theory of the competitive firm, supply and factor demand; duality relations in consumer and producer theory, welfare change measures; partial equilibrium analysis, perfect competition, monopoly; choice under uncertainty, the expected utility model, risk aversion; insurance, portfolio and production decisions under risk.

ECON 602: Macroeconomic Analysis

(4-1) Cr. 4. S.

Prereq: ECON 301, ECON 302, previous or concurrent enrollment in 600 and permission of Director of Graduate Education

Neoclassical aggregate growth models; the overlapping generations model; endogenous growth models; equilibrium business cycle theories; equilibrium job search and matching; models of money; fiscal and monetary policy; income and wealth distribution.

ECON 603: Microeconomic Analysis II

(4-1) Cr. 4. S.

Prereq: ECON 601, ECON 602 and permission of Director of Graduate Education

General equilibrium analysis, efficiency, and welfare; market failures, externalities, and the theory of the second best; introduction to game theory; adverse selection, signaling, screening and moral hazard.

ECON 604: Advanced Macroeconomic Analysis

(4-1) Cr. 4. F.

Prereq: ECON 601, ECON 602 and permission of Director of Graduate Education

Topics will be selected from: new Keynesian approaches to business cycle theory; endogenously generated business cycles; models of credit and financial intermediation; mechanism design and time inconsistency issues; political economy models; heterogeneous-agent models with strategic interaction; path dependence, network effects, and lock-in; economies as evolving self-organizing systems.

ECON 606: Advanced Topics in Macroeconomics

(3-0) Cr. 3.

Prereq: ECON 603, and credit or current enrollment in ECON 604

Selected topics in macroeconomic theory of current significance to the profession.

ECON 615: Industrial Organization I

(3-0) Cr. 3.

Prereq: ECON 603

Introduction to industrial organization theory and game-theoretic methods. Monopoly and price discrimination. Oligopoly theory and product differentiation. Quality and asymmetric information. Research & development and innovation. Introduction to empirical methods in industrial organization. Discrete choice models of product differentiation. Cost and production functions. Entry, exit, and dynamic equilibrium models.

ECON 618: Game Theory

(3-0) Cr. 3.

Prereq: ECON 603, or ECON 501 and permission of instructor

Theoretical analysis and applications of strategic games, extensive form games, and cooperative games. Nash equilibrium, correlated equilibrium, Bayesian games, subgame perfect equilibrium, the core, evolutionary equilibrium, repeated games with finite automata, and common knowledge.

ECON 621: Advanced Labor Demand and Labor Markets

Cr. 3. S.

Prereq: ECON 601 or ECON 520

Analysis of labor demand, job search and matching, unemployment, market determination of wages, compensating differentials, employment contracts and incentives, wage inequality and discrimination, effects of minimum wage legislation, occupation choice, labor unions.

ECON 641: Agricultural Economics I

(3-0) Cr. 3.

Prereq: ECON 603

Demand and supply for agricultural products, market equilibrium models, implications of government policies on the agricultural sector, evaluation of research and development policies in agriculture, and biofuel and energy policy analysis. Commodity promotion programs, food safety and consumers' valuation of product attributes.

ECON 642: Agricultural Economics II

(3-0) Cr. 3.

Prereq: ECON 603

Advanced treatment of topics and models in agricultural economics with emphasis on stochastic models. Topics will include analysis of risk in decision making by consumers, firms and farms; analysis of risk management strategies for farmers; the economics of commodity storage; analysis of the impact of biofuels on commodity prices; and models of agricultural inputs and outputs.

ECON 653: Financial Economics

(3-0) Cr. 3.

Prereq: ECON 603, ECON 672. Recommended: ECON 674, StAT 551

Review of decision-making under uncertainty. Portfolio Theory. Theoretical foundations of asset valuation models: capital asset pricing model (CAPM), arbitrage pricing theory (APT), representative agent models, pricing of derivative securities. Complete and incomplete asset markets, credit markets, financial intermediaries, the role of government in the financial sector. Market frictions, crashes, bubbles. Applications of asset valuation models, with emphasis on their testable implications.

ECON 655: International Trade

(3-0) Cr. 3.

Prereq: ECON 603

Theories of international trade; welfare and distributional aspects of trade and commercial policies. Optimal trade policies in the presence of domestic distortions; strategic trade policy; international trade and economic growth.

ECON 657: International Finance

(3-0) Cr. 3.

Prereq: ECON 602

The intertemporal approach to current account determination; non-traded goods and the real exchange rate; fiscal policy in the open economy; monetary approach to balance of payments and exchange rate determination; sticky price models of the open economy; exchange-rate based stabilizations; capital inflows; financial and balance of payments crises; international business cycles.

ECON 671: Econometrics I

(4-1) Cr. 4. F.

Prereq: ECON 501 and STAT 447 or STAT 542

Probability and distribution theory for univariate and multivariate normal random variables, introduction to the theory of estimators for linear models, hypothesis testing and inference, introduction to large sample properties of estimators; derivation of common estimators and their properties for the classical and general multiple regression models, hypothesis testing, forecasting, implications of specification errors - missing data, left-out regressors, measurement error, stochastic regressors.

ECON 672: Econometrics II

(4-1) Cr. 4. S.

Prereq: ECON 671

Identification, estimation, and evaluation of systems of simultaneous equations; qualitative choice and limited dependent variable models; introduction to time series methods and applications, including alternative variance specifications.

ECON 673: Microeconometrics

(3-0) Cr. 3.

Prereq: ECON 672, ECON 601

Econometric treatment of models arising in microeconomic applications. Methods are primarily concerned with the analysis of cross-section data. Topics may include: systems of demand equations in panel data settings, random utility models of discrete choices, production possibilities frontier estimation, and discrete/continuous models of participation and consumption.

ECON 674: Macroeconometrics

(3-0) Cr. 3.

Prereq: ECON 672, ECON 602

Time-series econometric techniques and their application to macroeconomics and financial markets. Techniques may include GARCH and ARCH-M models, unit-root tests, nonlinear adjustment models, structural VARs, and cointegration tests.

ECON 680: Advanced Resource Economics

(3-0) Cr. 3.

Prereq: ECON 603

Dynamic allocation of scarce, exhaustible, and renewable natural resources, including minerals and energy, soil, water, forests, and fish. Social versus private decisions. Market and nonmarket considerations. Technological change. Regulation. Dynamics and uncertainty.

ECON 690: Advanced Topics

Cr. 1-5. Repeatable.

Offered on a satisfactory-fail basis only.

ECON 691: Third-Year Paper

Cr. 3.

Under the direction of the major professor, Ph.D. students write a formal research paper as an introduction to the dissertation research process.

Offered on a satisfactory-fail basis only.

ECON 693: Workshops

Cr. 3.

Workshop in economics. Offered on a satisfactory-fail basis only.

ECON 694A: Research Workshop

Cr. 3. F.

Prereq: Third year status in the Economics Ph.D. program or permission of instructor.

Instruction in basic and applied research methods commonly used in economics. Survey methodologies, critique written work, summarize and evaluate data, prepare and present work orally, and develop an original research paper. Satisfactory-fail only. Offered on a satisfactory-fail basis only.

ECON 694B: Research Workshop

Cr. 3. S.

Prereq: Econ 694A

Writing and communicating economic research. Continuation of Econ 694A, resulting in completion of an original research paper. Satisfactory-fail only. Offered on a satisfactory-fail basis only.

ECON 699: Research for Thesis or Dissertation

Cr. arr. Repeatable.

Offered on a satisfactory-fail basis only.

Education (EDUC)***Any experimental courses offered by EDUC can be found at:***

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Educational Administration (EDADM)***Any experimental courses offered by EDADM can be found at:***

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for graduate students, open to qualified undergraduates:**EDADM 541: Principles of Inclusive Educational Leadership**

(3-0) Cr. 3. F.S.SS.

Prereq: Teacher licensure and permission of instructor

Basic principles of educational organizations, including an understanding of organizational behavior and theoretical approaches to administration. Exploration of substantive elements related to school reform, such as the change process, current issues in education, and developing a shared vision and mission around inclusive leadership.

EDADM 551: Supervision for Learning Environments

(3-0) Cr. 3. F.S.SS.

Prereq: EDADM 541

Study of effective classroom instructional practices that reflect current principles of learning. Understanding and practice of supervisory techniques that support teachers in improving the teaching and learning process, including skills in observational data collection, data analysis, collaboration, and conferencing skills.

EDADM 552: Contemporary Issues in Principal Leadership

(3-0) Cr. 3. F.S.SS.

Prereq: EDADM 541

Develops an equity-centered principal and building-level leadership understanding of school/work and community context. Emphasis placed on understanding essential tasks of building-level leadership and management; connecting management and operational decisions to mission and vision; building expertise in instructional leadership to improve teacher practice and student learning; leveraging school culture/atmosphere to provide opportunities and success for all students and their learning needs; advocacy for resources; and, examining the role of principals in a changing world.

EDADM 554: Leading School Reform

(3-0) Cr. 3. F.S.SS.

Prereq: EDADM 541

Study of principles of transformational leadership and collaborative decision-making skills. Leadership activities that facilitate the development of a school culture that embraces change and school reforms that result in high quality schools dedicated to improved student achievement.

EDADM 556: Leading for Equitable Learning in School Systems

(3-0) Cr. 3.

Prereq: EDADM 541

This course builds on Ed Admin 541, Principles of Educational Leadership, to explore more fully how a leader can establish a vision for equitable and excellent learning. It provides historical, practical and theoretical perspectives on the culture and systems of schools, particularly in an age of accountability.

EDADM 557: Human Resource Development for Learning

(3-0) Cr. 3. F.S.SS.

Prereq: EDADM 541

Leadership theory and practice that focuses on the professional development of school staff to promote improved student learning. Principles of school personnel evaluation; legal issues related to hiring, retention, and dismissal; evaluation models for professional and classified staff; and effective professional development models to support lifelong learning and reflective practice.

EDADM 558: Diverse Learning Needs

(3-0) Cr. 3. F.S.SS.

Prereq: EDADM 541

This course is designed to address practical and ethical dimensions of school leadership, especially related to disability status, race, gender, language status, and other minoritized statuses. Specific focus will be on the various ecological contexts of the school, the community, and the family as means of making effective use of multiple resources to enrich education.

EDADM 559: Curriculum Leadership

(3-0) Cr. 3. F.S.SS.

Prereq: EDADM 541

Analysis of PK-12 school curricula (hidden, explicit, and null), including current and historical curriculum and instructional issues; design, development, and evaluation of instructional materials. Promoting a vision of learning and instructional program conducive to student learning and staff professional growth. Examining the role curricula play in maintaining and advancing bodies of thought, norms, and historic attitudes. Draws on critical curriculum leadership theories to promote socially just curriculum leadership.

EDADM 575: Education Law and Ethics

(3-0) Cr. 3. F.S.SS.

Prereq: EDADM 541

Examination of constitutional, statutory, and judicial provisions as a basis for the legal operation of educational institutions. Rights and ethical responsibilities of school leaders are examined in relation to their roles and responsibilities with boards, other school personnel, and students.

EDADM 590: Special Topics

Cr. 1-4. Repeatable.

*Prereq: 9 credits in education***EDADM 591: Supervised Field Experience**

Cr. 1-6. Repeatable.

Prereq: EDADM 541 and admission to program and instructor's approval

Supervised on-the-job field experience in special areas.

EDADM 591A: Supervised Field Experience: Elementary Principal

Cr. 1-6. Repeatable.

Prereq: EDADM 541 and admission to program and instructor's approval

Supervised on-the-job field experience in special areas.

EDADM 591B: Supervised Field Experience: Secondary Principal

Cr. 1-6. Repeatable.

Prereq: EDADM 541 and admission to program and instructor's approval

Supervised on-the-job field experience in special areas.

EDADM 593: Workshops

Cr. 1-4.

*Prereq: 9 credits in education***EDADM 599: Creative Component Development**

Cr. 1-3.

*Prereq: 9 credits in educational administration***Courses for graduate students:****EDADM 615: Seminar**

Cr. 1-3. Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 615A: Seminar: Client Focus

Cr. 1-3. Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 615B: Seminar: Research

Cr. 1-3. Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 615C: Seminar: Quality Improvement

Cr. 1-3. Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 615D: Seminar: Special Services

Cr. 1-3. Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 615E: Seminar: Assessment

Cr. 1-3. Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 615F: Seminar: Leadership

Cr. 1-3. Repeatable.

In-depth study of administrative topics of contemporary interest and importance.

EDADM 620: Program Induction Leadership Seminar

(3-0) Cr. 3. SS.

Prereq: EDADM 541

Assessment of candidate skill areas, including communication, leadership, technology, and team facilitation for the development of an individualized learning plan for the program. Orientation to program expectations and leadership challenges in the context of schooling for a global society.

EDADM 621: Aligning the System for Student Achievement

(5-0) Cr. 5. F.

Prereq: EDADM 541

Alignment of system goals and leadership theory with student achievement, governance, systems thinking, and communication and collaboration with various publics.

EDADM 622: Maximizing Human and Financial Resources for Student Achievement

(3-0) Cr. 3. S.

Prereq: EDADM 541

Allocation of system resources to enhance student achievement; human resource development and negotiations; and coaching and evaluating the administrative team.

EDADM 623: Mid-Program Leadership Seminar

(1-0) Cr. 1. SS.

Prereq: EDADM 541

Mid-program assessment of candidate progress and exploration of leadership strategies for working with diverse populations.

EDADM 624: School Finance

(2-0) Cr. 2. SS.

Prereq: EDADM 541

General issues of school finance and managing a school district's financial responsibilities. Role of the federal, state and local governments in educational finance, tax issues, and structures; budgeting procedures; and financial analysis and accountability. Includes attendance at selected sessions of the Iowa School Business Management Academy in the spring and two additional class sessions during the summer.

EDADM 631: Achieving Results Through Accountability Strategies

(5-0) Cr. 5. F.

Prereq: EDADM 541

Accountability strategies for applying leadership theory to student achievement, governance, systems thinking, change agency, and communication and collaboration with various publics.

EDADM 632: Using System Assets to Create a Culture of Learning

(3-0) Cr. 3. S.

Prereq: EDADM 541

Leadership strategies to promote a culture of high student achievement; effective human capital management, including recruitment and induction of new personnel; and effective communication with parents and other patrons.

EDADM 633: Career Induction Leadership Seminar

(1-0) Cr. 1. SS.

Prereq: EDADM 541

Development of entry plan for creating a culture of collaboration; professional growth plan for first year in new position; and authentic performance assessment of values and beliefs platform.

EDADM 634: School Business Management and Accountability

(2-0) Cr. 2. SS.

Prereq: EDADM 541

Management of school operations; accountability and ethical business practices; risk management; school plant operations, food service and student transportation. Includes attendance at selected sessions of the Iowa School Business Management Academy in the spring and two additional class sessions during the summer.

EDADM 651: Ethics, Spirituality, and Social Justice in Administrative Practice

(3-0) Cr. 3. Alt. SS., offered even-numbered years.

Exploration of ethical models and practice of educational administrators. Participants develop personal and professional codes of ethics: define concepts of care, spirituality, democracy, equity, diversity, and social justice; and explain how those concepts relate to students' academic and social success. Case studies offer opportunities to consider moral and legal consequences of decision-making. Participants develop their own vision of leadership.

EDADM 690: Advanced Special Topics

Cr. 1-3. Repeatable.

Prereq: 9 credits in educational administration

EDADM 691: Clinical Dilemmas of Practice

Cr. 1-3. Repeatable, maximum of 3 credits.

Prereq: EDADM 541, admission to program, and instructor's approval

Supervised on-the-job field leadership experience in clinical dilemmas of practice. Offered on a satisfactory-fail basis only.

EDADM 699: Dissertation Research

Cr. arr. Repeatable.

Prereq: 9 credits in education

Educational Leadership and Policy Studies (EL PS)

Any experimental courses offered by EL PS can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for graduate students, open to qualified undergraduates:

EL PS 591: Social Justice Field Experience

Cr. 1-3. F.S.SS.

Prereq: EL PS 620

Supervised field experience in equity and social justice inside/outside higher education.

Courses for graduate students:

EL PS 615: Thematic Seminars

Cr. 1. F.S.SS.

Prereq: Admission to educational leadership doctoral program

EL PS 615A: Thematic Seminars: Communication and Team Building

Cr. 1. F.S.SS.

Prereq: Admission to educational leadership doctoral program

EL PS 615B: Thematic Seminars: Governance, Politics and Policies

Cr. 1. F.S.SS.

Prereq: Admission to educational leadership doctoral program

EL PS 615C: Thematic Seminars: Law, Equity, Equality

Cr. 1. F.S.SS.

Prereq: Admission to educational leadership doctoral program

EL PS 615D: Thematic Seminars: Ethics, Justice, and Caring

Cr. 1. F.S.SS.

Prereq: Admission to educational leadership doctoral program

EL PS 615E: Thematic Seminars: Problem Solving and Planning

Cr. 1. F.S.SS.

Prereq: Admission to educational leadership doctoral program

EL PS 615F: Thematic Seminars: Critical and Creative Thinking

Cr. 1. F.S.SS.

Prereq: Admission to educational leadership doctoral program

EL PS 616: Capstone Experience

Cr. 3. F.S.

Prereq: 4 credits of EL PS 615

This experience is designed to explore a topic addressed in one of the thematic seminars. The product of the capstone experience is a written paper of sufficient quality to be submitted to a scholarly journal for review.

EL PS 620: Education for Social Justice

(3-0) Cr. 3. F.

Introduction to social justice theory, research, and practice from a variety of theoretical perspectives in the context of education and broader society.

EL PS 621: Pedagogies of Dissent

(Cross-listed with WGS). (3-0) Cr. 3. S.

Prereq: EL PS 620

Critical examination of the theoretical foundations of contemporary and historical pedagogical traditions that seek to challenge the status quo, expand justice, and deepen democracy.

EL PS 622: Decolonizing Praxis

(3-0) Cr. 3. S.

Prereq: EL PS 620

Critically probes the philosophical and historical foundations of anti/post-colonial theory. Examination of policy, social, theoretical and educational issues from an anti/post-colonial perspective.

EL PS 624: Critical Race Theory in Education

(3-0) Cr. 3. SS.

Exploration of the central tenets of critical race theory. Examination of policy, social and educational issues from a critical race perspective.

EL PS 625: Gender and Sexuality in Education

(3-0) Cr. 3. SS.

Exploration of gender and sexuality in education.

EL PS 626: Social Justice and Social Change in Education

(3-0) Cr. 3. F.

Prereq: EL PS 621

An examination of how changes in the interest of social justice have occurred historically in education. Exploration of social movements and theories of social change.

EL PS 630: Education Policy and Analysis

Cr. 3. Alt. S., offered even-numbered years.

Prereq: Advanced graduate standing

Introduction to current theoretical, practical, and research-based policy debates related to the P-20 educational system. Critical analysis and evaluation of government policies, initiatives, funding, and other regulatory levers related to education. Intensive reading and discussion of the nature of theory, evidence, practice of education policy.

Electrical Engineering (E E)

Any experimental courses offered by E E can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

E E 166: Professional Programs Orientation

(Cross-listed with CPR E). Cr. R. F.S.

(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

E E 185: Introduction to Electrical Engineering and Problem-Solving I

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Project based examples from electrical engineering. Systematic thinking process for engineering problem solving. Group problem solving. Mathematical, conceptual and computer based projects. Solving engineering problems and presenting solutions through technical reports and oral presentations. Solutions of engineering problems using computation tools and basic programming.

E E 186: Introduction to Electrical Engineering and Problem Solving II

(0-2) Cr. 1. S.

Prereq: E E 185

Project based and hands on continuation of 185. Group skills needed to work effectively in teams. Individual interactive skills for small and large groups. Learning to use tools and methods for solving electrical engineering problems.

E E 201: Electric Circuits

(3-3) Cr. 4. F.S.

Prereq: Credit or enrollment in MATH 267 and PHYS 222

Emphasis on mathematical tools. Circuit elements (resistors, inductors, capacitors) and analysis methods including power and energy relationships. Network theorems. DC, sinusoidal steady-state, and transient analysis. AC power. Frequency response. Two port models. Diodes, PSPICE. Laboratory instrumentation and experimentation. Credit for only E E 201 or 442 may be used towards graduation.

E E 224: Signals and Systems I

(3-3) Cr. 4. F.S.

Prereq: E E 201, MATH 267, PHYS 222

Mathematical preliminaries. Introduction to signals and systems. Signal manipulations. System properties. LTI systems, impulse response and convolution. Fourier Series representation and properties. Continuous and discrete-time Fourier Transforms and properties. Sampling and reconstruction. Modulation and demodulation. Applications and demonstrations using Matlab.

E E 230: Electronic Circuits and Systems

(3-3) Cr. 4. F.S.

Prereq: E E 201, MATH 267, PHYS 222

Frequency domain characterization of electronic circuits and systems, transfer functions, sinusoidal steady state response. Time domain models of linear and nonlinear electronic circuits, linearization, small signal analysis. Stability and feedback circuits. Operational amplifiers, device models, linear and nonlinear applications, transfer function realizations. A/D and D/A converters, sources of distortions, converter linearity and spectral characterization, applications. Design and laboratory instrumentation and measurements.

E E 261: Transfer Orientation

(Cross-listed with CPR E). Cr. R.

Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

E E 285: Problem Solving Methods and Tools for Electrical Engineering

(3-3) Cr. 4.

Integration of field-specific computational tools for practically solving electrical engineering problems. Methods for systematically reducing problems into sequential steps compatible with computer based tools. Structuring computer programs for efficiency and maintainability. Integration of multi-platform operating systems and multi-vendor tools for solving engineering problems. Hands-on laboratory experiences using Matlab, C, and other computational tools.

E E 294: Program Discovery

(Cross-listed with CPR E). Cr. R.

Prereq: CPR E 166 or E E 166

The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today's world. Offered on a satisfactory-fail basis only.

E E 303: Energy Systems and Power Electronics

(3-0) Cr. 3. F.S.

Prereq: MATH 267, PHYS 222; credit or enrollment in E E 230

Structure of competitive electric energy systems. System operation and economic optimization. Mutual inductance, transformers. Synchronous generators. Balanced three-phase circuit analysis and power calculations. Network calculations and associated numerical algorithms. Two-port circuits. Voltage regulation. Resonance and power factor correction. DC and induction motors. Power electronic circuit applications to power supplies and motor drives.

E E 311: Electromagnetic Fields and Waves

(4-0) Cr. 4. F.S.

Prereq: E E 201, MATH 265, PHYS 222, credit or enrollment in MATH 267

Fundamentals and applications of electric and magnetic fields and materials. Electrostatics and magnetostatics, potentials, capacitance and inductance, energy, force, torque. Uniform plane electromagnetic waves, Poynting vector. Transmission lines: transient and sinusoidal steady-state conditions, reflection coefficient.

E E 314: Electromagnetics for non Electrical Engineers

(3-0) Cr. 3.

Prereq: PHYS 222, PHYS 112, or equivalent

Conceptual study of electromagnetism and its application in engineering and related fields. EM fundamentals, EM spectrum, radiation, radiating systems, wireless, modern concepts of physics, quantum computing, transmission lines, high speed effects, waveguides, GPS and other related phenomena will be discussed and explained with the application in mind.

E E 321: Communication Systems I

(3-0) Cr. 3. F.

Prereq: E E 224

Frequency domain analysis, spectral filtering, bandwidth. Linear modulation systems. Angle modulation systems. Phase locked loop, super-heterodyne receiver. Sampling and pulse code modulation. Digital data transmission, line coding, pulse shaping, multiplexing.

E E 322: Probabilistic Methods for Electrical Engineers

(Cross-listed with STAT). (3-0) Cr. 3. F.S.

Prereq: E E 224

Introduction to probability with applications to electrical engineers. Sets and events, probability space, conditional probability, total probability and Bayes' rule. Discrete and continuous random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating function, multiple random variables, functions of random variables. Elements of statistics, hypothesis testing, confidence intervals, least squares. Introduction to random processes.

E E 324: Signals and Systems II

(3-3) Cr. 4. F.S.

Prereq: E E 224

Laplace and z-Transforms, properties and inverses. Applications to LTI systems and analog/digital filters. Feedback systems and stability. State-space representation and analysis.

E E 330: Integrated Electronics

(Cross-listed with CPR E). (3-3) Cr. 4.

Prereq: E E 201, credit or enrollment in E E 230, CPR E 281

Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells.

E E 332: Semiconductor Materials and Devices

(Cross-listed with MAT E). (3-0) Cr. 3. S.

Prereq: PHYS 222; MAT E majors: MAT E 317; CPR E and E E majors: E E 230

Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED's.

E E 333: Electronic Systems Design

(3-3) Cr. 4. F.

Prereq: E E 230, credit or enrollment in CPR E 288

Further topics in electronic systems design: Use of sensors and actuators. High-power amplifying and switching components. Linear and switched-mode power supplies. Linear and switched-mode amplifiers. Interfacing electronic components with programmable microcontrollers. Printed circuit board technology and design tools. Laboratory exercises and design projects incorporating printed circuit technology.

E E 341: BioMEMS and Nanotechnology

(Cross-listed with B M E). (3-0) Cr. 3.

Prereq: B M E 220

Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nano-wires, and stimuli-responsive biomaterials.

E E 341L: BioMEMS and Nanotechnology Laboratory

(Cross-listed with B M E). (0-3) Cr. 1.

Prereq: B M E 220, concurrent enrollment in B M E 341

Introductory laboratory course accompanying B M E 341. Design, fabrication, and characterization of BioMEMS lab-on-a-chip devices and nanoscale techniques for bioengineering. Student group projects.

E E 351: Analysis of Energy Systems

(3-0) Cr. 3.

Prereq: PHYS 222

Energy-scientific, engineering and economic foundations. Energy utilization-global and national. Sectoral analysis of energy consumption. Relationship of energy consumption and production to economic growth and environment. Technology for energy production. Economic evaluation of energy utilization and production. Scientific basis for global warming. Environmental impact of energy production and utilization. Renewable energy.

Meets International Perspectives Requirement.

E E 388: Sustainable Engineering and International Development

(Cross-listed with A B E, C E). (2-2) Cr. 3. F.

Prereq: Junior classification in engineering

Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering.

Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs).

Course readings, final project/design report.

Meets International Perspectives Requirement.

E E 391: Open Laboratory and Design Studio

(2-2) Cr. 2.

Prereq: E E 224

Studio-based activity (guided problem-based learning and design) focusing on elements of design, measurement, data capture, and data interpretation. Team building, engineering professionalism, engineering process of review and critique, and presentation. Open design activities that may include working with other studios.

E E 394: Program Exploration

(Cross-listed with CPR E). Cr. R.

Prereq: CPR E 294 or E E 294

Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.

E E 396: Summer Internship

Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services

Professional work period of at least 10 weeks during the summer.

Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

E E 398: Cooperative Education (Co-op)

Cr. R. Repeatable. F.S.

Prereq: Permission of department and Engineering Career Services

Professional work period. One semester per academic or calendar year.

Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

E E 414: Microwave Engineering

(Dual-listed with E E 514). (3-3) Cr. 4. F.

Prereq: E E 230, E E 311

Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.

E E 417: Electromagnetic Radiation, Antennas, and Propagation

(Dual-listed with E E 517). (3-3) Cr. 4. S.

Prereq: E E 311

Fundamental antenna concepts. Radiation from wire-and aperture-type sources. Radio transmission formulas. Wave and antenna polarization. Antenna arrays. Modern antenna topics. Practical antenna design.

Antenna noise. Radiowave propagation in the presence of the earth and its atmosphere. Antenna measurements and computer aided analysis.

E E 418: High Speed System Engineering Measurement and Testing

(Cross-listed with CPR E). (3-2) Cr. 4. F.

Prereq: E E 230 and E E 311

Measurement of high speed systems and mixed signal systems. Measurement accuracy and error. Network analysis and spectrum analysis used in high speed measurement and testing. Test specification process and parametric measurement. Sampling and digital signal processing concepts. Design for testability. Testing equipment. Applications.

E E 419: Magnetism and Magnetic Materials

(Dual-listed with E E 519). (Cross-listed with MAT E). (3-0) Cr. 3. F.

Prereq: E E 311 or MAT E 317 or PHYS 364

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, magnetic measurements of properties for materials evaluation.

E E 422: Communication Systems II

(3-0) Cr. 3.

Prereq: E E 321, E E 322, enrollment in E E 423

Introduction to probability and random processes; Performance of analog systems with noise; Performance of digital communication with noise; optimum receivers, transmission impairments, and error rates; Introduction to information theory and coding: source coding, channel coding, channel capacity.

E E 423: Communication Systems Laboratory

(0-3) Cr. 1.

Prereq: E E 321, enrollment in E E 422

Construction and evaluation of modulators, demodulators and other components for analog and digital communications. Design, simulate, and evaluate wireless communication systems and their key components. Noise measurement.

E E 424: Introduction to Digital Signal Processing

(3-3) Cr. 4.

Prereq: E E 224

Sampling and reconstruction. Concepts and mathematical tools in discrete-time signal processing with examples from digital signal processing and communications. Discrete-time correlation and matched filter receivers. Discrete Fourier transform (DFT). Fast Fourier algorithms. Z transforms. Design of finite impulse response (FIR) and infinite impulse response (IIR) filters. Realizations of discrete-time systems and quantization effects. Multi-rate signal processing. Laboratory experiments illustrating DSP implementations and applications.

E E 425: Machine learning: A Signal Processing Perspective

Cr. 3. S.

Prereq: E E 322/STAT 322 (preferred) or STAT 330; and MATH 207 or MATH 407/507 (preferred).

Basic machine learning tools and techniques. Predictive modeling, regression (least squares estimation), classification (multiple hypothesis testing), Bayesian supervised learning and time series analysis (MMSE estimation, MAP estimation, Kalman filtering and more), unsupervised learning (clustering, PCA, robust PCA). Introduce neural network and deep learning methods and the publicly available software packages for these.

E E 432: Microelectronics Fabrication Techniques

(Dual-listed with E E 532). (Cross-listed with MAT E). (2-4) Cr. 4.

Prereq: PHYS 222; Mat E majors: MAT E 317; CprE and EE majors: E E 230

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

E E 435: Analog VLSI Circuit Design

(Cross-listed with CPR E). (3-3) Cr. 4. S.

Prereq: E E 330

Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters.

E E 437: Electronic Properties of Materials

(Dual-listed with E E 537). (Cross-listed with MAT E). Cr. 3. S.

Prereq: E E 332 or MAT E 317 or PHYS 322

Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

E E 438: Optoelectronic Devices and Applications

(Dual-listed with E E 538). (3-0) Cr. 3.

Prereq: E E 311, E E 332

Transmission and reflection of electromagnetic plane waves. Propagation in dielectric and fiber optic waveguides. LED and laser operating principles and applications. Photodetectors and solar cells. Optical modulation and switching.

E E 439: Nanoelectronics

(3-0) Cr. 3. S.

Prereq: E E 332 or M A T E 334

Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the leading technologies for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices.

E E 442: Introduction to Circuits and Instruments

(3-2) Cr. 2. F.S.

Prereq: P H Y S 222, M A T H 267

Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive-inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers and applications. Familiarization with common E E instrumentation and demonstration of basic principles. Credit for only 201 or 442 may be counted toward graduation; credit for 442 will not count toward graduation for E E or Cpr E majors.

E E 448: Introduction to AC Circuits and Motors

(3-2) Cr. 2. F.S.

Prereq: E E 442

Half-semester course. Basics of DC machines, stepper motors, AC induction motors, and synchronous generators. AC steady state analysis, transformers, and three-phase circuit analysis.

E E 450: Biosensors

(Cross-listed with B M E). (3-0) Cr. 3.

Prereq: B M E 220

Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

E E 450L: Biosensors Laboratory

(Cross-listed with B M E). (0-3) Cr. 1.

Prereq: B M E 220, concurrent enrollment in B M E 450

Laboratory course accompanying B M E 450. Design, fabrication, and characterization of various electrical, chemical, polymer, optical and acoustic sensors.

E E 451: Engineering Acoustics

(Cross-listed with E M, M E). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: P H Y S 221 and M A T H 266 or M A T H 267

The basics of acoustic wave propagation in fluids with an emphasis on sound propagation in air. Topics include transmission and reflection of sound at a boundary; role of acoustic sources in directing sound fields; diffraction of sound around solid objects; reverberation of sound in a room; and the measurement of sound fields.

E E 452: Electrical Machines and Power Electronic Drives

(2-3) Cr. 3. S.

Prereq: E E 303, E E 324

Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC, induction, and AC motors. Experiments with converter topologies, DC motors, AC motors and adjustable speed drives.

E E 455: Introduction to Energy Distribution Systems

(3-0) Cr. 3. F.

Prereq: E E 303, credit or registration in E E 324

Overhead and underground distribution system descriptions and characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment.

E E 456: Power System Analysis I

(3-0) Cr. 3. F.

Prereq: E E 303, credit or registration in E E 324

Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow.

E E 457: Power System Analysis II

(3-0) Cr. 3. S.

Prereq: E E 303, credit or registration in E E 324

Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment.

E E 458: Economic Systems for Electric Power Planning

(Cross-listed with ECON). (3-0) Cr. 3.

Prereq: E E 303 or ECON 301

Evolution of electric power industry. Power system operation and planning and related information systems. Linear and integer optimization methods. Short-term electricity markets and locational marginal prices. Risk management and financial derivatives. Basics of public good economics. Cost recovery models including tax treatment for transmission investments.

E E 459: Electromechanical Wind Energy Conversion and Grid Integration

(Dual-listed with E E 559). (3-0) Cr. 3.

Prereq: Credit or enrollment in E E 452, E E 456

Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

E E 465: Digital VLSI Design

(Cross-listed with CPR E). (3-3) Cr. 4. F.

Prereq: E E 330

Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project.

E E 466: Multidisciplinary Engineering Design

(Cross-listed with A B E, AER E, B M E, CPR E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.

Prereq: Student must be within two semesters of graduation; permission of instructor.

Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

E E 475: Automatic Control Systems

(3-0) Cr. 3. F.

Prereq: E E 324

Stability and performance analysis of automatic control systems. The state space, root locus, and frequency response methods for control systems design. PID control and lead-lag compensation. Computer tools for control system analysis and design.

E E 476: Control System Simulation

(2-3) Cr. 3. S.

Prereq: E E 475

Computer aided techniques for feedback control system design, simulation, and implementation.

E E 488: Eddy Current Nondestructive Evaluation

(Dual-listed with E E 588). (Cross-listed with MAT E). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: MATH 265 and (MAT E 216 or MAT E 273 or MAT E 392 or E E 311 or PHYS 364)

Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts.

E E 489: Survey of Remote Sensing Technologies

(Dual-listed with E E 589). (Cross-listed with GEOL, MTEOR, NREM). (3-0) Cr. 3. F.

Prereq: Four courses in physical or biological sciences or engineering

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S.

E E 489L: Satellite Remote Sensing Laboratory

(Dual-listed with E E 589L). (Cross-listed with GEOL, MTEOR, NREM). (0-3) Cr. 1. F.

Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/EE 489/589

Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context.

E E 490: Independent Study

Cr. arr. Repeatable.

Prereq: Senior classification in electrical engineering

Investigation of an approved topic commensurate with the student's prerequisites.

E E 490H: Independent Study: Honors

Cr. arr.

Prereq: Senior classification in electrical engineering

Investigation of an approved topic commensurate with the student's prerequisites.

E E 491: Senior Design Project I and Professionalism

(Cross-listed with CPR E, S E). (2-3) Cr. 3. F.S.

Prereq: CPR E majors: CPR E 308, completion of 29 credits in the CPR E professional program, ENGL 314. E E majors: E E 322, completion of 24 credits in the E E professional program, ENGL 314. SE majors: S E 329 and S E 339, CPR E 308 or COM S 352, ENGL 309 or ENGL 314.

Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

E E 492: Senior Design Project II

(Cross-listed with CPR E, S E). (1-3) Cr. 2. F.S.

Prereq: CPR E 491 or E E 491

Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

E E 494: Portfolio Assessment

(Cross-listed with CPR E). Cr. R.

Prereq: CPR E 394 or E E 394, credit or enrollment in CPR E 491 or E E 491

Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

E E 496: Modern Optics

(Cross-listed with PHYS). (3-0) Cr. 3. S.

Prereq: Credit or enrollment in PHYS 322, PHYS 365, and PHYS 480

Review of wave and electromagnetic theory; topics selected from: reflection/refraction, interference, geometrical optics, Fourier analysis, dispersion, coherence, Fraunhofer and Fresnel diffraction, holography, quantum optics, nonlinear optics.

Courses primarily for graduate students, open to qualified undergraduates:**E E 501: Analog and Mixed-Signal VLSI Circuit Design Techniques**

(3-3) Cr. 4. F.

Prereq: E E 435

Design techniques for analog and mixed-signal VLSI circuits. Amplifiers; operational amplifiers, transconductance amplifiers, finite gain amplifiers and current amplifiers. Linear building blocks; differential amplifiers, current mirrors, references, cascading and buffering. Performance characterization of linear integrated circuits; offset, noise, sensitivity and stability. Layout considerations, simulation, yield and modeling for high-performance linear integrated circuits.

E E 503: Power Management Integrated Circuits

Cr. 3. Alt. F., offered even-numbered years.

Prereq: E E 435, or Credit or Registration for E E 501

Introducing in-depth chip-level power management integrated circuit (PMIC) designs, including switching power converters, linear regulators, charge pumps and other types of PMICs. Steady-state and dynamic response analysis and optimization of linear regulators and switching power converters with different control methodologies, such as voltage-/current-/band-band control. Chip-level circuit design considerations, optimizations and cadence simulations for PMICs, including system and block-level circuits, such as voltage reference, current source and current mirror, current sensor, ramp generator, non-overlapping power stage, and other circuits.

E E 505: CMOS and BiCMOS Data Conversion Circuits

(3-3) Cr. 4. Alt. S., offered even-numbered years.

Prereq: E E 501

Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

E E 506: Design of CMOS Phase-Locked Loops

(3-3) Cr. 4.

Prereq: E E 435 or E E 501 or instructor approval

Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

E E 507: VLSI Communication Circuits

(3-3) Cr. 4. Alt. S., offered odd-numbered years.

Prereq: E E 435 or E E 501

Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

E E 508: Filter Design and Applications

(3-3) Cr. 4.

Prereq: E E 501

Filter design concepts. Approximation and synthesis. Transformations. Continuous-time and discrete time filters. Discrete, active and integrated synthesis techniques.

E E 509: Mixed-Signal IC Testing and Built In Self Test

(3-0) Cr. 3.

Prereq: E E 424 or equivalent and E E 435 or E E 501

Introduction to mixed-signal IC testing; measurement uncertainty and test validity; IEEE standard test algorithms; high performance test and built-in self test challenges; new mixed-signal test algorithms and techniques to reduce data acquisition to relax instrumentation requirements, to simplify test setup, to improve test validity, and/or to enable co-testing of heterogeneous functions.

E E 510: Topics in Electromagnetics

Cr. 1-3. Repeatable.

*Prereq: E E 311***E E 512: Advanced Electromagnetic Field Theory I**

(3-0) Cr. 3. F.

Prereq: E E 311

Review of static electric and magnetic fields. Maxwell's equations. Circuit concepts and impedance elements. Propagation and reflection of plane waves in isotropic media. Guided electromagnetic wave. Characteristics of common waveguides and transmission lines. Propagation in anisotropic media. Special theorems and concepts. Radiation and scattering.

E E 513: Advanced Electromagnetic Field Theory II

(3-0) Cr. 3. S.

Prereq: E E 512

Green's functions, perturbational and variational techniques. Analysis of microstrip lines and interconnects. Spectral domain approach, waves in layered media. Integral equations and method of moments. Inverse scattering. Electromagnetic applications.

E E 514: Microwave Engineering

(Dual-listed with E E 414). (3-3) Cr. 4. F.

Prereq: E E 230, E E 311

Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.

E E 516: Computational Methods in Electromagnetics

(3-0) Cr. 3. S.

Prereq: E E 311

Maxwell's equations. Differential equation based methods. Finite difference and finite difference time domain methods, boundary conditions. Finite element method and applications to the analysis of practical devices. Integral equation based methods. Electric and magnetic field integral equations. Matrix solvers. Fast solution methods.

E E 517: Electromagnetic Radiation, Antennas, and Propagation

(Dual-listed with E E 417). (3-3) Cr. 4. S.

Prereq: E E 311

Fundamental antenna concepts. Radiation from wire-and aperture-type sources. Radio transmission formulas. Wave and antenna polarization. Antenna arrays. Modern antenna topics. Practical antenna design. Antenna noise. Radiowave propagation in the presence of the earth and its atmosphere. Antenna measurements and computer aided analysis.

E E 518: Microwave Remote Sensing

(Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Math 265

Microwave remote sensing of Earth's surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.

E E 519: Magnetism and Magnetic Materials

(Dual-listed with E E 419). (Cross-listed with M S E). (3-0) Cr. 3. F.

Prereq: E E 311 or MAT E 317 or PHYS 364

Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, magnetic measurements of properties for materials evaluation.

E E 521: Advanced Communications

(3-0) Cr. 3. F.

Prereq: E E 422, credit or enrollment in E E 523

Digital communication systems overview. Characterization of communication channels. Digital modulation and demodulation design and performance analysis. Channel capacity and error-control coding concepts. Waveform design for band-limited channels. Equalization. Wireless fading channels and performance.

E E 522: Cognitive Radio Networks

(Cross-listed with CPR E). (3-0) Cr. 3. Alt. F., offered irregularly.

Prereq: Permission of instructor

Topics on cognitive radio networks: Cognitive Radio Networks Architecture; Software Defined Radio Architecture; Spectrum Sensing; Spectrum Management; Spectrum Sharing; Spectrum Mobility; Applications of Cognitive Radio Networks.

E E 523: Random Processes for Communications and Signal Processing

(3-0) Cr. 3.

Prereq: E E 322, MATH 317

Axioms of probability; Repeated trials; Functions of a random variable and multiple random variables: covariance matrix, conditional distribution, joint distribution, moments, and joint moment generating function; Mean square estimation; stochastic convergence; Some important stochastic processes: Random walk, Poisson, Wiener, and shot noise; Markov chains; Power spectral analysis; Selected applications.

E E 524: Digital Signal Processing

(3-0) Cr. 3. F.

Prereq: E E 322, E E 424, MATH 317

Review: sampling and reconstruction of signals; discrete-time signals, systems, and transforms. Multi-rate digital signal processing and introduction to filter banks. Optimal linear filtering and prediction. Introductions to adaptive filtering and spectral estimation. Applications.

E E 525: Data Analytics in Electrical and Computer Engineering

Cr. 3. S.

Prereq: E E 322 or equivalent

Introduction to a variety of data analytics techniques -- particularly those relevant for electrical and computer engineers -- from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques.

E E 526: Deep Learning: Theory and Practice

Cr. 3.

Prereq: MATH 207, E E 322

Review of basic theoretic tools such as linear algebra and probability. Machine learning basics will then be introduced to motivate deep learning networks. Different deep learning network architectures will be studied in detail, including their training and implementations. Applications and research problems will also be surveyed at the end of the class.

E E 527: Detection and Estimation Theory

(3-0) Cr. 3. S.

Prereq: E E 422

Statistical estimation theory and performance measures: maximum likelihood estimation, Cramer-Rao bound, Bayesian estimation, optimal demodulation, signal design. Introduction to graphical models. Hidden Markov models and Kalman filter. Classical statistical decision theory, decision criteria, binary and composite hypothesis tests. Error probability and Chernoff bound. Applications.

E E 529: Data Analytics in Electrical and Computer Engineering

(Cross-listed with CPR E). (3-0) Cr. 3. S.

Prereq: E E 322 or equivalent

Introduces a variety of data analytics techniques # particularly those relevant for electrical and computer engineers # from a foundational perspective. Topics to be covered include techniques for classification, visualization, and parameter estimation, with applications to signals, images, matrices, and graphs. Emphasis will be placed on rigorous analysis as well as principled design of such techniques.

E E 531: Micro and Nano Systems and Devices

Cr. 3.

Prereq: E E 332; E E 432 or E E 532

Fundamentals of modeling and design of micro-nanosystems and devices based on various operational mechanisms. Significant hands-on experience using commercial software COMSOL to design and model micro-nanosystems and devices for biomedical and biomedicine applications among others. Experimental hands-on experience to operate the fabricated micro-nanosystems and devices in the instructor's research lab.

E E 532: Microelectronics Fabrication Techniques

(Dual-listed with E E 432). (Cross-listed with M S E). (2-4) Cr. 4.

Prereq: PHYS 222; Mat E majors: MAT E 317; CprE and EE majors: E E 230

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

E E 535: Physics of Semiconductors

(Cross-listed with PHYS). (3-3) Cr. 4.

Prereq: E E 311 and E E 332

Basic elements of quantum theory, Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carriers and recombination, carrier transport at low and high fields, space charge limited current, photo-conductivity in solids, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density, photo-conductivity, diffusion length of carriers.

E E 536: Physics of Semiconductor Devices

(Cross-listed with PHYS). (3-0) Cr. 3.

Prereq: E E 535

P-n junctions, band-bending theory, tunneling phenomena, Schottky barriers, heterojunctions, bipolar transistors, field-effect transistors, negative-resistance devices and optoelectronic devices.

E E 537: Electronic Properties of Materials

(Dual-listed with E E 437). (Cross-listed with M S E). Cr. 3. S.

Prereq: E E 332 or MAT E 317 or PHYS 322

Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

E E 538: Optoelectronic Devices and Applications

(Dual-listed with E E 438). (3-0) Cr. 3.

Prereq: E E 311, E E 332

Transmission and reflection of electromagnetic plane waves. Propagation in dielectric and fiber optic waveguides. LED and laser operating principles and applications. Photodetectors and solar cells. Optical modulation and switching.

E E 552: Energy System Planning

(3-0) Cr. 3.

Prereq: E E 456, E E 457 or equivalent

Characteristics of bulk energy conversion, storage, and transport technologies. Environmental legislation. Modeling of electricity markets. Evaluation of sustainability and resiliency. Types of planning analyses: economic, multi-sector, long-term, national. Planning tools and associated optimization methods.

E E 553: Steady State Analysis

(3-0) Cr. 3. F.

Prereq: E E 456, E E 457

Power flow, economic dispatch, unit commitment, electricity markets, automatic generation control, sparse matrix techniques, interconnected operation, voltage control.

E E 554: Power System Dynamics

(3-0) Cr. 3. S.

Prereq: E E 456, E E 457, E E 475

Dynamic performance of power systems with emphasis on stability. Modeling of system components and control equipment. Analysis of the dynamic behavior of the system in response to small and large disturbances.

E E 555: Advanced Energy Distribution Systems

(3-0) Cr. 3.

Prereq: E E 455

Transient models of distribution components, automated system planning and distribution automation, surge protection, reliability, power quality, power electronics and intelligent systems applications.

E E 556: Power Electronic Systems

(3-0) Cr. 3.

Prereq: E E 452

Converter topologies, AC/DC, DC/DC, DC/AC, AC/AC. Converter applications to do motor drives, power supplies, AC motor drives, power system utility applications (var compensators) and power quality.

E E 559: Electromechanical Wind Energy Conversion and Grid Integration

(Dual-listed with E E 459). (3-0) Cr. 3.

Prereq: Credit or enrollment in E E 452, E E 456

Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

E E 565: Systems Engineering and Analysis

(Cross-listed with AER E, I E). (3-0) Cr. 3.

Prereq: Coursework in basic statistics

Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test, evaluation and systems engineering planning and organization. Not available for degrees in industrial engineering.

E E 566: Avionics Systems Engineering

(Cross-listed with AER E). (3-0) Cr. 3. S.

Prereq: E E 565

Avionics functions. Applications of systems engineering principles to avionics. Top down design of avionics systems. Automated design tools.

E E 570: Systems Engineering Analysis and Design

(3-0) Cr. 3.

Prereq: E E 475, E E 577

Selected topics in abstract algebra, linear algebra, real analysis, functional analysis, and optimization methods in electrical engineering.

E E 571: Introduction to Convex Optimization

(3-0) Cr. 3.

Introduction to convex optimization problems emerging in electrical engineering. Efficiently solving convex optimization problems with the use of interior point algorithms software. Review of linear algebra, convex functions, convex sets, convex optimization problems, duality, disciplined convex programming, applications to optimal filtering, estimation, control and resources allocations, sensor network, distributed systems.

E E 573: Random Signal Analysis and Kalman Filtering

(Cross-listed with AER E, M E). (3-0) Cr. 3. F.

Prereq: E E 324 or AER E 331 or M E 370 or M E 411 or MATH 341

Elementary notions of probability. Random processes. Autocorrelation and spectral functions. Estimation of spectrum from finite data. Response of linear systems to random inputs. Discrete and continuous Kalman filter theory and applications. Smoothing and prediction. Linearization of nonlinear dynamics.

E E 574: Optimal Control

(Cross-listed with AER E, M E). (3-0) Cr. 3. S.

Prereq: E E 577

The optimal control problem. Variational approach. Pontryagin's principle, Hamilton-Jacobi equation. Dynamic programming. Time-optimal, minimum fuel, minimum energy control systems. The regulator problem. Structures and properties of optimal controls.

E E 575: Introduction to Robust Control

(Cross-listed with AER E, M E). (3-0) Cr. 3.

Prereq: E E 577

Introduction to modern robust control. Model and signal uncertainty in control systems. Uncertainty description. Stability and performance robustness to uncertainty. Solutions to the H₂, H_∞, and L₁ control problems. Tools for robustness analysis and synthesis.

E E 576: Digital Feedback Control Systems

(Cross-listed with AER E, M E). (3-0) Cr. 3. F.

Prereq: E E 475 or AER E 432 or M E 411 or MATH 415; and MATH 267

Sampled data, discrete data, and the z-transform. Design of digital control systems using transform methods: root locus, frequency response and direct design methods. Design using state-space methods. Controllability, observability, pole placement, state estimators. Digital filters in control systems. Microcomputer implementation of digital filters. Finite wordlength effects. Linear quadratic optimal control in digital control systems. Simulation of digital control systems.

E E 577: Linear Systems

(Cross-listed with AER E, M E, MATH). (3-0) Cr. 3. F.

Prereq: E E 324 or AER E 331 or MATH 415; and MATH 207

Linear algebra review. Least square method and singular value decomposition. State space modeling of linear continuous-time systems. Solution of linear systems. Controllability and observability. Canonical description of linear equations. Stability of linear systems. State feedback and pole placements. Observer design for linear systems.

E E 578: Nonlinear Systems

(Cross-listed with AER E, M E, MATH). (3-0) Cr. 3. S.

Prereq: E E 577

Linear vs nonlinear systems. Phase plane analysis. Bifurcation and center manifold theory. Lyapunov stability. Absolute stability of feedback systems. Input-output stability. Passivity theory and feedback linearization. Nonlinear control design techniques.

E E 588: Eddy Current Nondestructive Evaluation

(Dual-listed with E E 488). (Cross-listed with M S E). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: MATH 265 and (MAT E 216 or MAT E 273 or MAT E 392 or E E 311 or PHYS 364)

Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a 'virtual' eddy current instrument will demonstrate key concepts.

E E 589: Survey of Remote Sensing Technologies

(Dual-listed with E E 489). (Cross-listed with GEOL, MTEOR, NREM). (3-0)

Cr. 3. F.

Prereq: Four courses in physical or biological sciences or engineering

Electromagnetic-radiation principles, active and passive sensors, multispectral and hyperspectral sensors, imaging radar, SAR, thermal imaging, lidar. Examples of applications. Also offered online S.

E E 589L: Satellite Remote Sensing Laboratory

(Dual-listed with E E 489L). (Cross-listed with GEOL, MTEOR, NREM). (0-3)

Cr. 1. F.

Prereq: Completion or concurrent enrollment in MTEOR/GEOL/NREM/EE 489/589

Processing and analysis of satellite sensor data (optical and radar). Provides practical applications in an environmental context.

E E 590: Special Topics

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590A: Special Topics: Electromagnetic Theory

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590B: Special Topics: Control Systems

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590C: Special Topics: Communication Systems

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590E: Special Topics: Computer Engineering

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590F: Special Topics: Electric Power

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590G: Special Topics: Electrical Materials

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590H: Special Topics: Electronic Devices and Circuits

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590I: Special Topics: Signal Processing

Cr. 1-6. Repeatable.

Formulation and solution of theoretical or practical problems in electrical engineering.

E E 598: Electrical and Computer Engineering Learning Community Seminar

(Cross-listed with CPR E). Cr. R. F.S.

Prereq: Electrical and Computer Engineering Graduate Student

Introduction to graduate study in Electrical and Computer Engineering at Iowa State University. Building networks, introduction to core requirements, and tools and techniques for success. Offered on a satisfactory-fail basis only. ECpE

E E 599: Creative Component

Cr. arr. Repeatable.

Courses for graduate students:**E E 621: Coding Theory**

(3-0) Cr. 3.

Prereq: E E 521

Fundamentals of error-control coding techniques: coding gain, linear block codes. Galois fields. Cyclic codes: BCH, Reed-Solomon. Convolutional codes and the Viterbi algorithm. Trellis-coded modulation. Iterative decoding. Recent developments in coding theory.

E E 622: Information Theory

(3-0) Cr. 3.

Prereq: E E 521, E E 523

Information system overview. Entropy and mutual information. Data Compression and source encoding. Discrete memoryless channel capacity. Noisy channel coding theorem. Rate distortion theory. Waveform channels. Advanced topics in information theory.

E E 653: Advanced Topics in Electric Power System Engineering

(3-0) Cr. 3. Repeatable.

Prereq: Permission of instructor

Advanced topics of current interest in electric power system engineering.

E E 674: Advanced Topics in Systems Engineering

(3-0) Cr. 3. Repeatable.

Prereq: Permission of instructor

Advanced topics of current interest in the areas of control theory, stochastic processes, digital signal processing, and image processing.

E E 697: Engineering Internship

(Cross-listed with CPR E). Cr. R. Repeatable.

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

E E 699: Research

Cr. arr. Repeatable.

Engineering (ENGR)

Any experimental courses offered by ENGR can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

ENGR 101: Engineering Orientation

Cr. R. F.S.

Introduction to the College of Engineering and the engineering profession. Information concerning university and college policies, procedures, and resources. Undeclared sections: Considerations in choosing an engineering curriculum. Opportunities to interact with departments. Declared sections: Introduction to major-specific topics. Offered on a satisfactory-fail basis only.

ENGR 104: LEAD Program Orientation

(1-0) Cr. 1. F.

Orientation for LEAD Learning/Living Community participants. Introduction to college and university resources, tools and techniques to promote academic, professional and social/cultural development and success. Focus on building support networks with peers, faculty, and staff. Introduction to core engineering competencies including but not limited to initiative, communication, teamwork, and cultural adaptability. Offered on a satisfactory-fail basis only.

ENGR 105: LEAD Program Seminar

(1-0) Cr. 1. S.

Seminar for LEAD Learning/Living Community participants. Focus on professional development and exposure to various engineering disciplines through hands-on lab experiences, industry visits and networking opportunities with alumni, faculty, and staff. Development of core competencies: engineering/technical knowledge, communication and teamwork. Offered on a satisfactory-fail basis only.

ENGR 131: Learning Community Seminar

Cr. R. F.

Peer-mentored review of course topics in engineering undeclared learning communities. Offered on a satisfactory-fail basis only.

ENGR 150: Foundations of Leadership Development and Learning

(1-0) Cr. 1. F.S.

Prereq: ELP students only

Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Offered on a satisfactory-fail basis only.

ENGR 160: Engineering Problems with Computer Applications Laboratory

(2-2) Cr. 3. F.S.SS.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations

Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

ENGR 250: Leadership in Engineering Teams

(1-0) Cr. 1. F.S.

Building and sustaining decision-making engineering teams. Students will explore the interrelated processes of discerning purpose, thinking systemically, developing reflective judgment, and exercising leadership by mobilizing and setting the direction for adaptive change within a team. Industry based examples and information from engineering and natural resource sciences will be infused into the course.

ENGR 260: Engineering: Getting from Thought to Thing

(Cross-listed with IND D). (3-0) Cr. 3. F.S.

What is engineering, technology and their roles in society? Investigation of engineering methods through case studies of everyday objects. Explore questions about the impact of technology in society. Apply engineering methods to design and failure analysis.

ENGR 265: Survey of the Impacts of Engineering Activity

(3-0) Cr. 3. F.S.

Survey of the economic, environmental, societal, and political benefits and problems resulting from engineering activity. Effects of engineering projects on human health, social structures, and the environment. Examination of improvements in economic opportunities and quality of life resulting from engineering activity. Case studies of the effects of engineering activity.

ENGR 270: Survey of How Things Work

(Cross-listed with IND D). (3-0) Cr. 3. F.S.

Removing mysteries surrounding science and technology. Identify key concepts from applied science and technology to obtain better understanding on how things work. Review and explain the principles behind the technologies which define our modern way of life. A survey of broad range of technology could include: cell phones, GPS, radio, television, computers, ultrasound, microwave ovens, automobile, bioengineering and other industrial and consumer technologies. Common day technology examples illustrating scientific knowledge and applications.

ENGR 320: International Experience Report

Cr. 3. F.S.

Prereq: Satisfactory completion of international work experience of at least ten weeks or nine credits of approved course work taken abroad. Permission of student's department prior to departure

Critique of work/study abroad experience as it relates to professional development. Taken the semester after completion of work abroad or study abroad. Written report and presentation. Offered on a satisfactory-fail basis only.

Meets International Perspectives Requirement.

ENGR 327: Voices of Public Policy

(3-0) Cr. 3. F.

Prereq: Sophomore classification in engineering

Role and impact of legislative process, partisan politics, government, lobbyists, the media, expert testimony and grassroots activism on public policy. Critical analysis of context; of claims, assumptions, premises, and evidence of both sides; represented and disenfranchised populations; the ethical issues to develop personal position and courses of action to impact public policy process.

ENGR 340: Introduction to Wind Energy: System Design & Delivery

(3-0) Cr. 3. F.

Prereq: MATH 166, PHYS 222

Introduction to wind energy. Economic analysis related to wind energy. Electrical power generation, transmission, and grid operations. Tower, blade and nacelle materials and manufacturing. Tower design. Construction, transportation, supply chain and life cycle analysis for wind turbine components.

ENGR 350: Dean's Leadership Seminar

(1-0) Cr. 1. F.S.

Prereq: Selection based on demonstrated commitment to leadership development; for junior status or above.

Understanding the complexities of leadership in building an organization, decision-making styles, communication, managing change, building trust, shared responsibility leadership, creating legacy, prioritizing, effective use of authority, conflict, ethics, integrity, transparency, accountability. Offered on a satisfactory-fail basis only. May not apply toward a degree in Engineering

ENGR 430: Entrepreneurial Product Engineering

(Cross-listed with I E). Cr. 3. F.Alt. S., offered irregularly.

Prereq: Junior Classification

Process of innovative product development in both entrepreneurial and intra-preneurial settings. Define, prototype and validate a product concept based on competitive bench-marking, market positioning and customer requirement evaluation in a target market into a product design that is consistent with defined business goals and strategies. Combination of lecture, discussion, problem solving and case study review.

ENGR 466: Multidisciplinary Engineering Design

(Cross-listed with A B E, AER E, B M E, CPR E, E E, I E, M E, MAT E). (1-4)

Cr. 3. Repeatable. F.S.

Prereq: Student must be within two semesters of graduation; permission of instructor.

Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

ENGR 467: Multidisciplinary Engineering Design II

(Cross-listed with AER E, I E, M E, MAT E). (1-4) Cr. 3. Repeatable, maximum of 2 times. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: Student must be within two semesters of graduation or receive permission of instructor.

Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

ENGR 490E: Entrepreneurship

Cr. 1-3. Repeatable, maximum of 3 credits.

Prereq: Junior or senior classification in engineering, college approval

ENGR 490L: Independent Study

Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS.
Leadership.

Engineering Mechanics (E M)

Any experimental courses offered by E M can be found at:

registrar.iastate.edu/faculty-staff/courses/explistsings/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explistsings/>)

Courses primarily for undergraduates:

E M 324: Mechanics of Materials

(3-0) Cr. 3. F.S.SS.

Prereq: E M 274

Plane stress, plane strain, stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, flexural, and combined loadings. Elementary considerations of theories of failure, buckling.

E M 327: Mechanics of Materials Laboratory

(0-2) Cr. 1. F.S.

Prereq: E M 324

Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 324. Use of strain measuring devices. Preparation of reports.

E M 362: Principles of Nondestructive Testing

(Cross-listed with MAT E). (3-0) Cr. 3. S.

Prereq: PHYS 112 or PHYS 222

Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests, materials to which applicable, types of defects detectable, calibration standards, and reliability safety precautions.

E M 362L: Nondestructive Testing Laboratory

(Cross-listed with MAT E). (0-3) Cr. 1. S.

Prereq: Credit or enrollment in MAT E 362

Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories.

E M 378: Mechanics of Fluids

(2-2) Cr. 3. F.S.

Prereq: E M 274

Properties of fluids. Fluid statics. Kinematics and kinetics of fluid flow. Mass, momentum, and energy conservation laws; dimensional analysis; flow in pipes and channels. Selected laboratory experiments.

E M 417: Experimental Mechanics

(Dual-listed with E M 517). (Cross-listed with AER E). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: E M 324; MAT E 273

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

E M 424: Intermediate Mechanics of Materials

(3-0) Cr. 3. F.S.

Prereq: E M 324

Analysis of stresses, strains, and deflections. Torsion and bending of unsymmetrical members. Analysis of thick wall pressure vessels and shrink fit problems. Dynamic load effects, fatigue and fracture mechanics introduction. Work-strain energy methods.

E M 425: Introduction to the Finite Element Method

(3-0) Cr. 3. S.

Prereq: E M 324, MATH 266 or MATH 267

Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave propagation. Two-dimensional triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one- and two-dimensional problems.

E M 451: Engineering Acoustics

(Cross-listed with E E, M E). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: PHYS 221 and MATH 266 or MATH 267

The basics of acoustic wave propagation in fluids with an emphasis on sound propagation in air. Topics include transmission and reflection of sound at a boundary; role of acoustic sources in directing sound fields; diffraction of sound around solid objects; reverberation of sound in a room; and the measurement of sound fields.

E M 480: Ultrasonic Nondestructive Evaluation

(Cross-listed with AER E). (3-0) Cr. 3. S.

Prereq: E M 324, MATH 266 or MATH 267, PHYS 222

Introduction to stress/strain, Hooke's law, and elastic wave propagation in two dimensions in isotropic media. Ultrasonic plane-wave reflection and transmission; and simple straight-crested guided waves. Transducer construction, behavior, and performance. Simple signal analysis and discrete signal processing. The last few weeks of the course are devoted to case studies.

E M 490: Independent Study

Cr. arr. Repeatable.

Prereq: Permission of instructor

E M 490H: Independent Study: Honors

Cr. arr. Repeatable.

Prereq: Permission of instructor

Courses primarily for graduate students, open to qualified undergraduates:

E M 510: Continuum Mechanics

(3-0) Cr. 3. F.

Prereq: MATH 385

Introduction to Cartesian tensors as linear vector transformations. Kinematics of continuous deformations, Lagrangian and Eulerian descriptions of motion. Fundamental equations or balance laws of continuous media, linear and angular momentum balance. Conservation laws of momentum and energy. Introduction to constitutive equations of classical elastic solids and simple fluids. Formulations and solutions of some canonical problems.

E M 514: Advanced Mechanics of Materials

(Cross-listed with AER E). (3-0) Cr. 3. F.

Prereq: E M 324

Theory of stress and strain, stress-strain relationships. Unsymmetrical bending, curved beams, shear center. Torsion of thin-walled noncircular sections. Equilibrium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders.

E M 516: Applied Elasticity and Mechanics of Deformable Solids

(3-0) Cr. 3. S.

Prereq: E M 510

Fundamental mechanics of linear elasticity, formulation and solution of simple elastostatic boundary value problems. Kinematics of small deformations, constitutive equations for isotropic and anisotropic media. Field equations for elastic solids, plane strain/plane stress and some classic analytical solutions such as Boussinesq, Hertz, Kirsch, Lamé, and Mitchell. Stress functions and potential methods and introduction to finite elements.

E M 517: Experimental Mechanics

(Dual-listed with E M 417). (Cross-listed with AER E). (2-2) Cr. 3. Alt. F., offered even-numbered years.

Prereq: E M 324; MAT E 273

Introduction to fundamental concepts for force, displacement, stress and strain measurements for structures and materials applications. Strain gage theory and application. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro- and nano-scale regimes. Selected laboratory experiments.

E M 518: Waves in Elastic Solids with Applications to Ultrasonic Nondestructive Evaluation

(3-0) Cr. 3. F.

Prereq: MATH 385

Propagation of bulk waves, surface waves, and guided waves in isotropic and anisotropic elastic media. Transmission and reflection of waves at plane and curved interfaces. Radiation of sources with application to ultrasonic transducer beam modeling. Elastic wave scattering from cracks and inclusions. Reciprocity principles and their use in the development of an ultrasonic measurement model. Characterization and measurement of material attenuation.

E M 525: Finite Element Analysis

(Cross-listed with AER E). (3-0) Cr. 3. S.

Prereq: E M 425, MATH 385

Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

E M 526: Boundary Element Methods in Engineering

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: E M 514 or E M 516

Introductory boundary element methods through plane problems. Singular integrals, Cauchy principal values, integral representations and boundary integrals in one dimension. Direct and indirect formulations. Plane potential and elastostatic problems. Higher order elements, numerical integration. Regularizations. Body forces and infinite regions. Specialized fundamental solutions, half-plane and axisymmetric problems. Diffusion and wave problems. Coupling with finite elements.

E M 543: Introduction to Random Vibrations and Nonlinear Dynamics

(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation.

E M 548: Advanced Engineering Dynamics

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: E M 345, MATH 266 or MATH 267

3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange's equations with constraints, modified Euler's equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints.

E M 550: Nondestructive Evaluation

(Cross-listed with M S E). (3-2) Cr. 4. S.

Prereq: E M 324, MATH 385

Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, and computed tomography are analyzed. Computer-based experiments on a selection of methods: ultrasonics, eddy currents, x-rays are assigned for student completion.

E M 552: Advanced Acoustics

(Cross-listed with M E). (3-0) Cr. 3. Alt. F., offered irregularly.

Prereq: E M 451

Theoretical acoustics: wave propagation in fluids; acoustic radiation, diffraction and scattering; nonlinear acoustics; radiation force; cavitation; and ray acoustics.

E M 564: Fracture and Fatigue

(Cross-listed with AER E, M E, M S E). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392.

Undergraduates: Permission of instructor

Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

E M 566: Phase Transformation in Elastic Materials

(Cross-listed with M E). (3-0) Cr. 3. S.

Prereq: EM 510 or EM 516 or EM 514

Continuum thermodynamics and kinetics approaches to phase transformations. Phase field approach to stress- and temperature-induced martensitic transformations and twinning at the nanoscale. Nucleation and growth. Nanostructural evaluation. Analytical and numerical solutions. Surface stresses and energy. Surface-induced phase transformations. Large Strain formulation.

E M 569: Mechanics of Composite and Combined Materials

(Cross-listed with AER E, M S E). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: E M 324

Mechanics of fiber-reinforced materials. Micromechanics of lamina. Macromechanical behavior of lamina and laminates. Strength and interlaminar stresses of laminates. Failure criteria. Stress analysis of laminates. Thermal moisture and residual stresses. Joints in composites.

E M 570: Wind Engineering

(Cross-listed with AER E). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: E M 378, E M 345

Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

E M 590: Engineering Mechanics Special Topics

Cr. 1-4. Repeatable.

Prereq: Permission of instructor

E M 590F: Engineering Mechanics Special Topics: Introduction to Dislocation and Plasticity

Cr. 1-4. Repeatable.

Prereq: Permission of instructor

E M 590H: Engineering Mechanics Special Topics: Mechanics of Thin Films and Adhesives

Cr. 1-4. Repeatable.

Prereq: Permission of instructor

E M 590I: Engineering Mechanics Special Topics: Mechanics of Cellular and Porous Media

Cr. 1-4. Repeatable.

Prereq: Permission of instructor

E M 590J: Engineering Mechanics Special Topics: Other

Cr. 1-4. Repeatable.

Prereq: Permission of instructor

E M 599: Creative Component

Cr. arr. Repeatable.

Courses for graduate students:**E M 690: Engineering Mechanics Special Topics**

Cr. 1-6. Repeatable.

*Prereq: Permission of instructor***E M 690N: Engineering Mechanics Special Topics: Advanced Experimental Methods**

Cr. 1-6. Repeatable.

*Prereq: Permission of instructor***E M 690O: Engineering Mechanics Special Topics: Advanced Wave Propagation**

Cr. 1-6. Repeatable.

*Prereq: Permission of instructor***E M 690P: Engineering Mechanics Special Topics: Advanced Materials**

Cr. 1-6. Repeatable.

*Prereq: Permission of instructor***E M 690Q: Engineering Mechanics Special Topics: Advanced Computational Methods**

Cr. 1-6. Repeatable.

*Prereq: Permission of instructor***E M 690R: Engineering Mechanics Special Topics: Reliability and Failure**

Cr. 1-6. Repeatable.

*Prereq: Permission of instructor***E M 690S: Engineering Mechanics Special Topics: Other**

Cr. 1-6. Repeatable.

*Prereq: Permission of instructor***E M 697: Engineering Internship**

Cr. R. Repeatable.

Prereq: Permission of DOGE (Director of Graduate Education), graduate classification

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

E M 699: Research

Cr. arr. Repeatable.

English (ENGL)

Any experimental courses offered by ENGL can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ENGL 011: Intensive English and Orientation Program Reading**

(5-0) Cr. 0. F.S.SS.

Study of English for speakers of other languages. Brochure available from the IEOP Office, 102 Landscape Architecture, or at www.ieop.iastate.edu.**ENGL 011A: Intensive English and Orientation Program Reading: Beginner**

(5-0) Cr. 0. F.S.SS.

Academic reading classes for speakers of other languages. More information available at www.ieop.iastate.edu.**ENGL 011B: Intensive English and Orientation Program Reading: Low Intermediate**

(5-0) Cr. 0. F.S.SS.

Academic reading classes for speakers of other languages. More information available at www.ieop.iastate.edu.**ENGL 011C: Intensive English and Orientation Program Reading: Intermediate**

(5-0) Cr. 0. F.S.SS.

Academic reading classes for speakers of other languages. More information available at www.ieop.iastate.edu.**ENGL 011D: Intensive English and Orientation Program Reading: High Intermediate**

(5-0) Cr. 0. F.S.SS.

Academic reading classes for speakers of other languages. More information available at www.ieop.iastate.edu.**ENGL 011E: Intensive English and Orientation Program Reading: High**

(5-0) Cr. 0. F.S.SS.

Academic reading classes for speakers of other languages. More information available at www.ieop.iastate.edu.**ENGL 011F: Intensive English and Orientation Program Reading: Advanced**

(5-0) Cr. 0. F.S.SS.

Academic reading classes for speakers of other languages. More information available at www.ieop.iastate.edu.**ENGL 012: Intensive English and Orientation Program Writing**

(5-0) Cr. 0. F.S.SS.

Academic writing classes for speakers of other languages. More information available at www.ieop.iastate.edu.**ENGL 012A: Intensive English and Orientation Program Writing: Beginner**

(5-0) Cr. 0. F.S.SS.

Academic writing classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013C: Intensive English and Orientation Program Listening and Speaking: Intermediate

(5-0) Cr. 0.

Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013D: Intensive English and Orientation Program Listening and Speaking: High Intermediate

(5-0) Cr. 0.

Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013E: Intensive English and Orientation Program Listening and Speaking: High

(5-0) Cr. 0.

Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 013F: Intensive English and Orientation Program Listening and Speaking: Advanced

(5-0) Cr. 0.

Academic listening and speaking classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014: Intensive English and Orientation Program Grammar

(5-0) Cr. 0.

Academic grammar classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014A: Intensive English and Orientation Program Grammar: Beginner

(5-0) Cr. 0.

Academic grammar classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014B: Intensive English and Orientation Program Grammar: Low Intermediate

(5-0) Cr. 0.

Academic grammar classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014C: Intensive English and Orientation Program Grammar: Intermediate

(5-0) Cr. 0.

Academic grammar classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014D: Intensive English and Orientation Program Grammar: High Intermediate

(5-0) Cr. 0.

Academic grammar classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014E: Intensive English and Orientation Program Grammar: High

(5-0) Cr. 0.

Academic grammar classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 014F: Intensive English and Orientation Program Grammar: Advanced

(5-0) Cr. 0.

Academic grammar classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 015: Intensive English and Orientation Program Exit Academic Skills

(10-0) Cr. 0.

Academic Skills classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 016: Intensive English and Orientation Program Exit Orientation

(5-0) Cr. 0.

Academic Orientation classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 017: Intensive English and Orientation Program Exit Technology

(5-0) Cr. 0.

Academic Technology classes for speakers of other languages. More information available at www.ieop.iastate.edu.

ENGL 018: Intensive English Orientation Program Business Oral English Communication: Listening and Speaking

(5-0) Cr. 0.

Academic English classes for speakers of other languages focusing on Business. More information available at www.ieop.iastate.edu.

ENGL 019: Intensive English Orientation Program Business Written English Communication: Reading and Writing

(10-0) Cr. 0.

Academic English classes for speakers of other languages focusing on Business. More information available at www.ieop.iastate.edu.

ENGL 020: Intensive English and Orientation Program Optional Seminar

(5-0) Cr. 0.

Customized academic English and cultural orientation for speakers of other languages.

ENGL 099: Strategies for Nonnative Speakers of English

Cr. 0. F.S.

Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option

ENGL 099R: Strategies for Nonnative Speakers of English: Strategies for Reading

Cr. 0. F.S.

Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option

ENGL 099S: Strategies for Nonnative Speakers of English: Academic Speaking and Pronunciation

Cr. 0. F.S.

Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option

ENGL 101: English for Native Speakers of Other Languages

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101B: English for Native Speakers of Other Languages: Academic English

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101C: English for Native Speakers of Other Languages: Academic English II--Undergraduates

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101D: English for Native Speakers of Other Languages: Academic English II--Graduates

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

Available P/NP to graduate students at their department's option. For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 120: Computers and Language

(Cross-listed with LING). (3-0) Cr. 3.

Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

ENGL 150: Critical Thinking and Communication

(3-0) Cr. 3. F.S.SS.

Prereq: Concurrent enrollment in LIB 160 is recommended.

Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio.

ENGL 180: Communication Skills for International Teaching Assistants

Cr. 1-3. Repeatable, maximum of 2 times. F.S.

Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180A: Communication Skills for International Teaching Assistants: Speaking Skills

Cr. 3. Repeatable, maximum of 2 times. F.S.

Emphasis on pronunciation improvement and greater fluency in spoken English. Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180B: Communication Skills for International Teaching Assistants: Intermediate Spoken English

Cr. 3. Repeatable, maximum of 2 times. F.S.

Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180C: Communication Skills for International Teaching Assistants: Advanced Spoken English

Cr. 3. Repeatable, maximum of 2 times. F.S.

For students who have completed ENGL 180A or ENGL 180b but have not reached the passing level on the OECT test. Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180D: Communication Skills for International Teaching Assistants: Presentation Skills

Cr. 3. Repeatable, maximum of 2 times. F.S.

Developing explanations, leading discussions and handling questions in a teaching environment. Placement based upon OECT test results. Persons whose native language is English cannot take ENGL 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 180E: Communication Skills for International Teaching Assistants: Supervised Independent Study

Cr. 1. Repeatable, maximum of 2 times. F.S.

Seminar with individual observation and consultation. Placement based upon OECT test results. Persons whose native language is English cannot take 180 for credit. No more than one section of ENGL 180 may be taken per semester; up to two sections total. Offered on a satisfactory-fail basis only. Credit for ENGL 180 does not apply toward graduation.

ENGL 201: Introduction to Literature

(3-0) Cr. 3.

Prereq: Credit in or exemption from 150

Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

ENGL 207: Introduction to Creative Writing

(3-0) Cr. 3. F.S.

Prereq: Credit in or exemption from 150

Course introduces students to the fundamentals of writing fiction, poetry, and creative nonfiction. Extensive readings in all three genres. Students learn creative processes through writing exercises, workshops, and conferences.

ENGL 214: Introduction to Technical Communication

Cr. 3. F.

Prereq: ENGL 150

A broad introduction to the culture of professional work as a technical communicator, with particular emphasis on principles and best practices for developing and managing technical information and digital media. Examination of user-centered design, the history of the discipline, cross-cultural communication, and the ethics of communicating complex information to lay audiences. Study and practice of team-based collaboration, project management, and technical editing.

ENGL 219: Introduction to Linguistics

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: Sophomore classification

Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

ENGL 220: Descriptive English Grammar

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Overview of grammatical structures and functions. Parts of speech; phrase, clause, and sentence structure; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course.

ENGL 225: Survey of British Literature to 1800

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 226: Survey of British Literature since 1800

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres and may include texts that reflect and/or critique the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

ENGL 227: Survey of American Literature to 1865

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works of American literature from its origins (including indigenous and conquest literatures) through the end of the Civil War in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 228: Survey of American Literature since 1865

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works written in the United States since the Civil War in historical, cultural, and literary contexts, with attention to the cultural and ethnic diversity of Americans. Will include multiple genres.

ENGL 237: Survey of Film History

(2-3) Cr. 3. F.

Prereq: Credit in or exemption from 150

A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present. Class meets two hours per week for lecture and discussion. Lab meets up to 3 hours for film screenings.

ENGL 240: Introduction to American Indian Literature

(Cross-listed with AM IN). (3-0) Cr. 3. F.

Prereq: Credit in or exemption from ENGL 150

Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works. Meets U.S. Diversity Requirement

ENGL 250: Written, Oral, Visual, and Electronic Composition

(3-0) Cr. 3. F.S.SS.

Prereq: ENGL 150 or exemption from ENGL 150; sophomore classification or exemption from ENGL 150; credit for or concurrent enrollment in LIB 160

Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of communication portfolio. The University requires a minimum grade of C in ENGL 250 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards.

ENGL 250H: Written, Oral, Visual, and Electronic Composition: Honors
(3-0) Cr. 3. F.

Prereq: Exemption from ENGL 150 and admission to Freshman Honors Program; credit for or concurrent enrollment in LIB 160

In-depth analysis, composition, and reflection on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on argumentation: developing claims, generating reasons, providing evidence. Individual sections organized by special topics. Development of communication portfolio. The University requires a minimum grade of C in ENGL 250 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards.

ENGL 260: Introduction to Literary Study

(3-0) Cr. 3.

Prereq: Credit in or exemption from 150

Basic principles of literary study. Emphasis on writing of interpretive and critical essays. Particular attention to poetry. Designed for English majors.

ENGL 275: Analysis of Popular Culture Texts

(Cross-listed with SP CM). (3-0) Cr. 3. F.S.

Prereq: Credit in or equivalent of 250

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

ENGL 302: Business Communication

(3-0) Cr. 3. F.S.SS.

Prereq: ENGL 250, junior classification

Rhetorical concepts and processes to successfully communicate individually and collaboratively via written, oral, visual, and electronic modes across a range of business disciplines. Covers strategies for analyzing audiences internal and external to an organization in order to communicate positive, neutral, and negative messages clearly, completely, correctly, and ethically; save an audience's time; and create goodwill.

ENGL 302H: Business Communication: Honors

(3-0) Cr. 3. F.S.SS.

Prereq: ENGL 250, junior classification

Theory, principles and processes of effective written, oral, visual, and electronic communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, and email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations.

ENGL 303: Free-Lance Writing for Popular Magazines

(3-0) Cr. 3. S.

Prereq: ENGL 250, not open to freshmen

Practical workshop in writing nonfiction articles for popular magazines. Emphasis on writing, market research, preparation of manuscripts, methods of submission. Major goal of the course is production of marketable material.

ENGL 304: Creative Writing: Fiction

(3-0) Cr. 3. F.S.

Prereq: ENGL 250, not open to freshmen

Progresses from practice in basic techniques of fiction writing to fully developed short stories. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

ENGL 305: Creative Writing: Nonfiction

(3-0) Cr. 3. F.S.

Prereq: ENGL 250, not open to freshmen

Workshop in writing imaginative essays, both critical and personal. Analytical reading, development of literary techniques. Individual and small group conferences.

ENGL 306: Creative Writing: Poetry

(3-0) Cr. 3. F.S.

Prereq: ENGL 250, not open to freshmen

Progresses from traditional to contemporary forms. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

ENGL 308: Write Like a Woman

(Cross-listed with WGS). (3-0) Cr. 3. F.

Prereq: ENGL 250

Writing and reading interpretive fiction written by women. Emphasis on stories that embody a female literary life, gender-specific ways of creating characters and conflicts, analytical reading and writing, workshop criticism and shared commentaries. Includes multi-modal projects.

ENGL 309: Proposal and Report Writing

(3-0) Cr. 3. F.S.

Prereq: ENGL 250, junior classification

Rhetorical concepts and processes to individually and collaboratively develop proposals for business, governmental, nonprofit, or other organizations and to report on the work completed both orally and in writing. Emphasizes the structure and classification of proposal and report types, qualitative and quantitative research methods, audience analysis, document design, and data visualization.

ENGL 310: Rhetorical Analysis

(Cross-listed with SP CM). (3-0) Cr. 3. F.S.

Prereq: ENGL 250

Fundamental principles of rhetorical criticism. Focus on selected theories for analyzing cultural texts, including essays, speeches, film, technical and scientific documents, and websites. Emphasis on identifying artifacts, formulating research questions, applying methodologies, and understanding and practicing critical analysis through discussion and in writing.

ENGL 312: Biological Communication

(3-0) Cr. 3. F.S.

Prereq: ENGL 250

Rhetorical concepts and processes to successfully communicate individually and collaboratively via written, oral, visual, and electronic modes in disciplines in and related to biological sciences. Emphasizes the strategies for analyzing and adapting to audiences in the biological sciences. Covers developing and designing documentation, presenting scientific data visually, and communicating results orally.

ENGL 313: Rhetorical Website Design

(3-0) Cr. 3.

Prereq: ENGL 250

Rhetorical principles of multimodal composing in hypertextual environments. Focus on writing according to web style guidelines, employing cascading stylesheets for layout and design, and using principles of information architecture to determine optimal site structure. Final project involves constructing interactive client site using latest web standards.

ENGL 314: Technical Communication

(3-0) Cr. 3. F.S.SS.

Prereq: ENGL 250, junior classification

Rhetorical concepts and processes to successfully communicate technical information individually and collaboratively via written, oral, visual, and electronic modes. Emphasizes the major strategies for analyzing expert and lay audiences and adapting information to those audiences. Covers developing and designing usable technical documentation, visualizing data, and presenting technical information orally.

ENGL 314H: Technical Communication: Honors

(3-0) Cr. 3. F.S.SS.

Prereq: ENGL 250, junior classification

Theories, principles, and processes of effective written, oral, visual, and electronic communication of technical information. Attention to major strategies for analyzing and adapting to audiences in various communication situations and composing technical discourse including organizing visual and verbal information. Extensive practice in many areas of technical communication, including instructions and procedures, proposals and reports, website analysis and design, and individual and team presentations.

ENGL 315: Creative Writing: Screenplays

(3-0) Cr. 3. F.

Prereq: ENGL 250, not open to freshmen

Stresses master scene technique of writing fully developed screenplays. Emphasis on movie techniques, writing, workshop criticism, analytical reading and viewing, and individual conferences.

ENGL 316: Creative Writing: Playwriting

(Cross-listed with THTRE). (3-0) Cr. 3. S.

Prereq: ENGL 250, not open to freshmen

Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences.

ENGL 318: Introduction to ESL methods and materials

(Cross-listed with LING). (3-0) Cr. 3. F.

Prereq: ENGL/LING 219

Introduction to methods and materials for teaching English as a Second Language (ESL) for elementary and secondary students. Strategies and resources for teaching reading, writing, speaking and listening skills. Elementary Education students must take this course in the same semester as either EDUC 280S or EDUC 480S.

ENGL 319: Studies in Language and Diversity

(Cross-listed with LING). Cr. 3. Repeatable, maximum of 9 credits. F.

Prereq: ENGL 250

Special topics related to the role of language and linguistics in US diversity, such as Dialects and American literature, American English Accents, Legal and Social Aspects of English-only Laws in the US. Connections between language use and social diversity. Meets U.S. Diversity Requirement

ENGL 320: Topics in Linguistic Structure

(Cross-listed with LING). Cr. 3. Repeatable, maximum of 9 credits. S.

Prereq: ENGL 219/LING 219, ENGL 220/LING 220

Special topics related to the study of linguistic structure. Focus on language structure in areas not covered in detail by existing courses. Topics include field linguistics, morphology, forensic linguistics, neurolinguistics, semantics, non-English phonology, acoustic phonetics, linguistic universals, and historical linguistics.

ENGL 322: Language and Society

(Cross-listed with LING). Cr. 3. S.

Prereq: ENGL/LING 219

Introduction to variation in language use in society. Survey of factors affecting language use, including background characteristics of language users, location, and purpose of interaction in addition to institutional, state, and national language policies.

ENGL 324: Introduction to Teaching ESL Literacy

(Cross-listed with LING). Cr. 3. F.

Prereq: ENGL/LING 219

Introduction to the issues and methods involved in teaching literacy skills to English as a second language (ESL) learners. The nature of literacy and materials and methods for developing ESL literacy at the middle school, high school, and adult ages across multiple levels of competency.

ENGL 325: Teaching Methods for ESL Learners: Oral Communication Skills

(Cross-listed with LING). Cr. 3. S.

Prereq: ENGL/LING 219

Issues and methods in teaching oral communication skills (listening, speaking, pronunciation) to English as a second language (ESL) learners. The nature of oral language ability. Materials and Methods for developing oral communication skills at middle school, high school, and adult contexts.

ENGL 330: Science Fiction

(3-0) Cr. 3.

Prereq: ENGL 250

Study of science fiction from its origins in nineteenth-century to the present. May include study of specific types of science fiction, such as classic, cyberpunk, feminist, or apocalyptic narratives; and may include consideration of science fiction film and/or theory.

ENGL 332: Visual Communication of Quantitative Information

(Cross-listed with STAT). (3-0) Cr. 3.

Prereq: STAT 101, STAT 104, STAT 201 or STAT 226; ENGL 250

Communicating quantitative information using visual displays; visualizing data; interactive and dynamic data displays; evaluating current examples in the media; color, perception, and representation in graphs; interpreting data displays.

ENGL 335: Studies in Film

(2-3) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250

Principles of film art and the traditional vocabulary of literature as applied to film. Influence of film on modes of thought and behavior. Class meets two hours per week for lecture and discussion. Lab meets up to 3 hours for film screenings.

ENGL 339: Literary Theory and Criticism

(3-0) Cr. 3.

Prereq: ENGL 260 and 3 additional credits in literature

Study of selected texts of literary criticism, with attention to the purposes and practices of criticism.

ENGL 340: Women's Literature

(Cross-listed with WGS). (3-0) Cr. 3.

Prereq: ENGL 250

Historical and thematic survey of literature by and about women. May include autobiographies, journals, letters, poetry, fiction, and drama. Meets U.S. Diversity Requirement

ENGL 344: U.S. Latino/a Literature

(3-0) Cr. 3. S.

Prereq: ENGL 250

An introduction to the literature of Mexican Americans, Puerto Ricans, Cuban Americans and other Latino/a sub-groups. Special emphasis on themes such as ethnic relations and comparisons with EuroAmerican literary traditions. Meets U.S. Diversity Requirement

ENGL 345: Women and Literature: Selected Topics

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250

Literature by women and/or dealing with the images of women, e.g., study of individual authors or related schools of authors; exploration of specific themes or genres in women's literature; analysis of recurrent images of women in literature. Meets U.S. Diversity Requirement

ENGL 346: American Indian Literature

(Cross-listed with AM IN). (3-0) Cr. 3.

Prereq: ENGL 250

Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Meets U.S. Diversity Requirement

ENGL 347: Studies in African American Literature

(Cross-listed with AF AM). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250

Literature by African Americans, which may include study of individual authors, movements, themes, genres.

Meets U.S. Diversity Requirement

ENGL 349: Topics in Multicultural Literatures of the United States

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250

Literature by writers from U.S. multicultural groups. May include literature of several groups or focus upon one of the following: Asian Americans, African Americans, Latino/a Americans, American Indians.

Meets U.S. Diversity Requirement

ENGL 350: Rhetorical Traditions

(Cross-listed with CL ST, SP CM). (3-0) Cr. 3. S.

Prereq: ENGL 250

Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

ENGL 352: Gay and Lesbian Literature

(Cross-listed with WGS). (3-0) Cr. 3.

Prereq: ENGL 250

Literary portrayals of gay and lesbian lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and gender identity over time.

Meets U.S. Diversity Requirement

ENGL 353: World Literature: Western Foundations through Renaissance

(Cross-listed with CL ST). (3-0) Cr. 3. F.S.

Prereq: ENGL 250

Representative works from the drama, epics, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Meets International Perspectives Requirement.

ENGL 354: World Literature: Seventeenth Century to the Present

(3-0) Cr. 3. S.

Prereq: ENGL 250

Global literatures in their various cultural and aesthetic contexts.

Representative works, oral and written literature, including poetry, fiction, nonfiction, and drama.

Meets International Perspectives Requirement.

ENGL 355: Literature and the Environment

(Cross-listed with ENV S). (3-0) Cr. 3.

Prereq: ENGL 250

Study of literary texts that address the following topics, among others: the relationship between people and natural/urban environments, ecocriticism, and the importance of place in the literary imagination.

ENGL 358: Myth and Fairytale

(3-0) Cr. 3.

Prereq: ENGL 250

Study of traditional fairytales, myths, and legends from diverse cultures.

ENGL 360: Studies in American Literature to 1800

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250; sophomore classification

Selected readings in American literature from its beginnings through the colonial period; may reflect themes, genres, or social and cultural contexts.

ENGL 362: Studies in 19th Century American Literature

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250; sophomore classification

Selected readings in American literature of the 19th century; may reflect themes, genres, or social and cultural contexts.

ENGL 364: Studies in American Literature: 1900 to the Present

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250; sophomore classification

Selected readings in American literature since 1900; may reflect themes, genres, or social and cultural contexts.

ENGL 370: Shakespeare

(3-0) Cr. 3. F.S.

Prereq: ENGL 250

Reading and analysis of selected plays. Development of Shakespeare's dramatic art in its social and intellectual context.

Meets International Perspectives Requirement.

ENGL 373: Studies in British Literature: The Middle Ages

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250; sophomore classification

Selected readings in medieval literature from its beginnings through the fifteenth century; may reflect themes, genres, or social and cultural contexts.

ENGL 375: Studies in British Literature: The Restoration and 18th Century

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250; sophomore classification

Selected readings in British literature from 1660 to 1800; may reflect themes, genres, or social and cultural contexts.

Meets International Perspectives Requirement.

ENGL 376: Studies in British Literature

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 250; sophomore classification

Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.

Meets International Perspectives Requirement.

ENGL 376A: Studies in British Literature: Romantic

(3-0) Cr. 3.

Prereq: ENGL 250; sophomore classification

Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.

Meets International Perspectives Requirement.

ENGL 376B: Studies in British Literature: Victorian

(3-0) Cr. 3.

Prereq: ENGL 250; sophomore classification

Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.

Meets International Perspectives Requirement.

ENGL 389: Postcolonial Literature

(3-0) Cr. 3.

Prereq: ENGL 250; sophomore classification

Historical, thematic and theoretical study of postcolonial literatures from one or more of the following areas: Africa, South Asia, the Caribbean, and the Middle East. Irish and immigrant British writers may also be included.

Meets International Perspectives Requirement.

ENGL 393: The History of Children's Literature

(3-0) Cr. 3. F.

Prereq: ENGL 250

Origin and development of English and American children's literature through the present day. Includes readings in fantasy, animal stories, and realistic literature.

ENGL 395: Study and Travel

Cr. arr. SS.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

Meets International Perspectives Requirement.

ENGL 395A: Study and Travel: Literature

Cr. arr. SS.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

Meets International Perspectives Requirement.

ENGL 395B: Study and Travel: Creative Writing

Cr. arr. SS.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

Meets International Perspectives Requirement.

ENGL 395C: Study and Travel: Linguistics

Cr. arr. SS.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

Meets International Perspectives Requirement.

ENGL 395D: Study and Travel: Rhetoric and Professional Communication

Cr. arr. SS.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

Meets International Perspectives Requirement.

ENGL 395E: Study and Travel: Teacher Education

Cr. arr. SS.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

Meets International Perspectives Requirement.

ENGL 396: Teaching the Reading of Young Adult Literature

(3-0) Cr. 3. F.S.

Prereq: ENGL 250

Critical study and evaluation of themes, genres, and cultures found in young adult literature. Strategies of effective reading; instructional strategies including discussion techniques and use of technology; matching texts to reader needs and proficiencies. Evaluation of fiction, nonfiction, and media-based materials for use in school programs.

Lesson planning.

ENGL 397: Practice and Theory of Teaching Writing in the Secondary Schools

(3-0) Cr. 3. F.S.

Prereq: ENGL 219 or ENGL 220; application process initiated for admission to university teacher education program; concurrent enrollment in C I 280 (cr. 2); and background check initiated with state of Iowa Department of Criminal Investigation

Introduction to teaching secondary language arts. Current theories and practices in the teaching of writing to secondary school students. Theories of rhetoric, approaches to teaching, lesson design and planning. Evaluating writing. Professional portfolio preparation.

ENGL 404: Creative Writing Workshop: Fiction

(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.

Prereq: ENGL 304

Individual projects in short fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

ENGL 405: Creative Writing Workshop: Nonfiction

(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.

Prereq: ENGL 305

Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

ENGL 406: Creative Writing Workshop--Poetry

(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.

Prereq: ENGL 306

Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

ENGL 410: Language as Data

(Cross-listed with LING). Cr. 3. S.

Prereq: Junior standing

Methods of discovering language patterns in text documents solve practical text analysis problems in the disciplines. Fundamentals of linguistics and its role in text analysis. Practice writing R scripts to perform text analysis and visualize textual data.

ENGL 411: Technology, Rhetoric, and Professional Communication

(3-0) Cr. 3.

Prereq: ENGL 310; ENGL 302, ENGL 309, ENGL 313, or ENGL 314; junior classification

Seminar course on the implication of technologies, especially computer technology, for the writing and reading of business, technical, and academic texts. Extensive reading, discussion, and writing on selected technology-related topics.

ENGL 415: Business and Technical Editing

(3-0) Cr. 3. S.

Prereq: ENGL 302, ENGL 309, or ENGL 314; junior classification

Editing concepts and processes for choosing the appropriate level of editing for the particular rhetorical situation. Covers using editorial tools such as copy-marking symbols, developing style sheets and guides, and managing document production. Emphasizes developing an editorial eye for verbal and visual details in order to achieve accuracy, consistency, correctness, and completeness.

ENGL 416: Visual Aspects of Business and Technical Communication

(3-0) Cr. 3. F.

Prereq: ENGL 302, ENGL 309, or ENGL 314; junior classification

Rhetorical strategies and perceptual principles for designing print and digital visual elements such as diagrams and graphs and integrating those visual elements into business and technical communications. Covers strategies for employing visual elements such as typeface, page and screen layout, and illustrations in order to make communications more usable.

ENGL 417: Student Teaching

Cr. arr. F.S.

Prereq: admission to teacher education, approval of coordinator the semester prior to student teaching

Full-time teaching in content licensure area: long term and unit planning, lesson planning, classroom teaching practice.

ENGL 417E: Student Teaching: English and Literature

(Cross-listed with EDUC). Cr. arr. Repeatable. F.S.

Prereq: ENGL 494, admission to teacher education, approval of coordinator the semester prior to student teaching

Full-time teaching in secondary English: long term and unit planning, lesson planning, classroom teaching practice in English language arts.

ENGL 418: Seminar in Argumentation

(Cross-listed with SP CM). (3-0) Cr. 3. F.S.

Prereq: ENGL 310/SP CM 310, junior classification

Advanced seminar in theory and analysis with extensive practice in various modes of argument.

ENGL 420: History of the English Language

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: ENGL 219 or LING 219, ENGL 220 or LING 220

Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents.

ENGL 422: Women, Men, and the English Language

(Cross-listed with LING, WGS). (3-0) Cr. 3. S.

Prereq: ENGL 219 or LING 219

The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions.

Meets U.S. Diversity Requirement

ENGL 425: Second Language Learning and Teaching

(Cross-listed with LING). (3-0) Cr. 3. S.

Prereq: ENGL 219 or LING 219; junior classification

The process of second language learning and principles and techniques of teaching second languages. Learning and teaching in specific situations and for particular purposes. Current applications of technology in teaching and assessment.

ENGL 437: Grammatical Analysis

(Cross-listed with LING). (3-0) Cr. 3. F.

Prereq: ENGL 220 or LING 220; ENGL 219 or LING 219 or introductory course in linguistics; junior classification

Theories and methods for analysis of syntax and morphology.

ENGL 440: Seminar in British Literature

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Completion of 9 credits of surveys; junior classification

Selected authors, movements, eras, or genres in British literature.

Readings in criticism; required research paper.

ENGL 441: Seminar in American Literature

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Completion of 9 credits of surveys; junior classification

Selected authors, movements, eras, or genres in American literature.

Readings in criticism; required research paper.

ENGL 445: Seminar: Literature Crossing Boundaries

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Completion of 9 credits of surveys; junior classification

Intensive study of selected literature that bridges traditional genre, period, national, or disciplinary boundaries. Readings in criticism; required research paper.

ENGL 450: Seminar in Literary Genres

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Completion of 9 credits of surveys; junior classification

Intensive study of drama, film, fiction, poetry, or prose. Selected movements, eras, or national traditions. Readings in criticism; required research paper.

ENGL 460: Seminar in Gender and Ethnicity

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Completion of 9 credits of surveys; junior classification

Selected readings of various authors, movements, eras, or genres.

Readings in criticism; required research paper.

ENGL 477: Seminar in Technical Communication

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 302, ENGL 309, or ENGL 314

Intensive study of a selected topic that bridges theory and practice in technical communication. Required project that contributes to the understanding of an emerging issue in the profession.

ENGL 487: Internship in Business, Technical, and Professional Communication

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: 9 credits in ENGL 302, ENGL 309, ENGL 313, ENGL 314, ENGL 415 (preferred), ENGL 416, or ENGL 477; junior classification; and permission of coordinator

An opportunity to write, edit, and design business and technical documents in a professional setting. Projects might include reports, proposals, manuals, brochures, newsletters.

ENGL 490: Independent Study

Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490A: Independent Study: Literature

Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490B: Independent Study: Linguistics

(Cross-listed with LING). Cr. arr. Repeatable, maximum of 9 credits. F.S.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee or Linguistics Adviser

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490C: Independent Study: Rhetoric, Teaching of Composition

Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490D: Independent Study: Criticism and Theory of Literature

Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490E: Independent Study: Instructional Methods and Research

Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490F: Independent Study: Creative Writing

Cr. arr. Repeatable, maximum of 9 credits. F.S.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490G: Independent Study: Business/Technical Communication

Cr. arr. Repeatable, maximum of 9 credits. F.S.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 490H: Independent Study: Honors

Cr. arr. Repeatable, maximum of 9 credits. F.S.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Designed to meet the needs of students who wish to study in areas other than those in which courses are offered or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of ENGL 490 may be used toward graduation.

ENGL 492: Undergraduate Teaching Experience

Cr. arr. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: 9 credits in English beyond ENGL 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee

Teaching assistant experience.

ENGL 493: Advanced Creative Writing Workshop—Multi-Genre

Cr. 3. Repeatable, maximum of 6 credits. F.S.

Prereq: ENGL 304, ENGL 305, or ENGL 306 and junior standing

Advanced workshop of individual creative writing projects in short fiction, nonfiction, and poetry. Readings and discussion of published examples of short fiction, nonfiction, and poetry by authors of national and international note. Extensive discussion and written analysis of elements of craft across genres.

ENGL 494: Practice and Theory of Teaching Literature in the Secondary Schools

(Cross-listed with EDUC). (3-0) Cr. 3. F.S.

Prereq: ENGL 310, ENGL 397, 9 other credits in English beyond ENGL 250, PSYCH 333, admission to teacher education program

Portfolio review. Current theories and practices in the teaching of literature to secondary school students. Integrating literary study and writing. Preparation and selection of materials. Classroom presentation. Unit planning. (Taken concurrently with EDUC 280, Cr. 2, and SP ED 401).

ENGL 497: Capstone Assessment

Cr. 1. F.S.

Prereq: Junior status

Must be taken in conjunction with a 400-level English course.

Courses primarily for graduate students, open to qualified undergraduates:

ENGL 500: Teaching Multimodal Composition

(3-0) Cr. 3. F.

Prereq: Graduate classification; must be teaching Engl 150 or Engl 250 concurrently

Introduction to the teaching of ISUComm Foundation Courses. Foundational and relevant newer composition theory and pedagogical methods related to ISUComm Foundation Courses objectives and their classroom enactment, including development of assignments and supporting activities, and evaluation of student projects. Required of all new teaching assistants teaching ISUComm Foundation Courses.

ENGL 501: Introduction to Research in Rhetoric, Composition, and Professional Communication

(3-0) Cr. 3.

Prereq: 6 graduate credits in English

Survey of the major rhetorical, qualitative, and quantitative methods used in research on communication and language in academic and nonacademic settings.

ENGL 503: Composition Theory

(3-0) Cr. 3.

Prereq: 6 graduate credits in English

In-depth consideration of the theory and practice of composition pedagogy. Opportunities for actual classroom application.

ENGL 504: Teaching Advanced Communication

(3-0) Cr. 3. F.

Prereq: Graduate classification

Teaching business and technical communication in university, community college, and industry settings. Emphasizes curriculum planning, materials development, assignment design, responding to student work, assessment of student work, and distance (online) teaching.

ENGL 505: User Experience Architecture and Testing for Advanced Communication

(3-0) Cr. 3.

Prereq: Graduate classification

Seminar course examining user experience (UX) interface design and development in technical communication. Focus is on the UX project cycle: creating userfaces, conducting user research, system testing, and implementing data-driven results.

ENGL 506: Professional Communication Theory

(3-0) Cr. 3.

Prereq: Admission to English Department graduate degree program

Introduction to professional communication as a discipline, with emphasis on theories of communication and discourse that inform professional communication research and on trends and developments in that research and the field.

ENGL 508: Writing for Academic Publication

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: 6 graduate credits

Hands-on practice in writing academic discourse for publication; rhetorical analyses of student-selected academic journals; discussion of current trends in academic writing; professional perspectives on the referee process and on journal editorial decision making. Focus on the writing of selected short pieces (opinion essays, standard reviews, conference-length papers) and of article-length manuscripts.

ENGL 510: Introduction to Computers in Applied Linguistics

(Cross-listed with LING). (3-0) Cr. 3. F.

Prereq: Graduate classification

Use of software and web applications for language teaching, linguistic analysis, and statistical analysis. Issues and problems in applied linguistics related to computer methods.

ENGL 511: Introduction to Linguistic Analysis

(Cross-listed with LING). (3-0) Cr. 3. F.

Prereq: Graduate classification

Principles and methods of linguistic analysis with emphasis on phonology, morphology, and syntax. Description of linguistic variation and current theoretical approaches to linguistics.

ENGL 512: Second Language Acquisition

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: ENGL 511 or LING 511 or an introductory course in linguistics

Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

ENGL 513: Language Assessment Practicum

(Cross-listed with LING). (3-0) Cr. 3. F.S.SS.

Prereq: ENGL 519 or LING 519

Advanced practicum in language assessment.

ENGL 514: Sociolinguistics

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: ENGL 511 or LING 511 or an introductory course in linguistics

Theories and methods of examining language in its social setting. Analysis of individual characteristics (e.g., age, gender, ethnicity, social class, region), interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

ENGL 515: Statistical Natural Language Processing

(Cross-listed with HCI, LING). (3-0) Cr. 3.

Prereq: STAT 330 or equivalent, recommended ENGL 219 or LING 219, or ENGL 511 or LING 511

Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

ENGL 516: Methods of Formal Linguistic Analysis

(Cross-listed with LING). Cr. 3. Alt. S., offered even-numbered years.

Prereq: ENGL 219/LING 219 or equivalent.

Data and knowledge structures for formal representation of natural language and speech data. Designing and implementing algorithms for automating linguistic analysis tasks. Conceptual issues for natural language and speech processing programming.

ENGL 517: Corpus Linguistics

(Cross-listed with LING). Cr. 3. Alt. S., offered even-numbered years.

Prereq: ENGL 511 or LING 511 or an introductory course in Linguistics

Corpus linguistics methods of language analysis, including corpus design, construction and annotation; data in corpus studies; tools and methods of analysis. Corpus methods applied in vocabulary, grammar, register and dialect variation, language change, pragmatics, semantics, stylistics, language learning and teaching, and language testing.

ENGL 519: Second Language Assessment

(Cross-listed with LING). (3-0) Cr. 3. S.

Prereq: ENGL 511 or LING 511

Principles of second language assessment including reliability, validity, authenticity and practicality. Constructing, scoring, interpreting, and evaluating second language tests for a variety of situations.

ENGL 520: Computational Analysis of English

(Cross-listed with HCI, LING). (3-0) Cr. 3.

Prereq: ENGL 510 or LING 510, and ENGL 511 or LING 511

Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

ENGL 521: Teaching of Literature and the Literature Curriculum

(3-0) Cr. 3.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Examination of the roles of the literary work, reader, and teacher in literary study. Responses to literature. Place of literature in language arts. Study and development of curriculum materials for middle school, high school, and college levels of instruction.

ENGL 522: Literary Theory and Criticism

(3-0) Cr. 3.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Examination of the history, logic, and rhetoric of contemporary literary criticism and analysis.

ENGL 523: Introduction to Old English Language and Literature

(3-0) Cr. 3.

Prereq: Course in medieval literature or history or history of the English language recommended

Introductory study of Old English language and literature in prose and poetry, including extracts from Beowulf. Some attention to Anglo-Saxon culture.

ENGL 524: Literacy: Issues and Methods for Nonnative Speakers of English

(Cross-listed with LING). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: ENGL 511 or LING 511 or an introductory course in linguistics

Theoretical and practical issues and techniques in the teaching of literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs.

ENGL 525: Research and Teaching of Second Language Pronunciation

(Cross-listed with LING). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: ENGL 511 or LING 511 or an introductory course in linguistics

Theoretical and practical issues and techniques in the teaching of second language pronunciation as it relates to other areas of language, especially listening and speaking skills. Topics will include segmental and suprasegmental features; intelligibility; pronunciation in language assessment; classroom, technology and individual instruction; and research issues. Topics will be relevant to those intending to teach or research in various contexts.

ENGL 526: Computer-Assisted Language Learning

(Cross-listed with LING). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: ENGL 511 or LING 511 or equivalent

Theory, research, and practice in computer use for teaching nonnative speakers of English. Methods for planning and evaluating computer-based learning activities.

ENGL 527: Discourse Analysis

(Cross-listed with LING). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: ENGL 511 or LING 511 or an introductory course in linguistics

Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

ENGL 528: English for Specific Purposes

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: ENGL 511 or LING 511 or an introductory course in linguistics

Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and corpus-informed syllabus and materials development for teaching and assessment.

ENGL 529: Content Management

(3-0) Cr. 3.

Prereq: ENGL 313

Strategies for developing and delivering multimodal content via digital media. Focus on the principles of database design, interface development, usability testing, and collaborative content management within professional communication settings.

ENGL 530: Technology and Oral Language

(Cross-listed with LING). Cr. 3. Alt. F., offered even-numbered years.

Prereq: ENGL 219 or ENGL 511 or equivalent.

Structure and description of oral language and discourse. How spoken language is linguistically described, analyzed, and taught for research and for education. Using technology to record, transcribe, and analyze spoken language at all levels of linguistic structure.

ENGL 531: Topics in the Study of Literature

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Intensive study of literary genres, periods, movements, or themes; e.g., Literature and Historicism, Narrating the Feminine, Allegory.

ENGL 532: American Literature to 1865

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Selected texts in American literature from Beginnings to the Civil War. Study may include Native American literature, the literature of European conquest, Colonial and Revolutionary periods, Early Republic, and Jacksonian Era, in critical and cultural contexts.

ENGL 533: British Literature to 1830

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Selected texts from the Medieval, Renaissance, Restoration, Eighteenth-Century, and/or Romantic periods, in critical and cultural contexts.

ENGL 534: American Literature 1865 to the Present

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Selected texts in American literature from the Civil War to the present. Study may include Realism, Naturalism, Modernism, and Postmodernism, with significant attention to race/ethnicity, gender, and identity, and to contemporary critical views. Range of authors and genres.

ENGL 535: British Literature 1830 to the Present

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Selected texts from the Victorian, Edwardian, Modernist, and/or Contemporary periods, in critical and cultural contexts.

ENGL 537: Corpus Approaches to Grammatical Analysis

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: ENGL 220 or LING 220; ENGL 219, LING 219, ENGL 511, LING 511, or introductory course in linguistics; graduate classification

Corpus-informed analysis of syntax in authentic writing and speech, with emphasis on approaches used in applied linguistics.

ENGL 538: Fiction

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Selected fiction writers in English; range of authors and genres. Emphasis on both male and female writers; attention to the relationships between fiction and cultural change.

ENGL 539: Poetry

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Selected poets writing in English, considered in representative groups.

ENGL 540: Drama

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Primary texts in dramatic genres from various literary periods, in critical and cultural contexts. Frequently concentrates on the English Renaissance and the Shakespearean stage.

ENGL 542: Document Design and Editing

(3-0) Cr. 3.

Prereq: Senior classification

Overview of the principles of desktop publishing as practiced in the field of technical communication. Focus on theories of print document design and project management, as well as digital prepress techniques employed to produce documents using external print services. Requires extensive use of current desktop publishing software.

ENGL 543: The Study of Environmental Literature

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification

Intensive study of environmental literary genres, periods, figures, movements, or themes: e.g., Ecofeminism, Imagining Natural Disaster, Material Ecocriticism, Environmental Justice, Posthumanism.

ENGL 545: Women's Literature

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above

Primary texts by women writers; historical, thematic, formal, or theoretical approaches; secondary readings; e.g., Nineteenth-Century Women Writers; American Women's Personal Narratives; Southern Women Writers of the U.S.

ENGL 546: Issues in the Study of Literature

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: Graduate classification or 6 credits in literature at 300 level or above
 Intensive study of current and emerging topics and problems concerning literature and its relationship to theory and to language study; e.g., Theory of Metaphor; Renegotiating the Canon; Feminist Theory.

ENGL 547: The History of Rhetorical Theory I: From Plato to Bacon

(Cross-listed with SP CM). (3-0) Cr. 3.

Prereq: 6 credits in English

Rhetorical theory from the classical period of ancient Greece and Rome through the Middle Ages to the early Renaissance; attention to its relation to the nature of knowledge, communication, practice, and pedagogy.

ENGL 548: The History of Rhetorical Theory II: From Bacon to the Present

(Cross-listed with SP CM). (3-0) Cr. 3.

Prereq: 6 credits in English

Rhetorical theory from the early modern period (Bacon, Descartes, and Locke) to the present; attention to its relation to the nature of knowledge, communication practice, and pedagogy.

ENGL 549: Multimedia and Interaction Design

(3-0) Cr. 3.

Prereq: Senior classification

Rhetorical principles of interactive multimedia design, such as those in DVDs, Blu-Ray videos, and streaming web multimedia. Practical understanding of computer applications used in interactive multimedia development. Focus on theoretical and practical elements of producing multimedia training in both education and industry. Work with interactive hypertext, digital audio, and nonlinear video editing.

ENGL 550: Creative Writing: Craft and Professional Practice

(3-0) Cr. 3. F.

Prereq: Admission into MFA Program in Creative Writing and Environment
 A multigenre craft course required of all incoming students in the MFA Program in Creative Writing and Environment. Students develop an understanding of craft and environmental writing across genres (poetry, fiction, nonfiction) as well as learn about editing and publication practice through the lens of a working literary journal, "Flyway: A Journal of Writing and Environment." Other course activities include presentations on the production practices of leading literary journals, individual editing projects, pragmatic tips for finding publication outlets for polished creative work, and a field trip to publishing houses.

ENGL 551: Master Workshop

(3-0) Cr. 3. F.

Prereq: Fifth-semester or equivalent standing in the Creative Writing and Environment MFA program

An advanced multigenre creative writing workshop. Students work intensively on book-length manuscripts of fiction, creative nonfiction, scriptwriting, or poetry.

ENGL 552: Workshop: Scriptwriting

(3-0) Cr. 3. Repeatable. F.

Prereq: ENGL 550 and graduate classification. Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor

Individual projects in dramatic writing. Focus on writing for stage, screen, and/or new media. Readings in dramatic literature. Discussion of elements such as plot, character, dialogue, structure, theme, and visual storytelling.

ENGL 554: Workshop: Fiction

(3-0) Cr. 3. Repeatable, maximum of 12 credits.

Prereq: ENGL 550 and graduate classification. Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor

Individual projects in fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

ENGL 555: Workshop: Nonfiction

Cr. arr. Repeatable, maximum of 12 credits.

Prereq: ENGL 550 and graduate classification. Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor

Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

ENGL 556: Workshop: Poetry

(3-0) Cr. 3. Repeatable, maximum of 12 credits.

Prereq: ENGL 550 and graduate classification. Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor

Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

ENGL 557: Studies in Creative Writing

(3-0) Cr. 3. Repeatable, maximum of 12 credits.

Prereq: Graduate classification. Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor.

Special topics course on ideas, issues, and techniques in creative writing. Subject matter may include specific genres, aspects of the creative writing process, or themes of particular interest. Significant readings and written work required; previous workshop experience helpful.

ENGL 558: Teaching Creative Writing

(3-0) Cr. 3.

Prereq: Graduate classification

Pedagogical approaches that are effective for grade-school through adult-education creative writing teaching. Writing exercises, workshops, text evaluation, and visits from creative writers.

ENGL 559: Creative Writing Teaching Internship

Cr. 1-3. Repeatable.

Prereq: Permission of participating instructors

Students assist in an introductory creative writing class. Some supervised teaching but mainly evaluation of submissions and individual conferences. Requirements and grades determined by participating instructors.

ENGL 560: Environmental Field Experience

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: ENGL 550 and graduate classification. Open to graduate students outside MFA in Creative Writing and Environment with permission of instructor

Students spend a term on a project that requires fieldwork. Projects might include working for a federal, state, or private non-profit environmental organization or farm, or living and working in a specified natural area.

ENGL 561: Methods for Scholarship in Literature and the Humanities

Cr. 3.

Prereq: Graduate classification or permission from the instructor

Intensive study of research methods and perspectives concerning the study of literature and the humanities at the master's level. Introduction to resources and techniques of research, the structure of academic articles, and strategies for argument in academic communication.

ENGL 562: Topics in the Study of Film

Cr. 3. Repeatable, maximum of 6 credits. S.

Prereq: Graduate classification or 6 credits in film at 300 level or above

Intensive study of cinematic genres, periods, movements, or themes; e.g., The Musical, Classical Hollywood Cinema, Structural Film, Art and Cinema. General emphasis will be on American, British, and other Anglophone cinemas.

ENGL 569: Grant Writing

(Cross-listed with GR ST). (1-0) Cr. 1. S.

Prereq: at least two prior years of graduate classification. Writing a winning proposal.

ENGL 586: Visual Rhetoric in Professional Communication

(3-0) Cr. 3.

Prereq: A course in professional communication

Rhetorical theory and research in graphics, document design, and related principles of visual communication. Methods of designing texts, data displays, illustrations, and other visual elements in business and technical communication.

ENGL 587: Internship in Business, Technical, and Professional Communication

(3-0) Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Three graduate credits in business and technical writing or composition and rhetoric, permission of instructor. Limited to master's and doctoral degree candidates in the field of rhetoric and professional communication

An opportunity to write, edit, and design business and technical documents in a professional setting.

ENGL 588: Supervised Practice Teaching in Teaching English as a Second Language

(Cross-listed with LING). (1-5) Cr. 3. F.S.SS.

Prereq: 9 credits toward the TESL/TEFL Certificate, 15 credits toward the TESL/AL master's degree, or 18 credits completed toward the ESL Endorsement option.

Intensive observation of ESL instruction and supervised practice in teaching learners of English in a context appropriate to the student teacher's goals. ENGL 588 cannot be used for teacher licensure and cannot be taken during student teaching.

ENGL 589: Supervised Practicum in Literary Editing

(3-0) Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: ENGL 550 and permission of instructor

An opportunity to edit literary texts and gain experience in a literary publishing setting.

ENGL 590: Special Topics

(Cross-listed with LING). Cr. arr. Repeatable.

Prereq: Permission of the Director of Graduate Education according to guidelines available online

ENGL 590A: Special Topics: Literature

Cr. arr. Repeatable.

Prereq: Permission of the Director of Graduate Education according to guidelines available online

ENGL 590B: Special Topics: Teaching English as a Second Language (TESL)/Applied Linguistics

(Cross-listed with LING). Cr. arr. Repeatable.

Prereq: Permission of the Director of Graduate Education according to guidelines available online

ENGL 590C: Special Topics: Composition and Rhetoric

Cr. arr. Repeatable.

Prereq: Permission of the Director of Graduate Education according to guidelines available online

ENGL 590E: Special Topics: Rhetoric and Professional Communication

Cr. arr. Repeatable.

Prereq: Permission of the Director of Graduate Education according to guidelines available online

ENGL 590F: Special Topics: Creative Writing

Cr. arr. Repeatable.

Prereq: Permission of the Director of Graduate Education according to guidelines available online

ENGL 590G: Special Topics: Applied Linguistics and Technology

(Cross-listed with LING). Cr. arr. Repeatable.

Prereq: Permission of the Director of Graduate Education according to guidelines available online

ENGL 591: Directed Readings

Cr. arr. Repeatable.

ENGL 591A: Directed Readings: Literature

Cr. arr. Repeatable.

ENGL 591B: Directed Readings: Teaching English as a Second Language (TESL)/Applied Linguistics

(Cross-listed with LING). Cr. arr. Repeatable.

ENGL 591C: Directed Readings: Composition and Rhetoric

Cr. arr. Repeatable.

ENGL 591E: Directed Readings: Rhetoric and Professional Communication

Cr. arr. Repeatable.

ENGL 591F: Directed Readings: Creative Writing

Cr. arr. Repeatable.

ENGL 591G: Directed Readings: Applied Linguistics and Technology

(Cross-listed with LING). Cr. arr. Repeatable.

ENGL 592: Core Studies in Rhetoric, Composition, and Professional Communication

(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and ENGL 250

Seminar on topics central to the fields of rhetoric and professional communication or composition.

ENGL 592A: Core Studies: Rhetoric

(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and ENGL 250

Seminar on topics central to the fields of rhetoric and professional communication or composition.

ENGL 592B: Core Studies: Composition

(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and ENGL 250

Seminar on topics central to the fields of rhetoric and professional communication or composition.

ENGL 592C: Core Studies: Professional Communication

(Cross-listed with SP CM). (3-0) Cr. 3. Repeatable, maximum of 9 credits.

Prereq: 12 credits in rhetoric, linguistics, or literature, excluding ENGL 150 and ENGL 250

Seminar on topics central to the fields of rhetoric and professional communication or composition.

ENGL 595: Graduate Study and Travel

Cr. arr.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

ENGL 595A: Graduate Study and Travel: Literature

Cr. arr.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

ENGL 595B: Graduate Study and Travel: Creative Writing

Cr. arr.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

ENGL 595C: Graduate Study and Travel: Linguistics

Cr. arr.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

ENGL 595D: Graduate Study and Travel: Rhetoric and Professional Communication

Cr. arr.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

ENGL 595E: Graduate Study and Travel: Teacher Education

Cr. arr.

Prereq: Permission of instructor

Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

ENGL 599: Creative Component

Cr. 3. F.S.SS.

*Prereq: Graduate classification, permission of major professor***Courses for graduate students:****ENGL 602: Research Methods in Rhetoric, Composition, and Professional Communication**

(3-0) Cr. 3. S.

Prereq: ENGL 501

A workshop for advanced graduate students in rhetoric and professional communication. Focus on rhetorical analysis, qualitative methods, or quantitative methods.

ENGL 602A: Research Methods in Rhetoric, Composition, and Professional Communication: Qualitative Research

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: ENGL 501

A workshop for advanced graduate students in rhetoric and professional communication.

ENGL 602B: Research Methods in Rhetoric, Composition, and Professional Communication: Quantitative Research

(3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: ENGL 501

A workshop for advanced graduate students in rhetoric and professional communication.

ENGL 602C: Research Methods in Rhetoric, Composition, and Professional Communication: Rhetorical Analysis

(3-0) Cr. 3.

Extended practice in close textual analysis of various kinds of rhetorical artifacts. Attention to important theoretical concepts used in rhetorical analysis and to historical controversies over the scope and function of rhetorical analysis.

ENGL 603: Seminar in Composition Theory

(3-0) Cr. 3.

Prereq: ENGL 503

Exploration of relationships between theory and practice in current pedagogy. Intensive examination of contemporary theories of poststructuralism, new media, feminism, postcolonialism, or cultural studies and their impact on current pedagogical practice. Participation in pedagogical research and theory building.

ENGL 611: Seminar in Rhetorical Theory

(3-0) Cr. 3. Repeatable.

Prereq: ENGL 547 or ENGL 548

Rhetorical theory, criticism, and/or practice in relation to an historical period or a particular theoretical issue.

ENGL 623: Research Methods in Applied Linguistics

(Cross-listed with LING). (3-0) Cr. 3. Repeatable.

Survey of research methods used in applied linguistics. Focus on conceptualizing and conducting research studies, including the process of developing research questions, gathering data, choosing data collection measures, and coding and analyzing data. Examples from a range of research approaches in the journals in applied linguistics and related areas are evaluated. The course aims to prepare students to be critical consumers of applied linguistics research and able to design and carry out their own research studies.

ENGL 626: Computer-Assisted Language Testing

(Cross-listed with LING). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: ENGL 510 or LING 510, ENGL 511 or LING 511, ENGL 519 or LING 519

Principles and practice for the use and study of computers and the Internet in second language assessment.

ENGL 630: Seminar in Applied Linguistics

(Cross-listed with LING). (3-0) Cr. 3. Repeatable.

Prereq: ENGL 510 or LING 510, ENGL 511 or LING 511

Topic changes each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feedback in CALL programs, technology and pronunciation, and advances in language assessment.

ENGL 631: Administration and Organization of Multimodal Writing Programs

(3-0) Cr. 3.

Prereq: ENGL 500, ENGL 503, ENGL 504, or ENGL 603

Survey of the major components of writing instruction in academic and nonacademic settings. History, theory, organization, and evaluation of writing programs. Guided observation of writing program functions at various institutions and businesses.

ENGL 699: Research

Cr. arr. Repeatable. F.S.SS.

Prereq: Graduate classification, permission of major professor
Research.

Entomology (ENT)

Any experimental courses offered by ENT can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ENT 201: Introduction to Insects**

(2.7-0) Cr. 1. F.S.SS.

Biological and ecological aspects of insects. Offered online only. 5 weeks.

ENT 211: Insects and Society

(2.7-0) Cr. 2. F.S.

Prereq: ENT 201

The importance of insects in human well-being. Insect-human interactions. Primarily for non-science and non-agriculture majors. Offered online only. 11 weeks.

ENT 214: Insects in Forensic Science

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: none

Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology.

ENT 220: Introduction to Forensic Science

(Cross-listed with CJ ST). (3-0) Cr. 3. S.

Prereq: none

Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced.

ENT 283: Pesticide Application Certification

(Cross-listed with AGRON, FOR, HORT). (2-0) Cr. 2. S.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

ENT 370: Insect Biology

(2-3) Cr. 3. F.

Prereq: BIOL 101 or BIOL 211

Structure, physiology, evolution, behavior, life histories, and recognition of insects. Collection required.

ENT 371I: Introduction to Insect Ecology

(Cross-listed with IA LL). (3-3) Cr. 4. Alt. SS., offered odd-numbered years.

Field and laboratory study of insects, their diversity, life history; emphasis on ecology and behavior.

ENT 372: Livestock Entomology

(2-0) Cr. 2. Alt. S., offered odd-numbered years.

Classroom and off-campus videotape sections. 12 weeks. Recognition, biology, behavior, economic importance, and management of insects and other arthropods affecting livestock and poultry production.

ENT 374: Insects and Our Health

(Cross-listed with MICRO). (3-0) Cr. 3. S.

Prereq: 3 credits in biological sciences

Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease.

Meets International Perspectives Requirement.

ENT 374L: Insects and Our Health Laboratory

(Cross-listed with MICRO). (0-3) Cr. 1. Alt. S., offered even-numbered years.

Prereq: Credit or enrollment in ENT 374

Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

ENT 375: Plant Protection Using Natural Enemies

(Dual-listed with ENT 575). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: ENT 370 or ENT 376

Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

ENT 376: Fundamentals of Entomology and Pest Management

(2-3) Cr. 3. S.

Prereq: BIOL 101 or BIOL 211

Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological backlash.

ENT 425: Aquatic Insects

(Dual-listed with ENT 525). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: BIOL 312 or equivalent

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 450: Pesticides in the Environment

(Dual-listed with ENT 550). (Cross-listed with TOX). (3-0) Cr. 3. S.

Prereq: 9 credits of biological sciences

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

ENT 452: Integrated Management of Diseases and Insect Pests of**Turfgrasses**

(Dual-listed with ENT 552). (Cross-listed with HORT, PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: HORT 351

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

ENT 466: Ecosystem Service Management

(Dual-listed with ENT 566). (Cross-listed with ENSCI, NREM). (3-0) Cr. 3.

Alt. S., offered odd-numbered years.

Prereq: permission of instructor

Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 471: Insect Ecology

(Dual-listed with ENT 571). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: 9 credits biological sciences

The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

ENT 490: Independent Study

Cr. 1-3. Repeatable, maximum of 9 credits.

Prereq: 15 credits in biological sciences, junior or senior classification

A maximum of 9 credits of all (university-wide) 490 credits may be applied toward graduation.

ENT 490E: Independent Study: Research or work experience.

Cr. 1-3. Repeatable, maximum of 9 credits.

Prereq: 15 credits in biological sciences, junior or senior classification

A maximum of 9 of all (university-wide) 490 credits may be used toward graduation.

ENT 490U: Independent Study: Laboratory teaching experience

Cr. 1-3. Repeatable, maximum of 9 credits.

Prereq: 15 credits in biological sciences, junior or senior classification. For students registering to be undergraduate laboratory assistants.

A maximum of 9 of all (university-wide) 490 credits may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:**ENT 511: Integrated Management of Tropical Crops**

(Cross-listed with HORT, PL P). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221

Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects.

Meets International Perspectives Requirement.

ENT 525: Aquatic Insects

(Dual-listed with ENT 425). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: BIOL 312 or equivalent

Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 530: Ecologically Based Pest Management Strategies

(Cross-listed with AGRON, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

ENT 550: Pesticides in the Environment

(Dual-listed with ENT 450). (Cross-listed with TOX). (3-0) Cr. 3. S.

Prereq: 9 credits of biological sciences

Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

ENT 552: Integrated Management of Diseases and Insect Pests of Turfgrasses

(Dual-listed with ENT 452). (Cross-listed with HORT, PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: HORT 351

Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

ENT 555: Insect Physiology

(3-3) Cr. 4. Alt. S., offered even-numbered years.

Prereq: ENT 370

Life processes of the insects, including reviews of current problems in insect physiology.

ENT 566: Ecosystem Service Management

(Dual-listed with ENT 466). (Cross-listed with ENSCI, NREM). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: permission of instructor

Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 568: Advanced Systematics

(Cross-listed with EEOB). (2-3) Cr. 3. Alt. S., offered irregularly.

Prereq: Permission of instructor

Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics.

ENT 570: Plant-Insect Interaction

(2-0) Cr. 2. Alt. F., offered odd-numbered years.

Prereq: 9 credits in biological sciences

Physiological, behavioral, ecological, and evolutionary factors that govern interactions between insects and plants, applications of this knowledge to agriculture, and important results from the study of natural systems. Additional topics covered during the semester include: tritrophic interactions, biological control of plants by insects, and pollination biology. Student-led discussions and draws on both the primary and secondary literature.

ENT 571: Insect Ecology

(Dual-listed with ENT 471). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: 9 credits biological sciences

The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

ENT 574: Medical Entomology

(3-3) Cr. 4. Alt. S., offered even-numbered years.

Prereq: 9 credits in biological sciences

Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease.

ENT 575: Plant Protection Using Natural Enemies

(Dual-listed with ENT 375). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: ENT 370 or ENT 376

Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

ENT 576: Systematic Entomology

(3-6) Cr. 5. Alt. F., offered even-numbered years.

Prereq: ENT 370

Classification, distribution, and natural history of insects, including fundamentals of phylogenetic systematics, biogeography, taxonomic procedures, and insect collection and curation.

ENT 590: Special Topics

Cr. 1-3. Repeatable.

Prereq: 15 credits in biological sciences.

ENT 590A: Special Topics: Biological Control and Pathology.

Cr. 1-3. Repeatable.

ENT 590B: Special Topics: Chemical Ecology and Behavior.

Cr. 1-3. Repeatable.

ENT 590C: Special Topics: Ecology and Pest Management.

Cr. 1-3. Repeatable.

ENT 590D: Special Topics: Evolution and Systematics.

Cr. 1-3. Repeatable.

ENT 590E: Special Topics: Special Research Topics.

Cr. 1-3. Repeatable.

ENT 590F: Special Topics: Medical and Veterinary Entomology.

Cr. 1-3. Repeatable.

ENT 590G: Special Topics: Molecular Entomology.

Cr. 1-3. Repeatable.

ENT 590I: Special Topics: Toxicology

Cr. 1-3. Repeatable.

ENT 590K: Special Topics: Teaching Experience.

Cr. 1-3. Repeatable.

ENT 590L: Special Topics: Extension Internship.

Cr. 1-3. Repeatable.

ENT 590M: Special Topics: Immature Insects.

Cr. 1-3. Repeatable.

ENT 590N: Special Topics: Population Genetics.

Cr. 1-3. Repeatable.

Courses for graduate students:**ENT 600: Seminar**

Cr. 1. F.S.SS.

Presentation of research results.

ENT 675: Insecticide Toxicology

(Cross-listed with TOX). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: ENT 555 or TOX 501

Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides.

ENT 699: Research

Cr. arr. Repeatable.

Entrepreneurship (ENTSP)

Any experimental courses offered by ENTSP can be found at:registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Environmental Science (ENSCI)

Any experimental courses offered by ENSCI can be found at:registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)**Courses primarily for undergraduates:****ENSCI 110: Orientation to Environmental Science**

(1-0) Cr. 1. F.

Prereq: Freshman classification in EnSci

Overview of Environmental Science curriculum and discussion of professional opportunities. Offered on a satisfactory-fail basis only.

ENSCI 201: Introduction to Environmental Issues

(Cross-listed with BIOL, ENV S). (2-0) Cr. 2. F.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

ENSCI 202: Exploration of Environmental and Sustainability Issues

(1-0) Cr. 1. F.

Prereq: Credit or enrollment in ENSCI 201

Exploration of specific environmental and sustainability issues; designed to complement ENSCI 201. Offered on a satisfactory-fail basis only.

ENSCI 203: Exploration of Environmental Science

(1-0) Cr. 1. S.

Prereq: ENSCI 202.

Continued exploration of specific environmental science issues developed in ENSCI 202. Topics may vary in different years. Offered on a satisfactory-fail basis only.

ENSCI 250: Environmental Geography

(Cross-listed with ENV S). (3-0) Cr. 3. F.

The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world.

ENSCI 251: Biological Processes in the Environment

(Cross-listed with BIOL). (3-0) Cr. 3. S.

Principles of Biology from the level of macromolecules to the biosphere. Biological processes that affect environmental systems: including metabolism, energy pathways, biochemical reactions in cells, plant and microbial structure and function, element and water cycles.

ENSCI 270: Geospatial Technologies

(Cross-listed with AGRON). Cr. 3.

Concepts and tools for acquiring, managing, analyzing, and displaying geographic information, including GIS, remote sensing, spatial analysis, and cartography. Focus on applications in biological, ecological, environmental, and agricultural sciences.

ENSCI 301: Natural Resource Ecology and Soils

(Cross-listed with NREM). (3-3) Cr. 4. F.

Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology

Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes.

ENSCI 312: Ecology

(Cross-listed with A ECL, BIOL). (3-3) Cr. 4. F.SS.

Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L

Fundamental concepts and principles of ecology dealing with organisms, populations, communities, and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

ENSCI 312I: Ecology

(Cross-listed with A ECL, IA LL). Cr. 4. SS.

An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

ENSCI 324: Energy and the Environment

(Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.

Prereq: CHEM 163 or CHEM 177, MATH 140

Exploration of the origin of Earth's energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities.

ENSCI 345: Natural Resource Photogrammetry and Geographic Information Systems

(Cross-listed with NREM). (2-3) Cr. 3. S.

Prereq: Junior classification

Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses.

ENSCI 360: Environmental Soil Science

(Cross-listed with AGRON). (2-2) Cr. 3. S.

Prereq: AGRON 182 (or equivalent) or ENSCI 250 or GEOL 201

Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

ENSCI 370: GIS for Ecology and Environmental Science

(Cross-listed with BIOL). Cr. 1-6. Repeatable. F.S.

Prereq: Six credits in biological and /or physical sciences, and permission of instructor.

Introduction to geographic information systems (GIS) with emphasis on ecological and environmental applications. No prior GIS experience required. Guided, individualized study of topics based on student background and interest. For students with prior experience, topics and activities are selected to build upon any previous experience and minimize duplication to previous GIS coursework. Potential topics include: basic concepts of GIS, data structures, database management, spatial analysis, modeling and visualization of ecological and environmental data. Case studies in ecological and environmental applications using ArcGIS. Offered on a satisfactory-fail basis only.

ENSCI 381: Environmental Systems I: Introduction to Environmental Systems

(Dual-listed with ENSCI 581). (Cross-listed with BIOL, ENV S). Cr. 3-4. F.

Prereq: 12 credits of natural science including biology and chemistry

Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 382: Environmental Systems II: Analysis of Environmental Systems

(Dual-listed with ENSCI 582). (Cross-listed with BIOL). (2-2) Cr. 3. S.

Prereq: ENSCI 381

Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 384: Introduction to Ecosystems

(3-0) Cr. 3. S.

Prereq: 12 credits of natural science including biology and chemistry

Biological and physical processes affecting material and energy flows in natural and managed ecosystems. Understanding and predicting climate and management impacts on ecosystem services and sustainability.

ENSCI 390: Internship in Environmental Science

Cr. arr. Repeatable. F.S.SS.

Prereq: Approval of the Environmental Science coordinator

Supervised off-campus work experience in the field of environmental science. Offered on a satisfactory-fail basis only.

ENSCI 391: Apprenticeship

Cr. arr. Repeatable. F.S.SS.

Prereq: Approval of the Environmental Science Coordinator

Practical experience in an approved setting such as a research laboratory, government office, or private office. Offered on a satisfactory-fail basis only.

ENSCI 402: Watershed Hydrology

(Dual-listed with ENSCI 502). (Cross-listed with GEOL, MTEOR, NREM). (2-3) Cr. 3. F.

Prereq: Four courses in physical or biological sciences or engineering; junior standing

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

ENSCI 402I: Watershed Hydrology and Surficial Processes

(Cross-listed with AGRON, IA LL). Cr. 4. SS.

Prereq: Four courses in physical or biological sciences or engineering

Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed.

ENSCI 404: Global Change

(Dual-listed with ENSCI 504). (Cross-listed with AGRON, ENV S, MTEOR). (3-0) Cr. 3. S.

Prereq: Four courses in physical or biological sciences or engineering; junior standing

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENSCI 405: Environmental Biophysics

(Dual-listed with ENSCI 505). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: MATH 165 and some exposure to computer programming (any language)

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

ENSCI 406: World Climates

(Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. S.

Prereq: AGRON 206/MTEOR 206

Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement.

ENSCI 407: Watershed Management

(Dual-listed with ENSCI 507). (Cross-listed with ENV S, NREM). (3-3) Cr. 4. S.

Prereq: A course in general biology

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 408I: Aquatic Ecology

(Dual-listed with ENSCI 508I ENSCI 408I). (Cross-listed with IA LL). Cr. 4. SS.

Prereq: Courses in ecology, chemistry, and physics

Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 409: Field Methods in Hydrogeology

(Dual-listed with ENSCI 509). (Cross-listed with GEOL). (0-4) Cr. 3. Alt. SS., offered even-numbered years.

Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473

Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 411: Hydrogeology

(Dual-listed with ENSCI 511). (Cross-listed with GEOL). (3-2) Cr. 4. F.

Prereq: Four courses in biological or physical sciences

Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

ENSCI 412: Micropaleontology

(Cross-listed with GEOL). Cr. 3. Alt. F., offered even-numbered years.

Prereq: GEOL 102 and GEOL 102L

Evolution, identification and utility of major microfossil groups from the Mesozoic to present. Focus on Cenozoic applications including biostratigraphy, paleoclimate, and paleothermometry using assemblages, stable isotopes, Mg/Ca, and molecular fossils. Laboratory includes processing and analysis of specific microfossils. Major groups covered include foraminifera, calcareous nannofossils, sponge spicules, diatoms, radiolarians, and silicoflagellates.

ENSCI 413: Applied and Environmental Geophysics

(Dual-listed with ENSCI 513). (Cross-listed with C E, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: GEOL 100 or GEOL 201, algebra and trigonometry

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

ENSCI 414: Applied Groundwater Flow Modeling

(Dual-listed with ENSCI 514). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: GEOL 411 or C E 473; MATH 165 or MATH 181

Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 415: Paleoclimatology

(Dual-listed with ENSCI 515). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Four courses in biological or physical science

Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods, utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years).

ENSCI 416: Hydrologic Modeling and Analysis

(Dual-listed with ENSCI 516). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Four courses in Earth science, meteorology, or engineering; junior standing.

Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

ENSCI 418: Stream Ecology

(Dual-listed with ENSCI 518). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: A ECL 486

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 419: Aqueous and Environmental Geochemistry

(Dual-listed with ENSCI 519). (Cross-listed with GEOL). (2-2) Cr. 3. S.

Prereq: CHEM 178, CHEM 178L; junior classification

Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 420: Environmental Engineering Chemistry

(Dual-listed with ENSCI 520). (Cross-listed with C E). (2-3) Cr. 3. F.

Prereq: C E 326, CHEM 178

Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

ENSCI 422I: Prairie Ecology

(Cross-listed with IA LL). Cr. 4. SS.

Prereq: Familiarity with basic principles in biological sciences and ecology

Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects.

ENSCI 424: Air Pollution

(Dual-listed with ENSCI 524). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424A: Air Pollution: Air quality and effects of pollutants

(Dual-listed with ENSCI 524A). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424B: Air Pollution: Climate change and causes

(Dual-listed with ENSCI 524B). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424C: Air Pollution: Transportation Air Quality

(Dual-listed with ENSCI 524C). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

ENSCI 424D: Air Pollution: Off-gas treatment technology

(Dual-listed with ENSCI 524D). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

ENSCI 424E: Air Pollution: Agricultural sources of pollution

(Dual-listed with ENSCI 524E). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 426: Stable Isotopes in the Environment

(Dual-listed with ENSCI 526). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Four courses in biological or physical science

Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 437: Watershed Modeling and Policy

(Dual-listed with ENSCI 537). (Cross-listed with A B E). (2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: CE 372 or equivalent

A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

ENSCI 446: Integrating GPS and GIS for Natural Resource Management

(Dual-listed with ENSCI 546). (Cross-listed with NREM). (2-3) Cr. 3. F.

Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS

Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

ENSCI 452: GIS for Geoscientists

(Dual-listed with ENSCI 552). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F.S.

Prereq: GEOL 100, GEOL 201 or equivalent

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 459: Environmental Soil and Water Chemistry

(Dual-listed with ENSCI 559). (Cross-listed with AGRON). (3-3) Cr. 4. F.

Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

ENSCI 461I: Introduction to GIS

(Cross-listed with ENV S, IA LL, L A). Cr. 4. SS.

Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management.

ENSCI 463: Soil Formation and Landscape Relationships

(Dual-listed with ENSCI 563). (Cross-listed with AGRON). (3-0) Cr. 3. S.

Prereq: AGRON 182 (or equivalent) or AGRON 260

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

ENSCI 463I: Soil Formation and Landscape Relationships

(Dual-listed with ENSCI 563I). (Cross-listed with AGRON, IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: AGRON 182 (or equivalent)

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 464: Wetland Ecology

(Dual-listed with ENSCI 564). (Cross-listed with BIOL). (3-0) Cr. 3. S.

Prereq: 15 credits in biological sciences.

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands.

ENSCI 466: Ecosystem Service Management

(Dual-listed with ENSCI 566). (Cross-listed with ENT, NREM). (3-0) Cr. 3.

Alt. S., offered odd-numbered years.

Prereq: permission of instructor

Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENSCI 468: Applied Geostatistics for Geoscientists

(Dual-listed with ENSCI 568). (Cross-listed with GEOL, MTEOR). Cr. 3. F.

Prereq: GEOL 452, C R P 351, C R P 452, NREM 345, or NREM 446

Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression).

ENSCI 477: Soil Physics

(Dual-listed with ENSCI 577). (Cross-listed with AGRON). (3-0) Cr. 3. S.

Prereq: AGRON 182 or equivalent and MATH 166 recommended

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 479: Surficial Processes

(Dual-listed with ENSCI 579). (Cross-listed with GEOL). (2-3) Cr. 3. F.

Prereq: GEOL 100 and GEOL 100L; or GEOL 201; or equivalent experience.

The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.

ENSCI 480: Engineering Analysis of Biological Systems

(Cross-listed with A B E). (2-2) Cr. 3. F.

Prereq: A B E 380 or permission of the instructor

Systems-level quantitative analysis of various biological systems, including applications in foods, feeds, biofuels, bioenergy, and other bio-based systems. Introduction to techno-economic analysis and life-cycle assessment of these systems at multiple production scales. Applying these tools to evaluate and improve cost and sustainability performance. Students enrolled in ABE 580 will be required to conduct additional learning activities.

ENSCI 483: Environmental Biogeochemistry

(Dual-listed with ENSCI 583). (Cross-listed with BIOL, GEOL). Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Combined 12 credits in biology, chemistry, and physics.

An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life.

ENSCI 484: Ecosystem Ecology

(Cross-listed with BIOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Combined 12 credits in biology, chemistry, and physics.

Introduction of the study of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

ENSCI 485: Soil and Environmental Microbiology

(Dual-listed with ENSCI 585). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F.

Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

ENSCI 486: Aquatic Ecology

(Dual-listed with ENSCI 586). (Cross-listed with A ECL, BIOL). (3-0) Cr. 3. F.

Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

ENSCI 486L: Aquatic Ecology Laboratory

(Dual-listed with ENSCI 586L). (Cross-listed with A ECL, BIOL). (0-3) Cr. 1. F.

Prereq: Concurrent enrollment in BIOL 486

Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 487: Microbial Ecology

(Dual-listed with ENSCI 587). (Cross-listed with BIOL, GEOL, MICRO). (3-0) Cr. 3. F.

Prereq: Six credits in biology and 6 credits in chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

ENSCI 488: GIS for Geoscientists II

(Dual-listed with ENSCI 588). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent

GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

ENSCI 490: Independent Study

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of the instructor and approval of the Environmental Science coordinator

ENSCI 490H: Independent Study: Honors

Cr. arr. Repeatable. F.S.SS.

Permission of instructor and approval of Environmental Science coordinator.

ENSCI 495: Current Topics and Case Studies in Environmental Science

Cr. 1-3.

Prereq: Junior classification in Environmental Science, permission of instructor

Current topics and case studies related to the analysis and management of environmental systems. Individual and/or group projects.

ENSCI 496: Travel Course

Cr. arr. Repeatable.

Prereq: Permission of instructor

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings. A. International Tour B. Domestic Tour.

ENSCI 496A: Travel Course: International Tour

Cr. arr. Repeatable.

Prereq: Permission of instructor

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 496B: Travel Course: Domestic Tour

Cr. arr. Repeatable.

Prereq: Permission of instructor

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENSCI 498: Cooperative Education

Cr. R. Repeatable. F.S.SS.

Prereq: Permission of Environmental Science Coordinator

Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:**ENSCI 502: Watershed Hydrology**

(Dual-listed with ENSCI 402). (Cross-listed with GEOL, MTEOR, NREM). (2-3) Cr. 3. F.

Prereq: Four courses in physical or biological sciences or engineering; junior standing

Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

ENSCI 504: Global Change

(Dual-listed with ENSCI 404). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. S.

Prereq: Four courses in physical or biological sciences or engineering; junior standing

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENSCI 505: Environmental Biophysics

(Dual-listed with ENSCI 405). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: MATH 165 and some exposure to computer programming (any language)

The movement of energy and mass among the soil, vegetation, and atmosphere. The heat and water budget of humans, other animals, plants, and plant communities. Relevance to weather and climate, the effect of climate change on organisms, and remote sensing.

ENSCI 507: Watershed Management

(Dual-listed with ENSCI 407). (Cross-listed with NREM). (3-3) Cr. 4. S.

Prereq: A course in general biology

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 508: Aquatic Ecology

(Cross-listed with IA LL, NREM). Cr. 4. SS.

Prereq: Courses in ecology, chemistry, and physics

Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 509: Field Methods in Hydrogeology

(Dual-listed with ENSCI 409). (Cross-listed with GEOL). (0-4) Cr. 3. Alt. SS., offered even-numbered years.

Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473

Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 511: Hydrogeology

(Dual-listed with ENSCI 411). (Cross-listed with GEOL). (3-2) Cr. 4. F.

Prereq: Four courses in biological or physical sciences

Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

ENSCI 513: Applied and Environmental Geophysics

(Dual-listed with ENSCI 413). (Cross-listed with C E, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: GEOL 100 or GEOL 201, algebra and trigonometry

Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

ENSCI 514: Applied Groundwater Flow Modeling

(Dual-listed with ENSCI 414). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years.

Prereq: GEOL 411 or C E 473; MATH 165 or MATH 181

Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 515: Paleoclimatology

(Dual-listed with ENSCI 415). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Four courses in biological or physical science

Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~ 1 million years).

ENSCI 516: Hydrologic Modeling and Analysis

(Dual-listed with ENSCI 416). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Four courses in earth science, meteorology, or engineering; junior standing

Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

ENSCI 518: Stream Ecology

(Dual-listed with ENSCI 418). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: A ECL 486

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 519: Aqueous and Environmental Geochemistry

(Dual-listed with ENSCI 419). (Cross-listed with GEOL). (2-2) Cr. 3. S.

Prereq: CHEM 178, CHEM 178L; junior classification

Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 520: Environmental Engineering Chemistry

(Dual-listed with ENSCI 420). (Cross-listed with C E). (2-3) Cr. 3. F.

Prereq: C E 326, CHEM 178

Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

ENSCI 521: Environmental Biotechnology

(Cross-listed with C E). (2-2) Cr. 3. F.

Prereq: C E 326

Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

ENSCI 522: Water Pollution Control Processes

(Cross-listed with C E). (2-2) Cr. 3.

Prereq: C E 421 or C E 521

Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

ENSCI 523: Physical-Chemical Treatment Process

(Cross-listed with C E). (2-2) Cr. 3.

Prereq: C E 520

Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

ENSCI 524: Air Pollution

(Dual-listed with ENSCI 424). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524A: Air Pollution: Air quality and effects of pollutants

(Dual-listed with ENSCI 424A). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524B: Air Pollution: Climate change and causes

(Dual-listed with ENSCI 424B). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524C: Air Pollution: Transportation Air Quality

(Dual-listed with ENSCI 424C). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: C E 524A; PHYS 221 or CHEM 178; MATH 166 or 3 credits in statistics. Senior classification or above.

ENSCI 524D: Air Pollution: Off-gas treatment technology

(Dual-listed with ENSCI 424D). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: C E 524A, C E 524B; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

ENSCI 524E: Air Pollution: Agricultural sources of pollution

(Dual-listed with ENSCI 424E). (Cross-listed with A B E, C E). (1-0) Cr. 1.

Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 526: Stable Isotopes in the Environment

(Dual-listed with ENSCI 426). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Four courses in biological or physical science

Introduction to the theory, methods and applications of stable isotopes.

Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 528: Solid and Hazardous Waste Management

(Cross-listed with C E). (3-0) Cr. 3.

Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing

Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

ENSCI 531: Design and Evaluation of Soil and Water Conservation Systems

(Cross-listed with A B E). (2-3) Cr. 3. F.

Prereq: E M 378 or CH E 356

Hydrology and hydraulics in agricultural and urbanizing watersheds.

Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

ENSCI 532: Nonpoint Source Pollution and Control

(Cross-listed with A B E). (3-0) Cr. 3.

Prereq: A B E 431 or C E 372

Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

ENSCI 533: Erosion and Sediment Transport

(Cross-listed with A B E, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: C E 372 or GEOL/ENSCI/MTEOR 402, MATH 166 or equivalent

Soil erosion processes, soil loss equations and their application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reservoir sedimentation, wind erosion, BMPs for controlling erosion.

ENSCI 534: Contaminant Hydrogeology

(Cross-listed with GEOL). (3-0) Cr. 3. S.

Prereq: GEOL 511 or equivalent

Theory and practical considerations of fate and transport of solutes through porous geologic materials. Organic and inorganic contaminants in industrial and agricultural settings. Subsurface microbiology and biodegradation of aromatic and chlorinated hydrocarbons. Investigation of coupled processes (diffusion, advection, dispersion, sorption, and biodegradation) using computer models. Soil and groundwater monitoring and remediation strategies.

ENSCI 535: Restoration Ecology

(Cross-listed with EEOB, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: BIOL 366 or BIOL 474 or graduate standing

Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

ENSCI 535I: Restoration Ecology

(Cross-listed with A ECL, EEOB, IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: A course in ecology

Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

ENSCI 536: Design and Evaluation of Soil and Water Monitoring Systems

(Cross-listed with A B E). (2-3) Cr. 3. Alt. S., offered even-numbered years.

Prereq: A B E 431

Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

ENSCI 537: Watershed Modeling and Policy

(Dual-listed with ENSCI 437). (Cross-listed with A B E). (2-2) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: CE 372 or equivalent

A project-based course on watershed-scale models for improving water quality. Legislative and judicial basis of the Total Maximum Daily Load (TMDL) program; approaches to TMDL development; principles and techniques for implementation; stakeholder engagement strategies. Hands-on experiences with GIS-interfaced models, data sources, calibration/validation, statistical assessment of model results, and simulation using multiple tools. In addition to other assignments, graduate students will present case studies of TMDLs using different modeling tools.

ENSCI 546: Integrating GPS and GIS for Natural Resource Management

(Dual-listed with ENSCI 446). (Cross-listed with NREM). (2-3) Cr. 3. F.

Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS

Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

ENSCI 552: GIS for Geoscientists

(Dual-listed with ENSCI 452). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F.S.

Prereq: GEOL 100, GEOL 201 or equivalent

Introduction to geographic information systems (GIS) using ArcGIS Pro with particular emphasis on geoscientific data. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 553: Soil-Plant Relationships

(Cross-listed with AGRON). (3-0) Cr. 3. S.

Prereq: AGRON 354

Composition and properties of soils in relation to the nutrition and growth of plants.

ENSCI 558: Laboratory Methods in Soil Chemistry

(Cross-listed with AGRON). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: AGRON 354 and CHEM 211

Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

ENSCI 559: Environmental Soil and Water Chemistry

(Dual-listed with ENSCI 459). (Cross-listed with AGRON). (3-3) Cr. 4. F.

Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 182 (or equivalent) or AGRON 360; GEOL 100 and AGRON 354 recommended

An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

ENSCI 563: Soil Formation and Landscape Relationships

(Dual-listed with ENSCI 463). (Cross-listed with AGRON). (3-0) Cr. 3. S.

Prereq: AGRON 182 (or equivalent) or AGRON 260

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

ENSCI 563I: Soil Formation and Landscape Relationships

(Dual-listed with ENSCI 463I). (Cross-listed with AGRON, IA LL). Cr. 2. Alt. SS., offered even-numbered years.

Prereq: AGRON 182 (or equivalent)

Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 564: Wetland Ecology

(Dual-listed with ENSCI 464). (Cross-listed with EEOB). (3-0) Cr. 3. S.

Prereq: 15 credits in biological sciences.

Ecology, classification, creation and restoration, and management of wetlands. Emphasis on North American temperate wetlands.

ENSCI 564I: Wetland Ecology

(Cross-listed with EEOB, IA LL). Cr. 4. SS.

Prereq: Ia LL 312I

Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

ENSCI 566: Ecosystem Service Management

(Dual-listed with ENSCI 466). (Cross-listed with ENT, NREM). (3-0) Cr. 3.

Alt. S., offered odd-numbered years.

Prereq: permission of instructor

Land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENSCI 568: Applied Geostatistics for Geoscientists

(Dual-listed with ENSCI 468). (Cross-listed with GEOL, MTEOR). Cr. 3. F.

Prereq: GEOL 452, C R P 351, C R P 452, NREM 345, or NREM 446

Introduction to geospatial data collection, analysis, interpretation, and presentation. Geospatial techniques including geographic information systems (GIS), remote sensing (RS), and global positioning systems (GPS). Study of applied geostatistical analysis (e.g., interpolation and spatial regression).

ENSCI 571: Surface Water Hydrology

(Cross-listed with C E). (3-0) Cr. 3. S.

Prereq: C E 372

Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination.

ENSCI 572: Analysis and Modeling Aquatic Environments

(Cross-listed with C E). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: C E 372

Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

ENSCI 573: Groundwater Hydrology

(3-0) Cr. 3. F.

Prereq: C E 372

Principles of groundwater flow, hydraulics of wells, superposition, slug and pumping tests, streamlines and flownets, and regional groundwater flow. Contaminant transport. Computer modeling. Design project. Extra assignments required for graduate students.

ENSCI 575: Soil Formation and Transformation

(Cross-listed with AGRON). (3-0) Cr. 3. F.

Prereq: AGRON 463 or equivalent

Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

ENSCI 577: Soil Physics

(Dual-listed with ENSCI 477). (Cross-listed with AGRON). (3-0) Cr. 3. S.

Prereq: AGRON 182 or equivalent and MATH 166 recommended

The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 578: Laboratory Methods in Soil Physics

(Cross-listed with AGRON). (0-3) Cr. 1. S.

Prereq: concurrent enrollment in AGRON 477 or AGRON 577

Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

ENSCI 579: Surficial Processes

(Dual-listed with ENSCI 479). (Cross-listed with GEOL). (2-3) Cr. 3. F.
Prereq: GEOL 100 and GEOL 100L; or GEOL 201; or equivalent experience.

The study of physical processes that shape Earth's surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.

ENSCI 581: Environmental Systems I: Introduction to Environmental Systems

(Dual-listed with ENSCI 381). (Cross-listed with EEOB). Cr. 3-4. F.

Prereq: 12 credits of natural science including biology and chemistry
 Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 582: Environmental Systems II: Analysis of Environmental Systems

(Dual-listed with ENSCI 382). (Cross-listed with EEOB). (2-2) Cr. 3. S.

Prereq: ENSCI 381

Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 583: Environmental Biogeochemistry

(Dual-listed with ENSCI 483). Cr. 3. Alt. S., offered odd-numbered years.

Prereq: Combined 12 credits in biology, chemistry, and physics.

An exploration of biological, physical and geochemical impacts on the structure and function of ecosystems from local to global scales. Emphasis on the cycles of carbon, nitrogen, phosphorus, sulfur, and metals, and how these have been impacted by human activity. Topics may include biological feedbacks to climate change, microbial physiology and redox reactions, plant/soil feedbacks, terrestrial/aquatic linkages, early Earth processes and the origins of life.

ENSCI 584: Ecosystem Science

(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: Combined 12 credits in biology, chemistry, and physics.

Advanced studies of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations and modern approaches to ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

ENSCI 585: Soil and Environmental Microbiology

(Dual-listed with ENSCI 485). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F.

Prereq: AGRON 182 or equivalent; MICRO 201 and MICRO 201L recommended

The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

ENSCI 586: Aquatic Ecology

(Dual-listed with ENSCI 486). (Cross-listed with A ECL, EEOB). (3-0) Cr. 3. F.

Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301

Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

ENSCI 586L: Aquatic Ecology Laboratory

(Dual-listed with ENSCI 486L). (Cross-listed with A ECL, EEOB). (0-3) Cr. 1. F.

Prereq: Concurrent enrollment in BIOL 486

Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 587: Microbial Ecology

(Dual-listed with ENSCI 487). (Cross-listed with EEOB, GEOL, MICRO).

(3-0) Cr. 3. F.

Prereq: Six credits in biology and 6 credits in chemistry

Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural and environmental systems. Consequences of microbial activity on water chemistry, weathering, and precipitation/dissolution reactions will be emphasized.

ENSCI 588: GIS for Geoscientists II

(Dual-listed with ENSCI 488). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years.

Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent

GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

ENSCI 590: Special Topics

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of major professor in Environmental Science faculty

Literature reviews and conference in accordance with needs and interest of the student.

ENSCI 599: Creative Component

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of major professor in Environmental Science faculty
Creative component for nonthesis master of science degree.

Courses for graduate students:**ENSCI 685: Advanced Soil Biochemistry**

(Cross-listed with AGRON, MICRO). (2-0) Cr. 2. Alt. S., offered even-numbered years.

Prereq: AGRON 585

Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

ENSCI 698: Seminar in Environmental Science

Cr. 1-3. Repeatable. S.

Reports and discussion of recent research and literature.

ENSCI 699: Research

Cr. arr. Repeatable. F.S.SS.

Environmental Studies (ENV S)

Any experimental courses offered by ENV S can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**ENV S 101: Environmental Geology: Earth in Crisis**

(Cross-listed with GEOL). (3-0) Cr. 3. F.S.SS.

Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding.

ENV S 108: Introduction to Oceanography

(Cross-listed with GEOL). (3-0) Cr. 3. F.

Introduction to the study of oceans and the processes that helped shape them. A major focus is on how the oceans work, with special attention on geological, chemical, and biological processes. Ocean circulation and its influence on climate. Life of the oceans. Use and misuse of ocean resources. Anthropogenic impacts on the oceanic environment.

ENV S 111: Geological Disasters

(Cross-listed with GEOL). (1-0) Cr. 1. F.S.SS.

Introduction to the catastrophic geologic processes with the potential to devastate human populations that continue to expand into regions at greatest risk from geologic hazards. Selected case studies and discussion of plate tectonics, climate, and earth processes explain the driving forces behind natural hazards such as earthquakes, tsunamis, volcanic eruptions, landslides, and floods.

ENV S 120: Introduction to Renewable Resources

(Cross-listed with AGRON, NREM). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

ENV S 130: Natural Resources and Agriculture

(Cross-listed with NREM). (3-0) Cr. 3. S.

Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

ENV S 160: Water Resources of the World

(Cross-listed with AGRON, GEOL, MTEOR). (3-0) Cr. 3. S.

Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment. Meets International Perspectives Requirement.

ENV S 173: Environmental Biology

(Cross-listed with BIOL). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

ENV S 201: Introduction to Environmental Issues

(Cross-listed with BIOL, ENSCI). (2-0) Cr. 2. F.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

ENV S 204: Biodiversity

(Cross-listed with BIOL). (4-0) Cr. 2. S.

Prereq: One course in life sciences

Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course.

ENV S 220: Globalization and Sustainability

(Cross-listed with ANTHR, GLOBE, M E, MAT E, SOC). (3-0) Cr. 3. F.S.

An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement.

ENV S 250: Environmental Geography

(Cross-listed with ENSCI). (3-0) Cr. 3. F.

The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world.

ENV S 270: Foundations in Natural Resource Policy and History

(Cross-listed with L A, NREM). (3-0) Cr. 3. F.

The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.

ENV S 293: Environmental Planning

(Cross-listed with C R P). (3-0) Cr. 3. F.S.

Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

ENV S 320: Ecofeminism

(Cross-listed with WGS). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: WGS 201 or 3 credits in WGS at the 300 level or above

Women's relationships with the earth, non-human nature, and other humans. The course explores the connections between society's treatment of women and nature; origins of ecofeminism and how it relates to the science of ecology, conventional and sustainable agriculture as well as how ecofeminism relates to other branches of feminist philosophy. Evaluation and critique of modern science, technology, political systems and SOLUTIONS will be included. Meets U.S. Diversity Requirement

ENV S 324: Energy and the Environment

(Cross-listed with ENSCI, GEOL, MTEOR). (3-0) Cr. 3. S.

Prereq: CHEM 163 or CHEM 177, MATH 140

Exploration of the origin of Earth's energy resources and the environmental and climatic impacts of energy acquisition and consumption. Renewable and non-renewable energy resources within an Earth-system context. Various environmentally-relevant topics such as water quality and availability, habitat destruction, greenhouse-gas emissions, and health and safety hazards to wildlife and human communities.

ENV S 334: Environmental Ethics

(Cross-listed with PHIL). (3-0) Cr. 3. F.

Prereq: 3 credits in philosophy

Thorough study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored.

ENV S 342: World Food Issues: Past and Present

(Cross-listed with AGRON, FS HN). (3-0) Cr. 3. F.S.SS.

Prereq: Junior classification

Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts. Investigation of various causes and consequences of overnutrition/ undernutrition, poverty, hunger, access, and distribution. Meets International Perspectives Requirement.

ENV S 342H: World Food Issues: Past and Present, Honors

(Cross-listed with AGRON). (3-0) Cr. 3. F.S.

Prereq: Junior classification

Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/ undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Meets International Perspectives Requirement.

ENV S 345: Population and Society

(Cross-listed with SOC). (3-0) Cr. 3. F.

Prereq: SOC 134

Human population growth and structure; impact on food, environment, and resources; gender issues; trends of births, deaths, and migration; projecting future population; population policies and laws; comparison of the United States with other societies throughout the world.

Meets International Perspectives Requirement.

ENV S 355: Literature and the Environment

(Cross-listed with ENGL). (3-0) Cr. 3.

Prereq: ENGL 250

Study of literary texts that address the following topics, among others: the relationship between people and natural/urban environments, ecocriticism, and the importance of place in the literary imagination.

ENV S 362: Global Environmental History

(Cross-listed with HIST). (3-0) Cr. 3. F.

Prereq: Either one of HIST 201, 202, or 207; or 3 credits of Environmental Studies; and sophomore classification.

Survey of the interactions of human communities with their environments from the beginnings of human history to the present. Topics include the domestication of animals, the agricultural revolution, industrialization, urbanization, deforestation, hydraulic management, fossil fuel consumption, and climate change.

ENV S 363: U. S. Environmental History

(Cross-listed with HIST). (3-0) Cr. 3.

Prereq: Sophomore classification

Survey of the interactions of human communities with the North American environment. Focus on the period from presettlement to the present, with a particular concentration on natural resources, disease, settlement patterns, land use, and conservation policies.

ENV S 380: Energy, Environmental and Resource Economics

(Cross-listed with ECON). (3-0) Cr. 3.

Prereq: ECON 101

Natural resource availability, use, conservation, and government policy, with emphasis on energy issues. Environmental quality and pollution control policies.

ENV S 381: Environmental Systems I: Introduction to Environmental Systems

(Cross-listed with BIOL, ENSCI). Cr. 3-4. F.

Prereq: 12 credits of natural science including biology and chemistry

Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENV S 382: Environmental Sociology

(Cross-listed with SOC). (3-0) Cr. 3. F.S.

Prereq: Soc 134 or 3 credits of ENV S

Environment-society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

ENV S 383: Environmental Politics and Policies

(Cross-listed with POL S). (3-0) Cr. 3. SS.

Prereq: sophomore classification

Major ideologies' relations to conservation and ecology. Processes, participants, and institutions involved in state, national, and global environmental policymaking. Case studies of environmental controversies and proposals for policy reform.

ENV S 384: Religion and Ecology

(Cross-listed with RELIG). (3-0) Cr. 3.

Introduction to concepts of religion and ecology as they appear in different religious traditions, from both a historical and contemporary perspective. Special attention to religious response to contemporary environmental issues.

Meets International Perspectives Requirement.

ENV S 390: Internship in Environmental Studies

Cr. arr. Repeatable. F.S.SS.

Prereq: Approval of the Environmental Studies Coordinator

Practical experience with nature centers, government agencies, schools, private conservation groups, and other organizations. Offered on a satisfactory-fail basis only.

ENV S 404: Global Change

(Cross-listed with AGRON, ENSCI, MTEOR). (3-0) Cr. 3. S.

Prereq: Four courses in physical or biological sciences or engineering; junior standing

Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENV S 407: Watershed Management

(Cross-listed with ENSCI, NREM). (3-3) Cr. 4. S.

Prereq: A course in general biology

Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENV S 417: Urban and Peri-urban Watershed Assessment

(Cross-listed with L A). (2-3) Cr. 3. F.

Prereq: Junior classification and 6 credits of natural science

Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.

ENV S 424: Sustainable and Environmental Horticulture Systems

(Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years.

Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

ENV S 442: The Policy and Politics of Coastal Areas

(Cross-listed with POL S). (3-0) Cr. 3. SS.

Exploration of political implications of coastal policy. Issues include: "Carrying capacity," zoning, regulation of human development activities, trade-offs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

ENV S 450: Issues in Sustainable Agriculture

(Cross-listed with AGRON). (3-0) Cr. 3. F.

Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices.

ENV S 460: Controversies in Natural Resource Management

(Cross-listed with NREM). (3-0) Cr. 3. F.S.

Prereq: NREM 120, and A ECL 312 or NREM 301, and Junior classification

Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed.

ENV S 461: Introduction to GIS

(Cross-listed with ENSCI, IA LL, L A). Cr. 4. SS.

Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management.

ENV S 484: Sustainable Communities

(Cross-listed with C R P). (3-0) Cr. 3. S.

Prereq: Junior classification

The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

ENV S 490: Independent Study

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of instructor and approval of Environmental Studies coordinator

ENV S 490H: Independent Study: Honors

Cr. arr. Repeatable. F.S.SS.

Prereq: Permission of instructor and approval of Environmental Studies coordinator.

ENV S 491: Environmental Law and Planning

(Cross-listed with C R P, L A). (3-0) Cr. 3. S.

Prereq: 6 credits in natural sciences

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

ENV S 496: Travel Course

Cr. arr. Repeatable.

Prereq: Permission of instructor

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENV S 496A: International Tour

Cr. arr. Repeatable.

Prereq: Permission of instructor

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

ENV S 496B: Domestic Tour

Cr. arr. Repeatable.

Prereq: Permission of instructor

Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

Event Management (EVENT)

Any experimental courses offered by EVENT can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**EVENT 171: Introduction to Event Management**

(3-0) Cr. 3. F.S.

Overview of the event management industries. Techniques and procedures required for producing successful and sustainable events.

EVENT 203: Event Management Sophomore Mentorship

(1-2) Cr. 2. S.

Prereq: Sophomore classification; AESHM 113 or 213; EVENT 271; by application only

Event Management sophomore students will be paired with a professional mentor in the event industry. Students will meet in the class and individually with their professional mentor throughout the spring semester. Students will be assessed on their experience through reflection, presentation, and mentor evaluation.

EVENT 212: Digital Production in Event Management

(2-2) Cr. 3. F.

Prereq: Event Management major

Applications of skills in Adobe Suite and other software technologies. Introduction to design elements used within the event management industry with a focus on digital publishing of marketing and promotional materials, wayfinding, and other stationery items. Face-to-face lecture and laboratory work.

EVENT 277: Introduction to Digital Promotion in Event Management

Cr. 3. F.S.

Prereq: EVENT 271

Event management digital channels and platforms, including display advertising, search advertising, social media, and mobile. Students will be introduced to the most popular event management platforms as well as digital event management topics of visual marketing, digital media planning, and content marketing.

EVENT 289: Contemporary Club Management

(Cross-listed with HSP M). (3-0) Cr. 3. F.S.

Prereq: HSP M 101

Organization and management of private clubs including city, country, and other recreational and social clubs. Field trip may be required.

EVENT 290: Independent Study

Cr. 1-2. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Freshman or Sophomore Classification. Permission of instructor, adviser, and department chair.

Independent study on topics of special interest to the student, facilitated by approved faculty member. No more than 9 credits of EVENT 290 and EVENT 490 may be applied towards graduation requirements.

EVENT 320: Attractions and Amusement Park Administration

(Cross-listed with HSP M). (3-0) Cr. 3. S.

Prereq: HSP M 101 or permission of instructor

Examination of current issues in the attractions and amusement park industry. Emphasis will be placed on development and design along with the functional departments of modern amusement parks and themed attractions.

EVENT 328: Incentive Meeting Management

Cr. 3. F.

Prereq: EVENT 271, Event Management major

Overview of the incentive meeting industry. Focus on incentive meeting planning, destination selection, program development, risk management, cultural aspects of international/national site selection and incentive meeting execution, and incentive meeting evaluation.

EVENT 333: Entertainment Venue Management

(3-0) Cr. 3. F.S.

Prereq: EVENT 271 or equivalent

Organization and management of various types of entertainment venues including clubs, theaters, auditoriums, and arenas.

EVENT 367: Event Sales

(3-0) Cr. 3.

Prereq: EVENT 271; AESHM 340

Overview of sales marketing management in the event industry and the role of the professional event sales manager in the marketing process. As an event professional, learn best sales practices to develop your personal selling style, to build on your strengths, and to create a referral business that delivers results. Principles covered include the characteristics and skills necessary for success in sales; strategic planning; sales leadership; analyzing customers and markets; designing and developing the sales force; the importance of relationship building; process management; and measurement, analysis, and knowledge management.

EVENT 371: Conference and Meeting Planning

(3-0) Cr. 3. F.S.

Prereq: EVENT 271 and junior standing

Application of event management principles to conference and meeting planning. Providing a comprehensive introduction to the key planning elements of the global conference, convention and meetings.

EVENT 373: Wedding Planning and Management

(3-0) Cr. 3. F.S.

Prereq: EVENT 271 and Event Management major

Overview of wedding event industry. Focus on wedding planning processes and implementation, design, and business planning and development.

EVENT 378: Sustainable Event Management

Cr. 3. S.

Prereq: EVENT 271, EVENT majors.

Introduction to international sustainable event standards, and how to measure the environmental impact of an event. Topics include ethics, corporate social responsibility (CSR), and sustainability related practices.

EVENT 379: Nonprofit Fundraising Event Planning

Cr. 3. F.

Prereq: EVENT 271, Instructor's permission.

The role of Nonprofit Organizations (NPOs) in the United States, and how NPOs secure essential income and help educate donors, guests, and volunteers of the organizational mission. Fundamentals of an event-based fundraising (e.g., a gala dinner) or community-based fundraising (e.g., runs, walks, and rides). Budgeting, marketing outreach, logistics management. Use of strategic tools, such as website and social media, to help increase financial success of a fundraising event.

EVENT 393: Event Management Workshop

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: EVENT Junior or Senior Classification and Permission of Instructor

Intensive 2 to 8 week workshop exploration. Topics vary each time offered. Maximum of 6 Event 393 credits can be applied to graduation.

EVENT 423: International Meetings and Conferences Management

Cr. 3. S.

Prereq: EVENT 271, EVENT 371

A comprehensive understanding of the strategies, procedures and nuances of planning and executing multinational and multicultural meetings, expositions, conventions or events held outside of the United States. The international aspects that will be covered include planning, budgeting, logistics, venue selection, risk management, and cross-cultural understanding.

EVENT 431: Case Studies in Event Management

(Dual-listed with EVENT 531). Cr. 3. S.

Prereq: Graduate-level standing and permission by instructor.

Operational and strategic challenges in the event management industry through directed case studies, roundtable discussions, and industry-related readings. Students will critically evaluate case studies related to event management in areas of event strategy, financial management, event operations, stakeholder development, event design, marketing, and other event topics.

EVENT 471: Special Events Coordination

(3-0) Cr. 3. F.S.

Prereq: EVENT 371 and junior standing; permission of instructor.

Advanced application of event management. Provide leadership and communicate direction for production of an event including developing event strategy, financial management, wayfinding, volunteer management, and event marketing. Discussion of fairs, festivals, Olympics, World's Fairs, unplanned events, lifecycle events.

EVENT 485: Event Production

(3-0) Cr. 3. F.S.

Prereq: Event 371

Event management production and design elements, including experience design, technical equipment, staging, lighting, and set design. Students will develop a design concept and event proposal to be implemented as part of EVENT 486X.

EVENT 490: Independent Study

Cr. arr. Repeatable.

*Prereq: Sections B-D: Program approval; Section H: Full membership in**Honors Program*

Independent study.

EVENT 490B: Independent Study: Conferences

Cr. arr. Repeatable.

Prereq: Program approval

Independent study.

EVENT 490C: Independent Study: Special Events

Cr. arr. Repeatable.

Prereq: Program approval.

Independent study.

EVENT 490D: Independent Study: Event Management

Cr. arr. Repeatable.

*Prereq: Sections B-D: Program approval; Section H: Full membership in**Honors Program*

Independent study.

Courses primarily for graduate students, open to qualified undergraduates:**EVENT 531: Case Studies in Event Management**

(Dual-listed with EVENT 431). Cr. 3. S.

Prereq: Graduate-level standing and permission by instructor.

Operational and strategic challenges in the event management industry through directed case studies, roundtable discussions, and industry-related readings. Students will critically evaluate case studies related to event management in areas of event strategy, financial management, event operations, stakeholder development, event design, marketing, and other event topics.

EVENT 599: Creative Component

(3-0) Cr. 3.

Prereq: Graduate level standing

Creative component as arranged with instructor.

Courses for graduate students:**EVENT 634: Theory and Research Seminar in Event Management**

Cr. 3. SS.

Prereq: STAT 401 or a graduate level course in statistics or by permission of instructor

Analysis and application of theories and research methodologies in event management and is designed to strengthen students' analytical and critical perspectives to evaluate event management research. Multidisciplinary approach to the areas of sports events, festivals and fairs, conventions and tradeshow, mega events, and event tourism.

Family Financial Planning (FFP)

Any experimental courses offered by FFP can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for graduate students, open to qualified undergraduates:**FFP 520: Financial Theory and Research I**

(3-0) Cr. 3. F.S.SS.

Theories of family functioning, macroeconomic theory related to family resource allocation decisions, the family as an economic unit, and the interaction of the economy and families. (on-line course offering via Distance Education).

FFP 525: Financial Theory and Research II

(3-0) Cr. 3. F.S.SS.

Microeconomic theory as it relates to family resource allocation decisions, theories of household behavior, the lifecycle hypothesis, behavioral economics, behavioral finance, theories of behavioral change, and psychological theories of family well-being. Focus on empirical research investigating household financial decision-making. (on-line course offering via Distance Education).

FFP 530: Fundamentals of Family Financial Planning

(3-0) Cr. 3. F.S.SS.

The nature and functioning of financial systems, including currencies, markets, monetary and fiscal policy, and supply/demand for land, labor, and capital. Focus is on the impact of global financial interdependence on individuals and families in the U.S. Current and emerging issues, as well as current research and theory relative to financial systems. (on-line course offering via Distance Education).

FFP 535: Financial Counseling

(3-0) Cr. 3. F.S.SS.

Theory and research regarding the interactive process between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, compensation, uses of technology to identify resources, information management, and current or emerging issues. (on-line course offering via Distance Education).

FFP 540: Estate Planning for Families

(3-0) Cr. 3. F.S.SS.

Fundamentals of the estate planning process, including estate settlement, estate and gift taxes, property ownership and transfer, and powers of appointment. Tools and techniques used in implementing an effective estate plan, ethical considerations used in providing estate planning services, and new and emerging issues in the field. Case studies provide experience in developing estate plans suitable for varied family forms. (on-line course offering via Distance Education).

FFP 541: Housing and Real Estate in Family Financial Planning

(Cross-listed with HD FS). (3-0) Cr. 3. Alt. SS., offered even-numbered years.

The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate. (on-line course offering via Distance Education).

FFP 545: Retirement Planning, Employee Benefits, and the Family

(3-0) Cr. 3. F.S.SS.

Study of micro and macro considerations for retirement planning. Survey of various types of retirement plans, ethical considerations in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits. (on-line course offering via Distance Education).

FFP 550: Military Personal Financial Readiness

(3-0) Cr. 3. F.S.SS.

Overview of the topics relevant to the financial planning process that address the unique needs of military service members and their families. (on-line course offering via Distance Education).

FFP 555: Insurance Planning for Families

(3-0) Cr. 3. F.S.SS.

In-depth study of risk management concepts, tools, and strategies for individuals and families, including life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-subsidized programs. Current and emerging issues and ethical considerations relative to risk management. Case studies provide experience in selecting insurance products suitable for individuals and family, study of investment options for clients including common stocks, fixed income securities, convertible securities, and related choices. Relationships between investment options and employee/employer benefit plan choices. Current and emerging issues and ethics are included. (on-line course offering via Distance Education).

FFP 565: Personal Income Taxation

(3-0) Cr. 3. F.S.SS.

In-depth information on income tax practices and procedures including tax regulations, tax return preparation, the tax audit processes, the appeals process, preparation for an administrative or judicial forum, and ethical considerations of taxation. New and emerging issues related to taxation. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies. (on-line course offering via Distance Education).

FFP 570: Professional Practices in Financial Planning

(3-0) Cr. 3. F.S.SS.

Challenges of managing financial planning practices including, but not limited to: business valuation, personnel, marketing, client services, ethics and technological applications. Relying both on a theoretical as well as an applied approach, students analyze case studies that provide relevant, practical exposure to practice management issues, with a strong emphasis on current research findings. (on-line course offering via Distance Education).

FFP 583: Investing for the Family's Future

(Cross-listed with HD FS). (3-0) Cr. 3. F.

Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family's overall financial and economic goals to help inform investment choices. (on-line course offering via Distance Education).

FFP 591: Practicum

Cr. 3-6. F.S.SS.

Supervised experience in family financial planning.

FFP 595: Financial Planning - Case Studies

(3-0) Cr. 3. F.S.SS.

Prereq: FFP 530, FFP 540, FFP 545, FFP 555, FFP 565, FFP 583

Professional issues in financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Students are expected to utilize skills obtained in other courses and work experiences in the completion of personal finance case studies, the development of a targeted investment policy, and other related financial planning assignments. (on-line course offering via Distance Education).

Family and Consumer Sciences Education and Studies (FCEDS)

Any experimental courses offered by FCEDS can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**FCEDS 206: Professional Roles in Family and Consumer Sciences**

(1-1) Cr. 2. F.

Prereq: HD FS 103 or concurrent enrollment in HD FS 103

Introduction to various roles in professional settings (community agencies, secondary schools, business and industry, and Cooperative Extension). Focus on factors that have influenced the development and mission of Family and Consumer Sciences programs nationwide. Includes 12 hours of observational practicum experience outside of the regular class schedule.

FCEDS 301: Short Course: Current Family and Consumer Sciences Offerings

Cr. 3. F.S.SS.

Prereq: 6 credits in family and consumer sciences or education

Short course in current family and consumer sciences offerings.

FCEDS 301F: Short Course: Housing

(3-0) Cr. 3. Alt. SS., offered odd-numbered years.

Prereq: 6 credits in family and consumer sciences or education

Short course in housing.

FCEDS 301K: Short Course: Textile Selection and Apparel Construction Methods

(3-0) Cr. 3. Alt. SS., offered even-numbered years.

Prereq: 6 credits in family and consumer sciences or education

Short course in textile selection and apparel construction.

FCEDS 306: Educational Principles for Family and Consumer Sciences
(3-2) Cr. 4. F.

Prereq: FCEDS 206

Principles of teaching and learning applied to family and consumer sciences content incorporating literacy and STEM strategies for diverse audiences. Focus on providing a broad overview of effective instructional methods and substantial technological tools to meet varied learning needs. Includes 12 hours of arranged practicum and team teaching.

FCEDS 380V: Pre-Student Teaching Experience in FCS Education: Practicum in FCS Labs

(Cross-listed with EDUC). (0-2) Cr. 1-2. Repeatable. F.S.

Prereq: FCEDS 306 and admission to teacher education

Laboratory experience in foods, hospitality management, culinary, prostart, textiles, fashion design, housing, and human development related to family and consumer sciences courses taught at the secondary level. Planning, implementing, managing, and assessing laboratory lessons in family and consumer sciences. Includes 24 hours practicum: unsupervised. 1/2 day of time needed in schedule. Offered on a satisfactory-fail basis only.

FCEDS 413: Planning and Assessment for Family and Consumer Sciences

(3-0) Cr. 3. S.

Prereq: FCEDS 306 and admission to Teacher Education

Development of curriculum and assessment tools for family and consumer sciences programs in school settings. Focus on accommodating exceptional learners and alignment of teaching standards for classroom assessment. Includes 12 hours of Career and Technical Student Organization Competitive Event Assessment at the state/national level.

FCEDS 417: Supervised Teaching in Family and Consumer Sciences

Cr. 3-8. Repeatable. F.S.

Prereq: FCEDS 413; 24 credits in family and consumer sciences subject matter; cumulative grade point of 2.50; admission to teacher education, reservation required.

Supervised teaching experience in secondary schools.

FCEDS 417A: Supervised Teaching in Family and Consumer Sciences: Vocational family and consumer sciences.

Cr. 3-8. Repeatable. F.S.

Prereq: FCEDS 413, 24 credits in family and consumer sciences subject matter, cumulative grade point of 2.50, admission to teacher education, reservation required.

Supervised teaching experience in secondary schools.

FCEDS 417B: Supervised Teaching in Family and Consumer Sciences: Family and consumer sciences.

Cr. 3-8. Repeatable. F.S.

Prereq: FCEDS 413, 24 credits in family and consumer sciences subject matter, cumulative grade point of 2.50, admission to teacher education, reservation required.

Supervised teaching experience in secondary schools.

FCEDS 418: Foundations of Career and Technical Education in Family and Consumer Sciences

(3-0) Cr. 3. S.

Prereq: Admission to teacher education, FCEDS 413 or concurrent enrollment in FCEDS 413.

Investigation into the philosophy of Career and Technical Education (CTE). Historical development of family and consumer sciences. Planning and implementing programs in family and consumer sciences including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. Includes educational opportunities off campus for professional development and career advancement. May be used toward Multioccupations Endorsement.

FCEDS 480V: Pre-Student Teaching Experience in FCS Education: Practicum in Diverse Settings

(Cross-listed with EDUC). (0-4) Cr. 2. Repeatable. F.S.

Prereq: FCEDS 306 and admission to teacher education.

Laboratory experience in foods, textiles, and human development related to family and consumer sciences exploratory programs. Planning, implementing, managing and assessing laboratory lessons in family and consumer sciences. Includes 48 hours practicum and supervised individual teaching. 1/2 day of time needed in schedule. Offered on a satisfactory-fail basis only.

FCEDS 490: Independent Study

Cr. arr. F.S.SS.

FCEDS 490G: Independent Study: General

Cr. arr. F.S.SS.

FCEDS 490H: Independent Study: Honors

Cr. arr. F.S.SS.

FCEDS 491: Supervised Experiences in a Professional Setting

Cr. 3-8. Repeatable. F.S.SS.

Prereq: HD FS 418B; 24 credits in family and consumer sciences; reservation required

Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only.

FCEDS 491A: Supervised Experiences in a Professional Setting: Communications

Cr. 3-8. Repeatable, maximum of 8 credits. F.S.SS.

Prereq: HD FS 418B; 24 credits in family and consumer sciences; reservation required

Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only.

FCEDS 491B: Supervised Experiences in a Professional Setting: Professional Studies

Cr. 3-8. Repeatable, maximum of 8 credits. F.S.SS.

Prereq: HD FS 418B; 24 credits in family and consumer sciences; reservation required

Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Offered on a satisfactory-fail basis only.

Finance (FIN)

Any experimental courses offered by FIN can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

FIN 301: Principles of Finance

(3-0) Cr. 3. F.S.SS.

Prereq: ACCT 284, ECON 101, STAT 226

Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.

FIN 310: Corporate Finance

(3-0) Cr. 3. F.S.SS.

Prereq: FIN 301

Theory used in a firm's investment and financing decisions. Analysis of environment in which financial decisions are made; applications of analytical techniques to financial management problems.

FIN 320: Investments

(3-0) Cr. 3. F.S.SS.

Prereq: FIN 301

Introduction to securities and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, measurement of return and risk, behavior of security prices, valuation of stocks and bonds, mutual funds, portfolio selection techniques, and performance evaluation.

FIN 327: Fixed Income Securities

(3-0) Cr. 3.

Prereq: FIN 301

Valuation of fixed income securities, including pricing conventions, term structure of interest rates, default, duration, and hedging of interest rate risk with derivatives. Analysis of bond market sectors, including treasury, agency, corporate, sovereign, municipal, and residential mortgage bonds.

FIN 330: Financial Markets and Institutions

(3-0) Cr. 3. F.S.

Prereq: FIN 301

Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing an integrated understanding of markets and financial service providers including global linkages.

FIN 361: Personal Risk Management and Insurance

(3-0) Cr. 3. F.S.

Prereq: ECON 101

Risk concepts and the use of insurance by individuals and families. Emphasis on the insurance mechanism and methods of dealing with income, property, and liability risks.

FIN 371: Real Estate Principles

(3-0) Cr. 3. SS.

Prereq: ECON 101

Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments.

FIN 415: Business Financing Decisions

(3-0) Cr. 3.

Prereq: FIN 301

In depth study of the firm's external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project.

FIN 424: Financial Futures and Options

(3-0) Cr. 3.

Prereq: FIN 320 and STAT 326

Advanced study of pricing and using derivatives - instruments deriving value from fundamental items such as commodities, currency exchange rates, market indices, equities and bonds. Addresses basic building blocks of derivatives (i.e., forwards, futures, options and swaps) and relevant current topics and issues.

FIN 425: Security Analysis and Portfolio Management

(3-0) Cr. 3. F.S.

Prereq: FIN 320, STAT 326 and permission of instructor

Advanced study of security analysis, security selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio's performance relative to standard benchmarks is also required.

FIN 428: Advanced Fixed Income Analysis and Portfolio Management

(Dual-listed with FIN 528). (3-0) Cr. 3.

Prereq: FIN 327, FIN 320, STAT 326

Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 435: Venture Capital, Private Equity, and Mergers and Acquisitions

(3-0) Cr. 3. S.

Prereq: FIN 310, FIN 320, STAT 326

An advanced investments class that focuses on alternative investments. Topics include techniques for valuing public and private firms, venture capital finance, investment banking, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.

FIN 445: Bank Management Decisions

(3-0) Cr. 3. F.S.

Prereq: STAT 326; and FIN 330 or ECON 353

Analysis of operations of depository financial institutions from management viewpoint. Emphasis on evaluating performance, policy formation, asset and liability management, the role of capital, and the operating environment.

FIN 450: Analytical Methods in Finance

Cr. 3. F.S.

Prereq: STAT 326, and ECON 301 or FIN 301

Applied empirical methods commonly employed in the analysis of firm and market data. Specific applications to financial and agricultural markets. Experiential learning experience using lectures with frequent in-class computer work sessions. Experience with financial and agricultural data sources. Application and interpretation of empirical techniques.

FIN 462: Corporate Risk Management and Insurance

(3-0) Cr. 3. F.

Prereq: FIN 301 and STAT 326

Analysis of an organization's approaches to the management of price, credit, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements.

FIN 464: Risk Management Derivatives

(3-0) Cr. 3.

Prereq: FIN 424

Advanced models for options and bond pricing. Geometric Brownian motion, risk-neutral pricing, no-arbitrage pricing models, exotic options, pricing options through simulation, and applications of derivatives to hedging market and credit risk exposure. Risk management tools and how they are applied within financial institutions such as banks, insurance companies, mutual funds, and hedge funds, as well as the corporate enterprise. Topics include the Basel accords, volatility modelling, value-at-risk analysis, extreme value theory, credit default swaps, and portfolio simulation.

FIN 472: Real Estate Finance

(3-0) Cr. 3.

Prereq: FIN 301 and STAT 326

Introduction to the techniques of assessing the value of real estate and real estate financing instruments.

FIN 474: Real Estate Investment

(3-0) Cr. 3. F.S.

Prereq: FIN 301, FIN 371

Introduction to theories and methods of investment analysis applied to real estate. Studies cash flow analysis, alternative measures of investment performance, the impact of the financing decision on real estate investment risks and return, and various real estate financing techniques. Covers cases involving more complex financing and capital markets tools used in real estate.

FIN 480: International Finance

(3-0) Cr. 3. F.S.

Prereq: FIN 310, FIN 320 or FIN 330

Advanced study of currency market equilibrium, use and analysis of currency derivatives, hedging currency risk, and additional topics, which could include multinational capital budgeting, taxation, raising capital internationally, international portfolio diversification, international capital market equilibrium, political and country risk, financing international trade, multinational corporate treasury management, and current issues.

FIN 490: Independent Study

Cr. 1-3. Repeatable.

Prereq: FIN 301, STAT 326 and permission of instructor

FIN 499: Finance Internship

(3-0) Cr. 1-3. F.S.SS.

Prereq: GPA 2.5; permission of internship coordinator; STAT 326; FIN 499A: FIN 330; FIN 499B: FIN 361; FIN 499C: FIN 301 plus 3 additional credits in finance; FIN 499D: FIN 320; FIN 499E: FIN 310

Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499A: Banking

(3-0) Cr. 1-3. F.S.SS.

Prereq: GPA 2.5; permission of internship coordinator; STAT 326.

Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499B: Insurance

(3-0) Cr. 1-3. F.S.SS.

Prereq: GPA 2.5; permission of internship coordinator; FIN 361 and STAT 326

Supervised experience in a private sector insurance organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499C: Real Estate

(3-0) Cr. 1-3. F.S.SS.

Prereq: GPA 2.5; permission of internship coordinator; FIN 301 plus 3 additional credits in finance and STAT 326;

Supervised experience in a private sector real estate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499D: Investments

(3-0) Cr. 1-3. F.S.SS.

Prereq: GPA 2.5; permission of internship coordinator; FIN 320 and STAT 326

Supervised experience in a private sector investment organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499E: Corporate

(3-0) Cr. 1-3. F.S.SS.

Prereq: GPA 2.5; permission of internship coordinator; FIN 310 and STAT 326

Supervised experience in a private sector corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

FIN 501: Financial Valuation and Corporate Financial Decisions

(3-0) Cr. 3.

Prereq: Enrollment in MBA program or departmental permission.

Shareholder wealth maximization as the goal of the firm within a social responsibility context, financial Math, valuation of securities, the global financial market place as the test of value, estimation of cost of capital, global capital investment decisions, capital structure policy, working capital management.

FIN 510: Advanced Corporate Finance

(3-0) Cr. 3.

Prereq: FIN 501

Examines corporate financial decisions, including theory and associated empirical evidence. Topics include agency conflicts, corporate governance, executive compensation, becoming publicly traded, raising capital through public and private offerings, capital structure, financial distress and bankruptcy, leasing, dividend policy, corporate control, restructuring, and risk management.

FIN 515: Case Studies in Financial Decision Making

(3-0) Cr. 3.

Prereq: FIN 501

This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

FIN 520: Investments

(3-0) Cr. 3.

Prereq: FIN 501

Analysis of risk and return for individual securities and portfolios of securities. Topics include the market environment, mechanics of trading, measurement of return and risk, valuation of stocks and bonds, mutual funds, optimal asset allocation, market efficiency, portfolio performance evaluation, and risk management.

FIN 528: Advanced Fixed Income Analysis and Portfolio Management

(Dual-listed with FIN 428). (3-0) Cr. 3.

Prereq: FIN 327, FIN 320, STAT 326

Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 530: Financial Analysis and Valuation

(3-0) Cr. 3.

Prereq: FIN 501

Valuation of public and private firms through analysis of financial statements and other information. Study of drivers of value creation, industry analysis, patterns of growth, models for forecasting and analyzing firm cash flows, estimating and adjusting cost of capital, alternative methods of cash flow valuation, the calculation and use of valuation multiples, and valuing mergers and acquisitions.

FIN 534: Financial Derivatives

(3-0) Cr. 3. F.

Prereq: Graduate classification

An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered.

FIN 535: Venture Capital, Private Equity, and Mergers and Acquisitions

(3-0) Cr. 3.

Prereq: FIN 501

Advanced investments class focusing on alternative investments. Topics include the nature and scope of investment banking, techniques for valuing public and private firms, venture capital finance, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.

FIN 550: Financial Econometrics

(3-0) Cr. 3.

Prereq: FIN 501, ECON 571

Analysis, modeling, and forecasting of time series data, volatility modeling and forecasting, maximum likelihood estimation, robust standard error computation, specification testing, estimation under alternative distributional assumptions, and Monte Carlo simulation. Applications include tests of asset pricing models, analysis of asset volatility, corporate event studies, and value at risk analysis.

FIN 564: Advanced Derivatives and Risk Management

(3-0) Cr. 3.

Prereq: FIN 501, FIN 534

Risk management tools and how they are applied within financial institutions and the corporate enterprise. Focus on measuring exposure to stock market risk, interest rate risk, currency risk, and credit risk and how these exposures may be managed. Topics include bank risk management regulations, volatility modeling, value at risk analysis, extreme value theory, credit default swaps, and portfolio simulation.

FIN 572: Real Estate Finance

(3-0) Cr. 3.

Prereq: FIN 501 or enrollment in MRED

Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

FIN 574: Real Estate Investment

(3-0) Cr. 3.

Prereq: FIN 501; enrollment in the MRED or instructor permission.

Introduction to theories and methods of investment analysis applied to real estate. Designed as second course in the sequence of real estate finance and investments. Basics of income-producing properties, the valuations of those properties using pro-forma, risk management and various other issues about the finance and investment of income-producing properties. Study of analysis of sustainable real estate development from capital budgeting perspective. Discussion of the financing practices in real estate and land development.

FIN 575: Real Estate Securitization and Portfolio Management

(3-0) Cr. 3.

Prereq: Enrollment in the MRED or instructor permission.

Mechanics, incentives and importance of securitization in firms' efforts to raise capital with application to residential and commercial real estate. Design and implementation of portfolio management strategies of private-market real estate investments. Additional topics include devising alpha strategies, approaches to diversification, creating investment plans to achieve different risk profiles and performance measurement and analysis.

FIN 576: Real Estate Market Analysis

(3-0) Cr. 3.

Prereq: Enrollment in the MRED or instructor permission.

Introduction to the structure of real estate markets. Topics include determinants of supply and demand in space and capital markets, house price dynamics and causes and consequences of market cycles. Discussion of likely behavior of U.S. real estate markets and comparisons with markets in other countries.

FIN 578: MRED Capstone Project

(Cross-listed with C R P). (3-0) Cr. 3.

Prereq: Enrollment in MRED.

Refinement of students' problem-solving, communication and negotiation skills. Students work on an actual case. Teams will apply knowledge acquired in the classroom to some aspect of a current development on-the-ground and in-process project.

FIN 590: Special Topics

Cr. 1-3. Repeatable. F.S.SS.

Prereq: Permission of instructor

For students wishing to do individual research in a particular area of finance.

Food Science and Human Nutrition (FS HN)

Any experimental courses offered by FS HN can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

FS HN 101: Food and the Consumer

(3-0) Cr. 3. F.S.SS.

Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 102: Nutrition for Sport Performance

(1-0) Cr. 1. F.S.

A scientific evaluation of dietary needs, dietary supplementation, and pop-culture claims relative to physical/sport performance. Discussion of safe and effective practices to enhance physical/sport performance.

FS HN 104: Introduction to Professional Skills in Culinary Science

(0-6) Cr. 1. S.

Prereq: Culinary Food Science major or minor.

Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

FS HN 110: Professional and Educational Preparation

(1-0) Cr. 1. F.S.

Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation as well as enhancement of communication skills. Offered on a satisfactory-fail basis only.

FS HN 111: Fundamentals of Food Preparation

(2-0) Cr. 2. F.S.

Prereq: FS HN 101 or FS HN 167; high school chemistry or CHEM 160; concurrent enrollment in FSHN 115.

Principles involved in preparation of food products of standard quality. Influence of composition and techniques on properties of food products.

FS HN 115: Food Preparation Laboratory

(0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in FS HN 111 or FS HN 214

Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety.

FS HN 120: The Biochemistry of Beer

(Cross-listed with BBMB). (2-0) Cr. 2. F.

An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. Natural science majors are limited to elective credit only.

FS HN 120L: Biochemistry of Beer Laboratory

(Cross-listed with BBMB). Cr. 1.

Prereq: Credit or enrollment for credit in BBMB 120

An introduction to biochemical methods related to the production of beer. Laboratory exercises related to water chemistry, mash enzymology, hop compound extraction and analysis, and yeast biology will be performed. Closely follows the material being taught in BBMB 120. Natural science majors are limited to elective credit only.

FS HN 167: Introduction to Human Nutrition

(3-0) Cr. 3. F.S.SS.

Prereq: High school biology or 3 credits of biology

Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

FS HN 203: Contemporary Issues in Food Science and Human Nutrition

(1-0) Cr. 1. F.S.

Introduction to presentation of published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, and communication.

FS HN 207: Processing of Foods: Basic Principles and Applications

(2-3) Cr. 3. S.

Prereq: FS HN 101

Lecture and lab-based instruction on principles of food processing and packaging. Food product-based discussion and activities will highlight raw food materials; unit operations; food quality and safety; processing plant sanitation; food forming and extrusion; fermentation; properties and selection of packaging materials.

FS HN 214: Scientific Study of Food

(3-0) Cr. 3. F.S.

Prereq: FS HN 167 or FS HN 265; CHEM 231 or CHEM 331; plus concurrent enrollment in FS HN 115 or 215

Composition and structure of foods. Principles of preparation of standard quality food products. Behavior and interactions of food constituents.

FS HN 215: Advanced Food Preparation Laboratory

(0-6) Cr. 2. F.S.

Prereq: Credit or enrollment in FS HN 214

Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation.

FS HN 241: Introduction to Manufacturing Processes for Plastics

(Cross-listed with TSM). (1-2) Cr. 2. F.S.

Prereq: MATH 145

A study of selected materials and related processes used in plastics manufacturing. Lecture and laboratory activities focus on materials, properties, and processes.

FS HN 242: The US Food System

(3-0) Cr. 3. S.

Exploration of the components of our food system including food production, food processing, and food access and the social, political and ethical influences on these components. Controversial topics related to how food is produced, processed, marketed and consumed will be discussed.

Meets U.S. Diversity Requirement

FS HN 264: Fundamentals of Nutritional Biochemistry and Metabolism

(3-0) Cr. 3. F.

Prereq: FS HN 167; CHEM 163, CHEM 163L; BIOL 211

Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies.

FS HN 265: Nutrition for Active and Healthy Lifestyles

(3-0) Cr. 3. S.SS.

Prereq: FS HN 167, plus credit or enrollment in BBMB 301 or credit in FS HN 264

Fundamentals of nutrient metabolism and nutrient requirements. Role of macronutrient metabolism in physical performance and disease prevention. Effect of manipulation of macronutrient metabolism on physical performance and disease prevention. Applications of nutrient metabolism principles to dietary recommendations and planning.

FS HN 276: Understanding Grape and Wine Science

(Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: High school biology and chemistry.

A scientific introduction to viticulture (grape-growing) and enology (wine-making). Topics include grape species and varieties, viticulture practices, fruit quality, geography, history, principles of fermentation and aging, wine classification, appreciation, evaluation, storage and service, regulations, wine as food. No wine tasting.

FS HN 305: Food Quality Management and Control

(2-0) Cr. 2. S.

Prereq: 3 credits in statistics

Fundamentals of statistical decision-making processes and quality control procedures used in food quality assurance programs.

FS HN 311: Food Chemistry

(3-0) Cr. 3. F.

Prereq: ENGL 250; CHEM 231 or CHEM 331; credit or enrollment in BBMB 301

The structure, properties, and chemistry of food constituents and animal and plant commodities.

FS HN 311L: Food Chemistry Laboratory

(0-3) Cr. 1. F.

Prereq: Credit or concurrent enrollment in FSHN 311.

The laboratory practices of structure, properties, and chemistry of food constituents.

FS HN 314: Professional Development for Culinary Food Science and Food Science Majors

(1-0) Cr. 1. F.S.

Prereq: Major or minor in Culinary Food Science or Food Science; Junior classification preferred.

Introduction to the roles culinary scientists and food scientists hold within industry. Discussions focused on professional and educational development and emerging issues and trends in the food industry.

FS HN 315: Professional Skills for Culinary Food Science and Food Science Majors

(1-0) Cr. 1. F.

Prereq: Major or minor in Culinary Food Science or Food Science; Junior classification recommended.

Focus on the importance of professional skills and application of those skills to potential job situations. Professional skills include communication, team building, leadership vs. management styles, business ethics, and continual learning.

FS HN 340: Foundations of Dietetic Practice

(1-0) Cr. 1. F.

Prereq: DIET or PDEX classification

Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on exploring career options in dietetics and preparation for a dietetic internship. Leadership and professional career development for the dietitian is addressed through self reflection and creation of materials for post-baccalaureate programs. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only.

FS HN 342: World Food Issues: Past and Present

(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.SS.

Prereq: Junior classification

Issues associated with global agricultural and food systems including ethical, social, economic, environmental, and policy contexts.

Investigation of various causes and consequences of overnutrition/ undernutrition, poverty, hunger, access, and distribution.

Meets International Perspectives Requirement.

FS HN 351: Introduction to Food Engineering Concepts

(3-0) Cr. 3. S.

Prereq: MATH 160 or equivalent, PHYS 111 or equivalent, FS HN 207 or permission of the instructor.

Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer.

FS HN 360: Advanced Nutrition and the Regulation of Metabolism

(3-0) Cr. 3. F.

Prereq: ENGL 250, FS HN 265, 3 credits in biochemistry; 3 credits in physiology recommended

Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and the regulation of metabolism; nutrient-gene interactions.

FS HN 361: Nutrition and Health Assessment

(1-3) Cr. 2. S.

Prereq: FS HN 265; 3 credits in statistics; 3 credits in physiology recommended

The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status.

FS HN 362: Nutrition in Growth and Development

(3-0) Cr. 3. S.

Prereq: FS HN 360; credit or enrollment in a course in physiology

Molecular, biochemical and physiological basis to understand the nutritional aspects of human development and aging. Nutrient needs and various disease states at each stage of human life cycle.

FS HN 364: Nutrition and Prevention of Chronic Disease

(3-0) Cr. 3. F.

Prereq: FS HN 264 or FS HN 265 or accepted into Nursing major

Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed.

FS HN 365: Obesity and Weight Management

(3-0) Cr. 3. S.

Prereq: BIOL 256 and BIOL 256L, or BIOL 306, or accepted into Nursing major

Multifactorial aspects of obesity, maintenance of healthy weight, and the relationship of weight status and chronic disease prevention. Traditional and novel nutrition and exercise theories as well as current popular diet and exercise trends will be discussed.

FS HN 366: Communicating Nutrition Messages

(3-0) Cr. 3. S.

Prereq: FS HN 264 or FS HN 265

Theory and application of adult learning and behavior change as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to various models. Factors to consider in developing the nutrition education/ intervention practicum experience. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach (print, radio, TV, newspaper, consumer publications, websites, community venues). Development of nutrition messages using various forms of media for a target population.

FS HN 367: Medical Terminology for Health Professionals

(1-0) Cr. 1. F.S.SS.

An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations. (offered online only).

FS HN 403: Food Laws and Regulations

(2-0) Cr. 2. S.SS.

Prereq: 3 credits in food science coursework at 200 level or above

History of food law in the US and the world. Relationship between policy, legislation and regulation. Introduction to primary US regulatory agencies and enforcement principles. Discussion of key laws related to food safety and nutrition. Overview of federal and independent research tools and sources of food law.

FS HN 406: Sensory Evaluation of Food

(Dual-listed with FS HN 506). (2-3) Cr. 3. F.

Prereq: FS HN 305 and credit or enrollment in FS HN 411; 3 credits in statistics

Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data.

FS HN 407: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FS HN 507). (Cross-listed with MICRO). (3-0) Cr. 3. S.

Prereq: MICRO 420

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

FS HN 408: Dairy Products Evaluation

(0-3) Cr. 1. S.

Prereq: Permission of instructor

Gain experience in identifying quality defects in dairy products including milk, cottage cheese, cheddar cheese, strawberry yogurt, butter, and vanilla ice cream. Intensive training for the National Collegiate Dairy Products Evaluation competition and for dairy product evaluation in the food industry.

FS HN 410: Food Analysis

(2-3) Cr. 3. F.

Prereq: FS HN 214 or FS HN 311 or CHEM 211

An introduction to the theory and application of chemical and instrumental methods for determining the constituents of food. Use of standard procedures for food analysis and food composition data bases.

FS HN 411: Food Ingredient Interactions and Formulations

(1-3) Cr. 2. F.S.

Prereq: FSHN 214 or FS HN 311 and FS HN 115, FS HN 215 or FS HN 311L; 3 credits in statistics.

Application of food science principles to ingredient substitutions in food products. Laboratory procedures for standard formulations and instrumental evaluation, with emphasis on problem-solving and critical thinking.

FS HN 412: Food Product Development

(Dual-listed with FS HN 512). (1-6) Cr. 3. S.

Prereq: FS HN 411; senior classification

Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Some pilot plant experiences. Emphasis on teamwork and effective communication.

FS HN 420: Food Microbiology

(Cross-listed with MICRO, TOX). (3-0) Cr. 3. F.

Prereq: MICRO 201 or MICRO 302

Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.

FS HN 421: Food Microbiology Laboratory

(Cross-listed with MICRO). (1-5) Cr. 3. S.

Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420

Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

FS HN 430: U.S. Health Systems and Policy

(Dual-listed with FS HN 530). Cr. 2. F.

Prereq: Senior or graduate classification, or permission of instructor

Introduction to public policy for health care professionals. Emphasis on understanding on the role of the practitioner for participating in the policy process, interpreting government policies and programs such as Medicare and Medicaid, determining reimbursement rates for eligible services, and understanding licensure and accreditation issues. Discussion and exploration of federal, state and professional policy-relevant resources.

FS HN 435: Analysis of Food Markets

(Cross-listed with ECON). Cr. 3. S.

Prereq: STAT 226, ECON 235, ECON 301.

Food market analysis from an economics perspective; food markets and consumption; methods of economic analysis; food industry structure and organization; food and agriculture regulations; labeling; consumer concerns; agricultural commodity promotion. Final project required.

FS HN 442: Issues in Food and Society

(2-0) Cr. 2. F.

Prereq: FS HN 242, FS HN 342

In-depth discussion, synthesis, and analysis of domestic and international food issues including: food systems from farm to fork, poverty and world hunger, overnutrition, population, agriculture and the environment, ethics, biotechnology, and policy.

FS HN 460: Global Nutrition

(Dual-listed with NUTRS 560 FS HN 560). (3-0) Cr. 3.

An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 461: Medical Nutrition and Disease I

(4-0) Cr. 4. F.

Prereq: FS HN 360, FS HN 361, FS HN 367; plus BIOL 256 and 256L or BIOL 306 or BIOL 335

(Dual-listed with NutrS 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 463: Community Nutrition

(3-0) Cr. 3. F.

Prereq: FS HN 265 or FS HN 360; FS HN 366 recommended

Dual-listed with NutrS 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis on written and oral communication at the lay and professional level. Field trip.

Meets U.S. Diversity Requirement

FS HN 464: Medical Nutrition and Disease II

(3-0) Cr. 3. S.

Prereq: FS HN 461

(Dual-listed with NutrS 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 466: Nutrition Counseling and Education Methods

(Dual-listed with FS HN 566). (2-2) Cr. 3. F.S.

Prereq: FS HN 361 and FS HN 362

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

FS HN 467: Molecular Basis of Nutrition in the Development, Prevention, and Treatment of Disease

(3-0) Cr. 3. S.

Prereq: FS HN 360 or equivalent

Understanding the molecular basis for the role of nutrients, nutrient-derivatives, and bioactive compounds in the development, prevention, and treatment of common diseases including diabetes, cancer, vascular disease, obesity, neurological disease, aberrant mineral metabolism, and autoimmune disease. Translating this understanding into practical approaches for improving the health of individuals and populations.

FS HN 471: Food Processing

(3-0) Cr. 3. F.

Prereq: FS HN 351 or A E 451 or CH E 357; MICRO 201 or 302.

Principles and application of food processing using both thermal (ex., blanching, pasteurization, canning, drying, freezing, evaporation, aseptic processing, extrusion) and non-thermal (ex., high pressure, irradiation, pulsed electric field, fermentation) unit operations. Emphasis on microbial inactivation, process heat and mass balance, and numerical problem solving.

FS HN 472: Food Processing Laboratory

(1-3) Cr. 2. F.

Prereq: Credit or enrollment in FS HN 471 or A E 451 or CH E 357

Hands-on and demonstration laboratory activities related to food processing principles and applications using lab and pilot-scale equipment. Laboratory experiences include important food processing operations, e.g., blanching/ pasteurization, canning, freezing, drying, corn wet milling, fermentation, baking etc. Emphasis on mass balance, interpreting data, writing reports, and presentations. Occasional field trips.

FS HN 480: Professional Communication in Food Science and Human Nutrition

(1-0) Cr. 1. F.S.

Prereq: FS HN 203, senior classification in the department

Presentation of current topics using written and oral communication to a lay audience. Emphasis on communication skills for the profession.

FS HN 489: Issues in Food Safety

(Cross-listed with AN S, HSP M, VDPAM). (1-0) Cr. 1. S.

Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HSP M 233; FS HN 419 or FS HN 420; FS HN 403

Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

FS HN 490: Independent Study

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490A: Independent Study: Dietetics

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490B: Independent Study: Food Science

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490C: Independent Study: Nutrition

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490D: Independent Study: International Experience

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490E: Independent Study: Entrepreneurship

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490H: Independent Study: Honors

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of instructor

Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 491: Supervised Work Experience

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Advance approval of instructor and adviser

Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491A: Supervised Work Experience: Dietetics

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Advance approval of instructor and adviser

Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491B: Supervised Work Experience: Food Science

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Advance approval of instructor and adviser

Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491C: Supervised Work Experience: Nutrition

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Advance approval of instructor and adviser

Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491D: Supervised Work Experience: Culinary Science

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.

Prereq: Advance approval of instructor and adviser

Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 492: Research Concepts in Human Nutrition

(1-3) Cr. 2. F.

Prereq: senior classification or permission of instructor; FS HN 360

Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.

FS HN 493: Food Preparation Workshop

(1-3) Cr. 1-3.

Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.

FS HN 495: Practicum

(1-3) Cr. 2. F.S.

Prereq: Senior classification in Nutritional Science-Nutrition and Wellness option or permission of instructor; FS HN 366; credit or enrollment in FS HN 463.

Students will develop, implement and assess a community-based project that engages groups in learning and practicing concepts related to nutrition and wellness. Assessed service learning component. Offered on a satisfactory-fail basis only.

FS HN 496: Food Science and Human Nutrition Travel Course

(Dual-listed with FS HN 596). Cr. 1-4. Repeatable. F.S.SS.

Prereq: Permission of instructor

(One credit per week traveled and 1 credit for pre-departure class, if offered.) Limited enrollment. Tour and study of food industry, culinary science, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 496A: Food Science and Human Nutrition Travel Course: International travel

(Dual-listed with FS HN 596A). Cr. 1-4. Repeatable. F.S.SS.

Prereq: Permission of instructor

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.

FS HN 496B: Food Science and Human Nutrition Travel Course: Domestic travel

(Dual-listed with FS HN 596B). Cr. 1-4. Repeatable. F.S.SS.

Prereq: Permission of instructor

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 498: Cooperative Education

Cr. R. Repeatable, maximum of 2 times. F.S.SS.

Prereq: Permission of department chair.

Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only.

FS HN 499: Undergraduate Research

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: Permission of staff member with whom student proposes to work Research under staff guidance. A maximum of 6 credits of FS HN 499 may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:**FS HN 506: Sensory Evaluation of Food**

(Dual-listed with FS HN 406). (2-3) Cr. 3. F.

Prereq: FS HN 305 and credit or enrollment in FS HN 411; 3 credits in statistics

Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data.

FS HN 507: Microbiological Safety of Foods of Animal Origins

(Dual-listed with FS HN 407). (Cross-listed with MICRO). (3-0) Cr. 3. S.

Prereq: MICRO 420

Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

FS HN 509: Sensory Evaluation of Wines

Cr. 2. S.

Prereq: Must be at least 21 years of age; senior or graduate status.

Principles of sensory evaluation and their application to wine evaluation. Sensory testing methods such as discrimination tests, ranking, descriptive analysis and scoring of wines will be covered. Students will have the opportunity to evaluate and learn about major types and styles of wines of the world. Lab fee.

FS HN 511: Integrated Food Science

(3-0) Cr. 3. F.

Prereq: 3 credits in each of organic chemistry, physics, mathematics, and microbiology.

Critical review of the key principles of food science and applications in the chemistry, microbiology, and processing of food. Understanding of the impact of processing on the quality of foods with respect to composition, quality and safety.

FS HN 512: Food Product Development

(Dual-listed with FS HN 412). (1-6) Cr. 3. S.

Prereq: FS HN 411; senior classification

Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Some pilot plant experiences. Emphasis on teamwork and effective communication.

FS HN 516: Advanced Nutrition I

(2-0) Cr. 2. F.

Prereq: Acceptance in the Master's of Professional Practice in Dietetics program.

Examination of current literature relative to molecular, cellular, and physiologic aspects of macronutrient and micronutrient metabolism. Integration of current evidence-based information, including peer-reviewed literature, to inform advanced professional nutrition practice. Offered online only.

FS HN 517: Gut Microbiome: Implications for Health and Diseases

(Cross-listed with AN S, MICRO, V MPM). Cr. 3.

Prereq: 2-3 credits in microbiology and/or immunology.

Explore current research on gut microbiome including modern tools used to study the gut microbiome. Examine the linkages between gut microbiome and health status, diseases, and manipulation of gut microbiome to improve health.

FS HN 518: Advanced Nutrition II

(2-0) Cr. 2. S.

Prereq: Acceptance in the Master's of Professional Practice in Dietetics program.

Principles of research design/methods and interpreting results/statistics in the current peer-reviewed scientific literature. Critical evaluation of the evidence-base to inform advanced professional nutrition practice. Offered online only.

FS HN 521: Microbiology of Food

(2-0) Cr. 2. S.SS.

Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.

This course deals with the identification, enumeration, and characterization of bacteria, yeasts, and mold associated with foods and food processing. Effects of physical and chemical agents on microorganisms will be studied. Microbiological problems in food spoilage, food preservation, food fermentation, and food-borne disease will be discussed. Offered online only.

FS HN 522: Advanced Food Microbiology and Biotechnology

(2-0) Cr. 2. Alt. S., offered odd-numbered years.

Prereq: Food microbiology, a course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.

This course will cover basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Students will be introduced to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and down-stream processing techniques, and regulatory aspects of food biotechnology. Offered online only.

FS HN 523: A Multidisciplinary Overview of Food Safety and Security

(2-0) Cr. 2. F.SS.

Prereq: A course in biology or chemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.

Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. Offered online only.

FS HN 524: Food Microbiology

(3-0) Cr. 3. F.

Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.

Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products. Offered online only.

FS HN 525: Principles of HACCP

(2-0) Cr. 2. F.

Prereq: Undergraduate biology and chemistry courses; enrollment in GP-IDEA Food Safety and Defense Certificate or permission of instructor.

A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. Offered online only.

FS HN 526: Ethnic Foods: Food Safety, Food Protection and Defense

(2-0) Cr. 2. SS.

Prereq: Graduate standing; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.

Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. Offered online only.

FS HN 527: Microbiology of Fermented Foods

(2-0) Cr. 2. SS.

Prereq: Food microbiology; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.

Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. Offered online only.

FS HN 528: Food Protection and Defense-Essential Concepts

(2-0) Cr. 2. S.

Prereq: Enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.

This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. Offered online only.

FS HN 530: U.S. Health Systems and Policy

(Dual-listed with FS HN 430). Cr. 2. F.

Prereq: Senior or graduate classification, or permission of instructor

Introduction to public policy for health care professionals. Emphasis on understanding on the role of the practitioner for participating in the policy process, interpreting government policies and programs such as Medicare and Medicaid, determining reimbursement rates for eligible services, and understanding licensure and accreditation issues. Discussion and exploration of federal, state and professional policy-relevant resources.

FS HN 538: Advanced Medical Nutrition Therapy

(3-0) Cr. 3. S.

Prereq: Acceptance in the Master's of Professional Practice in Dietetics program.

Nutritional biochemistry and physiology related to selected pathophysiology of disease with emphasis on treatment of complex medical problems and current issues. The nutrition care process will be utilized. Evidenced-based practice will be integrated into each disease state covered. Offered online only.

FS HN 542: Introduction to Molecular Biology Techniques

(Cross-listed with B M S, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

FS HN 542A: Introduction to Molecular Biology Techniques: DNA Techniques

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

FS HN 542B: Introduction to Molecular Biology Techniques: Protein

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, VDPAM). Cr. 1. Repeatable. S.SS.

Prereq: Graduate classification

Techniques. Includes: fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

FS HN 542C: Introduction to Molecular Biology Techniques: Cell Techniques

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.

Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

FS HN 542D: Introduction to Molecular Biology Techniques: Plant Transformation

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

FS HN 542E: Introduction to Molecular Biology Techniques: Proteomics

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

FS HN 542F: Introduction to Molecular Biology Techniques: Metabolomics

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.

Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

FS HN 542G: Introduction to Molecular Biology Techniques: Genomic

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.

Offered on a satisfactory-fail basis only.

FS HN 554: Dietetic Internship I

(0-22) Cr. 5. S.SS.

For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 555: Dietetic Internship II

(0-18) Cr. 5. F.S.

Prereq: Concurrent enrollment or successful completion of FS HN 554

For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 556: Dietetic Internship III

(0-22) Cr. 5. F.SS.

Prereq: Concurrent enrollment or successful completion of FS HN 554 and FS HN 555

For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project. Experiences and activities designed to meet accreditation standards.

FS HN 560: Global Nutrition

(Dual-listed with FS HN 460). (Cross-listed with NUTRS). (3-0) Cr. 3.

An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 566: Nutrition Counseling and Education Methods

(Dual-listed with FS HN 466). (Cross-listed with DIET). (2-2) Cr. 3. F.S.

Prereq: FS HN 361 and FS HN 362

Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

FS HN 575: Processed Foods

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: FS HN 214 or FS HN 311; a course in nutrition

This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease.

FS HN 580: Orientation to Food Science and Nutrition Research

(1-0) Cr. 1. F.

Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN. Offered on a satisfactory-fail basis only.

FS HN 581: Seminar

(1-0) Cr. 1. S.

Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Intended for graduate students in their first or second semester in FS HN.

FS HN 590: Special Topics

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590A: Special Topics: Nutrition

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590B: Special Topics: Food Science

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590C: Special Topics: Teaching

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 595: Grant Writing for the Professional

(Cross-listed with DIET). (3-0) Cr. 3. SS.

Prereq: Enrollment in GP-IDEA MFCS in Dietetics OR acceptance in the Master of Professional Practice in Dietetics program.

Identifying external funding sources, developing a research question and hypothesis, and writing a grant proposal.

FS HN 596A: Food Science and Human Nutrition Travel Course:**International travel**

(Dual-listed with FS HN 496A). Cr. 1-4. Repeatable. F.S.SS.

Prereq: Permission of instructor

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.

FS HN 596B: Food Science and Human Nutrition Travel Course: Domestic travel

(Dual-listed with FS HN 496B). Cr. 1-4. Repeatable. F.S.SS.

Prereq: Permission of instructor

(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 597: Nutritional Aspects of Oncology

(Cross-listed with DIET, NUTRS). (3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: B.S. in nutrition, dietetics, biology, or related discipline.

Understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management.

FS HN 599: Creative Component

Cr. arr.

Nonthesis option only.

Courses for graduate students:**FS HN 606: Advanced Food Analysis and Instrumentation**

(2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: FS HN 311, or FS HN 410, or FS HN 511 or equivalent.

Instrumental methods for measuring chemical and physical properties of foods, food quality and functionality. Techniques for methods development, sample preparation, optimization of operating conditions, and data analysis needed to obtain accurate, reproducible results by means of instrumentation.

FS HN 611: Advanced Food Processing

(Cross-listed with BRT). (3-0) Cr. 3. F.

Prereq: FS HN 311, or FS HN 471/472 or equivalent, or FS HN 511.

Recent advances in the science and technology of food processing and preservation; examples include both thermal and non-thermal processes, including cold plasma, nanotechnology, and extrusion. Advances in extraction and separation technologies, by-product utilization, and sustainability in food processing industry will also be discussed. Students to research on select topics and present.

FS HN 612: Advanced Food Chemistry

(3-0) Cr. 3. Alt. S., offered even-numbered years.

Prereq: FS HN 311, or FS HN 411, or FS HN 511, or BBMB 404, or equivalent.

Structure, chemical and physical properties of lipids, proteins and carbohydrates, and their food and industrial applications. Changes in functionalities during processing and storage.

FS HN 626: Advanced Food Microbiology

(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. F., offered odd-numbered years.

Prereq: FS HN 420 or FS HN 421 or FS HN 504

Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

FS HN 627: Rapid Methods in Food Microbiology

(Cross-listed with MICRO, TOX). (2-0) Cr. 2. Alt. F., offered even-numbered years.

Prereq: FS HN 420 or FS HN 421 or FS HN 504

Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

FS HN 681: Seminar

(1-0) Cr. 1. Repeatable, maximum of 2 credits. F.S.SS.

Presentation of thesis or dissertation research. Must be taken once for each graduate program; once for the M.S. program and once for the Ph.D. program.

FS HN 682: Seminar Reflection

Cr. R. Repeatable. F.S.

Active listening and critical thinking activities related to research seminars in food science and human nutrition. Required each semester for all FSHN graduate students. Electronic documentation.

FS HN 690: Special Problems

Cr. arr. Repeatable. F.S.SS.

Prereq: FS HN 502 or FS HN 503 or FS HN 504 or FS HN 553 or FS HN 554

FS HN 695: Grant Proposal Writing

(Cross-listed with NUTRS). (1-0) Cr. 1. F.

Prereq: 3 credits of graduate course work in food science and/or nutritional sciences

Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Understanding the grant funding process from federal, foundation, and commodity agencies. Includes preparing a grant for possible submission and participation in the review of proposals. Discussion of the role of successful grant writing in career development.

FS HN 699: Research in Food Science and Technology

Cr. arr. Repeatable. F.S.SS.

Offered on a satisfactory-fail basis only.

Forestry (FOR)

Any experimental courses offered by FOR can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

FOR 201: Forest Biology

(2-0) Cr. 2. F.

Prereq: Concurrent enrollment in FOR 202, FOR 203, FOR 204, FOR 205, and FOR 206

Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities.

FOR 202: Sustainable Materials: Wood Utilization

(2-0) Cr. 2. F.

Prereq: Concurrent enrollment in FOR 201, FOR 203, FOR 204, FOR 205, and FOR 206

Basis for use of wood as an industrial raw material for lumber, composites, pulp and paper, energy and chemicals. Implications of use of alternative renewable and non-renewable materials for societal infrastructure and consumer goods.

FOR 203: Resource Measurements/Evaluation

(2-0) Cr. 2. F.

Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 204, FOR 205, and FOR 206; MATH 140

Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood).

FOR 204: Forest Ecosystem Decision-Making

(2-0) Cr. 2. F.

Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 205, and FOR 206

Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.

FOR 205: Integrated Forestry Laboratory

(0-8) Cr. 3. F.

Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 206

Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

FOR 206: Fall Forestry Camp

Cr. 4. F.

Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 205

Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

FOR 280: Wood Properties and Identification

(3-3) Cr. 4. S.

Properties of wood and how they relate to its successful use.

Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

FOR 283: Pesticide Application Certification

(Cross-listed with AGRON, ENT, HORT). (2-0) Cr. 2. S.

Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

FOR 290: Special Problems

Cr. 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290A: Special Problems: Leadership in Forestry Teams (LIFT) Learning Community

Cr. 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290B: Special Problems: Forest Ecosystem Management

Cr. 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290C: Special Problems: Natural Resource Conservation

Cr. 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290D: Special Problems: Urban and Community Forestry

Cr. 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290E: Special Problems: Wood Science and Technology

Cr. 1-4. Repeatable.

Prereq: Freshman or Sophomore classification, permission of instructor

FOR 302: Silviculture

(3-3) Cr. 4. S.

Prereq: FOR 201, FOR 356, NREM 301

Manipulation of forest vegetation based on ecological principles for the production of goods and services.

FOR 356: Dendrology

(Cross-listed with BIOL). (2-2) Cr. 3. F.

Prereq: BIOL 211

Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Historical conditions of North American forest regions will also be addressed.

FOR 358: Forest Herbaceous Layer: Ecology and Identification.

(Cross-listed with NREM). (0.5-1) Cr. 1. S.

Prereq: BIOL 212

Survey of the major plant families, general, and representative species of the forest herbaceous layer. Functional ecology and restoration.

FOR 416: Forest Insects and Diseases

(Cross-listed with PL P). (3-0) Cr. 3. F.

Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent.

Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests.

FOR 416L: Forest Insects and Diseases Laboratory

(Cross-listed with PL P). (0-3) Cr. 1. F.

Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent. Credit or enrollment in PL P 416.

Laboratory experience working with insect and fungal pests of trees.

FOR 442: Dynamics of Forest Stands

(Dual-listed with FOR 542). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: NREM 301, FOR 302, STAT 101 or their equivalents

Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management.

FOR 451: Forest Resource Economics and Quantitative Methods

(3-3) Cr. 4. S.

Prereq: FOR 203, MATH 150

Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Application of mathematical and statistical models to the solution of managerial problems.

FOR 452: Ecosystem Management

(Dual-listed with FOR 552). (Cross-listed with NREM). (2-3) Cr. 3. S.

Prereq: Senior classification, and NREM 120 or its equivalent

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

FOR 454: Forestry Practicum

(1-4) Cr. 3. S.

Prereq: 20 credits in student's major at 300 level or above

Integrated decision-making related to the conservation, management, and preservation of private and public forests, wildlands, urban/community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client.

FOR 475: Urban Forestry

(Cross-listed with HORT). (2-3) Cr. 3. F.

Prereq: Junior or senior classification, 3 credits in biology

Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management).

Courses primarily for graduate students, open to qualified undergraduates:

FOR 542: Dynamics of Forest Stands

(Dual-listed with FOR 442). (2-3) Cr. 3. Alt. F., offered even-numbered years.

Prereq: NREM 301, FOR 302, STAT 101 or their equivalents

Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management.

FOR 552: Ecosystem Management

(Dual-listed with FOR 452). (Cross-listed with NREM). (2-3) Cr. 3. S.

Prereq: Senior classification, and NREM 120 or its equivalent

Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

FOR 599: Creative Component

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599A: Creative Component: Forest Biology

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599B: Creative Component: Forest Biometry

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599C: Creative Component: Forest and Recreation Economics

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599D: Creative Component: Forest Management and Administration

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599E: Creative Component: Wood Science

Cr. 1-12. Repeatable, maximum of 12 credits.

Courses for graduate students:**FOR 696: Research Seminar**

(Cross-listed with AGRON, BBMB, GDCB, HORT, PLBIO). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

FOR 699: Research

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699A: Research: Forest Biology - Wood Science

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699B: Research: Forest Biometry

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699C: Research: Forest Economics

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699D: Research: Forest Management and Administration

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699E: Research: Wood Science

Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699F: Research: Plant Physiology

Cr. 1-12. Repeatable, maximum of 12 credits.

French (FRNCH)

Any experimental courses offered by FRNCH can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:**FRNCH 101: Elementary French I**

(4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture.

FRNCH 102: Elementary French II

(4-0) Cr. 4. S.SS.

Prereq: FRNCH 101

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture.

Meets International Perspectives Requirement.

FRNCH 201: Intermediate French I

(4-0) Cr. 4. F.

Prereq: FRNCH 102

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture.

Meets International Perspectives Requirement.

FRNCH 202: Intermediate French II

(4-0) Cr. 4. S.

Prereq: FRNCH 201

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture.

Meets International Perspectives Requirement.

FRNCH 203: Intermediate French Grammar and Conversation

Cr. 4. F.

Prereq: FRNCH 201 or equivalent.

Practice in oral communication within the context of French language and cultures for professions. Best-suited for students with a solid foundation in basic French grammar. Only one of FRNCH 202 or 203 may count toward graduation.

FRNCH 301: French Writing and Grammar

(3-0) Cr. 3. F.

Prereq: FRNCH 202

Emphasis on developing functional language skills in reading and writing. Selective review of grammar within the context of cultural and literary prose.

Meets International Perspectives Requirement.

FRNCH 302: Reading and Writing French

(3-0) Cr. 3. S.

Prereq: FRNCH 301

Readings in French prose, theater and poetry. Introduction to close reading and analysis. Development of reading and writing skills for upper-level courses.

Meets International Perspectives Requirement.

FRNCH 304: French for Global Professionals

(3-0) Cr. 3.

Prereq: FRNCH 301

Communication in business and professional contexts in French-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Emphasis on working across French-American cultures. Preparation for internships.

Meets International Perspectives Requirement.

FRNCH 305: French Conversation

(3-0) Cr. 3.

Prereq: FRNCH 202

Intensive conversational and listening practice emphasizing contemporary France and the Francophone world. Native or near-native speakers are not eligible to enroll.

Meets International Perspectives Requirement.

FRNCH 320: France Today

(3-0) Cr. 3.

Prereq: FRNCH 202

Selected topics dealing with contemporary French society and culture.

Meets International Perspectives Requirement.

FRNCH 326: Studies in French or Francophone Film

(3-0) Cr. 3. Repeatable.

Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302

In-depth study of a selected filmmaker, genre, or movement. Emphasis on analytical interpretation and relationship between film and French or Francophone culture, history, and society. Counts toward World Film Studies Minor.

Meets International Perspectives Requirement.

FRNCH 340: Studies in French or Francophone Literature

(3-0) Cr. 3. Repeatable.

Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302

In-depth study of a selected topic, genre, movement or writer in French or Francophone literature, civilization or culture. Emphasis on close readings and discussion.

Meets International Perspectives Requirement.

FRNCH 370: French Studies in English

(3-0) Cr. 3-4. Repeatable.

Prereq: For fourth credit, 6 credits in French at 300 level.

Author, genre, or period study in French or Francophone history, literature, or culture. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French.

Meets International Perspectives Requirement.

FRNCH 370F: Studies in English Translation: French Topics on Women and Gender Studies

(Cross-listed with WGS). (3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

FRNCH 378: French Film Studies in English

(2-2) Cr. 3-4. Repeatable.

Prereq: For fourth credit, 6 credits in French at 300 level.

Analysis and interpretation of film in French society. Topics vary according to faculty interest. Film directors, genres, movements (e.g. The New Wave), historical survey, aesthetics, and cinematography. Three credits: readings, discussions and papers in English; open to all students. Four credits: required for French concentration credit, supplementary readings and written course work in French. Counts toward World Film Studies Minor.

Meets International Perspectives Requirement.

FRNCH 476: French Culture and Society in English

(3-0) Cr. 3-4. S.

Key moments and themes in French society and culture up to the modern era. Subjects vary according to faculty interest. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

FRNCH 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: Permission of French staff and department chair

Designed to meet the needs of students who wish to focus on areas other than those in which courses are offered. No more than 9 credits in French 490 may be counted toward graduation.

FRNCH 499: Internship in French

Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS.

Prereq: 9 credits of French at the 300 level; permission of advisor and WLC Internship Coordinator. Work experience using French language skills in the public or private sector, combined with academic work under faculty supervision

Credits may be applied only to LCP major. Offered on a satisfactory-fail basis only. No more than 3 credits of Frnch 499 may be applied to the major.

Courses primarily for graduate students, open to qualified undergraduates:

FRNCH 590: Special Topics in French

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590A: Special Topics in French: Literature or Literary Criticism

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590B: Special Topics in French: Linguistics

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590C: Special Topics in French: Language Pedagogy

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

FRNCH 590D: Special Topics in French: Civilization

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level French

Genetics (GEN)

Any experimental courses offered by GEN can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for undergraduates:

GEN 110: Genetics Orientation

(1-0) Cr. 1. F.

This course is intended for first year students and others new to the genetics major. Discussion of university policies and resources, requirements of the major, career opportunities, and other topics related to the first year experience.

GEN 112: Genetics Orientation for Transfer Students

(0.5-0) Cr. 0.5. S.

Eight-week course for external transfer students and internal change of major students. Discussion of university policies and resources, requirements of the major, and career opportunities. Only one of GEN 110 or 112 may count toward graduation.

GEN 298: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of department cooperative education coordinator; sophomore classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 313: Principles of Genetics

(Cross-listed with BIOL). (3-0) Cr. 3. F.S.SS.

Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L

Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative genetics, and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

GEN 313L: Genetics Laboratory

(Cross-listed with BIOL). (0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in BIOL 313

Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

GEN 320: Genetics, Agriculture and Biotechnology

(Cross-listed with AGRON). (3-0) Cr. 3. F.S.

Prereq: BIOL 212

Transmission and molecular genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

GEN 322: Introduction to Bioinformatics and Computational Biology

(Cross-listed with BCBIO, BIOL). (3-0) Cr. 3. F.

Prereq: BIOL 212

Genome sequencing, assembly, structural and functional annotation, and comparative genomics. Investigating these topics will develop skills in programming and scripting (Perl and/or Python), the use of biological databases, sequence alignment, similarity search, identification of sequence patterns, construction of phylogenetic trees, and comparative genomics.

GEN 340: Human Genetics

(3-0) Cr. 3. F.S.SS.

Prereq: BIOL 313 or GEN 313

Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

GEN 349: The Genome Perspective in Biology

(Cross-listed with BIOL). (2-2) Cr. 3. S.

Prereq: GEN 313 or GEN 320

Analysis of genome, RNA, and protein data using computer technology to answer biological questions on topics ranging from microbial diversity to human health. An introduction for students in the life sciences to the fields of genomics, bioinformatics and systems.

GEN 398: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of department cooperative education coordinator; junior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 402: Microbial Genetics and Genomics

(Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: MICRO 302, Biol 313

The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of vertical and horizontal genetic information transfer and gene regulation are covered, along with genetic and genomic-based approaches to study these and other cellular processes of microorganisms. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics and genomics.

GEN 409: Molecular Genetics

(3-0) Cr. 3. F.S.

Prereq: BIOL 313 or GEN 313

Principles of molecular genetics and analysis of gene expression, including elements of the Central Dogma (DNA replication, transcription, and translation) and gene regulation. Utilizing examples from the primary literature to illustrate experimental design, data analysis, and interpretation.

GEN 410: Analytical Genetics

(3-0) Cr. 3. F.S.

Prereq: BIOL 313 or GEN 313

The principles and practice of genetic analysis. Mendelian genetic analysis, mutational, transgenic, and genomic analysis of gene function, linkage and gene mapping, chromosomal aberrations, aneuploidy and polyploidy, extrachromosomal inheritance, analysis of genetic pathways.

GEN 444: Bioinformatic Analysis

(Cross-listed with BCB, BCBO, BIOL, COM S, CPR E). (4-0) Cr. 4. F.

Prereq: MATH 165 and Introductory Statistics (STAT 101, STAT 104, STAT 105, STAT 201, or STAT 330).

Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: bioinformatic data processing, Python programming, genome assembly, database search, sequence alignment, gene prediction, next-generation sequencing, comparative and functional genomics, and systems biology.

GEN 462: Evolutionary Genetics

(Cross-listed with BIOL). (3-0) Cr. 3. F.

Prereq: BIOL 315

The genetic basis of evolutionary processes in eukaryotic organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

GEN 490: Independent Study

Cr. 1-5. Repeatable, maximum of 9 credits.

Prereq: GEN 313, junior or senior classification, permission of instructor

Independent study in any area of genetics. Students may use no more than 9 credits of university-wide 490 credits (including Gen 490) toward the total of 120 credits required for graduation.

GEN 491: Undergraduate Seminar, Professional Practice in Genetics Disciplines

(1-0) Cr. 1. F.S.

Prereq: BIOL/GEN 313; credit or enrollment in GEN 409 or GEN 410; Junior Classification

Intended to develop career objectives and obtain positions appropriate to the goals of students, in particular juniors, in preparation for position searches in the senior year. Discussion of various career paths in genetics disciplines; identification of experiences to enhance entry to specific careers; exposure to professional practices not covered elsewhere including literature database management, scientific figure preparation for publication, the peer-review journal system, the federal competitive grants system, laboratory budgets and management, authorship and collaborations, etc.; preparation of effective curricula vitae and application letters; and verbal scientific discourse appropriate to interview interactions and other professional settings.

GEN 492: Undergraduate Teaching Experience

Cr. 1-2. Repeatable, maximum of 9 credits. F.S.

Prereq: BIOL 212, junior or senior classification, permission of instructor

For students registering to be undergraduate laboratory or classroom assistants. Offered on a satisfactory-fail basis only. No more than 2 credits of GEN 492 may be applied toward the Genetics advanced course requirement.

GEN 495: Special Topics in Genetics

(1-0) Cr. 1-3. Repeatable, maximum of 3 credits. F.S.

Prereq: GEN 313; permission of instructor

Content varies from year to year. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 496: Attendance and Critique of Genetics Seminars

Cr. 1. Repeatable, maximum of 3 credits. F.S.

Prereq: GEN 313, junior or senior classification, permission of instructor

Attendance and critique of departmental seminars in BBMB, GDCB, or EEOB. Offered on a satisfactory-fail basis only. Genetics students may use no more than 9 credits of university-wide 490 - 499 credits toward the total of 120 credits required for graduation.

GEN 498: Cooperative Education

Cr. R. F.S.SS.

Prereq: Permission of department cooperative education coordinator; senior classification

Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 499: Genetics Research

Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: GEN 313, junior or senior classification, permission of instructor

Independent research in any area of genetics. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

GEN 499H: Genetics Research for Honors

Cr. 1-5. Repeatable, maximum of 9 credits. F.S.SS.

Prereq: GEN 313, junior or senior classification, permission of instructor

Independent research in any area of genetics; for Honors students only. Genetics students may use no more than 9 credits of university-wide 490-499 credits toward the total of 120 credits required for graduation.

Genetics (GENET)

Any experimental courses offered by GENET can be found at:

registrar.iastate.edu/faculty-staff/courses/explisting/ (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting/>)

Courses primarily for graduate students, open to qualified undergraduates:

GENET 539: Ethics and Biological Sciences

(2-0) Cr. 2. Alt. S., offered odd-numbered years.

Introduction to Bioethics through case studies, discussion of contemporary work on central bioethics topics, and discussion of important emerging ethical issues associated with recent research or technological development. Issues covered will vary somewhat from year to year, but will include at least some of the following: ethics and responsible research practice, animal ethics and the use of animals in teaching and research, cloning, human reproductive and stem cell research, regulation of genetically modified crops and foods, plant biotechnology, gene patents. Students will be divided into groups to develop their own case study, to be presented in class at the end of the term. Offered on a satisfactory-fail basis only.

GENET 590: Special Topics

Cr. arr. Repeatable. F.S.SS.

Contact individual faculty for special projects or topics. Graded.

GENET 591: Workshop in Genetics

(1-0) Cr. 1. Repeatable. F.

Prereq: Permission of instructor

Current topics in genetics research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

Courses for graduate students:

GENET 690: Graduate Student Seminar in Genetics

(1-0) Cr. 1. Repeatable. F.S.

Prereq: Permission of instructor

Research presentations by students to improve their ability to: orally present scientific work in a clear and meaningful way, critically evaluate oral presentations, and give and receive constructive criticism. Students may enroll in one seminar per school year.

GENET 691: Faculty Seminar in Genetics

(1-0) Cr. 1. Repeatable. F.

Prereq: Permission of instructor
