

Iowa State University

Courses and Programs Catalog 2020 - 2021

The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at <http://www.registrar.iastate.edu/faculty-staff/courses/explisting>.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Iowa State University does not discriminate on the basis of race, color, age, ethnicity, religion, national origin, pregnancy, sexual orientation, gender identity, genetic information, sex, marital status, disability, or status as a U.S. veteran. Inquiries regarding non-discrimination policies may be directed to the Director, Office of Equal Opportunity, Title IX/ADA Coordinator, and Affirmative Action Officer, 3350 Beardshear Hall, Ames, Iowa 50011, Tel. 515 294-7612, email eooffice@iastate.edu.

TABLE OF CONTENTS

About the Catalog	7	Diet and Exercise (AGLS)	142
Accreditation and Administration	8	Dietetics (AGLS)	145
Admissions	9	Entomology	147
Student Housing and Dining	16	Environmental Science	149
Tuition, Fees and Expenses	17	Food Science (AGLS)	152
Student Financial Aid	21	Food Science and Human Nutrition	154
Student Records	22	Forestry	157
Grading	25	Genetics	161
Academics	30	Global Resource Systems	164
Academic Conduct	36	Horticulture	166
Progress and Probation	39	Industrial Technology	175
Student Services	42	International Agriculture	179
Student Life	46	Microbiology	180
Registration	48	Natural Resource Ecology and Management	183
Information About Courses	54	Nursing	184
Entry Level Courses	57	Nutritional Science (AGLS)	186
Plan of Study - Soar in 4	81	Occupational Safety	191
Colleges and Schools	84	Plant Pathology and Microbiology	191
Colleges and Curricula	84	Seed Science	192
College of Agriculture and Life Sciences	96	Sustainable Agriculture	193
Agricultural Business	100	Ivy College of Business	194
Agricultural and Life Sciences Education	102	Accounting	201
Agricultural Studies	105	Actuarial Science	204
Agriculture and Society	107	Business Administration	207
Agricultural Systems Technology	109	Business Analytics	209
Agronomy	112	Business Economics	212
Animal Ecology	118	Entrepreneurship	213
Animal Science	124	Finance	216
Biochemistry (AGLS)	129	International Business	218
Biology	132	Management	220
Community Development	136	Management Information Systems	223
Culinary Food Science (AGLS)	137	Marketing	226
Dairy Science	139	Supply Chain Management	230
		College of Design	233
		Architecture	239

Art and Design	242	Apparel, Events, and Hospitality Management Department	338
Biological/Pre-Medical Illustration	245	Apparel, Merchandising, and Design	338
Community and Regional Planning	248	Athletics	346
Design Studies	252	Athletic Training	346
Graphic Design	253	Child, Adult, and Family Services	349

ABOUT THE CATALOG

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New programs may be offered in the term (semester or summer session) following final approval by the Board of Regents, State of Iowa and any required accrediting bodies. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explistingings. (<http://www.registrar.iastate.edu/faculty-staff/courses/explistingings/>)

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (<http://www.facsen.iastate.edu/councils/academicaffairs/curriculum/>) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program. The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/Faculty Handbook Curriculum Approvals – Section 10.8. See the Office of the Provost (<http://www.provost.iastate.edu/>) web site for more information.

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (<http://www.facsen.iastate.edu/councils/academicaffairs/curriculum/>) representatives. Editing begins in late February with course changes due to the Office of the Registrar by June 1. Curriculum and other

general information is due to the Office of the Registrar by December 1. Publication is the following February.

See the catalog editing website (<http://www.registrar.iastate.edu/catalog-editing/>) for more details on how to make changes to the catalog.

ACCREDITATION AND ADMINISTRATION

Accreditation

Iowa State University is accredited by the Higher Learning Commission.

Higher Learning Commission

230 South LaSalle St., Suite 7-500

Chicago, IL 60604-1411

(800) 621-7440; (312) 263-0456

Fax: (312) 263-7462

info@hlcommission.org

www.hlcommission.org

Board of Regents, State of Iowa

www.regents.iowa.gov/ (<http://www.regents.iowa.gov/>)

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale, Iowa.

Officers of Administration

Wendy Wintersteen, Ph.D.

President of the University

Jonathan A. Wickert, Ph.D.

Senior Vice President and Provost

Pamela Elliott Cain, B.S., CPA

Interim Senior Vice President for Operations and Finance

Martino Harmon, Ph.D.

Senior Vice President for Student Affairs

Kristen Constant, Ph.D.

Interim Vice President and Chief Information Officer

Kristi Darr, M.B.A.

Interim Vice President of University Human Resources

John D. Lawrence, Ph.D.

Vice President for Extension and Outreach

Sarah M. Nusser, Ph.D.

Vice President for Research

Reginald Stewart, Ph.D.

Vice President for Diversity and Inclusion

Daniel Robison, Ph.D.

Dean of the College of Agriculture and Life Sciences

David P. Spalding, M.B.A.

Dean of the Ivy College of Business

Interim Vice President for Economic Development and Industry Relations

Luis Rico-Gutierrez, M.S.

Dean of the College of Design

W. Samuel Easterling, Ph.D.

Dean of the College of Engineering

Laura D. Jolly, Ph.D.

Dean of the College of Human Sciences

Beate Schmittmann, Ph.D.

Dean of the College of Liberal Arts and Sciences

Dan Grooms, D.V.M., Ph.D.

Dean of the College of Veterinary Medicine

William R. Graves, Ph.D.

Dean of the Graduate College

Hilary T. Seo, M.S.

Interim Dean of the Library

Dawn Bratsch-Prince, Ph.D.

Associate Provost for Faculty

Ann Marie VanDerZanden, Ph.D.

Associate Provost for Academic Programs

Vernon J. Hurte, Ph.D.

Dean of Students

ADMISSIONS

Office of Admissions

Executive Director of Admissions and New Student Programs

Katharine Johnson Suski

Admission

When to Apply

Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu. (<http://www.admissions.iastate.edu>)

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply

Applications for admission are available online at www.admissions.iastate.edu. (<http://www.admissions.iastate.edu>)

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Undergraduate Admission Directly from High School

Admission decisions are made by admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu (<http://www.admissions.iastate.edu>) for current application fee information). In addition applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university

communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the TOEFL, IELTS, PTE, ACT, or SAT. In addition to these tests, the Duolingo English Test (DET) may be used for undergraduates only. Detailed information concerning test score requirements can be found at <http://www.admissions.iastate.edu/intl/requirements.php>.

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based upon the mathematical formula listed below:

Regent admission Index Formula:

(ACT composite score x 3)

+ (Cumulative GPA x 30)

+ (Number of years of core courses in high school x 5)

= RAI Score

Note: For purposes of calculating the RAI, SAT scores will be ACT composite equivalents; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

Applicants who are admitted with less than a 245 RAI score may be required to participate in the first-year Smart Start Program as a condition of their enrollment.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on

standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation

Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts

Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics

Three years, including one year each of algebra, geometry, and advanced algebra

Science

Three years, including at least two years of courses which emphasize elements of biology, chemistry, or physics

Social Studies

Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering

In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission - Nondegree Undergraduate

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification

is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree may not enroll in graduate credits. To take courses listed as available for graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

Nondegree applicants are held to the same standards of admission as degree-seeking applicants, including English language proficiency.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree undergraduate students in the College of Liberal Arts and Sciences. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students - Undergraduate and Graduate

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Reentry Students (<http://catalog.iastate.edu/azindex/>).

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry Students (<http://catalog.iastate.edu/azindex/>) for more information.

Undergraduate Admission by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu (<http://www.admissions.iastate.edu/>) for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university's English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities will be admitted provided they have achieved a minimum 2.25 transfer grade point average (on a 4.00 grading scale) for all college work previously attempted. Applicants who have earned an associate's degree will be required to have earned a minimum 2.00 transfer grade point average.

Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

A. Students from regionally accredited colleges and universities.

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

- credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature
- credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor's degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

C. Students from colleges and universities not regionally accredited.

Courses completed at colleges and universities that are not regionally accredited will be evaluated according to the recommendations made by the American Association of Collegiate Registrars and Admissions Offices or the American Council on Education.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the

content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies

A. Students with credit obtained during military service.

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *A Guide to the Evaluation of Educational Experiences in the Armed Services*.

B. Students with credit obtained through non-college sponsored instruction.

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *The National Guide to Educational Credit for Training Programs*.

C. Students with credit obtained through correspondence courses.

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).

Iowa State University will award credit for each of the following 15 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, German Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/cbe_clep.php (http://www.admissions.iastate.edu/cbe/cbe_clep.php).

E. Students with "test-out" credit.

Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State's requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

F. Credit for prior learning.

Credit for prior learning applies to learning acquired from, but not limited to, credit by examination (e.g., Advanced Placement Exam (AP), College Level Exam (CLEP), International Baccalaureate (IB), Departmental Exams, etc.), credit that has been recommended by non-degree granting institutions, and ACE-recommended military coursework and/or experience. Credit awarded for prior learning is documented, evaluated, and appropriate for the level of degree awarded. Iowa State University does not award credit for work or life experience nor does it award credit for a service member's military occupational experience.

Iowa State University will allow a maximum of 60 credits of prior learning to satisfy a student's undergraduate degree requirements, of which no more than 32 credits may come from the credit by examination.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State's College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language, diversity, and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global

course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/equiv (<https://www.admissions.iastate.edu/equiv/>)) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to <http://transit.iastate.edu>.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable

for transfer credit. In addition, credits applied toward a particular degree will be determined by the student's college, based on relevance to the students' program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student's Iowa State cumulative grade point average.

A student who has earned an associate's degree and is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin.

Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of Credit By Examination Programs (CBE)

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State's policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe (<http://www.admissions.iastate.edu/cbe/>).

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Detailed information concerning the Advanced Placement Program can be found at <https://apstudent.collegeboard.org/home> (<https://apstudent.collegeboard.org/home/>).

International Baccalaureate Examinations

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Detailed information concerning the IB Program can be found at <http://ibo.org/iba/>.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested.

If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students' grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements.

Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program

CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students' degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acct 284; engineering majors should consult with their academic adviser before registering for this examination); Biology (Biol 101, not for biology or engineering majors); Calculus (Math 165); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); and Principles of Microeconomics (Econ 101).

In addition, Iowa State University will award up to 9 semester credit hours for CLEP French Language, up to 9 semester credit hours for CLEP German Language, and up to 9 semester credit hours for CLEP Spanish Language.

Information about testing centers and registration can be found at <https://clep.collegeboard.org/search/test-centers> (<https://clep.collegeboard.org/search/test-centers/>). For information on whether to take any of the CLEP tests, contact your academic adviser. Additional information on the CLEP exam is available at <https://clep.collegeboard.org/>.

Policies and Procedures Governing CBE Tests

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Credit by examination will not be granted if it duplicates courses previously passed or failed.

5. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

6. There is a nonrefundable fee for all departmental tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

7. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

8. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.

9. Listed below are policies for transferring CBE from another college or university to Iowa State University:

a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations

may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State's AP and CLEP policies.

b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State's IB policies.

c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

10. Credit earned from CBE will be posted to the student's academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

11. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

12. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Below is detailed information concerning Iowa State University admission policies and procedures. Prospective students are also encouraged to visit the following websites for additional information:

Student Housing and Dining

Department of Residence (DOR)

Welcome to your Cyclone Home! The university provides housing for almost 11,000 students in university owned on-campus residence halls and apartments. Single (non-family) student housing is available in all residence halls and the Frederiksen Court and University Village apartment communities. Family housing is available to students and their partners, children, and other relatives in the Schilleter Village apartments. While newly-admitted freshmen 18 and under are assigned to the halls, all halls and apartments have a diverse mix of freshmen, sophomores, juniors, seniors, and graduate students making on-campus housing a great place to live and learn. Visit <http://housing.iastate.edu/> for details.

ISU Dining

With 24 locations, a fresh meal or snack is right around the corner! We offer flexible meal plans for students living both on and off campus. Our dining centers serve a wide variety of fresh-made items and are a great place for a sit-down meal. Locations like our cafes, restaurants and markets are perfect for coffee breaks, meals and snacks when you're on the go. Our culinary team is ready to serve you! Visit <https://dining.iastate.edu/> for meal plan options, locations, menus and hours.

Questions?

Email the Administrative Services Office at housing@iastate.edu for information about DOR housing or dining@iastate.edu for information about ISU Dining.

TUITION, FEES AND EXPENSES

Tuition

Tuition and fees are based on the number of credits in which a student is enrolled as of 5:00 p.m. on the 10th day of class. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations are found in this catalog under Admissions and Registrar.

All tuition, fees, expenses, and policies are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa. For the most current and complete information see <http://www.registrar.iastate.edu/fees/>

Residency Classification for Admission and Tuition Purposes

These criteria are contained in the Policy Manual, Board of Regents, State of Iowa and or the Iowa Administrative Code: Board of Regents, State of Iowa. For additional information regarding the administrative code addressing residency classification: Section 681-1.4 "Classification of residents and nonresidents for admission, tuition, and fee purposes" <https://www.legis.iowa.gov/docs/aco/chapter/681.1.pdf> (Chapter 1, pg. 4).

GENERAL INFORMATION

A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver's license, and not meet the residency requirements as established by the Board of Regents, State of Iowa, for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary

to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:

1. A statement from the student describing employment and expected source of support
2. A statement from the student's employer
3. A statement from the student's parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
4. A statement from the student's spouse related to sources of family support, length of residence in Iowa, and reasons for being in the state of Iowa
5. Supporting statements from persons who might be familiar with the family situation
6. Iowa state income tax return.

D. Applications for resident classification for a given semester or session are due no later than the fifteenth class day of that semester or session. Applications received after the fifteenth class day of that semester or session will be considered for the next semester or session. Appeals of any nonresident classification decision resulting from applications for resident classifications are due no later than midterm of that semester or session. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

GRADUATE ASSISTANTS

Students with graduate assistantships of 1/4-time or more are assessed Iowa resident tuition and fees. Nonresident students with graduate assistantships of 1/4-time or more retain their nonresidency classification, but are assessed resident tuition and fees as long as the graduate assistantship is continued.

The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for resident tuition and fees during the period of the assistantship appointment. Iowa residency is not granted,

but a waiver of nonresident tuition and fees is in effect. When the graduate assistantship ends, the tuition and fee waiver for the spouse is terminated. (Board of Regents, State of Iowa, Minutes March 15, 1995, p. 801).

The graduate student must request the resident tuition assessment by midterm of the term in question. The benefit will not be granted retroactively.

GUIDELINES

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

1. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

2. In deciding why a person is in the state of Iowa, the person's domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

3. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

- (1). Has not acquired domicile in another state;
- (2). Has maintained a continuous voting record in Iowa; and
- (3). Has filed regular Iowa resident income tax returns during absence from the state.

4. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student

(6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

5. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

6. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

- (1). Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
- (2). Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

7. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

8. At the Regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe (Otto), Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (HoCak/Ho-Chunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299)

**Section B below is under revision. For current information, go to <http://www.veterans.iastate.edu/for-students/in-statetuition>. (<http://www.veterans.iastate.edu/for-students/in-statetuition/>)

B. Additional guidelines are used in determining the resident classification of a veteran, qualified military person, and dependent children and spouses of a veteran or qualified military person for purposes of admission and undergraduate tuition and mandatory fees:

1. A person who is stationed on active duty at the Rock Island arsenal as a result of military orders, or the dependent child or spouse of such person, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. However, if the arrival of the person under

orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled. If the qualified military person is transferred, deployed, or restationed while the person's spouse or dependent child is enrolled in an institution of higher education under the control of the board of regents, the spouse or dependent child shall continue to be classified as a resident under this subparagraph until the close of the fiscal year in which the spouse or dependent child is enrolled.

2. A veteran who is domiciled or moves to the state of Iowa and who is eligible for benefits, or has exhausted benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. The dependent child or spouse of a veteran who meets these requirements is entitled to resident status for undergraduate tuition.

However, if the arrival of the veteran in Iowa is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled.

3. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent child or spouse of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the dependent child or spouse is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

FACTS

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.
4. Former domicile in the state and maintenance of significant connections therein while absent.
5. Acceptance of an offer of permanent employment in Iowa.
6. Military orders, if for other than educational purposes.

7. Other facts indicating the student's domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver's license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.

Fee Payment

The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of new charges is available on the first of each month on Access Plus and each student will receive an email message at that time at their Iowa State e-mail address telling them that their bill is available. It is the student's responsibility to ensure that the university has a correct e-mail address and to regularly check their Iowa State e-mail account. Students who do not receive a billing statement before the term begins or are unable to use AccessPlus to view their bill, should contact the Accounts Receivable Office to learn the amount of their account balance due. Failure to receive a billing statement or view their account on AccessPlus will not exempt students from late penalties or from having a hold placed on their registration. Payments for fall semester are due August 20. Payments for spring semester are due January 20. Payments for summer semester are due May 20.

Students may pay their university bill by direct debit through AccessPlus. They may also pay by mail by sending a check or money order (along with the bottom portion of the billing statement printed from AccessPlus) to Iowa State University, Treasurer's Office, 1220 Beardshear Hall, 515 Morrill Road, Ames, IA 50011-2103. Payments may also be made in person by taking the personal check or certified funds to the drop box that is located behind the Student Answer Center on the ground floor of Beardshear Hall.

Credit Type - Audits and zero credit courses: Assessed according to contact hours; maximum charge for zero credit courses is three credit hours.

Credit Type - Partial credits: (.5) assessed on the next larger whole number of credits, e.g., 6.5 credits is assessed as 7 credits.

Credit Type - R credit: Assessed for the minimum fee only if no other credits are taken.

Deferred Billing Plan (payment over three months): This \$20 administrative charge (fall, spring, and summer) is assessed to those students who do not pay their full tuition, room and board charges on or before August 20 for fall semester, January 20 for spring semester, and May 20 for summer session. This permits students to spread payment over three installments. The administrative fee helps defray the extra IT and mailing costs involved in carrying and billing the charges over a longer period of time, as well as the extra personnel required in the Treasurer's Office to handle the traffic involved with three tuition payments per semester instead of one.

Iowa State University offers a deferment option for employees of businesses and organizations that provide tuition reimbursement programs. To enroll in the Employer Reimbursement Deferment Plan, please complete our online form found on AccessPlus in the following location: AccessPlus>Student tab>Account/U-Bill>**Empl Reimb Defer**. With successful enrollment in the deferment plan prior to each semester, all applicable charges will be due 30 days after grades are presented.

A non-deferrable \$35 enrollment fee will be assessed to the student U-Bill after successful enrollment into the deferment plan. Students will be responsible for payment of any non-deferred charges on their U-Bill in accordance with statement due dates.

Iowa State University employees will need to submit a tuition reimbursement request prior to the posted deadline, via AccessPlus>Employee tab>Tuition Reimburse, and obtain approval through University Human Resources. For additional information about eligibility requirements and semester application periods for the Tuition Reimbursement Program, please visit University Human Resources' website (<https://www.hr.iastate.edu/benefits/addlbenefits/>).

For more information about the Employer Reimbursement Deferment Plan, contact Holly Hohanshelt in the Accounts Receivable Office at (515) 294-4786 or hho@iastate.edu.

Installment Payment Plan: This administrative charge is assessed to those who elect the Iowa State University Installment Plan. This plan will allow students to pay tuition, room, board, fees, and accounts receivable costs in twelve equal monthly installments. The \$50 annual application fee will defray the extra IT and mailing costs associated with carrying the charges over a longer period of time, as well as the bank fees associated with the direct debit of payments.

Past Due Accounts: If students have past due accounts receivable charges prior to the beginning of classes, they may be dropped from

enrollment if these past due charges are not paid by the Friday before the first day of class. Students that are subject to being dropped will be notified via their Iowa State e-mail account.

Refunds: Refunds are available for students who cancel or withdraw their registration within the appropriate time period. To cancel their registration, students must notify the Office of the Registrar before the first day of the semester to avoid tuition assessment. Beginning on the first day of the semester, it will be necessary for students to formally withdraw from the university to terminate their registration. More information about canceling registration and withdrawing from classes can be found at <http://www.registrar.iastate.edu/registration/responsibilities.shtml>. (<http://www.registrar.iastate.edu/registration/responsibilities.shtml/>)

Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

Withdrawal Date/Student Pays

Before first day of classes: 0%
 During class days 1-5: 10%
 During class days 6-10: 25%
 During class days 11-15: 50%
 During class days 16-20: 75%
 After the twentieth day of classes: 100%

Students who wish to appeal tuition and fee assessment for withdrawals should contact the Scheduling & Fees area of the Office of the Registrar. Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student.

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

Fee refund for students with a reduction in credits below full-time: 100 percent if change is made through the 10th day of classes. No adjustment is made after the 10th day of classes. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

Workshop and Short Courses Refunds: Students who drop workshops or short courses of one or two weeks on or before the first class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day

of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.

Veterans and Eligible Dependents Receiving Educational Assistance

In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not impose any late fee, deny access to classes or facilities, or assess any other penalty to a Veteran or eligible dependent due to a late payment from the Veterans Administration (VA).

This policy is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapters 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.). In accordance with the SIT-REP Act, students receiving VA educational benefits from Chapter 31 or 33 must provide a certification of eligibility for entitlement of educational assistance to the Office of the Registrar. Nothing in this policy precludes the University from assessing a late fee, denial of access, or any other penalty in relation to payments due the University that are not covered under the SIT-REP Act.

For purposes of this policy, the following terms will be defined as:

- **Late Fee:** A financial penalty, equal to 1% of the outstanding balance, charged to discourage late payment of university bills.
- **Denial of Access:** To prohibit entry, participation, or attendance to an event or facility otherwise afforded to all registered students.
- **Any Other Penalty:** Any other fee, prohibition, or assessment levied upon a student for failure to pay required tuition and fees.

Student Financial Aid

The Office of Student Financial Aid helps families afford Iowa State University. Scholarships, grants, loans, and part-time employment opportunities are available to assist students and families in meeting college expenses. For more information see:

<http://www.financialaid.iastate.edu>

STUDENT RECORDS

Student Records

Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

Student Addresses

Students have the responsibility to notify the Office of the Registrar each time their information changes. Student information changes can be made through the Address Change link on the Student tab in AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>).

Iowa State employees (e.g., Graduate Assistants, student employees, etc.) must also report an address change to the office of University Human Resource Services (<http://www.hrs.iastate.edu/hrs/>). Information changes can be made through the Address Change link on the Employee tab in AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>).

When Records May Be Withheld

The appropriate university official may request that a student's record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld.

The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

Review and Challenge of Records

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual

staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

Posting Grades and Test Scores

Instructors who wish to inform students of their performance may post grades and test scores on a secure course website as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location (World Wide Web or hard copy posting) unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

Release of Grades

Students who choose to release their grades to parents or other trusted third parties may do so using the AccessPlus third party system. Reports of a student's grades are not routinely sent to the student's parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

ISUCard and Identification Number

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a university password, which is required for electronic access to personal student information.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

Social Security Number

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

Policy on Student Names

Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student's complete and legal name; however, we understand and respect that not all students identify with their legal name. If a student does not have the official legal documentation required in the standard Name Change Policy to support their legal name change, the Office of the Registrar will work with the student to still process the name change. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted. After a name change, a current student must obtain a new ISUCard; a replacement fee may apply.

Information Disclosure

Iowa State University is required by law to make available to enrolled students, prospective students, and their parents certain information about the university. The information disclosure policy is available at www.iastate.edu/~disclosure (<http://www.public.iastate.edu/%7Edisclosure/>). Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

Iowa State University Online Directory Information

The ISU Online Directory (<https://www.info.iastate.edu/>) differentiates between verified and guest users:

Verified Users - those accessing the directory from an on-campus server or via Iowa State University's virtual private network (VPN) or other authenticated means.

Information available for display to **verified users** include:

- Name
- Major
- Classification
- ISU Email Address
- Phone Number

Guest Users - those who are external, unauthenticated individuals.

Information available for display to **guest users** include:

- Name
- Major
- Classification

Guest users do not have access to view Iowa State University email address, but they do have the ability to send an email to the student via a webform.

Public Information at Iowa State University

Online directory information and public information may be released to the public upon request, except in cases where the student has suppressed the release of their information. Iowa State reserves the right to review and respond to the requests for release of public information on a case-by-case basis. While FERPA may authorize the release of student information, it does not obligate a school official to do so. See list below for specific types of public data.

Online Directory Information

- Name
- Major
- Classification
- ISU Email Address (for verified users)
- Phone Number (for verified users)

Other Public Information

- Hometown
- Dates of Attendance at ISU
- Expected date of graduation
- College
- Name(s) of adviser(s)
- Awards and academic honors
- Iowa State degree(s) and date(s) awarded
- Previous educational institutions attended, degrees received, dates of attendance
- Full-time or part-time status

- Participation in officially recognized activities and sports
- Weight and height of members of athletic teams

Students can withhold public information through the Address Change link on the Student tab in Access Plus (<https://accessplus.iastate.edu/frontdoor/login.jsp>).

Confidential Information

With the exception of the information noted above, all student records are considered to be confidential and are open only to school officials. A school official is a person employed by the university in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Iowa State University's notification of rights under FERPA can be found at <http://www.registrar.iastate.edu/policies> (<http://www.registrar.iastate.edu/policies/>).

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated school official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:

- Academic records: registrar
- Admissions records: director of admissions
- Financial aid records: director of student financial aid
- Student financials: director of accounts receivable
- Traffic and security records: director, ISU Department of Public Safety
- Medical records: director, Thielen Student Health Center
- Counseling records and test scores: director, Student Counseling Service
- Actions of Academic Standards Committees: college deans
- Disciplinary records: assistant dean of students, office of student conduct
- Residence hall records: director of residence
- Placement records: college placement officers
- Evaluations for admission to ISU graduate or professional programs: deans or department chairs
- Special academic programs: faculty member in charge of the program and the dean of the college
- Student employment: director of university human resources

2. The designated official may release records to other school officials who have a legitimate need for the information. A list of those persons

who normally have access to each type of student record is available in 214 Enrollment Services Center.

3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Enrollment Services Center.

4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived their right to review (e.g. letters of recommendation), nor does it apply to medical and counseling records.

5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student's adviser. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the adviser, but for convenience it may be stored elsewhere such as in the dean's office or department office. When the student changes majors, or changes advisers within the same major, the file is transferred to the new adviser. Under the university's student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.

9. Confidential information may be released by students to their parents or other trusted third parties through the AccessPlus third party system. Confidential information may also be released by obtaining the student's written consent or by having the parent establish the student's dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent's most recent federal income tax return.

10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials

in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.

For the purposes of FERPA, Iowa State University defines Directory Information to include both Online Directory and Other Public Information as defined above.

It is the policy of the university to respect the privacy of students; therefore, only lists containing Directory Information may be made available to members of the public when deemed appropriate and necessary, and in accordance with all applicable Iowa State policies and procedures. While FERPA allows for the release of such information, it does not obligate the university to do so; Iowa State University reserves the right to review and respond to requests for release of information on a case-by-case basis.

Directory Information will be provided at a cost. A sub-set of Directory Information is available via the Online Directory (<https://www.info.iastate.edu/>); please note that the Online Directory differentiates between verified and guest users and displays information accordingly. More information on this can be found in the Public Information section of the University Catalog.

Disclosures Permitted by FERPA

Iowa State University retains the discretion to disclose Directory and Confidential Information as indicated in Section 4 (<http://www.registrar.iastate.edu/policies/>) of Iowa State University's Notification of Rights Under FERPA. Specifically, the university may disclose to the public or to specific individuals, Directory and Confidential Information for reasons of safety if the disclosure meets the criteria under Section 4 (<http://www.registrar.iastate.edu/policies/>).

Grading

Grading System

Grades represent the permanent official record of a student's academic performance. The grading system at Iowa State University operates according to regulations outlined on the Grade Policies tab. The following provides quality points assigned for each letter grades:

Grade	Quality Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67

D+	1.33
D	1.00
D-	0.67
F	0.00
Grade	Description
P	Passing mark obtained under the Pass-Not Pass system.*
NP	Non-passing mark obtained under the Pass-Not Pass system.*
S	Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (required-credit) courses, and in courses numbered 290, 490, 590, and 690.
T	Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.
X	The course was officially dropped by the student after the first week of the term.
N	No report was submitted by the instructor. An N is not a recognized grade or mark, it merely indicates the instructor has not submitted a grade and that a grade report has been requested. A nonreport (N) will automatically change to a grade of 'F' after one calendar year whether or not the undergraduate student enrolled during that period. If the N is outstanding at the time of graduation, it will be converted to a grade of 'F'. Undergraduate students will not graduate with N on their permanent record. Repeating a course will not resolve the N.

I Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student's control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.***

*See Pass Not Pass Grading.

***See Incomplete Marks in the Grade Policies tab.

Policy Information

Grades represent the permanent official record of a student's academic performance. The grading system at Iowa State operates according to the following regulations:

1. Student performance or status is recorded by the grades and marks described below. A student's grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor's degree.

2. Students who want to **protest a grade submitted by an instructor** should follow the procedures described in the section, Appeal of Academic Grievances.

3. Incomplete Marks - If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (downloadable from the Office of the Registrar forms (<http://www.registrar.iastate.edu/forms/>) website) to document the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year or the student's graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete by communicating directly with the student by e-mail or postal mail. A copy of this communication must be retained by the instructor until after the I is resolved in case there are any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter the Incomplete (I) electronically as part of the end of term final grade submission.

Resolving an Incomplete: When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade, which becomes part of the student's

cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, **may not** be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor's department head and the dean of the instructor's college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above. The Grade Report to the Registrar form should be used to initiate the request to change the grade to an Incomplete. The Grade Report form should be completed and forwarded by the instructor to his/her Dean for approval. The Dean will forward the Grade Report form to the Office of the Registrar if approved.

Incompletes in all courses must be resolved by the middle of the student's term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

4. To change a grade or mark already reported to the registrar, the instructor submits the Grade Report to the Registrar form. This form is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

5. Midterm Grades. The registrar will collect C-, D+, D, D- and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisers using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of midterm grades is to provide the student and adviser with a timely warning that the student's academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

6. Grades in all courses attempted remain on each student's record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

7. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average.

8. Repeating Courses.

- The most recent grade for a course a student repeats will be used in computing the student's cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student's record.
 - Students may repeat any course for which an F grade, an NP grade, or any passing grade was received.
 - Beyond 15 credits of repeats, all grades will be included in computing the cumulative grade point average. Please refer to items #1 and #7 above regarding how to calculate the grade point average.
 - Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.
 - Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student's adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.
 - Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.
 - A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.
 - Repeated courses may affect any federal financial aid. See the Financial Aid website (<http://www.financialaid.iastate.edu/>) for further information.
2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.
 3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.
 4. Courses offered on a satisfactory-fail basis may not be taken P-NP.
 5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser's signature in the P-NP approval section of the form.
 6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.
 7. Changes to or from a P-NP basis may not be done after the last day to drop (usually the Friday of week 10 of the term) without college approval. Changes from a P-NP basis to a Graded basis that occur after the last day to drop will still count against a student's 9 maximum allowable P-NP credits.
 8. Registration on a P-NP basis is not indicated on the instructor's class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.
 9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student's grade point average (GPA).
 10. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.
 11. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student's degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student's degree program.

Pass-Not Pass Grading

Students may choose to attempt a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who are not on academic probation (P) at the beginning of the semester are eligible. A special (nondegree) student must obtain approval from their academic adviser and college dean.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students' learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a

regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:

- a. The course is multi-sectioned.
- b. A common departmentally developed examination will be administered to all students in all sections at the same time.
- c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted. Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:

- a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
- b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special

groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.

- c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
- d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
- e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
- f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Prep Week

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Prep Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Prep Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Prep Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Prep Week must be listed on the syllabus provided at the start of the course.
- Mandatory final examinations may not be given during the Prep Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.
- No in-class quizzes or exams may be given on the Thursday and Friday of Prep Week. Quizzes/exams that are administered outside of class such as take-home exams, online exams, or exams given in the testing centers must: 1) open no later than Wednesday at noon of Prep Week, and 2) only cover material presented on or before the Tuesday of Prep Week.

Exceptions to this policy include the following:

- Classes that only meet on Thursdays or Fridays
- Lab components of courses
- Half-semester courses
- Make-up exams due to excused absences
- Regularly used formative assessments intended to enhance student engagement and guide course delivery

All other exceptions require approval by the Office of the Senior Vice President and Provost.

- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Prep Week period. Any exception to these restrictions must be authorized in advance by the Office of the Senior Vice President for Student Affairs.

Instructors are reminded that most students are enrolled in several courses each semester, and the widespread violation of this policy can cause student workloads to be excessive as students begin their preparation for final examinations.

Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

Policy approved by Faculty Senate, Senior Vice President and Provost, and President, 2013; Amended and approved by Faculty Senate, Senior Vice President and Provost, and President, 2017.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. **Dean's List.** Each semester the university issues a dean's list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean's list is issued for summer school. The list can be viewed from the Office of the Registrar website (<http://www.registrar.iastate.edu>).
2. **Top 2 Percent.** Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student's permanent record.
3. **Graduation with Distinction.** Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State

University at the time they graduate, including a minimum of 50 graded credits.

Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student's official transcript and diploma and in the commencement program.

Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

4. **Honors Program.** Students who are full members of the University Honors Program need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student's permanent record and diploma, and in the commencement program.

Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

ACADEMICS

Classification

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school. See Grades for information about the grading system at Iowa State University.

Classification in all colleges except Veterinary Medicine is as follows:

Sophomore: 30 credit hours earned

Junior: 60 credit hours earned

Senior: 90 credit hours earned

Students who have a bachelor's degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special (nondegree) student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special (nondegree) student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as an undergraduate special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special (nondegree) students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Degree Planning ISU Degree Audit

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>). The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student's curriculum.

Students should use the degree audit information to help them review progress towards their degrees(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will meet all degree requirements upon successful completion of the courses on the student's schedule that term.

In addition, through AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>), students may request a degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress course work applies toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

Two Bachelor's Degrees

Students may receive two bachelor's degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form, Request for Double Major/ Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will have access to the student's information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor's Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

Double Major/Curriculum

A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, "Request for a Double Major/Curriculum or Two Degrees." This form, available from advisers and classification offices, should be completed at least one term prior to graduation. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student's rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student's registration adviser, but both advisers will have access to the student's information. Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

Second Major (Curriculum) Completed after the Bachelor's Degree

After receiving a bachelor's degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean's office.

Changing Curriculum or Major

A student's freedom to change their major, and the procedure that should be followed, depend on the student's academic standing and on policies of individual colleges as approved by the provost.

1. If students have never been dismissed and reinstated, they may change their major by consulting first with their adviser. Procedures for changing curriculum or major are as follows:
 - a. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
 - b. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and their file from their adviser, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.
2. Students on academic probation (P) may be restricted by rules outlined in the section on Additional Academic Standards Regulations.
3. Students who have been reinstated may not transfer to another college within the university during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

Declaring a Minor

Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students' transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. See [/collegescurricula/#minors](#) for additional information regarding policies which govern minors. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student's transcript and a printed certificate will be awarded.

Academic Grievances and Appeals

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an academic grievance more than one year following completion of the course, and may not initiate the grievance of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal grievance, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor's

department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal within 45 calendar days in writing to the dean of the instructor's college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair's decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor's college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward within 45 calendar days a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within fifteen calendar class days of receipt of the written notice of the appeal.

Within ten calendar days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost's decision may be made within 45 calendar days to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Student Government. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

Graduation

Seniors must file a graduation application with the Graduation Office, 210 Enrollment Services Center. Students will be notified of their graduation status approximately mid semester of their graduation term. For graduation application instructions and deadlines, go to the Graduation and Commencement website (<http://www.graduation.iastate.edu/>).

Iowa State University commencement ceremonies are held at the end of fall and spring semesters. Undergraduate students expected to graduate at the end of summer semester are invited to participate in the spring ceremony preceding their graduation term or the fall ceremony following their graduation term. In addition to the formal University commencement ceremony, the undergraduate colleges host graduation activities take place at the end of fall and spring semesters. For

more information see www.registrar.iastate.edu/graduation/ (<http://www.registrar.iastate.edu/graduation/>)

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. Registration for the term has been completed and the date of graduation is correct on the degree audit printout.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State; and student has met all special grade point average requirements established by their college, department, or program in specified courses.
 - a. Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.
 - b. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.
5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.
7. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their transcripts. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validating Enrollment for regulations concerning attendance to validate students' enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course.

Additional information regarding discretionary accommodation for disability and religion are available at <http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml> (<http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml/>)

Veteran Attendance

In accordance with the requirements of the Servicemembers Improved Transition through Reforms for Ensuring Progress Act (SIT-REP Act, December 31, 2018), the University will not deny access to classes or facilities to a Veteran or eligible dependent due to a late payment from the Veterans Administration. This is only applicable to Veterans or eligible dependents who are receiving educational assistance under Chapter 31 (VR&E) or 33 (Post 9/11 and Fry Scholarship) of title 38, United States Code (U.S.C.). For the purposes of this policy, "Denial of Access" shall be defined as "to prohibit the entry, participation, or attendance to an event or facility otherwise afforded to all registered students." More information about this policy is available at <https://catalog.iastate.edu/tuitionfees/#feepaymenttext>.

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at <http://www.veterans.iastate.edu>. (<http://www.registrar.iastate.edu/veterans/>)

Field Trips/Curricular-Related Activities

Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday -Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot

be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (<http://classes.iastate.edu/>).

Excusable Absences for Non-Curricular Reasons

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence. While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student's work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student's ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

Extra-Curricular Activities as a Representative of the University

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:

- academic or professional conferences and workshops
- intercollegiate athletic, academic, and judging competitions
- musical, theatrical, dance and other artistic performances
- presentations or programs given to external audiences

Other Extra-Curricular Activities

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

Military Service

Instructors shall excuse absences due to performing required National Guard or other United States military service obligations (other than annual training). When a student is called to active duty for more than two weeks, instructors should meet with the student and the student's adviser to discuss the situation and academic options. University procedures are in place for such situations and should be followed.

Court Appearances

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

Examinations and Evaluation Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students' learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
 - a. The course is multi-sectioned.
 - b. A common departmentally developed examination will be administered to all students in all sections at the same time.

- c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted. Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
- Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
 - Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
 - Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
 - If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
 - If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
 - All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Prep Week

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Prep Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Prep Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Prep Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Prep Week must be listed on the syllabus provided at the start of the course.
- Mandatory final examinations may not be given during the Prep Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.
- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Prep Week period. Any exception to these restrictions must be authorized in advance by Office of the Dean of Students.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. **Dean's List.** Each semester the university issues a dean's list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean's list is issued for summer school. The list can be viewed from the Office of the Registrar website (<http://www.registrar.iastate.edu>).

2. **Top 2 Percent.** Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student's permanent record.

3. **Graduation with Distinction.** Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits.

4. **Cumulative grade point recognition.** Students who graduate with a cumulative grade point average of 3.50 or higher are recognized as follows:

- Summa Cum Laude: cumulative grade point average of 3.90 or higher.
- Magna Cum Laude: cumulative grade point average of 3.70 to 3.89.
- Cum Laude: cumulative grade point average of 3.50 to 3.69.

This recognition appears on the student's official transcript and diploma and in the commencement program.

5. **Candidates for the bachelor of liberal studies degree** may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

6. **Honors Program.** Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the

student's permanent record and diploma, and in the commencement program.

Academic Conduct

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Validating Enrollment for regulations concerning attendance to validate students' enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets their policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce their policy at the beginning of the course.

Additional information regarding discretionary accommodation for disability and religion are available at <http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml> (<http://www.hrs.iastate.edu/AAO/eod/reasonaccom.shtml/>)

Veteran Attendance

Students who receive benefits from the Veterans Administration are required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at <http://www.veterans.iastate.edu/>.

Field Trips/Curricular-Related Activities

Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday -Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (<http://classes.iastate.edu/>).

Excusable Absences for Non-Curricular Reasons

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments

resulting from an excusable absence. While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student's work toward passing their course. If a student must miss, for any reason, a portion of a course that, in the considered opinion of the course instructor, is critical to the student's ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

Extra-Curricular Activities as a Representative of the University

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department- or university-sponsored activities, including:

- academic or professional conferences and workshops
- intercollegiate athletic, academic, and judging competitions
- musical, theatrical, dance and other artistic performances
- presentations or programs given to external audiences

Other Extra-Curricular Activities

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

Military Service

Instructors shall excuse absences due to Veteran or military service obligations (including service-related medical appointments, military orders dictating appointments, and National Guard Service obligations). When a student's military or veteran obligations are for more than two weeks, the student should meet with their adviser to discuss the situation and academic options and work with their instructors to discuss potential accommodations. University procedures are in place for such situations

and should be followed. In all instances, students have a responsibility to communicate with their instructors to ensure they are continuing to meet course expectations and requirements. Faculty, staff, and students are encouraged to utilize the ISU Veterans Center and review information at [veterans.iastate.edu](https://www.veterans.iastate.edu/) (<https://www.veterans.iastate.edu/>).

Court Appearances

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

Academic Misconduct

Academic misconduct occurs when a student uses or attempts to use unauthorized information in the completion of an exam or assignment; or submits as their own work themes, reports, drawings, laboratory notes, or other products prepared by another person; or knowingly assists another student in such acts; or plagiarism. Such behavior is disparaging to the university and students found responsible for academic misconduct can face a number of disciplinary sanctions such as a disciplinary reprimand, conduct probation, deferred suspension, suspension, or expulsion.

Instances of academic misconduct ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.

Examples of specific acts of academic misconduct include but are not limited to:

1. **Obtaining unauthorized information.** Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, copying coursework posted by another student at an online academic warehouse (Course Hero, Chegg, Study Blue, etc.), or by looking at your notes or other written work during an examination when not specifically permitted to do so.
2. **Tendering of information.** Students may not give or sell their work to another person who plans to submit it as their own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, giving or selling a term paper to another student, or posting coursework created by an instructor at an online academic warehouse (Course Hero, Chegg, Study Blue, etc.).
3. **Misrepresentation.** Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing or downloading for use a paper from a term paper service or online academic warehouse; reproducing another person's paper (even with modifications) and submitting it as their own; having another student

complete any form of course work (draft form or for credit), or having someone else take their exam.

4. **Bribery.** Offering money or any item or service to a faculty member or any other person to gain academic advantage for yourself or another is dishonest.
5. **Plagiarism.** Unacknowledged use of the information, ideas, or phrasing of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws. Literary offenses of this kind are known as plagiarism. Plagiarism occurs when a person does not credit the sources from which they borrow ideas, whether these ideas are reproduced exactly or summarized. The method of documentation will differ depending on whether the sources are written, oral, or visual. Ethically, communicators are responsible for providing accurate, detailed information about their sources. Practically, audiences need this information to comprehend and evaluate a message's content.

Academic misconduct is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic misconduct is therefore subject to appropriate academic penalty, to be determined by the instructor of the course, as well as sanctions under the university Student Disciplinary Regulations (<http://www.policy.iastate.edu/policy/SDR/>). If an instructor believes that a student has behaved dishonestly in a course, the following steps are recommended:

1. Arrange for an opportunity to meet with the student and discuss your conclusions.
2. Allow the student to provide their side of the story, and ask if they admit or deny responsibility for the misconduct.
3. If they **deny** responsibility, do not yet assign a grade for the assignment or course (**leave grade as N for grade processing**).
4. If they **admit** the misconduct, you may assign a grade according to your discretion and what you may have outlined in your syllabus.
5. Refer the case and information to the Dean of Students Office, including related materials such as emails, exams, essays, & websites.
6. When an outcome is determined by the Dean of Students Office, both the student and the instructor will be notified and apprised of the disciplinary process conclusions.

If a student either admits dishonest behavior or is found responsible for academic misconduct by the Office of Student Conduct or the Student Conduct Hearing Board, sanctions are imposed based on the severity of the misconduct, and might include any of the following:

1. **Disciplinary Reprimand:** An official warning followed by written notice to the student that their conduct is in violation of university rules and regulations.
2. **Conduct Probation:** A more severe sanction than a disciplinary reprimand it is a period of review and observation during which the student must demonstrate the ability to comply with university rules, regulations, and other requirements stipulated for the probation period.
3. **Deferred Suspension:** A suspension, but which is deferred subject to a definite or indefinite period of observation and review. If a student is found responsible for a further violation of the university Student Disciplinary Regulations or an order of a judiciary body, suspension may be recommended to the Dean of Students Office.
4. **Defined Length Suspension:** The student is dropped from the university for a specific length of time. This suspension cannot be for less than one semester or more than two years. Reinstatement may be contingent upon meeting the written requirements specified at the time the sanction was imposed, if any.
5. **Indefinite Suspension:** The student is dropped from the university indefinitely. Reinstatement may be contingent upon meeting the written requirements specified at the time the sanction was imposed, if any. Normally, a student who is suspended indefinitely may not be reinstated for a minimum of two years.
6. **Expulsion:** The student is permanently deprived of the opportunity to continue at the university in any status.
7. **Transcript Notation:** When a student is sanctioned with an expulsion, suspension, or revocation of admission, a notation is made on the student's academic transcript.

Educational sanctions are often also assigned.

Course and academic outcomes (grades) related to incidents of academic dishonesty are determined and assigned by faculty pursuant to their course policy and/or college-specific policy.

A student accused of academic misconduct has the option to stay in the class or to drop the class if the drop is made within the approved time periods and according to the regulations established by the university.

Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of seven years, after which the file records are purged. These student records are subject to state and federal laws and regulations guiding confidentiality of student records. However, when the student is expelled, suspended, or their admission is revoked, a notation will appear on the academic transcript that the student has been dropped due to disciplinary action and is not eligible

to enroll. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the Office of Student Conduct is available to consult with the instructor in deciding a proper course of action to be taken.

Response to Classroom Disruption

Should any student officially enrolled for credit or audit in a class disrupt the instructor's ability to ensure a safe learning environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom or learning environment disruption, the instructor may, if they find it necessary, explain to the student and the class why the particular action is deemed disruptive. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention as discussed in more detail in the Faculty Handbook. (<http://www.provost.iastate.edu/>)

Additional guidance and resources for managing classroom disruption are available from CELT (<https://www.celt.iastate.edu/teaching/effective-teaching-practices/classroom-behavior/>).

Course Ownership

Ownership of Course-related Presentations

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell or post the notes or recordings for sale or subscription must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Student Conduct Code (<https://www.policy.iastate.edu/policy/SDR/#4225>).

Recording and Transmission of Classes

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on their classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases, and with permission of faculty, the recordings may be preserved and used for other classes as well.

Progress and Probation Additional Academic Standards Regulations

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate. Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval. The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

Changing colleges: A student on academic probation (P) may transfer to another program in the university before period 3 begins (before the last day to drop a course.) For students on academic probation (P), transfer during period 3 (after the last day to drop a course) can only occur under exceptional circumstances and with the approval of the chair of the new program and the dean of the new college. A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.

Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of the term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.

Special (nondegree) students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or

secretary of their college academic standards committee in their college office.

The university's academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee's judgment, the student's academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student's ISU cumulative grade point average, are subject to Iowa State University's academic standards.

Maintaining Satisfactory Progress

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student's semester grade point average (GPA), the student's cumulative ISU GPA, and the student's transfer GPA (if below 2.00.)

Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student's permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

- Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or

- They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university. Academic probation is an indication of very serious academic difficulty. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both. Academic probation status is not a part of the student's permanent academic record.

Students on academic probation and warning are required to meet with their adviser and to complete the Academic Intervention Self Assessment form, which can be accessed here: <http://www.dso.iastate.edu/asc/ai/students/>

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.
2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

- Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA.
- Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).

- Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Academic Dismissal for dismissal policy.

Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal

Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student's academic record as a permanent notation. The official transcript of a student who has been dismissed includes a "Not Permitted to Register" notation.

Summer Academic Standards Regulations

Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:

All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student's grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Summer Cumulative GPA:

A student who was on academic probation (P) at the beginning of summer term based only on cumulative GPA, who raises his or her

cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA < 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

Summer Option for Students in Dismissal Status:

Starting with the 2019-20 University Catalog, Summer Option will no longer be an option for students in dismissal status.

STUDENT SERVICES

1010 Student Services Building

(515) 294-1020

The Dean of Students Office (DSO) at Iowa State University uses an integrated approach to support student-centered learning through personal, community and academic development culminating in a transformative experience. Reporting through the Division of Student Affairs, the DSO provides numerous opportunities for students to engage in learning beyond the classroom. The sixteen departments that comprise the DSO collaborate to create and support a common community experience for Iowa State University students. Our common goal across all areas within the DSO is to support student success.

Student Counseling Service

Director of Counseling: Dr. Chris Hanes

The Student Counseling Service (SCS) assists students in enhancing their academic success and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Services include:

- One-on-one counseling for any issue of personal concern, such as depression, anxiety, stress management, relationship issues, identity issues, and other forms of personal challenge. Students may also receive therapeutic services to deal with more severe mental health issues.
- Couples counseling for ISU students and their partners during times of relationship difficulty.
- Eating disorders assessment and treatment for students concerned with eating or body image issues. Students receiving treatment for eating disorders might also work with physicians, nutritionists, and personal trainers as their needs require.
- Substance abuse assessments to help students determine the nature and extent of their alcohol or other drug use and the impact of this use on their well being. Counselors offer recommendations and referrals for any concerns identified through the assessment.
- Career counseling to assist students having difficulty choosing a major or making decisions about their future after college.

- Group counseling is offered to facilitate personal growth and social skills learning. A list of the current semester's groups is available on the SCS web site.
- A variety of outreach programs are also available.

Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Nominal fees are also charged for uncanceled missed appointments. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the Student Counseling Service without the written permission of the client unless an imminent harm condition exists.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

Both SSSP and ISSO are listed under Dean of Students Office section.

Thielen Student Health Center

Thielen Student Health Center is a full-service medical clinic in Ames, Iowa, that specializes in students. The clinic is staffed with physicians, advanced registered nurse practitioners and nurses. The medical team is available to care for your primary health care needs.

The clinic offers a full range of medical services including illness and injury care, women's health, allergy and travel care, immunizations, mental health care, laboratory and x-ray services, physical therapy and a full-service pharmacy. After hour service is available for urgent or emergency problems at McFarland Urgent Care Clinic or Mary Greeley Medical Center Emergency Room.

The Prevention Services department provides campus-wide leadership for a comprehensive approach to reduce health risks for students. In collaboration with our campus and community partners, they strive to foster a healthy campus environment and support the academic success of our students. Areas of focus include high-risk drinking and sexual and interpersonal violence.

The mission of the Thielen Student Health Center is to promote the optimal health of our university community by providing high quality, accessible, affordable and accountable health care that encompasses prevention, wellness and education and to support the academic success of the Iowa State University students while building healthy habits for a lifetime.

We provide an inclusive, non-judgmental environment for our diverse student body and are conveniently located on the corner of Sheldon Avenue and Union Drive, right across from State Gym.

Student Health receives no funding from the state of Iowa and relies on the health fee for approximately 50% of its operating budget. Please note that the health fee is not health insurance. All students are encouraged to maintain adequate health insurance coverage while enrolled at Iowa State University. Those taking 4 or fewer credits may still access services by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services.

Clinic hours:

Monday, 8 a.m.-6 p.m.; Tuesday, Thursday and Friday, 8 a.m.-5 p.m.; Wednesday, 9 a.m.-5 p.m.; Saturday, 9 a.m.-12 noon. Hours vary during breaks and summer session. Patients are seen by appointment. Please call 515-294-5801.

The University Library

<http://www.lib.iastate.edu/>

Dean of the Library Services: Beth McNeil

General Information (515) 294-3642

The University Library provides extensive research collections, services and information literacy instruction/information for all students. Facilities consist of the main Parks Library, the Veterinary Medical Library, Design Reading Room, and a remote library storage building.

The library's extensive collections include electronic and print resources that support research and study for all undergraduate and graduate programs. Nationally recognized collections support the basic and applied fields of biological and physical sciences. Library holdings include more than 2,858,448 volumes and approximately 121,125 current serial titles. The library has access to 447,689 electronic books.

The library's instruction program includes an undergraduate information literacy course as well as a wide variety of subject-based seminars on effective use of library resources for undergraduate and graduate students.

The library website provides access to local and web-based resources including electronic journals and books, local collections, online indexes, electronic course reserves and guides, and a broad range of subject research guides. Assistance in using this vast body of electronic resources is available at the Help Desk on the first floor, on the library website through the Ask Us! link, and through individually arranged appointments with librarian liaisons. The Digital Repository @ Iowa State provides free, public access to the research and scholarship of Iowa State's faculty, students and staff.

A limited number of semiprivate study rooms available for graduate students, intended for research and other scholarly activities that require extensive use of library material, are available. Parks Library has group study rooms, multi-media production studios, a presentation room and collaborative multi-media study areas. The library has over 232 public computers and a laptop checkout program with over 100 Apple and Windows laptops, iPads, Apple Pencils, and iPad chargers that may be checked out from the Tech Lending room (Rm 117 Parks Library). Also located in Parks Library - ITS Solution Center, Online Learning Hub, and The Bookends Café.

Student Answer Center

<https://www.financialaid.iastate.edu/student-answer-center/>

Students who have questions but are not sure where to find an answer may contact the Student Answer Center located on the ground floor of Beardshear Hall. A staff member will answer campus-related questions on the spot or provide referrals to other university departments as needed. Information may include registration instruction, financial aid status, or classroom directions. Students can pick up forms, information brochures, campus maps, or use one of the computers to log on to AccessPlus or e-mail. Questions can be answered by email at answercenter@iastate.edu or by phone 515-294-4469.

Career Services Offices

Agriculture and Life Sciences: 15 Curtiss Hall

Business: 1320 Gerdin Business Building

Design: 297 College of Design

Engineering: 4th Floor Memorial Union

Graduate Business: 1360 Gerdin Business Building

Human Sciences: 131 MacKay Hall

Liberal Arts and Sciences: 131 Carver Hall

Veterinary Medicine: 2270A Veterinary Medicine Complex

Career Services is a coordinated network of career services offices offering a broad range of programs and services for undergraduate, professional, and graduate students, faculty, staff, alumni, and employers. These services include career exploration, career development, experiential learning, and professional career search assistance programs. The goal is to provide constituents with life-long skills to assist with career development and exploration.

Programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsors multiple career fairs, which bring to the ISU campus hundreds of employers. The career services offices also coordinate on-campus interview opportunities. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

In addition to the college-based career services offices, the Career Exploration Service provides a variety of services to students who are unsure about their major or future career path. Students can work one-on-one with a trained career counselor, use the many books and electronic resources in the Career Exploration Center, or enroll in UST 104, Personal Career Development.

Additional information on career services is available at <http://www.career.iastate.edu/>.

Child Care

Child Care Administration, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care coordinator is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:

- Center for Child Care Resources: Assistance in locating campus and community child care services, 100 University Village, Suite 1010, 515-294-8833 or 1-800-437-8599
- University Community Childcare, Family Resource Center, 100 University Village, 515-294-9838
- The Comfort Zone: Childcare for kids who don't feel so good, 100 University Village, 515-294-3333.
- Flex-Care: Part time care for children of ISU students, 100 University Village, 515-294-9838.
- University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.
- ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care coordinator at 515-294-8827.

STUDENT LIFE

Memorial Union

The Memorial Union completes the college experience by developing leadership, community, and career readiness.

515-296-6848; www.mu.iastate.edu (<http://www.mu.iastate.edu>)

Arts, Entertainment, Recreation:

- CyBowl & Billiards: bowling, billiards, video arcade, table tennis
- Maintenance Shop: live music, comedy, open mic
- Student Union Board: weekly films, comedy, music, diverse programs, special events, much more
- Art exhibits and art-for-rent
- Workspace: art and crafts classes for fun, studios for work in wood, jewelry, pottery; button maker
- TVs, lounges, study spaces

Student Organizations

- Student organization offices and meeting space; recognition process.

Dining & Shopping

- Food Court & MU Market & Café
- Panda Express
- University Book Store

Study Spots

- Multicultural Center
- Browsing Library & Computer Lab; Chapel;
- Lounges: Main, West, Pride, Commons & more

Services

- Meeting rooms, catering
- Parking ramp
- Copy Center
- Soult's Family Visitor Center
- ATMs, M-Shop Ticket Office, Lockers (in the MCC)
- U.S. Post Office – full service
- Student Legal Services
- Veteran's Center
- Center for LGBTQIA+ Student Success
- Sorority and Fraternity Student Engagement
- Student Government
- University Lectures
- International Students and Scholars

- Study Abroad
- NCORE/ISCORE

Distinctive Feature

- Gold Star Hall, a living memorial to Iowa State service personnel lost in the nation's conflicts

Memorial Union Student Activities

Jim Brockpahler

Coordinator For Entertainment Operations
Dustin Smothers

Coordinator For Major Programs
Katie Haygood

SAC Office Coordinator
Brigitte Milhous

Memorial Union Student Activities is committed to helping students learn inside and outside the classroom by offering countless ways to get involved at Iowa State through leadership, service, arts, entertainment and recreation activities.

The Student Activities Center includes: the Workspace (arts studio), the Maintenance Shop (entertainment venue), CyBowl & Billiards (recreation center/ bowling alley), Cyclone Cinema, leadership and service programs, art galleries in the MU, and management of the recognition of over 900 campus and student organizations. For a complete list of recognized organizations, visit www.stuorg.iastate.edu.

The staff provides assistance to student and campus organization leaders, members and advisers on an individual or group basis. Available on the SAC website are resources for student and campus organizations including the event authorization process, publicity and promotion ideas, constitution writing guidelines, and officer transition information. MU Student Activities is home to the Leadership and Service Center which provides hands on support for students interested in leadership and service opportunities and student organization officers looking to better

their clubs. In addition, MU Student Activities offers a 3-credit course called Leadership ISU, where students learn leadership capacity through a series of activities and seminars, as well as many other leadership conferences and retreats. Reservations for the Lynn Fuhrer Lodge are managed by this office as well.

MU Student Activities coordinates the Co-Curricular Transcript (CCT), an online system to help students manage their experiences, achievements and involvement while as an Iowa State student. Faculty and staff can add verified entries while students can add their own self-managed entries as well. Entries are added to one of the following categories: Campus Involvement, Community Service, Honors and Awards, Internships and Study Abroad, Leadership Experience, On Campus Employment, Publications, Recreational Activities, Research, and Seminars and Workshops. From there students can create customized and comprehensive transcripts to use when applying for jobs, internships, scholarships, graduate school or leadership opportunities.

Annual events include: ClubFest & Spring ClubFest (organization involvement fair), WelcomeFest (Ames and ISU opportunity fair), ISU AfterDark (substance-free alternative program- six times per year), Iowa State Leadership Experience (one-day leadership conference), and Winterfest (celebration of all things winter).

More information is available at the Memorial Union Student Activities Office, located in the East Student Office Space in the MU (across from Panda Express); online at www.sac.iastate.edu; or by calling (515) 294-8081.

Lectures

www.lectures.iastate.edu/ (<http://www.lectures.iastate.edu/>)

Throughout the academic year, the Committee on Lectures brings to the campus a number of speakers eminent in national and international affairs, the sciences, and the arts. In addition to giving formal lectures, a number of these speakers meet with students informally for meals and discussions. Through these lectures and discussions the students are given a well-rounded presentation on a range of subjects including popular culture, educational and economic philosophy, the arts, and technological and scientific development. Past speakers include evolutionary biologist Richard Dawkins and physicist Michio Kaku; activist Gloria Steinem; writers Margaret Atwood and Cheryl Strayed; and former Secretary of State Madeleine Albright.

The World Affairs Series is an annual series of speakers on a topic of international interest. The National Affairs Series invites speakers on a topic of national concern. The Committee on Lectures also sponsors or co-sponsors dramatic and film events.

Students are encouraged to contact the lectures program office and become involved in the planning of these events.

Honor Societies

Honor societies at Iowa State University provide opportunities for students who excel in the classroom and want to network with others in their major. Members of these honor societies are eligible for transcript recognition through the Office of the Registrar. The complete list of honor societies can be found on the student organization website at www.stuorg.iastate.edu (<https://www.stuorg.iastate.edu/orgtype/12/>)

REGISTRATION

Registration/Enrollment

In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls.

Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student's academic adviser. All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula.

Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls.

Disabled students who need assistance with any phase of registration should contact the Student Disability Resources office.

Validating Enrollment

To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop the course or they will receive an F grade.

Enrollment Status

Enrollment status is defined for certification purposes as either full-time or half-time.

Full-time status, fall or spring semester

Undergraduates: 12 credits

Graduates: 9 credits

Three-quarters status, fall or spring semester

Undergraduates: 9 credits

Graduates: 7 credits

Half-time status, fall or spring semester

Undergraduates: 6 credits

Graduates: 5 credits

Summer status

Summer status depends on the number of weeks a student is enrolled. Always contact the Office of the Registrar to verify a student's status for a summer session.

With the exception of enrollment certification for veterans' benefits, credit hours are rounded up to the next whole number. For example, credit load of 11.5 credits is rounded up to 12 credits. Contact the Office of the Registrar for more information.

Registration Responsibilities

The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involve the student's adviser; the student services staff of the student's college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

Student

- knowing and adhering to university policies and procedures that apply to registration and schedule changes
- checking the accuracy of his/her schedule on AccessPlus, including schedule adjustments (i.e., adds, drops, section changes)
- knowing the degree requirements of his or her major and/or curriculum
- planning course schedules to meet those requirements; and monitoring the accuracy of the degree audit.

Adviser

- consulting with advisees during the advising/registration period
- providing information about student's major and curriculum requirements
- providing guidance in the student's course selection
- assisting in monitoring the degree audit for accuracy
- notifying the college student services office with corrections to the degree audit.

College Student Services Staff

- assisting new and reentering students with the registration process
- resolving unusual scheduling problems
- updating the degree audit or solving problems concerning the degree audit.

Dean

- making decisions with respect to requests for deviations from university policies, deadlines, etc.

Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Class Schedule Planner

The Class Schedule Planner is an application that allows students to plan their schedules using courses displayed in the Schedule of Classes. Students can select courses and/or sections they want to take for a particular term, as well as block out unavailable class days and times. Based on those selections, Class Schedule Planner can return all possible schedules to the student in a color coded grid format.

Though it is a Web-based application, the Class Schedule Planner does not require authentication (no user ID, PIN, or password). Therefore, it is essential that students understand this is a planner and as such, it does not register them in courses and cannot be used to complete their registration. The application requires that the user have Java on their computer. The first screen of the Planner provides information about how to use the planner and simple instructions for downloading the Java application. A useful Help link also has been provided. The Class Schedule Planner is available at <http://classes.iastate.edu/planner> (<http://classes.iastate.edu/planner/>).

Using AccessPlus Registration

Students enter the system via AccessPlus by using university ID and password. A registration access number (RAN) also is needed, if required by their college.

The registration system provides messages after each entry indicating whether each request has been processed. Students also may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

All students are encouraged to register for courses through the AccessPlus registration system. However, students who are unable to use the system may register in person by processing their signed Registration Worksheet in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Registration System Abuse

Using the AccessPlus registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisers have the right to determine abuse and revoke privileges for any type of registration system abuse.

Registration Process

To register for classes, students need the following materials and information:

- Registration Worksheet, available for download at www.registrar.iastate.edu/forms/ (<http://www.registrar.iastate.edu/forms/>).

- A RAN (registration access number) if required by their college.
- Course information from the Online Schedule of Classes at <http://classes.iastate.edu/> (http://classes.iastate.edu).
- Other departmental information applicable to their curriculum, available from their adviser.

Students are expected to do the following in the advising and registration process:

1. Meet with their adviser, who will provide the following:

- a. degree audit
- b. guidance in course selection
- c. Registration Authorization form, with RAN, if applicable.

2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases advisers will not be involved in selecting meeting times.

3. Review their registration start date/time information and any registration hold information on AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>), under Current Information. Students in those colleges which require a four-digit registration access number (RAN) should meet with their adviser in advance of their start date, to obtain their Registration Authorization Card on which the RAN is printed.

4. Register for courses using the AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>) registration system.

Making Schedule Changes

Students may make most schedule changes through the first five days of class using the AccessPlus (<https://accessplus.iastate.edu/frontdoor/login.jsp>) registration system.

Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

Schedule change periods for full term courses are as follows:

Period 1 ends on the fifth day of classes in the fall and spring semesters.

Schedule changes during period 1 do not require adviser signatures. Instructor or departmental approval may be required for adds or section changes for some courses during period 1. Course drops during this period do not count toward a student's ISU course drop limit, and will not appear on a student's permanent record. Schedule changes during period 1 may be processed through the AccessPlus registration system or by presenting a Schedule Change form to the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Period 2 ends the Friday of week 10 in the fall and spring semesters. It is important for students to make well-informed decisions when adjusting

their course schedules, particularly because such decisions often have financial and/or academic implications. To best support students' decision-making process, students need to obtain signatures from their academic adviser and course instructor on a Schedule Change form.

For students who wish to add or change sections of a course, or adjust course credit hours, the signatures grant permission for a student to make the requested change.

In most cases, the decision to drop a course rests with the student; as such, this signature is not one of permission, but rather to indicate a conversation has occurred between the student and the adviser and instructor.

Course drops after period 1 count toward a student's ISU drop limit and appear as an X on the permanent record. A section change does not require a drop.

Drops and other schedule changes that are judged to be beyond the student's control may be processed as administrative actions if approved by the college dean. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. The effective date of an administrative action is the date it is approved by the college dean or authorized representative.

Period 3 is anytime after period 2. Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the student, and must be approved by the dean of the student's college or authorized representative.

Half-Semester and Partial Term Courses

Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find out specific deadlines for partial term courses, contact the Registrar's Student Scheduling Office, 10 Enrollment Services Center, 294-2331.

R-Credit Courses (required courses)

Processing a scheduling change for a required course is usually considered administrative. There is no fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. To make a Period 3 R-credit drop administrative requires approval of the college dean.

Dates and Deadlines

Dates for registration are published in the university calendar (<http://www.event.iastate.edu/>) (choose the Academic calendar link), and at www.registrar.iastate.edu/calendar/ (<http://www.registrar.iastate.edu/calendar/>).

Students are assigned a registration start date and time, which is the first day and time they can use the registration system. Registration start dates are assigned based on projected year in school classification (computed by combining total credits, current term credits, and current term test out credits). Then specific start dates within projected year in school are established by using the sum of total credits and current term test out credits.

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at <http://www.registrar.iastate.edu/calendar/registration-start-dates> (<http://www.registrar.iastate.edu/calendar/registration-start-dates/>).

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not initiated by the end of the fifth day of classes, students must obtain written permission from their advisers, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that time.

Withdrawal of Admission to the University

New undergraduate students who wish to withdraw their admission to the university prior to the first day of classes must initiate their withdrawal by completing the Admissions Office's Application Change Form: https://www.admissions.iastate.edu/forms/change_application.php.

Cancellation/Withdrawal - Currently Enrolled Students

Students who decide not to attend classes before the date class work begins must cancel their registration (<http://www.registrar.iastate.edu/students/cancel-withdraw/>) to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first

day of class or later must withdraw from the university (<http://www.registrar.iastate.edu/students/withdrawal/>).

Course Information

Prerequisite. A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. For more information, see Information About Courses (<http://catalog.iastate.edu/informationaboutcourses/>), Course Prerequisite.

Permission Required courses/sections. To register for these sections, students must obtain authorization on a Request for Schedule Change or Restriction Waiver form and process the approved form in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during summer orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Request for Schedule Change or Restriction Waiver form. The form is processed in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Classrooms are listed for each course in the Online Schedule of Classes at <http://classes.iastate.edu/> and on the student's class schedule on AccessPlus, beginning approximately 3 weeks prior to the start of the term.

Cancelled courses/sections. In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their AccessPlus schedule.

Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the Schedule of Classes. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

Credit Limits

For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limits are 12 credits for undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their adviser. Advisers should

notify the student's college student services office if the credit limit needs to be changed.

Registration Holds

Students with holds on their registration will not have access to registration until the initiating offices have released the holds. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration. Prior to their registration, students may check for holds on AccessPlus.

Drop Limit

Students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.) Students who entered Iowa State University as freshmen are allowed to drop a maximum of five courses during their undergraduate career. If they entered at a level above freshman classification or in the College of Veterinary Medicine, they are allowed to drop a maximum of four courses. Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count as a first term for this purpose. Students who enroll at Iowa State University as undergraduates after receiving a bachelor's degree are permitted four drops.

Exceptions to the drop limit may be made for courses that must be dropped for reasons beyond the student's control. These exceptions are granted only by the dean or other authorized person in the student's college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding their limit. At the instructor's discretion, students who attempt to drop a course beyond the limit without special permission by the dean of the student's college will continue to be enrolled in the course and will receive a grade at the end of the term.

Auditing

To audit a course means to enroll in the course without receiving credit for the course. The instructor of the course approves the audit request.

Students are assessed tuition and fees as though they are taking the course for credit, but the audited course does not count in determining full-time student status. However, an audited course does count towards the maximum allowable credits per semester. Audited courses do not apply toward V.A. benefits.

Graduate students: An audited course counts as one credit in the graduate student's allowable course load; however, tuition and fees will be assessed for the full number of credits for the course. See Graduate College.

Changing status to audit: Changing a course from credit to audit requires dropping the course for credit and adding it as an audit on a schedule

change request form. After day 5 of the semester, the drop will count toward the total allowable ISU drops. The drop appears on the student's permanent record.

Rights and privileges: Once enrolled in an audited course, auditors have the same rights and privileges as any student taking the course for credit. Their names appear on the class list with a notation that they are auditing the course. Audited courses do not appear on the student's permanent record except by special request from the student. A request form can be downloaded from the Office of the Registrar website at www.registrar.iastate.edu/forms (<http://www.registrar.iastate.edu/forms/>).

Audit Deadlines and Required Signatures

In addition to the deadlines provided below, note that instructors must approve all audits.

• Full semester courses:

Adding an audit—day 10 deadline:

- Through day 5 of classes: instructor approval required.
- Day 6-10: instructor, adviser approval required.
- After day 10: only with extenuating circumstances, instructor, adviser, college approval required.

Changing status, from credit to audit—day 10 deadline:

- Through day 5 of classes: instructor approval required.
- Day 6-10: instructor, adviser, college approval required.
- After day 10: only with extenuating circumstances, instructor, adviser, college approval required.

Changing status from audit to credit—day 5 deadline:

- Through day 5 of classes: instructor approval required.
- After day 5: instructor, adviser, college approval required.

• Partial semester or summer courses:

Deadlines are determined based on the length of the course. For deadlines concerning partial term or summer courses, contact the Scheduling & Fees Office, 515-294-2331.

Reinstatement

The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean's office in the college they wish to enter for instructions specific to that college. The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a

plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.

2. Students can only be reinstated after at least one academic semester has elapsed since they were academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.
3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academic dismissal. The summer session is not a semester for the purpose of being out of school one semester.
4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student's academic standing when the transfer is requested.
5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 12 or more months or who are international students must also file a reentry form prior to their return. For more information see the Reentry web site at <http://www.registrar.iastate.edu/info/reentry.html> (<http://www.registrar.iastate.edu/students/reentry/>). (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)
6. Juniors and seniors with extenuating circumstances may request a waiver of their required semesters of absence as identified in number 2 and 3 above. The petition requesting early reinstatement must be submitted through procedures specified by their college's Academic Standards Committee.
7. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal

Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written

appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee's action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee's action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee's action. The dean must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:
 - a. Students must not have enrolled at Iowa State University for four or more consecutive calendar years.
 - b. Students must not have graduated from Iowa State University.
 - c. Students must have demonstrated satisfactory academic performance as evidenced by earning a GPA of at least 2.00 over a minimum of 12.00 credit hours taken after returning to the university. If more than one semester is taken to reach 12.00 credit hours, the combined GPA of all semesters/terms of enrollment after returning to the university must be 2.00 or greater.
2. Conditions. Academic renewal is based on the following conditions:
 - a. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.

- b. Renewal may be applied only to academic terms completed prior to the students' extended absence.
 - c. All courses and grades for the chosen terms will remain on the students' academic record.
 - d. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
 - e. Students who have used all of their drop options will be given one extra drop.
 - f. Students may be granted only one academic renewal.
3. Procedures.
 - a. Students should discuss their desire to pursue academic renewal with an adviser in the college they wish to enter.
 - b. The student must complete the Academic Renewal Petition form available from www.registrar.iastate.edu/forms (<http://www.registrar.iastate.edu/forms/>) .
 - c. After the form is signed by the student and academic adviser, it is submitted to the Records area in the Office of the Registrar, 214 Enrollment Services Center.

Returning/Reentry to the University

U.S. students who have been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed since last enrolled, a U.S. student must apply for reentry to the university. All international students must apply for reentry regardless of the time away from the university.

Returning Students

U.S. undergraduate and U.S. non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and international non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form.

Returning U.S. students and graduate students should contact the Office of the Registrar at 515-294-2331 or reentry@iastate.edu to have their records updated and registration access created. Students should contact their advisers to select courses and begin the registration process.

International students must complete a reentry form regardless of the length of their absence. Forms are available from <http://www.registrar.iastate.edu/forms/> . International Students must also complete the Returning to ISU electronic form for the International Students and Scholars Office in order to receive their new I-20 or DS-2019. The form can be found under the F-1 or J-1 Student Services tab in Cystart at <https://cystart.its.iastate.edu>. If you have questions or

concerns in regards to your documents, please contact the International Students and Scholars Office at 515-294-1120 or isso@iastate.edu.

Returning students who want to change their curricula should follow the same procedure as in-school students. Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that they wish to reenter. (See Reinstatement/Renewal for policies that apply to requests for reinstatement).

Reentry Students

Undergraduate and nondegree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available from <http://www.registrar.iastate.edu/forms/>.

Students with a bachelor's degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate application.

International Students must also complete the Returning to ISU electronic form for the International Students and Scholars Office in order to receive their new I-20 or DS-2019. The form can be found under the F-1 or J-1 Student Services tab in Cystart at <https://cystart.its.iastate.edu>. If you have questions or concerns in regards to your documents, please contact the International Students and Scholars Office at 515-294-1120 or isso@iastate.edu.

The reentry form should be completed and returned to the Office of the Registrar, 10 Enrollment Services Center, well in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Reentering students must also contact their departmental office/adviser to prepare a class schedule. Reentry must be approved prior to registration.

Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

Graduate Students

Returning graduate students that have been enrolled in the last 24 months and are looking to continue in the same program, should contact the Office of the Registrar at 515-294-2331 or reentry@iastate.edu

to have their records updated and have registration access created. Students should contact their major professor to select courses and begin the registration process.

Reentering graduate students that have not been enrolled in the last 24 months, or are looking to come back in a different program than previously enrolled, please go to the Returning Graduate Students (<https://www.grad-college.iastate.edu/common/forms/inactive-to-active/>) website and follow the instructions for your specific situation.

Please contact the Graduate College at 515-294-4531 if you have question on returning to the Graduate College.

International students also need to contact International Students and Scholars Office, 3248 Memorial Union, Ames, IA 50011-1130, phone: 515-294-1120, fax: 515-294-8263, or email: intlserv@iastate.edu to find out any steps that need to be taken prior returning.

Reentry Approval Process

Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average.

Information About Courses

A-Z Courses (<http://catalog.iastate.edu/azcourses/>)

Course Numbers

The courses in each department are numbered from 1 to 699, according to the following groups:

- 1-99 Courses not carrying credit toward a degree (zero credit).
- 100-299 Courses primarily for freshman and sophomore students.
- 300-499 Courses primarily for junior and senior students.
- 500-599 Courses primarily for graduate students, but open to qualified undergraduates.
- 600-699 Courses for graduate students.

Off-campus courses-Residential Credit

Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, and CD/DVD. Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record

at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

Priority Enrollment

High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Special Course Fees

Courses for which special course fees are assessed are designated in the Schedule of Classes. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental Math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Additional information on camp fees and the developmental Math fee may be found in the fees and expenses section.

Independent Study

Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department's prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student's work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work the student do for that credit, and the system by which the student will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor's permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.

Credits and Contact Hours

The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture per week for the entire 16-week semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture hour; additional outside work may be required for laboratory or studio classes. The Office of the Registrar will maintain a table of faculty-approved credit-contact hour equivalencies for the types of instruction (e.g. lecture, studio,

internships, research courses) offered by the institution: <https://www.registrar.iastate.edu/faculty-staff/offeringinfo/define> (<https://www.registrar.iastate.edu/faculty-staff/offeringinfo/define/>).

Courses offered for less than a full semester (e.g. summer terms or compressed formats) will fulfill the same contact hour requirements as full-semester courses having the same credit hours. For example, a student enrolled in a one-credit course offered in an 8-week (half-semester) format should expect two hours of lecture and four hours of out of class preparation per week. Similarly, a course offered in hybrid, online, or distance education format is expected to meet the same contact hour requirement, and offer equivalent student-faculty/student-student interaction and class preparation time, as the same course taught in a traditional format.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures. For example, COM S 227 Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term "Cr. arr." means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term "Cr. R." means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student's degree, but it does apply toward the degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student's drop limit and will not appear on the student's transcript. (See Schedule Changes.)

Credit Involving a Paid Activity

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department.

The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student's learning will be assessed.

Semester of Offering

Within each course description may be found one or more of the following letters: F, S, SS., indicating which term—fall, spring, summer session—of the academic year the course is offered. "Alt." is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite

A prerequisite indicates the specific academic background or general academic preparedness considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite (or approval may be given following the appropriate departmental process) for a course for which they are responsible. Thus, permission of the instructor (or departmental process) is understood to be an alternate to the stated prerequisites.

It is university policy that the department or instructor informs enrolled students who have not met the prerequisite requirements that they must drop the course. Instructors have the right to neither accept, nor grade the work of a student who does not meet the stated prerequisite, or its equivalent (as determined by the process established in the department offering the course). Notification should be done as soon as possible and prior to the first day of class whenever possible. For students enrolled after the first day of class, notification must be given as soon as possible.

Some courses have been approved by their colleges to use administrative drops to enforce prerequisites. In such cases, the department shall inform the enrolled students who have not met the prerequisite requirements that they must drop the course or provide evidence of equivalent preparation to be reviewed by the department. Notification

should be done prior to the first day of class for students enrolled prior to the first day of class. For students enrolled after the first day of class, notification must be given as soon as possible. After such notification (via email or Canvas announcement), the student must drop the course within 3 business days, or initiate a review of their equivalent preparation. This timeframe should be indicated to the student during the notification process. If a student does not drop the course or have a successful review of an equivalent, the department or instructor may contact their college student services office to initiate an administrative drop to remove the student from the course. Additionally, students whose request to waive the prerequisite is denied, will be administratively dropped from the course. Administrative drops will be completed by the 10th day of the semester in most cases. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses

A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Dual-listed Courses

Dual-listed courses permit undergraduate and graduate students to be in the same class while receiving credit for either undergraduate or graduate level work.

Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase "Dual-listed with," although the student's official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

ENTRY LEVEL COURSES

Resources for Course Information

<http://catalog.iastate.edu/azcourses/>

<http://classes.iastate.edu>

Additional experimental courses: courses not published in the catalog.

The following courses are suitable for first year students. Course numbers that begin with 0 (e.g., MATH 010) may incur an additional "developmental course" fee. See the Tuition and Fees web site for more information about other fees (<http://www.registrar.iastate.edu/fees/othfee/>).

A B E 160: Systematic Problem Solving and Computer Programming

(2-2) Cr. 3. S.

Prereq: Credit or enrollment in MATH 143 or MATH 165

Engineering approach to problem solution and presentation. Introduction to basic principles from dynamics, statics, conservation laws, and basic electricity. Use of spreadsheet programs and computer programming language(s) to solve and present engineering problems. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, EE 185, IE 148, M E 160 and S E 185 may count towards graduation.

A B E 170: Engineering Graphics and Introductory Design

(2-2) Cr. 3.

Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A M D 131: Fashion Products and Markets

(3-0) Cr. 3. F.

Fashion industry from concept to consumer. Focus on fashion-driven consumer goods. Development and prototyping of fashion products for a target market.

A M D 165: Dress, Appearance, and Diversity in Society

(3-0) Cr. 3. F.S.

Examination of dress and appearance practices and experiences of marginalized identities and communities in the United States. Introduction to fashion- and dress-related theories, culture and identity concepts, and social justice concepts and issues in regards to dress, appearance, and fashion in the fashion industry.

Meets U.S. Diversity Requirement

ADVRT 230: Advertising Principles

(3-0) Cr. 3.

Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy and appeals. Study of the creation of advertising.

AER E 160: Aerospace Engineering Problems With Computer Applications Laboratory

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Solving aerospace engineering problems and presenting solutions through technical reports. Significant figures and estimation. SI units. Graphing and curve fitting. Introduction to aerospace engineering and engineering design. Spreadsheet programs. History of aerospace. Systems thinking. Team projects.

AF AM 201: Introduction to African American Studies

(3-0) Cr. 3. F.S.

An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

Meets U.S. Diversity Requirement

AFAS 141: Foundations of the United States Air Force

(1-0) Cr. 1. F.

No-commitment exploratory course introducing the United States Air Force and the Air Force Reserve Officer Training Corps program. Topics include Air Force heritage and culture, professional military officership values and expectations, and future career opportunities with an emphasis on cultivating leadership and communication skills.

AGRON 120: Introduction to Renewable Resources

(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

AGRON 180: Global Agriculture in a Changing World

(3-0) Cr. 3. F.

A scientific investigation of the global distribution of climate, soils and agricultural production and consumption. Physical processes that connect natural resources to agriculture and the environment. How global change drives increasing demand for agricultural production.

Meets International Perspectives Requirement.

AGRON 206: Introduction to Weather and Climate

(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

AM IN 201: Native People in American Culture

(3-0) Cr. 3. F.S.SS.

Perceptions and realities of Native people living in and responding to American society and culture. Topics include representations, contemporary Native identity, literature, the arts, history, film, and issues of diversity.

Meets U.S. Diversity Requirement

AM IN 210: Introduction to American Indian Studies

(3-0) Cr. 3. F.S.SS.

Introduction to the multidisciplinary aspects of American Indian Studies. Topics include the relevant events and ideas defining the contemporary American Indian experience, on and off reservation, in the United States. Sovereignty, identity, jurisdiction, taxes, economic development, education, and other issues are addressed.

Meets U.S. Diversity Requirement

AN S 101: Working with Animals

(1-2) Cr. 2. F.S.

A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

AN S 114: Survey of the Animal Industry

(2-0) Cr. 2. F.S.

Principles of management and care of domestic animals, including genetics, nutrition, and reproduction. Service of domestic animals to society in terms of food, shelter, protection, fuel and emotional well-being. Basic biology, industry structure, management practices and production systems.

ANTHR 201: Introduction to Cultural Anthropology

(3-0) Cr. 3. F.S.SS.

Comparative study of culture as key to understanding human behaviors in different societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.

Meets International Perspectives Requirement.

ANTHR 202: Introduction to Biological Anthropology and Archaeology

(3-0) Cr. 3. F.S.

Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology.

ANTHR 230: Globalization and the Human Condition

(3-0) Cr. 3. F.S.

An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific.

Meets International Perspectives Requirement.

ARCH 221: History of Pre-Modern Architecture

(3-0) Cr. 3. F.

Survey of pre-modern western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750.

Meets International Perspectives Requirement.

ART H 280: History of Art I

(3-0) Cr. 3. F.

Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic periods.

Meets International Perspectives Requirement.

ART H 292: Introduction to Visual Culture Studies

(3-0) Cr. 3.

An introduction to various topics in visual culture studies, including significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture.

Meets U.S. Diversity Requirement

ASTRO 103: Evening Star

Cr. 1. F.S.

An entirely web-based course covering topics in celestial mechanics ("Rocket science!") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Blackboard Learn. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 120: The Sky and the Solar System

(3-0) Cr. 3. F.S.SS.

For the nonscientist. A survey of our view of the universe, and the exploration of the solar system and beyond. The sky: constellations; motions of the Sun, Moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the Sun, planets, satellites, comets, meteorites, and asteroids. The detection and characterization of other solar systems, and the search for life in the universe. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 150: Stars, Galaxies, and Cosmology

(3-0) Cr. 3. F.S.

For the nonscientist. A survey of astronomy with a focus on the universe beyond our solar system. Basic observational astronomy and the history of astronomy. Stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The structure and evolution of the Milky Way Galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe.

BBMB 101: Introduction to Biochemistry

(1-0) Cr. 1. F.

Basic structure and function of biological molecules: protein, lipids, nucleic acids, and carbohydrates. Introduction to frontier technologies in the biosciences, and a survey of careers and research in biotechnology. For students majoring in Biochemistry or Biophysics or considering one of these majors.

BIOL 101: Introductory Biology

(3-0) Cr. 3. F.S.SS.

Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

BIOL 155: Human Biology

(3-0) Cr. 3. F.S.

A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173: Environmental Biology

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 211: Principles of Biology I

(3-0) Cr. 3. F.S.

Prereq: High school biology

Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L: Principles of Biology Laboratory I

(0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in BIOL 211

Laboratory to accompany 211.

BIOL 212: Principles of Biology II

(3-0) Cr. 3. F.S.

Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177

Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L: Principles of Biology Laboratory II

(0-3) Cr. 1. F.S.

Prereq: credit or enrollment in BIOL 212

Laboratory to accompany 212.

BIOL 255: Fundamentals of Human Anatomy

(3-0) Cr. 3. F.

Prereq: High School Biology and Chemistry, or BIOL 101

An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 255L: Fundamentals of Human Anatomy Laboratory

(0-3) Cr. 1. F.

Prereq: Credit or enrollment in BIOL 255

Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Does not satisfy biology major requirements.

BUSAD 102: Business Learning Team Orientation

(1-0) Cr. 1. F.S.

A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Only one of BusAd 102 or BusAd 103 may be counted towards graduation.

BUSAD 103: Orientation

(1-0) Cr. 1. F.S.

A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Only one of BUSAD 102 or BUSAD 103 may be counted toward graduation.

C E 160: Engineering Problems with Computational Laboratory

(2-2) Cr. 3. F.S.

Prereq: Credit or enrollment in MATH 165

Engineering approach to solving problems and presenting results with applications to examples in civil, construction, and environmental engineering, such as problems in statics. Dimensions and units. Data processing, graphing, and curve fitting. Formulating and solving fundamental and practical engineering problems with spreadsheets and a structured programming language. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 185, I E 148, M E 160 and S E 185 may count towards graduation.

C E 170: Graphics for Civil Engineering

(0-4) Cr. 2. F.S.

Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

C R P 201: The North American Metropolis

(3-0) Cr. 3. F.S.

Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today.

Meets U.S. Diversity Requirement

C R P 251: Fundamentals of Geographic Information Systems

Cr. 3. F.

Fundamentals of the concepts, models, functions and operations of Geographic Information Systems (GIS). Principles of spatial problems, spatial questions and hypotheses and their solutions based on spatial data, GIS tools and techniques. Integration of concepts and applications through lectures and facilitated labs. Applications from a variety of areas including design; physical, social, and human science; engineering; agriculture; business and medicine, landscape architecture, architecture, urban planning, geology, forestry, biology, and ecology.

CH E 160: Chemical Engineering Problems with Computer Applications Laboratory

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Formulation and solution of engineering problems. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to material balances, engineering economics, and design. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. Chemical Engineering examples. Only one of ENGR 160, A B E 160, AER E 160, CH E 160, C E 160, CPR E 160, E E 185, I E 148, M E 160 and S E 185 may count towards graduation.

CHEM 050: Preparation for College Chemistry

(3-0) Cr. 0. F.S.

Prereq: 1 year high school algebra

An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. Credit for Chem 50 does not count toward graduation.

CHEM 160: Chemistry in Modern Society

(3-0) Cr. 3. F.S.

Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

CHEM 163: College Chemistry

(4-0) Cr. 4. F.S.SS.

Prereq: 1 year of high school algebra and geometry and Chem 50 or 1 year of high school chemistry; and credit or enrollment in CHEM 163L

A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 163L: Laboratory in College Chemistry

(0-3) Cr. 1. F.S.SS.

Prereq: Credit or enrollment for credit in CHEM 163

Laboratory to accompany CHEM 163. Must be taken with CHEM 163. Only one of Chem 163L, CHEM 167L, and CHEM 177L may count toward graduation.

CHEM 167: General Chemistry for Engineering Students

(4-0) Cr. 4. F.S.

Prereq: 1 year of high school chemistry or CHEM 50 and Math 140 or high school equivalent.

Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177: General Chemistry I

(4-0) Cr. 4. F.S.SS.

Prereq: MATH 140 or high school equivalent, and CHEM 50 or 1 year high school chemistry, and credit or enrollment in CHEM 177L. Chemistry and biochemistry majors may consider taking CHEM 201

The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177L: Laboratory in General Chemistry I

(0-3) Cr. 1. F.S.SS.

Prereq: Credit or enrollment for credit in CHEM 177

Laboratory to accompany 177. 177L must be taken with 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177N: Laboratory in General Chemistry I

(0-3) Cr. 1. F.

Prereq: Credit or enrollment for credit in CHEM 177. For chemistry and biochemistry majors

Laboratory to accompany CHEM 177. CHEM 177N must be taken with CHEM 177. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 178: General Chemistry II

(3-0) Cr. 3. F.S.SS.

Prereq: CHEM 177, CHEM 177L, or CHEM 167

Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses.

CHEM 178L: Laboratory in College Chemistry II

(0-3) Cr. 1. F.S.SS.

Prereq: CHEM 177L and credit or enrollment for credit in CHEM 178

Laboratory to accompany 178. 178L is not a necessary co-requisite with 178.

CHEM 201: Advanced General Chemistry

(5-0) Cr. 5. F.

Prereq: Co-enrollment in MATH 165 or credit, one year of high school chemistry, and one year high school physics or advanced chemistry. Co-enrollment in CHEM 201L.

A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHIN 101: Elementary Mandarin Chinese I

(4-0) Cr. 4. F.

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. For students whose native language is not Chinese.

CHIN 201: Intermediate Mandarin Chinese I

(4-0) Cr. 4. F.

Prereq: CHIN 102

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. For students whose native language is not Chinese. Meets International Perspectives Requirement.

CJ ST 240: Introduction to the U.S. Criminal Justice System

(3-0) Cr. 3. F.

Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

CJ ST 241: Youth and Crime

(Cross-listed with SOC). (3-0) Cr. 3. F.

An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

CL ST 273: Greek and Roman Mythology

(3-0) Cr. 3.

Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories.

Meets International Perspectives Requirement.

COM S 101: Orientation

Cr. R. F.S.

Introduction to the computer science discipline and code of ethics, Com S courses, research and networking opportunities, procedures, policies, help and computing resources, extra-curricular activities offered by the Department of Computer Science and Iowa State University. Discussion of issues relevant to student adjustment to college life. Offered on a satisfactory-fail basis only. Offered on a satisfactory-fail basis only.

COM S 103: Computer Literacy and Applications

Cr. 4. F.S.SS.

Introduction to computer literacy and applications. Literacy: Impact of computer technology in today's societies, hardware, software, software programming, database and information systems, communication and networks, digital media technology, computer security and safety, ethics and privacy. Applications: In-depth hands-on experience with the operating systems, Microsoft word processing, spreadsheets, database management and presentation software. No prior computer experience necessary. Offered online only. Attendance required at an orientation session the first week of class.

COM S 104: Brief Introduction to Computer Programming for Non-Majors

(1.5-1) Cr. 2. F.S.

Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.

COM S 107: Windows Application Programming

(3-0) Cr. 3. F.S.

Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

COM S 113: Introduction to Spreadsheets and Databases

(2-2) Cr. 3. F.S.SS.

Using Microsoft Excel spreadsheets and Microsoft Access databases to input, store, process, manipulate, query, and analyze data for business and industrial applications. Credit in Com S 113 may not be applied toward graduation in the COM S, S E, and CPR E majors.

COM S 207: Fundamentals of Computer Programming

(Cross-listed with MIS). (3-1) Cr. 3. F.S.SS.

Prereq: MATH 150 or placement into MATH 140 or higher

An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/MIS 207 and Com S 227.

COM S 227: Object-oriented Programming

(3-2) Cr. 4. F.S.SS.

Prereq: Credit or Enrollment in MATH 143 or higher; recommended: a previous high school or college course in programming or equivalent experience.

Computer programming using objects as the mechanism for modularity, abstraction, and code reuse. Instance variables, methods, and encapsulation. Review of control structures for conditionals and iteration. Developing algorithms on strings, arrays, and lists. Recursion, searching, and sorting. Text parsing and file I/O. Interfaces, inheritance, polymorphism, and abstract classes. Exception handling. Tools for unit testing and debugging. Emphasis on a disciplined approach to specification, code development, and testing. Course intended for Com S majors. Credit may not be applied toward graduation for both Com S 207 and 227.

COM S 228: Introduction to Data Structures

(3-1) Cr. 3. F.S.SS.

Prereq: Minimum of C- in COM S 227, credit or enrollment in MATH 165

An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism, and generics. Abstract data type specification and correctness. Collections including lists, stacks, queues, trees, heaps, maps, hash tables, and graphs. Big-O notation and algorithm analysis. Searching and sorting. Graph search and shortest path algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

COMST 101: Introduction to Communication Studies

(3-0) Cr. 3.

An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

COMST 211: Interpersonal Communication

(3-0) Cr. 3.

Application of major principles related to interpersonal communication theories, concepts, and research. Emphasis on using interpersonal communication skills effectively.

CPR E 131: Introduction to Computer Security Literacy

(Cross-listed with INFAS). (1-0) Cr. 1.

Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 185: Introduction to Computer Engineering and Problem Solving I

(2-2) Cr. 3.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using a programming language.

DANCE 270: Dance Appreciation

(3-0) Cr. 3. F.S.

Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required. Meets International Perspectives Requirement.

DES 230: Design Thinking

(3-0) Cr. 3.

Introduction to design thinking processes, toolkits, and mindsets, and its interaction with art, design, and technology. Emphasis on interdisciplinary practices.

DS 201: Introduction to Data Science

Cr. 3. Alt. F., offered irregularly. Alt. S., offered irregularly.

Prereq: 1-1/2 Years of High School Algebra

Data Science concepts and their applications; domain case studies with applications in various fields; overview of data analysis; major components of data analysis pipelines; computing concepts for data science; descriptive data analysis; hands-on data analysis experience; communicating findings to stakeholders, and ethical issues in data science.

DSN S 102: Design Studio I

(1-6) Cr. 4.

A foundation design studio exploring two and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Creative processes, visual order, materials, and critical thinking are investigated through studio projects. Lectures and discussions cover the topics introduced in studios.

DSN S 115: Design Collaborative Seminar

(1-0) Cr. 0.5.

Prereq: Member of Design Collaborative Learning Community

Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 131: Drawing I

(1-6) Cr. 4.

An introduction to methods of visual thinking and drawing through studio experiences and lectures. All design fields utilize visual communication and drawing. Focus on the use of drawing as a method for creative problem solving, design development and visual communication. Explore, from observation and imagination, the use of fast sketching and in-depth drawing, using various scales, mediums and processes.

DSN S 183: Design in Context

(3-0) Cr. 3.

Explores designed media, objects, places, spaces, structures, and systems as products of varied and often intersecting contexts. Using historical and contemporary case studies, investigates how cultural, economic, environmental, spatial, social, and temporal contexts, among others, affect design. Explores in particular how design addresses complex and multifaceted problems.

DSN S 232: Digital Design Communications

(3-0) Cr. 3.

Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

E E 185: Introduction to Electrical Engineering and Problem-Solving I

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Project based examples from electrical engineering. Systematic thinking process for engineering problem solving. Group problem solving. Mathematical, conceptual and computer based projects. Solving engineering problems and presenting solutions through technical reports and oral presentations. Solutions of engineering problems using computation tools and basic programming.

ECON 101: Principles of Microeconomics

(3-0) Cr. 3. F.S.SS.

Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value.

ECON 101L: Laboratory in Principles of Microeconomics

(0-2) Cr. 1. F.

Prereq: Concurrent enrollment in the appropriate section of ECON 101

Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

ECON 102: Principles of Macroeconomics

(3-0) Cr. 3. F.S.SS.

Prereq: ECON 101 recommended

Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance.

ECON 235: Introduction to Agricultural Markets

(3-0) Cr. 3. F.S.

Prereq: ECON 101

Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools.

EDUC 204: Social Foundations of Education in the United States:**Secondary**

(3-0) Cr. 3. F.S.SS.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis is placed on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning at the secondary level in public schools. For prospective teachers in an ISU Secondary Educator Preparation program; open to students who are considering teaching and/or work in education as a career path.

EDUC 205: Social Foundations of Education in the United States: Early Childhood and Elementary Education

Cr. 3. F.S.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis on topics and tensions in the relationship between school and society (e.g., equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning in public schools. Students in K-12 education, secondary, education, or a non-education major should take EDUC 204.

EDUC 219: Orientation to Teacher Education: FCS Education, History, Math and Science Majors

Cr. 1. F.S.

Prereq: Students seeking teacher licensure in Family and Consumer Sciences, History, Mathematics Science in grades 5-12

Overview of mathematics, science, family and consumer sciences and history secondary education (grades 5-12), teacher licensure requirements in Iowa and other states. Program and career planning. Offered on a satisfactory-fail basis only.

ENGL 099S: Strategies for Nonnative Speakers of English: Academic Speaking and Pronunciation

Cr. 0. F.S.

Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option

ENGL 101B: English for Native Speakers of Other Languages: Academic English

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101C: English for Native Speakers of Other Languages: Academic English II--Undergraduates

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 150: Critical Thinking and Communication

(3-0) Cr. 3. F.S.SS.

Prereq: Concurrent enrollment in LIB 160 is recommended.

Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio.

ENGL 201: Introduction to Literature

(3-0) Cr. 3.

Prereq: Credit in or exemption from 150

Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

ENGL 214: Introduction to Technical Communication

Cr. 3. F.

Prereq: ENGL 150

A broad introduction to the culture of professional work as a technical communicator, with particular emphasis on principles and best practices for developing and managing technical information and digital media. Examination of user-centered design, the history of the discipline, cross-cultural communication, and the ethics of communicating complex information to lay audiences. Study and practice of team-based collaboration, project management, and technical editing.

ENGL 225: Survey of British Literature to 1800

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 226: Survey of British Literature since 1800

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres and may include texts that reflect and/or critique the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

ENGL 237: Survey of Film History

(2-3) Cr. 3. F.

Prereq: Credit in or exemption from 150

A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present. Class meets two hours per week for lecture and discussion. Lab meets up to 3 hours for film screenings.

ENGL 240: Introduction to American Indian Literature

(Cross-listed with AM IN). (3-0) Cr. 3. F.

Prereq: Credit in or exemption from ENGL 150

Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works. Meets U.S. Diversity Requirement

ENGL 250: Written, Oral, Visual, and Electronic Composition

(3-0) Cr. 3. F.S.SS.

Prereq: ENGL 150 or exemption from ENGL 150; sophomore classification or exemption from ENGL 150; credit for or concurrent enrollment in LIB 160

Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of communication portfolio. The University requires a minimum grade of C in ENGL 250 to meet the Communication Proficiency graduation requirement; some majors/degree programs may set higher standards.

ENGL 275: Analysis of Popular Culture Texts

(Cross-listed with SP CM). (3-0) Cr. 3. F.S.

Prereq: Credit in or equivalent of 250

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

ENGR 160: Engineering Problems with Computer Applications Laboratory

(2-2) Cr. 3. F.S.SS.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations

Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

ENT 201: Introduction to Insects

(2.7-0) Cr. 1. F.S.SS.

Biological and ecological aspects of insects. Offered online only. 5 weeks.

ENT 211: Insects and Society

(2.7-0) Cr. 2. F.S.

Prereq: ENT 201

The importance of insects in human well-being. Insect-human interactions. Primarily for non-science and non-agriculture majors. Offered online only. 11 weeks.

ENT 214: Insects in Forensic Science

(3-0) Cr. 3. Alt. F., offered even-numbered years.

Prereq: none

Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology.

ENT 220: Introduction to Forensic Science

(Cross-listed with CJ ST). (3-0) Cr. 3. S.

Prereq: none

Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced.

ENV S 101: Environmental Geology: Earth in Crisis

(Cross-listed with GEOL). (3-0) Cr. 3. F.S.SS.

Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding.

ENV S 120: Introduction to Renewable Resources

(Cross-listed with AGRON, NREM). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

ENV S 173: Environmental Biology

(Cross-listed with BIOL). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

ENV S 201: Introduction to Environmental Issues

(Cross-listed with BIOL, ENSCI). (2-0) Cr. 2. F.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

EVENT 171: Introduction to Event Management

(3-0) Cr. 3. F.S.

Overview of the event management industries. Techniques and procedures required for producing successful and sustainable events.

FRNCH 101: Elementary French I

(4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture.

FRNCH 201: Intermediate French I

(4-0) Cr. 4. F.

Prereq: FRNCH 102

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture.

Meets International Perspectives Requirement.

FS HN 101: Food and the Consumer

(3-0) Cr. 3. F.S.SS.

Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics.

Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 167: Introduction to Human Nutrition

(3-0) Cr. 3. F.S.SS.

Prereq: High school biology or 3 credits of biology

Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

GEOL 100: How the Earth Works

(3-0) Cr. 3. F.S.SS.

How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, landforms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in Geol 100L.

GEOL 100L: How the Earth Works: Laboratory

(0-2) Cr. 1. F.S.

Prereq: Credit or enrollment in GEOL 100

Students will gain understanding of how Earth processes affect their lives and how they affect the Earth, and of the complex nature of the Earth and its processes. They will gain a deep knowledge of the methods used to understand the time scales and rates of Earth processes also through an applied research experience on groundwater and surface water.

GEOL 101: Environmental Geology: Earth in Crisis

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.SS.

Exploration of the interactions between humans and the geologic environment, and the consequences of those interactions, on local to global scales. Discussion of water, soil, mineral, and energy resources, pollution, climate change, and natural hazards such as earthquakes, volcanism, mass wasting, and flooding.

GEOL 105: Gems and Gemstones

(2-0) Cr. 1. F.

Offered in second half of the semester. Introduction to gems and gemstones, physical and optical properties of gems and gemstones, explanation of where gems come from and how they are found, how to distinguish between synthetic and naturally occurring gems, how the value of gems are determined, and the history of famous gems.

GEOL 108: Introduction to Oceanography

(Cross-listed with ENV S). (3-0) Cr. 3. F.

Introduction to the study of oceans and the processes that helped shape them. A major focus is on how the oceans work, with special attention on geological, chemical, and biological processes. Ocean circulation and its influence on climate. Life of the oceans. Use and misuse of ocean resources. Anthropogenic impacts on the oceanic environment.

GEOL 111: Geological Disasters

(Cross-listed with ENV S). (1-0) Cr. 1. F.S.SS.

Introduction to the catastrophic geologic processes with the potential to devastate human populations that continue to expand into regions at greatest risk from geologic hazards. Selected case studies and discussion of plate tectonics, climate, and earth processes explain the driving forces behind natural hazards such as earthquakes, tsunamis, volcanic eruptions, landslides, and floods.

GEOL 201: Geology for Engineers and Environmental Scientists

(2-2) Cr. 3. F.

Introduction to Earth materials and processes with emphasis on engineering and environmental applications.

GER 101: Elementary German I

(4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. For beginning-level learners who have little or no prior exposure to German.

GER 201: Intermediate German I

(4-0) Cr. 4. F.

Prereq: GER 102

Intermediate level development of reading, writing, listening comprehension, and speaking in German within the context of German culture. Intensive review of basic grammar covered in the first-year German class (or equivalent high school courses) while exploring cultural topics and themes.

Meets International Perspectives Requirement.

GLOBE 201: Global Resource Systems

(3-0) Cr. 3. F.S.

A comparative analysis of global resources and the various natural and human systems affecting those resources. Assessed service-learning component.

H S 105: First Aid and Emergency Care

(1-2) Cr. 2. F.S.SS.

Discussion and application of the basic techniques of utilizing bloodborne pathogen safety measures, administering first aid and cardiopulmonary resuscitation. ARC layperson certification available.

H S 110: Personal and Consumer Health

(3-0) Cr. 3. F.S.

Physical, mental, emotional and social aspects of health as a basis for understanding and promoting health, and preventing poor health conditions. Study of personal responsibility on the long-term benefits of maintaining a high level of wellness and health. Identification and mitigation of negative lifestyle habits.

H SCI 110: Orientation and Human Sciences Career Exploration

(2-0) Cr. 2. F.S.

Orientation and adjustment to the university and college; review of policies and procedures; academic resources; and course selection and planning. Comprehensive approach to career development; intensive self-analysis; and in-depth examination of majors in Human Sciences. Required for all students declared as an Undecided major in the College of Human Sciences.

H SCI 150: Dialogues on Diversity

(1-0) Cr. 1. F.S.

An exploration of diversity within the context of the Iowa State University community through understanding human relations issues.
Meets U.S. Diversity Requirement

HD FS 102: Individual and Family Development, Health, and Well-being

(3-0) Cr. 3. F.S.SS.

Overview of life-span developmental tasks (physical, cognitive, language, social, emotional) examined from various theoretical perspectives. Discussion of topics related to family diversity, individual/family health and well-being and reciprocal relationships as affected by external factors.

HD FS 183: Personal Finance in Early Adulthood

(1-0) Cr. 1. F.S.SS.

Introduction to basic concepts and budgeting practices for management of resources and prevention of financial problems commonly associated with college, including credit and student loans. Offered on a satisfactory-fail basis only.

HD FS 223: Child Development and Health

(3-0) Cr. 3. F.S.

Typical and atypical development of children prenatal through middle childhood. Examination of healthy development and potential impact of health issues in children. Discussion of influence of the family and society on development. Either HD FS 223 or HD FS 224, but not both, may be applied toward graduation.

HD FS 239: Consumer Issues

(3-0) Cr. 3. F.S.

Introduction to factors affecting consumer decisions of individuals and families, including housing, healthcare, and personal finances. Emphasis on accessibility and affordability, community contexts for families; and consumer protection, legislation and regulation, and consumer fraud.
Meets U.S. Diversity Requirement

HD FS 240: Literature for Children

(3-0) Cr. 3. F.S.

Evaluation of literature for children, including an emphasis on diversity and inclusion; cultural competence. Roles of literature in the overall development of children. Literature selection and use in the home and educational settings.
Meets U.S. Diversity Requirement

HD FS 276: Human Sexuality

(3-0) Cr. 3. F.S.SS.

Behavioral, biological, and psychological aspects of human sexuality within the social context of family, culture, and society. Role of sexuality in human development. Critical analysis of media and research. Communication and decision-making skills relating to sexuality issues and relationships.
Meets U.S. Diversity Requirement

HIST 201: Introduction to Western Civilization I

(3-0) Cr. 3. F.

Western civilization from ancient Mediterranean world to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.
Meets International Perspectives Requirement.

HIST 207: Chinese Civilization

(3-0) Cr. 3.

Origins, development, decline and transformation of China from earliest times to 1911.
Meets International Perspectives Requirement.

HIST 211: Ancient Empires: From Sargon to Caesar

Cr. 3. F.S.

Development of empires in the Near East and Mediterranean from the Akkadians to the fall of Rome. Discussion of the Hittites, Assyrians, Persians, Athenians, Macedonians (including the conquests of Alexander the Great), Carthaginians, and Romans; examination of imperialism as well as the social, cultural, and economic consequences of empire.

HIST 221: Survey of United States History I

(3-0) Cr. 3. F.

Colonial foundations: revolution, confederation, and constitution; nationalism and democracy; sectional disunity, Civil War, and reunion.

HIST 225: Introduction to Asian American Studies

(3-0) Cr. 3.

An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constructions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice.

Meets U.S. Diversity Requirement

HIST 280: Introduction to History of Science I

(3-0) Cr. 3.

Ideas of nature from ancient Greece to the seventeenth-century scientific revolution.

Meets International Perspectives Requirement.

HORT 121: Home Horticulture

(3-0) Cr. 3. F.S.

Growing plants in and around the home including requirements for growing indoor plants, plant propagation, landscape design, and maintaining trees, lawns, flower, fruit, and vegetable gardens. Recitation includes demonstrations and hands-on activities that illustrate principles of designing, growing and maintaining plants for both indoor and outdoor gardens.

HSP M 101: Introduction to the Hospitality Industry

(3-0) Cr. 3. F.S.

Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry.

I E 148: Information Engineering

(2-2) Cr. 3. F.S.

Prereq: Credit or enrollment in MATH 143

Development of information solutions for engineering problems. Fundamentals of the software development process. Engineering computations and the human/computer interface. Data models and database development. Program connectivity and network applications.

INTST 235: Introduction to International Studies

(3-0) Cr. 3. F.S.S.

Overview of international studies, emphasizing cultural, geographic, economic, and political characteristics of major world areas and nations. Meets International Perspectives Requirement.

ITAL 107: Intensive Beginning Italian

Cr. 4. F.S.

A communicative approach to grammar and vocabulary within the context of Italian culture for students whose native language is not Italian. Taught in Italian.

JL MC 101: Mass Media and Society

(3-0) Cr. 3. F.S.SS.

Communication theory models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media literacy process.

JL MC 110: Orientation to Journalism and Communication

(1-0) Cr. 1. F.S.

Orientation to professional and pre-professional opportunities, writing for the mass media and curriculum requirements in the Greenlee School. Basic media writing preparation. Offered on a satisfactory-fail basis only.

JL MC 240: Principles of Journalism

Cr. 3. F.S.

Analysis of journalism industry and specific audiences served by print, electronic, visual and digital media. Introduction to core values of journalism and guiding principles that encompass literacy, ethics, law, history, the economy and cultural and societal implications.

JL MC 242: Visual Principles for Mass Communicators

(3-0) Cr. 3. F.S.

Understanding and analysis of the visual message. Visual perception, visual communication theory, design syntax, design elements and how they are applied in mass communication.

KIN 252: Disciplines and Professions in Kinesiology and Health

(1-0) Cr. 1. F.S.

Overview of the various disciplines and professions that comprise the field of Kinesiology (the study of human movement) and help students determine the career option that best fits their interests.

KIN 253: Orientation and Learning Community in Kinesiology and Health
(1-0) Cr. 1. F.S.

Prereq: Concurrent enrollment or credit in KIN 252

Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only.

L L S 112: Foundations of Learning and Productive Team Membership
(2-0) Cr. 2. F.

Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

LAS 101: Orientation for Open Option and Preprofessional Students
(1-0) Cr. 1. F.

Introduction to all undergraduate colleges. Provides information about university resources and services, assists with a successful academic transition to the university, and helps initiate the process of identifying academic major(s) and eventual career paths. Required of all first-year students in Open Option and Preprofessional Programs. Offered on a satisfactory-fail basis only.

LATIN 101: Elementary Latin I
(3-0) Cr. 3. F.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

LD ST 122: Leading with Purpose
(1-0) Cr. 1. F.S.

Designed for emerging student leaders. Basic leadership skills covering personal skills development, goal achievement, values-based behaviors and mission statement development.

LD ST 270: Campus Leadership Development
(3-0) Cr. 3. F.S.SS.

Theory and practice of effective leadership in a campus and community context. Study of effective leadership models and leadership in complex systems. Expectation of engagement in campus activities and community organizations. Assessed service-learning component.

LIB 160: Information Literacy
(1-0) Cr. 1. F.S.SS.

Prereq: For students placed in ENGL 101: Completion of ENGL 101 requirement.

Eight-week course required for undergraduate degree. Provides a solid understanding of information literacy and the research process with emphases on finding, evaluating, and using scholarly information; the ethical and legal framework related to information use; and utilization of library discovery tools. To be taken as early as possible in the student's undergraduate career. See course descriptions of ENGL 150 and ENGL 250 for requirements related to LIB 160. Offered on a satisfactory-fail basis only.

LING 119: Introduction to World Languages
(Cross-listed with WLC). (3-0) Cr. 3.

Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy. Meets International Perspectives Requirement.

LING 120: Computers and Language
(Cross-listed with ENGL). (3-0) Cr. 3.

Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

M E 160: Mechanical Engineering Problem Solving with Computer Applications
(2-2) Cr. 3. F.S.

Prereq: M E majors only. MATH 142 or MATH 143 or MATH 145; credit or enrollment in MATH 165.

Introduction to the field of Mechanical Engineering through problem-solving in a range of topics including statics, mechanics of materials and thermo-fluids. Techniques to professionally present and communicate solutions. Use of MATLAB computer programming to aid problem solving, including curve fitting and graphing. Only one of M E 160, ENGR 160, Aer E 160, C E 160, CPR E 185, E E 185, S E 185 and I E 148 may count towards graduation.

M E 170: Engineering Graphics and Introductory Design

(2-2) Cr. 3. F.S.

Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142 or MATH 143 or MATH 145

Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods.

M S 101: Introduction to Military Science

(1-0) Cr. 1. F.

Prereq: Concurrent enrollment in M S 101L required

Examines the role of a Cadet in the Army Reserve Officer Training Corps and a Lieutenant in the United States Army. The course explores a military culture whose ultimate success is determined by the character and proficiency of its' leaders. Instruction introduces students to the cultural heritage and history of the U.S. Army. Students will begin to understand the structure of the U.S. Army and how it functions as an organization and institution. The curriculum promotes the development of students' communication skills to enhance their ability to transmit ideas. The class examines how the Army's cultural values drive the development of leadership in the Officer Corps. Hands-on activities enable students to gain insight on the skills and abilities required of cadets and officers interacting with civilians and soldiers.

M S 101L: Basic Leadership Laboratory I

(0-2) Cr. 1. F.

Prereq: Concurrent enrollment in M S 101 required

Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. This concept provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Marching, rifle firing, and tactical patrolling; students gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students' physical and medical eligibility.

M S 150: Army Physical Readiness

(0-3) Cr. 1. Repeatable. F.S.

This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical fitness techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students physical and medical eligibility.

MATH 010: High School Algebra

(4-0) Cr. 0. F.S.

For students who do not have adequate facility with topics from high school algebra or do not meet the algebra admission requirement. The course is divided into tracks of one- and two-semester lengths. For most students a diagnostic exam will determine which track must be taken. Students will receive a grade in MATH 25 or MATH 30 respectively depending on the level of material covered. Satisfactory completion of MATH 30 is recommended for students planning to take MATH 140, MATH 143, MATH 145, MATH 150, or MATH 151, while MATH 25 is sufficient for MATH 104, MATH 105, MATH 195, STAT 101 or STAT 105. Students must complete MATH 30 to remove a deficiency in the algebra admission requirement. Topics include signed numbers, polynomials, rational and radical expressions, exponential and logarithmic expressions, and equations. Offered on a satisfactory-fail basis only.

MATH 101: Orientation in Mathematics

(1-0) Cr. 1. F.

A required orientation for all first-year and transfer students in mathematics. Provides information about campus resources and opportunities available to students, assists with transition to the University, and academic planning. Offered on a satisfactory/fail basis only. Offered on a satisfactory-fail basis only.

MATH 104: Introduction to Probability

(3-0) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry

Permutations, combinations, probability, expected value, and applications. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 105: Introduction to Mathematical Ideas

(3-0) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry.

Introduction to the use of basic mathematics to solve real-world problems in the areas of voting issues, measuring power in situations where people have different numbers of votes, apportionment, fair division, and elementary game theory. No prior background in politics or history is necessary for this course.

MATH 106: Discovering Mathematics

(3-0) Cr. 3. F.S.

Inquiry-based approach to mathematics, emphasizing the art, history, and beauty of the subject. Typical topics are mathematics from art, music, puzzles, patterns, and reasoning.

MATH 140: College Algebra

(3-1) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or MATH 30.

Coordinate geometry, quadratic and polynomial equations, functions, graphing, rational functions, exponential and logarithmic functions, inverse functions, quadratic inequalities, systems of linear equations. Prepares students for MATH 160. Students in the College of Liberal Arts and Sciences may not count MATH 140 toward the General Education Requirements.

MATH 143: Preparation for Calculus

(4-0) Cr. 4. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or MATH 140.

Preparation for MATH 160, MATH 165, and MATH 181. Functions, graphing, basic trigonometry, logarithms, exponentials. Emphasis on co-variational reasoning. Students in the College of Liberal Arts and Sciences may not count MATH 143 toward General Education Requirements. Only one of MATH 143 and MATH 145 may count toward graduation.

MATH 145: Applied Trigonometry

(3-0) Cr. 3. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or minimum of C- in MATH 140.

Mathematical ideas regarding the conception of space. General trigonometry, with an emphasis on the calculation of lengths, areas, and angles. The Law of Sines and the Law of Cosines. Polar, cylindrical, and spherical coordinate systems. Conic sections and quadric surfaces. Students in the College of Liberal Arts and Sciences may not count MATH 145 toward the General Education Requirements. Only one of MATH 143 and MATH 145 may count toward graduation.

MATH 150: Discrete Mathematics for Business and Social Sciences

(2-1) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry

Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 160: Survey of Calculus

(4-0) Cr. 4. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of geometry; or minimum of C- in MATH 140; or minimum of C- in MATH 143

Analytic geometry, derivatives and integrals of elementary functions, simple differential equations, and applications. Will not serve as a prerequisite for MATH 265 or MATH 266. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or MATH 181 may be counted towards graduation.

MATH 165: Calculus I

(4-0) Cr. 4. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry; or minimum of C- in MATH 143

Differential calculus, applications of the derivative, introduction to integral calculus. Only one of MATH 151 or MATH 160 or the sequence MATH 165-MATH 166 may be counted towards graduation.

MATH 166: Calculus II

(4-0) Cr. 4. F.S.SS.

Prereq: Minimum of C- in MATH 165 or high math placement scores
Integral calculus, applications of the integral, parametric curves and polar coordinates, power series and Taylor series. Only one of MATH 151, MATH 160, or the sequence MATH 165-MATH 166 may be counted towards graduation.

MATH 195: Mathematics for Elementary Education I

(2-2) Cr. 3. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years high school algebra, 1 year of high school geometry, enrollment in elementary education or early childhood education

Whole number operations through analysis of properties, theoretical and hands-on models, mathematical analysis of elementary students' thinking; standard and non-standard algorithms; structure of the decimal system; linear measurement; two- and three-dimensional measurement, shapes and spatial sense; number theory; algebra as it relates to elementary curricula/teaching profession. Students in the College of Liberal Arts and Sciences may not count MATH 195 toward General Education Requirements.

MATH 265: Calculus III

(4-0) Cr. 4. F.S.SS.

Prereq: Minimum of C- in MATH 166 or MATH 166H

Geometry of space and vectors, multivariable differential calculus, multivariable integral calculus, vector calculus.

MATH 267: Elementary Differential Equations and Laplace Transforms

(4-0) Cr. 4. F.S.SS.

Prereq: Minimum of C- in MATH 166 or MATH 166H

Same as MATH 266 but also including Laplace transforms and power series solutions to ordinary differential equations.

MICRO 101: Microbial World

(3-0) Cr. 3. F.

Prereq: High school biology or equivalent

Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

MICRO 201: Introduction to Microbiology

(2-0) Cr. 2. F.S.

Prereq: One semester of college-level biology

Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for Micro 302 in advanced courses.

MICRO 201L: Introductory Microbiology Laboratory

(0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in MICRO 201 or MICRO 302

Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

MTEOR 107: Severe and Hazardous Weather

(2-0) Cr. 1. F.

Understanding of atmospheric processes that play a role in creating severe and hazardous weather. Focus on thunderstorms, tornadoes, hurricanes, floods, blizzards, ice storms, and temperature extremes. Impacts on lives and property.

MTEOR 206: Introduction to Weather and Climate

(Cross-listed with AGRON). (3-0) Cr. 3. F.S.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

MUSIC 101: Fundamentals of Music

(1-2) Cr. 2. F.S.

Prereq: Ability to read elementary musical notation

Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Open to non-majors only.

MUSIC 102: Introduction to Music Listening

(3-0) Cr. 3. F.S.SS.

Expansion of the music listening experiences for the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, harmony, form, and style, and how these elements are used in musics of different cultures and time periods. Ability to read or perform music not required. Meets International Perspectives Requirement.

MUSIC 111: Wind Ensemble

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour.

MUSIC 112: Concert Band

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Open to all students who have performed on a wind or percussion instrument in high school band or orchestra

Repertoire includes the broad spectrum of band music. Two concerts are presented each semester.

MUSIC 113: Jazz Ensemble

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Designed to explore various styles and trends in contemporary jazz.

MUSIC 114A: Marching and Pep Bands: Marching Band

(0-5) Cr. 1. Repeatable. F.

Membership determined by audition and band application. Auditions held for woodwind, brass, percussion, flag, and twirler positions. Presentation of pre-game and half time shows at each home football game; additional performances are also scheduled on and off campus. Audition information is listed on the band website (www.music.iastate.edu/org/marching). Students may not be concurrently enrolled in MUSIC 114A and 114C.

MUSIC 115: Symphonic Band

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Stresses high quality wind literature. Performances include formal concerts on campus.

MUSIC 118: Applied Music: Non-majors

(0.5-0) Cr. 1-2. Repeatable. F.S.

Prereq: Audition, permission of instructor

Applied music for the general student.

MUSIC 141: Lyrica Women's Choir

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all female students by audition

Large chorus; emphasis on fundamental vocal and choral skills, wide variety of literature. Campus concerts each semester.

MUSIC 151A: Oratorio Chorus: Cantamus Women's Choir

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men's and women's choirs separately and in combination.

MUSIC 151B: Oratorio Chorus: Statesmen Men's Choir

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men's and women's choirs separately and in combination.

MUSIC 161: Iowa State Singers

(0-5) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Concert choir specializing in performance of advanced music literature, Renaissance through contemporary. Campus concerts, annual spring tour.

MUSIC 181: Symphony Orchestra

(0-4) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Reading, preparation, and performance of standard repertoire. Five or six concerts annually plus occasional off-campus appearances.

N S 111: Introduction to Naval Science

(3-0) Cr. 3. F.

Introduction to the organization, regulations, and capabilities of the US Navy, with emphasis on mission and principal warfare components.

NREM 120: Introduction to Renewable Resources

(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

P R 220: Principles of Public Relations

(3-0) Cr. 3.

Introduction to public relations in business, government and non-profit organizations; functions, processes, and management; ethics, public opinion and theory.

PHIL 201: Introduction to Philosophy

(3-0) Cr. 3. F.S.SS.

It has been rumored that the unexamined life is not worth living. Philosophy is an attempt to begin examining life by considering such questions as: What makes us human? What is the world ultimately like? How should we relate to other people? Is there a god? How can we know anything about these questions? Understanding questions of this kind and proposed answers to them is what this course is all about.

PHIL 206: Introduction to Logic and Scientific Reasoning

(3-0) Cr. 3. F.

Basic principles of critical reasoning and argument evaluation. A consideration of basic forms of argumentation in science and everyday life. Application to contemporary issues and controversies.

PHIL 207: Introduction to Symbolic Logic

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Linguistics majors should take LING/PHIL 207 as early as possible.

PHIL 230: Moral Theory and Practice

(3-0) Cr. 3. F.S.SS.

Investigation of moral issues in the context of major ethical theories of value and obligation; e.g., punishment, abortion, economic justice, job discrimination, world hunger, and sexual morality. Emphasis on critical reasoning and argument analysis.

PHIL 235: Ethical Issues in a Diverse Society

(3-0) Cr. 3. F.S.

This course will examine a range of arguments on diversity issues. Topics will include: the social status of women, the moral status of sexuality and homosexuality, the nature and role of racism in contemporary society, the relationship between biology, gender roles and social status, and various proposals for change from a variety of political perspectives.

Meets U.S. Diversity Requirement

PHYS 050: Preparation for Introductory Physics

Cr. 0. F.S.

Prereq: 1 year high school algebra

An in#depth active learning experience designed to impart the fundamental concepts and principles of physics, with an emphasis on applied mathematical techniques and logical thinking. For students intending to enroll in classical physics (PHYS 221/222) who have not taken high school physics, who have not had a high school college preparatory physics course, or who need a review of physics problem solving and physics concepts. Credit for Phys 50 does not count toward graduation.

PHYS 101: Physics for the Nonscientist

(3-0) Cr. 3. F.S.

Survey of the principal areas of both classical and modern physics. Emphasis on the nature of the physical universe and the application of physical principles to life in the modern world. Not suitable to meet a general physics requirement for natural science majors.

PHYS 111: General Physics

(4-2) Cr. 5. F.S.SS.

Prereq: 1 1/2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry

General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Mechanics, fluids, heat and thermodynamics, vibrations, waves, sound.

PHYS 112: General Physics

(4-2) Cr. 5. F.S.SS.

Prereq: PHYS 111

General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Electricity and magnetism, ray and wave optics, topics in modern physics.

PHYS 115: Physics for the Life Sciences

(4-0) Cr. 4. F.S.

Prereq: high school: 1 1/2 yr. algebra, 1 yr. geometry, 1 semester trigonometry

Emphasis on basic physics principles applied to biological problems. Topics include mechanics, fluids, thermodynamics, heat, light, sound, electricity and magnetism. A coordinated laboratory, Physics 115 laboratory is available.

PHYS 198: Physics of Music

(2-2) Cr. 3. F.

Introductory level course on sound for nonphysics majors. Properties of pure tones and harmonics; human perception of sound; room acoustics; scales; production, and analysis of musical by voice, string, woodwind, brass, and percussion instruments. Not suitable to meet a general physics requirement for natural science majors

PHYS 221: Introduction to Classical Physics I

(4.5-1) Cr. 5. F.S.SS.

Prereq: Proficiency in algebra, trigonometry, vector manipulation, and topics covered in Math 165, and credit or enrollment in MATH 166.

For engineering and science majors. 3 hours of lecture each week plus 3 recitations and 1 laboratory every 2 weeks. Elementary mechanics including kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation. Heat, thermodynamics, kinetic theory of gases; waves and sound.

PHYS 222: Introduction to Classical Physics II

(4-2) Cr. 5. F.S.SS.

Prereq: PHYS 221 OR PHYS 241, MATH 166

3 hours of lecture each week plus 1 recitation and 1 laboratory each week. Fluid dynamics. Electric forces and fields. Electrical currents; DC circuits. Magnetic forces and fields: LR, LC, LCR circuits; Maxwell's equations; wave optics. PHYS 222 will be taught for the last time in Spring 2020; PHYS 232X and PHYS 232LX will be offered beginning Summer 2020.

PHYS 241: Principles and Symmetries in Classical Physics I

(4.5-1) Cr. 5. F.

Prereq: Proficiency in algebra, trigonometry, vector manipulation, and topics covered in MATH 165, and credit or enrollment in MATH 166.

Covers all of mechanics; Kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation, and extremum principles. Topics in kinetic theory, thermodynamics, waves and sound.

POL S 215: Introduction to American Government

(3-0) Cr. 3. F.S.SS.

Fundamentals of American democracy; constitutionalism; federalism; rights and duties of citizens; executive, legislative, and judicial branches of government; elections, public opinion, interest groups, and political parties.

POL S 241: Democracy and Dictatorship: Introduction to Comparative Politics

(3-0) Cr. 3. F.S.

Interactions between governments and citizens in countries outside the US. Causes of democracy, dictatorship, and economic and social development.

Meets International Perspectives Requirement.

POL S 251: Introduction to International Politics

(3-0) Cr. 3. F.S.

Dynamics of interstate relations pertaining to nationalism, the nation state; peace and war; foreign policy making; the national interest; military capability and strategy; case studies of transnational issues, such as population, food, energy, and terrorism.

Meets International Perspectives Requirement.

PSYCH 101: Introduction to Psychology

(3-0) Cr. 3. F.S.SS.

Fundamental psychological concepts derived from the application of the scientific method to the study of behavior and mental processes. Applications of psychology.

PSYCH 102: Laboratory in Introductory Psychology

(0-2) Cr. 1. F.S.

Prereq: Credit or enrollment in PSYCH 101

Laboratory to accompany 101.

PSYCH 111: Orientation to Psychology

Cr. 1. F.S.

Program requirements and degree/career options. Required of psychology majors. Offered on a satisfactory-fail basis only.

PSYCH 131: Academic Learning Skills

(1-0) Cr. 1. F.S.

Evidence-based approach to learning and applying academic skills such as time management, note-taking, reading, test preparation, goal setting and motivation, and well-being. Hybrid course structured in a team-based learning format.

PSYCH 230: Developmental Psychology

(3-0) Cr. 3. F.S.SS.

Life-span development of physical traits, cognition, intelligence, language, social and emotional behavior, personality, and adjustment.

PSYCH 250: Psychology of the Workplace

(3-0) Cr. 3.

Survey of theories and research methods of psychology applied to the workplace. Consideration of employee selection, training, performance evaluation, leadership, work groups, employee motivation, job attitudes and behaviors, organizational culture, organizational development, human factors, and job design from the scientist-practitioner approach.

PSYCH 280: Social Psychology

(3-0) Cr. 3. F.S.SS.

Individual human behavior in social contexts. Emphasis on social judgments and decisions, attitudes, perceptions of others, social influence, aggression, stereotypes, and helping.

RELIG 205: Introduction to World Religions

(Cross-listed with WLC). (3-0) Cr. 3. F.S.SS.

An introduction to the academic study of religions, including myths, beliefs, rituals, values, social forms. Examples chosen from oral cultures and major religions of the world.

Meets International Perspectives Requirement.

RELIG 210: Religion in America

(3-0) Cr. 3. F.S.SS.

Introductory study of the major beliefs, practices, and institutions of American Judaism, Catholicism, Protestantism, and Islam with emphasis on the diversity of religion in America, and attention to issues of gender, race, and class.

Meets U.S. Diversity Requirement

RELIG 220: Introduction to the Bible

(3-0) Cr. 3. F.S.

Basic overview of the contents of the Old and New Testament in light of their ancient socio-historical background, and with attention to a variety of interpretations and relevance to modern American society.

RELIG 280: Introduction to Catholicism

(3-0) Cr. 3. F.

An explanation of the beliefs, spirit, and practices of Roman Catholicism, including its understanding of God, sacramentality, the human person, and community, and its relationship to other forms of Christianity and other world religions.

RUS 101: Elementary Russian I

(4-0) Cr. 4. F.

Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

RUS 201: Intermediate Russian I

(4-0) Cr. 4. F.

Prereq: RUS 102

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

S E 101: Software Engineering Orientation

Cr. R.

Introduction to the procedures, policies, and resources of Iowa State University and the Software Engineering Program. Offered on a satisfactory-fail basis only.

S E 185: Problem Solving in Software Engineering

(2-2) Cr. 3.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Introduction to software engineering and computer programming. Systematic thinking process for problem solving in the context of software engineering. Group problem solving. Solving software engineering problems and presenting solutions through computer programs, written documents and oral presentations. Introduction to principles of programming, software design, and extensive practice in design, writing, running, debugging, and reasoning about programs. Only one of ENGR 160, A B E 160, AER E 160, C E 160, CH E 160, CPR E 185, E E 185, I E 148, M E 160, and S E 185 may count toward graduation.

SOC 115: Orientation to Sociology

(1-0) Cr. 1. F.S.

Orientation to sociology. A familiarization with University and LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during first semester of freshman year, or as soon as possible after transfer into the department. Offered on a satisfactory-fail basis only.

SOC 134: Introduction to Sociology

(3-0) Cr. 3. F.S.SS.

Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure.

SOC 219: Sociology of Intimate Relationships

(3-0) Cr. 3. F.S.SS.

Prereq: SOC 134

Analysis of intimate relationships among couples using a sociological perspective. Attention is given to singlehood; dating and courtship; sexuality; mate selection, cohabitation, and marriage. Relationship quality, communication, conflict and dissolution of these types of relationship will also be explored.

SOC 235: Social Problems and American Values

(3-0) Cr. 3. F.S.

Prereq: SOC 134

Sociological concepts, theories and methods to analyze the causes and consequences of social problems. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy.

Meets U.S. Diversity Requirement

SOC 241: Youth and Crime

(Cross-listed with CJ ST). (3-0) Cr. 3. F.

An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

SP CM 110: Listening

(3-0) Cr. 3. F.S.

Theory, principles, and competency development in comprehensive, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships.

SP CM 212: Fundamentals of Public Speaking

(3-0) Cr. 3. F.S.SS.

Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches.

SP CM 216: America Speaks: Great Speakers and Speeches in US History

Cr. 3.

Survey of great speeches examined within their political and cultural contexts. Analysis of the rhetorical strategies of diverse speakers with an emphasis on texts from social movements in the United States.

Meets U.S. Diversity Requirement

SP CM 275: Analysis of Popular Culture Texts

(Cross-listed with ENGL). (3-0) Cr. 3. F.S.

Prereq: Credit in or equivalent of 250

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

SP ED 250: Education of the Exceptional Learner in a Diverse Society

(3-0) Cr. 3. F.S.

Prereq: EDUC 205

An overview of students with diverse learning needs, including students with disabilities, English Learners, students who are at risk, and gifted learners. Emphasis is on early identification; educational programming and implications; and legal foundations.

SPAN 097: Accelerated Spanish Review

(3-2) Cr. 0. F.S.

Prereq: Two years but less than three years of high-school Spanish

For students who require additional review at the first year (101-102) level. Course components include a compact review of 101 and the essential elements of 102. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (201-202) level without completing 102.

SPAN 101: Elementary Spanish I

(4-0) Cr. 4. F.S.S.

A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

SPAN 102: Elementary Spanish II

(4-0) Cr. 4. S.S.S.

Prereq: SPAN 101, SPAN 97 or placement by departmental exam

Continuation of Spanish 101. A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 201: Intermediate Spanish I

(4-0) Cr. 4. F.

Prereq: SPAN 102 or placement by departmental exam

Intensive review of basic grammar and conversation. For students whose native language is not Spanish. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature.

Meets International Perspectives Requirement.

SPAN 297: Intensive Intermediate Spanish

(4-0) Cr. 4. F.S.

Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement

Bridge course between 200- and 300-level Spanish courses that focuses on application of advanced grammatical concepts within the context of Hispanic culture. Accelerated review of SPAN 201 and SPAN 202 designed for students who want to continue at the 300 level. Taught in Spanish for students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 303: Spanish Conversation and Composition

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational and writing skills within the context of Hispanic culture. Taught in Spanish. Meets International Perspectives Requirement.

STAT 101: Principles of Statistics

(3-2) Cr. 4. F.S.S.S.

Prereq: 1 1/2 years of high school algebra

Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection (sampling and designing experiments); elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

STAT 104: Introduction to Statistics

(2-2) Cr. 3. F.S.S.S.

Prereq: 1 1/2 years of high school algebra

Statistical concepts and their use in science; collecting, organizing and drawing conclusions from data; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

THTRE 106: Introduction to the Performing Arts

(3-0) Cr. 3. F.S.S.S.

An audience oriented, broad-based, survey of the performing arts which emphasizes theatre and includes segments on television, radio and podcasts, film, dance, and music.

THTRE 110: Theatre and Society

(3-0) Cr. 3. F.S.

An introduction to Theatre focusing on its relationship with society throughout history.

THTRE 251: Acting Foundations

(3-0) Cr. 3. F.S.

Theory and practice in fundamentals of acting.

TSM 115: Solving Technology Problems

(2-2) Cr. 3. F.S.

Prereq: Credit or enrollment for credit in MATH 140 or higher

Solving technology problems using modern hardware and software tools for data-driven solutions. Problem solving cycle, unit conversion, unit factor method, SI and engineering units, significant figures, data collecting and cleaning, error analysis, data visualization, curve fitting, and computer coding fundamentals (data types, flow control, I/O handling, visualization, debugging). Strong emphasis on critical thinking, systematic problem solving, and effective communication.

TSM 116: Introduction to Design in Technology

(2-2) Cr. 3. F.S.

Use of parametric solid modeling software to create three dimensional solid models and document parts and assemblies. Includes national and international standards for documentation, design projects, and teamwork. Rapid prototyping design creation, 3D printing, assemblies, rendering, and detailing technical drawings.

U ST 104: Personal Career Development

(2-0) Cr. 2. F.S.

Comprehensive approach to personal career development providing students with the skills and structure to make informed choices about their major and career path. Self-exploration of interests, skills, values, and personality as related to the world of work using a variety of techniques; exploration of majors and occupations; model for major and career decision-making and career goal implementation; exposure to effective job search and interviewing skills and resources.

US LS 211: Introduction to U.S. Latino/a Studies

(3-0) Cr. 3. F.S.

History and current lives of the Latino/a peoples in the United States, including Mexican, Cuban, Puerto Rican, Dominican, and South and Central Americans, as well as information specific to Iowa Latino/as, will be covered. Through readings, class discussions, writing assignments, and guest speakers, students will acquire accurate information and a solid understanding of the US Latino/a population and cultural perspectives. Elements of Latino/a culture to be covered include historical, sociological, educational, psychological, economic, and political facets.

Meets U.S. Diversity Requirement

WGS 160: Gender Justice

(2-0) Cr. 1. F.S.

Half semester course. Examines the socialization process in the United States and how our perspectives are formed. An introduction to patriarchy, sexism, and ally development are explored. Skills to enhance communication and understanding among women and men will be developed. Offered on a satisfactory-fail basis only.

Meets U.S. Diversity Requirement

WGS 201: Introduction to Women's and Gender Studies

(3-0) Cr. 3.

Introduction to the interdisciplinary field of Women's and Gender Studies. Contemporary status of women in the U.S. and worldwide from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Subject matter includes work, health, sexuality, and violence. Foundation for the other courses in the program.

Meets U.S. Diversity Requirement

WLC 278: Introduction to Global Film

(3-0) Cr. 3. F.

Introduction to the cinema of non-English speaking regions and cultures of the world through representative subtitled films, lectures, and readings. Topics vary according to faculty interest. Emphasis on selected national cinemas and film as a mode of cultural expression as well as on diverse cultural contexts of cinema.

Meets International Perspectives Requirement.

The following experimental courses (courses that are new and not yet published in the catalog) are also available:

AGRON 140X. Climate and Society. (Cross-listed with ENV S 140X, GEOL 140X, MTEOR 140X). (3-0) Cr. 3. F.S. The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaption to and mitigation of climate change. Meets International Perspectives Requirement.

ENV S 140X. Climate and Society. (Cross-listed with AGRON 140X, GEOL 140X, MTEOR 140X). (3-0) Cr. 3. F.S. The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaption to and mitigation of climate change. Meets International Perspectives Requirement.

GEOL 140X. Climate and Society. (Cross-listed with AGRON 140X, ENV S 140X, MTEOR 140X). (3-0) Cr. 3. F.S. The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected

changes in future climate and potential impacts on society, environment and resources. Adaptation to and mitigation of climate change.

Meets International Perspectives Requirement.

MTEOR 140X. Climate and Society. (Cross-listed with AGRON 140X, ENV S 140X, GEOL 140X). (3-0) Cr. 3. F.S. The climate system of our planet. How nature and our actions alter the existing energy balance leading to climate change. Past climates on our planet. The influence of climate on society and resource availability during the Holocene (~ 11,000 years ago to present) with focus on changes post industrial revolution. Significant climate events that have altered our way of life in the past. Projected changes in future climate and potential impacts on society, environment and resources. Adaptation to and mitigation of climate change. Meets International Perspectives Requirement.

FS HN 220X. American Food and Culture. (3-0) Cr. 3. F. American cuisine reflects the history of the U.S. it is the unique blend of diverse groups of people from around the world, including indigenous Native American Indians, Africans, Asians, Europeans, Pacific Islanders, and South Americans. Explore factors that impact the American Cuisine of today including diverse ethnic and cultural group influences, historical events related to food diversity in the U.S., and agriculture and industrial impacts on food production. Practical knowledge and basic food preparation techniques related to the U.S. food system and trends. Class sessions will include lectures, class discussions and Preview-Reflection Assessments, audio-visual presentations, and Tasting Immersion Activities.

Meets U.S. Diversity Requirement.

JL MC 140X. Identity, Diversity and the Media. (3-0) Cr. 3. Understand perspectives and biases within journalism, advertising and public relations content, including content shared through social-media platforms. Analyze content generated by others. Topics include media literacy, source evaluation, portrayals of diverse groups, identification of diverse sources and strategies for reducing bias in media work.

Meets U.S. Diversity Requirement.

U ST 123X. Introduction to Iowa State University. (1-0) Cr. R. Foundation of knowledge, skills, and expectations all students need to navigate the university. Resources for academic success, integration into ISU community and culture.

Satisfactory-Fail.

WLC 101X. Becoming a Global Professional. (1-0) Cr. 1. Introduction to the fields of study, faculty and degree programs in World Languages and Cultures. Focus on guidance for early career exploration and planning in languages and cultures with an emphasis on global professions.

Credits

The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of

lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Contact Hours

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, COM S 227 Introduction to Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

Semester Offering

The expected term a course is to be offered is indicated by the abbreviations F (Fall) S (Spring) SS (Summer). The notations are for planning purposes and *do not* guarantee a course will be offered in a particular term. Always check the Schedule of Classes (<http://classes.iastate.edu>) for availability and specific offering times.

PLAN OF STUDY - SOAR IN 4

Four Year Graduation Guarantee

Iowa State University's Soar in 4: Four-Year Graduation Guarantee provides the opportunity for students to take a proactive approach towards completing their undergraduate degree in four years (or eight semesters). Through careful planning with their academic advisers, students can complement their undergraduate degree with experiences such as study abroad, internship, and service learning. By graduating in four years, students can reduce their tuition costs and accelerate their entry into the job market or advanced education compared to students who take more than eight semesters to graduate. The program encourages students to work collaboratively with their academic adviser to make strategic academic decisions about which courses to take each semester.

Students wanting to graduate in four years under the Soar in 4: Four-Year Graduation Guarantee are expected to:

- Keep in close contact with their Iowa State academic adviser, who will guide students' academic decisions and keep students up-to-date with university policies and procedures.
- Take required courses at the times they are available.
- Maintain student registration at ISU during off-campus experiences.
- Register for classes promptly and monitor academic progress on a regular basis by reviewing the degree audit with their adviser.

Iowa State University will provide the academic advising services and degree-audit mechanisms to assist students in accurately monitoring progress toward graduation. ISU is also responsible for providing class space in the courses required for the student's respective major in order to complete a bachelor's degree within eight consecutive semesters.

Additional information about the Four-Year Graduation Guarantee can be found at:

<http://www.provost.iastate.edu/academic-programs/soarin4> (<http://www.provost.iastate.edu/academic-programs/soarin4/>)

Four-year (eight-semester) templates for ISU programs of study

Iowa State University offers over 100 majors in six undergraduate colleges. All but two programs, architecture and landscape architecture, may be completed in four years. ISU's bachelor degree programs require from 120 to 144 credits; therefore, students must average between 15 and 18 credits per semester. To assist students in creating their own personal four-year academic plans, [eight-semester templates](#) are provided for all programs of studies covered by the Soar in 4 program.

- Agricultural and Life Sciences Education, B.S - communications option

- Agricultural and Life Sciences Education, B.S - teacher certification option
- Agricultural Biochemistry, B.S. - option 1
- Agricultural Biochemistry, B.S. - option 2

COLLEGES AND SCHOOLS

Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. The Graduate College (<http://www.grad-college.iastate.edu/>) web site provides a complete listing (<http://www.grad-college.iastate.edu/academics/programs/apprograms.php>) of graduate majors, minors, certificates and programs.

Iowa State University is accredited by the Higher Learning Commission.

Colleges and Curricula

Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission.

Bachelor's Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A minimum of 120-semester credits and a cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer student from another college or university is required to have a 2.25 cumulative grade point average at the time of entrance. A transfer student who has earned an associate's degree is required to have a 2.00 cumulative grade point average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, and will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor's degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student's major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor's degrees if the student meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Undergraduate Certificates

All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass-not pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index or individual colleges for information).

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student's entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student's major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student's progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student's communication practices.

Iowa State University's communication curriculum, based on these five principles, seeks to enrich the student's understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses

To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Communication Proficiency Grade Requirement: At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250; some majors/degree programs may set higher requirements for communication proficiency.

Upper-Level Curricula

Continuing development of communication skills will be directed by the student's major department. Using the university's basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student's major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course- specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by

the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

Library Study

Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

For undergraduate students, LIB 160 Information Literacy is a one-credit graduation requirement course that provides a foundation of information literacy and library research skills and concepts. Librarians also work each semester with ISU course instructors to teach course-related instruction sessions for undergraduate students in the effective use of library resources in course-relevant fields of study.

Each semester librarians work with ISU course instructors to teach course-related instruction sessions for graduate students in library research skills, information literacy concepts, and the effective use of library resources and research tools in course-relevant fields of study. For more information, call the Library at 515 294-4527.

U.S. Diversity and International Perspective Requirements

One of Iowa State University's goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students' fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student's college or requirements of the student's major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
- analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
- analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
- analyze the perspectives of groups and individuals affected by discrimination
- analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students' understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are "studying abroad" from their home country's perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- analyze and evaluate the influence of global issues in their own lives.
- describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events.
- communicate competently in a second language.

Curriculum Requirements

The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and the student's adviser in

planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

Catalog in Effect

A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous five years, provided it covers a period of the student's enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Special Programs Honors Program

The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The program enables honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet them. An honors program may include substitutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.

Other benefits. Members of the Honors Program have 24-hour access to the Jischke Honors Building as a quiet place to study, use the computers, and visit with other honors students. Students also have off-campus opportunities such as attending honors seminars and conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

First-Year Honors Program

Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an honors education, consists of honors sections of English 250 and Library 160, an FHP seminar, and honors advisers. Students may also choose to participate in the Honors Mentor Program, which introduces students

to scholarship and research. Participants are matched with faculty members conducting research in an areas of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or www.honors.iastate.edu (<http://www.honors.iastate.edu>).

Dual-degree Programs

Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor's degree from Iowa State. (See Index, Preprofessional Study.)

Iowa Lakeside Laboratory

Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, <https://iowalakesidelab.org/>.

Regent Universities Student Exchange Program

Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)

Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities.

Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student's academic adviser in advance of application. Detailed information and applications forms are available from:

National Student Exchange

Study Abroad

Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. It's an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles. The skills students gain while studying abroad will make them top candidates for internship placements and full-time positions post-graduation.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center (SAC) is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, volunteer opportunities, and scholarships.

With over 50 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition.

Semester in Australia, Germany, Ireland, Italy, New Zealand, Scotland and Wales offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, or summer.

Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctica to Uganda and to more than 40 other destinations.

For additional information, contact or stop by the Study Abroad Center. No appointment necessary!

- Hospitality Management, B.S.
- Kinesiology and Health, B.S.
- Nursing, B.S.N.
- Nutritional Science, B.S.

College of Veterinary Medicine

- Veterinary Medicine, D.V.M.

Minors

1. All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
2. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.
3. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.
4. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.
5. Courses taken for a minor may not be taken on a pass-not pass basis.

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student's transcript. Lists of

undergraduate minors offered by each college appear in the college description. Specific requirements and/or restrictions are available from the department or program offering the minor.

Minors by College

This list may not be inclusive. Check the college web sites for more information.

Agriculture and Life Sciences

- Agricultural Business
- Agricultural Systems Technology
- Agricultural and Life Sciences Education
- Agronomy
- Animal Ecology
- Animal Science

Engineering

For Engineering Majors:

- Biomedical Engineering
- Cyber Security
- Energy Systems
- Engineering Sales
- Entrepreneurship*
- Feed Technology*
- Nondestructive Evaluation
- Sustainability*
- Wind Energy*

*The College of Engineering participates in these interdisciplinary minors.

Human Sciences

- Apparel Merchandising, and Design
- Child, Adult, and Family Services
- Culinary Food Science
- Dance
- Educational Services in Family and Consumer Sciences
- Entrepreneurship* (interdisciplinary minor)
- Event Management
- Exercise Science
- Financial Counseling and Planning
- Food and Society
- Food Science
- Food Safety* (interdepartmental minor)
- Gerontology* (interdisciplinary minor)
- Health Promotion
- Hospitality Management
- Kinesiology
- Learning Technologies
- Nutrition
- Textile Design
- Textile Science and Product Performance

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. See undergraduate majors, minors, certificates (<http://catalog.iastate.edu/undergraduatemajors-alpha/>) for more information.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student's transcript and a printed certificate will be awarded.

Iowa State University also offers certificates from the Graduate College.

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor's degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor's degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All

students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the preveterinary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor's degree in specific ISU majors, by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in pro-fessional CLS/MT school can be used to partially fulfill the requirements for the bachelor's degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT program is affiliated with Iowa State University:

St. Luke's Methodist Hospital, Cedar Rapids, Iowa. Program Director: Carol Collingsworth. Medical Director: Lileah Harris, MD

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements;

they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree..

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor's degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor's degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master's degree or a bachelor's degree, depending upon the size of the institution and whether an upper or middle entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor's degree in health administration, or they may spend four years earning a bachelor's degree in any department before entering a master's degree program at the University of Iowa or other university. Courses required for admission to master's degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.

Human Medicine

Physicians study, diagnoses, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student's interests and provide appropriate preparation for an alternative career.

Law

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D.) degree. A bachelor's degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor's degree should reflect a student's passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student's development of critical thinking skills, including analytical written and oral skills. An understanding of business, social sciences, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should include accounting, management, political science, psychology, criminal justice, economics, philosophy, English literature, and history. The completion of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

Library and Information Science

Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master's degree programs in library and information science provide the professional preparation. Iowa State students may earn a bachelor's degree in any department before entering a professional master's degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field.

Occupational Therapy

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor's degree in any major at Iowa State University, and then enter a master's or doctoral degree program at another university.

Optometry

Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor's degree. Students wishing to earn the bachelor's degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

Pharmacy

Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceutical. Students may complete prepharmacy courses at Iowa State University. Many schools do not require a bachelor's degree for admission, however most students complete at least 3 years of college before admission to pharmacy schools. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail four years of study.

Physical Therapy

Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Usually, students earn a bachelor's degree at ISU before entering professional school to earn a doctoral degree. The bachelor's degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

Physician Assistant

A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master's degree level. Applicants must have had health-care experience with direct patient contact experience. Students must have earned a bachelor's degree before entering a PA program. The degree can

be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, psychology, and statistics.

Podiatry

Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor's degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor's degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor's degree.

Theology or Religious Studies

The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor's degree for admission.

The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

Veterinary Medicine

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety,

industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu (<http://www.vetmed.iastate.edu>.)

Students may pursue their preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student's vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor's degree; the most effective progress toward a bachelor's degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preveterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preveterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor's degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

Daniel Robison, Endowed Dean

Joe Colletti, Senior Associate Dean

David Acker, Associate Dean for Academic and Global Programs

Jay Harmon, Interim Associate Dean for Extension Programs and Outreach

Mark Honeyman, Associate Dean for Operations

Theresa Cooper, Assistant Dean for Diversity

Ruth MacDonald, Assistant Dean of Graduate Programs

Howard Tyler, Assistant Dean for Student Services

www.cals.iastate.edu (<http://www.cals.iastate.edu>)

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates of the College of Agriculture and Life Sciences include: agribusiness and industry, production agriculture, biological and environmental sciences, value-added processing, natural resource management, rural development, public agencies, education, animal and human health professions, and graduate studies.

High School Preparation

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

Core Curriculum and Electives

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. To graduate with a degree from the College of Agriculture and Life Sciences a student must complete while at Iowa State University a minimum of 18 credits from the College's departmental offerings, program offerings, and cross-listed program offerings. Twelve or more of those 18 credits must be 300-level or above. Some curricula within the College may have more restrictive requirements.

Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the

four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

Interpersonal and public communication skills	10
6 credits of English composition with grades of C or better	
3 credits of speech fundamentals with grades of C or better	
1 credit of LIB 160 Information Literacy	
Total Credits	10

Mathematical, physical, and life sciences from college-approved lists	17
3 credits of mathematics	
3 credits of statistics	
5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics)	
6 credits of life sciences including BIOL 101 Introductory Biology, or BIOL 211 Principles of Biology I, or BIOL 212 Principles of Biology II, or BIOL 251 Biological Processes in the Environment and 3 additional credits of life sciences	
Personal development from college-approved lists	15
3 credits of ethics	
3 credits of humanities	
3 credits of social sciences	
3 credits of U.S. diversity	
3 credits of international perspectives	

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

Professional, Interpersonal and Cross-cultural Communications

- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

Problem-Solving/Critical Thinking

- Apply a holistic approach to solving complex issue-laden problems.
- Apply a rational and objective process to:
 - Distinguish verifiable facts from value claims,
 - Determine the accuracy of statements,
 - Identify assumptions and detect bias,

- Distinguish relevant from irrelevant information,
- Prioritize needs.
- Summarize, analyze, and interpret research data and policy issues.

Leadership

- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action plan, work towards a goal and justify actions taken.

Entrepreneurship

- Demonstrate innovativeness and creativity.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning

- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics

- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness

- Explain the physical and biological interactions within ecosystems
- Explain how human activities impact the environment and how societies are affected by environmental change.

International/Multi-Cultural Awareness

- U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
 - Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
 - Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,
 - Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
 - Analyze the perspectives of groups and individuals affected by discrimination,
 - Analyze how cultural diversity and cooperation among social groups affect U.S. society.

- International Perspectives – Students should achieve two of the following outcomes. They should be able to:
 - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
 - Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve,
 - Analyze and evaluate the influence of global issues in their own lives,
 - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events,
 - Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

Electives

Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements. No more than 9 credits of 490 coursework from any Iowa State University curriculum may be applied toward graduation, although some individual curricula may establish a more restrictive use of 490 credits toward fulfillment of graduation requirements.

Advising

Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students' interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences.

This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu (<http://www.ag.iastate.edu/>).

Graduate Study

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

Biorenewable Resources and Technology
 Ecology and Evolutionary Biology
 Environmental Science
 Genetics and Genomics
 Immunobiology
 Microbiology
 Molecular, Cellular, and Developmental Biology
 Neuroscience
 Nutritional Sciences
 Plant Biology
 Seed Technology and Business
 Sustainable Agriculture
 Technology and Social Change (interdepartmental minor)
 Toxicology

For details, consult the Graduate College section of this catalog.

Departments of the College

- Agricultural and Biosystems Engineering
- Agricultural Education and Studies
- Agronomy
- Animal Science
- Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology
- Ecology, Evolution, and Organismal Biology
- Economics
- Entomology
- Food Science and Human Nutrition
- Genetics, Development and Cell Biology
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology and Microbiology
- Sociology
- Statistics

Majors in the College of Agriculture and Life Sciences

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions.

Majors in agriculture and life sciences are:

Primary Majors

Agricultural Business
 Agricultural and Life Sciences Education
 Agricultural Studies
 Agriculture and Society
 Agricultural Systems Technology
 Agronomy
 Animal Ecology
 Animal Science
 Biochemistry
 Biology
 Culinary Food Science
 Dairy Science
 Diet and Exercise
 Dietetics
 Environmental Science
 Food Science
 Forestry
 Genetics
 Global Resource Systems
 Horticulture
 Industrial Technology
 Microbiology
 Nursing
 Nutritional Science

Secondary Majors*

Environmental Studies
 International Agriculture
 Seed Science

*A secondary major must be taken in conjunction with a primary major.

Minors

Agricultural Business
 Agricultural and Life Sciences Education
 Agricultural Systems Technology
 Agronomy
 Animal Ecology

Animal Science
 Biochemistry
 Biology
 Culinary Food Science
 Emerging Global Diseases*
 Entrepreneurial Studies*
 Environmental Studies
 Feed Technology*
 Food and Society
 Food Safety*
 Food Science
 Forestry
 Genetics
 Horticulture
 Industrial Technology
 Insect Science
 International Agriculture
 Landscape Management
 Learning and Leadership Sciences*
 Meat Science
 Microbiology
 Nutrition
 Sustainability*

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

See statement on minors in the Colleges and Curricula section of this catalog.

Certificate

Occupational Safety

Special Programs

Agriculture Exploration

Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preveterinary Medicine

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with veterinary medicine.

New students direct from high school who are undecided about choice of major may enroll as a general preveterinary studies (Gen PV) student.

These students will also enroll in an orientation course, which describes the various college majors. By the end of their first semester, a Gen PV student must select a major. Transfer students, however, must select a major prior to enrolling in their first semester classes.

Enrollment as a Gen PV student does not guarantee admission into the College of Veterinary Medicine (veterinary school). See the College of Veterinary Medicine section of this catalog for specific admissions requirements.

Students accepted into the College of Veterinary Medicine without a bachelor of science degree have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission into the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program

The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs

Online courses, certificates, and graduate programs from the College of Agriculture and Life Sciences are designed for working professionals and recent graduates alike giving students anywhere in the world the opportunity to enhance their careers and advancing in their profession.

Students learn from the same faculty and in the same classes as our resident students. Start your adventure with one of our online certificates or programs to advance your career.

Master's Programs: Agricultural Education, Agronomy, Plant Breeding, Seed Technology and Business

Graduate Certificates: Agronomy, Biochemistry, Food Safety and Defense, Meat Science, Seed Science and Technology, Seed Business Management

Undergraduate BS: Agricultural Studies Hybrid Online/Campus

Undergraduate Certificates: Swine Science, Occupational Safety

Study Abroad and International Travel Opportunities

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities on all seven continents. Students can enroll in CALS travel courses, spend a semester or more at a partner university abroad or develop an independent academic opportunity like research, service learning or working abroad. Travel ranges from two weeks to a year and students travel to over 30 countries annually. For additional information, contact the Office of Global Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

Agricultural Business

The Department of Economics offers coursework for a Bachelor of Science degree in Agricultural Business. The major in Agricultural Business prepares students for advanced studies (e.g., Masters or Ph.D. in Agricultural Economics, Law School, MBA, etc) and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A minor in Agricultural Business is also possible.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Agriculture and Life Sciences or the Ivy College of Business, or that emphasize specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service. A major in Agricultural Business with a minor in Economics is not permitted; however, a double major in Agricultural Business and Economics is permitted.

Customization of the Agricultural Business major is possible. Students may request to pursue one of three Business Options in Finance, Marketing, or Supply Chain Management. Electing a Business Option does not change the overall requirements of the Agricultural Business major. Eligibility and coursework requirements for Business Options are

maintained and approved by the Department of Economics and details are available on the department website.

Curriculum in Agricultural Business

The major in Agricultural Business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 18 credits must be earned from courses taught by the Department of Economics at ISU.

a. Select six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.

b. Students interested in taking additional FIN courses beyond FIN 301 should take STAT 226 during the first semester of their sophomore year, and FIN 301 instead of Business Elective in the second semester of their sophomore year.

Agricultural Business Minor

The Department of Economics offers a minor in Agricultural Business. The minor requires at least 15 credits, including 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other Department, College, or University requirement. Courses to be included in the minimum of 15 credits include the following:

ECON 101	Principles of Microeconomics	3
ECON 230	Farm Business Management	3
ECON 235	Introduction to Agricultural Markets	3
ECON 301	Intermediate Microeconomics	3-4

Three credits of ECON courses from: 230-289, 300-389, 400-489 courses. 3

Agricultural and Life Sciences Education

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision-making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our

baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/. (<http://www.ageds.iastate.edu/>)

Curriculum in Agricultural and Life Sciences Education

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

Teacher Certification Option

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and a minimum grade of C- in selected courses.

International Perspective: 3 cr. from approved list

U.S. Diversity: 3 cr. from approved list

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 10 cr.:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
LIB 160	Information Literacy	1

Total Credits 10

Humanities and Social Sciences: 9 cr.

ECON 101	Principles of Microeconomics	3
PSYCH 230	Developmental Psychology	3
3 credits from approved American history list		3

Ethics: 3 cr. from approved list
Math, Physical and Life Sciences: 19 cr.

CHEM 163	College Chemistry	4
or CHEM 177	General Chemistry I	
CHEM 163L	Laboratory in College Chemistry	1
or CHEM 177L	Laboratory in General Chemistry I

Minor - Agriculture and Life Sciences Education

The department offers a minor in agriculture and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A minor will not meet state licensure requirements for teaching high school agriculture. Courses that can be taken for a minor are:

AGEDS 211	Early Field Based Experience	1
AGEDS 310	Foundations of Agricultural Education Programs	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
AGEDS 312	Science With Practice	3
AGEDS 315	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
AGEDS 327	Survey of Agriculture and Life Sciences Communication	3

Visit the departmental website at www.AgEds.iastate.edu/. (<http://www.AgEds.iastate.edu/.html>)

Graduate Study

The department offers the degrees of master of science and doctor of philosophy, with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor's degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Agricultural Studies Undergraduate Study

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and

agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/. (<http://www.ageds.iastate.edu/>)

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective:

3 cr. from approved list.

U.S. Diversity:

3 cr. from approved list.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Agriculture and Society

College of Agriculture— Agriculture & Society

This undergraduate degree emphasizes the application of social science knowledge to issues related to agriculture and society. The interdisciplinary major draws largely on courses from sociology, political science and economics. Its goal is to prepare students to become leaders in addressing complex issues related to the social and human dimensions of agriculture at both the local and global level. Students will learn social science concepts and skills to understand, analyze and communicate complex ideas, information and data related to agricultural systems.

Internships are an important part of the Agriculture & Society major. The curriculum offers the flexibility needed to accommodate the special interests and needs of each student.

The curriculum is designed to provide students with the following skills and competencies:

1. Recognize, analyze and evaluate the critical human and social factors (e.g. practices, policies, laws, institutions) impacting agriculture.
2. Understand the social dimensions of agriculture and its connections with food and environmental systems.
3. Develop problem solving, critical thinking, and leadership skills to positively influence human impacts on agriculture.
4. Understand the perspectives of diverse stakeholders and develop strategies to communicate clearly and effectively to a range of audiences.

Students will develop the necessary skills to become effective leaders with companies, local, national and international non-governmental organizations (NGOs), and government agencies that work on agricultural, food and environmental related issues. Graduates can work as public policy analysts, government relations, public relations, program analyst, program specialists, marketing, sales, agriculture, educators, and executive directors.

Curriculum in Agriculture & Society

Administered by the Department of Sociology

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (C or better):

6 credits of English Composition	6
Three credits of Speech Fundamentals	3

Communication/Library:

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work;

and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

Agricultural Systems Technology

The Department of Agricultural and Biosystems Engineering offers a bachelor of science degree in Agricultural Systems Technology (AST). Students majoring in AST choose between two options: Agricultural and Biosystems Management or Machine Systems. The department also offers a minor in Agricultural Systems Technology.

Required AST courses are taught under the course designator TSM (Technology Systems Management).

Successful AST graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of a safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach where AST graduates apply science, technology and engineering principles to manage complex agricultural and other production systems, including how the constituent sub-systems are interrelated and the broader impact of these systems.

Graduates find careers within a variety of agricultural industries, businesses, and organizations in the fields of agricultural machinery; off-road equipment; food, feed and grain processing; water quality; biorenewable resources; precision agriculture; or livestock production systems.

Common job duties of AST Agricultural and Biosystems Management graduates include:

- technical support
- operations management
- production supervision
- grain elevator management

Common job duties of AST Machine Systems graduates include:

- precision agriculture support
- testing or sales management
- technical support
- maintenance supervision

For more information about the AST degree: <http://www.abe.iastate.edu/undergraduate-students/agricultural-systems-technology/>

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following:		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
AGEDS 327	Survey of Agriculture and Life Sciences Communication	
One of the following:		3
SP CM 212	Fundamentals of Public Speaking	
COMST 214	Professional Communication	
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
LIB 160	Information Literacy	1
Total Credits		13

Mathematical, Physical, and Life Sciences: 25 cr.

MATH 151	Calculus for Business and Social Sciences	3
MATH 145	Applied Trigonometry	3
STAT 104	Introduction to Statistics	3
PHYS 111	General Physics	5
CHEM 163	College Chemistry	4
CHEM 163L	Laboratory in College Chemistry	1
One of the following:		3
BIOL 101	Introductory Biology	
BIOL 211	Principles of Biology I	
BIOL 212	Principles of Biology II	
BIOL 251	Biological Processes in the Environment	

Life Sciences Elective from approved College of Agriculture and Life Sciences list	3
--	---

Total Credits 25

Business, Humanities, Ethics, and Social Sciences: 18 cr.

ACCT 284	Financial Accounting	3
ECON 101	Principles of Microeconomics	3
Ethics Course		3
TSM 370	Occupational Safety	
Humanities course from College of Agriculture and Life Sciences list		3
International Perspectives course from University list		3
U.S. Diversity course from University list		3

Total Credits 18

Technical Core: 30 cr.

TSM 110	Introduction to Technology	1
TSM 111	Experiencing Technology	1
TSM 115	Solving Technology Problems	3
TSM 116	Introduction to Design in Technology	3
TSM 201	Preparing for Workplace Seminar	1
TSM 210	Fundamentals of Technology	3
TSM 214	Managing Technology Projects	1
TSM 270	Principles of Injury Prevention and Safety	3
TSM 310	Total Quality Improvement	3
TSM 363	Electrical Power Systems and Electronics for Agriculture and Industry	4
TSM 397	Internship in Technology	R
TSM 399	Work Experience in Technology	2
TSM 415	Applied Project Management in Technology	2
TSM 416	Technology Capstone	3

Total Credits 30

No more than 4 cr. of TSM 399 may count toward graduation.

Agricultural and Biosystems Management Option: 34 cr.

TSM 322	Preservation of Grain Quality	3
TSM 322L	Preservation of Grain Quality Laboratory	1
TSM 324	Soil and Water Conservation Management	3
TSM 325	Biorenewable Systems	3
TSM 327	Animal Production Systems	3
TSM 330	Agricultural Machinery and Power Management	3
TSM 433	Precision Agriculture	3
TSM 455	Feed Processing and Technology	3

Minor in agricultural systems technology

The Department of Agricultural and Biosystems Engineering offers a minor in agricultural systems technology which may be earned by completing a minimum of 15 credits of technology systems management courses, which includes:

TSM 115	Solving Technology Problems	3
TSM 210	Fundamentals of Technology	3
9 credits from:		9
TSM 310	Total Quality Improvement	
TSM 322	Preservation of Grain Quality	
TSM 322L	Preservation of Grain Quality Laboratory	
TSM 324	Soil and Water Conservation Management	
TSM 325	Biorenewable Systems	
TSM 327	Animal Production Systems	
TSM 330	Agricultural Machinery and Power Management	
TSM 335	Tractor Power	
TSM 337	Fluid Power Systems Technology	
TSM 363	Electrical Power Systems and Electronics for Agriculture and Industry	
TSM 393E	Topics in Technology: Chemical Application Systems	
TSM 393F	Topics in Technology: Agricultural Safety and Health	
TSM 433	Precision Agriculture	

• At least six (6) credits of 300-level or higher TSM classes (from the classes listed above)

• At least nine (9) credits that are not used to meet any other department, college, or university requirement.

Total Credits **15**

Agronomy Undergraduate Study

Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life. The Department of Agronomy offers a major leading to a degree of bachelor

of science (BS) in agronomy. Graduates have the theoretical and practical knowledge needed for efficient and sustainable crop production. They are skilled in critical thinking, problem solving, communicating, and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing agronomists globally.

An agronomy major prepares students for employment in crop production and soil management, yield forecasting, precision farming, plant breeding, agricultural business and industry, agricultural service organizations, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, grain inspectors, integrated pest management, land appraisal, agricultural finance, and in other science-based professional positions.

An agronomy major also prepares students for graduate school. We offer a concurrent BS/MBA degree. About a quarter of our students immediately continue into research-based MS and PhD programs. As an undergraduate, there are many opportunities to be involved in research

Department of Agronomy website - <http://www.agron.iastate.edu/>. (<http://www.agron.iastate.edu/>)

Curriculum in Agronomy

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. A minimum of 15 credits of agronomy courses must be earned at Iowa State and not transferred from other institutions.

International Perspective: 3 cr.

3 cr. from approved International Perspective list: <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>)

U.S. Diversity: 3 cr.

3 cr. from approved U.S. Diversity list: <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/> (<https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>)

Communication/Library: 13 cr.

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	

LIB 160	Information Literacy	1
---------	----------------------	---

One of the following:

ENGL 302	Business Communication	3
----------	------------------------	---

ENGL 309	Proposal and Report Writing	3
----------	-----------------------------	---

ENGL 314	Technical Communication	3
----------	-------------------------	---

Humanities: 3 cr.

3 cr. from approved humanities list: <http://www.cals.iastate.edu/student-services/humanities/> (<http://www.cals.iastate.edu/student-services/humanities/>)

Social Sciences: 3 cr.

3 cr. from approved social sciences list: <http://www.cals.iastate.edu/student-services/social-sciences/> (<http://www.cals.iastate.edu/student-services/social-sciences/>)

Ethics: 3 cr.

3 cr. from approved ethics list: <http://www.cals.iastate.edu/student-services/ethics/> (<http://www.cals.iastate.edu/student-services/ethics/>)

Mathematical Sciences: 6 cr.

MATH 140	College Algebra	3
----------	-----------------	---

STAT 104	Introduction to Statistics	3
----------	----------------------------	---

Physical Sciences: 8 cr.

CHEM 163	College Chemistry	5
----------	-------------------	---

& 163L and Laboratory in College Chemistry

One of the following:

AGRON 259	Organic Compounds in Plants and Soils	3
-----------	---------------------------------------	---

BBMB 221	Structure and Reactions in Biochemical Processes	3
----------	--	---

CHEM 231	Elementary Organic Chemistry	4
----------	------------------------------	---

& 231L and Laboratory in Elementary Organic Chemistry

Life and Biological Sciences: 7 cr.

BIOL 212	Principles of Biology II	4
----------	--------------------------	---

& 212L and Principles of Biology Laboratory II

AGRON 320	Genetics, Agriculture and Biotechnology	3
-----------	---	---

or BIOL 313 Principles of Genetics

Supporting Sciences: 15 cr.

Courses cannot be used to fulfill any other Agronomy requirements. At least 9 cr. must be in courses numbered 300 or above.

This requirement can be met in one of three ways:

- Complete at least 3 credits in basic or mathematics-intensive discipline (ACCT, BBMB, BIOL, CHEM, COM S, ECON, All Engineering, GEOL, GEN, MATH, MTEOR, PHYS, STAT) as well as at least 6

additional credits in BIOL, BBMB, ENSCI, ENT, GEOL, HORT, GEN, MICRO, NREM, PL P, TSM. The other 6 credits can be a combination of the above department's courses and/or AGRON.

- b. Complete the courses needed to fulfill a second major that complements the student's academic and professional goals.
- c. By the end of the third semester before graduation, petition the Agronomy Curriculum Committee with a specific set of courses designed around "keeper of the land," "builder of genetic diversity," "explorer of plant life," "developer of bio-energy," "confronter of world hunger," and "designer of sustainable systems."

Minor - Agronomy

A minor in agronomy is earned by taking 18 credits, 9 credits of which must be from foundational courses. An additional 9 credits must be taken from foundational or approved elective courses, with a minimum of 6 of the 9 credits from courses at the 300 level or higher. At least 9 credits must be taken at Iowa State University with 6 credits numbered

300 or above. At least 9 credits must be unique to the requirements for the minor and not used to fulfill specified requirements from the student's major.

Foundational Courses (9 required credits):

AGRON 180	Global Agriculture in a Changing World	3
AGRON 181	Introduction to Crop Science	3
AGRON 182	Introduction to Soil Science	3
AGRON 280	Crop Development, Production and Management	3
AGRON 281	Crop Physiology	3
AGRON 282	Soil Conservation and Land Use	3

Approved Elective Courses for Minor Credit (9 credits minimum, 6 credits at 300+ level)

AGRON 206	Introduction to Weather and Climate	3
AGRON 217	Weed Identification	1
AGRON 259	Organic Compounds in Plants and Soils	3
AGRON 316	Crop Structure-Function Relationships	3
AGRON 317	Principles of Weed Science	3
AGRON 320	Genetics, Agriculture and Biotechnology	3
AGRON 330	Crop and Seed Identification Laboratory	2
AGRON 334	Forage Crop Management	3
AGRON 338	Seed Science and Technology	3
AGRON 342	World Food Issues: Past and Present	3
AGRON 351	Turfgrass Establishment and Management	3
AGRON 354	Soils and Plant Growth	3
AGRON 354L	Soils and Plant Growth Laboratory	1
AGRON 360	Environmental Soil Science	3
AGRON 392	Systems Analysis in Crop and Soil Management	3
ENSCI 402	Watershed Hydrology	3
AGRON 404	Global Change	3
AGRON 405	Environmental Biophysics	3
AGRON 406	World Climates	3
AGRON 407	Mesoscale Meteorology	3
AGRON 421	Introduction to Plant Breeding	3
AGRON 446	International Issues and Challenges in Sustainable Development	3
AGRON 450	Issues in Sustainable Agriculture	3
AGRON 452	GIS for Geoscientists	3
AGRON 459	Environmental Soil and Water Chemistry	4
AGRON 463	Soil Formation and Landscape Relationships	3
AGRON 477	Soil Physics	3
AGRON 484	Organic Agricultural Theory and Practice	3
AGRON 485	Soil and Environmental Microbiology	3

AGRON 497	Agroecology Field Course	3
-----------	--------------------------	---

Students minoring in agronomy can take the following courses: AGRON 331, AGRON 370, AGRON 490, and AGRON 496; but only one (1) credit from these courses can be used in the minor program

Graduate Study

Introduction

Agronomy is the science and technology of producing plants that serve humans, using practices essential for maintaining and improving life.

The Department of Agronomy administers Master of Science (MS) and Doctor of Philosophy (PhD) degree programs in four different graduate majors that emphasize different disciplines of agronomy. These majors are: Agricultural Meteorology; Crop Production and Physiology; Plant Breeding; and Soil Science. A fifth graduate major, Agronomy, offers both an MS and a Graduate Certificate through distance education suitable for professionals working in industry or government, as well as a graduate minor for on-campus students.

Admission

To be fully admitted, prospective graduate students must have an undergraduate GPA of at least a 3.00 GPA (4.00 scale) or rank in the upper one-half of their undergraduate class. Provisional and restricted admission demand that students fulfill certain requirements. Non-native English speakers must take the Test of English as a Foreign Language (TOEFL). Students applying to the Agricultural Meteorology and Plant Breeding graduate majors must take the Graduate Record Examination (GRE). For all of the majors except Agronomy, a faculty member of the graduate major must agree to be the major professor before the student is admitted.

Program of Study

The academic courses used to satisfy requirements for a graduate degree compose a student's Program of Study (POS). The POS must be approved by the student's POS Committee. For the MS in Agronomy, the POS Committee must be composed of at least two faculty who are both members of the Graduate Major in Agronomy. For the other four majors at the MS degree level, at least three faculty must serve on a POS Committee. Two of the three must be members of the major, and at least one must be a member of a different graduate major. At the PhD level the POS Committee must have at least five members, of which at least three must be faculty in the major, and at least one a member of a different graduate major. If the student is pursuing a graduate minor, either as part of an MS or PhD, a graduate faculty member representing the minor must serve on the POS Committee.

Agronomy

The POS for the MS in Agronomy is fixed and consists of the following:

AGRON 501	Crop Growth and Development	3
AGRON 502	Chemistry, Physics, and Biology of Soils	3
AGRON 503	Climate and Crop Growth	3
AGRON 511	Crop Improvement	3
AGRON 512	Soil-Plant Environment	3
AGRON 513	Quantitative Methods for Agronomy	3
AGRON 514	Integrated Pest Management	3
AGRON 531	Crop Ecology and Management	3
AGRON 532	Soil Management	3
AGRON 533	Crop Protection	3
AGRON 591	Agronomic Systems Analysis	3
AGRON 592	Current Issues in Agronomy	3
AGRON 594	Agronomy MS Practicum	1
AGRON 599M	Agronomy	arr †

† Arranged with instructor.

All Other Degrees

The courses in each student's POS will vary depending on the major and the student's interests. Every on-campus student must include AGRON 601 in their POS. Only a maximum of three 400-level courses or one 300-level and two 400-level courses may be included on the POS. If a 300-level course is listed on the POS it cannot be an AGRON course.

Agricultural Meteorology

Students with a major in Agricultural Meteorology must include AGRON 698 in their POS. Students are encouraged to include the following courses: AGRON 505; AGRON 577; MTEOR 605; a modeling course such as AGRON 508, AGRON 518, AGRON 525, AGRON 677, GEOL 516, or MTEOR 552; and a course in statistics.

Crop Production and Physiology

The Graduate Major in Crop Production and Physiology has defined five Core Areas.

Core Area 1 (molecular biology / biochemistry): BBMB 404, BBMB 405, BBMB 542A–G, BBMB 607, and PLBIO 545.

Core Area 2 (growth and development): AGRON525, AGRON551, BIOL 454, BIOL 428, and GDCB 528.

Core Area 3 (plant physiology and metabolism): AGRON508, AGRON516, AGRON519, AGRON 525, AGRON 538, AGRON 553, AGRON 556, BBMB 645, and PLBIO 513.

Core Area 4 (crop ecology and management): AGRON 509, AGRON 515, AGRON 530, AGRON 553, AGRON 556, BIOL 472, BIOL 474, EEOB 570, EEOB 582, EEOB 584, EEOB 589, HORT 524, PL P 577, and PL P 594.

Core Area 5 (statistics / quantitative methods): AGRON 526, STAT 587, STAT 402, STAT 407, STAT 505, STAT 512, CRP 551, and NREM 546.

To major in Crop Production and Physiology, at least one course from three of the Core Areas must be included in the POS for the MS. For the PhD, at least one course from each of the Core Areas must be included. A single course cannot be used for more than one Core Area. Students are also encouraged to consider AGRON 698.

Plant Breeding

The Graduate Major in Plant Breeding has both a resident and distance-education MS program. The following courses are recommended for students with a major in Plant Breeding: AGRON 521, AGRON 522, AGRON 523, AGRON 524, AGRON 528, AGRON 561, AGRON 600A, AGRON 698, GEN 510, STAT 587, and STAT 402. For the distance program, the following courses are recommended: AGRON 501, AGRON 506, AGRON 513, AGRON 520, AGRON 521, AGRON 523, AGRON 524, AGRON 528, AGRON 544, and AGRON 599. Resident students pursuing the PhD also often include AGRON 621 and AGRON 625 in their POS.

Soil Science

Students pursuing a major in Soil Science may specialize in one of six areas: soil chemistry; soil fertility; soil management; soil microbiology and biochemistry; soil morphology and genesis; or soil physics. If a specialization is chosen, the major professor must be in the designated specialty area. For the PhD, the POS must include one credit of AGRON 600B. Students are also encouraged to consider including AGRON 698 in their POS.

Master of Science

The general requirements for an MS degree include:

- a minimum of 30 credits from academic courses and research activities;
- at least 22 credits earned at ISU;
- two-thirds or more of earned credits related to the major; and
- completion of a final oral examination.

Both non-thesis and thesis options for an MS degree in Agricultural Meteorology, Crop Production and Physiology, Plant Breeding, and Soil Science are available. Students in the Agronomy major must choose the non-thesis option.

Students in Agricultural Meteorology working towards the MS must meet with their POS Committee at least twice. Besides the final oral examination, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. The student must also present a short written report on how the proposed research will help them master established Enduring Understandings in Agricultural Meteorology.

Creative Component

If the non-thesis MS degree is chosen, then the student must:

1. register for at least two credits of AGRON 599 that will be used to complete a “creative component;” and
2. pass a comprehensive final oral examination.

The creative component is work that presents “substantial evidence of individual accomplishment.” The POS Committee and the student will specify the creative component, how it will be documented, and how it will be evaluated. The POS Committee also has flexibility in determining the format of the final oral examination. For Agricultural Meteorology, the final oral exam must include an evaluation of the student’s mastery of the Enduring Understandings in Agricultural Meteorology.

Thesis

In the thesis option the student must:

1. pursue a research project culminating in a written thesis; and
2. pass a comprehensive final oral examination.

A minimum of three research credits of AGRON 699 must be listed on the POS to account for work on an MS thesis. The thesis is submitted to the POS Committee prior to the final oral examination. During the final oral examination, the student will present and defend the thesis in the presence of the POS Committee. Students in Agricultural Meteorology must also demonstrate mastery of the Enduring Understandings in Agricultural Meteorology. The presentation (also called the “exit seminar”) is open to the general public. Only POS Committee members may attend the examination that follows the presentation.

Doctor of Philosophy

The general requirements for a PhD degree include:

- a minimum of 72 credits from academic courses and research activities;
- at least 36 of these credits earned at ISU;
- completion of a preliminary oral examination;
- a written PhD dissertation; and
- completion of a comprehensive final oral examination.

The 72 credits can include the credits earned in pursuit of an MS degree. If an MS was earned at another institution, those courses earned at the other institution can be listed along with the ISU courses, but only if the POS Committee determines that the courses are appropriate. Students in Agricultural Meteorology working towards the PhD must meet with their POS Committee at least three times. Besides the final oral examination and another for the preliminary exam, an additional meeting must be held near the beginning of the graduate program. At this meeting the student will introduce the area of research to be pursued, potential research questions and methods, and a proposed POS. If a student will pursue a PhD without first completing an MS, then during the first meeting of the POS Committee the student must also present a short written report

that illustrates connections between the Enduring Understandings in Agricultural Meteorology and their planned research.

Qualification Exam

Agricultural Meteorology

Students in Agricultural Meteorology must take and pass a qualification exam once they have decided to pursue a PhD. The qualification exam must be passed before taking the preliminary exam. The format of the qualification exam is as follows. The student will produce a written report that demonstrates their knowledge of the Enduring Understandings in Agricultural Meteorology. If the student has come from another university the report must present research completed at ISU and not at the previous institution (such as a thesis). This report will be submitted to all of the faculty in the major. The student will then make an oral presentation to faculty and other students in the major that summarizes and defends the written report. After the oral presentation, the faculty will meet to determine whether or not the student passed the exam, and whether the student can re–take the exam if the student failed. The faculty will provide written feedback to the student, suggesting areas where improvement is needed and a course of action. The qualification exam can be taken only two times during a student’s graduate career at ISU. If a student who had entered the PhD program without an MS degree takes the qualification exam and fails the exam, the student can: take the qualification exam again, if so allowed by the faculty; or continue their graduate career in pursuit of an MS degree. In the latter case, the student could take the qualification exam one more time after an MS degree has been completed.

All Other Majors

A qualification exam is not required for students in the Crop Production and Physiology, Plant Breeding, or Soil Science majors.

Preliminary Exam

All students pursuing a PhD must take and pass a preliminary oral examination.

Agricultural Meteorology

For students in Agricultural Meteorology the preliminary exam consists of a defense of the student’s proposed dissertation research to the POS Committee. Besides an oral defense, the student must also submit a written report on their proposed research. If the student fails the preliminary exam, the POS Committee must also decide if the student can re–take the exam. The preliminary exam can only be taken twice.

Crop Production and Physiology

Students in Crop Production and Physiology may be asked to take a written preliminary examination. If a student fails the written preliminary examination, the POS Committee may require the student to retake the exam, to answer additional written questions, or proceed with the oral examination. The nature of the preliminary oral exam is determined by the student’s POS Committee.

Plant Breeding

Students in Plant Breeding must pass a uniform written preliminary examination that consists of five questions, each from one of five topical areas. Faculty members in Plant Breeding evaluate each answer. Evaluators assign a pass or fail grade to the answer. If an evaluator assigns a failing grade to a question, the evaluator shall clearly indicate the strengths and weaknesses of the answer and provide written information (e.g., references, rationale) to the student which clearly outlines an acceptable response to the question. Failure to provide such written information may invalidate that grade and be considered sufficient cause to exclude the grade in the overall evaluation of the student's answer. Students who receive two pass grades for a question will have successfully completed that topic, and students must pass each topic to pass the exam. If two valid grades are not in agreement (e.g., one passing grade and one failing grade), additional faculty members will evaluate the answer until there are two valid assessments that are in agreement. Students who do not pass a topic have the opportunity to repeat that topic on the next regularly scheduled exam date. The number of attempts for each topic has not been specified. The examination is offered the last Thursday and Friday of each January and September when one or more students have signed up to take the exam. Students may choose to attempt questions for all five topics, or for subsets of the topics. If a student decides to attempt questions for only certain topics, the student must specify which topics in writing at least one month prior to the scheduled exam date. The nature of the preliminary oral exam is determined by the student's POS Committee.

Soil Science

Students in Soil Science must pass a written preliminary examination. Exam questions are authored by members of the POS Committee. The format of each question is left open and they may be formulated as open- or closed-book problems. A reasonable period for completion may be set by the author of the question. The student's responses are formally scored or ranked only by the POS Committee member who authored the question. A copy of the student's responses to all questions is submitted to all POS Committee members at least one week before the student's preliminary oral examination. When the student submits a request to schedule the preliminary oral examination, the student's major professor certifies by signing the form that the student has satisfactorily completed a written preliminary exam. The nature of the preliminary oral exam is determined by the student's POS Committee.

Doctoral Dissertation and Final Oral Examination

All students must include at least three AGRON 699 credits in their POS for work on their PhD dissertation. During the required final oral examination, a student presents and defends the dissertation. This presentation (also called the "exit seminar") is open to the general public.

Only POS Committee members may attend the examination that follows the presentation.

Graduate Certificate in Agronomy for distance students

The Graduate Certificate in Agronomy is for distance students and is comprised of the first six courses in the Master of Science in Agronomy Distance Curriculum. All six courses are required for certificate completion.

AGRON 501	Crop Growth and Development	3
AGRON 502	Chemistry, Physics, and Biology of Soils	3
AGRON 503	Climate and Crop Growth	3
AGRON 511	Crop Improvement	3
AGRON 512	Soil-Plant Environment	3
AGRON 514	Integrated Pest Management	3
Total Credits		18

Graduate Minor

Students who wish to minor in Agronomy must include a core course from each of the other four graduate majors in their POS. These courses are:

AGRON 505	Environmental Biophysics	3
AGRON 516	Crop Physiology	3
AGRON 521	Principles of Cultivar Development	3
AGRON 553	Soil-Plant Relationships	3

However, one substitution is allowed with the approval of the faculty member serving as the minor representative on the POS Committee.

Animal Ecology

The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology major understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Four specific

options prepare students for careers in interpretation of natural resources, fisheries and aquatic sciences, pre-veterinary and wildlife care, and wildlife. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university's affiliate field stations: Rod and Connie French Conservation Camp in Montana, Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department's Student Services Center.

Preveterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Students preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Criminal Justice Studies).

Curriculum in Animal Ecology

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

6 cr. of English composition

3 cr. of speech fundamentals

Communication/Library 16 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
LIB 160	Information Literacy	1
Plus 6 credits from the following:		6
ENGL 207	Introduction to Creative Writing	
ENGL 275	Analysis of Popular Culture Texts	
ENGL 302	Business Communication	
ENGL 303	Free-Lance Writing for Popular Magazines	
ENGL 304	Creative Writing: Fiction	
ENGL 305	Creative Writing: Nonfiction	
ENGL 306	Creative Writing: Poetry	
ENGL 309	Proposal and Report Writing	
ENGL 310	Rhetorical Analysis	
ENGL 312	Biological Communication	
ENGL 314	Technical Communication	
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
P R 305	Publicity Methods	
NREM 330	Principles of Interpretation	
SP CM 312	Business and Professional Speaking	
SP CM 313	Communication in Classrooms and Workshops	

Humanities and Social Sciences: 6 cr.

Humanities course list: <https://www.cals.iastate.edu/student-services/humanities/>
 Social Science course list: <https://www.cals.iastate.edu/student-services/social-sciences/>

Approved humanities course	3
Approved social science course	3

Total Credits 6

Ethics: 3 cr.

3 cr. from approved ethics list: <https://www.cals.iastate.edu/student-services/ethics> (<https://www.cals.iastate.edu/student-services/ethics/>)

Mathematical Sciences: 6 cr.

MATH 140	College Algebra	3
STAT 101	Principles of Statistics	3-4
or STAT 104	Introduction to Statistics	

Total Credits 6-7

Physical Sciences: 14 cr.

CHEM 163	College Chemistry	5
& 163L	and Laboratory in College Chemistry	
or CHEM 177	General Chemistry I	
& 177L	and Laboratory in General Chemistry I	
CHEM 231	Elementary Organic Chemistry	4
& 231L	and Laboratory in Elementary Organic Chemistry	
or CHEM 331	Organic Chemistry I	
& 331L	and Laboratory in Organic Chemistry I	
PHYS 115	Physics for the Life Sciences	5
& 115L	and Laboratory in Physics for the Life Sciences	
or PHYS 111	General Physics	

Total Credits 14

Biological Sciences: 24 cr.

NREM 110	Orientation in Natural Resource Ecology and Management	1
NREM 120	Introduction to Renewable Resources	3
NREM 211	Careers in Natural Resources	1
A ECL 231	Principles of Wildlife & Fisheries Conservation	3
A ECL 312	Ecology	4
A ECL 365	Vertebrate Biology	4
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

Total Credits 24

Practical Experience:**Fisheries and Aquatic Sciences option**

A ECL 321	Fish Biology	3
A ECL 486	Aquatic Ecology	3
A ECL 486L	Aquatic Ecology Laboratory	1

Choose one of two Mathematics sequences: 7-8

Sequence 1 (Calculus)

At least five credits from the following list: 5

A ECL 415	Ecology of Freshwater Invertebrates, Plants, and Algae
AGRON 317	Principles of Weed Science
BIOL 355	Plants and People
BIOL 454	Plant Anatomy
BIOL 456	Principles of Mycology
BIOL 474	Plant Ecology
EEOB 564	Wetland Ecology
FOR 356	Dendrology
NREM 357	Midwestern Prairie Plants
NREM 358	Forest Herbaceous Layer: Ecology and Identification.

Plus additional credits from approved list to total 45 credit hours. 0-5

Total credits = 45

Minor - Animal Ecology

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including:

A ECL 312	Ecology	4
A ECL 365	Vertebrate Biology	4
NREM 120	Introduction to Renewable Resources	3

Plus four additional credits of Animal Ecology or NREM courses at the 300 level or above.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Animal Ecology, B.S. - fisheries and aquatic sciences

*** In scheduling coursework, students should pay attention to courses with limited offerings, (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course). It is critical that students take A ECL 371 fall semester of the junior year and A ECL 451 fall semester of the senior year.

Animal Science

The Department of Animal Science Undergraduate Program intends for its graduates to be able to explain the symbiotic relationship of animals and humans, to contribute to the solution of complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding global community. Graduates of our program will be knowledgeable about sustainable animal production practices that also ensure animal health and well-being and stewardship of natural resources.

To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The overarching goals of the degree program are to

provide a comprehensive animal science education in: science, animal management, and agri-business. Faculty in our program strive to create an environment for students to develop effective communication skills, develop skills that enable students to gather and integrate information to solve problems, become self-learners, become leaders and team builders, and to become aware of domestic and global issues driving changes in the animal industries. Learner outcomes for these goals, for each of our courses, and other information defining the program can be found at our web site: <http://www.ans.iastate.edu/stud/ugrad/>. Our program is designed to provide career skills appropriate to job market needs. Our faculty goals include providing superior academic advising to enable students to fulfill their objectives.

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science. A double major in animal and dairy science is not permitted. However, combining either the animal science or dairy science majors with other curricula is permitted. A limit of 6 credits each in Intercollegiate Judging (Animal Science 475), or any independent study course (490 courses) can be applied toward a degree. A limit of 4 credits of Undergraduate Teaching Experience (Animal Science 497) can be applied toward a degree.

Within the animal science major, specialized options in animal products, companion animal management, equine management, livestock management, pre-professional studies, and pre-veterinary medicine are available. The department offers a minor in Animal Science and a minor in Meat Science. Both the animal science curricula and dairy science curricula allow complementary work toward admission to veterinary medical school and other professional schools, which may be done while satisfying requirements for the bachelor of science degree. A program that combines bachelor of science and master of science in animal science is offered. In addition, a program that combines a bachelor of science and master of business administration is offered. The Department facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspectives

Approved International Perspectives course 3

U.S. Diversity

Approved U. S. Diversity course 3

Communications Proficiency (with a C or better)

English composition 6

Speech fundamentals 3

Total Credits 9

Communication/Library

ENGL 150 Critical Thinking and Communication 3

ENGL 250 Written, Oral, Visual, and Electronic Composition 3

LIB 160 Information Literacy 1

One course from the following: 3

SP CM 212 Fundamentals of Public Speaking

AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences

AGEDS 327 Survey of Agriculture and Life Sciences Communication

COMST 214 Professional Communication

One course from the following: 3

ENGL 302 Business Communication

ENGL 309 Proposal and Report Writing

ENGL 312 Biological Communication

ENGL 314 Technical Communication

Total Credits 13

Humanities and Social Sciences

Approved Humanities course 3

Approved Social Science course 3

Total Credits 6

Ethics

Approved Ethics course 3

Mathematical Sciences

One course from the following: 3-4

MATH 140 College Algebra

MATH 150 Discrete Mathematics for Business and Social Sciences

MATH 160 Survey of Calculus

MATH 165 Calculus I

One course from the following: 3-4

STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 226	Introduction to Business Statistics I	

Total Credits 6-8

Physical Sciences

A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Biological Sciences

BIOL 211 Principles of Biology I 3

BIOL 211L Principles of Biology Laboratory I 1

BIOL 212 Principles of Biology II 3

BIOL 212L Principles of Biology Laboratory II 1

BIOL 313 Principles of Genetics 3

or GEN 320 Genetics, Agriculture and Biotechnology

MICRO 201 Introduction to Microbiology 3-4

& 201L and Introductory Microbiology Laboratory

or MICRO 302 Biology of Microorganisms

& 302L and Microbiology Laboratory

Total Credits 14-15

Business

One course from the following: 3

ACCT 284 Financial Accounting

ECON 101 Principles of Microeconomics

ECON 102 Principles of Macroeconomics

Total Credits 3

Animal Science Core

AN S 101 Working with Animals 2

AN S 110 Orientation in Animal Science and ISU 1

AN S 114 Survey of the Animal Industry 2

AN S 210 Career Preparation in Animal Science 1

AN S 211 Issues Facing Animal Science 1

AN S 214 Domestic Animal Physiology 3

AN S 214L Domestic Animal Anatomy and Physiology Lab 1

AN S 319 Animal Nutrition 3

AN S 320 Animal Feeds and Feeding 3

AN S 331 Domestic Animal Reproduction 3

AN S 352 Genetic Improvement of Domestic Animals 3

AN S 411 Addressing Issues in Animal Science 1

Total Credits 24

General Animal Science

CHEM 163 College Chemistry 5

& 163L and Laboratory in College Chemistry

or CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 331	Organic Chemistry I	3
or BBMB 221	Structure and Reactions in Biochemical Processes	
Three courses from the following:		9
AN S 216	Equine Science	
AN S 223	Poultry Science	
AN S 224	Companion Animal Science	
AN S 225	Swine Science	
AN S 226	Beef Cattle Science	
AN S 229	Sheep Science	
AN S 235	Dairy Cattle Science	
AN S 270 & 270L	Foods of Animal Origin and Foods of Animal Origin Laboratory	
One course from the following:		2-4
AN S 313	Exercise Physiology of Animals	
AN S 324	Food Processing for Companion Animals	
AN S 336	Domestic Animal Behavior and Well-Being	
AN S 337	Lactation

AN S 434	Dairy Systems Management	
AN S 460	Processed Meats	
FS HN 410	Food Analysis	
FS HN 420	Food Microbiology	
MICRO 407	Microbiological Safety of Foods of Animal Origins	

Total Credits 36-39

Additional free electives required for the Pre-veterinary Medicine Option 8-14

* The Iowa State University College of Veterinary Medicine academic requirements are met by completion of this option (<http://vetmed.iastate.edu/academics/prospective-students/admissions/academic-requirements>).

Minors: Animal Science and Meat Science

All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The department offers a minor in Animal Science. The minor requires:

AN S 101	Working with Animals	2
AN S 114	Survey of the Animal Industry	2
AN S 214	Domestic Animal Physiology	3
AN S 214L	Domestic Animal Anatomy and Physiology Lab	1
One course from the following:		3
AN S 216	Equine Science	
AN S 223	Poultry Science	
AN S 224	Companion Animal Science	
AN S 225	Swine Science	

AN S 226	Beef Cattle Science	
AN S 229	Sheep Science	
AN S 235	Dairy Cattle Science	
AN S 270	Foods of Animal Origin & 270L and Foods of Animal Origin Laboratory	

One course from the following: 3

AN S 313	Exercise Physiology of Animals	
AN S 319	Animal Nutrition	
AN S 331	Domestic Animal Reproduction	
AN S 345	Growth and Development of Domestic Animals	
AN S 352	Genetic Improvement of Domestic Animals	

One course from the following: 2-3

AN S 319	Animal Nutrition	
AN S 320	Animal Feeds and Feeding	
AN S 331	Domestic Animal Reproduction	
AN S 324	Food Processing for Companion Animals	
AN S 336	Domestic Animal Behavior and Well-Being	
AN S 337	Lactation	
AN S 345	Growth and Development of Domestic Animals	
AN S 352	Genetic Improvement of Domestic Animals	
AN S 360	Fresh Meats	
AN S 419	Advanced Animal Nutrition	

Total Credits 16-17

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science adviser.

Minor - Meat Science

The department offers a minor in Meat Science. The minor requires:

AN S 270	Foods of Animal Origin	2
AN S 270L	Foods of Animal Origin Laboratory	1
AN S 360	Fresh Meats	3
AN S 460	Processed Meats	3
One course from the following:		1
AN S 489	Issues in Food Safety	
AN S 490C	Independent Study: Meat Science	
Two courses from the following:		5-6
FS HN 311	Food Chemistry	
FS HN 403	Food Laws and Regulations	
FS HN 406	Sensory Evaluation of Food	
FS HN 305	Food Quality Management and Control	

FS HN 410	Food Analysis
FS HN 412	Food Product Development
FS HN 420	Food Microbiology
AN S 324	Food Processing for Companion Animals
FS HN 471	Food Processing
MICRO 407	Microbiological Safety of Foods of Animal Origins
Total Credits	15-16

Students majoring in Animal Science will not be allowed to count the 9 required credits (270, 270L, 360, 460) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science adviser.

Animal Science, B.S. - GENERAL

Freshman

 - Other Electives (8)

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal science; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor

work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCDB (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index (<http://catalog.iastate.edu/azindex/>)).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Biochemistry (AGLS)

The department of Biochemistry, Biophysics & Molecular Biology (<http://www.bbmb.iastate.edu>) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry, biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have

developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

A program that combines a bachelor of science and masters of science in biochemistry or biophysics is offered.

Biochemistry Major in the College of Agriculture and Life Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture and Life Sciences, Curricula.

Biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in biochemistry, chemistry, physics, and mathematics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and animal and plant biotechnology.

Biochemistry program of study

BBMB 101	Introduction to Biochemistry	1
BBMB 102	Introduction to Biochemistry Laboratory	1
BBMB 201	Chemical Principles in Biological Systems	2

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as

chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology.

The major's curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student's career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

Pre-medical and Human Health Professions--This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary--An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology--Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology--Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of

Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking recommendation for licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience.

Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating

from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major.

Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (<http://www.biology.iastate.edu/>) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of advanced biological science courses at the 300 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 211/L and BIOL212/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9 credits must be taken as BIOL courses, and a minimum of two laboratory or field courses must also be included from an approved list.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. A 2.0 cumulative average is required in biology and advanced biology coursework. In order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements-- Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by

earning a minimum of C in ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212. (Students in the College of Agriculture and Life Sciences are required to earn a C or better in ENGL 150, as well.)

Minor

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology and includes the completion of the specific courses listed below and 7 credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must apply only to the minor. For more information, see the Biology Program web site or contact the Student Services Office in 103 Bessey Hall.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
Total Credits		8

Graduate Study

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.

2.00 GPA average required.

BIOL 110	Introduction to Biology	1
BIOL 111	Opportunities in Biology	0.5
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
BIOL 312	Ecology	4
BIOL 313	Principles of Genetics	3
BIOL 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3
Total Credits		23.5

Advanced Biology: 21 cr.

2.00 GPA average required. See the Biology Program web site for list of approved Advanced Biology courses, or consult an adviser in the Biology Student Services office, 103 Bessey Hall.

Biology advanced courses (from approved list)	9
Additional approved biology advanced courses	12
Total Credits	21

Mathematical Sciences 7 cr.

Students in College of Agriculture and Life Sciences must have a Math and Statistics.

MATH 160 or 165 and STAT 101 or 104

Or		
MATH 165	Calculus I	8
& MATH 166	and Calculus II	
Or

* Students should meet with a Biology Program Adviser to determine the proper plans for chemistry, math and physics before selecting those options above.

Students must have 120 credits minimum to graduate

students are required to take 21 credits in advanced biology of which 9 credits must be from the Biology Program (BIOL), and 2 advanced BIOL courses must have a lab or field component.

Community Development Interinstitutional Graduate Program

<http://www.agonline.iastate.edu/programs/community-development-ms>
(<http://www.agonline.iastate.edu/programs/community-development-ms/>)

Community Development deals with challenges faced by communities in the United States and other countries, particularly those in rural areas. Global economic restructuring and the devolution of government services have produced an environment in which Community Developers are called on to think and act in innovative ways.

Community Development is a progressive field, actively promoting positive social, economic, cultural and environmental change. It encourages people to see the "whole picture," engaging citizens in democratic decision making and action.

In the Great Plains IDEA Community Development Master's degree program, a diverse faculty from several institutions teaches critical thinking, ethical consideration, careful planning and involvement of all stakeholders. A Master's degree in Community Development equips the student with a breadth of perspective and depth of cutting-edge material in the field.

The Great Plains IDEA online Master's program is ideal for Community Development students and practitioners. Students seeking a professional career in Community Development can attain the necessary knowledge base without commuting or relocating. Community Development practitioners who wish to augment their training can use the skill set gained through the Community Development Master's degree to work most effectively in, or to advance beyond, their current position.

A Master's degree in Community Development is ideal for professionals in a wide variety of fields:

- Community and Regional Planning
- Sociology
- Economics
- Political science
- Geography
- Local Planning Departments

- Community Economic Development Organizations
- Cooperative Extension Services
- Housing Agencies
- Parks & Recreation
- Tribal Programs
- Non-Profit Organizations focusing on Community Enhancement

Students select one university to be their "*home institution*", this is the university to which you apply, enroll and pay tuition. Students must meet the admissions requirements of the home institution. Contact the Campus Coordinators Casey Smith and Michelle Zander at agonline.iastate.edu or 800-747-4478 for more information.

Participating Institutions:

- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development is an inter-institutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student may take courses from any of the teaching institutions: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, an email address and program forms are required for participating in the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU. See <http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=70> (<http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=70> for program requirements) for program requirements.

Culinary Food Science (AGLS)

The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor.

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

Note: Planned course offerings may change and students need to check the online Schedule of Classes each term to confirm course offerings: <https://classes.iastate.edu> (<https://classes.iastate.edu/>) This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Dairy Science

Students majoring in Dairy Science will complete the degree requirements listed below. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Important Note: This is only one of many equally-sound schedule sequences.

Free electives and specified group electives are often chosen to complement the student's career focus. The student's academic adviser assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in AN S 110 and through appointments with the student's adviser in Dairy Science. Typical career areas include Advanced Degree in Dairy Science, Business and Finance, Agriculture Promotion and Information, Dairy Food Industry, Agricultural Sales and Marketing, International Agriculture, Animal Production and General Agribusiness and Pre-Veterinary Medicine.

Diet and Exercise (AGLS) Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a \$30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

Total Degree Requirements: 125 cr. for bachelor's degree and 37-41 cr. for master's degree

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

International Perspectives: 3 cr.**U.S. Diversity: 3 cr.****Communications and Library: 10 cr.**

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

Total Credits **10**

Social Sciences: 6 cr.

PSYCH 101	Introduction to Psychology	3
PSYCH 230	Developmental Psychology	3

Total Credits **6**

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from: 3-4

MATH 140	College Algebra	
MATH 143	Preparation for Calculus	
MATH 160	Survey of Calculus	
MATH 165	Calculus I	

Select at least 3 credits from: 3-4

STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 226	Introduction to Business Statistics I	

Total Credits **6-8**

Physical Sciences: 13-17 cr.

Select from: 5-8

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
CHEM 177 & 177L & CHEM 178	General Chemistry I and Laboratory in General Chemistry I and General Chemistry II	
CHEM 231	Elementary Organic Chemistry	3
CHEM 231L	Laboratory in Elementary Organic Chemistry	1
PHYS 115 or PHYS 111	Physics for the Life Sciences or General Physics	4-5

Total Credits **13-17**

Biological Sciences: 19 cr.

BBMB 301	Survey of Biochemistry	3
BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3

BIOL 255	Fundamentals of Human Anatomy	3
BIOL 255L	Fundamentals of Human Anatomy Laboratory	1
BIOL 256	Fundamentals of Human Physiology	3
BIOL 256L	Fundamentals of Human Physiology Laboratory	1
MICRO 201	Introduction to Microbiology	2

Total Credits **19**

Diet and Exercise undergraduate courses to be completed or in progress when applying for admission to the program: 20-22 cr.

Select from: 1-2

FS HN 110	Professional and Educational Preparation	
KIN 252 & KIN 253	Disciplines and Professions in Kinesiology and Health and Orientation and Learning Community in Kinesiology and Health	
FS HN 167	Introduction to Human Nutrition	3
FS HN 214	Scientific Study of Food	3
FS HN 215 or FS HN 115	Advanced Food Preparation Laboratory or Food Preparation Laboratory	1-2
FS HN 265	Nutrition for Active and Healthy Lifestyles	3
FS HN 340	Foundations of Dietetic Practice	1
FS HN 360	Advanced Nutrition and the Regulation of Metabolism	3
H S 110	Personal and Consumer Health	3
KIN 258	Principles of Physical Fitness and Conditioning	2

Total Credits **20-22**

Acceptance into the BS/MS PROGRAM is required BEFORE spring semester of the THIRD year.**Humanities and Ethics: 6-9 cr.**

Select 6 credits from approved Humanities list 6

Select 3 credits from approved Ethics list 3

Note: If ethics course is on the humanities list, it can meet both requirements.

Diet and Exercise remaining undergraduate courses to complete the bachelor's degree requirements: 44 cr.

H S 380	Worksite Health Promotion	3
A TR 220 or H S 305	Basic Athletic Training or Instructor's First Aid and Cardio-pulmonary Resuscitation	2
KIN 259	Leadership Techniques for Fitness Programs	3
KIN 345	Management of Health-Fitness Programs and Facilities	3
KIN 358	Exercise Physiology	3
Select from:		3
KIN 355	Biomechanics	

KIN 360	Sociology of Physical Activity and Health	
KIN 366	Exercise Psychology	
KIN 372	Motor Control and Learning Across the Lifespan	
KIN 462	Medical Aspects of Exercise	3

Planned course offerings may change, and students need to check the online Schedule of Classes each term to confirm course offerings: <http://classes.iastate.edu/>. This sequence is only an example.

Dietetics (AGLS)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a \$30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

Electives: 0-13 cr. Select from any university coursework to earn at least 120 total credits.

Admission to the dietetics program: Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN courses.

Entomology Undergraduate Minors

All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Minor - Insect Science

The department offers a minor in Insect Science that may be earned by completing ENT 370 Insect Biology and 12 credits in courses selected from an approved list supplied by the department.

Minor - Global Health

Minor in Global Health Effective Summer 2020

The Global Health minor is a transdisciplinary program designed for students who seek a broad and flexible set of skills for understanding contemporary health challenges and broad-based thinking in finding solutions. Humans are at the core of Global Health, which is viewed and addressed through an understanding of disease, disease transmission, health and well-being. Global health incorporates all cultures and places and integrates knowledge of health's social, anthropological, historical, biological, and ecological dimensions. The program cultivates capacities to deal with complex problems across disciplines and social constructs: how to identify the critical issues, ask the right questions, and create solutions that are meaningful, lasting and effective.

Requirements of the Global Health minor

The Global Health minor will consist of selecting courses that have at their core a focus on health, disease transmission, and social aspects that pertain to health. The minor will require a minimum of 15 credit hours with all students required to take Global Health (V MPM/MICRO/GLOBE 360) and Insects and Our Health (ENT/MICRO 374). The remaining credits to fulfill the minor will come from courses listed in two tracks:

- 1. Biological sciences of health
- 2. Social sciences aspects of health

Students must select a minimum of three credits from each of the two tracks, and an additional three credits from either track. Students may petition to take courses not on the approved list, providing these courses can be shown to include substantial study related to global health.

Required for Global Health minor:

V MPM 360X	Global Health (F)	3
ENT 374	Insects and Our Health (S)	3
Biological Sciences track:		
H S 350	Human Diseases (F, S, SS)	3
MICRO 310	Medical Microbiology (F)	3
V PTH 353	Introductory Parasitology (S)	3
FS HN 460	Global Nutrition	3
BIOL 328	Molecular and Cellular Biology of Human Diseases (F)	3
VDPAM 428	Principles of Epidemiology and Population Health (S)	3
ENT 374L	Insects and Our Health Laboratory (Alt. S)	1
Social Science track:		
ECON 385	Economic Development	3
AGRON 342	World Food Issues: Past and Present	3
FS HN 442	Issues in Food and Society	2
GLOBE 330X	Global Health Disparities (S)	3

SOC 345	Population and Society (F)	3
SOC 348	Global Poverty, Resources and Sustainable Development	3
SOC 411	Social Change in Developing Countries (S)	3

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellular levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 590 Special Topics (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of ENT 600 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four additional courses of ENT 590 Special Topics (selected from topics A through D and F through I, M through N inclusive), and at least 1 credit of ENT 600 Seminar. At least one 590 must be taken from each of these subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 590K Special Topics: Teaching Experience. both semesters or ENT 590K

Special Topics: Teaching Experience. one semester and ENT 590L Special Topics: Extension Internship. the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (500 level and above) for a total of 9 credits to be determined by the student's POS committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular Entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:

ENT 555	Insect Physiology	4
ENT 590G	Special Topics: Molecular Entomology.	1-3
Plus one other course of 590 selected from topics A-D, F, H, I, M, N		
Plus one additional course in molecular entomology		
ENT 600	Seminar	1
BBMB 404	Biochemistry I	3
BBMB 542A	Introduction to Molecular Biology Techniques: DNA Techniques	1
And one course from the following:		
ENT 576	Systematic Entomology	
ENT 525	Aquatic Insects	
ENT 568	Advanced Systematics	

Any student receiving the Ph.D. in entomology with an emphasis in molecular entomology is required to take:

ENT 555	Insect Physiology	4
ENT 590G	Special Topics: Molecular Entomology.	1-3
Plus three other courses of 590 selected from topics A-D, F, H, I, M, N		9
One additional course in molecular entomology		3
ENT 600	Seminar	1
BBMB 542A	Introduction to Molecular Biology Techniques: DNA Techniques	1
Plus two other workshops selected from:		6
BBMB 542C	Introduction to Molecular Biology Techniques: Cell Techniques	
BBMB 542D	Introduction to Molecular Biology Techniques: Plant Transformation	
BBMB 542E	Introduction to Molecular Biology Techniques: Proteomics	
An additional course with a molecular component		3
Plus one from each of the following:		
Systematics		3
ENT 576	Systematic Entomology	
ENT 525	Aquatic Insects	

ENT 568	Advanced Systematics	
Biochemistry		3
BBMB 404	Biochemistry I	
BBMB 405	Biochemistry II	
BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; microbiology; molecular, cellular and developmental biology; sustainable agriculture; and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit is available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate students can be viewed on the department's website at www.ent.iastate.edu (<http://www.ent.iastate.edu/assessment/>). Curriculum assessment for the department can be viewed here: <http://www.ent.iastate.edu/assessment> (<http://www.ent.iastate.edu/assessment/>).

Environmental Science

College of Agriculture and Life Sciences

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.

2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 32 credits

ENSCI 110	Orientation to Environmental Science	1
ENSCI 201	Introduction to Environmental Issues	2
ENSCI 202	Exploration of Environmental and Sustainability Issues	1
ENSCI 203	Exploration of Environmental Science	1
ENSCI 250	Environmental Geography	3
ENSCI 251	Biological Processes in the Environment	3
ENSCI 381	Environmental Systems I: Introduction to Environmental Systems	3
ENSCI 382	Environmental Systems II: Analysis of Environmental Systems	3
ENSCI 384	Introduction to Ecosystems	3
Additional ENSCI choice courses		12
Total Credits		32

2. Mathematics & Statistics: 7-8 credits

Choose one of the following:		4
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
Choose one of the following:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
Total Credits		7-8

3. Physical & Life Sciences: 21-24 credits

BIOL 101	Introductory Biology	3
or BIOL 211	Principles of Biology I	
Choose from one of the following:		5-6
CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
CHEM 167 & 167L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering	

CHEM 177 & 177L General Chemistry I and Laboratory in General Chemistry I

CHEM 201 & 201L Advanced General Chemistry and Laboratory in Advanced General Chemistry

Choose from one of the following: 3-4

CHEM 231 & 231L Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry

CHEM 331 & 331L Organic Chemistry I and Laboratory in Organic Chemistry I

BBMB 221 Structure and Reactions in Biochemical Processes

AGRON 259 Organic Compounds in Plants and Soils

Choose from one of the following: 4-5

PHYS 111 General Physics

PHYS 115 Physics for the Life Sciences

PHYS 221 Introduction to Classical Physics I

Choose 2 of the following: 6

AGRON 182 Introduction to Soil Science

GEOL 100 How the Earth Works

or GEOL 201 Geology for Engineers and Environmental Scientists

MTEOR 206 Introduction to Weather and Climate

BIOL 212 Principles of Biology II

CHEM 178 General Chemistry II

& 178L and Laboratory in College Chemistry II

Total Credits 21-24

4. Communications: 7-10 credits

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Embedded communication coursework in ENSCI 203, 381 and 382		
Total Credits		7

Additional communication Courses required of majors in the College of Agriculture and Life Sciences

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	

Total Credits 3

5. General Education: 15-21 credits

General Education requirements in the College of Agriculture and Life Sciences

Humanities	3
Social Science	3
Ethics	3
International Perspectives course from university approved list	3

US Diversity course from university approved list	3
Total Credits	15

General Education requirements in the College of Liberal Arts and Sciences

Arts and Humanities courses from college approved list	12
Social Science courses from college approved list	9

(Select courses to include 3 cr. of International Perspectives and 3 cr. of US Diversity)

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level

Total Credits	21

¹ Students complete at least 27 credits in Environmental Science including ENSCI 110,201, 250, 381, 382, and 15 additional credits of approved ENSCI coursework.

² Students complete at least 15 credits in humanities and social science including at least 3 credits each in ethics, humanities, social science, U.S. Diversity, and International Perspectives from approved lists.

³ Students choose one course from the following Earth Science related courses: AGRON 182, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, CHEM 331 & 331L, BBMB 221, or AGRON 259.

Graduate Study

Contact information for the graduate program:

Lynette Edsall

camelot@iastate.edu (mstolt@iastate.edu)

515-294-1191

<https://enscigrad.iastate.edu/>

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and

physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (<https://enscigrad.iastate.edu/>).

Food Science (AGLS)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. The food science major is approved by the Institute of Food Technologists.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Courses listed below are required.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary food science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science
- Nursing

Undergraduate Study**Culinary Food Science**

Culinary food science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary food science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/culinary-science/> (<http://www.fshn.hs.iastate.edu/undergraduate-programs/culinary-science/>)

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor's and Master's degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a \$30 fee for a statement of verification of completion of the DPD. For information about verification statements policies, see the dietetics program website: <http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/>.

Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate

wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

Diet and Exercise

A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (<http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise/>) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

The food science major is approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/>

Students in food science have the opportunity to pursue a Master of Business Administration (<http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/>) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food

science/MBA degrees is a rigorous 5-year program, and admission is very selective.

Nutritional Science

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/nutritional-science/>

Nursing

The RN to BSN program is designed for the Registered Nurse (RN) to advance their nursing career to the next level with a Bachelor of Science in Nursing (BSN). The BSN program prepares nurses to apply new skills to day-to-day interactions with patients and co-workers, as well as provides students with broader perspective on the increasingly complex healthcare environment. The RN-BSN program equips students to enhance quality and safety, work effectively in a team, grow as a professional and develop leadership skills for the future. A BSN is necessary for management positions, public health nursing, and specialized clinical positions. It also prepares individuals for admission to graduate nursing programs in nursing education, nursing administration, and advanced practice nursing.

Within the RN-BSN program, students have the opportunity to choose an area of interest for elective options and practicum experience. Interdisciplinary opportunities and clubs/organizations provide a number of opportunities for students to get involved. For more information: <https://fshn.hs.iastate.edu/undergraduate-programs/nursing/>

Departmental Learning Outcomes

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate

effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/outcomes/> (<http://www.fshn.hs.iastate.edu/undergraduate-programs/nutritional-science/>)

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers coursework for a variety of minors (<http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/>). Minors available include:

- culinary food science
- food safety (interdepartmental minor)
- food science
- nutrition
- food and society

All minors have the following requirements:

- At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
- The minor must include at least 9 credits that are not used to meet any other college or university requirement.
- The same courses may not be applied to two different minors.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy. Degree options include:

- food science and technology (<http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology/>) (MS and PhD)
- meat science (<http://www.ans.iastate.edu/section/meat/?pg=degree>) (MS and PhD; co-major in animal science)

- nutritional sciences (<http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences/>) (MS and PhD; interdepartmental graduate program)
- family and consumer sciences/dietetics (<http://www.fshn.hs.iastate.edu/graduate-program/mfcs-dietetics/>) (MS only)
- diet and exercise (<http://www.hs.iastate.edu/academics/majors-list/diet-and-exercise/>) (BS/MS)
- nutritional sciences (BS/MS)

Prerequisite to major work is a baccalaureate degree in food science, nutrition, other physical/biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master's degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative

component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (<http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology/#minor-in-food-science-and-technology>)
- nutritional sciences (<http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences/#minor-in-nutritional-sciences>)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 501

Certificate - Undergraduate

Health Coach (<http://www.fshn.hs.iastate.edu/undergraduate-programs/health-coach-certificate/>)

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition,

exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (<http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense/>)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program .

Dietetics Internship (<http://www.dietetics.iastate.edu/>)

The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a "Graduate Certificate in Dietetics Internship" which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) credential. There is a nonrefundable application fee of \$75.

Forestry

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including biodiversity, recreation, water, wilderness, wildlife, and wood and fiber. Conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, or natural resource conservation and restoration. All options lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation's forest lands and related ecosystems - private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood

products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

In consultation with their adviser, students can select elective courses related to elective courses in the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Elective courses in the interpretation of natural resources option can be selected

to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in fiber procurement and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department's integrated forestry modules consisting of:

FOR 201	Forest Biology	2
FOR 202	Sustainable Materials: Wood Utilization	2
FOR 203	Resource Measurements/Evaluation	2
FOR 204	Forest Ecosystem Decision-Making	2
FOR 205	Integrated Forestry Laboratory	3
FOR 206	Fall Forestry Camp	4

That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

Forestry Minor

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

FOR 302	Silviculture	4
FOR 356	Dendrology	3
FOR 416	Forest Insects and Diseases	3
FOR 416L	Forest Insects and Diseases Laboratory	1

FOR 442	Dynamics of Forest Stands	3
FOR 451	Forest Resource Economics and Quantitative Methods	4
FOR 452	Ecosystem Management	3
FOR 475	Urban Forestry	3
NREM 120	Introduction to Renewable Resources	3
NREM 301	Natural Resource Ecology and Soils	4
NREM 345	Natural Resource Photogrammetry and Geographic Information Systems	3
NREM 390	Fire Ecology and Management	3
NREM 407	Watershed Management	4
NREM 446	Integrating GPS and GIS for Natural Resource Management	3

Curriculum in Forestry

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

English composition	6
Speech fundamentals	3
Total Credits	9

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3
One course from:	3	
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 312	Biological Communication	
ENGL 314	Technical Communication	
Total Credits		13

Humanities and Social Sciences: 6 cr.

6 cr. from approved list.

Ethics: 3 cr.

3 cr. from approved list.

Mathematics, Physical and Life Sciences: 21-23 cr.

MATH 140	College Algebra	3
CHEM 163	College Chemistry	4
CHEM 163L	Laboratory in College Chemistry	1
AGRON 182	Introduction to Soil Science	3

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
One course from:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
One course from:		3-4
MATH 151	Calculus for Business and Social Sciences	
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
NREM 240	Quantitative Problem Solving in Natural Resources	
STAT 301	Intermediate Statistical Concepts and Methods	
Total Credits		21-23

Forestry: 31 cr.

NREM 104	Practical Work Experience	R
NREM 110	Orientation in Natural Resource Ecology and Management	1
NREM 120	Introduction to Renewable Resources	3
NREM 211	Careers in Natural Resources	1
FOR 201	Forest Biology	2
FOR 202	Sustainable Materials: Wood Utilization	2
FOR 203	Resource Measurements/Evaluation	2
FOR 204	Forest Ecosystem Decision-Making	2
FOR 205	Integrated Forestry Laboratory	3
FOR 206	Fall Forestry Camp	4
FOR 302	Silviculture	4
FOR 451	Forest Resource Economics and Quantitative Methods	4
FOR 454	Forestry Practicum	3
Total Credits		31

Electives: Students majoring in forestry are required to choose one of the following options at the end of their sophomore year: forest ecosystem management; sustainable material science and technology; urban and community forestry; natural resource conservation and restoration; or interpretation of natural resources.

Forest Ecosystem Management

FOR 280	Wood Properties and Identification	4
FOR 356	Dendrology	3
PL P 416	Forest Insects and Diseases	3
PL P 416L	Forest Insects and Diseases Laboratory	1
FOR 442	Dynamics of Forest Stands	3
FOR 452	Ecosystem Management	3
NREM 301	Natural Resource Ecology and Soils	4

NREM 345	Natural Resource Photogrammetry and Geographic Information Systems	3
One course from:		3-4
A ECL 366	Natural History of Iowa Vertebrates	
ECON 380	Energy, Environmental and Resource Economics	
NREM 390	Fire Ecology and Management	
NREM 407	Watershed Management	
NREM 446	Integrating GPS and GIS for Natural Resource Management	
One course from:		3
NREM 385	Natural Resource Policy	
or NREM 46(Controversies in Natural Resource Management		
Total Credits		30-31

Interpretation of Natural Resources

A ECL 365	Vertebrate Biology	4
A ECL 366	Natural History of Iowa Vertebrates	3
BIOL 366	Plant Systematics	4
ENT 370	Insect Biology	3
FOR 452	Ecosystem Management	3
NREM 303	Internship	1-3
NREM 330	Principles of Interpretation	3
One course from:		3
BIOL 474	Plant Ecology	
FOR 356	Dendrology	
One course from:		3-4
AGRON 206	Introduction to Weather and Climate	
ASTRO 120	The Sky and the Solar System	
GEOL 100	How the Earth Works	
GEOL 101	Environmental Geology: Earth in Crisis	
GEOL 108	Introduction to Oceanography	
One course from:		3
NREM 385	Natural Resource Policy	
NREM 460	Controversies in Natural Resource Management	
Total Credits		30-33

Natural Resource Conservation and Restoration

A ECL 366	Natural History of Iowa Vertebrates	3
FOR 356	Dendrology	3
FOR 452	Ecosystem Management	3
NREM 301	Natural Resource Ecology and Soils	4
NREM 390	Fire Ecology and Management	3
NREM 407	Watershed Management	4
PL P 416	Forest Insects and Diseases	3

PL P 416L	Forest Insects and Diseases Laboratory	1
One course from:		3
NREM 345	Natural Resource Photogrammetry and Geographic Information Systems	
NREM 446	Integrating GPS and GIS for Natural Resource Management	
One course from:		3
NREM 385	Natural Resource Policy	
NREM 460	Controversies in Natural Resource Management	
Three credit hours from approved list of electives		3
Total Credits		33

Urban and Community Forestry

FOR 280	Wood Properties and Identification	4
C R P 201	The North American Metropolis	3-4
or C R P 301 Urban Analytical Methods		
HORT 342	Landscape Plant Installation, Establishment, and Maintenance	3
FOR 356	Dendrology	3
FOR 452	Ecosystem Management	3
FOR 475	Urban Forestry	3
PL P 416	Forest Insects and Diseases	3
PL P 416L	Forest Insects and Diseases Laboratory	1
SOC 310	Community	3
or SOC 382 Environmental Sociology		
One course from:		3
NREM 385	Natural Resource Policy	
NREM 460	Controversies in Natural Resource Management	
Total Credits		29-30

Forestry, B.S. - Forest Ecosystem Management option

Freshman

Fall	Credits Spring	Credits

Free Electives	3	
13		15

* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit math course (MATH 10) may be required at additional course.

*** In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

Note In addition to coursework listed above, students must complete departmental requirements for Practical Work Experience requirement (NREM 104). See <https://www.nrem.iastate.edu/workexperience> (<https://www.nrem.iastate.edu/workexperience/>)

Genetics

Scott Nelson, Chair, Genetics Major Committee

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/ biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Curriculum in Genetics - Requirements

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences

A grade of C- or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors

GEN 110	Genetics Orientation	1
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3
One of the following:		3-4
GEN 322	Introduction to Bioinformatics and Computational Biology	
GEN 349	The Genome Perspective in Biology	
GEN 444	Bioinformatic Analysis	
BCBIO 402	Fundamentals of Systems Biology and Network Science	
GEN 409	Molecular Genetics	3
GEN 410	Analytical Genetics	3
One of the following:		3
GEN 462	Evolutionary Genetics	
EEOB 561	Evolutionary and Ecological Genomics	
EEOB 563	Molecular Phylogenetics	
GEN 491	Undergraduate Seminar, Professional Practice in Genetics Disciplines	1
MICRO 302	Biology of Microorganisms	3
Total Credits		35-36

B. Course required of majors in the College of Agriculture and Life Sciences only

A minimum of 3 cr. of coursework in the area of environmental science from program approved list

Total Credits 3

2. Advanced Sciences Electives: 6 cr. from program approved list

A grade of C- or better is required in each course. No more than 3 cr. of GEN 490, 490R, 490H, 492, 496, 499, or 499H may be used to meet this requirement.

3. Mathematical Sciences

Complete at least one calculus course from MATH, minimum of 4 credits.

MATH 160	Survey of Calculus	
MATH 165	Calculus I	
Complete at least one course from STAT, minimum of 3 credits.		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
Complete at least one additional course from MATH or STAT, minimum of 4 credits.		4
MATH 166	Calculus II	
STAT 301	Intermediate Statistical Concepts and Methods	
Total Credits		11-12

4. Supporting Sciences

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
CHEM 332L	Laboratory in Organic Chemistry II	1
PHYS 111	General Physics	5
or PHYS 221	Introduction to Classical Physics I	
PHYS 112	General Physics	5
or PHYS 222	Introduction to Classical Physics II	
Choose one of the following options		6-7
Option 1		
BBMB 404	Biochemistry I	
And one of the following:		
BBMB 405	Biochemistry II	
BBMB 411	Techniques in Biochemical Research	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	
CHEM 325	Chemical Thermodynamics	
Option 2		

BBMB 420	Mammalian Biochemistry
And one of the following:	
BBMB 411	Techniques in Biochemical Research
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory
CHEM 325	Chemical Thermodynamics
Total Credits	33-34

5. International Perspectives: 3 cr. from university approved list

This course can satisfy **both** the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list

This course can satisfy **both** the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Information Literacy

A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 250 and advanced writing. (The College of Agriculture and Life Sciences requires a C or better in ENGL 150, as well.)

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
LIB 160	Information Literacy	1
One advanced English writing course from program approved list		3
Total Credits		10

B. Course required of majors in the College of Agriculture and Life Sciences only.

A grade of C or better is required by the college.

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
Total Credits		3

8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

Humanities course from college approved list	3
Social Science course from college approved list	3
Ethics course from college approved list	3
Total Credits	9

B. College of Liberal Arts and Sciences

Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list	12
Social Science courses from college approved list	9
Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.	
Total Credits	21

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used **only** to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
GEN 410	Analytical Genetics	3
GEN 409	Molecular Genetics	3
Two or more additional credits in Genetics at the 300 level or above.		2
Total Credits		15

Genetics, B.S.

Global Resource Systems

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global resource issues. Students develop a core set of technical competencies in a resource area selected from the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural internship experience. They carry out a senior project related to their resource specialization within the context of the world region. The undergraduate experience culminates with a senior capstone course, where students work with real-world clients to address global resource challenges.

Multidisciplinary themes are developed in the context of the physical, biological and socio-economic factors affecting global resource systems. In this context, resource systems include natural, food and agricultural, environmental, cultural and human, political and institutional, financial and built, public health and social resources. Graduates of this program have transnational leadership skills and are successful integrators

of various specializations on a team. They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing an additional major, minor or certificate program offered through the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list

U.S. Diversity: 3 cr.

3 cr. from approved list

Communications Proficiency:

English composition (6 credits with a grade of C or higher; see courses below.)

Speech fundamentals (3 credits with a grade of C or higher; see courses below.)

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
ENGL 302	Business Communication	3
or ENGL 309	Proposal and Report Writing	
or ENGL 314	Technical Communication	

LIB 160	Information Literacy	1
Total Credits		13

Humanities and Social Sciences: 6 cr.

ECON 101	Principles of Microeconomics	3
or ECON 102	Principles of Macroeconomics	
Plus three credit hours from approved humanities list		3
Total Credits		6

Ethics: 3 cr.

3 cr. from approved list 3

Life Sciences: 7 cr.

BIOL 211	Principles of Biology I	4
& 211L	and Principles of Biology Laboratory I	
or BIOL 212	Principles of Biology II	
& 212L	and Principles of Biology Laboratory II	
Plus 3 cr. from approved life sciences list at 300-level or higher		3

Mathematical Sciences: 6 cr.

MATH 140	College Algebra (or higher; except Math 195 or 196)	3
STAT 101	Principles of Statistics	3-4
or STAT 104	Introduction to Statistics	
Total Credits		6-7

Global Competency: 15-31 cr.

16 cr. of 100 and 200 level of a single WLC language; 15 cr. in global competency courses from an approved list with up to 3 cr. may be earned from a travel course.

Physical Sciences: 8 cr.

One of the following:		5
CHEM 163	College Chemistry	
& 163L	and Laboratory in College Chemistry	
or CHEM 177	General Chemistry I	
& 177L	and Laboratory in General Chemistry I	
One course from the following:		3
AGRON 182	Introduction to Soil Science	
AGRON 282	Soil Conservation and Land Use	
AGRON 206	Introduction to Weather and Climate	
GEOL 101	Environmental Geology: Earth in Crisis	

GEOL 160	Water Resources of the World	
Total Credits		8

Global Resource Systems: 23 cr.

GLOBE 110	Orientation	1
3 credits of GLOBE 211		3
GLOBE 211	Issues in Global Resource Systems (Each offering is 1 cr., must be repeated for 3 cr.)	
GLOBE 201	Global Resource Systems	3
GLOBE 320	Global Resource Systems Internship Preparation	1
GLOBE 303	Agricultural, Food and Natural Global Resource Systems	3
GLOBE 304	Socio-Economic Global Resource Systems	3
GLOBE 401	Senior Project	3
GLOBE 402	Responses to Global Resource System Challenges	3
One of the following:		3-6
GLOBE 321	Internship - Global	
GLOBE 322	Internship - United States	
Total Credits 23-26		

Technical Concentration: 15-18 cr.

Satisfied by any of the majors, minors or certificates offered through the College of Agriculture and Life Sciences.

Electives:

Sufficient coursework to ensure a total of not less than 129 credits

Horticulture

To meet the educational needs of a student population with interests ranging from the biology of plants to landscape design/installation to fruit and vegetable production to golf course construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses.

The Department of Horticulture offers six options within the horticulture major:

1. Greenhouse Plant Production
2. Horticultural Food Crop Production and Management
3. Landscape Design, Installation, and Management
4. Public Horticulture

5. Horticulture Research
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management practices for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, fertilizer cooperatives, agricultural chemical companies, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Minors

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. Both minors are earned by taking HORT 221 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The Horticulture minor is a broad-based minor that does not focus within a specific area of horticulture. The 12 additional credits for this minor can be selected from the full list of Horticulture courses.

The Landscape Management minor focuses on landscape management including plant selection, landscape installation and management, and turfgrass management. The 12 additional credits for this minor can be selected from the following courses: HORT 240 Trees, Shrubs, and Woody Vines for Landscaping, HORT 281 Landscape Graphics, HORT 330 Herbaceous Ornamental Plants, HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs, HORT 342 Landscape Plant Installation, Establishment, and Maintenance, HORT 351 Turfgrass Establishment and Management or HORT 444 Landscape Construction Management.

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Options.

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. The requirements appear under Undergraduate Minors.

Total Degree Requirement: 129 credits (cr.)

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biological Sciences: 18 cr.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
And complete fourteen credit hours from the following:		14
AGRON 217	Weed Identification	
AGRON 282	Soil Conservation and Land Use	
AGRON 316	Crop Structure-Function Relationships	
AGRON 317	Principles of Weed Science	
AGRON 354	Soils and Plant Growth	
AGRON 354L	Soils and Plant Growth Laboratory	
BIOL 212	Principles of Biology II	
BIOL 212L	Principles of Biology Laboratory II	
BIOL 312	Ecology	
BIOL 313 & 313L	Principles of Genetics and Genetics Laboratory	
	or GEN 320 Genetics, Agriculture and Biotechnology	
BIOL 314	Principles of Molecular Cell Biology	
BIOL 355	Plants and People	
BIOL 366	Plant Systematics	
BIOL 430	Principles of Plant Physiology	
BIOL 454	Plant Anatomy	
BIOL 474	Plant Ecology	
ENT 201	Introduction to Insects	
ENT 211	Insects and Society	
ENT 370	Insect Biology	
ENT 375	Plant Protection Using Natural Enemies	
ENT 376	Fundamentals of Entomology and Pest Management	
FOR 416	Forest Insects and Diseases	
FOR 416L	Forest Insects and Diseases Laboratory	

PL P 408	Principles of Plant Pathology	
Total Credits		18

Communications Proficiency (with a grade of C or better)

6 credits of English composition (see approved courses below)

3 credits of speech fundamentals (see approved courses below)

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
ENGL 302	Business Communication	3
or ENGL 309	Proposal and Report Writing	
or ENGL 314	Technical Communication

Soil Sciences: 3 cr.

AGRON 182	Introduction to Soil Science	3
Total Credits		3

Electives

No more than 4 cr. of Hort 490 may count toward graduation.

Options

Greenhouse Plant Production

The following courses are required to meet the Horticulture requirement:

HORT 240	Trees, Shrubs, and Woody Vines for Landscaping	3
HORT 322	Plant Propagation	3
HORT 330	Herbaceous Ornamental Plants	3
HORT 331	Hydroponic Food Crop Production	3
HORT 332	Greenhouse and Nursery Operations and Management	4
HORT 434	Floriculture Crop Production	3
HORT 435	Landscape Plant Production	3

Other recommended courses are:

HORT 391	Horticultural Management Experience	
HORT 424	Sustainable and Environmental Horticulture Systems	
HORT 476	Horticultural Postharvest Technology	

Required for option:

ACCT 284	Financial Accounting	3
----------	----------------------	---

And select 9 cr. hours from the following: 9

ACCT 215	Legal Environment of Business	
ACCT 285	Managerial Accounting	
ACCT 316	Business Law	
AGRON 206	Introduction to Weather and Climate	
COM S 103	Computer Literacy and Applications	
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
ECON 230	Farm Business Management	
ECON 234	Small Business Management	
ECON 334	Entrepreneurship in Agriculture

MGMT 370	Management of Organizations	
MGMT 371	Organizational Behavior	
MKT 340	Principles of Marketing	
MKT 442	Sales Management	
MKT 447	Consumer Behavior	
TSM 270	Principles of Injury Prevention and Safety	

Horticultural Food Crop Production and Management

The following courses are required to meet the Horticulture requirement:

HORT 276	Understanding Grape and Wine Science	3
HORT 376	Fundamentals of Field Production of Horticultural Food Crops	3
HORT 461	Fruit Crop Production and Management	3
HORT 471	Vegetable Production and Management	2
HORT 471L	Vegetable Production and Management Lab	1
HORT 476	Horticultural Postharvest Technology	3

Other recommended courses:

HORT 322	Plant Propagation	
HORT 331	Hydroponic Food Crop Production	
HORT 332	Greenhouse and Nursery Operations and Management	
HORT 338	Seed Science and Technology	
HORT 391	Horticultural Management Experience	
HORT 484	Organic Agricultural Theory and Practice	

Required for option:

ACCT 284	Financial Accounting	3
----------	----------------------	---

And select 9 cr. hours from the following: 9

ACCT 215	Legal Environment of Business	
ACCT 285	Managerial Accounting	
ACCT 316	Business Law	
COM S 103	Computer Literacy and Applications

MGMT 313	Feasibility Analysis and Business Planning
MGMT 370	Management of Organizations
MGMT 371	Organizational Behavior
MKT 340	Principles of Marketing
MKT 442	Sales Management
MKT 447	Consumer Behavior
TSM 270	Principles of Injury Prevention and Safety
TSM 324	Soil and Water Conservation Management

Horticulture Research

The following courses are required for this option:

AGEDS 312	Science With Practice	3
HORT 322	Plant Propagation	3

Biological Sciences:

BIOL 430	Principles of Plant Physiology	3
----------	--------------------------------	---

Other recommended courses:

HORT 240	Trees, Shrubs, and Woody Vines for Landscaping
HORT 330	Herbaceous Ornamental Plants
HORT 331	Hydroponic Food Crop Production
HORT 332	Greenhouse and Nursery Operations and Management
HORT 342	Landscape Plant Installation, Establishment, and Maintenance
HORT 391	Horticultural Management Experience

Mathematical Sciences Requirement: 8

MATH 165	Calculus I
MATH 166	Calculus II

Physical Sciences Requirement:

BBMB 301	Survey of Biochemistry
	or BBMB 404 Biochemistry I
CHEM 177	General Chemistry I
CHEM 177L	Laboratory in General Chemistry I
CHEM 178	General Chemistry II
CHEM 178L	Laboratory in College Chemistry II
CHEM 331	Organic Chemistry I
CHEM 331L	Laboratory in Organic Chemistry I
CHEM 332	Organic Chemistry II
CHEM 332L	Laboratory in Organic Chemistry II
PHYS 111	General Physics
& PHYS 112	and General Physics

And select 5 cr. hours from the following:

BBMB 404	Biochemistry I
BBMB 405	Biochemistry II
BBMB 411	Techniques in Biochemical Research
BIOL 313	Principles of Genetics
BIOL 313L	Genetics Laboratory
BIOL 314	Principles of Molecular Cell Biology
BIOL 315	Biological Evolution
CHEM 211	Quantitative and Environmental Analysis
CHEM 211L	Quantitative and Environmental Analysis Laboratory
CHEM 316	Instrumental Methods of Chemical Analysis
CHEM 316L	Instrumental Analysis Laboratory
CHEM 321L	Laboratory in Physical Chemistry
CHEM 322L	Laboratory in Physical Chemistry
CHEM 324	Introductory Quantum Mechanics
COM S 107	Windows Application Programming
	or COM S 20 Fundamentals of Computer Programming
GEN 409	Molecular Genetics
GEN 410	Analytical Genetics

Landscape Design, Installation and Management

The following courses are required to meet the Horticulture requirement:

HORT 240	Trees, Shrubs, and Woody Vines for Landscaping	3
HORT 281	Landscape Graphics	2
HORT 330	Herbaceous Ornamental Plants	3
HORT 341	Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs	2
HORT 342	Landscape Plant Installation, Establishment, and Maintenance	3
HORT 351	Turfgrass Establishment and Management	3
HORT 380	Principles of Garden Composition	2
HORT 381	Beginning Garden Composition Studio	2
HORT 444	Landscape Construction Management	3
HORT 481	Advanced Garden Composition	2

Other recommended courses are:

HORT 322	Plant Propagation
HORT 332	Greenhouse and Nursery Operations and Management
HORT 391	Horticultural Management Experience

Required for option:

ACCT 284	Financial Accounting	3
----------	----------------------	---

And select 9 cr. hours from the following:	9
ACCT 215	Legal Environment of Business
ACCT 285	Managerial Accounting
ACCT 316	Business Law
COM S 103	Computer Literacy and Applications
ECON 234	Small Business Management
ECON 334	Entrepreneurship in Agriculture
MGMT 310	Entrepreneurship and Innovation
MGMT 313	Feasibility Analysis and Business Planning
MGMT 370	Management of Organizations
MGMT 371	Organizational Behavior
MKT 340	Principles of Marketing
MKT 442	Sales Management
MKT 447	Consumer Behavior
TSM 324	Soil and Water Conservation Management

Public Horticulture

The following courses are required to meet the Horticulture requirement:

HORT 240	Trees, Shrubs, and Woody Vines for Landscaping	3
HORT 282	Educating Youth Through Horticulture	3
HORT 322	Plant Propagation	3
HORT 330	Herbaceous Ornamental Plants	3

Other recommended courses:

HORT 281	Landscape Graphics
HORT 332	Greenhouse and Nursery Operations and Management
HORT 341	Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs
HORT 342	Landscape Plant Installation, Establishment, and Maintenance
HORT 351	Turfgrass Establishment and Management
HORT 351L	Turfgrass Establishment and Management Laboratory
HORT 376	Fundamentals of Field Production of Horticultural Food Crops
HORT 380	Principles of Garden Composition
HORT 381	Beginning Garden Composition Studio
HORT 391	Horticultural Management Experience

Required for option

ACCT 284	Financial Accounting	3

Graduate Study

The graduate major in horticulture leads to the M.S. (thesis and non-thesis option) and Ph.D. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics and genomics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also

Industrial Technology

The Department of Agricultural and Biosystems Engineering offers a bachelor of science degree in Industrial Technology (ITec), as well as an undergraduate certificate in Occupational Safety. Students majoring in ITec choose between two options: Manufacturing or Occupational Safety. The department also offers a minor in Industrial Technology.

Required ITec courses are taught under the course designator TSM (Technology Systems Management).

Successful ITec graduates gain knowledge, skills, and abilities in solving technical problems, understanding the design process, excelling in authentic leadership, being aware of a safety issues, having a quality orientation, effectively managing projects, and having a systems-thinking perspective. This translates to a holistic approach that uses science and engineering principles to focus on the way the constituent parts of a manufacturing system interrelate, how they work over time, and how they fit the context of larger systems. Graduates find careers within a variety of industries, businesses, and organizations in the fields of advanced manufacturing; robotics; automation and controls; electronics; lean manufacturing; quality management; safety management, loss prevention; or industrial hygiene.

Common job duties of ITec Manufacturing graduates include:

- quality management
- production supervision
- product process design
- facility planning and management

Common job duties of ITec Occupational Safety graduates include:

- development, management, and evaluation of safety programs and systems
- hazard identification and mitigation
- loss prevention

The certificate in occupational safety is designed to meet the needs of the students who will find themselves in management roles with responsibilities that include safety. The certificate program prepares technically-oriented managers to meet their professional safety responsibilities.

For more information about the Industrial Technology degree: <http://www.abe.iastate.edu/undergraduate-students/industrial-technology/>

For more information about the occupational safety certificate: <http://www.abe.iastate.edu/home/certificate-in-occupational-safety/>

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3

Minor - Industrial Technology

The Department of Agricultural and Biosystems Engineering offers a minor in industrial technology which may be earned by completing a minimum of 15 credits of technology systems management courses, which includes:

TSM 115	Solving Technology Problems	3
TSM 210	Fundamentals of Technology	3
9 credits from:		9
TSM 216	Advanced Technical Graphics, Interpretation, and CAD	
TSM 240	Introduction to Advanced Manufacturing and Metals Processing	
TSM 270	Principles of Injury Prevention and Safety	
TSM 310	Total Quality Improvement	
TSM 337	Fluid Power Systems Technology	
TSM 340	Advanced Automated Manufacturing Processes	
TSM 363	Electrical Power Systems and Electronics for Agriculture and Industry	
TSM 370	Occupational Safety	
TSM 371	Occupational Safety Management	
TSM 372	Legal Aspects of Occupational Safety and Health	
TSM 440	Cellular Lean Manufacturing Systems	
TSM 443	Statics and Strength of Materials for Technology	
TSM 444	Facility Planning	
TSM 465	Automation Systems	
TSM 470	Industrial Hygiene: Physical, Chemical, and Biological Hazards	
TSM 471	Safety Laboratory	
TSM 477	Risk Analysis and Management	
• At least six (6) credits of 300-level or higher TSM classes (from the courses listed above)		
• At least nine (9) credits that are not used to meet any other department, college, or university requirement.		
Total Credits		15

For the undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science or for the undergraduate curriculum in industrial technology leading to the degree of bachelor of science.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering.

Certificate in occupational safety

The Department of Agricultural and Biosystems Engineering offers a undergraduate certificate in occupational safety (<http://www.abe.iastate.edu/undergraduate-students/industrial-technology/certificate-in-occupational-safety/>) which may be earned by completing a minimum of 20 credits of technology systems management courses, which includes:

TSM 270	Principles of Injury Prevention and Safety	3
TSM 370	Occupational Safety	3
TSM 371	Occupational Safety Management	2
TSM 372	Legal Aspects of Occupational Safety and Health	2
TSM 470	Industrial Hygiene: Physical, Chemical, and Biological Hazards	3
6 credits from a departmentally approved list		6
TSM 493D	Workshop in Technology: Occupational Safety (Note: This course needs to be the last course taken toward completion of the Occupational Safety Certificate)	1-4

International Agriculture Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in

international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. The minor requires 15 credits and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.

Microbiology

Undergraduate Microbiology Major

Interested in the study of small things that have a big impact? Then Microbiology may be the place for you.

Our mission in the Microbiology Program is to instill a comprehensive understanding of microbiology and its relevance to human society and global health, and to cultivate the concepts and skills necessary to succeed in microbiology-related careers.

Iowa State University offers:

- Extensive hands-on laboratory experiences that develop problem solving & technical skills used in a variety of professional careers
- Application of science to issues in the modern world
- Excellent preparation for human medicine and veterinary medicine
- Preparation for employment in a variety of professional settings
- Research opportunities and interaction with professors from across Iowa State University Departments of Animal Science, Plant Pathology and Microbiology, Biochemistry & Molecular Biology, Biology, Veterinary Microbiology, Veterinary Pathology, Food Science, Entomology, and Geology
- Degrees in microbiology at both the undergraduate (B.S.) level and graduate (M.S., PhD., see Graduate Major) level

Career opportunities:

Opportunities after graduation include the following:

- Biomedical research scientist
- Biotechnology firms
- Biorenewables industry
- Forensic scientist

- Technical brewer
- Science writer
- Public health agencies
- Public policy organizations

Interested in Human medicine or Veterinary medicine? A microbiology degree prepares students for advanced study in Dentistry, Medical Laboratory Science, Optometry, Pharmacy, Physician Assistant Programs, and Physician or Veterinary education. Go to micro.iastate.edu (<https://www.micro.iastate.edu/>) to find more information about the Microbiology Program.

Curriculum in Microbiology

www.micro.iastate.edu (<http://www.micro.iastate.edu>)

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

International Perspectives Courses (<https://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>)

U.S. Diversity: 3 cr.

U.S. Diversity Courses (<https://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>)

Electives: 7-12

Communications Proficiency:

English composition - with a C or better	6
Speech fundamentals - with a C or better	3

Communication/Library:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
One course from the following:		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 312	Biological Communication	
ENGL 314	Technical Communication	
LIB 160	Information Literacy	1

Total Credits **13**

Humanities and Social Sciences:

Approved Humanities list ¹	3
Approved Social Science list ²	3

¹ Humanities Course list (<https://www.cals.iastate.edu/student-services/humanities/>)

² Social Sciences Course list (<https://www.cals.iastate.edu/student-services/social-sciences/>)

Ethics: 3 cr.

3 cr. from approved Ethics Course list (<https://www.cals.iastate.edu/student-services/ethics/>)

Mathematical Sciences:

One of the following: 7-8

MATH 143 Preparation for Calculus
& MATH 160 and Survey of Calculus

MATH 165 Calculus I
& MATH 166 and Calculus II

MATH 160 Survey of Calculus
& STAT 301 and Intermediate Statistical Concepts and Methods

One of the following: 3-4

STAT 101 Principles of Statistics

STAT 104 Introduction to Statistics

Total Credits 10-12

Physical Sciences:

CHEM 177 General Chemistry I 4

CHEM 177L Laboratory in General Chemistry I 1

CHEM 178 General Chemistry II 3

One of the following: 5-10

PHYS 111 General Physics
& PHYS 112 and General Physics

PHYS 115 Physics for the Life Sciences
& 115L and Laboratory in Physics for the Life Sciences

CHEM 331 Organic Chemistry I 3

CHEM 331L Laboratory in Organic Chemistry I 1

CHEM 332 Organic Chemistry II 3

One of the following: 3-6

BBMB 404 Biochemistry I
& BBMB 405 and Biochemistry II

or BBMB 301 Survey of Biochemistry

or BBMB 316 Principles of Biochemistry

Total Credits 23-31

Biological Sciences:

BIOL 211 Principles of Biology I 3

BIOL 211L Principles of Biology Laboratory I 1

BIOL 212 Principles of Biology II 3

BIOL 212L Principles of Biology Laboratory II 1

BIOL 313 Principles of Genetics 3

BIOL 313L Genetics Laboratory 1

BIOL 314 Principles of Molecular Cell Biology 3

Total Credits 15

Microbiology:

Core courses:

MICRO 110 Professional and Educational Preparation in Microbiology 1

MICRO 302 Biology of Microorganisms 3

MICRO 302L Microbiology Laboratory 1

MICRO 310 Medical Microbiology 3

One of the following: 1

MICRO 310L Medical Microbiology Laboratory

MICRO 475L Immunology Laboratory

MICRO 320 Molecular and Cellular Bacteriology 4

MICRO 440 Laboratory in Microbial Physiology, Diversity, and Genetics 4

MICRO 450 Undergraduate Capstone Colloquium 2

MICRO 451 Survey in Microbiology R

One of the following: 3

MICRO 430 Prokaryotic Diversity and Ecology

MICRO 456 Principles of Mycology

MICRO 477 Bacterial-Plant Interactions

Additional nine credit hours from the following: 9

MICRO 353 Introductory Parasitology

MICRO 374 Insects and Our Health

MICRO 374L Insects and Our Health Laboratory

MICRO 402 Microbial Genetics and Genomics

MICRO 407 Microbiological Safety of Foods of Animal Origins

MICRO 408 Virology

MICRO 420 Food Microbiology

MICRO 421 Food Microbiology Laboratory

MICRO 430 Prokaryotic Diversity and Ecology

MICRO 456 Principles of Mycology

MICRO 475 Immunology

MICRO 475L Immunology Laboratory

Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Students requesting a minor in Microbiology must take the following:

- 1) Micro 201 (Introduction to Microbiology, and the accompanying lab, Micro 201L) **or** Micro 302 (Biology of Microorganisms, and the accompanying lab, Micro 302L)
- 2) Additional lecture credits and no more than 3 additional lab credits to reach 15 credits. For a list of acceptable courses see https://www.micro.iastate.edu/files/page/files/minor_in_microbiology_4.pdf
- 3) At least 6 credits at the 300+ level and must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micrograd.iastate.edu. (<http://www.micrograd.iastate.edu/>)

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

Natural Resource Ecology and Management

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

Contact the department for information about minors from the Department of Natural Resource Ecology and Management.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in biorenewable resources technology, ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index (<http://catalog.iastate.edu/azindex/>)). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey's Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry

The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master's option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Nursing overview

The RN to BSN program is designed for the Registered Nurse (RN) to advance their nursing career to the next level with a Bachelor of Science in Nursing (BSN). The BSN program prepares nurses to apply new skills to day-to-day interactions with patients and co-workers, as well as provides students with a broader perspective on the increasingly complex healthcare environment. The RN-BSN program equips students to enhance quality and safety, work effectively in a team, grow as a professional and develop leadership skills for the future. A BSN is necessary for management positions, public health nursing, and specialized clinical positions. It also prepares individuals for admission to graduate nursing programs in nursing education, nursing administration, and advanced practice nursing.

Within the RN-BSN program, students have the opportunity to choose an area of interest for elective options and practicum experience. Interdisciplinary opportunities and clubs/organizations provide a number of opportunities for students to get involved.

Administered by the Department of Food Science and Human Nutrition

RN-BSN Admissions Criteria

Applications for the RN to BSN program are individually reviewed. Minimum requirements for admission to the BSN program include*:

- Licensure as a Registered Nurse in Iowa or a compact state if applicable**
- Meet all Iowa State University admission criteria for transfer students
- Official college transcripts from all colleges and universities attended
- Minimum of 2.5 cumulative GPA for all college coursework
- Achievement of minimum "C" (not C-) for all prerequisite courses listed below

Anatomy and Physiology I and II (BIOL 255/L and BIOL 256/L equivalent)

English Composition I and II (ENGL 150 and ENGL 250 equivalent)

Introduction to Chemistry (CHEM 163 or CHEM 1T equivalent)

Statistics (STAT 101 or STAT 104 equivalent)

Introduction to Human Nutrition (FS HN 167 equivalent)

Developmental Psychology (PSYCH 230 equivalent)

Introduction to Sociology (SOC 134 equivalent)

- Evidence of a satisfactory criminal background check within 6 months of application and/or 12 months of enrollment or provide evidence of current employment as a Registered Nurse in Iowa or a compact state
- Evidence of meeting current health and immunization requirements

*Admissions requirements are congruent with the Iowa Action Coalition, RN to BSN Task Force Recommendations. Most, and in some cases, all of these are required in the Associate's Degree in Nursing curriculum.

**License must remain current and unrestricted while enrolled in ISU RN-BSN program. Nursing courses with a clinical or practicum component may not be taken if any of the following has occurred: student denied licensure by the Iowa Board of Nursing; Registered Nurse license is currently suspended, surrendered or revoked in any U.S. jurisdiction; Registered Nurse license is currently suspended, surrendered or revoked in another country due to disciplinary action; or student has failed a criminal background check.

RN-BSN Progression Criteria

- Must earn a "C" grade or better in all NRS courses and meet the university's academic standards for progress toward a degree

RN-BSN Graduation Requirements

- At least 32 credits earned in residence at Iowa State University, and the final 32 credits taken through Iowa State University prior to graduation.

- All general education requirements at Iowa State University must be met.
- The BSN curriculum consists of 22 credits of NRS courses, 6 credits of FS HN courses, and 6 credits selected from approved list for a total of 34 credits in addition to prerequisite coursework and electives.
- Electives are selected by students to meet identified career interests, and total elective credits needed will vary based on individual transfer credits.
- Minimum credits for graduation is 120 credits.

Nutritional Science (AGLS)

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy

eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions.

The department also offers a nutrition minor.

Administered by the Department of Food Science and Human Nutrition

FS HN 364	Nutrition and Prevention of Chronic Disease	3
FS HN 365	Obesity and Weight Management	3
FS HN 366	Communicating Nutrition Messages	3
FS HN 403	Food Laws and Regulations	2

FS HN 463	Community Nutrition	3
FS HN 495	Practicum	2
Total Credits		35

FAMILY HEALTH OPTION: 18 credits

HD FS 102	Individual and Family Development, Health, and Well-being	3
-----------	---	---

Select two of the following: 6

HD FS 223	Child Development and Health	
HD FS 226	Development and Guidance in Middle Childhood	
HD FS 227	Adolescent and Emerging Adulthood	
HD FS 234	Adult Development	
HD FS 249	Parenting and Family Diversity Issues	
HD FS 270	Family Communications and Relationships	

Select three of the following: 9

HD FS 367	Abuse and Illness in Families	
HD FS 373	Death as a Part of Living	
HD FS 377	Aging and the Family	
HD FS 395	Children, Families, and Public Policy	
HD FS 449	Program Evaluation and Proposal Writing	
HD FS 463	Environments for the Aging	
HD FS 479	Family Interaction Dynamics	

FOOD SERVICE OPTION: 18 credits

HSP M 380	Food Production Management	3
HSP M 380L	Food Production Management Experience	3
HSP M 391	Foodservice Systems Management I	3
HSP M 392	Foodservice Systems Management II	3
ECON 101	Principles of Microeconomics	3
ACCT 284	Financial Accounting	3

GLOBAL HEALTH AND POLICY OPTION: 18 credits

ANTHR 201	Introduction to Cultural Anthropology	3
C R P 451	Introduction to Geographic Information Systems	3
or C R P 383	Theory of the Planning Process	
ECON 101	Principles of Microeconomics	3
FS HN 460	Global Nutrition	3
POL S 251	Introduction to International Politics	3
SOC 348	Global Poverty, Resources and Sustainable Development	3

HEALTH COACH OPTION: 18 credits

KIN 258	Principles of Physical Fitness and Conditioning	2
KIN 358	Exercise Physiology	3
KIN 458	Principles of Fitness Assessment and Exercise Prescription	4
PSYCH 101	Introduction to Psychology	3
or PSYCH 230	Developmental Psychology	
PSYCH 422	Counseling Theories and Techniques	3
PSYCH 485	Health Psychology	3

NUTRITION AND WELLNESS OPTION: 10-18 credits of electives

At least 9 credits of electives must be 300-400 level courses. Select from any university coursework to earn at least 120 total credits.

Go to FS HN courses.

Occupational Safety

Undergraduate Certificate in Occupational Safety

The undergraduate certificate in Occupational Safety is designed to meet the needs of the vast majority of undergraduate students who are planning a career with management responsibilities (including safety), but are not planning on careers as safety professionals. This Certificate provides them with desired professional development and recognition of their increased professional knowledge and skills in the field of Occupational Safety.

Working professionals who have discovered that their career path has resulted in an increased focus on occupational safety, but do not have formal educational training in safety will also benefit from this structured safety curriculum. This certificate program prepares professionals, regardless of discipline, to effectively meet expected occupational safety responsibilities.

A professional with an Iowa State University Occupational Safety certificate will strengthen a company's ability to protect their workers from injuries and illnesses. This undergraduate certificate provides a way to give formal recognition of focused study in occupational safety that is less comprehensive than what is required for an undergraduate major.

The Department of Agricultural and Biosystems Engineering, with its nationally ranked education programs, is pleased to offer this Occupational Safety Certificate program to undergraduate students, graduate students, and working professionals. This certificate program is available on campus or entirely online via web-based interactions and streaming media.

20 Credits required.

Students complete the following 14 credits of core courses:

TSM 270	Principles of Injury Prevention and Safety	3
TSM 370	Occupational Safety	3
TSM 371	Occupational Safety Management	2
TSM 372	Legal Aspects of Occupational Safety and Health	2
TSM 470	Industrial Hygiene: Physical, Chemical, and Biological Hazards	3
TSM 493D	Workshop in Technology: Occupational Safety	1-4

The remaining six credits will selected from the following:

TSM 376	Fire Protection and Prevention	3
TSM 471	Safety Laboratory	1
TSM 477	Risk Analysis and Management	3
TSM 393F	Topics in Technology: Agricultural Safety and Health	1-4
H S 105	First Aid and Emergency Care	2
H S 110	Personal and Consumer Health	3
H S 305	Instructor's First Aid and Cardio-pulmonary Resuscitation	2
I E 271	Applied Ergonomics and Work Design	3

A minimum of 9 credits applied towards the certificate cannot be used to meet any other departmental, college, or university requirement.

Courses taken for the certificate cannot be taken pass not pass.

A grade of a 2.0 or better is required in each individual course applied towards the certificate.

Plant Pathology and Microbiology Undergraduate Study

The department participates in the interdepartmental undergraduate Microbiology major. See [/collegeofagricultureandlifesciences/microbiology/](#) for more information.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens

with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Seed Science Secondary Major

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study focus on seeds including production, conditioning, pathology, physiology, quality control, marketing, and seed plant designs.

Curriculum in Seed Science (Secondary Major)

Total Degree Requirement: 128 cr.

Complete Communication and Library requirements of primary major and 3 cr. from the following:

ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
SP CM 312	Business and Professional Speaking	3

Biological Sciences: 7 cr.

BIOL 211 & 211L	Principles of Biology I and Principles of Biology Laboratory I	4
or BIOL 212 & 212L	Principles of Biology II and Principles of Biology Laboratory II	
BIOL 313	Principles of Genetics	3
or AGRON 320	Genetics, Agriculture and Biotechnology	

Physical Sciences: 8-9 cr.

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	5
or CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	

One of the following:

AGRON 259	Organic Compounds in Plants and Soils	3
BBMB 221	Structure and Reactions in Biochemical Processes	3

CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4
--------------------	--	---

Mathematical Sciences 6 cr.

MATH 140	College Algebra	3
or MATH 150	Discrete Mathematics for Business and Social Sciences	
Statistics course		3

Agricultural Sciences: 28-29 cr.

AGRON 181	Introduction to Crop Science	3
or HORT 221	Principles of Horticulture Science	
AGRON 182	Introduction to Soil Science	3
AGRON 206	Introduction to Weather and Climate	3
AGRON 217	Weed Identification	1-2
or AGRON 330	Crop and Seed Identification Laboratory	
AGRON 281	Crop Physiology	3
AGRON 316	Crop Structure-Function Relationships	3
or HORT 321	Horticulture Physiology	
AGRON 354	Soils and Plant Growth	3
9 credits from AGRON, HORT, or TSM (6 credits at 300-400 level)		9

Economics and Business: 9 cr.

ECON 101	Principles of Microeconomics	3
Six credits from the following:		6
ACCT 284	Financial Accounting	
ECON 102	Principles of Macroeconomics	
ECON 230	Farm Business Management	
ECON 234	Small Business Management	
ECON 235	Introduction to Agricultural Markets	
ECON 236	Agricultural Selling	
ECON 334	Entrepreneurship in Agriculture	
MGMT 370	Management of Organizations	
MKT 340	Principles of Marketing	

Seed Science: 16 cr.

AGRON 317	Principles of Weed Science	3
AGRON 338	Seed Science and Technology	3
AGRON 421	Introduction to Plant Breeding	3
ENT 376	Fundamentals of Entomology and Pest Management	3
PL P 408	Principles of Plant Pathology	3
One of the following:		
AGRON 311	Professional Internship in Agronomy (seed related)	1
AGRON 491	Seed Science Internship Experience	1-2
HORT 391	Horticultural Management Experience	1

Humanities: 3 CR.

3 cr. from approved humanities list: <http://www.cals.iastate.edu/student-services/humanities> (<http://www.cals.iastate.edu/student-services/humanities/>)

Social Sciences: 3 CR.

3 cr. from approved social sciences list: <http://www.cals.iastate.edu/student-services/social-sciences> (<http://www.cals.iastate.edu/student-services/social-sciences/>)

Ethics: 3 CR.

3 cr. from approved ethics list: <http://www.cals.iastate.edu/student-services/ethics> (<http://www.cals.iastate.edu/student-services/ethics/>)

Remaining credits (student choice).

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

Sustainable Agriculture

Interdepartmental Graduate Major

The Sustainable Agriculture interdepartmental major is offered through faculty in 21 departments – Agricultural and Biosystems Engineering; Agricultural Education and Studies; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Community and Regional Planning; Ecology, Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Industrial and Manufacturing Systems Engineering; Journalism and Mass Communication; Landscape Architecture; Mechanical Engineering; Natural Resource Ecology and Management; Plant Pathology; Political Science; Sociology; World Languages and Cultures and Veterinary Diagnostic and Production Animal Medicine. Faculty in these departments cooperate to offer courses and direct research leading to M.S. and Ph.D. degrees with a major in Sustainable Agriculture.

The Sustainable Agriculture major is designed to balance depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning. Students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture.

Applicants applying to the MS program must have a bachelor's degree in one of the life, social, or engineering sciences, or a bachelor's degree plus equivalent experience in these areas. Applicants applying to the PhD program must have a master's degree and either an undergraduate or master's degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent.

Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on application procedures (<https://susag.iastate.edu/admissions/>), curriculum requirements (<https://susag.iastate.edu/academics/>), and faculty research areas (<https://www.susag.iastate.edu/faculty/>) is available on the Sustainable Agriculture website (<https://susag.iastate.edu/>).

IVY COLLEGE OF BUSINESS

David Spalding, Dean

Jackie Rees Ulmer, Associate Dean for Professional Masters Programs

Joey George, Associate Dean for Research

Valentina Salotti, Associate Dean for Undergraduate Programs

<https://www.ivybusiness.iastate.edu/>

Objectives of the Curriculum in Business

The instructional objective of the Ivy College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

Organization of Curriculum

The undergraduate curriculum in business is divided into three areas: a general education program, a pre-professional business program, and a professional business program. The general education program provides a broad spectrum of liberal arts coursework. The pre-professional business requirements provide a foundation in pre-business coursework. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The ten majors offered for the degree bachelor of science (B.S.) are accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, management, management information systems, marketing, and supply chain management. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Curriculum Changes

Iowa State University students who want to change their curriculum to the Ivy College of Business must attend a curriculum change meeting. For more details on changing curriculum or majors, please visit with an academic adviser in the Undergraduate Programs Office or visit: <https://>

nextcatalog.registrar.iastate.edu/academics/#degreeplanningtext .

Students on Academic Probation will not be allowed to change curriculum to the Ivy College of Business during enrollment period three.

See Making Schedule Changes at: <http://catalog.iastate.edu/registration/#schedulechangestext>

Admission Standards to Professional Programs

All new entering students and curriculum change students are enrolled in the pre-business curriculum. To enter the professional program in the Ivy College of Business, students must complete any required ENGL 099 Strategies for Nonnative Speakers of English courses, any required ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, at least 30 credits, and the following foundation courses or their approved substitutions:

MATH 150	Discrete Mathematics for Business and Social Sciences	3
COM S 113	Introduction to Spreadsheets and Databases	3
ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
STAT 226	Introduction to Business Statistics I	3
ACCT 284	Financial Accounting	3
BUSAD 102	Business Learning Team Orientation	1
	or BUSAD 103 Orientation	
BUSAD 203	Business Careers and Employment Preparation	1
BUSAD 250	Introduction to Business	3

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade point average of 2.5 in the foundation courses listed above. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes. With the exception of ACCT 285 Managerial Accounting, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Students who meet the following requirements qualify for early admission to the professional program. Students must have a minimum ISU cumulative GPA of 3.50 in at least 12 graded credits or full membership in the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University.

Admission requirements are subject to change. Applications and the current requirements for admission to the Ivy College of Business are available at <https://online.bus.iastate.edu/professionalprogram/>

Academic Standards and Graduation Requirements

Policies for students enrolled in the Ivy College of Business may be obtained at <https://www.ivybusiness.iastate.edu/undergraduate/forms-policies/> or from the Undergraduate Programs Office in the Ivy College of Business.

Students are responsible for knowing and adhering to these Ivy College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2019-2020 catalog:

1. A minimum of 122 semester credits are required. For the Actuarial Science major, a minimum of 131 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year institution.
3. Cumulative ISU grade point average of at least 2.0 with no quality point deficiencies.
4. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
5. No more than two transfer classes can be applied to the major.
6. Students must achieve communication proficiency by earning a grade of C or better in ENGL 250 and one additional from ENGL 150 or ENGL 302.
7. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
8. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
9. Business majors may not take business courses Pass-Not Pass (P/NP).
10. General education courses may not be taken P/NP.
11. No more than 9 elective credits may be taken P/NP.
12. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

Advising System

Each student in the Ivy College of Business has an assigned academic adviser who helps facilitate student progress toward graduation while supporting the academic standards of the College. Students enter as Pre-Business majors and are guided toward their entrance to the Professional

Program (business major) with assistance from professional advisers who continue to work with them through graduation.

Advisers, as part of the Undergraduate Programs Office staff, provide academic services to Business students including development of academic plans, study abroad planning, accessing pertinent University services and resources, and meeting their overall educational objectives.

The College encourages students to attend an orientation program prior to their entry, where information is shared and evaluated to help set the student out on the academic path appropriate to their goals, preparation, interests, and capabilities.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Currently enrolled students who have completed 12 graded credits at Iowa State University and earned a GPA of 3.50 or above are eligible to apply for membership to the University Honors Program (UHP). UHP students in the Ivy College of Business will work with designated advisers to incorporate elements of breadth, depth, and leadership into their business education through completion of academic, co-curricular, and personal/professional development experiences. In addition, to graduate with Honors in the Ivy College of Business, students must complete a minimum of two honors-designated courses, two 300-level honors seminars, an honors project, 50 credits of 300-level or higher coursework, and maintain a cumulative GPA of 3.50 or above. Additional details of requirements can be found on the Ivy College of Business Honors website at: <https://www.ivybusiness.iastate.edu/undergraduate/honors-program/>

Internships

Credit and non-credit internships in business may be approved for Ivy College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. A career coordinator from the Business Career Services Office will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the Ivy College of Business may complete additional majors in the Ivy College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural

business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the Ivy College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the Ivy College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Second Majors, Minors and certificates

International Business Secondary Major

A student in the Ivy College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits of international business courses, one year of the same university-level foreign language (minimum of 6 credits), and an approved international experience. Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor in International Business

Students with a major in the Ivy College of Business may earn a minor in International Business by completing 15 credits of approved coursework and one year of foreign language study, and completion of an approved study tour course offered by the Ivy College of Business, or an approved study abroad/internship experience. The minor must include at least six credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minor in Business and Technology Consulting

The Department of Marketing also offers a minor for any student with a major in the Ivy College of Business. The Business and Technology Consulting minor prepares you for a career as a business consultant. Every year consulting companies attract talented graduates across the world. As a consultant, you gain broad exposure to business issues, solve different business problems, make an impact on major businesses, and become an expert in a specific business functional area. The minor

provides a systematic process for students to strengthen problem-solving skills and prepare them to become better communicators and future leaders.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minors for Business Students

Students with a major in the Ivy College of Business may qualify for a minor specialization in one of the college's departments by taking at least 15 credit hours in the minor specialization (16 credit hours are required for a minor in Accounting), nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Minor for Non-Business Students

The Ivy College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

Required Courses (6 credits):

ACCT 284	Financial Accounting	3
ACCT 285	Managerial Accounting	3
or ACCT 215	Legal Environment of Business	
or BUSAD 250	Introduction to Business	

Elective Courses (9 credits):

Select three courses from the following list:

ENTSP 310	Entrepreneurship and Innovation	3
or MGMT 310	Entrepreneurship and Innovation	
FIN 301	Principles of Finance	3
MIS 301	Management Information Systems	3
MKT 340	Principles of Marketing	3
MGMT 370	Management of Organizations	3
SCM 301	Supply Chain Management	3

The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A grade of C or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the Ivy College of Business are eligible for a general business minor only—not a specialization in a business department.

Non-Business students may not take more than 9 cr. of 300 or 400 level Business courses.

General Business minor students needing more courses to meet the "nine credit stand alone" rule will need to apply to the Ivy College of Business for an exception, or should consider taking one additional course of ACCT 285, ACCT 215, or BUSAD 250.

For more information on the General Business minor, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/general-business-minor/>

Undergraduate Certificates

Professional Sales Certificate

The certificate in professional sales is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling. The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Students need to fulfill the course prerequisites set by the Ivy College of Business. A minimum of 9 credits used for the certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business courses for the certificate.

For more information about the Professional Sales Certificate, please visit: <https://catalog.iastate.edu/collegeofbusiness/marketing/#undergraduatecertificatetext>

Actuarial Science Certificate

The certificate in actuarial science is available from the *College of Liberal Arts and Sciences* for non-actuarial science majors at Iowa State. The certificate requires 23 credits from a designated list of courses, of which

9 credits must stand-alone. There are 9 prerequisite courses required for the certificate's required courses.

For more information about the Actuarial Science Certificate, please visit: <https://catalog.iastate.edu/collegeofbusiness/actuarialscience/#certificatetext>

Entrepreneurship Cross-Disciplinary Minor

The Ivy College of Business participates in a cross-disciplinary minor in Entrepreneurship. This minor is available to any undergraduate student. Requirements for the minor include, ENTSP 310 Entrepreneurship and Innovation (3 credits), either ENTSP 313 Feasibility Analysis and Business Planning or ENTSP 320 Corporate Entrepreneurship, Innovation and Technology Management or ENTSP 410 Social Entrepreneurship (3 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available at: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/entrepreneurial-studies-minor/> The minor requires at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Non-degree Seeking Students

Students who wish to take courses in the Ivy College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college's admission requirements.

Upper Division Courses for Students Outside the College

Students from outside the Ivy College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college's admission requirements to the professional program, as long as they meet course prerequisites.

Graduate Study

Six programs are offered at the master's level: a master of business administration (MBA), a master of accounting (MAcc), a master of business analytics (MBS), a master of finance (MFin), a master of real estate development (MRED), and a master of science in information systems (MSIS). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (MBA) is the professional management education program for those pursuing careers in business. The goal of the MBA program is to educate future business leaders

preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The MBA program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, business analytics, finance, information systems, marketing, or supply chain management.

The Ivy College of Business also offers a business administration minor to students with majors outside the college. For more information on the graduate minor in business administration, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/full-time-mba/collaborative-mba-programs/graduate-minors/>

A concurrent BS/MBA is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biosystems, chemical, civil, computer, electrical, industrial, mechanical, or software engineering.

A concurrent BS/MBA is available to eligible undergraduate students majoring in agronomy, agricultural systems technology, animal science, chemistry, computer science, food science, geology, industrial design, industrial technology, and meteorology.

Double degree programs are offered with apparel, merchandising, and design (MBA/MSAMD) architecture (MArch/MBA), community and regional planning (MBA/MCRP), finance (MBA/MFin), information systems (MBA/MSIS), and statistics (MBA/MS Statistics). A double degree program (DVM/MBA) is available to eligible Veterinary Medicine students as well.

The master of accounting (MAcc) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making. Additionally, the MAcc program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa. The 30 hour program requires 15 hours of graduate accounting courses, an international topics course, and 12 hours of non-accounting graduate credits, including a communications course. Students may pursue a specialization in Financial Reporting and Assurance, Data Analytics, Managerial Decision Making, Global Business, or Tax.

The master of business analytics (MBS) is an interdisciplinary program that addresses the challenges of dealing with data analytics and business intelligence in the "Big Data" environment. The goal is to develop managers who will master analytics in ways that lead to increased profits for their company. This blended program offers both online and face-to-face education in a comprehensive approach that draws from Business, Computer Science, Electrical and Computer Engineering, Statistics, and Industrial and Manufacturing Systems Engineering. It provides a foundation in data analytics project management, statistical and predictive modeling, consumer sentiment analysis, knowledge discovery, analytical reporting, segmentation

analysis and data visualization. The program requires 30 credits of graduate level courses over a 21 month period. Students start the program with a one-week on-campus initiation class. Students then revisit campus once during the middle and once at the end of the program, while taking online classes during the rest of the time.

A certificate in business analytics is also available for working professionals. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in business analytics, please visit: <http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>

The master of finance (MFin) is designed to provide students with in-depth coverage of financial topics and a strong quantitative skill set. Students will learn financial analysis, valuation, modeling, and risk management techniques. The 30-credit program requires 24 finance credits, of which 6 are finance electives. The remaining 6 credits are electives selected from any related area.

A certificate in finance is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken face-to-face. For more information on the graduate certificate in finance, please visit: <http://catalog.iastate.edu/collegeofbusiness/finance/#graduatecertificatetext> (<http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>)

The Master of Real Estate Development (MRED) is a 30-credit non-thesis, non-creative component program. The MRED program offers academic training, networking opportunities and collaboration with leading academics and practitioners to solve real world problems. Areas of study include real estate market analysis, finance, investments, leadership and negotiation, fundamentals of the build environment, construction science and urban planning. The curriculum is offered in a convenient format of distance learning and brief campus residencies, making it ideal for the full-time working professional.

The master of science in information systems (MSIS) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. The 30 credit program includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

A certificate in supply chain management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may only be taken on-line. For more information on the graduate certificate in supply chain management, please visit: <http://catalog.iastate.edu/collegeofbusiness/supplychainmanagement/#graduatecertificatetext>

(<http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>)

A certificate in enterprise cybersecurity management is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in enterprise cybersecurity management, please visit: <http://catalog.iastate.edu/collegeofbusiness/managementinformationssystem/#graduatecertificatetext> (<http://catalog.iastate.edu/collegeofbusiness/businessanalytics/#graduatecertificatetext>)

A certificate in entrepreneurship and innovation is also available. The certificate requires a minimum of 12 graduate level approved credits, which may be taken either on-line or face-to-face. For more information on the graduate certificate in entrepreneurship and innovation, please visit: <http://catalog.iastate.edu/collegeofbusiness/entrepreneurship/#graduatecertificatetext>

The Ivy College of Business participates in the following graduate level interdepartmental programs: Cyber Security, Engineering Management, Human Computer Interaction, Seed Technology and Business, and Transportation.

Ph.D in Business and Technology

The Ivy College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of five specializations—entrepreneurship (ENTSP), information systems (IS), management (MGMT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, Supply Chain Management, and Information Systems and Business Analytics), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by a 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master's degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information contact the Graduate Programs office in the Ivy College of Business or visit: <https://www.ivybusiness.iastate.edu/phd/>

Departments of the College

- Accounting
- Finance
- Management
- Marketing

- Supply Chain Management
- Information Systems and Business Analytics

Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, management, management information systems, marketing, or supply chain management. The college also offers a secondary major in international business. Total credits required: 122

Total credits required for Actuarial Science: 131

See also: A 4-year (8 semester) plan of study for each business degree.

Business Curriculum

For Actuarial Science curriculum, please go to: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/actuarial-science/>

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr. (see NOTE #3 below)

U.S. Diversity: 3 cr. (see note #4 below)

Communication: 13 cr.

Proficiency met with grade of C or better in ENGL 250 and one additional from ENGL 150 or ENGL 302.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGL 302	Business Communication	3
SP CM 212	Fundamentals of Public Speaking	3
or SP CM 312	Business and Professional Speaking	
LIB 160	Information Literacy	1

Humanities/Social Science: 9 cr.

9 cr. from approved humanities/social science list.

Global Perspectives: 6 cr. (SEE NOTE #3 BELOW)

6 cr. from approved global perspectives list.

Natural Science: 3 cr.

3 cr. from approved natural sciences list.

An approved list of the general education courses above are available at: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/> or from the Undergraduate Programs Office in the Ivy College of Business.

Foundation: 23 cr.

BUSAD 102	Business Learning Team Orientation	1
or BUSAD 103	Orientation	

BUSAD 203	Business Careers and Employment Preparation	1
BUSAD 250	Introduction to Business	3
MATH 150	Discrete Mathematics for Business and Social Sciences	3
COM S 113	Introduction to Spreadsheets and Databases	3
ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
STAT 226	Introduction to Business Statistics I	3
ACCT 284	Financial Accounting	3
Total Credits		23

Supporting Courses: 9-13 cr.

NOTE: Additional supporting courses are required for Actuarial Science.

MATH 151	Calculus for Business and Social Sciences	3
ACCT 215	Legal Environment of Business	3
ACCT 301	The Accounting Cycle (For ACCT majors only)	1
MIS 207	Fundamentals of Computer Programming (For MIS majors only)	3
STAT 326	Introduction to Business Statistics II (For ACCT, ACSCI, BUSEC, and FIN majors only)	3
PHIL 230	Moral Theory and Practice	3

Business Core: 24 cr.

ACCT 285	Managerial Accounting	3
FIN 301	Principles of Finance	3
MIS 301	Management Information Systems	3
MGMT 371	Organizational Behavior	3
MGMT 372	Responsible Management and Leadership in Business	3
MKT 340	Principles of Marketing	3
SCM 301	Supply Chain Management	3
MGMT 478	Strategic Management *	3
Total Credits		24

*All above core courses must be completed before MGMT 478.

BUSINESS MAJOR: 18-29 CR. (depending on major)

ELECTIVES: 0-17 CR. (depending on major)

Notes:

- Accounting, Actuarial Science, Finance, and Business Economics majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Bus Econ majors will take MATH 160 Survey of Calculus and ECON 207 Applied Economic Optimization instead of MATH 150 Discrete Mathematics for Business and Social Sciences and MATH 151 Calculus for Business

and Social Sciences. Accounting majors will take ACCT 301 The Accounting Cycle concurrent with ACCT 285 Managerial Accounting as part of the Supporting Courses. Management Information Systems majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.

- Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curricula.
- Students may satisfy the Global/International Perspectives requirement by taking six credit hours from the University International Perspectives list.
- Courses used for the U.S. Diversity requirements may also be used to fulfill humanities/social science.

Professional Programs

The curriculum in Accounting is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

Bachelor of Science

The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the Ivy College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting, actuarial science, business analytics, business economics, entrepreneurship, finance, management, management information systems, marketing, or supply chain management.

Majors

Accounting
Actuarial Science

Supply Chain Management

For Non-Business Majors

General Business Minor
Entrepreneurship

Accounting

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

The primary purpose of accounting is to provide useful information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, controlling, and reporting the activities of the firm. Accounting information is needed by external users in order to make investment decisions, to grant or withhold credit, and in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession.

Undergraduate Major in Accounting

For undergraduate curriculum in business, major in accounting.

The Department of Accounting offers a major in accounting. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (BS) degree, and 21 additional credits in the major.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to think critically and creatively about accounting problems
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and

does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Accounting, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/accounting/>

Undergraduate Minor in Accounting

The Department of Accounting also offers a minor for non-Accounting majors in the Ivy College of Business. The minor requires 16 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (7 credits):

ACCT 284	Financial Accounting	3
ACCT 285	Managerial Accounting	3
ACCT 301	The Accounting Cycle	1

Elective Courses (9 credits):

Select nine credit hours from 300 or 400 level Accounting courses, except ACCT 316.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Accounting, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

The requirements for the accounting major are met by successful completion of the following courses:

Required Courses (18 credits):

ACCT 383	Intermediate Managerial Accounting	3
ACCT 384	Accounting Information Systems and Analytics	3
ACCT 386	Intermediate Accounting I	3
ACCT 387	Intermediate Accounting II	3
ACCT 485	Principles of Federal Income Tax	3
ACCT 497	Introduction to Auditing	3

Elective Courses (3 credits):

Select three credit hours from the following list:

ACCT 315	Business Data Streams and Issues	3
ACCT 483	Application and Communication in Managerial Accounting	3
ACCT 484	Advanced Accounting Information Systems	3
ACCT 487	Volunteer Income Tax Assistance	1
ACCT 488	Governmental and Non-profit Institution Accounting	3
ACCT 489	Corporate Social Responsibility Reporting	3
ACCT 495	Advanced Accounting Problems	3
ACCT 496	Accounting in the Global Economy	3

See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 316 Business Law. The Department of Accounting should be consulted for information on alternative plans of study.

CPA Note: The accounting major requires 22 credits of accounting beyond ACCT 284 Financial Accounting and ACCT 285 Managerial Accounting. The State of Iowa CPA exam requirement is 24 hours beyond principles, therefore, students will need 2 additional credits beyond major requirements to qualify for the CPA exam.** ACCT 316 Business Law is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. While students may sit for the CPA exam in Iowa after completing the required accounting course work and earning a bachelors degree, CPA candidates must complete a total of 150 credits in order to be certified or licensed to practice in Iowa. Qualified students should consider taking the Masters of Accounting (MAcc) to satisfy the 150-credit requirement. Students in accounting who are interested in graduate study should contact the Coordinator of the MAcc Program as early as possible to complete their graduate degree in an efficient manner. Students planning certification outside Iowa must check local rules, as each state determines its own exam qualification and licensing requirements.

** In addition, business law, ACCT 215 does not count towards to the 24 hour accounting course requirement.

^{*} All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in accounting. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your adviser for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your adviser regarding multiple business **degree requirements**.

Graduate Study

The department offers a graduate degree, the master of accounting (MAcc). This is a 30-hour degree which also offers up to two optional 12 credit hour specializations within those 30 hours. Specializations are offered in Financial Reporting and Assurance, Data Analytics, Managerial Decision Making, Global Business, or Tax. The program requires 15 hours of graduate accounting courses, ENGL 592C Core Studies: Professional Communication or its equivalent, at least 9 hours of non-accounting courses, and an international course from an approved list. Included in the 15 required hours of graduate accounting courses is one 3-credit required course, ACCT 598 Financial Accounting: Theory and Contemporary Issues.

The MAcc is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The MAcc program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the MAcc. Contact the coordinator of the MAcc program for details.

For more information about the MAcc program, please visit: <https://www.ivybusiness.iastate.edu/masters/macc/>

The Department of Accounting participates in the full-time and part-time Master of Business Administration (MBA) program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.

For more information about the MBA program with a specialization in Accounting, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

Actuarial Science

Actuaries measure and manage risk, and have a deep understanding of mathematics, statistics and business. With this knowledge, they help businesses grow and provide value to their customers, help leaders make strategic decisions, and help consumers prepare for their future. In demand, actuaries work for and with businesses with a financial focus – such as life, health, and property-casualty insurance, along with banking, investments, government, energy, e-commerce, marketing, employee benefits, product development, enterprise risk management, predictive analytics, and consulting.

Students studying actuarial science will acquire the knowledge base and skills in finance, mathematics, and statistics needed to pass the preliminary actuarial exams offered by the Society of Actuaries and Casualty Society of America, while acquiring essential skills to be successful in the field.

Undergraduate Major:

The Department of Finance in the Ivy College of Business offers a major in actuarial science. Students will complete the business general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 29 additional credits in the major.

The actuarial science major, intended for students with strong quantitative backgrounds and interest in business, has the goal of educating students in business and risk management, while providing the technical and analytical skills needed to enable them for certification as an actuary (via the 5 preliminary exams of the profession). The major is an excellent opportunity for individuals who want to help businesses grow and provide value to their customers, help leaders make strategic decisions, and help consumers prepare for their future.

Certificate:

The certificate in actuarial science is available from the *College of Liberal Arts and Sciences* for non-actuarial science majors at Iowa State. The certificate requires 23 credits from a designated list of courses, of which 9 credits must stand-alone. There are 9 prerequisite courses required for the certificate's required courses.

The certificate in actuarial science is intended for students studying mathematics, statistics, or other STEM disciplines at Iowa State (or who hold a baccalaureate degree from an accredited institution) who wish to prepare for a career in the field while obtaining the advanced technical and analytical skills in their chosen major. Students completing the certificate will have sufficient background to pass the first 4 preliminary exams of the profession, along with applying actuarial mathematics to problems in finance, investments, and risk analysis for a broad range of businesses and consumers.

Undergraduate Major in Actuarial Science

For undergraduate curriculum in business, major in actuarial science.

The Department of Finance offers a major in actuarial science. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 29 additional credits in the major.

Actuaries measure and manage risk and work for and with businesses with a financial focus, such as finance and insurance. The actuarial science program provides a background in probability, statistics, finance, and actuarial mathematics to enable students to pass the 5 preliminary exams offered by the Society of Actuaries and Casualty Society of America. After completion of this program, students will acquire the business-related skills needed to be a successful actuary. These include the ability to: understand how a business is organized and functions; communicate effectively in written, oral, visual, and electronic modes; work in teams; make ethical choices; use quantitative and analytical methods to address unstructured business problems; think critically; understand financial statements; and understand markets and investments.

Areas of study in the field of actuarial science include interest theory, theory of probability, financial futures and options, loss models, credibility theory, and mathematics of life contingencies.

The instructional objective of the Actuarial Science program is to provide a well-rounded professional business education in actuarial science. Such a program will provide the student with:

1. a mastery of actuarial concepts and methods of analysis
2. a basic understanding of insurance operations in a global setting and of the role of financial institutions in the economy

3. an ability to effectively communicate and work with others as an actuary
4. an ability to demonstrate leadership capabilities in actuarial, financial analysis, and portfolio management.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Actuarial Science, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/actuarial-science/>

Curriculum:

While the General Education Requirements for Actuarial Science majors remains the same as all other Business majors, there are specific changes in the following areas that must be completed in order to receive a Bachelor's degree in Actuarial Science:

Pre-Professional Program – Foundation: (24)

BUSAD 102	Business Learning Team Orientation	1
	or BUSAD 103 Orientation	
BUSAD 203	Business Careers and Employment Preparation	1
COM S 113	Introduction to Spreadsheets and Databases	3
MATH 165	Calculus I	4
ECON 101	Principles of Microeconomics	3
BUSAD 250	Introduction to Business	3
ECON 102	Principles of Macroeconomics	3
STAT 226	Introduction to Business Statistics I	3
ACCT 284	Financial Accounting	3

Supporting Courses: (23)

ACCT 215	Legal Environment of Business	3
FIN 320	Investments	3
MATH 166	Calculus II	4
MATH 207	Matrices and Linear Algebra	3
MATH 265	Calculus III	4
PHIL 230	Moral Theory and Practice	3
STAT 326	Introduction to Business Statistics II	3

Professional Program – Business Core: (24)

ACCT 285	Managerial Accounting #	3
FIN 301	Principles of Finance	3
MGMT 371	Organizational Behavior	3

MGMT 372	Responsible Management and Leadership in Business	3
MIS 301	Management Information Systems	3
MKT 340	Principles of Marketing	3
SCM 301	Supply Chain Management	3
Above courses are prerequisites and must be taken prior to:		
MGMT 478	Strategic Management	3

With the exception of ACCT 285, Pre-Business students cannot take Professional Program courses.

Major – Actuarial Science: (29)**

MATH 240	Mathematics of Investment and Credit	3
STAT 341	Introduction to the Theory of Probability and Statistics I	4
STAT 342	Introduction to the Theory of Probability and Statistics II	4
FIN 424	Financial Futures and Options	3
ACSCI 401	Loss Models I	3
ACSCI 402	Credibility Theory	3
FIN 464	Risk Management Derivatives	3
MATH 441	Life Contingencies I	3
MATH 442	Life Contingencies II	3

Part of the IFM actuarial exam includes material covered in **FIN 310 Corporate Finance. Thus, FIN 310 remains highly recommended as an elective, and should be taken sooner rather than later.

Actuarial Science, B.S.

Sample 4-Year Plan (Your plan may differ)

Freshman

Fall	Credits Spring	Credits
BUSAD 102 or 103	1 ACCT 284*	3
ECON 101*	3 ECON 102*	3

HUM/SOC SCI	3 MGMT 478**	3
(Students should take STAM (or IFM) exam during winter break)	HUM/SOC SCI	3
	(Students should take LTAM exam)	
<hr/>		
	15	15

Total Credits: 131

Total Credits = 131 if US Diversity and Human/Social Sciences are dual assigned.

@ Courses in these requirements may also be used as Global Perspective.

US Diversity courses may be used to satisfy HUM/SOC SCI.

* Validation of Educational Experience courses

** All core classes must be completed prior to taking MGMT 478 in the graduating semester.

FM = Financial Mathematics exam

P = Probability exam

IFM = Investments & Financial Markets exam

STAM = Short-Term Actuarial Mathematics exam

LTAM = Long-Term Actuarial Mathematics exam

Students must be admitted to the professional program in business to major in actuarial science. The requirements to enter the professional program are:

1. Completion of at least 30 credits, all Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your adviser for specific information.)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 131 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. A grade of C- or better in MATH 166 and MATH 265 required.

8. All 300-level and higher business credits must be earned at a four-year college.

9. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your adviser regarding multiple business **degree requirements**.

Undergraduate Certificate

For the undergraduate certificate in actuarial science.

Purpose

The College of Liberal Arts and Sciences offers a certificate in Actuarial Science. The certificate provides students with a major in mathematics, statistics, or other STEM disciplines (or who hold a baccalaureate degree from an accredited institution) with the necessary background in mathematics, statistics, and the basic principles of finance for a career in actuarial science while obtaining advanced technical and analytical

skills in their chosen major. Students completing the certificate will have the background to pass 4 of the preliminary exams in the profession, will have obtained the specialized knowledge required for success in the field, and will be prepared to work for and with businesses with a financial focus, such as insurance, banking, and investments.

Learning Outcomes

After completing the certificate in actuarial science, students will:

- master the quantitative and analytical skills required to obtain an entry-level position in the profession,
- have sufficient background to pass the first 3 or 4 professional exams offered by the professional actuarial organizations,
- apply actuarial mathematics to problems in finance, investment, and risk analysis, and
- demonstrate the ability to communicate the results of quantitative analysis, both in writing and orally.

Requirements

The certificate in actuarial science requires the completion of 7 courses, totaling 23 credit hours.

These courses are:

FIN 320	Investments	3
FIN 424	Financial Futures and Options	3
MATH 240	Mathematics of Investment and Credit	3
MATH 441	Life Contingencies I	3
MATH 442	Life Contingencies II	3
STAT 341	Introduction to the Theory of Probability and Statistics I	4
STAT 342	Introduction to the Theory of Probability and Statistics II	4

The seven courses in the list above require 9 prerequisite courses. These courses are: ACCT 284, ECON 101, FIN 301, MATH 165, MATH 166, MATH 265, MATH 207 or 317, STAT 226 (or another introductory statistics course: STAT 101, 104, 105, 201, 231, 305, 322 or 330), and STAT 326 (or STAT 301).

In order to be admitted to the certificate program, students must complete ACCT 284, ECON 101, MATH 165, MATH 166, and STAT 226 (or another introductory statistics course) with a cumulative GPA of at least 2.5.

At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

A cumulative GPA of at least 2.0 is required in the seven courses for the certificate.

Business Administration

The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Management, Marketing, Supply Chain Management, and Information Systems and Business Analytics, by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study

The Ivy College of Business offers a professional graduate degree program in business administration, the master of business administration (MBA), which is described below. The college also has five specialized master degree programs: the master of accounting (MAcc), the master of business analytics (MBS), the master of finance (MFin), the master of real estate development (MRED), and the master of science in information systems (MSIS). The college also offers a PhD in business and technology, with specializations in information systems, management, marketing, supply chain management, and entrepreneurship. Finally, the Ivy College of Business is a participating member of the following interdepartmental programs: master of engineering management, master of science in transportation, master of science in seed technology and business, master of science and PhD in human computer interaction, and master of science in cyber security.

Master of Business Administration (MBA)

The Ivy College of Business offers a 48 credit program leading to a non-thesis master of business administration degree with a specialization in accounting, business analytics, finance, information systems, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The MBA is the professional management education program for those pursuing careers in business.

Students may enroll in the MBA on either a full-time or part-time basis. The part-time MBA is designed for employed professionals. Part-time MBA classes are held in the evenings in downtown Des Moines.

Students working toward the MBA are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, professional responsibilities, and strategic management), as well as advanced elective coursework. Two courses on professional skills development are also required for full-time MBA students.

Courses for the MBA are provided by the departments of Accounting, Economics, Finance, Management, Marketing, Supply Chain Management, and Information Systems and Business Analytics. Courses from other departments may also be chosen to meet specific student interests.

A concurrent BS/MBA is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biosystems, chemical, civil, computer, electrical, industrial, software or mechanical engineering.

A concurrent BS/MBA is available to eligible undergraduate students majoring in Agricultural Systems Technology, Agronomy, Animal Science, Chemistry, Computer Science, Food Science, Geology, Industrial Design, Industrial Technology, and Meteorology.

Double master's degree programs are offered with architecture (MARCH/MBA), apparel, merchandising, and design (MBA/MSAMD) community and regional planning (MBA/MCRP), information systems (MBA/MSIS), finance (MBA/MFin), and statistics (MBA/MS-Statistics). A double degree program (DVM/MBA) is also available to eligible Veterinary Medicine students.

The MBA program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, Graduate Management Admission Test (GMAT) scores or Graduate Record Exam (GRE) scores, personal essays, a resume, and two letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time MBA. Although applications will be considered after this date, candidates are encouraged to submit their application materials by July 1 (March 1 for international students). Part-time MBA applications are considered for fall, spring, or summer entry.

For more information about the MBA program in any of the areas of specialization listed above, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

Ph.D. in Business and Technology

The Ivy College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of five specializations—entrepreneurship (ENTSP), information systems (IS), management (MGMT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, Supply Chain Management, and Information Systems and Business Analytics),

and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master's degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These include:

- Financial or managerial accounting (min. 3 Cr)
- Corporate finance (min. 3 Cr)
- Management information systems (min. 3 Cr)
- Marketing (min. 3 Cr)
- Supply chain management (min. 3 Cr)
- Economics – micro and macro (min. 6 Cr)

Students can choose one of five areas of specialization—ENTSP, IS, MGMT, MKT, or SCM.

The entrepreneurship (ENTSP) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on preparing students to conduct and publish scholarly research in the fields of Entrepreneurship, Innovation, and Technology Management.

The information systems (IS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the IS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

The management (MGMT) specialization applies a broad range of theoretical perspectives from the social sciences and diverse research methods to the study of organizational behavior, human resources, strategy, and entrepreneurship. The curriculum takes a multidisciplinary approach to analyze individuals and teams, the formulation and implementation of strategy, the effective use of human resources, social responsibility and ethics, entrepreneurship, innovation and technology, and the challenges of the global business environment. The

program emphasizes personalized attention and the development of scholars who can contribute with high-quality theoretical and empirical research in these and related areas.

The marketing (MKT) area focuses on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses' customer base.

The supply chain management (SCM) specialization focuses on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today's world, where competition occurs across supply chain networks, SCM also involves integrating business processes across firms.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student's PhD committee. Each student must complete advanced courses in his/her area of specialization, a minor area that supports the major area, and research methods courses. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the PhD program is January 15 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, Graduate Management Admission Test (GMAT) scores or Graduate Record Exam (GRE) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

For more information about the PhD program in any of the areas of specialization listed above, please visit: <https://www.ivybusiness.iastate.edu/phd/>

Graduate Minor in Business Administration

The Ivy College of Business also offers a business administration minor to students with majors outside the college. In order to obtain a graduate minor in business administration at Iowa State University, a student must complete eighteen credit hours of the required core courses for the major in business administration. A student who wishes to minor in business administration must have full admission status in his/her respective

graduate program and must be in good academic standing (graduate transcript required).

Required Courses (9 credits):

ACCT 501	Financial Accounting	3
MGMT 502	Organizational Behavior	3
MGMT 503	Professional Responsibility in Business and Society	3

Choose THREE additional courses from the list below (9 credits):

FIN 501	Financial Valuation and Corporate Financial Decisions	3
MKT 501	Marketing	3
SCM 501	Supply Chain Management	3
MIS 501	Management Information Systems	3

Applications for the graduate minor in business administration are accepted for fall semester entry only.

For more information on the graduate minor in business administration, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/full-time-mba/collaborative-mba-programs/graduate-minors/>

Business Analytics

We live in a day where we are overwhelmed with data. Today's companies are data-rich and information-poor (DRIP). Business analytics is the transformation of data into insights for better decision making. This transformation is iterative and multi-disciplinary. Business analytics falls at the intersection of technology, statistics, and business.

Students studying business analytics will gain the knowledge and skills necessary to understand and apply quantitative modeling techniques, design cross-functional solutions using standard and advanced business analytics technologies and software, evaluate data mining methods, communicate solutions using data visualizations, develop team and project management skills in a big data context, and effectively communicate analytical findings both orally and in writing.

Undergraduate Major in Business Analytics

For undergraduate curriculum in business, major in Business Analytics.

The Department of Information Systems and Business Analytics offers a major in Business Analytics. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the business analytics major is to prepare students to realize the opportunities presented by data. This includes bringing structure to data, finding compelling patterns in data,

communicating the stories buried in data, and advising decision-makers at all levels on the implications for processes and decisions through a data-driven approach.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Business Analytics, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/business-analytics/>

Undergraduate Minor in Business Analytics

The Department of Information Systems and Business Analytics also offers a minor for non-Business Analytics majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least nine credits that are not used to satisfy any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (9 credits):

DS 201	Introduction to Data Science	3
MIS 320	Database Management Systems *	3
OR		
ACCT 384	Accounting Information Systems and Analytics *	
MIS 436	Introduction to Business Analytics	3

Elective Courses (6 credits):

Choose at least two 3-credit courses from the list below		
ACCT 484	Advanced Accounting Information Systems	3
FIN 450	Analytical Methods in Finance	3
MGMT 473X	Advanced Human Resource Management I	3
MIS 315	Business Data Streams and Issues	3
MIS 446	Advanced Business Analytics	3
MIS 368	Marketing Analytics	3
MKT 361	Social Media Marketing Strategy	3
MKT 367X	Consultative Problem Solving	3
MKT 445	Customer Relationship Management	3
SCM 430X	Supply Chain Analytics	3
SCM 460	Decision Tools for Logistics and Operations Management	3

* If both MIS 320 and ACCT 384 are taken, one will count for 3 elective credits in the minor.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Business Analytics, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

In addition to the basic business requirements, Business Analytics majors must also complete:

Required Courses (12 credits):

DS 201	Introduction to Data Science	3
MIS 320	Database Management Systems *	3
OR		
ACCT 384	Accounting Information Systems and Analytics *	
MIS 436	Introduction to Business Analytics	3
MIS 446	Advanced Business Analytics	3

Elective Courses (9 credits):

Select three courses from the following list:		
ACCT 484	Advanced Accounting Information Systems	3
FIN 450	Analytical Methods in Finance	3
MGMT 473X	Advanced Human Resource Management I	3
MIS 315	Business Data Streams and Issues	3
MIS 368	Marketing Analytics	3
MKT 361	Social Media Marketing Strategy	3
MKT 367X	Consultative Problem Solving	3
MKT 445	Customer Relationship Management	3
SCM 430X	Supply Chain Analytics	3
SCM 460	Decision Tools for Logistics and Operations Management	3

* If both MIS 320 and ACCT 384 are taken, one will count for 3 elective credits in the major.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Business Analytics, B.S.

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.

US Diversity courses may be used to satisfy HUM/SOC SCI.

* All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in Business Analytics. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your adviser for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your adviser regarding multiple business **degree requirements**.

Graduate Study

The master of business analytics (MBS) is an interdisciplinary program that addresses the challenges of dealing with data analytics and business intelligence in the "Big Data" environment. The goal is to develop managers who will master analytics in ways that lead to increased profits for their company. This blended program offers both online and face-to-face education in a comprehensive approach that draws from Business, Computer Science, Electrical and Computer Engineering, Statistics, and Industrial and Manufacturing Systems Engineering. It provides a foundation in data analytics project

management, statistical and predictive modeling, consumer sentiment analysis, knowledge discovery, analytical reporting, segmentation analysis and data visualization. The program requires 30 credits of graduate level courses over a 21 month period. Students start the program with a one-week on-campus initiation class. Students then revisit campus once during the middle and once at the end of the program, while taking online classes during the rest of the time.

For more information about the Master of Business Analytics program, please visit: <https://www.ivybusiness.iastate.edu/masters/business-analytics/>

The Department of Information Systems and Business Analytics participates in the full-time and part-time Master of Business Administration (MBA) program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in Business Analytics.

For more information about the MBA program with a specialization in Business Analytics, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

Graduate Certificate

The graduate certificate in business analytics will address the challenges of dealing with issues of "big data" and its analysis to extract actionable insights, equips business professionals with the basic analytic concepts and techniques necessary in various areas of business such as marketing, supply chain, operations, forensics, and risk management. Students will have a foundation in data management, business analytics, modeling, and communicating through data visualization.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as business analysts, analytic systems designers, and data scientists to help improve business performance. The certificate is available online, on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in business analytics, please visit: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/> (<https://www.ivybusiness.iastate.edu/masters/graduate-certificates/business-analytics/>)

Business Economics

The Ivy College of Business has partnered with the Department of Economics to offer a Business Economics major.

Where business studies the organizations and functions that deliver goods and services to customers, economics studies those good and

services with respect to production, distribution, and consumption, and the choices we make about how to best utilize the resources we have.

Undergraduate Major in Business Economics

For undergraduate curriculum in business, major in business economics.

Through a partnership between the Ivy College of Business and the Department of Economics, a major in Business Economics is offered. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (BS) degree, and 19 additional credits in the major.

The objective of the Business Economics major is to provide a high quality education with a balanced emphasis in both business and economics. Such an education should equip graduates with a unique set of skills distinguishing them from other graduates. In particular, they will have the ability to use both business and economic reasoning to think critically and address complex issues using tools and decision making models of economics, business, mathematics, statistics, as well as concepts from the biological, physical, and social sciences; to make decisions and to communicate effectively.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Business Economics, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/business-economics/>

Curriculum:

In addition to the basic business requirements, business economics majors must also complete:

Required Courses (10 credits):

ECON 301	Intermediate Microeconomics	4
ECON 353	Money, Banking, and Financial Institutions	3
ECON 431	Managerial Economics	3
ECON 492	Graduating Senior Survey	R

Elective Courses (9 credits):

Select one course of ECON 230-289, 300-389, or 400-489	3
Select two additional 400-489 level ECON courses	6

NOTES:

Business Economic majors must take STAT 326.

Business Economic majors take MATH 160 and ECON 207 instead of MATH 150 and MATH 151.

Students majoring in business economics are not permitted to take agricultural business or economics as a double major, or economics as a minor.

Business Economics, B.S.

US Diversity courses may be used to satisfy HUM/SOC SCI.

* All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in business economics. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your adviser for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.
7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your adviser regarding multiple business **degree requirements**.

Entrepreneurship

Success in entrepreneurship requires a broad base of conceptual knowledge, personal skills, and competencies. The required courses in the major provide a variety of rich developmental experiences that include applied learning, case analysis, research projects, team-based active learning projects, and guest speakers, in addition to traditional classroom

lectures and discussions. The Entrepreneurship major places a strong emphasis on written and oral communication skills, teamwork, creativity, leadership, and personal initiative.

Undergraduate Major in Entrepreneurship

For undergraduate curriculum in business, major in entrepreneurship.

The Department of Management offers a major in Entrepreneurship. Students will complete the general education requirements (including business foundation courses), business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The instructional objectives of the Entrepreneurship major are to provide students with an in-depth and rigorous study of the field of entrepreneurship. Upon graduation, students are better prepared to identify and exploit business opportunities, start their own business, assist other entrepreneurs in starting or running a business, or contribute to entrepreneurial and innovative activities in established organizations.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Students majoring in Entrepreneurship are not permitted to take Entrepreneurship as a minor.

For more information on the undergraduate major in Entrepreneurship, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/entrepreneurship/>

Undergraduate Minor in Entrepreneurship

An Entrepreneurship minor for non-Entrepreneurship majors is also available. This interdepartmental undergraduate minor in Entrepreneurship is available to all undergraduate students at Iowa State University. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include 9 credits that are not used to meet any other department, college, or university requirement. Students must follow college-specific rules in selecting courses for the minor. The college representatives to the supervisory committee for the minor will be responsible for advising students in their college, and will inform students about the details of the college rules. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and

does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

Students with an Entrepreneurship minor are not permitted to major in Entrepreneurship.

For more information on the undergraduate minor in Entrepreneurship, please visit: <http://catalog.iastate.edu/interdisciplinaryprograms/minor/entrepreneurialstudies/>

Curriculum:

Entrepreneurship majors are required to complete 18 credit hours of entrepreneurship or management department-approved courses.

Included in these 18 credits are four required courses:

Required Courses (12 credits):

ENTSP 310	Entrepreneurship and Innovation	3
ENTSP 313	Feasibility Analysis and Business Planning	3
ENTSP 320	Corporate Entrepreneurship, Innovation and Technology Management	3
ENTSP 480	Applied Entrepreneurship: Executing New Ventures and Projects	3

Elective Courses (6 credits):

Select two courses from the following list:

ACCT 316	Business Law	3
ACCT 371X	Entrepreneurship and Accounting Information	3
AESHM 474	Entrepreneurship in Human Sciences	3
ECON 334	Entrepreneurship in Agriculture	3
ENTSP 367	International Entrepreneurship	3
ENTSP 410	Social Entrepreneurship	3
ENTSP 431X	Small Business Finance Decisions	3
ENTSP 485	Trends in Entrepreneurship	3
FIN 415	Business Financing Decisions	3
MGMT 471	Personnel and Human Resource Management	3
MGMT 472	Management of Diversity	3
MKT 447	Consumer Behavior	3
SCM 340	Project Management	3
SCM 453	Supply Chain Planning and Control	3

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Graduate Study

The Department of Management participates in the PhD in Business and Technology with an Entrepreneurship (ENTSP) specialization. The program is a 56-credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on preparing students to conduct and publish scholarly research in the fields of Entrepreneurship, Innovation, and Technology Management.

For more information about the PhD program with a specialization in Entrepreneurship, please visit: <https://www.ivybusiness.iastate.edu/phd/>

Graduate Certificate

The graduate certificate in Entrepreneurship and Innovation is designed to teach students the process through which new ventures are

created and to ensure students understand the role of innovation in entrepreneurship.

The certificate allows post-graduate students from any discipline to learn about entrepreneurship, innovation, and the new venture creation process. The interdisciplinary certificate program provides students an opportunity to gain business skills they can use in starting a business without a large time commitment. It is flexible so that students can design a program that provides core entrepreneurship education through Management 566 as well as discipline-specific training from entrepreneurship courses in other colleges.

For more information about the graduate certificate in Entrepreneurship and Innovation, please visit: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/>

Finance

Finance is a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include corporate financial management, investments, portfolio management, insurance, real estate, banking, and risk management. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

Undergraduate Major in Finance

For undergraduate curriculum in business, major in finance.

The Department of Finance offers a major in finance. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (B.S.) degree, and 21 additional credits in the major.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. a mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as the finance member of a team

4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Finance, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/finance/>

Undergraduate Minor in Finance

The Department of Finance also offers a finance minor for non-finance majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Course (3 credits):

FIN 301	Principles of Finance	3
---------	-----------------------	---

Elective Courses (12 credits):

Select twelve credit hours from 300 or 400 level Finance courses

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Finance, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

In addition to the basic business requirements, finance majors must also complete:

Required Courses (6 credits):

FIN 310	Corporate Finance *	3
FIN 320	Investments	3

Elective Courses (12 credits):

Select four courses from the following (at least two must be 400-level):

FIN 327	Fixed Income Securities	3
---------	-------------------------	---

FIN 330	Financial Markets and Institutions	3
FIN 361	Personal Risk Management and Insurance	3
FIN 371	Real Estate Principles	3
FIN 415	Business Financing Decisions	3
FIN 424	Financial Futures and Options	3
FIN 425	Security Analysis and Portfolio Management	3
FIN 428	Advanced Fixed Income Analysis and Portfolio Management	3
FIN 431X	Small Business Finance Decisions	3
FIN 435	Venture Capital, Private Equity, and Mergers and Acquisitions	3
FIN 445	Bank Management Decisions	3
FIN 450	Analytical Methods in Finance	3
FIN 455X	Predictive Analytics in Finance	3
FIN 456X	Financial Modeling	3
FIN 462	Corporate Risk Management and Insurance	3
FIN 464	Risk Management Derivatives	3
FIN 472	Real Estate Finance	3
FIN 474	Real Estate Investment	3
FIN 480	International Finance	3
FIN 491X	International Study Course in Global Capital Markets	3

Additional Elective Courses (3 credits):

Select one course from the following:

ACCT 383	Intermediate Managerial Accounting	3
ACCT 386	Intermediate Accounting I	3
ACCT 387	Intermediate Accounting II	3

or any additional 400+ level Finance course.

Total Credits: 21

* STAT 326 Introduction to Business Statistics II is highly recommended to be taken as a prerequisite.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Graduate Study

The Finance Department offers a Master of Finance (MFin) degree. The MFin is a non-thesis, non-creative component curriculum designed to provide students with in-depth coverage of finance topics and a strong quantitative skill set. Students will learn financial analysis and valuation, advanced regression techniques and programming approaches for data analysis, time series analysis and forecasting, optimization techniques, modelling of financial and risk variables, simulation techniques, and tools for effective risk management. The 30 credit program requires 18 core credits. Another 12 credits of electives are required, six of which must be in finance courses.

For more information about the MFin program, please visit: <https://www.ivybusiness.iastate.edu/masters/mfin/>

The Finance Department also offers a Master of Real Estate Development (MRED) degree. Jointly created by the College of Design, with significant input and engagement from industry leaders, the MRED is a 30-credit

non-thesis, non-creative component program. The MRED program offers academic training, networking opportunities and collaboration with leading academics and practitioners to solve real world problems. Areas of study include real estate market analysis, finance, investments, leadership and negotiation, fundamentals of the build environment, construction science and urban planning. The curriculum is offered in a convenient format of distance learning and brief campus residencies, making it ideal for the full-time working professional.

For more information about the MRED program, please visit: <https://www.ivybusiness.iastate.edu/masters/mred/>

The Department of Finance also participates in the full-time and part-time Master of Business Administration (MBA) program. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in finance.

For more information about the MBA program with a specialization in Finance, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

Graduate Certificate

The graduate certificate in finance provides training in investment valuation and the skills necessary to value an entire company through analysis of expected cash flows based on financial statements, growth characteristics, and risk.

The certificate is for graduate students and recent graduates seeking job opportunities as investors or professional money managers, who deal with efficient asset allocation in a portfolio setting, investment performance measurement, and performance evaluation. The certificate is available on campus in Ames.

For more information about the graduate certificate in Finance, please visit: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/>

International Business

The international business secondary major is designed to provide students with an understanding of the international business environment. Students are expected to develop an understanding of factors associated with international business issues as applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The major is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

Undergraduate Secondary Major in International Business

For undergraduate curriculum in business, secondary major in International Business.

Administered by the Department of Management.

International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this major should strengthen their placement opportunities with companies that are engaged in international business and trade.

For students with a primary major in the Ivy College of Business, the requirements for this secondary major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits), an approved international experience, and completion of the requirements of their primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.

Students interested in this major should meet with their academic adviser in the Undergraduate Programs Office. For information on potential international experiences, see the Ivy College of Business International Programs Coordinator, also located in the Undergraduate Programs Office.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate secondary major in International Business, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/international-business/>

Undergraduate Minor in International Business

Students with a major in the Ivy College of Business may earn a minor in International Business by completing 15 credits of approved coursework and one year of foreign language study, and completion of an approved study tour course offered by the Ivy College of Business, or an approved study abroad/internship experience. The minor must include at least six credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Select 12 CREDITS from the following list:

ACCT 496	Accounting in the Global Economy	3
ECON 355	International Trade and Finance	3
ECON 455	International Trade	3
FIN 480	International Finance	3
MGMT 367	International Entrepreneurship *	3
MGMT 414	International Management	3
MKT 448	Global Marketing	3
MKT 492	Comparative Marketing	3
POL S 381	International Political Economy	3
SCM 466	Global Trade Management *	3
SCM 491	International Live Case and Study Tour	3
BUSAD 391B	Professional Experiential Learning: International Internship	1
BUSAD 391D	Professional Experiential Learning: International Travel and Study	1

* Courses not offered on a regular basis. Students should consult with their academic adviser about terms of offering.

Select THREE CREDITS from above, or other course as approved.

Other courses must include a significant content representing the international or regional, economic, political, legal, or non-US cultural context in which business is conducted. Below is a PARTIAL list of alternate courses.

AGRON 342	World Food Issues: Past and Present	3
ECON 320	Labor Economics	3
ECON 385	Economic Development	3
ECON 457	International Finance	3
POL S 241	Democracy and Dictatorship: Introduction to Comparative Politics	3
POL S 251	Introduction to International Politics	3
POL S 300+	Any Regional Politics course offered by the POL S department	

Select ONE of the following four options for the international experience component:

- One-year sequence of college foreign language (minimum of six credits), and one Ivy College of Business study tour course.
- A study abroad experience of at least 12 weeks, with at least 12 credits of business or cultural-related courses.
- A study abroad experience of six weeks, with at least six credits while in residence with a host family.
- An approved international internship of at least 12 weeks in duration.

NOTE: Students whose primary language (learned first) is not English may take a year of a third language, take six additional credits of English beyond ENGL 150, 250, and 302, or take two additional business-related courses from the approved lists.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in International Business, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

The requirements for the secondary major in International Business are met by successful completion of the following:

International Experience

An approved international experience must entail study abroad or an overseas internship. The minimum requirements are:

1) Any combination of study abroad programs or international internship* that total at least 6 weeks in length.

* The international internship requires pre-approval. Students who are neither United States (U.S.) citizens nor permanent residents are considered to be international students. International students are encouraged to find internships in the United States to meet this requirement. International students who are unable to find an internship in the U.S. may petition that an internship experience in their home country be approved. International transfer students who have studied a business curriculum in their home country for at least two semesters, and have at least 12 credits of transferable business courses, have met the international experience requirement. Petitions for pre-approval should be submitted to the International Programs Coordinator in 1200 Gerdin Business Building.

International Business and Related Courses (12 credits)

Required Courses (6 credits):

MGMT 414	International Management	3
MGMT 472	Management of Diversity	3

Elective Courses (6 credits):

Select 3-6 credits from the following list of courses:

ACCT 496	Accounting in the Global Economy
ECON 355	International Trade and Finance
FIN 480	International Finance

MGMT 367	International Entrepreneurship *
MKT 448	Global Marketing
MKT 492	Comparative Marketing
POL S 381	International Political Economy
SCM 466	Global Trade Management *
SCM 491	International Live Case and Study Tour
BUSAD 391B	Professional Experiential Learning: International Internship
BUSAD 391D	Professional Experiential Learning: International Travel and Study
Select 0-3 credits from the following list of courses:	
AGRON 342	World Food Issues: Past and Present
ECON 385	Economic Development
ECON 455	International Trade
POL S 300+: Any Regional Politics class offered by the POL S department	

* Courses not offered on a regular basis. Students should consult with their academic adviser about terms of offering.

World Language (6 credits)

At least one year of the same university-level foreign language, or other language courses approved by the International Programs Coordinator in 1200 Gerdin Business Building. Students whose primary language (learned first) is not English may take two additional courses from the approved list.

Management

Management is a broadly defined discipline and activity, which is neither industry- nor function-specific. Management concepts, theories, techniques, and skills are applicable to all business functional areas and are essential for successful organizations, regardless of whether the venture is large or small, a well-established firm or an entrepreneurial start-up. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources.

Undergraduate Major in Management

For undergraduate curriculum in business, major in management.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the Bachelor of Science (B.S.) degree, and 18 additional credits in the major.

The instructional objectives of the Management Department are to provide students with foundational knowledge of organizations, people within organizational leadership activities, and the ideals and activities

of business entrepreneurship. Management majors will have an understanding of:

1. Employee work-related attitudes and behaviors, as well as human resource management practices within firms
2. Challenges and strategies in international business
3. The foundations of entrepreneurship and innovation

Students will demonstrate awareness for the role of evidence, diversity, ethics and technology in business decision-making and the impact of external forces and global issues on organizations. Students will display the ability to think critically, to communicate effectively and to contribute constructively to effective team performance. Required courses in the major provide a variety of rich developmental experiences that include applied learning, case analysis, research projects, team-based active learning projects, and guest speakers, in addition to traditional classroom lectures and discussions.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Management, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/management/>

Undergraduate Minor in Management

The Department of Management also offers a minor for non-Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (6 credits):

MGMT 371	Organizational Behavior	3
MGMT 478	Strategic Management	3

Elective Courses (9 credits):

Select nine credit hours from 300 or 400 level Management courses.

*

* MGMT 370 may not be taken as part of the nine credit hours from 300-400 MGMT courses.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Management, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

The Management major requires students to take 18 credit hours in the Management area, including 9 credit hours of required core courses and 9 credit hours of electives OR have the OPTION of participating in a human resource management track.

Required Courses (9 credits):

ENTSP 310	Entrepreneurship and Innovation	3
MGMT 414	International Management	3
MGMT 471	Personnel and Human Resource Management	3

Elective Courses (9 credits):

Select three courses from the following list:

ENTSP 313	Feasibility Analysis and Business Planning	3
ENTSP 320	Corporate Entrepreneurship, Innovation and Technology Management	3
ENTSP 367	International Entrepreneurship	3
ENTSP 410	Social Entrepreneurship	3
ENTSP 480	Applied Entrepreneurship: Executing New Ventures and Projects	3
ENTSP 485	Trends in Entrepreneurship	3
MGMT 422X	Negotiation and Conflict Resolution *	3
MGMT 472	Management of Diversity	3
MGMT 473X	Advanced Human Resource Management 1	3

OR Students have the option of specializing in the following track:

OPTIONAL Human Resource Management Track (9 credits):

MGMT 422X	Negotiation and Conflict Resolution *	3
MGMT 472	Management of Diversity	3
MGMT 473X	Advanced Human Resource Management 1	3

* Courses not offered on a regular basis. Students should consult with their academic adviser about terms of offering.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent

courses listed in the course catalog and count as elective choices in the major.

Management, B.S.

^{*} All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in management. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your adviser for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your adviser regarding multiple business **degree requirements**.

Graduate Study

The Department of Management participates in the full-time and part-time Master of Business Administration (MBA) and in the PhD in Business and Technology programs. The MBA is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students can obtain a specialization in Management.

For more information about the MBA program with a specialization in Management, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

The PhD in Business and Technology with a Management (MGMT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on management issues relating to organizational behavior, human resources, strategy, and entrepreneurship.

For more information about the PhD program with a specialization in Management, please visit: <https://www.ivybusiness.iastate.edu/phd/>

Graduate Certificate

The graduate certificate in Entrepreneurship and Innovation is designed to teach students the process through which new ventures are created and to ensure students understand the role of innovation in entrepreneurship.

The certificate allows post-graduate students from any discipline to learn about entrepreneurship, innovation, and the new venture creation process. The interdisciplinary certificate program provides students an opportunity to gain business skills they can use in starting a business without a large time commitment. It is flexible so that students can design a program that provides core entrepreneurship education through Management 566 as well as discipline-specific training from entrepreneurship courses in other colleges.

For more information about the graduate certificate in Entrepreneurship and Innovation, please visit: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/>

Management Information Systems

Management Information Systems is the analysis and use of information systems and technologies to support problem solving and decision making within and across organizations. Organizations and companies use data, most often in digital form, to conduct nearly every part of their businesses and functions. The program provides students with the core knowledge related to every dimension of information systems and technologies, including the creation and implementation of software and databases, to information security, analytics, and the user interface. The program takes a balanced approach with both technical and managerial coursework.

Undergraduate Major in Management Information Systems

For undergraduate curriculum in business, major in management information systems.

The Department of Information Systems and Business Analytics offers a major in management information systems. Students will complete the general education requirements (including business foundation courses),

business core requirements for the bachelor of science (BS) degree, and 18 additional credits in the major.

The instructional objective of the Management Information Systems major is to prepare students for professional careers with a wide variety of firms and roles, ranging from small start-up firms to large multinational corporations. Common job titles include business analyst and systems analyst. Students are also pursuing careers in Information Technology consulting.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Management Information Systems, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/management-information-systems/>

Undergraduate Minor in Management Information Systems

The Department of Information Systems and Business Analytics also offers a minor for non-Management Information Systems majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Course (3 credits):

MIS 301	Management Information Systems	3
---------	--------------------------------	---

Elective Courses (12 credits):

Select twelve credit hours from 300 or 400 level MIS courses

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Management Information Systems, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

The Management Information Systems major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives.

Required Courses (12 credits):

MIS 307	Intermediate Business Programming	3
MIS 310	Information Systems Analysis	3
MIS 320	Database Management Systems	3
MIS 340	Project Management	3

Elective Courses (6 credits):

Select 6 credits of MIS department courses, OR select one of the MIS elective CLUSTERS described below:

The remaining 6 credits can be taken from the department approved electives, preferably with the specified clusters that focus on specific IT job related knowledge and skills (application development, business analytics, IT infrastructure and security, and supply chain technology). Students are encouraged to take electives that cover multiple clusters to enhance marketability and career flexibility.

Application Development Cluster

MIS 407	Advanced Business Programming
MIS 447	Information Systems Development

Business Analytics Cluster

MIS 436	Introduction to Business Analytics
MIS 446	Advanced Business Analytics

IT Infrastructure and Security Cluster

MIS 435	Information Systems Infrastructure
MIS 445	Enterprise Systems and Architecture

Supply Chain Technology Cluster

MIS 440	Supply Chain Information Systems
MIS 450	Enterprise Resource Planning Systems in Supply Chain

Other MIS Courses

MIS 315	Business Data Streams and Issues
MIS 368	Marketing Analytics
MIS 495	Case Practicum

Management Information Systems, B.S.

Graduate Study

The Department of Information Systems and Business Analytics participates in the MS in Information Systems (MSIS), the full-time and part-time Master of Business Administration (MBA) and the PhD in Business and Technology programs. The department also participates in an interdepartmental MS in Cyber Security as well as in a master's and PhD program in Human Computer Interaction.

The MBA program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are graduate electives. Within the MBA program, students may obtain a specialization in information systems.

For more information about the MBA program with a specialization in information systems, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

The MSIS is a 30-credit (minimum) curriculum designed around three interrelated areas – business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The MSIS program will educate students on

applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

For more information about the MSIS program, please visit: <https://www.ivybusiness.iastate.edu/masters/msis/>

The PhD in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas—core, specialization, minor, and research methods—and the dissertation. The Management of Information Systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

For more information about the PhD program with a specialization in MIS, please visit: <https://www.ivybusiness.iastate.edu/phd/>

Graduate Certificates

The graduate certificate in enterprise cybersecurity management will equip business professionals with basic concepts and techniques in cybersecurity and the management of information assets, including understanding cyber threat and choosing appropriate protections, enterprise cyber risk management, budgeting for cybersecurity, policies, procedures, human relations issues, and compliance and legal issues present in the modern organization.

The certificate is for working professionals as well as students enrolled in graduate programs. The certificate is available on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in Enterprise Cybersecurity Management, please visit: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/>

The graduate certificate in business analytics will address the challenges of dealing with issues of "big data" and its analysis to extract actionable insights, equips business professionals with the basic analytic concepts and techniques necessary in various areas of business such as marketing, supply chain, operations, forensics, and risk management.

Students will have a foundation in data management, business analytics, modeling, and communicating through data visualization.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as business analysts, analytic systems designers, and data scientists to help improve business performance. The certificate is available online, on campus in Ames and at Capital Square in Des Moines.

For more information about the graduate certificate in business analytics, please visit: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/> (<https://www.ivybusiness.iastate.edu/masters/graduate-certificates/business-analytics/>)

Marketing

A major in marketing acquaints students with the managerial decisions and actions that surround the satisfaction of customer needs in the purchase and use of goods and services. Examples of marketing decision areas are product development, pricing, marketing communication, marketing analytics, and personal selling. Completion of the major prepares students for careers such as product manager, marketing analyst, digital marketing specialist, marketing consultant, advertising or promotions manager, marketing researcher, sales representative or manager, and special events manager; in the public and private sectors. Some graduates also find careers in the retail industry, be it store management, market analysis, or purchasing.

Undergraduate Major in Marketing

For undergraduate curriculum in business, major in marketing.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), supporting courses/major prerequisites, business core requirements for the bachelor of science (BS) degree, and 18 additional credits in the major.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. Students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Marketing, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/marketing/>

Undergraduate Minor in Business and Technology Consulting

The Department of Marketing also offers a minor for any student with a major in the Ivy College of Business. The Business and Technology Consulting minor prepares you for a career as a business consultant. Every year consulting companies attract talented graduates across the world. As a consultant, you gain broad exposure to business issues, solve different business problems, make an impact on major businesses, and become an expert in a specific business functional area. The minor provides a systematic process for students to strengthen problem-solving skills and prepare them to become better communicators and future leaders.

The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (9 credits):

MKT 367X	Consultative Problem Solving	3
FIN 415	Business Financing Decisions	3
MIS 495	Case Practicum	3
or SCM 495	Case Practicum	
or MKT 495X	Case Competitions in Sales and Marketing	

Elective Courses (6 credits):

Select 6 credit hours from the list below:

SCM 450	Enterprise Resource Planning Systems in Supply Chain	3
SCM 440	Supply Chain Information Systems	3
SCM 424	Process Management, Analysis, and Improvement	3
SCM 340	Project Management	3
MIS 435	Information Systems Infrastructure	3
MIS 436	Introduction to Business Analytics	3
MIS 320	Database Management Systems	3
MKT 445	Customer Relationship Management	3
MKT 368	Marketing Analytics	3
MGMT 320	Corporate Entrepreneurship, Innovation and Technology Management	3
MGMT 473X	Advanced Human Resource Management I	3

FIN 435	Venture Capital, Private Equity, and Mergers and Acquisitions	3
ACCT 315	Business Data Streams and Issues	3
ACCT 371X	Entrepreneurship and Accounting Information	3
ACCT 384	Accounting Information Systems and Analytics	3

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Business and Technology Consulting, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Undergraduate Minor in Marketing

The Department of Marketing also offers a minor for non-Marketing majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (6 credits):

MKT 340	Principles of Marketing	3
MKT 447	Consumer Behavior	3

Elective Courses (9 credits):

Select nine credit hours from 300 or 400 level Marketing courses.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Marketing, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

For the undergraduate certificate in professional sales.

Purpose

The certificate in professional sales is a course of study administered by the Department of Marketing in the Ivy College of Business. It is designed for all undergraduate majors who wish to enhance their degree and employment possibilities by adding expertise in professional selling.

The certificate program will equip students with knowledge and skills related to developing and managing mutually beneficial relationships with customers. The certificate program is built on a strong theoretical background but emphasizes applications and practice. The certificate provides students with an opportunity to learn about the ethical, technological, analytical, and global aspects of professional sales.

Learning Outcomes

After completing the certificate in professional sales, students will be able to:

- Identify and describe the steps in a relational selling process to create value and achieve customer satisfaction,
- Apply the sales technology, skills and knowledge to business problems,
- Enhance oral communication skills and basic business writing skills,
- Build a network and develop professional relationships through corporate participation in the sales program, and
- Enhance career management options by gaining a better understanding of sales as a career option.

Requirements

The certificate in professional sales requires the completion of at least 7 courses, totaling 21 credit hours. At least 12 credits should be taken at Iowa State University.

Required Courses (12 credits):

MKT 340	Principles of Marketing	3
MKT 342	Foundation Of Personal Selling	3
MKT 442	Sales Management	3
MKT 450	Advanced Professional Selling	3

Elective Courses (9 credits):

Select 9 credits of electives from the following list:

A M D 275	Retail Merchandising	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
ADVRT 336	Advertising Account Management	3
COMST 211	Interpersonal Communication	3
C E 206	Engineering Economic Analysis and Professional Issues in Civil Engineering	3
ECON 235	Introduction to Agricultural Markets	3
ECON 236	Agricultural Selling	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
ENGL 332	Visual Communication of Quantitative Information	3

HSP M 540	Strategic Marketing	3
I E 450	Technical Sales for Engineers I	3
I E 451	Technical Sales for Engineers II	3
I E 305	Engineering Economic Analysis	3
I E 430	Entrepreneurial Product Engineering	3
I E 434X	Entrepreneurial Product Engineering Design Project	3

PSYCH 380	Social Cognition	3
PSYCH 450	Industrial Psychology	3
PSYCH 314	Motivation	3
SP CM 110	Listening	3
SP CM 312	Business and Professional Speaking	3
SP CM 327	Persuasion and Social Influence	3
MKT 445	Customer Relationship Management *	3
MKT 410	Promotional Strategy *	3
MGMT 310	Entrepreneurship and Innovation *	3
MGMT 422X	Negotiation and Conflict Resolution *	3
MGMT 471	Personnel and Human Resource Management *	3
ENTSP 480	Applied Entrepreneurship: Executing New Ventures and Projects *	3
SCM 486	Principles of Purchasing and Supply Management *	3

* Business courses listed as electives are available only to business majors. Non-business majors are limited to the 12 credits of required business courses for the certificate.

In addition to the courses listed, independent study/special topics or other courses may count as electives for the certificate. Prior approval from the director of the Professional Sales Program or the chair of the Marketing Department is required.

Students need to fulfill the course prerequisites set by the Ivy College of Business.

A minimum of 9 credits used for the certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

A certificate is not awarded until baccalaureate requirements are fulfilled.

Courses taken for the certificate may not be taken on a pass/not-pass basis.

A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

For more information on the undergraduate certificate in Professional Sales, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

Required and elective marketing major courses can be combined into three distinct tracks: marketing analytics, sales, and marketing management. In addition to the basic business requirements, marketing majors must also complete the following:

Required Courses (9 credits):

MKT 444	Marketing Research	3
MKT 447	Consumer Behavior	3
MKT 443	Strategic Marketing Management	3

Elective Courses (9 credits):

Select 9 credits of Marketing department courses, OR select one of the three Marketing elective TRACKS described below.

Optional Marketing Analytics Track (9 credits)

Select 9 credits:

MKT 361	Social Media Marketing Strategy	3
MKT 368	Marketing Analytics	3
MKT 445	Customer Relationship Management	3
MKT 362X	Digital Marketing	3

Optional Sales Track (9 credits)

Select 9 credits:

MKT 342	Foundation Of Personal Selling	3
MKT 442	Sales Management	3
MKT 450	Advanced Professional Selling	3
MKT 451	Sales and Distribution Strategy	3

Optional Marketing Management Track (9 credits)

Select 9 credits:

MKT 342	Foundation Of Personal Selling	3
MKT 361	Social Media Marketing Strategy	3
MKT 410	Promotional Strategy	3
MKT 448	Global Marketing	3
MKT 453	Brand Management	3
MKT 492	Comparative Marketing	3
MKT 362X	Digital Marketing	3

Other Marketing Courses:

MKT 351	Services Marketing	3
MKT 367X	Consultative Problem Solving	3
MKT 495X	Case Competitions in Sales and Marketing	3

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

Marketing, B.S.

Total Credits: 122

@ Courses in these requirements may also be used as Global Perspective.

US Diversity courses may be used to satisfy HUM/SOC SCI.

* All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in marketing. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.

2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your adviser for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.

2. 42 credits of 300+ level courses from a four-year institution.

3. 50% of required Business courses must be earned at ISU.

4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).

5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.

6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.

7. All 300-level and higher business credits must be earned at a four-year college.

8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your adviser regarding multiple business **degree requirements**.

Graduate Study

The Department of Marketing participates in the full-time and part-time Master of Business Administration (MBA) and the PhD in Business and Technology programs. The MBA is a 48-credit, non-thesis, non-creative

component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students may develop an area of specialization in marketing.

For more information about the MBA program with a specialization in Marketing, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

The PhD in Business and Technology with a Marketing (MKT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on marketing issues relating to strategic decision making, understanding consumer preferences and behaviors, and using data analytics for increasing the performance of the firm.

For more information about the PhD program with a specialization in Marketing, please visit: <https://www.ivybusiness.iastate.edu/phd/>

Supply Chain Management

Supply chain management is an integrated program of study concerned with the efficient flow of information, materials, and products within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing, and processing to the final customer. The program's balanced approach includes courses in the three core areas of supply chain management: procurement, operations, and logistics. Students will develop knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, transportation management, warehouse management, inventory control, material handling, product and service support, information technology, and strategic supply chain management.

Undergraduate Major in Supply Chain Management

For undergraduate curriculum in business, major in supply chain management.

The Department of Supply Chain Management offers a major in supply chain management. Students will complete the general education requirements (including business foundation courses), business core requirements for the bachelor of science (B.S.) degree, and 18 additional credits in the major.

The instructional objective of the supply chain management major is to prepare students for professional careers in logistics analysis, plant management, procurement, warehouse management, sustainable supply chain management, and consulting. The curriculum provides the required theoretical and conceptual base and analytical methods for making sound operational and strategic business decisions related to all activities in a supply chain.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate major in Supply Chain Management, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/supply-chain-management/>

Undergraduate Minor in Supply Chain Management

The Department of Supply Chain Management also offers a minor for non-Supply Chain Management majors in the Ivy College of Business. The minor requires 15 credits from an approved list of courses, including at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students with declared majors have priority over students with declared minors in courses with space constraints.

Required Courses (6 credits):

SCM 301	Supply Chain Management	3
SCM 486	Principles of Purchasing and Supply Management	3

Elective Courses (9 credits):

Select one elective course from:

SCM 424	Process Management, Analysis, and Improvement	
SCM 450	Enterprise Resource Planning Systems in Supply Chain	
SCM 453	Supply Chain Planning and Control	

Select one elective course from:

SCM 460	Decision Tools for Logistics and Operations Management	
SCM 461	Principles of Transportation	
SCM 462	Transportation Carrier Management *	
SCM 466	Global Trade Management	

Select one additional elective course from either section above.

* Courses not offered on a regular basis. Students should consult with their academic adviser about terms of offering.

Students are limited to three business majors/degrees within the Ivy College of Business, or a total of three business majors/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the Ivy College of Business.

For more information on the undergraduate minor in Supply Chain Management, please visit: <https://www.ivybusiness.iastate.edu/undergraduate/majors-minors/>

Curriculum:

In addition to the basic business requirements, Supply Chain Management majors must also complete:

Required Courses (15 credits):

SCM 424	Process Management, Analysis, and Improvement	3
SCM 453	Supply Chain Planning and Control	3
SCM 460	Decision Tools for Logistics and Operations Management	3
SCM 461	Principles of Transportation	3
SCM 486	Principles of Purchasing and Supply Management	3

Elective Courses (3 credits):

Select one elective from the following list:

SCM 340	Project Management	3
SCM 428	Special Topics in Operations Management *	3
SCM 430X	Supply Chain Analytics *	3
SCM 434X	Implementing Process Improvement *	3
SCM 440	Supply Chain Information Systems	3
SCM 450	Enterprise Resource Planning Systems in Supply Chain	3
SCM 462	Transportation Carrier Management *	3
SCM 466	Global Trade Management	3
SCM 471	Sustainable Supply Chain Management *	3
SCM 491	International Live Case and Study Tour	3
SCM 492X	Supply Chain Management Live Case *	3
SCM 495	Case Practicum	3

* Courses not offered on a regular basis. Students should consult with their academic adviser about terms of offering.

The X designation after a course number indicates this is an experimental course offered by the Department. Although in an experimental phase, these courses are open for registration just the same as permanent courses listed in the course catalog and count as elective choices in the major.

* All core classes must be completed prior to taking MGMT 478 in the graduating semester.

Students must be admitted to the professional program in business to major in supply chain management. The requirements to enter the professional program are:

1. Completion of at least 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses. Early admission is allowed for Honors-eligible students. (See your adviser for specific information)

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses from a four-year institution.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU (exceptions for study abroad and internship may be requested).
5. 122 Credits minimum and a Cumulative GPA of at least 2.00 with no quality point deficiencies.
6. A grade of C or better in ENGL 250 required, and also in one other required ENGL course.
7. All 300-level and higher business credits must be earned at a four-year college.
8. Multiple business **majors** must have at least 15 distinct credits in each of the major requirements; when applicable, one course can be shared between business majors; see your adviser regarding multiple business **degree requirements**.

Graduate Study

The Department of Supply Chain Management participates in the full-time and part-time Master of Business Administration (MBA) and in the PhD in Business and Technology programs. The department also participates in the interdepartmental MS in Transportation program.

The MBA program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the MBA program, students can obtain a specialization in Supply Chain Management.

For more information about the MBA program with a specialization in Supply Chain Management, please visit: <https://www.ivybusiness.iastate.edu/masters/mba/>

The PhD in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain

Management (SCM) as their major area of specialization. The primary objective of the SCM specialization is to prepare students for careers in research universities. The SCM domain is broad and includes the design, development and control of business processes for the conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems also included. However, in today's world, with competition across supply chain networks, SCM also involves integrating business processes across firms. Research in this area is therefore interdisciplinary in nature and addresses both intra- and inter-organizational issues.

Ph.D. core curriculum	6
Doctoral seminars and research practicum in the area of specialization	14
Minor area (9 cr.) plus electives (3 cr.)	12
Research methods courses	12
Dissertation	12
Total Credits	56

For more information about the PhD program with a specialization in Supply Chain Management, please visit: <https://www.ivybusiness.iastate.edu/phd/>

Graduate Certificate

The online graduate certificate in Supply Chain Management will provide foundational concepts and applied technical skills that supply chain professionals need to effectively manage a global supply chain.

The certificate is for working professionals as well as students enrolled in graduate programs who are employed or seeking a career as a business analyst, supply chain analyst, or who want to move into a supply chain position.

For more information about the graduate certificate in Supply Chain Management, please visit: <https://www.ivybusiness.iastate.edu/masters/graduate-certificates/>

COLLEGE OF DESIGN

Luis Rico-Gutierrez - Dean

Cameron Campbell - Senior Associate Dean

Seda McKilligan - Associate Dean for Academic Programs

Kevin Kane - Associate Dean for Research and Outreach

www.design.iastate.edu/ (<http://www.design.iastate.edu/>)

Objectives of the Curricula in Design

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

Organization of Curricula

All undergraduate programs in the College of Design share a common foundation curriculum, the Core Design Program, followed by degree-specific curricula. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous, inclusive base for the college's professional and non-professional programs. It creates a shared language, experience, and community for programs, faculty, and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple degree programs, and experiment with interdisciplinary work.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students' ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the degree programs, is composed to ensure that students receive a well-rounded undergraduate education.

High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended, though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability
- 3 years of mathematics to develop problem-solving skills, including 1 year each of algebra, geometry, and advanced algebra
- 3 years of science, including at least two of the following:
 - 1 year of biology, 1 year of chemistry, or 1 year of physics
- 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government

Admission Standards to Enrollment-Managed Professional Programs

Admission into the enrollment-managed professional programs of Architecture, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, academic performance, and a written essay.

Students may apply directly to the professional program in Community and Regional Planning and to the programs in Art and Design and Interdisciplinary Design. Transfer students from two-year institutions also may apply to these three programs.

Advising

Each student receives personal assistance from an academic adviser within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisers. Once admitted to professional programs, students are assigned to faculty advisers within the student's curriculum area. Advisers help students develop a program of study and access pertinent university resources, and provide information on career choice.

The college's career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program, which provides opportunities for outstanding students to individualize their programs of study. Honors students in the College of Design will work with the Honors Program chair or Honors academic adviser to choose from academic and

co-curricular experiences that offer breadth and depth in their learning, as well as opportunities for personal, community, and professional development.

See Honors Program.

Departments of the College

- Architecture
- Art and Visual Culture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Interior Design
- Landscape Architecture

Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements.

Core Design Program

Cr. Fall/Spring

DSN S 102	Design Studio I	4
DSN S 115	Design Collaborative Seminar *	0.5
DSN S 131	Drawing I	4
DSN S 183	Design in Context	3
Social Science/Humanities Electives **		6
Math/Science Electives ***		6
Communications		7

* Students enrolled in the Design Exchange Learning Community take DSN S 110 in place of DSN S 115.

** General education credits in the Core Design Program may count toward the minimum credits.

*** Students who intend to apply to the Architecture program are strongly advised to take MATH 145 Applied Trigonometry and PHYS 111 General Physics during their Core year. While these specific courses are not required to apply to the program, they are required to advance in the B.Arch. program beyond the first semester. Students who intend to apply to the Industrial Design program are advised to take PHYS 101 Physics for the Nonscientist Physics for the Nonscientist, ECON 101 Principles of Microeconomics Principles of Microeconomics and a math course during their Core year.

General Education

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 7 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

LIB 160	Information Literacy	1
Total Credits		7

(C- or better grade). Includes courses in the fields of English (composition) and speech communication (interpersonal and rhetorical). According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 (or ENGL 250H).

Mathematics, physical sciences, and biological sciences 6 cr.

Includes courses in the fields of agronomy, astronomy and astrophysics, biology, chemistry, civil engineering, computer science, geology, mathematics, physics, and statistics.

Humanities: 6 cr.

Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.

Social Sciences: 6 cr.

Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women's studies, and university studies.

General Education Electives: 9 cr.

9 cr. from any of the above areas, 6 cr. of course level 300-400.

Minor in Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, media and technology, design in everyday life, and models of professional practice. The minor is open to undergraduates in all university majors.

Total minor requirements: 15 cr.

ART H 292	Introduction to Visual Culture Studies	3
DSN S 183	Design in Context	3
or another 100-200 level History/theory course offered in the College of Design		
Nine credit hours from approved list.		9
Total Credits		15

At least six of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the 15 credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Undergraduate Curricula

Minors in Design

The College of Design offers or participates in the following undergraduate minors:

- Critical Studies in Design
- Design Studies
- Digital Media
- Entrepreneurial Studies
- Geographic Information Science (GISC)
- Illustration

- Textile Design
- Urban Studies

Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore:

- historical and contemporary issues
- cultural production
- media and technology
- design in everyday life
- models of professional practice

Open to undergraduates in all university majors, this minor requires 15 credits of coursework. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

ART H 292	Introduction to Visual Culture Studies	3
DSN S 183	Design in Context	3
or ARCH 220	Contemporary Architecture	
or ARCH 221	History of Pre-Modern Architecture	
or ART H 280	History of Art I	
or ART H 281	History of Art II	
or C R P 291	World Cities and Globalization	
or C R P 293	Environmental Planning	
9 credits from approved list (at least 6 credits at 300-level or above)		9
Total Credits		15

Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits of course work: three (3) credits selected from College of Design history/theory course offerings (DSN S 183 will not meet this requirement) and additional 12 credits selected from any College of Design course offerings*.

At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

* The following courses **cannot** be used to meet the requirements for the Design Studies Minor: DSN S 110, 111, 115, 301, 373, 397, 492.

Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits of coursework. At least three (3) credits of fundamental courses at the 200 level must be taken in the student's primary major (see list below). At least 9 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above and may not be used to meet any other department, college, or university requirement.

Fundamental Courses:

ARCH 230	Design Communications I (for Architecture majors)	3
DSN S 232	Digital Design Communications (for non-design majors)	3
ARTGR 275	Graphic Technology I (prereq: ARTGR 270; for Graphic Design majors)	2
ARTGR 276	Graphic Technology II (for Graphic Design majors)	2
ARTIS 212	Studio Fundamentals: Computers (for Integrated Studio Arts and all majors)	3
ARTIS 227	Introduction to Creative Digital Photography (for Integrated Studio Arts majors)	3
ARTID 263	Graphic Communication for Interior Design II (prereq: ARTID 261; for Interior Design majors)	3
C R P 251	Fundamentals of Geographic Information Systems (for non-design majors)	3
L A 211	Digital Design Methods for Landscape Architecture (for Landscape Architecture and all majors)	3

Entrepreneurial Studies

The College of Design is an active participant in the Entrepreneurial Studies Minor for undergraduate students.

Geographic Information Science (GISC)

The undergraduate minor in Geographic Information Science (GISC) is an interdisciplinary program that provides students with opportunities to engage the theory, processes, techniques and tools that use spatial data and computational technology to create cutting-edge analysis and mapping approaches for a wide range of fields, such as urban planning,

architecture, landscape architecture, design, community development, agriculture, environmental sciences, natural resources, sociology, criminology, anthropology, political science, environmental studies and others.

The minor is open to undergraduates in all university majors with a minimum overall GPA of 2.0 prior to enrolling.

Students must complete a minimum of 15 undergraduate credits of GIS coursework to receive the minor. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

Foundations of GIS - complete the following 2 courses:		6
C R P 251	Fundamentals of Geographic Information Systems	
C R P 351	Intermediate Geographic Information Systems	
GIS Tools and Techniques - choose 3 courses from the following:		9
A B E 437	Watershed Modeling and Policy	
C R P 449	Geodesign	
C R P 452	Geographic Data Management and Planning Analysis	
C R P 454	Fundamentals of Remote Sensing (or substitute GEOL 489: Survey of Remote Sensing Technologies)	
C R P 456	GIS Programming and Automation	
C R P 457	GeoGames for Civic Engagement	
NREM 345	Natural Resource Photogrammetry and Geographic Information Systems	
NREM 446	Integrating GPS and GIS for Natural Resource Management	
GEOL 452	GIS for Geoscientists	
GEOL 468	Applied Geostatistics for Geoscientists	
GEOL 488	GIS for Geoscientists II	
Total Credits		15

Illustration

The undergraduate minor in Illustration is ideal for students interested in illustration for books, graphic novels, magazine articles, advertising and concept art for game design and film. This minor provides the ability to tailor a curriculum that serves these varied career interests, whether you want to work in the industry or freelance as an independent studio practitioner.

Through this minor, students will:

- develop conceptual skills directed toward communicating narrative content in sequential visual form
- demonstrate the ability for critical thinking through visual, verbal and written communication
- develop technical skills, working with a range of both traditional and digital media used in the field of illustration
- develop an awareness of historical and contemporary illustration
- strengthen individual portfolios to position themselves for success in their chosen field after graduation

Requirements:

Students must complete two prerequisites prior to pursuing the Illustration minor.

Prerequisites:

DSN S 131	Drawing I	4
ARTIS 230	Drawing II	3

After completion of the prerequisites, students must complete a minimum of 15 credits of Illustration coursework to receive the minor. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Required Courses: 6

ARTIS 330	Drawing III: Life Drawing
ARTIS 432	Sequential Narrative Drawing

Elective Courses: 9

ART H 489	History of Comics
ARTGR 464	Digital Imaging
ARTIS 233	Watercolor Painting
ARTIS 308	Computer Modeling, Rendering and Virtual Photography
ARTIS 338	Painting II
ARTIS 356	Relief Printmaking: Digital/Traditional
ARTIS 357	Intaglio and Monotype Printmaking: Digital / Traditional
ARTIS 358	Lithography: Digital / Traditional
ARTIS 408	Principles of 3D Animation
ARTIS 430	Drawing IV
ARTIS 438	Painting III
ARTIS 490F	Independent Study: Illustration
BPM I 323	Scientific Illustration Principles and Techniques or ARTIS 323Scientific Illustration Principles and Techniques
BPM I 326	Illustration and Illustration Software or ARTIS 326Illustration and Illustration Software

BPM I 327 Illustration as Communication
or ARTIS 327Illustration as Communication

BPM I 337 Application of Scientific Illustration Techniques
or ARTIS 337Application of Scientific Illustration Techniques

Textile Design

The undergraduate minor in Textile Design allows students to focus specifically on the design and creation of textiles - a practice with applications in the fine arts, fashion and related fields. Open to undergraduates at the sophomore level and above enrolled in any College of Design major or in the Apparel, Merchandising and Design major in the College of Human Sciences.

Through this minor, students will:

- learn historical and contemporary applications of textile production
- develop conceptual skills in textile media and techniques such as printing, dyeing and weaving for self-expression
- develop technical skills in both hand skills and digital tools
- demonstrate the ability for critical thinking through visual, verbal and written communications with an emphasis on what it means to be an artist/designer using textile media and techniques
- strengthen individual portfolios to position themselves for success in their chosen field after graduation

Students must complete 16-18 credits of Textile Design coursework to receive the minor. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

Required Core 6

A M D 204	Textile Science
ARTIS 214	Studio Fundamentals: Textiles

History/Theory (choose one of the following) 3

A M D 362	Cultural Perspectives of Dress
ART H 292	Introduction to Visual Culture Studies
ART H 280	History of Art I
ART H 281	History of Art II

Practice (choose two of the following) 6

A M D 121	Apparel Assembly Processes
A M D 328	Apparel, Merchandising, and Design Seminar
A M D 490	Independent Study
ARTIS 208	Color
ARTIS 345	Woven Textile Structures
ARTIS 346	Natural Dyes
ARTIS 347	Printed Textile Design

ARTIS 448	Digital Textile Design	
ARTIS 490E	Independent Study: Textiles	
Electives (choose from the following)		3-5
A M D 354	History of European and North American Dress	
A M D 356	History of Twentieth Century Fashion	
ARTIS 206	Studio Fundamentals: Printmaking	
ARTIS 213	Studio Fundamentals: Painting	
ARTIS 310	Sources and Methods of Visual Art	
ART H 382	Art and Architecture of Asia	
ART H 384	Art of Islam	
DSN S 131	Drawing I	

Urban Studies

The undergraduate minor in Urban Studies is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks. Students can pursue interests in:

- urban history
- urban design
- neighborhood revitalization
- economic development
- social movements
- global urbanization

The minor is open to undergraduates in all university majors except Community & Regional Planning.

This minor requires 15 credit hours of coursework. At least 6 of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements except the credit requirement for graduation.

Requirements:

C R P 201	The North American Metropolis	3
C R P 291	World Cities and Globalization	3
Nine (9) credits in three other courses from the approved list **		9
Total Credits		15

** Approved list of elective courses for Urban Studies Minor (<https://www.design.iastate.edu/programs-minors/minors/urban-studies/>)

Graduate Curricula

The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Majors

- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Visual Arts
- Interior Design
- Landscape Architecture
- Sustainable Environments*
- Transportation*
- Urban Design*

Double Degree Programs

- Architecture / Business
- Architecture / Community and Regional Planning
- Architecture / Urban Design
- Architecture / Sustainable Environments
- Community and Regional Planning / Landscape Architecture
- Community and Regional Planning/ Public Administration
- Community and Regional Planning / Sustainable Agriculture
- Community and Regional Planning / Business
- Community and Regional Planning / Urban Design
- Community and Regional Planning / Sustainable Environments
- Integrated Visual Arts / Sustainable Environments
- Landscape Architecture / Urban Design
- Landscape Architecture / Sustainable Environments

Minor

- Gerontology*
- Industrial Design
- Integrated Visual Arts
- Sustainable Environments

*The College of Design participates in this interdepartmental graduate program.

Certificate

- Geographic Information Systems (GIS)
- Preservation and Cultural Heritage

Architecture

<http://www.design.iastate.edu/architecture> (<https://www.design.iastate.edu/architecture/>)

The undergraduate program in architecture is an accredited five-year curriculum leading to the Bachelor of Architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth-year students. Other study abroad opportunities are also available for short-term and semester-long duration.

The undergraduate curriculum includes one year of the college's Core Design Program followed by a four-year professional program. Admission to the professional degree program is based on the applicant's performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources. Information on admission criteria is posted each year on the College of Design website.

Objectives of the Bachelor of Architecture program:

The department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effects are integrated with building design through construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

Our program intends the following for our students: that they develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing using communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tuned and made sustainable; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program after completion of the Core Design Program, the department requires purchase on their own or through the college of a laptop/notebook computer

and appropriate software. Information is provided to students about computer requirements at the time of acceptance to the program.

Curriculum in Architecture

The Department offers undergraduate and graduate degree programs:

A 167.5-credit undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree. (B. Arch.) A 102-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture. (M.S. Arch.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an 8-year or 3-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

NAAB-accredited degree programs at Iowa State University are the Bachelor of Architecture and Master of Architecture. The MS in Architecture degree is a post-professional degree and is not accredited.

Total B. Arch. Requirement: 167.5 cr.

Only 65 cr from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 7 cr.

(C or better grade in ENGL 150 and ENGL 250)

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Total Credits		7

Humanities: 6 cr.

6 cr. from approved list.

Social Sciences: 6 cr.

6 cr. from approved list.

Math and Physical Sciences: 8 cr.

MATH 145	Applied Trigonometry	3
PHYS 111	General Physics	5

Total Credits 8**Design Core 11.5-12 cr.**

DSN S 102	Design Studio I	4
DSN S 115	Design Collaborative Seminar	0.5-1
or DSN S 110	Design Exchange Seminar I	
DSN S 131	Drawing I	4
DSN S 183	Design in Context	3

Total Credits 11.5-12**Design Communications: 3 cr.**

ARCH 230	Design Communications I	3
ARCH 231	Advanced Design Representation	3

Total Credits 6**Design: 48 cr.**

ARCH 201	Architectural Design I	6
ARCH 202	Architectural Design II	6
ARCH 301	Architectural Design III	6
ARCH 302	Architectural Design IV	6
ARCH 401	Architectural Design V	6
ARCH 402	Architectural Design VI	6
ARCH 403	Architectural Design VII	6
DSN S 546	Interdisciplinary Design Studio	6

Total Credits 48**Building Technologies: 21 cr.**

ARCH 345	Building Science and Technology I	2
ARCH 345L	Building Science and Technology I Lab	1
ARCH 346	Building Science and Technology II	3
ARCH 346L	Building Science and Technology II Lab	2
ARCH 347	Building Science and Technology III	3
ARCH 347L	Building Science and Technology III Lab	2
ARCH 348	Building Science and Technology IV	3
ARCH 348L	Building Science and Technology IV Lab	2
ARCH 445	Building Science and Technology V	2
ARCH 445L	Building Science and Technology V Lab	1

Total Credits 21**Studies in History, Theory, and Culture: 18 cr.**

ARCH 220	Contemporary Architecture	3
ARCH 221	History of Pre-Modern Architecture	3
ARCH 322	Histories and Theories of Modern Architecture	3
Nine credits from approved HTC Option list.		9

Total Credits 18**Behavioral Studies/Practice: 6 cr.**

ARCH 371	Human Behavior and Environmental Theory	3
ARCH 482	Professional Practice	3

Total Credits 6**Professional Options: 9 cr.**

6 cr. 300-500 level Arch; 3 cr. from Arch, Art, Art H, ArtID, ArtGr, ArtIS, C R P, Des, Dsn S, or L A, SusE, or Urb D.

Electives: 21 cr.

2 cr. Kin or Ath allowed; 4 cr. AFAS, M S, or N S allowed; 9 cr. Arch allowed (no P/NP).

Architecture, B.Arch.

18 **15**

Total Credits: 167.5 or 168

Admission into the Bachelor of Architecture Program requires the completion of at least 30 credits, including the following courses: DSN S 102, 131, 183, 110 or 115, 6 credits of Social Sciences/Humanities, at least 3 credits of MATH 145 or 5 credits of PHYS 11, ENGL 150 (or test-out credit), LIB 160. A portfolio review and essay will also be significant factors.

Graduate Study

The Department of Architecture offers two graduate degrees in architecture: a three-year accredited professional degree (M.Arch.) and a two-semester to three-semester research degree (M.S. in Arch.). Both degrees offer options for interdisciplinary study within the College of Design and across related fields within the university. Double-degree programs are offered with a number of other graduate programs of study within the college. Financial support in the form of teaching and research assistantships is available competitively.

Master in Architecture

Our M.Arch. is an accredited professional degree in architecture designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold a four-year pre-professional degree in architecture.

The M.Arch. program engages with architecture as a form of knowledge, practice and production situated in relation to contemporary concerns and issues. Students gain the knowledge, skills and experience with which to professionally practice architecture, while also developing a critical awareness of the discipline's wider social, political, economic, environmental and cultural implications.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years including the first summer term. The curriculum commences with an intensive sequence of classes that establish the foundations for the study and practice of architecture. Equal emphasis is placed on each of the three study areas: studios in architectural design and media, laboratories and lectures on science and technology, and lectures and seminars on history and theory. Building on these foundations, students are supported in developing their own particular interests and agendas as they progress through the subsequent two years of study. This is facilitated through options in studying abroad, undertaking specialized studio options both within and outside of the department, and opportunities for independent study.

In addition to architecture, students previously admitted to the full three-year program have held undergraduate degrees in a broad range of fields, including art history, history, literature, interior design, economics, mathematics, computer science, anthropology, medicine and philosophy. This diverse range of previous study and experience is brought to bear on the study of architecture, collectively enriching the range and depth of our program.

While students with undergraduate degrees in other disciplines, must complete the full three years of the curriculum, students with undergraduate degrees in architecture or other related design fields may, on consideration, be given advanced standing in the program. Advanced standing students may waive up to the whole first year.

Master of Architecture (M.Arch.)

Studio Courses: 39 cr.

ARCH 505	Architectural Design and Media I: Mapping, Programming, Building	5
ARCH 506	Architectural Design and Media II: Materiality and Representation	5
ARCH 507	Architectural Design and Media III: Design in Detail	5
ARCH 601	Sustainable Building Design	6
ARCH 602	Community, Building and the Environment	6

ARCH 603	Integrative Design	6
ARCH 604	Design Studio Options	6

Technology and Practice: 26 cr.

ARCH 545	Building Science and Technology I	2
ARCH 545L	Building Science and Technology I Lab	3
ARCH 546	Building Science and Technology II	3
ARCH 546L	Building Science and Technology II Lab	2
ARCH 547	Building Science and Technology III	3
ARCH 547L	Building Science and Technology III Lab	1
ARCH 548	Building Science and Technology IV	3
ARCH 548L	Building Science and Technology IV Lab	1
ARCH 581	Making and Material Practice	5
ARCH 582	Professional Practice	3

History and Theory: 16 cr.

ARCH 595	Seminar on the Built Environment I: History	5
ARCH 596	Seminar on the Built Environment II: Landscape and Society	5
ARCH 597	Seminar on the Built Environment III: Theory	3
ARCH 598	Seminar on the Built Environment IV: Topical Study	3

Electives: 21 cr.

Total Credits: 102

Master of Science in Architecture

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the study areas listed on the program's webpage. The degree is also open for applicants with non-professional degrees in various fields depending on the research proposed by the applicant.

Master of Science In Architecture (M.s.)**History and Theory: 6 cr.**

ARCH 597	Seminar on the Built Environment III: Theory	3
ARCH 598	Seminar on the Built Environment IV: Topical Study	3

Thesis: 9 cr.

ARCH 699	Research	9
----------	----------	---

Area of Study: 9 cr.**Electives: 6 cr.**

Total Credits: 30

Dual degree

Double degree programs are offered with a number of graduate programs in other college departments. Information about our programs and how to apply can be obtained from the department's web page at: www.design.iastate.edu/architecture (<http://catalog.iastate.edu/collegeofdesign/architecture/www.design.iastate.edu/architecture/>)

Financial support in the form of teaching and research assistantships is available.

Art and Design

The Bachelor of Arts in Art and Design is a four-year degree program with two options: *Art and Culture* or *Visual Culture Studies*. Both options require students to complement their studio art or visual culture studies coursework with study in a second area, within or outside of the College of Design. This can include a second major or minor, or an alternative program of study approved by your academic adviser.

Many students pursue this BA degree in conjunction with a second major or minor such as journalism, advertising, business, history, or psychology.

The two Art and Design curricula provide a solid liberal arts educational experience that can be a springboard into a wide array of graduate school and career opportunities, including art criticism, art history, art sales, corporate art collections, gallery/museum studies, and art therapy.

Art and Culture Option

The *Art and Culture* option provides a general studies degree in which students combine studio art with another area of interest. Students create their own programs of study, which may include another major or minor in addition to the concentration emphasizing studio art.

Visual Culture Studies Option

The *Visual Culture Studies* option provides concentrated study of art and design history, theory, and criticism. Courses may include up to nine (9) credits of museum or gallery internship, for those students interested in museum studies. Students also create their own programs of study, which may include another major or minor in addition to the concentration in visual culture studies.

This curriculum offers two concentrations: *Art and Culture* and *Visual Culture Studies*. Both concentrations are combined with an approved program of study, which may consist of a second major or a minor.

Art and Culture Concentration

The curriculum in Art and Design: Art and Culture Concentration leads to a 120.5-credit undergraduate Bachelor of Arts degree.

Total Degree Requirements: 120.5 credits

Only 65 credits from a two-year institution can apply, and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspectives: 3 credits**U.S. Diversity: 3 credits****Communication: 10 credits**

(C or better grade in ENGL 150 and ENGL 250)

Biological/Pre-Medical Illustration

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "communicating science through art," the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, freelance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

The information below outlines the specific requirements for a BA degree in Biological/Pre-Medical Illustration (BPM I). There are four components to a degree in BPM I:

- Liberal arts general education
- Science core and advanced courses
- Art core and advanced courses
- Electives

Part 1. College Requirements

a. Communication Proficiency Requirements

ENGL 150	Critical Thinking and Communication (grade of C or better)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (grade of C or better)	3
LIB 160	Information Literacy	1
Choose one course from the following:		3
ENGL 302	Business Communication	

ENGL 316	Creative Writing: Playwriting	
Two semesters of college-level world language		0-8
Students with 3 years in high school world language are exempt		
Total Credits		10-18

B. Liberal Arts and Sciences Requirements*

Arts and Humanities **		12
Natural Sciences and Mathematical Disciplines		
MATH 104	Introduction to Probability	3-4
or MATH 165	Calculus I	
or STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	
or more advanced		
CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	5
or CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4
Social Sciences ***		9
Total Credits		33-34

* Choose courses to meet *International Perspectives & US Diversity requirements*

** See <https://las.iastate.edu/students/academics/general-education/> Consider *HIST 280, HIST 281; ART H 280, ART H 281; DSN S 183*

*** See <https://las.iastate.edu/students/academics/general-education/>

Part 2. Course Requirements for Major in BPM I (continued in Part 3)

A. Biological Sciences Core

LAS 293D	Special Projects: General (F)	1
or LAS 101	Orientation for Open Option and Preprofessional Students	
BIOL 211 & 211L	Principles of Biology I and Principles of Biology Laboratory I (F.S.)	4
BIOL 212 & 212L	Principles of Biology II and Principles of Biology Laboratory II (F.S.)	4
BIOL 255	Fundamentals of Human Anatomy (F.)	3
BIOL 256	Fundamentals of Human Physiology (S.)	3
BIOL 351	Comparative Chordate Anatomy (S.)	5
BIOL 356	Dendrology	3-4
or BIOL 366	Plant Systematics	
or BIOL 454	Plant Anatomy	
Total Credits		23-24

B. Art Core

DSN S 131	Drawing I (F.S.)	4
ARTIS 230	Drawing II (F.S.)	3
ARTIS 233	Watercolor Painting (F.S.)	3
ARTIS 308	Computer Modeling, Rendering and Virtual Photography (F.S.)	3
ARTIS 330	Drawing III: Life Drawing (F.S.)	3
BPM I 323	Scientific Illustration Principles and Techniques (F.)	3
BPM I 326	Illustration and Illustration Software (S.)	3
BPM I 327	Illustration as Communication (F.)	3
BPM I 337	Application of Scientific Illustration Techniques (S.)	3
BPM I 497	Illustration Internship	1
Total Credits		29

Beyond the core preparation, students must take 9 credits in the advanced science area and 12 credits in the advanced art area. The courses acceptable in these areas follow. Other courses in art and biological science may be acceptable. See BPM I advisers and/or the BPM I Advisory Committee.

C. Advanced Art Area

Select 12 total credits from below. At least 6 credits must be studio classes.

Pre-Med Illustration Area		
ARCH 335	Three-Dimensional Studio	3
ARTIS 330	Drawing III: Life Drawing	3
ARTIS 408	Principles of 3D Animation	3
ARTIS 430	Drawing IV (F.S.)	3
BPM I 323	Scientific Illustration Principles and Techniques	3
BPM I 326	Illustration and Illustration Software	3
BPM I 337	Application of Scientific Illustration Techniques	3
BPM I 490	Independent Study	1-3
BPM I 491	Portfolio Design and Professional Development (S.)	2
BPM I 494	Special Topics in Illustration	1-3
General Art Area		
ARTIS 213	Studio Fundamentals: Painting (F.S.)	2
ARTIS 227	Introduction to Creative Digital Photography	3
ARTIS 238	Painting I (F.S.)	3
ARTIS 329	Creative Photography	3
ARTIS 338	Painting II	3
ARTIS 407	Principles of 3D Character Animation	3
ARTIS 409	Computer/Video Game Design and Development	3

ARTIS 438	Painting III (F.S.)	3
BPM I 395	Field Illustration (S.SS.)	1-3
JL MC 306	Broadcast Media Production (F.S.)	3
JL MC 315	Digital Storytelling (F.S.)	3

D. Advanced Science Area

Select 9 credits total from below.

Pre-Med Illustration Science Area - required/recommended courses by most graduate schools		
BBMB 316	Principles of Biochemistry (F.)	3
BIOL 313	Principles of Genetics (F.S.SS.)	3
BIOL 314	Principles of Molecular Cell Biology (F.S.)	3
BIOL 335	Principles of Human and Other Animal Physiology (S.)	3
BIOL 352	Vertebrate Histology (S.)	4
BIOL 423	Developmental Biology (S.)	3
B M S 329	Anatomy and Physiology of Domestic Animals (S.)	3
B M S 448	Principles of Human Gross Anatomy (S.)	4
GEN 340	Human Genetics (F.S.SS.)	3
General Science Area		
A ECL 321	Fish Biology (S.)	3
A ECL 366	Natural History of Iowa Vertebrates (S.)	3
A ECL 457	Herpetology (F.)	2
A ECL 458	Ornithology (S.)	2
A ECL 459	Mammalogy (S.)	2
ANTHR 307	Biological Anthropology (S.)	3
ANTHR 319	Skeletal Biology (F.)	3
ANTHR 424	Forensic Anthropology (S.)	3
BBMB 301	Survey of Biochemistry (S.SS.)	3
BIOL 312	Ecology (F.SS.)	4
BIOL 313L	Genetics Laboratory (F.S.)	1
BIOL 315	Biological Evolution (F.S.)	3
BIOL 328	Molecular and Cellular Biology of Human Diseases (F.)	3
BIOL 336	Ecological and Evolutionary Animal Physiology	3
BIOL 350	Comprehensive Human Anatomy (F.)	4
BIOL 353	Introductory Parasitology (S.)	3
BIOL 354	Animal Behavior (F.)	3
BIOL 355	Plants and People (S.)	3
BIOL 356	Dendrology (F.)	3
BIOL 364	Invertebrate Biology (F.)	3-4
BIOL 365	Vertebrate Biology (F.)	4
BIOL 366	Plant Systematics (S.)	4

BIOL 393	North American Field Trips in Biology	1-4
BIOL 394	International Field Trips in Biology	1-4
BIOL 402	Introduction to Pathology (F.)	3
BIOL 430	Principles of Plant Physiology	3
BIOL 436	Neurobiology (F.)	3
BIOL 454	Plant Anatomy (F.)	4
BIOL 455	Bryophyte and Lichen Biodiversity	3
BIOL 456	Principles of Mycology (F.)	3
BIOL 474	Plant Ecology (S.)	3
BIOL 488	Identification of Aquatic Organisms (F.S.)	1
BPM I 395	Field Illustration (S.SS.)	1-3
ENT 370	Insect Biology (F.)	3
ENT 374	Insects and Our Health (S.)	3
MICRO 302	Biology of Microorganisms (F.S.SS.)	3
MICRO 302L	Microbiology Laboratory (F.S.)	1
MICRO 310	Medical Microbiology (F.)	3
NREM 301	Natural Resource Ecology and Soils (F.)	4
NREM 330	Principles of Interpretation (S.)	3
PSYCH 310	Brain and Behavior (F.S.)	3
V PTH 401	Basics of Medical Terminology (F.)	1

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The biological sciences must include:

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

The art and design courses must include:

BPM I 323	Scientific Illustration Principles and Techniques	3
BPM I 337	Application of Scientific Illustration Techniques	3
Advanced drawing, illustration, electronic media or painting course		3

For more information, contact the BPM I adviser in 102 Catt Hall or view the website listed above.

Biological/Pre-Medical Illustration, B.A. 120 minimum credits required.

Community and Regional Planning

www.design.iastate.edu/community-and-regional-planning (<http://www.design.iastate.edu/communityplanning/>)

Community and regional planning is a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Graduates of the Community and Regional Planning department are able to integrate planning knowledge and skills in a variety of practical applications, and can communicate effectively in written and oral form. Graduates will be qualified for a variety of entry-level positions. They will also be well prepared for graduate study in a variety of fields, including law, public policy, public health, environmental science, geography, sociology, urban design, and architecture.

Graduates of the Community and Regional Planning department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, and collaboration, and in synthesizing and applying knowledge to practice. Graduates are expected to be able to assess the impact of plans and alternatives based on equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Our students gain an education that, when combined with experience, supports eligibility for membership in the American Institute of Certified Planners.

The department administers two undergraduate minors: Urban Studies and Geographic Information Science (GIS). The department cooperates in the undergraduate minors in Design Studies, Digital Media, Critical Studies in Design, Environmental Studies, and Sustainability.

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 128-credit-hour undergraduate program leading to the Bachelor of

Science. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

The BS in Community and Regional Planning program can be completed in two to four years. Students may apply for admission to the program at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student's cumulative GPA and a departmental review of course work.

Transfer applications from students in programs in sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 credits

Only 65 credits from a two-year institution may apply which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; completion of all requirements listed below.

International Perspective: 3 credits

U.S. Diversity: 3 credits

Communication: 13 credits

(C or better grade in ENGL 150 and ENGL 250)

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGL 309	Proposal and Report Writing	3
or ENGL 314	Technical Communication	
SP CM 212	Fundamentals of Public Speaking	3
LIB 160	Information Literacy	1
Total Credits		13

Humanities: 9 credits; 6 credits 300-level or above

PHIL 201	Introduction to Philosophy	3
or PHIL 206	Introduction to Logic and Scientific Reasoning	
or PHIL 230	Moral Theory and Practice	
Six credits from program curriculum sheet		6
Total Credits		9

Social Sciences: 18 credits 300 level or above

ECON 101	Principles of Microeconomics	3
or ECON 102	Principles of Macroeconomics	
POL S 215	Introduction to American Government	3
SOC 134	Introduction to Sociology	3
Nine credits from program curriculum sheet.		9
Total Credits		18

Math/Physics/Biol. Sciences: 13 credits

STAT 101 Principles of Statistics, 6 credits in Natural Sciences, 3 credits in Math

Design Core: 3 credits

DSN S 102	Design Studio I	3-4
or DSN S 183	Design in Context	

Total Credits **3-4**

Community and Regional Planning Core: 25 credits

C R P 201	The North American Metropolis	3
C R P 293	Environmental Planning	3
C R P 301	Urban Analytical Methods	4
C R P 383	Theory of the Planning Process	3
C R P 391	Field Travel	1
C R P 432	Community Planning Studio	6
C R P 492	Planning Law, Administration and Implementation	3
C R P 331	Professional Practice Seminar	2

Total Credits **25**

Planning Elective: 24 credits

24 credits from:

C R P 251	Fundamentals of Geographic Information Systems	3
C R P 325X	US Housing Policy	3
C R P 351	Intermediate Geographic Information Systems	3
C R P 416	Urban Design and Practice	6
C R P 417	Urban Revitalization	3
C R P 421	Financing Historic Preservation Projects	3
C R P 429	Planning in Developing Countries	3
C R P 435	Planning in Small Towns	3
C R P 437	Public Participation in Planning	3
C R P 445	Transportation Policy and Planning	3
C R P 451	Introduction to Geographic Information Systems	3
C R P 449	Geodesign	3
C R P 471	Real Estate Development	3
C R P 455	Smart Cities	3
C R P 479	Public Finance and Planning	3
C R P 484	Sustainable Communities	3
C R P 491	Environmental Law and Planning	3
C R P 494	Senior Seminar in Planning	3

General Electives: 24 credits

24 credits of general electives from program curriculum sheet

Undergraduate Minors

The Department of Community and Regional Planning offers 15-credit minors in Urban Studies and Geographic Information Science (GIS).

The Urban Studies minor is earned by completing both C R P 201 (The North American Metropolis) and C R P 291 (World Cities and

Globalization), plus 9 additional credit hours from the approved list of courses. At least 6 credit hours must be in courses numbered 300 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least nine credits that are not used to meet any other department, college or university requirement except the credit requirement for graduation. The Urban Studies minor is open to students from any college and any major.

Introduction to Urban Studies: 6 credits

C R P 201	The North American Metropolis	3
C R P 291	World Cities and Globalization	3

Advanced Urban Studies: 9 credits

C R P 251	Fundamentals of Geographic Information Systems	3
C R P 293	Environmental Planning	3
C R P 301	Urban Analytical Methods	4
C R P 320	Urban Geography	3
C R P 325X	US Housing Policy	3
C R P 351	Intermediate Geographic Information Systems	3
C R P 376	Rural, Urban and Regional Economics	3
or ECON 376	Rural, Urban and Regional Economics	
C R P 383	Theory of the Planning Process	3
C R P 417	Urban Revitalization	3
C R P 421	Financing Historic Preservation Projects	3
C R P 429	Planning in Developing Countries	3
C R P 455	Smart Cities	3
C R P 457	GeoGames for Civic Engagement	3
C R P 460	Social Justice and Planning	3
C R P 471	Real Estate Development	3
C R P 479	Public Finance and Planning	3
C R P 484	Sustainable Communities	3
C R P 492	Planning Law, Administration and Implementation	3
C R P 573X	Contemporary Issues in Global Housing	3
or ARCH 573X	Contemporary Issues in Global Housing	
ARCH 221	History of Pre-Modern Architecture	3
ARCH 321	History of the American City	3
ARCH 420	Topics in American Architecture	3
ARCH 429	Topics in Italian Architecture and Urbanism	3
ARCH 575	Contemporary Urban Design Theory	3
ANTHR 418	Global Culture, Consumption and Modernity	3
C E 451	Urban Transportation Planning Models	3
CL ST 275	The Ancient City	3
HIST 429	"Monstrous London": London's Histories 1500-1800	3-4

HIST 465	The American West	3
SOC 310	Community	3
SOC 331	Social Class and Inequality	3
SOC 332	The Latino/Latina Experience in U.S. Society	3
SOC 360X	Globalization and Development	3
L A 274	The Social and Behavioral Landscape	3
L A 371	History of Modern Landscapes, 1750 to Present	3
L A 373	Gardens and Landscapes from Antiquity to 1750	3
POL S 310	State and Local Government	3
POL S 334	Politics and Society	3
POL S 371	Public Organizations and Leadership	3
POL S 480	Ethics and Public Policy	3
URB D 521	Foundations of Urban Design	3
URB D 522	Contemporary Urban Design Practices	3

The Geographic Information Science (GIS) minor is earned by taking CRP 252 and CRP 351, plus 9 additional credits from the approved list of courses. At least 6 credit hours must be in courses numbered 300 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least 9 credits that are not used in any other department, college or university requirement except the credit requirement for graduation. The GIS minor is open to students in any college and any major.

Foundations of GIS: 6 credits

C R P 251:	Introduction to Geographic Information Systems	3
C R P 351:	Intermediate Geographic Information Systems	3

GIS Tools and Techniques: 9 credits

C R P 449	Geodesign	3
C R P 452	Geographic Data Management and Planning Analysis	3
C R P 454	Fundamentals of Remote Sensing	3
C R P 455	Smart Cities	3
C R P 456	GIS Programming and Automation	3
C R P 457X	GeoGames for Civic Engagement	3
C R P 558	Web Mapping and Spatial Data Visualization	3
NREM 345	Natural Resource Photogrammetry and Geographic Information Systems	3
NREM 546	Integrating GPS and GIS for Natural Resource Management	3
GEOL 452	GIS for Geoscientists	3
GEOL 488	GIS for Geoscientists II	3

First Year

Graduate Study

The Department of Community and Regional Planning (CRP) offers three different graduate degree options for individuals interested in engaging with communities and helping to shape their future: a Master of Community and Regional Planning (MCRP), an interdisciplinary Master

of Science with an emphasis in Community Development (CDEV), and a Master of Real Estate Development (MRED).

The primary focus of the MCRP degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (24 credits), electives (18-21 credits), and a capstone component consisting of either a comprehensive exam (3 credits) or thesis (6 credits). The required core consists of C R P 532, 561, 563, 564, 566, 568 and 592. Students select electives in consultation with their Program of Study Committee (POSC). Students are encouraged to complete an internship in a planning office during their course of study.

C R P 532	Community Planning Studio	6
C R P 561	Planning Theory	3
C R P 563	Planning the American Metropolis	3
C R P 564	Introduction to Analytical Methods for Planning	3
C R P 566	Policy Analysis and Planning	3
C R P 568	Planning and Development	3
C R P 592	Land Use and Development Regulation Law	3

Admission to the MCRP program is by application to the department and to the Graduate College. Students with a bachelor's degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department's Director of Graduate Education (DOGE) in writing prior to the first day class of the student's first semester in the program to have credits waived. No foreign language is required for the degree Master of Community and Regional Planning.

Double degree programs are offered with architecture (MCRP/MArch), business administration (MCRP/MBA), landscape architecture (MCRP/MLA) and sustainable agriculture (MCRP/MS). The department also participates in the interdepartmental major in transportation (see Transportation). Information about our programs and how to apply can be obtained from the department's web page at: www.design.iastate.edu/community-and-regional-planning (<http://www.design.iastate.edu/CRP/>), or send an email to crp@iastate.edu.

CRP offers an interdisciplinary Master of Science degree with an emphasis in Community Development (CDEV) through the department's affiliation with the Great Plains Interactive Distance Education Alliance (GPIDEA). The CDEV program consists of 30-credit hours offered in an on-line format. Information about the CDEV program may be obtained from the department office and from the department's web page at: <https://www.design.iastate.edu/community-and-regional-planning/>

degrees/master-of-community-and-regional-planning/community-development-masters-program/.

In partnership with the Department of Finance in the College of Business, CRP offers a two-year, 33-credit Master of Real Estate Development (MRED) degree. The program is designed for working professionals, with coursework delivered in a blended online/on-campus format. During the academic year, students complete coursework remotely and come to campus for three, one-week intensive workshops throughout the two-year degree. More information on the MRED program is available on the program website: <https://www.ivybusiness.iastate.edu/masters/mred/>.

The Certificate in Preservation and Cultural Heritage (P+CH) is a multidisciplinary graduate program that provides the practical skills and background needed to succeed in the fields of historic preservation and cultural resource management. The certificate program is open to Iowa State University graduate students in any College of Design major as well as those majoring in history, anthropology, and related disciplines. Interested students should visit <https://www.design.iastate.edu/programs-minors/certificates/preservation-and-cultural-heritage/> or contact historicplaces@iastate.edu for guidance.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications, and program management. The program is open to graduate students in all disciplines of the university. Information about the graduate certificate may be obtained from the department office and from the department's web page at: www.design.iastate.edu/programs-minors/certificates/gis-certificate/ (<https://www.design.iastate.edu/programs-minors/certificates/gis-certificate/>)

Design Studies

Interdepartmental Undergraduate Program

<http://www.design.iastate.edu>

The Design Studies programs bring together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design, art and planning fields.

Core Design Program

Four Design Studies courses constitute the Core Design Program: Design Studio 1 (Dsn S 102), Drawing I (Dsn S 131), Design in Context (Dsn S 183) and Design Collaborative (Dsn S 115). Full or partial credit of the Core Design program is required for all undergraduate students in the College of Design.

Minor—Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.

Minor—Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multi-disciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minor—Digital Media

The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of design, art and planning. This minor is open to all undergraduate students at Iowa State University.

Minor - Geographic Information Science (GISC)

The undergraduate minor in Geographic Information Science (<https://www.design.iastate.edu/programs-minors/minors/gisc/>) (GISC) is an interdisciplinary program that provides students with opportunities to engage the theory, processes, techniques and tools that use spatial data and computational technology to create cutting-edge analysis and mapping approaches for a wide range of fields, such as urban planning, architecture, landscape architecture, design, community development, agriculture, environmental sciences, natural resources, sociology, criminology, anthropology, political science, environmental studies and others. The minor is open to undergraduates in all university majors with a minimum overall GPA of 2.0 prior to enrolling.

Minor - Illustration

The undergraduate minor in Illustration (<https://www.design.iastate.edu/programs-minors/minors/illustration/>) is ideal for students interested in illustration for books, graphic novels, magazine articles, advertising and concept art for game design and film. This minor provides the ability to tailor a curriculum that serves these varied career interests, whether you want to work in the industry or freelance as an independent studio practitioner.

Minor - Textile Design

The undergraduate minor in Textile Design (<https://www.design.iastate.edu/programs-minors/minors/textile-design/>) allows

students to focus specifically on the design and creation of textiles – a practice with applications in the fine arts, fashion and related fields. Open to undergraduates at the sophomore level and above enrolled in any College of Design major or in the Apparel, Merchandising and Design major in the College of Human Sciences.

Minor - Urban Studies

The undergraduate minor in Urban Studies (<https://www.design.iastate.edu/programs-minors/minors/urban-studies/>) is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks. The minor is open to undergraduates in all university majors except Community & Regional Planning.

Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

Graphic Design

<http://www.design.iastate.edu/graphicdesign/index.php> (<http://www.design.iastate.edu/graphicdesign/>)

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Graphic design.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, visual organization and communication media, and interaction design. Graphic design graduates effectively integrate abstract thinking skills such as communication design theory, history, methodology; and technology. Components of visual communication including typography, symbology, time-based media, information design, branding, image creation, and other communication systems are integrated with an understanding of professional practice.

Curriculum in Graphic Design

The Curriculum in Graphic Design leads to a 123.5-credit undergraduate Bachelor of Fine Arts in Graphic Design including the 30-credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Information on admission criteria is posted each year on the College of Design website.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

A 30-graduate-credit program is offered leading to the Master of Arts with a specialization in Graphic Design for students planning to undertake a professional degree. (NOTE: Applicants without a degree background in graphic design may be required to complete up to 18 additional credits of coursework).

A 64-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions, see Graduate Study under Graphic Design in the Courses and Programs section.

Total Degree Requirement: 123.5 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits

U.S. Diversity: 3 credits

Communications: 10 credits

ENGL 150	Critical Thinking and Communication *	3
ENGL 250	Written, Oral, Visual, and Electronic Composition *	3
LIB 160	Information Literacy	1
One of the following:		3
COMST 101	Introduction to Communication Studies

Admission into the BFA in Graphic Design Program is based on departmental resources and will be determined by overall cumulative grade point average following completion of 29.5 credits including DSN S 120, 131, ENGL 150 or 250, and other general education requirements. A portfolio review will also be significant factor.

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design and Master of Arts (M.A.) in Experiential Graphic Design.

M.F.A. in Graphic Design

The Master of Fine Arts in Graphic Design is recognized as the terminal degree in the field and requires a minimum of 64-credits. M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. Students and faculty work collaboratively on a required thesis; integrating theory, creation, research, and design problem solving.

The M.A. in Experiential Graphic Design

This 30-credit degree focuses on preparing students for visual communication. This degree provides a comprehensive exposure to all aspects of user experience, including but not exclusive to wayfinding, exhibition design, interaction, information design, and placemaking.

The MAXGD is for those seeking a graphic design specialization with little to no previous experience in the area. Students may use the degree as a complement to a bachelor's degree in graphic design or another design field to enhance their skills and qualifications for employment. It can also be used to complement those students with an undergraduate degree in a graphic design area that would like to add an additional graduate level study to their coursework prior to enter the field.

Graphic Design Graduate Program

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student's undergraduate major is the standard for full admission

to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students' progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, may be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Graphic Design, College of Design, Iowa State University, Ames, IA 50011-3092.

MFA in Graphic Design Degree Requirement

Industrial Design

<http://www.design.iastate.edu/industrialdesign/index.php> (<http://www.design.iastate.edu/industrialdesign/>)

BID Bachelor of Industrial Design

Students in this program take a carefully defined sequence of courses developed to give them exposure and practice in the areas of theory and skill required by industrial design. These include design sketching and visualization, form development, history, creative thinking, engineering principles, research, design methodology, human factors, computer-aided design, manufacturing techniques, commercial factors, management and strategic design development. In their third year, students select electives within and outside of the department, defining current issues in the profession. The upper-level studio classes are reserved for study abroad programs, internships, and sponsored projects with students from other departments and colleges, in collaboration with industry. The curriculum aims to develop the ability to cope with diverse problem areas in industrial design without restricting students to particular fields of specialization.

Curriculum in Industrial Design

The curriculum in Industrial Design leads to a 132.5-credit undergraduate Bachelor of Industrial Design including the first year Core Design Program.

Admission into the professional program depends upon available departmental resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, previous high school record, and a portfolio of original work.

Transfer students with studio credits from other programs, colleges, and universities must present a portfolio of work done in those courses, for departmental review, in order to have the credits apply toward studio. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

A 48-credit post-professional graduate program is also offered leading to the degree Master of Industrial Design.

Total Degree Requirements: 132.5 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits**U.S. Diversity: 3 credits****Communications: 10 credits**

Graduate Study

Designing for Future Industries

Master of Industrial Design | MID

48-credit study | distributed across two consecutive years

How will (Industrial) Design look like in the future? Where is the field going? What new methods and methodologies will be needed to tackle current and emergent global issues? What will it mean to be human in the age of Artificial Intelligence? How will design disciplines answer to these new futures, new typologies of users and ever-changing technologies?

These are just some of the questions that keep us awake in the new MID program! In an age where new technologies and automation are continually changing the way we think about human activities and future jobs, Industrial Design is faced with challenges that question the field itself. Designing successfully for and with new industries and technologies will require ambidextrous designers, that are flexible, critical, creative and highly capable of working and collaborating in different contexts, across domains and most importantly under different roles. Design practitioners, scholars and students will need to be more than developers, managers or human-centered researchers - they will need to be change-makers, leaders and above all Connectors. The MID program offers a competence-based curriculum, with tools and training on how to be[come] this design connector of the future.

Description of the degree | the bigger picture

The Master of Industrial Design (MID) program at the College of Design, Iowa State University, specifically emphasizes *systems thinking* as one of its core languages when reframing problems as opportunities for future contexts. Systems design, change theory, problem reframing, strategic and creative thinking, and innovation by design are some of the fundamentals of the MInD framework.

Industrial DesignIt is a human-centered discipline that questions existing boundaries and makes connections among diverse domains. Therefore, the program challenges students to develop the ability to recognize and define problems in new ways, and thus find opportunities others might have missed or undervalued. As a strategic problem-solving process, Industrial Design tries to reimagine how we should go about developing innovative, sustainable and durable solutions for people and society at large that genuinely lead to better quality of life and better futures. The MID program actively connects with other knowledge domains and disciplines, to research how things are with the drive to propose how they ought to be. This is achieved through the challenging balance between critical and creative ways of thinking [and working] when devising novel,

useful and meaningful artifacts, services, experiences and environments. Ultimately, the program integrates the design triad of people, business and technology, in innovative ways, and is based on insightful research to create new value and competitive advantage in a variety of societal, economic and environmental contexts.

Details about the degree | zooming in

The MID program is centralized on the creation and application of new knowledge through in-depth investigations of existing 'gaps' culminating in a graduation project, which includes a creative component (grad studio-based) or a written thesis (research project). At the same time, students expand their design practice skills using different methodologies, collaboratively, throughout the entire design process. They explore, generate, transfer and implement interdisciplinary insights into foundational knowledge for the discipline of Industrial Design.

The MID is accredited and recognized as a terminal degree in Industrial Design. This graduate program is designed to offer significant mix of skills and experiences, including students from different disciplinary backgrounds, faculty-directed research programs, internships, international study abroad, industry-sponsored coursework and also teaching experience.

The MID program is positioned in one of the most comprehensive design colleges in the country, facilitating the integration of methodologies and skillsets from multiple disciplines. Additionally, the program has established curricular connections to the nationally ranked College of Engineering and the College of Business at Iowa State University, as well as to numerous industry collaborators and practitioners.

Degree requirements includes a completion of a 2-year, 48-credit program, including a required core (30 credits), departmental electives or experiential learning credits (15 electives), and one of the following: creative component with a design process report (3 credits) or research-based written thesis (3 credits). To note that students and faculty work collaboratively on this required final grad project irrespective of graduation final deliverable: integrating both theory and creation, and research with/for design problem-solving.

Curriculum Outline

Admission to the MID program is by application to the department and to the Graduate College. The MID program does not require a bachelor's degree in industrial design and is open to students from any other disciplinary background. Information about our programs and how to apply can be obtained from the department's web page at: www.design.iastate.edu/ (<http://www.design.iastate.edu/CRP/>)<https://www.design.iastate.edu/industrial-design/degrees/master-of-industrial-design/>, or send an email directly to graduate recruitment services merfoleymid@iastate.edu.

Integrated Studio Arts

<http://www.design.iastate.edu/artvisualculture/index.php> (<http://www.design.iastate.edu/artvisualculture/>)

The Department of Art and Visual Culture offers degree programs focused on visual art and visual culture and offers courses in art history, studio arts, and art education. Degree offerings include the Bachelor of Arts in Art and Design, Bachelor of Fine Arts in Integrated Studio Arts, and Master of Fine Arts in Integrated Visual Arts.

Undergraduate Study

BFA Integrated Studio Arts

Students select from studio options including ceramics, digital media, drawing, furniture design, illustration, jewelry and metalsmithing, scientific illustration, two- and three-dimensional mixed media, painting, photography, printmaking, textiles, and new genres. Over the four-year course of study students will develop a portfolio and prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem-solving, critical thinking, and skill development, drawing on contemporary developments, historical and cultural theory, and studio practice.

Transfer students with studio credits from other colleges and universities must present a portfolio of work created in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with the department's professional advisers.

The department offers an undergraduate minor in Illustration and participates in the undergraduate minors in Classical Studies, Critical Studies in Design, Design Studies, Digital Media, and Textile Design.

Undergraduate Curriculum

The Curriculum in Integrated Studio Arts leads to a 126.5-credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts. Admission into the program requires the completion of at least 30.0 credits, including the following courses: DSN S 102, DSN S 110 or 115, DSN S 131, and DSN S 183; 6 credits of Social Sciences/Humanities; 6 credits of Math/Science; ENGL 150 (or test-out credit); LIB 160. Review of the student's portfolio and essay will also be significant factors.

Admission into the professional program is subject to the approval of a faculty committee following the completion of the College of Design Core Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Total Degree Requirement: 126.5 cr.

Only 65 credits from a two-year institution can apply, and may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

International Perspective: 3 credits

U.S. Diversity: 3 credits

Communication: 10 credits

(C or better grade ENGL 150 and ENGL 250)

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

Post-Baccalaureate Undergraduate Certificate

Iowa State's Post-Baccalaureate Undergraduate Certificate program in Integrated Studio Arts (ISA) prepares students for either graduate study or career advancements by providing a focused environment for advancing aesthetic, technical, creative, and conceptual skills. While a bachelor's degree in visual arts is not required, a strong portfolio of artwork and a written statement of purpose are required for admission. Download application requirements (https://www.design.iastate.edu/wp-content/uploads/2019/01/Postbaccalaureate_ISA_2019-20.pdf) (PDF) or view online. (<https://www.design.iastate.edu/art-and-visual-culture/degrees/post-baccalaureate-undergraduate-certificate/>)

Curriculum

Post-baccalaureate students will work with a faculty adviser to create a tailored 25-credit program of study including:

- 15 credits of 300/400-level Integrated Studio courses
- Six (6) credits of 300/400-level art history courses
- Three-credit elective selected from a list of options
- ARTIS 491: One-credit capstone exhibition course

For the capstone experience, you will be expected to produce an artist's statement and a written assessment of your learning that will be reviewed, along with your art, by the arts faculty.

This 25-credit certificate program must be completed in two (2) years. Students interested in developing a body of work for admission to graduate school or for professional practice will be ideal candidates.

Application Requirements

To apply for this program, please submit the following materials.

1. Digital portfolio in PowerPoint format:
 - Twenty (20) images of recent work with no more than four (4) of the 20 images being details
 - Descriptions on each PPT image slide need to include title, date, size and medium
2. One-page statement of intent
3. Current resume
4. Name and contact information of three (3) references

Application Deadlines

Contact the College of Design for application deadlines.

Ingrid Lilligren, Professor and Chair

Department of Art and Visual Culture

Upload to CyBox (email ililligr@iastate.edu for access to upload your application)

Admission into the BFA in Integrated Studio Arts requires the completion of 30.0 credits including the following courses DSN S 102, DSN S 131, DSN S 183, DSN S 110 or 115, 6 credits in Social Science/Humanities, 6 credits Math/Science, ENGL 150, LIB 160. A portfolio review and essay will also be significant factors.

Graduate Study

The department offers the Master of Fine Arts (MFA) in Integrated Visual Arts. The MFA curriculum in Integrated Visual Arts requires a minimum of 60 credits. The program of study includes seminar classes, a studio concentration, history and criticism courses, elective courses outside the department or area of study, and the completion of a thesis exhibition and written thesis statement.

MFA graduates in Integrated Visual Arts link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio practice, business, higher education, or new interdisciplinary fields. The MFA is recognized as the terminal degree. A required thesis exhibition is composed of two parts: a substantial exhibition; and a written thesis statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A written thesis with no exhibition component may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

Interdisciplinary Design

The Bachelor of Arts in Interdisciplinary Design is a 122.5-credit non-professional undergraduate degree program that combines design studios and the liberal arts in a four-year curriculum focused on educating students to use design and critical thinking skills to generate ideas, solve complex problems and be creative and innovative makers. The program provides each student flexibility in exploring across multiple disciplines to learn design methods, theory, and application that drive the design process. The core of the degree program is a series of lectures, seminars, and studios. Students have hands-on experiences grappling with design challenges that vary in complexity and scale. Courses are taught by faculty from multiple design disciplines. Seniors complete a capstone project, called Launchpad, and a portfolio and professional development course in preparation for graduate school or the job market. The program works well with a second major or a minor, can be

completed on a part-time schedule, and is transfer-friendly. Students with transfer credit should speak to academic adviser about how these credits can apply to degree requirements.

The curriculum developed out of a shared philosophy across the college's disciplines that designers have the capacity to think strategically and creatively about society's increasing economic, social and environmental challenges. Innovation and entrepreneurship are encouraged, integrated, and valued. Our graduates pursue a wide range of professional career paths in design practice, digital media and entrepreneurship. Upon completion, students may enter graduate programs in the design professions or other fields in which design thinking, skills in making, and critical analysis are valued.

Curriculum for Bachelor of Arts in interdisciplinary design

Total Degree Requirement: 121.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 6 cr. in Design History/Theory/Criticism and 6 cr. in Design Skills credit; 16 technical cr.; 21 P-NP cr. of free electives; 2.00 minimum GPA average; completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 13 cr.

(C or Better in ENGL 150 and ENGL 250)

Interior Design

<http://www.design.iastate.edu/interiordesign/index.php> (<http://www.design.iastate.edu/interiordesign/>)

The department offers the degree Bachelor of Fine Arts (BFA) in Interior Design.

BFA Interior Design. Emphasis is on the student's application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, and physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting, and computer-aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction, and application of human factors. The curriculum

is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional-level education.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present their portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Critical Studies in Design, Design Studies, and Digital Media.

Curriculum in Interior Design

The Curriculum in Interior Design leads to a 129.5-credit undergraduate Bachelor of Fine Arts in Interior Design including a 30.5-credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance and a portfolio of original work.

A 34-graduate-credit program is offered leading to the Master of Arts, for students planning to undertake professional or design research-oriented pursuits. (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60-graduate-credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions, see Graduate Study under Interior Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires completion of the 30.5-credit Core Design Program, including the following courses:

DSN S 102	Design Studio I	4
DSN S 115	Design Collaborative Seminar	0.5
or DSN S 110	Design Exchange Seminar I	
DSN S 131	Drawing I	4
DSN S 183	Design in Context	3
Six credits of Social Science/Humanities		6
Six credits of Math/Science		6
ENGL 150	Critical Thinking and Communication	3
or ENGL 250	Written, Oral, Visual, and Electronic Composition	
LIB 160	Information Literacy	1

Admission is based on department resources and will be determined by a formal review at the end of the Core Design Program.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 129.5 cr.

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

(C or better grade ENGL 150 and ENGL 250)

Graduate Study

The Department of Interior Design offers two graduate degrees in interior design: a five-semester Master of Fine Arts (MFA) and a three-semester Master of Arts (MA), each of which requires a thesis. The degree programs encourage interdisciplinary work within the College of Design and across related fields within the university. We currently offer double-degree programs and an interdisciplinary PhD program with a home department in Interior Design. Financial support in the form of teaching and research assistantships is available on a competitive basis.

Master of Fine Arts in Interior Design (MFA)

The MFA is a terminal degree in Interior Design with a required thesis and a creative component. It is designed for students with undergraduate degrees in Interior Design or closely related disciplines and for students from other disciplines who complete required prerequisites in the Department of Interior Design. The MFA in Interior Design Program prepares students to become professionals in practice, teaching, and research.

The MFA program encourages students to research and engage diverse contemporary issues within design specializations across the field of Interior Design. Faculty in the program provide students with opportunities to engage and address social, cultural, environmental, historical, practical, and other concerns within regional, national, and international contexts. They amalgamate traditional methods and contemporary technologies, and encourage students to develop new processes as needed. Faculty members promote inclusive designs that accommodate current and future needs across distinct cultures and populations. The Interior Design Graduate Programs expect graduates to approach research, interdisciplinary coursework with dedication and commitment.

The MFA curriculum has an intensive five-semester course sequence that emphasizes foundations of interior design including methods, theory and process, humanics (human factors in design), and studio. Design seminars offer training in varied interior design specializations including preservation and cultural heritage, inclusive design, lighting, color theory, research methods, and human factors design. The program offers study abroad options, studios with specialized faculty, and the opportunity to do independent projects. Interdisciplinary option studios apply and integrate core-course content with technical proficiency in

areas of preservation and cultural heritage, healthcare, design for elderly populations, and and hospitality, among others. The program offers study abroad options, studios with specialized faculty, and the opportunity to do an independent projects. During the last two semesters students explore interior design through a focused research thesis written and graphic representations. The MFA program concludes with a public defense of the thesis that includes a display of the creative component.

Students admitted to the program hold undergraduate degrees in a broad range of fields. A student without an undergraduate degree in interior design or interior architecture must complete the curriculum's prerequisites listed in curriculum sheets posted on the Graduate Programs in Interior Design's website (<https://www.design.iastate.edu/interior-design/graduate-degrees/graduate-program-overview/>). Students with undergraduate degrees in closely related to design fields may be eligible to waive part of the prerequisites in the program.

Master of Arts in Interior Design (MA)

The post-professional Master of Arts (MA) in Interior Design is a 34 credit research degree with required graduate thesis. The MA degree is open to applicants who hold a professional degree in Interior Design or Interior Architecture from an accredited program. The MA in Interior Design degree prepares students to become competent professionals in Interior

Design practice, while the written research thesis contributes to the body of knowledge in the field.

MA candidates are required to develop a thesis proposal with a statement of purpose, research questions, literature review, methods summary, and outline of proposed chapters. A first professional degree is also open for applicants with non-professional degrees in various fields with the completion of required prerequisites in the Department of Interior Design. A first professional MA for graduates in closely related design fields may allow some prerequisite courses to be waived.

Dual Degrees

Double-degree programs are offered with the Department of Architecture with a Master of Arts (MA) in Interior Design and a Master of Architecture (MArch). The graduate program also offers a PhD in Human Computer Interaction (HCI) with home department in Interior Design. Information about our programs and how to apply can be obtained from the department of Interior Design Graduate Program website and from the graduate school's departmental web page.

Concurrent undergraduate/graduate STATUS

Students enrolled in the Bachelor of Interior Design Program at ISU may apply for concurrent undergraduate/graduate status prior to their final semester of their undergraduate program. If accepted, students will be

allowed to register for six graduate credits and apply the credits to an MA degree.

Landscape Architecture

Landscape architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The department offers graduate and undergraduate degree programs and cooperates in the undergraduate minors in Design Studies, Critical Studies in Design, and Digital Media.

The undergraduate curriculum includes one year of the college's Core Design Program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This

studio is a full semester's credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems.

To enhance the study of landscape architecture in off-campus settings, the department requires students to choose from among the following options during the spring and summer of their fourth year: a professional internship; the College of Design Rome Program; an independent study abroad experience; or National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design's Career Services Office.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 30 credits and a four-year professional program of 119.5 credits.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Design Program of 30 credits and a four-year professional program of 119.5 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first-professional degree programs in landscape architecture at the bachelor's and master's levels.

Total Degree Requirement: 149.5 credits

Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits; 9 P-NP credits of free electives; 2.00 minimum GPA.

ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	

Total Credits 10

Humanities: 9 credits

9 credits from PHIL, HIST, MUSIC or other humanities course offerings.

Social Sciences: 6 credits

6 credits from ANTHR, ECON, POL S, PSYCH, or SOC.

Mathematics and Science: 12 credits

One of the following: 3-4

MATH 140	College Algebra	
MATH 145	Applied Trigonometry	
MATH 165	Calculus I (4 crs)	
ENV S 120	Introduction to Renewable Resources	3
Science Elective		6

Additional General Education Course 3 credits

3 credits from 300-400-level courses

Design Core: 11.5 credits

DSN S 102	Design Studio I	4
DSN S 115	Design Collaborative Seminar	0.5-1
or DSN S 110	Design Exchange Seminar I	
DSN S 131	Drawing I	4
DSN S 183	Design in Context	3

Total Credits 11.5-12

Landscape Architecture: 89 credits

L A 201	Studio: Landscape Interpretation and Representation	6
L A 202	Studio: Site Design I	6
L A 221	Native Plants of the Savanna Ecotone	3
L A 222	Introduced Plants of the Midwest	3
L A 241	Developing Identity as a Landscape Architect	1
L A 272	Landscape Studies	3
L A 274	The Social and Behavioral Landscape	3
L A 281	Investigating Landscape Form, Process, and Detail	3
L A 282	Landscape Dynamics	3
L A 301	Site Design II	6
L A 302	Ecological Design at the Regional Scale	6
L A 341	Contemporary Landscape Architecture	1
L A 371	History of Modern Landscapes, 1750 to Present	3
L A 373	Gardens and Landscapes from Antiquity to 1750	3

L A 381	Shaping the Land	3
L A 402	Urban Design	6
L A 404	Advanced Landscape Architectural Design	6
L A 444	Landscape Architecture Independent Educational Enrichment	R
L A 442	Professional Practice	2
L A 481	Landscape Construction	3
L A 482	Landscape Construction Documentation	3
DSN S 546	Interdisciplinary Design Studio	6
Plus nine credits professional electives		9

Total Credits 88

Electives: 14 credits

Complete electives sufficient to complete graduation requirements.

Landscape Architecture, B.L.A.

First Year

Fall	Credits	Spring	Credits
DSN S 102 or 131	4		
DSN S 183 (or General Education)	3	DSN S 131 or 102	4
DSN S 115	0.5	Soc. Sciences/Humanities Elective	3
ENGL 150 or 250	3	Science Elective or MATH 142	3
Soc. Sciences/Humanities Elective	3	LIB 160	1
MATH 145	3	Elective (Optional for pre-professional year; not required for program application. If not taken in first year, add 3 cr. to a subsequent semester to meet the 150.0 credit total)	3
		16.5	14

Second Year

Fall	Credits	Spring	Credits
L A 201	6	L A 202	6
L A 221	3	L A 274	3
L A 241	1	L A 222	3
L A 272	3	L A 282	3
L A 281	3	Elective	3
		16	18

Third Year

Fall	Credits	Spring	Credits
L A 301	6	L A 302	6
L A 381	3	L A 341	1
L A 373	3	L A 371	3
ENV S 120	3	Social Science/Humanities Electives	3
ENGL 250	3	Math/Science Elective	3
		18	16

Fourth Year

Fall	Credits	Spring	Credits
L A 402	6	One of the following:	
L A 481	3	L A 444A	R
Social Science/Humanities Elective	3	L A 444B	R
LA electives	3	L A 444C	R
Communications (300 level English)	3		
DSN S 301 (Rome option only)	1		
		19	0

Fifth Year

Fall	Credits	Spring	Credits
L A 401	6	DSN S 546	6
LA Electives	3	L A 442	2
Social Science/Humanities Elective (300 level)	6	L A 482	3
LA Electives	3	Electives/LA Electives	3
		Professional Elective	1
		18	15

Additionally: Each student needs to take 3 credits of a US Diversity (usually covered by LA 272) and 3 credits of an International Perspectives course (usually covered by LA 373). Students also need to take at least 6 credits of 300 level or above in the combined areas of communication, science, math, humanities, and social science (6 total from all the areas).

Graduate Study

The department offers the Master of Landscape Architecture (MLA), an accredited professional degree designed for students with or without an undergraduate degree in landscape architecture. The degree provides skills and knowledge as measured by the Landscape Architectural Accreditation Board (LAAB) and the licensing exam for students seeking to practice as a licensed professional in the public or private sectors.

The MLA degree also offers competency for students interested in post-professional study as it provides the skills and knowledge for the application of research and/or scholarly methods to professional practice.

The MLA program offers three concentration tracks in the following topical areas – Theory/Urbanism, Technology/Ecology, Advocacy/Community – through coursework and an optional thesis and creative component. The concentration in one of the three tracks will be determined by the student in consultation with his/her adviser.

Concentration electives may be selected from within the college and university from an approved list and up to three (3) credits from within the department. In their final year, students may undertake a creative component or thesis option with the approval of their major professor and the department Graduate Committee.

Students are also able to pursue double degrees with Master of Community and Regional Planning (MLA/MCRP), Master of Urban Design (MLA/MUD), and Master of Design in Sustainable Environments (MLA/MDesSE). Students interested in the double-degree programs should contact the departments to receive a detailed description of requirements.

The department also offers courses in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

Design and Planning: 34 credits

L A 601 Design Representation	4
L A 602 Studio I – Land/Form & Plant/Scape	6
L A 603 Studio II – Living Systems	6
L A 604 Studio III – City Matters	6
L A 605 Studio IV – LandWorks/LandDigits	6
DSN S 546 Interdisciplinary Design Studio	6

or 2 cr. L A 580 Thesis, Creative Comp. Tutorial + 4 cr. L A 599 Creative Comp. or L A 699 Thesis

Theory/History/Urbanism: 11 credits

L A 571 Landscape Architectural Theory	3
L A 590D Special Topics: History/Theory/Criticism	3
or L A 578D: LA History elective*	
L A 543 Colloquium I	1
L A 545 Colloquium II	1

Technology/Ecology/Materiality: 14 credits

L A 557 Computer Applications	3
L A 583 Landscape TopoGraphics	3
L A 581 Landscape Structure	3

L A 542 Professional Practice & Enterprise	2
L A 522 Advanced Plant Technology	3

Advocacy/Planning/Policy: 6 credits

L A 594 Environmental Justice in Built Environments	3
Planning Elective**	3

Concentration Electives: 9 credits**Elective: 3 credits****Total 80 credits****Approved Distribution Electives:****LA History elective (3 credits)*****Courses offered on term-by-term basis**

L A 590D: Special Topics: History

L A 578D: Landscape Architecture: History

Planning elective (3 credits)**

C R P 566: Planning Policy

C R P 568: Planning & Development

C R P 591: Environmental Law and Planning

C R P 592: Land Use and Development Regulation Law

Theory elective (3 credits)***

Theory course in your concentration area (Theory, Technology or Advocacy) – Select from CRP, ARCH, MUD, SUS E, IND D, or other relevant field in the college or university.

Concentration Track Electives

1. Theory/History/Urbanism MLA/MUD
2. Advocacy/Planning/Community MLA/CRP
3. Technology/Ecology/Materiality MLA/MDES SE

Concentration track electives from approved list on separate sheet.

Students may also take courses from other departments across college.

Elective

3 credit non-LA course from college or university courses (incl. LA 509: Field Trip)

Sustainable Environments

Master of Design in Sustainable Environments

The Master of Design in Sustainable Environments (MDesSE) is an advanced interdisciplinary degree that focuses on holistic design strategies for the production of sustainable, resilient environments and artifacts. MDesSE students and faculty constitute a multidisciplinary, highly interactive community that is deeply engaged in understanding, promoting, and conceiving sustainable practices in design, planning, and artistic production. Students from a variety of backgrounds such as design, art, planning, education, engineering, science, etc., engage in research projects and are challenged to develop individual sustainable design strategies for issues of current relevance that conserve resources,

ameliorate ecological problems, and promote social, political, and economic justice.

Coursework focuses on developing skills in modes of representation and information dissemination; foundational and emerging theoretical discourse; as well as research methods and design interventions. The degree concludes with an integrated capstone experience through a student-defined thematic project. Capstone projects are situated in different parts of the world and include themes that draw upon each student's specific area of interest while being informed by the theories, skills, methods, and tactics learned throughout the MDesSE program.

The Master of Design in Sustainable Environments degree consists of 35 credits, typically distributed over three semesters (fall, spring, and summer); however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in art (BFA, MFA), architecture (BArch, MArch), graphic design (BFA, MFA), interior design (BFA, MFA), industrial design (BID, MID), landscape architecture (BLA, MLA), community and regional planning (BSCR, MCRP, MUP), or engineering. Graduate students can also pursue the following double degrees in the College of Design: MArch/MDesSE, MCRP/MDesSE, MFA in IVA/MDesSE and MLA/MDesSE.

Urban Design

The Master of Urban Design (M.U.D.) is an advanced, interdisciplinary program of study that focuses on contemporary challenges of urbanism at local, regional and global scales. Courses are taught by faculty from Architecture, Community and Regional Planning, and Landscape Architecture; with an understanding that urban environments should be engaged through an integrated design process that includes ecological, social, material, economic, and urban policy factors.

The urban design degree reflects a deep commitment to resilient urban environments within the context of an increasingly concentrated, connected and, diverse urban world. Accordingly, the coursework engages emerging urbanization topics including:

- The formation of more adaptable, flexible and resilient cities;
- the exponential growth of megacities and steady decline of investments in traditional urban economies in the twenty-first century;
- The transformation of Industrial landscapes, particularly within the Midwestern context, and the global impact of transnational economic operations.
- the spatialization of informal economies, practices, and services across the south-north global divide;
- and, a reexamination of the potentials of hard and soft infrastructures, principles of the circular economy and a reframing of the urban-rural divide.

The program consists of 30 credits, typically distributed over three semesters (fall, spring and summer), however, students may choose to distribute these credits over four or five semesters. The degree is geared toward students with professional degrees in architecture (BArch, MArch), landscape architecture (BLA, MLA) or planning (BSCR, MCRP, MUP). Graduate students can also pursue the following double degrees in the College of Design: M Arch/MUD, MCRP/MUD and MLA/MUD.

List of Courses:

Urban Design Local Studio (URB D 501) - 6 credits

Urban Design Global Studio (URB D 502) - 6 credits

History/Theory/Criticism - 6 credits from the following list

Technology/Methods - 12 credits from the following list

History, Theory, Culture

Art and Architecture of India. (ART H 581)

Art and Theory Since 1945 (ART H 595)

Art History in Europe (ART H 592)

Contemp. Urban Design Theory (Arch 575)

Foundations of Urban Design (URB D 521)

Green Art: Earthworks and Beyond (ART H 597)

History of Chinese Architecture. F. (Arch 527)

History of Photography (ART H 596)

History of Urban Design (URB D 511)

Issues in Visual and Material Culture Seminar (ART H 501)

Methods of Urban Design Workshop (URB D 531)

Middle Eastern Cities (Arch 519)

Modern Art and Theory (ART H 588)

Nineteenth Century Art (ART H 587)

Planning in Developing Countries (C R P 529)

Planning the American Metropolis (C R P 563)

Planning Theory (C R P 561)

Seminar on the Built Environment III: Theory (ARCH 597)

Seminar on the Built Environment IV: Topical Study (ARCH 598)

Spatial Dialectics in the American Midwest (ARCH 529)

Studies in Architecture: Culture (ARCH 528A)

Theory of Urban Design (URB D 522)

Topical Studies in Landscape Architecture (LA 578)

U. S. Environmental History (ENV S 472)

Urban Design Media Workshop (URB D 532)

Urban Design Methods (URB D 533)

Women/Gender in Art (ART H 594)

Technology/Methods

Advanced Computer Lighting and Rendering (ARCH 432)

Advanced Computer-aided Architectural Design (ARCH 534)

Advanced Design Media (ARCH 436)

Advanced GIS Modeling (LA 567)

Advanced GIS Modeling (LA 567)

Advanced Three-Dimensional Studio (ARCH 535)

Analytical Planning/GIS (C R P 553)

Building Science and Technology V (ARCH 445)

Community and Regional Planning

Computer Aided Animation and Visualization (ARTIS 508)

Computer Aided Industrial Design (IND D 541)

Computer-aided Arch. and Enviro. Design (ARCH 434)

Computer/Video Game Design and Development (ARTIS 409)

Computer/Video Game Design and Development (ARTIS 509)

Design for E-Commerce/Graphic Applications (ARTGR 478)

Digital Textile Design (ARTIS 548)

File to Fabrication (ARCH 433)

Geog. Data Management and Planning Analysis (C R P 552)

Geographic Data Management and Planning Analysis (C R P 452)

GIS Programming and Automation (C R P 456)

GIS Programming and Automation (C R P 556)

Intaglio & Monotype Printmaking: Dig/Traditional (ARTIS 557)

Introduction to Research Design (DSN S 501X)

- Introduction to Web Mapping (LA 558)
- Introduction to Geographic Information Systems (C R P 551)
- Lithography: Digital / Traditional (ARTIS 558)
- Multimedia Design (ARTGR 473)
- Principles of 3D Animation (ARTIS 408)
- Principles of 3D Character Animation (ARTIS 407)
- Principles of 3D Character Animation (ARTIS 507)
- Product Realization for Industrial Design (IND D 534)
- Relief Printmaking: Digital/Traditional (ARTIS 556)
- Science and Technology for Architects I (ARCH 541)
- Seminar in GIS Applications/Research (C R P 595)
- Sustainability and Green Architecture (ARCH 558)
- Topical Studies in Landscape Architecture (LA 578G-K-L)
- Urban/Periurban Watersheds (LA 517)
- Wayfinding Design (ARTGR 479)
- Workshop: Computer Art and Design (ARTIS 493C)

COLLEGE OF ENGINEERING

W. Samuel Easterling, Dean for College of Engineering

Arun Somani, Associate Dean for Research

Sriram Sundararajan, Associate Dean for Academic Affairs

www.engineering.iastate.edu (<http://www.engineering.iastate.edu/>)

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students' critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/ Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, mechanical engineering and software engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, mechanical engineering and software engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences.

Accreditation

Twelve undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>). These twelve programs are: aerospace, agricultural, biological systems, chemical, civil, computer, construction, electrical, industrial, materials, mechanical and software engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index (<http://catalog.iastate.edu/azindex/>) for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Engineering Basic Program

Please see "Basic Program for Engineering Curricula" section.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

Engineering Minors

The College of Engineering offers four undergraduate minors which are open only to students in the College of Engineering. These are minors in biomedical engineering, energy systems, engineering sales and nondestructive evaluation. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The biomedical engineering minor is a 17 credit interdisciplinary program that complements a student's major discipline by providing additional insight into the interactions between various engineering disciplines and Biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Biomedical Engineering in Courses and Programs.

The energy systems minor is a 15 credit program that provides engineering students with focused educational opportunities in the broad area of energy systems. Students will understand broad energy perspectives, the language of energy systems and the economic, environmental, and policy issues related to energy. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Energy Systems in Courses and Programs or see <http://www.me.iastate.edu/energy-systems-minor/>.

The engineering sales minor is a 15 credit minor that complements the technical training in the student's major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) open to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

Engineering Minor (Interdisciplinary)

The College of Engineering offers undergraduate minors in wind energy and cyber security which are open to all students at ISU who meet the prerequisites. The wind energy minor is a 15 credit minor which enables students to acquire an interdisciplinary knowledge of the wind energy industry. There are two required courses; the remaining credits are chosen from a list of elective courses that are related to wind energy. The minor is administered by a supervisory faculty committee from several departments. For minor course requirements, refer to Wind Energy Minor in Courses and Programs. The cyber security minor is a 15 credit minor that is intended for students studying computer engineering, computer science, software engineering or management information systems with the goal of enabling them to work in cyber security. For minor course requirements, refer to the Cyber Security in Courses and Programs.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to provide a resource contact person for students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. Transfer students may also complete orientation online. All entering students are encouraged to attend orientation which includes meeting with an academic adviser to register for classes. Placement assessments given during the orientation program help determine the student's current level of proficiency which enables the academic adviser to prepare an appropriate course schedule for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering's International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional semester to complete curriculum requirements.

Cooperative programs are a mechanism by which a student may work full-time for one semester per academic or calendar year. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student's potential as a future full-time employee. Both domestic and international co-op programs are allowed. Cooperative education students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (398) for fall or spring and are considered full-time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for the summer.

Enrollment in the program allows students to gain practical work experience in their career field while attending college.

Internship students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (396) for the summer are considered to be full-time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index (<http://catalog.iastate.edu/azindex/>)). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Engagement. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

The College of Engineering has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study abroad, visit the Engineering International Engagement website: <http://www.engineering.iastate.edu/studyabroad/>

Engineering

Two Bachelor's Degrees versus a Degree and Second Major

A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study.

Basic Program for Engineering Curricula

The Basic Program is a set of courses that provides a foundation common to all engineering curricula. Students normally enroll in most of the Basic Program courses during their first year. Before enrolling in engineering courses at the 200-level and above, students enrolled in the College of Engineering must do the following:

1. Complete the Basic Program with a Basic Program grade point average (GPA) of at least 2.00.
2. Earn an ISU cumulative GPA of at least 2.00.

A grade of C or better is required for any transfer credit course applied to the Basic Program. Grades from transfer courses will not be used in computing the Basic Program GPA.

Students enrolled in the College of Engineering who have not met the above requirements may enroll for no more than two semesters in 200-level engineering courses. Students not enrolled in the College of Engineering may take engineering courses as long as they meet the prerequisites and space is available; only the first two semesters of engineering courses at the 200-level and above taken at ISU while a student is not enrolled in the College of Engineering can be applied toward an engineering degree.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing MATH 143 Preparation for Calculus before enrolling in MATH 165 Calculus I.

The Department of English may recommend placement in one or more sections of ENGL 099 or ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates deficiencies. Satisfactory completion of the recommended English course(s) will be required of students to complete their Basic Program.

Basic Program

(A minimum GPA of 2.00 required for this set of courses. Transfer courses are not used in the Basic Program GPA computation).

MATH 165	Calculus I	4
MATH 166	Calculus II	4
ENGL 150	Critical Thinking and Communication (Must have a C or better)	3
CHEM 167 or CHEM 177 or CHEM 201	General Chemistry for Engineering Students General Chemistry I Advanced General Chemistry	4-5
PHYS 221	Introduction to Classical Physics I	5
ENGR 101	Engineering Orientation *	R
LIB 160	Information Literacy	1
ENGR 160	Engineering Problems with Computer Applications Laboratory	3

Or one of the following in place of ENGR 160

AER E 160	Aerospace Engineering Problems With Computer Applications Laboratory
A B E 160	Systematic Problem Solving and Computer Programming
C E 160	Engineering Problems with Computational Laboratory
CH E 160	Chemical Engineering Problems with Computer Applications Laboratory

CPR E 185	Introduction to Computer Engineering and Problem Solving I
E E 185	Introduction to Electrical Engineering and Problem-Solving I
I E 148	Information Engineering
M E 160	Mechanical Engineering Problem Solving with Computer Applications
S E 185	Problem Solving in Software Engineering

Total Credits **24-25**

ENGL 250 Written, Oral, Visual, and Electronic Composition is normally taken in the second year. Credit for ENGL 150 Critical Thinking and Communication is earned upon successful completion of ENGL 250 Written, Oral, Visual, and Electronic Composition, but only when ENGL 250 Written, Oral, Visual, and Electronic Composition is completed at Iowa State.

* Students enrolled in the joint software engineering degree program should take S E 101 Software Engineering Orientation, note that ENGR 101 can be substituted for S E 101.

Engineering Courses (ENGR)

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of ENGR 160 Engineering Problems with Computer Applications Laboratory, ENGR 340 Introduction to Wind Energy: System Design & Delivery, ENGR 466 Multidisciplinary Engineering Design and ENGR 467 Multidisciplinary Engineering Design II Multidisciplinary Engineering Design II are coordinated through Engineering Student Services in Engineering Academic and Student Affairs.

ENGR 160	Engineering Problems with Computer Applications Laboratory	3
ENGR 340	Introduction to Wind Energy: System Design & Delivery	3
ENGR 466	Multidisciplinary Engineering Design	3
ENGR 467	Multidisciplinary Engineering Design II	3

Aerospace Engineering Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science. The Aerospace Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, structural, and transportation challenges play major roles.

Make To Innovate (M:2:I) is an exciting new program in the Aerospace Engineering Department that engages students in hands-on projects to augment their understanding of engineering fundamentals.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended for students who participate in alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years.

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement:

The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

The objectives of the Aerospace Engineering program at ISU are to produce graduates:

- Who actively contribute to the field of aerospace, related fields or other disciplines;
- Are critical thinkers and lifelong learners; and
- Are aware of the societal, economic and environmental impact of their work.

Curriculum in Aerospace Engineering

Leading to the degree bachelor of science.

Total credits required: 129.0.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

International Perspectives¹: 3 cr.**U.S. Diversity¹: 3 cr.****Communication Proficiency/Library requirement:**

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1
One of the following:		3
ENGL 314	Technical Communication (C or better in this course)	
ENGL 309	Proposal and Report Writing (C or better in this course)	

General Education Electives: 12.0 cr.²

Complete 12 cr. General Education Electives are requirements for graduation so may not be taken on a P-NP basis.

Basic Program: 24 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4
or CHEM 177	General Chemistry I	
ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGR 101	Engineering Orientation	R
AER E 160	Aerospace Engineering Problems With Computer Applications Laboratory ³	3
LIB 160	Information Literacy	1

----------------------	--	-----------

Aerospace Engineering Core: 44 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Core GPA):

AER E 261	Introduction to Performance and Design	3
AER E 310	Aerodynamics I: Incompressible Flow	3
AER E 311	Aerodynamics II: Compressible Flow	3
AER E 321	Flight Structures Analysis	3
AER E 331	Flight Control Systems I	3
AER E 322	Aerospace Structures Laboratory	2
AER E 344	Aerodynamics and Propulsion Laboratory	3
AER E 351	Astroynamics I	3
AER E 355	Aircraft Flight Dynamics and Control	3
AER E 411	Aerospace Vehicle Propulsion I	3
AER E 421	Advanced Flight Structures	3
AER E 461	Modern Design Methodology with Aerospace Applications	3
AER E 462	Design of Aerospace Systems	3
E M 324	Mechanics of Materials	3
M E 231	Engineering Thermodynamics I	3

Total Credits		44
----------------------	--	-----------

Other Remaining Courses: 36 cr.

ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
C E 274	Engineering Statics	3
M E 345	Engineering Dynamics	3
MAT E 273	Principles of Materials Science and Engineering	3
AER E 161	Numerical, Graphical and Laboratory Techniques for Aerospace Engineering	3
AER E 361	Computational Techniques for Aerospace Design	3
AER E 362	Aerospace Systems Integration	3
3 credits from the following		3
any AER E or EM graduate level (500+ level) course		
AER E 407	Applied Formal Methods	
AER E 412	Aerospace Vehicle Propulsion II	
AER E 417	Experimental Mechanics	
AER E 422	Vibrations and Aeroelasticity	
AER E 423	Composite Flight Structures	
AER E 426	Design of Aerospace Structures	
AER E 432	Flight Control Systems II	

AER E 433	Spacecraft Dynamics and Control	
AER E 442	V/STOL Aerodynamics and Performance	
AER E 446	Computational Fluid Dynamics	
AER E 448	Fluid Dynamics of Turbomachinery	
AER E 451	Astrodynamics II	
AER E 463	Introduction to Multidisciplinary Design Optimization	
AER E 464	Spacecraft Systems	
AER E 468	Large-Scale Complex Engineered Systems (LSCES)	
AER E 481	Advanced Wind Energy: Technology and Design	
AER E 483	Aeroacoustics	
One of the following:		3
ENGL 314	Technical Communication (Must have a C or better in this course)	
ENGL 309	Proposal and Report Writing (Must have a C or better in this course)	
Technical Electives (see below) ²		3
Career Electives (see below) ²		6
Total Credits		36

Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding Aer E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships/Flight Experience:

AER E 192	Aerospace Seminar	R
AER E 301	Flight Experience	R

Co-op and internships are optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (http://www.aere.iastate.edu/students/undergraduate_program/)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Nondestructive Evaluation (NDE)

The NDE Minor (http://catalog.iastate.edu/collegeofengineering/non_destructiveevaluationengineering/) is multidisciplinary and open to undergraduates in the College of Engineering.

Graduate Study

The department offers graduate programs that lead to the degrees master of engineering, master of science, and doctor of philosophy with major in aerospace engineering and minor work to students taking major work in other departments. For all graduate degrees, it is possible to establish a co-major program with another graduate degree-granting department. Within the aerospace program, students can specialize in one or more of the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

Master of Science and Master of Engineering

The Master of Science degree requires a thesis and has strong research emphasis. The Master of Science degree is recommended for students who anticipate entering a doctoral program later. The Master of Engineering degree does not require either research credits or a thesis and is intended for students who do not anticipate pursuing a doctoral degree. The Master of Engineering degree can be completed with coursework only or with a combination of coursework and creative component. Credits for creative component will be obtained by registering for **AerE 599 Creative Component**. A written report and an oral presentation will be given to the student's graduate committee.

At least 30 credits of acceptable graduate work are required for both the Master of Science and the Master of Engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (<http://www.aere.iastate.edu/files/2015/04/AerE-Graduate-Handbook-Revised-S15.pdf>).

Bachelor of Science/Master of Science Concurrent Degree Program

The department offers concurrent BS/MS and BS/ME degree programs (<http://www.aere.iastate.edu/students/concurrent-degrees/>) and a concurrent BS/MBA degree program which offer an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master's degree before completing a bachelor's degree. The concurrent degree programs reduce by one year the normal time period for completing both degrees separately.

Preparation for Graduate Work

The normal prerequisite for major graduate work in aerospace engineering is the completion of an undergraduate curriculum substantially equivalent to that required of aerospace engineering students at this university. Due to the diversity of interests of aerospace faculty, students whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite aerospace background. A prospective graduate

student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses are offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Graduate Minor Work

Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

Agricultural Engineering

For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science. The Agricultural Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

Goal: To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their agricultural engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a bachelor of science curriculum in biological systems engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in

the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. A concurrent bachelor of science and master of business administration program is also offered by the department. Refer to Graduate Study for more information.

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 126.0cr Land and Water Resources Engineering Option, 128.0cr Power and Machinery Engineering Option, 128.0cr Animal Production Systems Engineering Option.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement :

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1
Communication Elective: One of the following (Must have a C or better in this course)		3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
MKT 450	Advanced Professional Selling	
SP CM 212	Fundamentals of Public Speaking	
SP CM 312	Business and Professional Speaking	

Social Sciences and Humanities: 12 cr. ^{1,2}

3 credits from international perspectives-university approved list	3
3 credits from U.S. diversity-university approved list	3
6 credits from Social Sciences and Humanities courses-department approved list	6
Total Credits	12

Basic Program: 24 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program

in College of Engineering Overview section. Within the Agricultural Engineering Basic Program, students are required to complete CHEM 167 and CHEM 167L or the sequence of CHEM 177, CHEM 177L, and CHEM 178. This is a departmental requirement within the College of Engineering Basic Program requirements. CHEM 178 credits can then be applied to the Math/Science Elective within the options of Power and Machinery Engineering and Animal Production Systems Engineering of the Agricultural Engineering major requirements.

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at <http://www.abe.iastate.edu/>. (<http://www.abe.iastate.edu/>)

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

Biological Systems Engineering

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

Goal: To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to

prepare students for professional practice and post-graduate educational opportunities.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent bachelor of science and master of business administration program is also offered by the department.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index (<http://catalog.iastate.edu/azindex/>)).

Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required:

128.0 cr Biorenewable Resources Option

127.0 cr Bioenvironmental Engineering Option

128.0 cr Food Engineering Option

128.0 cr Open Option.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150 Critical Thinking and Communication (Must have a C or better in this course) 3

ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1
Communication Elective: One of the following (Must have a C or better in this course)		3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
MKT 450	Advanced Professional Selling	
SP CM 212	Fundamentals of Public Speaking	
SP CM 312	Business and Professional Speaking	

Social Sciences and Humanities: 12 cr.^{1,2}

3 credits from international perspectives-university approved list 3

3 credits from U.S. diversity-university approved list 3

6 credits from Social Sciences and Humanities courses-department approved list 6

Total Credits 12

Basic Program: 24 cr.

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section. Within the Biological Systems Engineering Basic Program, students are required to complete CHEM 167 and CHEM 167L or the sequence of CHEM 177, CHEM 177L, and CHEM 178. This is a departmental requirement within the College of Engineering Basic Program requirements. The CHEM 178 course will show as completing the chemistry portion of the Basic Program and the credits will be applied towards a student's classification.

A B E 160	Systematic Problem Solving and Computer Programming ³	3
CHEM 167	General Chemistry for Engineering Students or CHEM 177 and CHEM 178	4
ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

U.S. Diversity, International Perspectives and Social Science/ Humanities courses may not be taken Pass/Not Pass.

2. Choose from department approved list. (<http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula/>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at <http://www.abe.iastate.edu/>.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

Biomedical Engineering Undergraduate Study

Minor supervised by an interdisciplinary faculty committee, administered by the Chemical and Biological Engineering Department. The Biomedical Engineering minor is a unique opportunity for engineering students to acquire a multi-disciplinary engineering and life sciences background for entering the field of biomedical engineering.

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core biology and engineering relevant to further study in biomedical engineering along with an introduction to the application of engineering principles to biomedical problems from a multidisciplinary perspective as well as the applications within the majors of the participating departments. Minor requirements are as follows:

A minimum of 17 cr. meeting the six requirements below with a minimum of 9 of those credits not being used to meet degree requirements and a minimum of 6 cr. at the 300 level or above. No more than 3 cr. of 490 credit may be applied to this minor.

BIOL 212	Principles of Biology II	3
B M E/CH E 220	Introduction to Biomedical Engineering	3
BIOL 256	Fundamentals of Human Physiology	3
or BIOL 335	Principles of Human and Other Animal Physiology	
Introductory Engineering Elective *		3
Advanced Engineering Elective **		3
Professional Elective ***		2-3
Total Credits		17-18

*A second (Introductory) engineering course from a department other than that of your major. The topic of the course should have ready application to later B M E-related electives in that discipline (C E 274; CH E 210; CPR E 281; E E 201, 314, or 442 and 448; E M 324 or 378; MAT E 273; M E 231; or other courses approved by Minor Chair).

** 300-500 level engineering course with clear biomedical engineering application (B M E 490, B M E/E E 341, 450; B M E/CH E 440; B M E/MAT E 456; I E 571; M E 550 or other courses approved by Minor Chair).

*** 300-500 level engineering or life sciences course with clear biomedical engineering application OR B M E 490 OR departmental 490 with biomedical engineering topic OR 200+ level life sciences laboratory course (If a 200-level course is chosen here, the student will need to meet the required 6 cr. of 300+ courses by substitution of a higher-level course for the other requirements or by taking an additional course.), OR 300-500 level B M E course.

Chemical Engineering

<http://www.cbe.iastate.edu/>

Administered by the Department of Chemical and Biological Engineering

For undergraduate curriculum in chemical engineering leading to the degree bachelor of science. The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products; chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer's influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass

transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates who have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments; and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and societal context, and recognition of the need for, and an ability to engage in life-long learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

Program Educational Objectives

The objectives of the Chemical Engineering Program at Iowa State University are to produce graduates who:

- will excel in careers as professional chemical engineers in the businesses and industries related to chemical engineering; and
- will successfully pursue research and advanced studies in chemical engineering, or in related fields such as chemistry or biology, or in related professional fields such as medicine, law, and business.

Cooperative Education

A cooperative education program is available to students in chemical engineering.

Curriculum in Chemical Engineering

Administered by the Department of Chemical and Biological Engineering

Leading to the degree bachelor of science.

Total credits required: 129 cr. See also Basic Program and Special Programs.**International Perspectives: 3 cr.**¹**U.S. Diversity: 3 cr.**¹**Communication Proficiency/Library requirement:**

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3

Total Credits		24

SEMINARS/CO-OPS/INTERNSHIPS:

Co-op/Internship is optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (<http://www.cbe.iastate.edu/current-students/guides-and-handbooks/>).
3. See Basic Program for Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. Students who substitute CHEM 201/201L credit for CHEM 177/CHEM 177L/CHEM 178L credit cannot also receive credit for CHEM 178. Credit for CHEM 178 must be earned through an Advanced Chemistry Elective² that is taken in addition to the 3 credits of Advanced Chemistry required for all students.

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in this category at the 300-level or above to qualify for the B.S. degree in chemical engineering.

Pass-Not Pass Policy

A maximum of nine Pass-Not Pass semester credits may be used to meet graduation requirements. Courses offered on a Satisfactory-Fail basis may not be taken on a Pass-Not Pass basis. Pass-Not Pass credits can be applied toward requirements for a B.S. degree in chemical engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not Pass credits are not acceptable for technical elective courses or for courses used to satisfy the US diversity or international perspectives requirements.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor's degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the master of science degree. The master of science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework, 12

within Ch E and 3 outside). The master of engineering requirements are the same for total credits but include a special project or coursework rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework, at least 16 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree can refer to the department's home page and/or the department's Graduate Student Handbook for degree options and credit requirements.

Well-qualified juniors and seniors in chemical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.

Civil Engineering

<http://www.ccee.iastate.edu/>

Administered by the Department of Civil, Construction and Environmental Engineering

For undergraduate curriculum in civil engineering leading to the degree bachelor of science. The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Civil engineers apply principles of motion and materials to plan, design, construct, maintain, and operate public and private facilities, while working under economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, waste management, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes planning, designing, and executing surveying operations and locating, delimiting, and delineating physical and cultural features on the earth's surface. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on campus is supplemented by inspection trips, which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health; providing an ample safe water supply; managing solid and hazardous waste; treating and disposing of domestic and industrial wastewaters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and controlling water quality, soil contamination, and air pollution. The environmental option for the civil engineering degree replaces some of the courses and electives in the general curriculum with further courses in chemistry, biology, and microbiology as well as specific topics in environmental engineering and design.

The civil engineering curriculum equips students with a broad education that includes technical skills in analysis and design and professional practices such as communication, teamwork, leadership, and ethics.

Program educational objectives: By three to five years after graduation, graduates of the civil engineering program will have:

1. Pursued successful careers and expertise in civil engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment and study abroad programs. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and either a master of science in Civil Engineering or a master of business administration in the College of Business Administration. These students would have an the opportunity to graduate in five years with both degrees.

Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 129. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.

Communication Proficiency/Library requirement

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1

Social Sciences and Humanities: 12 cr.²

Complete 12 cr. with 6 cr. at 200-level or above.

Basic Program: 24 cr.³

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

Graduate Study

The Department of Civil, Construction and Environmental Engineering offers graduate programs for the degrees of master of engineering, master of science, and doctor of philosophy with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, transportation engineering, and intelligent infrastructure engineering. The department also offers graduate minors of 9 to 15 credits of coursework to students from other engineering departments.

Candidates for the degrees of master of engineering and master of science are required to complete a total of 30 acceptable graduate credits. The master of engineering degree involves all course work. The master of science degree requires the preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree are required to complete a minimum of 72 acceptable graduate credits. Normal prerequisite for major graduate work in civil engineering is the completion of an undergraduate curriculum substantially equivalent to that required of engineering students at this university. Due to the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student's background and area of interest. The department participates in the interdepartmental graduate programs in transportation, environmental science, wind energy science, engineering and policy and biorenewable resources and technology.

The department also offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 graduate credits (nine credits of "core courses" and three credits of approved "elective courses").

The environmental engineering or environmental systems certificate requires 12 graduate credits (six credits of "core courses", six credits

of approved "elective courses") and a seminar course or an approved equivalent.

Additional information about graduate programs, research and admission criteria are available on the department's website <http://www.ccee.iastate.edu/academics/graduate/>.

Computer Engineering

www.ece.iastate.edu (<http://www.ece.iastate.edu>)

Administered by the Department of Electrical and Computer Engineering

For the undergraduate curriculum in computer engineering leading to the degree Bachelor of Science. The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software systems, embedded systems, networking, information security, computer architecture, and VLSI.

Students also may take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

The program objectives for the computer engineering programs describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the computer engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of computer and software systems, including system integration and implementation.

- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Curriculum in Computer Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 127

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1

Seminar/Co-op/Internships:

CPR E 166	Professional Programs Orientation	R
CPR E 294	Program Discovery	R
CPR E 394	Program Exploration	R
CPR E 494	Portfolio Assessment	R

Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.

2. From department approved lists. (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements/>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The Master of Engineering degree is course-work only. It is recommended for off-campus students.

The Master of Science degree with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers three graduate certificate programs in embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student's undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering also is a participating department in the interdepartmental certificate, Master of Engineering, and Master of Science in Information Assurance programs. Students interested in studying information assurance topics may earn a

degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering

The curriculum in construction engineering, leading to a bachelor of science degree can be referenced here: <http://catalog.iastate.edu/collegeofengineering/constructionengineering/#curriculumtext>. The Construction Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Program educational objectives: By three to five years after graduation, graduates of the construction engineering program will have:

1. Pursued successful careers and expertise in construction engineering or a related profession.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess a strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical, or electrical

construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer's plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by encouraging students to:

- interact with practicing professionals
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers
- develop leadership skills by participating in student organizations
- develop, analyze, and interpret alternative solutions to open-ended problems
- study abroad

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student's perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study abroad programs.

Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering (<http://www.ccee.iastate.edu/academics/graduate/>) Graduate Study for more information.

Curriculum in Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering; leading to the degree bachelor of science.

Total credits required: Building Option -128.0, Heavy Option - 127.0, Electrical - 127.0, Mechanical - 127.0 cr.

The Construction Engineering program requires a grade of a C or better for any transfer credit course that is applied to the degree program (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirements:

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1
Business Communication Elective: one course of the following with a minimum grade of C.		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	

Total Credits **10**

Social Sciences and Humanities: 12 cr.

One of the following		3
PSYCH 101	Introduction to Psychology	
PSYCH 230	Developmental Psychology	
PSYCH 250	Psychology of the Workplace	
PSYCH 280	Social Psychology	
SOC 134	Introduction to Sociology	
ECON 101	Principles of Microeconomics	3
or ECON 102	Principles of Macroeconomics	
International Perspectives ¹		3
U.S. Diversity ¹		3

Total Credits **12**

Basic Program: 24 cr.³

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil,

Construction and Environmental Engineering. This specialization focuses on project management including and beyond the traditional iron triangle of scope, technical, and schedule to include context and financing, enabling project management of more complex projects. Three graduate degrees including, Master of Engineering (30 credits), Master of Science (30 credits), and Doctor of Philosophy (72 credits) are offered. The Master of Engineering degree is a coursework only option and the other degree programs require a research component at a level adjusted to the degree sought. All degrees are offered on-campus and some degrees may be completed off-campus through distance education. All degrees require C E 501, C E 502, C E 503, and six to nine credits additional credits. Course options include but are not limited to:

C E 501	Preconstruction Project Engineering and Management	3
C E 502	Construction Project Engineering and Management	3
C E 503	Construction Finance and Business Management	3
C E 505	Design of Construction Systems	3
C E 594A	Special Topics Construction Engineering and Mgt.: Planning and Scheduling	3
C E 594L	Spl Topics Construction Engr and Mgt.: Adv Building Construction Topics - LEED for New Construction	3
C E 594N	Special Topics Construction Engineering and Mgt.: Industrial Construction	3
C E 594O	Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction	3
C E 594P	Special Topics Construction Engineering and Mgt.: Advanced Building Energy Systems and Technologies	3

Undergraduate students may also qualify for the concurrent bachelor of science/master of science (BS/MS) degree program. Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs. A graduate certificate is also available which requires 12 credits of coursework. Courses required for the certificate are C E 501, C E 502, and C E 503. For additional information see Civil Engineering, Graduate Programs, <https://www.ccee.iastate.edu/academics/graduate/>.

Cyber Security Engineering

[www.ece.iastate.edu \(http://www.ece.iastate.edu/\)](http://www.ece.iastate.edu/)

Administered by the Department of Electrical and Computer Engineering

For the undergraduate curriculum in cyber security engineering leading to the degree Bachelor of Science.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of cyber security engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The program objectives for the cyber security engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for the program.

The objectives of the cyber security engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** in computer security principles together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and operation of the physical, software and human components of a system, including system integration and implementation.
- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world.

Well-qualified juniors and seniors in cyber security engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.

Curriculum in Cyber Security Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 125

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.
2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
3. From department approved lists. (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements/>)
4. Co-op / Internships are optional

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Cyber Security Minor

The minor is intended for students studying computer engineering, computer science, software engineering, or management information systems with the goal of enabling them to work in cyber security. The minor consists of a series of lab based courses that are designed to provide students with both the technical background and the hands-on experiences along with the theoretical background to allow them to compete for jobs in cyber security.

The minor requires 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Below is the list of courses used in the minor.

Core

CPR E 230	Cyber Security Fundamentals	3
CPR E 231	Cyber Security Concepts and Tools	3
CPR E 331	Application of Cryptographic Concepts to Cyber Security	3
Plus one of the following (3-4 cr.)		3
CPR E 308	Operating Systems: Principles and Practice	
COM S 252	Linux Operating System Essentials	

COM S 352	Introduction to Operating Systems	
One Elective Course ¹		3
Total Credits		15

1. From department approved lists.

Objectives

The minor in cyber security is designed to prepare students with the technical skills for entry into cybersecurity positions in industry or government agencies.

A few years after graduation, students completing the cyber security minor should be:

- Contributing to their communities and society in the area of cyber security technology and applications and demonstrating an understanding of contemporary security issues, both technological and societal.
- Advancing in their careers through application of their knowledge of cyber security
- Working effectively as team members and demonstrating ethics and responsible behavior
- Applying cyber security methods and concepts to the general area of their BS degree
- Continuing their professional development through life-long learning

Learning Outcomes

After earning the minor in cyber security students will

- Demonstrate the ability to apply knowledge of cyber security concepts, tools and technologies to computer systems.
- Understand cyber security risks, threats and countermeasures and apply this understanding to develop cyber defense strategies.
- Demonstrate the ability to design cyber security systems to meet organizational needs within realistic constraints such as economic, environmental, social, and ethical expectations.
- Demonstrate the ability to function on teams.

Electrical Engineering

For the undergraduate curriculum in electrical engineering leading to the degree Bachelor of Science. The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and prepare for the practice of electrical engineering. The student-

faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective courses in computer networking, security, computer architecture, digital systems, and software.

The program objectives for the electrical engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the electrical engineering program at ISU are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of electrical and electronic devices and systems.
- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship

program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Courses for students who are not in the electrical engineering program: E E 442 Introduction to Circuits and Instruments, E E 448 Introduction to AC Circuits and Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Curriculum in Electrical Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 128. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

E E 494	Portfolio Assessment	R
---------	----------------------	---

Co-op or internship is optional

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. From department approved lists (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements/>).

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in power systems engineering.

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student's undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental graduate minor in complex adaptive systems. Students interested in this program should see the Complex Adaptive Systems section of the catalog for requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the

Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's website.

Energy Systems Minor

Energy Systems Minor

Energy systems are pervasive in our society. A list of energy-related subjects and applications in the engineering curriculum would be nearly endless, but here are some examples:

- Mechanical engineers have a core area in thermo-fluids where courses in thermodynamics, fluid mechanics, and heat transfer form a base for energy systems.
- Electrical engineers address power transmission and distribution as well as electric motors and power systems.
- Civil engineers develop structures for wind turbines and hydroelectric dams.
- Construction engineers need to understand how building systems impact energy utilization.
- Chemical engineers develop alternative fuels and clean burning technologies.
- Material engineers develop new materials for batteries and fuel cells.
- Aerospace engineers develop wind turbines.
- Industrial engineers address manufacturing efficiency and energy reduction.
- Agricultural engineers develop biorenewable energy sources.

Energy systems are also a significant focus of the grand challenges of engineering (<http://www.engineeringchallenges.org/>), and this minor will help our students address these issues in their engineering careers.

The goal of the minor in energy systems is to provide ISU engineering students with focused educational opportunities in the broad area of energy systems. Successful energy systems minor students will understand broad energy perspectives, the language of energy systems, and the economic, environmental, and policy issues related to energy in the two required courses (six credits) for the minor (Econ 380 and EE 351 OR ME 433). *Note that credit for both EE 351 and ME 433 is no longer accepted.* The remaining nine credits in the minor can be selected from a list of approved engineering courses related to energy systems to give students the opportunity to extend their knowledge.

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following course list. The minor must include at least 9 credits

that are not used to meet any other department, college, or university requirement. A complete list of approved elective courses can be found below.

Required Courses

ECON 380	Energy, Environmental and Resource Economics	3
E E 351	Analysis of Energy Systems	3
or M E 433	Alternative Energy	
Electives: Choose from list of approved courses as outlined below		9

 NUC E 461 Radiation Detection, Measurement and Simulation
<http://www.me.iastate.edu/energy-systems-minor/>

Engineering Mechanics

Administered by the Department of Aerospace Engineering

Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media,

deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers graduate programs that lead to the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and has strong research emphasis. The master of science degree is recommended for students who anticipate entering a doctoral program later. The master of engineering degree does not require either research credits or a thesis. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

The master of engineering degree does require a creative component which will be obtained by registering for E M 599 Creative Component. A written report and an oral presentation will be given to the student's graduate committee.

At least 30 credits of acceptable graduate work are required for both the master of science and the master of engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (<http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf>).

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Engineering Sales Minor

With approximately 15% of engineering job postings involving product sales, marketing or customer field support, a minor in engineering sales can be a critical step towards a great job offer. Besides being one of the best paid positions in engineering, technical sales offers substantial travel opportunities and the ability to solve customers' engineering

problems in the field working with people. Talk to your adviser to see how just a few additional courses could fit into your schedule and fast-track your job prospects.

To fill this need, the Department of Industrial and Manufacturing Systems Engineering has developed a minor in sales engineering. The engineering sales minor is a 15 credit minor that complements the technical training in the student's major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is available only to engineering students and is administered by a supervisory faculty committee. No more than 6 of the 15 credits can be used to meet any other department, college or university requirements.

Requirements:

- I E 450 Technical Sales for Engineers I
- I E 451 Technical Sales for Engineers II
- Mkt 340 Principles of Marketing
- Mkt 442 Sales Management, or Mkt 447 Consumer Behavior or Mkt 450 Advanced Professional Selling

AND

One of the following:

- I E 305 Engineering Economic Analysis
- Fin 301 Principles of Finance
- C E 206 Engineering Economic Analysis and Professional Issues in Civil Engineering

The objectives of the minor are to provide a broad understanding of the technical sales process, primarily from the business-to-business perspective. At the conclusion of the minor, students will be able to:

- Calculate a return on investment and communicate this to the customer
- Determine payback period for a given solution and communicate this to the customer
- Perform a market segmentation
- Develop a client value analysis
- Perform prospecting and business-to-business marketing
- Identify decision makers and processes
- Manage a sales process
- Use sales automation software
- Apply knowledge of underlying international sales issues
- Prepare written and verbal sales presentations
- Provide information about product/service pricing
- Lead a team selling process
- Establish sales channel management procedures
- Develop sound distribution strategies and global sales processes

- Formulate bid strategies/negotiation strategies
- Employ good time management skills

Those students interested in pursuing this minor should contact an academic adviser in their home department and fill out a REQUEST FOR MINOR form. Evaluation of all students requesting this minor will be conducted in the Department of Industrial and Manufacturing Systems Engineering. Any questions should be directed to Ms. Devna Popejoy-Sheriff at devna@iastate.edu.

Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering

The undergraduate curriculum in industrial engineering leads to the degree Bachelor of Science.

The Industrial Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Industrial Engineering (IE) Program educates its future graduates to accomplish its program educational objectives (PEO's) in their early careers. Specifically, the IE Program prepares its majors so that, within a few years after graduation, graduates' attainments are

1. effective industrial engineering solutions and appropriate communications with stakeholders regarding such solutions.
2. contributions to team goals through productive team interactions and leadership.
3. new skills and knowledge that advance professional practice and enable career advancement.

Details on industrial engineering program outcomes that foster the attainment of these objectives are available at appropriate sections of: www.imse.iastate.edu (<http://www.imse.iastate.edu>)

The industrial engineering undergraduate curriculum provides students with fundamental knowledge in mathematics and science, engineering science, social science, and humanities as well as professional industrial engineering course work. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships.

Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. or M.Eng. degrees in Industrial Engineering, or B.S. and M.B.A. degrees.

Engineering Sales Minor

The Engineering Sales Minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor requires 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

I E 450	Technical Sales for Engineers I	3
I E 451	Technical Sales for Engineers II	3
MKT 340	Principles of Marketing	3
MKT 450	Advanced Professional Selling	3
And one of the following:		3
I E 305	Engineering Economic Analysis	
FIN 301	Principles of Finance	
Total Credits		15

Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 122 cr. See also Basic Program and Special Programs. Grades of C or better are required for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirements:

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1

Remaining Communication courses: 9 cr.

ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or Better in this course)	3
SP CM 212	Fundamentals of Public Speaking	3
ENGL 314	Technical Communication	3
Total Credits		9

Social Sciences and Humanities Electives: 12 cr. ²

Six of twelve credits must be from 200-level or above courses. Six credits must be sequential or related courses.

Basic Program: 24 cr. ³

A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4
ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3

GRADUATE STUDY

The department offers programs for the degrees Master of Engineering (M.Eng.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) with a major in industrial engineering. A minor is available to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in industrial engineering. The M.S. and Ph.D. degrees are designed to improve the student's capability to conduct research as well as advancing their professional expertise. In conjunction with the Department of Mechanical Engineering, the department offers a certificate in advanced manufacturing.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution. Because of the diversity of industrial engineering topics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering; e.g., mathematics or physics. However, completion of a math sequence of calculus through differential equations is expected.

The graduate program offers advanced study in advanced manufacturing, ergonomics/human factors, operations research/analytics, systems engineering and engineering management.

Well-qualified juniors and seniors in industrial engineering who are interested in graduate study may apply for concurrent enrollment to simultaneously pursue both the industrial engineering bachelor's degree

and an M.Eng or M.S. degree. Another attractive concurrent degree option is the industrial engineering bachelor's degree concurrent with a Master of Business Administration degree from the business college. For additional information about graduate degree programs, admission criteria, and procedures refer to <https://www.imse.iastate.edu/graduate-program/>.

Materials Engineering

For the undergraduate curriculum in materials engineering leading to the degree bachelor of science. The Materials Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>. Materials engineering is a broadly-based discipline relating the composition, structure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), nanotechnologies, consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

The objectives of the materials engineering program are to produce graduates who:

- practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
- engage in advanced study in materials and related or complementary fields

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates have the opportunity to gain experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research. Graduates can develop a global perspective of engineering through various study abroad opportunities supported by the department. Classes provide hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include

fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, design, and professional practice experience. Students tailor their programs to their goals and interests through the selection of a specialization from the three available: ceramic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3

MAT E 413	Materials Design and Professional Practice I	3
MAT E 414	Materials Design and Professional Practice II	3
MAT E 418	Mechanical Behavior of Materials	3

Students must choose one from the three areas of specialization (12 cr.): ceramic, metallic and polymeric materials.

Total Credits **44**

The courses below meet the specialization requirement. Students select one of the following tracks (ceramics, metals, polymers):

Ceramic Materials:

MAT E 321	Introduction to Ceramic Science	3
MAT E 322	Introduction to Ceramic Processing	3
MAT E 425	Glass Science and Engineering	3
MAT E 433	Advanced Ceramics and Electronic Materials	3

Metallic Materials:

MAT E 341	Metals Processing	3
MAT E 342	Structure/Property Relations in Nonferrous Metals	3
MAT E 443	Physical Metallurgy of Ferrous Alloys	3
MAT E 444	Corrosion and Failure Analysis	3

Polymeric Materials:

MAT E 350	Polymers and Polymer Engineering.	3
MAT E 351	Introduction to Polymeric Materials	3
MAT E 453	Physical and Mechanical Properties of Polymers	3
MAT E 454	Polymer Composites and Processing	3

Other Courses: 24 cr.

STAT 305	Engineering Statistics	3
In-department electives from list of materials courses ²		6
Technical electives from approved departments ²		12
Non-remedial course ²		3

Total Credits **24**

Seminar/Co-op/Internships

Co-op and internships are optional

MAT E 301	Materials Engineering Professional Planning	R
-----------	---	---

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list (<https://www.mse.iastate.edu/files/2019/08/UG-HANDBK-2019-2020-revised-08-19-19.pdf>).

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used

to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

Areas of specialization:

- Ceramic Materials: 321, 322, 425, 433
- Metallic Materials: 341, 342, 443, 444
- Polymeric Materials: 350, 351, 453, 454

Well qualified students in materials engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College. This allows senior-level students to simultaneously pursue both bachelor of science and master of science degrees. See Materials Science and Engineering for more information.

Materials Science and Engineering Graduate Study

Built on a foundation of thermodynamics, kinetics of phase transformations, mechanical behavior, physical properties, solid state science, and the structure and chemistry of materials, the graduate program offers advanced studies in many areas of materials science and engineering, including the design and control of materials for structural, electronic, photonic, magnetic, optical, and biological functionality. Graduates of the program have a fundamental understanding of the critical aspects of the field and how they are applied to real materials systems. The program is highly flexible and research-oriented, where students work carefully with their major professor in tailoring the various academic and research components to meet their interests.

With the ability to address complex problems in materials science while considering the various constraints inherent to both academic and industrial environments, our graduates are well prepared for a wide range of academic and research-related careers. They are skilled in carrying out independent and collaborative research, able to communicate effectively in formal and informal settings, and are proficient at writing persuasive technical articles and grant proposals.

The department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, the Center for Advanced Nonferrous Structural Materials, the Caloric Materials Consortium, and the Critical Materials Institute. These laboratories offer excellent resources and opportunities for graduate student research.

Graduate Majors

The department offers work toward the following advanced degrees: Master of Engineering in Materials Science and Engineering, Master of

Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of science degrees.

The requirements for the M. Eng., M.S. and Ph.D. degrees are established by the student's program of study (POS) committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research (M.S. and Ph.D. only), proposal (M.S. and Ph.D. only), preliminary oral examination (Ph.D. only), dissertation (M.S. and Ph.D. only), and a final oral examination (M.S. and Ph.D. only).

Academic requirements include 30 credits for the M.Eng. degree, 33 credits for the M.S. degree (18 credits of coursework, 3 credits of professional development, 12 credits of research), and 72 credits for the Ph.D. degree (27 coursework, 6 professional development, 36 credits of research, 3 additional course or research). The MSE Department offers a graduate minor in Materials Science and Engineering. The graduate minor requires 12 credits of MSE graduate coursework, including 6 credits selected from MSE 510, 520, 530, and 540. In addition, the minor program requires that the POS committee includes at least one member of the MSE Graduate Faculty. There are no foreign language requirements for any of the graduate degrees administered by the Department of Materials Science and Engineering.

Mechanical Engineering

For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science. The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing devices and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are used in research, development, design, testing, production, technical sales, technical management, as well as medicine, law, and business. Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Mechanical engineers are employed in a wide range of industries;

examples include agricultural/heavy equipment, biomedical, consulting, energy and power, manufacturing, product design and transportation.

The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:

1. Graduates will have utilized a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will have become effective collaborators and innovators, leading or participating in efforts to address social, technical and business challenges.
3. Graduates will have engaged in life-long learning and professional development through self-study, continuing education or graduate and professional studies in engineering, business, law or medicine.

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. The mechanical engineering disciplinary areas emphasized are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student's unique educational goals, whether they include immediate entry into industry or further professional or graduate study.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum. Students also develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.

Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Curriculum in Mechanical Engineering

Administered by the Department of Mechanical Engineering. Leading to the degree bachelor of science.

Total credits required: 129 cr.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

- These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
- Choose from department approved list of technical electives (<http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/tech-electives/>) and general education electives (<http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/general-education/>). Note: electives used to meet graduation requirements may not be taken Pass-Not Pass (P-NP).
- See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Transfer Credit Requirements

The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program.

The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, 3 must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level M E technical electives. No more than 3 credits of independent study shall be applied to meet the 12 credit requirement.

See also: A 4-year plan of study grid showing course template by semester.

Energy Systems Minor

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found below. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

<http://www.me.iastate.edu/energy-systems-minor/>

Graduate Study

The department offers programs for the degrees Master of Engineering (M. Eng.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the student's capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

Well-qualified juniors and seniors in mechanical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Graduate Programs Office and on the department's website (<http://www.me.iastate.edu/>).

The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student's program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.

Program requirements can be found on the department webpage (<http://www.me.iastate.edu/>) and in the Mechanical Engineering Graduate Student Handbook.

Non-destructive Evaluation Engineering Minor

Minor supervised by an interdisciplinary faculty committee, administered by Aerospace Engineering. The NDE minor is a unique opportunity for engineering students to acquire a multidisciplinary engineering qualification in the rapidly evolving field of Nondestructive Evaluation.

Undergraduate Study

Students interested in completing the NDE engineering minor must be enrolled in the College of Engineering at Iowa State University. They must submit the "Request for Minor" form and complete the minimum prescribed 16 credit-hours of course work defined below. Acceptance is based on approval by the administering department, Aerospace Engineering.

A combined average grade of C or higher is required in courses applied to the minor. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The course requirements for the undergraduate minor in NDE are:

MAT E/E M 362	Principles of Nondestructive Testing	3
MAT E/E M 362L	Nondestructive Testing Laboratory	1
At least one of the following NDE specific courses		3-4
C E 449	Structural Health Monitoring	
M S E/E M 550	Nondestructive Evaluation	
MAT E 488	Eddy Current Nondestructive Evaluation	
E M 480	Ultrasonic Nondestructive Evaluation	
AER E 429X	Penetrating Radiation Methods in Nondestructive Evaluation	

Independent Study courses on NDE projects from other engineering disciplines will need to be approved by the NDE Minor Coordinator

AER E 490J	Aerospace Engineering Independent Study: Non-destructive Evaluation (Research Topic related to NDE for any 490)	
or E E 490	Independent Study	
or M E 490	Independent Study	
or MAT E 490	Independent Study	

Up to three of the following or additional NDE specific courses from the list above

AER E 321	Flight Structures Analysis	
AER E 421	Advanced Flight Structures	
AER E 423	Composite Flight Structures	

E E 418	High Speed System Engineering Measurement and Testing
E E 224	Signals and Systems I
CPR E 418	High Speed System Engineering Measurement and Testing
I E 348	Solidification Processes
I E 361	Statistical Quality Assurance
STAT 231	Probability and Statistical Inference for Engineers
STAT 305	Engineering Statistics
STAT 322	Probabilistic Methods for Electrical Engineers
AER E 422	Vibrations and Aeroelasticity
AER E 426	Design of Aerospace Structures
E M 424	Intermediate Mechanics of Materials
E M 425	Introduction to the Finite Element Method
M E 417	Advanced Machine Design
M E 418	Mechanical Considerations in Robotics
MAT E 418	Mechanical Behavior of Materials
MAT E 443	Physical Metallurgy of Ferrous Alloys
MAT E 444	Corrosion and Failure Analysis

Total Credits

16-20

Software Engineering

For the undergraduate curriculum in Software Engineering (<http://www.se.iastate.edu>) leading to the degree Bachelor of Science. The Software Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Bachelor of Science degree in software engineering is jointly administered by the College of Engineering and the College of Liberal Arts and Sciences. The Software Engineering program provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of state-of-the-art software technologies and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers many elective choices in software engineering. Students may also take elective courses in computer engineering and computer science.

Program Educational Objectives

Within five years of graduation, the graduates should:

1. attain a **productive career** in Software Engineering or related fields;

2. attain **leadership** roles and become **effective collaborators** to advance professional and organizational goals;

3. engage in **lifelong learning** and professional development;

4. encourage and support **diversity** and **inclusiveness** in their workplace.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) *peer-recognized expertise*, (b) *engagement in professional practice*, (c) *sustained learning*, (d) *leadership* and (e) *teamwork*.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the College of Engineering and the College of Liberal Arts and Sciences provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

The Software Engineering program is an interdisciplinary program delivered jointly by the College of Engineering and the College of Liberal Arts & Sciences.

Leading to the degree bachelor of science.

Total credits required: 125 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
Choose one of the following:		3
ENGL 309	Proposal and Report Writing (C or better in this course)	
ENGL 314	Technical Communication (C or better in this course)	
Total Credits		10

General Education Requirements: 24 cr.²

Arts and Humanities		6
Social Sciences		3
Additional Arts and Humanities or Social Sciences course		3
Choose 1 course from the following:		3
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
I E 305	Engineering Economic Analysis	
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
Choose one of the following ENGL courses (C or better in this course)		3
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
SP CM 212	Fundamentals of Public Speaking	3
Total Credits		24

Basic Program: 24 cr.

A minimum GPA of 2.00 is required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4
or CHEM 177	General Chemistry I	
ENGL 150	Critical Thinking and Communication (C or better in this course)	3
S E 101	Software Engineering Orientation ³	R
S E 185	Problem Solving in Software Engineering ³	3
LIB 160	Information Literacy	1

MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 221	Introduction to Classical Physics I	5
Total Credits		24

Math and Physical Science: 17 cr.

COM S 227	Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
MATH 267	Elementary Differential Equations and Laplace Transforms	4
Math Elective: Choose one of the following:		3
MATH 207	Matrices and Linear Algebra	
MATH 265	Calculus III	
MATH 304	Combinatorics	
MATH 314	Graph Theory	
MATH 317	Theory of Linear Algebra	
STAT 330	Probability and Statistics for Computer Science	3
Total Credits		17

Software Engineering Core: 37 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Core GPA):

CPR E 281	Digital Logic	4
Choose one of the following:		3
COM S 327	Advanced Programming Techniques	
CPR E 288	Embedded Systems I: Introduction	
Choose one of the following:		3
COM S 321	Introduction to Computer Architecture and Machine-Level Programming	
CPR E 381	Computer Organization and Assembly Level Programming	
Choose one of the following:		3
COM S 352	Introduction to Operating Systems	
CPR E 308	Operating Systems: Principles and Practice	
Choose one of the following:		3
COM S 230	Discrete Computational Structures	
CPR E 310	Theoretical Foundations of Computer Engineering	
COM S 311	Introduction to the Design and Analysis of Algorithms	3
COM S 363	Introduction to Database Management Systems	3
COM S 309	Software Development Practices	3
S E 319	Construction of User Interfaces	3
S E 329	Software Project Management	3

S E 339	Software Architecture and Design	3
S E 421	Software Analysis and Verification for Safety and Security	3

Note: CPR E 288, CPR E 381 and CPR E 308 are 4-credit courses. The core credit requirement (37 credits) is given in terms of 3-credit courses. If the 4-credit courses are taken instead, then the extra credits will be used as credits for Supplementary Electives.

Total Credits **37**

Other Remaining Courses: 23 cr.

S E 166	Careers in Software Engineering	R
S E 491	Senior Design Project I and Professionalism	3
S E 492	Senior Design Project II	2
Software Engineering Elective ²		6
Supplementary Elective ²		9
Open Elective ²		3

Total Credits **23**

Optional Co-op/Internships

Co-op or internship (S E 396, S E 397, S E 398) is optional

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism and S E 492 Senior Design Project II and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved lists. (<http://www.se.iastate.edu/academics/>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives (<http://www.se.iastate.edu/academics/>).

Plan of Study - 4 Year Plan *

* Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Basic Program - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA)

Must receive a C or better grade in required English classes.

General Educational Elective courses to be selected in consultation with SE advisers from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as international perspectives and U.S. diversity, language, arts and humanities, and social sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives and Supplementary Electives must be selected from the program-approved list (<http://www.se.iastate.edu/academics/>).

¹ Core Professional Curriculum (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Core GPA)

² Students who take the 4-credit lab courses CPR E 288, CPR E 308, and CPR E 381 instead of the corresponding 3-credit alternatives can apply the additional credits toward Supplementary Electives. The total number of credits required in the Software Engineering Program remains the same for all students.

Systems Engineering

Systems Engineering Master's Degree

Administered by the Department of Industrial and Manufacturing Systems Engineering

The Systems Engineering Program focuses on developing an individual's analytical skills to design, evaluate, and build modern complex engineered systems. Engineers who can conceptualize, model, and integrate hardware, software, data, and humans are critical in technology driven multi-disciplinary design teams. The Iowa State University Master of Engineering in Systems Engineering Program is designed to train engineers to excel in the technology driven design environment commonly found in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

Unrestricted admission requires (1) a 3.0 grade point average from an ABET accredited undergraduate engineering program, (2) minimum of two years of engineering experience or current full-time employment as an engineer, (3) calculus, engineering statistics, and engineering economy. A GRE is not required for this program.

Applicants for admission to the Systems Engineering Program apply through the Graduate College at Iowa State University. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to 9 credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (<http://www.elo.iastate.edu/how-elo-works/admission-and-enrollment/>)

The Master of Engineering in Systems Engineering Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Degree Requirements (10 courses total = 30 credits)

Intro Core (required first year)

I E 563	Engineering and Systems Management	3
I E 565	Systems Engineering and Analysis	3

Additional Core

I E 564	Decision Analysis	3
I E 570	Systems Engineering and Project Management	3
I E 585	Requirements and Architecture Engineering	3

Electives (select 5 courses from any categories)

Manufacturing Courses		
I E 448	Manufacturing Systems Engineering	
I E 541	Inventory Control and Production Planning	
I E 549	Computer Aided Design and Manufacturing	
I E 561	Total Quality Management	
I E 572	Design and Evaluation of Human-Computer Interaction	
I E 577	Human Factors	
Engineering Courses		
I E 582	Enterprise Modeling and Integration	
AER E 568	Large-Scale Complex Engineered Systems (LSCES)	
I E 503	Introduction to Sustainable Production Systems	
Software Courses		
I E 581	e-Commerce Systems Engineering	
I E 588	Information Systems for Manufacturing	
1	Other from any graduate program (optional)	

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.

Systems Engineering Certificate 2016 (4 courses total = 12 credits)

Intro Core (required first year)

I E 563	Engineering and Systems Management
---------	------------------------------------

I E 565	Systems Engineering and Analysis
---------	----------------------------------

Core (required to pick 2)

I E 564	Decision Analysis
---------	-------------------

I E 570	Systems Engineering and Project Management
---------	--

I E 585	Requirements and Architecture Engineering
---------	---

Other focus areas in related disciplines, such as systems engineering, human factors, supply chain management, or manufacturing, may be substituted for supporting courses. A program of study is developed by the student and academic adviser to fit individual needs.

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.

COLLEGE OF HUMAN SCIENCES

Laura Jolly, Dean, Dean's Chair

Jennifer Margrett, Interim Associate Dean Research and Graduate Education

Robert D. Reason, Associate Dean Undergraduate Academic Affairs

Debra Sellers, Associate Dean and Director of Human Sciences Extension and Outreach

www.hs.iastate.edu/ (<http://www.hs.iastate.edu/>)

The College of Human Sciences (CHS) provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences, founded in 2005, fosters innovative synergies in teaching and learning in addition to the discovery of new knowledge. Members of the college work to enhance human potential in many ways, and strive to improve the quality of people's lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Departments/School

- Apparel, Events, and Hospitality Management (<http://www.aeshm.hs.iastate.edu/>)
- Food Science and Human Nutrition (<http://www.fshn.hs.iastate.edu/>)
- Human Development and Family Studies (<http://www.hdfs.hs.iastate.edu/>)
- Kinesiology (<http://www.kin.hs.iastate.edu/>)
- School of Education (<http://www.education.iastate.edu/>)

Recommended High School Preparation

Recommended preparation for students entering most departments in the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social sciences and/or humanities. In addition, students interested in Elementary Education are advised to complete two or more years of high school study in one foreign language.

Information for Prospective Students

Each student in the College of Human Sciences works closely with an academic advisor who is associated with the program in which the student is majoring. Advisors assist students in developing academic programs and in adjusting to university life. They also provide information

and guidance about career choices. Advisors attempt to assist students as they develop their schedule of classes to meet their goals, interests, and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Students who enter in spring or summer terms are also offered orientation sessions which are held prior to the beginning of the student's first term. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Undecided Students

The College of Human Sciences offers an academic support program for students who are considering several majors in CHS. This program is administered to undecided Human Sciences students through the MINDS Learning Community. Students in the MINDS Learning Community take coursework together, including an orientation and career exploration course which is taught by college advisers. This course provides opportunities for students to evaluate their interests, skills, and strengths while also receiving additional support through a peer mentor program.

All undecided majors in the College of Human Sciences are required to participate in MINDS Learning Community and will sign up for the program during orientation. For more information, visit the MINDS webpage: <http://www.hs.iastate.edu/prospective/learning-communities/minds/>

Planned Transfer Programs

By planning carefully, students may begin their education at another college and then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Recruitment Office.

Accreditation and Licensure

The following program-specific accreditation/ licensure/registrations have been attained by departments or School of Education within the college:

Department of Apparel, Events, and Hospitality Management:

Apparel, Merchandising, and Design major is endorsed by the American Apparel and Footwear Association's Education Foundation. The Design primary option is accredited by the National Association of Schools in Art and Design.

Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration.

Department of Food Science and Human Nutrition:

The Food Science degree, including Industry and Technology options are approved by the Institute of Food Technologists.

The Didactic Program in Dietetics and Dietetics Internship are accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics.

The Baccalaureate Degree in Nursing at Iowa State University is pursuing initial accreditation by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. Applying for accreditation does not guarantee that accreditation will be granted. The program has interim approval from the Iowa Board of Nursing.

Department of Human Development and Family Studies:

The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC), Academy for Early Childhood Programs, is licensed by the Iowa Department of Human Services, and maintains a 5 Star Rating from the Iowa Quality Rating System.

The Early Childhood Education Program (administered in collaboration with the School of Education) and the Family and Consumer Sciences Education Teacher Licensure Program are accredited by the Iowa Department of Education and students may be recommended for licensure to the Iowa Board of Educational Examiners.

Financial Counseling and Planning (FCP) is a registered education program with the Certified Financial Planner Board of Standards and the Association for Financial Counseling and Planning Education. With these registrations FCP students are eligible to sit for the Certified Financial Planner™ and Accredited Financial Counselor® examinations.

Department of Kinesiology:

The Athletic Training program is accredited by the Commission on Accreditation of Athletic Training Education.

The Physical Education Educator Preparation Program is recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

School of Education - Educator Preparation

All Iowa State University Educator Preparation Programs are recommended for approval by the Iowa Department of Education and approved by the State of Iowa Board of Education.

Each student will be enrolled in the School or Department in which he or she plans to major and must meet the graduation

requirements of that department and the college in which it is located.

All candidates must meet the program completion requirements of the Iowa State University Educator Preparation Program in order to be recommended for teacher or educational leadership licensure by Iowa State University.

For details about Teacher Education programs, requirements, and endorsement areas, see Teacher Education. (<http://www.education.iastate.edu/undergraduate-studies/>)

For details about Educational Leadership programs and requirements, see Educational Leadership (<http://www.education.iastate.edu/graduate-studies/gradprograms/elop.html>)

Undergraduate Core Curriculum

Purpose

The College of Human Sciences has established core learning outcomes to provide the unifying foundation critical to personal and professional success for all College of Human Sciences undergraduate students. Assessment of College of Human Sciences' core learning outcomes will measure student competence in four (4) areas. Assessment results will be used by CHS faculty and staff to enhance student learning experiences.

Four components

The core identifies the expected minimum outcomes that each undergraduate in the college must meet:

Communication - Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats without distracting errors in usage or convention.

Self-Assessment/Self Reflection - Consistently and realistically analyze and evaluate one's own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy.

Critical Thinking - Generate, acquire and evaluate information based on scientific evidence, creative processes, and logical and ethical reasoning to make decisions and solve problems in one's personal, professional and community endeavors.

Social Justice - Articulate and demonstrate a clear concept of a just society in which individuals and groups equitably share in societal benefits within a global community.

Expectations for Departments/School of Education/Programs

Departments/schools/programs formally participate in outcomes assessment. Programs identify courses at three levels (introductory, intermediate, and advanced) where at least one significant educational activity is identified and assessed. Increased achievement and level of mastery at advanced levels is discussed and incorporated through continuous improvement efforts.

General Education

Students in the College of Human Sciences are required to complete a program in general education which is integrated in their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

I. Communication Skills (10 cr.): ENGL 150, ENGL 250; LIB 160; and 3 credits in oral communication

II. Biological and physical sciences and mathematical disciplines (9 cr.): at least 3 credits in mathematical disciplines

III. Social sciences and humanities (15 cr.): at least 6 credits in social sciences and at least 6 credits in humanities

Double Majors

Undergraduate students may elect a second major from the departments or school and program areas listed above, or from a major field offered for the bachelor's degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department

of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, prerequisites and supporting courses.

Two Bachelor's Degrees

Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index (<http://catalog.iastate.edu/azindex/>), Bachelor's Degree, Two.

International Programs

The College of Human Sciences encourages students to participate in international programs that will help them to become life-long learners of other cultures and perspectives, to enhance their global citizenship, and to expand their opportunities for employment after graduation. The College offers short-term faculty-led study abroad programs, semester-long programs, international student teaching placements, and dietetic internship rotations.

International opportunities change each year, and students should visit <http://intl.hs.iastate.edu> to review the list of available programs and to explore which offerings are designed for specific majors. The College offers several study abroad scholarships and last year over \$73,000 was awarded to support student participation in our international programs.

Faculty members also bring diversity and global perspectives to instruction through research and collaborations with scholars and institutions abroad, and the College employs faculty members from many different countries.

Honors Program

High achieving students, with a grade point average of above 3.50, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and collaborate with a faculty member to complete an honors project. For further information, contact the College Honors Committee or academic adviser. See www.hs.iastate.edu/academics/honors/ (<http://www.hs.iastate.edu/academics/honors/%20%20/>) or look in the Index (<http://catalog.iastate.edu/azindex/>), under Honors Program.

Human Sciences Extension and Outreach

Students may prepare for a career in the Cooperative Extension System by enrolling in a curriculum in the College of Human Sciences that

provides them with a subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the Associate Dean and Director of Iowa State University Human Sciences Extension and Outreach, and/or the Iowa State University Extension and Outreach 4-H Youth Development Program Leader.

Undergraduate Majors

For more information about a major, see:

1. The curriculum descriptions in this section of the catalog
2. The department catalog section under Courses and Programs
3. Department websites.

Apparel, Events, and Hospitality Management

Apparel, Merchandising, and Design

Options: Merchandising; Creative and Technical Design; and Product Development See Curriculum in Apparel, Merchandising, and Design

Event Management

See Curriculum in Event Management

Hospitality Management

See Curriculum in Hospitality Management

Food Science and Human Nutrition

Culinary Food Science

See Curriculum in Culinary Food Science

Diet and Exercise B.S./M.S.

Jointly administered with the Department of Kinesiology. See Curriculum in Diet and Exercise

Dietetics

See Curriculum in Dietetics

Food Science

Options: Food Science and Industry; Food Science and Technology. See Curriculum in Food Science

Nursing: See Curriculum in Nursing

Nutritional Science

Options: Pre-Health Professional and Research; Family Health; Food Service; Global Health and Policy; Health Coach; and Nutrition and Wellness. See Curriculum in Nutritional Science

Human Development and Family Studies

Child, Adult, and Family Services

Options: Child Programs; Youth Programs; and Adult/Family Programs. See Curriculum Child, Adult, and Family Services

Early Childhood Education - Unified

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education - Unified

Family and Consumer Sciences Education and Studies

Options: Communications; Professional Studies; Teacher Licensure. See Curriculum in Family and Consumer Sciences Education and Studies

Financial Counseling and Planning

See Curriculum in Financial Counseling and Planning

Affiliated Program: Early Childcare Education and Programming.

Offered by the Great Plains Interactive Distance Education Alliance (GPIDEA). See Curriculum in Early Childcare Education and Programming

Kinesiology

Athletic Training

See Curriculum in Athletic Training

Diet and Exercise B.S./M.S.

Jointly administered with the Department of Food Science and Human Nutrition. See Curriculum in Diet and Exercise

Kinesiology & Health

Options: Community and Public Health; Exercise Science; Physical Activity and Health Promotion; Physical Education Teacher Education; and Pre-Health Professions. See Curriculum in Kinesiology & Health

School of Education

Early Childhood Education - Unified

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education - Unified

Elementary Education

Administered by the School of Education. See Curriculum in Elementary Education

K-12/Secondary Education

The Secondary Education program has three routes, an undergraduate route, a post bachelor route, and a graduate route.

- Undergraduate Secondary Education

Offered in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Teacher Education

- Post-Bachelor Secondary Education

Coordinated by departments/programs across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Teacher Education

- Graduate Secondary Education in the School of Education

Masters of Arts in Teaching in Science Education and Masters of Education in Mathematics Education are coordinated by the School of Education. Other education programs, such as agriculture education, family consumer sciences education, and physical education teacher education, offer masters programs to pursue program completion through their own departments.

International Studies (secondary major only)

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see International Studies).

Undergraduate Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel, Merchandising, and Design

Child, Adult, and Family Services

Culinary Food Science

Dance

Educational Services in Family and Consumer Sciences

Event Management

Exercise Science

Financial Counseling and Planning

Food and Society

Food Safety (interdepartmental minor)

Food Science

Gerontology (interdisciplinary minor)

Health Promotion

Hospitality Management

Learning and Leadership Sciences

Learning Technologies

Kinesiology

Nutrition

Graduate Programs

The College of Human Sciences offers a variety of programs leading to a Master's degree, a Ph.D., or a graduate certificate. Each unit offers a variety of program options, as well as opportunities for interdisciplinary study in the areas of gerontology, toxicology, nutritional studies, and genetics. Multiple opportunities for on-campus and distance education programs are available.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest.

Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in business; government agencies; and public and private agencies and institutions; as well as for teaching, research, and extension positions in colleges and universities.

Information for Prospective Students

Graduate study in the College of Human Sciences is conducted through collaboration with the Graduate College, and application is completed through the Graduate College. Details regarding the application process and general information about graduate studies at ISU are found in the Graduate College section of this catalog, (<http://www.grad->

college.iastate.edu/). Details regarding the curricula and specific expectations for each program are found on department websites.

Each graduate student in the College of Human Sciences works closely with an academic advisor and a Program of Study (POSC) committee. The POSC assists students in developing academic programs tailored to meet individual needs, guide research and/or internship activities, and provide information and guidance about career choices. Graduate assistantship support is available for many students and involves them in research, teaching, and administrative experiences. Incoming students are encouraged to work with departmental advisors to develop appropriate class and assistantship activities.

Graduate Curricula

Information about curricula and degree options for each College of Human Sciences unit is available on the unit websites below.

- Apparel, Events, and Hospitality Management – <http://www.aeshm.hs.iastate.edu/graduate-programs/>
- Food Science & Human Nutrition – <http://www.fshn.hs.iastate.edu/graduate-program/>
- Human Development & Family Studies – <https://www.hdfs.hs.iastate.edu/graduate-programs/>
- Kinesiology – <https://www.kin.hs.iastate.edu/graduate-programs/kinesiology/>
- School of Education - <http://www.education.iastate.edu/graduate-studies/>

Distance Education Opportunities

The College of Human Sciences offers several online courses and programs. Degrees include PhD, Master's, Undergraduate, and Certificates. Many courses incorporate a blended or hybrid approach, where online students interact with students on campus in real time using webinar services. Some degree programs are provided with a combination of online and condensed schedules that require limited time on campus. Details about these offerings are found on the website at <http://www.online.hs.iastate.edu/graduate-programs/>. (<http://www.online.hs.iastate.edu/graduate-programs/>)

Of these programs, six Certificates, one Undergraduate, and four Masters programs are offered through collaboration with the Great Plains Interactive Distance Education Alliance (GP-IDEA; <http://www.gpidea.org/>). These online programs allow students to earn a graduate degree from ISU while taking courses and interacting with students from a number of participating universities. The CHS also offers a Masters of Family and Consumer Sciences-Comprehensive degree

online where students have the flexibility to design a program of study the best meets their professional goals.

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. At Iowa State University, an undergraduate certificate is awarded concurrently or after baccalaureate requirements are finished. The following undergraduate certificate is available in the College of Human Sciences:

Health Coach Certificate

Graduate Certificates

Graduate certificates provide formal recognition of focused graduate study in an area of specialization that is less comprehensive than required for a master's degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master's or doctoral degree. The following graduate certificates are available in the College of Human Sciences:

Applied Research Methods in Human Sciences Certificate - see <https://www.education.iastate.edu/graduate-programs/applied-research/>

Community College Teaching Certificate - see <https://www.education.iastate.edu/graduate-programs/division-higher-education/community-college-teaching/>

Development and Family Sciences Advanced Research Design and Methods - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/#developmental-and-family-sciences-advanced-research-design-and-methods

* Dietetics Internship Certificate - see www.dietetics.iastate.edu/ (<http://www.dietetics.iastate.edu/>)

Education for Social Justice Certificate - see <http://www.education.iastate.edu/graduate-studies/gradprograms/social-justice/>

* Family Financial Planning Certificate - see www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/ (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/>)

* Financial and Housing Counseling Certificate - see www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/ (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/>)

Family Well Being in Diverse Society - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/#family-well-being-in-diverse-society

* Gerontology Certificate - see www.hdfs.hs.iastate.edu/graduate/curriculum/ms-fcs/ (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-gerontology/>)

* Infant and Early Childhood Mental Health - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/#infant-and-early-childhood-mental-health

* Instructional Design Certificate - see <https://www.education.iastate.edu/graduate-programs/teaching-learning-leadership-policy/designcert/>

Life Span Development - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/

Special Education Certificate - see <http://www.education.iastate.edu/graduate-studies/gradprograms/l3/special-education-certificate.html>

Superintendent Licensure - see www.education.iastate.edu/graduate-studies/gradprograms/elop.html#Certificate

* Youth Development Specialist - see <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>

* Youth Program Management & Evaluation - see <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>

* online certificate

Apparel, Events, and Hospitality Management Department

The Apparel, Events, and Hospitality Management department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student's major area of study whether it be Apparel, Merchandising, and Design; Event Management; Hospitality Management; agriculture, business, design education, engineering, liberal arts and sciences or minor areas of study including entrepreneurial studies, design studies, or international studies.

Apparel, Events, and Hospitality Management, otherwise known as AESHM, is composed of three majors:

- Apparel, Merchandising, and Design
- Event Management
- Hospitality Management

Through each of these three programs, students gain skills and knowledge to help them succeed in the real world. In addition to coursework, they complete an internship that closely relates to their career aspirations.

Graduates of these programs are the managers of your favorite resorts, the designers of your best jeans, and the coordinators of lavish events.

From fine dining to fine apparel, our students, alumni, faculty, and staff have an eye for the original and a taste for quality.

Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in A M D at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level). The major in apparel, merchandising, and design provides a broad-based program of study with flexibility in creating program options. Courses are required in general education, and apparel industry professional core. To complete the program, a student selects a primary option from design, product development and innovation, product management and sourcing, merchandising and retail analytics, and fashion communication.

Minors are available in apparel, merchandising, and design; textile science and product performance; a textile design minor in collaboration with the College of Design; and a merchandising certificate.

Undergraduate Study

The program offers study for the degree of Bachelor of Science with a major in apparel, merchandising, and design (A M D). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, source and present textile and apparel products to meet the needs of consumers. Students understand the issues involved in textile and apparel production and marketing, both nationally and internationally. Graduates appreciate the

interdependence of nations and cultures as producers and consumers of textile products.

The A M D major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, A M D core classes, and structured clusters of courses to form an option in merchandising and retail analytics, fashion communication, product management and sourcing, product development and innovation, or design

An option in merchandising and retail analytics prepares students for the planning, promotion, and presentation of market-oriented product lines and events. Career opportunities are in buying, promotion, sales, product development, branding, and management in both manufacturing and retailing sectors with a focus on the textile and apparel industry.

An option of fashion communications prepares students for the development and delivery of visual, written, and oral communication.

Career opportunities are in visual merchandising, styling, fashion influencing, social media, and communication. An option in creative and technical design is appropriate for those interested in the aesthetic and creative aspects of design, technical design, costuming, textile design, and product development. An option in product development and innovation is appropriate for those interested in developing innovative products for special markets including accessories, footwear, performance wear, smart textiles, functional apparel, and softgoods for home. Career opportunities include designer, materials testing, quality assurance, and technical design. An option in product management and sourcing is appropriate for those interested in both line planning, product development, and merchandising products or lines for consumer groups, sourcing, quality assurance, and manufacturing. Instead of a portfolio review for admission, students in the design and product development options have a review of their first year design skills (A M D 206 Design Selective Advancement) after completing A M D 121 Apparel Assembly, A M D 131 Overview of the Fashion Industry, A M D 178 Introduction to Fashion Design Studio, and A M D 204 Textile Science. The A M D 206 Design Selective Advancement project is scored by design industry professionals and determines if/when students move forward into the Design option.

The program offers a concurrent B.S. and M.S. degree that allows students to obtain a B.S. and M.S. degree in apparel, merchandising, and design in 5 years. Application for admission to the Graduate College should be made in the junior year.

For additional courses of interest, see Apparel, Events, and Hospitality Management.

Grade Point Requirement

All students majoring in apparel, merchandising, and design are required to earn a C- or better in all AESHM and A M D courses applied toward the degree, including transfer credits.

Communication Proficiency Requirement

Undergraduate English proficiency is certified when the student has received a grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Students who receive a C-, D+, D, or D- in ENGL 150 Critical Thinking and Communication or ENGL 250 Written, Oral, Visual, and Electronic Composition may take one of the following, with permission from the English Department, instead of repeating the lower-level course:

ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

Minor

A minor in apparel, merchandising, and design requires (15-17 cr.) of the following:

Select from:		3
A M D 121	Apparel Assembly Processes	
A M D 131	Fashion Products and Markets	
A M D 165	Dress, Appearance, and Diversity in Society	
A M D 178	Introduction to Apparel Design Studio	
Select from:		3-4
A M D 204	Textile Science	
Select from:		3-4
A M D 231	Product Development and Manufacturing	
A M D 245	Aesthetics and Brand Image	
A M D 257	Museum Studies	
A M D 275	Retail Merchandising	
300-400 level at Iowa State University in A M D or approved AESHM		6
AESHM 340	Hospitality and Apparel Marketing Strategies	
AESHM 342	Aesthetics of Consumer Experience	
AESHM 470N	Supervised Professional Internship: Apparel	
AESHM 472	Fashion Show Management	
AESHM 474	Entrepreneurship in Human Sciences	
AESHM 476CX	Entrepreneurship Studio: Creating an Online Business	
AESHM 499X	Research, Seminar, or Senior Project	
A M D 305	Quality Assurance of Textiles and Apparel	
A M D 328	Apparel, Merchandising, and Design Seminar	

A M D 354	History of European and North American Dress	
A M D 356	History of Twentieth Century Fashion	
A M D 362	Cultural Perspectives of Dress	
A M D 372	Sourcing and Global Issues	
A M D 375	Omni-Channel Retailing	
A M D 376	Merchandise Planning and Buying	
A M D 377	Visual Presentation and Promotions	
A M D 393	Apparel, Merchandising, and Design Workshop	
A M D 404	Innovative Textiles	
A M D 431	Apparel Production Management	
A M D 458X	Queer Fashions, Styles, and Bodies	
A M D 467	Consumer Studies in Apparel and Fashion Products	
A M D 475	Retail Information Analysis	
A M D 490	Independent Study	
A M D 499	Undergraduate Research	
Total Credits		15-17

Certificate

A certificate in Merchandising requires (22 cr.) of the following:

A M D 275	Retail Merchandising	3
A M D 375	Omni-Channel Retailing	3
A M D 376	Merchandise Planning and Buying	4
A M D 475	Retail Information Analysis	3
Select from:		9
AESHM 287	Principles of Management in Human Sciences	
AESHM 340	Hospitality and Apparel Marketing Strategies	
AESHM 342	Aesthetics of Consumer Experience	
AESHM 470N	Supervised Professional Internship: Apparel	
AESHM 474	Entrepreneurship in Human Sciences	
A M D 165	Dress, Appearance, and Diversity in Society	
A M D 245	Aesthetics and Brand Image	
A M D 372	Sourcing and Global Issues	
A M D 377	Visual Presentation and Promotions	
A M D 467	Consumer Studies in Apparel and Fashion Products	
Total Credits		22

Curriculum in Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in AMD at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level).

Cr. Degree Requirements

Communications Skills

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Select one of the following:		3
COMST 210	Communication and U.S. Diversity	
COMST 214	Professional Communication	
COMST 218	Conflict Management	
SP CM 212	Fundamentals of Public Speaking	

Total Credits **10**

Biological and Physical Sciences and Mathematical Disciplines

Mathematics (MATH 150 recommended for merchandising. 3
MATH 140 required for design and product development)

Select from natural sciences. Creative and Technical Design, Product 3-5
Development, and Product Innovation Options must take CHEM 163
and CHEM 163L.

Select one class from: 3-4

STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 226	Introduction to Business Statistics I	

Total Credits **9-12**

Social Sciences

ECON 101	Principles of Microeconomics	3
A M D 165	Dress, Appearance, and Diversity in Society	3
Select from A M D list, including A M D 362		3

Total Credits **9**

Humanities

Select one (1) class from A M D list (world language and cultures 3
course recommended).

A M D 356	History of Twentieth Century Fashion	3
History/Art History (Creative and Technical Design: ART H required)		3

Total Credits **9**

Pre-Professional Development Courses

AESHM 112	Orientation for AESHM	1
AESHM 113N	Professional Development for AESHM: Common Threads Learning Community	1
AESHM 311N	Seminar on Careers and Internships: Apparel, Merchandising, and Design	1

AESHM 411N	Seminar on Current Issues: Apparel	1
AESHM 470N	Supervised Professional Internship: Apparel	3-6
Field Study (if AESHM 470 is not out-of-home-state)		2-3
AESHM 380N	U.S. Field Study: Apparel, Merchandising, and Design	
AESHM 381N	International Field Study: Apparel, Merchandising, and Design	

Total Credits 9-13

A M D Integrated Core

A M D 131	Fashion Products and Markets	3
A M D 204	Textile Science	4
A M D 210	Computer Applications in Digital Design	3
A M D 231	Product Development and Manufacturing	4
A M D 245	Aesthetics and Brand Image	3
A M D 275	Retail Merchandising	3
A M D 372	Sourcing and Global Issues	3
COM S 113	Introduction to Spreadsheets and Databases	3

Total Credits 26

Primary Options

Select one professional primary option from the following three choices:

Creative and Technical Design Primary Option

A M D 121	Apparel Assembly Processes	4
A M D 178	Introduction to Apparel Design Studio	3
A M D 206	Design Selective Advancement	R
A M D 225	Patternmaking I: Drafting and Flat Pattern	3
A M D 278	Fashion Illustration	3
A M D 310	Computer Aided Apparel Patternmaking	3
A M D 321	Computer Integrated Textile and Fashion Design	3
A M D 325	Patternmaking II: Draping	3
A M D 329	Digital Textile Printing for Apparel Design	3
A M D 415	Technical Design Processes	3
A M D 495	Senior Design Studio	3

Select from: 3

A M D 305	Quality Assurance of Textiles and Apparel	
A M D 404	Innovative Textiles	
A M D 431	Apparel Production Management	
Select from:		3
A M D 354	History of European and North American Dress	
A M D 362	Cultural Perspectives of Dress	

Select two (2) classes from approved AMD, AESHM, THTRE, ART IS, DSGN, or DSN S. This category can be waived with approved double-major.

Total Credits 43

Product Development and Innovation Primary Option

A M D 121	Apparel Assembly Processes	4
A M D 178	Introduction to Apparel Design Studio	3
A M D 226X	3D Designing and Patternmaking for Soft Good Product Development	3
A M D 305	Quality Assurance of Textiles and Apparel	3
A M D 321	Computer Integrated Textile and Fashion Design	3
A M D 376	Merchandise Planning and Buying	4
A M D 404	Innovative Textiles	3
A M D 431	Apparel Production Management	3
A M D 496	Fashion Product Development and Prototyping	3
DSN S 131	Drawing I	4

Select three (3) classes from approved AMD, AESHM, CHEM, GLOBE, IND D, T SC, ENV S courses. This category can be waived with approved double-major.

A M D 225	Patternmaking I: Drafting and Flat Pattern	3
-----------	--	---

Total Credits 45

Product Management and Sourcing Primary Option

A M D 121	Apparel Assembly Processes	4
A M D 178	Introduction to Apparel Design Studio	3
A M D 226X	3D Designing and Patternmaking for Soft Good Product Development	3
A M D 305	Quality Assurance of Textiles and Apparel	3
A M D 376	Merchandise Planning and Buying	4
A M D 415	Technical Design Processes	3
A M D 431	Apparel Production Management	3
A M D 467	Consumer Studies in Apparel and Fashion Products	3
A M D 496	Fashion Product Development and Prototyping	3
AESHM 340	Hospitality and Apparel Marketing Strategies	3
or MKT 340	Principles of Marketing	
ACCT 284	Financial Accounting	3
SCM 301	Supply Chain Management	3

Select one (1) class from elective list of approved AESHM, AMD, ENV S, GLOBE, T SC class. This category can be waived with appropriate double-major.

Total Credits 41

Merchandising and Retail Analytics Primary Option

ACCT 284	Financial Accounting	3
AESHM 340 or MKT 340	Hospitality and Apparel Marketing Strategies Principles of Marketing	3
AESHM 474	Entrepreneurship in Human Sciences	3
A M D 328T	Apparel, Merchandising, and Design Seminar: Fashion Trend Forecasting	1-3
A M D 375	Omni-Channel Retailing	3

Graduate Study

The program offers work for the concurrent Bachelor of Science and Master of Science; Master of Science (thesis and non-thesis options; on-campus and hybrid); and Doctor of Philosophy (on-campus and distance hybrid) with a major in apparel, merchandising, and design. For all programs the field of study is highly interdisciplinary; programs of study are tailored to students' background and interests. The program offers a concurrent B.S. and M.S. degree that allows students to obtain both the B.S. and M.S. degrees in apparel, merchandising, and design

in 5 years. Application for admission to the Graduate College should be submitted in fall semester of the junior year.

Graduates understand how textiles and apparel are essential in meeting individual and societal needs and understand the interdependence of nations and cultures as producers and consumers. Graduates understand diverse philosophies of scholarship and apply multiple methods to creative activity, research, and teaching. Strong writing and oral communication skills help graduates disseminate scholarship and compete successfully for awards and grants.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Master's and doctoral graduates have experience working in team-oriented and interactive environments. Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice.

They bring a strong sense of ethics to research, teaching, and business endeavors.

Program emphases for graduate study include creative design and functional design; product development; consumer behavior; entrepreneurship; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultures; U.S. dress and textiles from the 19th into the 21st centuries; textiles and sustainability.

Athletics

Administered by the Department of Kinesiology.

Athletic Training

This major prepares students for a career as an athletic trainer in a variety of settings such as high school, college and professional settings.

There are additional settings in sports medicine clinics, hospitals, military, industry, and in performing arts. The accredited program is seeking CAATE approval for the degree change and students will be prepared for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found at <http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>.

Iowa State University's Athletic Training Program has transitioned to a Professional Master's degree program. Undergraduate students will be enrolled in the 3+2 athletic training program with a 3-year Pre-Athletic Training undergraduate curriculum and a 2-year Masters of Athletic Training program in the Department of Kinesiology. Students with a B.S. or B.A. degree may apply directly to the Master's program with completion of prerequisite coursework, program requirements, and

observation hours. For more information, please contact the program director, Dr. Mary Meier, at mary@iastate.edu.

Mission

Athletic training is the art and science of the prevention, recognition, care, and rehabilitation of athletic injuries. It includes the organization and administration of athletic training education programs, as well as the education and counseling physically active individuals and athletes. The Iowa State University athletic training program provides high quality education striving to instill intellectual curiosity, evidence-based knowledge, and clinical skills essential for individual development. The athletic training program enrolls academically qualified students who represent diverse socio-economic levels, ethnic heritage and who provide a gender balance. The program faculty and clinical preceptors strive to prepare athletic training students to be productive and responsible citizens of the world and to foster affective, caring individuals to promote the profession of athletic training.

The Athletic Training faculty and clinical preceptors continually update educational curriculum to keep athletic training students current with field knowledge and to ensure the best possible undergraduate and graduate education in both the didactic and clinical settings.

Goals

1. We prepare athletic training students for the BOC Certification Exam.
2. We produce high quality athletic trainers prepared for employment in educational, clinical, and professional settings.
3. We promote professional and ethical conduct at all times.
4. We provide athletic training students equal opportunity to develop their skills both in the classroom and in the clinical settings.
5. We continually update the curricular offerings to provide the athletic training student current evidence based knowledge in the profession.
6. We provide high quality instruction in the classroom and clinical experiences.
7. We assist the athletic training student in gaining employment.
8. We promote the concept of establishing professional contacts by attending professional and educational meetings.
9. We foster an appreciation of athletic training as a component of sports medicine.
10. We foster the affective, caring side of athletic training.

Undergraduate Study

The Department of Kinesiology offers a Bachelor of Science degree in Kinesiology & Health. The B.S. in Athletic Training degree is only offered upon completion of the 3+2 B.S./M.A.TR. Athletic Training program.

The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the component courses. The intent of the general education component is

to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S./M.A.TR. degree in Athletic Training

Certified Athletic Trainers are allied medical health care professionals who specialize in the prevention, assessment, diagnosis, emergency care, and treatment and rehabilitation of injuries. To gain certification as an athletic trainer, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination. In addition, most states have licensure requirements to practice athletic training. The ISU Athletic Training undergraduate education program has been CAATE accredited since 2001 and as we transition to the new Professional Master's program, we are seeking CAATE approval for the degree change. The Athletic Training program at Iowa State University includes various athletic training clinical rotations including high school settings, physical therapy and hospital clinics, college and university settings, surgical and emergency room observations, and immersive clinical opportunities in orthopedic and non-orthopedic settings.

Curriculum in Athletic Training

This major prepares students for a career as an athletic trainer in high school, college or professional sport settings. Additional settings include sports medicine clinics, hospitals, military, industry, and with the performing arts. The 3+2 program prepares students for the Board of Certification exam upon graduation. Admission to the Athletic Training Master's degree program is competitive. Admission requirements for the Professional Master's in Athletic Training program can be found at <http://www.kin.hs.iastate.edu/graduate-programs/athletic-training/> (<http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>).

Curriculum in Athletic Training

This major prepares students for a career as an athletic trainer in high school, college or professional sport settings. Additional settings include sports medicine clinics, hospitals, military, industry, and with the performing arts. The 3+2 program prepares students for the Board of Certification exam upon graduation. Admission to the Athletic Training Master's degree program is competitive. Admission requirements for the Professional Master's in Athletic Training program can be found at <http://www.istatesportsmed.com/>

Communication Proficiency

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course:

ENGL 302	Business Communication	3
or ENGL 314	Technical Communication	
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See university approved list.

General Education Physical and Life Sciences:

BIOL 255	Fundamentals of Human Anatomy	3
BIOL 255L	Fundamentals of Human Anatomy Laboratory	1
BIOL 256	Fundamentals of Human Physiology	3
BIOL 256L	Fundamentals of Human Physiology Laboratory	1

Additional major-specific requirements are:

CHEM 163	College Chemistry	4
or CHEM 177	General Chemistry I	
CHEM 163L	Laboratory in College Chemistry	1
or CHEM 177L	Laboratory in General Chemistry I	
FS HN 167	Introduction to Human Nutrition	3
PHYS 111	General Physics	4-5
or PHYS 115	Physics for the Life Sciences	

Mathematics and Statistics:

From the following:		3-4
MATH 140	College Algebra	
or MATH 141	Preparation for Calculus	
or MATH 142	Applied Trigonometry	
or MATH 161	Calculus I	
From the following:		3-4
STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	

Social Sciences: 9 cr. min required

PSYCH 101	Introduction to Psychology	3
or PSYCH 230	Developmental Psychology	
SOC 134	Introduction to Sociology	3

Humanities: 6 cr. min required

Choose from department approved list.

Communications:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

One of the following	3
ENGL 302 Business Communication or ENGL 314 Technical Communication or SP CM 31 Business and Professional Speaking	

Program requirements:

The following courses are required in all majors and options:

H S 110	Personal and Consumer Health	3
H S 350	Human Diseases (*)	3
KIN 252	Disciplines and Professions in Kinesiology and Health	1
KIN 253	Orientation and Learning Community in Kinesiology and Health	1
KIN 258	Principles of Physical Fitness and Conditioning	2
KIN 358	Exercise Physiology (*)	3
KIN 359	Exercise Physiology Lab	1

* A grade of C- or better is required.

Courses for Athletic Training Major

Option Requirements:

A TR 219	Anatomy Clinical Practicum	1
A TR 220	Basic Athletic Training	2
A TR 221	Pre-Athletic Training Clinical Practicum	1
A TR 223	Preseason Clinical Experience Practicum	1
A TR 425	Organization and Administration of Athletic Training	3
A TR 450	Medical Concerns for the Athletic Trainer	3
A TR 488	Evidence Based Practice in Athletic Training	2
A TR 489	Review of Athletic Training Competencies and Clinical Proficiencies	1
H S 215	Drug Education	3
KIN 355	Biomechanics (*)	3
KIN 365 or KIN 366	Sport Psychology (*) Exercise Psychology	3
KIN 480	Functional Anatomy	3
Electives		3
Total Credits		29

* A grade of C- or better is required.

Planned course offerings may change, and students need to check the online Schedule of Classes each term to confirm course offerings: <https://classes.iastate.edu/>.

Humanities, Social Science, International Perspectives, and US Diversity courses: <https://www.kin.hs.iastate.edu/find-majors/general-ed-requirements/>

This sequence is only an example.

Child, Adult, and Family Services

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

Total credits required: 120. The child, adult, and family services curriculum leads to employment opportunities in the helping professions working with children, adults, and families in a variety of public and private human service agencies and organizations. Students select one or more options within the major: child program, youth program, or adult and family program.

A minor in child, adult, and family services is available; see requirements under Human Development and Family Studies, Undergraduate programs.

The following requirements are for the CHFS major by option.

Child Programs Option

Human Development and Family Studies Core: 19-20 credits

HD FS 102	Individual and Family Development, Health, and Well-being	3
HD FS 369	Research Methods in Human Development and Family Studies	3
HD FS 418B	Professional Practice Reflection/Discussion: Internships	2
HD FS 449	Program Evaluation and Proposal Writing	3
HD FS 491	Internship	8-9

Total Credits 19-20

Child, Adult, and Family Services Core: 15 credits

HD FS 183	Personal Finance in Early Adulthood	1
HD FS 218	Professional Orientation and Service Learning	2

Culinary Food Science (H SCI)

The Culinary Food Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary food science minor.

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3
<hr/>		
Total Credits		10

Humanities and Social Sciences: 6-12 cr.

Select Humanities course from approved list		3
If H Sci student, select:		6
Additional Humanities course		
Additional Humanities or Social Science course		
ECON 101	Principles of Microeconomics	3

Ethics: 3 cr.

FS HN 342	World Food Issues: Past and Present	3
-----------	-------------------------------------	---

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from:		3-4
MATH 140	College Algebra	
MATH 143	Preparation for Calculus	
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
Select at least 3 credits from:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
<hr/>		
Total Credits		6-8

Physical Sciences: 9 cr.

CHEM 163	College Chemistry	4
or CHEM 177	General Chemistry I	
CHEM 163L	Laboratory in College Chemistry	1
or CHEM 177L	Laboratory in General Chemistry I	
CHEM 231	Elementary Organic Chemistry	3

Footnotes

* Fall only course offering.

** Spring only course offering.

+ Choose elective courses to total equal to or greater than 120 credits.

Not planned course offerings may change and students need to check the online Schedule of Classes each term to confirm course offerings: <https://classes.iastate.edu> (<https://classes.iastate.edu>). This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Dance

Administered by the Department of Kinesiology.

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance.

A Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index: Performing Arts.

Diet and Exercise (H SCI) Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a \$30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

Total Degree Requirements: 125 cr. for bachelor's degree and 37-41 cr. for master's degree

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3

Planned course offerings may change, and students need to check the online Schedule of Classes each term to confirm course offerings: <http://classes.iastate.edu/>. This sequence is only an example.

Dietetics (H SCI)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a \$30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

Electives: 0-13 cr. Select from any university coursework to earn at least 120 total credits.

Admission to the dietetics program: Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN courses.

Footnotes

* Choose elective courses to total equal to or greater than 120 credits.

Note: This sequence is only an example, and the number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Early Childcare Education and Programming

Curriculum in Early Childcare Education and Programming

The **Early Childcare Education and Programming (E C P)** curriculum is designed to prepare graduates to work in a variety of early care and education programs that serve families that are mobile. Families who are mobile include military families, immigrant families, families who must travel to make a living, homeless families, and families living in

poverty. Some of the programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This degree does not lead to teacher licensure. Students interested in a license to teach in public schools can refer to the Early Childhood Education - Unified (ECE) program. The E C P curriculum is designed to provide content for the final two years of a student's program; the content is focused specifically on topics directly relevant to the major. This is an online program offered through a collaboration of seven universities as part of GPIDEA. The program is known as Early Care and Education for a Mobile Society. For more information see <https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society> (<https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society/>)

The **Early Childcare Education and Programming** curriculum is designed to provide content for the final two years of a student's program; the content is focused specifically on topics directly relevant to the major. Students will complete a total of 120 credits for the major, 51 of which are specific to the E C P curriculum. These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to E C P. If students prefer to be admitted to ISU before being admitted to the E C P major, they can enroll as Pre ECP (P ECP) students until they are eligible for the E C P major. For more information about the program at Iowa State, see <http://www.online.hs.iastate.edu/ecp> (<http://www.online.hs.iastate.edu/ecp/>).

Early Childhood Education - Unified

Administered by the Department of Human Development and Family Studies and the School of Education. Leading to the degree bachelor of science.

The curriculum in early childhood education – unified (ECE) prepares graduates to teach young children and work with their families. This curriculum has been approved by the Iowa Department of Education and meets requirements for candidates to seek a teaching endorsement in PK-3, Inclusive Settings, which permits individuals to teach general and special education for children from birth through third grade. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through third grade) or in home-based programs.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses.

Additional information is also available from the student's academic adviser.

Students in early childhood education – unified must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through artifacts such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 1001 in the State of Iowa. These include competencies in (1) promoting child development, learning and individual learning differences, (2) building family and community relationships, (3) observing, documenting, and assessing to support young children and families, (4) using developmentally and individually effective approaches to connect with children and families, (5) using content knowledge to build a meaningful curriculum, (6) professional responsibilities, and (7) early childhood field experiences. Pre-student teaching field experiences in at least three settings, and student teaching experiences in at least two different settings is required.

This sheet provides a guide to the sequence of HD FS and EDUC courses; courses adhere to a prescribed sequence of semesters. Your academic advisor will help you develop an individual long range plan.

^B Block of courses listed together in the semester must be taken concurrently as sequenced

* See approved ECE list of courses for options in Biological Sciences, Humanities, Physical Sciences and Social Sciences

ISU requires a 3 credit U.S. Diversity course (satisfied by SP ED 250 or HD FS 240) and a 3 credit international perspective course (usually met through a University approved humanities or social science options from the ECE options list)

Elementary Education

A degree in elementary education at Iowa State prepares you to teach at the elementary school level. This program prepares you to teach all content areas from kindergarten through sixth grade.

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Additional information about endorsements can be found at: <https://www.education.iastate.edu/find-majors/elementary-education/>

Curriculum in Elementary Education

Educator Preparation Program Admission Requirements

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

Minimum grade of a "C" required for all EDUC/C I, HD FS, and SP ED courses and all content-specific pedagogy/methods courses. Minimum grade of "C-" required for all other courses in endorsement areas.

Primary Endorsement Options:

English/Language Arts
 English as a Second Language (ESL)
 Health
 Math
 Science
 Social Studies
 Special Education

Additional information about endorsements can be found at <https://www.education.iastate.edu/find-majors/elementary-education/>

Student Teaching: 16 credits

EDUC 416A	Supervised Student Teaching - Elementary: Primary grades (K-3)	8
EDUC 416B	Supervised Student Teaching - Elementary: Intermediate grades (4-6)	8
Total Credits		16

**Must receive a "C" or above

Total Credits: 120 minimum credits (credits will vary depending on endorsement option)

U.S. Diversity and International Perspectives Requirements: Students in elementary education fulfill the U.S. Diversity requirement with SP ED 250 or HD FS 240. Students in elementary education fulfill the International perspectives requirement by choosing three credits of coursework from university-approved Humanities or Social Sciences courses included on the Elementary Education approved options sheet.

Additional Endorsement

Candidates can pursue any of the primary endorsement areas listed above and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these endorsements can be found at: <https://iaastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf> (<https://iaastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>)
 Contact an Elementary Education academic adviser for additional information.

Educator Preparation Program Completion Requirements:

In order to be recommended for licensure, candidates must have completed all degree program requirements and be considered an Educator Preparation Program Completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iaastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iaastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic adviser as a resource in this process.

Event Management

Administered by the Department of Apparel, Events, and Hospitality Management.

The program offers study for the degree of Bachelor of Science with a major in event management. The program prepares undergraduate students for careers in leading event and meeting management businesses. Through the major, students gain background and experiences in planning, budgeting, and implementing conferences, meetings, and other special events in the public or private sectors. Course work provides students with a general education plus professional preparation focusing on the concepts and principles involved in meeting and event planning strategy; special event management; stakeholder development; budgets and finance; site selection; contracts, vendors, and negotiations; marketing and promotions; food and beverage management; meeting technology; event evaluation; and hospitality law. Event electives include courses in event sustainability, event digital promotion, incentive meetings, and international conference planning. Supporting courses include foodservice, catering, promotion, brand management, trend analysis, fashion, and resource management.

The program also houses "The Meeting Room: Where Experiences and Technology Innovate," a lab designed to allow Event Management students to have hands-on access to a number of cutting-edge

technology tools designed to let students focus on new and event disruptive ideas in events and meeting management. The lab is equipped with virtual reality headsets, event sound and lighting equipment, wireless connectivity to displays for BYOD, and group/collaboration furniture.

Graduates from this program are prepared for careers in event planning (corporate events, celebrations, education, promotions, commemorations, trade shows, weddings, conferences, association events, exhibitions, festivals, philanthropies, entertainment, fundraising, conventions, and sport events) and small business development (entrepreneurship). Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, promotion, and event management principles. Students are required to complete an internship in event management prior to graduation. The student experience is enhanced through networking and development events with our Event Management Executive Advisory Council, meeting/event industry conferences and association meetings, and international experiences designed specifically for event management students.

The AESHM Department offers a minor in event management. The minor can be earned by successfully completing the following for a total of 15 credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

9 credits are required:

EVENT 171	Introduction to Event Management	3
EVENT 371	Conference and Meeting Planning	3
EVENT 471	Special Events Coordination	3
And six credits of the following:		6
AESHM 287	Principles of Management in Human Sciences	
AESHM 340	Hospitality and Apparel Marketing Strategies or MKT 340 Principles of Marketing	
AESHM 342	Aesthetics of Consumer Experience	
AESHM 474	Entrepreneurship in Human Sciences	
HSP M 437	Hospitality and Event Technology Applications	
P R 220	Principles of Public Relations	
Total Credits		15

Leading to the degree Bachelor of Science

Total credits required: 123, including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree.

The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Students majoring in Event Management are required to earn C- or better in all AESHM and EVENT courses, and all courses in the EVENT Core.

Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Curriculum in Event Management

Administered by the Apparel, Events, and Hospitality Management Department.

Leading to the degree Bachelor of Science.

Total credits required: 123 including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree. The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Family and Consumer Sciences Education and Studies

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 areas (<http://www.nasafacs.org/national-standards-and-competencies.html>): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the curriculum choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Graduates of the Teacher Licensure option may teach family and consumer sciences in middle, junior high, and senior high schools. Students who enroll in Teacher Licensure must apply and be accepted into the educator preparation program prior to enrolling in advanced courses. This program option is approved by the Iowa Department of Education for the preparation of comprehensive and occupational career and technical education family and consumer sciences teachers.

Graduates of the Communications option have a broad-based knowledge of family and consumer sciences and the ability to communicate in a global and technologically changing society. They are able to plan, develop, creatively present and evaluate information. Students apply the principles of educational presentations, journalism, marketing, and public relations to the family and consumer sciences field within businesses, agencies, and organizations that work to empower individuals, families, and communities.

Graduates of the Professional Studies option pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for global settings. Students are prepared to work in a variety of careers ranging from non-profit organizations to the private sector in a business or entrepreneurial venture working with family nutrition, financial planning, life planning, current issues or other topics from the 16 content areas that affect individuals, families and communities.

Students in FCEDS may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/> and/or <http://www.ncfr.org/cfle-certification> (<http://www.ncfr.org/cfle-certification/>).

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (<https://www.aafcs.org/home> (<https://www.aafcs.org/home/>)):

CFCS: Certified in Family and Consumer Sciences; **CFCS-HDFS:** Certified in Human Development and Family Studies; **CFCS-HNFS:** Certified in Hospitality, Nutrition, and Food Science; and **CPFFE:** Certified Personal and Family Finance Educator.

There is also an opportunity to take courses that will allow you to be recommended for a family and consumer sciences-general endorsement or teacher licensure as a post baccalaureate student.

Communication Proficiency Requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C- or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

Curriculum in Family and Consumer Sciences Education and Studies

Administered by the Department of Human Development and Family Studies. Leading to a degree bachelor of science.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

Students in the program choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Option 1, **Teacher Licensure**, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior high, and senior high schools. Further information about educator preparation programs appears under Teacher Education in the School of Education.

Option 2, **Communications**, is designed for students seeking careers emphasizing the use of principles in journalism, marketing, communications, and public relations with diverse populations in business or social agency settings as well as extension, community agencies, community colleges, and youth and adult education programs in the global community.

Option 3, **Professional Studies**, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Careers include working with diverse populations in Extension, business, community agencies, and community colleges, or non-profit groups and organizations involving youth and adult education programs.

A minor in Educational Services in Family and Consumer Sciences is available, see requirements under Human Development and Family

Studies Courses and Programs or in the catalog section Family and Consumer Sciences Education and Studies.

Family and Consumer Sciences, MFCS

Master of Family and Consumer Sciences (M.F.C.S.)

The College of Human Sciences offers a nonthesis, professional master's degree program offered completely online through the Great Plains Interactive Distance Education Alliance (or GPIDEA).

Students select one of the following specializations (all require 36 credits): Dietetics, Family Financial Planning, Gerontology, and Youth Development

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component. A thesis or creative component could be included on mutual agreement of the student and major professor, with approval of the Graduate College.

Admission requirements for the MFCS include a bachelor's degree from a regionally-accredited college or university, minimum 3.0 cumulative grade point average for unrestricted admission, official transcripts, two letters of recommendation, and a goal statement. Students pursuing the Dietetics specialization must currently hold the credential of Registered Dietitian (RD) or be RD-eligible. Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates

<http://www.online.hs.iastate.edu/graduate-programs/certificates/>

Graduate Certificates

Four graduate certificates are available:

- Family Financial Planning (18 credits) is offered for students who do not need a master's degree and want to obtain the educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.
- Gerontology (15 credits)
- Youth Development Specialist (13 credits)
- Youth Program Management and Evaluation (13 credits)

For additional information, students should contact the College of Human Sciences Dean's Office, E262 Lagomarcino, Ames, Iowa 50011-1041, gpideainfo@iastate.edu

Family Financial Planning Interinstitutional Graduate Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in Family Financial Planning. This is an interinstitutional distance education program offered entirely online.

The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from each of the participating institutions: Iowa State University, Montana State University, North Dakota State University, Oklahoma State University; South Dakota State University, University of Missouri, and University of Nebraska-Lincoln.

At Iowa State University, Family Financial Planning is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-FFP) that consists of 36 semester credits. Neither a thesis nor a creative component is required. Students typically complete the program in three years while employed full time. Both the FFP graduate certificate and MFCS-FFP degree fulfill the educational requirements necessary for CFP® certification. A computer with minimum specifications, Web access, and an email address are required for completing the program.

More information about the requirements of the program: <http://www.online.hs.iastate.edu/graduate-degrees/family-financial-planning/>

FFP Graduate Certificate

The Graduate Certificate in Family Financial Planning consists of the six courses from the MFCS-FFP that contain the competencies required for the Certified Financial Planner (CFP®) Certification Examination. Students interested in attaining the CFP® credential and not a master's degree should enroll in the certificate program.

Courses included in the FFP graduate certificate program include:

FFP 540	Estate Planning for Families	3
FFP 545	Retirement Planning, Employee Benefits, and the Family	3
FFP 555	Insurance Planning for Families	3
FFP 565	Personal Income Taxation	3
FFP 583	Investing for the Family's Future	3
FFP 595	Financial Planning - Case Studies	3

Both the Master's degree and Graduate Certificate programs at Iowa State University are registered with Certified Financial Planner Board of Standards Inc. As a CFP Board-registered Program, ISU FFP courses

satisfy CFP Board's education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP®, CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and examination requirements. (CFP Board of Standards web site: www.cfp.net (<http://www.cfp.net>).

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

Admission Procedures: Admission to the FFP Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section in the catalog.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Financial Counseling and Planning

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

The **Financial Counseling and Planning** curriculum prepares students for careers in family financial services. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on individual specific career goals, students may select courses that lead to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic and with industry partners. A field experience encourages students to apply their studies and to experience the profession in real-world settings.

Total credits required: 120

** See HD FS General Education Selections sheet for course options. Students in Financial Counseling and Planning fulfill the US Diversity and International Perspectives Requirement by choosing three credits of coursework from each of the university-approved lists.

This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation.

Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Food Science (H SCI)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. The food science major is approved by the Institute of Food Technologists.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Courses listed below are required.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

14		14

Total Credits: 121-124

* Choose elective courses to total equal to or greater than 120 credits.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation.

Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point considerations.

Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary food science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science
- Nursing

Undergraduate Study

Culinary Food Science

Culinary food science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary food science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/culinary-science/> (<http://www.fshn.hs.iastate.edu/undergraduate-programs/culinary-science/>)

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor's and Master's degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a \$30 fee for a statement of verification of completion of the DPD. For information about verification statements policies, see the dietetics program website: <http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/>.

Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate

wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

Diet and Exercise

A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (<http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise/>) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

The food science major is approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/>

Students in food science have the opportunity to pursue a Master of Business Administration (<http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science/>) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food

science/MBA degrees is a rigorous 5-year program, and admission is very selective.

Nutritional Science

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/nutritional-science/>

Nursing

The RN to BSN program is designed for the Registered Nurse (RN) to advance their nursing career to the next level with a Bachelor of Science in Nursing (BSN). The BSN program prepares nurses to apply new skills to day-to-day interactions with patients and co-workers, as well as provides students with broader perspective on the increasingly complex healthcare environment. The RN-BSN program equips students to enhance quality and safety, work effectively in a team, grow as a professional and develop leadership skills for the future. A BSN is necessary for management positions, public health nursing, and specialized clinical positions. It also prepares individuals for admission to graduate nursing programs in nursing education, nursing administration, and advanced practice nursing.

Within the RN-BSN program, students have the opportunity to choose an area of interest for elective options and practicum experience. Interdisciplinary opportunities and clubs/organizations provide a number of opportunities for students to get involved. For more information: <https://fshn.hs.iastate.edu/undergraduate-programs/nursing/>

Departmental Learning Outcomes

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate

effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field. For more information: <http://www.fshn.hs.iastate.edu/undergraduate-programs/outcomes/> (<http://www.fshn.hs.iastate.edu/undergraduate-programs/nutritional-science/>)

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers coursework for a variety of minors (<http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/>). Minors available include:

- culinary food science
- food safety (interdepartmental minor)
- food science
- nutrition
- food and society

All minors have the following requirements:

- At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
- The minor must include at least 9 credits that are not used to meet any other college or university requirement.
- The same courses may not be applied to two different minors.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science, nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The Food Science and Technology (FST) graduate program offers MS and PhD degrees in the general areas of Food Chemistry and Functionality, Food Safety and Microbiology, and Food Processing. The FST core curriculum and interdisciplinary faculty team provides holistic graduate student training. Individuals with an undergraduate or graduate degree from a variety of academic training backgrounds, such as food sciences and the various disciplines of biology, chemistry, and agricultural sciences, may enter the FST program.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The three main departments are FSHN, Animal Science, and Kinesiology, whereas other departments (such as; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved. (See Nutritional Sciences interdepartmental graduate major).

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master's degree program may be admitted.

The department also offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Course topics include food microbiology, food defense, food toxicology, HACCP, and additional topics related to food safety. Students may be admitted if qualified for admission to the food science master's degree program.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees

in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to:

- Apply scientific thinking to the analysis, synthesis and evaluation of knowledge within the discipline of food science, nutritional sciences, or dietetics
- Apply ethical reasoning within the discipline of food science, nutritional sciences or dietetics
- Effectively communicate discipline-specific information in written and oral forms to scientific audiences
- Effectively interact within scientific teams
- Facilitate learning within FSHN courses

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (<http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology/#minor-in-food-science-and-technology>)
- nutritional sciences (<http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences/#minor-in-nutritional-sciences>)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.

- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 501

Certificate - Undergraduate

Health Coach (<http://www.fshn.hs.iastate.edu/undergraduate-programs/health-coach-certificate/>)

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (<http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense/>)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program .

Dietetics Internship (<http://www.dietetics.iastate.edu/>)

The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a "Graduate Certificate in Dietetics Internship" which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) credential. There is a nonrefundable application fee of \$75.

Gerontology

Interdepartmental Minor and Interinstitutional Program

The gerontology program is designed for students desiring careers in aging-related fields and for students interested in improving their understanding of aging persons in American society. Students are expected to take courses to develop the necessary interdisciplinary

breadth which, in combination with other disciplinary training, can prepare them to work with older adults.

Graduates understand the ways in which individual and societal aging influence, and are impacted by, developments in their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of human aging.

Gerontology courses are offered in the interdepartmental gerontology program in the following participating departments and programs: Architecture; Biochemistry, Biophysics, and Molecular Biology; Economics; Apparel, Educational Studies, and Hospitality Management, Food Science and Human Nutrition; Kinesiology; Human Development and Family Studies; Political Science; Psychology; and Sociology.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in gerontology. A balanced grouping of courses assists the student in developing both a sensitivity to the issues and the ability to synthesize ideas from the variety of disciplines important to the study of the aging process.

Minor

Undergraduate students may minor in gerontology by taking 16 semester hours of gerontology related courses. Nine of these credits must come from the following courses:

GERON 373	Death as a Part of Living	3
GERON 377	Aging and the Family	3
GERON 378	Retirement Planning and Employee Benefits	3
GERON 463	Environments for the Aging	3

Students will participate in a prepracticum seminar, GERON 466 Gerontology Prepracticum Seminar, and will complete a supervised field practicum after all gerontology coursework is completed (GERON 467 Gerontology Practicum). A minimum of 3 semester credits must be selected from a list of supportive gerontology related courses. Supportive courses include units or topics related to aging and can be used to complement the student's major interests. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. The student's minor program must be approved by the undergraduate gerontology coordinator.

Graduate Study

A declared graduate minor in gerontology consists of a minimum of 12 credits taken from a list of acceptable courses, and from at least two departments. Nine of the 12 credits must be in courses that are focused specifically on aging. One 590 course (3 credits maximum) can be taken as part of the 12 credits. GERON 510 Survey of Gerontology is required for all minor students. At least one member of the gerontology faculty

will be on a student's advisory committee; this person must be a member of the Graduate Faculty. Contact the coordinator to determine whether courses other than those listed below are available.

Interinstitutional Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in gerontology. This is an interinstitutional distance education program offered through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects the home institution, which grants the degree. After admission at the home institution, the student takes courses from the seven participating institutions: Iowa State University, Kansas State University, North Dakota State University, Oklahoma State University, Texas Tech University, University of Arkansas, and University of Missouri.

The master's degree consists of 36 semester hours, 24 of these hours are from the following courses:

GERON 530	Perspectives in Gerontology	3
GERON 534	Adult Development	3
GERON 540	Nutrition and Physical Activity in Aging	3
GERON 545	Economics, Public Policy, and Aging	3
GERON 563	Environments for the Aging	3
GERON 577	Aging in the Family Setting	3
GERON 584	Program Evaluation and Research Methods in Gerontology	3
GERON 594	Professional Seminar in Gerontology	3

The remaining 12 credits will include electives and specific courses needed to meet the requirements of the institution awarding the degree. Neither a thesis nor a creative component is required.

Gerontology Graduate Certificate Program

The 15-credit Graduate Certificate Program in Gerontology includes the following courses from the list of core courses:

GERON 530	Perspectives in Gerontology	3
GERON 534	Adult Development	3

The additional nine credits required for the certificate can be chosen from the remaining core courses or from other approved elective courses. A maximum of three credits of practicum also can be included in the elective credits.

Admission Procedures: Admission to the Gerontology Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of the catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration, and fee payment processes through ISU.

Health Coach

Health Coach - Certificate

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach. The certificate provides additional credentials for students already pursuing a bachelor's degree in food science and human nutrition, kinesiology, or psychology. Students would be able to sit for the American Council on Exercise exam should they choose to do so.

Any Iowa State University student may apply for the undergraduate health coach certificate. Application form (<http://www.registrar.iastate.edu/sites/default/files/uploads/forms/Urequest.pdf>) The completed application should be submitted to the academic adviser in the student's home department: Food Science and Human Nutrition – Anne Oldham (aoldham@iastate.edu) Kinesiology – Marsha Wissink (mwissink@iastate.edu) Psychology – Kristin Towers (ktowers@iastate.edu).

The Health Coach certificate requires 23 credits:

Note: Pre-requisites apply for all courses required in the health coach certificate.

FS HN 265	Nutrition for Active and Healthy Lifestyles	3
FS HN 364	Nutrition and Prevention of Chronic Disease	3
or FS HN 365	Obesity and Weight Management	
FS HN 361	Nutrition and Health Assessment	2
KIN 458	Principles of Fitness Assessment and Exercise Prescription	4
KIN 467	Exercise and Health: Behavior Change	3
PSYCH 422	Counseling Theories and Techniques	3
PSYCH 485	Health Psychology	3
FS HN 495	Practicum	2
or KIN 494A & KIN 494B	Practicum in Motivational Interviewing for Health: Principles of Motivational Interviewing and Practicum in Motivational Interviewing for Health: Supervised Experience	

Total Credits

23

Hospitality Management

Administered by the Department of Apparel, Events, and Hospitality Management

The Hospitality Management program offers study for the degree of Bachelor of Science with a major in hospitality management. As the only 4-year hospitality program in the state of Iowa, the program prepares undergraduate students with essential principles of managing a variety of hospitality organizations, such as hotels, restaurants, clubs, and foodservice companies. Students also develop expertise in managing diverse areas, such as accounting and finance, human resources, marketing, foodservice, tourism, and lodging.

Students get hands-on experience at the Joan Bice Underwood Tearoom, a 105-seat learning laboratory where students take responsibility for meal preparation and service. The Joan Bice Underwood Tearoom is the earliest established student run restaurant that is still in operation on a college campus in the United States.

Our students participate in internships locally, nationally, and internationally with a range of hotels, restaurants, caterers, theme parks, sports facilities, cruise ships convention and visitor's bureaus, independent businesses, and country clubs. Courses provide students with opportunities to develop and apply management techniques in hospitality organizations. The Hospitality Management curriculum provides students with the opportunity to obtain professional certifications in multiple areas.

The Hospitality Management program mission is to create, share, and apply knowledge to provide hospitality consumers with products, services, and experiences to enhance overall well-being. We accomplish our mission with a personalized, nationally ranked program. Our students learn in a nurturing, safe, and inclusive environment, with caring faculty with industry experience.

The Bachelor of Science Degree

Total credits required: 123, including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree.

Minor in Hospitality Management

The Hospitality Management minor (HSPM) requires the completion of at least 15 credits from the Hospitality Management curriculum. The minor must include at least 6 credits in courses numbered 300 or above taken at ISU. All course pre-requisites must be completed prior to taking the course. All minor courses must be taken for a grade.

Undergraduate Study

The program offers a Bachelor of Science degree in hospitality management. Coursework is planned to provide students with a general

education plus professional preparation for supervisory and executive positions in hospitality organizations such as clubs, hotels, dining, theme parks, cruise lines, and casinos. Principles of business management are presented, as well as fundamentals of hospitality operations.

Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, marketing, and operational principles for managing hospitality operations. They demonstrate best practices in meeting customer expectations and use of technology (e.g., Point-of-Sales systems, property management systems, and revenue management systems) to achieve operational efficiency and effectiveness.

Learning experiences are provided in the quantity food production and service facility of the Hospitality Management program and other approved establishments. Students are required to have a total of at least 800 hours of relevant work experience prior to graduation. Of the 800 hours, 200 hours are required prior to completing one year in the program.

The program offers a concurrent B.S. and M.S. degree that allows students to obtain a B.S. and M.S. degree in hospitality management in 5 years. Application for admission to the Graduate College should be made in the junior year.

Minor

A minor in Hospitality Management can be earned by successfully completing the following for a total of 15 credits. The minor must include at least six (6) credits in courses numbered 300 or above taken at Iowa State University. All course prerequisites must be completed prior to take the course. All minor courses must be taken for a grade.

The Hospitality Minor requires students to complete the following courses:

HSP M 101	Introduction to the Hospitality Industry	3
HSP M 133	Food Safety Certification	1
HSP M 233	Hospitality Sanitation and Safety	3
Total Credits		7

The remaining eight (8) credits may be selected from the following:

AESHM 238	Human Resource Management	3
AESHM 287	Principles of Management in Human Sciences	3
AESHM 340	Hospitality and Apparel Marketing Strategies	3
AESHM 474	Entrepreneurship in Human Sciences	3
HSP M 189	Introduction to University Dining Services Management	1
HSP M 201	Casino Management I	3
HSP M 230	Introduction to Hospitality Performance Analysis	3
HSP M 260	Global Tourism Management	3

HSP M 280	Non-Alcoholic Beverages and Café Operations	3
HSP M 289	Contemporary Club Management	3
HSP M 301X	Hospitality Revenue Management	3
HSP M 315	Hospitality Law	3
HSP M 320	Attractions and Amusement Park Administration	3
HSP M 352	Lodging Operations Management I	3
HSP M 383	Wine and Spirits in Hospitality Management	2
HSP M 383L	Wine, Spirits, and Mixology Laboratory in Hospitality Management	1
HSP M 385X	Beer and Brewed Beverages in the Hospitality Industry	1
HSP M 433	Hospitality Financial Management	3
HSP M 437	Hospitality and Event Technology Applications	3
HSP M 439	Advanced Hospitality Human Resource Management	3
HSP M 452	Lodging Operations Management II	3
HSP M 455	Strategic Management in Hospitality	3

Curriculum in Hospitality Management

Administered by the Apparel, Events, and Hospitality Management Department. Leading to the Bachelor of Science degree.

The curriculum in Hospitality Management develops students as leaders for the hospitality professions.

A minor in Hospitality Management is available; see requirements under Hospitality Management, Courses and Programs.

Students majoring in Hospitality Management are required to earn C- or better in all AESHM and HSP M courses. Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Degree Requirements 10 Communications and Library

ENGL 150	Critical Thinking and Communication	Grade of C or better required in ENGL 150 and ENGL 250	3
ENGL 250	Written, Oral, Visual, and Electronic Composition		3
LIB 160	Information Literacy		1
Select one from the following:			3
COMST 211	Interpersonal Communication		
COMST 214	Professional Communication		
SP CM 212	Fundamentals of Public Speaking		

Total Credits **10**

9-10 Natural Sciences and Mathematical Disciplines

Select one MATH course from: ^{AESHM 175D required if C+ or lower in MATH credits} 3

MATH 104	Introduction to Probability	
MATH 105	Introduction to Mathematical Ideas	
MATH 140	College Algebra	
MATH 150	Discrete Mathematics for Business and Social Sciences	
MATH 160	Survey of Calculus	
FS HN 167	Introduction to Human Nutrition	3
STAT 101	Principles of Statistics	3-4
or STAT 104	Introduction to Statistics	
Total Credits		9-10

9 Social Sciences

ECON 101	Principles of Microeconomics	3
PSYCH 101	Introduction to Psychology	3
SOC 134	Introduction to Sociology	3
Total Credits		9

6 Humanities

AESHM 342	Aesthetics of Consumer Experience	3
Approved courses		3
Total Credits		6

16-17 Other Professional Courses

ACCT 284	Financial Accounting	3
AESHM 112	Orientation for AESHM	1
AESHM 113E	Professional Development for AESHM: Event and Hospitality Management - Directions Learning Community	2
or AESHM 213	Transitions: Pre-Professional Strategies and Career Explorations	
AESHM 170D	Supervised Work Experience I: Hospitality	1
AESHM 270D	Supervised Work Experience II: Hospitality	1-2

Total Credits: 122-123

US Diversity and International Perspectives Requirement: Students in HSP M fulfill the US Diversity and International Perspectives Requirements by choosing 3 credits of coursework from each of the University-approved lists.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

- ¹ BIOL 101 required if student has not completed high school biology
- ² When the 4-year plan indicates HSP M Group or General Electives, choice depends on courses available. However, you must have a total of 13-15 credits of HSP M electives and 11-17 credits of General Electives (HSP M courses may be taken to meet General Electives requirements).
- ³ CHEM 160 required if student has not completed high school chemistry

Graduate Study

The Hospitality Management program offers work for the Master of Science and Doctor of Philosophy degrees in hospitality management. Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. The Master's degree program is designed to prepare individuals for managerial and leadership positions in industry, business, and non-profit organization; teaching careers; and continued graduate study.

The doctoral program is designed to prepare individuals to teach in programs at the university level; provide leadership in non-profit organizations; and/or conduct advanced research at the corporate level or with research firms.

A degree in hospitality management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or

closely related fields are encouraged to apply. PhD applicants must have two (2) years of professional work experience in the field.

The Master of Science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take three core courses out of the four offered in the core areas (human resources, financial management, marketing, and strategic management).

The PhD program requires a minimum of 72 credits, up to 30 of which may be applied from the Master's degree. All PhD students take a minimum of 15 research/dissertation credits.

Human Development and Family Studies Department

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in five curricula: Child, Adult, and Family Services; Early Childhood Education; Family and Consumer Sciences Education and Studies, Financial Counseling and Planning, and an affiliated program: Early Childcare Education and Programming (a distance education program offered in collaboration with six other universities).

Students graduating in Human Development and Family Studies will

1. Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats to foster collaboration, provide information and advance knowledge related to child, adult, family, and community services.
2. Consistently and realistically analyze and evaluate one's own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy related to working with children, adults, families and communities.
3. Understand content related to working with children, adults, families, and communities within a chosen program. Use critical thinking skills to evaluate and utilize evidence-based practices. Use logical and ethical reasoning to make decisions and solve problems.
4. Understand the diverse needs of children, adults, and families. Ensure equitable access of children, adults, and families to appropriate environments that support healthy living. Engage children, adults, and families with socially responsible and respectful behavior.

Communication Proficiency requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C- or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with

the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The **Child, Adult, and Family Services** curriculum leads to work in helping professions with employment opportunities in public and private agencies. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults in the areas of education/prevention, treatment, and administration. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in Child, Adult, and Family Services may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/> and/or <http://www.ncfr.org/cfle-certification> (<http://www.ncfr.org/cfle-certification/>).

The curriculum in **Early Childhood Education – Unified** prepares graduates to teach young children and work with their families. This curriculum has been approved by the Iowa Department of Education and meets requirements for candidates to seek teacher licensure in early childhood education – unified, which permits individuals to teach general and special education for children from birth through third grade. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through third grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see <http://www.hdfs.hs.iastate.edu/undergraduate-majors/ece/>.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses.

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree. (<http://catalog.iastate.edu/collegeofhumansciences/familyandconsumerscienceseducationandstudies>)

The curriculum in Family and Consumer Sciences Education and Studies (FCEDS) prepares graduates with a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities.

The study of Family and Consumer Sciences Education incorporates the following 16 content areas (<http://www.nasafacs.org/national-standards-and-competencies.html>): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the program choose one of three options, Teacher Licensure, Communications, or Professional Studies.

Students in Family and Consumer Sciences Education and Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/> and/or <http://www.ncfr.org/cfle-certification> (<http://www.ncfr.org/cfle-certification/>).

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (<http://www.aafcs.org/home> (<https://www.aafcs.org/home/>)): CFCS: Certified in Family and Consumer Sciences; CFCS-HDFS: Certified in Human Development and Family Studies; CFCS-HNFS: Certified in Hospitality, Nutrition, and Food Science; and CPFFE: Certified Personal and Family Finance Educator.

There is also an opportunity to take courses that will allow you to be recommended for a family and consumer sciences endorsement or teacher licensure as a post baccalaureate student.

The **Financial Counseling and Planning** (FCP) curriculum prepares students for careers in family financial services. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on career goals, students select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic and with program partners in the financial services industry. A field work experience helps students apply their studies and experience the profession in real-world settings.

Financial Counseling and Planning majors are also prepared to enter graduate programs in family financial planning, financial education, economics, finance, and law.

Juniors and seniors in Financial Counseling and Planning who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a B.S. in Financial Counseling and Planning and a M.S. in Human Development and Family Studies or a B.S. in Financial Counseling and Planning and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. See Graduate Study for more information (<http://www.hdfs.hs.iastate.edu/graduate/>).

The Financial Counseling and Planning major is registered with Certified Financial Planner Board of Standards Inc. as a CFP Board-registered Program. ISU courses satisfy CFP Board's education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP® CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and examination requirements. (CFP Board of Standards web site www.cfp.net.)

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

FCP majors also satisfy the education requirements for the Accredited Financial Counselor (AFC®) designation offered through the Association for Financial Counseling and Planning Education (AFCPE).

Affiliated Programs

The **Early Childcare Education and Programming (E C P)** curriculum, offered by the Great Plains Interactive Distance Education Alliance (GPIDEA), is designed to prepare graduates to work in a variety of early care and education programs in local communities and on military installations. Some of these programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This is an online program offered through a collaboration of seven universities as part of GPIDEA where the program is referred to as Early Care and Education for a Mobile Society. For more information see <https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society> (<https://www.gpidea.org/program/early-care-and-education-in-a-mobile-society/>).

The E C P curriculum is designed to provide content for the final two years of a student's program; the content is focused specifically on topics directly relevant to the major. Students will complete a total of 120 credits for the major, 51 of which are specific to the E C P curriculum. These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete 30 credits of college work, a lifespan development course, and have a 2.5 GPA to be admitted to E C P. If students prefer to be admitted to ISU before being admitted to the E C P major, they can enroll as Pre ECP (P ECP) students until they are eligible for the E C P major. For more information about the program at Iowa State, see <http://www.online.hs.iastate.edu/ecp> (<http://www.online.hs.iastate.edu/ecp/>).

Curricula:

- **Child, Adult and Family Services**
- **Early Childhood Education – Unified**
- **Family and Consumer Sciences Education and Studies**
- **Financial Counseling and Planning**
- **Affiliated Program: Early Childcare Education and Programming (GPIDEA program)**

Minors

The department offers minors in Child, Adult, and Family Services, Educational Services in Family and Consumer Sciences, and Financial Counseling and Planning. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The Child, Adult, and Family Services minor may be earned by completing 15 credits:

HD FS 102	Individual and Family Development, Health, and Well-being	3
One of the following:		3
HD FS 223	Child Development and Health	
HD FS 226	Development and Guidance in Middle Childhood	
HD FS 227	Adolescent and Emerging Adulthood	
HD FS 234	Adult Development	
HD FS 377	Aging and the Family	
Three of the following:		9
HD FS 249	Parenting and Family Diversity Issues	
HD FS 270	Family Communications and Relationships	
HD FS 360	Housing and Services for Families and Children	
HD FS 367	Abuse and Illness in Families	
HD FS 373	Death as a Part of Living	
HD FS 395	Children, Families, and Public Policy	
HD FS 449	Program Evaluation and Proposal Writing	
HD FS 463	Environments for the Aging	
HD FS 479	Family Interaction Dynamics	
Total Credits		15

The Education Services in Family and Consumer Sciences minor may be earned by completing 15 credits:

HD FS 102	Individual and Family Development, Health, and Well-being	3
FCEDS 206	Professional Roles in Family and Consumer Sciences	2
FCEDS 306	Educational Principles for Family and Consumer Sciences	4
FCEDS 413	Planning and Assessment for Family and Consumer Sciences	3
One of the following:		3
FCEDS 418	Foundations of Career and Technical Education in Family and Consumer Sciences	
HD FS 341	Household Finance and Policy	
HD FS 360	Housing and Services for Families and Children	
HD FS 367	Abuse and Illness in Families	
HD FS 373	Death as a Part of Living	
HD FS 395	Children, Families, and Public Policy	
Total Credits		15

The Financial Counseling and Planning minor may be earned by completing 15 credits:

HD FS 283	Personal and Family Finance	3
Twelve credits from the following:		12
HD FS 341	Household Finance and Policy	
HD FS 378	Retirement Planning and Employee Benefits	
HD FS 383	Fundamentals of Financial Planning	
HD FS 482	Family Savings and Investments	
HD FS 484	Estate Planning for Families	
HD FS 489	Financial Counseling	
HD FS 489L	Financial Counseling Laboratory	
Total Credits		15

Graduate Study

The department offers work for the Master of Science (thesis or non-thesis options) and Doctor of Philosophy degrees with the major in Human Development and Family Studies. Minors are also available for students taking major work in other departments. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and/or intervention or prevention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.

Graduate study in Human Development and Family Studies at Iowa State University is multidisciplinary and focuses on research and practice in several content areas such as adolescent/youth development, adult development and aging, family studies and policy, family economic well-being and financial planning, infant and child development, health and well-being; and lifespan development.

Prerequisite to work in the major is the completion of a related undergraduate program with basic courses and/or experiences in areas such as child/human development, community and regional planning, economics, education, family studies, psychology, or sociology. Additional coursework or prerequisites (e.g., basic statistics) may be required depending on the undergraduate program and program of study. Students may be admitted to our doctoral program with either a bachelor's (M.S./Ph.D. Track, 5 years) or a master's degree (Ph.D. Track only, 3 years). Students admitted to the Ph.D. Track without a prior master's degree complete requirements for a thesis-based master's degree as part of their doctoral program of study.

All students take a core set of courses; the program of study is then completed with a selection of courses that meet the individual needs of the student. The variety of and flexibility in the coursework allows a student to tailor a program to specific academic interests. The graduate programs are based on a theory, research, and application interactive

paradigm with all three areas integrated into content and method courses.

The department offers a graduate minor in Human Development and Family Studies. For more detailed information about the minor, see the Graduate Minors tab.

The department also offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field.

The department also participates in several Master of Family and Consumer Sciences (MFCS) degree programs (<http://catalog.iastate.edu/collegeofhumansciences/familyandconsumersciences/>). Admission to the youth (YTH), family financial planning (FFP) and gerontology (GERON) specialization programs require submission of the Graduate College application form, transcripts, 2 letters of recommendation, resume and a goal statement. Students in a MFCS program select one of the options listed below.

1. Master of Family and Consumer Sciences - Human Development and Family Studies (MFCS-HDFS). The Master of Family and Consumer Sciences degree specialization track in Human Development and Family Studies (HDFS) provides students with the opportunity to enhance their background knowledge and skills for working with children and families (37 credits).
2. Master of Family and Consumer Sciences - Youth Development (MFCS-YD). This is an entirely online degree focusing on the skills to serve today's young people. The degree uses a strengths-based curriculum that supports you to grow socially, emotionally, and cognitively. There are also two youth development related certificates available for students (see Graduate Certificates tab for details) (36 credits).
3. Master of Family and Consumer Sciences - Family Financial Planning Program (MFCS-FFP). This is a master's degree program offered entirely online, designed to prepare individuals to work in the financial planning field (36 credits). Completion of course work in the master's degree or a graduate certificate meets the educational requirements to sit for the Certified Financial Planner (CFP) Board of Standards Certification Examination.

The department offers a Financial Counseling and Planning (FCP) concurrent degree program that allows students to obtain a B.S. in FCP and an M.S. in HD FS or a B.S. in FCP and a Graduate Certificate in Family Financial Planning in 5 years. Application for admission to the Graduate College should be made near the end of the junior year. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. Students interested in these programs should contact the department for details.

Finally, the department collaborates with the interdepartmental Gerontology program; students may declare a minor in Gerontology. The Master of Family and Consumer Sciences - Gerontology program (MFCS-GERON) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to older adults. Professionals offering direct services often are involved in health promotion programs, directing inter-generational activities, managing senior centers or retirement communities, counseling older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of older adults, and work with business and industry on issues related to an aging work force.

Graduate Minors

The department offers a graduate minor in Human Development and Family Studies. To earn this minor, students in a Master's program must take 9 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed). To earn a minor in HD FS students in a Doctoral program must take 12 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed). A graduate faculty member from the minor program must serve on the student's POS Committee.

HDFS Certificates

The department offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field. The certificates emphasize application and relevance to growing diversity and demands on the work force. The four certificate areas are:

1. Developmental and Family Sciences Advanced Research Design and Methods (15 credits)
2. Family Well-Being in Diverse Society (12 credits)
3. Infant and Early Childhood Mental Health (12 credits, online)
4. Life-Span Development (12 credits, online)

For more information about courses for the certificates, go to <http://www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/#developmental-and-family-sciences-advanced-research-design-and-methods>

Youth Development Certificates

The department also collaborates to offer two certificates related to youth development through the MFCS program. Both certificates are designed to prepare individuals who work directly with youth or are involved in education and research related to youth. For more

information, go to <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>.

1. Youth Development Specialist Certificate (13 credits)
2. Youth Program Management and Evaluation Certificate (13 credits)

Family Financial Planning Certificates

The MFCS – Family Financial Planning (FFP) program also offers two certificates listed below. More information can be found at <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-ffp/>.

1. FFP certificate. Master of Family and Consumer Sciences with Family Financial Planning (FFP) specialization graduate certificate program (18 credits)
2. FHC certificate. Master of Family and Consumer Sciences Financial and Housing Counseling (FHC) specialization graduate certificate program (18 credits)

Human Sciences

Human Sciences courses provide integrative study and enriching experiences in areas that cut across the diverse curricula of the College of Human Sciences. These may include such areas as leadership, global understanding, social justice/responsibility, and ethics. Students in any college may take these courses.

Kinesiology

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.
3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

Undergraduate Study

The Department of Kinesiology offers a Bachelor of Science degree in Kinesiology & Health. The undergraduate curriculum major/option

is comprised of three components: general education, required departmental courses and the major/option courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S./M.A.T.R. degree in Athletic Training

Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination.

In addition to BOC certification, many states also have licensure requirements to practice athletic training. The current undergraduate Athletic Training education program at Iowa State University, accredited since 2001, includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation. The M.A.T.R. degree program is currently seeking CAATE approval for a level of degree change.

B.S. degree in Kinesiology & Health

The Kinesiology & Health major includes five specialization options. Options comprise a focused area of study within Kinesiology and Health. Coursework within each specialization option builds upon personal and scholarly learning by enabling students to master content and skills specific to career applications. Options available are:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Academic options within the Kinesiology & Health major

Students in the **Community and Public Health** option are prepared for professional employment at local, state or national health agencies, medical centers, and other public or private organizations that seek to promote health in the population.

Students in the **Exercise Science** option are prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health/fitness facilities, clinics, or hospitals. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health. Graduates also have a basic understanding of management issues related to business applications in the health and fitness field.

Students in the **Physical Activity and Health Promotion** option are prepared for careers focused on health and physical activity. This option provides more emphasis on behavioral and psychological aspects of physical activity. Students are prepared for careers in community based settings, including work sites, schools, hospitals, and other community agencies.

Students in the **Physical Education/Teacher Education** option are prepared to teach physical education in grades K-12 and to meet the State of Iowa learning outcomes for teachers. Graduates can plan developmentally appropriate physical education, and individualize instruction and assessment for diverse audiences.

Students in the **Pre-Health Professions** option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in medicine, physical therapy, physician assistant or other healthcare professions.

Learning outcomes for the undergraduate degree

Despite the diversity of options, the learning outcomes comprise a common framework for each student as they progress through Iowa State University.

The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

Communication

Uses clear and effective written, oral, visual, and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.

Lifelong learning, assessment, and self-reflection

Analyzes and evaluates one's own knowledge, abilities and actions relative to professional standards, seeks opportunities to grow professionally, and utilizes self-assessment and assessment of others to foster physical, cognitive, social, and emotional well-being.

Content knowledge, discovery, and critical thinking

Understands fundamental concepts of physical activity and health, conducts scientific inquiry, and applies critical thinking to solve problems from personal, scholarly, and professional perspectives.

Ethics, diversity, and social justice

Demonstrates leadership and social responsibility to improve quality of life for others and ensures equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.

Other Program Offerings:

B.S./M.S. degree in Diet and Exercise

A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in Diet and Exercise is available. The program is jointly

administered by the Department of Food Science and Human Nutrition (FS HN), and the Department of Kinesiology. Students interested in this program must enroll as freshmen in the Pre-Diet and Exercise program. In the fall of the junior year, students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue toward completion of a B.S. degree in Dietetics or Kinesiology & Health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in Diet and Exercise.

More information can be found at: <http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise/>

Endorsement to coach interscholastic athletics

The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see School of Education, Teacher Education. More information can be found at: <http://www.kin.hs.iastate.edu/>

Endorsement to teach health education

Those interested in teaching health education in the public schools may get a primary licensure or an additional endorsement. The State Department of Education has approved the Health Teaching Licensure for grades 5-12.

Basic Activity Instruction Program

The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, fitness, martial arts, and sports. These courses are designed to serve general education purposes for all students.

Dance

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and physical education in the public schools may major in Kinesiology and Health (Physical Education Teacher Education) and minor in Dance.

An interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index: Performing Arts to find Performing Arts Major, Emphasis in Dance.

Curriculum in Athletic Training

The athletic training major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). See program details (<http://www.istatesportsmed.com/>) for course requirements.

Admission procedures and technical standards can be found at <http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>.

Curriculum in Kinesiology and Health

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the medical, health, physical activity, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of five options:

1. Community and Public Health
2. Exercise Science
3. Physical Activity and Health Promotion
4. Physical Education Teacher Education
5. Pre-Health Professions

Minors in dance, exercise science, health promotion, and kinesiology, are available; see requirements under Kinesiology, Undergraduate Programs.

A major in Performing Arts with a dance emphasis is available; see requirements under Curriculum in Performing Arts Program, Dance.

Communication Proficiency

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with the ENGL 150 grade being no lower than a C- and the ENGL 250 grade no lower than a C. Students not meeting this condition must earn a C or better in an advanced writing course:

ENGL 302	Business Communication	3
or ENGL 314	Technical Communication	
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See university approved list.

General Education:

Physical and Life Sciences:

BIOL 255	Fundamentals of Human Anatomy	3
BIOL 255L	Fundamentals of Human Anatomy Laboratory	1
BIOL 256	Fundamentals of Human Physiology	3
BIOL 256L	Fundamentals of Human Physiology Laboratory	1

Additional option-specific requirements are:

Community and Public Health

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1

CHEM 163	College Chemistry	4
CHEM 163L	Laboratory in College Chemistry	1
FS HN 167	Introduction to Human Nutrition	3
MICRO 201	Introduction to Microbiology	2
MICRO 201L	Introductory Microbiology Laboratory	1

or ENGL 314 Technical Communication
or SP CM 31 Business and Professional Speaking

Program requirements:

The following courses are required in all majors and options:

H S 110	Personal and Consumer Health	3
H S 350	Human Diseases (*)	3
KIN 252	Disciplines and Professions in Kinesiology and Health	1
KIN 253	Orientation and Learning Community in Kinesiology and Health	1
KIN 258	Principles of Physical Fitness and Conditioning	2
KIN 358	Exercise Physiology (*)	3
KIN 359	Exercise Physiology Lab	1

* A grade of C- or better is required.

Total cr. required to graduate: A minimum of 124 credits is required, with a minimum of 46 credits in courses numbered 300 or above.

Courses for Kinesiology and Health Major

Option 1. Community and Public Health

This option prepares students for a diverse array of careers in public and private health agencies as well as local, state and federal government programs. Students are qualified for careers in a variety of health and human service agencies, community organizations, and hospitals. This option also provides the ideal background training for credentials as a Certified Health Education Specialist (CHES).

Option Requirements:

P R 220	Principles of Public Relations	3
or P R 305	Publicity Methods	
H S 105	First Aid and Emergency Care	2
H S 215	Drug Education	3
H S 310	Community and Public Health (*)	3
H S 385	Preparation and Search Strategies for Kinesiology and Health Internships	0.5
H S 430	Community Health Program Development	3
H S 464	Physical Activity Epidemiology	3
or VDPAM 428	Principles of Epidemiology and Population Health	
H S 485	Internship in Health Studies	8-16
HD FS 270	Family Communications and Relationships	3
HD FS 449	Program Evaluation and Proposal Writing	3
or ENGL 309	Proposal and Report Writing	
PSYCH 485	Health Psychology	3

One of the following

HD FS 377	Aging and the Family	3
or HD FS 395	Children, Families, and Public Policy	

Electives: 6-14 credits

* A grade of C- or better is required.

Option 2. Exercise Science

This option prepares students for careers in exercise/fitness promotion. Students are prepared as health/fitness specialists, personal trainers, strength and conditioning specialists, and health coaches. Students find work in fitness centers, worksite health programs, medical facilities, cardiac rehabilitation centers, and other agencies that provide fitness services. Students are eligible to sit for certification exams offered by the American College of Sports Medicine and the National Strength & Conditioning Association.

Option Requirements:

KIN 259	Leadership Techniques for Fitness Programs	3
KIN 266	Advanced Strength Training and Conditioning	2
KIN 345	Management of Health-Fitness Programs and Facilities	3
KIN 355	Biomechanics (*)	3
KIN 360	Sociology of Physical Activity and Health (*)	3
KIN 366	Exercise Psychology (*)	3
KIN 372	Motor Control and Learning Across the Lifespan (*)	3
KIN 385	Preparation and Search Strategies for Kinesiology and Health Internships	0.5
KIN 458	Principles of Fitness Assessment and Exercise Prescription (*)	4
KIN 459	Internship in Exercise Leadership	1
KIN 462	Medical Aspects of Exercise	3
KIN 485A	Internship in Exercise Science	8-16
H S 380	Worksite Health Promotion	3
A TR 220	Basic Athletic Training	2
or H S 305	Instructor's First Aid and Cardio-pulmonary Resuscitation	

Electives: 12-21 credits

* A grade of C- or better is required.

Option 3. Physical Activity and Health Promotion

This option prepares students for a variety of career outlets focused on health and physical activity promotion. The coursework provides the ideal background for students interested in worksite wellness programming. Students are also well suited to pursue career opportunities in health coaching and health promotion in schools, community agencies, as well as clinical settings. This option provides

ideal background training for students interested in pursuing the Physical Activity in Public Health Specialist Certification offered by the American College of Sports Medicine.

Option Requirements:

FS HN 364	Nutrition and Prevention of Chronic Disease	3
FS HN 365	Obesity and Weight Management	3
or FS HN 366	Communicating Nutrition Messages	
H S 310	Community and Public Health (*)	3
H S 380	Worksite Health Promotion	3
H S 385	Preparation and Search Strategies for Kinesiology and Health Internships	0.5
H S 430	Community Health Program Development	3
H S 464	Physical Activity Epidemiology	3
H S 485	Internship in Health Studies	8-16
KIN 259	Leadership Techniques for Fitness Programs	3
KIN 366	Exercise Psychology (*)	3
KIN 458	Principles of Fitness Assessment and Exercise Prescription (*)	4
KIN 467	Exercise and Health: Behavior Change	3
Electives: 9-18 credits		

* A grade of C- or better is required.

Option 4. Physical Education Teacher Education

This option is for students seeking a license to teach K-12 physical education. All courses required for licensure have a minimum grade requirement of a C or C-. Students interested in a coaching and/or a health endorsement must complete additional coursework.

Option Requirements:

KIN 231	Fundamentals of Tumbling and Gymnastics (*)	1
KIN 232	Fundamentals of Team Sports (*)	1
KIN 236	Fundamentals of Individual Sports and Fitness (*)	1
KIN 259	Leadership Techniques for Fitness Programs	3
KIN 280	Directed Field Experience in Elementary Physical Education	1
KIN 281	Directed Field Experience in Secondary Physical Education	1
KIN 282	Field Experience with Educational Outreach	1
KIN 312	Movement Education in Elementary School Physical Education (**)	3
KIN 313	Teaching Secondary Physical Education (**)	3
KIN 355	Biomechanics (*)	3
KIN 360	Sociology of Physical Activity and Health (*)	3
KIN 365	Sport Psychology (*)	3

or KIN 366	Exercise Psychology	
KIN 372	Motor Control and Learning Across the Lifespan (*)	3
KIN 395	Adapted Physical Education (**)	3
KIN 417	Supervised Teaching in Physical Education in the Secondary School (**)	8
KIN 418	Supervised Teaching in Physical Education in the Elementary School (**)	8
KIN 471	Measurement in Physical Education (**)	3
KIN 475	Physical Education Curriculum Design and Program Organization (**)	3
DANCE 211	Fundamentals and Methods of Social and World Dance (*)	1
EDUC 202	Educational Technologies in the 7-12 Classroom	3
EDUC 204	Social Foundations of Education in the United States: Secondary	3
EDUC 406	Social Justice Education and Teaching: Secondary	3
H S 105	First Aid and Emergency Care (*)	2
H S 305	Instructor's First Aid and Cardio-pulmonary Resuscitation (*)	2
Electives: 5 credits		

* A grade of C- or better is required.

** A grade of C or better is required.

Option 5. Pre-Health Professions

This option is for students interested in graduate study or for those who are preparing for professional programs in medicine, physical therapy, physician assistant, and other healthcare professions. Course work provides background in human movement while completing the requirements for entry into graduate or professional school.

Option Requirements:

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
KIN 242	Planning for Success in a Health Career	0.5
KIN 355	Biomechanics (*)	3
KIN 360	Sociology of Physical Activity and Health (*)	3
KIN 365	Sport Psychology (*)	3
or KIN 366	Exercise Psychology (*)	
KIN 372	Motor Control and Learning Across the Lifespan (*)	3
9 cr. from the following		
H S 464	Physical Activity Epidemiology	3
KIN 455	Research Topics in Biomechanics	3

KIN 458	Principles of Fitness Assessment and Exercise Prescription	4
KIN 462	Medical Aspects of Exercise	3
KIN 467	Exercise and Health: Behavior Change	3
KIN 472	Neural Basis of Human Movement	3
KIN 473	Physical Dimensions of Aging	3
KIN 480	Functional Anatomy	3

Specialization Requirements: Other prerequisites as required by professional schools.

Electives: 6-14 credits

* A grade of C- or better is required.

Minors

Dance

The minor requires a minimum of 19 credits and may be earned by completing the following:

DANCE 220	Modern Dance Composition	2
DANCE 222/223	Modern Dance II	1
DANCE 270	Dance Appreciation	3
DANCE 320	Sound and Movement	3
DANCE 360	History and Philosophy of Dance	3
DANCE 384	Teaching Children's Dance	2
DANCE 385	Methods of Teaching Dance	2

or DANCE 386 Teaching Dance Technique and Composition

3 additional credits selected from dance courses numbered 200 or above.*

*Participation in Orchesis I or II is recommended.

Exercise Science

The minor requires a minimum of 18 credits and may be earned by completing the following:

KIN 258	Principles of Physical Fitness and Conditioning	2
KIN 358	Exercise Physiology	3
KIN 359	Exercise Physiology Lab	1
KIN 366	Exercise Psychology	3
KIN 458	Principles of Fitness Assessment and Exercise Prescription	4

5 cr. from the following

A TR 220	Basic Athletic Training
KIN 259	Leadership Techniques for Fitness Programs
KIN 266	Advanced Strength Training and Conditioning

KIN 345	Management of Health-Fitness Programs and Facilities
KIN 360	Sociology of Physical Activity and Health
KIN 462	Medical Aspects of Exercise
KIN 467	Exercise and Health: Behavior Change

Health Promotion

The minor requires a minimum of 18 credits and may be earned by completing the following:

H S 110	Personal and Consumer Health	3
H S 350	Human Diseases	3
H S 380	Worksite Health Promotion	3

3-6-cr. from the following

H S 215	Drug Education
H S 305	Instructor's First Aid and Cardio-pulmonary Resuscitation
H S 310	Community and Public Health

3-6 cr. from the following

H S 430	Community Health Program Development
KIN 467	Exercise and Health: Behavior Change

Kinesiology

The minor requires a minimum of 16 credits and may be earned by completing the following: (For non-majors only)

KIN 355	Biomechanics	3
KIN 358	Exercise Physiology	3
KIN 359	Exercise Physiology Lab	1
KIN 360	Sociology of Physical Activity and Health	3
KIN 372	Motor Control and Learning Across the Lifespan	3
KIN 365	Sport Psychology	3
or KIN 366	Exercise Psychology	

Gerontology

The department participates in the interdepartmental minor in gerontology (see Index).

FOUR YEAR PLANS

Students must complete a 3-credit course in US diversity and a 3-credit course in international perspectives. Check the ISU homepage for a list of approved courses. You must complete a minimum of 46 credits in 300/400 level courses and a total of 124 credits for graduation. Four year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. These are SAMPLE plans - use the degree audit as "official" documentation of progress toward your degree.

Graduate Study

The Department of Kinesiology graduate program seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a non-thesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department web site (<http://www.kin.hs.iastate.edu/> graduate (<http://www.kin.hs.iastate.edu/graduate/>)).

Learning and Leadership Sciences Learning and Leadership Sciences Minor

The Learning and Leadership Sciences minor provides an opportunity for students to engage in productive thinking, enabling them to lead in their professions and contribute to society and their communities.

The coursework builds on the curriculum of a student's primary discipline to enhance student leadership abilities throughout their academic career and beyond. Students will enhance their abilities to engage in productive thinking, such as critical, analytical, and creative thinking in problem-solving; discern the types of thinking required when presented with new situations; and use different types of thinking to address issues and situations as professionals and citizens. Core courses in the minor address eight competency areas that are critical for leaders: 1) understanding self and personal responsibility for learning, 2) understanding worthy team membership, 3) developing productive

thinking and creative problem solving abilities, 4) developing resiliency, 5) negotiating and resolving conflict, 6) action planning for providing service, 7) communicating, and 8) recognizing and acting on the obligation to "do" leadership every day.

Students in the Learning and Leadership Sciences Minor will ultimately achieve these learning outcomes by uncovering and practicing:

- habits of deep self-reflection about learning and application of these habits to their professional and community lives;
- effective interaction with others in professional and community settings, including abilities to listen actively, communicate clearly, resolve conflicts, and negotiate desired outcomes;
- habits of professional thinking, including accountability, initiative, innovation, resilience, tolerance, and profound respect for others.

Nursing overview

The RN to BSN program is designed for the Registered Nurse (RN) to advance their nursing career to the next level with a Bachelor of Science

in Nursing (BSN). The BSN program prepares nurses to apply new skills to day-to-day interactions with patients and co-workers, as well as provides students with a broader perspective on the increasingly complex healthcare environment. The RN-BSN program equips students to enhance quality and safety, work effectively in a team, grow as a professional and develop leadership skills for the future. A BSN is necessary for management positions, public health nursing, and specialized clinical positions. It also prepares individuals for admission to graduate nursing programs in nursing education, nursing administration, and advanced practice nursing.

Within the RN-BSN program, students have the opportunity to choose an area of interest for elective options and practicum experience. Interdisciplinary opportunities and clubs/organizations provide a number of opportunities for students to get involved.

Administered by the Department of Food Science and Human Nutrition

RN-BSN Admissions Criteria

Applications for the RN to BSN program are individually reviewed.

Minimum requirements for admission to the BSN program include*:

- Licensure as a Registered Nurse in Iowa or a compact state if applicable**
- Meet all Iowa State University admission criteria for transfer students
- Official college transcripts from all colleges and universities attended
- Minimum of 2.5 cumulative GPA for all college coursework
- Achievement of minimum "C" (not C-) for all prerequisite courses listed below

Anatomy and Physiology I and II (BIOL 255/L and BIOL 256/L equivalent)

English Composition I and II (ENGL 150 and ENGL 250 equivalent)

Introduction to Chemistry (CHEM 163 or CHEM 1T equivalent)

Statistics (STAT 101 or STAT 104 equivalent)

Introduction to Human Nutrition (FS HN 167 equivalent)

Developmental Psychology (PSYCH 230 equivalent)

Introduction to Sociology (SOC 134 equivalent)

- Evidence of a satisfactory criminal background check within 6 months of application and/or 12 months of enrollment or provide evidence of current employment as a Registered Nurse in Iowa or a compact state
- Evidence of meeting current health and immunization requirements

*Admissions requirements are congruent with the Iowa Action Coalition, RN to BSN Task Force Recommendations. Most, and in some cases, all of these are required in the Associate's Degree in Nursing curriculum.

**License must remain current and unrestricted while enrolled in ISU RN-BSN program. Nursing courses with a clinical or practicum component may not be taken if any of the following has occurred: student denied licensure by the Iowa Board of Nursing; Registered Nurse license is currently suspended, surrendered or revoked in any U.S. jurisdiction; Registered Nurse license is currently suspended, surrendered or revoked in another country due to disciplinary action; or student has failed a criminal background check.

RN-BSN Progression Criteria

- Must earn a "C" grade or better in all NRS courses and meet the university's academic standards for progress toward a degree

RN-BSN Graduation Requirements

- At least 32 credits earned in residence at Iowa State University, and the final 32 credits taken through Iowa State University prior to graduation.
- All general education requirements at Iowa State University must be met.
- The BSN curriculum consists of 22 credits of NRS courses, 6 credits of FS HN courses, and 6 credits selected from approved list for a total of 34 credits in addition to prerequisite coursework and electives.
- Electives are selected by students to meet identified career interests, and total elective credits needed will vary based on individual transfer credits.
- Minimum credits for graduation is 120 credits.

Nutritional Science (H SCI)

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are degree program options within nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. Additional options in family health, global health and policy, health coach, and nutrition and wellness prepare students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness. The food service option prepares students for school nutrition and food service management positions.

The department also offers a nutrition minor.

Administered by the Department of Food Science and Human Nutrition

- Pre-Health Professional and Research Option

Professional Practice in Dietetics

Master of PROFESSIONAL PRACTICE IN DIETETICS (M.P.P.D.)

The Department of Food Science and Human Nutrition offers a non-thesis master's degree for individuals that have successfully completed the Iowa State University Dietetic Internship (ISU DI). This online program is considered a professional master's degree. Students interested in further graduate study (PhD) may require additional coursework and/or research beyond the MPP-D to gain admission into a doctoral program.

This 30-credit non-thesis program applies the 15 credits earned in the ISU DI in addition to 15 credits of online coursework. Students completing approximately 4-5 credits per semester can finish the program in 1 year.

3 Approximately 9 credits are core courses with an additional 6 credits chosen based on the student's professional interests and career path.

3 Admission requirements for the MPP-D include successful completion of the ISU DI since 2010, passing the Registration Examination for the Registered Dietitian Nutritionist prior to beginning the second semester of coursework, a positive letter of recommendation from your ISU DI faculty mentor, and a professional goal statement (<500 words). The Graduate Record Examination (GRE) is not required.

School of Education

Donald Hackmann, Director of the School of Education

School of Education (<http://www.education.iastate.edu>)

Mission and Goals

The School of Education at Iowa State University (<http://iastate.edu/>) is committed to engaging in rigorous and socially meaningful research, preparing leaders and practitioners across the P-20 continuum that support rich and equitable learning opportunities for all students, and supporting public education as a cornerstone of a healthy, vibrant, and just society. We strive to be a national leader in educational theory, policy, and practice, and to honor the land-grant tradition and the broader mission of the university to serve the people of Iowa.

Undergraduate Study

The School of Education provides the professional education coursework to support the completion of the Educator Preparation Program. Program completers can then be recommended for licensure to the Iowa Board of Education Examiners. Majors offered in the School include **Elementary Education (K-6)**, and **Early Childhood Education-Unified (birth through third grade, inclusive)**. The Early Childhood Education-Unified major is an interdepartmental program administered by the School of Education and the Department of Human Development and Family Studies.

Undergraduate students who are interested in teaching at the secondary level (5-12) or at the K-12 level major in a specific discipline and complete additional required educational coursework in the School of Education and the department to complete the Educator Preparation Program. K-12 and secondary education programs include: Agriculture Education, English Education, Family and Consumer Sciences Education, Health Education, History-Social Sciences Education, Mathematics Education, Music Education, Physical Education, Science Education (Biology, Chemistry, Earth Science, and Physics), and World Languages and Cultures Education.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted

to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9/>)
- To access the policy: Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students, please follow this link: <https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwrk9cc92jzb> (<https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwrk9cc92jzb/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements:

For Educator Preparation general education requirements, please see this link: <https://iastate.box.com/s/nye3ue752tivi9t4xbpjxv9zq6wgsrln> (<https://iastate.box.com/s/nye3ue752tivi9t4xbpjxv9zq6wgsrln/>)

Early Childhood Education – Unified

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through third grade, inclusive. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about

the program, see Early Childhood Education - Unified Curriculum <https://www.hdfs.hs.iastate.edu/find-majors/early-childcare-education-and-programming/>

Students who enroll in the early childhood education – unified program must apply to and be accepted into the Educator Preparation Program prior to enrolling in advanced courses. Admission requirements can be found at: <https://www.education.iastate.edu/educator-prep-program/admission/>.

Early Childhood Education majors must complete all of the required degree curriculum. This can be found at: http://catalog.iastate.edu/collegeofhumansciences/early_childcare_educationandprogramming/

Candidates must receive a minimum of a “C” in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion. Candidates must receive a minimum of a “C-” in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

Candidates can pursue an additional endorsement in K-8 reading. Information about this endorsement can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf> Contact an Early Childhood Education academic adviser for additional information.

Elementary Education

The undergraduate curriculum in elementary education leads to the Bachelor of Science degree.

The curriculum in elementary education is designed for candidates preparing to teach at the elementary school level. The curriculum in elementary education is designed for candidates preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed will be qualified to teach in elementary classrooms in either public or private schools. Elementary Education majors must complete all of the required degree curriculum. This can be found at: <http://catalog.iastate.edu/collegeofhumansciences/elementaryeducation/>

Candidates must receive a minimum of a “C” in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion. Candidates must receive a minimum of a “C-” in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be

prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Information about endorsements can be found at: <https://www.education.iastate.edu/find-majors/elementary-education/>

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these additional endorsements can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>) Contact an Elementary Education academic adviser for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator

preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

K-12 and Secondary Education

Students wanting to pursue K-12 or Secondary Teacher Education major in the content area in which they want to focus. In addition, coursework is taken to complete the Educator Preparation Program. Program completers can then be recommended to the Iowa Board of Educational Examiners.

In addition to being admitted to Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)
- To access the policy: Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students, please follow this link: <https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb> (<https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

K-12 and secondary education candidates must complete a professional core course sequence. In general, the sequence includes:

EDUC 203X	A Connected World: Technology for Learning, Creating, and Collaborating	1
EDUC 303X	Introduction to Educational Technology	1
EDUC 403X	Intermediate Educational Technology	1
EDUC 204	Social Foundations of Education in the United States: Secondary	3
EDUC 333	Educational Psychology	3
EDUC 406	Social Justice Education and Teaching: Secondary	3
EDUC 426	Principles of Secondary Education	3

SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	3
-----------	--	---

Total Credits 18

Coursework in content-specific pedagogy and field experience coursework also needs to be successfully completed.

Please check departmental information in regards to specific requirements for each program.

Candidates must receive a minimum of a "C" in all education (EDUC), human development and family studies (HD FS), special education (SP ED) courses and all content-specific pedagogy/methods courses required for program completion and endorsement completion. Candidates must receive a minimum of a "C-" in all major department courses/content courses required for teacher program completion and endorsement completion (content coursework).

Candidates interested in pursuing K-12 education or secondary education can pursue an initial endorsement in any of the following program areas:

- K-12 Music Education
- K-12 Physical Education
- Secondary Agriculture Education
- Secondary English Education
- Secondary Family and Consumer Sciences Education
- Secondary Health Education
- Secondary History-Social Sciences Education (American History and World History)
- Secondary Mathematics Education
- Secondary Science Education (Biology, Chemistry, Earth Science, or Physics)
- Secondary World Languages and Cultures Education (French, German, or Spanish)

Specific program requirements can be found within each department.

Candidates can choose to pursue additional endorsements. These can include any of the endorsements listed above and the following:

- K-12 Coaching
- K-12 English as a Second Language
- 5-12 Agriscience/Agribusiness
- 5-12 Multi-occupations
- 5-12 Reading (contact the English Education academic adviser for a list of required courses)
- Science
 - 5-12 Physical Science
 - 5-12 Basic Science
- Social Sciences
 - 5-12 American Government
 - 5-12 Anthropology

- 5-12 Economics
- 5-12 Psychology
- 5-12 Sociology
- 5-12 Speech Communications and Theater
- World Languages and Cultures
 - 5-12 Chinese
 - 5-12 Russian

Specific program requirements can be found within each department that houses the endorsement. Information on K-12 Coaching, K-12 English as a Second Language, and 5-12 Reading can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf/> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf/>)

LEARNING TECHNOLOGIES MINOR

The School of Education offers a Learning Technologies minor available to all teacher education candidates. In order to earn this minor, candidates must register for the minor and complete the following sequences of courses:

EDUC 201	Educational Technologies in the PK-6 Classroom	3
EDUC 203X	A Connected World: Technology for Learning, Creating, and Collaborating*	
EDUC 303X	Introduction to Educational Technology*	
EDUC 403X	Intermediate Educational Technology*	
EDUC 280B	Pre-Student Teaching Experience I: Educational Technologies	1
EDUC 302	Principles and Practices of Learning with Technology	3
EDUC 407	Principles and Practices of Distance Learning	3
EDUC 454	Emerging Topics in Educational Technologies (and one of the following:)	3
One of the following:		3
COM S 107	Windows Application Programming	
COM S 207	Fundamentals of Computer Programming	
EDUC 370	Toying with Technology	

Total Credits 16

Candidates must receive a "C" or above in all courses

*These three 1 credit courses are the 7-12 Classroom technology requirements

Additional information can be found at: <https://www.education.iastate.edu/find-majors/learning-technologies-minor/>

Graduate Study

The School of Education is comprised of two divisions: Higher Education and Teaching, Learning, Leadership, and Policy (TLLP). Within these

divisions, the School offers coursework and experiences for the degrees Doctor of Philosophy, Doctor of Education, Master of Science, and Master of Education with a major in education. Graduate programs leading to completion of a teacher preparation program and recommendation for teacher licensure are offered in secondary science and secondary mathematics. In addition, endorsements in reading and special education can also be pursued by graduate students. Graduate students interested in educational leadership may also participate in our educator preparation programs in educational leadership. Program completers may be recommended for administrative licensure for roles as principals and superintendents. The School of Education offers graduate coursework leading to a minor for masters and doctoral students in other fields of study. Several graduate certificate programs are offered through the School of Education.

Doctoral Degree Programs

Students in the School of Education may complete the Ph.D. with a major in education. Students pursuing a Ph.D. in the division of Higher Education may earn an education degree with an emphasis in either higher education administration or community college leadership. Students pursuing a Ph.D. in the division of TLLP may earn an education degree with an emphasis in one of the following areas: educational leadership, organizations, and policy; instructional technology; mathematics education; science education; literacy; special education; or social and cultural studies of education. Specific information about the requirements of and options available within the Ph.D. degree in education are available from the School office or on the School of Education Graduate Programs website.

Graduates of the Ph.D. program in education are prepared to pursue careers as scholars, leaders, and administrators in various educational settings, including public and private colleges and universities, community colleges, public and private educational agencies, and corporate training settings.

Students in the School of Education may complete an Education Doctorate (Ed.D.) with a major in education. Students may earn an education degree with an emphasis in Community College Leadership or in P-12 Systems Level Leadership. The Ed.D. program is designed for working professionals and uses a hybrid distance format to deliver courses using a mix of on campus and online weekend meeting formats. Specific information about the requirements of the Ed.D. degree in education are available on the School of Education Graduate Programs website. Graduates of the Ed.D. program in education are prepared to pursue careers as scholar-practitioners in leadership roles in community colleges and K-12 educational systems including school districts, public and private education agencies, and state departments of education. Students who complete the K-12 Systems Level Leadership program can be recommended for Iowa licensure as a superintendent.

Master's Degree Programs

In the division of Higher Education, students may earn an M.Ed in education with an emphasis in either student affairs or higher education. In the division of TLLP, students may earn an M.S. or an M.Ed. in education with an emphasis in one of the following areas: educational leadership, organizations and policy; instructional technology; mathematics education; science education; literacy; special education; or social and cultural studies of education.

Specific information about the requirements of and options available within M.S. or M.Ed. degrees in education are available from the School office or on the website School of Education Graduate Programs website <https://www.education.iastate.edu/graduate-programs/>

Graduates of the master's degree programs are prepared to pursue careers as educational leaders, higher education professionals, researchers, and advanced practitioners in colleges and universities, community colleges, public and private schools, education agencies, and informal (free-choice) education settings.

Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. For more information, students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, and General Graduate Studies or to graduate level course offerings within other departments.

Graduate minor in education

A minor in Education is available at both the master's and doctoral level. Graduate students in other majors may pursue a graduate minor in Education. A minor for doctoral students requires 15 credits in education courses, while a minor for master's students requires 9 courses. Students should identify a faculty member who will serve as the minor representative on their Program of Study Committee and work with this person to identify an appropriate set of courses to fit the student's interests. The minor is not an appropriate option for students whose primary interests are in research methodology; the graduate certification Applied Research in the Human Sciences should be used instead. Doctoral students are reminded that a minor must be declared before the preliminary oral examination.

Graduate Teacher and Educational Leadership Preparation Programs

A Master of Arts in Teaching degree program (science education) is available to students who currently have a bachelor's degree in a science area (or a closely related field). A teacher preparation program in mathematics education is also available to graduate students (School of Education). In these teacher preparation programs, program

completers can be recommended for teacher licensure to the Iowa Board of Educational Examiners.

Teacher preparation programs at the graduate level are also offered in Agricultural Education (College of Agriculture and Life Sciences) and Physical Education (College of Human Sciences). The School of Education provides the professional core education coursework for these programs. Students in a graduate teacher preparation program must complete specific courses. Specific information about these programs can be found by contacting these departments.

Graduate level programs leading to recommendation for teaching endorsements are offered through the School of Education.

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the Policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. Requirements for program completion can be found by following this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

Graduate students who seek a teaching endorsement in reading or special education, but do not wish to pursue a master's degree can incorporate those courses in a professional certificate program. Endorsement programs include Instructional Strategist II: Behavior Disorders/Learning Disabilities, Reading K-8 and Reading 5-12. Information about these endorsements can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmuibz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmuibz5dhv9catryr2jqf/>)

The School of Education offers graduate programs for students seeking careers as principals and superintendents. The Transformative School Leader Program (TSLP) is designed for working professionals and includes coursework and field experiences in a principal preparation program. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Students must complete the program as a Master of Education degree.

Graduate Certificate Programs

The School of Education offers Graduate Certificate programs to allow students to enhance their skills outside of full degree programs. The Certificate programs currently offered include Applied Research Methods in the Human Sciences, Community College Teaching, Instructional Design, Literacy Coaching, Education for Social Justice and Special Education. Certificate programs require a minimum of 12 graduate credits (several require more than this) and can be earned in conjunction with a degree program. More information about graduate certificate programs can be found on the School of Education web site.

Educator Preparation Program at Iowa State University

Heidi Doellinger, Director of Educator Preparation

Educator Preparation (<http://www.education.iastate.edu/educator-prep-program/>)

The Educator Preparation Program at Iowa State University is a shared responsibility that spans three colleges. All candidates who are recommended by Iowa State University for licensure must be considered a program completer by meeting the requirements of the Educator Preparation Program and be recommended by their department, college, and the ISU recommending official. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills, knowledge, and dispositions / professional practices required of educators.

Undergraduate Educator Preparation Programs

An undergraduate student seeking a bachelor's degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

All Educator Preparation Program candidates must complete the professional core coursework (information found under each program) and required pedagogy and field experience coursework for their program. In addition, all prospective teachers are required to meet general education requirements as a part of their preparation. They must complete studies in the following general education groups. General

education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements.

For Educator Preparation general education requirements, please see this link: <https://iastate.box.com/s/nye3ue752tivi9t4xbpjxv9zq6wgsrln> (<https://iastate.box.com/s/nye3ue752tivi9t4xbpjxv9zq6wgsrln/>)

Currently, there are fifteen undergraduate Educator Preparation areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

Agricultural Education (grades 5-12)
 Biology (grades 5-12)
 Chemistry (grades 5-12)
 Early Childhood Education-Unified (birth-grade 3, inclusive)
 Earth Science (grades 5-12)
 Elementary Education (grades K-6)
 English (grades 5-12)
 Family and Consumer Sciences (grades 5-12)
 Health Education (grades 5-12)
 History-Social Sciences (grades 5-12)
 Mathematics (grades 5-12)
 Music (grades K-12)
 Physical Education (grades K-12)
 Physics (grades 5-12)
 World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Endorsements Areas

Early Childhood Education

Candidates can also choose to pursue an endorsement in K-8 reading.

Elementary Education

Candidates pursuing a degree in Elementary Education are required to pursue an endorsement in at least one additional area. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts,
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8).

Additional information about these endorsements can be found at: <https://www.education.iastate.edu/find-majors/elementary-education/>

Elementary Education Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these additional endorsements can be found at: <https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmiubz5dhv9catryr2jqf/>)

Contact an Elementary Education academic adviser for the requirements for these endorsements.

K-12 Education and Secondary Education

Candidates can choose to pursue additional endorsements. These can include any of the above listed endorsement and the following:

- K-12 Coaching
- K-12 English as a Second Language
- 5-12 Agriscience/Agribusiness
- 5-12 Multioccupations
- 5-12 Reading (contact the English Education academic adviser for a list of required courses)
- Science
 - 5-12 Physical Science
 - 5-12 Basic Science
- Social Sciences
 - 5-12 American Government
 - 5-12 Anthropology
 - 5-12 Economics
 - 5-12 Psychology
 - 5-12 Sociology
- 5-12 Speech Communications and Theater
- World Languages and Cultures
 - 5-12 Chinese
 - 5-12 Russian

Information about endorsements can be found at: <https://www.education.iastate.edu/find-majors/endorsements/>

Minors

Students in the Educator Preparation Program may also choose to pursue a minor in Learning Technologies additional information can be found at: <https://www.education.iastate.edu/find-majors/learning-technologies-minor/>

Post-Bachelor's Educator Preparation Programs

Students holding an appropriate bachelor's degree may complete the K-12 or secondary educator preparation program in order to be recommended for teacher licensure.

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)
- To access the policy: Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students, please follow this link: <https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb/> (<https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3>

Candidates would be required to complete the Professional Core requirements of the program. In general, the sequence includes:

EDUC 203X	A Connected World: Technology for Learning, Creating, and Collaborating	1
EDUC 303X	Introduction to Educational Technology	1
EDUC 403X	Intermediate Educational Technology	1
EDUC 204	Social Foundations of Education in the United States: Secondary	3
EDUC 333	Educational Psychology	3
EDUC 406	Social Justice Education and Teaching: Secondary	3
EDUC 426	Principles of Secondary Education	3
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	3
Total Credits		18

Coursework in content-specific pedagogy and field experience coursework also need to be successfully completed. Please check department information regarding to specific requirements for each program.

Candidates must have at least one course in each of the following five general education groups identified for undergraduate students identified in the previous section: Natural Sciences, Mathematics and Statistics, Social Sciences, Humanities, and Communication Skills. Specific departments and/or colleges may require specific coursework to meet these requirements or additional credits.

Interested students should consult with the program coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Educator Preparation Programs for which post-bachelor candidates take undergraduate Educator Preparation courses include;

- English (grades 5-12)
- Health Education (grades 5-12)
- History-Social Sciences (grades 5-12)
- World Languages and Cultures (French, German, and Spanish) (grades 5-12)

GRADUATE DEGREE PROGRAMS WITH EDUCATOR PREPARATION PROGRAM COMPLETION

Currently, there are four graduate teacher-educator preparation programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

- Agricultural Education (M.S.)
- Mathematics Education (M.Ed.)
- Physical Education (M.S.)
- Secondary Sciences Education (M.A.T.)

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the Policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. Requirements for program completion can be found by following this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

Graduate level programs leading to recommendation for additional teaching endorsements are offered through the School of Education. Graduate students who seek a teaching endorsement in reading or special education, but do not wish to pursue a master's degree can incorporate the coursework in a professional certificate program. Endorsement programs include Instructional Strategist II: Behavior Disorders/Learning Disabilities, Reading K-8 and Reading 5-12.

Graduate programs are also available for those who wish to pursue educational leadership as a profession as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

Master's Programs with Teacher Preparation

AGRICULTURAL EDUCATION

The Agricultural Education and Studies Department offers a Master's of Science program that prepares Agricultural Education teachers for grades 5-12

See coordinator for program requirements.

MATHEMATICS

The School of Education offers a Master's of Education program that prepares Mathematics teachers for grades 5-12

Physical Education

The Department of Kinesiology offers a Master's of Science program that prepares Physical Education teachers for grades K-12.

See coordinator for program requirements.

Secondary Sciences

The School of Education offers a Master's of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12

See coordinator for program requirements.

IOWA STATE UNIVERSITY TEACHER EDUCATION STANDARDS (INTASC STANDARDS)

The Learner and Learning

Standard #1: Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Content

Standard #4: Content Knowledge. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Instructional Practices

Standard #6: Assessment. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

Standard #7: Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #8A: Technology. The teacher integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology (this standard is unique to the Iowa State University Teacher Preparation Program).

Professional Responsibility

Standard #9: Professional Learning and Ethical Practice. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other

school professionals, and community members to ensure learner growth, and to advance the profession.

EDUCATOR PREPARATION PROGRAM ADMISSION REQUIREMENTS

Educator Preparation Program Candidates must have:

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9/>)
- To access the policy: Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students, please follow this link: <https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb> (<https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb/>)

More information about admission requirements can be found at: <https://www.education.iastate.edu/educator-prep-program/admission/>

THE PROFESSIONAL CORE REQUIREMENT FOR EDUCATOR PREPARATION

Undergraduate Students

Educator Preparation Program candidates must complete certain studies related directly to the profession of teaching. All undergraduate candidates in the educator preparation program must take the following courses prior to student teaching, unless the student's program area has an approved content-area course deemed to be equivalent. Candidates must receive a minimum of a "C" in all education (EDUC) / Curriculum Instruction (C I) , Human Development and Family Studies (HD FS), Special Education (SP ED) courses and all content-specific pedagogy/methods courses required for licensure. (See program coordinator for more information).

EARLY CHILDHOOD EDUCATION-Unified

EDUC 201	Educational Technologies in the PK-6 Classroom	3
EDUC 205	Social Foundations of Education in the United States: Early Childhood and Elementary Education	3
EDUC 245	Landscape of Teaching	3
EDUC 332	Educational Psychology of Early Childhood and Elementary Education	3
EDUC 405	Social Justice Education and Teaching: Early Childhood and Elementary	3
SP ED 250	Education of the Exceptional Learner in a Diverse Society	3

Total Credits

18

In addition, Early Childhood Education majors must complete all degree curriculum requirements. These can be found here: http://catalog.iastate.edu/collegeofhumansciences/early_childcare_educationandprogramming/

ELEMENTARY EDUCATION:

EDUC 201	Educational Technologies in the PK-6 Classroom	3
EDUC 205	Social Foundations of Education in the United States: Early Childhood and Elementary Education	3
EDUC 245	Landscape of Teaching	3
EDUC 405	Social Justice Education and Teaching: Early Childhood and Elementary	3
HD FS 102	Individual and Family Development, Health, and Well-being	3
or PSYCH 230	Developmental Psychology	
SP ED 250	Education of the Exceptional Learner in a Diverse Society	3

Total Credits

18

Elementary Education majors must meet all degree curriculum requirements. These can be found here: <http://catalog.iastate.edu/collegeofhumansciences/elementaryeducation/>

K-12 AND SECONDARY EDUCATION:

Student teaching (semester-long experience). See Program Area Coordinator for more information.

EDUC 203X	A Connected World: Technology for Learning, Creating, and Collaborating	1
EDUC 303X	Introduction to Educational Technology	1
EDUC 403X	Intermediate Educational Technology	1
EDUC 204	Social Foundations of Education in the United States: Secondary	3
EDUC 333	Educational Psychology	3
EDUC 406	Social Justice Education and Teaching: Secondary	3
EDUC 426	Principles of Secondary Education	3
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	3

In addition, candidates must complete all degree program discipline-specific pedagogy coursework, field experience coursework, and content-specific coursework. These requirements can be found in the home department of the major.

Post-Bachelor's Students

Students who hold an appropriate bachelor's degree and seek a teaching license must complete an educator preparation program. This includes the professional education requirements listed above. The requirements can be met through course work or examination.

Master's Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master's programs that lead to completion of an educator preparation program must take the following courses prior to student teaching, unless the student's program area has an approved content area course deemed to be equivalent. (See Master's Programs section below for details.)

EDUC 505	Using Technology in Learning and Teaching	3
EDUC 506	Social Justice Education and Teaching: Advanced	3
EDUC 526	Principles of Secondary Education <small>Not all programs require this course. Check with program coordinator</small>	3
EDUC 529	Educational Psychology and the Secondary Classroom	3
EDUC 580	Studies in the Foundations of Education in the United States	3
SP ED 501	Teaching Secondary Students with Exceptionalities in General Education	3

In addition, candidates must complete all degree program discipline-specific pedagogy coursework, field experience coursework, and content-specific coursework. These requirements can be found in the home department of the major.

CLINICAL EXPERIENCES

The Standards for Practitioner and Administrator Preparation Programs 281–79.14(256) Teacher preparation clinical practice standard states “The unit and its school partners shall provide field experiences and student teaching opportunities that assist candidates in becoming successful teachers in accordance with the following provisions.

This includes:

- **79.14(5)** Teacher candidates admitted to a teacher preparation program must complete a minimum of 80 hours of pre-student teaching field experiences, with at least 10 hours occurring prior to acceptance into the program.
- **79.14(7)** The unit is responsible for ensuring that the student teaching experience for initial licensure:

a. Includes a full-time experience for a minimum of 14 consecutive weeks in duration during the teacher candidate's final year of the teacher preparation program. (Iowa State University policy requires a full semester experience.)

For most programs, there are four levels for clinical experiences used to meet these requirements. Level 1 involves observation in local schools and is typically completed prior to admission to the educator preparation program. This typically occurs prior to admission to the Educator Preparation Program. Level 2 involves actively teaching in the

classroom with one-to-one lessons, at minimum. Level 3 involves actively teaching in the classroom with two lessons, at minimum and being observed by a supervisor during teaching. Level 4 is student teaching and involves actively teaching for a semester-long experience where the student teacher bears primary responsibility for planning and instruction within the classroom for a minimum of four weeks during the semester. Level 2, 3 and 4 field experiences involve a course fee, which ranges from \$75.00 to \$450.00 and are assessed to cover the costs of supervision and placement with a cooperating teacher. Course fees are increased when student teaching nationally or internationally. For current course fees, consult the Schedule of Classes. For level 2, 3 and 4 field experiences, the student needs access to transportation because the placement may be within 60 miles of the university. The time commitment for clinical experiences ranges from 1/2 day for level 2 and 3 to the full day for level 4. Students complete a background check before initial placement in schools and other appropriate locations.

Specific field experience course requirements can be found in program/degree requirements.

PROGRAM CURRICULUM

Undergraduate Students

Early Childhood Education – Unified

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through third grade, inclusive. Program completers can be recommended for licensure to the Iowa Board of Educational Examiners. Individuals who are licensed may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education - Unified Curriculum <http://www.education.iastate.edu/undergraduate-studies/early-childhood-education> (<http://www.education.iastate.edu/undergraduate-studies/early-childhood-education/>).

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/>

[s/vnp2dt4sihtu99ilym531y1Injkrb4e9](https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9) (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)

- To access the policy: Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students, please follow this link: <https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb> (<https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

All early childhood education – unified candidates must meet general education requirements in order to complete the Educator Preparation Program.

Elementary Education

In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. In addition to pursuing a degree in Elementary Education, candidates are required to pursue an endorsement in at least one additional area. Candidates will be prepared to teach students in grades kindergarten through eighth grade in this area of specialization. Endorsements in the following areas are available for elementary education majors:

- K-8 English/language arts
- K-12 English as a Second Language (ESL)
- K-8 Health
- K-8 Mathematics
- K-8 Science
- K-8 Social studies
- K-8 Special education (Instructional Strategist I: Mild/Moderate Disabilities K-8)

Additional information about these endorsements can be found at: <https://www.education.iastate.edu/find-majors/elementary-education/>

Candidates can pursue additional endorsements in any of the above listed areas and in the following areas:

- K-8 Reading
- K-12 Coaching

Information about these additional endorsements can be found: <https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf> (<https://iastate.app.box.com/s/m4tr3ogr9ouwmibz5dhv9catryr2jqf/>)

Contact an Elementary Education academic adviser for additional information.

Elementary education majors must satisfy a world languages requirement for graduation. Students must complete two years of a foreign language in high school or one year of a foreign language in college.

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)
- To access the policy: Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students, please follow this link: <https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb> (<https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

K-12 and Secondary Education

Students wanting to pursue K-12 or Secondary Teacher Education declare a major in the content area in which they want to focus. In addition, coursework is taken to complete the Education Preparation Program.

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1Injkrb4e9/>)
- To access the policy: Decision Point 1 - Early Admission to the Teacher Education Program for Transfer Students, please follow this

link: <https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb>
(<https://iastate.box.com/s/o45gppndbjxa3j9fm9pwwvrk9cc92jzb/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

Post-Bachelor's Students

Students holding an appropriate bachelor's degree who wish to complete a teacher preparation program in order to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See program coordinator for more information).

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the Policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

Graduate Students

Each Master's program will determine what, if any, general education requirements Master's students must fulfill beyond a bachelor's degree from a regionally accredited institution. (See program coordinator for more information.)

In addition to being admitted Iowa State University and departmental programs/majors, educator preparation candidates must be admitted to the Educator Preparation Program prior to beginning advanced coursework.

Educator Preparation Program Admission Requirements are provided in Educator Preparation Policy.

- To access the Policy: Decision Point 1 - Admission to the Teacher Education Program, please follow this link: <https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9> (<https://iastate.box.com/s/vnp2dt4sihtu99ilym531y1lnjkrb4e9/>)

In order to be recommended for licensure, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

See coordinator for program requirements.

EDUCATOR PREPARATION PROGRAM COMPLETION REQUIREMENTS

In order to be recommended for licensure to the Iowa Board of Educational Examiners by Iowa State University, candidates but have completed all degree program requirements and be considered an educator preparation program completer. To access the policy: Decision Point 3 - Recommendation for Licensure, please follow this link: <https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3> (<https://iastate.box.com/s/s6l016zuyu0r7v7alw426d6bosai6zo3/>)

REGENTS ALTERNATIVE PATHWAY TO IOWA LICENSURE

The Regents Alternative Pathway to Iowa Licensure is a collaborative program involving the three Iowa Regents' universities. The program is designed for adult learners holding a baccalaureate degree with work experience who are seeking 5-12 licensure in a high needs area. For more information: <https://iowateacherintern.org>

Youth Development

Interinstitutional Graduate Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with a specialization in Youth Development. This is an interinstitutional distance education program offered entirely online through the Great Plains Interactive Distance Education Alliance (or GPIDEA). The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from the participating institutions: Iowa State University, Kansas State University Michigan State University, North Dakota State University, Texas Tech University, University of Missouri, and University of Nebraska-Lincoln.

The Master of Family and Consumer Sciences with Youth

Development specialization is only online degree available focusing solely on the skills to serve today's young people. Students become immersed in a strengths-based curriculum and learn a methodology that supports youth, enabling them to grow socially, emotionally, and cognitively. The program has its roots in positive youth development. Rather than focusing solely on corrective measures, a positive youth development approach equips individuals in the second decade of life with the skillset necessary for a successful transition into adulthood.

The masters degree requires 36 credits which includes 25 required credits, 5 or more credits of either creative component or internship, and the remaining credits as electives. A creative component is completed as the final project/exam for this degree. The final project is tailored to the needs of the individual student and determined in cooperation with the student's committee. The student presents the agreed-upon project to the committee in a 60- to 90-minute final oral examination meeting via a video conference call. <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>

Youth Development Certificates

- Youth Development Specialist Graduate Certificate <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>
- Youth Program Management and Evaluation Graduate Certificate (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>)

COLLEGE OF LIBERAL ARTS AND SCIENCES

Beate Schmittmann, Dean

Arne Hallam, Associate Dean

Leslie Hogben, Associate Dean

Jo Anne Powell-Coffman, Associate Dean

Amy Slagell, Associate Dean

Zora D. Zimmerman, Associate Dean Emerita

www.las.iastate.edu/ (<http://www.las.iastate.edu/>)

The College of Liberal Arts and Sciences is a world-class learning and research community. Iowa State's most academically diverse college, LAS educates students to become global citizens, providing rigorous academic programs in the sciences, humanities and social sciences within a supportive, student-centered learning environment that emphasizes career readiness. The college also is home to the Open Option Program that prepares students for any curriculum at the University.

Learning Goals

The primary mission of the college is to promote learning in all its dimensions by providing students with ample opportunities to acquire the requisite knowledge, abilities, and skills to succeed in the world beyond the university. Through coursework within the major and in general education, students will develop skills in reasoning, analysis, and communication; achieve an understanding of the intellectual, historical, and artistic foundations of culture; and work to strengthen their abilities to interact with people, cultures, and the environment in an ethical and sensitive manner. To achieve these learning goals, the college asks students to acquire depth in learning within disciplines of their own choosing, and to acquire breadth through general education courses and electives.

Entering the College of Liberal Arts and Sciences

From High School

Students entering the college are expected to have high school preparation including:

- 4 years of English
- 3 years of Social Studies
- 3 years of Mathematics
- 3 years of Science

Coursework in computer applications and in world languages is highly encouraged; three or more years of a single world language in high school

meets the world language graduation requirement in the College of Liberal Arts and Sciences.

By Transfer

Students are eligible to transfer to the College of Liberal Arts and Sciences with no deficiencies by completing 24 credit hours from an accredited two or four year institution with a 2.25 minimum GPA. To graduate from the LAS College, a transfer student must complete the general requirements of the college as well as those of the university.

Early planning can improve the transfer process and support a timely graduation. For information on articulation/transfer agreements that apply to students who have earned Associate of Arts degrees from an Iowa public community college or who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa, see Articulation/Transfer Agreements in the Admission Transfer Information section of the catalog. Transfer students should also note that in order to graduate "with distinction" students must have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits and have a 3.5 or higher GPA at the beginning of their final term.

Transfer students in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of their graduation or under one of the five immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met though adjustments will be made in instances where courses are no longer available or where programs have been changed. Transfer students are responsible for reviewing their transfer credit evaluation with the academic adviser during the first semester of enrollment. Prospective transfer students are urged to contact the College of Liberal Arts and Sciences well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU.

Curricula of the College of Liberal Arts and Sciences

The college has four curricula: a curriculum in Liberal Arts and Sciences, leading to the Bachelor of Arts or the Bachelor of Science degree; a curriculum in music, leading to the Bachelor of Music degree; a curriculum in liberal studies, leading to the Bachelor of Liberal Studies degree; and a curriculum in Software Engineering, leading to the Bachelor of Science degree.

Liberal Arts and Sciences Curriculum

To obtain a bachelor's degree from the curriculum in liberal arts and sciences, an undergraduate student must meet all university graduation requirements:

- 120 credits or more
- minimum of 32 semester credits earned in residence at Iowa State University
- last 32 credits in residence
- GPA of 2.0 or better on courses taken at Iowa State University
- credit for LIB 160: Information Literacy
- credit for ENGL 150; credit for ENGL 250*
- U.S. diversity and international perspectives requirements

Students must also meet all college and program specific requirements for:

- General Education
- World Language
- Advanced Communication
- Advanced Credits
- Completion of the Major

**The College of Liberal Arts and Sciences aligns with the University Communication Proficiency Grade Requirement: At a minimum, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250; some majors set higher requirements for communication proficiency.*

General Education

Requirements and Learning Goals

The central importance of a general education is reflected in the learning goals of each of three disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation to support learning for all majors.

General Education Areas

The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

- Arts and Humanities—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.
- Mathematical Disciplines and Natural Sciences —(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way

of thinking, and should experience science as a rational search for understanding the structure and behavior of the natural world.

- Social Sciences—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Lists of courses approved for the three general education areas are available on the LAS College website (<http://www.las.iastate.edu/students/academics/general-education/>). Students may not apply the same course in more than one general education area.

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas.

Courses from the department of the first major may not be applied to general education requirements. Courses cross-listed with a course in the student's first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once.

Seminars and experimental courses may be acceptable as general education; advisers should consult with the LAS college office.

Orientation courses, independent study courses (usually numbered 290 or 490), cooperative courses, courses numbered 500 and above, and courses taken on a satisfactory-fail (S-F) or pass-not pass (P-NP) basis cannot be applied to a general education group.

World Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture's language. Students meet this expectation by satisfying a graduation requirement equivalent to the first year of university-level study in one world language.

Students may meet this requirement through several pathways:

- completing three or more years of high-school world language study in a single language
- passing the exam for credit at the 102 level
- receiving a passing grade in an ISU 102 world language or American Sign Language (ASL) course, an ISU 107 intensive world language course, or equivalent transfer course
- receiving a passing grade in a world language course taught in a language other than English at the 200-level or higher
- being a native speaker of a language other than English

- completing a major in any world language
- earning a passing grade in SPAN 097 Accelerated Spanish Review.

Questions about the World Language Requirement and how to meet it should be directed to the College Academic Services office in 102 Catt Hall. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply approved courses in world languages toward the appropriate general education areas.

Advanced Communication Skills

The continued development of communication skills following the sophomore year is the responsibility of the student's major department. The department promotes this development by adopting measures to certify the communication proficiency of its own majors. Certification occurs upon satisfactory completion of a designated course in which communication is evaluated and is a significant component. This designated course may be either a course required in the student's program or an advanced communication course offered by the Department of English, such as:

ENGL 302	Business Communication	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

Advanced Credit Requirements

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher.

The Major

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major is comprised of 24 to 48 credits in a specific discipline as determined by the faculty. Tracks within a major must have a common core that supports learning outcomes of the major. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.) Courses in the first major listed on the degree program may not be counted in the general education groups.

The average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher.

Courses meeting the requirements of additional majors may be counted in the general education groups. When choosing an additional major, students must confirm that the additional major is allowable (see list under "Double Majors").

The major in Interdisciplinary Studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives.

Double Majors

Students may elect a second major from the departments and program areas in the College of Liberal Arts and Sciences, or from a major field offered for the bachelor's degree in another college of the university.

Double majors between the following are not allowed:

- Chemistry with Biochemistry and Agricultural Biochemistry;
- Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Genetics, and Microbiology;
- Economics with Business Economics
- Any combination of Journalism and Mass Communication, Advertising, and Public Relations.

A student in the Bachelor of Liberal Studies or Bachelor of Music curricula may not add a major from the Liberal Arts and Sciences curriculum, though they may work toward a second degree in the Liberal Arts and Sciences curriculum.

To be awarded a double major both major departments must approve the degree program, and if those majors involve two colleges, both colleges must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major.

If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences must meet all requirements of the second major, but are exempt from the LAS College General Education, World Language and Advanced Credits requirements.

A student may earn two degrees in the Liberal Arts and Sciences curriculum with two appropriate majors and at least 30 additional credits. Any degree offered by this college may be earned together with a degree

and a major in any other college of the university. For the requirements for two degrees, see Two Bachelor's Degrees in the Degree Planning section of the catalog.

Minors

In addition to earning a major a student may want to add a minor to the program of study. Minors are established by programs and must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. To earn a minor students must file paperwork to declare the minor and must complete the requirements specified by the program. The minor must include at least 9 credits that are not used to meet any department, college, or university requirement other than the credit requirement for graduation and credit requirement for courses numbered 300 or above. Courses for the minor beyond those 9 standalone credits may be applied toward general education or to meet other graduation requirements. Completed minors will be recorded on the transcript.

More information and a list of minors offered by the college of Liberal Arts and Sciences can be found on the University Minors page.

Bachelor of Music Curriculum

The Department of Music offers a Bachelor of Music degree (B.Mus.) as well as a Bachelor of Arts degree in music. In order to receive teacher certification in music, students must earn the Bachelor of Music degree. Bachelor of Music students must select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition. For details about both degrees, see Music, Undergraduate Study.

Bachelor of Liberal Studies Curriculum

The LAS College administers the Bachelor of Liberal Studies (B.L.S.) degree, a bachelor's degree program established by the three Iowa Regent universities. The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals. Students in the B.L.S. program are not eligible to add majors to their degree program, but they may earn a Certificate or minor by completing all of the requirements of those programs.

For specific degree requirements, see Liberal Studies.

Software Engineering Curriculum

A Bachelor of Science degree in software engineering is jointly administered by the College of Liberal Arts and Sciences and the College of Engineering. The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes,

techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This cross-college program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering.

Additional Curricular Policies

In addition to the policies outlined in the above discussion of the curricula of the LAS College:

- Elective courses as well as general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.
- Courses taken on a pass/not pass basis may be counted toward the required total of 120 credits and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.
- No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.
- Students whose high school study of world languages meets the College World Language Requirement may not enroll in or receive credit for 101 or 102 in that language.
- Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education area requirements.

Be sure to talk to your academic adviser and review other University policies that affect graduation in the Academics section of the catalog.

The Open Option

Students who enter Iowa State University and want time to explore the best match between their academic interests and abilities, may do so as Open Option students.

The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State. Open Option students are assigned academic advisers in the Liberal Arts and Sciences Student Academic Services Office and take LAS 101, an orientation class that introduces students to campus resources as well as to all of the colleges and majors on campus.

Aided by their adviser, Open Option students select courses that allow them to sample their academic interests before committing to a specific university major. Open Option students typically declare a major during

their second or third semester. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

Academic Enhancements in LAS Certificate Programs

The LAS College also administers certificate programs in Actuarial Science, Computing Applications, Data Science, Latin American Studies, and Leadership Studies. Students interested in pursuing these certificates are advised to consult with their academic adviser and with the relevant program that administers the certificate. Completion of a certificate will be recorded on the transcript.

Honors Program

Students enrolled in the College of Liberal Arts and Sciences are encouraged to participate in the University Honors Program.

Liberal Arts and Sciences Honors is designed to add depth and breadth to students' programs of study and intellectual development. Students in Liberal Arts and Sciences Honors benefit from the resources and capabilities of a large and dynamic research university along with the small class sizes and intellectual community that characterize smaller, selective liberal arts colleges. Membership in LAS Honors offers specific benefits to students such as collaborations with individual faculty members on Honors projects, extended library loan privileges, 24-hour use of the Jischke Honors Building and priority registration for classes.

LAS Honors encourages freshmen as well as more advanced students to join. Graduation in the Honors Program is recognized by a special notation on the student's diploma and permanent record. Honors students wear white Honors cords at graduation.

Teacher Preparation

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for recommendation. Recommendations for teaching licensure are issued for a specific teaching level, e.g., grades 5-12. Subject area endorsements are listed on the candidate's license. The College of Liberal Arts and Sciences collaborates with the School of Education to prepare students for recommendations for licensure in approved programs. Students who plan to teach in secondary schools (grades 5-12) may work toward completing an approved teacher preparation program in one of the following majors:

- Biology
- Chemistry
- Earth Science
- English

- History
- Mathematics
- Music (through the Bachelor of Music curriculum)*
- Physics
- World Languages and Cultures (Endorsements are available in French, German, and Spanish.)

Students may also prepare for recommendation for additional endorsements to their primary license in:

- English as a Second Language
- General Science
- Physical Science
- Social Studies
- Speech Communication
- World Languages and Cultures (Chinese, Latin, and Russian)

*Students in the College of Liberal Arts and Sciences who complete the approved teacher preparation program in music education (BM degree with Vocal K-12 option or Instrumental K-12 option) and meet all other requirements may be recommended for a teaching license that allows them to teach music in grades K-12.

For further information, see Teacher Education.

Preprofessional Programs

Students in the College of Liberal Arts and Sciences may participate in preprofessional programs by taking the courses required for admission to professional schools. Students may enter the college with the designation Premed, Prelaw, or Preprofessional Health Programs. Most will earn a bachelor's degree by choosing a major and meeting the requirements for the major while taking the preprofessional courses.

Others will spend one to three years as students in the college before transferring to a professional school to which they have applied and been accepted. For further information, see Opportunities for Preprofessional Study.

The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa. Visit the Liberal Arts and Sciences Student Academic Services office for details.

Reserve Officers' Training Corps Programs (ROTC)

The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in Military Science (Army), Naval Science (Navy, Marine Corps), and Air Force Aerospace Studies.

Learning Communities

Students in the LAS College can participate in a variety of learning community options that support student success by supporting the transition to college life. There are various kinds of learning communities both within and across majors. Most learning communities involve small groups of students who take one or more classes in common and have a staff person or peer mentor who supports students as they make connections and get engaged at ISU.

See <http://www.lc.iastate.edu/> for more information.

Study Abroad and National Student Exchange

The LAS College offers many study abroad and domestic exchange program options to enhance the undergraduate experience. Every year hundreds of students expand their horizons through these programs while they stay on track for graduation. Visit the LAS Study Abroad office in Catt Hall or the National Student Exchange office in 1080 Hixson-Lied for more information.

Undergraduate Research

The LAS College has hundreds of faculty actively engaged in research and most majors have designated independent study and/or research courses. Students are encouraged to talk to faculty about how they can be involved in the process of discovery.

Career Services, Internships and Co-ops

LAS Career Services assists students in gaining career-related experience while going to school. Internships/Co-ops provide students with the opportunity to gain specific skills, apply academic knowledge in practical situations, pretest their career choice, and establish a network of professional contacts. Internships may be paid or unpaid.

Most internships last for a semester or a summer. Students wishing to receive academic credit for their internship must work with their departments and programs in advance of their internship experience to establish a plan to connect their work experience to the curriculum. Official ISU sanctioned co-op arrangements allow students to work full-time on an extended basis (such as working two semesters) or on an alternating basis (work, school, work, etc.) during any semester (fall, spring, summer) while keeping their student status.

Gaining work experience while in college is highly recommended. Students can find internship opportunities through the University CYHIRE system and through participation in any of the career fairs held on campus each Fall and Spring semester. Students must visit with their adviser to make plans for an internship experience and to understand what impact, if any, it may have on their four-year graduation plan.

For additional information, contact Liberal Arts and Sciences Career Services on the first floor of Carver Hall.

Academic Advising Planning the Program of Study

Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student's chosen major is available to the student and the adviser through AccessPlus. The student should review the audit each semester and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean's office. Students are responsible for reviewing and updating their degree audits in a timely fashion in order to avoid delays in graduation.

During the first two years, students should meet proficiency requirements in ISU Comm Foundations (English 150,250) and Information Literacy (LIB 160) and make progress toward meeting the general education requirements. The third and fourth years should emphasize completion of the major (and minor, if elected) and general education requirements, and should give the student an opportunity to take electives. Students seeking the enhanced academic opportunities provided by Study Abroad, National Student Exchange, Honors, Undergraduate Research and Internships will want to engage in careful planning of the Program of Study.

Academic Advising Learning Outcomes

Through their experience with academic advising, students will:

- Develop an understanding of the structure, application, and goals of a liberal arts education in relation to their academic development.
- Be able to formulate appropriate questions, seek information, and evaluate and apply academic advice.
- Know the requirements, policies and protocol of the university, college, and department as they relate to their educational experience.
- Understand how degree programs can be enhanced by study and experiences tailored to their intellectual and personal goals.

Students will also be able to identify and use university resources effectively to:

- Satisfy degree requirements
- Plan programs of study, including selection of appropriate courses and registration
- Discover how interests, skills and goals connect to fields of study and careers
- Link curricular and co-curricular activities
- Research and prepare for advanced study and/or careers

- Share responsibility for a mentor-mentee relationship between advisee and adviser.

Departments of the College

Majors and minors in the College of Liberal Arts and Sciences are administered by the following departments:

- Air Force Aerospace Studies
- Biochemistry, Biophysics, and Molecular Biology
- Chemistry
- Computer Science
- Ecology, Evolution, and Organismal Biology
- Economics
- English
- Genetics, Development, and Cellular Biology
- Geological and Atmospheric Sciences
- Greenlee School of Journalism and Communication
- History
- Mathematics
- Military Science (Army Reserve Officers' Training Corps)
- Music and Theatre
- Naval Science
- Philosophy and Religious Studies
- Physics and Astronomy
- Political Science
- Psychology
- Sociology
- Statistics
- World Languages and Cultures
- Economics, B.S.
- English, B.A., B.S.
- Environmental Science, B.S.
- Environmental Studies (secondary major only)
- French (see World Languages and Cultures, below)
- Genetics, B.S.
- Geology, B.S.
- German (see World Languages and Cultures, below)
- History, B.A., B.S.
- Interdisciplinary Studies, B.A., B.S.
- International Studies (secondary major only)
- Journalism and Mass Communication, B.S.
- Liberal Studies, B.L.S. (a general studies degree)
- Linguistics, B.A.
- Mathematics, B.S.
- Meteorology, B.S.
- Music, B.A., B.Mus.
- Performing Arts, B.A.
- Philosophy, B.A.
- Physics, B.S.
- Political Science, B.A.
- Psychology, B.A., B.S.
- Public Relations, B.S.
- Religious Studies, B.A.
- Sociology, B.A., B.S.
- Software Engineering, B.S.
- Spanish (See World Languages and Cultures, below)
- Speech Communication, B.A.
- Statistics, B.S.
- Technical Communication, B.S.
- Women's and Gender Studies, B.A., B.S.
- World Languages and Cultures B.A.:
 - French
 - German
 - Spanish

MAJORS

- Advertising, B.A.
- Anthropology, B.A., B.S.
- Biochemistry, B.S.
- Bioinformatics and Computational Biology B.S.
- Biological/Pre-Medical Illustration, B.A.
- Biology, B.S.
- Biophysics, B.S.
- Chemistry, B.A., B.S.
- Communication Studies, B.A.
- Computer Science, B.S.
- Criminal Justice Studies, B.A.
- Data Science, B.S.
- Earth Science, B.A., B.S.

A secondary major must be taken in conjunction with a primary major.

MINORS

To earn a minor students must file paperwork to declare the minor and must complete the requirements specified by the program. Minors consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. Minors must also include at least 9 credits that are not used to meet any department,

college, or university requirement other than the credit requirement for graduation and credit requirement for courses numbered 300 or above.

Completed minors will be recorded on the transcript.

- Advertising
- African and African American Studies
- American Indian Studies
- Anthropology
- Astronomy
- Biochemistry
- Bioinformatics and Computational Biology
- Biological Illustration
- Biology
- Chemistry
- Chinese Studies
- Classical Studies
- Communication Studies
- Computer Science
- Criminal Justice Studies
- Data Science
- Economics
- Emerging Global Disease*
- English
- Entrepreneurial Studies*
- Environmental Studies
- French
- Genetics
- Geology
- German
- Gerontology

- Leadership Studies Certificate

Cross-Disciplinary Programs

The College of Liberal Arts and Sciences has a variety of interdisciplinary and cross-disciplinary programs that draw on faculty expertise across multiple departments. Students may enroll in courses offered by these programs, declare majors or minors where offered, or propose an Interdisciplinary Studies major.

Cross-Disciplinary Programs

African and African American Studies Program

(Minor only) African and African American Studies

American Indian Studies Program

(Minor only) American Indian Studies

Biological/Premedical Illustration Program

(Major or minor) Biological/Pre-Medical Illustration

Communication Studies

(Major or minor) Communication Studies

Data Science

(Major, Minor or Certificate) Data Science

Environmental Science

(Major) Environmental Science

Environmental Studies

(Secondary major or minor) Environmental Studies

Interdisciplinary Studies Program

(Major only; Degree Tracks: Classical Studies; U.S. Latino/a Studies)

Interdisciplinary Studies

International Studies Program

(Second major or minor) International Studies

Leadership Studies

(Minor or Certificate) Leadership Studies

Premedical and Preprofessional Health Programs

Preprofessional Study

Sustainability Program

(Minor only) Interdisciplinary Minor in Sustainability

U.S. Latino/a Studies Program

(Minor) U.S. Latino/a Studies

Women's and Gender Studies Program

(Major or minor) Women's and Gender Studies

Other Program Collaborations

Bachelor of Liberal Studies Program

Liberal Studies

Honors Program in Liberal Arts and Sciences

Teacher Education Program

Teacher Education

Advertising

The Advertising Major

The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media. Coursework in this major focuses on writing, research, digital and

emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

To receive a bachelor of arts degree in advertising, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JL MC or P R. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level courses or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC or P R. These include:

JL MC 101	Mass Media and Society	3
JL MC 110	Orientation to Journalism and Communication	1
JL MC 201	Reporting and Writing for the Mass Media (C+ or better)	3
ADVRT 230	Advertising Principles	3
ADVRT 301	Research and Strategic Planning for Advertising and Public Relations	3

One of the following two courses:

ADVRT 334	Advertising Creativity (C+ or better)	
ADVRT 336	Advertising Account Management (C+ or better)	

One of the following two courses:

ADVRT 434	Advertising Campaigns	
ADVRT 436	Advertising Portfolio Practicum	
JL MC 460	Law of Mass Communication	3
JL MC 462	Media Ethics, Freedom, Responsibility	3
ADVRT 499A	Professional Media Internship: Required	3

Advertising majors are also required to take:

MKT 340	Principles of Marketing	3
SP CM 212	Fundamentals of Public Speaking	3
STAT 101	Principles of Statistics (or another approved statistics course)	4

Additional recommended courses and requirements for the advertising major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or minor in the school. All Greenlee School majors are required to take a second major or minor outside the school as an area of expertise. All Greenlee School majors are required to take 499A. Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Minor in Advertising

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in advertising, students complete 15 credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

JL MC 101	Mass Media and Society	3
ADVRT 230	Advertising Principles	3
ADVRT 301	Research and Strategic Planning for Advertising and Public Relations	3
6 credits from the following:		6
ADVRT 335	Advertising Media Planning	
JL MC 307	Digital Video Production	
JL MC 390	Professional Skills Development	
JL MC 401	Mass Communication Theory	
JL MC 406	Media Management	
JL MC 474	Communication Technology and Social Change	
JL MC 476	World Communication Systems	
JL MC 477	Diversity in the Media	
ADVRT 497	Special Topics in Communication

<hr/>		
	12	12

For JL MC 300- and 400-level choices, please choose from the list of selected courses available from an academic adviser. You may schedule an appointment with an adviser by either calling 515-294-4342 or visiting with our front office staff at 101 Hamilton Hall.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses: (U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>) and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>). Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

African and African American Studies

Interdepartmental Undergraduate Program

African and African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans' experience and African American contributions to American culture. Students in the program analyze and learn about African American experiences through the study of history, literature, art, religion, and society. They gain knowledge and develop skills and sensitivities to help them function effectively in today's diverse society.

African and African American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university's diversity requirement. Students can minor or even design their own Interdisciplinary Studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

Graduate Study

Several courses can be applied to a graduate program as electives.

A minor in African and African American Studies requires six courses in the program with a minimum of 18 credits, including AF AM 201 Introduction to African American Studies and AF AM 460 Seminar in African American Culture. The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

American Indian Studies

American Indian Studies is a cross-disciplinary minor in the College of Liberal Arts and Sciences that allows students to learn more about the contemporary and historical realities of native communities in North America, to appreciate the variety of native cultures and experiences, and

to be prepared for an attentive lifelong learning experience in a diverse world.

Courses focus on critical thinking and the application of knowledge in complex, diverse situations. Courses in American Indian Studies thus not only provide knowledge on specific native issues, but also prepare students for careers and further studies in fields such as community development and planning, social work, law, sociology, education, history, anthropology, agriculture, resource extraction, literature, policy, engineering, environmental issues.

Today, 80% of American Indians live outside of reservation communities. American Indian Studies students will gain the knowledge and skills they need for living and working with, in and around native communities and people who live everywhere in North America, and, increasingly, the world.

For students who are interested in deeper knowledge on the issues, a major can be pursued through the Interdisciplinary Studies major in the College of Liberal Arts and Sciences. Faculty members also are available to provide expertise to graduate students working on specific issues that involve American Indian themes.

Most American Indian Studies courses meet the university-wide U.S. Diversity requirement.

The minor in American Indian Studies is 15 credits and includes:

AM IN 210	Introduction to American Indian Studies	3
-----------	---	---

And 12 additional credits of AM IN coursework, of which at least 9 credits need to be 300-level courses or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

The coursework will be established in consultation with the director of the program through the student's "Request for Minor" form.

Anthropology

The ISU program in Anthropology is housed in the Department of World Languages and Cultures (<http://catalog.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures/>).

An undergraduate major in Anthropology can serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology students develop a well-rounded professional education in cultural anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and society,

the biology and evolution of humans and other primates, and through the study of past human communities and material culture. Students learn the important historical and contemporary issues of our subdisciplines, and they learn what it means to be an Anthropologist and acquire an anthropological perspective on global issues. Students develop an appreciation of the value of cultural difference at the local, national and global levels. Students may obtain experience in archaeological, ethnographic and biological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area I (Arts and Humanities) or III (Social Sciences) or a combination of both. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area IIA (Mathematics) or IIB (Natural Sciences) or a combination of both.

Undergraduate students with majors in anthropology are required to take the following anthropology core courses:

ANTHR 201	Introduction to Cultural Anthropology	3
ANTHR 202	Introduction to Biological Anthropology and Archaeology	3
ANTHR 306	Cultural Anthropology	3
ANTHR 307	Biological Anthropology	3
ANTHR 308	Archaeology	3
ANTHR 450	Approaches in Anthropology	3

One of the following methods courses is required: 3

ANTHR 319	Skeletal Biology
or ANTHR 32	Archaeological Discovery and Analysis
or ANTHR 43	Ethnographic Methods

In addition to the above, 15 ANTHR choice credits are required. 15

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	

Additionally, the Anthropology Program requires a grade of C or better in one of the following courses:

ENGL 302	Business Communication
ENGL 309	Proposal and Report Writing
ENGL 314	Technical Communication

The principal sub-disciplines of anthropology are represented by the following:

1. Cultural anthropology:

ANTHR 201	Introduction to Cultural Anthropology	3
ANTHR 230	Globalization and the Human Condition	3
ANTHR 306	Cultural Anthropology	3
ANTHR 309	Introduction to Culture and Language	3
ANTHR 313	Kinship and Marriage in a Global Perspective	3
ANTHR 322	Peoples and Cultures of Native North America	3
ANTHR 323	Topics in Latin American Anthropology	3
ANTHR 325	Peoples and Cultures of Africa.	3
ANTHR 332	Current Issues in Native North America	3
ANTHR 336	Global Development	3
ANTHR 340	Magic, Witchcraft, and Religion	3
ANTHR 354	War and the Politics of Humanitarianism	3
ANTHR 411	Anthropology for Global Professionals	3
ANTHR 418	Global Culture, Consumption and Modernity	3
ANTHR 431	Ethnographic Methods	3-6
ANTHR 434B	Internship: Cultural Anthropology	2-6
ANTHR 434D	Internship: Linguistic Anthropology	2-6
ANTHR 444	Sex and Gender in Cross-cultural Perspective	3
ANTHR 450	Approaches in Anthropology	3
ANTHR 451B	Practicum in Anthropology: Cultural Anthropology	1-3
ANTHR 451D	Practicum in Anthropology: Linguistic Anthropology	1-3
ANTHR 490B	Independent Study: Cultural Anthropology	1-5
ANTHR 490D	Independent Study: Linguistic Anthropology	1-5

2. Archaeology:

ANTHR 202	Introduction to Biological Anthropology and Archaeology	3
ANTHR 308	Archaeology	3
ANTHR 315	Archaeology of North America	3
ANTHR 320	Great Plains Archaeology	3
ANTHR 321	World Prehistory	3
ANTHR 328	Archaeological Discovery and Analysis	3
ANTHR 429	Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School	4-6
ANTHR 434A	Internship: Archaeology	2-6
ANTHR 450	Approaches in Anthropology	3
ANTHR 451A	Practicum in Anthropology: Archaeology	1-3

ANTHR 427I	Field Archaeology	4
ANTHR 490A	Independent Study: Archaeology	1-5

3. Biological Anthropology:

ANTHR 202	Introduction to Biological Anthropology and Archaeology	3
ANTHR 307	Biological Anthropology	3
ANTHR 319	Skeletal Biology	3
ANTHR 424	Forensic Anthropology	3
ANTHR 434C	Internship: Biological Anthropology	2-6
ANTHR 445	Biological Field School	4-6
ANTHR 451C	Practicum in Anthropology: Biological Anthropology	1-3
ANTHR 490C	Independent Study: Biological Anthropology	1-5

A minor in anthropology consists of at least 15 credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

ANTHR 201	Introduction to Cultural Anthropology	3
ANTHR 202	Introduction to Biological Anthropology and Archaeology	3
One of the following in cultural anthropology:		3

ANTHR 306 Cultural Anthropology
or ANTHR 3C Introduction to Culture and Language
or ANTHR 3Z Peoples and Cultures of Native North America
or ANTHR 3Z Topics in Latin American Anthropology
or ANTHR 3Z Magic, Witchcraft, and Religion

One of the following in archaeology or biological anthropology: 3

ANTHR 307 Biological Anthropology
or ANTHR 3C Archaeology
or ANTHR 31 Archaeology of North America
or ANTHR 31 Skeletal Biology
or ANTHR 3Z World Prehistory
or ANTHR 4E Topics in Biological Anthropology

Three additional credits in ANTHR at the 300+ level 3

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

Students in Anthropology have the option of pursuing a B.S. or a B.A. A B.S. requires six additional group requirement credits in natural science or mathematics disciplines. A B.A. requires six additional group requirement credits in social or humanities disciplines.

Graduate Study

The department offers a master of arts degree with a major in anthropology. Graduate courses are offered in the areas of archaeology, biological anthropology, and cultural anthropology. Competence in statistics or a methodology relevant to the student's program of study must be demonstrated. Students are required to do original field, archival, or laboratory research that will result in a scholarly thesis.

Biochemistry and Biophysics

The department of Biochemistry, Biophysics & Molecular Biology (<http://www.bbmb.iastate.edu>) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry, biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students

have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

A program that combines a bachelor of science and masters of science in biochemistry or biophysics is offered.

Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences

For the undergraduate curriculum leading to the degree bachelor of science, major in Biochemistry in the College of Agriculture and Life Sciences, see biochemistry in Agriculture and Life Sciences.

Biochemistry and biophysics are recommended to students whose career interests involve advanced graduate or medical study or employment in biochemistry or biophysics, or in related areas of the biological or medical sciences.

Total Credits: 114-117

* General Chemistry I and II (177, 177N or 177L and 178) are acceptable substitutes for CHEM 201 and 201L.

** ALEKS assessment determines math placement.

¹ Communication Proficiency: A grade of C or better is required in ENGL 250. For students fulfilling the upper-level requirement with BBMB 411, a grade of 80% or better must be earned on two journal-style written reports.

² Liberal Arts and Sciences (LAS) General Education requirements include: 12cr. Arts and Humanities, 9 cr. Social Sciences and 11 cr. Natural Sciences (8 cr.) and Math (3 cr.).

Students in all ISU majors must complete a 3 cr. course in U.S. Diversity and a 3 cr. course in International Perspectives. Discuss with your adviser how the two courses you select can be applied to address general education requirements. Check for a list of approved courses at: [http://www.registrar.iastate.edu/students/div-ip-guide/](http://www.registrar.iastate.edu/students/div-ip-guide) (<http://www.registrar.iastate.edu/students/div-ip-guide/>)

³ One Biology laboratory course is required. Choose Biol 211L, 212L or 313L.

⁴ Students have the option of choosing the senior level biochemistry sequence for 6 credits (BBMB 404 and BBMB 405) or the graduate-level biochemistry sequence for 8 credits (BBMB 504, 505 and BBMB 506, 507).

⁵ Undergraduate study or research, BBMB 490 or 499, is recommended but not required. Credit value is variable.

⁶ Four credits of electives in Biological Sciences are required.

⁷ CHEM322L may be taken as a substitute for BBMB 561L.

⁴ Students have the option of choosing BBMB 405 or BBMB 420.

⁵ Undergraduate study or research, BBMB 490 or 499, is recommended but not required. Credit value is variable.

⁶ Seven additional science elective credits 300+; biochemistry, biophysics, biological sciences, chemistry or physics.

⁷ CHEM 322L can substitute for BBMB 561L.

⁸ World Language Requirement

Graduate Study

Introduction

Biochemistry and Biophysics are the science and technology used to understand the mechanisms underlying biological processes at the molecular level, with an emphasis on the fundamental relationships among the chemical, physical, and biological sciences. The Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology (BBMB) administers Doctor of Philosophy (Ph.D.), Master's (M.S.), and Graduate

Certificate programs that lead to an advanced degree or certificate in these disciplines. The prerequisite to graduate study is a sound undergraduate background in biology, chemistry, mathematics, and physics.

BBMB offers Doctor of Philosophy and Master's degrees in Biochemistry and in Biophysics that are designed to train students to independently conceive and carry out original research. BBMB also offers two graduate certificate programs in Biochemistry that provide a mechanism for formal recognition of focused graduate study in a specialized area that is less comprehensive than that required for a master's degree. BBMB participates in the Interdepartmental majors of Bioinformatics and Computational Biology; Genetics and Genomics; Immunobiology; Molecular, Cellular, and Developmental Biology; Neuroscience; Plant Biology; and Toxicology. All graduate degree students in BBMB are required to teach as part of their training.

Graduate Degree Programs

Concurrent Bachelor's (B.S.)/ Master's (M.S.) Degree

The department offers a concurrent enrollment degree program in either Biochemistry or Biophysics that allows ISU undergraduate students to obtain both the B.S. and M.S. degrees in about five years. The program is open to undergraduate students in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. The concurrent degrees can be useful to students entering various career tracks. For those considering careers as research specialists, entry positions with higher-level responsibilities, and a higher-level salary, are made possible with the M.S. degree. For those considering careers as research directors, which require advanced study, the M.S. degree provides an advantage for admission into Ph.D. programs at the most competitive and prestigious graduate schools. Similarly, the M.S. degree can be a competitive advantage for admission in to medical, dental, law, veterinary medicine, or other professional schools.

Application to the program is made near the end of the junior undergraduate (third) year. Concurrent B.S./M.S. degree students begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships, which are renewable based on academic standing and satisfactory research performance. The M.S. thesis requires intensive experience in original, independent laboratory research under the close supervision of a faculty mentor. To apply, see the concurrent B.S./M.S. application instructions found on the department's Graduate Study web page.

Master's (M.S.) Degree

The M.S. degree programs in Biochemistry and in Biophysics are useful for students who prefer to undertake research training without the longer-term commitment required for the Ph.D. degree. It is also useful for

students interested more in the technical aspects of research rather than in careers as research directors. The program requires about 3 years on average to complete and the successful defense of an independent research dissertation is required. About half the time required to earn the degree is spent on advanced coursework and professional seminars, and the other half is devoted to research undertaken in the laboratory under the close supervision of a faculty mentor. Financial support is available.

To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool.

NOTE: Students interested in a research career are encouraged to consider the Ph.D. track. Students may enter the Biochemistry or Biophysics M.S. degree program as a direct admit to a faculty research group at any time during the year.

Doctor of Philosophy (Ph.D.) Degree

The Ph.D. programs in Biochemistry and in Biophysics are designed to train students in the ability to independently conceive and carry out original research in the general area of the chemistry or physics of the processes of life. The programs require about 5-6 years on average to complete and the successful defense of an independent research dissertation. The majority of the time required to earn the degree is spent doing research on the dissertation project in the laboratory under the close supervision of a faculty mentor. Considerable time also is devoted to advanced coursework and professional seminars. Financial support is available. To apply, applicants first submit the free BBMB online application found on the department website, which is used as a screening tool. Students may enter the Biochemistry or Biophysics Ph.D. degree programs either as a rotation student in the fall semester or as a direct admit to a faculty research group at any time during the year.

Minor in Biochemistry

Graduate students in other M.S. and/or Ph.D. programs at ISU can earn a graduate minor in Biochemistry by completing 12 credits of the following courses with a grade point average of 3.0 or above: at least 6 credits from BBMB 504, 505, 506 and 507 and at least 6 credits of other BBMB 500- and 600-level courses. A student wishing to declare a minor in Biochemistry should arrange for a member of the graduate faculty in Biochemistry to serve on the POS Committee and submit the required form found on the Graduate College Forms page.

Graduate Certificate Programs

The graduate certificate program is designed for students who wish to continue or expand their knowledge in Biochemistry at the graduate level without the time commitment or lab experience required for a formal Master's or Ph.D. program. A certificate program can be an attractive option for individuals who have a bachelor's degree and are interested in broadening their expertise, or who are working in the sciences or industry

and want to continue their education at the graduate level. BBMB offers two graduate certificate programs in Biochemistry: a concurrent B.S. / Graduate Certificate and a Graduate Certificate. The standards of admission and the course standards to which a certificate student are held are equivalent to those expected of a master's student. Each graduate certificate requires at least 12 graduate credits, all of which are available either on campus or on line. A graduate supervisor will be appointed to oversee the certification for each student.

If a person who completes a graduate certificate program decides to continue for a graduate degree in Biochemistry or Biophysics, program approval is required. Credits earned for the graduate certificate may be used to meet course requirements for the graduate degree program.

Concurrent B.S./Graduate Certificate

This B.S. /Graduate Certificate program is intended for exceptional undergraduate students majoring in Biochemistry. In this program, the student completes all of the requirements for the B.S. degree and the graduate certificate in a four-year period by combining the requirements of the two programs. The student enters the Graduate College after he/she achieves junior status and develops a plan of coursework (graduate and undergraduate) subject to the approval of the Director of Certificate (DOC). Required graduate courses are BBMB 504, 505, 506, 507, 561 and 561L. The student must satisfy the requirements of the B.S. in Biochemistry (121 credits) and the Graduate Certificate in Biochemistry (12 credits). Six credits of graduate coursework can satisfy some requirements of the B.S. degree. To apply for the B.S./Graduate Certificate, submit the application form found on the Graduate College Forms web page.

Graduate Certificate in Biochemistry

The graduate certificate in Biochemistry is designed for students who have a B.S. degree in Biochemistry or a related field and wish to advance their knowledge by taking additional coursework at the graduate level.

The graduate certificate courses may be taken either on-line or on campus. Candidates for a graduate certificate in Biochemistry are admitted in the Graduate College. A total of 12 credits is required that include BBMB 504, 505, 506 and 507, plus four additional credits of BBMB coursework at the 500-level. The 12 credits earned in the graduate certificate program may be applied to meet the course requirements of a M.S. or Ph.D. program in Biochemistry at Iowa State University (ISU) if the student is accepted into one of these programs. To apply for the graduate certificate in Biochemistry, submit the ISU online application.

Bioinformatics and Computational Biology

Undergraduate study in BCBio is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell

Biology, and the Department of Mathematics. The undergraduate B.S. degree is offered through the College of Liberal Arts and Sciences.

Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad range of possibilities to get involved in research.

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBio graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology that now exist.

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

In addition to basic degree requirements listed in the Curriculum in Liberal Arts and Sciences, BCBio majors must satisfy the following requirements:

A. Complementary Courses for the BCBio Major

A minimum of 4 credits from the following: 4-8

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry
--------------------	--

or

CHEM 177 & 177L & CHEM 178	General Chemistry I and Laboratory in General Chemistry I and General Chemistry II
----------------------------------	--

or

CHEM 201 & 201L	Advanced General Chemistry and Laboratory in Advanced General Chemistry
--------------------	--

A minimum of 4 credits from the following: 4-8

CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry
--------------------	--

or

CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I
--------------------	--

and		
CHEM 332 & 332L	Organic Chemistry II and Laboratory in Organic Chemistry II	
PHYS 111	General Physics	5
or		
PHYS 221	Introduction to Classical Physics I	
or		
PHYS 115 & 115L	Physics for the Life Sciences and Laboratory in Physics for the Life Sciences	
STAT 330	Probability and Statistics for Computer Science	3
STAT 483	Empirical Methods for the Computational Sciences	3
BIOL 211 & 211L	Principles of Biology I and Principles of Biology Laboratory I	4
BIOL 212 & 212L	Principles of Biology II and Principles of Biology Laboratory II	4
BIOL 314	Principles of Molecular Cell Biology	3
or		
BIOL 315	Biological Evolution	
or		
GEN 409	Molecular Genetics	
Total Credits		30-38

Complementary courses note: The following other STAT courses may be substituted for STAT 330 and STAT 483, with permission of the BCBio Major.

STAT 330: STAT 101, 104, 105, 201, 231, 305, or 341

STAT 483: STAT 301, 342, or 432

B. Core Courses Within the BCBio Major

GEN 313 & 313L	Principles of Genetics and Genetics Laboratory	4
A minimum of 6 credits from the following:		6-7
COM S 227 & COM S 228	Object-oriented Programming and Introduction to Data Structures (recommended when developing course plan)	
or		
COM S 207 & COM S 208	Fundamentals of Computer Programming and Intermediate Computer Programming (allowed for students entering major who took these courses)	
COM S 230	Discrete Computational Structures	3
COM S 311	Introduction to the Design and Analysis of Algorithms	3

MATH 165 & MATH 166	Calculus I and Calculus II (recommended when developing course plan)	8
BCBIO 110	BCBIO Orientation	0.5
BCBIO 322	Introduction to Bioinformatics and Computational Biology	3
BCBIO 401	Fundamentals of Bioinformatics and Computational Biology	3
BCBIO 402	Fundamentals of Systems Biology and Network Science	3
BCBIO 490 or BCBIO 491	Independent Study Team Research Projects.	1-5
Total Credits		34.5-39.5

Core courses note: The Com S 227/228 and Math 165/166 core course series is required for BCBio majors. However, students transferring into the major who have already earned credit for Com S 207/208 and/or the Math 181/182 can substitute those courses for the respective Com S 227/228 and/or Math 165/166 series. Students will need permission of the instructors to enroll in any upper level course that requires a pre-req in Com S 227/228 and/or Math 165/166.

C. Support Electives

3-9 credits to be chosen from the following list:

BBMB 404	Biochemistry I	3
BBMB 405	Biochemistry II	3
BBMB 461	Molecular Biophysics	2
BIOL 328	Molecular and Cellular Biology of Human Diseases	3
BIOL 423	Developmental Biology	3
BIOL 451	Plant Evolution and Phylogeny	4
BIOL 462	Evolutionary Genetics	3
BIOL 487	Microbial Ecology	3
COM S 252	Linux Operating System Essentials	3
COM S 309	Software Development Practices	3
COM S 319	Construction of User Interfaces	3
COM S 327	Advanced Programming Techniques	3
COM S 363	Introduction to Database Management Systems	3
COM S 425	High Performance Computing for Scientific and Engineering Applications	3
COM S 426	Introduction to Parallel Algorithms and Programming	4
GEN 340	Human Genetics	3
GEN 410	Analytical Genetics	3
MATH 207	Matrices and Linear Algebra	3

or MATH 317	Theory of Linear Algebra	
MATH 265	Calculus III	4
MATH 266	Elementary Differential Equations	3
or MATH 267	Elementary Differential Equations and Laplace Transforms	
MATH 304	Combinatorics	3
MATH 314	Graph Theory	3
MATH 373	Introduction to Scientific Computing	3
MICRO 402	Microbial Genetics and Genomics	3
STAT 342	Introduction to the Theory of Probability and Statistics II	4
STAT 471	Introduction to Experimental Design	3
STAT 474	Introduction to Bayesian Data Analysis	3
STAT 475	Introduction to Multivariate Data Analysis	3
STAT 486	Introduction to Statistical Computing	3
STAT 581	Analysis of Gene Expression Data for the Biological Sciences	3

D. The communications and English proficiency requirements of the LAS college are met by:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	

And one of the following:

ENGL 309	Proposal and Report Writing	3
----------	-----------------------------	---

or

ENGL 312	Biological Communication	
----------	--------------------------	--

or

ENGL 314	Technical Communication	
----------	-------------------------	--

BCBio majors must earn a minimum grade of C in ENGL 250 Written, Oral, Visual, and Electronic Composition or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors.

Minor in Bioinformatics and Computational Biology

The administering departments offer a minor in Bioinformatics and Computational Biology, which requires the following courses.

BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3
GEN 313	Principles of Genetics	3
COM S 227 & COM S 228	Object-oriented Programming and Introduction to Data Structures	7

or

COM S 207 & COM S 208	Fundamentals of Computer Programming and Intermediate Computer Programming	
STAT 330	Probability and Statistics for Computer Science	3
BCBIO 322	Introduction to Bioinformatics and Computational Biology	3
BCBIO 401	Fundamentals of Bioinformatics and Computational Biology	3
BCBIO 402	Fundamentals of Systems Biology and Network Science	3

Total Credits **28**

Note: The following other STAT courses may be substituted for STAT 330, with permission of the BCBio Major: STAT 101, 104, 105, 201, 231, 305, or 341

2. The Com S 227/228 course series is required for the BCBio minor.

However, students transferring into the minor who have already earned credit for Com S 207/208 can substitute those courses for the Com S 227/228 series. Students will need permission of the instructors to enroll in any upper level course that requires a pre-req in Com S 227/228.

Most students pursuing a minor in Bioinformatics and Computational Biology will be biology, genetics, computer science, computer engineering, statistics, or mathematics students who have already taken some of these courses for their major. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Entomology, Genetics, Development and Cell Biology; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu (<http://www.bcb.iastate.edu>).

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis

research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 Graduate Research Rotation, working with three or more different research groups to gain experience in both "wet" (biological) and "dry" (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A course load similar to the following list would be considered acceptable:

MATH 265	Calculus III	4
STAT 341	Introduction to the Theory of Probability and Statistics I	4
COM S 207	Fundamentals of Computer Programming	3
COM S 208	Intermediate Computer Programming	3
COM S 230	Discrete Computational Structures	3
CPR E 310	Theoretical Foundations of Computer Engineering	3
CHEM 163	College Chemistry	4
CHEM 231	Elementary Organic Chemistry	3
BBMB 301	Survey of Biochemistry	3
BIOL 313	Principles of Genetics	3
BIOL 315	Biological Evolution	3

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics, three of which are mandatory in the BCB program:

BCB 567	Bioinformatics Algorithms (mandatory)	3
BCB 568	Statistical Bioinformatics (mandatory)	3
BCB 569	Structural Bioinformatics	3
BCB 570	Systems Biology (mandatory)	3

And also should include

GDCB 511	Advanced Molecular Genetics	
BCB 690	Student Seminar in Bioinformatics and Computational Biology	
BCB 691	Faculty Seminar in Bioinformatics and Computational Biology	
BCB 593	Workshop in Bioinformatics and Computational Biology	

M.S. students take the above background and core courses, take at least 6 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu (<http://www.bcb.iastate.edu>).

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology.

The major's curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student's career goals, while simultaneously assuring some exposure

to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

Pre-medical and Human Health Professions--This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary--An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology--Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology--Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity--This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to

explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking recommendation for licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience.

Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major.

Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (<http://www.biology.iastate.edu/>) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a two-semester long Principles of Biology course sequence:

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110.

Students then explore, in any order depending on their interests, four upper-level core courses including: concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of advanced biological science courses at the 300 level, or above, from an approved list of courses. Many of these courses have as prerequisites BIOL 211/L and BIOL 212/L, so students do not need to complete the four upper-level core courses before taking advanced courses. Of these advanced courses, at least 9

credits must be taken as BIOL courses, and a minimum of two laboratory or field courses must also be included from an approved list.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. A 2.0 cumulative average is required in biology and advanced biology coursework. In order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements-- Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212. (Students in the College of Agriculture and Life Sciences are required to earn a C or better in ENGL 150, as well.)

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students

should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.

2.00 GPA average required.

BIOL 110	Introduction to Biology	1
BIOL 111	Opportunities in Biology	0.5
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
BIOL 312	Ecology	4
BIOL 313	Principles of Genetics	3
BIOL 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3
Total Credits		23.5

Advanced Biology: 21 cr.

2.00 GPA average required. See the Biology Program web site for list of approved Advanced Biology courses, or consult an adviser in the Biology Student Services office, 103 Bessey Hall.

Biology advanced courses (from approved list)	9
Additional approved biology advanced courses	12
Total Credits	21

Mathematical Sciences 7 cr.

Students in College of Agriculture and Life Sciences must have a Math and Statistics.

MATH 160 or 165 and STAT 101 or 104

Or		
MATH 165	Calculus I	8
& MATH 166	and Calculus II	
Or		
STAT 101 or 104	and STAT 301	4-7

Physical Sciences

General Chemistry: 5 cr. minimum

CHEM 163	College Chemistry	5
& 163L	and Laboratory in College Chemistry	
Or		

CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	5
CHEM 178 & 178L	General Chemistry II and Laboratory in College Chemistry II	4
Organic Chemistry: 4 cr. minimum		
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4
Or		
CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	4
Biochemistry: 3 cr.		
BBMB 316	Principles of Biochemistry	3
Or		
BBMB 404	Biochemistry I	3
Or		
BBMB 420	Mammalian Biochemistry	3
Physics: 5 cr. minimum		
PHYS 115 & 115L	Physics for the Life Sciences and Laboratory in Physics for the Life Sciences	5
Or		
PHYS 111 & PHYS 112	General Physics and General Physics	10

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication/Information Literacy

Students must earn a C or better in ENGL 250 and the advanced communication course. Additionally, students in the College of Agriculture and Life Sciences must earn a C or better in ENGL 150.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3
or ENGL 312	Biological Communication	

Total Credits 10

Humanities and Social Sciences

Chosen from approved lists.

LAS - Biology

Note: Students must have completed 3 years of a single world language or take 4-8 credits of university level world language.

Humanities		12
Social Sciences		9
Total Credits		21

Humanities and Social Sciences

Chosen from approved lists.

CALS - Biology

Note: Students in CALS - Biology must take an approved speech course and an approved Math and Statistics course.

16**15**

Students must have 120 credits minimum to graduate.

This is only a suggested outline plan. Students may choose or be forced to deviate from this plan to satisfy unmet requirements, for scheduling reasons, or to add a minor or double major. We strongly suggest student involvement in internships, study abroad, summer field stations, Iowa Lakeside Lab, Field Trips in Biology or research opportunities at ISU. These will; enhance your program of study but may add credits or time to your degree plan.

Students are required to take 21 credits in advance biology of which 9 credits must be from the Biology Program, (BIOL), and 2 advanced BIOL courses must have a lab or field component.

- * Students should meet with a Biology Program advisor to determine the proper plans for chemistry, math and physics before selecting those options above.

Graduate Study

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Chemistry

Undergraduate Study

For undergraduate curricula in liberal arts and sciences leading to the degrees Bachelor of Science and Bachelor of Arts, see Liberal Arts and Sciences, Curriculum.

Graduates holding the B.S. degree in Chemistry qualify in many fields as: teachers of Chemistry, supervisors in industry, technical sales personnel, and research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they may explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, or to obtain additional

majors or strong minors. The B.A. degree does not prepare students as well for graduate study or professional employment in chemistry.

Graduates have firm foundations in the fundamentals and application of current chemical theories. They are able to design, carry-out, record, and analyze the results of chemical experiments. They are able to use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research. Graduates are able to communicate the results of their work to chemists, as well as non-chemists. They understand the ethical and environmental dimensions of problems and issues facing chemists. They follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals. Graduates are skilled in problem solving, critical thinking, and analytical reasoning. These skills may be applied to careers in education and industry; in professions such as law, medicine, environmental sciences, and forensic sciences.

The curricula in Chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree provided they also take one Biochemistry course, typically BBMB 301 Survey of Biochemistry, BBMB 316 (<http://catalog.iastate.edu/azcourses/bbmb/>) Principles of Biochemistry or BBMB 404 Biochemistry I and BBMB 405 (<http://catalog.iastate.edu/azcourses/bbmb/>) Biochemistry II.

Liberal arts majors who wish to transfer into Chemistry at the end of their second year may still complete all degree requirements and graduate within five years.

Undergraduate students seeking the B.S. degree in Chemistry have the following courses in their degree programs as minimum requirements:

CHEM 177 & CHEM 178	General Chemistry I and General Chemistry II	5-7
or CHEM 201	Advanced General Chemistry	
CHEM 177L or CHEM 177N or CHEM 201L	Laboratory in General Chemistry I Laboratory in General Chemistry I Laboratory in Advanced General Chemistry	1
CHEM 211	Quantitative and Environmental Analysis	2
CHEM 211L	Quantitative and Environmental Analysis Laboratory	2
CHEM 301	Inorganic Chemistry	2
CHEM 316	Instrumental Methods of Chemical Analysis	2
CHEM 316L	Instrumental Analysis Laboratory	2
CHEM 322L	Laboratory in Physical Chemistry	3
CHEM 324	Introductory Quantum Mechanics	3
CHEM 325	Chemical Thermodynamics	3
CHEM 331	Organic Chemistry I	3
CHEM 332	Organic Chemistry II	3

CHEM 331L or CHEM 333L	Laboratory in Organic Chemistry I Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)	1
CHEM 332L or CHEM 334L	Laboratory in Organic Chemistry II Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)	1
CHEM 402	Advanced Inorganic Chemistry	3
CHEM 401L	Inorganic Chemistry Laboratory	1
Two advanced Chemistry courses (min 4 credits)		4-6
The following are required as supporting work:		
ENGL 150	Critical Thinking and Communication	3
ENGL 250 or ENGL 250H	Written, Oral, Visual, and Electronic Composition Written, Oral, Visual, and Electronic Composition: Honors	3
ENGL 314	Technical Communication	3
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
PHYS 221	Introduction to Classical Physics I	5
PHYS 222	Introduction to Classical Physics II	5

Plus a foreign language requirement.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The Department requires a grade of C- or better in ENGL 314.

CHEM 399 Undergraduate Research or CHEM 499 Senior Research is strongly recommended. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements.

Chemistry majors seeking certification to teach Chemistry in secondary schools must meet the requirements of the College of Human Sciences as well as those of the Chemistry program. In addition, they must apply formally for admission to the teacher education program.

Undergraduate students seeking the B.A. degree in Chemistry have the following courses in their degree programs as minimum requirements:

One of the following sequences:		6-8
CHEM 177 & CHEM 178 & 177L or CHEM 177L	General Chemistry I and General Chemistry II and Laboratory in General Chemistry I Laboratory in General Chemistry I	

CHEM 167 & CHEM 178 & 167L	General Chemistry for Engineering Students and General Chemistry II and Laboratory in General Chemistry for Engineering	
CHEM 201 & 201L	Advanced General Chemistry and Laboratory in Advanced General Chemistry	
CHEM 211	Quantitative and Environmental Analysis	2
CHEM 211L	Quantitative and Environmental Analysis Laboratory	2
CHEM 301	Inorganic Chemistry	2
CHEM 316	Instrumental Methods of Chemical Analysis	2
CHEM 316L	Instrumental Analysis Laboratory	2
CHEM 324	Introductory Quantum Mechanics	3
CHEM 321L	Laboratory in Physical Chemistry	2-3
or CHEM 322L	Laboratory in Physical Chemistry	
CHEM 325	Chemical Thermodynamics	3
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
CHEM 332L	Laboratory in Organic Chemistry II	1
The following are required as supporting work:		12
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
ENGL 314	Technical Communication	3
LIB 160	Information Literacy	1
MATH 165	Calculus I	
MATH 166	Calculus II	
PHYS 221	Introduction to Classical Physics I	
PHYS 222	Introduction to Classical Physics II	

Minor

The Department offers a minor in chemistry which may be earned by credit in:

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
or		
CHEM 167 & 167L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering	5
CHEM 178	General Chemistry II	3
CHEM 211	Quantitative and Environmental Analysis	2

CHEM 211L	Quantitative and Environmental Analysis Laboratory	2
CHEM 324	Introductory Quantum Mechanics	3
CHEM 331 & CHEM 332	Organic Chemistry I and Organic Chemistry II	3-6
or CHEM 231	Elementary Organic Chemistry	
CHEM 331L & CHEM 332L	Laboratory in Organic Chemistry I and Laboratory in Organic Chemistry II	1-2
or CHEM 231L	Laboratory in Elementary Organic Chemistry	
And one of the following:		2-5
CHEM 301	Inorganic Chemistry	
CHEM 316 & 316L	Instrumental Methods of Chemical Analysis and Instrumental Analysis Laboratory	
CHEM 325 & CHEM 321L	Chemical Thermodynamics and Laboratory in Physical Chemistry	
or CHEM 322L	Laboratory in Physical Chemistry	
CHEM 332 & 332L	Organic Chemistry II and Laboratory in Organic Chemistry II	

The total minimum credits in Chemistry thus will be 20 to 23 depending on which advanced courses are selected. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Chemistry, B.A.

¹ Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.

² Students may substitute the following courses, if necessary:

- CHEM 201 for 177 and 178;
- CHEM 177L for 177N or 201L.
- CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- CHEM 321L for 322L; however this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- PHYS 111 and 112 for PHYS 221 and 222, however PHYS 221 and 222 are highly recommended.

³ Required of Chemistry Learning Community Members.

⁴ Completion of three years of foreign language in high school fulfills this requirement.

F Class offered Fall Semester only.

S Class offered Spring Semester only.

Individuals earning a B.A. degree in Chemistry who have taken 331L, 334L and 322L can obtain American Chemical Society certification by taking an additional advanced chemistry lecture course of BBMB 301 or 404. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.

ENGL 314	3 Advanced Chemistry ^{5,6}	4-5	course requirement. A minor in Chemistry is available to students in other departments. The Department participates in the interdepartmental major in Toxicology.
Electives	9 BBMB 301 (strongly recommended) CHEM 399 (strongly recommended) crs-variable Electives	3 6	The Department of Chemistry requires all graduate students majoring in Chemistry to teach as part of their training for an advanced degree. Prerequisite to major graduate work is the completion of undergraduate work in Chemistry, Mathematics, and Physics substantially equivalent to that required of undergraduate Chemistry majors at this institution.
15		14-15	

¹ Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.

² Students may substitute the following courses, if necessary:

- CHEM 201 for 177 and 178;
- CHEM 177I for 177N or 201L
- CHEM 331I and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.

³ Completion of three years of foreign language in high school fulfills this requirement.

⁴ The completion of two courses (minimum of 2 credits each) are required to meet this requirement. (In addition to advanced Chemistry courses, certain courses in Biochemistry-Biophysics, Chemical Engineering, Computer Science, Mathematics and Materials Science and Engineering are acceptable.) Up to four credits in undergraduate research (CHEM 339 and/or 499) can be counted as one of the two advanced chemistry courses. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.

⁵ The program as listed above meets the standard for a certified degree of the American Chemical Society's Committee on Professional Training if BBMB 301 or 404 is one of the Advanced Chemistry Courses.

F Class offered Fall Semester only.

S Class offered Spring Semester only.

Graduate Study

The Department offers work for the degrees Master of Science and Doctor of Philosophy with majors in Chemistry, Analytical, Inorganic, Organic, and Physical chemistry. Co-majors may be taken between areas within Chemistry or between one of the areas in Chemistry and another department. Courses in other areas of Chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in Chemistry may choose an additional specialty in one of six areas: Materials Chemistry, Industrial Chemistry, Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and Forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside

The course numbers for general Chemistry courses include 163-178, and 201.

Index to field of work for 200 level courses and above is given by the second and third digits of course numbers:

1. Inorganic Chemistry 00-09
2. Analytical Chemistry 10-19
3. Physical Chemistry 20-29 and 60-69
4. Organic Chemistry 30-39
5. Chemical Education 50-59
6. Interdisciplinary Chemistry 70-89
7. Research 99

Communication Studies

The Communication Studies Major

comst.las.iastate.edu (<https://comst.las.iastate.edu/>)

The Communication Studies Program focuses on human communication, exploring the ways humans create and negotiate meaning.

Communication Studies majors master a focused course of inquiry into interpersonal processes as they create and sustain relationships and impact individuals, groups, and organizations. The Communication Studies curriculum builds primarily on social science traditions in developing a liberal arts education emphasizing human communication.

Students in the Communication Studies major study applied communication theory and research in interpersonal, small group, organizational, intercultural, and other contexts.

The Communication Studies (ComSt) major teaches students how to think critically, giving them the ability to examine complex communication issues, and develop and implement strategies grounded in evidence-based research. This prepares students for careers in business and industry and graduate education. Students majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, public relations, training and development, sales management, recruitment, event planning, sales, management,

organizational development, business communication, law, and international and intercultural relations.

ComSt majors must earn at least 120 credits, with 45 credits at the 300-400 levels, and a minimum of 33 credits in ComSt.

Communication Studies majors will...

- Develop foundational knowledge of human communication
- Apply human communication strategies in a diverse world
- Evaluate and utilize evidence-based research
- Cultivate communication competence

Communication Proficiency Requirement

To meet the University's Communication Proficiency requirement students are required to take:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
Plus one of the following:		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
ENGL 415	Business and Technical Editing	

A grade of C or higher is required in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition, Honors).

Total Credits 9

The Communication Studies Major

Core Requirements (15 credits)

COMST 101	Introduction to Communication Studies	3
COMST 211	Interpersonal Communication	3
COMST 203	Introduction to Communication Research Methods	3
COMST 301	Human Communication Theory	3
Plus one of the following:		3
COMST 214	Professional Communication	
COMST 218	Conflict Management	
COMST 210	Communication and U.S. Diversity	
SP CM 212	Fundamentals of Public Speaking	

Total Credits 15

Upper Division Requirements (15 credits). Select five courses from the following

COMST 310	Intercultural Communication	3
COMST 311	Relational Communication	3

COMST 313	Leadership Communication Theories	3
COMST 314	Organizational Communication	3
COMST 317	Small Group Communication	3
COMST 319	Communication Training and Development	3
COMST 325	Nonverbal Communication	3
COMST 330	Computer Mediated Communication	3
COMST 450	Special Topics in Communication Studies	3
SP CM 323	Gender and Communication	3
Total Credits		15

Capstone Course Requirement (3 credits)

COMST 404	Research Seminar	3
-----------	------------------	---

Credits in COMST 384 Applied Organizational Communication, may not be applied toward the upper division requirements.

In accordance with college requirements, an overall average in Communication Studies courses of C (2.0) or better is required.

Enhancement Requirement (4 credits)

COM S 103	Computer Literacy and Applications	4
-----------	------------------------------------	---

Additional Recommended Courses

STAT 101	Principles of Statistics	4
----------	--------------------------	---

The Communication Studies Minor (18 credits)

The requirements for a minor in ComSt may be fulfilled by credit in:

COMST 101	Introduction to Communication Studies	3
COMST 203	Introduction to Communication Research Methods	3
COMST 211	Interpersonal Communication	3
COMST 301	Human Communication Theory	3
Plus six credits from the following:		6
COMST 310	Intercultural Communication	3
COMST 311	Relational Communication	3
COMST 313	Leadership Communication Theories	3
COMST 314	Organizational Communication	3
COMST 317	Small Group Communication	3
COMST 319	Communication Training and Development	3
COMST 325	Nonverbal Communication	3
COMST 330	Computer Mediated Communication	3
COMST 450	Special Topics in Communication Studies	3

Credits in COMST 384 Applied Organizational Communication, may not be applied toward the minor. Students must earn an overall average of C (2.0) or better in all courses taken for the minor.

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Total Credits **45**

Communication Studies, B.A.

Freshman

Elective 300+	3 Elective 300+	3
15		15

To meet Upper Division Comm Requirements students select from among the following:

- COMST 310
- COMST 311
- COMST 313
- COMST 314
- COMST 317
- COMST 319
- COMST 325
- COMST 330
- SP CM 323

Students in all majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. (COMST 310 fulfills the international perspective requirement/ COMST 210 and SP CM 323 fulfill the U.S. diversity requirement). Approved courses are listed at: <http://www.registrar.iastate.edu/courses/div-ip-guide.html> (<http://www.registrar.iastate.edu/students/div-ip-guide/>). Discuss with your adviser how the two courses that you select can be applied to to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS foreign language requirement.

The LAS College requires all students to have a 2.0 in the major to graduate. This means students need a 2.0 GPA in the 33 hours taken to fulfill the major requirements in Communication Studies.

Computer Science

<http://www.cs.iastate.edu>

The undergraduate curriculum in Computer Science leading to the Bachelor of Science degree is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>. This degree equips students with a sound knowledge of the foundations of Computer Science as well as problem solving and system design skills necessary to create robust, efficient, reliable, scalable, and flexible software systems. The B.S. degree in Computer Science prepares students for graduate study in Computer Science and for various business, industry, and government positions including computer scientists, information technologists, and software developers. The main educational objectives of the Computer Science program at Iowa State University are that its graduates demonstrate expertise, engagement, and learning within three to five years after graduation.

•Expertise: Graduated students should have the ability to establish peer-recognized expertise in the discipline. They should have the ability to

articulate this expertise by formulating and solving problems of interest, by creating or deriving value through the application of technology, and by using mathematical foundations, algorithmic principles, and computer science theory in designing, implementing, and evaluating computer-based systems and processes which meet the desired needs of their employers.

•Engagement: Graduated students should have the ability to be engaged in the profession through the practice of computer science in industry, academia, or the public sector. They should demonstrate effective teaming and commitment to working with others by applying communications skills and professional knowledge.

•Learning: Graduated students should have the ability to engage in sustained learning through graduate work, professional improvement opportunities, and self study so that they can adapt to the role played by information processing in ever-changing areas of science, technology, and society.

Curriculum in Computer Science

A student seeking a B.S. degree in Computer Science must satisfy the requirements of the University and College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum) and the departmental requirements.

The departmental requirements consist of a minimum of 46 credits in Computer Science and satisfaction of written and oral requirements. Students must earn at least a C- in Math 165, Math 166, and each Computer Science course taken to fulfill the Degree Program. The LAS College requires the major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher.

The following courses are required:

COM S 101	Orientation	R
COM S 203	Careers in Computer Science	R
COM S 227	Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
COM S 309	Software Development Practices	3
COM S 311	Introduction to the Design and Analysis of Algorithms	3
COM S 321	Introduction to Computer Architecture and Machine-Level Programming	3
COM S 327	Advanced Programming Techniques	3
COM S 331	Theory of Computing	3
COM S 342	Principles of Programming Languages	3
COM S 352	Introduction to Operating Systems	3
COM S 402	Computer Science Senior Project	3

At least 15 credits, including at least 6 credits of 400-level courses, all with a grade of C- or better, from the following:

COM S 319	Construction of User Interfaces	3
COM S 336	Introduction to Computer Graphics	3
COM S 362	Object-Oriented Analysis and Design	3
COM S 363	Introduction to Database Management Systems	3
COM S 409	Software Requirements Engineering	3
COM S 410	Distributed Development of Software	3
COM S 412	Formal Methods in Software Engineering	3
COM S 413	Foundations and Applications of Program Analysis	3
COM S 415	Software System Safety	3
COM S 417	Software Testing	3
COM S 418	Introduction to Computational Geometry	3
COM S 421	Logic for Mathematics and Computer Science	3
COM S 424	Introduction to High Performance Computing	3
COM S 425	High Performance Computing for Scientific and Engineering Applications	3
COM S 426	Introduction to Parallel Algorithms and Programming	4
COM S 430	Concurrent Programming in Practice	3
COM S 433	Molecular Programming of Nanoscale Devices and Processes	3
COM S 435	Algorithms for Large Data Sets: Theory and Practice	3
COM S 437	Computer Game and Media Programming	3
COM S 440	Principles and Practice of Compiling	3
COM S 441	Programming Languages	3
COM S 444	Bioinformatic Analysis	4
COM S 453	Privacy Preserving Algorithms and Data Security	3
COM S 454	Distributed Systems	3
COM S 455	Simulation: Algorithms and Implementation	3
COM S 461	Principles and Internals of Database Systems	3
COM S 472	Principles of Artificial Intelligence	3
COM S 474	Introduction to Machine Learning	3
COM S 476	Motion Strategy Algorithms and Applications	3
COM S 477	Problem Solving Techniques for Applied Computer Science	3
COM S 481	Numerical Methods for Differential Equations	3
COM S 486	Fundamental Concepts in Computer Networking	3
COM S 487	Network Programming, Applications, and Research Issues	3
CPR E 431	Basics of Information System Security	3

CPR E 458	Real Time Systems	3
CPR E 489	Computer Networking and Data Communications	4

Com S 414 **may not** be applied towards fulfilling the 400-level electives.

Toward satisfying requirements of the College of Liberal Arts and Sciences, the following courses should be included:

PHIL 343	Philosophy of Technology	3
SP CM 212	Fundamentals of Public Speaking	3

At least 17 credits of Math and Statistics 17

MATH 165	Calculus I	4
MATH 166	Calculus II	4
COM S 230	Discrete Computational Structures	3

One Statistics course from:

STAT 305	Engineering Statistics	3
STAT 330	Probability and Statistics for Computer Science	3
STAT 341	Introduction to the Theory of Probability and Statistics I	4

At least one Math course from:

MATH 207	Matrices and Linear Algebra	3
MATH 265	Calculus III	4
MATH 266	Elementary Differential Equations	3
MATH 267	Elementary Differential Equations and Laplace Transforms	4
MATH 304	Combinatorics	3
MATH 314	Graph Theory	3
MATH 317	Theory of Linear Algebra	4

One of the following 2-course Natural Science sequences (with labs):

BIOL 211 & 211L	Principles of Biology I and Principles of Biology Laboratory I	4
BIOL 212 & 212L	Principles of Biology II and Principles of Biology Laboratory II	4
BIOL 255 & 255L	Fundamentals of Human Anatomy and Fundamentals of Human Anatomy Laboratory	4
BIOL 256 & 256L	Fundamentals of Human Physiology and Fundamentals of Human Physiology Laboratory	4
CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	5
CHEM 178 & 178L	General Chemistry II and Laboratory in College Chemistry II	4
GEOL 100 & 100L	How the Earth Works and How the Earth Works: Laboratory	4
GEOL 102 & 102L	History of the Earth and History of the Earth: Laboratory	4

PHYS 221	Introduction to Classical Physics I	5
or PHYS 241	Principles and Symmetries in Classical Physics I	

PHYS 222	Introduction to Classical Physics II	5
or PHYS 242	Principles and Symmetries in Classical Physics II	

The following courses meet the communication proficiency requirement:

LIB 160	Information Literacy	1
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following		
ENGL 302	Business Communication	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The Department requires a C or higher in the upper-level ENGL course (302, 305, 309, 314).

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

Students must take at least 15 credits of Computer Science courses at the 300 level or higher at Iowa State University while resident here. Computer Science transfer courses need to be a minimum grade of C or higher to be considered for course substitution.

Students must earn a C- or better in each Computer Science course which is a prerequisite to a course listed in the student's degree program.

Undergraduate Minor in Computer Science

The Department of Computer Science offers an undergraduate minor in Computer Science. The minor requires at least 16 credits in computer science courses. Com S 414 cannot be used to fulfill minor requirements.

A minimum grade of C- is required in Com S 227 and Com S 228. A minimum grade of C is required in both Com S 311 and the three credits of 300-level Computer Science courses and above. At least 6 credits of the minor must be in courses numbered 300 and above and taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

COM S 227	Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
COM S 230	Discrete Computational Structures	3
COM S 311	Introduction to the Design and Analysis of Algorithms	3
3 credits in ComS courses at the 300 level or above		3

Undergraduate Curriculum in Software Engineering

The Department of Computer Science, together with the Department of Electrical and Computer Engineering, also offer a curriculum leading to an undergraduate degree in Software Engineering. The Software Engineering curriculum offers emphasis areas in Software Engineering principles, process, and practice. Students may also take elective courses in Computer Engineering and Computer Science.

See Index, Software Engineering. For curriculum information, see also College of Engineering and College of Liberal Arts and Sciences.

Graduate Study

The department offers graduate programs leading to degrees of Master of Science (MS) and Doctor of Philosophy (PhD) with a major in Computer Science. The Doctor of Philosophy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor for the students majoring in other disciplines.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor's degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, a minimum of 31 semester credits is required. A thesis or a creative component demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The PhD requirements are governed by the student's program of study committee within established guidelines of the department and the graduate college. They include coursework (demonstrating breadth and depth of knowledge), a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Criminal Justice

The Criminal Justice program in the College of Liberal Arts and Sciences offers a Bachelor of Arts degree and a minor in Criminal Justice.

Your adventure begins with your academic adviser. Both Mark and Jenny work with undergraduate students who are majoring in sociology or criminal justice. Please see Contact Information or email cjsocadvising@iastate.edu.

Students in this major will learn about the components of the juvenile and criminal justice systems, become acquainted with the issues affecting these systems, apply theoretical concepts to real-world phenomena, interface with criminal justice and social service providers, and plan an academic and/or applied career in criminal justice.

Graduates of this program will:

- Understand theories of crime, victimization, and criminal justice (i.e., theories about social bonds, learning, social control, conflict, labeling, rehabilitation, treatment, and punishment).
- Think critically about crime, victimization, and criminal justice (i.e., be able to apply, critique, compare, and integrate knowledge in the area).
- Understand how race/ethnicity, gender, wealth, and power are related to crime, victimization, and criminal justice.
- Understand and be able to use basic social science research methods, as well as those most relevant to the study of crime, victimization, and criminal justice.
- Be familiar with career paths in the criminal justice system, and make career choices that best fit their career interests.
- Make appropriate decisions, think creatively and be able to express themselves in written and oral communication to supervisors and clients.

University Requirements:

International Perspective	3
US Diversity	3
Total Credits	6

Communication Proficiency: Majors must complete both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition. (According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.) In addition, majors must also take an advanced course in ENGL 302 Business Communication or ENGL 309 Proposal and Report Writing or ENGL 314 Technical Communication with a grade of C or better.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
ENGL 302, 309, or 314		3
Total Credits		10

World Languages and Cultures:

3 years of H.S.

SPAN 097	Accelerated Spanish Review	0
2 semesters at the college level		8
Total Credits		8

General Education Coursework:

Students must select from a variety of LAS approved general education courses in each area listed below. A full list of approved courses can be found at <https://las.iastate.edu/students/academics/general-education/>.

Arts and Humanities	12
Math	3
Natural Sciences	8
Social Sciences	9
Total Credits	32

A program of study that meets the needs and interests of the student and departmental requirements will be developed in consultation with the major adviser. Students must maintain a GPA of 2.0 or higher in their core courses. Program of study will include:

SOC 115	Orientation to Sociology	1
CJ ST 240	Introduction to the U.S. Criminal Justice System	3
CJ ST 241	Youth and Crime	3
CJ ST 340	Deviant and Criminal Behavior	3
CJ ST 341	Criminology	3
CJ ST 402	White-Collar Crime	3
or CJ ST 403	Criminal Offenders	
or CJ ST 406	Gender and Crime	
CJ ST 460	Criminal and Juvenile Justice Practicum	3-9

Select one of the following courses

CJ ST 320	American Judicial Process	3
CJ ST 332	Philosophy of Law	3
CJ ST 339	Liberty and Law in America	3
CJ ST 404	Criminal Justice Policies	3
PSYCH 383	Psychology and Law	3

Select 5 of the following courses

CJ ST 320	American Judicial Process	3
-----------	---------------------------	---

CJ ST 332	Philosophy of Law	3
CJ ST 339	Liberty and Law in America	3
CJ ST 351	Police and Society	3
CJ ST 352	Punishment, Corrections, and Society	3
CJ ST 402	White-Collar Crime	3
CJ ST 404	Criminal Justice Policies	3
CJ ST 405	Drugs and Crime	3
CJ ST 406	Gender and Crime	3
CJ ST 410	Capital Punishment	3
CJ ST 484	Topical Studies in Criminal and Juvenile Justice	3
PSYCH 383	Psychology and Law	3
ANTHR 424	Forensic Anthropology	3

Total Credits: 118-120

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level.

Special Topics choices: CJ ST/POL S 320; CJ ST/PHIL 332, 339; CJ ST 335, 351, 352, 354, 360X, 402, 404, 405, 406, 410, 451X, 470, 484*; PSYCH 383; and ANTHR 424.

*May take up to 9 credits of CJ ST 484 special topics.

"See list" - Refer to your Degree Audit (available in Access+) for options for each list.

NOTE: This is an example four-year plan. Your actual semester schedules may vary.

The Criminal Justice minor offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in the criminal justice field.

Students who declare a minor in Criminal Justice are required to complete 18 total credits. Students may do up to nine credits of CJ ST 460 but only three of those credits may be applied to the minor. Nine credits must be at the 300 or 400 level. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Students must have a minimum grade point average of 2.0 in courses for the minor.

CJ ST 240	Introduction to the U.S. Criminal Justice System	3
CJ ST 460	Criminal and Juvenile Justice Practicum	3
Four additional CJ ST classes		12
Total Credits		18

Data Science

Data Science

Data Science is a rapidly growing academic discipline fueled by the proliferation of rich and complex data emerging from activities in science,

industry, and governments. As a result, there is strong demand for data science professionals today in Iowa as well as across the nation and globe, and this market is expected to continue to grow in the next decade. The data science programs are intended for students who wish to study the data science discipline for its own sake as well as for students studying any discipline at Iowa State University with the goal of enabling them to work in data science. The courses in the data science program are designed to provide students with the requisite background that would enable them to take jobs with significant data science components, e.g., establishing and operating data analysis pipelines. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting.

The Data Science major is intended for students with strong quantitative backgrounds and has the goal of educating students on the technical fundamentals of Data Science, with a focus on developing the knowledge and skills needed to transform data into insights. The major is an excellent opportunity for individuals who want to prepare themselves for the exciting Data Scientist positions that are in high demand today.

The minor in Data Science is intended for students studying any discipline at Iowa State and is designed to give students an in-depth understanding of data science as it is applied to a variety of domains.

The certificate in Data Science is intended for students studying any discipline at Iowa State and is designed to prepare them for future work with significant data science components. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting.

Data Science Major

Purpose

This Bachelor's of Science degree program in Data Science is intended for students with strong quantitative backgrounds and has the goal of educating students on the technical fundamentals of data sciences, with a focus on developing the knowledge and skills needed to manage and analyze large-scale, heterogeneous data to address a wide range of problems.

Learning Outcomes

After successfully completing the program, students majoring in Data Science will demonstrate

1. an understanding of and an ability to apply the following data science concepts, tools and methods to data analysis pipelines:
 - a. data acquisition
 - b. data preprocessing
 - c. exploratory data analysis

- d. inferential and predictive thinking, modeling and analysis
 - e. computational thinking, data structures, and algorithms
2. an understanding of ethical, legal, societal, and economic concerns in application of data science concepts
3. an ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders
4. an ability to function on multi-disciplinary teams using concepts and tools from data science

Requirements

The B.S. in Data Science consists of 120 total credit hours including: (1) 39 credits hours in the major core, three credits of which constitute a capstone course that is expected to provide experiential learning; (2) 9 credit hours in one of seven elective tracks to examine applications and theory of data sciences in a specific area; and (3) 23 credit hours of foundation courses. The capstone course will provide an opportunity for students to apply data science concepts to an application area while working in a multi-disciplinary team setting.

Data Science Major Requirements

Data Science Core Courses		39
DS 110	Orientation to Data Science	R
DS 201	Introduction to Data Science	3
DS 202	Data Acquisition and Exploratory Data Analysis	3
DS 303	Concepts and Applications of Machine Learning	3
DS 401	Data Science Capstone	3
COM S 228	Introduction to Data Structures	3
COM S 230	Discrete Computational Structures	3
or CPR E 310	Theoretical Foundations of Computer Engineering	
COM S 311	Introduction to the Design and Analysis of Algorithms	3
COM S 363	Introduction to Database Management Systems	3
CPR E 419	Software Tools for Large Scale Data Analysis	4
STAT 301	Intermediate Statistical Concepts and Methods	4
STAT 347	Probability and Statistical Theory for Data Science	4
STAT 477	Introduction to Categorical Data Analysis	3

At least 9 credits from any **ONE** of the following seven application emphasis areas:

Big Data		9-10
COM S 424	Introduction to High Performance Computing	3
COM S 426	Introduction to Parallel Algorithms and Programming	4
COM S 435	Algorithms for Large Data Sets: Theory and Practice	3

COM S 454	Distributed Systems	3
COM S 461	Principles and Internals of Database Systems	3
COM S 474	Introduction to Machine Learning	3
Engineering Applications		10
CPR E 388	Embedded Systems II: Mobile Platforms	4
CPR E 425	High Performance Computing for Scientific and Engineering Applications (cross-listed as COM S 425)	3
E E 425	Machine learning: A Signal Processing Perspective	3
Optimization		9
I E 312	Optimization	3
I E 483	Data Mining	3
I E 487	Big Data Analytics and Optimization	3
Security		9
COM S 421	Logic for Mathematics and Computer Science	3
COM S 453	Privacy Preserving Algorithms and Data Security	3
CPR E 431	Basics of Information System Security	3
Software Analytics		9
COM S 342	Principles of Programming Languages	3
COM S 413	Foundations and Applications of Program Analysis	3
COM S 440	Principles and Practice of Compiling	3
COM S 474	Introduction to Machine Learning	3
CPR E 416	Software Evolution and Maintenance	3
Statistics		9
STAT 471	Introduction to Experimental Design	3
STAT 473	Introduction to Survey Sampling	3
STAT 475	Introduction to Multivariate Data Analysis	3
COM S 474	Introduction to Machine Learning	3
Computational Biology		10
BCBIO 322	Introduction to Bioinformatics and Computational Biology	3
BCBIO 402	Fundamentals of Systems Biology and Network Science	3
BCBIO 444	Bioinformatic Analysis	4

Toward satisfying requirements of the College of Liberal Arts and Sciences, the following courses should be included:

COM S 227	Object-oriented Programming	4
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 207	Matrices and Linear Algebra	3
STAT 201	Introduction to Statistical Concepts and Methods	4

Foreign Language 3 years in high school or 1 year in college	0 - 8
Natural Science	8
Social Science	9
Arts and Humanities	12

The following courses meet the communication proficiency requirement:

LIB 160	Information Literacy	1
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following:		
ENGL 302	Business Communication	3
ENGL 314	Technical Communication	3
ENGL 332	Visual Communication of Quantitative Information (cross-listed as STAT 332)	3

According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The Data Science program requires a C or higher in the upper-level ENGL course (302, 314, or 332).

All students must complete 3 credits of US Diversity and 3 credits of International Perspective courses.

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

Social Science	3 Electives 300+	3-6
13		13-16

The major elective courses will come from any one application emphasis area as outlined on the Undergraduate Major page. A student must take at least 9 credits from any single application emphasis area and may choose from: Big Data; Engineering Applications; Optimization; Security; Software Analytics; Statistics; and Computational Biology.

All students are required to take at least 45 hours of courses at the 300+ level or above. This may require taking additional electives.

Data Science Minor

Purpose

The minor in data science is intended for students studying any discipline at Iowa State and is designed to give students an in-depth understanding of data science as it is applied to a variety of domains. The minor in data science will prepare students with the technical and communication skills to enter the workforce as domain experts with data science skills.

Learning Outcomes

After completing the minor in data science, students will demonstrate:

- an ability to apply data science concepts, tools and technologies to data analysis pipelines,
- an understanding of ethical, legal, societal, and economic concerns in application of data science concepts,
- an ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders, and

- an ability to function on multi-disciplinary teams using concepts and tools from data science.

Requirements

The minor in data science requires the completion of 15 credit hours, including 9 credits from the data science core and 6 credits from approved data science electives.

At least 6 credits must be taken in courses numbered at the 300-level or above.

At least 9 credits used for the minor cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Courses for the minor cannot be taken on a pass/not-pass basis.

Course Requirements for Data Science Minor

Core Courses (9 credits)

DS 201	Introduction to Data Science (Required)	3
DS 202	Data Acquisition and Exploratory Data Analysis (Required)	3
DS 301	Applied Data Modeling and Predictive Analysis (Required)	3

* DS 301 has a prerequisite of an introductory statistics course: STAT 101, STAT 104, STAT 105, STAT 201, STAT 226, STAT 231, STAT 305, STAT 322, or STAT 330.

Electives (6 credits)

A B E 316	Applied Numerical Methods for Agricultural and Biosystems Engineering	3
ADVRT 335	Advertising Media Planning	3
ADVRT 497J	Ad Tech	3
BCBIO 322	Introduction to Bioinformatics and Computational Biology	3
COM S 311	Introduction to the Design and Analysis of Algorithms	3
COM S 363	Introduction to Database Management Systems	3
COM S 424	Introduction to High Performance Computing	3
COM S 435	Algorithms for Large Data Sets: Theory and Practice	3
COM S 453X	Privacy Preserving Algorithms and Data Security	3
COM S 474	Introduction to Machine Learning	3
C R P 251	Fundamentals of Geographic Information Systems	3
C R P 351	Intermediate Geographic Information Systems	3
C R P 452	Geographic Data Management and Planning Analysis	3

C R P 456	GIS Programming and Automation	3
CPR E 419	Software Tools for Large Scale Data Analysis	4
CPR E 426	Introduction to Parallel Algorithms and Programming	4
ECON 371	Introductory Econometrics	4
E E 428X	Image Analysis from Machine Learning	3
ENGL 332	Visual Communication of Quantitative Information	3
FIN 450	Analytical Methods in Finance	3
I E 312	Optimization	3
I E 483	Data Mining	3
LING 410	Language as Data	3
MATH 422X	Mathematical Principles of Data Science	3
MIS 436	Introduction to Business Analytics	3
MIS 446	Advanced Business Analytics	3
MKT 368	Marketing Analytics	3
STAT 301	Intermediate Statistical Concepts and Methods	4
STAT 330	Probability and Statistics for Computer Science	3
STAT 475	Introduction to Multivariate Data Analysis	3
STAT 477	Introduction to Categorical Data Analysis	3
STAT 483	Empirical Methods for the Computational Sciences	3
STAT 486	Introduction to Statistical Computing	3

Data Science Certificate

Purpose

The certificate in data science is intended for students studying any discipline at Iowa State and is designed to prepare them for future work with significant data science components. The data science certificate is also available to students who have already earned a Baccalaureate degree from Iowa State or elsewhere. The capstone will provide an opportunity for students to apply data science concepts to a domain problem while working in a multi-disciplinary team setting. The certificate in data science will prepare students with the technical and communication skills to enter the workforce as domain experts with data science skills.

Learning Outcomes

After completing the certificate in data science, students will demonstrate:

- an ability to apply data science concepts, tools and technologies to data analysis pipelines,
- an understanding of ethical, legal, societal, and economic concerns in application of data science concepts,
- an ability to visualize, interpret and communicate the output of data analysis pipelines to stakeholders, and

- an ability to function on multi-disciplinary teams using concepts and tools from data science.

Requirements

The certificate in data science requires the completion of 21 credit hours, including 9 credits from the data science core, 9 credits from approved data science electives, and a three-credit data science capstone experience.

At least 9 credits must be taken in courses numbered at the 300-level or above.

At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.

Courses for the certificate cannot be taken on a pass/not-pass basis.

Course Requirements for Data Science Certificate

Core Courses (9 credits)

DS 201	Introduction to Data Science (Required)	3
DS 202	Data Acquisition and Exploratory Data Analysis (Required)	3
DS 301	Applied Data Modeling and Predictive Analysis (Required)	3

* DS 301 has a prerequisite of an introductory statistics course: STAT 101, STAT 104, STAT 105, STAT 201, STAT 226, STAT 231, STAT 305, STAT 322, or STAT 330.

Data Science capstone experience (3 credits)		
DS 401	Data Science Capstone	3

Earth Science

Earth Science

The **Earth Science major** is a program leading to the bachelor of arts or bachelor of science.

The bachelor of arts emphasizes an interdisciplinary field and prepares the student primarily for a career in secondary education. Apart from the required and supporting coursework listed below, the B.A. program must satisfy the requirements of the Teacher Education Program. The B.S. program provides a broad overview of geology and supporting sciences. This degree pathway is also suitable for students who may want to pursue a career in secondary education or continue on to graduate school. If a student chooses this option and is interested in secondary education, they should contact Dr. Cinzia Cervato for additional guidance.

Required courses for the B.A. include:

GEOL 100	How the Earth Works	3
or GEOL 101	Environmental Geology: Earth in Crisis	
GEOL 100L	How the Earth Works: Laboratory	1
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1
GEOL 302	Summer Field Studies	6
GEOL 315	Mineralogy and Earth Materials	3

GEOL 315L	Laboratory in Mineralogy and Earth Materials	1
GEOL 316	Optical Mineralogy	1
GEOL 356	Structural Geology and Tectonics	4
GEOL 357	Geological Mapping and Field Methods	1
GEOL 365	Igneous and Metamorphic Petrology	3
GEOL 368	Sedimentary Geology	4
MTEOR 206	Introduction to Weather and Climate	3
ASTRO 120	The Sky and the Solar System	3
ASTRO 150	Stars, Galaxies, and Cosmology	3
And 3 credits of geology electives		3
Total Credits		43

Required supporting courses include:

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
PHYS 111	General Physics	5
PHYS 112	General Physics	5

One of the following

MATH 151	Calculus for Business and Social Sciences	3
or MATH 160	Survey of Calculus	
or MATH 165	Calculus I	

One of the following

COM S 107	Windows Application Programming	3
or STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	

And one course in Biology, Botany, or Zoology 3

Total Credits **28**

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The department requires a grade of C or better in ENGL 309 or ENGL 314.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	

One of the following:

ENGL 309	Proposal and Report Writing	3
----------	-----------------------------	---

or ENGL 314	Technical Communication	
Total Credits		9

Required courses for the B.S. include:

GEOL 100	How the Earth Works	3
or GEOL 101	Environmental Geology: Earth in Crisis	
GEOL 100L	How the Earth Works: Laboratory	1
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1
GEOL 302	Summer Field Studies	6
GEOL 315	Mineralogy and Earth Materials	3
GEOL 315L	Laboratory in Mineralogy and Earth Materials	1
GEOL 316	Optical Mineralogy	1
GEOL 356	Structural Geology and Tectonics	4
GEOL 357	Geological Mapping and Field Methods	1
GEOL 365	Igneous and Metamorphic Petrology	3
GEOL 368	Sedimentary Geology	4
GEOL 479	Surficial Processes	3
MTEOR 206	Introduction to Weather and Climate	3
And 8 credits of electives in agronomy, astronomy, environmental science, or other approved areas.		8
Total Credits		45

Required supporting courses include:

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 111	General Physics	5
PHYS 112	General Physics	5
COM S 107	Windows Application Programming	3
or STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	
Total Credits		30

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The department requires a grade of C or better in the below communication courses.

ENGL 150	Critical Thinking and Communication	3
ENGL 309	Proposal and Report Writing	3
or ENGL 314	Technical Communication	
or ENGL 302	Business Communication	
or JL MC 347	Science Communication	
Total Credits		6

Earth Science, B.A.

NOTE: Course plan, sequence and credit amounts will vary depending upon which endorsement area(s) a student chooses to pursue. In addition, this plan is solely an example of one possible academic layout. This plan can and likely will be modified based on transfer credit, advanced placement (AP) credit, dual enrollment credit, "test out" credit, course offerings, schedule conflicts and entry term. *It is our expectation that students know the requirements of their academic program and develop and follow an academic plan based on their academic catalog and degree audit using their individual academic adviser as a resource in this process.*

Potential pathway for the B.A. in Earth Science degree:

Freshman

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level in addition to the LAS world language and cultures requirement. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher.

Students must take an American History (counts as humanities) or American Government (counts as social science).

¹ Choose from list of approved courses available from an adviser.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS foreign language requirement.

¹ Choose from list of approved courses available from an adviser or departmental office.

Department of Ecology, Evolution, and Organismal Biology Undergraduate Study

Within the Biological Sciences, studies of ecology, evolution, and organismal biology are essential in understanding the complex relationships of life on Planet Earth. Ecology focuses on the interactions among organisms as well as the interactions between organisms and their physical environments. Evolutionary theory addresses the origins and interrelationships of species. Organismal biology studies both the diversity of biological organisms and the structure and function of individual organisms.

The EEOB Department offers several undergraduate majors with other departments. Students interested in the areas of ecology, evolution, and organismal biology should major in Biology, Environmental Science, or Genetics. The Biology Major is administered and offered jointly by the EEOB and GDCB departments. The faculty of EEOB, together with those in GDCB and BBMB, administer and offer the Genetics Major. Faculty in EEOB, in cooperation with faculty from other departments on campus, administer and offer the Environmental Science Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. Faculty in the EEOB Department also teach undergraduate courses at Iowa Lakeside Laboratory (see the Iowa Lakeside Laboratory listing).

The Biology Major, the Environmental Science Major, and the Genetics Major prepare students for a wide range of careers in biological sciences. Some of these careers include conservation of natural resources and biodiversity, human and veterinary medicine, and life science education. These majors are also excellent preparation for graduate study in systematics, ecology, biological diversity, physiology, and related fields. Faculty members in EEOB contribute to the undergraduate courses listed below. The titles and descriptions of these courses are in the Biology section of the catalog.

BIOL 101	Introductory Biology	3	BIOL 414	Life History and Reproductive Strategies	3

Graduate Study

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. EEOB graduate students major in one of several interdepartmental majors including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Environmental Science, Genetics, Interdisciplinary Graduate Studies, Neuroscience, and Toxicology. The EEOB faculty members are active in the interdepartmental graduate majors and teach a wide range of graduate courses. Faculty research programs cover a wide range of specializations including physiology and physiological ecology; Microbiology; animal behavior; evolutionary genetics of plants and animals; modeling of evolutionary and ecological processes; plant and animal systematics; neurobiology; developmental biology; aquatic and wetland ecology; functional, population, community, landscape, and ecosystem ecology; and conservation biology. For further

information on faculty research interests check the EEOB web site (www.eeob.iastate.edu (<http://www.eeob.iastate.edu>)). Some EEOB faculty teach graduate courses at Iowa Lakeside Laboratory. Field Station courses are also available through the Gulf Coast Marine Laboratory and the Organization for Tropical Studies (see the Biology listing).

Prospective graduate students need a sound background in the physical and biological sciences, as well as in mathematics and English.

Interested students should check the Graduate Program link from the EEOB web site for specific admission procedures and updates. The department and majors require submission of Graduate Record Examination (GRE) aptitude test scores. Subject area GRE scores are recommended. International students whose native language is other than English must also submit TOEFL or IELTS scores with their application.

Students who are enrolled in the interdepartmental graduate majors with EEOB affiliation are required to participate in departmental seminars, to participate in research activities, and to show adequate progress and professional development while pursuing their degree. For both the M.S. and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. Requirements and guidelines for study are provided by the Graduate College, the EEOB faculty, and the individual student's major professor and Program of Study Committee. General information about graduate study requirements can be found at the web site for the Graduate College and requirements for the interdepartmental majors can be found by following the links from the EEOB web site above. Although not a formal requirement, the EEOB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Economics

www.econ.iastate.edu (<http://www.econ.iastate.edu>)

Overview

The Department of Economics offers coursework for Bachelor of Science degrees in three majors: Agricultural Business, Economics, and Business Economics. The Department also offers a minor in Agricultural Business and a minor in Economics. In addition, the Department participates in four interdepartmental programs: International Agriculture (CALs), Global Resource Systems (CALs), International Studies (LAS), and Women's Studies (LAS). Further details of the three majors are found in the respective sections.

Economics teaches the abilities to think and reason clearly and to address complex issues using tools and decision-making models of economics, mathematics, and statistics, as well as concepts from the biological, physical, and social sciences. The study of economics also helps students to develop an understanding of the interaction of technology, human activity, and the environment, to apply economic

and business concepts associated with making optimal choices among economic alternatives, and to communicate concepts and findings to industry professionals, organizations, governments, and the general public.

Graduates of all three majors offered by the Department of Economics receive strong training in economic reasoning that serves as a foundation for a variety of rewarding careers and for advanced study in a range of professional and academic fields. Each of the Department's majors provide students the tools of critical analysis and human relations skills that are essential for being informed citizens and getting and keeping meaningful employment. By selecting the major that best reflects their interests, students may choose a different focus or specialization.

Learner Outcome Goals

The Department of Economics at Iowa State University has general goals for its Bachelor of Science graduates. These goals are for students to be able to solve problems and think critically, engage in economic reasoning, demonstrate leadership skills, communicate effectively, make ethical decisions, understand the environmental impacts of human activities, meet the challenges of living and working in a culturally diverse and global community, develop a capacity for innovation and creativity, and value the importance of life-long learning. Regarding each of these general goals, there are more specific additional goals, namely:

1. Problem Solving/Critical Thinking:
 - a. Distinguish factual statements from opinions or value judgments.
 - b. Summarize, analyze, and interpret research data and policy issues.
 - c. Distinguish causal relationships from correlations.
 - d. Determine the accuracy of statements.
 - e. Understand the usefulness of abstractions and models.
 - f. Identify assumptions and detect bias.
 - g. Critically evaluate their arguments and those of others.
 - h. Distinguish relevant information from irrelevant information.
 - i. Establish priorities.
 - j. Apply a holistic approach to solving complex, issue-laden, problems.
2. Economic Reasoning:
 - a. Distinguish positive ('what is') from normative ('what should be') economics.
 - b. Determine the opportunity cost of alternatives.
 - c. Apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues.
 - d. Identify the conditions under which markets allocate resources efficiently or markets fail.
 - e. Apply marginal economic analysis to solve problems.
 - f. Conduct comparative static analyses.
 - g. Pose and test hypotheses.
 - h. Use scientific methods to identify optimal choices among economic alternatives.

i. Identify decision-makers, objectives, choice variables, incentives, and constraints.

j. Understand how conclusions depend on assumptions.

3. Leadership:

a. Organize, facilitate, and participate effectively in a group, team, or organization.

b. Define a problem or opportunity, implement an action planning process, work toward a goal and justify actions taken.

4. Professional, Interpersonal and Cross-cultural Communications:

a. Communicate economic and business concepts to professionals, organizations, governments, and the general public.

b. Obtain information by accessing electronic or traditional media, listening, or by observation.

c. Read, listen, observe and reflect.

d. Speak and write clearly and persuasively.

e. Prepare and present effective visual, oral, written, and electronic presentations.

5. Ethics:

a. Define and assess their ethical perspectives, sense of moral responsibility, and values.

b. Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

6. Environmental Awareness:

a. Explain the physical and biological interactions within ecosystems.

b. Explain how human activities impact the environment and how societies are affected by environmental change.

7. International/Multi-Cultural Awareness:

U.S. Diversity – Students should achieve two of the following outcomes:

a. Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.

b. Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.

c. Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.

d. Analyze how cultural diversity and cooperation among social groups affect U.S. society.

International Perspectives – Students should achieve two of the following outcomes:

a. Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.

b. Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.

c. Analyze and evaluate the influence of global issues in their own lives.

d. Describe the values and perspectives of cultures other than their own and discuss how the influence individuals' perceptions of global issues or events.

e. Communicate competently in a second language.

8. Entrepreneurship:

a. Demonstrate innovation and creativity regardless of context.

b. Identify and pursue opportunities that produce value.

c. Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

9. Life-long Learning:

a. Articulate how continued learning after graduation will enrich their lives.

b. Identify and participate in new areas for learning beyond the classroom and after graduation.

Agricultural Business Major, College of Agriculture and Life Sciences

The major in Agricultural Business in the College of Agriculture and Life Sciences prepares students for advanced studies (e.g., Masters or Ph.D. in Agricultural Economics, Law School, MBA, etc) and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Agriculture and Life Sciences or the Ivy College of Business that emphasize specific areas within Agricultural Business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service. A double major in Agricultural Business and Economics is permitted. A double major in Agricultural Business and Business Economics is not permitted. A major in Agricultural Business with a minor in Economics is not permitted, and minors in both Agricultural Business and Economics are not permitted.

Customization of the Agricultural Business major is possible. Students may request to pursue one of three Business Options in Finance, Marketing, or Supply Chain Management. Electing a Business Option does not change the overall requirements of the Agricultural Business major. Eligibility and coursework requirements for Business Options are

maintained and approved by the Department of Economics and details are available on the Department website.

The major in Agricultural Business requires a minimum of 120 credits and a GPA of 2.00 or higher. No more than 65 credits (which may include up to 16 technical credits) from a two-year institution may apply to the degree. At least 18 credits must be earned from courses taught by the Department of Economics at ISU, with at most 9 P-NP credits of free electives. The major in Agricultural Business requires:

International Perspective: 3 cr. from approved course list (<http://tinyurl.com/bzbmvy9> (<http://tinyurl.com/bzbmvy9/>)).

U.S. Diversity: 3 cr. from approved course list (<http://tinyurl.com/atq6kpi> (<http://tinyurl.com/atq6kpi/>)).

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
One of the following		3
SP CM 212	Fundamentals of Public Speaking	
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
LIB 160	Information Literacy	1

Communication Proficiency Requirement: A grade of C or better in ENGL 250, a C or better in either ENGL 150 or (ENGL 302 or ENGL 309 or ENGL 314), and a C or better in the speech fundamentals course (SP CM 212 or AGEDS 311).

Total Credits 13

Humanities and Social Sciences: 6 cr.

ECON 102	Principles of Macroeconomics	3
Three credits from approved course list (www.agstudent.iastate.edu/humanities.htm).		3

Ethics: 3 cr. from approved course list: <https://www.cals.iastate.edu/student-services/ethics> (<https://www.cals.iastate.edu/student-services/ethics/>)

Life Sciences: 6 cr.

One of the following		3
BIOL 101	Introductory Biology	
BIOL 211	Principles of Biology I	
Three credits from approved course list (www.agstudent.iastate.edu/life_science.htm).		3

Total Credits 6

Mathematics: 13-14 cr.

One of the following 4

MATH 160	Survey of Calculus	
MATH 165	Calculus I	

One of the following 3-4

ECON 207	Applied Economic Optimization	
MATH 166	Calculus II	
STAT 226	Introduction to Business Statistics I	3
STAT 326	Introduction to Business Statistics II	3

Physical Sciences: 5 cr.

CHEM 163	College Chemistry	5
& 163L	and Laboratory in College Chemistry	
Or		
PHYS 111	General Physics	5

Agricultural, Food, or Natural Resources Sciences: 6 cr. from approved course list: <https://www.econ.iastate.edu/files/page/files/ag-food-or-natural-resource-science-elective-coursesb.pdf>

General Economics: 9-10 cr.

ECON 101	Principles of Microeconomics	3
ECON 301	Intermediate Microeconomics	3-4
One of the following		3
ECON 302	Intermediate Macroeconomics	
ECON 353	Money, Banking, and Financial Institutions	
ECON 492	Graduating Senior Survey	R

Business and Agricultural Business: 29 cr.

ACCT 284	Financial Accounting	3
FIN 301	Principles of Finance	3
Six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.		6
ECON 110	Orientation in Agricultural Business	1
ECON 235	Introduction to Agricultural Markets	3
ECON 292	Career Seminar	1
Nine credits of ECON 230-289, 300-389, 400-489 courses.		9
Three credits of 400-489 level ECON courses.		3

Electives: 22-24 cr.

Agricultural Business majors seeking a double major in Economics must take an additional 9 credits of economics courses beyond those required for the Economics major for a total of 47 economics credits, and must earn a minimum GPA of 2.0 across ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics and ECON 302 Intermediate Macroeconomics, with no grade in these lower than a C-.

Economics Major, College of Liberal Arts and Sciences

The Economics major in the College of Liberal Arts and Sciences prepares students for advanced studies in Economics, Finance, and Analytics, for professional degrees such as law and business administration (MBA), and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service. Candidates for the Bachelor of Science degree with a major in Economics must fulfill requirements established by the College of Liberal Arts and Sciences. For details of undergraduate curricula in liberal arts and sciences, see College of Liberal Arts and Sciences, Curriculum. A double major in Economics and Agricultural Business is permitted. A double major in Economics and Business Economics is not permitted. A major in Business Economics with a minor in Economics is not permitted. A minor in Economics cannot be combined with a major in Agricultural Business, and minors in both Agricultural Business and Economics are not permitted.

Students majoring in Economics are required to take the following courses within the General Education Area of Natural Sciences and Mathematical Disciplines:

Choose one of the following pairs: 7-8

MATH 165 Calculus I
& MATH 166 and Calculus II

MATH 165 Calculus I
& ECON 207 and Applied Economic Optimization *

MATH 160 Survey of Calculus
& ECON 207 and Applied Economic Optimization ()

*Students who plan to take postgraduate work in economics should take MATH 165 and MATH 166.

Choose one of the following pairs: 6

STAT 226 Introduction to Business Statistics I
& STAT 326 and Introduction to Business Statistics II

STAT 341 Introduction to the Theory of Probability and
& STAT 342 Statistics I
and Introduction to the Theory of Probability and
Statistics II

Students must complete the following courses in economics:

ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
ECON 301	Intermediate Microeconomics	3-4
ECON 302	Intermediate Macroeconomics	3
ECON 371	Introductory Econometrics	4
ECON 492	Graduating Senior Survey	R

Three credits of ECON 230-289, 300-389, 400-489 courses. 3

Nine credits of 400-489 level ECON courses. 9

A minimum of 18 credits of economics coursework must be earned at Iowa State University. Economics majors must earn a minimum GPA of 2.0 across ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics, with no grade in these lower than a C-.

Communication Proficiency Requirement: According to the University-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. In addition the Economics major requires a grade of C or better in ENGL 302 or ENGL 314.

ENGL 150 Critical Thinking and Communication 3

ENGL 250 Written, Oral, Visual, and Electronic Composition 3
or ENGL 250H Written, Oral, Visual, and Electronic Composition:
Honors

ENGL 302 Business Communication 3
or ENGL 314 Technical Communication

Optimal progress for an Economics major would be to complete the principles sequence

ECON 101 Principles of Microeconomics 3

ECON 102 Principles of Macroeconomics 3

and one of the following sequences in the freshman year: 7-8

MATH 165 Calculus I
or MATH 166 Calculus II

MATH 165 Calculus I
or ECON 207 Applied Economic Optimization

MATH 160 Survey of Calculus
or ECON 207 Applied Economic Optimization

The freshman-year sequences should be followed in the sophomore 6-7 year by the intermediate theory sequence:

ECON 301 Intermediate Microeconomics
& ECON 302 and Intermediate Macroeconomics

Students planning to attend graduate programs in Economics or related fields are encouraged to take STAT 341 Introduction to the Theory of Probability and Statistics I and STAT 342 Introduction to the Theory of Probability and Statistics II. Students planning for careers in the finance industry or government sectors are encouraged to enroll in STAT 226 Introduction to Business Statistics I and STAT 326 Introduction to Business Statistics II.

Business Economics Major, Ivy College of Business

The Business Economics major combines training in economics with exposure to applied business skills, including analytics. Graduates from this major are well-suited for employment in upper level management and public service positions and have solid preparation for graduate studies in law, economics, and in Master of Business Administration (MBA) programs. A double major in Business Economics and Agricultural Business is not permitted. A double major in Business Economics and Economics is not permitted. A major in Business Economics with a minor in Economics is not permitted. For the undergraduate curriculum in business economics, see Ivy College of Business Business Economics Major or visit the Ivy College of Business web site at <http://www.business.iastate.edu/>.

Agricultural Business Minor, College of Agriculture and Life Sciences

For a minor in Agricultural Business, students complete a minimum of 15 credits. The minor must include at least 9 credits that are not used to meet any other Department, College, or University requirement.

ECON 101	Principles of Microeconomics	3
ECON 230	Farm Business Management	3
ECON 235	Introduction to Agricultural Markets	3
ECON 301	Intermediate Microeconomics	3-4
Three credits of ECON 300-389, 400-489 courses.		3

Economics Minor, College of Liberal Arts and Sciences

For a minor in Economics, students complete a minimum of 15 credits. The minor must include at least 9 credits that are not used to meet any other Department, College, or University requirement.

ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
ECON 301	Intermediate Microeconomics	3-4
Six credits of ECON 230-289, 300-389, 400-489 courses.		6

Students in all ISU majors must complete a three-credit course in both U.S. Diversity and in International Perspectives. The two courses may simultaneously meet the following graduation requirements: Social Science, Arts/Humanities, ECON 400-489, or Econ courses from approved list. Please discuss with our advisor.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. Three of the required 45 credits at the 300+ level must be earned in a general education group outside the group of your major. Econ majors must meet or complete the LAS foreign language requirement. In addition, Econ majors must earn a minimum of 18 credits from courses taught by the Department of Economics at ISU.

a MATH 165 (Calculus I) and MATH 166 (Calculus II) may be substituted for MATH 160 and ECON 207.

b STAT 341 (Introduction to Theory of Probability & Stats I) and STAT 342 (Introduction to Theory of Probability & Stats II) may be substituted for STAT 226 and 326.

Also see Agricultural Business.

Graduate Programs in Economics and Agricultural Economics

The Department of Economics offers work toward the degrees Master of Science and Doctor of Philosophy with majors in Economics and Agricultural Economics. The Department also offers minors to students with majors in other departments. For more information, visit our web site at www.econ.iastate.edu (<http://www.econ.iastate.edu>).

Students do not need to have an undergraduate major in Economics or Agricultural Economics to qualify for graduate work in the Department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, calculus, and matrix algebra. Some background in math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree Master of Science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree Master of Science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of acceptable graduate work, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the students's committee. Subject to staffing constraints, the Department offers coursework to support the following fields of concentration: agricultural economics, applied econometrics, environmental and resource economics, financial economics, human resources, industrial organization, international economics, and macroeconomics. Students must complete advanced courses in microeconomic and macroeconomic theory, quantitative methods and econometrics, and two fields from the list above. Students are required to participate in workshops and demonstrate competence in theory by passing qualifying examinations.

English Undergraduate Study

The English department curriculum teaches an understanding of the way the English language functions and how people use it to create and communicate. We teach all students the fundamental skills needed to succeed in college, at work, and as citizens. As one of the core disciplines in the liberal arts, English fosters critical thinking, leadership ability, and democratic engagement. Students interested in majoring in English can choose a

- BA in English (with possible emphases in Literature, Creative Writing, Literary Editing, or Rhetoric)

- BA in English with an emphasis in Teacher Education (required courses for students seeking licensure are indicated below)
- BS in English
- BS in Technical Communication (<http://catalog.iastate.edu/collegeofliberalartsandsciences/technicalcommunication/>).

Students interested in a BS degree in English need to complete 12 credits in addition to the general education requirements; these credits must be taken in linguistics, natural science, mathematics, social science, or selected courses in kinesiology.

Those interested in civic discourse and oral communication can also major or minor in Speech Communication (<http://catalog.iastate.edu/collegeofliberalartsandsciences/speechcommunication/>). Students in secondary education can also earn an ESL endorsement through classes in the English Department.

An undergraduate major in English can be a solid basis for the professional study of law, medicine, theology, and business or careers in education, arts management, and publishing. An undergraduate major in Technical Communication (<http://catalog.iastate.edu/collegeofliberalartsandsciences/technicalcommunication/>) can prepare students for careers in nonprofit and government communication, web design and communication consulting, software documentation, usability and user experience, and scientific and technical writing and editing.

The department also provides communication courses for students across the disciplines through the ISUComm (<https://www.engl.iastate.edu/isucomm/>) initiative. The goal of ISUComm is to strengthen student communication and enhance students' critical thinking by creating opportunities for them to practice communication skills throughout their academic careers. These courses include ENGL 150 and 250 (ISUComm foundation courses) and ENGL 302, 309, and 314 (ISUComm advanced communication courses). These courses benefit all ISU undergraduates by addressing written, oral, visual, and electronic communication, or WOVE. WOVE prepares students for 21st-century communication activities.

As part of Iowa State's commitment to interdisciplinary study and cultural inclusiveness, English also has strong ties with African and African American Studies, American Indian Studies, Classical Studies, Communication Studies, U.S. Latina/o Studies, Linguistics, Speech Communication, and Women's and Gender Studies. In addition to course offerings in literature, creative writing, linguistics, speech communication, rhetoric, technical communication, and English education, the field of English Studies features strong connections with the technical, scientific, and environmental work that distinguishes Iowa State.

International students and other nonnative speakers of English can go to the Intensive English and Orientation Program (<https://ieop.iastate.edu/>) (IEOP) in the department, which offers special courses in English for

both undergraduate and graduate students who are native speakers of other languages. (See catalog entries under English Courses for Native Speakers of Other Languages and English Requirement for International Students.)

English Major Requirements

English majors are required to have, in addition to ISUComm foundation courses (ENGL 150 (<http://catalog.iastate.edu/search/?P=ENGL%20150>) Critical Thinking and Communication and ENGL 250 (<http://catalog.iastate.edu/search/?P=ENGL%20250>) Written, Oral, Visual, and Electronic Composition), at least 36 credits in English. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate with a major in the English Department and meet the university-wide Communication Proficiency Grade Requirement, a student must have credit for ENGL 150 Critical Thinking and Communication and earn at least a C (not C-) in ENGL 250 Written, Oral, Visual, and Electronic Composition as well as in each of the courses taken to fulfill the program of study, including one advanced communication course.

* Indicates English courses or groups required for students seeking teacher licensure

Texts and Language: Choose 5 15

ENGL 201	Introduction to Literature
ENGL 207	Introduction to Creative Writing
ENGL 214	Introduction to Technical Communication
ENGL 220	Descriptive English Grammar
ENGL 225	Survey of British Literature to 1800 *
ENGL 226	Survey of British Literature since 1800 *
ENGL 227	Survey of American Literature to 1865 *
ENGL 228	Survey of American Literature since 1865 *
ENGL 260	Introduction to Literary Study *

Advanced Communication: Choose 1 * 3

ENGL 302	Business Communication
ENGL 303	Free-Lance Writing for Popular Magazines
ENGL 304	Creative Writing: Fiction
ENGL 305	Creative Writing: Nonfiction
ENGL 306	Creative Writing: Poetry
ENGL 308	Write Like a Woman
ENGL 309	Proposal and Report Writing
ENGL 313	Rhetorical Website Design
ENGL 314	Technical Communication
ENGL 315	Creative Writing: Screenplays
ENGL 316	Creative Writing: Playwriting

Critical Reading and Textual Analysis: Choose 2 6

ENGL 275	Analysis of Popular Culture Texts
ENGL 310	Rhetorical Analysis *
ENGL 339	Literary Theory and Criticism
ENGL 350	Rhetorical Traditions
ENGL 396	Teaching the Reading of Young Adult Literature *

Choose 4: English Electives at the 200, 300, and 400 level (does not include ENGL 250) (Students seeking teacher licensure must take 219*, 220*, 354*, and 420*.) 12

Total Credits 36

All English majors must also complete the following requirements, which may overlap with the above requirements.

Three credits in Literature of Social and Environmental Justice (340s, 352, 355, 389)* 3

Nine credits in English classes with a historical perspective* (choose from the following or any 340s, 350s, 360s, or 370s course) 9

ENGL 201	Introduction to Literature
ENGL 225	Survey of British Literature to 1800 *
ENGL 226	Survey of British Literature since 1800
ENGL 227	Survey of American Literature to 1865
ENGL 228	Survey of American Literature since 1865 *
ENGL 237	Survey of Film History
ENGL 260	Introduction to Literary Study
ENGL 389	Postcolonial Literature
ENGL 393	The History of Children's Literature
ENGL 395A	Study and Travel: Literature
ENGL 420	History of the English Language *

Fifteen credits of major requirements must be at the 300 level. 15

Nine credits of major requirements must be at the 400 level. 9

Teacher Licensure Courses

Students seeking teacher licensure in Teacher Education should consult their adviser for a complete list of courses that meet major requirements and specialized licensure requirements (see Teacher Education section in this catalog). Among those licensure requirements are the following additional courses in English:

ENGL 353	World Literature: Western Foundations through Renaissance *	3
ENGL 397	Practice and Theory of Teaching Writing in the Secondary Schools *	3
ENGL 494	Practice and Theory of Teaching Literature in the Secondary Schools *	3

ENGL 417	Student Teaching *	arr
		†

† Arranged with instructor.

Additional course requirements outside English for students seeking teacher licensure include the following:

EDUC 202	Educational Technologies in the 7-12 Classroom	3
EDUC 204	Social Foundations of Education in the United States: Secondary	3
EDUC 280A	Pre-Student Teaching Experience I: Core Experience	1-2
EDUC 395	Teaching Disciplinary Literacy	3
EDUC 406	Social Justice Education and Teaching: Secondary	3
EDUC 426	Principles of Secondary Education	3
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	
PSYCH 230	Developmental Psychology	
PSYCH 333	Educational Psychology	
HIST or POL S American History or Government		
SP CM 212	Fundamentals of Public Speaking	
	or THRE 350 Oral Interpretation	

Some of these courses taken to meet licensure requirements may also meet General Education requirements for the college.

ESL Endorsement Requirements

At Iowa State University, ESL is an add-on endorsement, which means that students need to be certified in another area and to take all basic teacher preparation courses. The growing number of English learners in our public schools make the ESL endorsement a useful addition to a teaching license.

To add English as a Second Language, students must earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

ENGL 219	Introduction to Linguistics	3
ENGL 220	Descriptive English Grammar	3
ENGL 425	Second Language Learning and Teaching	3
ENGL 322	Language and Society	3
or EDUC 420	Bilingualism, Bilingual Education, and U.S. Mexican Youth	
or EDUC 520	Bilingualism, Bilingual Education, and U.S. Mexican Youth	

ENGL 318 & ENGL 324	Introduction to ESL methods and materials and Introduction to Teaching ESL Literacy (ENGL/LING 318, ENGL/LING 324)	6
---------------------	--	---

OR		
ENGL 324 & ENGL 325	Introduction to Teaching ESL Literacy and Teaching Methods for ESL Learners: Oral Communication Skills (ENGL/LING 324, ENGL/LING 325)	6

Practicum courses taken through the School of Education at ISU		
EDUC 280S	Pre-Student Teaching Experience I: English as a Second Language (ESL)	1
EDUC 480S	Pre-Student Teaching Experience III: English as a Second Language (ESL)	2

Departmental Awards and Scholarships

Each spring the English Department offers many scholarships and awards for both undergraduate and graduate students. Some undergraduate awards are for returning English and Technical Communication majors only; others are for returning students of any major who demonstrate excellence in some aspect of English or technical communication. Application forms and a list of current awards are available on the English Department website and in 206 Ross Hall early in the Spring Semester. Award winners are announced each year in April.

English Minor Requirements

The minor in English prepares students in any discipline for which communication activities are needed to succeed in their professions. Minors in English will complete 15 credits beyond ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition; ENGL 250 and additional courses require a grade of C or higher (not C-), 9 of which will be at the 300 or 400 levels. Twelve of these hours must be taken at Iowa State. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

English, B.A., B.S.

Graduate Study

The department offers graduate work leading to three Master of Arts degrees, one Master of Fine Arts degree, two Doctor of Philosophy degrees, and one TESL/TEFL Certificate. Information on application requirements and procedures for all majors is available on the Graduate Studies "How To Apply" (<http://www.engl.iastate.edu/graduate-students/prospective-students/how-to-apply-2/>) website.

The MA in English (<https://www.engl.iastate.edu/english/>) degree program offers advanced study of literature, film, research, writing, and the teaching of reading. Students admitted to the MA in English choose between two areas of specialization: (1) Literature or (2) Literature and the Teaching of Reading. These tracks prepare students for a variety of career paths, including teaching at the secondary or college levels, publishing, research, administration, and work in nonprofit sectors. For individuals interested in pursuing research and 4-year university teaching, the specialization in Literature provides excellent pre-PhD preparation through this program's small class sizes, research opportunities, and professionalization. The specialization in Literature and the Teaching of Reading is designed for licensed teachers who wish to take graduate literature courses and work toward a reading endorsement by taking three reading courses in Curriculum and Instruction.

The MA in Rhetoric, Composition, and Professional Communication (RCPC) (<https://engl.iastate.edu/ma-coursework-program-of-study/>) prepares students for careers in business, technical, and professional communication in the private and public sectors and for teaching writing and communication at the postsecondary level.

The MA in TESL/Applied Linguistics (TESL/AL) (<https://apling.engl.iastate.edu/ma-program-in-tesl-applied-linguistics/>) prepares students for careers in teaching English to non-native speakers of English, either in the U.S. or abroad. Students with MA degrees in TESL teach adults and younger learners in a wide variety of contexts, supervise language programs, work for testing organizations, and create language teaching materials. Students admitted to the degree program can choose among optional specializations: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESP); Literacy; Literature in ESL; Teaching English to L1 Spanish Learners; and Corpus and Computational Linguistics.

The Master of Arts (MA) degree programs require a minimum of 30 hours of graduate credit, including a final thesis or creative component (3 credits). Both the MA in English (<https://www.engl.iastate.edu/english/>) and the MA in TESL/Applied Linguistics (<https://>

apling.engl.iastate.edu/ma-program-in-tesl-applied-linguistics/) have language requirements that may be fulfilled in a number of ways. Students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement.

The Master of Fine Arts (MFA) program in Creative Writing and Environment (CWE) (<https://www.engl.iastate.edu/creative-writing/mfa-program-in-creative-writing-and-environment/>) cultivates in its students an interdisciplinary approach to research and writing. The program's unique design allows writers to develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, poetry, and drama. The program is designed to prepare students for careers as writers, teachers, editors, and environmental educators. The MFA degree requires 54 hours of graduate credit: a core of creative writing and other English courses, a book-length thesis (6 credits), experiential environmental fieldwork (3 credits), and 12 credits in disciplines other than English (such as Landscape Architecture, Anthropology, or Environmental Science, among many others) relevant to an individual student's research interests and thesis project.

The Doctor of Philosophy (PhD) in Applied Linguistics and Technology (ALT) (<https://apling.engl.iastate.edu/ph-d-in-applied-linguistics-and-technology/>) focuses on English language description, teaching, learning, and assessment, with particular emphasis on issues and practices related to technology: analysis of language using computational and corpus linguistic methods as well as the study of computer technology in English language teaching, learning, and assessment. The degree prepares students for a variety of academic appointments in departments of applied linguistics and English and for professional opportunities in research and development, international publishing, and government agencies in the U.S. and around the world where English is taught and used for specific educational, vocational, and professional purposes. Candidates are required to complete 72 hours of graduate credit including a dissertation, to meet a language requirement that may be fulfilled in a number of ways (students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement), and to pass a portfolio assessment, a preliminary examination (consisting of a dissertation proposal and pilot study and written response to questions about them), and an oral defense of the dissertation.

The PhD in Rhetoric and Professional Communication (RPC) (<https://www.engl.iastate.edu/rpc/graduate-programs/phd-rpc/>) focuses on the rhetorical theory, history, pedagogy, and practice of written, oral, visual, and electronic communication (WOVE) in professional communities such as business, industry, science, and government and in public spaces that frame deliberation, controversy and communal identity. The degree prepares graduates for academic positions in rhetoric, in multimodal composition, and in business, professional, and technical

communication, as well as for work in the private and public sectors as professional communication specialists, editors, designers, and communication managers. Candidates are required to complete 72 hours of graduate credit including a dissertation and to pass a portfolio assessment, a preliminary examination, and an oral defense of the dissertation.

A Graduate Certificate in Teaching English as a Second Language/ Teaching English as a Foreign Language (TESL/TEFL) (<https://apling.engl.iastate.edu/tesltefl-graduate-certificate/>) prepares students to teach English to non-native speakers of English either in the U.S. or abroad. It offers students grounding in the linguistic understanding of English and a flexible program of study with courses in teaching methodology, language assessment, and the use of technology to address students' language needs. This 12-credit program has two prerequisites, one core requirement, and three graduate course electives.

The department offers qualified graduate students an opportunity to gain professional experience through teaching and research assistantships, fieldwork and internships, and departmental research activities. Graduate students often work with ISUComm (<https://www.engl.iastate.edu/isucomm/>), the Intensive English and Orientation Program (IEOP) (<https://ieop.iastate.edu/>), ESL courses (<https://apling.engl.iastate.edu/esl-courses/>), and the Speech Communication Program. Teaching assistants are responsible for teaching, with faculty supervision, courses in ISUComm Foundation, ISUComm Advanced (business and technical communication), public speaking, and English as a Second Language (ESL). Research assistants may be assigned to faculty members engaged in research projects. One or more Pearl Hoglefe Fellowships in Creative Writing (<https://www.engl.iastate.edu/creative-writing/how-to-apply/pearl-hoglefe-fellowship-in-creative-writing/>), covering stipend and tuition, are awarded each year to outstanding graduate students. Freda Huncke Endowment Graduate Teaching Fellowships are awarded to select students each year.

With prior written approval from the School of Education, students may use selected courses to meet requirements for the ESL endorsement (K-12) for teachers.

The English Department offers minors in each of its graduate programs. A graduate minor at the MA level requires 9 credits of English at the 500 or 600 level in the respective major (English, RCPC, TESL/AL). A graduate minor within the MFA program in Creative Writing and Environment requires an approved application and completion of 12 graduate credits of creative writing. A graduate minor at the PhD level requires 12 credits at the 500 or 600 level in the respective major (ALT or RPC).

Environmental Science

From the College of Liberal Arts and Sciences

<http://www.ensci.iastate.edu>

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.
2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 32 credits

ENSCI 110	Orientation to Environmental Science	1
ENSCI 201	Introduction to Environmental Issues	2
ENSCI 202	Exploration of Environmental and Sustainability Issues	1
ENSCI 203	Exploration of Environmental Science	1
ENSCI 250	Environmental Geography	3
ENSCI 251	Biological Processes in the Environment	3

ENSCI 381	Environmental Systems I: Introduction to Environmental Systems	3
ENSCI 382	Environmental Systems II: Analysis of Environmental Systems	3
ENSCI 384	Introduction to Ecosystems	3
Additional ENSCI choice courses		12

Total Credits 32

2. Mathematics & Statistics: 7-8 credits

Choose one of the following: 4

MATH 160	Survey of Calculus	
MATH 165	Calculus I	

Choose one of the following: 3-4

STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	

Total Credits 7-8

3. Physical & Life Sciences: 21-24 credits

BIOL 101	Introductory Biology	3
or BIOL 211	Principles of Biology I	

Choose from one of the following: 5-6

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
CHEM 167 & 167L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering	
CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 201 & 201L	Advanced General Chemistry and Laboratory in Advanced General Chemistry	

Choose from one of the following: 3-4

CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	
CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	
BBMB 221	Structure and Reactions in Biochemical Processes	
AGRON 259	Organic Compounds in Plants and Soils	

Choose from one of the following: 4-5

PHYS 111	General Physics	
PHYS 115	Physics for the Life Sciences	
PHYS 221	Introduction to Classical Physics I	

Choose 2 of the following: 6

AGRON 182	Introduction to Soil Science	
GEOL 100	How the Earth Works	
or GEOL 201	Geology for Engineers and Environmental Scientists	

MTEOR 206	Introduction to Weather and Climate	
BIOL 212	Principles of Biology II	
CHEM 178 & 178L	General Chemistry II and Laboratory in College Chemistry II	

Total Credits 21-24

4. Communications: 7-10 credits

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1

Embedded communication coursework in ENSCI 203, 381 and 382

Total Credits 7

Additional communication Courses required of majors in the College of Agriculture and Life Sciences

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	

Total Credits 3

5. General Education: 15-21 credits

Additional general education requirements in the College of Agriculture and Life Sciences

Humanities	3
Social Science	3
Ethics	3
International Perspectives course from university approved list	3
US Diversity course from university approved list	3

Total Credits 15

additional general education requirements in the College of Liberal Arts and Sciences

Arts and Humanities courses from college approved list	12
Social Science courses from college approved list	9

(Select courses to include 3 cr. of International Perspectives and 3 cr. of US Diversity)

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level

Total Credits 21

Electives (28-35 credits)

120.0 Total Credits Bachelor of Science B.S.

Freshman

Students in all ISU majors must complete a 3 credits in U.S. diversity and a 3 credits in international perspectives. Check the Environmental Science website (<http://www.ensci.iastate.edu>) for a list of approved courses.

Minimum of 120 credits required, including a minimum of 45 credits at the 300/400 level.

¹ Students complete at least 2-7 credits in Environmental Science including ENSCI 110, 201, 250, 381, 382 and 15 additional credits of approved ENSCI coursework.

² Students complete at least 12 credits in arts and humanities and 9 credits in social science from approved lists. These credits can also be used to meet the U.S. Diversity and International Perspectives requirements.

³ Students choose one course from the following Earth Science related courses: AGRON 182, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, BBMB 2221, or AGRON 259.

Graduate Study

Contact information for the graduate program:

Lynette Edsall

camelot@iastate.edu (mstolt@iastate.edu)

515-294-1191

<https://enscigrad.iastate.edu/>

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (<https://enscigrad.iastate.edu/>).

Environmental Studies

Interdepartmental Undergraduate Program

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Secondary Major

The Environmental Studies secondary major is taken in addition to a first major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of ENV S coursework including:

At least one general survey course chosen from:

ENV S 101	Environmental Geology: Earth in Crisis
ENV S 120	Introduction to Renewable Resources
ENV S 173	Environmental Biology
ENV S 201	Introduction to Environmental Issues

At least one integrative/issues course chosen from:

ENV S 160	Water Resources of the World
ENV S 204	Biodiversity
ENV S 324	Energy and the Environment
ENV S 342	World Food Issues: Past and Present
ENV S 404	Global Change
ENV S 424	Sustainable and Environmental Horticulture Systems
ENV S 450	Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:

ENV S 293	Environmental Planning
ENV S 320	Ecofeminism
ENV S 334	Environmental Ethics
ENV S 345	Population and Society
ENV S 355	Literature and the Environment
ENV S 363	U. S. Environmental History
ENV S 380	Energy, Environmental and Resource Economics
ENV S 382	Environmental Sociology

ENV S 383	Environmental Politics and Policies
ENV S 384	Religion and Ecology
ENV S 442	The Policy and Politics of Coastal Areas
ENV S 484	Sustainable Communities
ENV S 491	Environmental Law and Planning

Beyond these three requirements, any Environmental Studies course and up to six credits of approved environmental coursework outside of Environmental Studies may be applied toward the 24 credit total for the major. Regardless of their home college, Environmental Studies majors must complete at least 9 credits of approved coursework in natural science. Unless prohibited by program or college rules, courses used to fulfill requirements of the Environmental Studies major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including:

At least one general survey course chosen from:

ENV S 101	Environmental Geology: Earth in Crisis
ENV S 120	Introduction to Renewable Resources
ENV S 173	Environmental Biology
ENV S 201	Introduction to Environmental Issues

At least one integrative/issues course chosen from:

ENV S 160	Water Resources of the World
ENV S 204	Biodiversity
ENV S 324	Energy and the Environment
ENV S 342	World Food Issues: Past and Present
ENV S 404	Global Change
ENV S 424	Sustainable and Environmental Horticulture Systems
ENV S 450	Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:

ENV S 293	Environmental Planning
ENV S 320	Ecofeminism
ENV S 334	Environmental Ethics
ENV S 345	Population and Society
ENV S 355	Literature and the Environment
ENV S 363	U. S. Environmental History
ENV S 380	Energy, Environmental and Resource Economics
ENV S 382	Environmental Sociology
ENV S 383	Environmental Politics and Policies

ENV S 384	Religion and Ecology
ENV S 442	The Policy and Politics of Coastal Areas
ENV S 484	Sustainable Communities
ENV S 491	Environmental Law and Planning

A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Genetics

Scott Nelson, Chair, Genetics Major Committee

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences.

Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/ biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students

interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Curriculum in Genetics - Requirements

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences

A grade of C- or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors

GEN 110	Genetics Orientation	1
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3
One of the following:		3-4
GEN 322	Introduction to Bioinformatics and Computational Biology	
GEN 349	The Genome Perspective in Biology	
GEN 444	Bioinformatic Analysis	
BCBIO 402	Fundamentals of Systems Biology and Network Science	
GEN 409	Molecular Genetics	3
GEN 410	Analytical Genetics	3
One of the following:		3
GEN 462	Evolutionary Genetics	
EEOB 561	Evolutionary and Ecological Genomics	
EEOB 563	Molecular Phylogenetics	
GEN 491	Undergraduate Seminar, Professional Practice in Genetics Disciplines	1
MICRO 302	Biology of Microorganisms	3

Total Credits

35-36

B. Course required of majors in the College of Agriculture and Life Sciences only

A minimum of 3 cr. of coursework in the area of environmental science from program approved list 3

Total Credits 3

2. Advanced Sciences Electives: 6 cr. from program approved list

A grade of C- or better is required in each course. No more than 3 cr. of GEN 490, 490R, 490H, 492, 496, 499, or 499H may be used to meet this requirement.

3. Mathematical Sciences

Complete at least one calculus course from MATH, minimum of 4 credits. 4

MATH 160 Survey of Calculus

MATH 165 Calculus I

Complete at least one course from STAT, minimum of 3 credits. 3-4

STAT 101 Principles of Statistics

STAT 104 Introduction to Statistics

Complete at least one additional course from MATH or STAT, minimum of 4 credits. 4

MATH 166 Calculus II

STAT 301 Intermediate Statistical Concepts and Methods

Total Credits 11-12

4. Supporting Sciences

CHEM 177 General Chemistry I 4

CHEM 177L Laboratory in General Chemistry I 1

CHEM 178 General Chemistry II 3

CHEM 178L Laboratory in College Chemistry II 1

CHEM 331 Organic Chemistry I 3

CHEM 331L Laboratory in Organic Chemistry I 1

CHEM 332 Organic Chemistry II 3

CHEM 332L Laboratory in Organic Chemistry II 1

PHYS 111 General Physics 5

or PHYS 221 Introduction to Classical Physics I

PHYS 112 General Physics 5

or PHYS 222 Introduction to Classical Physics II

Choose one of the following options 6-7

Option 1

BBMB 404 Biochemistry I

And one of the following:

BBMB 405 Biochemistry II

BBMB 411 Techniques in Biochemical Research

CHEM 211 & 211L Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory

CHEM 325 Chemical Thermodynamics

Option 2

BBMB 420 Mammalian Biochemistry

And one of the following:

BBMB 411 Techniques in Biochemical Research

CHEM 211 & 211L Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory

CHEM 325 Chemical Thermodynamics

Total Credits 33-34

5. International Perspectives: 3 cr. from university approved list

This course can satisfy **both** the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list

This course can satisfy **both** the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Information Literacy

A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 250 and advanced writing. (The College of Agriculture and Life Sciences requires a C or better in ENGL 150, as well.)

ENGL 150 Critical Thinking and Communication 3

ENGL 250 Written, Oral, Visual, and Electronic Composition 3
or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors

LIB 160 Information Literacy 1

One advanced English writing course from program approved list 3

Total Credits 10

B. Course required of majors in the College of Agriculture and Life Sciences only.

A grade of C or better is required by the college.

SP CM 212 Fundamentals of Public Speaking 3

or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences

Total Credits 3

8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

Humanities course from college approved list	3
Social Science course from college approved list	3
Ethics course from college approved list	3
Total Credits	9

B. College of Liberal Arts and Sciences

Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list	12
Social Science courses from college approved list	9
Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.	
Total Credits	21

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used **only** to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
GEN 410	Analytical Genetics	3
GEN 409	Molecular Genetics	3
Two or more additional credits in Genetics at the 300 level or above.		2
Total Credits		15

Genetics, B.S.

* Summer: Students taking the MCAT need to have completed biochemistry and physics by this time. Others can complete during the senior year.

Genetics, Development and Cell Biology

The Department of Genetics, Development and Cell Biology (GDCB) is dedicated to biological discovery and excellence in undergraduate and graduate education. The research and teaching mission of the department is to achieve a greater understanding of fundamental principles of life by focusing on basic cellular and subcellular processes, including genome dynamics, cell structure and function, cellular response to environmental and developmental signals, and molecular mechanisms of development. Recognizing that student education is of paramount importance, GDCB strives for excellence in teaching and research. GDCB plays a leading role in undergraduate and graduate training through a variety of activities, including traditional courses, undergraduate

internships in research laboratories, and advanced graduate seminar and literature-based courses. Innovative approaches to learning are emphasized throughout the curriculum.

Undergraduate Study

The Department of GDCB offers undergraduate majors in conjunction with other departments. Students interested in the areas of genetics, development and cell biology should major in biology, genetics or bioinformatics and computational biology (BCBio). The biology major is administered and offered jointly by the GDCB and Ecology, Evolution and Organismal Biology (EEOB) departments. The GDCB faculty, together with those in EEOB and the Department of Biochemistry, Biophysics and Molecular Biology (BBMB), administer and offer the genetics major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. BCBio is administered by GDCB and the Departments of Computer Science and Mathematics, and it is available through the College of Liberal Arts and Sciences.

The biology major and the genetics major prepare students for a wide range of careers in biological sciences. Training in biology or genetics may lead to employment in teaching, research, or any of a variety of health-related professions. Some of these careers include biotechnology, human and veterinary medicine, agricultural sciences and life science education. BCBio majors are prepared for careers at the interfaces of biological, informational and computational sciences in the above fields. These majors are also excellent preparation for graduate study in bioinformatics, molecular genetics, cell and developmental biology, neuroscience and related fields. Faculty members in GDCB contribute to the undergraduate courses listed below. The full descriptions of these courses can be found in the biology, genetics and BCBio sections of the catalog.

BIOL 101	Introductory Biology	3
BIOL 110	Introduction to Biology	1
BIOL 111	Opportunities in Biology	0.5
BIOL 155	Human Biology	3
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
BIOL 255	Fundamentals of Human Anatomy	3
BIOL 255L	Fundamentals of Human Anatomy Laboratory	1
BIOL 256	Fundamentals of Human Physiology	3
BIOL 256L	Fundamentals of Human Physiology Laboratory	1
BIOL 313	Principles of Genetics	3
BIOL 313L	Genetics Laboratory	1

BIOL 314	Principles of Molecular Cell Biology	3
BIOL 328	Molecular and Cellular Biology of Human Diseases	3
BIOL 344	Human Reproduction	3
BIOL 350	Comprehensive Human Anatomy	4
BIOL 352	Vertebrate Histology	4
BIOL 394	International Field Trips in Biology	1-4
BIOL 423	Developmental Biology	3
BIOL 423L	Developmental Biology Laboratory	1
BIOL 428	Cell Biology	3
BIOL 436	Neurobiology	3

BIOL 494	Biology Internship	1-3
BIOL 495	Undergraduate Seminar	1-3
BIOL 499	Undergraduate Research Experience	1-3
GEN 110	Genetics Orientation	1
GEN 112	Genetics Orientation for Transfer Students	0.5
GEN 349	The Genome Perspective in Biology	3
GEN 409	Molecular Genetics	3
GEN 410	Analytical Genetics	3
GEN 490	Independent Study	1-5
GEN 491	Undergraduate Seminar, Professional Practice in Genetics Disciplines	1
GEN 499	Genetics Research	1-5
BCBIO 110	BCBIO Orientation	0.5
BCBIO 322	Introduction to Bioinformatics and Computational Biology	3
BCBIO 401	Fundamentals of Bioinformatics and Computational Biology	3
BCBIO 402	Fundamentals of Systems Biology and Network Science	3
BCBIO 444	Bioinformatic Analysis	4

Graduate Study

Understanding the genetic blueprint and the functions of cells is critical to virtually all aspects of biology. The basic mission of the Department of GDCB is to achieve a greater understanding of fundamental principles of life. The GDCB faculty and students conduct hypothesis-driven research into the biology of animals, plants and microbes. While research in GDCB is often based on discovery and analysis of molecular mechanisms of life processes, a true understanding of living organisms will ultimately require the integration of molecular mechanisms in the context of dynamic structural components of the living cell. Thus, research efforts within GDCB use molecular, genetic, biochemical, computational and

imaging techniques to study systems at increasingly complex levels of organization.

GDCB faculty contribute to a broad but integrated array of cutting-edge research topics. Faculty implement interactive and multidisciplinary approaches that bridge conventional boundaries, and they incorporate experimental and computational biology as complementary approaches. Examples include using genetics and molecular biology to investigate the cellular basis of development, or combining biochemical and computational approaches to study basic subcellular functions, signal transduction or metabolism.

The faculty in the GDCB Department train graduate students in several interdepartmental majors/programs, including bioinformatics and computational biology; ecology and evolutionary biology; genetics and genomics; immunobiology; plant biology; interdisciplinary graduate studies; microbiology; molecular, cellular and developmental biology; neuroscience; and toxicology. Graduate work leading to degrees in the master of science (M.S.) and doctor of philosophy (Ph.D.) is available.

Prospective graduate students need a sound background in the physical and biological sciences, as well as mathematics and English. Interested students should check the links on the GDCB website (www.gdcb.iastate.edu/) for specific admissions procedures and the latest information about individual faculty and their research programs. The interdepartmental majors and programs require submission of Graduate Record Examination (GRE) aptitude test scores. Advanced GRE scores are recommended. International students whose native language is other than English must also submit TOEFL scores with their application.

Students who are enrolled in the interdepartmental graduate majors and who have affiliations with GDCB are required to actively participate in seminars and research activities, and they are required to show adequate progress and professional development while pursuing their degree. Completion of either the M.S. or Ph.D. requires that research conducted by the student culminates in the writing and presentation of a thesis or dissertation. The Graduate College, the GDCB faculty, and the individual student's major professor and Program of Study Committee provide requirements and guidelines for study. General information about graduate study requirements can be found at the website for the Graduate College (www.grad-college.iastate.edu/), and requirements for the interdepartmental majors can be found by following the links from the GDCB website (www.gdcb.iastate.edu/ (<http://www.gdcb.iastate.edu/>)). Although not a formal requirement, the GDCB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Geology

Geology

The **bachelor of science major in Geology** prepares the student for a professional career and/or graduate study in the geological sciences. Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct past environments and anticipate future problems. Graduates provide essential information for solving problems for resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, staff members in state and U.S. geological surveys, government regulators, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

Geology as a Secondary Major: The Geology program has identified the core of 31 credits of geology courses that can complement a BS degree or major in materials engineering, civil engineering, environmental science, meteorology, or biology for students wishing to earn a secondary major in geology. This pathway to earning a Geology major allows students in these academic programs with affinity to geology to complete both programs. Students should work closely with their advisers in each department to ensure that all requirements are met. These programs prepare students for careers or graduate study in the geosciences. The requirements of the 31 credit core are below. Please review information on the department website and contact the current program head for more information and sample four year plans for the Geology as a secondary major program.

Required courses in Geology as a Secondary Major

GEOL 100	How the Earth Works	3
or GEOL 101	Environmental Geology: Earth in Crisis	
GEOL 100L	How the Earth Works: Laboratory	1
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1
GEOL 302	Summer Field Studies	6
GEOL 315	Mineralogy and Earth Materials	3
GEOL 315L	Laboratory in Mineralogy and Earth Materials	1
GEOL 316	Optical Mineralogy	1
GEOL 356	Structural Geology and Tectonics	4
GEOL 357	Geological Mapping and Field Methods	1
GEOL 365	Igneous and Metamorphic Petrology	3

GEOL 368	Sedimentary Geology	4
Total Credits		31

Combined Degrees: A concurrent program is offered which combines a bachelor of science degree in geology and a master of science degree in geology. This program gives well-qualified Iowa State juniors and seniors the opportunity to begin working on the M.S. degree before completing the B.S. degree, reducing by at least one year the normal time period necessary to complete both degrees separately. Additionally, a concurrent program exists that gives highly motivated and career-focused students the opportunity to receive a bachelor of science in geology and an M.B.A. (master of business administration). Review the department website or contact Dr. Cinzia Cervato for more information regarding these programs.

Required courses for BS in Geology include:

GEOL 100	How the Earth Works	3
or GEOL 101	Environmental Geology: Earth in Crisis	
GEOL 100L	How the Earth Works: Laboratory	1
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1
GEOL 302	Summer Field Studies	6
GEOL 315	Mineralogy and Earth Materials	3
GEOL 315L	Laboratory in Mineralogy and Earth Materials	1
GEOL 316	Optical Mineralogy	1
GEOL 356	Structural Geology and Tectonics	4
GEOL 357	Geological Mapping and Field Methods	1
GEOL 365	Igneous and Metamorphic Petrology	3
GEOL 368	Sedimentary Geology	4
GEOL 479	Surficial Processes	3
And 9 credits of geology electives		9
Total Credits		43

Required supporting courses include:

MATH 165	Calculus I	4
MATH 166	Calculus II	4
CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
PHYS 111	General Physics	5
PHYS 112	General Physics	5

And 6 additional credits of either geology electives or courses from an approved departmental list of science, engineering, and mathematical disciplines outside of geology. **6**

Total Credits 33

No more than 9 credits in 490 may be counted toward a degree in Geology.

Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250. The department requires a grade of C or better in ENGL 309 or ENGL 314.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
One of the following:		3
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	

Total Credits 9

Minor - Geology

A minor in Geology may be earned by taking 15 credits of geology coursework, including:

GEOL 100	How the Earth Works	3
or GEOL 201	Geology for Engineers and Environmental Scientists	
or GEOL 101	Environmental Geology: Earth in Crisis	
GEOL 100L	How the Earth Works: Laboratory	1
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1

Although many students will take GEOL 100 as the first course in this sequence, GEOL 101 or GEOL 201 may be taken in place of GEOL 100. Note: all students must take GEOL 100L (How the Earth Works: Laboratory). The remainder of the coursework should be at the 300 level or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

FOUR YEAR PLAN

Below is a suggested pathway for new majors.

Geology, B.S.

Freshman

Fall	Credits	Spring	Credits
ENGL 150	3	GEOL 102	3
GEOL 100 or 101	3	GEOL 102L	1
GEOL 100L	1	CHEM 178	3
CHEM 177	4	CHEM 178L	1
CHEM 177L	1	MATH 166	4
MATH 165	4	Arts-and-Humanities Choice	3
LIB 160	1		
17		15	

Sophomore

Fall	Credits	Spring	Credits
ENGL 250	3	GEOL 365	3
GEOL 315	3	Arts-and-Humanities Choice	3
GEOL 315L	1	PHYS 112	5
GEOL 316	1	Science/Engineering/Mathematics Choice ¹	3
PHYS 111	5	Elective	3-4
Science/Engineering/Mathematics Choice ¹	3		
16		17-18	

Junior

Fall	Credits	Spring	Credits	Summer	Credits
GEOL 479	3	GEOL 356	4	GEOL 302	6
GEOL 368	4	Foreign Language/Elective	3-4		
Geology Choice ¹	3	Geology Choice ¹	3		
Foreign Language/Elective	3-4	Social-Science Choice	3		
GEOL 357	1				
14-15		13-14		6	

Senior

Fall	Credits	Spring	Credits
Geology Choice ¹		3 Elective	3
Arts-and-Humanities Choice		3 Arts-and-Humanities Choice	3
Social-Science Choice		3 Social-Science Choice	3
ENGL 309 or 314		3 Elective	3
		12	12

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS foreign-language requirement.

¹ Choose from list of approved courses available from an adviser or the departmental office.

Graduate Study

The department offers programs leading to the master of science and doctor of philosophy with majors in Geology, Earth Science, and Meteorology. Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate preparation and performance along with their expressed goals in the statement of purpose. All prospective students should reach out to individual faculty members who they wish to work with prior to applying.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in complementary areas such as aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, environmental science, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a

strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology. A non-thesis option is also offered for the M.S. degree in Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

Course requirements for the MS degree include MTEOR 542, 543, 507 or 518, 552 or 516x, and 502 or 504 or 505 or 605. In addition to the 5 required courses from this list, students must take at least 3 more credits of graduate course work in Meteorology, Agricultural Meteorology, or a field related to their research interests (students will work closely with their POS committee to determine the exact amount of structured course work required – typically this is 18-21 credits). Students without prior synoptic meteorology course work must complete MTEOR 511 and may substitute these credits in place of the required MTEOR 507 or 518 courses.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

Greenlee School of Journalism and Communication

<http://www.greenlee.iastate.edu/>

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

- Advertising Bachelor of Arts (ADVRT)
- Journalism and Mass Communication Bachelor of Science (JL MC)
- Public Relations Bachelor of Science (P R)

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek a second major or minor in the school. All students are required to take a second major or minor outside the school as an area of expertise.

Undergraduate Study

Students who major in advertising, journalism and mass communication, or public relations are expected to develop competencies in 12 key areas:

- understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
- demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
- demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
- demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
- understand concepts and apply theories in the use and presentation of images and information;
- demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
- think critically, creatively and independently;
- conduct research and evaluate information by methods appropriate to the communications professions in which they work;
- write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;
- critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
- apply basic numerical and statistical concepts;
- apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

Communication Proficiency Requirement

All majors in the School must complete ENGL 150 Critical Thinking and Communication (or be exempt) and earn a grade of C or better in ENGL 250, Oral, Visual, and Electronic Composition (or ENGL 250H). These additional requirements apply:

Advertising majors must earn a C+ or better in:

JL MC 201	Reporting and Writing for the Mass Media	3
and one of		
ADV RT 334	Advertising Creativity	3
ADV RT 336	Advertising Account Management	3

Journalism and mass communication majors must earn a C+ or better in:

JL MC 201	Reporting and Writing for the Mass Media	3
and one of		
JL MC 302	Intermediate Reporting and Writing for the Mass Media	3
JL MC 303	Reporting and Writing for Broadcast Media	3

Public relations majors must earn a C+ or better in:

JL MC 201	Reporting and Writing for the Mass Media	3
P R 321	Public Relations Writing	3

History

The History department offers courses leading to the B.A. and B.S. degrees in history, an M.A. in History, and a Ph.D. in Rural, Agricultural, Technological and Environmental History.

The department offers a variety of survey courses (200 series) for first- and second-year students as either general education courses or as introductions to advanced courses in history or other subject areas. In addition to 200-level survey courses, it offers advanced undergraduate courses in the history of Europe, Asia, Africa, Latin America, the United States, technology and science, agriculture, and other selected topics.

The History Major

History majors may earn either a bachelor of arts or bachelor of science degree. The minimum required for a major in history is 36 credits, including HIST 301 and HIST 495 or HIST 498. At least 24 credits of HIST must be in courses numbered 300 or above. Students may take a maximum of 12 credits at the 200-level, a maximum of 15 credits at the 300-level (including HIST 301), and must take a minimum of 12 credits at the 400-level or above (i.e. HIST 495 or HIST 498 and 9 additional 400+ level credits). A minimum of 15 credits of HIST numbered 300 or above must be taken in residence at Iowa State. The department will accept

a maximum of 6 credits of cross-listed courses originating in another teaching department toward the major degree. Candidates for the B.A. must complete two years of university-level study in one foreign language or the equivalent. Many history majors also pursue a minor in another discipline, a second major, or teacher certification.

Objectives for History Majors

1. Display the appropriate level of cognitive knowledge of historical themes and events based upon the student's course of study
2. Display an understanding of past cultures and social organizations, based on the course of study
3. Develop the fundamental methodological skills of the historical craft: the ability to contextualize and analyze primary source evidence; familiarity with the concepts of historical argument and interpretation, and the ability to formulate effective argumentation in written and oral forms; awareness of the basic historiography in selected research area; and the ability to conduct research and to write a historical essay based upon primary and secondary source research. Students receive an introduction to these concepts in HIST 301 The Historian's Toolbox.
4. Display a sophisticated understanding of the relationship between past events and the present. For purposes of outcomes assessment, History majors must complete three credits from the following list: HIST 495 Historiography and Research Writing; if qualified and willing, one graduate-level research seminar; or if qualified and pursuing teacher certification HIST 498 Methods of Teaching History/ Social Sciences.

Communication Proficiency requirement: History majors must receive a grade of C or better in ENGL 250 (or ENGL 250H), and HIST 301.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. For a history major, 15 credits of history at the 300/400 level must be taken at ISU. You must also complete the LAS foreign language requirement.

Students seeking teacher certification should contact the History Department directly for the latest information on specific course work required for certification by the State of Iowa. Course work in addition to the degree minimums may be required.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. For a history major, 15 credits of history at the 300/400 level must be taken at ISU. You must also complete the LAS foreign language requirement.

The BA in History requires the equivalent of 2 years of college-level study in the same foreign language. Six credits of electives may be replaced by 6 additional credits of foreign language.

Students seeking teacher certification should contact the History Department directly for the latest information on specific course work

required for certification by the State of Iowa. Course work in addition to the degree minimums may be required.

Minor

The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 must be in courses numbered 300 or above, excluding HIST 490 Independent Study. A minimum of 9 credits numbered 300 or above must be taken at Iowa State. The College of Liberal Arts and Sciences requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. A student may count a maximum of 3 hours of cross-listed courses originating in another teaching department toward the minor in History. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

Graduate Study

The History Department offers two graduate degrees: an M.A. in History and a Ph.D. in Rural, Agricultural, Technological and Environmental History.

Most history graduate courses are either readings seminars or research seminars. Readings seminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Research seminars require students to conduct original historical research and to write research papers reporting the results.

The M.A. in history includes both thesis and non-thesis options. See the departmental website on the M.A. in History for a full discussion of the options and requirements. An M.A. in History serves as the basis for continued study in history, as well as preparation for careers in law, education, business, and government service. Throughout world history human beings have depended on rural and agricultural communities as well as on the technologies developed and employed by these communities to sustain lives. Iowa State's Doctoral Program in Rural, Agricultural, Technological and Environmental History offers a scholarly community and learning environment dedicated to the close examination of pervasive and enduring questions about these basic aspects of human history. Such questions can best be answered through the multi-faceted perspectives provided by rural, agricultural, technological, and environmental history. The result is a dynamic learning experience that leads to comparative and transnational analysis shaped by a broad range of methods drawn from the humanities and social/physical sciences. The Program's aim is to produce students who are excellent researchers and engaging teachers, capable of succeeding in a broad variety of professional positions, both inside and outside of academia.

The Ph.D. in Rural, Agricultural, Technological and Environmental History is designed for students who have completed an M.A. in history. Those

who have not yet completed an M.A. will be expected to complete the degree while progressing toward the Ph.D. Thirty semester hours of graduate credit are required for the M.A. and 72 for the Ph.D. Students who continue beyond the M.A. are expected to pass preliminary examinations in four areas of specialization, complete a dissertation, and defend it orally in the Ph.D. final examination. See the departmental website on the program for a full description of requirements.

Interdisciplinary Studies

Interdepartmental Undergraduate Major Administered by the College of Liberal Arts and Sciences

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty review board, and an academic adviser design the major. Leading to either the Bachelor of Arts or the Bachelor of Science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more departments. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College's cross-disciplinary programs. Areas of interest in Interdisciplinary Studies have included Classical Studies, International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and U.S. Latino/a Studies.

A student seeking admission to the program in interdisciplinary studies writes a letter of application that explains how the proposed major meets specific educational and learning goals. A faculty review board screens applications. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the review board in the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student's educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

The interdisciplinary studies major must satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.
3. The courses will be chosen from at least two disciplines.

All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major. To meet the English and communication proficiency requirement, a grade of C or better must be earned in ENGL 250 and in either an advanced English composition course or a course in the major with a significant writing component.

Further information may be obtained from the LAS College Student Academic Services office.

Classical Studies

The cross-disciplinary Classical Studies Program engages students with the civilizations of ancient Greece and Rome and their influence, both past and present, on western and world cultures. The Classical Studies minor and Interdisciplinary Studies major include an integrated curriculum of courses in the cultures, literatures, history, languages, archaeology, and art of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Current information about the Program may be found at: <http://language.iastate.edu/academic-programs/classical-studies/>

Courses in Classical Studies provide background and a classical context for students whose major fields of study or career interests include History, Anthropology, English, World Languages and Cultures, Philosophy, Women's and Gender Studies, material culture, law, medicine, political science, the life sciences, and related fields.

Students interested in pursuing an Interdisciplinary Studies major or minor in Classical Studies should meet with an academic adviser in the Department of World Languages and Cultures (<https://language.iastate.edu/advising/>) and the Classical Studies Program director (<https://language.iastate.edu/directory/#clst>).

(Note: neither this major nor minor prepares students for graduate study in Classical Studies.)

Interdisciplinary Studies Major in Classical Studies (CL ST)

Students interested in pursuing an Interdisciplinary Studies major in Classical Studies should consult the Program Chair (see "Program Faculty" at <https://language.iastate.edu/classical-studies/>) or an

Academic Adviser in the Department of World Languages and Cultures (<https://language.iastate.edu/advising/>).

Required Latin Languages Courses (6 Credits)

(100-level courses cannot count toward major credit requirements.)

LATIN 101	Elementary Latin I	3
LATIN 102	Elementary Latin II	3

The major requires 36 credits and permits great flexibility while maintaining academic rigor, breadth, and focus. Many courses are cross-listed with those in other departments (see course descriptions, below).

A. Required Foundation Course: (3 credits)

CL ST 273	Greek and Roman Mythology	3
or CL ST 275	The Ancient City	

B. Required Ancient History Courses: (6 credits)

CL ST 402	Greek Civilization.	3
CL ST 403	Roman Civilization.	3

C. Additional Courses: Students must take at least 27 credits chosen from a, b, and c below (or approved by the Program Committee), with a minimum of 3 credits from each section (not including the course used for the Required Foundation Course).

a) Material Culture and Art: (at least 3 credits)

CL ST 369	Ancient Egypt	3
CL ST 376A	Classical Archeology: Bronze Age and Early Iron Age Greece	3
CL ST 376B	Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)	3
CL ST 376C	Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)	3
CL ST 383	Greek and Roman Art	3
CL ST 384	Roman Italy: An Introduction	2
CL ST 385	Study Abroad: Roman Italy: Building the Empire	3
CL ST 394	The Archaeology of Greece: An Introduction	2
CL ST 395	Study Abroad: The Archaeology of Greece	2-6

b) Literature: (at least 3 credits)

CL ST 353	World Literature: Western Foundations through Renaissance	3
CL ST 372	Greek and Roman Tragedy and Comedy	3
CL ST 373	Heroes of Greece, Rome, and Today	3

c) Cultural Studies: (at least 3 credits)

CL ST 273	Greek and Roman Mythology	3
CL ST 275	The Ancient City	3
CL ST 310	Ancient Philosophy	3
CL ST 350	Rhetorical Traditions	3

CL ST 367	Christianity in the Roman Empire	3
CL ST 368	Religions of Ancient Greece and Rome	3
CL ST 374	Sex, Gender, and Culture in the Ancient Mediterranean World	3
CL ST 430	Foundations of Western Political Thought	3
CL ST 480	Seminar in Classical Studies	3
CL ST 490	Independent Study	1-6
LATIN 490	Independent Study	1-6
CL ST 512A	Readings Seminar in European History: Ancient	3
CL ST 530	Foundations of Western Political Thought	3
CL ST 594A	Research Seminar in European History: Ancient	3

Notes

1. The list of acceptable courses may include courses not currently in the list above. Contact the Classical Studies Program director for information on eligible courses.

2. The general requirements for the Interdisciplinary Studies major in the College of Liberal Arts and Sciences must be met. All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major.

3. Communication Proficiency requirement: According to the university-wide Communication Proficiency Grade Requirement, students must demonstrate their communication proficiency by earning a grade of C or better in ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors). In addition, the Department requires a grade of C or better in any course numbered between 350 and 379 in Classical Studies.

4. LATIN 490 Independent Study (1-6 credits, repeatable up to 9 credits): This option will only occasionally be available and only to students who have successfully completed intermediate-level Latin coursework elsewhere.

MINOR in CLASSICAL STUDIES

The minor in Classical Studies requires 18 credits: 6 credits of Latin and 12 credits of CL ST courses taught in English. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

a) The following set of courses in Latin: (6 credits)

LATIN 101	Elementary Latin I	3
LATIN 102	Elementary Latin II	3

b) One of the following introductory courses: (3 credits)

CL ST 273	Greek and Roman Mythology (or)	3
-----------	---------------------------------	---

CL ST 275	The Ancient City	
-----------	------------------	--

c) One course in ancient history from those listed below or approved by the program committee: (3 credits) 3

CL ST 402	Greek Civilization.	
-----------	---------------------	--

CL ST 403	Roman Civilization.	
-----------	---------------------	--

d) Two additional courses (not used to meet other CL ST minor requirements) from those listed below or approved by the program committee: (6 credits) 6

One of these classes (3 crs) must be at the 300-level or above.

CL ST 273	Greek and Roman Mythology	
-----------	---------------------------	--

CL ST 275	The Ancient City	
-----------	------------------	--

CL ST 310	Ancient Philosophy	
-----------	--------------------	--

CL ST 350	Rhetorical Traditions	
-----------	-----------------------	--

CL ST 353	World Literature: Western Foundations through Renaissance	
-----------	---	--

CL ST 367	Christianity in the Roman Empire	
-----------	----------------------------------	--

CL ST 368	Religions of Ancient Greece and Rome	
-----------	--------------------------------------	--

CL ST 369	Ancient Egypt	
-----------	---------------	--

CL ST 372	Greek and Roman Tragedy and Comedy	
-----------	------------------------------------	--

CL ST 373	Heroes of Greece, Rome, and Today	
-----------	-----------------------------------	--

CL ST 374	Sex, Gender, and Culture in the Ancient Mediterranean World	
-----------	---	--

CL ST 376A	Classical Archeology: Bronze Age and Early Iron Age Greece	
------------	--	--

CL ST 376B	Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)	
------------	--	--

CL ST 376C	Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)	
------------	---	--

CL ST 383	Greek and Roman Art	
-----------	---------------------	--

CL ST 384	Roman Italy: An Introduction	
-----------	------------------------------	--

CL ST 594A	Research Seminar in European History: Ancient	
------------	---	--

LATIN 490	Independent Study	
-----------	-------------------	--

U.S. Latino/a Studies Program

Latinos/as/x are the largest and fastest growing culturally diverse population in the United States, representing dynamic and thriving American realities.

U.S. Latino/a Studies at Iowa State University is a cross-disciplinary, coalition-building program that offers well-structured and creative coursework to students interested in the arts, cultures, economies, histories, politics, religions, and literatures of Latino/a/x communities throughout the United States. It facilitates the study of a vast array of communities and individuals with roots in the Caribbean and Latin America, and long-established U.S. citizen communities such as Chicanos/as, Mexican Americans, Tejanos, Californios, Cuban-Americans, Dominican-Americans, and Puerto Ricans on the island and on the mainland.

The program aims to serve as a hub that connects classes, service and outreach opportunities across colleges, schools, and departments.

Consequently, students can discover a stimulating field of critical and academic research, engage in an exciting platform on which to link different fields of study, and become part of outreach/community networks in which they will grow to become outstanding, conscientious leaders in their respective careers.

The Program in U.S. Latino/a Studies is well suited to careers in Education, Psychology, History, Sociology, Business, Journalism, Spanish Language and Cultures, Women's and Gender Studies, and Agriculture. A U.S. Latino/a Studies minor, or a double major with a Latino/a Studies track in Interdisciplinary Studies, strengthens student profiles as they compete for jobs on the global market because they have attained an in-depth experience of local and global experiences of Latin America and the Caribbean, as well as a sophisticated understanding of diversity and inclusion.

The US LS Program offers course work that meets the ISU U.S. Diversity requirement and also offers a 15 credit Minor (<https://usls.las.iastate.edu/minor/>).

Interdisciplinary Studies Major, Track in U.S. Latino/a Studies

Students can work with the US LS program director and the Interdisciplinary Studies adviser to develop an individualized major program. In addition to meeting the general requirements for the Interdisciplinary Studies major, students wishing to complete a track in U.S. Latino/a Studies must complete a minimum of 36 credits in the area of U.S. Latino/a Studies including US LS 211 (Introduction to U.S. Latino/a Studies). At least 15 of the 36 credits must be in courses numbered 300 and above and 6 credit hours must be earned at the 400-level. Students

must also meet the upper-level communication proficiency requirement by taking English 302 or 314.

Required Courses (36 credits)

Prerequisite for all US LS courses: (3 credit hours):

US LS 211	Introduction to U.S. Latino/a Studies	3
Two of the following Historical Foundations of US LS		6
US LS 372	Latina/o History	
HIST 340	History of Latin America I	
HIST 341	History of Latin America II	
Two of the following Social Science Foundations of US LS		6
SOC 332	The Latino/Latina Experience in U.S. Society	
US LS 347	U.S. Latino/a Psychology	
ANTHR 323	Topics in Latin American Anthropology	
SPAN 322	Latin American Civilization	
SPAN 324	Latin America Today	
Two of the following Political Foundations of US LS		3
US LS 343	Latin American Government and Politics	
US LS 473	Civil Rights and Ethnic Power	
Two of the following Literature and Language in US LS		6
US LS 342	Religion and U.S. Latino/a Literature	
ENGL 344	U.S. Latino/a Literature	
SPAN 445	Seminar on the Literatures and Cultures of Latin America	
SPAN 304	Spanish for Global Professionals	
Special Topics in US LS (Optional; maximum of 3 credit hours per semester up to 9 credit hours total)		3-9
US LS 490	Independent Study	
Additional Credits for the Major (if not taken to satisfy areas above; four of the following courses)		12
US LS 372	Latina/o History	
SOC 332	The Latino/Latina Experience in U.S. Society	
US LS 342	Religion and U.S. Latino/a Literature	
US LS 343	Latin American Government and Politics	
ENGL 344	U.S. Latino/a Literature	
US LS 347	U.S. Latino/a Psychology	
US LS 473	Civil Rights and Ethnic Power	
US LS 490	Independent Study	
ANTHR 323	Topics in Latin American Anthropology	
HIST 340	History of Latin America I	
HIST 341	History of Latin America II	
SPAN 322	Latin American Civilization	
SPAN 324	Latin America Today	

SPAN 445	Seminar on the Literatures and Cultures of Latin America
----------	--

Notes

1. The list of acceptable courses may include courses not currently listed above. Contact the Director of US Latino/a Studies for information on eligible courses.
2. The student must have an average grade of C in the required courses of the major.
3. Fulfillment of the foreign language requirement with Spanish is strongly recommended, but not required. A limit of six (6) credits of approved Spanish courses (304, 322, 324, 445) may be used as supporting courses for the major. Spanish course credits counted toward the major may not be applied to any other degree requirement.

US Latino/a Studies Minor

The minor in US Latino/a Studies requires a minimum of 15 credit hours including US LS 211 (Introduction to U.S. Latino/a Studies). University policy indicates that minors must include at least 9 credits that are not applied to any other degree requirement.

Required course work in core courses (9 credits total):

US LS 211	Introduction to U.S. Latino/a Studies	3
And six credits from the following:		6
US LS 371	Mexican American History	3
US LS 372	Latina/o History	3
US LS 420	Bilingualism, Bilingual Education, and U.S. Mexican Youth	3
US LS 342	Religion and U.S. Latino/a Literature	
US LS 343	Latin American Government and Politics	
US LS 347	U.S. Latino/a Psychology	
US LS 473	Civil Rights and Ethnic Power	
US LS 490	Independent Study	
HIST 473	Civil Rights and Ethnic Power	3

Six (6) additional credits from the following list (if not taken to satisfy area above):

US LS 371	Mexican American History	3
US LS 372	Latina/o History	3
US LS 420	Bilingualism, Bilingual Education, and U.S. Mexican Youth	3
US LS 342	Religion and U.S. Latino/a Literature	3
US LS 343	Latin American Government and Politics	3
US LS 347	U.S. Latino/a Psychology	3
US LS 473	Civil Rights and Ethnic Power	3
US LS 490	Independent Study	1-3

ANTHR 323	Topics in Latin American Anthropology	3
HIST 340	History of Latin America I	3
HIST 341	History of Latin America II	3
SPAN 304	Spanish for Global Professionals	3
SPAN 322	Latin American Civilization	3
SPAN 324	Latin America Today	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3
HIST 473	Civil Rights and Ethnic Power	3

Notes:

1. The list of acceptable courses may include courses not currently listed above. Contact the Director of US Latino/a Studies for information on eligible courses.
2. A limit of six (6) credits of approved Spanish courses (304, 322, 324, 445) may be used as supporting courses for the minor.
3. A maximum of 3 credit hours of US LS 490 (Independent Study) may be applied toward the minor.

International Studies

Interdepartmental Undergraduate Major and Minor, Administered by the College of Liberal Arts and Sciences

Through a combination of coursework and study abroad, students who complete a secondary major or minor in International Studies can prepare for careers or advanced study in the international arena, such as foreign service, journalism, advocacy organizations, scientific or research institutions, business, nongovernmental development organizations (NGOs), humanitarian agencies, environmental organizations, human rights organizations, think tanks, international agriculture, and international engineering. Students in International Studies gain an understanding of global issues, learn to communicate across cultures, develop awareness of cultural ideas and attitudes, and are well positioned to become global leaders in their chosen field.

A secondary major and a minor in International Studies are available for undergraduates. The program requirements are structured around a combination of a designated Topical Module and a Geographic Region, both selected by the student. Each student's program of study is designed to reflect opportunities at Iowa State University as well as the academic, intellectual, and professional interests of the student.

Secondary Major

A student seeking a secondary major in International Studies must successfully complete two core courses plus courses in a selected Geographic Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and

participate in a required study, service, or work abroad program (see below).

Requirements for the Secondary Major in International Studies:

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Geographic Regions:
 - Africa and the Middle East
 - Asia
 - Latin America
 - Western Europe
 - Russia, East Europe and Central Asia
- 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Topical Modules:
 - Global Environmental Issues
 - Globalization and Economic Development
 - International Issues in Science and Technology
 - International Communication
 - International Conflict
 - Social and Cultural Change

Click here (<https://iastate.box.com/shared/static/2egqdgik8da0qiipayf.pdf>) **for courses approved for credit for the Geographic Regions and Topical Modules.**

- 3 additional credits of coursework selected from either the Geographic Region or Topical Module.

Language Proficiency

- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.

Study/Service/Work Abroad Experience

- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

The major must include a minimum of 12 credits not used to meet any other department, college, or university requirement.

Minor

A student seeking a minor in International Studies must successfully complete two core courses plus courses in a selected Geographical Region and Topical Module; demonstrate proficiency in a language

relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

Requirements for the Minor in International Studies:

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Geographic Regions:
 - Africa and the Middle East
 - Asia
 - Latin America
 - Western Europe
 - Russia, East Europe and Central Asia
- 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Topical Modules:
 - Global Environmental Issues
 - Globalization and Economic Development
 - International Issues in Science and Technology
 - International Communication
 - International Conflict
 - Social and Cultural Change
- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language.
- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable Iowa State.

Click here (<https://iastate.box.com/shared/static/2egqdgj6k8da0qiipayf.pdf>) **for courses approved for credit for the Geographic Regions and Topical Modules.**

The minor must include a minimum of 9 credits not used to meet any other department, college, or university requirement.

Language Proficiency

- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language or by passing an approved exam. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.

Study/Service/Work Abroad Experience

Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable to Iowa State.

Journalism and Mass Communication

The journalism and Mass Communication Major

The journalism and mass communication major prepares students for careers that involve all aspects of news and information. Emphasis is placed on generating ideas, organizing, writing, editing and presenting information for various media platforms and audiences. Students work with advisers to develop a program of study that prepares them for work in communication-specific areas including broadcast media, magazines and/or newspapers, photojournalism, science communication, visual communication and digital media. Coursework in this major focuses on writing, research, digital and emerging media, and professional abilities. Students are required to complete a capstone internship experience to practice and refine their skills.

To receive a bachelor of science degree in journalism and mass communication, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, JL MC or P R. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level or above.

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC and P R. These include:

JL MC 101	Mass Media and Society	3
JL MC 110	Orientation to Journalism and Communication	1
JL MC 240	Principles of Journalism	3
JL MC 201	Reporting and Writing for the Mass Media (C+ or better)	3

One of the following two courses:

JL MC 302	Intermediate Reporting and Writing for the Mass Media (C+ or better)	
JL MC 303	Reporting and Writing for Broadcast Media (C+ or better)	
JL MC 460	Law of Mass Communication	3
JL MC 462	Media Ethics, Freedom, Responsibility	3
JL MC 499A	Professional Media Internship: Required	3

Journalism and mass communication majors are also required to take:

STAT 101	Principles of Statistics (or another approved statistics course)	4
----------	--	---

Additional recommended courses and requirements for the journalism and mass communication major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or a minor in the school. All Greenlee School majors are required to take a second major or minor outside the school as an area of expertise. All Greenlee School majors are required to take 499A. Greenlee majors and minors cannot take ADVRT, JL MC or P R courses pass/not pass.

Minor in Journalism and Mass Communication

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in journalism and mass communication, students complete 15 credits. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

JL MC 101	Mass Media and Society	3
JL MC 240	Principles of Journalism	3
9 credits from the following:		9
JL MC 242	Visual Principles for Mass Communicators	
JL MC 307	Digital Video Production	
JL MC 347	Science Communication	
JL MC 390	Professional Skills Development	
JL MC 401	Mass Communication Theory	
JL MC 406	Media Management	
JL MC 461	History of American Journalism	
JL MC 464	Journalism and Literature	
JL MC 474	Communication Technology and Social Change	
JL MC 476	World Communication Systems	
JL MC 477	Diversity in the Media	
JL MC 497	Special Topics in Communication	

Total Credits 15

* For 300- and 400-level choices, please choose from the list of selected courses available from an academic adviser. You may schedule an appointment with an adviser by either calling 515-294-4342 or visiting with Greenlee School office staff at 101 Hamilton Hall.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses:(U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> (<http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses/>) and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current/>). Students must also demonstrate their communication proficiency by earning a grade of C or better in ENGL 250.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Graduate Study

The Greenlee School of Journalism and Communication offers work for a master of science degree in journalism and mass communication.

Majors plan a program of study in one of two tracks:

I. Academic track – The School offers advanced academic preparation in communication theory and research, leading to the master of science degree. Graduate work prepares students to use and contribute to research and scholarship in the field of communication. This track requires a thesis based on original research, which must be defended successfully before a committee at the end of the program.

Areas of research emphasis include: science and risk communication, media effects, advertising, public relations, political communication, communication technology, law and ethics, international communication, visual communication and emerging media.

II. Professional track – The School offers advanced professional study in journalism and mass communication leading to the master of science degree. Graduate work prepares students for professional careers in a variety of mass communication fields. Students with limited training or experience in journalism and mass communication may include skills courses in their programs, but the credits for those courses may not count toward the graduate degree. This track requires either a creative component which must be defended successfully before a committee at the end of the program.

All graduate students must complete 32 credits for graduation, comprised of four core classes, at least two electives outside the Greenlee School, and at least four thesis or creative component credits. The following core courses account for 10 credits of the needed 32 credits.

JL MC 501	Theories of Mass Communication	3
JL MC 502	Fundamentals of Communication Research Methods	3
JL MC 592	Introduction to Graduate Study in Journalism and Mass Communication	1
JL MC 598	Seminars in Mass Communication	1-3

Each student selects elective courses based on his/her area of emphasis and career goal, in consultation with the student's major professor and Program of Study Committee.

The Greenlee School graduate program offers minor work for students majoring in other departments. The M.S. minor requires:

JL MC 501, JL MC 510 and one other course in journalism and mass communication for a total of 9 credits taken within the Greenlee School.

Latin American Studies

Interdepartmental undergraduate program

The certificate in Latin American Studies is a cross-disciplinary course of study in the College of Liberal Arts and Sciences and is designed for

undergraduates in any major who wish to enhance their degree and employment possibilities by adding expertise in Latin America and competence in the Spanish language.

Objectives

- Provide opportunities for students to develop skills and understanding about issues concerning Latin America by bringing them into contact with faculty members from many different academic backgrounds
- Provide students with an international immersion experience where they gain cultural awareness and sensitivity
- Prepare students for work or advanced study in Latin America, such as in foreign service, journalism, advocacy organizations, scientific or research institutions
- Help students acquire proficiency in one of the principal languages of Latin America (Spanish)
- Guide students in interdisciplinary study leading to an understanding of the multi-faceted picture of the past, present, and future of Latin America

Learning Outcomes

Upon Completion of the Certificate in Latin American Studies, students will be able to:

- Demonstrate understanding of key concepts pertaining to Latin American cultural, historical and political events
- Understand, interpret and articulate the major processes, theories and problems of selected contemporary and historical issues in Latin America
- Demonstrate oral, aural, and written proficiency in Spanish equivalent to the mid-advanced level
- Effectively communicate with persons of Latin American cultures
- Become effective global citizens through knowledge and comparison of the cultures and issues of the United States and Latin American countries
- Be able to read Latin American cultural, literary, and historical texts in the target language with comprehension and analytical insight
- Demonstrate awareness of cultural values, beliefs, and ideologies of the various Latin American countries
- Demonstrate a thorough knowledge of the geography of the Latin American countries

General Requirements

Requirements for the Certificate in Latin American Studies are satisfied through formal language instruction and by completing a minimum of 21 credits at the 300 level or above. Students will take coursework in at least three different disciplines and departments (Spanish, Anthropology,

and Political Science) with other possible course offerings in LAS, History, Agriculture, and Agronomy.

Course Requirements

Students will complete 6 credits of core courses:

SPAN 322 (Latin American Civilization) or SPAN 324 (Latin America Today) 3

ANTHR 323 (Topics in Latin American Anthropology) 3

Students should consult with their adviser for alternative courses in the event a course is not available.

Other Requirements

Students will complete an additional 15 credits selected from the approved list of courses in Latin American Studies or courses approved by the Latin American Studies Certificate adviser at the 300 level or above.

- No more than 3 credits may be taken as a 490, independent study, and the topic must deal with Latin America.
- A minimum of 9 credits applied toward the Certificate cannot be used to meet any other departmental, college, or university requirement.
- Students may receive credit on a pre-approved basis for internships completed in Latin America. No more than 3 credits from this area may be applied to the Certificate.
- Courses taken for the Certificate may not be taken on a pass not-pass basis.
- Credits for a Certificate may be used to satisfy the credit requirement for graduation and to meet the credit requirements for courses numbered 300 and above.
- A certificate is not awarded if the baccalaureate degree is not finished.
- For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.
- After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.
- A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.

Language Requirement

- The minimum requirement in formal language instruction is completion of two years or the equivalent of Spanish at the university level. At ISU the completion of Spanish 202 satisfies this requirement.
- Native speakers, or those with in-field experience of another Latin American language with a level equivalent to 202 or higher can have the language requirement waived. Equivalence will normally be assessed by a faculty member/CLEP exam in the Dept. of World Languages and Cultures.

- While students are encouraged to enroll in language instruction courses (i.e., conversation and composition) above the 300 level, no more than 6 credits of language study (301,303, 304) may be applied toward fulfilling language requirements for the Certificate. Students should be aware that all 300-level literature and culture/civilization courses in the Dept. of World Languages and Cultures have prerequisites.

Study Abroad

Students are required to participate in an ISU-approved study abroad program in a Latin American country with a minimum duration of 4 consecutive weeks. The Study Abroad Office has a list of ISU-approved programs. Students may elect to participate in other study abroad programs with the approval of the Latin American Studies Advisory Committee.

Approved courses available toward the Certificate:

The decision as to whether or not a course can be counted toward the certificate is based primarily on course title and description as it appears in the current ISU course catalog. Courses which primarily deal with Spain or Portugal and their cultures do not count toward the certificate. Students should consult with the adviser for the Latin American Studies Undergraduate Certificate program before registering to be sure a particular travel course or field school offering can apply toward the certificate.

Leadership Studies

The Leadership Studies Program provides a strong foundation of coursework and experiences for undergraduate students who seek to study, understand and apply the principles of leadership in their current activities and, eventually, in their careers. Complementing their major field of study, students earning either the certificate or minor in leadership studies will be well-prepared to enter the public, nonprofit or private sectors. The certificate and minor are awarded by the College of Liberal Arts and Sciences. Completion of the certificate or minor will be noted on the student's transcript.

Objectives

- Develop students' leadership capacity—which encompasses individual-level capabilities of self-awareness, integrity and commitment; group-level capabilities of collaboration, shared purpose and handling controversy with civility; and community-level capabilities of citizenship and civic responsibility.
- Provide opportunities for students to study leadership by learning effective communication practices, organizational theories, ethical principles, an appreciation of diversity, intrapersonal development and the value of community service.
- Cultivate students' understanding of social empowerment and social justice to create positive and sustainable change.
- Challenge students to critically examine leadership at the intrapersonal, interpersonal, team, organizational and societal levels.
- Bring students into contact with community leaders and faculty members from diverse academic departments, backgrounds and leadership experiences.
- Prepare students to undertake leadership roles in their careers and in service to their community through coursework and co-curricular engagement.

Learning Outcomes

Upon completion of the certificate or minor in leadership studies, students will be able to:

- Recognize leadership as a set of skills, knowledge and attitudes that can be learned.
- Understand traditional and emergent leadership theories and apply them in practice.
- Comprehend key concepts of communication theories, organizational theories, contemporary diversity issues and ethical principles.
- Practice and evaluate their own capacity to lead effectively within teams, organizations and diverse communities.

- Develop and implement plans for continually improving their leadership capacity.
- Demonstrate proficiencies in written and oral communication.

Leadership Studies Certificate

The certificate in leadership studies requires the completion of 21 credit hours through three, 3-credit-hour required courses in leadership, speech communication and organizational theory. An additional 12 credit hours are earned from approved electives including 3 hours in communication; 6 hours in leadership; and 3 hours of a capstone experience through a course, internship or study abroad. The capstone course should focus on the scholarship of leadership in the student's field of study, whereas an internship or a study abroad should provide a leadership-in-practice experience.

At least 9 credits must be taken in courses numbered at the 300-level or above. At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the certificate cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

Core Courses: 9 credits of required core courses

LD ST 322	Leadership Styles and Strategies in a Diverse Society	3
SP CM 312	Business and Professional Speaking	3
MGMT 371	Organizational Behavior	3
or POL S 371	Public Organizations and Leadership	

Communication Electives: Choose 3 credits from the following

COMST 214	Professional Communication	3
COMST 310	Intercultural Communication	3
COMST 314	Organizational Communication	3
COMST 404	Research Seminar	3
ENGL 302	Business Communication	3
P R 305	Publicity Methods	3
SP CM 212	Fundamentals of Public Speaking	3
SP CM 322	Argumentation, Debate, and Critical Thinking	3
SP CM/WGS 323	Gender and Communication	3
SP CM 327	Persuasion and Social Influence	3
SP CM 497	Capstone Seminar	3

Leadership Electives: Choose 6 credits from the following

AESHM 211	Leadership Experiences and Development (LEAD)	3
AESHM 222	Creativity on Demand	3
AESHM 287	Principles of Management in Human Sciences	3
AESHM 421	Developing Global Leadership: Maximizing Human Potential	3
AESHM 474	Entrepreneurship in Human Sciences	3
AGEDS 315	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
C E 306	Project Management for Civil Engineers	3
COMST 218	Conflict Management	3
COMST 313	Leadership Communication Theories	3
COMST 317	Small Group Communication	3
C R P 429	Planning in Developing Countries	3
C R P 432	Community Planning Studio	4-6
C R P 435	Planning in Small Towns	3
C R P 492	Planning Law, Administration and Implementation	3
CON E 380	Engineering Law	3
ENGR 150	Foundations of Leadership Development and Learning	1
ENGR 250	Leadership in Engineering Teams	1
ENGR 350	Dean's Leadership Seminar	1
HD FS 395	Children, Families, and Public Policy	3
LAS 151	Dean's Leadership Seminar I	1
LD ST 122	Leading with Purpose	1
LD ST 270	Campus Leadership Development	3
LD ST 290	Independent Study	1-3
LD ST 291	Leading Through Service Learning	4
LD ST 291A	Leading Through Service Learning: General	4
LD ST 291B	Leading Through Service Learning: U.S. Diversity	4
LD ST 291C	Leading Through Service Learning: International Perspectives	4
LD ST 293	Special Projects	1-3
LD ST/WGS 333	Women and Leadership	3
LD ST 370	Special Topics	1-3
LD ST 422	Leadership Capstone Seminar: Theory to Practice	3
LD ST/WGS 488	Research on Women and Leadership	3
LD ST 490	Independent Study	1-3
M E 412	Ethical Responsibilities of a Practicing Engineer	3
MGMT 370	Management of Organizations	3
MGMT 371	Organizational Behavior	3
MGMT 472	Management of Diversity	3
N S 412	Leadership and Ethics	3
PHIL 235	Ethical Issues in a Diverse Society	3

POL S 310	State and Local Government	3
POL S 371	Public Organizations and Leadership	3
POL S/WGS 385	Women in Politics	3
POL S 475	Management in the Public Sector	3
POL S 487	Electronic Democracy	3
SOC 310	Community	3
SOC/POL S 334	Politics and Society	3
SOC 464	Strategies for Community Engagement	3
SP CM 110	Listening	3
SP CM 416	History of American Public Address	3
SP CM/POL S 417	Campaign Rhetoric	3
U ST 315	Cyclone Aide Leaders Seminar	2
WGS 301	International Perspectives on Women and Gender	3
WGS 435	Gender, Globalization and Development	3

Capstone Courses: Choose 3 credits of the following

LD ST 422	Leadership Capstone Seminar: Theory to Practice	3
LD ST 490	Independent Study (Must include a leadership focus and be pre-approved by the leadership studies faculty.)	1-3

Study abroad: Must include a leadership focus and be pre-approved by the leadership studies faculty.

Other capstones may be approved with leadership studies faculty permission if they include a significant leadership component (e.g., COMST 404 or AESHM 421 with a leadership-based project). Students wishing to take a capstone course not listed here must receive approval prior to registering for the course and must demonstrate in writing how the course includes a significant leadership component.

Leadership Studies Minor

The minor in leadership studies requires the completion of 15 credit hours through three, 3-credit-hour required courses in leadership, speech communication and organizational theory, and an additional 6 credit hours earned from approved leadership electives.

At least 9 credits must be taken in courses numbered at the 300-level or above. At least 9 credits used for the minor cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the minor cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the minor.

Core Courses: 9 required credits

LD ST 322	Leadership Styles and Strategies in a Diverse Society	3
SP CM 312	Business and Professional Speaking	3
MGMT 371	Organizational Behavior	3
or POL S 371	Public Organizations and Leadership	

Leadership Electives: Choose 6 credits from the following

AESHM 211	Leadership Experiences and Development (LEAD)	3
AESHM 421	Developing Global Leadership: Maximizing Human Potential	3
AGEDS 315	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
COMST 218	Conflict Management	3
COMST 313	Leadership Communication Theories	3
ENGR 150	Foundations of Leadership Development and Learning	1
ENGR 250	Leadership in Engineering Teams	1
ENGR 350	Dean's Leadership Seminar	1

SOC 464	Strategies for Community Engagement	3

Liberal Studies

The Bachelor of Liberal Studies degree (B.L.S.) was established by the three Iowa Regent universities primarily to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The degree may be earned from Iowa State University, the University of Iowa, or the University of Northern Iowa.

The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Work done in community colleges or other accredited colleges and universities can be applied toward the degree, as can applicable courses taken at any of the three Iowa Regent universities, whether on or off campus.

The B.L.S. program has no residence requirements. To complete the degree, students may earn credits through distance-learning formats as well as regular on-campus courses. Students may also earn credits by proficiency or test-out examinations.

Admission

Admission to the B.L.S. program is open to persons who meet either of the following levels of previous educational attainment:

- Hold the associate in arts (A.A.) or associate in science (A.S.) degree from an accredited two-year college. (Holders of the associate in applied science or associate in applied arts degree are not automatically eligible, although some courses may be found applicable upon review.)
- Have at least 24 semester credits of collegiate work acceptable toward graduation at ISU with a total cumulative grade point average of at least 2.00 (a C average).

Requirements for the B.L.S. Degree

The B.L.S. candidate must earn a total of 120 credits in accordance with requirements listed below. Courses taken at Iowa State University on a pass/not pass basis may be counted toward graduation only as electives.

No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

Required Coursework

Basic English Composition	6
World language/Cultures*	6-8
Arts and humanities**	12
Mathematics, statistics, or computer science**	3
Natural sciences**	8
Social sciences**	9
Distribution Requirements***	36
Electives	38-40

Total Credits, 120 Minimum

*The requirement may be met by completion of three or more years of high school study in one world language, by meeting the LAS World Language requirement, or by taking six credits of International Perspectives courses.

**A list of courses acceptable in the general education groups can be obtained from the college website (<http://www.las.iastate.edu/students/academics/general-education/>).

***A minimum of 12 credits is required in each of three of the five distribution areas listed below.

Distribution Areas

Humanities (for example, literature, philosophy, history, religion, art and music appreciation)
